2/9/2026 - Jen Patterson - From Mt. Bachelor: Please know that the broad Protect Oregon Recreation coalition that's working together to advance this effort is united in strong opposition to SB 1517 and frankly any legislation that attempts to pick winners and losers within the broader recreation and health and fitness industry. PNSAA/NSAA (regional/national ski areas associations) are also in strong opposition to ski-only waiver legislation. Senator Prozanski has known this for a long time but had the bill drafted anyway. It was drafted by OTLA.

SB 1517 is not just ski-only but filled with poison pills for the ski industry. No state does this and it would be a terrible precedent to set. Our attorneys believe that current law in Oregon would be better than this bill. Detailed testimony will be provided on the record as to why.

This bill is also bad for non ski area interests for at least three reasons:

- 1) It doesn't do anything to help non ski-area recreational providers.
- 2) It won't do anything to settle the recreational insurance market.

3) It stands to actually make things worse for non-ski area interests with insurers forced to conclude that the Oregon Legislature has no interest in helping them. Which makes it worse for economic interests who support and benefit from the ski industry, not to mention the recreational users themselves, which is ultimately what matters most.

2/2/2026 - Stephen Gunnels - Allows local transient lodging tax money to be used for city or county services provided by a special district in lieu of the city or county. The Act would change the split of tax uses from at least 70 percent for tourism and no more than 30 percent for local services to at least 40 percent and no more than 60 percent. The Act would let local governments with grandfathered tax laws use the new provisions of the Act.

2/10/2026 - Robert Tingle - Association of Counties and League of Oregon Cities testified in opposition due to the costs of implementation, ongoing budget challenges, and continuing increases in overall PERS rates. There were several state and local government employees testifying in support of the bill.

For Deschutes, the PERS costs for the proposed positions would increase from 29.14% (OPSRP General) to 34.41% (OPSRP P&F) charged against payroll.

#### Information Technology

HB 4055	2	Oppose unless amended	Presession filed (at the request of Joint Legislative Committee on Information Management and Technology for Representative Nancy Nathanson)		Information Management and Technology (J)	Reviewed

2/4/2026 - Tania Mahood - We respectfully oppose HB 4055 unless amended.

We support timely, secure coordination with the State during significant cyber incidents. However, HB 4055's current 48-hour "full report" mandate during active response, its broad re-disclosure authority, and the absence of objective thresholds will divert responders, increase risk, and conflict with well-established Oregon and federal frameworks.

What we request is modest and practical:

Replace the 48-hour "full report" with a 72-hour minimal notice containing only four fields: date/time, incident type, remediation status, and known IOCs—nothing more during the heat of response. This mirrors the federal direction under CIRCIA (72-hour initial report; 24-hour ransom-payment report) and follows NIST's phased incident-handling principles.

Add objective, measurable thresholds so we don't flood the State with low-value noise (e.g., =250 Oregon residents' personal information affected; =12-hour outage of essential services; material destructive malware on production systems; or loss exceeding \$50,000). The >250-resident threshold harmonizes with Oregon's existing breach-notice statute.

Tighten re-disclosure: allow sharing only with law enforcement, federally designated SLTT program (e.g., MS-ISAC, CISA), and a state SOC for defensive use under equal or stronger confidentiality; OCCoE may receive only de-identified research data. Use DHS's PCII program when sharing with CISA to ensure protection from public records laws and civil discovery.

Preserve Oregon Public Records Law protections for cybersecurity information (ORS 192.355(47)) and clarify that submitting a report does not waive privilege or work product.

These changes give the State actionable situational awareness without forcing premature root-cause narratives or exposing live vulnerabilities. They also align with Oregon's existing breach framework (45-day outer bound, AG threshold >250 residents, vendor notice in 10 days) and national standards.

We appreciate the bill's intent and would support HB 4055 with the amendments below.

2/3/2026 - Chris Doty - One of the biggest, if not the biggest reason ODOT is in the position they are in is due to a legislature which has historically saddled the agency with a combination of well-intended but impractical requirements coupled with ideological hoops that are intended to produce an intended outcome – with little regard efficiency or cost. This bill is that in a nut-shell.

I do think ODOT would benefit from a 10-year CIP development process - not unlike what Deschutes County and most other local government have been doing for many years. That said, if ODOT is going to move forward in a meaningful way, they need to hire good leadership and the legislature needs to listen to that leadership. Not pile on more "great ideas" in the absence of leadership.
