MEMORANDUM

To: Deadwood City Commission
From: City Department Heads
Re: Broadway Parking Ramp Sign Package

Earlier this year we received a design package for the signage in the Broadway Parking Ramp to improve compliance with payment and the users' experience in the ramp. I have received several quotes from sign manufacturers for this project. The only vendor that could meet the material and time requirements was Elite Signs, LLC. I the quote was broken into four parts for each floor of the parking ramp. One for \$8,753.68, \$8,403.84, \$8,263.38, and \$4,300.96. The total is \$29,721.86, which is consistent with what the other vendors provided.

Thank you for your consideration to this matter.

GENERAL SPECIFICATIONS

SUBMITTALS

A. SHOP DRAWINGS: Three (3) sets of detailed shop drawings (plans, elevations, and scale drawings) are to be submitted to the Owner and Designer for review prior to production. These drawings are to show/indicate all materials, finishes, construction details, lighting, and installation detailing of artwork and signage structure, including locations of all material seams (finished and unfinished). Additional drawing(s) may be requested by the Designer, at the contractor's expense, to further indicate items in question.

B. PRODUCT DATA: Submit manufacturer's technical data and installation instructions for each type of sign and/or fixture required, as will be provided in the completed, installed sign unit.

C. SPECIFIC SAMPLES: Submit two (2) 3" x 5" samples of all actual material to be used for each different finish surface, (each color and texture) coated to match the proper color texture and finish as for each indicated, to show the quality of fabrication and design. If there are material seams or welded joints in the sign cabinet, a sample of a continuously welded, ground, filed, and smoothed seam with the correct indicated finish(s) applied must be submitted for Designer review. Completed and installed components will be evaluated based on these submittals.

D. OTHER SAMPLES: Two (2) 3" x 5" samples of all exterior materials that can be viewed when all finished sign structures are completed and in place (in addition to those mentioned above) are to be submitted for Designer review prior to production. Items sampled would include those specified, as well as those materials proposed for substitution of specified materials, or suggested materials for those that are unspecified, including Neon (sample drawing will be provided).

E. STRUCTURE: Design of installation, internal structure, mounting assemblies and foundations by Sign Contractor: Sign Contractor shall submit two sets of comprehensive shop drawings incorporating an adequate foundation or mounting structure for all sign components, given site conditions. The sign contractor shall at his expense submit calculations, stamped by the appropriate Engineer registered in the state, of Final Installation for all structural members, including foundations for Owner's review.

F. ELECTRICAL REQUIREMENTS: Sign Contractor shall provide at the earliest possible time the specific electrical requirements (if any) to the Owner.

G. LAMP SERVICE: Sign Contractor to provide Designer and Owner with complete lamp replacement information—brand, type, wattage, color, etc.—for all lighted components. This information shall be in typewritten format (8-1/2" x 11") and shall indicate at least one local (site) supplier.

H. MAINTENANCE: Sign Contractor to provide Designer and Owner with complete finish/component care instructions as specified by manufactures for ongoing cosmetic sign cleaning and maintenance.

MATERIALS

A. ACRYLIC/COLOR TRANSLUCENT SHEET: Where sheet material is indicated as a "color," provide color translucent sheet of density required to produce uniform brightness without halo effects. Material provided shall be appropriately matched to the intended permanent field conditions.

B. ACRYLIC/TRANSPARENT SHEET: Where sheet material is indicated as "clear," provide colorless sheet in glass finish, with light transmittance of 92%, where tested in accordance with the requirements of ASTM D-1003.

C. ALUMINUM SHEET: Provide aluminum sheet of alloy and temper recommended by the aluminum producer or finisher for the type of use and finish indicated, and with not less than the strength and durability properties specified in ASTM B109 for 5005-H15.

D. ALUMINUM EXTRUSIONS: Provide aluminum extrusions of alloy and temper recommended by the aluminum producer or finisher for the type of use and finish indicated, and with not less than the strength and durability properties specified in ASTM B-221 for 6063-T5.

E. STRUCTURAL STEEL: Provide internal galvanized structural steel as required to meet the requirements of the permanent installation.

F. FASTENERS: Unless otherwise indicated, use concealed fasteners fabricated from metals that are non-corrosive to either the signage materials or the mounting surface.

G. ELECTRICAL/LAMPS: Provide new electrical components and respective lamps, so as to be easily repaired or replaced from local available stock. (24 hr. max. turnaround.)

H. VINYL WALL COVERING: Type II, PVC coated, 20 oz., 20 mil, passes flame test, ASTM E-84-98, Meets UL723, NFPA NO. 255, UBC 42-1 AND ANSI NO. 2.5.

I. PERMITS: Sign Fabricator is responsible for acquiring all necessary permits and approvals from all local authorities for contents of this package prior to fabrication and/or installation. Owner is to be supplied with copies of all permits and approvals.

J. ALTERNATE MATERIALS AND METHODS: All bids are to be based directly on the materials and fabrication techniques indicated in this drawing package. No alternates will be considered as part of the base bid. Any alternates suggested by the potential bidder must be quoted separately as alternates and must be accompanied by a complete description of the proposed alternate in order to be considered.

QUALITY ASSURANCE

A. UL COMPLIANCE: Provide lighting fixture and electrical components that are UL-labeled and listed. Indicate electrical service required and location for review by Designer.

B. LAMP EMISSION: All lighting fixtures/sources shall emit a color balanced, consistent, and uniform light with no browning, flickering, haloing, or other uneven effect.

C. ELECTRICAL HARDWARE: All transformers and electrical hardware shall be concealed, non-audible, and non-visible to pedestrian and vehicular traffic.

D. LABELING: Code permitting, there shall be no visible labels, manufacturer's or otherwise, on the completed signs. If labels are required, a sample label and intended location must be submitted for Designer review, prior to application.

E. STOCK: All materials, hardware, electrical components, finishes, etc., used to fabricate any and all sign components shall be "NEW" (not previously used or operated in any other application) and from the most recent original manufacturer's production run/supply and appropriately matched to the service conditions required of the site.

F. ARTWORK: Finished black and white, film positive or digital artwork for all symbols and other custom designed graphic components, such as logos, logo-type and arrow heads used for all sign types shall be furnished or specified by the Owner for reproduction. All enlarging and reducing is the responsibility of the Sign Contractor.

G. EXECUTION: Problems such as messages being too long to fit into the required formats, difficult logo or logo-type components to reproduce accurately, etc., must be brought to the attention of the Designer, prior to execution. It is required that the Sign Contractor not resolve these kinds of discrepancies.

H. OWNERSHIP: All graphic designs created by the Designer and/or Owner for this project are to be used exclusively for this project. The sign Contractor must receive express written permission from both the Designer and Owner for any use other than for the completion of this project, including self-promotion and publication. It is required that all original artwork furnished by the Owner be returned upon completion of this project. (Deposit may be required.)

I. ACCEPTANCE: All work shall be complete in every respect and satisfactory to all governing legislative authorities, building codes, the Owner, and the Designer.

WARRANTY

A. During the warranty period, the Contractor agrees to restore defective work to the standard of the Bid Documents without cost to the Client, including material and labor, for three years after acceptance of the Work.

B. Signs shall be warranted for five years against discoloration, UV fading, delamination, or deterioration.

C. Vinyl letters shall be warranted for five years against failing, to include but not limited to, cracking and delamination from substrate.

D. At project completion, the Contractor must include within a 3-ring binder material samples and all warranty information, to include but not limited to, labor, materials, products used, along with all lighting specifications and manufacturers' contact information.
