                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   ## Time Impact Analysis 03 Rev 1

## WM Lyles Co.

#### INTRODUCTION

The following narrative outlines the Time Impact Analysis procedure and findings relating to Unforeseen Event 03 – MBR CHEMICAL AREA AND MISC CHANGES – CLARIFICATIONS #12 / #13.

#### IDENTIFICATION OF SCHEDULE:

| Schedule Update Base File: | COB_UP08    |
|----------------------------|-------------|
| Schedule Analysis File:    | COB_TIA03R1 |

#### TIME IMPACT ANALYSIS METHODOLOGY

The methodology used in this analysis follows a retroactive, "forward-looking" Time Impact Analysis (TIA) procedure. It compares the last approved schedule prior to the first impact event being analyzed to a copy of the same schedule with the addition of modeled schedule impact(s).

The modeled schedule impact events used in the analysis, herein are referred to as "Unforeseen Events" (UFEs), represent events that may impact the schedule and could not have been reasonably foreseen at the time of submitting the original bid for construction These events are beyond the control, and without fault or negligence of the General Contractor.

#### Analysis procedure for TIA03R1:

- 1. The last submitted schedule (As-Planned Schedule) prior to the start of the first UFE is the August 2019 schedule progress update (UP08).
- 2. The As-Planned schedule was copied to create the Impacted Schedule of Comparison (TIAO3R1)
- 3. UFE(s) being analyzed were logically inserted into the Impacted Schedule of Comparison.
- 4. The affected Project Milestone(s) in the As-Planned schedule were compared to the affected Project Milestone(s) in the Impacted Schedule of Comparison to quantify any impacts resulting from UFE(s).

#### **UNFORESEEN EVENTS**

An Unforeseen Event (UFE) is defined herein as an impact and/or change to the project schedule could not have been reasonably foreseen at the time of submitting a bid for construction and which is beyond the control and without fault or negligence of the General Contractor. As described in clarifications #12 / #13, the following changes have been made to the project:

#### UFE03\_MBR CHEMICAL AREA AND MISC CHANGES - CLARIFICATIONS #12 / #13

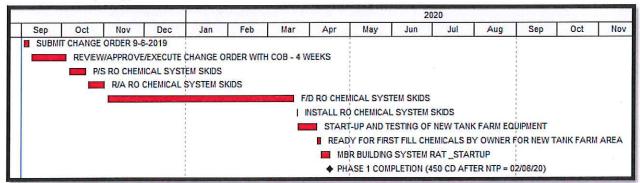

This change order addresses the changes in the MBR chemical feed area. These cover the removal of the Aqueous Ammonia room and associated equipment, modifications in the layout of chemical skids and piping, and addition of sulfuric acid chemical skid and ammonia sulfate chemical skid. In addition, miscellaneous changes associated with the addition of a lab-hood and modifications of

the restroom layouts are included. In addition, additional piping associated with the location of the RO skids issued in Clarification #11.

This change order also includes changes in the MBR chemical feed area and the addition of chemical storage tank farm (Chemical Storage Area #1). Included are the removal of buried chemical distribution piping inside of the MBR building and addition of a chemical storage tank farm with three single wall chemical tanks for Sodium Hypochlorite, Liquid Ammonium Sulfate and Sulfuric Acid. The change order also includes grading and yard piping changes associated with the chemical distribution piping from the chemical storage area to the MBR building. Electrical and instrumentation for all above referenced work is also included.

The RO Chemical Skids are driving the critical path of the delay. The current forecast for the fabrication and delivery of the RO Chemical Skids is 20 weeks. Activities representing the steps necessary to implement this change order have been logically added to the schedule. These activities replaced the existing activities in the schedule representing the scope of work being modified / replaced by this change order.

Salt Mitigation Upgrade Project Time Impact Analysis 03R1

The Phase 1 Completion and Phase 2 Completion Milestones were impacted by UFE03 as follows:

| MS01: | 29 Calendar Days |
|-------|------------------|
| MS02: | 30 Calendar Days |

#### CONCLUSION

WML is requesting that the Phase 1 Completion Milestone be extended by 29 Calendar days and the Phase 2 Completion Milestone be extended by 30 calendar days to compensate for schedule impacts resulting from UFE03.

Technical Systems, Inc. (TSI) is pleased to provide a quote for the above referenced project. Material for this project will be shipped FOB Lynnwood WA, complete, ready for field termination by others. TSI's price includes CA sales tax and does not include the cost to bond TSI's portion of the project.

TSI's price for the scope of work detailed on the following pages:

#### **Change Order Proposal Pricing:**

#### **Change Instrumentation as Follows:**

- Credit Deleted Ammonia Gas Monitor and Calibration Gas
   AE/AIT-5230
  - AE/AIT-5250
  - Add (2) Hach pHD pH Sensors • AE-4004, AE-30095
- Add (2) Hach SC200 Controllers
  - AIT-4004, AE-30095
- Add Mounting for Hach pH Probes
- Credit (1) Ultrasonic Level Transmitter
  - LE/LIT-5002
  - Add (1) Level Display, Trident PD765 X2
    - LI-5002
- Add (1) Magnetic Flow Meter, 1", for NaOCL Service
  - FE/FIT-5072

Terms: Net 30 FOB: Lynnwood WA Freight: Prepaid

This quote is valid for 90 days.

Please call with any questions you may have concerning pricing or any technical questions.

Sincerely,

Colin Dightman-Kovak

Colin Dightman-Kovak Technical Systems, Inc. 1-425-678-4116

#### <u>Scope of Work</u>

#### Misc Equipment:

Including:

- 1. Hardware Procurement
- 2. Required Testing
- 3. O&M, drawings updates

#### **GENERAL**

- 1. TSI supplies a bill of materials, CAD-based drawings, and Operations and Maintenance Manuals for all equipment furnished by TSI.
- 2. TSI supplies the required field startup services for this project.
- 3. Panels fabricated by TSI are UL 508 labeled.

#### STANDARD INCLUSIONS

We provide the following unless specifically excluded on our bill of material:

- 1) Equipment shipped FOB factory with freight allowed, tailgate, destination.
- 2) Field wiring diagrams showing interconnection of field instruments and instrumentation panels.
- 3) Instruction manuals as required.
- 4) All necessary field start-up and calibration of the equipment we supply.

#### STANDARD EXCLUSIONS

We do <u>NOT</u> include the following unless specifically included in our bill of material:

- 1) Pipe, tubing, valves or fittings between the instrument and the process.
- 2) Conduit, wire or cable not an integral part of the instrument.
- 3) Mounting brackets, stanchions, supports or mounting pads not an integral part of the instrument.
- 4) Labor to install the equipment.
- 5) The Cost, (if due to local union regulations), to have local craftsman make adjustments or wiring modifications to our equipment during start-up and calibration.
- 6) Any material or services not in our quoted sections.
- This proposal is based on award of a supply purchase order and does not include any of the costs associated with bonding or subcontract administration. If bonding or a subcontract is required they can be provided for additional cost.

### SPECIFIC EXCLUSIONS

1) No Specific Exclusions.

Re: Beaumont WWTP – Packaged Aq. Ammonia Feed System Specification Section 46 31 16 IMS Project Number: 40112

Dear Mr. Bonser,

It is unfortunate that the Owner has decided to delete the Aqueous Ammonia Feed system from the procured list of equipment. We understand that this is out of your control.

However, we have already invested our engineering resources in preparing the equipment design submittal, we kindly request reimbursement for such service accordingly. Please see below for the breakdown.

| Packaged Aq. Ammonia Feed System | -\$46,500.00 |
|----------------------------------|--------------|
| Startup Service                  | -\$750.00    |
| Freight from factory to jobsite  | -\$750.00    |
| Total Contract Price             | -\$48,000.00 |
|                                  |              |
|                                  |              |

Engineering Service in preparing equipment design submittal (\$85 / hr. x 60 hr.) \$5,100.00

Upon our receipt of the signed copy of this change order by email, we will sign and return a copy to you for your final execution.

Please do not hesitate to call me if you have any questions.

Sincerely,

Integrity Municipal Systems, LLC

### QUOTATION

Prepared For: Armando Cayama

Company: WM Lyles Co

Beaumont, CA 92223 Phone: (951) 973-7393 Email: acayama@wmlylesco.com

> THANK YOU FOR THE OPPORTUNITY TO EARN YOUR BUSINESS. Submit Purchase Orders to: VWRFurniture\_Orders@vwr.com or Fax to (972) 753-1389.

### Notes:

Lead time is approximately (8) to (10) weeks after receipt of approved purchase order and Tech Sheet by VWR, plus transit time. Transit time is typically (5) to (7) business days. Production levels vary and depending upon when an approved purchase order is received by VWR, lead time may fluctuate. Freight is included in this proposal and is quoted F.O.B. Shipping Point, Freight Charged as Quoted. VWR will not be responsible for any fees associated with any Bonds, Permits, or Taxes unless otherwise stated within this quotation/scope letter. Once an order is placed for any custom products, the client will be held responsible for any accrued charges from our manufacturers should the order be cancelled for any reason. **NO TAXES** are included in this bid. Certification and balancing of hoods is not included in this proposal and shall be the responsibility of others. Fume hoods quoted do not include ductwork, exhaust fans, roof penetrations, flashing and sealing, roof curbs, guy wires and weather caps or any mechanical, plumbing or electrical connections. Fume hoods and base cabinet colors TO BE DETERMINED. Installation/assembly is not included but is available if required at an additional cost.

Lab Hood exhaust fan to be supplied by HVAC provider.

In the absence of a definitive products supply agreement between the parties, VWR International's Terms and Conditions of Sale apply. A copy is available on our website

(https://us.vwr.com/store/content/externalContentPage.jsp?path=/en\_US/about\_vwr\_terms\_conditions\_product\_sales.jsp), or by request. Customer represents that it has read and agrees to VWR International's Terms and Conditions of Sale.

Customer is responsible for unloading and providing standard receiving facilities for large and/or heavy shipments. Special unloading or delivery cam be arranged, provided VWR International is notified at the time of order placement. For such arrangements, please contact VWR International for a quotation. Installation or other services are not included in this quotation, unless otherwise noted on the quotation.

Identified stock status is based on product availability at time of the quote and may change at time of order. Delivery dates are based on standard lead times from suppliers. Items prefixed with "MISC" are subject to regulatory approval once VWR International receives acceptance from the customer. They are special order, and as such may not be returnable. **Customer signed approvals are required when drawings are supplied for these items allong with Purchase Order before order can be scheduled.** Please see the "Notes" section on first page for lead times on special order items.

Any changes to the above agreement must be done so in writing and approved by both VWR International, LLC and customer.

Dear Juan,

Thank you for the opportunity to provide the following quote. We quoted the tanks and all of the accessories per the specification noted. We also included pricing for the radar level control units.

### BEAUMONT WWTP SALT MITIGATION UPGRADE- TANKS

### 2.0 Terms and Conditions

| Shipment                   | 4-5 weeks                                                 |
|----------------------------|-----------------------------------------------------------|
| Manufacturer's Warranty    | 3 years and 5 years per specification                     |
| FOB Point                  | Poly Processing Factories                                 |
| Prices Effective           | 30 days                                                   |
| Freight                    | Quoted as an option                                       |
| Sales Tax                  | Not included unless otherwise indicated                   |
| Sales Tax                  | Will be charged unless a resale card is on file (CA & AZ) |
| Freight Billing            | To be by purchaser specified at time of order placement   |
| Terms                      | 25% with order, balance net 20 days after shipment - OAC  |
| Cancellation Charges       | 100% after fabrication commences                          |
| Damaged Freight            | Must be noted on the freight bill to establish liability  |
| Off-Loading / Installation | By others                                                 |
| Anchor Bolts               | Not included unless otherwise indicated                   |
| Flange Gaskets / Bolt Kits | Not included unless otherwise indicated                   |
| Flexible Connections       | Required for most connections to preserve tank warranty   |
| Missing Parts              | Claims must be made within 30 days of delivery            |

WM Lyles Attn: Juan Ahumada Re: Pulsatron pumps

Juan,

Here is the pricing

Pulsafeeder said the EH25 was too big for the flow and pressure and are recommending the EH05

# PULSAFEEDE A Unit of IDEX Corporation

Eclipse Hypopump is specifically designed to pump (meter and transfer) sodium hypochlorite (NaOCI). Based on the patented technology of the Eclipse, significant enhancements were made to increase the reliability and sealing capability of troublesome hypo, while offering easy, fast maintenance (only a few minutes every year or two<sup>1</sup>). This new pump offers the highest quality, longest life and provides the lowest total cost of ownership. This pump's ability to handle entrained gases, sealless design, ease of maintenance, and long service life, make it a superior pump for use in sodium hypochlorite applications.

### **Key Features**

- Eclipse technology, wetted components are completely non-metallic (not coated like others)
- Pump housings, gears and gear liner are made of engineered composites. Magnetically driven eliminating mechanical seals
- Powder coated external reinforcements ensure zero leakage, no crystallization, or emissions
- Front pull-out design makes for fast and easy maintenance, no piping or electric to disconnect
- Pre-defined KOPkits<sup>®</sup> allow for easy ordering and kitting of all necessary parts to bring the pump back to optimum factory performance
- Engineered **PVDF** composite fluoropolymer provides superior chemical resistance; titanium hardware option for the most severe applications
- Pump is bidirectional, can be run in either direction
- Modular design allows for the pump to be mounted in 45° increments (to a full 360°); vertical, horizontal, or any configuration imaginable.

1. Actual service life will depend on system conditions. Servicing and inspection can be as little as two minutes and last multiple years.

### **MPC Vector**

The MPC Vector is a microprocessor based motor speed controller. When coupled with an Eclipse in closed loop operation (w/flowmeter & inverter duty motor), the user can achieve over 100:1 turndown. This controller has been designed for simplicity and accessibility. It has many standard features: multiple analog & digital inputs & outputs, alarms, level control, and communications. See its techsheet for all its capabilities.

### pulsafeeder.com

### **Operating Benefits**

- Long life and reduced down time means less maintenance costs and more production time
- Highly reliable and accurate metering to maintain consistent flow and ensure dosing compliance
- Ability to pump gases and not become air bound
- High suction lift capability allows for a variety of application conditions and variables
- Sealless design means zero leakage and less maintenance - No dynamic seals
- Fewer number of parts makes it fast and easy to service, as little as 2 minutes
- Maintenance in place; piping and electrical remain intact during servicing, requiring less labor and improving safety
- Robust and chemical resistant

### Aftermarket & Accessory Offerings

- KOPkit<sup>®</sup>, KOPkit Lite, or Kopkit Pro
- Pressure Relief Valves
- **Back Pressure Valves**
- **Calibration Columns** 120
- **Y-Strainers**
- Gauges

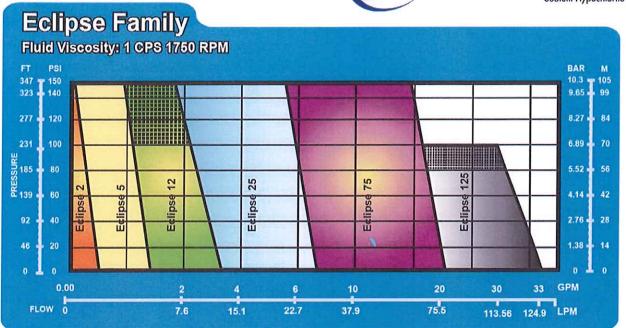

# **Ethos Sodium Hypochlorite Pump**

### **Specifications and Model Selection**

### **Engineering Data**

Housings and containment can: PVDF

Magnet : Neodymium Encapsulated Virgin ETFE

Gears and Liners: Carbon Reinforced PTFE

Shafts: Alumina Ceramic

Bearings: Graphite-Impregnated Silicon-Carbide

O-rings : FKM

Port Size and Type: thread and flanged, varies by model (1/4" or ISO 7-1 to 1.5" ANSI 150# or DIN 32/40)

- Gear Type: External Spur Gear
- Direction of Rotation: Bi-directional
- Maximum Differential Pressure: 150 psig (10 bar)

Maximum Allowable Working Pressure: 200 psig (14 bar)

Maximum Speed: 1750 rpm

- Maximum Fluid Temperature: 150°F (66°C)
- Maximum Suction Lift: 29 inHg
- NPSHr: 2ft (0.6m) at 1750 RPM

Motor Frame Sizes- NEMA: 56C to 213/215TC

IEC: 63 to 100/112 B14 Face

### **Custom Engineered Designs and Options**

- Chemical Feed Systems
- Special Chem-duty, wash down duty, inverterduty, 1000:1 turndown motor with SS shafts, moisture resistant windings, and epoxy coated
- O-Rings-Perfluoroelastomer (FFKM)
- MPC Vector for speed control
- Gear Reducers
- Titanium hardware
- Alternate Motors

American Grating, LLC is a leading designer, manufacturer and fabricator of FRP gratings and structural systems. We are pleased to offer our quotation of FRP materials for the referenced project.

All material take-offs are derived from construction drawings supplied by customer.

#### MATERIALS of CONSTRUCTION:

Proposed **FRP Molded Gratings** are **GridWalk Type IFR Molded Gratings** as manufactured by American Grating, LLC. Type IFR is manufactured with premium isophthalic polyester resin systems and exhibit a class I flame spread rating of 25 or less when tested in accordance with ASTM E-84. Top surface of the gratings are gritted for optimal slip resistance. Color is light gray. Molded gratings included in this quotation are of the following styles: 1-1/2" deep, 1-1/2" square mesh.

Proposed **FRP Handrails** are **AmeriRail Type IFR Handrail Systems** as manufactured by American Grating, LLC. Handrails are our standard 2 rail system with kick-plate supplied at all horizontal handrail sections. Handrail posts mid rail and top rail are fabricated utilizing 2" x 3/16" square tube. AmeriRail handrails are designed and fabricated in full compliance with OSHA 1910.23. Color is safety yellow.

Proposed **FRP Structural Shapes** are **Type IFR Pultruded Structural Shapes** as manufactured by American Grating, LLC. Type IFR is manufactured with a premium isophthalic polyester resin system and exhibits a class I flame spread rating of 25 or less when tested in accordance with ASTM E-84. Color is dark gray.

Proposed **FRP Ladders** are **AmeriRail Type IFR Ladder Systems** as manufactured by American Grating, LLC. The standard AmeriRail ladder has 18"clear inside width and rungs spaced 12" on center. The ladder rails are fabricated utilizing 2"x3/16" square tube. The ladder rungs are 1-1/4" diameter splined tube. Ladders are supplied with all required walk-throughs, returns, safety cage and mounting brackets. Color is safety yellow.

Grating hold down clips and structural fasteners are 316 SS.

#### SCOPE OF WORK

#### C1S-1 - CHEMICAL STORAGE #1 STRUCTURAL PLAN AND SECTION

1 each - 2' W x 2'-6" L x 3.5' H FRP platform with 2 each - FRP access ladder, complete with FRP grating, framing and handrail.

|                 | PRICING:   |                                            |
|-----------------|------------|--------------------------------------------|
| Lot Price       | \$1,408.00 | (tax not included)<br>F.O.B. Henderson, NV |
| Freight         | \$225.00   | *Est. 1 LTL shipment to 92220              |
| Total Bid Price | \$1,633.00 |                                            |
|                 | DELIVERY   |                                            |

Please allow American Grating 1-2 weeks to generate approval drawings ARO. Fabricated materials will ship approximately 6-8 weeks after return of approved drawings and based on work load at time of release.

#### NOTES & EXCEPTIONS:

1. American Grating's standard fabrication and manufacturing tolerances are based upon the recommendations of the Fiberglass Grating Manufacturers Council and shall be:

Structural shapes & plate = +/- 1/8"; Cut grating = + 1/8" / - 5/16".

WML submitted TIA 2 showing inclement weather impact as 53 calendar days to MS01 and 52 calendar days to MS02. A summary is shown in the following table:

| Milestone | Period | Calendar Day Impact | Cumulative Impact |
|-----------|--------|---------------------|-------------------|
| MS01      | 1      | -10                 | -10               |
|           | 2      | -26                 | -36               |
|           | 3      | -14                 | -50               |
|           | 4      | -3                  | -53               |
|           |        |                     |                   |
| MS01      | 1      | -14                 | -14               |
|           | 2      | -22                 | -36               |
|           | 3      | -16                 | -52               |
|           | 4      | 0                   | -52               |

MWH has reviewed the TIA 2 and agrees with the methodology. However, it is necessary to include working days during some of the City holidays that WML performed work on critical path activities.

| Milestone | Period | Calendar Day Impact | Cumulative Impact |
|-----------|--------|---------------------|-------------------|
| MS01      | 1      | -8                  | -8                |
|           | 2      | -26                 | -34               |
|           | 3      | -14                 | -48               |
|           | 4      | -3                  | <mark>-51</mark>  |
|           |        |                     |                   |
| MS01      | 1      | -9                  | -9                |
|           | 2      | -22                 | -31               |
|           | 3      | -16                 | -47               |
|           | 4      | 0                   | <mark>-47</mark>  |

The adjusted summary table becomes as follows:

#### Accordingly, the approved TIA 2 resulting impact of 51 calendar days to MS01 and 47 calendar days to MS02.

This TIA review analysis is performed during four periods. In each period, we compare the milestone dates based on the approved schedule at the beginning of the period with the milestone dates of same schedule with its calendar adjusted to reflect non-working days during the inclement weather days and working days if City allowed for work during City holidays.

1. <u>Period 1</u>: NTP Thru January 2019: WML worked on December 26, 2018 and on January 21, 2019 which were City holidays. Accordingly and for the purpuse of this TIA, these 2 days are considered working days.

#### Baseline schedule:

| COB WWTP Sa | It Mitigation Upgrade Project_Baseline | Global - Schedule Layout by | WBS |           |            |                |

| COBW        | NTP Salt Mitigation Upgrade Pro        | oject_Baseline Schedule     | 370 | 21-Jan-20 | 25-Jan-21  | 0              |
| MILEST      | ONES                                   |                             | 370 | 21-Jan-20 | 25-Jan-21  | 0              |
| MS01        | PHASE 1 COMPLETION (450 CD AFTER NTP   | = 01/21/20)                 | 0   |           | 21-Jan-20* | 0              |
| MS02        | PHASE 2 COMPLETION (820 CD AFTER NTP   | = 01/25/21)                 | 0   |           | 25-Jan-21* | 0              |

 Baseline schedule with an adjusted calendar to reflect non-working days during Period 1 inclement weather days and working days during City's holdiays (COB\_ES1.xer)\*:

|             |                                                   | -   |           |            |       |
|-------------|---------------------------------------------------|-----|-----------|------------|-------|
| Activity ID | Activity Name                                     | OD  | Start     | Finish     | Tota  |
|             |                                                   |     |           |            | Float |
| COB W       | NTP Salt Mitigation Upgrade Project_Rain Period 1 | 371 | 29-Jan-20 | 03-Feb-21  | -9    |
| MILEST      | ONES                                              | 371 | 29-Jan-20 | 03-Feb-21  | -9    |
| MS01        | PHASE 1 COMPLETION (450 CD AFTER NTP = 01/21/20)  | 0   |           | 29-Jan-20* | -8    |
| MS02        | PHASE 2 COMPLETION (820 CD AFTER NTP = 01/25/21)  | 0   |           | 03-Feb-21* | -9    |

Hence, the resulting impact of rain days and mitigation working days during Period 1 is: 8 days for MS1 and 9 days for MS2.

2. <u>Peiod 2</u>: Inclement weather days encountered in February 2019.

Although WML worked on February 18 (a City Holiday), the work was only for non-essential work and cleanup. Accordingly and for the purpuse of this TIA, this day remains a non-working day.

January schedule update (COB\_UP01.xer):

| COB WWTP S  | Salt Mitigation Upgrade Project_JAN 2019 | Global - Schedule Layout | by WBS |           |            |               |
|-------------|------------------------------------------|--------------------------|--------|-----------|------------|---------------|
| Activity ID | Activity Name                            |                          | OD     | Start     | Finis h    | Tota<br>Float |

| COB WWTP Salt Mitigation Upgrade Project_Rain Period 4 | 372 | 09-Mar-20 | 16-Mar-21  | -31           |
| MILESTONES                                             | 372 | 09-Mar-20 | 16-Mar-21  | -31           |
| MS01 PHASE 1 COMPLETION (450 CD AFTER NTP = 02/08/20)  | 0   |           | 09-Mar-20* | -33           |
| MS02 PHASE 2 COMPLETION (820 CD AFTER NTP = 02/13/21)  | 0   |           | 16-Mar-21* | -31           |

Hence, the resulting impact of rain days during Period 4 is: 3 days for MS1 and 0 day for MS2.

\*Relevant P6 files are includede with this review comments.

Corrections or comments made relative to submittals during this review do not relieve the contractor from compliance with the requirements of the drawings and specifications. This check is only for review of general conformance with the design concept of the project and general compliance with the information given in the contract documents. The contractor is responsible for confirming and correlating all qualities and dimensions; selecting fabrication processes and techniques of construction; coordinating work with other trades; and performing work in a safe and satisfactory manner. Very truly yours,

Hgp rqg#V d|hjk#

EDMOND SAYEGH, P. E.

| SUBJECT: | Wastewater Treatment Plant Expansion/Renovation and Brine Pipeline<br>Installation Project Status Update |

#### **Background and Analysis:**

#### Reach 1

- The contractor continues to work three crews on pipe installation, paving, restoration, ground water assessment and boring.
- Contractor is working at nights on Live Oak Canyon Road installing bypass pumping connections.
- Contractor has encountered significant groundwater at bore crossing and Palmer. They are working with the Regional Board regarding discharge which will be implemented through a Groundwater Discharge Plan.
- Approximately 54,263 linear feet of brine line have been installed to date.
- Contractor has requested 38 inclement weather days to date.
- The three week look ahead schedule is included as an attachment to this report (Attachment A).

#### Reach 2

- The contractor is now working several crews in separate areas focusing on pipe installation, bore pits and paving. Specific locations can be seen on the look ahead schedule.
- Connection plans for the brine line to SAWPA and the monitoring stations have been submitted to SAWPA. They are under review.
- Approximately 37,279 linear feet of brine line have been installed to date.
- Contractor has requested 13 inclement weather days to date.
- The three week look ahead schedule is included as an attachment to this report (Attachment B).

| Construction               | \$31,884,226.35 | \$19,131,700.96 | \$12,752,525.39 |
| Contingency                | \$2,600,000.00  | \$1,342,275.20  | \$1,257,724.80  |
| Total                      | \$40,511,295.35 | \$24,304,602.27 | \$16,206,693.09 |

#### Wastewater Treatment Plant Expansion/Renovation Project:

- Construction work continues on the MBR/RO Startup, aeration basin formwork & Reinforcing, Electrical Building PEMB erection, MBR metals and gates, Headworks Duct Bank 104, A-Basin False Work, MBR Metal Building assembly, Fine Screens Canopy, and Recycled Water Pump Station F/R/P slab.
- Upcoming pours include duct-banks , aeration basin and aeration basin walkway

- Contractor will continue to dig/lay/backfill the 30" MBR/RO effluent line and 24" storm drain, 20" reuse water pump station effluent, and 16" reuse water effluent.
- Contractor has requested 38 inclement weather days to date and 37 days have been approved.
- The three week look ahead schedule is attached for review (Attachment C).

# BEAUMONT

#### **Staff Report**

| TO:      | Mayor and City Council Members                    |
|----------|---------------------------------------------------|
| FROM:    | Todd Parton, City Manager                         |
| DATE:    | October 1, 2019                                   |
| SUBJECT: | Set Date and Time for a FY2020-21 Budget Workshop |

#### **Background and Analysis:**

As City staff begins to develop a budget for the Fiscal Year 2020-21, a workshop consisting of the City Council is necessary to prioritize and discuss budget goals. Staff will present data of existing financial conditions as well as forecasted trends to develop a plan for the FY2020-21 budget.

#### **Fiscal Impact:**

No fiscal impact at this time.

#### **Recommendation:**

1. Set a date and time for a workshop to discuss the FY2020-21 budget.
