

STEERING COMMITTEE - STRATEGIC PLAN WORKSHOP MINUTES

December 16, 2022, at 9:30 AM

CTAC, 802 NW 5th Ave, Gainesville, FL 32601

Call to Order

Meeting called to order by Chair Cheryl Twombly at 9:30am.

Roll Call

Attendance

Present

Cheryl Twombly
Ken Cornell
Lee Pinkoson
Barzella Papa
Candice King
Christi Arrington
Patricia Snyder
Christopher Stokes

Trust Staff Present

Marsha Kiner
Kristy Goldwire
Bonnie Wagner
Elizabeth Cayson
Mia Jones
Dan Douglas
Diana Sanchez
Ashley Morgan-Daniel

Also Present

Nikki Martin-Bynum
Vashti Rutledge

Agenda Review

Approval of the agenda also approves all the items on the consent agenda.

Consent Agenda

Motion made to accept by Member Pinkoson seconded by Member Cornell

1. 10.17.22 Steering Committee Meeting Minutes

Discussion Items

2. Purpose of the Strategic Planning Process (Marsha Kiner)

Executive Director Kiner introduced the strategic planning consultant Nicole “Nikki” Martin-Bynum to the group. Nikki introduced a member of her team Vashti Rutledge. Nikki expressed her thanks to the team for the invitation to work on the project.

3. Project Review (Kristy Goldwire)

Trust Staff DOP K. Goldwire recapped what led up to the listening project. She explained the RFP process and the voices that were included in the guiding and crafting. Goldwire noted that the steering committee is made up of more than board members. It includes staff and community members.

4. Listening Project Update (Dr. Tatia Prieto)

Dr. Prieto updated the committee on the current progress. She showed a graphic of the completed activities and discussed the upcoming events and deadlines. Dr. Prieto explained the project pivots with surveys, community meetings and focus groups. The project efforts were discussed. She asked the group for input on the final product should look like.

Discussion

Member Pinkoson asked how the parent focus groups went.

Member Cornell asked Dr. Prieto to share with the group the conversation that they had at the Praise Center. Dr. Prieto shared in a post Covid world people wanted more in person opportunities.

Executive Director Kiner thanked Dr. Prieto for being flexible and understanding when she reached out asking for changes. Dr. Snyder and Chair Twombly also expressed their thanks.

Trust staff member B. Wagner also thanked Dr. Prieto and her team for all the hard work. She also mentioned to the team that the parent and youth surveys are still live. Wagner acknowledged Member C. King’s question about the rural areas and survey completion. Member King asked specifically about if the churches had been contacted.

Dr. Prieto explained the extensive efforts to reach churches.

Member C. Stokes communicated with the group what he was working on to have survey completion in Micanopy and agreed that the rural areas need to be heard. Member Stokes shared that it is important to have the Pastor of the churches on board.

Member Cornell asked Dr. Prieto how many surveys does she believe she needs to hear from the rural areas? Dr. Prieto advised that she needs 30 quality results from each community parent and youth.

Member C. King asked about getting paper surveys to hand out at the Acorn Clinic.

N. Martin-Bynum r asked for Dr. Prieto to share with the group the zip codes and areas that were short on surveys. Dr. Prieto explained that the list that Staff member Wagner shared is accurate.

5. Environmental Scan (Bonnie Wagner)

Trust staff member B. Wagner discussed the environmental scan that she is working on for Alachua County. She is using valuable secondary data that is collected from various places including the Florida Census and Florida Charts. This data will help us to take a catalog of what our resources and assets look like in each of our municipalities that might supplement and compliment the work of the listening project. The environmental scan of Alachua County includes resources and assets, our municipalities, population statistics and child demographics. The indicators of child well-being in the areas of Health, Education, Support, and Safety were briefly discussed. The scan is not complete, and B. Wagner is hoping to receive feedback from the steering committee on how to figure out what is missing and what the group would like to see included.

Discussion led by strategic planners (Nikki Martin-Bynum and Vashti Rutledge)

Breakout Sessions

The committee broke up in smaller groups to discuss the indicators of child well-being Health, Education, Support and Safety.

Questions for each group.

- What trends do you see? Positive, negative, turbulent
- What factors could have impacted the trends? Social environmental, economical
- Which factors can CTAC impact?
- What opportunities/ challenges do you see?

Each group answered what they saw and heard from the data in front of them followed by a group discussion.

General Public Comments: None

Meeting adjourned at 12:30.

First Trimester Prenatal Care by County

Women who see a health care provider regularly during pregnancy have healthier babies and are less likely to have pregnancy complications. Mothers with unknown prenatal care are excluded from the denominator in calculating the percentage.

Prenatal care visits provide benefits to both the mother and baby and are used to monitor the progress of a pregnancy. To achieve the greatest benefit for both the mother and baby, it is recommended that women begin PNC visits in the first trimester of pregnancy or as soon as pregnancy is suspected. Early PNC allows health care providers to identify potential problems as early as possible so they can be prevented or treated before they become serious.

Inter-Pregnancy Interval < 18 months by County

A short pregnancy interval (less than 18 months) is a risk factor for preterm birth. Women who become pregnant before folate restoration is complete have a raised risk of folate insufficiency at the time of contraception and during pregnancy. Consequently, their offspring have higher risk of neural tube defects, intrauterine growth retardation, and preterm birth.

Healthy

Mother's Pre-Pregnancy Healthy Weight by County

Healthy weight is defined as body mass index of 18.5-24.9. This indicator is a count of births to mothers with a pre-pregnancy BMI of 18.5 - 24.9. Mothers with unknown pre-pregnancy BMI are excluded from the denominator in calculating the percentage.

One aspect of health is having a healthy weight. Eating healthy foods, staying active and gaining the right amount of weight during pregnancy helps optimize health for mothers and babies.

County	2017	2018	2019	2020	2021
Alachua	45.1%	45.1%	42.1%	41.6%	43.0%

Mother's Pre-Pregnancy Weight in Obese Range by County

Obesity is defined as a body mass index (BMI) of 30 or more. This indicator is a count of births to mothers who had a pre-pregnancy BMI of 30 or more. Mothers with unknown pre-pregnancy BMI are excluded from the denominator in calculating the percentage.

Women who are overweight or obese while pregnant are more likely to have premature births, babies with birth defects like neural tube defects, or babies who are large for gestational age. These women are more likely to have complications during labor and birth, and their babies are at a higher risk of developing heart disease, diabetes, and obesity later in life.

Oral Health

Oral health is essential to general health and well-being. Dental caries or cavities remains the most common preventable chronic infectious disease among young children and adolescents in the United States. If decay remains untreated, it may cause pain, dysfunction, poor appearance, loss of self-esteem, absence from school or work, and difficulty concentrating on daily tasks ([Florida Oral Health Screening Project](#)).

Healthy

Middle and High School students who are Overweight or Obese

Maintaining a healthy weight starting at an early age and continuing throughout life has many health implications and contributes to the avoidance health problems such as type 2 diabetes, heart disease, and some cancers ([Center for Disease Control](#)). The Florida Youth Tobacco survey collects height and weight as self-reported by adolescents in grades 6-12 to determine the prevalence of young adults who are overweight or obese. Overweight is defined as a body mass index (BMI) of 25-29.9. Obesity is defined as a BMI of 30 or more.

VPK Utilization rates by County

This indicator displays the percent of children who enrolled in VPK relative to the county population. VPK prepares children to be ready for school. Children who participate in early childhood education programs develop better language skills, score higher in school-readiness tests, and have better social skills and fewer behavioral problems once they enter school.

Kindergarten Readiness rates by County

The percentage of kindergarten students who score 500+ on the Florida Kindergarten Readiness Screener. State law requires screening for all public school kindergarten students within the first 30 days of the school year. Kindergarten teachers use the results to help understand each child's readiness for school and plan lessons to meet individual needs. Readiness at kindergarten entry greatly impacts future school success.

Educated

High School Graduation by County

Florida's high school graduation rate is the percentage of students who graduated with a standard diploma within four years of their initial enrollment in ninth grade.

Graduation rates provide information about performance of schools and future employability of students. Higher salaries are typically available to high school graduates. Receiving a high school diploma enables someone to pursue a higher education, including vocational school, trade programs, a certified work-program or college.

Support

Paternity Acknowledged on the Birth Certificate by County

Having a paternity acknowledged on a birth certificate is an indication of greater social and financial support for the infant. Research studies have shown this is linked to infant mortality.

County	2017	2018	2019	2020	2021

Total	213	220	213	135	

Youth Arrest Rate by County

This indicator provides a count of youths arrested. If the same youth is arrested for several offenses during a fiscal year, only one is counted in this report.

Crime is a social determinant of health. Research has shown that risks associated with juvenile arrests are cognitive deficits, low school involvement, living in poverty, or being runaway or homeless.

Domestic Violence Rate by County

Domestic violence is any criminal homicide, manslaughter, rape (includes forcible sodomy), fondling, aggravated assault, aggravated stalking, simple assault, threat/intimidation, or simple stalking of one family or household member by another family or household member. A family or household member means spouses, former spouses, parents, children, siblings, other family members, cohabitants, and persons who are parents of a child in common regardless of whether they have been married (FDLE's Uniform Crime Report).
