2024-26 On-Call Professional Services Agreement for Water

Presenter: Rob Charles, Utilities Manager

Time Estimate: 5 minutes

**BACKGROUND:** During the course of a year, the City will receive requests for large water service demands for a potential development project. These requests can be on the order of magnitude of 1 million gallons or more per day, but they can also be for smaller amounts of water to areas that have limitations on water delivery. Modeling of our water system is required to ensure we have well capacity, intermediate pumping, storage, and transmission capacity to deliver the water. This modeling can also update the city’s water plan as capital improvements are completed during the planning period (10 years).

**SUMMARY:** Carollo Engineering is proposing to provide the modeling of the City’s water system as well as recommended system improvements as needed to deliver water to these specific areas.

**BENEFITS TO THE COMMUNITY:** Modeling of the City’s Water System for potential large water users allows the city a plan to accommodate the user without disruption to existing users in the system.

**BUDGET IMPACT:** The proposal from Carollo Engineering is \$80,000 and there are sufficient funds in water to cover these costs.

**RECOMMENDATION:** Staff recommends that this item be placed on the September 3, 2024, Council Regular Consent Meeting Agenda for Council’s consideration.

Endicott Street Culvert Rehabilitation with Iron Horse LLC. (Submitted by Will Noonan, Public Works Operations Manager)

**BACKGROUND:** In 2022 a sink hole opened up on Endicott Street. Crews repaired the street and looked for the reason the sink hole developed. Upon TV inspection of the 42” corrugated metal culvert under Endicott, it was realized the bottom had deteriorated to failure and the structural integrity of the culvert was compromised. This needs to be addressed to avoid future failure.

**SUMMARY:** The most cost effective and least impactful way of repairing this culvert and restoring its structural integrity is through a process called Cured-in-Place Pipe (CIPP). CIPP is a trenchless method of rehabilitating a pipe or culvert. A flexible liner is inserted into the culvert, inflated with air and exposed to heat or ultraviolet light to dry and harden as a liner inside the pipe. There will be two sections of this culvert to receive the CIPP with access through manhole on the east side of Endicott, off the street. Through the competitive bid process Iron Horse LLC has been awarded the contract for this project.

Figure 2. Illustration of before and after CIPP

**BENEFITS TO THE COMMUNITY:** This repair will restore the structural integrity of the culvert with minimal impact to the surrounding houses and cost less than the tradition method of digging up the street to replace the two failed sections of culvert.

**BUDGET IMPACT:** This will be paid for by the Stormwater Utility. The total cost is \$154,894.60.

**RECOMMENDATION:** This item is also on tonight's Council Regular Meeting Agenda for Council's Consideration.
