I. **Policy**

It is the policy of this department to conduct investigations, and carry out police-related business on school property in conformance with the authority and responsibility of school officials to protect children in their charge and manage the school environment.

II. **Discussion**

Responding to calls for service, or conducting investigations on school property, requires understanding the authority and responsibility of school administrators, and the related limitations and requirements placed on law enforcement officers by law.

School administrators work under the authority of the school board, which derives its authority from the state legislature, and promulgates board rules that determine how children will be educated in most facets of the education process. Policies and procedures concerning *curriculum; dates and hours school will be attended; attendance requirements; holidays; and security and law enforcement support for school property and school sponsored events* are examples. Carrying out these policies and procedures shapes the management responsibilities entrusted to the superintendent of schools and principal of each campus.

School officials are charged with *en loco parentis rights and responsibilities*, meaning that school staff members stand *in the place of the parent* while students are at school and school functions. When considered in the context of an issue or question, school officials will usually ask themselves, *“What would a reasonable parent do in this situation?”*

Sworn law enforcement Officers responding to calls for service on school property, or a school sponsored activity, do not have *en loco parentis* rights or responsibilities. Likewise, sworn law enforcement Officers assigned to conduct school campus programs or carry out the duties of a School Resource Officer do not have *en loco parentis* rights or responsibilities. Non-sworn guards or security officers working for a school district may have *en loco parentis* rights and responsibilities, unless otherwise stated by the school board.

Absent a specific direction or request from law enforcement officials, school officials may elect to do the following, because of *en loco parentis rights and responsibilities*.

Standard Operating Procedure

S.O.P.: C-4
Effective: 12-18-2018
Revised: 12-18-2018
Reviewed:

Fire Chief Signature

DATE

Policy: Requests for Georgia Search & Rescue Personnel

Scope: All Personnel

Procedure:

Georgia Search & Rescue (GSAR) Task Force 6 will send texts and emails to all members when assistance is requested. When received by task force members, this is nothing more than informational material that must be acted upon by DFD leadership based on present needs and capabilities of the department.

Upon receipt of a deployment request, individual task force members shall communicate their availability to their respective shift commanders. This should be done by text when possible. This is merely a statement of availability on the part of the individual for the purpose of obtaining real-time resource availability at the department level. Missing person search requests do not require notification by the individual as this will be accomplished utilizing on duty personnel when possible.

The Training Division shall serve as the clearinghouse for information regarding any possible activation or deployment. The chain of command shall be utilized for improved communication and accountability. Shift commanders will be the point of contact for the Training Division prior to deployment.

In cases where the City of Dalton is unaffected by the incident (e.g. localized weather event), available GSAR resources from the on-duty shift will be the first to roster up for activation or deployment.

For smaller incidents (especially in the immediate area of surrounding counties), training will contact the on-duty shift commander and make a determination of what he/she can afford to send. For larger incidents/deployments, training will contact shift commanders to obtain real-time resource availability, then contact administrative chiefs to identify what resources we are willing to assign.

The department will not send resources to incidents involving missing person searches, etc. **outside** the immediate area of surrounding counties (Whitfield, Murray, Catoosa, Gordon, Walker) without approval from an administrative chief officer.
