Did you know?

Choosing native plants for your yard can help local pollinators such as native bees, butterflies, moths, bats and more!

Pollinators need native plants and native plants need pollinators. This pollinator-plant relationship has evolved over time. Flowers evolved to be more inviting to certain pollinators and pollinators evolved to better feed on the flowers they visit. Some of these pollinator-plant relationships are so exclusive that they often need specific species to feed on or to be pollinated by. Non-native plants may not meet their pollination needs for survival.

Resources:

https://www.xerces.org (Xerces Society for Invertebrate Conservation)

These resources contain additional information about native plants that you could plant in your garden to attract and support pollinators in our area.

SUPPORT OUR SENIORS –
AND GET A TAX BREAK IN 2026!

This year, your kindness can go even further. By donating to our senior center, you're helping provide warm meals, engaging activities, and a welcoming community for older adults who deserve care and connection.

And now, your generosity comes with a bonus — up to $1,000 in tax deductions (or $2,000 for couples filing jointly) for cash donations to qualified charities, even if you don't itemize.

Let's make 2026 a year where we lift up our seniors and give back in more ways than one. Together, we can keep our senior center thriving.
