

BOARD OF COMMISSIONERS

BOARD OF COUNTY COMMISSIONERS MEETING

2:00 PM, MONDAY, JUNE 5, 2023

Allen Room - Deschutes Services Building - 1300 NW Wall St - Bend

(541) 388-6570 | www.deschutes.org

AGENDA

MEETING FORMAT: In accordance with Oregon state law, this meeting is open to the public and can be accessed and attended in person or remotely, with the exception of any executive session.

Members of the public may view the meeting in real time via YouTube using this link: <http://bit.ly/3mmlnzy>. To view the meeting via Zoom, see below.

Citizen Input: The public may comment on any topic that is not on the current agenda. Alternatively, comments may be submitted on any topic at any time by emailing citizeninput@deschutes.org or leaving a voice message at 541-385-1734.

When in-person comment from the public is allowed at the meeting, public comment will also be allowed via computer, phone or other virtual means.

Zoom Meeting Information: This meeting may be accessed via Zoom using a phone or computer.

- To join the meeting from a computer, copy and paste this link: bit.ly/3h3oqdD.
- To join by phone, call 253-215-8782 and enter webinar ID # 899 4635 9970 followed by the passcode 013510.
- If joining by a browser, use the raise hand icon to indicate you would like to provide public comment, if and when allowed. If using a phone, press *6 to indicate you would like to speak and *9 to unmute yourself when you are called on.

Deschutes County encourages persons with disabilities to participate in all programs and activities. This event/location is accessible to people with disabilities. If you need accommodations to make participation possible, call (541) 388-6572 or email brenda.fritsvold@deschutes.org.

CALL TO ORDER

CITIZEN INPUT: Citizen Input may be provided as comment on any topic that is not on the agenda.

Note: In addition to the option of providing in-person comments at the meeting, citizen input comments may be emailed to citizeninput@deschutes.org or you may leave a brief voicemail at 541.385.1734.

AGENDA ITEMS

1. **2:00 PM** Consideration to increase solid waste franchise fees from three percent to five percent to fund nuisance abatement compliance
2. **2:15 PM** Oregon Revised Statute (ORS) 197.307(4) "clear and objective" standards for rural residential housing
3. **2:35 PM** Work Session on Senate Bill 391 – Rural Accessory Dwelling Units Legislative Amendments

OTHER ITEMS

These can be any items not included on the agenda that the Commissioners wish to discuss as part of the meeting, pursuant to ORS 192.640.

EXECUTIVE SESSION

At any time during the meeting, an executive session could be called to address issues relating to ORS 192.660(2)(e), real property negotiations; ORS 192.660(2)(h), litigation; ORS 192.660(2)(d), labor negotiations; ORS 192.660(2)(b), personnel issues; or other executive session categories.

Executive sessions are closed to the public; however, with few exceptions and under specific guidelines, are open to the media.

ADJOURN

BOARD OF COMMISSIONERS

AGENDA REQUEST & STAFF REPORT

MEETING DATE: June 5, 2023

SUBJECT: Consideration to increase solid waste franchise fees from three percent to five percent to fund nuisance abatement compliance

RECOMMENDED MOTION:

None at this time.

BACKGROUND AND POLICY IMPLICATIONS:

Staff seeks Board consideration to amend Deschutes County Code sections 13.24.120 (Fees for Commercial Haulers) and 13.24.120 (Fees for Noncommercial Haulers) to increase solid waste franchise fees from three percent to five percent.

Earlier this year, the Community Development Department (CDD) approached the Solid Waste Department to discuss its need to address the increasing number of private properties that have accumulated large amounts of solid wastes onsite which require County involvement to ensure the abatement of these situations. Under DCC 13.36 Nuisances and Abatement, if a property is determined to be a nuisance, the County has the right and responsibility to ensure compliance to remediate the situation. CDD staff has worked with these types of properties for years to voluntarily remove materials and bring these properties back into compliance. However, the number of properties that are considered to be nuisances are increasing, and many of the owners have not voluntarily come back into compliance. Before these sites get any worse, and with the risk of them becoming an environmental hazard, CDD is anticipating moving into a different stage of enforcement that would allow the County to place liens on these properties and hire private contractors to remove the wastes and other materials from the sites. These operations will be significant and require funding that is not currently within the CDD budget. Seeing that these enforcements actions are for solid waste code violations, CDD staff approached the Solid Waste staff for funding in the amount of \$200,000 per year to support these enforcement activities.

Solid Waste staff identified the franchise fee as an appropriate funding mechanism to support the CDD's enforcement activity. The franchise fee is assessed primarily to the commercial franchise haulers which provide services to residents and commercial businesses within the unincorporated areas of the County as prescribed through the

franchise agreements with Cascade Disposal, Wilderness Disposal, Bend Garbage and Recycling, High Country Disposal, and Deschutes Transfer. The amount of the franchise fee is defined in and determined by the Deschutes County Code. The franchise fee is currently set at three percent of gross receipts for each of the commercial haulers, as well as for any non-commercial haulers. In 2021, these fees generated approximately \$354,000. A two percent increase in the franchise fee to five percent would generate approximately \$240,000 a year of additional revenue to support the funding request from CDD for abatement services. These revenues are subject to fluctuations due to the economic activities in the County's service areas.

This increase in the franchise fee would be passed on to residential and commercial customers through their monthly service fees. It is anticipated to impact the average residential customer rate by \$0.60 per month for a 65-Gallon garbage cart, and approximately \$6 per month for a commercial business receiving weekly service for a 4-cubic yard container. These impacts will vary depending on service levels and locations throughout the county.

These changes in the franchise fees have already been anticipated and included in the franchise rate modification request that Solid Waste staff is recommending to the Board of County Commissioners in June, 2023.

The purpose of the work session is to prepare for a public hearing before the Board regarding this proposal to increase the Solid Waste franchise fee.

BUDGET IMPACTS:

If the change in the franchise fee is adopted, the Solid Waste department will seek to amend the adopted FY '23-24 budget to increase the revenues in accordance with this change, and add an increase in M&S expenses of \$200,000 to account for the transfer of funds to CDD. Any additional revenues above this expense will be added to the Solid Waste Department's contingency. CDD and the Solid Waste department will develop a Memorandum of Understanding (MOU) that will further define the terms and timing of the funding arrangement.

ATTENDANCE:

- Chad Centola – Director of Solid Waste*
- Tim Brownell – Incoming Director of Solid Waste*

BOARD OF
COMMISSIONERS

AGENDA REQUEST & STAFF REPORT

MEETING DATE: June 5, 2023

SUBJECT: Oregon Revised Statute (ORS) 197.307(4) “clear and objective” standards

RECOMMENDED MOTION:

N/A

BACKGROUND AND POLICY IMPLICATIONS:

The Board of County Commissioners (Board) needs to begin considering the implications of clear and objective requirements for rural housing development. Following this briefing, staff will seek Board direction later in the summer at the conclusion of the 2023 Legislative Session.

BUDGET IMPACTS:

None

ATTENDANCE:

Will Groves, Planning Manager

COMMUNITY DEVELOPMENT

MEMORANDUM

TO: Deschutes County Board of Commissioners

FROM: Will Groves, Planning Manager

DATE: June 5, 2023

SUBJECT: Oregon Revised Statute (ORS) 197.307(4) "clear and objective" standards

The Board of County Commissioners (Board) needs to begin considering the implications of clear and objective requirements for rural housing development. Staff will seek Board direction later in the summer at the conclusion of the 2023 Legislative Session.

I. BACKGROUND

ORS 197.307(4)¹ requires local governments to "adopt and apply only clear and objective² standards, conditions and procedures regulating the development of housing." Prior to 2017, this rule clearly applied to only lands within Urban Growth Boundaries (UGBs). In 2017, the Governor signed Senate Bill (SB) 1051, which amended several statutes, including, ORS 197.307(4).

SB 1051 made two changes to the statute. First, it expanded the "clear and objective" requirement from "needed housing" to include "the development of housing, including needed housing[.]" Second, SB 1051 deleted the phrase "on buildable land." Both "needed housing" and "buildable land" constrained the applicability of ORS 197.307(4) to specific lands within UGBs. These changes expanded the applicability of this provision from lands within the UGB to all rural lands. In *Warren vs. Washington County* (2017), the Land Use Board of Appeals confirmed that ORS 197.307(4) precludes counties from applying any standards, conditions, and procedures that are not clear and objective to the development of housing.

To date, this preclusion has only been raised locally in Deschutes County file *Eden Central Properties* (247-23-000261-TP). In this application, the applicant argues many of the Title 17 provisions relating to subdivisions are not clear and objective and, thus, not enforceable. Staff anticipates increased use of ORS

¹ ORS 197.307(4) Except as provided in subsection (6) of this section, a local government may adopt and apply only clear and objective standards, conditions and procedures regulating the development of housing, including needed housing. The standards, conditions and procedures:

- (a) May include, but are not limited to, one or more provisions regulating the density or height of a development.
- (b) May not have the effect, either in themselves or cumulatively, of discouraging needed housing through unreasonable cost or delay.

² In order to be "clear" for purposes of ORS 197.307(4), a standard must be "clear enough for an applicant to know what he must show during the application process," it must be "easily understood and without obscurity or ambiguity," and it must not be capable of multiple constructions that support diametrically opposed conclusions.

197.307(4) to preclude application of County criteria to housing proposals or to appeal County housing decisions that are based on discretionary standards.

II. HB 3197 (2023)

In the current legislative session, House Bill (HB) 3197 was proposed to clarify that ORS 197.307(4) is only intended to apply within UGBs. As of early May, the bill is in its third set of amendments, specifying that the “clear and object requirements would apply to:

“...unincorporated communities designated in a county’s acknowledged comprehensive plan after December 5, 1994, nonresource lands and areas zoned for rural residential use as defined in ORS 215.501.”

These amendments also limit the clear and objective provisions to lands within UGBs until July 1, 2025. This would provide Counties with two years to review and update local code to comply with the clear and objective requirement. It is uncertain if this bill will be signed, and it is possible that land use code provisions relating to housing will remain unenforceable unless they are clear and objective for the foreseeable future.

III. IMPACTED COUNTY REGULATIONS

Following an initial review of County Code, Table 1 highlights some important sections of the Code that relate to housing and likely do not meet clear and objective requirements. Example discretionary criteria are identified below.

Table 1 – Impacted County Regulations

| Code Provision/Section | Example Criteria |
|--------------------------------|--|
| Title 17 - Subdivisions | <p>DCC 17.16.100(A) – <i>The subdivision contributes to the orderly development and land use patterns in the area...</i></p> <p>DCC 17.16.100 (B) – <i>The subdivision would not create excessive demand on public facilities, services and utilities required to serve the development.</i></p> |
| Title 17 - Partitions | <p>DCC 17.22.020(5) – <i>Each parcel is suited for the use intended or offered, considering the size of the parcels, natural hazards, topography and access.</i></p> <p>DCC 17.22.020(6) – <i>All required utilities, public services and facilities are available and adequate and are proposed to be provided by the petitioner.</i></p> |
| Title 18 - Definitions | DCC 18.04.030 – <i>Grade, Height, Single-Family, “Front” lot lines</i> |

| Code Provision/Section | Example Criteria |
|---|---|
| <p>Title 18 - Non-Farm Dwellings</p> | <p>DCC 18.16.050(G)(1)(a)(1) – <i>The dwelling or activities associated with the dwelling will not force a significant change in or significantly increase the cost of accepted farming practices, as defined in ORS 215.203(2)(c), or accepted forest practices on nearby lands devoted to farm or forest use.</i></p> <p>DCC 18.16.050(G)(1)(a)(2) – <i>The proposed nonfarm dwelling will not materially alter the stability of the overall land use pattern of the area. In determining whether a proposed nonfarm dwelling will alter the stability of the land use pattern in the area, the County shall consider the cumulative impact of nonfarm dwellings on other lots or parcels in the area similarly situated, by applying the standards under Oregon Administrative Rule (OAR) 660-033-0130(4)(a)(D), and whether creation of the parcel will lead to creation of other nonfarm parcels, to the detriment of agriculture in the area.</i></p> |
| <p>Title 18 - Forest Template Dwellings</p> | <p>DCC 18.36.040(A) - <i>The proposed use will not force a significant change in, or significantly increase the cost of, accepted farming or forest practices on agricultural or forest lands.</i></p> <p>DCC18.36.040(B) - <i>The proposed use will not significantly increase fire hazard or significantly increase fire suppression costs or significantly increase risks to fire suppression personnel.</i></p> |
| <p>Title 18 - Conditional Housing Approvals</p> <ul style="list-style-type: none"> • Planned Unit and Cluster Subdivisions (RR10, MUA10, Terrebonne) • Manufactured Home Park (Terrebonne, Tumalo, Rural Service Centers) • Recreational Vehicle Park (Terrebonne, Tumalo, Rural Commercial) • Multifamily Dwellings (Terrebonne, Tumalo, Rural Service Centers) | <p>DCC 18.128.015(A) - <i>The site under consideration shall be determined to be suitable for the proposed use based on the following factors:</i></p> <ol style="list-style-type: none"> 1. <i>Site, design and operating characteristics of the use;</i> 2. <i>Adequacy of transportation access to the site; and</i> 3. <i>The natural and physical features of the site, including, but not limited to, general topography, natural hazards and natural resource values.</i> <p>B. <i>The proposed use shall be compatible with existing and projected uses on surrounding properties based on the factors listed in DCC 18.128.015(A).</i></p> |
| <p>Title 18 - Goal 5 Resource Protections (Sensitive Bird and Mammal Combining Zone, Wetland/Riparian Protections, Landscape Management Corridors, Wildlife Inventories, Surface Mining, Cultural Resources)</p> | <p>DCC 18.84.080(D) - <i>Subject to applicable rimrock setback requirements or rimrock setback exception standards in DCC 18.84.090(E), all structures shall be sited to take advantage of existing vegetation, trees and topographic features in order to reduce visual impact as seen from the designated road, river or stream. When more than one nonagricultural structure is to exist and no vegetation, trees or topographic features exist which can reduce visual impact of the subject structure, such structure shall be clustered in a manner which reduces their visual impact as seen from the designated road, river, or stream.</i></p> |

IV. RURAL ACCESSORY DWELLING UNITS AND OTHER CODE CHANGES

ORS 197.307(4) also requires that any new County Code relating to housing have clear and objective standards. Any new code adopted not meeting this requirement will potentially be subject to facial challenge. This impacts two in-process code updates:

- **Accessory Dwelling Units** – Staff is working with Legal Counsel to update draft code language to incorporate clear and objective requirements for rural accessory dwelling units (ADUs).
- **2023 Mule Deer Update** – This amendment was designed with clear and objective standards, due to a similar clear and objective requirement in OAR 660-023-0050(2) for Goal 5 resources.

V. ALTERNATIVE STANDARDS

Clear and objective standards have the potential to reduce developer and community uncertainty on how regulations will be applied to a project. Properly implemented, these standards can reduce the likelihood and viability of appeals to land use decisions. However, they also can limit a County’s ability to use discretion to respond to special circumstances related to wildlife and floodplain protections, compatibility to adjoining uses, or novel situations. Fortunately, the clear and objective requirements of ORS 197.307(4) and OAR 660-023-0050(2) each allow Counties to adopt an alternative subjective code pathway when a clear and objective code pathway is also available. However, Staff anticipates increased time and effort will be required to design, adopt, defend, and maintain multiple code approval pathways.

VI. ACTIONS UNDERTAKEN AND FUTURE OPPORTUNITIES

To date, staff has coordinated with Association of Oregon Counties (AOC) to track and discuss this issue. As described above, it is unclear if House Bill 3197 will be signed this year and, under this bill, if Counties will have a two-year window to update local code provisions. While legislative changes may be possible in the short 2024 Legislative Session, there are presently no legislative concepts that have been raised outside of House Bill 3197 (2023).

Regardless, meeting clear and objective requirements imposes significant demands on Counties in the form of regulatory uncertainty, increased likelihood of land use appeals, cumbersome code audits and updates, and anticipated legal challenges to those updates. The possibility of reconciling statutory requirements and Goal 5 resource protections would likely require significant restructuring of the associated local code provisions through robust public processes.

As we await the outcome of HB 3197, staff recommends the Board begin considering responses to these issues, which include but are not limited to:

1. Engage AOC and Central Oregon’s legislative representatives to support a legislative concept for the 2024 Legislative Session that limits ORS 197.307(4) to:
 - o UGBs and/or;

- Areas zoned for residential uses outside of UGBs, clear and objective standards apply when a county is not implementing regulatory programs that address Goal 5 (Wildlife) and/or Goal 7 (Natural Hazards) consistent with their Comprehensive Plan.
2. Prioritize amendments to County Code to comply with ORS 197.307(4) upon completion of the Comprehensive Plan Update, Tumalo Community Plan Update, Transportation System Plan Update, Mule Deer Winter Range Inventory, and Rural ADU amendments. Emerging capacity is anticipated in fall 2023. Other discretionary projects identified in the Planning Division's FY 2023/24 Work Plan, including processing applicant-initiated text amendments and quasi-judicial plan amendment, zone change applications would likely be placed on hold due to staffing constraints.

BOARD OF COMMISSIONERS

AGENDA REQUEST & STAFF REPORT

MEETING DATE: June 5, 2023

SUBJECT: Work Session on Senate Bill 391 – Rural Accessory Dwelling Units Legislative Amendments

BACKGROUND AND POLICY IMPLICATIONS:

The first of two required public hearings concerning local provisions for rural accessory dwelling units as identified in Senate Bill 391 was held by the Deschutes County Planning Commission (Commission) on September 22, 2022. During this work session, staff will provide an overview of the proposed amendments, recent state legislative changes, comments received on the proposal to date, and recommendations from the Commission.

Staff will seek further direction from the Board concerning next steps on the proposed amendments, including future hearing dates.

BUDGET IMPACTS:

None

MEMORANDUM

TO: Board of County Commissioners

FROM: Kyle Collins, Associate Planner
Will Groves, Planning Manager

DATE: May 31, 2023

SUBJECT: Senate Bill (SB) 391 Work Session – Rural Accessory Dwelling Unit (ADU) Legislative Amendments

I. OVERVIEW

The Board of County Commissioners (Board) will conduct a work session on June 5, 2023 concerning local provisions for rural ADUs as identified in Senate Bill (SB) 391¹ (file no. 247-22-000671-TA). Staff submitted a 35-day Post-Acknowledgement Plan Amendment (PAPA) notice to the Department of Land Conservation and Development (DLCD) on August 17, 2022. A public hearing was held with the Planning Commission (Commission) on September 22, 2022². The Commission held deliberations on October 27, 2022³ and the recommendations from that meeting are discussed herein and within provided attachments. Additional sections describe recent state legislative changes associated with SB 644, which broadly affect rural ADU standards.

Attached to this memorandum are:

- Staff Report and Draft Amendments (Attachment 1)⁴
- Memo Summarizing Planning Commission Recommendations, Public Comments, and Agency Comments (Attachment 2)
- Memo Summarizing Anticipated Property Eligibility for Rural ADU Development (Attachment 3)

¹ <https://olis.oregonlegislature.gov/liz/2021R1/Downloads/MeasureDocument/SB0391/A-Engrossed>

² See Deschutes County Planning Commission September 22, 2022 Agenda for more information: <https://www.deschutes.org/bc-pc/page/planning-commission-17>

³ See Deschutes County Planning Commission October 27, 2022 Agenda for more information: <https://www.deschutes.org/bc-pc/page/planning-commission-21>

⁴ Within the proposed amendments, added language is shown underlined and deleted shown as strikethrough.

II. BOARD DECISION POINTS

Given recent state legislative changes, staff requests direction from the Board on the following matters:

- Per recent legislative changes to SB 391, should staff initiate a new PAPA notice to DLCD to capture all edits now incorporated in the proposed amendments?
 - A new PAPA notice would restart the ADU adoption process and allow for additional public comment opportunities at subsequent public hearings.
 - DLCD staff has provided feedback that they believe a new PAPA **is not** required to capture the minor edits to the original amendments. However, staff notes there is an unknown level of legal vulnerability associated with not reinitiating the adoption process.
- Should the Commission be given an additional opportunity to review the modified amendments and provide feedback?
 - Primarily, SB 644 removes the connection between the Statewide Map of Wildfire Risk associated with SB 762 and the development of local ADU standards. Additional changes have been included to establish clear and objective standards for rural ADU development. The Board should determine if these changes warrant additional review by the Commission.
- Should staff proceed with the initial PAPA timeline and begin scheduling a public hearing before the Board?
 - Per DCC 22.12.020(A), staff will need a **minimum of 10 days prior to any scheduled hearing** to provide formal public notice.

III. RECORD

The full record is available for inspection at the Planning Division and at the following website: <https://www.deschutes.org/adu>.

IV. STATE REGULATIONS

SB 391 and SB 644 contain several provisions related to properties eligible for rural ADUs which cannot be amended by counties. Those criteria and restrictions are highlighted in the table below:

Table 1: SB 391 – Rural Accessory Dwelling Unit Standards

| Eligibility | Restrictions |
|--|--|
| 1. Rural Residential Exception Areas, Minimum Lot Size, and Dwelling Requirements | <ul style="list-style-type: none"> Applies to Rural Residential (RR10), Multiple Use Agricultural (MUA10), Urban Area Reserve (UAR-10), Suburban Residential (SR 2.5), and Westside Transect (WTZ) zones. Lot or parcel must be at least two (2) acres in size. One (1) single-family dwelling must be sited on the lot or parcel. |
| 2. Existing Dwelling Nuisance | <ul style="list-style-type: none"> The existing single-family dwelling is not subject to an order declaring it a nuisance or pending action under ORS 105.550 to 105.600. |
| 3. ADU Sanitation Requirements | <ul style="list-style-type: none"> The ADU must comply with all applicable laws and regulations relating to sanitization and wastewater disposal and treatment. |
| 4. ADU Square Footage Requirements | <ul style="list-style-type: none"> The ADU cannot include more than 900 square feet of useable floor area. |
| 5. ADU Distance Requirements | <ul style="list-style-type: none"> The ADU is required to be located no farther than 100 feet from the existing single-family dwelling. |
| 6. ADU Water Supply Requirements | <ul style="list-style-type: none"> If the ADU is relying on a domestic well, no portion of the lot or parcel can be within new or existing ground water uses restricted by the Water Resource Commission. |
| 7. ADU Water Supply Source Option | <ul style="list-style-type: none"> A county may require that an ADU be served by the same water supply source or water supply system as the existing single-family dwelling, provided such is allowed by an existing water right or a use under ORS 537.545 (exempt uses).⁵ |
| 8. ADU / Metolius Area of Critical State Concern / Limitations | <ul style="list-style-type: none"> No portion of a lot or parcel can be within a designated area of critical state concern. |
| 9. ADU Setback Requirements | <ul style="list-style-type: none"> The ADU is required to have adequate setbacks from adjacent lands zoned Exclusive Farm Use (EFU) or Forest Use. |
| 10. ADU / Wildland-Urban Interface Requirements | <ul style="list-style-type: none"> The lot or parcel must comply with the rules of the State Board of Forestry under ORS 477.015 to 477.061. |
| 11. ADU / Outside Wildland-Urban Interface (WUI) Area Requirements | <ul style="list-style-type: none"> If the ADU is not subject to ORS 477.015 to 477.061 (i.e. outside of the newly-defined wildland-urban interface), it must have defensible space and fuel break standards as developed in consultation with local fire protection service providers. |
| 12. ADU / Statewide Wildfire Map Requirements | <ul style="list-style-type: none"> Applies to properties identified as high or extreme risk and located within a designated WUI on the statewide wildfire risk maps established per SB 762. ADUs identified as high or extreme risk are required to comply with the Oregon residential specialty code relating to wildfire hazard mitigation for the mapped area (R327.4). Per SB 644, prior to release of the statewide wildfire risk maps, all ADUs, regardless of future risk classification, are required to comply with the Oregon residential specialty code relating to wildfire hazard mitigation (R327.4). |
| 13. ADU Adequate Access and Evacuation for Firefighting Requirements | <ul style="list-style-type: none"> Local regulations must ensure the ADU has adequate access for firefighting equipment, safe evacuation and staged evacuation areas |

⁵ https://oregon.public.law/statutes/ors_537.545

| Eligibility | Restrictions |
|---|---|
| 14. ADU Occupancy Requirements | <ul style="list-style-type: none"> ADUs cannot be allowed for vacation occupancy, as defined in ORS 90.100. |
| 15. ADU Land Division Requirements | <ul style="list-style-type: none"> If an eligible property with an ADU is divided, the single family dwelling and ADU cannot be situated on a different lot or parcel. |
| 16. ADU / Additional Units | <ul style="list-style-type: none"> A second ADU is not allowed. |

V. DESCHUTES COUNTY INTERPRETATIONS

Numerous portions of the SB 391 language were not defined during the legislative process and thus were left open to interpretation by local jurisdictions that elect to allow rural ADUs. Specifically, the following items were not explicitly defined:

- “Useable Floor Area” as related to the 900-square-foot size limitation for rural ADUs.
- The specific standards of the 100-foot site distance requirements for rural ADUs.
- Adequate access for firefighting equipment, safe evacuation, and staged evacuation areas.

As summarized in Table 2, staff drafted the proposed amendments to address these areas in the following manner:

Table 2: Draft Interpretations

| Undefined SB 391 Standard | Draft County Interpretation |
|---------------------------------|--|
| Useable Floor Area | <ul style="list-style-type: none"> Means the living space area of the accessory dwelling unit included within the surrounding insulated exterior walls, exclusive of garages, carports, decks and porch covers. All portions of accessory dwelling units that do not meet the definition of “usable floor area” shall not be improved with the following: <ul style="list-style-type: none"> ○ Kitchen, kitchenette, or other cooking facilities; ○ Sleeping quarters; and/or ○ Facilities for washing and/or drying laundry. |
| 100-Foot Siting Distance | <ul style="list-style-type: none"> A unit must be located no farther than 100 feet from the existing single family dwelling, measured from a wall of the single-family dwelling to the nearest part of the “useable floor area” of the accessory dwelling unit. |

| Undefined SB 391 Standard | Draft County Interpretation |
|--|---|
| <p>Adequate Access and Evacuation for Firefighting Requirements</p> | <ul style="list-style-type: none"> • “Safe evacuation plan” means an identifiable route on a right(s)-of-ways from the rural accessory dwelling unit to the staged evacuation area. • “Staged evacuation area” means a public or private location that occupants of the rural accessory dwelling unit may evacuate to reorganize. • “Adequate access” means a continuous, minimum 20-foot width right-of-way, connecting an accessory dwelling with a fire protection service provider. The right-of-way must be improved and composed of an all-weather surface including asphalt, concrete, or gravel, but excluding cinders and other aggregate materials. <ul style="list-style-type: none"> ○ Alternatively, property owners may demonstrate adequate access by providing written certification from a fire protection service provider with professionals who have received training or certification described in ORS 181A.410, on a form prepared by Deschutes County, that access to the property meets minimum fire district requirements to provide emergency services to the property. |

The following items describe supplemental development standards recommended by Community Development staff to ensure safe operations for any ADUs constructed within Deschutes County.

Groundwater Protection

Due to vulnerable groundwater characteristics in southern Deschutes County, the Onsite Wastewater Division recommends increasing the minimum lot or parcel size for rural ADUs to be at least five (5) acres in size in this specific geographic area. The draft amendments as presented include this provision. Additionally, in consultation with the Onsite Wastewater Division, staff has explored the possibility of requiring advanced wastewater treatment systems for ADU development in southern Deschutes County. Further details are included as part of the attached Commission recommendation and discussion memo (Attachment 2).

Additional Dwelling Units

Due to concerns regarding failing treatment systems and groundwater impacts, the Onsite Wastewater Division recommends limiting properties constructed with ADUs from all future residential dwelling development, including additional ADUs, medical hardship dwellings, and temporary dwellings within recreational vehicles or similar uses. The draft amendments as presented include this provision. Further details are included as part of the attached Commission recommendation and discussion memo (Attachment 2).

VI. WILDFIRE STANDARDS

Senate Bill 762

Certain properties in rural Deschutes County will likely be subject to new wildfire mitigation measures as approved under SB 762.⁶ One of the primary pieces of SB 762 is the creation of a comprehensive

⁶ SB 762 (2021)

Statewide Map of Wildfire Risk to guide new wildfire regulations for development. The initial risk map was made available on June 30, 2022.⁷ However, based on significant concern from citizens and interest groups through the state, the Oregon Department of Forestry (ODF) withdrew the initial risk map to provide more time for additional public outreach and refinement of risk classification methodologies. At this time, it is unclear when ODF anticipates releasing new risk maps.

Due to the current unavailability of fire risk maps, staff cannot provide specific estimates on the number of properties which may be subject to additional wildfire mitigation standards. Additionally, per direction from County Legal Counsel (discussed in detail during a November 14, 2022 work session with the Board⁸), the specific language of SB 391 originally mandated that no properties would be eligible for rural ADUs, despite adoption of County standards which approve said use within the County Comprehensive Plan and zoning ordinances, until such time as a new iteration of a Statewide Map of Wildfire Risk is formally released by ODF.

Once these risk maps are finalized, properties included in **both** a designated Wildland Urban Interface (WUI) boundary and classified as either high or extreme risk within the Statewide Map of Wildfire Risk will be subject to additional development regulations. Properties meeting both of these standards will be subject to:

- 1) Home hardening building codes as described in section R327 of the 2021 Oregon Residential Specialty Code
- 2) Defensible space standards as determined by the Oregon State Fire Marshal.

At present, the State Fire Marshal has yet to develop final statewide defensible space requirements.

Senate Bill 644

SB 644 was recently passed by the Oregon State Legislature⁹. SB 644 effectively decouples the Statewide Map of Wildfire Risk from the adoption of any local rules allowing rural ADUs. During any interim period where a local jurisdiction has adopted rules allowing rural ADUs and prior to the release of the final risk map, any constructed ADUs will be subject to the home hardening building codes as described in section R327 of the 2021 Oregon Residential Specialty Code.

SB 644 does not alter the original defensible space standards of SB 762. At the urging of County Legal Counsel and to provide for clear and objective standards, staff has proposed supplemental defensible space rules for all ADU development which occurs prior to adoption and release of the Statewide Map of Wildfire Risk. The proposed defensible space standards are based on existing rules within the Forest Use Zones (F1 and F2) and would be effectively removed after final adoption of the final risk map.

VII. NEXT STEPS

As discussed above, the Board will need to make a decision on the following points:

- Per recent legislative changes to SB 391, should staff initiate a new PAPA notice to DLCD to capture all edits now incorporated in the proposed amendments?
- Should the Planning Commission be given an additional opportunity to review the modified amendments and provide feedback?
- Should staff proceed with the initial PAPA timeline and begin scheduling a public hearing before the Board?

At the conclusion of the meeting, the Board can:

- Set a date for a future Board public hearing; or
- Select an alternative hearing date based on new Commission review or PAPA submittal

STAFF REPORT

FILE NUMBER: 247-22-000671-TA

APPLICANT: Deschutes County Community Development
117 NW Lafayette Avenue
Bend, Oregon 97703

PROPERTY OWNER: N/A

REQUEST: Pursuant to Senate Bills (SB) 391 and 644, Text Amendments to allow an owner of a lot or parcel within a rural residential exception area to construct one accessory dwelling unit (ADU) subject to certain restrictions and limitations.

STAFF CONTACT: Kyle Collins, Associate Planner

I. APPLICABLE CRITERIA:

Deschutes County lacks specific criteria in DCC Titles 18, 19, 22, or 23 for reviewing a legislative text amendment. Nonetheless, since Deschutes County is initiating a legislative text amendment, the County bears the responsibility for justifying that the amendments are consistent with Statewide Planning Goals and its existing Comprehensive Plan

II. BASIC FINDINGS:

A. Senate Bill 391

On June 23, 2021, the Oregon Legislature adopted Senate Bill (SB) 391, which authorizes counties to allow an owner of a lot or parcel within a rural residential exception area to construct one accessory dwelling unit (ADU) subject to certain restrictions and limitations. SB 391 does not obligate a county to allow ADUs, nor does it prohibit a county from imposing any additional restrictions beyond what is mandated in state law.

Rural residential exception areas and their corresponding zones exist throughout Oregon. By definition, rural residential zones exist outside urban growth boundaries (UGBs), but are excluded

1 https://olis.oregonlegislature.gov/liz/2021R1/Downloads/MeasureDocument/SB391

from the state’s resource land (farm and forest zone) protections. While the protections afforded to resource lands allow residential uses only in conjunction with a farm or forest use, rural residential zones allow a dwelling as a primary use of the land. Prior to the adoption of SB 391, state law allowed counties to permit an additional dwelling on a property containing a house built prior to 1945.² However, unlike urban zones, rural residential zones did not have other by-right accessory dwelling options, making inter-generational and alternative housing options difficult to achieve.

SB 391 only authorizes ADUs on lands zoned for rural residential use. Areas zoned for rural residential use are defined by ORS 215.501 to mean “land that is not located inside a UGB as defined in ORS 195.060 (Definitions) and that is subject to an acknowledged exception to a statewide land use planning goal relating to farmland or forestland and planned and zoned by the county to allow residential use as a primary use.” The applicable zoning designations in Deschutes County for these lands are Multiple Use Agricultural (MUA-10), Rural Residential (RR-10), Suburban Low Density Residential (SR 2.5), Urban Area Reserve (UAR-10), and Westside Transect Zone (WTZ).

B. Senate Bill 644

On May 8, 2023, the Oregon Legislature adopted Senate Bill (SB) 644, which amends requirements relating to wildfire hazard mitigation for development of accessory dwelling units on lands zoned for rural residential use.³ Prior to adoption of SB 644, counties were required to wait for final adoption of the State Map of Wildfire Risk from the Oregon Department of Forestry (ODF) as identified in SB 762⁴ prior to adoption of any local administering rural ADU standards. SB 644 decouples adoption of the Statewide Map of Wildfire Risk from the adoption of any local rules allowing rural ADUs. During any interim period where a local jurisdiction has adopted rules allowing ADUs and prior to the release of the final risk map, any constructed ADUs will be subject to the home hardening building codes as described in section R327 of the 2021 Oregon Residential Specialty Code.

C. Deschutes County Rural ADU Ordinance

In addition to only applying to lands recognized as rural residential exception areas, SB 391 also contains minimum criteria that must be met for a lot or parcel to qualify for an ADU. Many of those criteria are general in nature and therefore require counties to provide their own interpretations or definitions. At the same time, SB 391 contains several provisions related to wildfire hazard mitigation, which relied on and referred to actions at the state level as directed by the passage of SB 762, a comprehensive wildfire hazard mitigation bill.⁵ While wildfire requirements were being created at the state level, staff worked with the Board of County Commissioners to “translate” the language of SB 391 into the local code presented in these amendments.

² House Bill 3012 (2017).
³ <https://olis.oregonlegislature.gov/liz/2023R1/Downloads/MeasureDocument/SB644/Enrolled>
⁴ <https://olis.oregonlegislature.gov/liz/2021R1/Downloads/MeasureDocument/SB762/Enrolled>
⁵ SB 1533 (2022) corrected broken links in SB 762 related to wildfire mapping.

III. PROPOSAL:

This is a legislative text amendment to Deschutes County Code (DCC), Title 18, County Zoning, and Title 19, Bend Urban Growth Boundary Zoning Ordinance. The primary purpose of the amendments is to allow rural ADUs per the adoption of SB 391 and SB 644. The proposal creates two new subsections (effectively the same, but pertaining to different zones in Titles 18 and 19) that govern the criteria for rural ADUs. Table 1 provides a summary of each provision of the amendments.

Table 1 – SB 391 Requirements

| Topic | SB 391 Requirements | Comment |
|--|--|---|
| Single Family Dwelling | SB 391 Section 2(2)(c) requires one single-family dwelling to be located on the lot or parcel. | DCC 18.116.370(B)(1) and DCC 19.92.160(B)(1) are consistent with SB 391. |
| Urban Reserve Area | SB 391 Section 2(b) requires that the lot or parcel is not located within an area designated as an urban reserve as defined in ORS 195.137. In Deschutes County, the Redmond Urban Reserve Area is the only urban reserve that meets this definition. | DCC 18.116.370(B)(2) is consistent with SB 391. Redmond’s Urban Reserve Areas is not near lands zoned in Title 19, therefore it is not cited in DCC 19.92.160. |
| Nonresource Lands | SB 391 Section 2(1)(b) requires that “Area zoned for rural residential use” has the meaning given that term in ORS 215.501. ORS 215.501(1)(b), “Area zoned for rural residential use” means land that is not located inside an urban growth boundary as defined in ORS 195.060 (Definitions) and that is subject to an acknowledged exception to a statewide land use planning goal relating to farmland or forestland and planned and zoned by the county to allow residential use as a primary use. | Pursuant to DLCD, Acknowledged nonresource plan amendments and zone changes from Exclusive Farm Use (EFU) to RR-10 or MUA-10 are eligible for an ADU. |
| Areas of Critical State Concern | SB 391 Section 2(2)(i) requires that no portion of the lot or parcel is within a designated area of critical state concern. Areas of critical state concern are generally defined in ORS 197.405 and apply to the Metolius Area of Critical State Concern in ORS 197.416. | DCC 18.116.370(B)(3) is consistent with SB 391. The Metolius Area of Critical State Concern is not near lands zoned in Title 19, therefore it is not cited in DCC 19.92.160. |
| Minimum Lot Size | SB 391 Section 2(2)(b) requires the subject lot or parcel be at least two acres in size. | DCC 18.116.370(B)(4) and DCC 19.92.160(B)(2) are consistent with SB 391. DCC 18.116.370(B)(4) requires a minimum lot or parcel to be at least 5 acres in size south of Sunriver due to groundwater protection. |
| Setbacks | SB 391 Section 2(2)(m)(A) requires that the ADU has adequate setbacks from adjacent lands zoned for resource use. | DCC 18.116.370(B)(5) and DCC 19.92.160(B)(3) are consistent with SB 391. Both require a minimum setback of 100 feet between the ADU and adjacent EFU and Forest Use zoned (F-1, F-2) properties. |

| Topic | SB 391 Requirements | Comment |
|---|---|---|
| ADU Size | SB 391 Section 2(2)(f) limits the size of the ADU to 900 square feet of useable floor area. | DCC 18.116.370(B)(6) and DCC 19.92.160(B)(4) are consistent with SB 391. Usable floor area is defined as, "the area of the accessory dwelling unit included within the surrounding insulated exterior walls, exclusive of garages, carports, decks and porch covers." |
| Distance from Dwelling | SB 391 Section 2(2)(g) requires the ADU to be located no farther than 100 feet from the single family dwelling. ⁶ | DCC 18.116.370(B)(7) and DCC 19.92.160(B)(5) are consistent with SB 391. Both require the ADU be located no farther than 100 feet from the existing single family dwelling, measured from a wall of the single-family dwelling to the nearest part of the useable floor area of the ADU. |
| Sanitation and Wastewater | SB 391 Section 2(2)(e) requires the ADU to comply with applicable sanitation and wastewater regulations. | DCC 18.116.370(B)(8) and DCC 19.92.160(B)(6) are consistent with SB 391. |
| Fire Protection District Service | SB 391 Section 2(2)(j) requires the lot or parcel be served by a fire protection service provider with professionals who have received training or certification described in ORS 181A.410. | DCC 18.116.370(B)(9) and DCC 19.92.160(B)(7) are consistent with SB 391. |
| Access and Evacuation | SB 391 Section 2(2)(m)(B) requires that the ADU has adequate access for firefighting equipment and safe evacuation and staged evacuation areas. | DCC 18.116.370(B)(10) and DCC 19.92.160(B)(8) are consistent with SB 391. Both require certification of access by the applicable fire protection district and that there are evacuation plan and authorized staged evacuation areas. |
| Wildland Urban Interface (WUI) Defensible Space Requirements | SB 1533 Section 5(2)(k) requires that if the lot or parcel is in an area identified on the statewide map of wildfire risk described in ORS 477.490, as within a WUI with a high to extreme risk classification, the lot or parcel must comply with any applicable minimum defensible space requirement for wildfire risk reduction established by the State Fire Marshal under ORS 476.392. | DCC 18.116.370(B)(12) and (13), and DCC 19.92.160(B)(10) and (11) are consistent with SB 391. Consistent with SB 644, the code sections identify alternatives for properties wishing to develop rural ADUs prior to and after the adoption of the State Map of Wildfire Risk identified in SB 762. |

⁶ The bill language and legislative history are unclear if the entire ADU must be entirely within 100 feet of the dwelling or just a portion. Local governments are therefore granted deference to interpret this provision.

| Topic | SB 391 Requirements | Comment |
|--|---|---|
| Wildland Urban Interface (WUI) Fire Hardening | SB 762 Section 12 requires that if the lot or parcel is in an area identified on the statewide map of wildfire risk described in ORS 477.490, as within a WUI with a high to extreme risk classification, the ADU must comply with R327 (fire hardening standards) in the Oregon Residential Specialty Code. | DCC 18.116.370(B)(12) and (13), and DCC 19.92.160(B)(10) and (11) are consistent with SB 391. Consistent with SB 644, the code sections identify alternatives for properties wishing to develop rural ADUs prior to and after the adoption of the State Map of Wildfire Risk identified in SB 762. |
| Nuisance | SB 391 Section 2(2)(d) requires that the ADU complies with applicable sanitation and wastewater regulations. | DCC 18.116.370(B)(14) and DCC 19.92.160(B)(12) are consistent with SB 391. |
| Subdivision and Other Accessory Dwelling Unit Limitations | SB 391 Section 2(4)(a) and (b) preclude a subdivision, partition or other division of the lot or parcel so that the existing single-family dwelling is situated on a different lot or parcel than the ADU; and precludes construction of an additional ADU on the same lot or parcel. | DCC 18.116.370(B)(15) and DCC 19.92.160(B)(13) are consistent with SB 391. |
| Water Supply | SB 391 Section 2(5) allows a county to require that the ADU be served by the same water source or water supply system as the existing single-family dwelling. If the ADU is served by a well, the construction of the ADU shall maintain all setbacks from the well required by the Water Resources Commission or Water Resources Department. | DCC 18.116.370(B)(16) and DCC 19.92.160(B)(14) are consistent with SB 391. While not requiring the same water source, DCC 18.116.370(B)(16) and DCC 19.92.160(B)(14) require setbacks from the well to be maintained from an ADU. |
| Water Right Exempt Use | SB 391 Section 2(6) recognizes that a single family dwelling and an ADU are considered a single unit and therefore do not require a groundwater permit from the Oregon Water Resources Department. ⁷ | DCC 18.116.370(B)(18) and DCC 19.92.160(B)(16) are consistent with SB 391. |
| Vacation Occupancy | SB 391 Section 2(3) prevents an ADU from being used for vacation occupancy as defined in ORS 90.100. | DCC 18.116.370(B)(19) and DCC 19.92.160(B)(17) are consistent with SB 391. Both require a restrictive covenant be recorded to ensure compliance. |

⁷ Deschutes County does not contain any critical groundwater areas as defined by the Water Resources Commission.

IV. FINDINGS:

CHAPTER 22.12, LEGISLATIVE PROCEDURES

Section 22.12.010.

Hearing Required

FINDING: This criterion will be met because a public hearing was held before the Deschutes County Planning Commission and Board of County Commissioners.

Section 22.12.020, Notice

Notice

A. Published Notice

- 1. Notice of a legislative change shall be published in a newspaper of general circulation in the county at least 10 days prior to each public hearing.***
- 2. The notice shall state the time and place of the hearing and contain a statement describing the general subject matter of the ordinance under consideration.***

FINDING: This criterion will be met as notice was published in the Bend Bulletin newspaper for the Planning Commission public hearing, and the Board of County Commissioners' public hearing.

B. Posted Notice. Notice shall be posted at the discretion of the Planning Director and where necessary to comply with ORS 203.045.

FINDING: Posted notice was determined by the Planning Director not to be necessary.

C. Individual notice. Individual notice to property owners, as defined in DCC 22.08.010(A), shall be provided at the discretion of the Planning Director, except as required by ORS 215.503.

FINDING: Given the proposed legislative amendments do not apply to any specific property, no individual notices were sent.

D. Media notice. Copies of the notice of hearing shall be transmitted to other newspapers published in Deschutes County.

FINDING: Notice was provided to the County public information official for wider media distribution. This criterion is met.

Section 22.12.030 Initiation of Legislative Changes.

A legislative change may be initiated by application of individuals upon payment of required fees as well as by the Board of County Commissioners.

FINDING: The application was initiated by the Deschutes County Planning Division at the direction of the Board of County Commissioners, and has received a fee waiver. This criterion is met.

Section 22.12.040. Hearings Body

- A. *The following shall serve as hearings or review body for legislative changes in this order:***
 - 1. The Planning Commission.***
 - 2. The Board of County Commissioners.***
- B. *Any legislative change initiated by the Board of County Commissioners shall be reviewed by the Planning Commission prior to action being taken by the Board of Commissioners.***

FINDING: The Deschutes County Planning Commission held the initial public hearing on September 22, 2022. The Board then held a public hearing on [TBD]. These criteria are met.

Section 22.12.050 Final Decision

All legislative changes shall be adopted by ordinance

FINDING: The proposed legislative changes will be implemented by Ordinance No. [number TBD] upon approval and adoption by the Board of County Commissioners. This criterion will be met.

B. Statewide Planning Goals and Guidelines

Goal 1: Citizen Involvement: The amendments do not propose to change the structure of the County's citizen involvement program. Notice of the proposed amendments was provided to the *Bulletin* for the Board public hearing.

Goal 2: Land Use Planning: This goal is met because ORS 197.610 allows local governments to initiate post acknowledgments plan amendments (PAPA). An Oregon Land Conservation and Development Department 35-day notice was initiated on August 17, 2022. The Planning Commission held a public hearing on September 22, 2022 and the Board of County Commissioners will hold a public hearing on [TBD]. The Findings document provides the adequate factual basis for the amendments.

Goal 3: Agricultural Lands: No changes related to agricultural lands are proposed as part of the text amendments. This goal does not apply.

Goal 4: Forest Lands: No changes related to forest lands are proposed as part of the text amendments. This goal does not apply.

Goal 5: Open Spaces, Scenic and Historic Areas, and Natural Resources: By adopting SB 391 in 2021, the Oregon Legislature added a new use, ADU, to rural residential exception areas. Local governments can choose to allow this use by: 1) amending their zoning codes and complying with SB 391's development standards. Goal 5 does not apply.

However, to the extent that it does, local governments apply Goal 5 to a PAPA when the amendment allows a new use and the new use "could be" a conflicting use with a particular Goal 5 resource site on an acknowledged resource list. Certain areas in rural Deschutes County, zoned MUA-10 and RR-10 contain Goal 5 resources because they are overlaid with a Wildlife Area Combining Zone. Two zoning codes are being amended to allow Rural ADUs and are therefore subject to an ESEE Analysis. No other changes to the code warrant specific ESEE Analysis as they are not adding new uses that conflict with Goal 5 resources. The ESEE analysis is included in *Appendix A* which is attached to this document.

Goal 6: Air, Water and Land Resources Quality: The proposed text amendments do not propose changes to the County's Comprehensive Plan policies or implementing regulations for compliance with Goal 6, and therefore are in compliance. However, it is worth noting that the amendments preclude citing an ADU south of Sunriver on lots or parcels that are between 2 and 4.99 acres. The eligible lot or parcel size in this area of the County is 5 acres. In the RR-10 zone south of Sunriver, there are 912 tax lots between 2 and 4.99 acres and 387 tax lots 5 acres or larger.

Goal 7: Areas Subject to Natural Disasters and Hazards: The proposed text amendments do not propose to changes the County's Comprehensive Plan or implementing regulations regarding natural disasters and hazards; therefore, they are in compliance. Eligible properties subject to SB 762 and those constructed prior to adoption of the State Map of Wildfire Risk, will be required to comply with Oregon Residential Specialty Code (R327) to fire harden the ADU and coordinate with the Oregon State Fire Marshal or local fire protection districts to ensure the property has defensible space.

Goal 8: Recreational Needs: Accessory Dwelling Units are not a recreational use or need. This goal does not apply.

Goal 9: Economic Development: Accessory Dwelling Units are not primarily economic in nature. This goal does not apply.

Goal 10: Housing: This goal is not applicable because unlike municipalities, unincorporated areas are not obligated to fulfill certain housing requirements.

Goal 11: Public Facilities and Services: Accessory Dwelling Units in the rural county typically rely on domestic wells and onsite wastewater treatment systems. A Goal 11 exception would be required for a centralized sewer system and would need to be applied on a property specific, needs related basis. This goal does not apply.

Goal 12: Transportation: By adopting SB 391 in 2021, the Oregon Legislature added a new use, ADU, to rural residential exception areas. Local governments can choose to allow this use by: 1) amending their zoning codes and complying with SB 391's development standards. ADUs will still be subject to Transportation System Development Charges (SDCs) prior to the issuance of a building permit. To the extent that the Transportation Planning Rule at OAR 660-012-0060 does apply, staff notes the following comments from the County's Senior Transportation Planner:

The Transportation Planning Rule (TPR) at OAR 660-012-0060 requires a determination if a new land use regulation will significantly affect a transportation facility. Approximately 9,831 lots could be eligible for a rural accessory dwelling unit (ADU) based on zoning and size of the tax lot with roughly 3,000 tax lots being eligible immediately. The remaining roughly 6,000 tax lots' eligibility will need to be determined based on the wildfire rules and requirements in development based on Senate Bill (SB) 763.

The potential lots for a rural ADU are geographically spread out:

- Bend area: 3,876 lots
- Redmond area: 2,886 lots
- Sisters area: 1,576 lots
- South County: 1,123 lots

The County is currently updating its 2010-2030 Transportation System Plan (TSP) to 2020-2040. The analysis of future traffic volumes only indicated a few intersections that would not meet County performance standards. Both were tied to the Deschutes Junction interchange at US 97/Deschutes Market Road-Tumalo. The TSP has planned improvements to mitigate the deficiencies at those intersections.

The geographic distribution of the lots, the adequate reserve capacity on the County system, the low trip generation of each home, an average of nine daily trips, including one p.m. peak hour trip, and the fact the lots will develop over years and years, means the road system is adequate to handle the traffic volumes generated by rural ADUs.

The rural ADUs do not result in any changes to the County's functional classifications or access management policies. The County collects transportation system development charges (SDCs) for all new developments, including single-family homes. The SDC rate is indexed to construction costs and resets every July 1. As a rural ADU is essentially a second home on the property, the County would collect SDCs as each rural ADU develops. The current SDC rate for a single-family home is \$4,115. If the SDC rate remained unchanged, which is highly unlikely, the 9,831 lots would generate \$38.6 million dollars in SDCs.

The addition of a second rural ADU on approximately 9,381 lots will not create a significant nor adverse effect to the County transportation system and thus complies with the TPR.

Goal 13: Energy Conservation: Any future site-specific application for an ADU will be required to incorporate energy conservation measures through the Oregon Building Code. This goal does not apply.

Goal 14: Urbanization: The purpose of Goal 14 is to direct urban uses to areas inside UGBs. As the proposed amendments do not seek to allow urban uses on rural land, nor do they seek to expand an existing urban growth boundary, this goal does not apply.

Goals 15 through 19: Deschutes County does not contain any of the relevant land types included in Goals 15-19. Therefore these goals do not apply.

C. Deschutes County Comprehensive Plan

Chapter 3, Rural Growth

Section 3.3, Rural Housing

3.3.5 Maintain the rural character of the County while ensuring a diversity of housing opportunities, including initiating discussions to amend State Statute and/or Oregon Administrative Rules to permit accessory dwelling units in Exclusive Farm Use, Forest and Rural Residential zones.

FINDING: Implementing SB 391, which allows ADUs to be sited in rural residential exception areas, is consistent with Policy 3.3.5.

V. CONCLUSION:

Based on the information provided herein, the staff recommends the Board of County Commissioners approve the proposed text amendments to allow an owner of a lot or parcel within a rural residential exception area to construct one accessory dwelling unit (ADU) subject to certain restrictions and limitations.

Chapter 1: Overview of Goal 5 and ESEE Analyses

Introduction

This appendix report was prepared to supplement the findings document associated with File No. 247-22-000671-TA. Deschutes County is amending Deschutes County Code (DCC), Titles 18 and 19 to allow Rural Accessory Dwelling units (ADUs) consistent with Senate Bill (SB) 391 (2021) in Multiple Use Agricultural (MUA-10), Rural Residential (RR-10), Suburban Low Density Residential (SR 2.5), Urban Area Reserve (UAR-10), and Westside Transect Zones (WTZ). DCC Chapter 18.88 is the Wildlife Area (WA) Combining Zone, which recognizes four Goal 5 inventories: Antelope Range, Deer Migration Corridor, Deer Winter Range, and Significant Elk Habitat. Certain areas in rural Deschutes County, zoned MUA-10 and RR-10, are overlaid with a Deer Migration Corridor, Deer Winter Range, and/or Significant Elk Habitat.

In addition, there are some areas zoned MUA-10 and RR-10 that contain Goal 5 riparian resources and their associated fish, furbearer, waterfowl, and upland game bird habitat. Recognizing that an ADU is a new conflicting use in the WA Combining Zone, Deschutes County is applying Goal 5 in consideration of this Post Acknowledgment Plan Amendment (PAPA). The full findings document provides additional detail and background information regarding the intent of the amendments and compliance with other applicable local and state regulations outside of Statewide Land Use Planning Goal 5 – *Natural Resources, Scenic and Historic Areas, and Open Spaces*.

Deschutes County Goal 5 Program

The purpose of Goal 5 is “to protect natural resources and conserve scenic and historic areas and open spaces.” Local governments, as part of the Comprehensive Planning process, are required to inventory the extent, location, quality, and quantity of significant natural resources within their jurisdictional boundaries. Following this inventory, local governments then conduct an economic, social, environmental, and energy (ESEE) analysis to determine the extent to which land uses should be limited in order to adequately protect significant resources. Following an ESEE analysis, governments then establish a program to protect significant natural resources. Deschutes County established its initial Goal 5 natural resource inventory, ESEE analyses, and protection programs between the years of 1988-1994, as part of periodic review.

In reviewing this document, it is important to acknowledge there are six policies and development standards within the Deschutes County Comprehensive Plan and DCC that were established through ESEEs over time that could still limit the development of ADUs near inventoried Goal 5 resources. Deschutes County finds the proposed amendments do not alter the following existing protections.

1. Setback Protections: 100-foot structural setback from the ordinary high water mark (OHWM) of rivers and streams.

2. Scenic Protections: Development near rivers in the Landscape Management Combining Zone must be reviewed for aesthetic compatibility.
3. Wetland Protections: Prohibition of fill or removal of any material or wetland vegetation, regardless of the amount, within the bed and banks of any stream or river or in any wetland unless approved as a conditional use.
4. Mitigation Protections: Impacts to any wetland or riverbank impacts to be fully mitigated, as evaluated by Oregon Department of Fish and Wildlife (ODFW).
5. Flood Plain Protections: All new construction, expansion or substantial improvement of an existing dwelling, an agricultural related structure, a commercial, industrial or other non-residential structure, or an accessory building in a designated Flood Plain must obtain a conditional use permit.
6. Combining Zone Requirements: Deer Migration Corridor, Deer Winter Range, Elk Habitat, and Sensitive Bird and Mammal Habitat have site specific requirements including development setbacks and/or seasonal construction requirements to prevent impacts to sensitive species and habitat.

Required Steps and Discretionary Review

Local governments are required to comply with Goal 5 when a PAPA allows a new use and the new use “could be” a conflicting use with a particular Goal 5 resource site on an acknowledged resource list.⁸ Deschutes County is amending the MUA-10, RR-10, SR 2.5, UAR-10 and WTZ zoning chapters to allow ADUs consistent with SB 391 (2021).

ADUs have the potential to generate a certain level of noise and habitat alteration. As this new use could potentially impact Goal 5 resources, Deschutes County is conducting an ESEE Analysis to identify potential consequences and protections related to the amendments. ADUs will be added as a new permitted use in the MUA-10, RR-10, SR 2.5, UAR-10 and WTZ zones. As shown below, only two of those zones, MUA-10 and RR-10 contain Goal 5 resources and are being reviewed as part of this ESEE analysis.

Table 2: Zones Containing Goal 5 Resources

| Contain Goal 5 Resources | Do Not Contain Goal 5 Resources |
|--|---|
| <ul style="list-style-type: none"> DCC Chapter 18.32, Multiple Use Agricultural Zone DCC Chapter 18.60, Rural Residential Zone | <ul style="list-style-type: none"> DCC Chapter 19.12, Urban Area Reserve Zone DCC Chapter 19.20, Suburban Low Density Residential Zone DCC Chapter 19.22, Westside Transect Zone |

⁸ OAR 660-023-0250(3)(b)

ESEEs are meant to be analytical tools. The content of the ESEE is discretionary and is intended to be conducted by planning staff using existing information. An ESEE is not meant to focus exclusively on environmental impacts such as an Environmental Impact Statement (EIS) under the National Environmental Policy Act (NEPA). Additionally, Goal 5 explains “the ESEE analysis need not be lengthy or complex, but should enable reviewers to gain a clear understanding of the conflicts and the consequences to be expected.”⁹ In utilizing this analytical tool, there are a few steps jurisdictions must include and address in accordance with OAR 660-023 – *Procedures and Requirements for Complying with Goal 5*:

1. Identify Conflicting Uses – Does the land use or activity negatively impact natural resources?
2. Determine Impact Area – What is the geographic extent to which land uses or activities adjacent to natural resources could negatively impact those resources?
3. Analyze ESEE Consequences – What are the positive and negative consequences (both for development and natural resources) of a decision to fully protect natural resources, fully allow conflicting uses, or limit conflicting uses?
4. Develop a program – How and to what extent will the natural resources be protected based on the ESEE analysis?

A response to each of these steps is included throughout this report. The relevant page and chapter can be found in the table of contents.

⁹ OAR 660-023-0040(1)

Chapter 2: Deschutes County Goal 5 Inventory and Methodology

660-23-0030 – Inventory Goal 5 Resources

Stemming from periodic review, Deschutes County adopted inventories for a variety of Goal 5 natural resources (Attachment 1). Some of these resources have mapped geographic boundaries such as Deer Winter Range, whereas others are described as being located in general areas – such as furbearer habitat in riparian corridors. The inventories were produced at a countywide scale, with additional detail for the Deschutes River and its tributaries through the Deschutes County/City of Bend River Study. County staff digitized these habitat boundaries into Geographic Information Systems (GIS) shape files in the 2000s for public awareness. The shape files were created from hard copy maps and descriptions found in the ordinances establishing the County’s Goal 5 program, in consultation with the Oregon Department of Fish and Wildlife (ODFW).

Maps provided in this document include inventoried habitat that spatially overlaps with the MUA-10 and RR-10 zones impacted by the proposed text amendments (Attachment 2). The habitat areas include: deer migration corridor, deer winter range, elk habitat, flood plain, and wetlands. Staff utilized the County’s WA Combining Zone layers to determine the general extent of habitat for big game species as the Combining Zone was designed to cover a larger area than the habitat itself (Ordinance 92-046). Inventoried streams and rivers are shown on the map, as well as wetlands and flood plains. Goal 5 Riparian areas (flood plain, wetlands and 100 feet measured from ordinary high water mark) associated with these water bodies is also the habitat area for fish, furbearers, waterfowl, and upland game birds (Ordinance 92-041, 94-007). As the proposed text amendments are legislative and do not impact any specific properties, staff did not review Goal 5 impacts on an individual parcel level basis. Instead staff identified the following potential resource sites in which the allowance of ADUs could potentially intersect with Goal 5 resources:

Riverine Resources: Some properties in the MUA-10 and RR-10 zones are located in relative proximity to the Deschutes River, Little Deschutes River, Paulina Creek, and Whychus Creek and its associated Goal 5 Riparian Area.¹⁰ Ordinance 92-041 stated the following additional Goal 5 resources depend on riparian corridors for habitat: furbearer, waterfowl, and upland game bird habitat. As the extent of the habitat locations for these species are not detailed in a boundary description or on a map, staff assumes the species habitat is found entirely inside the Riparian Area boundary shown in Attachment 2.

Wildlife Area Combining Zone: The WA Combining Zone was adopted as a protection measure for antelope, deer, and elk in Deschutes County. As an overlay zone, the mapped area conservatively identified typical habitat and migration areas and provided additional development requirements to ensure impacts to wildlife are properly mitigated alongside the underlying base zone regulations. The zone encompasses the previously inventoried area for Antelope Range, Deer Migration

¹⁰ There are 386 RR-10 tax lots, two acres or greater that abut the Little Deschutes River or Deschutes River and 505 tax lots that are split-zoned RR-10 or MUA-10 with the Flood Plain Zone. The Flood Plain Zone is not recognized as a rural residential exception area. RR-10 and MUA-10 split zoned properties will be required to contain the minimum lot or parcel area to qualify for an ADU.

Corridor, Deer Winter Range, and Significant Elk Habitat. The proposed amendments add a conflicting use, ADUs which affect three habitat ranges in MUA-10 and RR-10: Deer Migration Corridor, Deer Winter Range, and Significant Elk Habitat. These habitat ranges are shown in Attachment 2. The maps include federal land. However, these properties are not subject to Deschutes County land use regulations.

The Deschutes County Goal 5 inventory also includes scenic and open space sites such as Landscape Management Rivers and Streams, State Scenic Waterways and Federal Wild and Scenic Rivers, and Ecologically and Scientifically Significant Natural Areas – Little Deschutes River / Deschutes Confluence (Attachment 1). As these are resources associated with mitigating visual impacts and do not impact development potential, they are not impacted by the proposed amendments and therefore are not reviewed in this document.

Chapter 3: Conflicting Use Analysis

660-023-0040(2): Identify conflicting uses. Local governments shall identify conflicting uses that exist, or could occur, with regard to significant Goal 5 resource sites. To identify these uses, local governments shall examine land uses allowed outright or conditionally within the zones applied to the resource site and in its impact area. Local governments are not required to consider allowed uses that would be unlikely to occur in the impact area because existing permanent uses occupy the site.

Deschutes County is proposing to add ADUs in the MUA-10 and RR-10 zones in the WA Combining Zone. ADUs could be a conflicting use to significant Goal 5 resources as they generate vehicle trips, buildable footprints, and noise. Other uses that are allowed in the two zones are shown below.

Table 3: Allowed Uses

| Zoning | Outright Uses | Conditional Uses |
|--------|---|---|
| MUA-10 | Agricultural uses Single family dwelling or manufactured home Harvesting a forest product Class I and II road or street projects subject to land division standards Class III road or street project Noncommercial horse stables Horse events Operation, maintenance and piping of canals Type I Home occupation Historic accessory dwelling units | Public use Semipublic use Dude ranch Kennel and/or veterinary clinic Guest house Manufactured home as a secondary accessory farm dwelling Exploration for minerals Private parks Personal use airstrip Golf course Type 2 or 3 Home occupation Destination resorts Planned developments Cluster developments Landfills Timeshare Hydroelectric facility Storage, crushing and processing of minerals Bed and breakfast inn Excavation, grading and fill Religious institutions Private or public schools Utility facility Cemetery Commercial horse stables Horse events Manufactured home park or RV park Wireless telecommunication facilities Guest lodge Surface mining in conjunction with operation and maintenance of irrigation system |

| Zoning | Outright Uses | Conditional Uses |
|--------|---|--|
| RR-10 | Single family dwelling or manufactured home Utility facility Community center Agricultural use Class I and II road or street projects subject to land division standards Class III road or street project Noncommercial horse stables Horse events Operation, maintenance and piping of canals Type I Home occupation Historic accessory dwelling units | Public park Dude ranch Personal use airstrip Planned developments Cluster developments Recreation-oriented facility Landfills Cemetery Timeshare Hydroelectric facility Bed and breakfast inn Golf course Excavation, grading and fill Religious institutions Public use Semipublic use Commercial horse stables Private or public schools Manufactured home park or RV park Wireless telecommunication facilities Surface mining in conjunction with operation and maintenance of irrigation system |

General Impacts of Conflicting Uses

The proposed amendments would allow ADUs in inventoried Goal 5 resources. As part of the ESEE review “a local government may conduct a single analysis for two or more resource sites that are within the same area or that are similarly situated and subject to the same zoning”.¹¹ In reviewing the proposed amendments, Deschutes County finds that the impacts from ADUs in the MUA-10 and RR-10 zones as they relate to Deer Migration Corridor, Deer Winter Range, and Significant Elk Habitat are of such a similar nature that the impacts for these areas may be reviewed together via the general impacts described below.

- *Noise and Light*

ADUs as a secondary dwelling may distress inventoried wildlife, as they seek to avoid noise and light.

- *Habitat Removal*

ADUs would likely require removal of upland vegetation, grading, and soil compaction that could alter drainage and runoff patterns. This could increase peak runoff, cause bank erosion, flooding, or increase the flow of sediment into water bodies. The removal of upland vegetation could also reduce tree canopy and understory vegetation which could be utilized by wildlife, outside of their primary habitat.

¹¹ OAR 660-023-0040(4)

- *Introduction of Invasive, Nonnative Plants*

ADUs may contribute to the spread of invasive, nonnative plants which could replace and degrade native vegetation of which many species depend.

- *Habitat Fragmentation*

Additional human development may result in fences, roads, traffic and other barriers to the movement of terrestrial wildlife that is critical to their survival.

Greater detail on these potential conflicts and their consequences are provided below.

Chapter 4: Impact Areas

660-023-0040(3): Determine the impact area. Local governments shall determine an impact area for each significant resource site. The impact area shall be drawn to include only the area in which allowed uses could adversely affect the identified resource. The impact area defines the geographic limits within which to conduct an ESEE analysis for the identified significant resource site.

This step is discretionary and allows for the local jurisdiction to define which areas are the most vulnerable and/or most likely to be affected by the proposed amendments. The impact area for this ESEE analysis are properties that are within the Deer Migration Corridor, Deer Winter Range, and Significant Elk Habitat in the MUA-10 and RR-10 zones. As this ESEE is not for any specific property, but instead reflects changes to the code generally, there is no individual property specific data.

Properties in this impact area can be found in Attachment 2 – *Impact Area Maps*

Impact Area Methodology

To understand the impact of the proposed amendments, an estimate of the number of parcels is shown in Table 4 below.

Table 4: Number of Affected Non-Federal Properties in Impact Area ¹²

| Zone | Deer Migration | Deer Winter | Elk |
|--------------------------------|----------------|-------------|-----------|
| Multiple Use Agricultural Zone | 0 | 9 | 0 |
| Rural Residential Zone | 1,293 | 446 | 39 |
| Total | 1,293 | 455 | 39 |

¹² See footnote #8.

Chapter 5: ESEE Analysis

660-023-0040(4): Analyze the ESEE consequences. Local governments shall analyze the ESEE consequences that could result from decisions to allow, limit, or prohibit a conflicting use. The analysis may address each of the identified conflicting uses, or it may address a group of similar conflicting uses. A local government may conduct a single analysis for two or more resource sites that are within the same area or that are similarly situated and subject to the same zoning. The local government may establish a matrix of commonly occurring conflicting uses and apply the matrix to particular resource sites in order to facilitate the analysis. A local government may conduct a single analysis for a site containing more than one significant Goal 5 resource. The ESEE analysis must consider any applicable statewide goal or acknowledged plan requirements, including the requirements of Goal 5. The analyses of the ESEE consequences shall be adopted either as part of the plan or as a land use regulation.

Background

Deschutes County is choosing to conduct a single analysis for all resource sites as the impacts from ADUs could have very similar impacts to both riparian areas and fish and wildlife that depend on the riparian for their habitat, and for big game including deer and elk.

As described above, the potential impacts fall into four general areas:

- *Noise and Light*

ADUs as a secondary dwelling may distress inventoried wildlife, as they seek to avoid noise and light.

- *Habitat Removal*

ADUs would likely require removal of upland vegetation, grading, and soil compaction that could alter drainage and runoff patterns. This could increase peak runoff, cause bank erosion, flooding, or increase the flow of sediment into water bodies. The removal of upland vegetation could also reduce tree canopy and understory vegetation which could be utilized by wildlife, outside of their primary habitat.

- *Introduction of Invasive, Nonnative Plants*

ADUs may the spread of invasive, nonnative plants which could replace and degrade native vegetation of which many species depend.

- *Habitat Fragmentation*

Additional human development may result in fences, roads, traffic and other barriers to the movement of terrestrial wildlife that is critical to their survival.

This step is discretionary. The purpose of an ESEE analysis is to provide a qualitative exercise for local governments to weigh the positive and negative consequences of three scenarios in order to determine a preferred outcome. Governments may choose to use quantitative data as necessary, but are not required to gather new information or hire wildlife biologists, economists, sociologists, or energy consultants.

ESEE Scenario Descriptions

Scenario (A) – Allow the Conflicting Use

In this scenario, the local government may decide that a conflicting use should be allowed fully, without any restrictions, no matter the potential impacts on the inventory site(s). In this instance, the Goal 5 rule would require the government to determine the conflicting use is of such importance compared to the site that the use should be allowed without any protections or limitations. In choosing this scenario, the local government could still use other tools to protect the inventories that are currently in place.

Scenario (B) – Prohibit the Conflicting Use

In this scenario, the local government may decide that the inventory site is of such importance or the conflicting use has the potential to be so detrimental to the inventory site(s), that the conflicting use should be entirely prohibited.

Scenario (C) – Limit the Conflicting Use

In this scenario, the local government may decide that the inventory site and the conflicting use are both important when compared to each other, and the use should be allowed with limitations to balance the impacts to the inventory site(s).

Accessory Dwelling Unit ESEE Analysis

Scenario (A) Allow the Conflicting Use

In this scenario, Deschutes County would allow ADUs in MUA-10 and RR-10 zones without any additional requirements to protect the inventoried resources.

Economic Consequences:

Permitting ADUs would have positive consequences by allowing a second dwelling on a property. Deschutes County is experiencing a housing shortage. Allowing ADUs, which are limited to 900 square feet of livable floor area and cannot be used as vacation rentals, could help address work force housing shortages in the region. It could reduce commuting costs for those workers that live in adjoining Crook, Jefferson and Klamath counties, and coupled with other work force housing strategies, attract businesses and employment opportunities in Central Oregon.

Allowing ADUs could also have negative consequences. The development of ADUs in MUA-10 and RR-10 zones could significantly increase land value, which could price out low and middle-income residents from the opportunity to own a home. Previous testimony from ODFW estimates that hunting and wildlife viewing contributed more than \$50 million to the Deschutes County economy annually. Deschutes County is proposing to allow ADUs in some areas that contain riparian areas

and species that rely on the riparian area for habitat including fish, furbearers, upland game birds, and waterfowl. Allowing for ADUs near these areas could reduce income associated with wildlife viewing and hunting of these species.

In some parts of the county, mule deer populations have declined up to 70% since 2000 as a result of human caused habitat reduction, fragmentation, and disturbance on winter range. By allowing ADUs in Deer Migration Corridor, Deer Winter Range, and Significant Elk Habitat, there is the potential for greater disturbance of deer and elk populations that could reduce hunting and viewing opportunities.

Social Consequences:

Permitting ADUs could have positive consequences by allowing property owners with an existing single family dwelling to build an ADU that accommodates aging parents or family members, farm help for those that are working on MUA-10 zoned agricultural properties or nearby Exclusive Farm Use zoned properties. By providing affordable housing, it could help lift people out of poverty and increase economic mobility. It could bring a positive impact on the surrounding community, encouraging social connections and lowering crime rates.

It could also have negative consequences by allowing ADUs in rural areas with inadequate access to employment, schools, food markets, medical facilities and parks. This could lead to higher automobile-dependence and vehicle emissions caused by more people driving to and from rural areas. Based on previous testimony from ODFW, there could also be negative impacts due to the potential loss of wildlife habitat. Many residents, advocacy organizations, and wildlife agencies continue to express concerns regarding the loss of fish and wildlife habitat due to the region's rapid growth and development. There is a recognition that increases in human activity, especially in rural areas, displace habitat and diminish, incrementally, Deschutes County's rural character and quality of life. The proposed amendments could have negative consequences due to increased human presence and infrastructure near the inventoried Goal 5 resources, which could lead to a reduced level of access and enjoyment for recreationalists.

Environmental Consequences:

In this scenario, ADUs would be permitted outright. As stated previously, ADUs could present negative impacts as they have the potential to increase noise and light near fish and wildlife habitats, and in turn cause distress to inventoried Goal 5 species.

Developing an ADU would likely require removal of upland vegetation, grading, and soil compaction that could alter drainage and runoff patterns. This could increase peak runoff, cause bank erosion, flooding, or increase the flow of sediment into water bodies. The removal of upland vegetation could also reduce tree canopy and understory vegetation which could be utilized by wildlife, outside of their primary habitat. Permitting ADUs could create negative impacts to designated habitat for Deer Migration Corridor, Deer Winter Range, and Significant Elk Habitat. Based on previous testimony from ODFW, mule deer populations have declined up to 70% since 2000. Their testimony identified other elements contributing to reductions in mule deer populations tied to human caused habitat reduction, fragmentation, and disturbance on winter range.

As previously stated, the following Goal 5 protections established during the creation of the initial inventory would remain in place:

1. Setback Protections: 100-foot structural setback from the ordinary high water mark of rivers or streams.
2. Scenic Protections: Development near rivers in the Landscape Management Combining Zone must be reviewed for aesthetic compatibility.
3. Wetland Protections: Prohibition of fill or removal of any material or wetland vegetation, regardless of the amount, within the bed and banks of any stream or river or in any wetland unless approved as a conditional use.
4. Mitigation Protections: Impacts to any wetland or riverbank impacts to be fully mitigated, as evaluated by ODFW.
5. Flood Plain Protections: All new construction, expansion or substantial improvement of an existing dwelling, an agricultural related structure, a commercial, industrial or other non-residential structure, or an accessory building in a designated Flood Plain shall obtain a conditional use permit.
6. Combining Zone Requirements: Deer Migration Corridor, Deer Winter Range, Significant Elk Habitat and Sensitive Bird and Mammal Habitat have site specific requirements including development setbacks and seasonal construction requirements to prevent impact to sensitive species and habitat.

Existing protections would prevent riparian areas from being developed with ADUs established near them. As the existing Goal 5 measures in place today protect riparian areas and the fish and wildlife within that habitat area, the addition of ADUs near these areas will be neutral.

Energy Consequences:

ADUs are unlikely to cause any major energy consequences. Per SB 391, the ADU must be within 100 feet of the existing dwelling. It must utilize the existing onsite system if there is no pre-existing centralized wastewater treatment system. It can also rely on an existing domestic well.

A potential negative consequence of the proposed amendments could be additional development in rural Deschutes County. Depending on the location of the ADU, it could lead to additional Vehicle Miles Traveled and greater congestion on county owned roads for employment, education, and basic services.

Scenario (B) Prohibit the Conflicting Use

In this scenario, Deschutes County would not allow ADUs in the MUA-10 and RR-10 zones associated with the WA Combining Zone and Deer Migration Corridor, Deer Winter Range, and Significant Elk Habitat.

Economic Consequences:

Prohibiting ADUs could have negative economic consequences, as it prevents certain property owners from using their land and building a secondary dwelling unit. This could contribute to work force housing deficiencies in the region and compel residents to commute from adjoining areas in Crook, Jefferson, and Klamath counties.

It could also have neutral consequences based on previous testimony from ODFW. Prohibiting ADUs could contribute to stabilizing mule deer populations, thereby maintaining economic benefits from wildlife viewing or hunting. Wildlife viewing, hunting, and fishing experiences in Deschutes County is a major economic asset to the region. Continuing with the current regulations could minimize further habitat fragmentation and help maintain wildlife viewing, hunting, and fishing revenues in Deschutes County.

Social Consequences:

Prohibiting ADUs could have negative consequences. Many residents and multi-generational families in Deschutes County need affordable housing and are rent-burdened. Limiting the potential supply of ADUs could exacerbate Central Oregon’s housing crisis by forcing some residents to pay higher rents, commute longer distances for basic services, or relocate. Those circumstances could lead to further mental and physical stress.

It could also have positive consequences. Many residents express their appreciation for undisturbed landscapes because they contribute to Deschutes County’s rural character and quality of life. Prohibiting ADUs, which generate noise and light would continue to limit disturbance to existing fish and wildlife habitats.

Environmental Consequences:

There are 386 RR-10 tax lots, two acres or greater that abut the Little Deschutes River or Deschutes River and 505 tax lots that are split-zoned RR-10 or MUA-10 with Flood Plain. These properties contain a Goal 5 Riparian Area which is also the habitat for Goal 5 inventoried waterfowl, upland game bird, furbearers, and fish. The WA Combining Zone contains Deer Migration Corridor, Deer Winter Range, and Significant Elk Habitat. By prohibiting ADUs and maintaining the status quo, these species will continue to be protected against habitat fragmentation and distress from second dwellings. The environmental consequences are therefore neutral.

Energy Consequences:

Energy consumption would have neutral consequences as this scenario maintains the status quo. Development associated with ADUs may be displaced to other areas of rural Deschutes County, which could still have demands on utilities.

Scenario (C) Limit the Conflicting Use

In this scenario, Deschutes County would allow ADUs in the MUA-10 and RR-10 zones, with additional limitations to protect the inventoried resources, outside of existing protections. The existing limitation would require the entire ADU to be within a 100 feet of the existing dwelling.

Economic Consequences:

Permitting ADUs would have positive consequences by allowing a second dwelling on a property. Deschutes County is experiencing a housing shortage. Allowing ADUs, which are limited to 900 square feet of livable floor area and cannot be used as vacation rentals, could help address work force housing shortages in the region. It could reduce commuting costs for those workers that live in adjoining Crook, Jefferson and Klamath counties and coupled with other work force housing strategies, attract businesses and employment opportunities in Central Oregon.

Compared to scenario (a) in which only a portion of the ADU must be within a 100 feet of the existing dwelling, the addition of limitations could lessen the impact by minimizing the buildable footprint and ultimately, the number of eligible properties, recognizing that some may not have enough area to accommodate an ADU. This could positively impact the hunting and wildlife viewing economy in Central Oregon, valued at \$50 million annually. While such measures could lessen impacts, the overall burden caused by allowing ADUs nevertheless may still overall impact wildlife and thereby impact revenue generated from the recreation economy.

In comparison to scenario (a), which would allow the use outright, Deschutes County finds that this scenario would provide a limitation to reduce the amount of impacts, even if those impacts still exist.

Social Consequences:

The positive social consequences in this scenario are very similar to scenario (a). Permitting ADUs could have positive consequences by allowing property owners with an existing single family dwelling to build an ADU that accommodates aging parents or family members, farm help for those that are working on MUA-10 zoned agricultural properties or nearby Exclusive Farm Use zoned properties. By providing affordable housing, it could help lift people out of poverty and increase economic mobility. It could bring a positive impact on the surrounding community, encouraging social connections and lowering crime rates.

The existing limitation would require the entire ADU to be within a 100 feet of the existing dwelling. Even adding a limitation (or others), there could be a negative consequence of ADUs in rural areas with inadequate access to employment, schools, food markets, medical facilities and parks. This could lead to higher automobile-dependence and vehicle emissions caused by more people driving to and from rural areas. Based on previous testimony from ODFW, there could also be negative impacts due to the potential loss of wildlife habitat stemming from the possible removal of habitat areas and construction of structures and their associated human presence. Many residents, advocacy organizations, and wildlife agencies continue to express concerns regarding the loss of fish and wildlife habitat due to the region's rapid growth and development. There is a recognition that increases in human activity, especially in rural areas, displace habitat and diminish, incrementally, Deschutes County's rural character and quality of life. The proposed amendments

could have negative consequences due to increased human presence and infrastructure near or within the inventoried Goal 5 resources, which could lead to a reduced level of access and enjoyment for recreationalists.

Environmental Consequences:

ADUs could present negative consequences as they have the potential to increase activity, noise, and light near fish and wildlife habitats, and in turn cause distress to inventoried Deer Migration Corridor, Deer Winter Range, and Significant Elk Habitat.

Development of an ADU would likely require removal of upland vegetation, grading, and soil compaction that could alter drainage and runoff patterns. This could increase peak runoff, cause bank erosion, flooding, or increase the flow of sediment into water bodies. The removal of upland vegetation could also reduce tree canopy and understory vegetation which could be utilized by fish and wildlife species, outside of their primary habitat. Permitting ADUs could result in further negative impacts to the Deer Migration Corridor, Deer Winter Range, and Significant Elk Habitat. Based on recent testimony from ODFW, mule deer populations have declined up to 70% since 2000. Their testimony identified other elements contributing to reductions in mule deer populations tied to human caused habitat reduction, fragmentation, and disturbance on winter range.

Existing protections in place today (discussed above) would prevent Goal 5 riparian areas from being developed when ADUs are nearby. The establishment of ADUs in these areas would likely be neutral.

By limiting the entire ADU within a 100 feet of the existing dwelling, the negative environmental consequences associated with ADU could be mitigated to a certain extent.

Energy Consequences:

The energy consequences in this scenario are the same as in scenario (a). Limiting the entire ADU to within a 100 feet of the existing dwelling could decrease the amount of energy used to operate the ADU.

Chapter 6: ESEE Decision

660-023-0040(5): Develop a program to achieve Goal 5. Local governments shall determine whether to allow, limit, or prohibit identified conflicting uses for significant resource sites. This decision shall be based upon and supported by the ESEE analysis. A decision to prohibit or limit conflicting uses protects a resource site. A decision to allow some or all conflicting uses for a particular site may also be consistent with Goal 5, provided it is supported by the ESEE analysis. One of the following determinations shall be reached with regard to conflicting uses for a significant resource site:

(c) A local government may decide that the conflicting use should be allowed fully, notwithstanding the possible impacts on the resource site. The ESEE analysis must demonstrate that the conflicting use is of sufficient importance relative to the resource site, and must indicate why measures to protect the resource to some extent should not be provided, as per subsection (b) of this section.

The graphic below is meant to be a simplified representation to balance each of the ESEE factors. As stated in the ESEE analysis, there are a variety of positive, negative, and neutral consequences associated with each scenario. Deschutes County finds that the issue of allowing an ADU in MUA-10 and RR-10 zones are both a social and economic issue that outweighs the other ESEE consequences. The County considered allowing the use with limitations by limiting the entire ADU within a 100 feet of the existing dwelling, but this practice could limit the number of affordable housing opportunities. Therefore the County is choosing scenario (a) which will allow the use fully notwithstanding the possible impacts on the resource sites.

Table 5: ESEE Factors

| ESEE Factors | Support habitat functions (Environmental, economic, social) | Support Affordable Housing (Social, economic) | Support Recreational Economy (Economic, Social) | Preserves Rural Character (Social, economic) | Transportation (Energy) |
|---|--|--|--|---|--------------------------------|
| Prohibit conflict (No code change) | 0 | - | 0 | 0 | 0 |
| Allow conflict Allow ADUs with no additional requirements | - | + | - | - | - |
| Limit conflict Allow ADUs with additional limitation | - | + | - | - | - |

Chapter 7: Program to Achieve Goal 5

660-023-0050(1): *For each resource site, local governments shall adopt comprehensive plan provisions and land use regulations to implement the decisions made pursuant to OAR 660-023-0040(5). The plan shall describe the degree of protection intended for each significant resource site. The plan and implementing ordinances shall clearly identify those conflicting uses that are allowed and the specific standards or limitations that apply to the allowed uses. A program to achieve Goal 5 may include zoning measures that partially or fully allow conflicting uses (see OAR 660-023-0040(5)(b) and (c)).*

660-023-0050(2): *When a local government has decided to protect a resource site under OAR 660-023-0040(5)(b), implementing measures applied to conflicting uses on the resource site and within its impact area shall contain clear and objective standards. For purposes of this division, a standard shall be considered clear and objective if it meets any one of the following criteria:*

- (a) It is a fixed numerical standard, such as a height limitation of 35 feet or a setback of 50 feet;*
- (b) It is a nondiscretionary requirement, such as a requirement that grading not occur beneath the dripline of a protected tree; or ...*

Deschutes County has determined that allowing ADUs within the MUA-10 and RR-10 zones and within the Deer Migration Corridor, Deer Winter Range, and Significant Elk Habitat should be allowed fully, notwithstanding the possible impacts on the inventoried resources. The implementing measures do not include alternative, discretionary procedures for compliance.

Attachment 1 - Deschutes County Significant Goal 5 Resources

| Inventoried Resource | Flood Plain Relationship | Conflicts | Comments | Relevant Ordinances |
|--|--------------------------|--|---|--|
| <p>Fish Habitat (Inventory – Ord. No. 92-041, page 18; creeks, rivers and lakes)</p> | <p>Yes</p> | <p>Major conflicts are removal of riparian vegetation, fill and removal activities within the bed and banks of streams or wetlands, hydroelectric, rural residential development and water regulation</p> | <p>Floodplain zone recognized as program to achieve the goal to conserve fish habitat (Ordinance Nos. 88-030, 88-031, 89-009).</p> <p>Others include: fill and removal permits, wetland removal regulations, hydro prohibitions, rimrock setbacks, 100’ setback from OHW, conservation easements and restrictions on boats and docks.</p> | <p>Ordinance Nos. 86-018, 86-053, 86-054, 86-056, 88-030, 88-031, 89-009, 92-040, 92-041</p> |
| <p>Deer Winter Range (Inventory – Ord. No. 92-041, page 22; Metolius, Tumalo, North Paulina, and Grizzly ranges identified by ODFW)</p> | <p>Yes</p> | <p>Major conflicts are dwellings, roads, and dogs. Activities which cause deterioration of forage quality and quantity or cover are conflicting uses. Fences which impede safe passage are also a conflicting use.</p> | <p>Floodplain zone recognized as a program to achieve the goal to protect deer winter range (Ordinance Nos. 88-030, 88-031, 89-009).</p> <p>Others include Wildlife Area Combining Zone. Requires 40-acre minimum lot size for all new residential land divisions. Underlying zoning in most of the deer winter range is: EFU, Forest, and Floodplain. These zones provide for large lot sizes and limit uses that are not compatible with farm or forest zones.</p> | <p>Ordinance Nos. 88-030, 88-031, 89-009, 92-040, 92-041, 92-042, 92-046</p> |
| <p>Deer Migration Corridor (Inventory – Ord. No. 92-041, page 26; Bend-La Pine migration corridor identified by ODFW)</p> | <p>Yes</p> | <p>Major conflicts are dwellings, roads, and dogs. Fences which impede safe passage are also a conflicting use.</p> | <p>Wildlife Area Combining Zone was recognized as the only program to achieve the goal to protect the deer migration corridor. Underlying zoning is RR-10. It was amended to require cluster development for all land divisions in the RR-10 zone in the Bend/La Pine migration corridor (92-042). A 20-acre parcel is the minimum size required for a cluster development. Siting and fencing standards also apply in the deer migration corridor. Migration corridor includes some EFU, Forest, and Floodplain zoned land. These resource zones provide for large lot sizes and limit uses that are not compatible with farm or forest zones.</p> | <p>Ordinance Nos. 92-040, 92-041, 92-042, 92-046</p> |

| Inventoried Resource | Flood Plain Relationship | Conflicts | Comments | Relevant Ordinances |
|--|--------------------------|---|--|--|
| <p>Elk Habitat (Inventory – Ord. No. 92-041 – page 32; identified by USFS and ODFW)</p> | <p>Yes</p> | <p>Major conflict is the loss of habitat due to increased residential densities in the habitat areas. Increased human disturbance can cause conflict with elk. The use of land which necessitates the removal of large amounts of vegetative cover can also alter the quality of elk habitat.</p> | <p>Wildlife Area Combining Zone was recognized as the only program to achieve the goal to protect the elk habitat.</p> <p>It was amended to require a 160-acre minimum lot size for areas identified as significant elk habitat. Siting standards are required to minimize conflicts of residences with habitat protection.</p> <p>Underlying zoning in the elk habitat areas is either Floodplain, Forest, or Open Space and Conservation. These resource zones restrict high density residential development and prohibit industrial and commercial uses.</p> <p>* Some lands are zoned RR10, including lots that are split zoned with flood plain. They are already parcelized, preventing future land divisions.</p> | <p>Ordinance Nos. 88-030, 88-031, 89-009, 92-040, 92-041, 92-042, 92-046</p> |
| <p>Antelope Habitat (Inventory – Ord. No. 92-041 – page 38; identified by ODFW)</p> | <p>No</p> | <p>Land use or development activities which would result in the loss of habitat, and animal harassment and disturbance associated with human activity.</p> | <p>To achieve the goal to conserve antelope habitat, uses conflicting with antelope habitat are limited to the Wildlife Area Combining Zone. In antelope range, the minimum lot size is 320 acres. Except for rural service centers, the antelope habitat is zoned EFU or F1.</p> | <p>Ordinance Nos. 92-040, 92-041, 92-042, 92-046</p> |
| <p>Habitat for Sensitive Birds (Inventory – Ord. No. 92-041 – page 41 and Table 5; identified by ODFW, ODF, OSU, Oregon Natural Heritage Data Bases).</p> <p>The area required for each nest site varies between species.</p> | <p>No</p> | <p>Nest sites are found in Forest, EFU and Open Space and Conservation zones. Uses that could conflict with the habitat site are surface mining, residential use, recreation facilities, roads, logging, and air strips.</p> <p>Any activity which would disturb the nesting birds, including intensive recreational use or removal of trees or</p> | <p>The Sensitive Bird and Mammal Combining Zone achieves the goal to protect sensitive bird sites.</p> | <p>Ordinance Nos. 92-040, 92-041, 92-042, 92-046</p> |

CHAPTER 18.32 MULTIPLE USE AGRICULTURAL ZONE; MUA

18.32.020 Uses Permitted Outright

* * *

18.32.020 Uses Permitted Outright

The following uses and their accessory uses are permitted outright:

- A. Agricultural uses as defined in DCC Title 18.
- B. A single family dwelling, or a manufactured home subject to DCC 18.116.070.
- C. Propagation or harvesting of a forest product.
- D. Class I and II road or street project subject to approval as part of a land partition, subdivision or subject to the standards and criteria established by DCC 18.116.230.
- E. Class III road or street project.
- F. Noncommercial horse stables, excluding horse events.
- G. Horse events, including associated structures, involving:
 - 1. Fewer than 10 riders;
 - 2. Ten to 25 riders, no more than two times per month on nonconsecutive days; or
 - 3. More than 25 riders, no more than two times per year on nonconsecutive days. Incidental musical programs are not included in this definition. Overnight stays by participants, trainers or spectators in RVs on the premises is not an incident of such horse events.
- H. Operation, maintenance, and piping of existing irrigation systems operated by an Irrigation District except as provided in DCC 18.120.050.
- I. Type 1 Home Occupation, subject to DCC 18.116.280.
- J. Historic Accessory Dwelling Units, subject to DCC 18.116.350.
- K. Residential Accessory Dwelling Units, subject to DCC 18.116.370.

CHAPTER 18.116 SUPPLEMENTARY PROVISIONS

18.116.350 Historic Accessory Dwelling Units In RR10 And MUA Zones

18.116.370 Residential Accessory Dwelling Units In RR10 And MUA 10 Zones

* * *

18.116.350 Historic Accessory Dwelling Units In RR10 And MUA Zones

A. As used in this section:

1. “Historic Accessory dwelling unit” means a residential structure that is used in connection with or that is auxiliary to a single-family dwellinghistoric home. For the purposes of DCC Title 18, the term "auxiliary" shall be synonymous with the terms “incidental and subordinate to.”
2. “Area zoned for rural residential use” means land that is not located inside an urban growth boundary as defined in ORS 195.060 and that is subject to an acknowledged exception to a statewide land use planning goal relating to farmland or forestland and planned and zoned by the county to allow residential use as a primary use.
3. “Historic home” means a single-family dwelling constructed between 1850 and 1945.
4. “New” means that the dwelling being constructed did not previously exist in residential or nonresidential form. “New” does not include the acquisition, alteration, renovation or remodeling of an existing structure.
5. “Place a manufactured home” means the placement of a manufactured home that did not previously exist on the subject lot of record; it may include the placement of a manufactured home that was previously used as a dwelling on another lot and moved to the subject lot of record.
6. “Single-family dwelling” means a residential structure designed as a residence for one family and sharing no common wall with another residence of any type.

B. An owner of a lot or parcel within an area zoned for rural residential use (RR10 and MUA zones) may construct a new single-family dwelling or place a manufactured home on the lot or parcel, provided:

1. The lot or parcel is not located in an area designated as an urban reserve as defined in ORS 195.137;
2. The lot or parcel is at least two acres in size;
3. A historic home is sited on the lot or parcel;
4. The owner converts the historic home to an accessory dwelling unit upon completion of the new single-family dwelling or placement of a manufactured home; and

- 5. The accessory dwelling unit may be required to comply with all applicable laws and regulations relating to sanitation and wastewater disposal and treatment.
- C. The construction of an accessory dwelling under subsection (B) of this section is a land use action subject to DCC 22.20.
- D. An owner that constructs a new single-family dwelling or places a manufactured home under subsection (B) of this section may not:
 - 1. Subdivide, partition or otherwise divide the lot or parcel so that the new single-family dwelling or manufactured home is situated on a different lot or parcel from the accessory dwelling unit.
 - 2. Alter, renovate or remodel the accessory dwelling unit so that the square footage of the accessory dwelling unit is more than 120 percent of the historic home’s square footage at the time construction of the new single-family dwelling commenced.
 - 3. Rebuild the accessory dwelling unit if the structure is deemed a dangerous building due to fire or other natural disaster, pursuant to the Uniform Code for the Abatement of Dangerous Buildings, which defines “dangerous building” as “Whenever any portion thereof has been damaged by fire, earthquake, wind, flood or by any other cause, to such an extent that the structural strength or stability thereof is materially less than it was before such catastrophe and is less than the minimum requirements of the Building Code for new buildings of similar structure, purpose or location.”
 - 4. Construct an additional accessory dwelling unit on the same lot or parcel.
- E. A new single-family dwelling constructed or a manufactured home placed under this section may be required to be served by the same water supply source as the accessory dwelling unit.
- F. Owner occupancy of either the accessory dwelling unit or the new single-family dwelling is not required. However, the new single-family dwelling and the accessory dwelling unit may not be used simultaneously for short-term rentals of thirty (30) consecutive days or less.

HISTORY

Adopted by Ord. 2019-009 §3 on 9/3/2019

Recorded by Ord. 2019-009 §3 on 9/3/2019

Amended by Ord. 2023-00x §x on [date]

18.116.370 Residential Accessory Dwelling Units In RR10 And MUA Zones

A. As used in this section:

- 1. “Accessory dwelling unit” means a residential structure that is used in connection with or that is auxiliary to an existing single-family dwelling or manufactured home. For the purposes of DCC Title 18, the term “auxiliary” shall be synonymous with the terms “incidental and subordinate to.”
- 2. “Adequate access” means a continuous, minimum 20-foot width right-of-way, connecting an accessory dwelling with a fire protection service provider. The right-of-

way must be improved and composed of an all-weather surface including asphalt, concrete, or gravel, but excluding cinders and other aggregate materials.

3. “Living Space” means space within an accessory dwelling unit that may be utilized for living, sleeping, eating, cooking, bathing, washing and sanitation purposes.
 4. “Right-of-way” means either a public road maintained by the county, a private road with a public access easement, a public road maintained by a road district, or an unmaintained road.
 5. “Rural residential use” means a lot or parcel located in the RR-10 or MUA-10 zones, consistent with the definition in ORS 215.501.
 6. “Safe evacuation plan” means an identifiable route on a right(s)-of-ways from the rural accessory dwelling unit to the staged evacuation area.
 7. “Single-family dwelling” or “manufactured home” means a residential structure designed as a residence for one family and sharing no common wall with another residence of any type.
 8. “Staged evacuation area” means a public or private location that occupants of the rural accessory dwelling unit may evacuate to reorganize.
 9. “Useable floor area” means the living space of the accessory dwelling unit included within the surrounding insulated exterior walls, exclusive of garages, carports, decks and porch covers. All portions of accessory dwelling units that do not meet the definition of “useable floor area” shall not be improved with the following:
 - a. Kitchen, kitchenette, or other cooking facilities;
 - b. Sleeping quarters; and/or
 - c. Facilities for washing and/or drying laundry
 10. “Vacation occupancy” means occupancy in a dwelling unit, not including transient occupancy in a hotel or motel, that has all of the following characteristics:
 - a. The occupant rents the unit for vacation purposes only, not as a principal residence;
 - b. The occupant has a principal residence other than at the unit; and
 - c. The period of authorized occupancy does not exceed 45 days.
- B. One accessory dwelling unit is permitted outright on a lot or parcel zoned for RR-10 or MUA-10, provided:
1. One single-family dwelling is sited on the lot or parcel;
 2. The lot or parcel is not located within the Redmond Urban Reserve Area, consistent with ORS 195.137.

3. No portion of the lot or parcel is within the Metolius Area of Critical State Concern, as defined in ORS 197.416.
4. The lot area or parcel area is at least two acres in size, with the exception of those unsewered areas between Sunriver and the Klamath County border; defined as those unincorporated portions of Deschutes County contained in Townships 19S, 20S, 21S, and 22S and Ranges 9E, 10E and 11E, the minimum lot or parcel size must be at least five acres in size.
5. The accessory dwelling unit will have a minimum setback of 100 feet between the accessory dwelling unit and adjacent land zoned F-1, F-2, or EFU and meet the other minimum setback requirements of the underlying zone and combining zones.
6. The accessory dwelling unit will not include more than 900 square feet of useable floor area.
7. The accessory dwelling unit will be located no farther than 100 feet from the existing single-family dwelling, measured from a wall of the single-family dwelling to the nearest part of the useable floor area of the accessory dwelling unit.
8. The accessory dwelling unit receives approval from a sewer authority or Deschutes County Environmental Soils for onsite wastewater disposal and treatment.
9. The lot or parcel is served by a fire protection service provider with professionals who have received training or certification described in ORS 181A.410.
10. The accessory dwelling unit provides for the following:
 - a. Adequate access:
 - i. The accessory dwelling unit has adequate access as defined in DCC 18.116.370, or;
 - ii. Written certification from a fire protection service provider with professionals who have received training or certification described in ORS 181A.410, on a form prepared by Deschutes County, that access to the property meets minimum fire district requirements to provide emergency services to the property;
 - b. A safe evacuation plan; and
 - c. Written authorization from the owner of the staged evacuation area that the occupants of the rural accessory dwelling unit may evacuate to the staged evacuation area.
11. The lot or parcel and accessory dwelling unit comply with rules of the State Board of Forestry under ORS 477.015, 477.025 and 477.027.
12. If statewide wildfire risk maps described in ORS 477.490 have been approved, the following requirements shall apply:

- a. For extreme and high wildfire risk classes in the wildland-urban interface that are identified pursuant to ORS 477.490, the wildfire hazard mitigation building code standards as described in section R327 of the Oregon Residential Specialty Code;
 - b. Defensible space standards:
 - i. For extreme and high wildfire risk classes in the wildland-urban interface that are identified pursuant to ORS 477.490, the minimum defensible space rules established by the State Fire Marshal as described in ORS 476.392 shall apply, or;
 - ii. If the accessory dwelling unit is not subject to ORS 477.015, 477.025 and 477.027:
 - 1. The minimum defensible space rules established by the State Fire Marshal as described in ORS 476.392 shall apply, or;
 - 2. The accessory dwelling unit has defensible space and fuel break standards as developed in consultation with local fire protection service providers.
13. If statewide wildfire risk maps described in ORS 477.490 have not been approved, the following requirements shall apply:
- a. The wildfire hazard mitigation building code standards as described in section R327 of the Oregon Residential Specialty Code.
 - b. Defensible space standards:
 - i. The owners shall construct and maintain the following firebreaks on land surrounding the accessory dwelling unit on land that is owned or controlled by the owner:
 - 1. Primary Firebreak. Prior to use, a primary firebreak, not less than 10 feet wide, shall be constructed containing nonflammable materials. This may include lawn, walkways, driveways, gravel borders or other similar materials;
 - 2. Secondary Firebreak. A secondary firebreak of not less than 20 feet wide shall be constructed outside the primary firebreak. This firebreak need not be bare ground, but can include a lawn, ornamental shrubbery or individual or groups of trees separated by a distance equal to the diameter of the crowns adjacent to each other, or 15 feet, whichever is greater. All trees shall be pruned to at least eight feet in height. Dead fuels shall be removed;
 - 3. Fuel Break. A fuel break shall be maintained, extending a minimum of 100 feet in all directions around the secondary firebreak. Individual and groups of trees within the fuel break shall be separated by a distance equal to the diameter of the crowns adjacent to each other, or 15 feet,

whichever is greater. Small trees and brush growing underneath larger trees shall be removed to prevent spread of fire up into the crowns of the larger trees. All trees shall be pruned to at least eight feet in height. Dead fuels shall be removed. The fuel break shall be completed prior to the beginning of the coming fire season;

- 4. No portion of a tree or any other vegetation shall extend to within 15 feet of the outlet of a stovepipe or chimney, or;
- 5. The accessory dwelling unit has defensible space and fuel break standards as developed in consultation with local fire protection service providers.

14. The existing single-family dwelling property on the lot or parcel is not subject to an order declaring it a nuisance or subject to any pending action under ORS 105.550 to 105.600.

15. A lot or parcel with an accessory dwelling unit approved under this section is ineligible for:

- a. A subdivision, partition, other division of the lot or parcel, or a lot line adjustment where the result of such application would be to situate the existing single-family dwelling on a different lot or parcel than the accessory dwelling unit.
- b. Placement or construction of any additional accessory dwelling unit or any other permanent or temporary structure or dwelling unit designed or used for residential purposes.

16. If the accessory dwelling unit is served by a well, the construction of the accessory dwelling unit shall maintain all setbacks from the well required by the Water Resources Commission or Water Resources Department.

17. A letter confirming that the supplier of water is "Willing and Able to Serve" the ADU be provided if the ADU is to be served by any water source other than an onsite domestic well.

18. An existing single-family dwelling and an accessory dwelling unit allowed under this section are considered a single unit for the purposes of calculating ground water right exemptions under ORS 537.545(1).

19. The applicant shall sign and record with the County Clerk, prior to the issuance of a building permit, a restrictive covenant stating an accessory dwelling unit allowed under this section cannot be used for vacation occupancy, as defined in DCC 18.116.370(A)(10) and consistent with ORS 90.100.

CHAPTER 19.92 INTERPRETATIONS AND EXCEPTIONS

* * *

19.92.150 Accessory Dwelling Units In UAR-10 And SR-2 1/2 Zones

19.92.160 Residential Accessory Dwelling Units In UAR-10, SR-2 1/2, And WTZ Zones

19.92.150 Historic Accessory Dwelling Units In UAR-10 And SR-2 1/2 Zones

A. As used in this section:

1. “Historic Accessory dwelling unit” means a residential structure that is used in connection with or that is auxiliary to a ~~single-family dwelling~~ historic home. For the purposes of DCC Title 19, the term "auxiliary" shall be synonymous with the terms “incidental and subordinate to.”
2. “Area zoned for rural residential use” means land that is not located inside an urban growth boundary as defined in ORS 195.060 and that is subject to an acknowledged exception to a statewide land use planning goal relating to farmland or forestland and planned and zoned by the county to allow residential use as a primary use.
3. “Historic home” means a single-family dwelling constructed between 1850 and 1945.
4. “New” means that the dwelling being constructed did not previously exist in residential or nonresidential form. “New” does not include the acquisition, alteration, renovation or remodeling of an existing structure.
5. “Single-family dwelling” means a residential structure designed as a residence for one family and sharing no common wall with another residence of any type.

B. An owner of a lot or parcel within an area zoned for rural residential use (UAR-10 and SR-2 1/2 zones) may construct a new single-family dwelling on the lot or parcel, provided:

1. The lot or parcel is not located in an area designated as an urban reserve as defined in ORS 195.137;
2. The lot or parcel is at least two acres in size;
3. A historic home is sited on the lot or parcel;
4. The owner converts the historic home to an accessory dwelling unit upon completion of the new single-family dwelling; and
5. The accessory dwelling unit may be required to comply with all applicable laws and regulations relating to sanitation and wastewater disposal and treatment.

C. The construction of an accessory dwelling under subsection (B) of this section is a land use action subject to DCC 22.20.

- D. An owner that constructs a new single-family dwelling under subsection (B) of this section may not:
 1. Subdivide, partition or otherwise divide the lot or parcel so that the new single-family dwelling is situated on a different lot or parcel from the accessory dwelling unit.
 2. Alter, renovate or remodel the accessory dwelling unit so that the square footage of the accessory dwelling unit is more than 120 percent of the historic home’s square footage at the time construction of the new single-family dwelling commenced.
 3. Rebuild the accessory dwelling unit if the structure is deemed a dangerous building due to fire or other natural disaster, pursuant to the Uniform Code for the Abatement of Dangerous Buildings, which defines “dangerous building” as “Whenever any portion thereof has been damaged by fire, earthquake, wind, flood or by any other cause, to such an extent that the structural strength or stability thereof is materially less than it was before such catastrophe and is less than the minimum requirements of the Building Code for new buildings of similar structure, purpose or location.”
 4. Construct an additional accessory dwelling unit on the same lot or parcel.
- E. A new single-family dwelling constructed under this section may be required to be served by the same water supply source as the accessory dwelling unit.
- F. Owner occupancy of either the accessory dwelling unit or the new single-family dwelling is not required. However, the new single-family dwelling and the accessory dwelling unit may not be used simultaneously for short-term rentals of thirty (30) consecutive days or less.

19.92.160 Residential Accessory Dwelling Units In UAR-10, SR-2 ½, And WTZ Zones

A. As used in this section:

1. “Accessory dwelling unit” means a residential structure that is used in connection with or that is auxiliary to an existing single-family dwelling or manufactured home. For the purposes of DCC Title 19, the term "auxiliary" shall be synonymous with the terms “incidental and subordinate to.”
2. “Adequate access” means a continuous, minimum 20-foot width right-of-way, connecting an accessory dwelling with a fire protection service provider. The right-of-way must be improved and composed of an all-weather surface including asphalt, concrete, or gravel, but excluding cinders and other aggregate materials.
3. “Living Space” means space within an accessory dwelling unit that may be utilized for living, sleeping, eating, cooking, bathing, washing and sanitation purposes.

4. “Right-of-way” means either a public road maintained by the county, a private road with a public access easement, a public road maintained by a road district, or an unmaintained road.
 5. “Rural residential use” means a lot or parcel located in the RR-10 or MUA-10 zones, consistent with the definition in ORS 215.501.
 6. “Safe evacuation plan” means an identifiable route on a right(s)-of-ways from the rural accessory dwelling unit to the staged evacuation area.
 7. “Single-family dwelling” or “manufactured home” means a residential structure designed as a residence for one family and sharing no common wall with another residence of any type.
 8. “Staged evacuation area” means a public or private location that occupants of the rural accessory dwelling unit may evacuate to reorganize.
 9. “Useable floor area” means the living space of the accessory dwelling unit included within the surrounding insulated exterior walls, exclusive of garages, carports, decks and porch covers. All portions of accessory dwelling units that do not meet the definition of “useable floor area” shall not be improved with the following:
 - a. Kitchen, kitchenette, or other cooking facilities;
 - b. Sleeping quarters; and/or
 - c. Facilities for washing and/or drying laundry
 10. “Vacation occupancy” means occupancy in a dwelling unit, not including transient occupancy in a hotel or motel, that has all of the following characteristics:
 - a. The occupant rents the unit for vacation purposes only, not as a principal residence;
 - b. The occupant has a principal residence other than at the unit; and
 - c. The period of authorized occupancy does not exceed 45 days.
- B. One accessory dwelling unit is permitted outright on a lot or parcel zoned for UAR-10, SR-2 ½, or WTZ, provided:**
1. One single-family dwelling is sited on the lot or parcel.
 2. The lot area or parcel area is at least two acres in size.
 3. The accessory dwelling unit will have a minimum setback of 100 feet between the accessory dwelling unit and adjacent land zoned F-1, F-2, or EFU and meet the other minimum setback requirements of the underlying zone and combining zones.
 4. The accessory dwelling unit will not include more than 900 square feet of useable floor area.

5. The accessory dwelling unit will be located no farther than 100 feet from the existing single-family dwelling, measured from a wall of the single-family dwelling to the nearest part of the useable floor area of the accessory dwelling unit.
6. The accessory dwelling unit receives approval from a sewer authority or Deschutes County Environmental Soils for onsite wastewater disposal and treatment.
7. The lot or parcel is served by a fire protection service provider with professionals who have received training or certification described in ORS 181A.410.
8. The accessory dwelling unit provides for the following:
 - a. Adequate access:
 - i. The accessory dwelling unit has adequate access as defined in DCC 18.116.370, or;
 - ii. Written certification from a fire protection service provider with professionals who have received training or certification described in ORS 181A.410, on a form prepared by Deschutes County, that access to the property meets minimum fire district requirements to provide emergency services to the property;
 - b. A safe evacuation plan; and
 - c. Written authorization from the owner of the staged evacuation area that the occupants of the rural accessory dwelling unit may evacuate to the staged evacuation area.
9. The lot or parcel and accessory dwelling unit comply with rules of the State Board of Forestry under ORS 477.015, 477.025 and 477.027.
10. If statewide wildfire risk maps described in ORS 477.490 have been approved, the following requirements shall apply:
 - a. For extreme and high wildfire risk classes in the wildland-urban interface that are identified pursuant to ORS 477.490, the wildfire hazard mitigation building code standards as described in section R327 of the Oregon Residential Specialty Code;
 - b. Defensible space standards:
 - i. For extreme and high wildfire risk classes in the wildland-urban interface that are identified pursuant to ORS 477.490, the minimum defensible space rules established by the State Fire Marshal as described in ORS 476.392 shall apply, or;
 - ii. If the accessory dwelling unit is not subject to ORS 477.015, 477.025 and 477.027:
 1. The minimum defensible space rules established by the State Fire Marshal as described in ORS 476.392 shall apply, or;

2. The accessory dwelling unit has defensible space and fuel break standards as developed in consultation with local fire protection service providers.

11. If statewide wildfire risk maps described in ORS 477.490 have not been approved, the following requirements shall apply:

a. The wildfire hazard mitigation building code standards as described in section R327 of the Oregon Residential Specialty Code.

b. Defensible space standards:

i. The owners shall construct and maintain the following firebreaks on land surrounding the accessory dwelling unit on land that is owned or controlled by the owner:

1. Primary Firebreak. Prior to use, a primary firebreak, not less than 10 feet wide, shall be constructed containing nonflammable materials. This may include lawn, walkways, driveways, gravel borders or other similar materials.

2. Secondary Firebreak. A secondary firebreak of not less than 20 feet wide shall be constructed outside the primary firebreak. This firebreak need not be bare ground, but can include a lawn, ornamental shrubbery or individual or groups of trees separated by a distance equal to the diameter of the crowns adjacent to each other, or 15 feet, whichever is greater. All trees shall be pruned to at least eight feet in height. Dead fuels shall be removed;

3. Fuel Break. A fuel break shall be maintained, extending a minimum of 100 feet in all directions around the secondary firebreak. Individual and groups of trees within the fuel break shall be separated by a distance equal to the diameter of the crowns adjacent to each other, or 15 feet, whichever is greater. Small trees and brush growing underneath larger trees shall be removed to prevent spread of fire up into the crowns of the larger trees. All trees shall be pruned to at least eight feet in height. Dead fuels shall be removed. The fuel break shall be completed prior to the beginning of the coming fire season;

4. No portion of a tree or any other vegetation shall extend to within 15 feet of the outlet of a stovepipe or chimney, or;

5. The accessory dwelling unit has defensible space and fuel break standards as developed in consultation with local fire protection service providers.

12. The existing single-family dwelling property on the lot or parcel is not subject to an order declaring it a nuisance or subject to any pending action under ORS 105.550 to 105.600.

- 13. A lot or parcel with an accessory dwelling unit approved under this section is ineligible for:

 - a. A subdivision, partition, other division of the lot or parcel, or a lot line adjustment where the result of such application would be to situate the existing single-family dwelling on a different lot or parcel than the accessory dwelling unit.
 - b. Placement or construction of any additional accessory dwelling unit or any other permanent or temporary structure or dwelling unit designed or used for residential purposes.
- 14. If the accessory dwelling unit is served by a well, the construction of the accessory dwelling unit shall maintain all setbacks from the well required by the Water Resources Commission or Water Resources Department.
- 15. A letter confirming that the supplier of water is "Willing and Able to Serve" the ADU be provided if the ADU is to be served by any water source other than an onsite domestic well.
- 16. An existing single-family dwelling and an accessory dwelling unit allowed under this section are considered a single unit for the purposes of calculating ground water right exemptions under ORS 537.545(1).
- 17. The applicant shall sign and record with the County Clerk, prior to the issuance of a building permit, a restrictive covenant stating an accessory dwelling unit allowed under this section cannot be used for vacation occupancy, as defined in DCC 19.92.160(A)(10) and consistent with ORS 90.100.

CHAPTER 22.04 INTRODUCTION AND DEFINITIONS

22.04.040 Verifying Lots of Record

* * *

22.04.040 Verifying Lots of Record

- A. Purpose; scope. Concurrent with or prior to the issuance of certain permits, a lot or parcel shall be verified pursuant to this section to reasonably ensure compliance with the zoning and land division laws in effect on the date the lot or parcel was created. Not all permits require verification. If required, verifying that the lot or parcel was lawfully created is a threshold issue that should be addressed before the permit may be issued, but does not supersede or nullify other permit requirements. This section 22.04.040 provides an applicant the option to concurrently verify a lot or parcel as part of applying for a permit that requires verification, or preliminarily apply for a declaratory ruling to thereby determine the scope of available permits.
- B. Permits Requiring Verification.
 - 1. Unless an exception applies pursuant to subsection (B)(2) below, verifying a lot or parcel pursuant to subsection (C) shall be required prior to the issuance of the following permits:
 - a. Any land use permit for a unit of land in the Exclusive Farm Use Zones (DCC Chapter 18.16), Forest Use Zone – F1 (DCC Chapter 18.36), or Forest Use Zone – F2 (DCC Chapter 18.40);
 - b. Any permit for a lot or parcel that includes wetlands as shown on the Statewide Wetlands Inventory;
 - c. Any permit for a lot or parcel subject to wildlife habitat special assessment;
 - d. In all zones, a land use permit relocating property lines that reduces in size a lot or parcel;
 - e. In all zones, a land use, structural, or non-emergency on-site sewage disposal system permit if the lot or parcel is smaller than the minimum area required in the applicable zone;
 - e.f. In all zones, a permit for a Historic Accessory Dwelling Unit as defined in DCC 18.116.350 or a Rural Accessory Dwelling Unit as defined in DCC 18.116.370.
- C. Verified Lots of Record. Permits that require verification shall only be issued to lots or parcels that meet the “lot of record” definition in 18.04.030.
- D. Findings; Declaratory Ruling. If an applicant is applying for a land use permit listed in subsection (B)(1), the County shall include a finding verifying that the lot or parcel meets the “lot of record” definition in 18.04.030, a finding noting that the lot or parcel does not meet the “lot of record” definition in 18.04.030, or a finding noting that verification was not required because the lot or parcel qualified for an exception pursuant to subsection (B)(2). If an applicant is applying for a

permit listed in subsection (B)(1) that does not require public notice, or prior to applying for any permit, an applicant may request a declaratory ruling pursuant to DCC Chapter 22.40. If the lot or parcel meets the “lot of record” definition in 18.04.030, the County shall issue the declaratory ruling determining that the lot or parcel qualifies for all permits listed in subsection (B)(1). If the lot or parcel does not meet the “lot of record” definition in 18.04.030, the County shall not issue the declaratory ruling and instead shall provide the applicant information on permit options that do not require verification and information on verification exceptions that may apply pursuant to subsections (B)(2).

HISTORY

[Amended by Ord. 2023-00x §x on \[date\]](#)

MEMORANDUM

TO: Board of County Commissioners

FROM: Kyle Collins, Associate Planner
Will Groves, Planning Manager

DATE: May 31, 2023

SUBJECT: Rural Accessory Dwelling Unit (ADU) Legislative Amendments – Planning Commission Recommendations, Public Comments, and Agency Comments

Staff has prepared amendments concerning local provisions for rural ADUs as identified in Senate Bill (SB) 391¹ (file no. 247-22-000671-TA). Staff submitted a 35-day PAPA notice to DLCD on August 17, 2022. A public hearing was held with the Planning Commission (Commission) on September 22, 2022². The Commission held deliberations on October 27, 2022³. The recommendations, public comments, and agency comments from that process are discussed herein.

I. PLANNING COMMISSION RECOMMENDATIONS

As noted above, a public hearing was held with the Commission on September 22, 2022. The Commission held deliberations on October 27, 2022 and made recommendations concerning the proposed amendments. Many of these recommendations correspond with staff’s initial draft amendments while others would require new language and modifications to the proposed amendments:

- **Recommendation #1** (*approved 4 to 2*): The Commission recommended adoption of the proposed amendments, with substantial changes to the initial proposal as discussed herein.
- **Recommendation #2** (*approved 5 to 1*): “Useable floor area” is undefined within SB 391 and the administering statutes. The Commission recommends “Useable Floor Area” be defined as “the area of the accessory dwelling unit included within the surrounding exterior walls, including garages and other accessory components.” To clarify, the 900 square-foot size

¹ <https://olis.oregonlegislature.gov/liz/2021R1/Downloads/MeasureDocument/SB0391/A-Engrossed>
² See Deschutes County Planning Commission September 22, 2022 Agenda for more information: <https://www.deschutes.org/bc-pc/page/planning-commission-17>
³ See Deschutes County Planning Commission October 27, 2022 Agenda for more information: <https://www.deschutes.org/bc-pc/page/planning-commission-21>

limitation for rural ADUs would apply to the entire ADU structure, including garages and accessory components.

- **Recommendation #3:** A unit must be located no farther than 100 feet from the existing single family dwelling, measured from a wall of the single-family dwelling to the nearest part of the “useable floor area” of the accessory dwelling unit. This recommendation was unchanged by the Commission from staff’s initial proposal and thus no approval vote was taken.
- **Recommendation #4:** Due to vulnerable groundwater characteristics in southern Deschutes County, the Commission recommends the minimum lot or parcel size for rural ADUs to be at least five (5) acres in size. The boundaries of this recommendation were defined by the upper Deschutes watershed area studied during the La Pine Demonstration Project, US Geological Survey report 2007-5237, USGS Fact Sheet 2007-3103. This recommendation was unchanged by the Commission from staff’s initial proposal and thus no approval vote was taken.
- **Recommendation #5** (*approved 5 to 1*): The Commission recommends prohibiting rural ADU development in designated Goal 5 resource areas (i.e. – Wildlife Area Combining Zone, Greater Sage-Grouse Area Combining Zone, and the Sensitive Bird and Mammal Habitat Combining Zone).
- **Recommendation #6** (*approved 6 to 0*): Pursuant to SB 762, the Commission recommends delaying the adoption of any local rural ADU legislation until such time as the final Statewide Map of Wildfire Risk has been released by the Oregon Department of Forestry (ODF).
 - This recommendation was made prior to adoption of SB 644 and the corresponding impacts on SB 391 and the Statewide Map of Wildfire Risk.
 - SB 644 effectively decouples the Statewide Map of Wildfire Risk from the adoption of any local rules allowing rural ADUs. During any interim period where a local jurisdiction has adopted rules allowing ADUs and prior to the release of the final risk map, any constructed ADUs will be subject to the home hardening building codes as described in section R327 of the 2021 Oregon Residential Specialty Code.
- **Recommendation #7** (*approved 6 to 0*): The Commission recommends prohibiting rural ADU development the Westside Transect Zone (WTZ) Zone.
- **Recommendation #8** (*approved 6 to 0*): The Commission recommends prohibiting both the existing single-family dwelling and the ADU for vacation occupancy use, as defined in DCC 18.116.370(A)(8) and consistent with ORS 90.100.

Outside of the explicit recommendations above, the Commission engaged in numerous discussion points relevant to the proposed amendments. A number of Commissioners expressed concern that the rural ADU amendments were being presented prior to completion of other ongoing long range planning initiatives which may have significant bearing on the proposal. Specifically, some Commissioners highlighted the importance of the ongoing state wildfire mitigation efforts and SB

762, the ongoing Deschutes County Comprehensive Plan update ([Deschutes 2040](#)), and the ongoing Goal 5 habitat inventory update for mule deer ([Wildlife Inventory Update](#)). Of these items, only the SB 762 mapping and wildfire mitigation efforts received a majority vote recommending delay of the proposed amendments. Should the Board elect to follow the Commission's recommendation to delay adoption of the proposed amendments until release of the final Statewide Map of Wildfire Risk by ODF, it is unclear when these maps will be formally released and may significantly delay adoption of any local ADU standards.

If the Board desires to change the amendments outside of the initial recommendations, alterations to supporting documents will need to be made prior to adoption of any final implementing ordinance.

II. WRITTEN TESTIMONY & DISCUSSION

To date, a total of sixteen (16) comments from members of the public have been received by staff concerning the initially proposed amendments.

Seven (7) of the submitted comments generally expressed support for the proposed ADU amendments, citing the following items:

- Opportunities for a general increase in housing supply, particular given ongoing housing shortages and burdensome rental costs in Central Oregon.
- Increased opportunities for intergenerational living as many aging parents and family members pursue housing with other family members on existing developed properties.
- Increased economic activity from rural ADU development.
- In conjunction with the initially proposed County standards, the existing requirements in SB 391 will serve to limit the effects of increased development in rural areas of the county.

Alternatively, nine (9) of the submitted comments expressed general disapproval of the proposed ADU amendments, citing the following items:

- Negative impacts from increased traffic.
- Additional risk from adding residential development in high wildfire risk areas.
- Impacts to pre-existing water resources from adding additional exempt, private residential wells in the rural county.
- Loss of open space and rural quality of life expected from increased rural density.
- Impacts to wildlife populations and habitat related to increased development density.
- General skepticism around the impact that rural ADUs would have on housing availability and

affordability in the region.

- Concerns that certain restrictions, such as the limitation of utilizing rural ADUs for short term vacation rental purposes, can be accurately tracked and enforced by county staff.

Among those comments expressing general disapproval, not all requested a full denial of the proposed amendments. Certain commenters suggested additional actions or details that should accompany any ADU program if ultimately approved by the Board:

- Delaying the amendment process until final versions of the Statewide Map of Wildfire Risk required by Senate Bill (SB) 762 has been released by the Oregon Department of Forestry.
- Prohibit ADUs in all Goal 5 inventories captured by Deschutes County, including the Wildlife Area Combining Zone, Greater Sage-Grouse Area Combining Zone, and the Flood Plain Zone.
- Prohibit ADUs in the Westside Transect Zone.
- Delay the amendment process until the County's proposed Goal 5 inventory update is completed.

III. PLANNING COMMISSION HEARING TESTIMONY & DISCUSSION

During the public hearing before the Commission, nine (9) individuals provided testimony. Some testimony expressed dissatisfaction regarding the proposed text amendments in general. These comments focused primarily on the following items:

- Negative impacts to wildlife populations.
- Negative impacts on ground water supplies.
- Potential code compliance issues, specifically related to the required prohibition on vacation rentals.
- Additional wildfire risk from increased development in the rural county.
- A lack of compatibility between the proposed amendments, the statewide land use goals, and the Deschutes County Comprehensive Plan.

Some testimony expressed support for the proposed text amendments in general. These comments focused primarily on the following items:

- Opportunities for a general increase in housing supply, particular given ongoing housing shortages and burdensome rental costs in Central Oregon.

- Increased opportunities for intergenerational living as many aging parents and family members pursue housing with other family members on existing developed properties.
- Increased economic activity from rural ADU development.

IV. AGENCY COMMENTS & DISCUSSION

As part of the record, seven (7) comments have been included from several state and local agencies with an interest in the proposed ADU amendments. Staff will attempt to highlight some of those specific comments that are particularly pertinent:

Deschutes County Environmental Soils Division

Due to concerns regarding failing treatment systems and groundwater impacts, the Onsite Wastewater Division recommends the following:

- Increasing the minimum lot or parcel size for rural ADUs to be at least five (5) acres in size in this specific geographic area. Additionally, in consultation with the Onsite Wastewater Division, staff has explored the possibility of requiring advanced wastewater treatment systems for ADU development in southern Deschutes County.
- Limiting properties constructed with ADUs from all future residential dwelling development, including additional ADUs, medical hardship dwellings, and temporary dwellings within recreational vehicles or similar uses.

Oregon Department of Fish and Wildlife

The Oregon Department of Fish and Wildlife (ODFW) has requested certain mitigation standards for any ADUs that may be developed within the Wildlife Area (WA) Combining Zone. Specifically, ODFW has requested the following:

- The siting and fencing standards of Deschutes County Code (DCC) 18.88⁴ be maintained for all rural ADU development in the WA Combining Zone.
- A specific size limitation be instituted for all accessory components (i.e. - garages, storage structures, etc.) of any developed ADU not included in the 900 square-foot “useable floor area” required by SB 391.
- Access to properties should utilize existing roads and driveways for all rural ADU development.

4
https://deschutescounty.municipalcodeonline.com/book?type=ordinances#name=CHAPTER_18.88_WILDLIFE_AREA_COMBINING_ZONE; WA

Staff believes that the siting and fencing standards of DCC 18.88 would apply to all rural ADU development, regardless of specific language included in the proposed text amendments. To maintain clarity, should rural ADUs be allowed within the Wildlife Area Combining Zone, staff could modify the proposed amendment language to explicitly state the referenced standards from DCC 18.88 will apply to any future ADU development.

Options for specific size limitations have been proposed and discussed by the Commission regarding accessory components of an ADU. As discussed above and within the attached Recommendation Matrix (Attachment 1), the Commission recommends limiting the definition of “useable floor area” to encompass both living areas and accessory components of an ADU. As recommended, the total footprint of any proposed ADU, including components such as garages or storage areas, would be limited to 900 square feet.

Finally, staff notes that construction of new roads is typically reviewed through a subdivision or partition process against the standards of DCC Title 17. These proposals are generally distinct from specific physical development on an individual property, such as the construction of an ADU. Additionally, driveway permits are issued and reviewed through the Road Department primarily for compliance with clear sighting and other safety requirements. If driveway access to rural ADUs is required to be consolidated to existing access points, it is unclear how this specific standard would be reviewed or enforced over time.

MEMORANDUM

TO: Board of County Commissioners

FROM: Kyle Collins, Associate Planner
Will Groves, Planning Manager

DATE: May 31, 2023

SUBJECT: Rural Accessory Dwelling Unit (ADU) Legislative Amendments – Anticipated Property Eligibility

Staff has prepared amendments concerning local provisions for rural ADUs as identified in Senate Bill (SB) 391¹ (file no. 247-22-000671-TA). Staff submitted a 35-day PAPA notice to DLCD on August 17, 2022. A public hearing was held with the Planning Commission (Commission) on September 22, 2022². The Commission held deliberations on October 27, 2022³.

I. ANTICIPATED PROPERTY ELIGIBILITY

This proposal amends Deschutes County Code (DCC), Titles 18 and 19 to allow Rural ADUs consistent with SB 391 in the Multiple Use Agricultural (MUA-10), Rural Residential (RR-10), Suburban Low Density Residential (SR 2.5), Urban Area Reserve (UAR-10), and Westside Transect (WTZ) Zones. Eligibility criteria will be incorporated in DCC Chapters 18.116, Supplementary Provisions and 19.92, Interpretations and Exceptions. Based on initial review of the qualifying characteristics, approximately **8,660 tax lots in Deschutes County could potentially qualify for a rural ADU**. This includes properties which do not currently have a single-family dwelling onsite, but otherwise meet the qualifying standards. Additionally, this includes parcels which the Commission has recommended be prohibited from rural ADU development. However, staff notes the following limitations and revisions to that initial estimate:

- The estimate is only based on general requirements from SB 391 and does not evaluate properties on an individual level. Specific properties may have unique lot boundaries, geographic features, onsite wastewater limitations, or other characteristics which make the establishment of a rural ADU more challenging or impossible.

¹ <https://olis.oregonlegislature.gov/liz/2021R1/Downloads/MeasureDocument/SB0391/A-Engrossed>

² See Deschutes County Planning Commission September 22, 2022 Agenda for more information: <https://www.deschutes.org/bc-pc/page/planning-commission-17>

³ See Deschutes County Planning Commission October 27, 2022 Agenda for more information: <https://www.deschutes.org/bc-pc/page/planning-commission-21>

- Property owners may encounter additional costs and challenges when constructing a rural ADU above and beyond specific land use standards. It is likely that numerous properties will need to incorporate significant upgrades to onsite wastewater treatment systems prior to establishment of rural ADUs.
- This estimate includes 765 potentially eligible tax lots in the Wildlife Area Combining Zone (includes Deer Migration Corridor, Deer Winter Range, and Significant Elk Habitat). There are no potentially eligible tax lots within the Greater Sage Grouse Area Combining Zone.
 - The Commission recommends that all properties within the Wildlife Area Combining Zone be prohibited from qualifying for an ADU.
- This estimate includes 120 potentially eligible parcels in the Westside Transect Zone.
 - The Commission recommends that all properties within the Westside Transect Zone be prohibited from qualifying for an ADU.
- This estimate is based on a 5-acre minimum parcel size in southern Deschutes County. There are approximately 319 potentially eligible tax lots in southern Deschutes County based on a 5-acre minimum parcel size. There are approximately 1,129 potentially eligible tax lots in this area based on a 2-acre minimum parcel size.
 - The Commission recommends a 5-acre minimum parcel size in southern Deschutes County for ADU development.
