

SPECIAL ASSESSMENT COMMISSION MEETING - 6/24/2026 AGENDA

Wednesday, June 24, 2026 at 5:00 PM MT
City Hall – 38 1st Street West Dickinson, ND 58601

Commissioners:

President: Adam Brezinski
Suzi Sobolik
Trevor Ernst

CALL TO ORDER

ROLL CALL

1. ORDER OF BUSINESS: CONSIDERATION FOR APPROVAL

2. COMMUNITY DEVELOPMENT

A. Special Assessment Commission Meeting Minutes - November 24, 2025 (Enc.)

Presented by: Engineer and Community Development Director Skluzacek

Consideration to approve

B. Special Assessment Policy (Enc.)

Presented by: Engineer and Community Development Director Skluzacek

Consideration to approve

C. 2027 Road Maintenance Special Assessment (Enc.)

Presented by: Engineer and Community Development Director Skluzacek

Consideration to approve

3. COMMISSION COMMENTS

4. ADJOURNMENT

**SPECIAL ASSESSMENT COMMISSION MEETING
November 24, 2025**

Pursuant to due call and notice, the Special Assessment Commission met on Monday, November 24, 2025 at 5:30 PM at City Hall.

1. CALL TO ORDER

City Administrator Dustin Dassinger called the meeting to order at 5:30 PM

2. ROLL CALL

Present were: Suzi Sobolik, Trevor Ernst and Adam Brezinski

Also present: Joshua Skluzacek, Attorney Stephen Fetch, and Rita Binstock
Natalie Birchak, Scott Schneider, Jeremy Easum
Kris Keller, Dustin Dassinger

Absent: None

3. APPROVAL OF MINUTES

N/A

4. TERM LIMITS FOR COMMISSION MEMBERS:

City Administrator Dustin Dassinger thanks everyone for coming to the Special Assessment Commission Meeting.

City Engineer Joshua Skluzacek explains the criteria of being on the Special Assessment Commission.

City Administrator Dassinger states the special assessment commission terms are one year, two year, and three year. The one-year term board member will become the President for that year. After discussion the board members had decided to place Adam Brezinski as a one-year term and the President; Suzi Sobolik will complete the two-year term and Trevor Ernst will complete the three-year term. These terms are according to 40-23-01.

5. PUBLIC HEARING – 2026 ROAD MAINTENANCE

President Adam Brezinski opens the public hearing at 5:40 p.m.

City Engineer Josh Skluzacek presents the 2026 Road Maintenance Special Assessments and 2026 Utility and Street Improvement Project Special Assessments. He states having the special assessment district will benefit the properties in a manner to improve the areas and the city areas. He states special assessments do not outweigh the project costs. This will be a significant benefit to the are to this area. Engineer Skluzacek states the City will follow the ten-year treasure and take an average of the daily yield. The average is 4.1%. He updates the Commission on the benefits of this project which include full depth repairs of failed road sections in order to extend the pavement life.

Engineer Skluzacek states the bids for this project are anticipated to be in January, 2026. Engineer Skluzacek states the location of this project is on Enterprise Avenue, Alder, Box, Cherry, Dell, Elm, Franklin, 8th Avenue East, 7th and 8th Street East, Bighorn Drive, 9th Avenue East, along with an area of Kuchenski, Rivershore, etc. Engineer Skluzacek states the special could be figured by square foot. He states sidewalk and driveways in the public right away will be the responsibility of the property owner. Engineer Skluzacek states the streets in these areas are not in good shape. He states there are a number of blocks that need to be replacement of the watermain and service lines need to be replaced. He states the city does have a .5% loan and 75% loan forgiveness for lead service line replacements only. There has not been a requirement for anyone to pay of the lead line replacements to the homeowner. He states that in 2019 the curb, gutter and sidewalks were worked on and 2024 only the sidewalk was special to the property owners. The roadway is in very poor condition. He states that there is a handful of spots that sanitary sewer will be repaired and/or replaced.

Jeremy Easum states only one parcel stands out on this project and it is on the west end of Kuchenski drive. He states it has a retaining wall that is needed. He states in some areas there is no need for sidewalk improvements. The address for this property so 483 Kuchenski Drive.

Engineer Skluzacek states the property does have a retaining wall and in order to make the

1.5 BENEFITS..... 3

1.0 INTRODUCTION

1.1 PREFACE

Chapter 40 of the North Dakota Century Code authorizes cities in North Dakota to use special assessments as a method to fund public improvements, such as water supply systems, sewer systems, streets, flood protection, sidewalks, trees, storm sewers. According to N.D.C.C. 40-22-01.2, cities with a population exceeding 10,000 population shall adopt written policies which will be applied for cost allocation among properties benefitting by a special assessment project. This special assessment policy is intended to provide guidance to the City of Dickinson (City) Staff, Special Assessment Commission, and City Commission. In accordance with the N.D.C.C., the City will levy and apportion special assessments in a reasonable, equitable manner consistent with the procedural process and substantive case law governing the levy and apportionment of the special assessment as determined by the North Dakota Supreme Court.

The City utilizes special assessments as a method to pay for public improvements that affect benefiting properties. Improvements in the public right-of-way and dedicated public easements are considered public improvements if they meet the City’s design standards. The costs of the improvements are allocated to the parcels/lots that benefit from these improvements.

1.2 PURPOSE AND RESPONSIBILITIES

The City recognizes that each and every special assessment district and the properties therein can have unique facts and circumstances and the methodologies set forth herein is intended to provide guidance to the City of Dickinson Staff, Special Assessment Commission, and City Commission.

1.3 USE OF THE SPECIAL ASSESSMENT POLICY

The special assessment policy is intended to be used for standardization of special improvement district creation and scope of work and cost allocation. As a result, the City of Dickinson Staff, Special Assessment Commission, and City Commission may deviate from this Special Assessment Policy if the facts and/or circumstances warrant such departures.

The project special assessment scopes of work that are included in the special assessments to the parcel/lot owners are: sidewalks along the parcel/lot frontage – both new and repair and/or replacements, driveway approaches to the right-of-way limits – both new and repair and/or replacements. Sidewalks and driveway approaches that are required to be removed and replacement due to the replacement of existing underground infrastructure is to be included. Settlements and/or heaves in sidewalks and driveway approaches are included in the special assessments.

The project special assessment scopes of work that are not included in the special assessments to the parcel/lot owners are: Americans with Disabilities Act (ADA) pedestrian ramps – including the required sloping to catch grade to the sidewalks and/or driveway approaches, where new

engineering attributes are being added such as: new storm drain mains and inlets, new water mains and appurtenances, new sanitary sewer mains and appurtenances.

Typically, projects eligible for Federal Highway Administration urban funding and/or urban regional funding have not utilized special assessments to the parcel/lot owners. These are roadways classified with as Collector, Minor Arterial, and Principal Arterial.

Where at the discretion of the City Engineer, some Collector streets that include large percentages of residential uses may be eligible to include the special assessments to the parcel/lot owner as described above.

Also, where at the discretion of the City Engineer, sidewalk installation is not feasible or deemed a sidewalk to nowhere are not to be mandated to be installed.

1.4 PROCEDURES

This special assessment policy is not intended to limit innovation or creativity, particularly when such efforts result in more efficient solutions. Departure from the required standards shall be determined by the City Engineer on a per project basis.

1. Interest Rate Determination
 - a. For all special assessment districts proposed for the following year's construction season, the average daily 10-year Treasury Yield interest rate for the month of September shall be calculated.
2. Order of Steps / Tasks
 - a. Project Engineering Report – N.D.C.C.
 - i. Benefits section to be reviewed by City Attorney annually
 - b. SID Project Engineering Report Determination at Special Assessment Commission - N.D.C.C.
 - i. Not a public hearing
 - c. Project Frequently Asked Questions document – Optional, but City typically prepares and delivers this.
 - d. Resolution to begin protest period at City Commission – N.D.C.C.
 - i. Not a public hearing
 - e. Legal advertisement for protest period – N.D.C.C.
 - f. SID letter with parcel/lot estimate – N.D.C.C.
 - g. SID Public Engagement Meeting – Optional, but the City provides this.
 - h. SID Public Hearing to Determine Protests at City Commission – N.D.C.C.
 - i. SID Protest Information – Parcel ID and Parcel/Lot acreage and totals
 - i. If SID is approved, the City Engineer is authorized to proceed with finalizing the project plans and specifications, and the project will be put out to bid.
 - j. SID Post Construction Actuals letter – Optional, but the City provides this.
 - k. SID Assessment Certification to Stark County – N.D.C.C.

- i. Due by October each year. The City of Dickinson must provide the prior year's construction season assessment certification by October of the following year after construction has concluded.

1.5 **BENEFITS**

The special assessment for each parcel/lot may not exceed the amount of benefit received by that particular parcel/lot.

Utility System Improvements

There are many benefits to a publicly operated water system for an urban community. The water treatment and distribution systems ensure a consistent, reliable supply of potable water to residential, commercial, and industrial properties, meeting the diverse needs of the population. The system is centrally maintained by municipal authorities, who are responsible for inspections, repairs, and upgrades, ensuring water quality and reducing the burden on individual property owners. Water distribution systems are designed to handle varying demand levels, making them scalable to accommodate population growth and future urban development. Additionally, they enhance public health and safety by providing a clean and safe water supply, crucial for drinking, sanitation, and fire protection services. A water distribution system thus increases property values and supports the economic growth of a community by offering dependable and long-term access to clean water, which is essential for both daily life and business operations.

The alternative to a municipal water distribution system is the use of individual wells. However, individual wells pose several challenges, particularly in urban areas. Wells require significant space for installation, making them impractical in densely populated neighborhoods. Moreover, the quality and quantity of water from individual wells can vary depending on local groundwater conditions, often requiring additional filtration systems or treatment to ensure safe drinking water. Wells also place the maintenance responsibility entirely on property owners, including costs related to water testing, pump maintenance, and potential repairs. Given these limitations, individual wells are not a practical solution within city limits, but they can be used as a cost benchmark for quantifying the expenses property owners would face in the absence of a water distribution system.

Owning and maintaining a well system over 25 years comes with a variety of expenses. These include:

- Installation Costs
- Pumping and Routine Maintenance
- Repairs and Component Replacement
- Electricity Costs
- System Failure or Well Replacement

The capital and maintenance costs of a well system would cost at least \$30,000 and upwards to \$100,000 depending on many variables.

A failed water main system can cause significant damage to properties, potentially resulting in structural damage and loss of personal belongings. It is important to note that the water distribution system costs within the Special Improvement District are not being assessed to property owners which further increases the benefits to the property owners.

Roadway Paving and Incidentals

Roadway pavement is essential to ensuring safe and efficient transportation within urban communities. A well-maintained paved road network improves vehicle and pedestrian safety by providing a smooth, stable surface that reduces the risk of accidents and vehicle damage caused by uneven or unpaved roads. Proper pavement also improves traffic flow, reducing congestion and travel time for residents and businesses, thereby enhancing overall quality of life. Additionally, paved roads are more durable and resilient to weather conditions, preventing issues like erosion, dust, and water pooling, which can degrade unpaved surfaces over time and lead to costly repairs.

Unpaved roads, while potentially less costly to install initially, are impractical in urban environments due to their high long-term maintenance costs, susceptibility to weather damage, and poor durability under heavy traffic. Unpaved roads require frequent grading to remain passable, and they deteriorate quickly in adverse weather, leading to erosion, dust, and potholes. These factors not only increase ongoing maintenance costs but also result in poor road conditions that can negatively impact property values, vehicle repair costs, and public safety. While unpaved roads are not a practical solution for urban areas, they serve as the only feasible alternative for comparison in evaluating the costs and benefits of paved road improvements within urban improvement districts. Unpaved roadways do not meet the International Fire Code within urban areas.

Unpaved roads require significant ongoing maintenance to keep them functional. Over a 25-year period, the costs of maintaining an unpaved roadway include regular grading, dust control, erosion management, and resurfacing. Below is a breakdown of key expenses: Initial Installation, Costs, Routine Maintenance, Grading, Dust Control, Resurfacing, Vehicle Damage, and Safety Implications. Additional costs to consider are related to delay time to the average use of the roadway.

Pavement preservation is a proactive approach that involves a series of low-cost, preventative maintenance treatments aimed at protecting our roadway network, extending pavement life, and meeting the needs of our citizens. While no pavement lasts forever, the timely application of these treatments can significantly extend the lifespan of the pavement, resulting in substantial cost savings.

The following pavement rehabilitation strategy is from the City of Dickinson’s 2023 Pavement Management Report (MDS Technologies, Inc., February 1, 2024):

Rehabilitation Programs and Budget Analysis

Effective management of a pavement network involves understanding how pavements deteriorate over time and applying appropriate maintenance and rehabilitation treatments at critical times in the life of a pavement to minimize the long-term cost of maintaining the network at a desirable condition level. The concept of pavement management is illustrated in Figure 4 below. Figure 4 shows that pavements typically do not deteriorate linearly. A pavement may experience only a 40 percent drop in quality over the first 70 percent of its life. During this time the life of a pavement may be extended significantly through the periodic application of relatively low-cost maintenance treatments. This is represented by the “shark-fin” shaped curve in the upper-right of the figure.

Figure 4: Pavement Management Concept and Effect of Timely Maintenance

A failed roadway system not only requires costly repairs but also lead to indirect expenses for road users, including vehicle damage, increased fuel consumption, and more frequent maintenance needs. By implementing timely pavement preservation projects, smoother road surfaces are maintained, reducing these additional costs for the adjacent landowners. The pavement within the Special Improvement District existed prior to this project. However, the

improvements are necessary due to required water system improvements. It is important to note that the surface costs within the Special Improvement District are not being assessed to property owners which further increases the benefits to the property owners.

Preliminary Engineering Report

City of Dickinson 2027 Road Maintenance

Special Improvement District

SID Number 202701-XX

June 2026

This document
is preliminary
and not for
construction or
implementation
purposes.

PRELIMINARY

Background and Project Areas

The proposed Special Improvement District (SID) is part of the 2027 Road Maintenance Project also known as City of Dickinson project number 202701. The project is included in the City's 2027 budget and is based on a 2025 Pavement Management Report that assessed all City streets and provided a priority rating for improvements. The report was further reviewed by the consultant team and City staff. The primary objective is street asphalt pavement rehabilitation and full-depth reconstruction in accordance with the recommendations. In addition, the project will include repair or replacement of concrete curb, gutter, sidewalk, accessibility ramps and driveways adjacent to the streets being rehabilitated.

Justification

Mill & overlay or full depth repairs of failed road sections are needed to extend the pavement life. To minimize impacts on landowners the project will also repair or replace adjacent concrete.

A SID will fund the sidewalk repair or replacement in accordance with the City's Special Assessment Policy (see Appendix 1) approved by the City Commission on December 17, 2019. The policy gives the City authority to assess cost for constructing sidewalks, curb and gutter and driveway aprons in conjunction with street maintenance projects. The city has opted only to use a SID for sidewalk and driveway repairs and replacement. The costs associated with repair and replacement of curb, gutter and accessibility ramps will be funded under the pavement maintenance budget.

Schedule and Opinion of Cost

Construction for this project is scheduled to be completed during the summer of 2027. Bids are anticipated in November 2026.

The engineer's estimate of probable construction cost for the project is included in Appendix 2, and the breakout of specific assessments to individual parcels is shown in Appendix 3.

Public Benefits - Roadway Paving and Incidentals

Roadway pavement is essential to ensuring safe and efficient transportation within urban communities. A well-maintained paved road network improves vehicle and pedestrian safety by providing a smooth, stable surface that reduces the risk of accidents and vehicle damage caused by uneven or unpaved roads. Proper pavement also improves traffic flow, reducing congestion and travel time for residents and businesses, thereby enhancing overall quality of life. Additionally, paved roads are more durable and resilient to weather conditions, preventing issues like erosion, dust, and water pooling, which can degrade unpaved surfaces over time and lead to costly repairs.

Unpaved roads, while potentially less costly to install initially, are impractical in urban environments due to their high long-term maintenance costs, susceptibility to weather damage, and poor durability under heavy traffic. Unpaved roads require frequent grading to remain passable, and they deteriorate quickly in adverse weather, leading to erosion, dust, and potholes. These factors not only increase ongoing maintenance costs but also result in poor road conditions that can negatively impact property values, vehicle repair costs, and public safety. While unpaved roads are not a practical solution for urban areas, they serve as the only feasible alternative for comparison in evaluating the costs and benefits of paved road improvements within urban improvement districts. Unpaved roadways do not meet the International Fire Code within urban areas.

Unpaved roads require significant ongoing maintenance to keep them functional. Over a 25-year period, the costs of maintaining an unpaved roadway include regular grading, dust control, erosion management, and resurfacing. Below is a breakdown of key expenses:

- Initial Installation Costs
- Routine Maintenance
 - Grading
 - Dust Control
 - Resurfacing
- Vehicle Damage and Safety Implications
- Additional costs to consider are related to delay time to the average use

The capital and maintenance costs of a typical collector or local roadway system are between \$4,500,000 and \$5,500,000 per mile.

Pavement preservation is a proactive approach that involves a series of low-cost, preventative maintenance treatments aimed at protecting our roadway network, extending pavement life, and meeting the needs of our citizens. While no pavement lasts forever, the timely application of these treatments can significantly extend the lifespan of the pavement, resulting in substantial cost savings.

The following pavement rehabilitation strategy is from the City of Dickinson’s *2023 Pavement Management Report (MDS Technologies, Inc., February 1, 2024)*:

8 Rehabilitation Programs and Budget Analysis

Effective management of a pavement network involves understanding how pavement deteriorates over time and applying appropriate maintenance and rehabilitation treatments at critical times in the life of a pavement to minimize the long-term cost of maintaining the network at a desirable condition level. The concept of pavement management is illustrated in Figure 4 below.

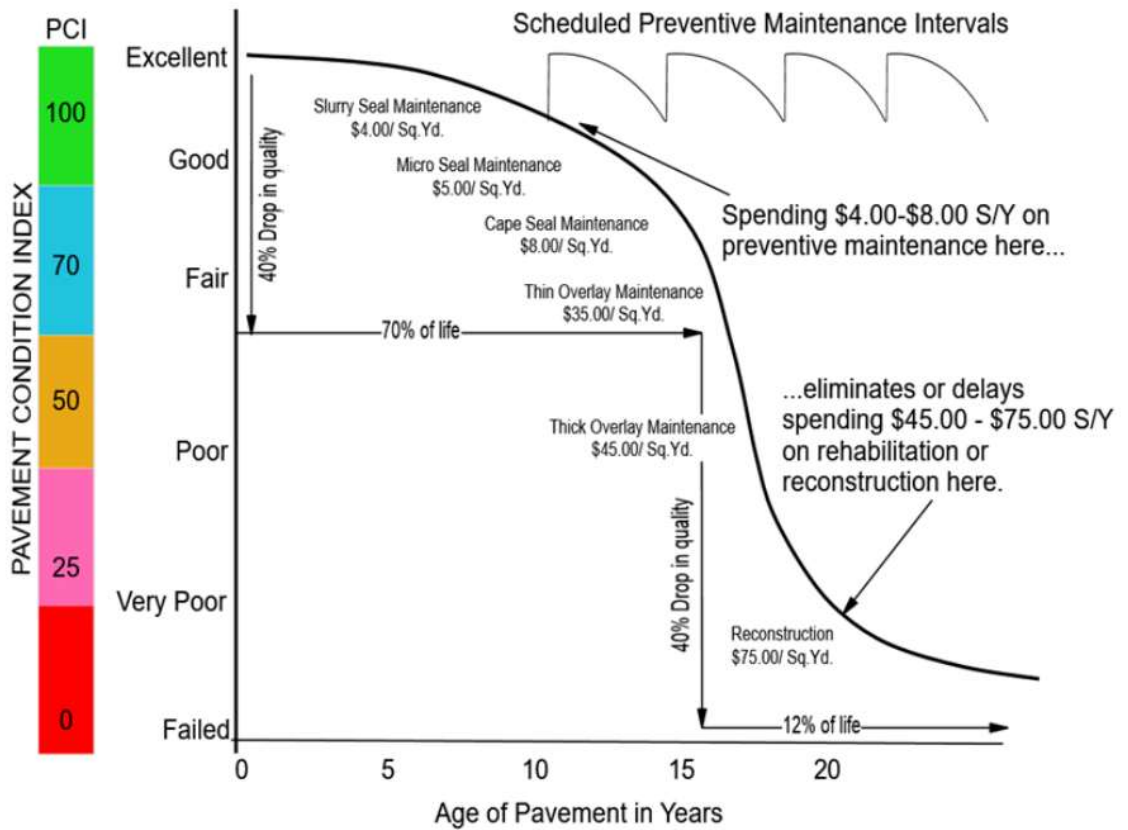

Figure 4: Pavement Management Concept and Effect of Timely Maintenance

Figure 4 shows that pavements typically do not deteriorate linearly. A pavement may experience only a 40 percent drop in quality over the first 70 percent of its life. During this time the life of a pavement may be extended significantly through the periodic application of relatively low-cost maintenance treatments. This is represented by the “shark-fin” shaped curve in the upper-right of the figure.

A failed roadway system not only requires costly repairs but also leads to indirect expenses for road users, including vehicle damage, increased fuel consumption, and more frequent maintenance needs. By implementing timely pavement preservation projects, smoother road surfaces are maintained, reducing these additional costs for the adjacent landowners. The pavement within the Special Improvement District existed prior to this project. It is important to note that the surface costs within the Special Improvement District are not being assessed to property owners, which further increases the benefits to the property owners.

SID Maps and Assessment Tables

Information pertaining to the SID is shown in Appendix 3. This includes the overall layout showing the related subdivisions and adjacent streets along with plan view drawings showing proposed improvements adjacent to each parcel and the assessment table for each parcel in the SID.

City of Dickinson
Special Assessment Policy

RESOLUTION NO. 39 - 2019

A RESOLUTION DECLARING A SPECIAL ASSESSMENT POLICY FOR COSTS FOR SIDEWALKS, CURB AND GUTTER IMPROVEMENTS

WHEREAS, the City of Dickinson intends to perform routine maintenance projects on asphalt and concrete streets, and

WHEREAS, the City of Dickinson has a limited amount of funding available to perform maintenance projects, and

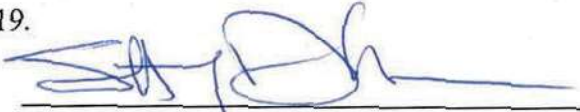

WHEREAS the City of Dickinson has the legal authority to assess costs for sidewalks and curb and gutter improvements to properties within the City Of Dickinson pursuant to N.D.C.C. Section 40-31-06 and Municipal Code Section 33.04.180.

NOW, THEREFORE, it is hereby resolved by the Board of City Commissioners, as follows:

1. There is hereby created a special assessment policy for street maintenance projects.
2. Sidewalk and curb and gutter improvements made in conjunction with the street maintenance projects will be assessed to the adjacent landowners except in the following conditions:
 - a. On corner lots, through the entirety of the radius around the corner.
 - b. Where otherwise satisfactory curb and gutter or sidewalk need to be replaced because of work being done on the street project, including lighting and signing.
 - c. Where curb and gutter or sidewalk about the back lot line of a property
 - d. Where at the discretion of the City Engineer, sidewalk installation is not feasible.
3. Of the eligible costs in Section 2, one hundred percent (100%) will be assessed to the benefitting properties.
4. The costs of assessments shall be paid by the benefitting properties over a ten (10) year term at a rate of 1.5% over the then current market interest rate at the time of construction.

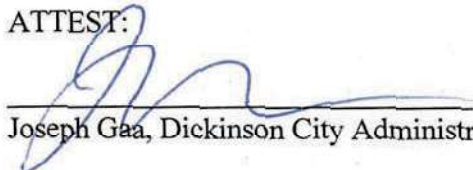

NOW, THEREFORE, BE IT RESOLVED that the Board of City Commissioners of the City of Dickinson, North Dakota creates a special assessment policy for street maintenance projects.

Dated this 17th day of December 2019.

Scott Decker, President
Board of City Commissioners

ATTEST:

Joseph Gaa, Dickinson City Administrator
