RE: Ordinance Number 23-08: Amending the tree protection section of the City's Land Development Regulations to increase the penalty amount for tree removal without a permit from \$50 to \$2,500

Introduction:

Since the Lake Lincoln Lookout Subdivision site was completely cleared of trees contrary to their approvals, the City Commissioners have sought methods to prevent this from happening in the future. To that end, the City Commissioners have instructed the Development Services staff to make a few changes to the Tree Protection section of the City's Land Development Regulations. The proposed change is considered a quick fix until additional best practices relating to tree protection can be brought back, presented, discussed by the City Commission and added to the City's Land Development Regulations.

Background:

Staff recommends approval of this change to be added to the City's Land Development Regulations so that this penalty can be imposed on those property owners/contractors/individuals who cut down a protected tree in the City.

Budget/Staff Impact:

None.

Sec. 115-10. Tree protection and vegetation preservation.

Purpose and intent. The purpose of this section is to establish rules and regulations governing the protection of trees and vegetative cover as a valuable community resource within the City; to encourage the proliferation of trees and vegetation within the City as well as their replacement; to recognize their importance and their meaningful contribution to a healthy, beautiful, and safer community attributable to their carbon dioxide absorption, oxygen production, dust filtration, wind and noise reduction, soil erosion prevention, lakeshore erosion protection, wildlife habitat, surface drainage improvement, beautification and aesthetic enhancement of improved and vacant lands; and the general promotion of the health, safety, welfare and well-being of the community. Tree protection is beneficial to the City by improving community appearance and quality of life, enhancing property values, and creating a functional and aesthetically pleasing living environment for existing and future residents. Therefore, the City finds that it is in the best public interest to enact and enforce the regulations described herein for the purpose of controlling tree removal, clear cutting and strip clearing of land.

(Ord. No. 16-31, 12-15-2016)

- (e) Trees and vegetative groundcover should be preserved or enhanced in development areas exceeding ten percent slope, within the 100-year floodway, or within 50 feet of the ordinary high water line of lakes, rivers or canals to the greatest extent practicable. This 50-foot buffer area shall remain a natural vegetative buffer zone between development areas and the above-referenced water courses, except for City-approved water-related facilities, such as docks, walkovers, ramps, marinas, etc.

- (d) During application review, the Director of Development Services or designee shall consider the effect that the proposed development activity will have on the future viability of the trees to be retained/relocated within the area to be developed.

 - For purposes of these land development regulations, redevelopment shall not be considered a valid condition for removal if the tree removal permit is submitted after the fact.

The minimum compensation requirement shall be the number of replacement trees required to maintain compliance with the minimum tree requirements included in section 115-10.7.
