MEETING DATE	October 14th	**REPORT TYPE**	☒ Monthly ☐ Annual Summary

WORK ORDERS COMPLETED	WORK ORDERS OPEN	PREVENTIVE TASKS	ON-CALL ACTIONS	SAFETY INCIDENTS
47	10	2	0	0

DSRP COMPLETED WORK & PREVENTIVE MAINTENANCE

Major work completed, inspections performed, recurring maintenance, grounds/facility improvements, and measurable accomplishments.

New, twice monthly, inspection sheets have been created and implemented to ensure proper upkeep of all fleet vehicles and equipment. The walk around inspection sheets completed upon each use for both drag tractors have been updated to include a few more essential items. Work has begun on a similar walk around inspection sheet for the brand-new skid steer.

DSRP BUILDING DAMAGES & FACILITY CONCERNS

Location, damage/concern, date identified, immediate response, current status, estimated completion, and cost/insurance information when known.

-Some minor stall repairs were needed due to screws coming loose, the repairs have been completed to secure them properly.
-There are some lights that have started flickering throughout the building that will need to be replaced. PEI will be contacted regarding these lights and their warranty.
-Daniel doors has been out to ranch park to assess the repairs of the vendor hall roll door as well as one expansion roll door. I do not have an estimate or expected repair date as of now.
-The replacement mesh panel on one of the vendor hall interior doors has been ordered through Southwest Erectors and we are awaiting delivery now.

DSRP EQUIPMENT DAMAGES & REPAIR UPDATES

Equipment/asset, issue, operational impact, repair or replacement status, vendor/parts update, estimated return-to-service date, and cost when known.

-The DSRP-owned John Deere tractor has been taken by Tellus to assess the severity of engine damages due to low engine oil.
-The estimated repair costs are estimated between $10,000-$30,000 before labor charge depending on severity.
-Tellus is working out details on a loaner tractor to fill the space of the one that is down. In the meantime we are using the sponsorship tractor to fill the gap. This has put a lot of unplanned hours on the sponsor tractor which has pushed us passed the planned usage amount but Tellus is aware and also working on getting it switched out.

-A repair was done to the water wagon to stop a leak between fittings. While the plumbing was apart on the water wagon, a brace was added to the plumbing frame to attempt to correct what is causing the leak and back-up parts were ordered and have arrived to be prepared if this problem arises again.
