## Field Services

All Calls for Service are handled within 24 hours

The Animal Services division responds to approximately 2,000 calls for service each year. Trends usually show the numbers peaking during the warmest months and declining during the coldest.

## Actions Taken by Officers

Attempts to educate and mediate are most often the first method of resolution. When these techniques fail or are ignored, a written warning or citation could be issued. These methods help to reduce the number of repeat offenders, and animals impounded, and more effectively manage long-term problems. These actions are taken to enhance public safety and animal welfare.

### Intake Information

Burleson Animal Shelter intakes about 2,000 animals per year and averages about 165 animals per month. Below you will see the intake data per month broken down by species and by intake type.

### Euthanasia Information

The chart below depicts the breakdown of euthanasia numbers by reason for the fiscal year.

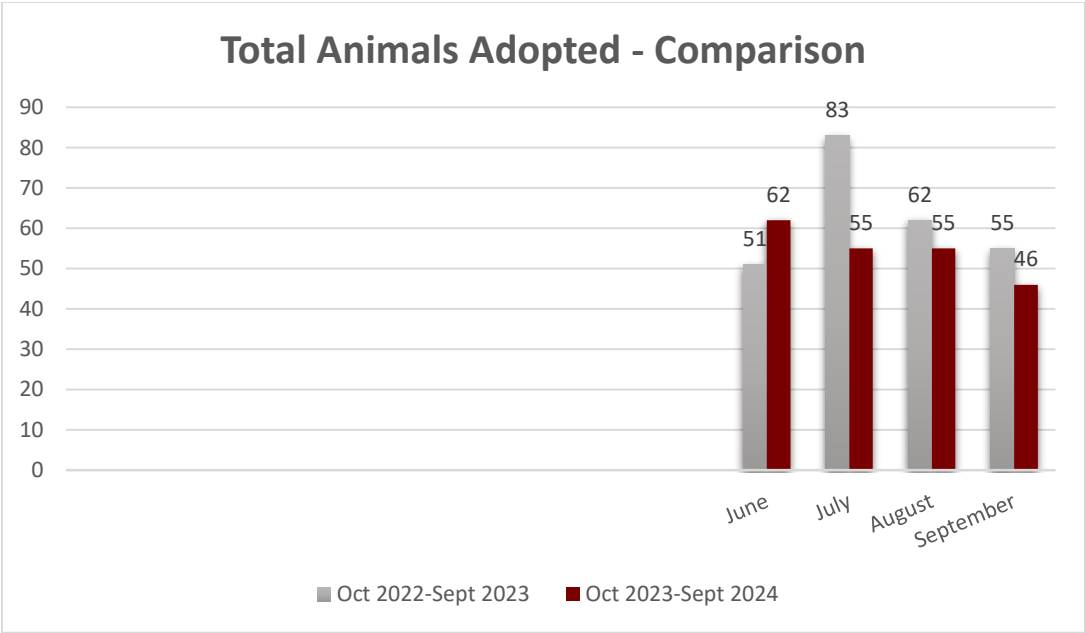

### General Information

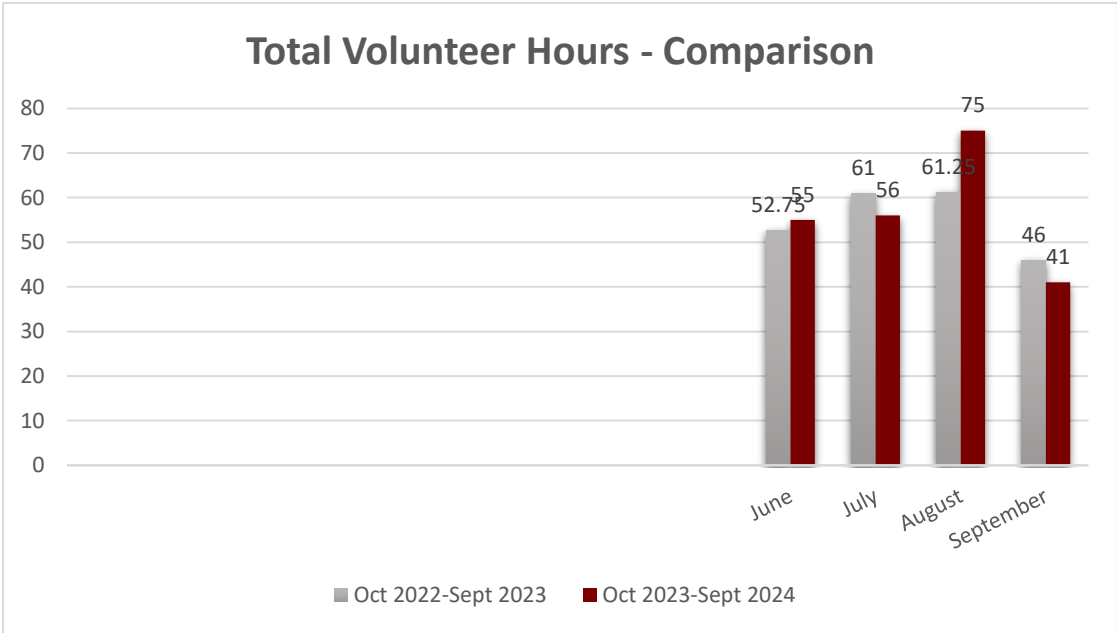

Phone calls and visitors are depicted in the graph above. Phone calls typically increase with season changes and visitors tend to fluctuate on an unforeseen basis.

### Adoptions

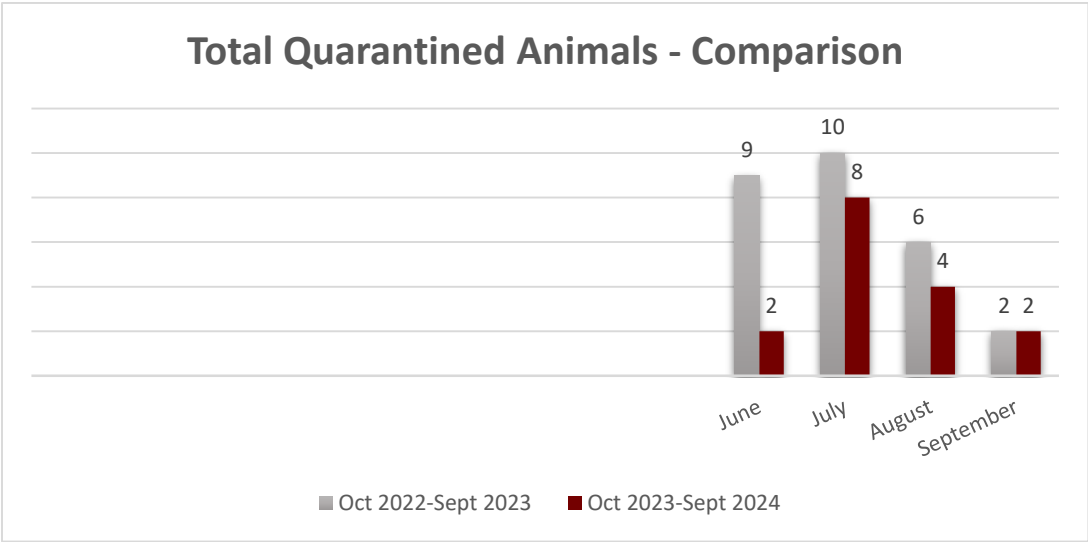

## Volunteers

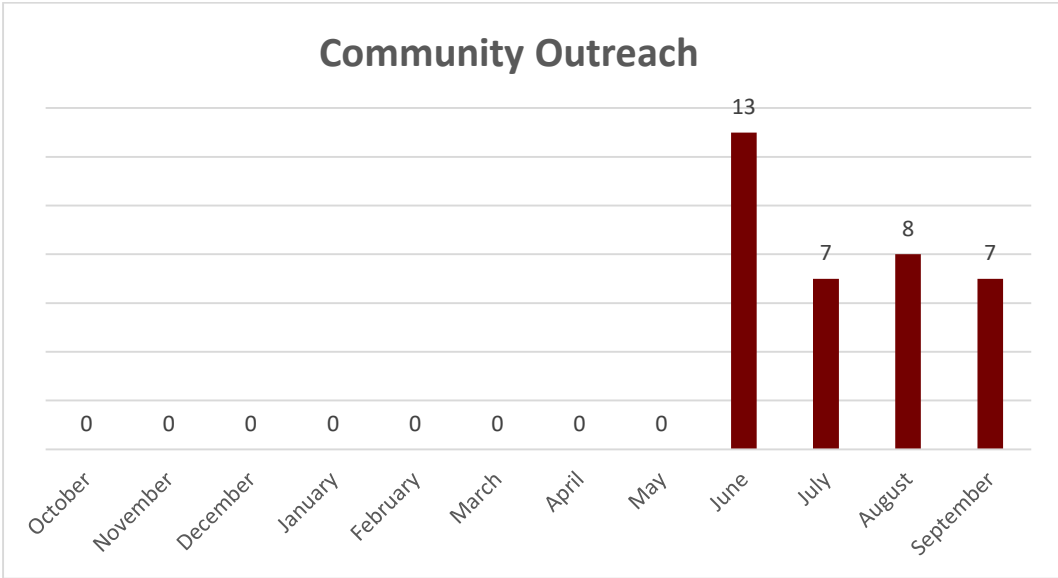

*Volunteers perform a myriad of tasks at the shelter from walking dogs, to playing with puppies and kittens. It is very beneficial for the animals to be able to spend some time outside of their cage with one-on-one human contact. Socializing and daily exercise helps reduce stress on the animals and also help make them more adoptable.*

## Animal Quarantine

*Animals that bite are subject to quarantine and are required to quarantine the animal for not less than ten days confinement from the date of the bite, at the owner's expense.*

### Community Outreach

*Community outreach enables us to go out and interact with the community to improve adoptions, improve communication with residents and animal services, and provide unique services to get the community involved.*

Item C.

# Community Outreach

This summer, an egret rookery was established in the Shady Oaks neighborhood. Since egrets are federally protected once nesting begins, neither the city nor the residents could remove them. The large number of birds in the rookery caused significant disruption, including excessive noise, unpleasant odors, and damage to trees and grass. To address the issue, the city will host a meeting with Urban Biologist Adam Henry to discuss effective strategies for deterring egrets in the future.

## Prevention of Migratory Birds In 2024

### Habit Modification for Egrets/Herons

Migratory bird nesting has presented considerable challenges in and around your neighborhood in the past few years. In an effort to deter this nesting activity, the City will be collaborating with your neighborhood to assist with reducing/eliminating nesting for the 2024 season. It is important that action is taken during the fall / winter months before the egrets / herons arrive in the spring.

### Here is how you can help:

#### Tree Maintenance (prior to spring)

- Trim tree canopy to allow sunlight to shine between limbs and other trees.
- Team up with your neighbors when hiring a tree trimming service and ask for discount rates for group service.
- Remove old / abandoned nests from the previous nesting season so that they do not attract egrets.
- Remove any / all underbrush.

**Prevention**  
Rookery sites can be made less attractive to birds by selectively cutting and pruning trees to open the stand 50-75%.

## Migratory Bird Deterrent Measures

### AFTER TRIMMING TREES - Before nesting season begins (December - February)

- ✓ Be on the lookout for "sentry" or "scout" birds, they are the first to arrive looking for nesting places.
- ✓ Report sightings to your neighbors and to the city. (817-426-9283)
- ✓ Check daily for birds and nesting material in your trees.
- ✓ Check for twigs on the ground, increased bird droppings and an increase in bird noises.
- ✓ Begin scare tactics as soon as you see birds on or near your property.
- ✓ Use noisemakers, water spray or shine lights at night, hang "scare eye" balloons or other moving objects in trees, use long poles, tennis balls or water hoses to disturb early nesting material.
- ✓ Be a good neighbor and help those near you who may not be able to help themselves.

### What Will the City Do?

- The City has purchased two migratory bird deterrent sounds systems that can be strategically placed in areas to discourage birds from nesting in neighborhoods.
- City staff will be on high patrol during the start of the nesting season. Please contact Animal Services if you have sightings of the birds.
