

Solid Waste Management Facility Siting

DESCHUTES COUNTY SOLID WASTE ADVISORY COMMITTEE (SWAC) MEETING

Tuesday, May 6, 2025, 2:00 p.m.-4:00 p.m.

Deschutes County Road Department Conference Room (61150 SE 27th St., Bend, OR 97702) or Zoom

Zoom Meeting Information: This meeting may be accessed via Zoom using a phone or computer.

- To join the meeting from a computer, copy and paste this link: https://bit.ly/4iMi1NB
- To join by phone, call 253-215-8782 and enter webinar ID #812 0402 6361 followed by the passcode 773333.
- If joining by a browser, use the raise hand icon to indicate you would like to provide public comment, if and when allowed. If using a phone, press *6 to indicate you would like to speak and *9 to unmute yourself when you are called on.

May Meeting Agenda

- 1. Introductions/ Welcome
- 2. Public Comment
- 3. Overview of Landfill Siting Background, Process, and Recommendations
- 4. Moon Pit Property Negotiation Update
- 5. Board of County Commissioner Meeting and Direction
- 6. Alternate SWMF Sites
- 7. SWAC Recommendation on Path Forward
- 8. Adjourn

<u>Managing the Future of Solid Waste</u>: Solid Waste Management Facility resource information <u>Story Map</u>: Deschutes County Managing the Future of Solid Waste informational story map including Frequently Asked Questions

<u>Solid Waste Advisory Committee Meetings</u>: April 2022 to June 2023 meeting materials, including agendas and summaries

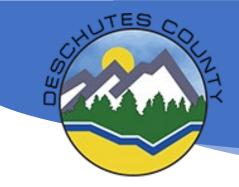

<u>Deschutes County Meeting Portal - Solid Waste Advisory Committee Meetings</u>: August 2023 and later meeting agendas and summaries

Deschutes County encourages persons with disabilities to participate in all programs and activities. This location is accessible to people with disabilities. If you need accommodation to make participation possible, please call the Solid Waste office at (541) 317-3163, or send an email to solidwaste@deschutes.org.

Condado de Deschutes alienta a las personas con discapacidad a participar en sus programas y actividades. Este lugar es accesible para personas con discapacidad. Si necesita hacer arreglos para hacer posible la participación, llame a Solid Waste la oficina a (541) 317-3163, o envíe un correo electrónico a solidwaste@deschutes.org.

Solid Waste Management Facility Siting Study

Solid Waste Advisory Committee (SWAC) Meeting May 6, 2025

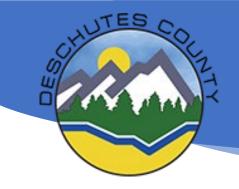

Agenda

- 1. Introductions/Welcome
- 2. Public Comment
- 3. Overview of Landfill Siting Background, Process, and Recommendations
- 4. Moon Pit Property Negotiation Update
- 5. Board of County Commissioner Meeting and Direction
- 6. Alternate SWMF Sites
- 7. SWAC Recommendation on Path Forward
- 8. Adjourn

Introductions / Welcome

SWAC Members

City Representatives (Primary / Alternate):

- •Bend: Cassie Lacy / Chris Ogren (new as alternate, former at-large)
- •Redmond: John Nielsen (new appointment)
- •Sisters: Jackson Dumach / Paul Bertagna (continuing)
- •La Pine: Brent Bybee (new appointment)

Franchise Haulers:

- •Cascade Disposal: Erwin Swetnam / Michael Grove (new alternate)
- •Republic Services: Erica Haitsma / Courtney Voss (new alternate)

Citizen Members:

- •Technical: Timm Schimke (new appointment, replacing Jared Black)
- •Financial: Luke Dynes (continuing)
- At-Large: Keith Kessaris & Robin Vora (continuing)
- •The Environmental Center: Neil Baunsgard (new appointment, replacing Mike Riley)

Project Team Members

Deschutes County

- •Tim Brownell Solid Waste Department Director
- •Jeff Merwin Solid Waste Infrastructure & Compliance Manager
- •Sue Monette Management Analyst
- •Angie Heffner Administrative Support
- •Stephanie Marshall County Legal Counsel
- •Kristie Bollinger County Property Manager

Parametrix (Consultant):

- •Dwight Miller, PE Project Principal
- •Ryan Rudnick, PE Project Manager

SWAC Role

Solicitation for committee members, issued February 2022:

Deschutes County is seeking applicants for its Solid Waste Advisory Committee. Committee members will provide input on the screening and selection process for the location of a new landfill in Deschutes County.

The County has been working on the development of site screening criteria for this effort. The committee will participate in the evaluation of candidate sites and other aspects of landfill siting effort. Ultimately, the Committee will make a recommendation to the Board of County Commissioners on a candidate site.

Public Comments

3 minutes per person, tentatively, depending on the number of people wishing to comment

Written comments can also be sent to:

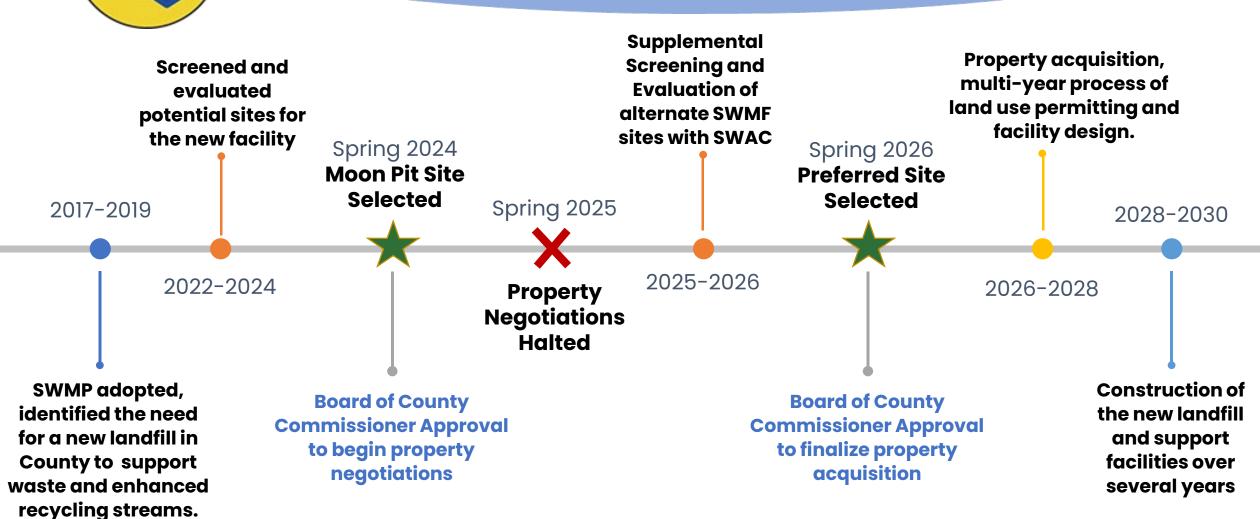

managethefuture@deschutescounty.gov

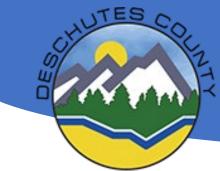

Overview of Landfill Siting Background, Process, and Recommendations

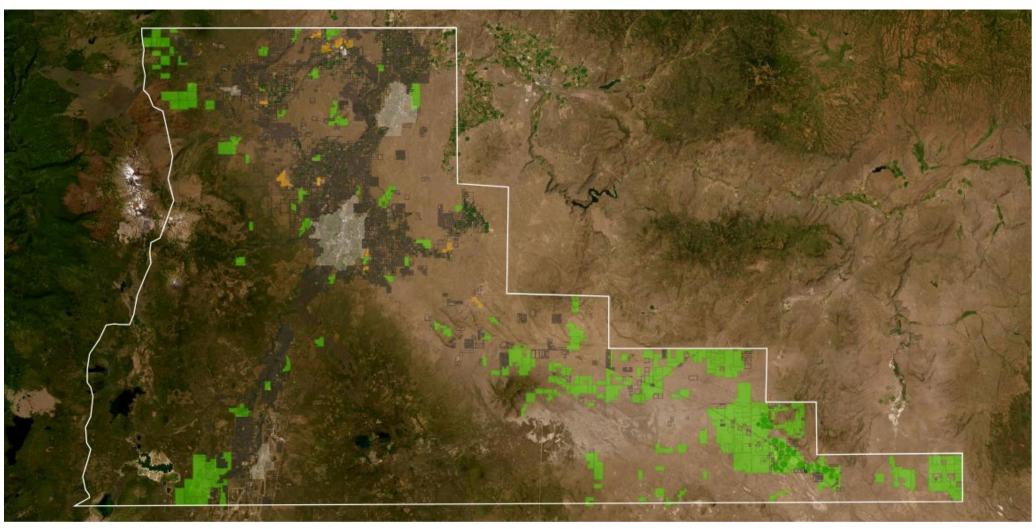

Roadmap to Opening in 2031

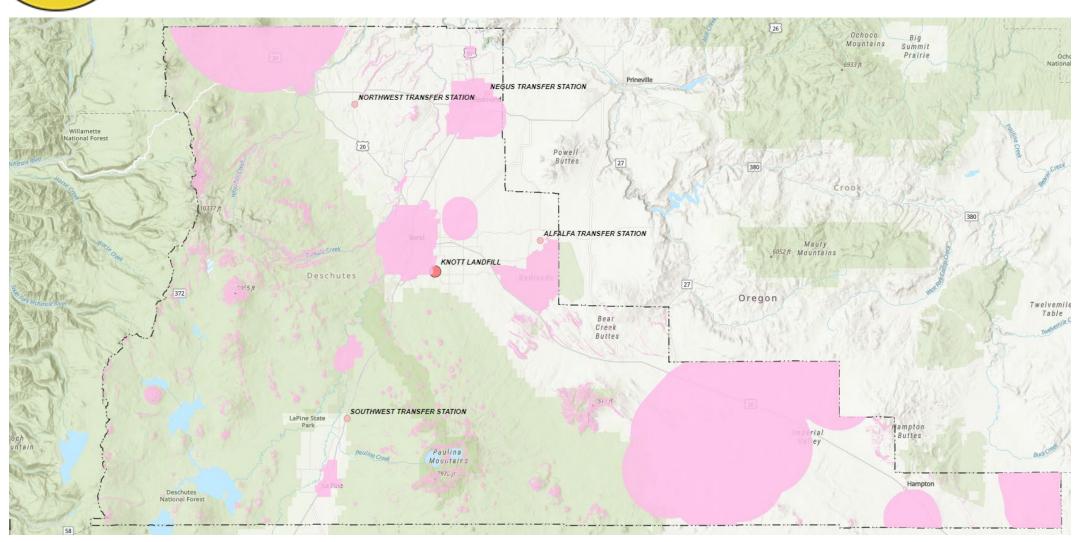

Initial Areas Identified by County

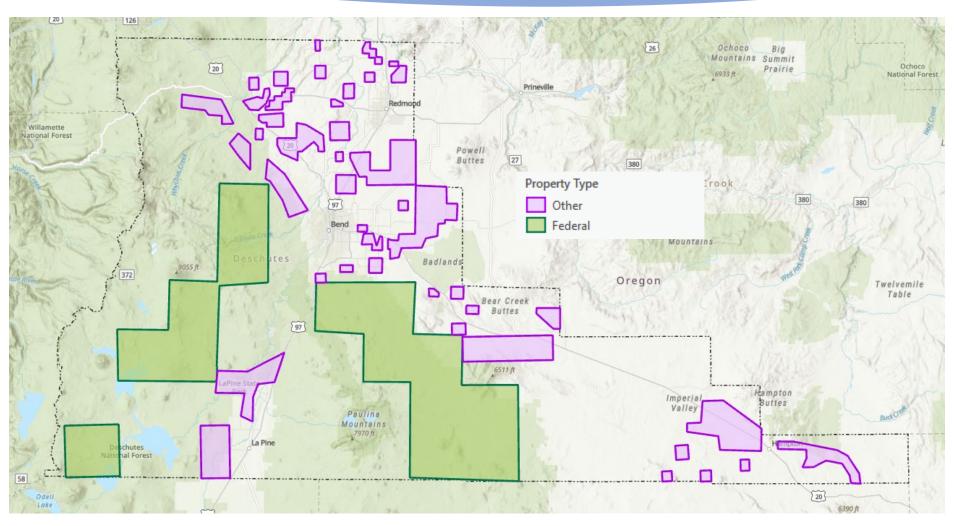

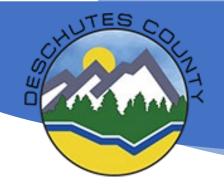

Exclusionary Area Mapping

Broad-Site Screening Areas of Interest

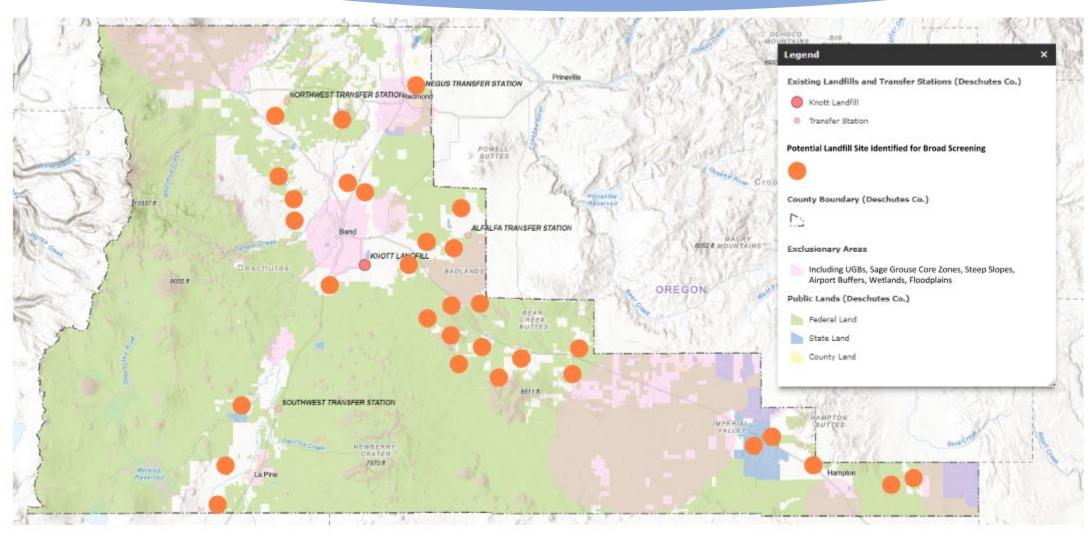

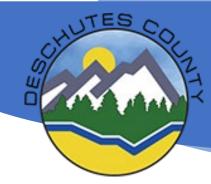

Broad Site Screening Process

- 1. Identify potential sites, consisting of parcels and parcel assemblies (5 or less) that are outside exclusionary areas and 300-3,000 acres
- 2. Develop preliminary disposal area footprints based on buffers and topography, outside exclusionary areas
- 3. Analyze parcel-level information available via GIS resources
- 4. Score sites according to broad site screening criteria
- 5. Eliminate sites that have fatal and practical flaws

Broad Screen Sites Identified

Broad Screen Sites Removed due to Fatal or Practical Flaws

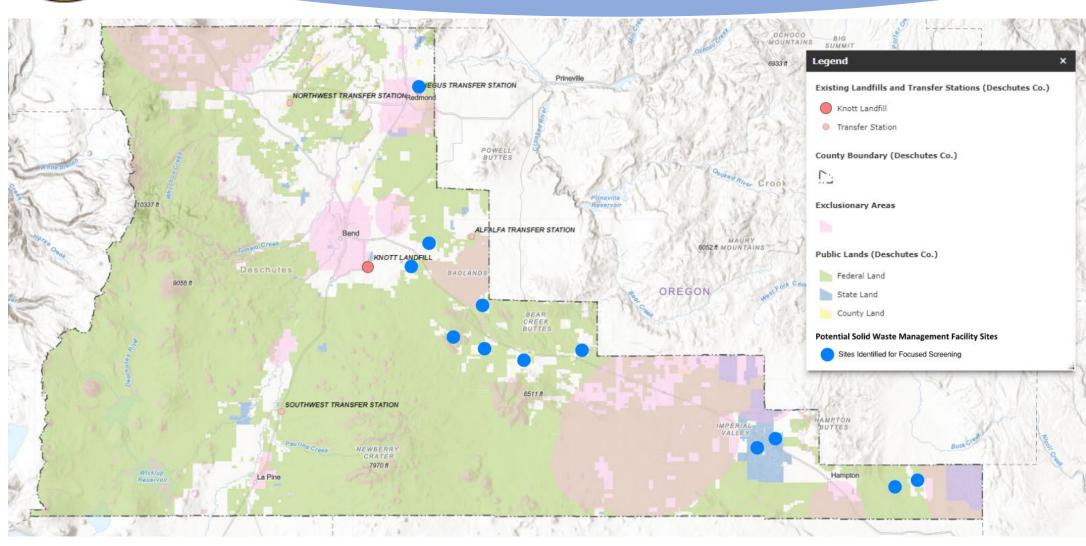

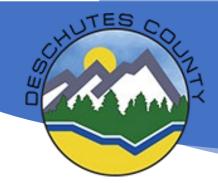

Focused Site Screening Process

- 1. Advance sites from broad site screening without fatal or practical flaws.
- 2. Conduct outreach to site property owners to verify acquisition potential
- 3. Score sites according to focused site screening criteria
- 4. Compare sites in terms of the number of residential dwellings within 1-mile and 2-miles
- 5. Compare sites in terms of comparative cost factors

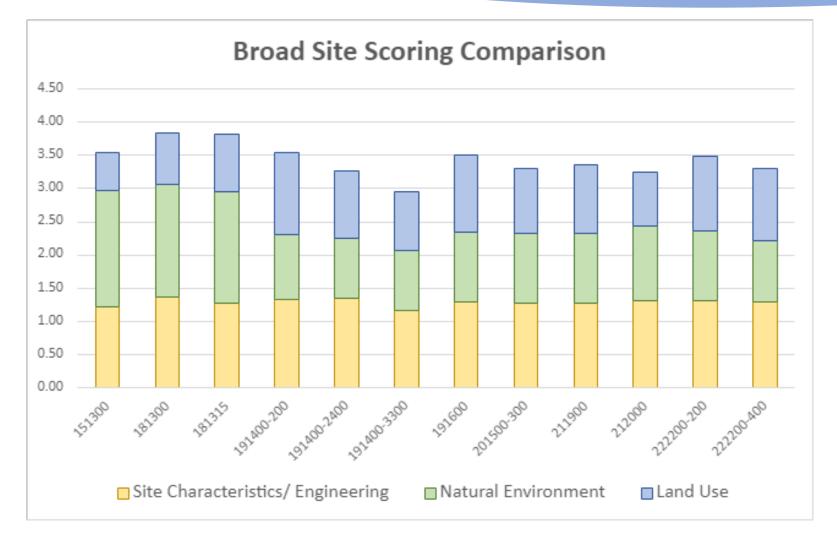

Sites Identified for Focused Screening

Sites Identified for Focused Screening

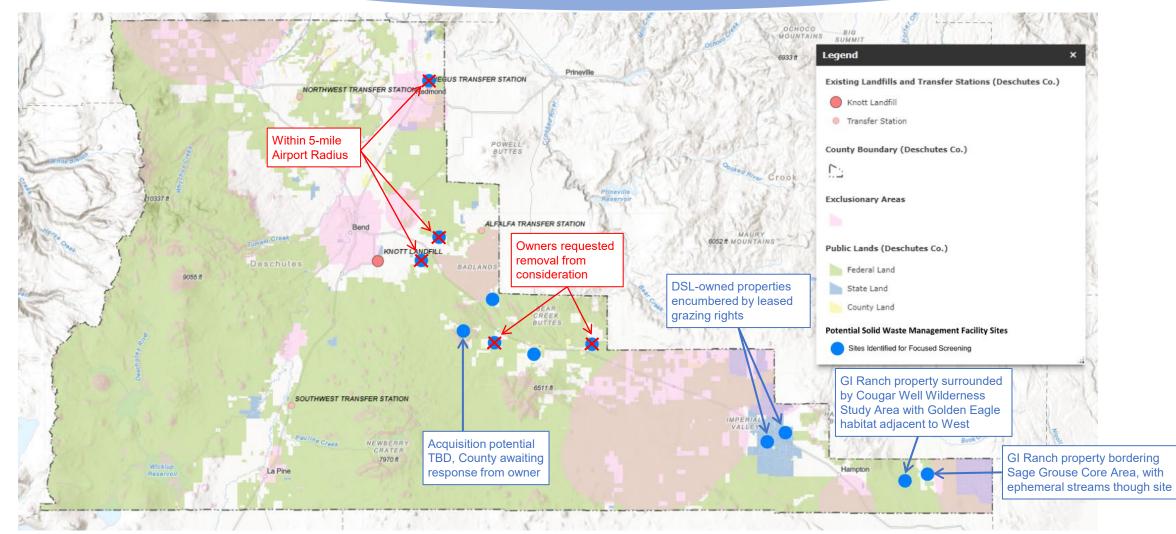

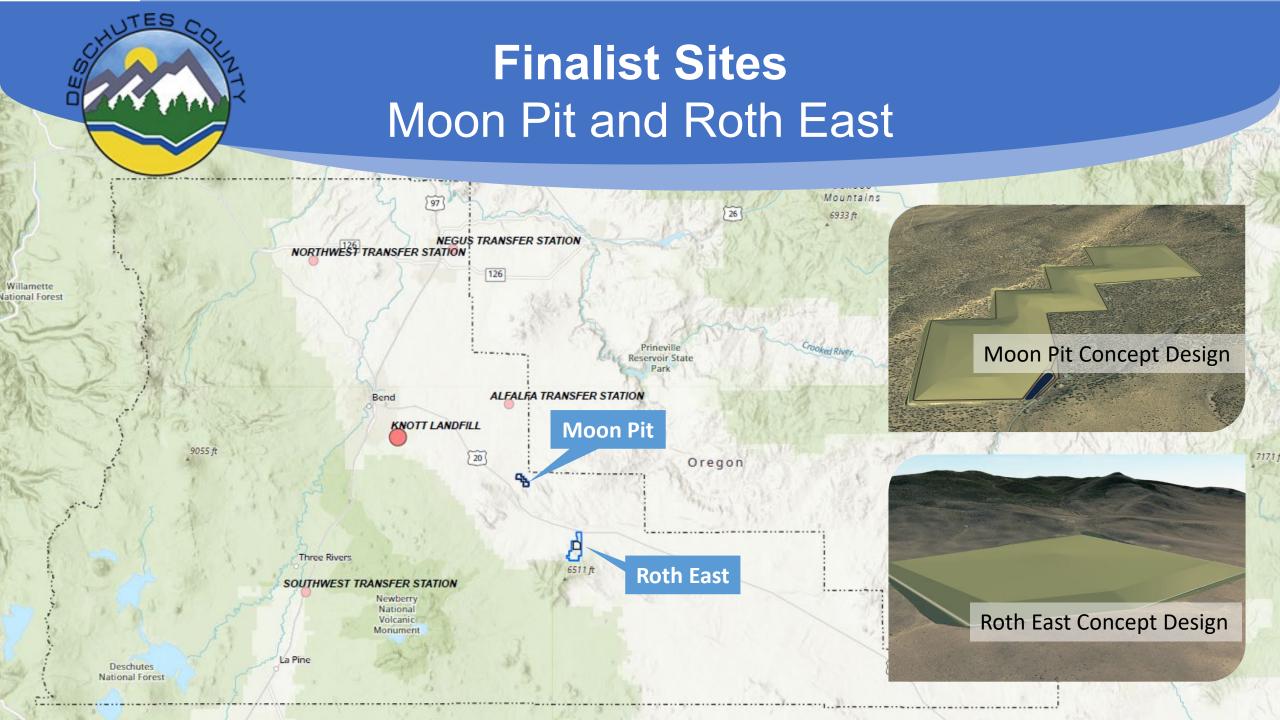

General comparison of how sites performed against criteria and in each main category for Broad Site Screening

Existing and new source data was further analyzed to refine scoring in Focused Site Screening

Focused Screening Updates

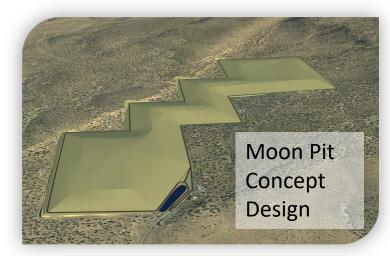

SWAC Final Site Recommendation& BOCC Selection: Moon Pit

On April 16, 2024, the SWAC unanimously recommended the Moon Pit site for the new County Solid Waste Management Facility (SWMF).

Key reasons for this recommendation included:

- The site is currently being used as an aggregate surface mine and is already disturbed
- Based on the current use, new impacts to area wildlife or recreation are would be less
- The site is comparatively closer to existing facilities which will help manage haul costs

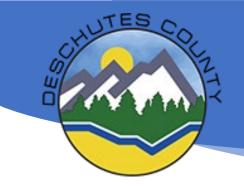

On July 10, 2024 the Deschutes County Board of County Commissioners (BOCC) voted to select "Moon Pit" as the preferred location for the County's next landfill and authorized County staff to move forward with the property negotiations and due diligence.

Moon Pit Property Negotiation Update

Moon Pit Property Negotiation Update

Agreement could not be reached between the County and the seller regarding:

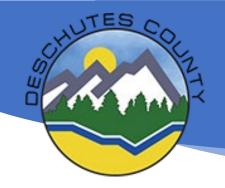

Property closing timeline

Public entity requirement for property appraisal

Uncertainty about how the cost of water rights would be determined

March 19, 2025 BOCC Meeting & Direction

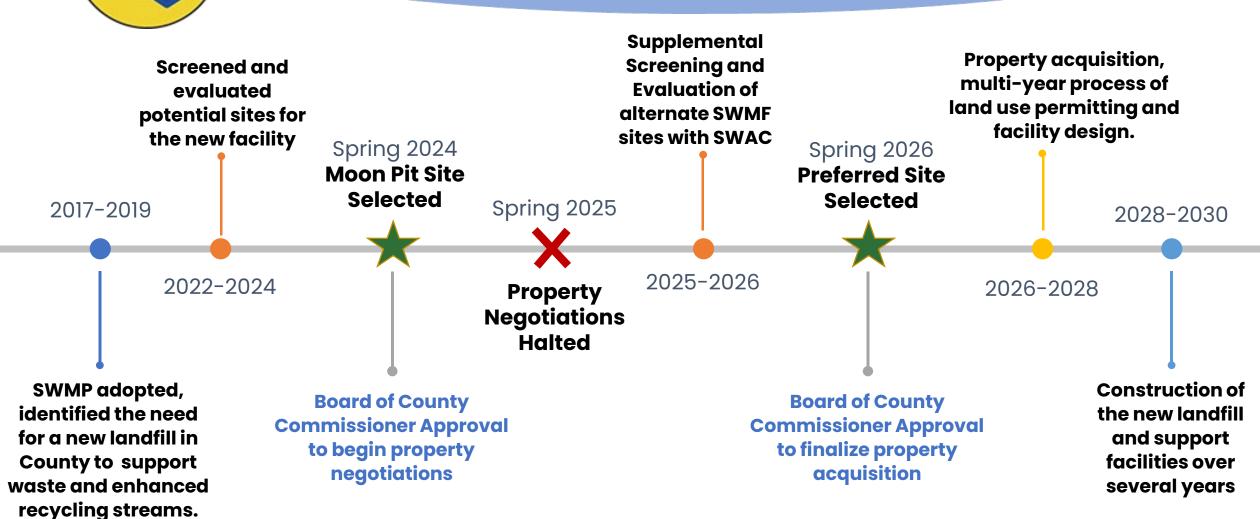

March 19, 2025 BOCC Meeting & Direction

- DCSW updated commissioners regarding status of Moon pit negotiations
- Presented various options for future solid waste disposal, including out-of-county landfill transfers
- An updated JRMA study examined alternate disposal technologies (i.e. waste to energy incinerator,
 plasma gasification, etc.) which were found to be technically and economically unviable for the County
 at this time.
- Options were presented to Commissioners for county MSW disposal:
 - 1. Reconvene SWAC to consider:
 - a. Recommend Roth East
 - b. Screen & Evaluate additional alternate sites
 - 2. Transfer to out-of-county landfills

BOCC gave direction to re-convene the SWAC for further review, deliberation, and recommendation.

Roadmap to Opening in 2031

Alternate SWMF Sites

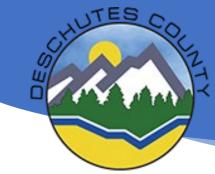

What has changed?

Slower-than-expected waste growth trends in the county over recent years have **extended Knott Landfill's solid waste disposal capacity to approximately 2031**.

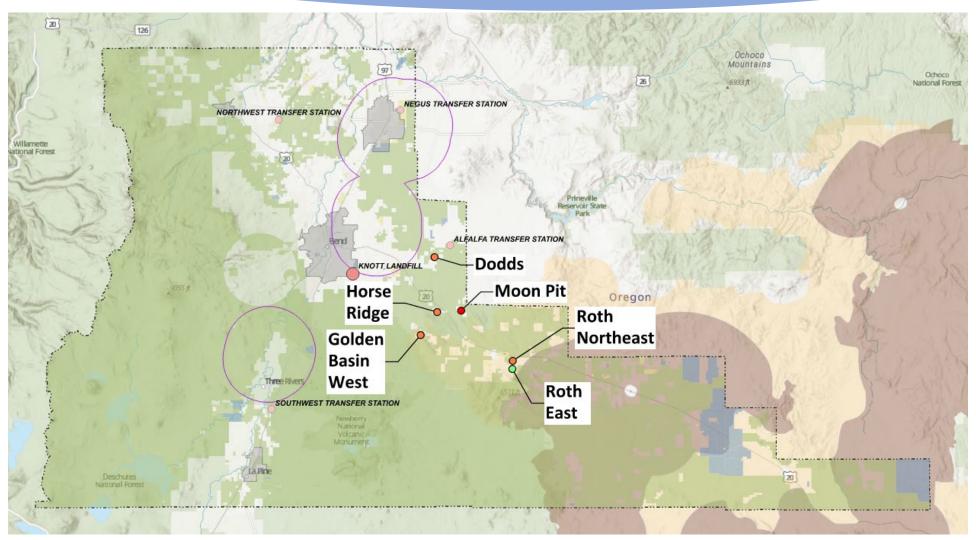

This provides some additional time for supplemental site screening, property acquisition, permitting, and landfill construction. Yet, <u>urgency remains for alternate site selection</u>.

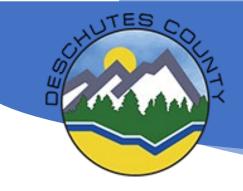

Several factors relevant to SWMF Siting have been updated and some sites previously screened out have become more feasible. For example:

- Updated **Sage Grouse Habitat Maps** adopted in 2025 change the mitigation requirements for some sites.
- New golden eagle nest location data from USFWS provides more precise habitat impact
 assessments, than the section-level habitat mapping available during broad site screening.
- Increased willingness from some property owners to sell land.
- The County Solid Waste staff are open to considering **smaller disposal areas** (<250 acres) that can facilitate at least 80 years of disposal capacity.

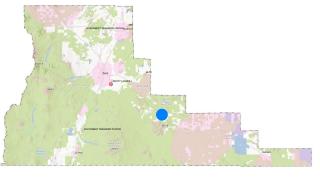

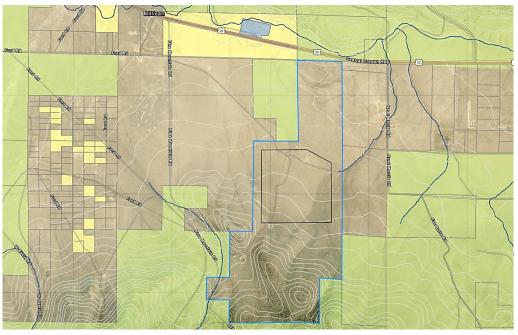

Alternate SWMF Sites

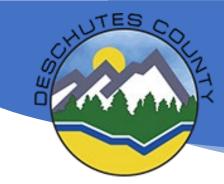

Roth East

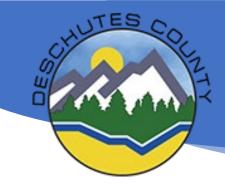

Considerations:

- Finalist SWMF site evaluated to same level as Moon Pit site.
 Further study not required for selection.
- Near southeast extent of Millican Valley / Basin
- Within Low Density Sage Grouse Habitat Area
- Core Sage Grouse Zone ~0.5 mile SE from disposal area
- Variety of recreational uses in broad vicinity
- Nearest residence ~0.7 mile distant
- Setback 1 mile from Pine Mountain road and Highway 20, and screened from view by topography
- 23-27 miles from waste centroid
- All Roth properties recently offered for sale ~3,000 acres.
- Cost-effective to excavate and operate due to ~300 ft depth of alluvial sediment deposit.

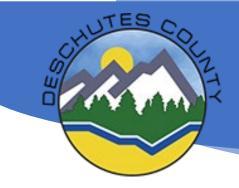

Roth East Site Photos

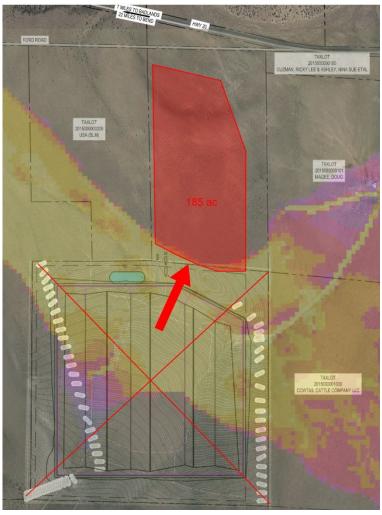

Roth East Site Photos

Roth Northeast

Considerations:

- Alternate disposal area north of Roth East site on same taxlot, to avoid mapped Sage Grouse Migration route.
- NE site is setback 1 mile from Pine Mountain road and screened by topography from Millican area views
- Visible from Highway 20 to north, setback ¼ mile
- Transmission lines through NE corner of site
- ~185 acre disposal area, estimated to have closer to 80 years of disposal capacity
- 25 miles from waste centroid
- Nearest residence ~0.5 mile distant
- Within Low Density Sage Grouse Habitat Area
- Core Sage Grouse Zone ~0.8 mile SE from disposal area
- Shorter access road needed, compared to Roth East
- All Roth properties recently offered for sale ~3,000 acres.
- Nearby well logs suggest 100'+ depth of sand, gravel, clay, and cobble deposits cost effective excavation and operations anticipated but further investigation needed to confirm.

Roth Northeast Site Photos

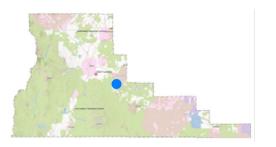

Roth Northeast Site Photos

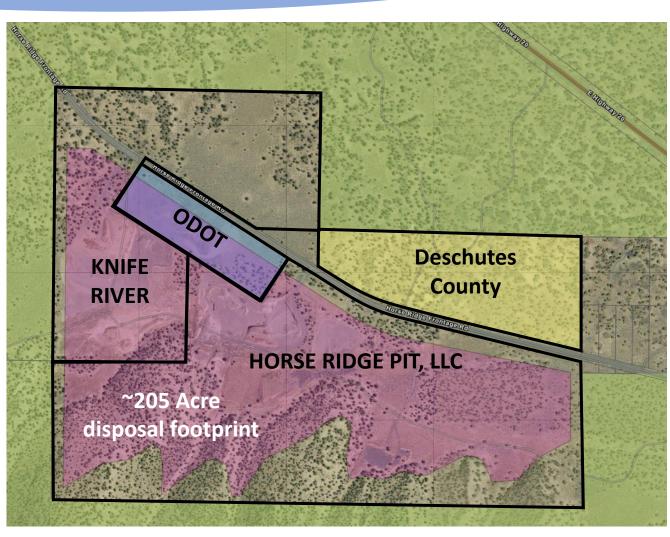

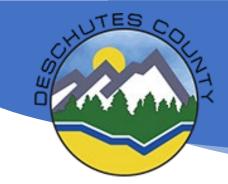

Horse Ridge

Considerations:

- 3 property acquisitions required from separate owners
- Combined property area is approximately 391 acres
- 13 miles from waste centroid
- Access to the site from Hwy 20 & Horse Ridge Frontage Road
- No residences within 0.25 mile, approx. 3 dwellings within 1 mile
- Road re-alignment or code variance may be required to address the ¼ mile road setback requirement per County Code
- Two existing wells onsite, but no water rights
- Central band of sedimentary deposits (sand, gravel) up to 30' deep, with basalt rock to north and south.
- 80-100 year disposal capacity est., depending on footprint & depth
- ~7 mile extension of 3-phase power needed from Dodds Rd
- Projectile point, lithic scatter, and can dumps found onsite during 1996 cultural resources reconnaissance survey
- Golden Eagle nest mapped ~1.5 miles to the Southwest

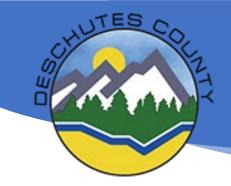

Horse Ridge Site Photos

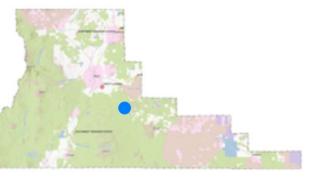

Horse Ridge Site Photos

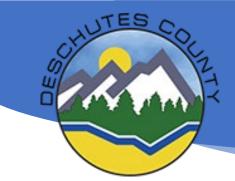

Golden Basin West

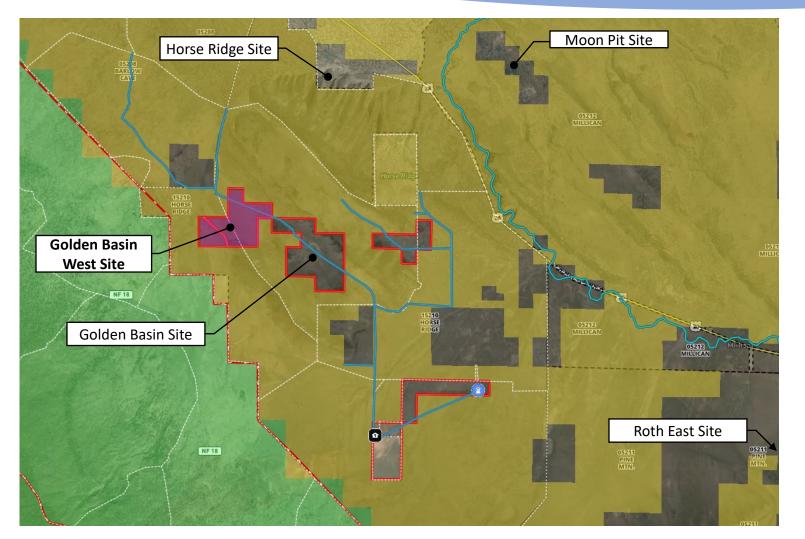

Considerations:

- On two parcels west of Golden Basin site, which was reviewed in Focus Screening and eliminated due to unwillingness to sell at the time
- 'Golden Basin Ranch' was recently listed for \$4.5M with 1,998 deeded acres, including these two deeded parcels.
- De-listed currently, awaiting response from Owner
- No residences within 3 miles
- VERY Remote and well hidden from most nearby viewpoints
- Surrounded by BLM land, but accessible via 60' wide Ford Rd ROW
- Would require road reconstruction along Ford Rd (~7 miles) from end of Gosney & Arnold Market Rd (haul route impacts) or Stookey Rd (~5 miles) BLM coordination and NEPA compliance may be required.
- Golden Eagle and Big-eared bat nest points within ~1.5 mile radius
- Within Low Density Sage Grouse Habitat Area
- No nearby water or power infrastructure
- 13 miles from Waste Centroid
- NRCS soil report classifies site as sandy loam. Landforms suggest alluvial or windblown deposits between ridges, but depth is unknown.

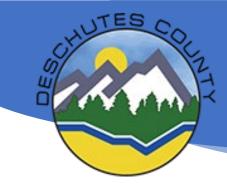

Golden Basin Ranch Listing Map

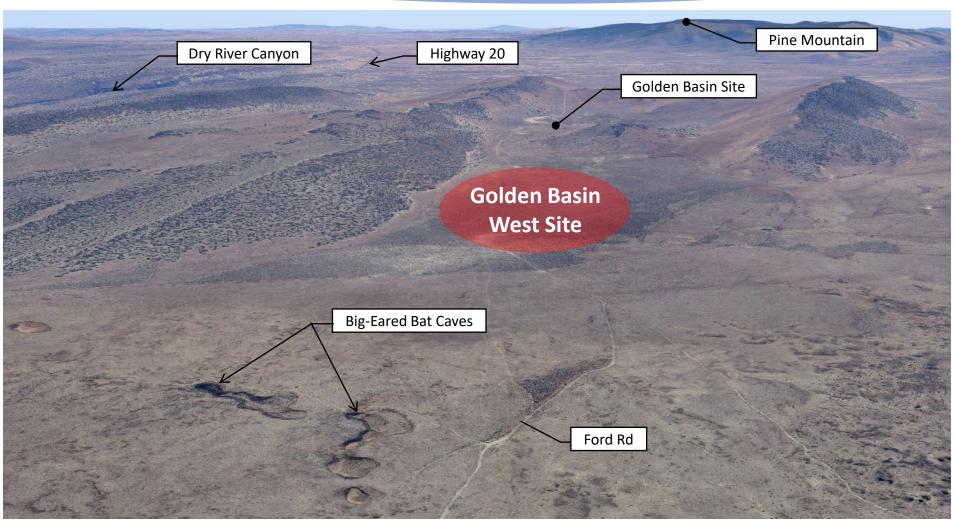

Quick Facts

- Total Acres: 83,341.05 +/-
- 46,843 +/- USFS-Cinder Cone Allotment-600+/- AUM's
- 22,152 +/- BLM- Horse Ridge Allotment- 1,624 +/- AUM's
- 12,348 +/- BLM Barlow Cave Allotment- 600+/-AUM's
- 1,998.05 +/- Deeded Acres
- Less than 25 Minutes from Bend, Oregon
- Main House- 4 bedrooms 2 bath-Well/Septic 200Amp Service (2 leks mapped onsite)
- Bunk House- Studio office area with 1- bath
- 2019 New Well

Dodds Road Site

Considerations:

- 480 acre property Owned by Central Oregon Irrigation District (COID)
- Acquisition potential TBD
- 14 miles from waste centroid, access via Hwy 20 and Dodds Road
- Approximate 80-yr capacity anticipated
- Shallow basalt bedrock anticipated, based on nearby well logs and visible rock formations
- Existing wells and residences nearby, approx.:
 - 3 within 0.5 mile
 - ~25 within 1 mile
 - ~60 within 2 miles
- Adjacent to farms, ranches, and Badlands
 Wilderness Area (to the East)
- No known wells or water rights onsite
- 3-phase power near SW corner of site at intersection of Dodds & Obernolte
- Undulating terrain, gently sloped down north

SWAC Recommendation on Path Forward

SWAC Recommendation on Path Forward

Potential recommendations before the SWAC:

1. County pursue acquisition of Roth East for the landfill

• Likely continuing with Phase 3 Site Permitting & Design in 2025 Q3.

2. Screen and evaluate alternate sites for comparison, along with Roth East.

 Assuming 1 additional alternate site is recommended for final site evaluation (as with Moon Pit & Roth East), Phase 3 Site Permitting & Design would likely resume 2026 Q2.

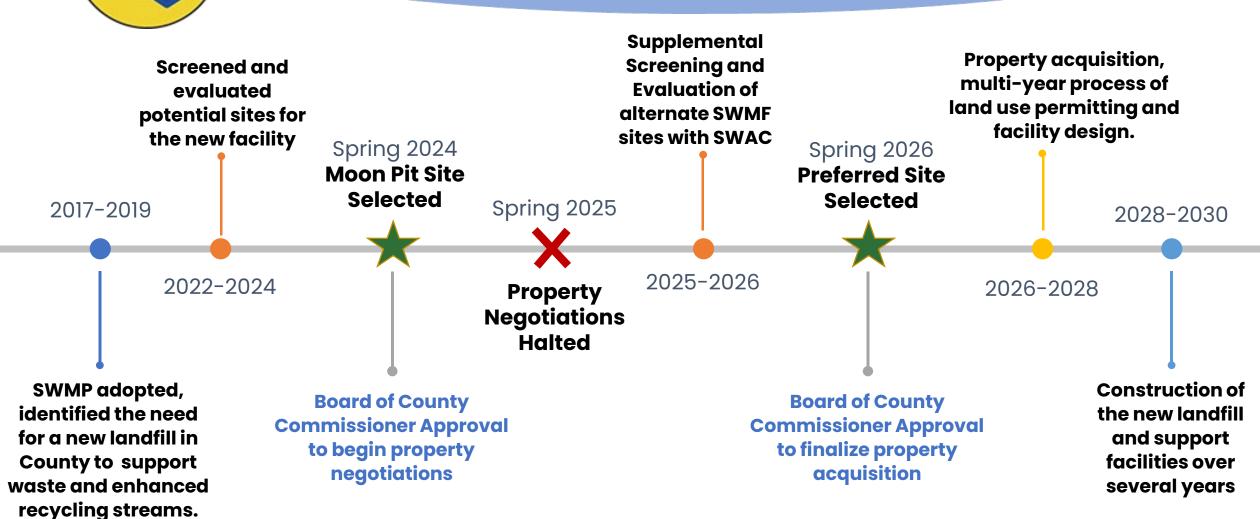

3. Other?

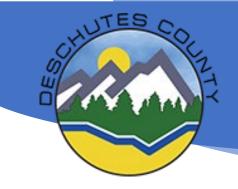

Next Steps

Roadmap to Opening in 2031

What happens next...

Continuation of SWAC Meetings in 2025 for supplemental site screening and recommendation of alternate SWMF site:

- June 17, 2025, 9-11 am: preliminary findings update (focus screening)
- July 15, 2025, 9-11 am: review input on finalist sites, confirm site evaluations
- August 19, 2025, 9-11 am: finalist site(s) recommendation

Solid Waste

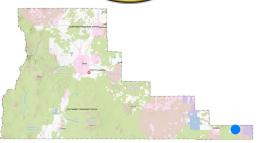

Informational Story Mag

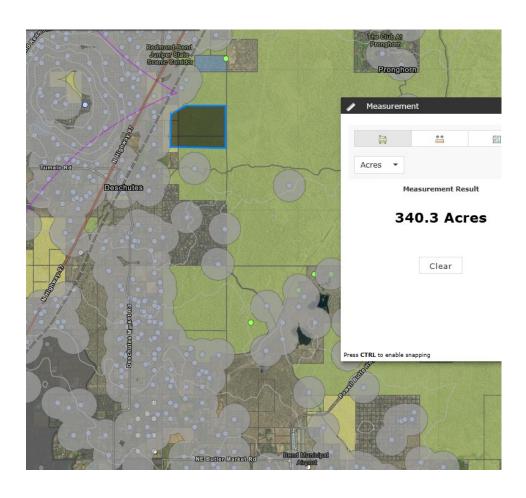

Deschutes County Department of Solid Waste | August 202

Hwy 97 County/BLM Site

Cons:

- During the site screening process, the SWAC and BOCC officially moved to consider the 5mile radius around public airports to be an exclusionary zone for landfill siting, consistent with FAA recommendations.
- Expensive and difficult to operate due to shallow and persistent bedrock.
- Lengthy process for BLM land acquisition.
- BNSF railway crossing required
- Substantial opposition from nearby property owners

Pros:

- Centrally located between Bend and Redmond
- Outside Sage Grouse habitat zones
