

Fort Collins City Council Agenda

Regular Meeting

6:00 p.m. Tuesday, August 15, 2023

City Council Chambers at City Hall, 300 Laporte Ave, Fort Collins, CO 80521

Zoom Webinar link: <https://zoom.us/j/98241416497>

NOTICE:

Regular meetings of the City Council are held on the 1st and 3rd Tuesdays of each month in the City Council Chambers. Meetings are conducted in a hybrid format, with a Zoom webinar in addition to the in person meeting in Council Chambers.

City Council members may participate in this meeting via electronic means pursuant to their adopted policies and protocol.

How to view this Meeting:

Meetings are open to the public and can be attended in person by anyone.

Meetings are televised live on Channels 14 & 881 on cable television.

Meetings are available through the Zoom platform, electronically or by phone.

Meetings are livestreamed on the City's website, fcgov.com/fctv

Upon request, the City of Fort Collins will provide language access services for individuals who have limited English proficiency, or auxiliary aids and services for individuals with disabilities, to access City services, programs and activities. Contact 970.221.6515 (V/TDD: Dial 711 for Relay Colorado) for assistance. Please provide advance notice. Requests for interpretation at a meeting should be made by noon the day before.

A solicitud, la Ciudad de Fort Collins proporcionará servicios de acceso a idiomas para personas que no dominan el idioma inglés, o ayudas y servicios auxiliares para personas con discapacidad, para que puedan acceder a los servicios, programas y actividades de la Ciudad. Para asistencia, llame al 970.221.6515 (V/TDD: Marque 711 para Relay Colorado). Por favor proporcione aviso previo. Las solicitudes de interpretación en una reunión deben realizarse antes del mediodía del día anterior.

There are in person and remote options for members of the public who would like to participate in Council meetings:

Comment in real time:

During the public comment portion of the meeting and discussion items:

In person attendees can address the Council in the Chambers. The public can join the Zoom webinar and comment from the remote meeting, joining online or via phone.

All speakers are required to sign up to speak using the online sign up system available at www.fcgov.com/agendas. Staff is also available outside of Chambers prior to meetings to assist with the sign up process for in person attendees.

Full instructions for online participation are available at fcgov.com/councilcomments.

Join the online meeting using the link in this agenda to log in on an internet-enabled smartphone, laptop or computer with a speaker and microphone. Using earphones with a microphone will greatly improve audio experience.

To be recognized to speak during public participation portions of the meeting, click the 'Raise Hand' button.

Participate via phone using this call in number and meeting ID:

Call in number: 720 928 9299

Meeting ID: 982 4141 6497

During public participation opportunities in the meeting, press *9 to indicate a desire to speak.

Submit written comments:

Email comments about any item on the agenda to cityleaders@fcgov.com

Written comments can be mailed or dropped off at the City Manager's Office at City Hall, at 300 Laporte Ave, Fort Collins, CO 80521

Documents to Share during public participation: Persons wishing to display presentation materials using the City's display equipment under the Public Participation portion of a meeting or during discussion of any Council item must provide any such materials to the City Clerk in a form or format readily usable on the City's display technology no later than two (2) hours prior to the beginning of the meeting at which the materials are to be presented.

NOTE: All presentation materials for appeals, addition of permitted use applications or protests related to election matters must be provided to the City Clerk no later than noon on the day of the meeting at which the item will be considered. See Council Rules of Conduct in Meetings for details.

August 15, 2023 at 6:00 PM

PROCLAMATIONS & PRESENTATIONS
5:00 PM

A) PROCLAMATIONS AND PRESENTATIONS

None scheduled.

REGULAR MEETING
6:00 PM
Amended 8/14/2023

B) CALL MEETING TO ORDER

C) PLEDGE OF ALLEGIANCE

D) ROLL CALL

E) CITY MANAGER'S AGENDA REVIEW

- City Manager Review of Agenda
- Consent Calendar Review, including removal of items from Consent Calendar for individual discussion.

F) COMMUNITY REPORTS - None scheduled.

G) PUBLIC COMMENT ON ANY TOPICS OR ITEMS OR COMMUNITY EVENTS
(Including requests for removal of items from Consent Calendar for individual discussion.)

*Individuals may comment regarding any topics of concern, whether or not included on this agenda. Comments regarding land use projects for which a development application has been filed should be submitted in the development review process** and not to Council.*

- Those who wish to speak are required to sign up using the online sign-up system available at www.fcgov.com/council-meeting-participation-signup/
- Each speaker will be allowed to speak one time during public comment. If a speaker comments on a particular agenda item during general public comment, that speaker will not also be entitled to speak during discussion on the same agenda item.
- All speakers will be called to speak by the presiding officer from the list of those signed up. After everyone signed up is called on, the presiding officer may ask others wishing to speak to identify themselves by raising their hand (in person or using the Raise Hand option on Zoom), and if in person then will be asked to move to one of the two lines of speakers (or to a seat nearby, for those who are not able to stand while waiting).
- The presiding officer will determine and announce the length of time allowed for each speaker.
- Each speaker will be asked to state their name and general address for the record, and, if their comments relate to a particular agenda item, to identify the agenda item number. Any written comments or materials intended for the Council should be provided to the City Clerk.
- A timer will beep one time and turn yellow to indicate that 30 seconds of speaking time remain and will beep again and turn red when a speaker's time has ended.

*[**For questions about the development review process or the status of any particular development, consult the City's Development Review Center page at <https://www.fcgov.com/developmentreview>, or contact the Development Review Center at 970.221.6760.]*

H) PUBLIC COMMENT FOLLOW-UP

I) COUNCILMEMBER REMOVAL OF ITEMS FROM CONSENT CALENDAR FOR DISCUSSION

CONSENT CALENDAR

The Consent Calendar is intended to allow Council to spend its time and energy on the important items on a lengthy agenda. Staff recommend approval of the Consent Calendar. Agenda items pulled from the Consent Calendar by either Council or the City Manager will be considered separately under their own Section, titled "Consideration of Items Removed from Consent Calendar for Individual Discussion." Items remaining on the Consent Calendar will be approved by Council with one vote. The Consent Calendar consists of:

- Ordinances on First Reading that are routine;
 - Ordinances on Second Reading that are routine;
 - Those of no perceived controversy;
 - Routine administrative actions.
1. **Consideration and Approval of the Minutes of the July 18, 2023 Regular Meeting.**
The purpose of this item is to approve the minutes of the July 18, 2023 regular meeting.
 2. **Second Reading of Ordinance No. 093, 2023, Appropriating Prior Year Reserves and Unanticipated Revenue from Philanthropic Donations Received Through City Give for Various Programs and Services as Designated by the Donors.**

This Ordinance, unanimously adopted on First Reading on July 18, 2023, requests an appropriation of \$56,974 in philanthropic revenue received through City Give in 2022 and 2023.

These miscellaneous gifts to various City departments support a variety of programs and services and are aligned with both the City's strategic priorities and as per the respective donors' designation.

In 2019, City Give, a formalized enterprise-wide initiative was launched to create a transparent, non-partisan governance structure for the acceptance and appropriations of charitable gifts.

3. **Second Reading of Ordinance No. 094, 2023, Appropriating Philanthropic Revenue in the General Fund Through City Give for Neighborhood Services for Community Workshops and the Creation and Distribution of a Neighborhood Business Guide.**

This Ordinance, unanimously adopted on First Reading on July 18, 2023, appropriates \$20,000 in philanthropic revenue for Neighborhood Services within the Community Development and Neighborhood Services Department of the Planning and Transportation services area.

Neighborhood Services has been awarded a gift of \$20,000 through the 2023 American Association of Retired Persons (AARP) Community Challenge with the designated intent to support healthy outcomes for residents' homes and personal wellbeing through three one-day Homeowner Workshops, each at a different mobile home community in the City, including Skyline, North College, and Hickory Village. The gift funds also will be used to create and distribute a neighborhood business guide to residents.

4. **Second Reading of Ordinance No. 095, 2023, Authorizing Expenditure of American Rescue Plan Act Funds for Affordable Housing Fee Credits as Specified.**

This Ordinance, unanimously adopted on First Reading on July 18, 2023, appropriates American Rescue Plan Act (ARPA) funding for 5 units targeting forty percent (40%) Area Median Income (AMI) households at the Heartside Hill development. Council already appropriated \$350,000 of ARPA funding for affordable housing fee credits, and this funding must be fully committed by 2024. Affordable housing fee credits have been approved administratively for 20 units serving households at thirty percent (30%) AMI or below, including 8 units at Heartside Hill. There are no additional thirty percent (30%) AMI units expected before the ARPA deadline to commit funds in 2024. Though fee credits for units up to sixty-five percent (65%) AMI are a presumptive eligible use of ARPA funds, the City's fee credit policy as codified in City Code Article VIII, Section 7.5 requires Council approval for fee credits for any units serving income ranges above thirty percent (30%) AMI. This Council action would ensure that the remaining appropriated funds are used for their intended purpose as affordable housing fee credits.

5. **Second Reading of Ordinance No. 096, 2023, Appropriating Prior Year Reserves and Authorizing Transfers of Appropriations in Multiple Utility Funds for the Purchase of Vendor Services to Support the Replacement of the City's Utilities Billing System.**

This Ordinance, unanimously adopted on First Reading on July 18, 2023, appropriates available reserves from the Light and Power, Water, Wastewater and Stormwater Enterprise Funds to implement a modern Utility Customer Information System – Customer Self Service Portal (CIS-CX) Solution. This appropriation request is the second, and final, request related to the new CIS-CX.

In March 2023, Ordinance No. 036, 2023, appropriated \$4,250,000 to begin the process of temporarily increasing staffing for the implementation while contract review and negotiations were being finalized. The City has now identified the Vendor of Choice, reviewed the functional requirements in detail with that vendor and negotiated terms of the contract sufficient to determine the amount of investment needed to successfully deploy a new CIS-CX. This appropriation request of \$9,700,000 will provide the additional funding needed for all costs associated directly with the software deployment, software testing, training, and the organizational change

management (OCM) associated with moving onto a modern CIS-CX. With this appropriation, the CIS-CX implementation will begin in October of this year and be fully operational by the end of 2025.

The total amount being requested for appropriation here is \$9,700,000 and is broken out as follows:

Software as Service Implementation \$3,250,000; Software Licensing through Implementation \$2,400,000; Organizational Change Management (OCM) \$1,500,000; Testing Protocol Development and Management \$900,000; Training Development and Initial Training \$900,000; and Business Process Analysis and Alignment \$750,000.

6. Items Relating to Parking of Shared Mobility Devices and Electric Scooters.

A. Second Reading of Ordinance No. 097, 2023, Amending Sections 2002, 2106 and 2108 of the Fort Collins Traffic Code to Address the Parking of Shared Mobility Devices and Electric Scooters.

B. Second Reading of Ordinance No. 098, 2023, Repealing Chapter 24, Article VI, Parking of Shared Mobility Devices, of the Code of the City.

These Ordinances, unanimously adopted on First Reading on July 18, 2023, amend the Fort Collins Traffic Code to add shared mobility devices and electric scooters regulations for parking of bicycles and electric bicycles, and repeal two sections of the City Code that separately relate only to parking of shared mobility devices and electric scooters.

7. Items Relating to The Landing at Lemay Two Plan Amendment to the City Structure Plan Map and Rezoning.

A. Second Reading of Ordinance No. 099, 2023, Amending the City's Structure Plan Map.

B. Second Reading of Ordinance No. 100, 2023, Amending the Zoning Map of the City of Fort Collins by Changing the Zoning Classification for that Certain Property Known as The Landing at Lemay Two Rezoning.

These Ordinances, unanimously adopted on First Reading on July 18, 2023, amend the City Structure Plan Map to change the land use designation of approximately nine acres of land east of the Lemay Avenue overpass over Vine Drive from the Industrial Place Type to the Mixed Neighborhood Place Type and rezone the property from the Industrial (I) District to the Medium Density Mixed Use Neighborhood (MMN) District. The site is a remnant area of Industrial zoning resulting from the first Landing at Lemay Rezone which was approved in February 2023.

The rezoning request is subject to criteria in Section 2.9.4 of the Land Use Code. The rezoning may be approved, approved with conditions, or denied by Council after receiving a recommendation from the Planning and Zoning Commission, which voted 7-0 on their consent agenda to recommend approval of the request at their May 2023 hearing.

This item is a quasi-judicial matter and if it is considered on the discussion agenda, it will be considered in accordance with Section 2(d) of the Council's Rules of Meeting Procedures adopted in Resolution 2022-068.

8. Second Reading of Ordinance No. 101, 2023, Designating the Emma Malaby Grocery Property, 313 North Meldrum Street, Fort Collins, Colorado, as a Fort Collins Landmark Pursuant to Chapter 14 of the Code of the City of Fort Collins.

This Ordinance, unanimously adopted on First Reading on July 18, 2023, requests City Landmark designation for the Emma Malaby Grocery Property at 313 North Meldrum Street. In response to an application from the property owner, Historic Larimer County, City staff and the Historic Preservation Commission have determined the property to be eligible for designation under City Code Section 14-22, Standards 1 – Events, 2 – Persons/Groups, 3 – Design/Construction, and 4 – Information Potential. The owner is requesting designation to ensure protection of the property's buildings and features and to gain access to financial incentives for historic property owners.

9. **Second Reading of Ordinance No. 102, 2023, Submitting to a Vote of the Registered Electors of the City of Fort Collins Proposed Amendments to Sections 2 and 5 of Article X of the City Charter Relating to Referendum and Petition Requirements.**

This Ordinance, unanimously adopted on First Reading on July 18, 2023, sets ballot language regarding proposed amendments to Sections 2 and 5 of Article X of the City Charter relating to referendum and petition requirements.

Following work with the Election Code Committee and through a Work Session on May 9, 2023, Council directed staff to bring forward a potential ballot option to amend the City Charter to reconcile contradictions in the referendum process.

10. **Second Reading of Ordinance No. 103, 2023, Submitting to a Vote of the Registered Electors of the City of Fort Collins Proposed Amendments to Articles II and IV of the City Charter Concerning the Requirement that Certain Employees Live in or Near Fort Collins.**

This Ordinance, unanimously adopted on First Reading on July 18, 2023, sets ballot language regarding the requirement that certain employees live in or near Fort Collins.

Based on feedback from Councilmembers at the May 9, 2023, staff brings forward a potential ballot option to amend the City Charter to remove requirements that certain employment position types live in or near Fort Collins, allowing Council to establish any residency requirements by ordinance or by employment agreement for employees reporting directly to Council. Currently, a vote of the registered electorate is required to amend the Charter language that specifies City positions that must live in or near Fort Collins.

11. **First Reading of Ordinance No. 104, 2023, Appropriating Unanticipated Revenue from Bond Proceeds from the Issuance of the Series 2023 Electric Utility Enterprise Revenue Bonds for Light and Power, Connexion, and the Art in Public Places Program.**

The purpose of this item is to appropriate the funds received from the bond issuance in the Light and Power Fund. These proceeds will be used to fund capital projects needing to occur for both Light and Power and Connexion, as well as for operating funds for Connexion, to pay issuance costs for the Series 2023 Revenue Bonds, and to transfer certain funds required by the Art in Public Places Program (APP Program) for the capital projects.

12. **First Reading of Ordinance No. 105, 2023, Appropriating Prior Year Reserves in the General Fund to Continue the Encampment Site Cleanup Pilot Program.**

The purpose of this item is to appropriate \$200,000 in additional funds to continue the site cleanup pilot program. In Fall 2022, staff identified a backlog of site cleanups throughout the City and determined that cleanups needed to shift from twice a month to once per week. This was implemented towards the end of January 2023 with the recognition that additional funds would be needed if this pilot program achieved desired results.

13. First Reading of Ordinance No. 106, 2023, Making Supplemental Appropriations from the 2023 Colorado Opioid Settlement Funds for Use by the Municipal Court.

The purpose of this item is to appropriate \$75,000 of the City's share of 2023 funds from the Colorado Opioid Settlement to be used in the remainder of 2023 to work towards establishing a municipal drug court program for persons with opioid use disorder and co-occurring substance use or mental health issues. This is a permitted use for these funds under the Colorado Opioid Settlement Memorandum of Understanding ("MOU") between the City and the State of Colorado.

14. First Reading of Ordinance No. 107, 2023, Appropriating Prior Year Reserves Designated for Fire Protection Services in the Fire Protection Capital Expansion Fee Account within the Capital Expansion Fee Fund for Payment to the Poudre Fire Authority to be Used by it for a New Headquarters Building.

The purpose of this item is to appropriate funds from the reserves in the Fire Protection Capital Expansion Fee Account within the City's Capital Expansion Fee Fund ("CEF Fund") and payment of those funds to the Poudre Fire Authority ("PFA") for its purchase of a new Headquarters Building.

15. First Reading of Ordinance No. 108, 2023, Appropriating Prior Year Reserves in the General Fund for the Purchase of Police Radios.

The purpose of this item is to request an appropriation in the amount of \$620,000 for the purchase of police handheld radios and approve the use of prior year reserves in the General Fund. There are currently 242 total handheld radios with 130 replaced in 2022. This leaves the remaining 112 radios needing to be replaced.

16. First Reading of Ordinance No. 109, 2023, Making a Supplemental Appropriation from the Colorado Division of Criminal Justice of Unanticipated Grant Revenue for Various Restorative Justice Services Programs.

The purpose of this item is to appropriate grant revenue to fund Restorative Justice Services within Community Development and Neighborhood Services. A grant in the amount of \$57,356 has been awarded from the Colorado Division of Criminal Justice (DCJ) Juvenile Diversion Fund for the continued operation of Restorative Justice Services, which includes the RESTORE program for shoplifting offenses, and the Restorative Justice Conferencing Program (RJCP) and Reflect Program for all other offenses. No match is required and the grant period is July 1, 2023, to June 30, 2024.

17. Resolution 2023-070 Approving Expenditures from the Art in Public Places Light & Power, Wastewater, Stormwater and Water Utility Accounts to Commission an Artist to Create Art for the City's Utilities.

The purpose of this item is to approve expenditures from the Art in Public Places (APP) Light & Power, Wastewater, Stormwater and Water Utility Accounts to commission an artist to create art for the City's Inaugural Utilities Artist-in-Residence Project. The expenditures of \$50,000 will be for design development, materials, fabrication, delivery, mural installation, signage, additional illustration work, and contingency for Allie Ogg to create the artworks for the Artist in Residence Project.

18. Resolution 2023-071 Approving an Exception to the Competitive Purchasing Process for the Purpose of Renewing the Contract with Nokia of America for Broadband Equipment, Software, Firmware, and Support Services.

The current Supply and Services Agreement between the City of Fort Collins and Nokia of America Corporation (Nokia) for equipment, software, and firmware necessary to operate Fort Collins Connexion (Connexion) services expires in August 2023.

Connexion's network is built with hardware and software originally provided by Nokia and is an integral part of Connexion's high level of service. Although there may be other viable partners to provide similar hardware, software, and services, transiting from the current Nokia solution would be a multi-year resource intensive project that would be very disruptive to Connexion customers.

Based on the alignment of Nokia's goods and services with the operating requirements of Connexion, the Purchasing Agent has recommended an exception to the City's competitive purchasing process to continue the relationship with Nokia under a new agreement for up to five additional years.

19. Resolution 2023-072 Authorizing the Sound Mitigation Project for Northern Colorado Law Enforcement Training Center Firing Range.

The purpose of this item is to seek approval to use existing funds from the NCLETC capital budget in the amount of approximately \$136,632 to make necessary modifications to the sound noise abatement materials in the firing range.

END OF CONSENT CALENDAR

J) ADOPTION OF CONSENT CALENDAR

K) CONSENT CALENDAR FOLLOW-UP *(This is an opportunity for Councilmembers to comment on items adopted or approved on the Consent Calendar.)*

L) STAFF REPORTS - None scheduled.

M) COUNCILMEMBER REPORTS

N) CONSIDERATION OF ITEMS REMOVED FROM THE CONSENT CALENDAR FOR INDIVIDUAL DISCUSSION

O) CONSIDERATION OF ITEMS PLANNED FOR DISCUSSION

The method of debate for discussion items is as follows:

- *Mayor introduced the item number and subject; asks if formal presentation will be made by staff*
- *Staff presentation (optional)*
- *Mayor requests public comment on the item (three minute limit for each person)*
- *Council questions of staff on the item*
- *Council motion on the item*
- *Council discussion*
- *Final Council comments*
- *Council vote on the item*

Note: Time limits for individual agenda items may be revised, at the discretion of the Mayor, to ensure all have an opportunity to speak. The timer will buzz when there are 30 seconds left and the light will turn yellow. It will buzz again at the end of the speaker's time.

20. Items Relating to City Initiated TABOR Questions (Sustainable Funding).

A. Possible Public Hearing and Motions Regarding Protest (s) of Ballot Language.

B. Resolution 2023-073 Submitting A Ballot Issue Question to the City's Registered Electors at the City's Regular Election on November 7, 2023, Asking Them to Authorize the City to Levy a Three Mill Property Tax to be Used Exclusively to Fund Affordable Housing.

OR

Resolution 2023-073 Submitting A Ballot Issue Question to the City's Registered Electors at the City's Regular Election on November 7, 2023, Asking Them to Authorize the City to Levy a Three Mill Property Tax to be Used Exclusively to Advance the City's Goals Under its 2021 Housing Strategic Plan.

C. Resolution 2023-074 Submitting a Ballot Issue Question to the City's Registered Electors at the City's Regular Election on November 7, 2023, Asking Them to Increase by .50% the City's Sales and Use Tax Rate to be Used Exclusively for Certain Specified Purposes. [WITH PERCENTAGES INSERTED]

OR

Resolution 2023-074 Submitting a Ballot Issue Question to the City's Registered Electors at the City's Regular Election on November 7, 2023, Asking Them to Increase by .50% the City's Sales and Use Tax Rate to be Used Exclusively for Certain Specified Purposes. [WITH BLANK PERCENTAGES]

The purpose of this item is to consider two resolutions and ballot language that reflect Councilmember feedback from the July 25, 2023, work session discussion. Two versions of each resolution are provided for consideration.

Any protest of the proposed ballot language must be received no later than Monday, August 14, 2023, at 12:00 p.m. Protest(s) shall be heard, considered, and resolved by the Council prior to adoption of the related Ordinance. If protests are received, copies will be included in Council's "Read Before the Meeting" packet.

21. Items Relating to City Council's Direction to Address Existing Occupancy Regulations.

A. Possible Public Hearing and Motion(s) Regarding Protest(s) of Ballot Language.

B. Resolution 2023-075 Directing City Staff to Prepare and Present to Council Amendments to the City of Fort Collins Land Use Code Increasing Occupancy Allowed in Residential Dwellings.

C. Resolution 2023-076 Referring to the Registered Electors of the City of Fort Collins Resolution 2023-075, Concerning Amending the Fort Collins Land Use Code to Increase the Occupancy Allowed in Residential Dwellings.

Any protest of the proposed ballot language must be received no later than Monday, August 14, 2023, at 12:00 p.m. Protest(s) shall be heard, considered, and resolved by Council prior to adoption of the related Resolution. If protests are received, copies will be included in Council's "Read Before the Meeting" packet.

22. Appeal of Planning and Zoning Commission Approval of the Ziegler-Corbett Overall Development Plan Major Amendment.

The purpose of this quasi-judicial item is to consider an appeal of the Planning and Zoning Commission's decision on March 23, 2023, approving the Ziegler-Corbett Overall Development Plan Major Amendment (#MJA22004 or "Major Amendment") located on the west side of Ziegler Road between Front Range Village and The English Ranch neighborhood.

Two Notices of Appeal were filed, both on April 5, 2023, alleging that the Planning and Zoning Commission failed to properly interpret and apply relevant provisions of the Land Use Code, City Code, and/or Charter. One of the appeals also alleges the Commission failed to conduct a fair hearing by ignoring previously established rules of procedure.

P) OTHER BUSINESS

OB 1. Possible consideration of the initiation of new ordinances and/or resolutions by Councilmembers.

(Three or more individual Councilmembers may direct the City Manager and City Attorney to initiate and move forward with development and preparation of resolutions and ordinances not originating from the Council's Policy Agenda or initiated by staff.)

OB 2. Motion to adjourn this meeting until after the completion of the Electric Utility Enterprise Board business:

"I move that Council adjourn this meeting until after the completion of the Electric Utility Enterprise Board business."

Q) ADJOURNMENT

Every regular Council meeting will end no later than midnight, except that: (1) any item of business commenced before midnight may be concluded before the meeting is adjourned and (2) the Council may, at any time prior to adjournment, by majority vote, extend a meeting beyond midnight for the purpose of considering additional items of business. Any matter that has been commenced and is still pending at the conclusion of the Council meeting, and all matters for consideration at the meeting that have not yet been considered by the Council, will be deemed continued to the next regular Council meeting, unless Council determines otherwise.

Upon request, the City of Fort Collins will provide language access services for individuals who have limited English proficiency, or auxiliary aids and services for individuals with disabilities, to access City services, programs and activities. Contact 970.221.6515 (V/TDD: Dial 711 for Relay Colorado) for assistance. Please provide advance notice. Requests for interpretation at a meeting should be made by noon the day before.

A solicitud, la Ciudad de Fort Collins proporcionará servicios de acceso a idiomas para personas que no dominan el idioma inglés, o ayudas y servicios auxiliares para personas con discapacidad, para que puedan acceder a los servicios, programas y actividades de la Ciudad. Para asistencia, llame al 970.221.6515 (V/TDD: Marque 711 para Relay Colorado). Por favor proporcione aviso previo cuando sea posible. Las solicitudes de interpretación en una reunión deben realizarse antes del mediodía del día anterior.

AGENDA ITEM SUMMARY

STAFF

Anissa N. Hollingshead, City Clerk

SUBJECT

Consideration and Approval of the Minutes of the July 18, 2023 Regular Meeting.

EXECUTIVE SUMMARY

The purpose of this item is to approve the minutes of the July 18, 2023 regular meeting.

STAFF RECOMMENDATION

Staff recommends approval of the minutes.

ATTACHMENTS

- 1. Draft Minutes, July 18, 2023

July 18, 2023

COUNCIL OF THE CITY OF FORT COLLINS, COLORADO

Council-Manager Form of Government

Regular Meeting – 6:00 PM

**PROCLAMATIONS AND PRESENTATIONS
5:00 PM**

A) PROCLAMATIONS

PP 1. **Declaring July 2023 as Smart Irrigation Month.**

Mayor Jeni Arndt presented the above proclamations at 5:00 p.m.

**REGULAR MEETING
6:00 PM**

B) CALL MEETING TO ORDER

Mayor Jeni Arndt called the regular meeting to order at 6:00 p.m. in the City Council Chambers at 300 Laporte Avenue, Fort Collins, Colorado, with hybrid participation available via the City’s Zoom platform.

C) PLEDGE OF ALLEGIANCE

Mayor Jeni Arndt led the Pledge of Allegiance to the American Flag.

D) ROLL CALL

PRESENT

- Mayor Jeni Arndt
- Mayor Pro Tem Emily Francis
- Councilmember Susan Gutowsky
- Councilmember Tricia Canonico (remote)
- Councilmember Shirley Peel (remote)
- Councilmember Kelly Ohlson

EXCUSED

- Councilmember Julie Pignataro

STAFF PRESENT

- Deputy City Manager Tyler Marr
- City Attorney Carrie Daggett
- Assistant City Clerk Ann Marie Sharratt

City Attorney Daggett noted Councilmembers Canonico and Peel are participating remotely and therefore do not technically count toward a quorum or vote on any voted items.

CITY MANAGER'S AGENDA REVIEW

Deputy City Manager Tyler Marr provided an overview of the agenda, including:

- Noting there were no changes to the published agenda.
- All items on the consent agenda were recommended for approval.
- The items on the discussion agenda were reviewed.

F) COMMUNITY REPORTS

None.

G) PUBLIC COMMENT ON ANY TOPICS OR ITEMS OR COMMUNITY EVENTS
(Including requests for removal of items from Consent Calendar for individual discussion.)

Janssen Nielsen stated he has lived in Fort Collins for about a year and has been working as a school psychologist. He stated he would like to build a life here in Fort Collins; however, it is quite expensive and unattainable for the working class. He would like to see the benefits of living in this beautiful and progressive city be accessible for all and urged Council to follow the Land Use Code guiding principles of increasing overall housing capacity, enabling more affordability, and increasing the diversity of housing options as it is considering future changes.

Wayne Brothers stated he has lived in Fort Collins for 46 years. He commented on the evolving Land Use Code noting Council has received two memos from staff, one regarding community engagement activities and one regarding possible Code alternatives, which he stated fell short of its stated purpose. He stated the alternatives presented by staff provide only minor tweaks to the repealed Land Development Code and do not address many of the concerns highlighted in the community engagement report, including the four alternatives for additional dwelling units (ADUs) in RL zones which do not include an alternative for not allowing ADUs in low-density residential neighborhoods. He stated 'no change' should be offered as an alternative and stated increased density does not directly lead to affordability.

Vicki Rossen (remote) stated she lives in the RL zone in southwest Fort Collins and was a public-school teacher for 30 years. She stated there is a prevalent consensus among the majority of homeowners in established single-family neighborhoods that they have not been heard in the new Land Use Code proposals. She stated the density brought on by increased occupancy, changing the U+2 Code, external ADUs, and multi-plex buildings will result in direct safety concerns to families residing in established neighborhoods. She stated new neighborhoods will be able to integrate safety into their design; therefore, the proposed changes would work for new neighborhoods. However, she stated imposing radical increased density changes on existing neighborhoods will have disastrous, unintended consequences to residential safety.

Ronald Hanser (remote) stated he lives in an RL neighborhood and made the investment in his home two years ago based on the City's existing housing Codes and the HOA covenants and with the faith that the City would not do anything to damage the City or the underlying value of HOA neighborhoods. He stated 80 percent of RL residents who participated in a survey expressed concern the proposed Land Use Code changes may threaten their investments and neighborhoods. He stated he has worked to support affordable housing; however, increased density does not equate to more affordability and forced density in established single-family HOA neighborhoods is not a solution for affordability. Additionally, he stated the City's efforts to override longstanding covenants of HOAs in Fort Collins in an effort to increase density are misguided and only serve to breed resentment. He supported establishing new neighborhoods with higher density.

Adam Eggleston supported the Land Use Code outreach efforts and commented on rumors related to intimidation tactics being used by a certain group threatening recalls and additional ballot measures

to repeal Land Use Code changes with which they disagree. He stated those types of tactics do not reflect the character and culture of Fort Collins. He also commented on misinformation regarding HOAs noting there is state statute from 1992 that allows City policies to override HOA policies.

Rich Stave commented on item 16, *Resolution 2023-068 Directing an Intergovernmental Agreement with Larimer County and Certification of Ballot Questions for the Municipal Election to be Conducted by Larimer County in Conjunction with the November 7, 2023, Coordinated Election*, stating he did not fully understand the dates referenced in the item. He also commented on riding Transfort and noted the service does not run late enough to provide rides home from Council meetings. Additionally, he commented on a transient breaking sprinkler heads off at a private business and stated those costs will be passed on to the public.

Public Comment concluded at 6:24 p.m.

H) PUBLIC COMMENT FOLLOW-UP

Mayor Pro Tem Emily Francis requested a follow-up to Mr. Stave's question regarding item 16. City Attorney Daggett replied the City must enter into an intergovernmental agreement (IGA) with the County before the end of July to participate in the County's coordinated election, though the Council has until the end of the first week in September to determine the actual ballot questions.

Mayor Pro Tem Francis asked if it would still be possible for a citizen-initiated item to be placed on the ballot. City Attorney Daggett replied it would not be workable timewise for a petition to begin and make its way to the November ballot due to deadlines for setting up the County election.

Mayor Pro Tem Francis stated there has been some discussion around which Code is being updated and requested staff clarification. Deputy City Manager Marr replied Council has a work session on the topic on July 31 and the updates being considered now are to the existing Land Use Code, and based on Council direction from the last couple work sessions, staff will be presenting a range of options in various areas, some of which mirror aspects of the repealed Land Development Code and some of which do not.

Councilmember Kelly Ohlson noted that work session is on a Monday and asked if there will be any extra promotion of that fact. Deputy City Manager Marr replied in the affirmative and noted that meeting was rescheduled several weeks ago due to Neighborhood Night Out on August 1st.

I) COUNCILMEMBER REMOVAL OF ITEMS FROM CONSENT CALENDAR FOR DISCUSSION

None.

J) CONSENT CALENDAR

1. Consideration and Approval of the Minutes of the June 20, 2023 Regular Meeting.

The purpose of this item is to approve the minutes of the June 20, 2023 regular meeting.

Approved.

2. Second Reading of Ordinance No. 088, 2023, Making Supplemental Appropriations of Unanticipated Revenue for the Siphon Overpass Project.

This Ordinance, unanimously adopted on First Reading on June 20, 2023, appropriates funds for the Siphon Overpass Project (Project), which will design and construct a trail overpass spanning the existing railroad tracks near the southwest corner of the Willow Springs neighborhood. This Ordinance will enable the City to receive and expend Multimodal Options Fund (MMOF) funds and Carbon Reduction Program (CRP) funds from the Colorado Department of Transportation

(CDOT) and to appropriate those funds for the Project. This Ordinance will also appropriate an additional \$750,000 in the Capital Projects Fund for the Project.

Adopted on Second Reading.

3. **Second Reading of Ordinance No. 089, 2023, Amending Chapter 26 of the Code of the City of Fort Collins Regarding Calculation and Collection of Development Fees Imposed for the Construction of New or Modified Electric Service Connections.**

This Ordinance, unanimously adopted on First Reading on June 20, 2023, is related to electric capacity fees imposed for the construction of new or modified electric service to add a 200-amp service option for multi-family developments. This additional service option will not impact existing customers or developments; rather, it will provide an alternative sizing option to the existing 150-amp multi-family service in Code today.

Adopted on Second Reading.

4. **Second Reading of Ordinance No. 090, 2023, Authorizing an Extension of the Temporary Exception to the Land Use Code to Allow T-Mobile to Place a Temporary Wireless Telecommunication Facility at 1800 East Harmony Road to Replace Lost Wireless Service Coverage.**

This Ordinance, unanimously adopted on First Reading on June 20, 2023, extends the authorization for a temporary wireless telecommunication facility known as a cell-on-wheels (COW), operated by T-Mobile, currently located at 1800 East Harmony. The current temporary authorization expired on June 1, 2023. This temporary facility is in place to address a critical loss in T-Mobile's existing cellular coverage in south Fort Collins caused by T-Mobile's removal of wireless equipment from Platte River Power Authority ("PRPA") infrastructure, to be used only until a permanent facility (proposed at 4518 Innovation Drive) is fully constructed by December 2023. This is the final request for an extension of authorization.

Adopted on Second Reading.

5. **Second Reading of Ordinance No. 091, 2023, Amending the Boundary of the Fort Collins Historic Landmark at 401 Smith Street, the Loomis-Jones Property, Pursuant to Chapter 14 of the Code of the City of Fort Collins.**

This Ordinance, unanimously adopted on First Reading on June 20th, 2023, approves the property owners of 401 Smith Street, a City landmark designated in 2008, to seek a modification to the landmark boundary as listed in the designation ordinance to allow for subdivision of the property and construction of an additional home. After review and consideration of the proposal, the Historic Preservation Commission recommended approval of the boundary change at their April 19, 2023, hearing. Municipal Code 14-35 requires Council action within seventy-five days of this recommendation.

Adopted on Second Reading.

6. **Second Reading of Ordinance No. 092, 2023, Designating the Alexander and Emma Barry Farm Property, 232 East Vine Drive, as a Fort Collins Landmark Pursuant to Chapter 14 of the Code of the City of Fort Collins.**

This Ordinance, unanimously adopted on First Reading on June 20, 2023, is requesting a City Landmark designation for the Alexander and Emma Barry Farm Property at 232 East Vine Drive. In cooperation with the property owner, City staff and the Historic Preservation Commission (HPC) have determined the property to be eligible for designation under Standards 1, Events, 2,

Persons/Groups, and 3, Design/Construction. Under Standard 1, the property is associated with the early settlement era of Fort Collins history, from the systematic removal of Native Americans for Anglo western land acquisition to the agricultural district that once existed just north of the historic core. Under Standard 2, this property is associated with early Anglo settlers and prominent farmers Alexander and Emma Barry, with acknowledgement of Native American occupation of the area before Anglo settlers. Under Standard 3, the farmhouse on this property is a good and rare example of an early farmhouse in this area and features Gothic Revival design elements. The owner is requesting designation, which will provide protection of the property's exterior and access to financial incentives for historic property owners.

Adopted on Second Reading.

7. First Reading of Ordinance No. 093, 2023, Appropriating Prior Year Reserves and Unanticipated Revenue from Philanthropic Donations Received Through City Give for Various Programs and Services as Designated by the Donors.

The purpose of this item is to request appropriation of \$56,974 in philanthropic revenue received through City Give in 2022 and 2023. These miscellaneous gifts to various City departments support a variety of programs and services and are aligned with both the City's strategic priorities and as per the respective donors' designation.

In 2019, City Give, a formalized enterprise-wide initiative was launched to create a transparent, non-partisan governance structure for the acceptance and appropriations of charitable gifts.

Adopted on First Reading.

8. First Reading of Ordinance No. 094, 2023, Appropriating Philanthropic Revenue in the General Fund Through City Give for Neighborhood Services for Community Workshops and the Creation and Distribution of a Neighborhood Business Guide.

The purpose of this item is to appropriate \$20,000 in philanthropic revenue for Neighborhood Services within the Community Development and Neighborhood Services Department of the Planning and Transportation services area.

Neighborhood Services has been awarded a gift of \$20,000 through the 2023 American Association of Retired Persons (AARP) Community Challenge with the designated intent to support healthy outcomes for residents' homes and personal wellbeing through three one-day Homeowner Workshops, each at a different mobile home community in the City, including Skyline, North College and Hickory Village. The gift funds also will be used to create and distribute a neighborhood business guide to residents.

Adopted on First Reading.

9. First Reading of Ordinance No. 095, 2023, Authorizing Expenditure of American Rescue Plan Act Funds for Affordable Housing Fee Credits as Specified.

The purpose of this item is to provide previously appropriated American Rescue Plan Act (ARPA) funding for 5 units targeting forty percent (40%) Area Median Income (AMI) households at the Heartside Hill development. Council already appropriated \$350,000 of ARPA funding for affordable housing fee credits, and this funding must be fully committed by 2024. Affordable housing fee credits have been approved administratively for 20 units serving households at thirty percent (30%) AMI or below, including 8 units at Heartside Hill. There are no additional thirty percent (30%) AMI units expected before the ARPA deadline to commit funds in 2024. Though fee credits for units up to sixty-five percent (65%) AMI are a presumptive eligible use of ARPA funds, the City's fee credit policy as codified in City Code Article VIII, Section 7.5 requires Council approval for fee credits for any units serving income ranges above thirty percent (30%) AMI. This

Council action would ensure that the remaining appropriated funds are used for their intended purpose as affordable housing fee credits.

Adopted on First Reading.

10. First Reading of Ordinance No. 096, 2023, Appropriating Prior Year Reserves and Authorizing Transfers of Appropriations in Multiple Utility Funds for the Purchase of Vendor Services to Support the Replacement of the City's Utilities Billing System.

The purpose of this item is to consider an appropriation from the Light and Power, Water, Wastewater and Stormwater Enterprise Funds available reserves to implement a modern Utility Customer Information System – Customer Self Service Portal (CIS-CX) Solution. This appropriation request is the second, and final, request related to the new CIS-CX.

In March 2023, Ordinance No. 036, 2023, appropriated \$4,250,000 to begin the process of temporarily increasing staffing for the implementation while contract review and negotiations were being finalized. The City has now identified the Vendor of Choice, reviewed the functional requirements in detail with that vendor and negotiated terms of the contract sufficient to determine the amount of investment needed to successfully deploy a new CIS-CX. This appropriation request of \$9,700,000 will provide the additional funding needed for all costs associated directly with the software deployment, software testing, training, and the organizational change management (OCM) associated with moving onto a modern CIS-CX. With this appropriation, the CIS-CX implementation will begin in October of this year and be fully operational by the end of 2025.

The total amount being requested for appropriation here is \$9,700,000 and is broken out as follows:

Software as Service Implementation \$3,250,000; Software Licensing through Implementation \$2,400,000; Organizational Change Management (OCM) \$1,500,000; Testing Protocol Development and Management \$900,000; Training Development and Initial Training \$900,000; and Business Process Analysis and Alignment \$750,000.

Adopted on First Reading.

11. Items Relating to Parking of Shared Mobility Devices and Electric Scooters.

A. First Reading of Ordinance No. 097, 2023, Amending Sections 2002, 2106 and 2108 of the Fort Collins Traffic Code to Address the Parking of Shared Mobility Devices and Electric Scooters.

B. First Reading of Ordinance No. 098, 2023, Repealing Chapter 24, Article VI, Parking of Shared Mobility Devices, of the Code of the City.

The purpose of this item is to add shared mobility devices and electric scooters to the Fort Collins Traffic Code regulations for parking of bicycles and electric bicycles, and also to repeal two sections of the City Code that separately relate only to parking of shared mobility devices and electric scooters.

Adopted both Ordinances on First Reading.

12. Items Relating to The Landing at Lemay Two Plan Amendment to the City Structure Plan Map and Rezoning.

A. Public Hearing and First Reading of Ordinance No. 099, 2023, Amending the City's Structure Plan Map.

B. Public Hearing and First Reading of Ordinance No. 100, 2023, Amending the Zoning Map of the City of Fort Collins by Changing the Zoning Classification for that Certain Property Known as The Landing at Lemay Two Rezoning.

The purpose of this item is to amend the City Structure Plan Map to change the land use designation of approximately nine acres of land east of the Lemay Avenue overpass over Vine Drive from the Industrial Place Type to the Mixed Neighborhood Place Type and rezone the property from the Industrial (I) District to the Medium Density Mixed Use Neighborhood (MMN) District. The site is a remnant area of Industrial zoning resulting from the first Landing at Lemay Rezone which was approved in February 2023.

The rezoning request is subject to criteria in Section 2.9.4 of the Land Use Code. The rezoning may be approved, approved with conditions, or denied by Council after receiving a recommendation from the Planning and Zoning Commission, which voted 7-0 on their consent agenda to recommend approval of the request at their May 2023 hearing.

This item is a quasi-judicial matter and if it is considered on the discussion agenda, it will be considered in accordance with Section 2(d) of the Council's Rules of Meeting Procedures adopted in Resolution 2022-068.

Adopted both Ordinances on First Reading.

13. First Reading of Ordinance No. 101, 2023, Designating the Emma Malaby Grocery Property, 313 North Meldrum Street, Fort Collins, Colorado, as a Fort Collins Landmark Pursuant to Chapter 14 of the Code of the City of Fort Collins.

The purpose of this item is to request City Landmark designation for the Emma Malaby Grocery Property at 313 North Meldrum Street. In response to an application from the property owner, Historic Larimer County, City staff and the Historic Preservation Commission have determined the property to be eligible for designation under City Code Section 14-22, Standards 1 – Events, 2 – Persons/Groups, 3 – Design/Construction, and 4 – Information Potential. The owner is requesting designation to ensure protection of the property's buildings and features and to gain access to financial incentives for historic property owners.

Adopted on First Reading.

14. Resolution 2023-066 Approving an Exception to the Use of a Competitive Process for Biosolids Dewatering Polymer for the Drake Water Reclamation Facility.

The purpose of this item is to request an exception to the use of a competitive bid process for a contract extension not to exceed five (5) years with Aqua Ben Corporation for purchase of biosolids dewatering polymer is being brought forward for consideration.

The alternative is contrary to the City's best interests for the following reasons:

Selection of an alternative biosolids dewatering polymer would require modification of the Drake Water Reclamation Facility (DWRf) National Pollutant Discharge Elimination System (NPDES) permit by Colorado Department of Public Health and Environment (CDPHE). Modification of NPDES permits is prohibited when the status of a permit is administratively extended. The DWRf NPDES permit is in a status of administrative extension.

Exception to the Competitive Bid or Proposal Rationale:

Section 8-161(d)(1)b. Although there exists more than one (1) responsible source, a competitive process cannot reasonably be used or, if used, will result in a substantially higher cost to the City, will otherwise injure the City's financial interest, or will substantially impede the City's administrative functions or the delivery of services to the public.

Adopted.

15. **Resolution 2023-067 Authorizing the City Manager to Execute an Intergovernmental Agreement with Larimer County for the Funding of the Colorado Front Range Trail – Poudre River Trail Segment with the Great Outdoors Colorado (GOCO) Grant Reimbursement.**

The purpose of this item is to support the Intergovernmental Agreement (IGA) with the City and Larimer County for the Poudre River Trail segment grant. Larimer County, in partnership with Fort Collins, Timnath, and Windsor, received a \$2.0 million grant from Great Outdoors Colorado (GOCO) for the completion of the remaining segments of the Poudre River Trail. The Grant will fund construction of gaps in the trail from Colorado State University's (CSU) Environmental Learning Center (ELC) to River Bluffs Open Space west of Windsor including a spur connection to Windsor's Kyger Reservoir property.

Funds from the award will be used to close two gaps of the Poudre River Trail within the City, one between Arapaho Bend Natural Area and the existing Timnath trail system on the east side of I-25, and the other connecting the existing trail near Rigden Reservoir to CSU's ELC. Alternative alignments are being explored for the segment of trail between Rigden Reservoir and the ELC (see attachment 2).

Adopted.

16. **Resolution 2023-068 Directing an Intergovernmental Agreement with Larimer County and Certification of Ballot Questions for the Municipal Election to be Conducted by Larimer County in Conjunction with the November 7, 2023, Coordinated Election.**

The purpose of this Resolution is to authorize the City Manager to enter into an Intergovernmental Agreement (IGA) with Larimer County for the conduct of the November election, and to direct the City Clerk to certify ballot content to the County no later than September 8, 2023. Both of these actions are required by State statute.

Adopted.

17. **Resolution 2023-069 Making an Appointment to the Northern Colorado Regional Airport Commission.**

The purpose of this items is to appoint Michael Williams as the Fort Collins appointed Citizen Member to the Northern Colorado Regional Airport Commission.

Adopted.

END OF CONSENT CALENDAR

Mayor Pro Tem Francis moved, seconded by Councilmember Gutowsky, to approve the recommended actions on items 1-17 on the Consent Calendar.

The motion carried 4-0.

CONSENT CALENDAR FOLLOW-UP

Councilmember Susan Gutowsky requested additional detail regarding item 8, *First Reading of Ordinance No. 094, 2023, Appropriating Philanthropic Revenue in the General Fund Through City Give for Neighborhood Services for Community Workshops and the Creation and Distribution of a Neighborhood Business Guide*. Nina Bodenhamer, City Give Director, replied the grant was received from the American Association of Retired Persons (AARP) and funds will be utilized to prepare winterization kits and resource guides for mobile home park residents.

Mayor Arndt congratulated Michael Williams on his appointment per item 17, *Resolution 2023-069 Making an Appointment to the Northern Colorado Regional Airport Commission*.

L) STAFF REPORTS

None.

M) COUNCILMEMBER REPORTS

Councilmember Susan Gutowsky

- Judged the Fourth of July parade and commended the entries and patriotic energy.
- Attended the Northern Colorado Regional Airport terminal groundbreaking.
- Toured the Carnegie Building renovations with the DDA Board and staff and noted it will be a state of the art venue for cultural events.
- Attended the NoCo Pride in the Park celebration.
- Commented on the opening of the Community Justice Alternative Center and on a presentation by a panel of residents who have been able to circumvent jail by going through a step by step program.
- Announced tomorrow's cesarian birth of her grandson in California.

Councilmember Tricia Canonico

- Attended a listening session with Councilmember Peel for businesses in the South College corridor.
- Toured the Northern Colorado Wildlife Center which aids wildlife in crisis.
- Attended the regional broadband celebration which highlighted municipal broadband in the region and celebrated the hundreds of millions of dollars in funding Colorado is receiving from the Broadband Equity Access and Deployment Initiative.
- Attended the asphalt art installation with FC Moves at the Roosevelt and Maple intersection.

Councilmember Shirley Peel

- Recognized individuals who donate to the community through City Give.
- Attended a tour of Crossroads Safehouse.
- Attended the Northern Colorado Regional Airport terminal groundbreaking.
- Announced a listening session Saturday from 9:00-11:00 a.m. at the Harmony Library.
- Thanked her neighbor, Gabe, who is nine, for a note thanking her for running for reelection.

Mayor Jeni Arndt

- Attended the Colorado Municipal League conference.
- Recognized City Manager Kelly DiMartino on attending the Harvard Leadership Training Program and receiving a scholarship from the International City Managers Association based on a vote of her peers. Noted the Poudre Fire Authority Chief is also in attendance at the training program.

CONSIDERATION OF ITEMS REMOVED FROM THE CONSENT CALENDAR FOR INDIVIDUAL DISCUSSION

None.

O) CONSIDERATION OF ITEMS PLANNED FOR DISCUSSION

18. Items Relating to a City-Initiated Charter Amendment Relating to Referendum Requirements.

A. Possible Public Hearing and Motion(s) Regarding Protest(s) of Ballot Language.

B. First Reading of Ordinance No. 102, 2023, Submitting to a Vote of the Registered Electors of the City of Fort Collins Proposed Amendments to Sections 2 and 5 of Article X of the City Charter Relating to Referendum and Petition Requirements.

The purpose of this item is to set ballot language regarding proposed amendments to Sections 2 and 5 of Article X of the City Charter relating to referendum and petition requirements.

Following work with the Election Code Committee and through a Work Session on May 9, 2023, Council directed staff to bring forward a potential ballot option to amend the City Charter to reconcile contradictions in the referendum process.

Any protest of the proposed ballot language must be received no later than Monday, July 17, 2023, at noon. Protest(s) shall be heard, considered, and resolved by the Council prior to adoption of the related Ordinance. If protests are received, copies will be included in Council's "Read Before the Meeting" packet.

Ginny Sawyer, Senior Policy and Project Manager, stated this item and the next involve two potential Charter amendments that Council showed some interest in possibly referring. She provided the ballot language for the items.

PUBLIC COMMENT

Rich Stave stated the ten day time period for protests discourages public participation and commented on the lack of opportunities for public participation leading up to a final decision being made by Council.

COUNCIL DISCUSSION

Mayor Pro Tem Francis moved, seconded by Councilmember Ohlson, to adopt on first reading Ordinance No. 102, 2023, Submitting to a Vote of the Registered Electors of the City of Fort Collins Proposed Amendments to Sections 2 and 5 of Article X of the City Charter Relating to Referendum and Petition Requirements.

Mayor Pro Tem Francis mentioned this clears up the City process given there was some confusion during the last petition. Mayor Arndt concurred.

The motion carried 4-0.

Motion to Reconsider:

Mayor Pro Tem Francis moved, seconded by Councilmember Ohlson, to reconsider the vote by which the first reading Ordinance No. 102, 2023, Submitting to a Vote of the Registered Electors of the City of Fort Collins Proposed Amendments to Sections 2 and 5 of Article X of the City Charter Relating to Referendum and Petition Requirements was adopted.

The motion carried 4-0.

Motion to Repass and add number 2:

Mayor Pro Tem Francis moved, seconded by Councilmember Ohlson, to repass Ordinance No. 102, 2023, Submitting to a Vote of the Registered Electors of the City of Fort Collins Proposed Amendments to Sections 2 and 5 of Article X of the City Charter Relating to Referendum and Petition Requirements, as number 2 on the ballot.

The motion carried 4-0.

19. Items Relating to a City-Initiated Charter Amendment Relating to Residency Requirements.

A. Possible Public Hearing and Motion(s) Regarding Protest(s) of Ballot Language.

B. First Reading of Ordinance No. 103, 2023, Submitting to a Vote of the Registered Electors of the City of Fort Collins Proposed Amendments to Articles II and IV of the City Charter Concerning the Requirement that Certain Employees Live in or Near Fort Collins.

The purpose of this item is to set ballot language regarding the requirement that certain employees live in or near Fort Collins.

Based on feedback from Councilmembers at the May 9, 2023, staff brings forward a potential ballot option to amend the City Charter to remove requirements that certain employment position types live in or near Fort Collins, allowing Council to establish any residency requirements by ordinance or by employment agreement for employees reporting directly to Council. Currently, a vote of the registered electorate is required to amend the Charter language that specifies City positions that must live in or near Fort Collins.

Any protest of the proposed ballot language must be received no later than Monday, July 17, 2023, at noon. Protest(s) shall be heard, considered, and resolved by the Council prior to adoption of the related Ordinance. If protests are received, copies will be included in Council's "Read Before the Meeting" packet.

Ginny Sawyer, Senior Policy and Project Manager, stated this item relates to residency requirements based on City title and position that are currently in the Charter. It would pull those requirements from the Charter and place them in the Code with the exception of the City Manager residency requirement which would remain in the Charter.

PUBLIC COMMENT

Rich Stave stated this creates opportunity for political patronage and citizens of Fort Collins expect those in public positions to be there to represent their best interests and live in the City.

COUNCIL DISCUSSION

None.

City Attorney Daggett noted the prior ordinance needs to have a number 2 or 3 inserted and recommended moving forward with this vote then reconsidering the previous motion with that inclusion.

Mayor Pro Tem Francis moved, seconded by Councilmember Ohlson, to adopt on first reading Ordinance No. 103, 2023, Submitting to a Vote of the Registered Electors of the City of Fort Collins Proposed Amendments to Articles II and IV of the City Charter Concerning the Requirement that Certain Employees Live in or Near Fort Collins, as number 3 on the ballot.

Mayor Arndt concurred with Mr. Stave's comments.

The motion carried 4-0.

P) OTHER BUSINESS

OB 1. Possible consideration of the initiation of new ordinances and/or resolutions by Councilmembers.

(Three or more individual Councilmembers may direct the City Manager and City Attorney to initiate and move forward with development and preparation of resolutions and ordinances not originating from the Council's Policy Agenda or initiated by staff.)

Mayor Arndt stated she would like the Council to consider placing an item on the ballot asking the registered electors whether Council should increase occupancy in Fort Collins given the level of public interest in the topic.

Councilmember Ohlson opposed the suggestion stating it is a last-minute addition of a substantial topic and its addition would be poor governance. He stated it should be Council that works out the details on this issue and stated a Council vote to add this question to the ballot would not occur until August which is only ten weeks prior to the election.

Mayor Arndt noted there was a previous petition attempt; therefore, she did not bring it up previously so as to avoid interrupting the citizen initiative and this is the first Council meeting since. She stated that having voter input on this topic would be beneficial.

Councilmember Ohlson stated he does not believe Council should react and place an item on the ballot after a failed citizen-initiated petition attempt.

Mayor Pro Tem Francis supported asking voters whether to proceed with occupancy increases and stated Council would still do the work of determining what those changes would be.

Councilmember Gutowsky stated placing this item on the ballot seems rushed and timing it with Council elections could be troublesome given the contentiousness of the issue.

Councilmember Peel supported the Mayor's suggestion as it would aid in identifying the will of voters.

Councilmember Canonico stated this has been an ongoing topic for years and giving voters the opportunity to voice their opinions would be valuable.

Councilmember Ohlson commented on the importance of the language in phrasing a ballot question.

City Attorney Daggett stated staff will provide some variations for the August 15th meeting and stated Council could adopt a resolution with the desired language then act to refer it to the voters.

Item 1.

ADJOURNMENT

There being no further business before the Council, the meeting was adjourned at 7:10 p.m.

DRAFT

AGENDA ITEM SUMMARY

City Council

STAFF

Nina Bodenhamer, City Give Director
John Duval, Legal

SUBJECT

Second Reading of Ordinance No. 093, 2023, Appropriating Prior Year Reserves and Unanticipated Revenue from Philanthropic Donations Received Through City Give for Various Programs and Services as Designated by the Donors.

EXECUTIVE SUMMARY

This Ordinance, unanimously adopted on First Reading on July 18, 2023, requests an appropriation of \$56,974 in philanthropic revenue received through City Give in 2022 and 2023. These miscellaneous gifts to various City departments support a variety of programs and services and are aligned with both the City's strategic priorities and as per the respective donors' designation.

In 2019, City Give, a formalized enterprise-wide initiative was launched to create a transparent, non-partisan governance structure for the acceptance and appropriations of charitable gifts.

STAFF RECOMMENDATION

Staff recommends adoption of the Ordinance on Second Reading.

BACKGROUND / DISCUSSION

The City of Fort Collins has long been the beneficiary of local generosity and has a valuable role in our community's philanthropic landscape. Generosity is demonstrated in both large and modest gifts, each appreciated for its investment in the mission and the range of services the City strives to deliver.

In 2022, the City received several individual philanthropic donations supporting various departments totaling \$9,775. In 2023, the City received several other individual donations totaling \$47,199. All of these funds are currently unappropriated.

As acknowledged by Section 2.5 of the City's Fiscal Management Policy 2-Revenue approved by Council, the City Manager has adopted the City Give Financial Governance Policy to provide for the responsible and efficient management of charitable donations to the City.

These generous donations have been directed by the respective donors to be used by the City for designated uses within and for the benefit of City service areas and programs as each donation is described in the exhibit to the ordinance.

CITY FINANCIAL IMPACTS

This Ordinance will appropriate \$56,974 in philanthropic revenue received through City Give for gifts to various City departments support a variety of programs and services.

The funds have been received and accepted per City Give Administrative and Financial Policy. The City Manager has also determined that these appropriations are available and previously unappropriated from their respective funds and will not cause the total amount appropriated in these funds to exceed the current estimate of actual and anticipated revenues and all other funds to be received in those funds during fiscal year 2023.

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

Not applicable.

PUBLIC OUTREACH

Not applicable.

ATTACHMENTS

First Reading attachments not included.

- 1. Ordinance for Consideration
- 2. Exhibit A to Ordinance

ORDINANCE NO. 093, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
APPROPRIATING PRIOR YEAR RESERVES AND UNANTICIPATED REVENUE FROM
PHILANTHROPIC DONATIONS RECEIVED THROUGH CITY GIVE
FOR VARIOUS PROGRAMS AND SERVICES AS DESIGNATED BY THE DONORS

WHEREAS, in 2022, the City received several individual philanthropic donations to be used for the City’s Gardens on Spring Creek, \$5,000 from one donor and several smaller donations from various donors totaling \$4,775, which funds have not been previously appropriated; and

WHEREAS, in 2023, the City received several other individual donations to be use for various City programs, several of which are individual donations of \$5,000 or less each and three of which are each \$5,000 or more up to \$20,000, which funds have not been previously appropriated and these eight donations total \$47,199; and

WHEREAS, the donors have directed these donations to be used by the City for certain designated uses within and for the benefit of certain City service areas as each donation is described in Exhibit “A” attached hereto and incorporated herein by reference; and

WHEREAS, as acknowledged by Section 2.5 for the City’s Fiscal Management Policy 2 - Revenue approved by City Council, the City Manager has adopted the City Give Financial Governance Policy to provide for the responsible and efficient management of charitable donations to the City (the “City Give Policy”); and

WHEREAS, Section 52.2.C. of the City Give Policy authorizes the City Give Director to accept donations of \$5,000 or less for the City service area intended by the donor to be benefited and Section 52.2.D. of the City Give Policy similarly authorizes the City Manager to accept donations of more than \$5,000 up to \$100,000; and

WHEREAS, as so authorized, the City Give Director and City Manager have accepted for the benefited City service areas, as applicable, the donations to be appropriated in this Ordinance to be used as directed by each donor as described in Exhibit “A”; and

WHEREAS, Article V, Section 9 of the City Charter permits the City Council, upon recommendation of the City Manager, to make a supplemental appropriation by ordinance at any time during the fiscal year, provided that the total amount of such supplemental appropriation, in combination with all previous appropriations for that fiscal year, do not exceed the current estimate of actual and anticipated revenues and all other funds to be received during the fiscal year; and

WHEREAS, Article V, Section 9 of the City Charter permits the City Council, upon the recommendation of the City Manager, to make supplemental appropriations by ordinance at any time during the fiscal year such funds for expenditure as may be available from reserves accumulated in prior years, notwithstanding that such reserves were not previously appropriated; and

WHEREAS, the City Manager has recommended the appropriations described in Sections 2 and 3 of this Ordinance and determined that the amount of each of these appropriations is available and previously unappropriated from the funds named in Sections 2 and 3 and will not cause the total amount appropriated in each such fund to exceed the current estimate of actual and anticipated revenues to be received in those funds during this fiscal year; and

WHEREAS, these appropriations will serve the public purpose of providing additional revenue to each of the benefited service areas to aid them in accomplishing the public purposes for which each service area is established thereby benefiting the public’s health, safety and welfare; and

WHEREAS, Article V, Section 11 of the City Charter authorizes the City Council to designate in the ordinance when appropriating funds from a private grant or donation, that such appropriation shall not lapse at the end of the fiscal year in which the appropriation is made, but continue until the earlier of the expiration of the private grant or donation or the City’s expenditure of all funds received from such grant or donation; and

WHEREAS, the City Council wishes to designate the appropriations herein for various City Give donations as appropriations that shall not lapse until the earlier of the expiration of the donations or the City’s expenditure of all funds received from such or donations.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That there is hereby appropriated from the prior year reserves in the Cultural Services and Facilities Fund the \$5,000 individual donation dated December 8, 2022, and the \$4,775 miscellaneous donations dated June 28, 2022, all to be expended for the Gardens on Spring Creek, as each of these donations is shown in Exhibit “A”.

Cultural Services and Facilities Fund	\$ 9,775
---------------------------------------	----------

Section 3. That there is hereby appropriated from the following funds these amounts of philanthropic revenue received in 2023 to be expended as designated by the donors in support of the various City programs and services as described in Exhibit “A”:

General Fund	\$ 9,500
Cultural Services and Facilities Fund	\$ 37,558
Golf Fund	\$ 141

Section 4. That the appropriations herein for various City Give donations are hereby designated, as authorized in Article V, Section 11 of the City Charter, as appropriations that shall not lapse at the end of this fiscal year but continue until the earlier of the expiration of the expiration of the donations or the City’s expenditure of all funds received from such donations.

Introduced, considered favorably on first reading and ordered published this 18th day of July, 2023, and to be presented for final passage on the 15th day of August, 2023.

SUBJECT

Second Reading of Ordinance No. 094, 2023, Appropriating Philanthropic Revenue in the General Fund Through City Give for Neighborhood Services for Community Workshops and the Creation and Distribution of a Neighborhood Business Guide.

EXECUTIVE SUMMARY

This Ordinance, unanimously adopted on First Reading on July 18, 2023, appropriates \$20,000 in philanthropic revenue for Neighborhood Services within the Community Development and Neighborhood Services Department of the Planning and Transportation services area.

Neighborhood Services has been awarded a gift of \$20,000 through the 2023 American Association of Retired Persons (AARP) Community Challenge with the designated intent to support healthy outcomes for residents’ homes and personal wellbeing through three one-day Homeowner Workshops, each at a different mobile home community in the City, including Skyline, North College, and Hickory Village. The gift funds also will be used to create and distribute a neighborhood business guide to residents.

STAFF RECOMMENDATION

Staff recommends adoption of the Ordinance on Second Reading.

BACKGROUND / DISCUSSION

Neighborhood Services offers a variety of services and programming to promote quality neighborhoods, from a Neighborhood Grant Program to free and confidential conflict resolution services.

AARP is the Nation’s largest nonprofit, nonpartisan organization dedicated to empowering people to choose how they live as they age. AARP works to strengthen communities and advocate for what matters most to families—with a focus on health security, financial stability, and personal fulfillment. The 2023 AARP Community Challenge received 3,560 Challenge applications nationwide, and the City was selected as a recipient of a \$20,000 award.

The gift from AARP will offer three one-day workshops to 696 households where residents will build their Do-It-Yourself (DIY) home repair skills to better maintain their homes. Members of households who are unable to attend the event will still receive informational materials and access to City and partner resources.

In addition, a neighborhood business guide will be created and distributed to encourage these residents to shop locally and bolster home-based businesses, many of which are run by individuals age 50+. The events

will involve two dozen volunteers and follow-up assistance through the City's existing Adopt-A-Neighbor program.

The City Manager recommends the appropriation described herein and has determined that this appropriation is available and previously unappropriated from the General Fund and will not cause the total amount appropriated in the General Fund to exceed the current estimate of actual and anticipated revenues to be received in the General Fund during this fiscal year. The City Manager also recommends the appropriation described herein, determining that the purpose for which the appropriated funds are to be expended remains unchanged.

CITY FINANCIAL IMPACTS

This Ordinance will appropriate \$20,000 in philanthropic revenue for Neighborhood Services within the Community Development and Neighborhood Services Department in the Planning, Development and Transportation services area.

The funds have been received and accepted per City Give Administrative and Financial Policy. All funds will be spent in the General Fund.

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

Not applicable.

PUBLIC OUTREACH

Not applicable.

ORDINANCE NO. 094, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
APPROPRIATING PHILANTHROPIC REVENUE IN THE GENERAL FUND THROUGH
CITY GIVE FOR NEIGHBORHOOD SERVICES FOR COMMUNITY WORKSHOPS AND
THE CREATION AND DISTRIBUTION OF A NEIGHBORHOOD BUSINESS GUIDE

WHEREAS, Neighborhood Services is a program within the Community Development and Neighborhood Services Department in the Planning, Development, and Transportation service area of the City; and

WHEREAS, Neighborhood Services offers a variety of services and programming to promote quality neighborhoods, from a Neighborhood Grant Program that assists financially with large projects or events, to free and confidential conflict resolution services; and

WHEREAS, the American Association of Retired Persons (AARP) is the Nation’s largest nonprofit, nonpartisan organization dedicated to empowering people to choose how they live as they age; and

WHEREAS, AARP works to strengthen communities and advocate for what matters most to families, with a focus on health security, financial stability, and personal fulfillment; and

WHEREAS, the City’s Neighborhood Services program was awarded a gift of \$20,000 through the 2023 AARP Community Challenge, with the designated intent to support healthy outcomes for residents’ homes and personal wellbeing through Homeowner Workshops to take place at different mobile home parks in the City, including Skyline, North College and Hickory Village; and

WHEREAS, the gift from AARP will allow Neighborhood Services to present three one-day workshops to 696 households where residents will improve their do-it-yourself home repair skills to better maintain their homes; and

WHEREAS, the gift also will support the creation and distribution of a neighborhood business guide to encourage these residents to shop locally and bolster home-based businesses, many of which are operated by individuals over the age of fifty years; and

WHEREAS, the events will involve two dozen volunteers and follow-up assistance through the Neighborhood Services’ existing Adopt-A-Neighbor program; and

WHEREAS, this appropriation benefits public health, safety and welfare of the citizens of Fort Collins and serves the public purpose of educating the public and supporting local businesses; and

WHEREAS, Article V, Section 9 of the City Charter permits the City Council, upon recommendation of the City Manager, to make a supplemental appropriation by ordinance at any time during the fiscal year, provided that the total amount of such supplemental appropriation, in

combination with all previous appropriations for that fiscal year, do not exceed the current estimate of actual and anticipated revenues and all other funds to be received during the fiscal year; and

WHEREAS, the City Manager has recommended the appropriation described herein and determined that this appropriation is available and previously unappropriated from the General Fund and will not cause the total amount appropriated in the General Fund to exceed the current estimate of actual and anticipated revenues and all other funds to be received in this Fund during this fiscal year.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That there is hereby appropriated from new philanthropic revenue in the General Fund the sum of TWENTY THOUSAND DOLLARS (\$20,000) to be expended in the General Fund by the Community Development and Neighborhood Services Department for hosting three one-day workshops to help residents develop do-it-yourself home repair skills and the creation and distribution of a neighborhood business guide.

Introduced, considered favorably on first reading and ordered published this 18th day of July, 2023, and to be presented for final passage on the 15th day of August, 2023.

SUBJECT

Second Reading of Ordinance No. 095, 2023, Authorizing Expenditure of American Rescue Plan Act Funds for Affordable Housing Fee Credits as Specified.

EXECUTIVE SUMMARY

This Ordinance, unanimously adopted on First Reading on July 18, 2023, appropriates American Rescue Plan Act (ARPA) funding for 5 units targeting forty percent (40%) Area Median Income (AMI) households at the Heartside Hill development. Council already appropriated \$350,000 of ARPA funding for affordable housing fee credits, and this funding must be fully committed by 2024. Affordable housing fee credits have been approved administratively for 20 units serving households at thirty percent (30%) AMI or below, including 8 units at Heartside Hill. There are no additional thirty percent (30%) AMI units expected before the ARPA deadline to commit funds in 2024. Though fee credits for units up to sixty-five percent (65%) AMI are a presumptive eligible use of ARPA funds, the City’s fee credit policy as codified in City Code Article VIII, Section 7.5 requires Council approval for fee credits for any units serving income ranges above thirty percent (30%) AMI. This Council action would ensure that the remaining appropriated funds are used for their intended purpose as affordable housing fee credits.

STAFF RECOMMENDATION

Staff recommends adoption of the Ordinance on Second Reading.

BACKGROUND / DISCUSSION

History on Fee Credits: Historically, the City has provided financial subsidy and forgone certain development fees to incentivize the development of affordable housing. Fee waivers have been one of the consistent incentives available to developers of affordable housing in the City. Before 2013, most development fees for affordable housing were traditionally waived, especially for the Fort Collins Housing Authority (FCHA).

In March of 2013 after a large fee waiver was granted to a project that was being developed primarily by CARE Housing, with the FCHA having only a small interest, Council amended its policies on fee waivers for affordable housing to allow more discretion in determining the kinds of projects for which City fees should be waived. This greatly limited the instances where fee waivers were provided. This change limited waiver eligibility to only the housing authority and then only for projects constructed for:

- Persons Experiencing Homelessness (PEH); or
- People With Disabilities (PWD); or

Households whose income is no greater than thirty percent (30%) of the area median income (AMI) of all City residents.

Furthermore, waivers of only certain fees (City Development Review Fees, Building Permit Fees, and City Capital Expansion Fees) were to be granted at the discretion of Council upon a determination that the proposed waiver will not jeopardize the financial interests of the City or the timely construction of the capital improvements to be funded by the fees for which waiver is sought. This recognized the difficulty of proving housing with rents affordable to these demographics while balancing the financial impacts of fee waivers to the City.

In 2017, Council expanded the availability of this limited incentive to all developers of units targeting the above referenced demographics. Lastly, the City had a practice of requiring some department fees to be reimbursed with General Fund Reserves or funds from the Affordable Housing Capital Fund.

Because the original process of calculating the sum of eligible fees and prorating the percentage of eligible units to determine the exact amount of each fee waiver request was labor intensive and administratively difficult, in 2020 Council established flat fee credits that replace the prior fee waivers available for units targeting the same demographics. These are set at \$14,000 for new construction and \$5,500 for adaptive reuse where some original fees will be credited to the project. These discretionary fee credits still required the requisite findings from Council for each request.

In 2022, the policy was further amended to allow administrative processing without Council action for fee credits for qualifying units when funding had been appropriated for such purpose.

Forecast of Eligible Units: Based on communications with affordable housing developers about known projects, there does not seem to be any qualified units (30% AMI, PWD or PEH) that will be ready to apply for fee credits in 2024. It is very hard to offer rents to serve thirty percent (30%) AMI households under current development conditions, in particular the rising costs of labor and construction materials and higher interest rates. It is not much easier to develop rentals affordable to the forty percent (40%) AMI target either. Higher rents can cover development and operating costs while lower rents are best subsidized on the front end to allow rents to go to on-going operations. Affordable rents targeting sixty percent (60%) AMI provide much more operating and maintenance revenue. For instance, under the new 2023 Colorado Housing and Finance Authority rent tables, a one-bedroom would as rent as follows:

- 30% AMI = \$639
- 40% AMI = \$852
- 60% AMI = \$1,278

While the City set the target for affordable housing fee credits at thirty percent (30%) AMI, it is notable that the American Rescue Plan Act (ARPA) sets the target at sixty-five percent (65%) AMI for presumptive eligibility.

American Rescue Plan Act Funding: In 2022, a Budget for Outcomes Offer (BFO) was funded for affordable housing fee credits with Rescue Plan ARPA for \$350,000. Since then, staff has administratively processed and approved requests for 20 units of new construction at 3 affordable housing communities: Northfield Commons (5 units), Village on Impala (7 units), and Heartside Hill (8 units). A total of \$280,000 of the appropriated funding has been committed to date, leaving \$70,000 available. The remaining funding amount could support 5 units of new construction with fee credits.

ARPA funding may be used for affordable housing projects if the developments increase the supply of long-term affordable housing. Moreover, the development of units serving a maximum of sixty-five percent (65%) AMI, if legally restricted for at least 20 years, are a Presumptively Eligible Use of ARPA funding.

At the City, ARPA funding must be committed by 2024 and fully spent by 2026. The Recovery Team has asked whether the remaining balance could be used for fee credits by the end of 2024. If not, they would like to redirect these funds so they can be timely deployed.

Heartside Hill Opportunity: The Heartside Hill development project is a unique development because it will include 3 types of affordable housing options. CARE Housing is the master developer and is responsible for constructing the community's infrastructure as well as building Heartside Hill Apartments, an apartment building with 72 units. This community will also include for-sale affordable homes constructed by Fort Collins Habitat for Humanity and group homes for PWD developed by L'Arche Fort Collins (see Heartside Hill Location Map).

Heartside Hill Apartments' unit mix will include:

- 8 Units at 30% AMI
- 5 Units at 40% AMI
- 8 Units at 50% AMI
- 51 Units at 60% AMI

While Heartside Hill Apartments received fee credits for the thirty percent (30%) AMI units they are developing, they have five, forty percent (40%) AMI units that could be supported by fee credits (see Request for Fee Credits). The timing of the financing of this project allows for an infusion of funds now and the project has had unanticipated unrelated costs as the master developer of the Heartside Hill overall project. The project needs to underground electric lines which will cost approximately \$220,000. Providing additional fee credits helps to close this funding gap, is a permissible use of ARPA funds, and will commit the remaining balance for ARPA funded fee credits in a timely manner. This allows the remaining funds to be used for the intended purpose of providing fee credits in the allowable timeline and removes the risk of needing to redeploy the funding to another City program.

The City's Recovery Team supports providing ARPA funding to the forty percent (40%) units at Heartside Hill (see Letter of Support).

Awarding fee credits to units that target forty percent (40%) AMI is a permissible use of ARPA funds, however, it requires Council approval because this target is not eligible for administrative processing under the current City Code language. Staff plans to bring a BFO offer for the 2025-2026 budget to replenish the fund for administrative fee credits. If a developer seeks fee credits for eligible units in 2024, the request would be subject to Council discretion and could not be processed administratively.

CITY FINANCIAL IMPACTS

ARPA funding has been budgeted for affordable housing fee credits. This would use the entire appropriated funds for the intended purpose in the allowable timeline.

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

The Affordable Housing Board supports the use of ARPA funding for the forty percent (40%) units at Heartside Hill and further recommends that staff investigate the feasibility of expanding the fee credit program in future budget cycles to provide subsidy up to forty percent (40% AMI) (see Draft Minutes, June 1, 1023 (Excerpt)).

PUBLIC OUTREACH

This matter was discussed at the May 4, 2023, Affordable Housing Board meeting which was open to the public.

First Reading attachments not included.

1. Ordinance for Consideration

ORDINANCE NO. 095, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
AUTHORIZING EXPENDITURE OF AMERICAN RESCUE PLAN ACT FUNDS
FOR AFFORDABLE HOUSING FEE CREDITS AS SPECIFIED

WHEREAS, Section 7.5-102(b) of the City Code authorizes the expenditure of appropriated funds for affordable housing fee credits for households with annual income that does not exceed thirty percent (30%) of the area median income (“AMI”); and

WHEREAS, in 2022, the City Council appropriated a Budget for Outcomes Offer of \$350,000 from the City’s American Rescue Plan Act (“ARPA”) funding for affordable housing fee credits; and

WHEREAS, affordable housing fee credits have been approved administratively for 20 units serving households at thirty percent (30%) AMI or below, obligating \$280,000 of the \$350,000 appropriation; and

WHEREAS, the City’s ARPA funding must be obligated by December 31, 2024; and

WHEREAS, there are no additional thirty percent (30%) AMI units expected to be developed before the ARPA deadline to obligate funds; and

WHEREAS, the remaining \$70,000 of the \$350,000 appropriation could fund affordable housing fee credits for five units of new construction; and

WHEREAS, authorizing the expenditure of the remaining \$70,000 for affordable housing fee credits for households with annual income that does not exceed forty percent (40%) of AMI would ensure that the remaining appropriated funds are used for their intended purpose to support affordable housing within the City.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That, notwithstanding § 7.5-102(b) of the City Code, Seventy Thousand Dollars (\$70,000) of the City Council’s 2022 appropriation of Three Hundred Fifty Thousand Dollars (\$350,000) in American Rescue Plan Act funds for affordable housing fee credits may be used for affordable housing fee credits for households with annual income that does not exceed Forty Percent (40%) of the area median income.

Introduced, considered favorably on first reading and ordered published this 18th day of July, 2023, and to be presented for final passage on the 15th day of August, 2023.

SUBJECT

Second Reading of Ordinance No. 096, 2023, Appropriating Prior Year Reserves and Authorizing Transfers of Appropriations in Multiple Utility Funds for the Purchase of Vendor Services to Support the Replacement of the City’s Utilities Billing System.

EXECUTIVE SUMMARY

This Ordinance, unanimously adopted on First Reading on July 18, 2023, appropriates available reserves from the Light and Power, Water, Wastewater and Stormwater Enterprise Funds to implement a modern Utility Customer Information System – Customer Self Service Portal (CIS-CX) Solution. This appropriation request is the second, and final, request related to the new CIS-CX.

In March 2023, Ordinance No. 036, 2023, appropriated \$4,250,000 to begin the process of temporarily increasing staffing for the implementation while contract review and negotiations were being finalized. The City has now identified the Vendor of Choice, reviewed the functional requirements in detail with that vendor and negotiated terms of the contract sufficient to determine the amount of investment needed to successfully deploy a new CIS-CX. This appropriation request of \$9,700,000 will provide the additional funding needed for all costs associated directly with the software deployment, software testing, training, and the organizational change management (OCM) associated with moving onto a modern CIS-CX. With this appropriation, the CIS-CX implementation will begin in October of this year and be fully operational by the end of 2025.

The total amount being requested for appropriation here is \$9,700,000 and is broken out as follows:

Software as Service Implementation \$3,250,000; Software Licensing through Implementation \$2,400,000; Organizational Change Management (OCM) \$1,500,000; Testing Protocol Development and Management \$900,000; Training Development and Initial Training \$900,000; and Business Process Analysis and Alignment \$750,000.

STAFF RECOMMENDATION

Staff recommends adoption of the Ordinance on Second Reading.

BACKGROUND / DISCUSSION

Replacing Fort Collins Utilities 22-year-old billing system is essential to providing our customers the safest and the best customer experience to interact with their community owned utility. Our priority is to provide accurate billing, convenient billing solutions, comprehensive, real time customer data that enhances our customer’s understanding of how they use energy and water and how much it costs. Our goals are to:

- Improve billing and operations functionality for existing utility services.
- Enhance the customer self-service portal capability with single sign-on functionality.
- Incorporate flexible user interfaces with process workflows that increase employee efficiency and billing accuracy.
- Increase the City’s ability to manage complex rates such as net metering and time of use, and future rate structures.
- Add a library of standard and user generated reports, including financials, customer transactions, key performance indicators and exceptions.

In March the initial appropriation for \$4,250,000 in funding to move ahead with the selection, implementation, and deployment of a modern Utility Customer Information System – Customer Self Service Portal (CIS-CX) Solution was authorized by Council. Since that time, the following progress has been made on this effort:

- Following the five weeks of product demonstrations, the Core team deliberated before the Vendor of Choice was selected and recommended to the Leadership team and the Executive team for discussion and review;
- The Leadership team conducted 13 reference checks with Utilities across the United States that were currently using any of the five vendors;
- The Executive team approved the decision to go with the Vendor of Choice;
- The Vendor of Choice and the other four vendors were notified;
- Funding was secured through Ordinance No. 36, 2023, which allowed legal review of the proposed service contract to begin, continued pre-project management and to begin the process to temporarily backfill critical existing positions needed for this implementation;
- Negotiations have been conducted on the City’s extensive contract requirements with the Vendor of Choice and refinements made to the full implementation costs; and
- Project staffing requirements and the project timeline have been refined.

In March, it was explained that a second appropriation would be necessary before the capital investment is fully funded and the service contract could be signed. Costs associated with the full scope of the solution including data migration, software interfaces, business process mapping, organizational change management, testing and training, as well as the direct implementation of the selected CIS-CX, have been defined, discussed, and negotiated by the outside project management consultants, the Vendor of Choice and Fort Collins Utilities. The funds being requested for this, the second and final, appropriation associated with this software implementation will be utilized as follows:

Software as a Service Implementation	\$3,250,000
Software Licensing through Implementation	\$2,400,000
Organizational Change Management (OCM)	\$1,500,000
Testing Protocol Development and Management	\$900,000
Training Development and Initial Training	\$900,000
Business Process Analysis and Alignment	<u>\$750,000</u>
Total	\$9,700,000

Software as a Service Implementation - \$3,250,000

All of the Vendor of Choice's direct costs associated with the implementation itself are included here. The chosen solution is a hosted solution, meaning that it will reside on software servers owned and maintained by the Vendor of Choice. A dedicated implementation is expected to provide over 22,000 hours toward this implementation during the 24-month implementation schedule.

Software Licensing through Implementation - \$2,400,000

Because this is a hosted software solution, the Vendor of Choice will begin realizing most direct costs associated with having a dedicated server at the beginning of the implementation. As such, monthly subscription fees will begin with the implementation itself, rather than at the time of going into production. Subscription fees will increase over time due to customer growth over a certain number and with modest, annual inflationary adjustments per contractual terms.

Organizational Change Management (OCM) - \$1,500,000

The current utility billing system will have been in place for over 20 years before this 24-month implementation is completed. Software capabilities have increased tremendously over the past 20 years, which is one of the primary reasons for this modernization. This change will require strategic change management to be a successful transformation of the utility customer experience. Outside change management consultants will work together with internal change agents to ensure the success of this implementation while allowing employees to adapt and embrace this change.

Change management will be approached from both an organizational perspective as well as a more direct project perspective. From an organizational perspective, outside change management consultants will work with Utility staff and leadership to mature the OCM capability within the organization. More specifically, focusing on how the new CIS-CX solution will be a major change itself, change management strategies will be developed and deployed to ensure the success change to this transformational application.

Testing Protocol Development and Management - \$900,000

Testing is critical to any software upgrade, especially those that are intended to be seamless and consistent with previous software. This implementation will require rigorous functional testing, system integration testing, operational readiness testing, stress testing, and regression and user acceptance testing. Testing scripts will have to be developed consistent with current and anticipated rate structures and business processes.

Software as a Service (SaaS) is becoming more and more common with modern utility billing systems. There are several advantages to SaaS over traditional utility-hosted billing systems including having access to the latest releases of the software solution. However, in order to most efficiently manage all SaaS clients, it is necessary for software vendors to minimize the number of different release configurations clients are running at any given time. This is done through required software releases to clients throughout the year. Because of this, testing is done not just during the initial implementation but also throughout the life of the solution with new releases.

Training Development and Initial Training - \$900,000

Any new application requires some training but a software application that is this critical to Utilities' success requires extensive training to ensure that employees understand and are confident and capable of utilizing the new CIS-CX. A Training Manager will help the City conduct a training needs assessment before developing training strategies, course curriculums and end user training materials specific to the job duties of each end user. All employees who will be utilizing the new CIS-CX will be trained prior to using the solution in their capacity.

Business Process Analysis and Alignment - \$750,000

The new CIS-CX will be capable of supporting current rate structures and customer services and through regular updates will adapt as those change in the future. To understand how changes to any existing business processes may affect customers, it is necessary to understand all business processes that are part of the Meter to Cash lifecycle of each utility service provided. All existing business processes with touch points to the Meter to Cash lifecycle will be documented in an “as is” state and then refined into a “to be” state through workshops with subject matter experts and end users. These documented business processes will then serve as the basis for developing the necessary testing, training and future business process improvements.

Appropriation by Enterprise Fund

As the customer information and billing system is needed by each utility to generate monthly operating revenues, each utility should contribute to the upgrade or replacement of the system. While some rates are more complicated than others and some require meter consumption data to assess, billing for each utility requires much of the same information as any other utility. Because electric monthly charges are more complicated than flat stormwater rates and unmetered wastewater use, there are additional billing components for billing electric customers. It is appropriate to attribute more of the shared costs to Light and Power and a similar argument applies to Water. The annual subscription costs for this system are divided between the four utilities as follows:

Light and Power	50.0%
Water	25.0%
Wastewater	12.5%
Stormwater	12.5%

This same cost sharing ratio is proposed for the implementation costs.

Light and Power	\$4,850,000
Water	\$2,425,000
Wastewater	\$1,212,500
Stormwater	\$1,212,500
	\$9,700,000

CITY FINANCIAL IMPACTS

The capital improvement plans that were included in the discussion for the 2023 utility rate ordinances assumed up to \$15M would be needed for this investment. As such, the financial impact of this investment is already included in the 10-year rate and debt issuance forecasts. The ongoing annual licensing and maintenance expenses associated with this solution are expected to be comparable to what the current solution costs. The funds being requested herein will need to come from available reserves of each utility enterprise. These funds are above and beyond funds set aside within the reserves to meet minimum fund balance requirements and any previous appropriations made but not yet spent. As the table below shows, each Enterprise Fund has sufficient available reserves for both anticipated appropriations related to modernizing the CIS-CX solution.

(\$ are in millions)	Light & Power	Water	Wastewater	Stormwater
Available Reserves EOY 2022	\$29.0	\$45.1	\$19.5	\$15.0
LESS 2023-24 BFO Investments	(\$4.7)	(\$19.1)	(\$7.2)	(\$1.6)
LESS Initial CIS-CX Appropriation	(\$2.1)	(\$1.1)	(\$0.5)	(\$0.5)
Estimated Available Reserves	\$22.2	\$24.9	\$11.8	\$12.9
Amount Being Requested	(\$4.9)	(\$2.4)	(\$1.2)	(\$1.2)
Remaining Available Reserves	\$17.3	\$22.5	\$10.6	\$11.7

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

This appropriation will be presented to the Water Commission and Energy Board at their July meetings which will occur before First Reading but after the agenda materials are due for publication. The meeting minutes will be included in the materials submitted for Second Reading.

This ordinance will be presented to the Council Finance Committee at the July 6 meeting. Due to the timeline for the implementation, it is necessary to bring this item to the Council at the next available regular meeting of the Council to be able to fully execute the contract and begin the implementation by October of this year.

PUBLIC OUTREACH

Public outreach and a solid communications plan focused on the customer experience will be forthcoming. This will also be represented in our change management strategy and approach throughout the project. There are many enhancements we expect to see for our customers including chat functionality, texting capabilities, better ways to educate and make informed decisions on consumption and use, a streamlined and more robust billing portal, single sign on solutions and more. The intention is to roll out new functionality as it is available which may be before the implementation is complete.

ATTACHMENTS

First Reading attachments not included.

1. Ordinance for Consideration

ORDINANCE NO. 096, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
APPROPRIATING PRIOR YEAR RESERVES AND AUTHORIZING
TRANSFERS OF APPROPRIATIONS IN MULTIPLE UTILITY FUNDS FOR
THE PURCHASE OF VENDOR SERVICES TO SUPPORT THE
REPLACEMENT OF THE CITY’S UTILITIES BILLING SYSTEM

WHEREAS, twenty-two years ago, the City began operating the current Banner software based customer information and billing system (“CIS”) to manage the City utility customer billing and account services for the City’s electric, water, wastewater, and stormwater utilities; and

WHEREAS, since implementing the Banner CIS, Utilities staff have identified functionality and capabilities that are needed to modernize operations, improve billing accuracy, and better manage City rate and efficiency programs and services; and

WHEREAS, in October 2022, the City issued RFP #9659 to solicit proposals for a new Customer Information System – Customer Self Service Portal (“CIS-CX”) solution, the proposal submission period for which closed on December 2, 2022 (“RFP #9659”); and

WHEREAS, based upon Utilities (Billing, Customer Service, and Metering), IT and Purchasing staff review of the RFP responses and selection of a CIS-CX solution provider, the costs to implement a replacement system have become better understood; and

WHEREAS, Utilities and Purchasing staff initially identified a total of \$4,250,000 for supplemental appropriation to address costs in the first phase of the CIS-CX development and implementation, which amount Council appropriated on April 4, 2023, under Ordinance No. 036, 2023; and

WHEREAS, staff has since identified the CIS-CX Vendor of Choice, and is negotiating preliminary terms of the contract with the Vendor sufficient to determine the additional amount of investment needed to successfully deploy a modern CIS-CX; and

WHEREAS, based on those discussions with the Vendor, staff has identified an additional \$9,700,000 recommended for supplemental appropriation to address the following direct costs:

Software as a Service Implementation	\$3,250,000
Software Licensing through Implementation	\$2,400,000
Organizational Change Management (OCM)	\$1,500,000
Testing Protocol Development and Management	\$ 900,000
Training Development and Initial Training	\$ 900,000
<u>Business Process Analysis and Alignment</u>	<u>\$ 750,000</u>
	Total \$9,700,000;

and

WHEREAS, this proposed appropriation will benefit the public health, safety and welfare of the residents of Fort Collins and serve the utility purpose of enhancing the accuracy, functionality, and convenience of Utility ratepayer billing, as well as improve ratepayer access to consumption records, building utility utilization data, and customer service; and

WHEREAS, Article V, Section 9 of the City Charter permits the City Council, upon the recommendation of the City Manager, to make supplemental appropriations by ordinance at any time during the fiscal year such funds for expenditure as may be available from reserves accumulated in prior years, notwithstanding that such reserves were not previously appropriated; and

WHEREAS, the City Manager has recommended the appropriation described herein and determined that this appropriation is available and previously unappropriated from the Light and Power Fund, Water Fund, Wastewater Fund, and the Stormwater Fund and will not cause the total amount appropriated in the Light and Power Fund, Water Fund, Wastewater Fund, or the Stormwater Fund, as applicable, to exceed the current estimate of actual and anticipated revenues and all other funds to be received in these funds during this fiscal year; and

WHEREAS, Article V, Section 10 of the City Charter authorizes the City Council, upon recommendation by the City Manager, to transfer by ordinance any unexpended and unencumbered appropriated amount or portion thereof from one fund or capital project to another fund or capital project, provided that the purpose for which the transferred funds are to be expended remains unchanged, the purpose for which the funds were initially appropriated no longer exists, or the proposed transfer is from a fund or capital project in which the amount appropriated exceeds the amount needed to accomplish the purpose specified in the appropriation ordinance; and

WHEREAS, the City Manager recommends transfer of the following amounts from the respect utility enterprise funds and has determined that the purpose for which the transferred funds are to be expended remains unchanged:

Light and Power	(50%)	\$4,850,000
Water	(25%)	\$2,425,000
Wastewater	(12.5%)	\$1,212,500
<u>Stormwater</u>	(12.5%)	<u>\$1,212,500</u>
	Total	\$9,700,000;

and

WHEREAS, Article V, Section 11 of the City Charter authorizes the City Council to designate in the ordinance when appropriating funds for a capital project, that such appropriation shall not lapse at the end of the fiscal year in which the appropriation is made, but continue until the completion of the project; and

WHEREAS, the City Council wishes to designate the appropriation herein for the purchase of vendor services to support the upgrade of the Utilities CIS as an appropriation that shall not lapse until the completion of the project.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That there is hereby appropriated from prior year reserves in the Light and Power Fund the sum of FOUR MILLION EIGHT HUNDRED FIFTY THOUSAND DOLLARS (\$4,850,000) to be expended in the Light and Power Fund for transfer to the Utility Customer Service and Administration Fund and appropriated therein for expenditure for the purchase of all vendor services needed to replace the City’s utilities billing system as proposed and described in RFP #9659.

Section 3. That there is hereby appropriated from prior year reserves in the Water Fund the sum of TWO MILLION FOUR HUNDRED TWENTY-FIVE THOUSAND DOLLARS (\$2,425,000) to be expended in the Water Fund for transfer to the Utility Customer Service and Administration Fund and appropriated therein for expenditure for the purchase of all vendor services needed to replace the City’s utilities billing system as proposed and described in RFP #9659.

Section 4. That there is hereby appropriated from prior year reserves in the Wastewater Fund the sum of ONE MILLION TWO HUNDRED TWELVE THOUSAND FIVE HUNDRED DOLLARS (\$1,212,500) to be expended in the Wastewater Fund for transfer to the Utility Customer Service and Administration Fund and appropriated therein for expenditure for the purchase of all vendor services needed to replace the City’s utilities billing system as proposed and described in RFP #9659.

Section 5. That there is hereby appropriated from prior year reserves in the Stormwater Fund the sum of ONE MILLION TWO HUNDRED TWELVE THOUSAND FIVE HUNDRED DOLLARS (\$1,212,500) to be expended in the Stormwater Fund for transfer to the Utility Customer Service and Administration Fund and appropriated therein for expenditure for the purchase of all vendor services needed to replace the City’s utilities billing system as proposed and described in RFP #9659.

Section 6. That the appropriation herein for the purchase of vendor services to support the replacement of the City’s utilities billing system as proposed and described in RFP #9659 is hereby designated, as authorized in Article V, Section 11 of the City Charter, as an appropriation for a capital project that shall not lapse at the end of this fiscal year but continue until the completion of the project.

Introduced, considered favorably on first reading and ordered published this 18th day of July, 2023, and to be presented for final passage on the 15th day of August, 2023.

AGENDA ITEM SUMMARY

City Council

STAFF

Rachel Ruhlen, Transportation Planner, FC Moves
Tyler Stamey, City Traffic Engineer, PDT
Aaron Guin, Legal

SUBJECT

Items Relating to Parking of Shared Mobility Devices and Electric Scooters.

EXECUTIVE SUMMARY

A. Second Reading of Ordinance No. 097, 2023, Amending Sections 2002, 2106 and 2108 of the Fort Collins Traffic Code to Address the Parking of Shared Mobility Devices and Electric Scooters.

B. Second Reading of Ordinance No. 098, 2023, Repealing Chapter 24, Article VI, Parking of Shared Mobility Devices, of the Code of the City.

These Ordinances, unanimously adopted on First Reading on July 18, 2023, amend the Fort Collins Traffic Code to add shared mobility devices and electric scooters regulations for parking of bicycles and electric bicycles, and repeal two sections of the City Code that separately relate only to parking of shared mobility devices and electric scooters.

STAFF RECOMMENDATION

Staff recommends adoption of these Ordinances on Second Reading.

BACKGROUND / DISCUSSION

The City and Colorado State University (CSU) selected Spin as the sole provider of shared e-bikes and e-scooters in Fort Collins in a competitive selection process. Spin began operating in 2021 on a one-year contract, which is renewable for up to five years total. The City and CSU have renewed the contract with Spin two years in a row.

During the first year, the City received complaints about improperly parked Spin e-bikes and e-scooters. During the fall of 2022, in collaboration with a graduate student intern from Colorado State University (candidate for Master’s in Public Health), FC Moves conducted a study of Spin parking behavior and collected photos and observations of over 400 Spin e-scooters and e-bikes. The study evaluated whether the device was parked in compliance with City regulations, namely Code Section 24-179, which specifically addresses the parking of shared mobility devices. The study also evaluated whether the parked device blocked a path or access, and whether the parked device blocked a path or access for individuals with disabilities.

The Spin parking study found that eighty-seven percent (87%) of shared mobility devices were not parked in compliance with the City code. For eighty-four percent (84%) of devices that were not parked in compliance, the study found there was no parking spot compliant with Section 24-179 available nearby.

While collecting data for the Spin parking study, FC Moves staff noted that, in most of the City, streets with unmetered, unmarked parking often are the best option to park e-bikes and e-scooters. Under the proposed ordinances, this now would be a legal option. Under the ordinances proposed by this agenda item, thirty-eight percent (38%) of the devices that were parked out of compliance in the fall 2022 study would have had a legal spot nearby, including fifty-six percent (56%) of devices that were blocking a path or access.

Using the data from the Spin parking study, FC Moves and Spin developed a parking management program that includes creating designated parking areas, assessment of penalties for improper parking, and educating riders on better parking practices. These steps are being rolled out now and, in fall 2023, data will be collected to compare parking behavior before and after these countermeasures. Also, should Council approve the ordinances proposed by this agenda item, FC Moves and Spin plans to educate riders to use this new option through a quiz tied to a \$5 ride credit.

It is important to note that, in addition to the City's own restrictions on parking of shared mobility devices, Spin imposes restrictions on the parking of its devices through "geofenced" no-park zones and rider penalties for violations. For example, Old Town Square currently is designated as a no-ride and no-park zone.

One of Council's "Five Guiding Principles" is to "*Make the code easier to use and understand.*" Currently, parking of personally owned electric scooters and shared mobility devices (whether bicycles, electric bicycles, or electric scooters) is regulated by Section 24-179 of the City Code. Parking of personally owned bicycles and electric bicycles, however, is regulated by Section 2108 of the Traffic Code. The proposed ordinances effectively would combine regulation of e-scooters and shared mobility devices in the Traffic Code, so that parking regulations for bicycles, electric bicycles, and electric scooters are the same regardless of whether they are shared- or personally owned devices. These ordinances also would allow for Spin shared mobility devices to be parked on streets which provides more options for parking in compliance with City regulations and are expected to reduce the number of parked shared mobility devices blocking paths or access.

In preparing these proposed changes, FC Moves staff consulted with Police Services, Traffic Operations, Parking Services and Spin staff. FC Moves also presented to and consulted with the City's Disability Advisory Board, Bicycle Advisory Committee, and the Transportation Board regarding the proposed changes.

CITY FINANCIAL IMPACTS

No financial impacts are anticipated.

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

On May 22, 2023, the Bicycle Advisory Committee unanimously expressed support for these ordinances and requested that the Transportation Board forward their support to Council.

On June 22, 2023, the Transportation Board agreed to forward to Council its recommendation in the Bicycle Advisory Committee memo (attached), with one dissenting vote.

PUBLIC OUTREACH

Over 1,200 Spin riders responded to a survey in Fall 2022. The most frequent answer to "What would encourage proper Spin e-bike/e-scooter parking for you?" was "Better options for parking." (forty-one percent (41%).

ORDINANCE NO. 097, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
AMENDING SECTIONS 2002, 2106 AND 2108 OF THE FORT COLLINS TRAFFIC CODE
TO ADDRESS THE PARKING OF SHARED MOBILITY DEVICES
AND ELECTRIC SCOOTERS

WHEREAS, FC Moves is a department within the City’s Planning, Development, and Transportation Service Area that exists to advance mobility solutions to increase walking, bicycling, transit use, shared and environmentally sustainable modes; and

WHEREAS, in 2021, the City of Fort Collins and Colorado State University (CSU) selected Spin as the sole provider of shared electric bikes and electric scooters in Fort Collins in a competitive selection process; and

WHEREAS, Spin began operating in Fort Collins in 2021 on a one-year contract that is renewable for up to five years total, and which has been renewed by the City and CSU two years in a row; and

WHEREAS, during the first year of Spin operations, the City received complaints about improperly parked Spin e-bikes and e-scooters, prompting FC Moves, in collaboration with a CSU graduate student intern, to conduct a study of Spin parking behavior, collecting photos and observations of over 400 Spin electric scooters and electric bikes; and

WHEREAS, the Spin parking study evaluated whether the shared mobility device was parked in compliance with City regulations, namely Code Section 24-179, which specifically addresses the parking of shared mobility devices; and

WHEREAS, the Spin parking study also evaluated whether the parked device blocked a path or access, and whether the parked device blocked a path or access for individuals with disabilities; and

WHEREAS, the Spin parking study found that eighty-seven percent (87%) of shared mobility devices were not parked in compliance with City Code regulations and, for eighty-four percent (84%) of devices that were not parked in compliance, there was no parking spot compliant with Section 24-179 available nearby; and

WHEREAS, while collecting data for the Spin parking study, FC Moves staff noted that, throughout most of the City, streets with unmetered, unmarked parking often are the best option to park electric bikes and electric scooters; and

WHEREAS, using the data from the Spin parking study, FC Moves and Spin developed a parking management program that includes creating designated parking areas on streets with unmetered, unmarked parking, assessing penalties for improper parking, and educating riders on better parking practices; and

WHEREAS, currently, the parking of personally owned electric scooters and shared mobility devices (whether bicycles, electric bicycles, or electric scooters) is regulated by Section 24-179 of the City Code; however, the parking of personally owned bicycles and electric bicycles, however, is regulated by Section 2108 of the Traffic Code; and

WHEREAS, upon recommendation of City staff, the City Council has determined that it is in the best interests of the City to repeal Sections 24-178 and 24-179 of the City Code relating to parking of shared mobility devices and to amend Sections 2002, 2106, and 2108 of the Traffic Code so that parking regulations for bicycles, electric bicycles, and electric scooters are the same regardless of whether they are shared or personally owned devices; and

WHEREAS, by repealing Sections 24-178 and 24-179 of the City Code and amending the Traffic Code in such a way, Spin shared mobility devices can be parked in designated zones on streets, thereby providing more options for parking in compliance with City regulations, and with the expectation that this also will reduce the number of parked shared mobility devices blocking paths or access.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That Section 2002 of the Fort Collins Traffic Code is hereby amended to add the following definition of “*Shared mobility device*,” which reads in its entirety as follows:

Shared mobility device shall mean any conveyance or device, including but not limited to electric scooters, skateboards and other toy vehicles, that integrates on-board technology allowing an individual to obtain the conveyance or device, either in person or remotely, from private property or the public right of way, whether or not such conveyance or device is human- or motor-powered.

Section 3. That Section 2106(2)(a) of the Fort Collins Traffic Code is hereby amended to read as follows:

2106. - Sidewalks and trails.

...

- (2) (a) A person riding a bicycle, electrical assisted bicycle, shared mobility device or electric scooter upon and along a sidewalk or pathway or across a roadway upon and along a crosswalk shall yield the right-of-way to any pedestrian and shall give an audible signal before overtaking and passing such pedestrian. A person riding a bicycle in a crosswalk shall do so in a manner that is safe for pedestrians.

...

Section 4. That Section 2108 of the Fort Collins Traffic Code is hereby amended to read as follows:

2108. - Parking.

- (1) (a) A person may park a bicycle, electrical assisted bicycle, electric scooter or shared mobility device on a sidewalk unless prohibited or restricted by an official traffic control device or local ordinance.
- (b) A bicycle, electrical assisted bicycle, electric scooter or shared mobility device parked on a sidewalk shall not impede the normal and reasonable movement of pedestrian or other traffic.
- (c) A bicycle, electrical assisted bicycle, electric scooter or shared mobility device may be parked on the road at any angle to the curb or edge of the road at any location where parking is allowed.
- (d) A bicycle, electrical assisted bicycle, electric scooter or shared mobility device may be parked on the road abreast of another such bicycle, electrical assisted bicycle, electric scooter or shared mobility device near the side of the road or any location where parking is allowed in such a manner as does not impede the normal and reasonable movement of traffic.
- (e) In all other respects, bicycles, electrical assisted bicycles, electric scooters or shared mobility devices parked anywhere on a highway shall conform to the provisions of Part 12 of this Traffic Code regulating the parking of vehicles.

Section 5. That the City Attorney and the City Clerk are authorized to modify the formatting and to make such other amendments to this Ordinance as necessary to facilitate the publication in the Fort Collins Traffic Code; provided, however, that such modifications and amendments shall not change the substance of the Code provisions.

Introduced, considered favorably on first reading and ordered published this 18th day of July, 2023, and to be presented for final passage on the 15th day of August, 2023.

AGENDA ITEM SUMMARY

City Council

STAFF

Ryan Mounce, City Planner
Brad Yatabe, Legal

SUBJECT

Items Relating to The Landing at Lemay Two Plan Amendment to the City Structure Plan Map and Rezoning.

EXECUTIVE SUMMARY

- A. Second Reading of Ordinance No. 099, 2023, Amending the City’s Structure Plan Map.
- B. Second Reading of Ordinance No. 100, 2023, Amending the Zoning Map of the City of Fort Collins by Changing the Zoning Classification for that Certain Property Known as The Landing at Lemay Two Rezoning.

These Ordinances, unanimously adopted on First Reading on July 18, 2023, amend the City Structure Plan Map to change the land use designation of approximately nine acres of land east of the Lemay Avenue overpass over Vine Drive from the Industrial Place Type to the Mixed Neighborhood Place Type and rezone the property from the Industrial (I) District to the Medium Density Mixed Use Neighborhood (MMN) District. The site is a remnant area of Industrial zoning resulting from the first Landing at Lemay Rezone which was approved in February 2023.

The rezoning request is subject to criteria in Section 2.9.4 of the Land Use Code. The rezoning may be approved, approved with conditions, or denied by Council after receiving a recommendation from the Planning and Zoning Commission, which voted 7-0 on their consent agenda to recommend approval of the request at their May 2023 hearing.

This item is a quasi-judicial matter and if it is considered on the discussion agenda, it will be considered in accordance with Section 2(d) of the Council’s Rules of Meeting Procedures adopted in Resolution 2022-068.

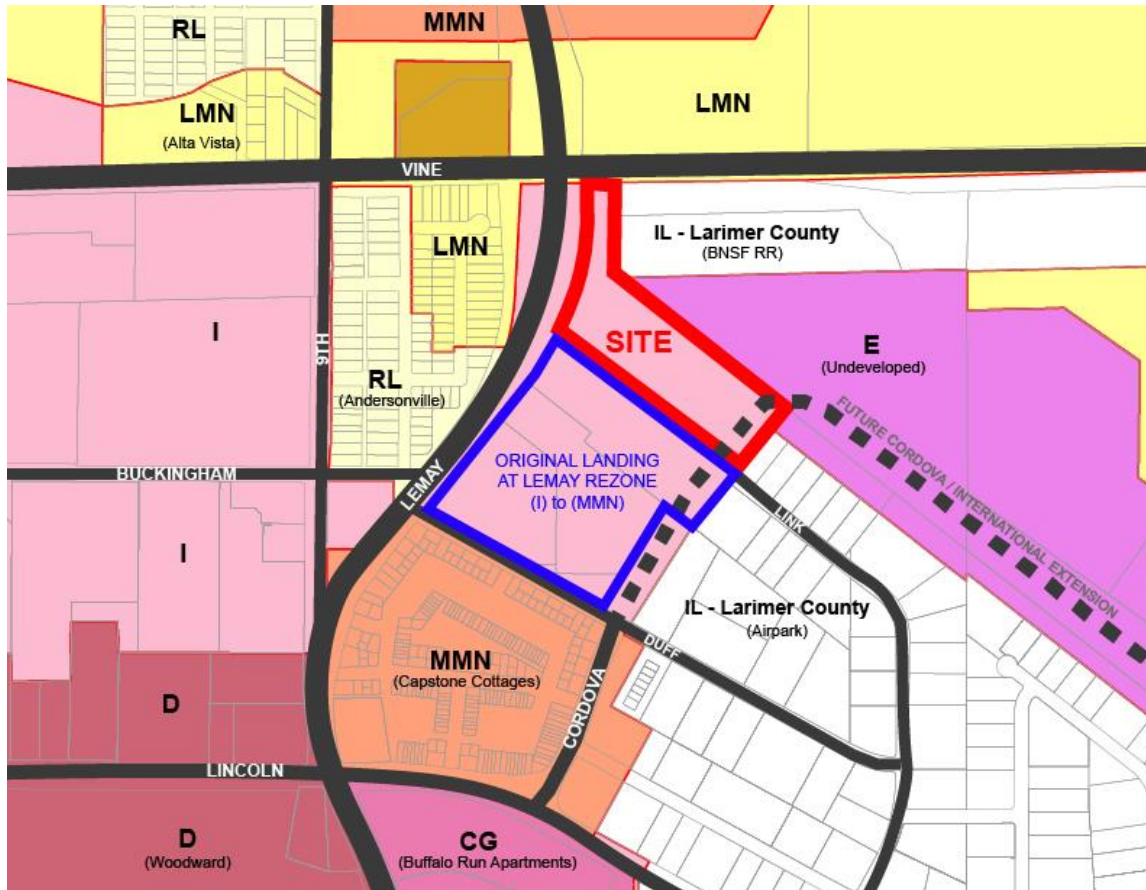

STAFF RECOMMENDATION

Staff recommends adoption of the Ordinances on First Reading.

BACKGROUND / DISCUSSION

In February 2023, Council approved a request to rezone approximately 17 acres of land from the Industrial (I) zone district to the Medium Density Mixed-Use Neighborhood (MMN) zone district known as The Landing at Lemay Rezone. Located near Lemay Avenue and Duff Drive, this rezoning resulted in an odd-

shaped remnant of industrial zoned land approximately nine acres in size that is the subject site of this second rezoning request known as The Landing at Lemay Two Rezoning.

Site and Zoning Vicinity Map

In Fall of 2021 when the petitioners were preparing the first Landing at Lemay Rezoning application, staff provided direction to only include the portions of property that were anticipated for a future residential development proposal in the rezoning request, and the remaining nine acres could be evaluated more holistically for potential land use or zoning changes as part of the East Mulberry Corridor Plan update which was beginning at the time. While the first rezoning request continued through the review process, the East Mulberry Corridor Plan update was subsequently delayed, resulting in a mismatch in timing between when these different areas would be considered for potential rezoning.

At the Planning and Zoning Commission hearing for the first Landing at Lemay Rezoning, the Commission discussed concerns about this remaining nine acres remnant of industrial land, as it created uncertainty about potential buffering requirements between industrial and residential development, and that the remaining 9 acre site suffered from similar characteristics that diminished the viability for industrial development as the first Landing at Lemay Rezone site.

The Planning and Zoning Commission discussion prompted the petitioners to submit the second rezoning request to proactively consider rezoning the 9 acre remnant and to unify the full property under MMN zoning. Given delays in the timeline for the East Mulberry Corridor Plan, staff are also supportive of the rezoning request for Council consideration in advance of the Plan update. The Planning and Zoning Commission subsequently voted 7-0 on their May 2023 hearing consent agenda to recommend Council approve the proposed Structure Plan Map amendment and rezoning.

PETITIONER'S REZONING REQUEST

The petitioner's request a rezoning of approximately 9 acres of land from the Industrial (I) zone district to the Medium Density Mixed-Use Neighborhood (MMN) zone district. Associated with the rezoning is a request to amend the Structure Plan Map from the Industrial Place Type to the Mixed Neighborhood Place Type to align with the proposed zoning. Unlike the first Landing at Lemay Rezone, there is no associated development proposal, and the change is primarily intended to clean up and unify zoning for the parcel and create more logical zoning boundaries.

SITE CONTEXT AND HISTORY

The site was part of the Fort Collins Business Center Annexation of 1986 and originally zoned Light Industrial (IL), conditioned upon the property being developed as part of a larger planned unit development. The original industrial development contemplated in the 1980s never occurred, and the site remains undeveloped.

A prominent characteristic of the site is a number of barriers which reduce the site's visibility and accessibility from several directions, including:

- (North) Burlington Northern Santa Fe railroad yard which prevents access to Vine Drive and provides a visual separation from the north.
- (West) The Lemay Avenue overpass over Vine Drive is elevated above the site and reduces visibility. Direct access to Lemay Avenue is no longer possible from the site and the overpass visually shields the site from the southwest to northwest.
- (East) Upon future development, the eastern edge of the site will be required to extend Cordova Road, a collector street intended to travel the perimeter of the Airpark and eventually connect with International Boulevard to the east near Timberline Road.

REZONING CRITERIA AND EVALUATION

Rezoning and map amendments are governed by five criteria in Land Use Code Subsections 2.9.4(H)(2) and 2.9.4(H)(3). A rezoning must demonstrate compliance with either criteria one or two, while the three remaining criteria are additional considerations for the Planning and Zoning Commission and Council. These five criteria can be paraphrased as:

1. Consistent with the Comprehensive Plan;
2. Warranted by Changed Conditions;
3. Compatible with Surrounding Uses;
4. Impacts to the Natural Environment; and
5. Logical and Orderly Development Pattern

Staff's summary of each criterion can be found below while the attached Planning and Zoning Commission staff report evaluates each criterion in greater detail.

Criterion One: Consistent with the Comprehensive Plan

In evaluating consistency with City Plan, staff analyzed both the policy guidance and future land use direction found in City Plan and the 2002 East Mulberry Corridor Plan, which is an adopted element of City Plan.

The existing City Plan Structure Plan Map identifies the site as part of the Industrial Place Type, consistent with its established industrial zoning. This industrial designation is also represented in the Land Use

Framework Map of the 2002 East Mulberry Corridor Plan. These land use designations are not consistent with the proposed MMN zoning, and a Structure Plan Amendment is required alongside a rezoning to create the necessary alignment between site zoning and the land use guidance in these policy documents.

Staff is currently working on updates to the East Mulberry Corridor Plan. If the proposed Structure Plan Map amendment and rezoning are approved by Council, staff intends to reflect those changes in the upcoming Plan update.

City Plan and East Mulberry Corridor Plan policies present a tension between goals seeking to ensure the success and preservation of the community's industrial and employment land supply, as well as maximizing housing opportunities along transit routes and in close proximity to nearby employment centers and services.

Either set of policies could be used to support retaining the existing industrial designation to ensure a long-term supply of land available for industrial development, or for a residential rezoning given the site's proximity to major employment areas located Downtown and in the Mulberry Corridor, as well as the site's proximity to transit along Lincoln Avenue and nearby retail and grocery store several blocks to the south.

Given the site's smaller size and odd shape as well as other constraints such as limited accessibility and access, Planning and Economic Health staff do not feel the site is a critical component of the City's overall industrial land supply and the policies encouraging housing with the type of nearby amenities supports a rezoning and compliance with the comprehensive plan.

Criterion Two: Warranted by Changed Conditions

Criteria two is the primary justification for the rezoning in staff's evaluation based on multiple physical and land-use changes which have occurred surrounding the site over the past several decades. Alongside changing trends in industrial development and demand, the site's suitability for industrial development has diminished.

The most prominent physical and land-use changes affecting the site include:

- Construction of the new Lemay Avenue overpass over Vine Drive. This has resulted in reduced visibility of the site and eliminated the possibility of direct arterial street access which are important site characteristics for certain types of industrial development.
- Introduction of a new collector street on the Master Street Plan (Cordova Road) along the site's eastern perimeter that can serve as a logical breakpoint between existing industrial development to the east.
- The rezoning of the abutting properties to the southwest (Capstone Cottages in 2015 and the first Landing at Lemay in 2023) from Industrial (I) to Medium Density Mixed-Use Neighborhood (MMN) zoning.
- The Lincoln Avenue frontage has been improved to create a more direct multimodal connection to Downtown with enhanced transit features and bike lanes as part of the Lincoln Corridor Plan.
- Land uses have shifted along Lincoln Avenue, with rezonings along both Lincoln Avenue frontages as a result of the new Woodward Headquarters and the shift in previously traditional industrial land uses towards retail, services, and tourism with the growth of nearby breweries. The City recently rezoned properties along the northern Lincoln Avenue frontage from the Industrial zone district to the Downtown district during the last update to the Downtown Plan.

The collective result of these changes is that the site's context within the middle of what was once planned as a much broader industrial district has shifted and the site now sits within a mixed land use context with residential zoning along two sides of the property. The construction of the new Lemay Avenue overpass has also diminished the competitiveness of the site for certain industrial users such as warehousing and logistics.

In consultation with Economic Health, staff also analyzed potential impacts to the community's industrial land supply and the importance of this site for new industrial development. Given a surplus of vacant industrial land in the Growth Management Area, ongoing industrial development trends, and marginal site attributes, Planning and Economic Health staff feel the site is not crucial to the City's overall industrial land supply.

Pages 32-33 of the attached City Plan Employment Land Demand Analysis estimate a large excess of vacant industrial land in the Growth Management Area in relation to future demand. Staff also requested historical industrial demand study from the petitioners during the first Landing at Lemay rezoning, which indicates industrial development over the past several decades in Fort Collins has been level or slightly decreasing, even as the community has grown. If these trends persist, Fort Collins' available industrial land supply is anticipated to be greater than future demand.

While the sites reduced visibility and lack of arterial street and highway access reduce competitiveness for warehousing/logistics users, narrative from Economic Planning Systems in the City Plan Employment Land Development Analysis, page 22, also discusses industrial development trends for Small Urban Manufacturers, such as those found to the east of the site in the Airpark. National trends for these businesses indicate a direction towards smaller footprints and number of employees. Further, these types of businesses generally seek out older spaces due to their lower costs rather than new construction. Where new construction or expansion may be desirable, there remain multiple vacant parcels within the Airpark/Mulberry Corridor and other sites for additional expansion or intensification.

Criterion Three: Compatible with Surrounding Uses

Given the immediate area's mixed zoning, the proposed MMN zone district does not appreciably alter the land use character of the area, especially given the site's limited size and location with limited access/visibility. A rezoning from the Industrial zone district to the Medium Density Mixed-Use Neighborhood district would also reduce a direct border between industrial and residential zoning and minimize the potential for nuisance issues.

In terms of potential future development impacts, the Industrial and Medium Density Mixed-Use Neighborhood zone districts feature similar levels of development intensity, although individual impacts are much more variable in the Industrial district given the large number of land uses that are permitted. An industrial development is more likely to create impacts related to noise, odor, truck-traffic, and aesthetics. An MMN-style development is more likely to create impacts related to building height and overall traffic generation.

Criterion Four: Impacts to the Natural Environment

The impact to the natural environment is likely to be similar between Industrial and MMN zoning at this location. Assuming typical development patterns for both zone districts, the level of human activity, traffic generation, and noise/light impacts can be expected to be of a similar magnitude. Traditionally, industrial development has been more likely to contain perimeter fencing and may use the full amount of property for impervious or compacted surfaces for parking and storage yards. Multifamily residential development may contain more requirements for formalized landscaping and open space/amenity areas that may be used on occasion by urban-adapted wildlife during low activity periods.

The City's Natural Habitats and Features Inventory Map does not contain any identifiable features on the site and the closest identified features are non-native grasslands several hundred feet to the northwest. Aerial imagery indicates the potential presence or past presence of prairie dogs. Under an I or MMN zoning designation, future development of the site will be required to identify ecological resources and subsequent mitigation efforts in compliance with Land Use Code requirements at the time of development – a change in zoning designation does not impact these standards and requirements.

Criterion Five: Logical and Orderly Development Pattern

Following the rezonings for Capstone Cottages and the first Landing at Lemay, all of the prior industrial zoning west of Cordova Road has shifted towards a residential designation. The proposed rezoning would complete the zoning and land use transition and reduce the potential for nuisances by eliminating a direct border between residential and industrial zoning. The proposed rezoning would instead shift this demarcation between residential and industrial to Cordova Road where the wider right-of-way of this future collector street can aid in greater physical separation and buffering.

The proposed rezoning also creates a logical and orderly pattern from a City Plan policy perspective as it encourages housing opportunities near employment, transit, and shopping, all of which can all be found within a short distance.

Finally, the proposed rezoning to MMN also matches the purpose and intent of the MMN zone district as described in the Land Use Code as a district, “...*intended to function together with surrounding low density neighborhoods (typically the L-M-N zone district) and a central commercial core (typically an N-C or C-C zone district).*” In this circumstance, the site would function as a separator or buffer between the more intensive non-residential areas of the Airpark and the lower density residential zone districts found further north and west and continues an area of MMN zoning extending northward from the commercially zoned property to the south comprising the Mulberry and Lemay Crossing Shopping Center.

CITY FINANCIAL IMPACTS

There are no direct financial impacts associated with the proposed rezoning.

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

The Planning and Zoning Commission voted 7-0 on the consent agenda at their May 18, 2023, hearing to recommend approval of the rezoning and Structure Plan Map amendment to Council. Draft minutes from the May 18, 2023, hearing and excerpted minutes from the Commission’s December 15, 2022, hearing discussing the first Landing at Lemay rezoning are attached and discuss the impetus for this second rezoning. At the December 15, 2022, meeting, the Commission discussed:

- Concern that the nine-acre remnant of industrial land features the same characteristics, such as reduced access and visibility, that make the site less suitable for industrial development and that a similar rezoning to MMN that is taking place for the original Landing at Lemay Rezone may be appropriate.
- Concern that leaving the nine-acre remnant under Industrial zoning will create uncertainty about buffering requirements when a project proposal for residential development is reviewed on the first Landing at Lemay Rezone site, especially if staff is already preparing to recommend zoning changes in the forthcoming East Mulberry Corridor Plan update process.

PUBLIC OUTREACH

A neighborhood meeting for the original rezoning proposal and early discussion of a potential multifamily development occurred October 4, 2021. A neighborhood meeting summary is attached.

Key discussion topics from the meeting included concerns and potential impacts from the multifamily development proposal, including building heights, traffic generation, the use of the vacant land by wildlife, and impacts on water resources. Related to the rezoning were discussion about a desire to see more diversity of land uses and housing types in the area, including more retail or restaurants within walking distance.

There were no public comments or testimony for the Landing at Lemay Two proposal at the Planning and Zoning Commission hearing.

ORDINANCE NO. 099, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
AMENDING THE CITY’S STRUCTURE PLAN MAP

WHEREAS, the City has received an application to rezone approximately nine acres of land east of the Lemay Avenue overpass over Vine Drive; and

WHEREAS, under the rezoning application, known as “The Landing at Lemay Two Rezoning,” such property would be rezoned from the Industrial (“I”) Zone District to the Medium Density Mixed Use Neighborhood (“M-M-N”) Zone District; and

WHEREAS, the City Council finds that, while The Landing at Lemay Two Rezoning does not comply with the present place type designation shown on the City’s Structure Plan Map for that location, it complies with the Principles and Policies of the City’s Comprehensive Plan, as well as the Key Principles of the City’s Structure Plan; and

WHEREAS, accordingly, the City Council has determined that the proposed The Landing at Lemay Two Rezoning is in the best interests of the citizens of the City; and

WHEREAS, the City Council has further determined that the City’s Structure Plan Map should be amended as shown on Exhibit “A” attached hereto, so that the proposed rezoning will comport with the City’s Comprehensive Plan in its entirety, including the City’s Structure Plan Map.

NOW, THEREFORE BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS, as follows:

Section 1. That the City Council finds that the existing City Plan Structure Plan Map is in need of the amendment requested by the applicant for The Landing at Lemay Two Rezoning.

Section 2. That the City Council finds that the proposed amendment promotes the public welfare and is consistent with the vision, goals, principles and policies of City Plan and the elements thereof.

Section 3. That the City Plan Structure Plan Map is hereby amended so as to appear as shown on Exhibit “A” attached hereto and incorporated herein by this reference.

Introduced, considered favorably on first reading and ordered published this 18th day of July, 2023, and to be presented for final passage on the 15th day of August, 2023.

ORDINANCE NO. 100, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
AMENDING THE ZONING MAP OF THE
CITY OF FORT COLLINS BY CHANGING THE ZONING
CLASSIFICATION FOR THAT CERTAIN PROPERTY KNOWN
AS THE LANDING AT LEMAY TWO REZONING

WHEREAS, Division 1.3 of the Fort Collins Land Use Code (the “Land Use Code”) establishes the Zoning Map and Zone Districts of the City; and

WHEREAS, on February 21, 2023, City Council adopted Ordinance No. 019, 2023, approving the Landing at Lemay Rezoning to rezone an approximately seventeen-acre property located east of the intersection of Lemay Avenue and Duff Drive from the Industrial (I) zone district to the Medium Density Mixed-Use Neighborhood (M-M-N) zone district; and

WHEREAS, the City has received a request to rezone an approximately nine-acre property (hereinafter, “The Landing at Lemay Two Rezoning”) that abuts the property rezoned in the Landing at Lemay Rezoning from the Industrial (I) zone district to the Medium Density Mixed-Use Neighborhood (M-M-N) zone district; and

WHEREAS, Division 2.9 of the Land Use Code establishes procedures and criteria for reviewing the rezoning of land; and

WHEREAS, in accordance with the foregoing, City Council has considered The Landing at Lemay Two Rezoning and has determined that said property should be rezoned as hereinafter provided; and

WHEREAS, City Council has further determined that The Landing at Lemay Two Rezoning, in consideration of the conditions of approval set forth in this Ordinance and the related Structure Plan Map amendment request, City’s Comprehensive Plan is warranted by changed conditions within the neighborhood surrounding and including the Landing at Lemay Two Rezoning; and

WHEREAS, to the extent applicable, City Council has also analyzed the proposed rezoning against the considerations as established in Section 2.9.4(H)(3) of the Land Use Code; and

WHEREAS, the Planning and Zoning Commission at its May 18, 2023, regular meeting recommended that Council approve The Landing at Lemay Two Rezoning and the requested amendment of the Structure Plan Map on a 7-0 vote; and

WHEREAS, the City Council finds that The Landing at Lemay Two Rezoning is in the best interest of the City.

NOW THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That the approval of The Landing at Lemay Two Rezoning is conditional upon City Council approving the requested amendment to the Structure Plan Map related to The Landing at Lemay Rezoning on second reading. The Structure Plan Amendment is necessary for The Landing at Lemay Two Rezoning to comply with the Comprehensive Plan. If such Structure Plan Map amendment is not approved on second reading, this Ordinance shall be null and void.

Section 3. That the Zoning Map adopted by Division 1.3 of the Land Use Code is hereby amended by changing the zoning classification from Industrial ("I") Zone District, to Medium Density Mixed Use Neighborhood ("M-M-N") Zone District, for the following described property in the City known as The Landing at Lemay Two Rezoning:

A TRACT OF LAND SITUATE IN THE NORTHWEST 1/4 OF SECTION 7, TOWNSHIP 7 NORTH, RANGE 68 WEST OF THE SIXTH PRINCIPAL MERIDIAN, LARIMER COUNTY, COLORADO, WHICH CONSIDERING THE NORTH LINE OF THE SAID NORTHWEST 1/4 AS BEARING NORTH 88° 53' 46" EAST AND WITH ALL BEARINGS CONTAINED HEREIN RELATIVE THERETO, THENCE COMMENCING FROM THE NORTHWEST CORNER OF SAID SECTION 7, BEING MONUMENTED WITH A #6 REBAR AND 3 1/4" ALUMINUM CAP, STAMPED WITH PLS# 17497, AND CONTINUING ALONG SAID NORTH LINE NORTH 88° 53' 46" EAST 1240.70 FEET; THENCE DEPARTING SAID NORTH LINE SOUTH 01° 05' 44" EAST 79.71 FEET TO A #4 REBAR WITH NO CAP, ALSO BEING THE POINT OF BEGINNING;
THENCE, SOUTH 00° 30' 20" WEST FOR A DISTANCE OF 417.97 FEET;
THENCE, SOUTH 88° 15' 17" EAST FOR A DISTANCE OF 57.91 FEET;
THENCE, SOUTH 51° 31' 56" EAST FOR A DISTANCE OF 914.10 FEET;
THENCE, SOUTH 38° 27' 14" WEST FOR A DISTANCE OF 377.87 FEET;
THENCE, NORTH 51° 26' 39" WEST FOR A DISTANCE OF 966.76 FEET TO THE BEGINNING OF A NON-TANGENTIAL CURVE;
SAID CURVE BEING CONCAVE TO THE WEST WITH A DELTA OF 02° 27' 28", HAVING A RADIUS OF 1380.00 FEET, AND WHOSE LONG CHORD BEARS NORTH 25° 09' 56" EAST FOR A DISTANCE OF 59.19 FEET;
THENCE, NORTH 23° 56' 12" EAST FOR A DISTANCE OF 89.54 FEET TO THE BEGINNING OF A CURVE,
SAID CURVE BEING CONCAVE TO THE WEST, WITH A DELTA OF 25° 03' 25", HAVING A RADIUS OF 1005.00 FEET, AND WHOSE LONG CHORD BEARS NORTH 11° 24' 30" EAST FOR A DISTANCE OF 436.02 FEET;
THENCE NORTH 01° 07' 15" WEST A DISTANCE OF 117.25 FEET
THENCE NORTH 88° 44' 21" EAST FOR A DISTANCE OF 75.67 FEET TO THE POINT OF BEGINNING

Section 4. That the Residential Neighborhood Sign District Map adopted pursuant to Section 3.8.7.1(M) of the Land Use Code be, and the same hereby is, changed and amended by showing that the above-described property is included in the Residential Neighborhood Sign District.

Section 5. That the Lighting Context Area Map adopted pursuant to Section 3.2.4(H) of the Land Use Code of the City of Fort Collins is hereby changed and amended by showing that the property subject to The Landing at Lemay Two Rezoning is included in the LC1 Lighting Context Area.

Section 6. The City Manager is hereby authorized and directed to amend said Zoning Map in accordance with this Ordinance.

Introduced, considered favorably on first reading and ordered published this 18th day of July, 2023, and to be presented for final passage on the 15th day of August, 2023.

AGENDA ITEM SUMMARY

City Council

STAFF

Yani Jones, Historic Preservation Planner
Heather N. Jarvis, Legal

SUBJECT

Second Reading of Ordinance No. 101, 2023, Designating the Emma Malaby Grocery Property, 313 North Meldrum Street, Fort Collins, Colorado, as a Fort Collins Landmark Pursuant to Chapter 14 of the Code of the City of Fort Collins.

EXECUTIVE SUMMARY

This Ordinance, unanimously adopted on First Reading on July 18, 2023, requests City Landmark designation for the Emma Malaby Grocery Property at 313 North Meldrum Street. In response to an application from the property owner, Historic Larimer County, City staff and the Historic Preservation Commission have determined the property to be eligible for designation under City Code Section 14-22, Standards 1 – Events, 2 – Persons/Groups, 3 – Design/Construction, and 4 – Information Potential. The owner is requesting designation to ensure protection of the property's buildings and features and to gain access to financial incentives for historic property owners.

STAFF RECOMMENDATION

Staff recommends adoption of the Ordinance on Second Reading.

BACKGROUND / DISCUSSION

The store on this property was constructed in 1881 by builder Hiram Pierce for George T. Wilkins, a notable photographer who took many of the portraits held in the local history archive today. Wilkins's store was originally located in what is now the 100 Block of North College Avenue, and he operated his business there for about fifteen years. In 1906, the store building was moved by Frank Collamer to its current location on North Meldrum Street. In 1916, the Collamer family expanded the store with an ell-shaped addition and constructed the barn on the property. The grocery business was primarily run by Frank Collamer's daughters, including Emma Malaby, who operated the grocery for over twenty years. The Collamer family also ran other businesses from this property, such as a wood yard and antique shop. The property passed to different descendants of the Collamer family over the years, most recently Jim Burrill. Mr. Burrill donated the property to Historic Larimer County earlier this year.

Under Standard 1, this property represents two events/patterns in Fort Collins history: (1) the location of grocery stores within residential settings prior to World War II; and (2) women's history in business, through association with multiple women in the Collamer family, including Minerva Stoneburner and Emma Malaby and their other sisters. Under Standard 2 for persons/groups, this property is associated with notable early photographer George T. Wilkins, who operated a photography studio out of the store building, as well as with the Collamer family, who have been involved in Fort Collins religious, social, and political life for well

over a century. Under Standard 3 regarding design/construction, this property contains one of three remaining false-front stores in Fort Collins; a stacked-plank shed, one of only two remaining examples of stacked-plank construction in Fort Collins; and a rare example of a barn original to and remaining in the boundaries of Fort Collins's original plat. Under Standard 4, because there is known to be a combined salvage yard and wood pile between the grocery building and barn, because of the presence of a stone-lined well that was filled in prior to 1980, and because of the likely location of a privy pit on this site, this property has potential to yield historical archaeological information related to life in the early to mid-twentieth century.

To convey its significance under Standards 1, 2, 3, and 4, the Emma Malaby Grocery Property retains a preponderance of all seven aspects of integrity, including location, design, setting, materials, workmanship, feeling, and association.

CITY FINANCIAL IMPACTS

Designation as a Fort Collins Landmark qualifies property owners for certain financial incentives funded by the City, as well as allows private property owners to leverage State tax incentives for repairs and modifications that meet national preservation standards. These include a 0% interest revolving loan program and Design Assistance mini-grant program through the City and the Colorado State Historic Tax Credits.

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

At its June 21, 2023, regular meeting, the Historic Preservation Commission (HPC) adopted a motion on a vote of 5-0 (2 absences, 1 recusal) to recommend that Council designate the Emma Malaby Grocery Property as a Fort Collins Landmark in accordance with City Code Chapter 14, based on the property's significance under Standards 1 – Events, 2 – Persons/Groups, 3 – Design/Construction, and 4 – Information Potential, and its integrity under all seven aspects: location, design, setting, materials, workmanship, feeling, and association. The HPC further recommends that designation of the property will advance the policies and purposes of City Code Chapter 14 set forth in City Code Sections 14-1 and 14-2 in a manner and extent sufficient to justify the designation.

PUBLIC OUTREACH

Because this Landmark nomination was owner-initiated, public outreach or notice described under Municipal Code Section 14-34 was not required. Outreach was limited to the property owner, the Larimer County Historic Alliance, dba Historic Larimer County, and included discussions with the owner of the eligibility of the property for designation, financial incentives for preservation, design review obligations for future exterior alterations, and the designation process in general.

1. Ordinance for Consideration

ORDINANCE NO. 101, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
DESIGNATING THE EMMA MALABY GROCERY PROPERTY,
313 NORTH MELDRUM STREET, FORT COLLINS, COLORADO,
AS A FORT COLLINS LANDMARK PURSUANT TO CHAPTER 14
OF THE CODE OF THE CITY OF FORT COLLINS

WHEREAS, pursuant to City Code Section 14-1, the City Council has established a public policy encouraging the protection, enhancement, and perpetuation of historic landmarks within the City; and

WHEREAS, by resolution adopted on June 21, 2023, the Historic Preservation Commission (the “Commission”) determined that the Emma Malaby Grocery Property, 313 North Meldrum Street in Fort Collins, as more specifically described in the legal description below (the “Property”), is eligible for landmark designation pursuant to City Code Chapter 14, Article II, Section 14-22(a) under Standards 1- Events, 2 - Persons/Groups, 3 - Design/Construction, and 4 - Information Potential; and

WHEREAS, the Commission’s resolution includes findings under Standards 1, 2, 3, and 4 that specifically the Property is eligible: (Standard 1) for its association with a pattern of development, the location of grocery stores within residential settings prior to World War II; for its association with women’s history in the area of business through associations with multiple women in the Collamer family who ran a business at this location, including Minerva Stoneburner and Emma Malaby, along with their sisters; (Standard 2) for its association with G.T. Wilkins, a notable early photographer who operated a photography studio out of the store building; for its association with the Collamer family, who have been involved in Fort Collins religious, social, and political life for well over a century; (Standard 3) for the design/construction of the store, which is one of three known remaining false-front stores in Fort Collins and the last known remaining wood frame building from the “triangle” area of Old Town; for the design/construction of the barn, which is a rare example of a barn built in and remaining in the boundaries of Fort Collins’s original plat; and for the design/construction of the stacked-plank shed, one of only two known remaining examples of stacked-plank construction in Fort Collins; and (Standard 4) because the Property has potential to yield historical archaeological information related to life in the early to mid-twentieth century due to the known location of a combined salvage yard and wood pile between the grocery building and barn, a stone-lined well that was filled in prior to 1980, and a likely privy site at the south edge of the Property; and

WHEREAS, the Commission determined eligibility also because the Property has historic integrity of Location, Setting, Design, Materials, Workmanship, Feeling, and Association under City Code Section 14-22(b)(1-7); and

WHEREAS, the Commission further determined that designation of the Property will advance the policies and purposes set forth in City Code Sections 14-1 and 14-2 in a manner and extent sufficient to justify designation; and

WHEREAS, the Commission recommends that the City Council designate the Property as a Fort Collins landmark; and

WHEREAS, the current owner of the Property nominated the Property, has consented to landmark designation, and desires to protect the Property; and

WHEREAS, landmark designation will preserve the Property’s significance to the community; and

WHEREAS, the City Council has reviewed the recommendation of the Commission and desires to follow the Commission’s recommendation and designate the Property as a landmark; and

WHEREAS, designation of the Property as a landmark will continue the prosperity, civic pride, and welfare of the public.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That the Property located in the City of Fort Collins, Larimer County, Colorado, described as follows, to wit:

LOT 3, BLOCK 53, FORT COLLINS
ALSO KNOWN BY STREET AND NUMBER AS 313 N. MELDRUM ST.,
CITY OF FORT COLLINS, COUNTY OF LARIMER, STATE OF COLORADO

be designated as a Fort Collins Landmark in accordance with City Code Chapter 14.

Section 3. That alterations, additions, and other changes to the buildings and structures located upon the Property will be reviewed for compliance with City Code Chapter 14, Article IV, as currently enacted or hereafter amended.

Section 4. That in compliance with Section 14-36 of the City Code, the City shall, within fifteen days of the effective date of this Ordinance, record among the real estate records of the Larimer County Clerk and Recorder a certified copy of this Ordinance designating the property.

Introduced, considered favorably on first reading, and ordered published this 18th day of July, 2023, and to be presented for final passage on the 15th day of August, 2023.

AGENDA ITEM SUMMARY

City Council

STAFF

Ginny Sawyer, Project and Policy Manager
Carrie Daggett, City Attorney

SUBJECT

Second Reading of Ordinance No. 102, 2023, Submitting to a Vote of the Registered Electors of the City of Fort Collins Proposed Amendments to Sections 2 and 5 of Article X of the City Charter Relating to Referendum and Petition Requirements.

EXECUTIVE SUMMARY

This Ordinance, unanimously adopted on First Reading on July 18, 2023, sets ballot language regarding proposed amendments to Sections 2 and 5 of Article X of the City Charter relating to referendum and petition requirements.

Following work with the Election Code Committee and through a Work Session on May 9, 2023, Council directed staff to bring forward a potential ballot option to amend the City Charter to reconcile contradictions in the referendum process.

STAFF RECOMMENDATION

Staff recommends adoption of the Ordinance on Second Reading.

BACKGROUND / DISCUSSION

The City of Fort Collins Charter is the governing document that defines the City organization and the powers and functions of the City. The Charter can only be amended by a vote of the people and was first created by a vote in 1954.

Over time, Charter provisions may become obsolete, contradictory, or desired to be changed to address needs, trends, or desires. The City typically has a few Charter changes, both large and small, on municipal ballots.

Council referred a measure addressing Council candidate qualifications on April 18, 2023 (Ordinance No. 062, 2023).

The City Clerk has requested that Council consider amendments to the Charter that eliminate potentially confusing and contradictory language regarding the processing of referendum petitions and petition requirements generally. In addition, formatting changes are proposed to these Charter provisions to simplify and make more readable the various requirements for petitions.

A) Current language includes some contradictory language between Sections 2 and 5 of Article X. *Initiative and Referendum*, regarding when an ordinance subject to a referendum is presented to the Council for reconsideration. The language in Section 5. *Petitions*, relates to both initiatives and referendums, and states a petition is presented to the Council only once it has been certified as sufficient by the City Clerk, after any amendments or protest proceedings.

Section 2(e) *Action by Council*, indicates both that:

- the presentation to Council of a petition certified by the City Clerk as sufficient for referendum shall automatically suspend the operation of the ordinance in question pending repeal by the Council or final determination by the electors, and
- the Council shall reconsider the ordinance at the next regular or special meeting of the Council following receipt of the petition by the City Clerk.

That specific requirement in Section 2 for Council to reconsider the ordinance at its next meeting after receipt of the petition by the Clerk contradicts Section 5 in both:

- specifying different events for action on a referendum petition to reach Council, which in practice occur at different time points, and
- indicating in one place that the action can return to the next regular or special meeting while the other citation requires action to occur at the next regularly scheduled meeting.

B) The last referendum process in December of 2022 also highlighted potential concerns around ordinances going into effect before being stayed. The timelines in the Charter for many steps of the referendum process mirror those found in State statute for the process as it applies to statutory municipalities or home rule municipalities without their own provisions. Because Fort Collins has also established its own shorter timeframe under Charter for when ordinances take effect upon adoption (10 days instead of 30 days), these timelines do not consider that ordinances subject to a petition for referendum will go into effect before the referendum process can be completed.

Proposed Actions:

- A) Cleaning up contradictions in Article X of the Charter between Sections 2 and 5 by removing the conflicting provision from Section 2, currently requiring the Council to reconsider the ordinance at the next regular or special meeting of the Council following the receipt of the petition by the City Clerk.
- B) Clarifying in Section 2 when an ordinance subject to a pending referendum petition is suspended from operation.

The specific changes are outlined in Section 2 of the Ordinance.

CITY FINANCIAL IMPACTS

Not applicable.

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

The Council Election Code Committee expressed support for moving these changes forward.

PUBLIC OUTREACH

Not applicable.

ATTACHMENTS

1. Ordinance for Consideration

ORDINANCE NO. 102, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
SUBMITTING TO A VOTE OF THE REGISTERED ELECTORS
OF THE CITY OF FORT COLLINS PROPOSED AMENDMENTS
TO SECTIONS 2 AND 5 OF ARTICLE X OF THE CITY CHARTER
RELATING TO REFERENDUM AND PETITION REQUIREMENTS

WHEREAS, Article IV, Section 8 of the Charter of the City of Fort Collins (“Charter”) provides that the Charter may be amended as provided by the laws of the State of Colorado; and

WHEREAS, Section 31-2-210, Colorado Revised Statutes, provides that Charter amendments may be initiated by the adoption of an ordinance by the City Council submitting a proposed amendment to a vote of the registered electors of the City of Fort Collins; and

WHEREAS, Article X of the Charter governs the initiative and referendum processes for City elections; and

WHEREAS, Section 2 and Section 5 of Article X provide inconsistent direction regarding the effects of certification of a referendum petition and the timing of the Council’s next required actions on the petition; and

WHEREAS, in addition, inconsistencies in some references within these sections can raise questions about their meaning; and

WHEREAS, these provisions of the City Charter currently appear as lengthy blocks of text that are difficult to read and follow, increasing potential confusion for those seeking to participate in and conduct the referendum process or petition process in general; and

WHEREAS, the City’s regular municipal election will be conducted on Tuesday, November 7, 2023, by Larimer County as a part of the coordinated election to be conducted on the same date (“City Election”); and

WHEREAS, Council desires to amend the Charter to correct, reconcile and clarify the referendum and petition process requirements, and to increase the readability of those provisions.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That the following proposed changes to Section 2 and Section 5 of Article X of the City Charter shall be submitted to the registered electors of the City as “Proposed Charter Amendment No. 2” at the regular municipal election to be held on Tuesday, November 7, 2023:

ARTICLE X. INITIATIVE AND REFERENDUM

. . .

Section 2. The referendum.

- (a) Power. The registered electors of the city shall have the power at their option to approve or reject at the polls, any ordinance, or portion of ordinance, adopted by the Council, except ordinances making the annual property tax levy, making the annual appropriation, calling a special election, or ordering improvements initiated by petition and to be paid for by special assessments.
- (b) Commencement of proceedings.
 - (1) One (1) or more registered electors may commence referendum proceedings by filing with the City Clerk within ten (10) days after final passage of the ordinance in question, a notice of protest against the going into effect of the ordinance. The notice shall be brief and need not state any reasons, but shall identify the ordinance or part thereof, or code section it proposes to have repealed.
 - (2) Not later than ten (10) days after the filing of the notice, the proponents shall present to the City Clerk the final form for the referendum petition conforming to the requirements of the Article.
 - (3) If the notice and petition form are timely presented, the City Clerk shall approve the petition form for circulation, in accordance with Section 5(b) of this Article.
 - (4) The petition shall be circulated, signed, verified, and filed in the manner prescribed by Section 5 of this Article.
- (c) Number of signatures required. The petition must be signed by registered electors of the city equal in number to at least ten (10) percent of the total ballots cast in the last regular city election.
- (d) Petition deadlines. The referendum petition shall be filed within twenty (20) days after the City Clerk's approval of the petition for circulation. If a completed petition is not subsequently filed within the requisite time after the City Clerk's approval of the petition for circulation, the referendum effort is null and void and the petition shall not be circulated further.
- (e) Action by Council.
 - (1) The City Clerk's certification of a petition as sufficient for referendum automatically suspends the operation of the ordinance in question pending repeal by Council or final determination by the electors.
 - (2) The Council shall reconsider the ordinance at the next regular meeting of the Council, or at an earlier special meeting of the Council called for this purpose, following the receipt of the certification of the petition by the City Clerk, and shall adopt an ordinance to repeal the ordinance in question, or part sought to be repealed, on first reading, with second reading no later than the next regular meeting.
 - (3) If the ordinance, or that part sought to be repealed, is not repealed by final action on such repealing ordinance, the Council must refer the same to a vote of the registered electors

at the next regular or special city election scheduled for any other purpose. Alternatively, the Council may call a special election for that specific purpose.

...

Section 5. Petitions.

(a) Separate petitions required. A separate petition shall be circulated and filed for each measure sought to be initiated or referred to the vote of the electors.

(b) Form and content.

(1) Approval of form for circulation.

- a. No petition shall be circulated until the City Clerk has approved the form for circulation.
- b. The City Clerk shall first determine that the petition form contains only the matters required by this Article.
- c. The Council shall prescribe by ordinance, upon recommendation of the City Clerk, a general form of petition which shall contain warnings and notices to signers as necessary.
- d. The City Clerk's approval under this Section shall not constitute an approval of the content of the petition, but rather, shall start the running of the time periods provided for circulation and filing of petitions.

(2) Petition content.

- a. The petition shall be addressed to Council.
- b. An initiative petition shall contain or have attached to each section throughout its circulation the full text of the proposed ordinance or resolution and shall contain a general statement of purpose fairly and accurately summarizing the proposed ordinance or resolution, indicating that the petition is to be circulated in support of the initiated ordinance or resolution and specifying whether a special election is requested.
- c. A referendum petition shall contain or have attached to each section throughout its circulation the full text of the ordinance sought to be referred, clearly identifying the protested portions if only a partial repeal is sought. In the case of bond ordinances, the full text of the ordinance need not be set forth but the petition shall contain or have attached to each section throughout its circulation the title and summary of the ordinance in question as prepared by the City Clerk.

(3) Signatures.

- a. Only registered electors may sign the petitions authorized under this Article.
- b. Each signer must sign his or her own signature and each signature shall be followed by the printed name of the signer, the street and number address of his or her residence, and the date of signing.
- c. No person shall knowingly sign an initiative or referendum petition more than once.

- d. In the event that the signature of any person appears more than once on a petition authorized under this Article, the first signature verified shall be counted and all other signatures of that person shall be rejected.
- (c) Circulation of petition.
 - (1) The petition may be circulated and signed in sections with each section consisting of one (1) or more sheets securely fastened at the top, provided that each section contains a full and accurate copy of the text of the petition and the names and addresses of the designated representatives for the petition.
 - (2) All sections shall be filed as one (1) instrument.
 - (3) Only persons eighteen (18) years of age or older may circulate the petition for signatures.
 - (4) The circulation of any petition by any medium other than personally by a circulator is prohibited. No person shall receive any compensation whatever for signing an initiative or referendum petition.
- (d) Affidavit of circulator.
 - (1) A circulator shall attach to each section of the petition circulated an affidavit signed by the circulator under oath before a notary public stating the following:
 - (i) the circulator's address of residence;
 - (ii) that the circulator is eighteen (18) years of age or older;
 - (iii) that he or she personally circulated the section;
 - (iv) that each signature was affixed in the circulator's presence;
 - (v) that to the best of the circulator's knowledge and belief each signer was at the time of signing a registered elector of the city;
 - (vi) that to the best of the circulator's knowledge and belief each signature is the genuine signature of the person whose name it purports to be;
 - (vii) that each signer had an opportunity before signing to read the full text of the petition; and
 - (viii) that the circulator has not paid or offered to pay any money or other thing of value to any signer for the purpose of inducing or causing the signer to affix his or her signature to the petition.
 - (2) A petition verified by the valid affidavits of its circulators in each of its sections shall be prima facie evidence that the signatures thereon are genuine and true.
- (e) Time limits; petition representatives. Petitions for initiative and referendum shall be filed with the City Clerk within the requisite time limits or they will be deemed null and void. Each petition shall designate by name and address not less than three (3) nor more than five (5) registered electors who shall represent the signers of the petition in all matters affecting the petition.
- (f) Sufficiency of petition.

- (1) Examination. Within five (5) working days of the filing of a petition the City Clerk shall ascertain by examination of the petition and the registration books whether the petition is signed by the requisite number of registered electors and contains the required particulars and affidavits. If the petition is insufficient, the City Clerk shall so certify and forthwith notify all of the designated petition representatives in writing, specifying the particulars of insufficiency.
- (2) Insufficient petition; amendment.
 - (i) If an initiative petition is deemed insufficient, whether following the initial determination by the City Clerk, or following protest proceedings, it may be amended by the submission of additional signatures collected after the City Clerk approved the form of the petition and within fifteen (15) days from the filing of the Clerk's certificate of insufficiency.
 - (A) Such signatures must be collected consistent with the requirements for collecting petition signatures as described in this Article.
 - (B) Within five (5) working days after such amendment, the City Clerk shall make examination of the amended petition and certify the result.
 - (C) If the amended petition is still insufficient, or if no amendment was made before the expiration of the time permitted for amendment, the petition shall be null and void without prejudice to the filing of a new petition for the same purpose.
 - (ii) If a referendum petition is deemed insufficient, it may be amended by the submission of additional signatures collected consistent with the requirements of this Article, but to be considered, any additional signatures must be submitted within the twenty-day circulation period after the City Clerk's approval of the petition form for circulation.
 - (A) Such signatures must be collected consistent with the requirements for collecting petition signatures as described in this Article.
 - (B) Within five (5) days after such amendment, the City Clerk shall make like examination of the amended petition and certify the result.
 - (C) If the amended petition is still insufficient, or if no amendment was made before the expiration of the time permitted for amendment, said referendum petition is null and void and a new petition may not thereafter be filed for referendum of the same ordinance.
- (3) Protests.
 - (i) Registered electors desiring to protest a determination by the City Clerk that a petition is either sufficient or insufficient may file a written protest, under oath, in the office of the City Clerk within ten (10) days of the filing of the petition. The protest shall set forth with particularity the grounds of protest and the names and defects in form protested.
 - (ii) Upon the filing of a protest, the City Clerk shall set a time for hearing such protest, which shall be no more than seven (7) days thereafter.

- (iii) At least five (5) days prior to the hearing, the City Clerk shall mail a copy of the protest to all of the designated petition representatives together with a notice of the time for hearing.
- (iv) All hearings shall be before a hearing officer appointed by the City Manager who shall have the power to issue subpoenas to compel the attendance of witnesses and the production of documents.
- (v) All records and hearings shall be public, and all testimony shall be under oath.
- (vi) The hearing shall be summary in nature and concluded within thirty (30) days after the petition was filed.
- (vii) The hearing officer shall decide and certify the results of the hearing within ten (10) days after the hearing is concluded, and no further protest regarding the petition may be filed.
- (viii) The City Clerk shall make any final determination regarding the sufficiency or insufficiency of a petition and shall base such determination on the protest hearing results certified by the hearing officer.
- (ix) A petition for referendum which has been deemed insufficient after protest may not be amended or circulated further and no further protest regarding the petition may be filed.

(4) Certification and presentation to Council. When and if a petition or amended petition is deemed sufficient, whether following the sufficiency determination by the City Clerk in the absence of a protest, or following protest proceedings, the City Clerk shall so certify and then present the certified petition to the Council at the next regularly scheduled meeting or special meeting called for this purpose. The City Clerk's certificate shall then be a final determination as to the sufficiency of the petition. Section 3. That the following ballot title and submission clause are hereby adopted for submitting Proposed Charter Amendment No. 2 to the voters at said election:

**CITY-INITIATED
PROPOSED CHARTER AMENDMENT NO. 2**

Shall Section 2 and Section 5 of Article X of the Charter of the City of Fort Collins, regarding the referendum process and petition process, be amended to eliminate inconsistency in language and make clear that certification of a referendum petition as sufficient stays the impact of the referred ordinance, that Council may consider a referendum petition at a special meeting called for that purpose, and making other clarifying and organizing edits to make those provisions more readable and understandable?

AGENDA ITEM SUMMARY

City Council

STAFF

Ginny Sawyer, Project and Policy Manager
Carrie Daggett, City Attorney

SUBJECT

Second Reading of Ordinance No. 103, 2023, Submitting to a Vote of the Registered Electors of the City of Fort Collins Proposed Amendments to Articles II and IV of the City Charter Concerning the Requirement that Certain Employees Live in or Near Fort Collins.

EXECUTIVE SUMMARY

This Ordinance, unanimously adopted on First Reading on July 18, 2023, sets ballot language regarding the requirement that certain employees live in or near Fort Collins.

Based on feedback from Councilmembers at the May 9, 2023, staff brings forward a potential ballot option to amend the City Charter to remove requirements that certain employment position types live in or near Fort Collins, allowing Council to establish any residency requirements by ordinance or by employment agreement for employees reporting directly to Council. Currently, a vote of the registered electorate is required to amend the Charter language that specifies City positions that must live in or near Fort Collins.

STAFF RECOMMENDATION

Staff recommends adoption of the Ordinance on Second Reading.

BACKGROUND / DISCUSSION

The City of Fort Collins Charter is the governing document that defines the City organization and the powers and functions of the City. The Charter can only be amended by a vote of the people and was first created by a vote in 1954.

Over time, Charter provisions may become obsolete, contradictory, or desired to be changed to address needs, trends, or desires. The City typically has some number of Charter changes, both large and small, on municipal ballots.

Residency Requirements

The Charter currently contains residency requirements for certain positions. Based on position title these requirements include requirements for employees to reside in Fort Collins, within the Growth Management Area (GMA), or within 5 miles of the GMA boundary.

The Ordinance language maintains the City Manager residency requirement in the Charter. Should the measure pass in November, staff will bring Code language that mirrors the Charter requirements for the other positions.

- 1. Ordinance for Consideration

ORDINANCE NO. 103, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
SUBMITTING TO A VOTE OF THE REGISTERED ELECTORS OF THE CITY OF FORT
COLLINS PROPOSED AMENDMENTS TO ARTICLES II AND IV OF THE CITY
CHARTER CONCERNING THE REQUIREMENT THAT CERTAIN EMPLOYEES
LIVE IN OR NEAR FORT COLLINS

WHEREAS, Article IV, Section 8 of the Charter of the City of Fort Collins (the “Charter”) provides that the Charter may be amended as provided by the laws of the State of Colorado; and

WHEREAS, Section 31-2-210, Colorado Revised Statutes, provides that Charter amendments may be initiated by the adoption of an ordinance by the City Council submitting a proposed amendment to a vote of the registered electors of the City of Fort Collins; and

WHEREAS, Article IV, Section 3 of the Charter concerns a residency requirement that applies to directors of City service areas or groups of City service areas, deputy city managers, and assistant city managers and compels such employees to reside within the Fort Collins Urban Growth Area; and

WHEREAS, Article IV, Section 3 of the Charter also concerns a residency requirement that applies to City department heads and compels department heads to live within five miles of the City limits as measured in a prescribed manner;

WHEREAS, the City Council is of the opinion that more flexibility is warranted for the City’s workforce than the current residency requirements allow and that some high level City positions should be required to live within or in close proximity to the City; and

WHEREAS, the proposed Charter amendments do not change and will maintain the City Manager’s obligation to reside in Fort Collins; and

WHEREAS, the City Council is of the opinion that residency requirements that apply to City employees should be established by written agreement with an employee or in the Fort Collins Municipal Code, which would allow for the City Council to set the requirements by ordinance; and

WHEREAS, accordingly, the City Council desires to submit to the Fort Collins electors the Charter amendment below.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That the following proposed changes to Article II, Section 12, and Article IV, Section 3, of the City Charter shall be submitted to the registered electors of the City as “Proposed Charter Amendment _” at the November Election:

ARTICLE II. CITY COUNCIL

...

Section 12. City Clerk.

With the approval of the Council, the City Manager shall appoint a City Clerk who shall act as Clerk of the Council ~~and who while so employed shall be a resident of the Fort Collins Urban Growth Area.~~ The City Clerk shall:

- (1) give notice of Council meetings;
- (2) keep a journal of Council proceedings;
- (3) authenticate by his or her signature and permanently record in full all ordinances and resolutions; and
- (4) perform other duties required by this Charter or by the City Manager.

...

**ARTICLE IV
GENERAL PROVISIONS**

...

Section 3. – Residency requirement

~~Directors of a city service area or a group of city service areas, deputy city managers, and assistant city managers shall reside within the Fort Collins Urban Growth Area during their tenure in office, but need not reside within the Fort Collins Urban Growth Area prior to their appointment. City department heads may live outside the Urban Growth Area during their tenure in office, but only if their places of residence are within five miles of the city limits, as measured by a straight line connecting the parcel of property upon which the residence is situated to the nearest boundary line of the city. City department heads appointed prior to March 6, 1985, shall not be subject to this residency requirement.~~

The City Council may establish any residency requirement that applies to one or more specified City employment position types or by ordinance or by employment agreement for employees reporting directly to the City Council.

...

Section 3. That the following ballot title, with its title and submission clause, is hereby adopted for submitting Proposed Charter Amendment No. __ to the voters at the November Election:

**CITY-INITIATED
PROPOSED CHARTER AMENDMENT NO. ____
(Residency Requirements)**

Shall the Charter of the City of Fort Collins, specifically Article II, Section 12, and Article IV, Section 3, regarding residency requirements, be amended to remove specific requirements that specified City employment position types live in or near Fort Collins, which requirements currently may only be amended by the electorate, and allow the City Council to establish such requirements by ordinance or by employment agreement for employees reporting directly to the City Council?

_____ Yes/For
_____ No/Against

Introduced, considered favorably on first reading and ordered published this 18th day of July, 2023, and to be presented for final passage on the 15th day of August, 2023.

John Duval, Legal

SUBJECT

First Reading of Ordinance No. 104, 2023, Appropriating Unanticipated Revenue from Bond Proceeds from the Issuance of the Series 2023 Electric Utility Enterprise Revenue Bonds for Light and Power, Connexion, and the Art in Public Places Program.

EXECUTIVE SUMMARY

The purpose of this item is to appropriate the funds received from the bond issuance in the Light and Power Fund. These proceeds will be used to fund capital projects needing to occur for both Light and Power and Connexion, as well as for operating funds for Connexion, to pay issuance costs for the Series 2023 Revenue Bonds, and to transfer certain funds required by the Art in Public Places Program (APP Program) for the capital projects.

STAFF RECOMMENDATION

Staff recommends adoption of the Ordinance on First Reading.

BACKGROUND / DISCUSSION

Overview

Both Light and Power and Connexion have additional capital needs in their systems. Staff are bringing forward two ordinances related to the issuance and appropriation of Electric and Telecommunication Enterprise revenue bonds.

Light and Power

Through the continued capital improvement plan, the Light and Power team have identified several areas needing investment. The primary use of the funds will be to build a new electrical substation in the northeast part of town, help with additional costs due to supply chain issues with transformers, and help with additional annexation costs being faced by the utility. The light and power utility will also use some of these funds for additional work involving replacement of parts of the electrical system that need to be addressed throughout the system. In addition, some of the proceeds from the bond issuance might be used in the future, subject to future Council appropriation (but not in this appropriation), to prepay all or a portion of the loan the City received in 2020 from Vectra Bank to fund Light and Power’s EPIC loan program that provides owners of residential property with financing for energy efficiency improvements to their properties.

Connexion

In March 2023, City Council authorized the reimbursement of capital expenditures through the issuance of bonds. Connexion has now exhausted all currently available funds. Staff presented updated financial projections for Connexion at Council's January 10, 2023, work session. In that meeting, the capital project estimate was updated, reflecting a need to access approximately \$16 million additional capital to complete the network build-out and customer ramp-up by the end of 2024. An additional \$3 – \$5 million for excess operating expenses was also estimated to be needed. The maximum aggregate principal amount of the bonds issued for Connexion cannot exceed \$20,365,000.

Structure

The bond issuance and structure are summarized as follows:

- Funding \$63.7M of gross proceeds, of which the City will use:
 - \$40.5M for Light and Power capital project costs (to be appropriated in this Ordinance) and potential payment of bank loan for EPIC program (to be appropriated in the future as needed)
 - \$22.5M for Connexion capital project and other operating costs
 - \$18M for capital projects (to be appropriated in this Ordinance)
 - \$2M for operating costs (to be appropriated in this Ordinance)
 - \$2.5M for contingency (to be appropriated in the future as needed)
 - \$0.7M for issuance costs (to be appropriated in this Ordinance)

CITY FINANCIAL IMPACTS

The principal, interest, maturity, and price are subject to change upon pricing late September within the proposed Bond Ordinance's parameters. The parameters allow for reasonable range of market scenarios in the weeks that elapse between first and second readings and final pricing of the bonds.

Structure

As currently structured, the bonds have a 21-year maturity. Each utility will repay their share of the principal amount being used for their respective projects. The bonds will fund \$66.1M of gross proceeds. Funds will be used as follows:

Sources:	Electric and Broadband Utility Revenue Bonds, Series 2023 (Light and Power)	Electric and Broadband Utility Revenue Bonds, Series 2023 (Connexion)	Total
Bond Proceeds:			
Par Amount	38,190,000.00	20,365,000.00	58,555,000.00
Premium	2,762,510.50	2,427,864.05	5,190,374.55
	<u>40,952,510.50</u>	<u>22,792,864.05</u>	<u>63,745,374.55</u>

Uses:	Electric and Broadband Utility Revenue Bonds, Series 2023 (Light and Power)	Electric and Broadband Utility Revenue Bonds, Series 2023 (Connexion)	Total
Project Fund Deposits:			
Light and Power Project Fund	40,500,000.00		40,500,000.00

	<u>40,500,000.00</u>	<u>22,553,178.38</u>	<u>63,053,178.38</u>
Delivery Date Expenses:			
Cost of Issuance	166,085.50	86,948.17	253,033.67
Underwriter's Discount	286,425.00	152,737.50	439,162.50
	<u>452,510.50</u>	<u>239,685.67</u>	<u>692,196.17</u>
	<u>40,952,510.50</u>	<u>22,792,864.05</u>	<u>63,745,374.55</u>

Debt Service

Debt service costs for Connexion will be deferred for the first 19 years and Connexion will only pay interest during this time. In years 20 and 21, Connexion will pay their share of the principal balance of the outstanding debt. Light and Power will make level debt service payments over the life of the bonds. An amortization table is included below for reference:

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

At the July 6, 2023, meeting, the Council Finance Committee supported proceeding to First Reading for this Ordinance with the full Council.

PUBLIC OUTREACH

Not applicable.

ATTACHMENTS

1. Ordinance for Consideration

ORDINANCE NO. 104, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
APPROPRIATING UNANTICIPATED REVENUE FROM BOND PROCEEDS
FROM THE ISSUANCE OF THE SERIES 2023 ELECTRIC UTILITY ENTERPRISE
REVENUE BONDS FOR LIGHT AND POWER, CONNEXION,
AND THE ART IN PUBLIC PLACES PROGRAM

WHEREAS, both the City’s Light and Power and Connexion have various capital project needs for their systems and Connexion needs additional operating funds; and

WHEREAS, to address these funding needs, the board of the Electric Utility Enterprise has adopted Ordinance No. 015 (“Ordinance No. 015”) authorizing the issuance of the Series 2023 Electric Utility Revenue Bonds (the “Revenue Bonds”); and

WHEREAS, the Revenue Bonds are estimated to be issued for \$66.2 million in total gross proceeds from which: (i) \$40.7 million will be used for Light and Power’s identified capital project needs and possibly for the payment of a bank loan funding the EPIC program, (ii) \$18 million used for Connexion’s identified capital project needs, (iii) \$4.8 million used as a contingency for future Connexion capital projects currently unidentified, (iv) \$2 million used by Connexion for operations, and (v) \$0.7 million used for the issuance costs for Revenue bonds; and

WHEREAS, of these amounts, only the following are being appropriated in this Ordinance: (i) \$40.7 million for Light and Power’s identified capital project needs, (ii) \$18 million for Connexion’s identified project needs, (iii) \$2 million for Connexion operations, and \$0.7 for the issuance costs for the Revenue Bonds; and

WHEREAS, the Light and Power and Connexion identified capital projects involve construction estimated to cost more than \$250,000 and, as such, City Code Section 23-304 requires one percent of these appropriations to be transferred to the Cultural Services and Facilities Fund for a contribution to the Art in Public Places program (“APP Program”), so this Ordinance also transfers and appropriates these required funds for the APP Program; and

WHEREAS, the appropriations in this Ordinance benefit the public health, safety and welfare of the residents of Fort Collins and serve the public purposes of providing the services and benefits being provided to Fort Collins residents by Light and Power, Connexion, and the APP Program; and

WHEREAS, Article V, Section 9 of the City Charter permits the City Council, upon recommendation of the City Manager, to make a supplemental appropriation by ordinance at any time during the fiscal year, provided that the total amount of such supplemental appropriation, in combination with all previous appropriations for that fiscal year, do not exceed the current estimate of actual and anticipated revenues and all other funds to be received during the fiscal year; and

WHEREAS, the City Manager has recommended the appropriation described herein and determined that these appropriations are available and previously unappropriated from the Light and Power Fund and the Broadband Subaccount in the Light and Power Fund (the “Broadband

Fund”), as applicable, and will not cause the total amount appropriated in the Light and Power Fund and the Broadband Fund, as applicable, to exceed the current estimate of actual and anticipated revenues and all other funds to be received in these funds during this fiscal year; and

WHEREAS, contributions to the APP Program by each City utility for art projects is kept and spent in such utility’s own fund, except the utility contributes its share of the APP Program’s costs for maintenance, administration, repair and display to the Cultural Services and Facilities Fund as provided in City Code Section 23-303(c); and

WHEREAS, in accordance with Article V, Section 10 of the City Charter, the appropriation for the capital projects from the Light and Power Fund and the Broadband Fund and the transfer of a portion of those unexpended and unencumbered appropriated funds to the APP Program as provided in City Code Section 23-304(c) will be used for the Light and Power and Connexion purposes, as applicable, and improvements in connection with their capital projects that provide a betterment to Light and Power and Connexion; and

WHEREAS, a portion of the funds appropriated in this Ordinance in the amount of \$2,710,387 for the Projects are ineligible for use in the APP Program due to restrictions placed on them by the source and use of these funds; and

WHEREAS, the amount to be contributed to the APP Program by the Light and Power Fund is therefore \$407,043; and

WHEREAS, 0.5% of the Broadband Fund operating revenue is \$100,495 for 2023; and

WHEREAS, the amount to be contributed to the APP Program in this Ordinance by the Broadband Fund is \$100,495; and

WHEREAS, Article V, Section 11 of the City Charter authorizes the City Council to designate in the ordinance when appropriating funds for a capital project, that such appropriation shall not lapse at the end of the fiscal year in which the appropriation is made, but continue until the completion of the capital project; and

WHEREAS, the City Council wishes to designate the appropriations herein using the proceeds from the issuance of the Revenue Bonds for use on capital projects expended or transferred from the Light and Power Fund and the Broadband Fund, as applicable, as appropriations that shall not lapse until the completion of the projects as such designations are set forth in Sections 2 and 5 below.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That there is hereby appropriated from the proceeds in the Light and Power Fund to be received from the issuance of the Revenue Bonds the sum of FORTY-ONE MILLION ONE HUNDRED SIXTY-NINE THOUSAND NINE HUNDRED THIRTY-TWO DOLLARS (\$40,952,511) to be expended in the Light and Power Fund for capital projects, bond issuance costs, and APP Program transfers as set forth below.

Light and Power Capital Projects (non-lapsing)	\$40,095,000
Art in Public Places (Artwork; non-lapsing)	\$315,900
Art in Public Places Project (transfer to Cultural Services Fund for APP Operations; lapsing)	\$81,000
Art in Public Places Project (transfer to Cultural Services Fund for APP Maintenance; lapsing)	\$8,100
Issuance costs (lapsing)	\$452,511
Total	\$40,952,511

Section 3. That the unexpended and unencumbered appropriated amount of EIGHTY-ONE THOUSAND DOLLARS (\$81,000) in the Light and Power Fund is hereby authorized for transfer to the Cultural Services and Facilities Fund and appropriated and expended therein for the operation costs of the APP Program.

Section 4. That the unexpended and unencumbered appropriated of EIGHT THOUSAND ONE HUNDRED DOLLARS (\$8,100) in the Light and Power Fund is hereby authorized for transfer to the Cultural Services and Facilities Fund and appropriated and expended therein for the maintenance costs of the APP Program.

Section 5. That there is hereby appropriated from the proceeds in the Broadband Fund to be received from the issuance of the Revenue Bonds the sum of TWENTY MILLION TWO HUNDRED NINETY-TWO THOUSAND EIGHT HUNDRED SIXTY-FOUR DOLLARS (\$20,292,864) to be expended in the Broadband Fund for capital projects, operating costs, bond issuance costs, and APP Program transfers as set forth below.

Broadband Capital Projects (non-lapsing)	\$18,000,000
Broadband operating costs (lapsing)	\$1,952,683
Art in Public Places (Artwork; non-lapsing)	\$78,386
Art in Public Places Project (transfer to Cultural Services Fund for APP Operations; lapsing)	\$20,099
Art in Public Places Project (transfer to Cultural Services Fund for APP Maintenance; lapsing)	\$2,010
Issuance costs (lapsing)	\$239,686
Total	\$20,292,864

Section 6. That the unexpended and unencumbered appropriated amount of TWENTY THOUSAND NINETY-NINE DOLLARS (\$20,099) in the Broadband Fund is hereby authorized for transfer to the Cultural Services and Facilities Fund and appropriated and expended therein for the operation costs of the APP Program.

Section 7. That the unexpended and unencumbered appropriated of TWO THOUSAND TEN DOLLARS (\$2,010) in the Broadband Fund is hereby authorized for transfer to the Cultural Services and Facilities Fund and appropriated and expended therein for the maintenance costs of the APP Program.

Section 8. That the appropriations herein from the issuance of the Revenue Bonds to be used on capital projects in the Light and Power Fund and the Broadband Fund, as applicable, are hereby designated, as authorized in Article V, Section 11 of the City Charter, as appropriations that shall not lapse at the end of this fiscal year but continue until the completion of those projects and repayment of the bonds as such designations are indicated in Sections 2 and 5 above.

Introduced, considered favorably on first reading, and ordered published this 15th day of August, 2023, and to be presented for final passage on the 5th day of September, 2023.

SUBJECT

First Reading of Ordinance No. 105, 2023, Appropriating Prior Year Reserves in the General Fund to Continue the Encampment Site Cleanup Pilot Program.

EXECUTIVE SUMMARY

The purpose of this item is to appropriate \$200,000 in additional funds to continue the site cleanup pilot program. In Fall 2022, staff identified a backlog of site cleanups throughout the City and determined that cleanups needed to shift from twice a month to once per week. This was implemented towards the end of January 2023 with the recognition that additional funds would be needed if this pilot program achieved desired results.

STAFF RECOMMENDATION

Staff recommends the adoption of the Ordinance on First Reading.

BACKGROUND / DISCUSSION

Prior to 2019, the City did not have a separate encampment fund. In 2017 and 2018, costs of cleanups came from regular operating budgets for Natural Areas, Parks, Neighborhood Services, and other departments where cleanups were occurring. In Fall 2018, a mid-cycle adjustment was requested for a dedicated fund to utilize in 2019. The joint offer was submitted by Neighborhood Services, Parks, Stormwater, and Natural Areas who provide staffing. Since 2019, a dedicated encampment fund has been utilized though funds expended have varied over the years likely due to the COVID-19 pandemic.

Since Fall 2022, a weekly tactical team of staff from Social Sustainability, Natural Areas, Police Services, Neighborhood Services, Parks Rangers, Transfort, City Attorney's Office and partners such as Poudre Fire Authority and Outreach Fort Collins meet to coordinate encampment cleanup prioritization and identify hot spots.

During these weekly tactical meetings, the growing number of site cleanups became an emergent issue with the turnaround time of when a site is identified to actual cleanup of the site ranging up to 3 months. A

pilot program was implemented in late January 2023 to move towards weekly cleanups with a goal to reduce turnaround time to 30 days.

In April 2023, the turnaround time for cleanups was an average of 12 days. A total of 257 camps had been cleaned with 169 cubic yards of waste, 363 sharps, 77 shopping carts and 15 cubic yards of metal collected and diverted from Natural Areas, Parks, and other locations in the City.

By July 17, 2023, the turnaround time had been further reduced to an average of 8 days. A total of 560 camps have been cleaned with 365 cubic yards of waste, 880 sharps, 119 shopping carts and 27 cubic yards of metal collected and diverted from Natural Areas, Parks, and other locations in the City. If the current pilot program continues, it is on track to divert 100% more trash, 79% more shopping carts and 20% more metal than 2022.

The weekly cleanups are averaging \$6500 per week. The cleanup amount varies each week depending on how debris is collected, especially sharps. In addition to the site cleanups, \$10,000 has been utilized from this fund for a debris boom pilot project at Warren Lake/Larimer Ditch #2 to help mitigate issues. Finally, an additional \$13,888 was utilized for stormwater cleanup due to issues in the Conifer Street area as it related to an inoperable RV.

As of July 2023, approximately \$171,000 have been spent of the original \$110,000 offer. To continue the current pilot program of weekly cleanups as weather and holidays permit, an additional \$200,000 is requested for 2023. Any additional expenses related to site cleanups or encampment issues will also be utilized from this fund, including towing of inoperable RVs or mitigation efforts such as any additional debris boom pilots or the need to secure abandoned buildings.

Homeless Outreach and Proactive Engagement (H.O.P.E)

Sgt. Annie Hill, Fort Collins Police Services, was selected in February 2023 to lead a pilot unit dedicated to homelessness. Since then, the team has expanded to three officers with the hopes of adding a fourth officer in Fall 2023. Twenty-five percent (25%) of the team's time is dedicated towards mitigating environmental impacts such as tagging and accompanying Natural Areas staff on site cleanups. This allows the team to provide direct outreach to people experiencing homelessness (PEH), especially to those that are not regular clients of the Murphy Center, Outreach Fort Collins, or other organizations and encourage them to utilize these resources.

H.O.P.E uses compassionate-based policing to meet PEH in the field, homeless encampments, and nuisance related calls to address not only the complaint but also to connect them to appropriate resources. This relationship building with PEH has allowed the city to get a better understanding of their needs. Other program goals include:

- Collaborate with Outreach Programs, Service Providers, and municipal and county courts to ensure a coordinated and comprehensive response to homelessness.
- Support and assist with maintaining the city landscape and natural areas, by addressing homeless encampments and encouraging unhoused individuals to utilize shelters as needed.
- Provide training and education to police officers and other community members on how to effectively engage with individuals experiencing homelessness.
- Monitor and evaluate program effectiveness: The outreach team will regularly monitor and evaluate the effectiveness of their program, using data to adjust and improve outcomes over time.

Next Steps

Initial goals for 2023 have been accomplished including:

- Reduction of the turnaround time of identifying a site to cleanup from over three months to less than 30 days (8 days as of July 17)
- Addressing community and public safety issues faster and more holistically as a city (ex: working with the Murphy Center to help mitigate daytime camping).
- Supporting safety for Natural Areas and other staff members as they do assessments and cleanups.
- Starting to identify emerging issues to problem solve holistically as a City (ex: Warren Lake debris boom pilot project, addressing inoperable RVs)

For 2024, goals include:

- Maintain the homelessness tactical team
- Assess the frequency needed for cleanups, if it continues to be weekly or a different cadence
- Identify and mitigate hot spots
- Problem solve emergent issues
- Capture data that is missing for PEH who are not connected with OFC or Murphy Center
- Understand root causes of homelessness in our community
- Research alternate shelter options and programs
- Apply for state grants for a case manager for the H.O.P.E and Mental Health Response Team
- Further the relationships with the business and faith communities

It is also important to note that the recent Point In Time numbers were released and have shown an increase from 2022 to 2023. In 2022, there were 263 sheltered and 84 unsheltered individuals. That number has grown in 2023 to 272 sheltered and 120 unsheltered individuals. The issue of homelessness and the prolonged impacts it has on those experiencing homelessness and the community should continue to be addressed with a holistic city and community approach. Staff will be discussing the homelessness response system during the September 12 work session.

CITY FINANCIAL IMPACTS

The amount of \$200,000 will be appropriated from reserves in the General Fund. Neighborhood Services manages the cleanup program.

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

This item was presented to Council Finance Committee (CFC) on May 4, 2023 with a request for \$175,000 and there was support for bringing this item forward for full Council consideration. As more information was collected as to the costs of cleanups, it was determined that \$200,000 was needed rather than \$175,000 as the weekly cleanups cost more than anticipated due to the amount of debris and sharps collected.

In addition, there was support from CFC for bringing forward a request for additional funds for 2024 during the mid-cycle revision process.

PUBLIC OUTREACH

Presentation

ORDINANCE NO. 105, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
APPROPRIATING PRIOR YEAR RESERVES IN THE GENERAL FUND TO CONTINUE
THE ENCAMPMENT SITE CLEANUP PILOT PROGRAM

WHEREAS, prior to 2019, the City did not have a separate encampment fund, rather the costs of cleanups came from regular operating budgets for Natural Areas, Parks, Neighborhood Services, and other departments where cleanups were occurring; and

WHEREAS, in Fall 2018, a mid-cycle adjustment was requested for a dedicated fund to utilize in 2019 with the joint offer being submitted by Neighborhood Services, Parks, Stormwater, and Natural Areas who provide staffing; and

WHEREAS, since 2019, a dedicated encampment fund has been utilized though funds expended, which have varied over the years likely due to the COVID-19 pandemic; and

WHEREAS, the growing number of site cleanups became an emergent issue with the turnaround time of site identification to actual cleanup taking up to 3 months; and

WHEREAS, since Fall 2022, a weekly tactical team of staff from Social Sustainability, Natural Areas, Police Service, Neighborhood Services, Parks Rangers, Transport, the City Attorney’s Office and partners such as Poudre Fire Authority and Outreach Fort Collins meet to coordinate cleanup prioritization and to identify hot spots; and

WHEREAS, the process in coordinating cleanups includes a pre-cleanup stage in which members of the tactical team will tag items in an identified spot for the purpose of determining valuation and providing notice according to Policy 9.0--Lost, Abandoned, Unclaimed or Unattended Tangible Personal Property, adopted by the City Manager and kept on file in the City Clerk’s Office; and

WHEREAS, in January 2023, a pilot program was implemented to move towards weekly cleanups with a goal of reducing turnaround time from up to 3 months to 30 days; and

WHEREAS, in April 2023, the turnaround time for cleanups was lowered to an average of 12 days and by July 17, 2023, the turnaround time had been further reduced to an average of 8 days; and

WHEREAS, to date, a total of 560 camps have been cleaned with 365 cubic yards of waste, 880 sharps, 119 shopping carts and 27 cubic yards of metal collected and diverted from Natural Areas, Parks, and other locations in the City; and

WHEREAS, if the current pilot program continues, it is on track to divert 100% more trash, 79% more shopping carts and 20% more metal than in 2022; and

WHEREAS, in February 2023, the Fort Collins Police Service has created a pilot program, led by Sgt. Annie Hill, called H.O.P.E., which stands for Homeless Outreach and Proactive Engagement; and

WHEREAS, H.O.P.E uses compassionate-based policing to meet people experiencing homelessness (PEH) in the field, homeless encampments, and nuisance-related calls to address not only the complaint but also to connect them to appropriate resources, build relationships with PEH, and to get a better understanding of their needs; and

WHEREAS, twenty-five percent of the H.O.P.E. team’s time is dedicated towards mitigating environmental impacts such as tagging and accompanying Natural Areas staff on site cleanups, which allows the team to provide direct outreach to PEH, especially to those that are not regular clients of the Murphy Center, Outreach Fort Collins, or other organizations and encourage them to utilize these resources; and

WHEREAS, the Point In Time numbers were released and have shown an increase of PEH from 2022 to 2023; and

WHEREAS, in 2022, there were 263 sheltered and 84 unsheltered individuals, which increased in 2023 to 272 sheltered and 120 unsheltered individuals; and

WHEREAS, the issue of homelessness and the prolonged impacts it has on those experiencing homelessness and the community should continue to be addressed with a holistic city and community approach to include the continuation of the site cleanup program; and

WHEREAS, this appropriation benefits the public health, safety and welfare of the residents of Fort Collins and serves the public purpose of continuing the site cleanup pilot program; and

WHEREAS, Article V, Section 9 of the City Charter permits the City Council, upon the recommendation of the City Manager, to make supplemental appropriations by ordinance at any time during the fiscal year such funds for expenditure as may be available from reserves accumulated in prior years, notwithstanding that such reserves were not previously appropriated; and

WHEREAS, the City Manager has recommended the appropriation described herein and determined that this appropriation is available and previously unappropriated from the General Fund and will not cause the total amount appropriated in the General Fund to exceed the current estimate of actual and anticipated revenues and all other funds to be received in this Fund during this fiscal year.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That there is hereby appropriated from prior year reserves in the General Fund the sum of TWO HUNDRED THOUSAND DOLLARS (\$200,000) to be expended in the General Fund to continue the Encampment Site Cleanup Pilot Program.

Introduced, considered favorably on first reading, and ordered published this 15th day of August, 2023, and to be presented for final passage on the 5th day of September, 2023.

AGENDA ITEM SUMMARY

City Council

STAFF

Jill Hueser, Chief Judge
Ingrid Decker, Legal

SUBJECT

First Reading of Ordinance No. 106, 2023, Making Supplemental Appropriations from the 2023 Colorado Opioid Settlement Funds for Use by the Municipal Court.

EXECUTIVE SUMMARY

The purpose of this item is to appropriate \$75,000 of the City’s share of 2023 funds from the Colorado Opioid Settlement to be used in the remainder of 2023 to work towards establishing a municipal drug court program for persons with opioid use disorder and co-occurring substance use or mental health issues. This is a permitted use for these funds under the Colorado Opioid Settlement Memorandum of Understanding (“MOU”) between the City and the State of Colorado.

STAFF RECOMMENDATION

Staff recommends adoption of the Ordinance on First Reading.

BACKGROUND / DISCUSSION

Over the last several years local and state governments across the nation, including in Colorado, filed lawsuits against opioid manufacturers, distributors, and pharmacies for creating the opioid epidemic. The parties to various opioid lawsuits have been negotiating settlement agreements to resolve the litigation.

The City is participating in the Colorado opioids settlement through a 2021 Memorandum of Understanding with the State, and a 2022 IGA with Larimer County and other local municipalities that created the Larimer Regional Opioid Council – a body that determines the distribution of funds in Larimer County.

The Municipal Court is working to establish a local drug court program to provide evidence-based problem-solving court practices to individuals with substance use disorders. The City has received its first payment of settlement funds in the amount of \$106,672 for 2023 and wishes to put \$75,000 of these funds towards that program. Providing certain services to and addressing the needs of criminal-justice-involved persons with opioid use disorder and co-occurring substance use or mental health issues is a permitted use of opioid settlement funds under the MOU. These funds would allow the hiring of a probation officer and work towards forming a cooperative team that would include Fort Collins Police Services, treatment providers, prosecution and defense attorneys, and other community resources.

CITY FINANCIAL IMPACTS

The settlement amount received in the General Fund for 2023 is \$106,672. These funds may only be used for specific types of programs and this appropriation would not impact the General Fund.

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

The Council Finance Committee supported this appropriation at their July 6, 2023, meeting.

PUBLIC OUTREACH

None.

- 1. Ordinance for Consideration

ORDINANCE NO. 106, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
MAKING SUPPLEMENTAL APPROPRIATIONS FROM THE 2023 COLORADO
OPIOID SETTLEMENT FUNDS FOR USE BY THE MUNICIPAL COURT

WHEREAS, communities throughout Colorado, including the City of Fort Collins, are suffering from an epidemic of opioid addiction; and

WHEREAS, local and state governments across the nation, including in Colorado, filed lawsuits against opioid manufacturers, distributors, and pharmacies for creating the opioid epidemic; and

WHEREAS, over the last several years the parties to various opioid lawsuits have been negotiating settlement agreements to resolve the litigation; and

WHEREAS, on December 7, 2021, the City Council adopted Resolution 2021-113 approving the City’s participation in the Colorado opioids settlement and authorizing execution of: (a) a Memorandum of Understanding (“MOU”) with the State of Colorado governing the City’s participation in the Colorado opioid settlement and allocation of opioid settlement funds in Colorado, and (b) related releases of legal claims against certain opioid industry defendants; and

WHEREAS, a significant portion of the opioid settlement funds are being distributed to 18 designated regions in the state, including the Larimer County Region; and

WHEREAS, on May 3, 2022, the City Council adopted Resolution 2022-055, authorizing execution of an Intergovernmental Agreement between the City, Larimer County, the City of Loveland and the Town of Wellington to establish the Larimer Regional Opioid Council, which will determine the distribution of the regional funds (the “Regional IGA”); and

WHEREAS, the Regional IGA was signed and went into effect on June 7, 2022, and was amended earlier this year to add the Town of Estes Park to the Regional Council, pursuant to City Council Resolution 2023-011, adopted January 17, 2023; and

WHEREAS, on March 21, 2023, the City Council adopted Resolution 2023-028, authorizing settlements and waivers with five additional opioid defendants; and

WHEREAS, the City has received its first payment of settlement funds in the amount of \$106,672 for 2023; and

WHEREAS, the Fort Collins Municipal Court has asked to appropriate \$75,000 of the settlement funds to use in 2023 to help establish a municipal drug court program that would provide evidence based problem-solving court practices to individuals with opioid use disorders and any co-occurring substance use disorders; and

WHEREAS, programs to address the needs of criminal-justice-involved persons with opioid use disorder and any co-occurring substance use disorders or mental health issues are an approved use of settlement funds under the MOU; and

WHEREAS, this appropriation benefits the public health, safety and welfare of the residents of Fort Collins and serves the public purpose of addressing the criminal justice consequences of substance use in the community; and

WHEREAS, Article V, Section 9 of the City Charter permits the City Council, upon recommendation of the City Manager, to make a supplemental appropriation by ordinance at any time during the fiscal year, provided that the total amount of such supplemental appropriation, in combination with all previous appropriations for that fiscal year, do not exceed the current estimate of actual and anticipated revenues and all other funds to be received during the fiscal year; and

WHEREAS, the City Manager has recommended the appropriation described herein and determined that this appropriation is available and previously unappropriated from the General Fund and will not cause the total amount appropriated in the General Fund to exceed the current estimate of actual and anticipated revenues and all other funds to be received in this Fund during this fiscal year; and

WHEREAS, the Council Finance Committee supported this appropriation at its July 6, 2023 meeting.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That there is hereby appropriated from new revenue or other funds in the General Fund the sum of SEVENTY-FIVE THOUSAND DOLLARS (\$75,000) to be expended in the General Fund for use by Municipal Court for the drug court program.

Introduced, considered favorably on first reading, and ordered published this 15th day of August, 2023, and to be presented for final passage on the 5th day of September, 2023.

AGENDA ITEM SUMMARY

City Council

STAFF

Derek Bergsten, Poudre Fire Authority Fire Chief
Kirsten Howard, Poudre Fire Authority Budget and Administration Manager
John Duval, Legal

SUBJECT

First Reading of Ordinance No. 107, 2023, Appropriating Prior Year Reserves Designated for Fire Protection Services in the Fire Protection Capital Expansion Fee Account within the Capital Expansion Fee Fund for Payment to the Poudre Fire Authority to be Used by it for a New Headquarters Building.

EXECUTIVE SUMMARY

The purpose of this item is to appropriate funds from the reserves in the Fire Protection Capital Expansion Fee Account within the City’s Capital Expansion Fee Fund (“CEF Fund”) and payment of those funds to the Poudre Fire Authority (“PFA”) for its purchase of a new Headquarters Building.

STAFF RECOMMENDATION

Staff recommends adoption of the Ordinance on First Reading.

BACKGROUND / DISCUSSION

Replacement or expansion of the PFA Administrative Building (102 Remington Street) has been included in PFA’s Long-Range Financial Plan since 2016 and has been on the unfunded priorities list within PFA budget documents since 2014. PFA staff have been in discussions with the PFA Board over the past year regarding additional space via a rental option at a separate location that required a lease of several years prior to purchase as well as tenant finish expenses, and the most recent option to purchase a new facility to house all PFA administrative and support staff.

PFA staff have been working on options for additional administrative office space with City Real Estate Services, and the property at 301 Remington Street meets the criteria for PFA needs. The Property is three times the size of the current Administration Building and will provide sufficient space for PFA Administrative and Support staff for the foreseeable future. The property is in Old Town on the southwest corner of East Olive and Remington Streets, near PFA’s current location and convenient for collaboration with City and County partners. The building features on-site parking (34 spaces), an outside courtyard, generator, computer server room, kitchen and eating area, one garage bay, several conference rooms, entry vestibule, and plenty of space for current and future PFA staff. An offer of \$3.8 million has been made by PFA staff and tentatively accepted by the seller.

CITY FINANCIAL IMPACTS

City Code Section 7.5-30(a) requires that capital expansion fees for fire protection services be used only for capital improvements related to the provision of fire services, as such improvements may be identified in the capital improvements plan for fire protection services.

The City Manager is recommending this appropriation and has determined that the funds for it are available in and previously unappropriated from the CEF Fund and this appropriation will not cause the total amount appropriated in the CEF Fund to exceed the current estimate of unappropriated prior year reserves plus the actual and anticipated revenues and all other funds to be received in the CEF Fund during this fiscal year.

The amount of \$3,511,575 will be appropriated from reserves in the CEF Fund to be paid to PFA.

1. Ordinance for Consideration.

ORDINANCE NO. 107, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
APPROPRIATING PRIOR YEAR RESERVES DESIGNATED FOR
FIRE PROTECTION SERVICES IN THE FIRE PROTECTION CAPITAL EXPANSION FEE
ACCOUNT WITHIN THE CAPITAL EXPANSION FEE FUND FOR PAYMENT TO THE
POUDRE FIRE AUTHORITY TO BE USED BY IT FOR A
NEW HEADQUARTERS BUILDING

WHEREAS, Article II of City Code Chapter 7.5 imposes, as an impact fee on new development, capital expansion fees for community parkland, police, fire protection, general government, and transportation; and

WHEREAS, the fire protection capital expansion fee is imposed in City Code Section 7.5-30(a) (“Fire Protection CEF”) and the revenues collected from it are required to be used to fund capital improvements related to the provision of fire services, as such improvements may be identified in the capital improvements plan for fire protection services; and

WHEREAS, such “capital improvements” are defined in Code Section 7.5-17 to include “the purchase or long-term lease or lease-purchase of real property”; and

WHEREAS, Code Section 7.5-30(b) requires that all revenues collected from the Fire Protection CEF be deposited in the Fire Protection Capital Expansion Fee Account established in Code Section 8-97 (“Fire Protection CEF Account”); and

WHEREAS, Code Section 8-97 provides that the Fire Protection CEF Account is an account within the Capital Expansion Fee Fund established in Code Section 8-92 (“CEF Fund”); and

WHEREAS, the current administrative headquarters of the Poudre Fire Authority (the “Authority”) is located at 102 Remington Street, and it houses Fire Prevention and Community Risk Reduction as well as Operations and the administrative personnel of the Authority whose duties include the management and coordination of public education and emergency services; and

WHEREAS, acquiring additional space or a new, larger building to house the Authority’s administrative headquarters has been a priority for the Authority since 2014 due to shortages of space in meeting both current and future needs at the 102 Remington facility and is included in the Authority’s 2023 PFA Long-Range Financial Plan, adopted by the Authority’s Board of Directors; and

WHEREAS, City Code Section 7.5-30(a) requires that capital expansion fees for fire services be used only for capital improvements related to the provision of fire services, as such improvements may be identified in the capital improvements plan for fire protection services; and

WHEREAS, the Authority’s staff has been working with the City’s Real Estate Services on options to acquire additional office space and has identified the property and building at 301 Remington Street (the “New Facility”) and the Authority has made an offer to its owner to purchase it for \$3.8 million, which offer the owner has tentatively accepted; and

WHEREAS, the funding for this purchase of the New Facility is proposed to be provided from the following sources:

City’s CEF Fund	\$3,511,575
Poudre Fire Authority Existing Appropriations	<u>288,425</u>
Total	\$3,800,000

WHEREAS, Article V, Section 9 of the City Charter permits the City Council to make supplemental appropriations by ordinance at any time during the fiscal year such funds for expenditure as may be available from reserves accumulated in prior years, notwithstanding that such reserves were not previously appropriated; and

WHEREAS, the City Manager has recommended this appropriation and determined that the funds for it are available in and previously unappropriated from the Fire Protection CEF Account in the CEF Fund and will not cause the total amount appropriated in the CEF Fund to exceed the current estimate of unappropriated prior year reserves plus actual and anticipated revenues and all other funds to be received in the CEF Fund during this fiscal year.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That there is hereby appropriated from prior year reserves in the Fire Protection CEF Account in the CEF Fund, the sum of THREE MILLION FIVE HUNDRED ELEVEN THOUSAND FIVE HUNDRED SEVENTY-FIVE DOLLARS (\$3,511,575), to be expended from the CEF Fund for payment to the Authority for it to use in its purchase of the New Facility.

Introduced, considered favorably on first reading, and ordered published this 15th day of August, 2023, and to be presented for final passage on the 5th day of September, 2023.

SUBJECT

First Reading of Ordinance No. 108, 2023, Appropriating Prior Year Reserves in the General Fund for the Purchase of Police Radios.

EXECUTIVE SUMMARY

The purpose of this item is to request an appropriation in the amount of \$620,000 for the purchase of police handheld radios and approve the use of prior year reserves in the General Fund. There are currently 242 total handheld radios with 130 replaced in 2022. This leaves the remaining 112 radios needing to be replaced.

STAFF RECOMMENDATION

Staff recommends adoption of the Ordinance on First Reading.

BACKGROUND / DISCUSSION

Police Services rely heavily on radio communication as their primary means for transmitting critical information to and between emergency responders. These devices allow field responders to receive and communicate not only life-saving information, but the information required to maintain the safety of the community, their partners, and their own personal safety. The ability to transmit information regarding an in-progress call or evolving situation is critical for responding personnel.

Having a supported and updated radio is critical to ensuring officer safety. Police Services utilizes the public safety emergency radio system on a continuous basis to communicate and receive updates from the 911 Center, convey information to other responders, and/or direct incoming resources for an incident. The current radio devices include handheld radios, mobile/vehicle radios, and dispatch radios. Currently, the handheld radios are in need of replacement.

Police Services utilizes Motorola radios, and the manufacturer has phased out the old APX AN model for the new APX BN model. Motorola will no longer support the old model in December of 2023. These radios will still function, but replacement parts will no longer be produced. Police Services has done well in extending the life of all radio equipment, with industry standards suggesting replacing handheld radios every 5-7 years. The remaining old Police Services handheld radios were purchased in 2013 and are 10 years old, beyond the suggested use standards. Out of the total 242 handheld radios, 130 radios were replaced with the newer BN model in 2022, leaving 112 still in need of replacement in 2023.

The cost to replace the remaining 112 radios is \$620,000 which equates to roughly \$5,500 per radio. The Manufactured Suggested Retail Price (MSRP) is \$7,500 and is reduced to \$5,500 when applying National Association of State Procurement Officials (NASPO) discount. If approved, the next step would be to order and replace the remaining radios in 2023.

CITY FINANCIAL IMPACTS

The requested funds (\$620,000) were held in assigned reserves within the General Fund last year in anticipation of this purchase.

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

Not applicable.

PUBLIC OUTREACH

None.

ORDINANCE NO. 108, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
APPROPRIATING PRIOR YEAR RESERVES IN THE GENERAL FUND FOR THE
PURCHASE OF POLICE RADIOS

WHEREAS, Police Services utilizes the public safety emergency radio system on a continuous basis to communicate and receive updates from the 911 Center, convey information to other responders, and/or direct incoming resources for an incident; and

WHEREAS, Police Services rely heavily on radio communication as their primary means for transmitting critical information to and between emergency responders and these devices allow field responders to receive and communicate not only life-saving information, but the information required to maintain the safety of the community, their partners, and their own personal safety; and

WHEREAS, the ability to transmit information regarding an in-progress call or evolving situation is critical for responding personnel and having a supported and updated radio is critical to ensuring officer safety; and

WHEREAS, the current radio devices include handheld radios, mobile/vehicle radios, and dispatch radios and the handheld radios need to be replaced; and

WHEREAS, Police Services utilizes Motorola radios, and the manufacturer has phased out the old model and will no longer support the old model starting in December of 2023 and although these radios will still function, replacement parts will no longer be produced; and

WHEREAS, although Police Services has done well in extending the life of all radio equipment, with industry standards suggesting replacing handheld radios every 5-7 years. The remaining old Police Services handheld radios were purchased in 2013 and are 10 years old, beyond the suggested use standards; and

WHEREAS, out of the total 242 handheld radios, 130 radios were replaced with the newer model in 2022, leaving 112 still needing to be replaced in 2023, the cost to replace the remaining 112 radios is \$620,000; and

WHEREAS, this appropriation benefits the public health, safety and welfare of the residents of Fort Collins and serves the public purpose of updating police radio equipment which is essential for the safety and function of Police Services; and

WHEREAS, Article V, Section 9 of the City Charter permits the City Council, upon the recommendation of the City Manager, to make supplemental appropriations by ordinance at any time during the fiscal year such funds for expenditure as may be available from reserves accumulated in prior years, notwithstanding that such reserves were not previously appropriated; and

WHEREAS, the City Manager has recommended the appropriation described herein and determined that this appropriation is available and previously unappropriated from the General

Fund and will not cause the total amount appropriated in the General Fund to exceed the current estimate of actual and anticipated revenues and all other funds to be received in this Fund during this fiscal year.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That there is hereby appropriated from prior year reserves in the General Fund the sum of SIX HUNDRED TWENTY THOUSAND DOLLARS (\$620,000) to be expended in the General Fund for the purchase of Police radios.

Introduced, considered favorably on first reading, and ordered published this 15th day of August, 2023, and to be presented for final passage on the 5th day of September, 2023.

AGENDA ITEM SUMMARY

City Council

STAFF

Perrie McMillen, Sr. Supervisor, Neighborhood Services
Aaron Guin, Legal

SUBJECT

First Reading of Ordinance No. 109, 2023, Making a Supplemental Appropriation from the Colorado Division of Criminal Justice of Unanticipated Grant Revenue for Various Restorative Justice Services Programs.

EXECUTIVE SUMMARY

The purpose of this item is to appropriate grant revenue to fund Restorative Justice Services within Community Development and Neighborhood Services. A grant in the amount of \$57,356 has been awarded from the Colorado Division of Criminal Justice (DCJ) Juvenile Diversion Fund for the continued operation of Restorative Justice Services, which includes the RESTORE program for shoplifting offenses, and the Restorative Justice Conferencing Program (RJCP) and Reflect Program for all other offenses. No match is required and the grant period is July 1, 2023, to June 30, 2024.

STAFF RECOMMENDATION

Staff recommends adoption of the Ordinance on First Reading.

BACKGROUND / DISCUSSION

Restorative Justice Services has been partially grant-funded since its inception in 2000. Annually, the City accepts grant funds from DCJ to support Restorative Justice Services' three programs: RESTORE, RJCP, and the Reflect Program, which assist youth referred to the program from the 8th Judicial District Attorney's Office. Since it began, Restorative Justice Services has provided restorative justice alternatives to more than 3,200 young people who have committed chargeable offenses in our community.

Restorative Justice is an alternative method of holding a young offender accountable by facilitating a meeting with the offender, the victim/victim representative, and members of the community to determine the harm done by the crime, and how to address and repair the harm. By identifying and seeking to repair the harm caused by the crime, Criminal Justice Officials are optimistic that repeat offenses by youth will be reduced and the needs and concerns of the victims and affected community will be addressed.

These programs help young people understand how family, friends, victims, and the community are harmed by their actions, and hold them accountable for the harm they caused. The intention is that these young people will make better future decisions and not commit the same or similar crime again. Reducing future criminal behavior and keeping young people out of the justice system, both contribute positively to a safer and healthier community. Addressing the needs and concerns of victims and community members also has a positive effect on the overall health and safety of the community. As part of the programs, youth and

Item 16.

families are referred to appropriate community resources based on needs identified during program participation.

Without grant funding and the support of the City, Restorative Justice Services would not be able to provide this service to young people and their families, victims, the courts, law enforcement and our community.

CITY FINANCIAL IMPACTS

The grant for 2023-2024 in the amount of \$57,356 from DCJ Juvenile Diversion funds provides funding for personnel to support the continuation of Restorative Justice Services. Funds are distributed to the City on a reimbursement basis.

ORDINANCE NO. 109, 2023
OF THE COUNCIL OF THE CITY OF FORT COLLINS
MAKING A SUPPLEMENTAL APPROPRIATION FROM THE
COLORADO DIVISION OF CRIMINAL JUSTICE OF UNANTICIPATED GRANT
REVENUE FOR VARIOUS RESTORATIVE JUSTICE SERVICES PROGRAMS

WHEREAS, Restorative Justice Services (“RJS”) is a division within the Neighborhood Services department that operates three programs: RESTORE for shoplifting offenses, and the Restorative Justice Conferencing Program and the Reflect Program for all other offenses; and

WHEREAS, RJS programs hold young offenders accountable by helping understand how family, friends, victims, and the community are harmed by their actions, and seek to hold offenders accountable for the harm they caused, to help them make better decisions in the future; and

WHEREAS, since its inception, Restorative Justice Services has provided restorative justice alternatives to more than 3,200 young people who have committed chargeable offenses in our community; and

WHEREAS, Restorative Justice Services has been partially grant-funded since its inception in 2000, and the City has accepted grant funds on an annual basis from the Colorado Division of Criminal Justice (DCJ) to support Restorative Justice Services programs; and

WHEREAS, a grant in the amount of \$57,356 has been awarded to Restorative Justice Services from DCJ’s Juvenile Diversion fund for the continued operation of Restorative Justice Services; and

WHEREAS, the grant period is from July 1, 2023, to June 30, 2024, and no local match from the City is required; and

WHEREAS, this grant helps fund Restorative Justice Services programs to assist youth referred to the program from the 8th Judicial District Attorney’s Office; and

WHEREAS, this appropriation benefits the public health, safety and welfare of the residents of Fort Collins and serves the public purpose of providing restorative justice alternatives to youth in an effort to reduce recidivism and build a safer and healthier community; and

WHEREAS, Article V, Section 9 of the City Charter permits the City Council, upon recommendation of the City Manager, to make a supplemental appropriation by ordinance at any time during the fiscal year, provided that the total amount of such supplemental appropriation, in combination with all previous appropriations for that fiscal year, do not exceed the current estimate of actual and anticipated revenues and all other funds to be received during the fiscal year; and

WHEREAS, the City Manager has recommended the appropriation described herein and determined that this appropriation is available and previously unappropriated from the General Fund and will not cause the total amount appropriated in the General Fund to exceed the current

estimate of actual and anticipated revenues and all other funds to be received in this Fund during this fiscal year; and

WHEREAS, Article V, Section 11 of the City Charter authorizes the City Council to designate in the ordinance when appropriating funds for a federal, state or private grant, that such appropriation shall not lapse at the end of the fiscal year in which the appropriation is made, but continue until the earlier of the expiration of the federal, state or private grant or the City's expenditure of all funds received from such grant or donation; and

WHEREAS, the City Council wishes to designate the appropriation herein from the Colorado Division of Criminal Justice as an appropriation that shall not lapse until the earlier of the expiration of the grant or the City's expenditure of all funds received from such grant.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That there is hereby appropriated from new revenue or other funds in the General Fund the sum of FIFTY-SEVEN THOUSAND THREE HUNDRED FIFTY-SIX DOLLARS (\$57,356) to be expended in the General Fund for various Restorative Justice Programs.

Section 3. That the appropriation herein from the Colorado Division of Criminal Justice is hereby designated, as authorized in Article V, Section 11 of the City Charter, as an appropriation that shall not lapse at the end of this fiscal year but continue until the earlier of the expiration of the grant or the City's expenditure of all funds received from such grant.

Introduced, considered favorably on first reading, and ordered published this 15th day of August, 2023, and to be presented for final passage on the 5th day of September, 2023.

AGENDA ITEM SUMMARY

City Council

STAFF

Ellen Martin, Visual Arts Administrator
Ted Hewitt, Legal

SUBJECT

Resolution 2023-070 Approving Expenditures from the Art in Public Places Light & Power, Wastewater, Stormwater and Water Utility Accounts to Commission an Artist to Create Art for the City’s Utilities.

EXECUTIVE SUMMARY

The purpose of this item is to approve expenditures from the Art in Public Places (APP) Light & Power, Wastewater, Stormwater and Water Utility Accounts to commission an artist to create art for the City’s Inaugural Utilities Artist-in-Residence Project. The expenditures of \$50,000 will be for design development, materials, fabrication, delivery, mural installation, signage, additional illustration work, and contingency for Allie Ogg to create the artworks for the Artist in Residence Project.

STAFF RECOMMENDATION

Staff recommends adoption of the Resolution.

BACKGROUND / DISCUSSION

Section 23-303 of the Code, which was added in 1995, established the APP Reserve Account, and designated it for use in acquiring or leasing works of art, maintenance, repair or display of works of art, and administrative expenses related to the APP Program, in accordance with the APP Guidelines adopted by the City Council by Ordinance No. 020, 1995. In 2012, City Council permanently adopted the APP Program, and reenacted City Code Chapter 23, Article IX, with certain modifications.

The City APP Program along with the City Utilities Department selected artist Allie Ogg for its inaugural Public Artist-in-Residence Project through a request for qualifications (RFQ) application process. Allie is a local fulltime artist and illustrator. The project demonstrates how artists offer unique and innovative perspectives on telling the story of our Utilities Department.

At the start of the residency, artist Allie Ogg met with key Utilities staff, toured Utility facilities and sites to learn about the work and needs of the City’s Utilities Department. The artist identified key messages from each Utility. Allie used this information to develop the proposed digital imagery package that offers multiple options for the Utility Project Team to consider as they decide final product/outcomes for the residency.

The digital elements of the package can be manipulated and used interchangeably throughout the various Utilities and therefore be able to grow with departmental needs.

Allie Ogg proposes a digital imagery package with four Utility Story Panels depicting Light & Power, Wastewater, Stormwater, and Water and a painted mural of the same. Once approved, the artist will work with Utilities on projects they select. Additional work by the artist could include the creation of illustrations for each department, pop-up banners, spot illustrations, posters, newsletter templates, blog/social media templates, merchandise designs, and Utility icons.

This proposed project was reviewed and recommended by the Project Team and recommended for City Council approval by the APP Board at the Board's July 19, 2023, regular meeting.

CITY FINANCIAL IMPACTS

The funds for this item have been appropriated in the APP Light & Power, Stormwater, Wastewater, and Water Utility Account. The APP program also has available appropriated maintenance funds for the long-term care of the subject artwork and the rest of the APP art collection.

The Artist-in-Residence art budget is \$50,000 to be used for design development, materials, fabrication, delivery, mural installation, signage, additional illustration work, and contingency for these multiple artworks.

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

The proposed budget and budget for the art project was reviewed and recommended for City Council approval by the APP Board at the July 19, 2023, regular board meeting.

PUBLIC OUTREACH

The selected artist collaborates with the project team to develop concepts for the artwork based on the goals of the project and input from the team. The project and budget are reviewed and approved by the project team and the APP Board then recommends the project to Council for approval.

The APP Program promotes the project in development, fabrication, installation, and completion of the artwork on social media, website, and newsletters.

OF THE COUNCIL OF THE CITY OF FORT COLLINS
APPROVING EXPENDITURES FROM THE ART IN PUBLIC PLACES LIGHT & POWER,
WASTEWATER, STORMWATER AND WATER UTILITY ACCOUNTS TO COMMISSION
AN ARTIST TO CREATE ART FOR THE CITY’S UTILITIES

WHEREAS, pursuant to Sections 23-303 and 23-304 of the City Code, one percent of construction project funding is set aside for use in the acquisition and installation of works of art in accordance with the Art in Public Places Guidelines adopted by the City Council in Ordinance No. 047, 1998 (the “Guidelines”); and

WHEREAS, funding contributions to Art in Public Places for each City Utility are to be kept and spent in such Utility’s own fund for the betterment of such utility or as otherwise determined by the City Council for a specific utility purpose; and

WHEREAS, Artist Allie Ogg was selected from a Request for Qualifications process to develop art for several City Utilities, including for a digital imagery package and a mural, along with additional artistic works (the “Art Project”); and

WHEREAS, the Art in Public Places Board (the “Board”) approved the design concept and budget for the Art Project and recommended City Council approval of the same at the Board’s July 19, 2023, regular meeting; and

WHEREAS, the budget for the Art Project is \$50,000, which is to be used for design development, materials, fabrication, delivery, mural installation, signage, additional illustration work, and contingency for these multiple artworks; and

WHEREAS, funds sufficient for the Art Project have been appropriated in the Art in Public Places Light & Power, Wastewater, Stormwater, and Water Utility Accounts; and

WHEREAS, City Code Section 23-308 requires that the Board’s recommendation concerning the use of funds for the Art Project be presented for City Council review and approval as the cost of the Art Project exceeds \$30,000.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals above.

Section 2. That the City Council hereby approves of the Art Project described herein, the design for which was reviewed and approved by the Art in Public Places Board on July 19, 2023, and the use of previously appropriated funds in an amount not to exceed FIFTY THOUSAND DOLLARS (\$50,000) from the Art in Public Places Light & Power, Wastewater, Stormwater and Water Utility Accounts for the Art Project.

Passed and adopted at a regular meeting of the Council of the City of Fort Collins this 15th day of August, 2023.

Stormwater Breakout Sketch Examples

Residency illustration work by Allie Ogg

The City of Fort Collins, Colorado, Art in Public Places Program (APP) along with the City of Fort Collins Utilities Department selected artist **Allie Ogg** for its inaugural Artist-in-Residence Project.

The primary goal of this project is to have the artist collaborate with the City of Fort Collins Utilities Department to develop tools and outcomes to help communicate the departmental mission and the vital yet often overlooked essential services that Utilities Department performs 24/7, 365 days a year.

Allie Ogg was selected as the Artist-In-Residence through an APP RFQ and application process. She is a local fulltime artist and illustrator. This project demonstrates how artists offer unique, innovative, and powerful perspectives on telling the story of our Utilities Department.

ART IN PUBLIC PLACES

At the start of the Residency, artist Allie Ogg met with key Utilities Staff, APP Project Managers, and toured sites to learn about the work and needs of the City’s Utilities Department (Water, Wastewater, Stormwater, Light & Power).

This approach ensured that the program outcomes reflect the artist’s unique talents and will further the program goal to foster greater connectivity and understanding between the Utilities Department, its services, and the greater Fort Collins community.

The artist identified key messages from each Utility. Allie used this information to developed the proposed digital imagery package that offers multiple options for the Utility Project Team to consider as they decide final product/outcomes for the residency. The digital elements of the package can be manipulated and used interchangeably throughout the various Utilities and therefore be able to grow with departmental needs. Additional work by the artist could be to create designs for illustrations for each department, pop-up banners, spot illustrations, posters, newsletter templates, blog/social media templates, merchandise designs, Utility icons, etc.

4. **PUBLIC PARTICIPATION**
5. **APPROVAL OF MINUTES**

Ms. Martin confirmed with City Clerks office that board members can vote on Minutes for meetings they didn't attend.

Ms. Powers moved to approve the May 10 and June 21 Minutes.
Ms. Sherman seconded.
Unanimously approved
6. **NEW BUSINESS**
 - a) **ARTIST-IN-RESIDENCE PRESENTATION**

Artist Allie Ogg, and Utilities Staff (Kellie Gorman with public engagement and executive sponsor Gretchen Stanford who is Deputy Director of Utilities) were in attendance to present the project. Allie spent the start of her residency learning about the Fort Collins Utilities with a goal of showing the community the work Utilities does 24/7 365 days a year. She has developed a four-panel illustration with an interconnected panel for each utility—Water, Wastewater, Stormwater, Light & Power. The illustration creates a digital package to be used ongoing. Its imagery can show the whole Utility ecosystem or pieces of the image can be pulled to show specific Utility functions. Allie is also proposing a painted mural of the four-panel Utility story on a to be determined building downtown as part of the project. The Utilities project team shared how the Utilities staff at large took pride the project and are excited to be shown in the illustration. The team sees

AGENDA ITEM SUMMARY

City Council

STAFF

Brian Hudson, Deputy Director, Broadband
Gerry Paul, Purchasing Director
Cyril Videgar, Legal

SUBJECT

Resolution 2023-071 Approving an Exception to the Competitive Purchasing Process for the Purpose of Renewing the Contract with Nokia of America for Broadband Equipment, Software, Firmware, and Support Services.

EXECUTIVE SUMMARY

The current Supply and Services Agreement between the City of Fort Collins and Nokia of America Corporation (Nokia) for equipment, software, and firmware necessary to operate Fort Collins Connexion (Connexion) services expires in August 2023.

Connexion's network is built with hardware and software originally provided by Nokia and is an integral part of Connexion's high level of service. Although there may be other viable partners to provide similar hardware, software, and services, transiting from the current Nokia solution would be a multi-year resource intensive project that would be very disruptive to Connexion customers.

Based on the alignment of Nokia's goods and services with the operating requirements of Connexion, the Purchasing Agent has recommended an exception to the City's competitive purchasing process to continue the relationship with Nokia under a new agreement for up to five additional years.

STAFF RECOMMENDATION

Staff recommends adoption of the Resolution.

BACKGROUND / DISCUSSION

Connexion went through a rigorous competitive purchasing selection process in 2017/2018 to determine the provider for equipment, software, firmware, and support services for both core networking components and customer premise equipment on the Connexion network. Nokia was selected as this service provider and, since the initial launch of Connexion, Nokia goods and services have been integral to Connexion's success.

Nokia is considered a market leader in core and passive optical network products, which are used daily in Connexion operations.

Moving away from Nokia products would be a resource intensive, multi-year project and would be very disruptive to Connexion customers and existing Intergovernmental Agreement (IGA) partners (Loveland

...urse and Estes Park Trailblazer) through which the City contributes to a centralized regional broadband network operations center.

City Code Section 8-161(d)(4) authorizes the Purchasing Agent to grant a sole source exception, to allow for negotiating the additional purchase of specialized goods or services for up to a total of five (5) years, which in this instance include hardware, software, firmware, and support services from Nokia necessary for continuity in operating the Connexion network.

The proposed exception to the use of the competitive bid or proposal conforms with the requirements of City Code Section 8-161(d), which directs that the City Council is to approve exceptions greater than \$200,000 that meet specific criteria evaluated by the Purchasing Agent.

The Purchasing Agent has found all necessary elements of the Purchasing Code are met for an exception to the City competitive bidding or proposal process in this instance.

CITY FINANCIAL IMPACTS

The provision of Nokia equipment, software, firmware, and support services is funded by appropriations approved in the FY2023/2024 budget. Transitioning Connexion support operations to an alternative provider of network equipment and services would likely result in a substantially higher cost and negative financial impact to Connexion.

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

Not applicable.

PUBLIC OUTREACH

Not applicable.

ATTACHMENTS

1. Resolution for Consideration

RESOLUTION 2023-071
OF THE COUNCIL OF THE CITY OF FORT COLLINS
APPROVING AN EXCEPTION TO THE COMPETITIVE PURCHASING PROCESS
FOR THE PURPOSE OF RENEWING THE CONTRACT WITH NOKIA OF AMERICA FOR
BROADBAND EQUIPMENT, SOFTWARE, FIRMWARE, AND SUPPORT SERVICES

WHEREAS, Section 8-161(d)(1)b. of the City Code authorizes the Purchasing Agent to negotiate the purchase of supplies and services without utilizing a competitive bidding or proposal process where the Purchasing Agent determines that although there is more than one source, the competitive process cannot reasonably be used, or if used, will result in a substantially higher cost to the City, will otherwise injure the City's financial interests or will substantially impede the City's administrative functions or the delivery of services to the public; and

WHEREAS, in 2018, the City used a competitive process to select Nokia of America Corporation (“Nokia”) as the City's provider of broadband signal routing equipment and support services (the “Services”), and entered into a Supply and Services agreement with Nokia to support delivery of Fort Collins Connexion (“Connexion”) telecommunication services; and

WHEREAS, since 2018, the City has integrated the use of the Services into multiple aspects of Connexion’s operations to provide public and the private subscribers with reliable broadband communication services; and

WHEREAS, Connexion services rely on multiple integrated equipment and software solutions, and the integration relies on the Services for dependable communication with equipment located in Connexion customer premises; and

WHEREAS, the City desires to continue using the Services, which is in the best interests of the City residents and Connexion ratepayers, and will save significant time and cost; and

WHEREAS, the estimated cost to renew the Services for up to five additional years exceeds an annual cost of \$200,000; and

WHEREAS, funding for the renewal through 2024 is authorized in the 2023/2024 Budget for expenditure from the Light & Power Fund; and

WHEREAS, funding for 2025 through 2028, will be requested through successive Budgeting for Outcomes Processes; and

WHEREAS, the City's Purchasing Agent has determined that although there is more than one source for the Services, the competitive process, if used, would result in a substantially higher cost to the City, would otherwise injure the City's financial interests, and substantially impede the City's administrative functions or the delivery of services to the public; and

WHEREAS, the Purchasing Agent and other City staff recommend the adoption of this Resolution; and

WHEREAS, the Purchasing Agent has submitted a written justification to the City Manager for approval, pursuant to the requirements in Section 8-161(d) of the City Code; and

WHEREAS, the City Manager has reviewed and approved the justification for the proposed exception to renew the contract with Nokia; and

WHEREAS, Section 8-161(d)(3) of the City Code requires prior approval of this purchasing method by the City Council for all procurements which exceed \$200,000.

NOW THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That the City Council hereby approves the renewal of a Supply and Services Agreement with Nokia of America Corporation for up to five years, as an exception to the City's competitive purchasing process requirements, for the reasons set forth herein.

Section 3. That the Purchasing Agent may use this approval, as authorized in City Code Section 8-161(d)(4), as the basis for negotiating the additional purchase of services from Nokia through July 2028.

Passed and adopted at a regular meeting of the Council of the City of Fort Collins this 15th day of August, 2023.

AGENDA ITEM SUMMARY

City Council

STAFF

Jackie Pearson, Police Lieutenant
Dawn Downs, Legal

SUBJECT

Resolution 2023-072 Authorizing the Sound Mitigation Project for Northern Colorado Law Enforcement Training Center Firing Range.

EXECUTIVE SUMMARY

The purpose of this item is to seek approval to use existing funds from the NCLETC capital budget in the amount of approximately \$136,632 to make necessary modifications to the sound noise abatement materials in the firing range.

STAFF RECOMMENDATION

Staff recommend adoption of the Ordinance on First Reading.

BACKGROUND / DISCUSSION

NCLETC officially opened for use in March of 2021. The facility is used by the two owning agencies (Fort Collins and Loveland) as well as several outside agencies for a variety of training needs, including firearms training in the firing range. After several months of operation, some concerns regarding noise exposure levels were raised by employees of Fort Collins Police Services (FCPS). In response to those concerns, City SRM representative Maggie Escobar conducted some exposure studies and found that the sound levels were above the acceptable range as determined by the Occupational Safety and Health Administration (OSHA).

Maggie Escobar then facilitated a comprehensive noise mapping study which was conducted by Colorado State University (CSU) Industrial Hygiene Masters' level students. This study confirmed that the current materials in the range are not effective in reducing noise levels appropriately for individuals on the range during firing events.

Since then, this issue has been temporarily mitigated by modifications to certain training practices and the requirement of the use of dual hearing protection during training. Both practices are not ideal in the long term. Modifications to training practices have limited some capabilities designed for the range. Some of these modifications include limiting the number of shooters allowed to train at one time and elimination of certain training sequences which have been shown to increase noise levels above acceptable. The requirement of dual hearing protection has created collateral issues such as reduction in the ability to communicate effectively and safely during training.

While these efforts to limit sound exposure are moderately effective, they are not ideal for the long term and are only temporary fixes. Having to place limits on training dynamics defeats one of the purposes of having a range of this size and safe communication during training is a necessity.

It is also important that the potential long-term safety issue of over-exposure to unsafe sound levels be addressed, not only for the benefit of owner-agency employees, but also for others who rent or use the facility.

It appears that some of the originally installed noise abatement materials are not functioning as originally expected and need to be replaced with more effective materials. These replacement materials have been identified in accordance with the recommendations from the CSU study and a vendor has been identified. The estimated cost per current bid obtained by Loveland’s purchasing department (per the Intergovernmental Agreement (IGA)) is \$136,632 with final costs determined after modifications are complete.

Per the current IGA for NCLETC, “policy issues” such as construction of capital projects require the approval of each city’s Councils, and each city shall review and approve all procurements and associated agreements and change orders exceeding \$10,000. Loveland Police Department is independently presenting this information to Loveland City Council to meet this requirement of the IGA.

CITY FINANCIAL IMPACTS

There will be no financial impact on the City as these funds already exist in the NCLETC Capital Fund.

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

Not applicable.

PUBLIC OUTREACH

- 1. Resolution for Consideration

RESOLUTION 2023-072
OF THE COUNCIL OF THE CITY OF FORT COLLINS
AUTHORIZING THE SOUND MITIGATION PROJECT FOR NORTHERN
COLORADO LAW ENFORCEMENT TRAINING CENTER FIRING RANGE

WHEREAS, in October 2017, the City and the City of Loveland (collectively, the “Cities”) entered into an initial intergovernmental agreement (IGA) for the sharing of costs for the design and construction administration of a jointly owned police regional training campus, the IGA was updated in March 2019, and the Northern Colorado Law Enforcement training Center (NCLETC) opened for operation in March 2021; and

WHEREAS, the facility is used by the Cities as well as several outside agencies for a variety of training needs, including firearms training in the firing range; and

WHEREAS, after several months of operation, some concerns regarding noise exposure levels were raised by employees of Fort Collins Police Services (FCPS), and in response to those concerns, the City and Colorado State University conducted exposure studies and found that the sound levels were above the acceptable range as determined by the Occupational Safety and Health Administration (OSHA); and

WHEREAS, it was determined that the current materials in the firing range are not effective in reducing noise levels appropriately for individuals on the range during firing events and the originally installed noise abatement materials are not functioning as originally expected and need to be replaced with more effective materials; and

WHEREAS, temporary modifications to training practices have been put in place to help mitigate the current sound levels but these training modifications are not ideal for long term use at the facility and have created collateral issues such as reduction in the ability to communicate effectively and safely during training; and

WHEREAS, in addition to each city using the facility for their own training needs, the Cities provide rental access to the NCLETC to other law enforcement agencies, the revenue from said rentals is placed into a dedicated Capital Fund to offset future costs of administering, operating, maintaining the facility, and funding future capital projects; and

WHEREAS, in accordance with Section 4 and 10 of the IGA all “Policy Issues”, which include capital projects that exceed \$10,000, shall require the approval of each City’s City Council; and

WHEREAS, the City of Loveland City Council approved the Capital Project and Appropriation for the NCLETC Sound Mitigation Project on July 18, 2023; and

WHEREAS, the NCLETC Capital Fund currently has a balance of \$441,011; the anticipated cost for the sound mitigation project is \$136,632, which will be paid for out of the NCLETC Capital Fund, and there are no additional financial obligations or requests of the City to fund this project; and

WHEREAS, the City Council has determined it is in the best interests to approve the NCLETC Sound Mitigation Capital Project for the health and safety of the Cities employees and others who rent or use the facility.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals above.

Section 2. That the City Council hereby approves and authorizes the Capital Project.

Passed and adopted at a regular meeting of the Council of the City of Fort Collins this 15th day of August, 2023.

John Duval, Legal

SUBJECT

Items Relating to City Initiated TABOR Questions (Sustainable Funding).

EXECUTIVE SUMMARY

- A. Possible Public Hearing and Motions Regarding Protest (s) of Ballot Language.
- B. Resolution 2023-073 Submitting A Ballot Issue Question to the City's Registered Electors at the City's Regular Election on November 7, 2023, Asking Them to Authorize the City to Levy a Three Mill Property Tax to be Used Exclusively to Fund Affordable Housing.

OR

Resolution 2023-073 Submitting A Ballot Issue Question to the City's Registered Electors at the City's Regular Election on November 7, 2023, Asking Them to Authorize the City to Levy a Three Mill Property Tax to be Used Exclusively to Advance the City's Goals Under its 2021 Housing Strategic Plan.

- C. Resolution 2023-074 Submitting a Ballot Issue Question to the City's Registered Electors at the City's Regular Election on November 7, 2023, Asking Them to Increase by .50% the City's Sales and Use Tax Rate to be Used Exclusively for Certain Specified Purposes. [WITH PERCENTAGES INSERTED]

OR

Resolution 2023-074 Submitting a Ballot Issue Question to the City's Registered Electors at the City's Regular Election on November 7, 2023, Asking Them to Increase by .50% the City's Sales and Use Tax Rate to be Used Exclusively for Certain Specified Purposes. [WITH BLANK PERCENTAGES]

The purpose of this item is to consider two resolutions and ballot language that reflect Councilmember feedback from the July 25, 2023, work session discussion. Two versions of each resolution are provided for consideration.

Any protest of the proposed ballot language must be received no later than Monday, August 14, 2023, at 12:00 p.m. Protest(s) shall be heard, considered, and resolved by the Council prior to adoption of the related Ordinance. If protests are received, copies will be included in Council's "Read Before the Meeting" packet.

STAFF RECOMMENDATION

On Item B (3-Mill Property Tax to Support Affordable Housing – set to be the second ballot question) staff has provided a version that limits spending more narrowly to affordable housing activities. The second

version expands from strictly an affordability focus to more of a focus on all strategies identified in the Housing Strategic Plan. Staff recommends this version.

On Item C (Dedicated .5-cent Renewable Tax to Support Parks, Recreation, Pools, Transit, and Climate – set to be the first of these ballot questions), Council discussion at the July 25 work session pointed towards an even split of funding between uses. This is provided as the first option. Alternatively, to ensure sufficient funding to meet the existing gap for parks and recreation asset management and the construction of desired aquatics facilities, staff recommends a split of funding with 50% for Parks and Recreation, and 25% each for Transit and Climate. This is the second version of Resolution 2023-074.

Both options state that the spending for each category shall be reconciled to the stated percentages within the first 7 years (2030), the second 10 years (2040), and the last 10 years of the tax (2050).

BACKGROUND / DISCUSSION

For the past 20 months, staff has been working with the Council Finance Committee and the full Council to strategically address a funding deficit in parks and funding implementation needs to address goals outlined in the Transit Master Plan, the Housing Strategic Plan, and the Our Climate Future initiative.

Original conversations in 2021 and early 2022 began with a slate of over a dozen funding mechanisms for consideration. Over time, the analysis and conversation on feasibility and desirability has led to consideration of a mill levy increase and a dedicated sales tax. These conversations also highlighted a lack of funding in the recreation and pool area for both replacement and new facilities. To consolidate and align, these needs were added to the parks funding conversation.

At the July 25, 2023, work session staff presented options that included a 5-Mill property tax increase for parks, recreation, and pools and a .25-cent dedicated tax for Transit, Housing, and Climate. Following the discussion, Councilmember feedback landed on the Resolutions presented today.

Category	Funding Mechanism	Timing	Use	Annual Revenue Estimate	Resident Annual Impact
Property Tax	3 Mills	2023	Housing	\$11M	Residential increase of: \$86 on \$400K home \$107 on \$500K home \$161 on \$750K home \$215 on \$1M home Commercial increase of \$376 on \$432K biz
Sales Tax	Additional ½ Cent Dedicated Tax	2023	Parks, Recreation, Pools Transit, & Climate	\$20M	\$62 per resident/ \$156* per household Sales tax on food would remain at 2.25% Visitors also impacted
Total				\$32M+	\$256 net annual increase per household

CITY FINANCIAL IMPACTS

Any new revenue received through these mechanisms would be bound by the guidance on uses provided in the ballot language. Also, any expenditures of this revenue would be vetted and considered through the normal budget process along with all other services and offers.

BOARD / COMMISSION / COMMITTEE RECOMMENDATION

Not applicable.

PUBLIC OUTREACH

[AFFORDABLE HOUSING ONLY]

RESOLUTION 2023-073
OF THE COUNCIL OF THE CITY OF FORT COLLINS
SUBMITTING A BALLOT ISSUE QUESTION TO THE CITY’S REGISTERED
ELECTORS AT THE CITY’S REGULAR ELECTION ON NOVEMBER 7, 2023,
ASKING THEM TO AUTHORIZE THE CITY TO LEVY A THREE MILL PROPERTY TAX
TO BE USED EXCLUSIVELY TO FUND AFFORDABLE HOUSING

WHEREAS, on March 2, 2021, the City Council adopted Ordinance No. 033, 2021, adopting the City’s Housing Strategic Plan (the “Housing Plan”) as an element of the City’s Comprehensive Plan; and

WHEREAS, the overall vision of the Housing Plan is that “Everyone has healthy, stable housing they can afford” (the “Vision”); and

WHEREAS, the Housing Plan was therefore developed to address the entire spectrum of housing within the community, organized by income level and subsidy, consisting of short-term accommodations (i.e., emergency shelters and transitioning housing), affordable housing (i.e., permanent supportive housing and deed-restricted housing for rent or purchase), and market-rate housing (i.e., unsubsidized housing), however a primary focus of the Housing Plan is how to increase affordable housing serving Fort Collins for disadvantaged and low-income people; and

WHEREAS, as it relates specifically to increasing affordable housing serving Fort Collins, the Housing Plan identifies four challenges: (i) price escalation for housing impacts disproportionately black, indigenous, and people of color, and low-income households, (ii) there are not enough affordable places available for people to rent or purchase, or what is available and affordable is not the kind of housing people need, (iii) while the City has some tools to encourage affordable housing, the current amount of City funding and incentives for affordable housing are not enough, and (iv) housing is expensive, and the cost of it will likely continue to increase (the “Challenges”); and

WHEREAS, the Housing Plan prioritizes 26 strategies to address these Challenges and other challenges identified in the Plan; and

WHEREAS, of the strategies identified in the Housing Plan, the following are mostly targeted at increasing affordable housing, and these include: (i) create a new dedicated revenue stream to fund the City’s affordable housing fund, (ii) expand partnership with the local Community Development Financial Institution to offer gap financing and low-cost loan pool for affordable housing development, (iii) recalibrate existing incentives to reflect current market conditions, (iv) bolster City land bank activity by allocating additional funding to the program, (v) fund foreclosure and eviction prevention and legal representation, and (vi) develop small landlord incentives (collectively, the “Strategies”); and

WHEREAS, it is the City Council’s intent in submitting the ballot issue question in this Resolution to ask the City’s registered electors to authorize a 3-mill property tax, which would be the City’s first increase in property tax since 1992, to be used exclusively to fund affordable housing within Fort Collins, as “affordable housing” is defined by City Council, to include, without limitation, funding the Strategies identified in the Housing Plan; and

WHEREAS, Article X, Section 20 of the Colorado Constitution requires the imposition of this property tax to be approved by the City’s registered electors; and

WHEREAS, Article X, Section 3 of the City’s Charter authorizes the City Council to submit any question to a vote of the people at a regular City election.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings in the recitals set forth above.

Section 2. That there is hereby submitted to the City’s registered electors at the City’s regular municipal election to be held on November 7, 2023, this ballot issue question with the following ballot title and submission clause:

City-Initiated Ballot Issue Question No. 2

SHALL CITY OF FORT COLLINS TAXES BE INCREASED BY \$16,000,000 IN THE FIRST FULL FISCAL YEAR OF PROPERTY TAX COLLECTION (2025), AND BY SUCH AMOUNTS COLLECTED ANNUALLY THEREAFTER, FROM A MILL LEVY OF THREE (3) MILLS IMPOSED FOR PROPERTY TAXES LEVIED IN 2024 AND COLLECTED IN 2025, WHICH WOULD BE THE CITY’S FIRST PROPERTY TAX INCREASE SINCE 1992, WITH THE TAXES COLLECTED USED FOR THE EXCLUSIVE PURPOSE OF FUNDING “AFFORDABLE HOUSING”, AS DEFINED BY CITY COUNCIL, TO INCLUDE FUNDING THE AFFORDABLE HOUSING STRATEGIES IDENTIFIED IN THE CITY’S 2021 HOUSING STRATEGIC PLAN, AS LATER AMENDED OR REPLACED BY CITY COUNCIL, AND TO FUND:

- THE CITY’S DEVELOPMENT, CONSTRUCTION, ACQUISITION, OPERATION, AND MAINTENANCE OF AFFORDABLE HOUSING;
- GRANTS AND INCENTIVES FOR THE DEVELOPMENT, CONSTRUCTION, ACQUISITION, OPERATION, AND MAINTENANCE OF AFFORDABLE HOUSING BY PRIVATE AND OTHER PUBLIC ENTITIES; AND
- PROGRAMS AND SERVICES PROVIDED BY THE CITY, OTHER PUBLIC ENTITIES, AND NON-PROFIT ORGANIZATIONS TO SUBSIDIZE AFFORDABLE HOUSING AND PROVIDE HOUSING SUPPORT FOR IT;

AND WITH ALL THE TAX REVENUES, AND INVESTMENT EARNINGS THEREON, TO BE COLLECTED, RETAINED AND SPENT AS A VOTER-APPROVED REVENUE CHANGE NOTWITHSTANDING THE SPENDING AND REVENUE LIMITATIONS OF ARTICLE X, SECTION 20 OF THE COLORADO CONSTITUTION?

_____ Yes/For

HOUSING STRATEGIC PLAN

RESOLUTION 2023-073
OF THE COUNCIL OF THE CITY OF FORT COLLINS
SUBMITTING A BALLOT ISSUE QUESTION TO THE CITY’S REGISTERED
ELECTORS AT THE CITY’S REGULAR ELECTION ON NOVEMBER 7, 2023,
ASKING THEM TO AUTHORIZE THE CITY TO LEVY A THREE MILL PROPERTY TAX
TO BE USED EXCLUSIVELY TO ADVANCE THE CITY’S GOALS UNDER ITS
2021 HOUSING STRATEGIC PLAN

WHEREAS, on March 2, 2021, the City Council adopted Ordinance No. 033, 2021, adopting the City’s Housing Strategic Plan (the “Housing Plan”) as an element of the City’s Comprehensive Plan; and

WHEREAS, the overall vision of the Housing Plan is that “Everyone has healthy, stable housing they can afford” (the “Vision”); and

WHEREAS, the Housing Plan was therefore developed to address the entire spectrum of housing within the community, organized by income level and subsidy, consisting of short-term accommodations (i.e., emergency shelters and transitioning housing), affordable housing (i.e., permanent supportive housing and deed-restricted housing for rent or purchase), and market-rate housing (i.e., unsubsidized housing) (collectively, the “Housing Spectrum”); and

WHEREAS, the Housing Plan identifies seven challenges to achieving the Vision, which are: (i) price escalation for the Housing Spectrum impacts everyone, but disproportionately black, indigenous, people of color, and low-income households, (ii) not enough affordable places available for people to rent or purchase, or what is available and affordable is not the kind of housing people need, (iii) while the City has some tools to encourage affordable housing, the current amount of City funding and incentives for affordable housing are not enough to meet the Vision, (iv) job growth continues to outpace housing growth, (v) housing is expensive, and the cost of it will likely continue to increase, (vi) it is difficult to predict the lasting effects and impacts of the COVID-19 pandemic, and (vii) housing policies have not consistently addressed housing stability and healthy housing, especially for people who rent (the “Challenges”); and

WHEREAS, to meet these Challenges in achieving the Vision, the Housing Plan prioritizes 26 strategies; and

WHEREAS, most of these strategies will likely require some additional City funding, but several cannot be easily implemented without significant additional City funding, and these include: (i) create a new dedicated revenue stream to fund the City’s affordable housing fund, (ii) expand partnership with the local Community Development Financial Institution to offer gap financing and low-cost loan pool for affordable housing development, (iii) recalibrate existing incentives to reflect current market conditions, (iv) bolster City land bank activity by allocating additional funding to the program, (v) fund foreclosure and eviction prevention and legal representation, and (vi) develop small landlord incentives (collectively, the “Strategies”); and

WHEREAS, it is the City Council’s intent in submitting the ballot issue question in this Resolution to ask the City’s registered electors to authorize a 3-mill property tax, which would be the City’s first increase in property tax since 1992, to be used exclusively to fund the Strategies in the Housing Plan, as hereafter amended or replaced by the City Council, to overcome the Challenges in achieving the Vision; and

WHEREAS, Article X, Section 20 of the Colorado Constitution requires the imposition of this property tax to be approved by the City’s registered electors; and

WHEREAS, Article X, Section 3 of the City’s Charter authorizes the City Council to submit any question to a vote of the people at a regular City election.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings in the recitals set forth above.

Section 2. That there is hereby submitted to the City’s registered electors at the City’s regular municipal election to be held on November 7, 2023, this ballot issue question with the following ballot title and submission clause:

City-Initiated Ballot Issue Question No. 2

SHALL CITY OF FORT COLLINS TAXES BE INCREASED BY \$16,000,000 IN THE FIRST FULL FISCAL YEAR OF PROPERTY TAX COLLECTION (2025), AND BY SUCH AMOUNTS COLLECTED ANNUALLY THEREAFTER, FROM A MILL LEVY OF THREE (3) MILLS IMPOSED FOR PROPERTY TAXES LEVIED IN 2024 AND COLLECTED IN 2025, WHICH WOULD BE THE CITY’S FIRST PROPERTY TAX INCREASE SINCE 1992, AND WITH THE TAXES COLLECTED USED FOR THE EXCLUSIVE PURPOSE OF ADVANCING THE CITY’S VISION UNDER ITS 2021 HOUSING STRATEGIC PLAN (PLAN), AS LATER AMENDED OR REPLACED BY CITY COUNCIL, TO INCLUDE FUNDING, CONSISTENT WITH THE PLAN, FOR:

- THE CITY’S DEVELOPMENT, CONSTRUCTION, ACQUISITION, OPERATION, AND MAINTENANCE OF HOUSING;
- GRANTS AND INCENTIVES FOR THE DEVELOPMENT, CONSTRUCTION, ACQUISITION, OPERATION, AND MAINTENANCE OF HOUSING BY PRIVATE AND OTHER PUBLIC ENTITIES; AND

- PROGRAMS AND SERVICES PROVIDED BY THE CITY, OTHER PUBLIC ENTITIES, AND NON-PROFIT ORGANIZATIONS TO SUBSIDIZE HOUSING AND PROVIDE HOUSING SUPPORT;

RESOLUTION 2023-074
OF THE COUNCIL OF THE CITY OF FORT COLLINS
SUBMITTING A BALLOT ISSUE QUESTION TO THE CITY’S REGISTERED
ELECTORS AT THE CITY’S REGULAR ELECTION ON NOVEMBER 7, 2023,
ASKING THEM TO INCREASE BY .50% THE CITY’S SALES AND USE TAX RATE TO
BE USED EXCLUSIVELY FOR CERTAIN SPECIFIED PURPOSES

WHEREAS, over the past 20 months, City staff has worked with the Council Finance Committee and the full City Council to address certain areas of shortfalls in City funding and to consider new sources of revenue to remedy these shortfalls; and

WHEREAS, one area of these shortfalls is for the life-cycle replacement and minor and major refresh of existing park and recreation facilities and for constructing indoor and outdoor recreation facilities, including aquatic facilities, as addressed in the City’s Park and Recreation Master Plan adopted by City Council on January 19, 2021, in Ordinance No. 010, 2021, as an element of the City’s Comprehensive Plan; and

WHEREAS, a second area of shortfalls is for the advancement of certain goals established for the City in the Our Climate Future Plan adopted by City Council on March 16, 2021, in Resolution 2021-031 related to reducing greenhouse gases and pollution, achieving 100% renewable energy, and community-wide carbon neutrality; and

WHEREAS, a third area relates to the future funding of the City’s transit system as the need for that funding is described in the City’s Transit Master Plan adopted by City Council on April 16, 2019, in Resolution 2019-049; and

WHEREAS, to ensure sufficient funding for each of these shortfall areas, it is City Council’s intent that this sales and use tax be at a rate of .50 % and the revenues from it be split 34% for Parks and Recreation, 33% for Climate, and 33% for Transit, with the spending at these percentages be reconciled at the end of 2030, 2040, and when the City spends the last of the tax revenues spent; and

WHEREAS, this sales and use tax shall, however, be for a limited duration, beginning on January 1, 2024, and ending at midnight on December 31, 2050, and shall not apply to any items exempt under the City’s Sales and Use Tax Code in Article III of Code Chapter 25, to food for home consumption, or for manufacturing equipment, but for the use tax only; and

WHEREAS, to the extent revenues collected from this tax for expenditure on constructing indoor and outdoor pool facilities are used in constructing swimming lanes for the public pool constructed as part of the Southeast Community Center, it is the City Council’s intent that access for Poudre School District (the “District”) students is conditional on the District’s and City’s agreement on the District’s share in the cost of those swimming lanes; and

WHEREAS, if the City’s registered electors approve this tax, the City Council intends that the revenue from it will supplement the amounts currently being expended for these three areas, and not to replace them with revenues from this new tax, so that the overall funding in these areas will increase according to the revenues generated by this tax and the percentages stated below in the ballot question; and

WHEREAS, Article X, Section 20 of the Colorado Constitution requires the imposition of this property tax to be approved by the City’s registered electors; and

WHEREAS, Article X, Section 3 of the City’s Charter authorizes the City Council to submit any question to a vote of the people at a regular City election.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings in the recitals set forth above.

Section 2. That there is hereby submitted to the City’s registered electors at the City’s regular municipal election to be held on November 7, 2023, this ballot issue question with the following ballot title and submission clause:

City-Initiated Ballot Issue Question No. 1

SHALL CITY OF FORT COLLINS TAXES BE INCREASED BY \$23,800,000 IN THE FIRST FULL FISCAL YEAR (2024), AND BY SUCH AMOUNTS COLLECTED ANNUALLY THEREAFTER, FROM A .50% SALES AND USE TAX BEGINNING JANUARY 1, 2024, AND ENDING AT MIDNIGHT ON DECEMBER 31, 2050, WITH THE TAX REVENUES SPENT ONLY FOR THE FOLLOWING:

- 34% FOR THE REPLACEMENT, UPGRADE, MAINTENANCE, AND ACCESSIBLITLY OF PARKS FACILITIES AND FOR THE REPLACEMENT AND CONSTRUCTION OF INDOOR AND OUTDOOR RECREATION AND POOL FACILITIES,
- 33% FOR PROGRAMS AND PROJECTS ADVANCING GREENHOUSE GAS AND AIR POLLUTION REDUCTION, THE CITY’S 2030 GOAL OF 100% RENEWABLE ENERGY, AND THE CITY’S 2050 GOAL OF COMMUNITY-WIDE CARBON NEUTRALITY, AND
- 33% FOR THE CITY’S TRANSIT SYSTEM, INCLUDING, WITHOUT LIMITATION, INFRASTRUCTURE IMPROVEMENTS, PURCHASE OF EQUIPMENT, AND UPGRADED AND EXPANDED SERVICES;

AND WHILE CITY COUNCIL MAY EXERCISE ITS DISCRETION IN DECIDING THE TIMING OF SPENDING FOR EACH CATEGORY, THAT SPENDING SHALL BE RECONCILED TO THE STATED PERCENTAGES BY THE END OF 2030, 2040, AND WHEN THE LAST OF THE REVENUES COLLECTED FROM THE TAX ARE SPENT, BUT THIS TAX SHALL NOT APPLY TO:

- ITEMS EXEMPT UNDER THE CITY CODE FROM CITY SALES AND USE TAX;
- FOOD FOR HOME CONSUMPTION; AND
- MANUFACTURING EQUIPMENT, BUT FOR THE USE TAX ONLY;

1

What adjustments, if any, need to be made to the current draft ballot language?

2

Are there any questions or inputs into the Recreation Capital strategy?

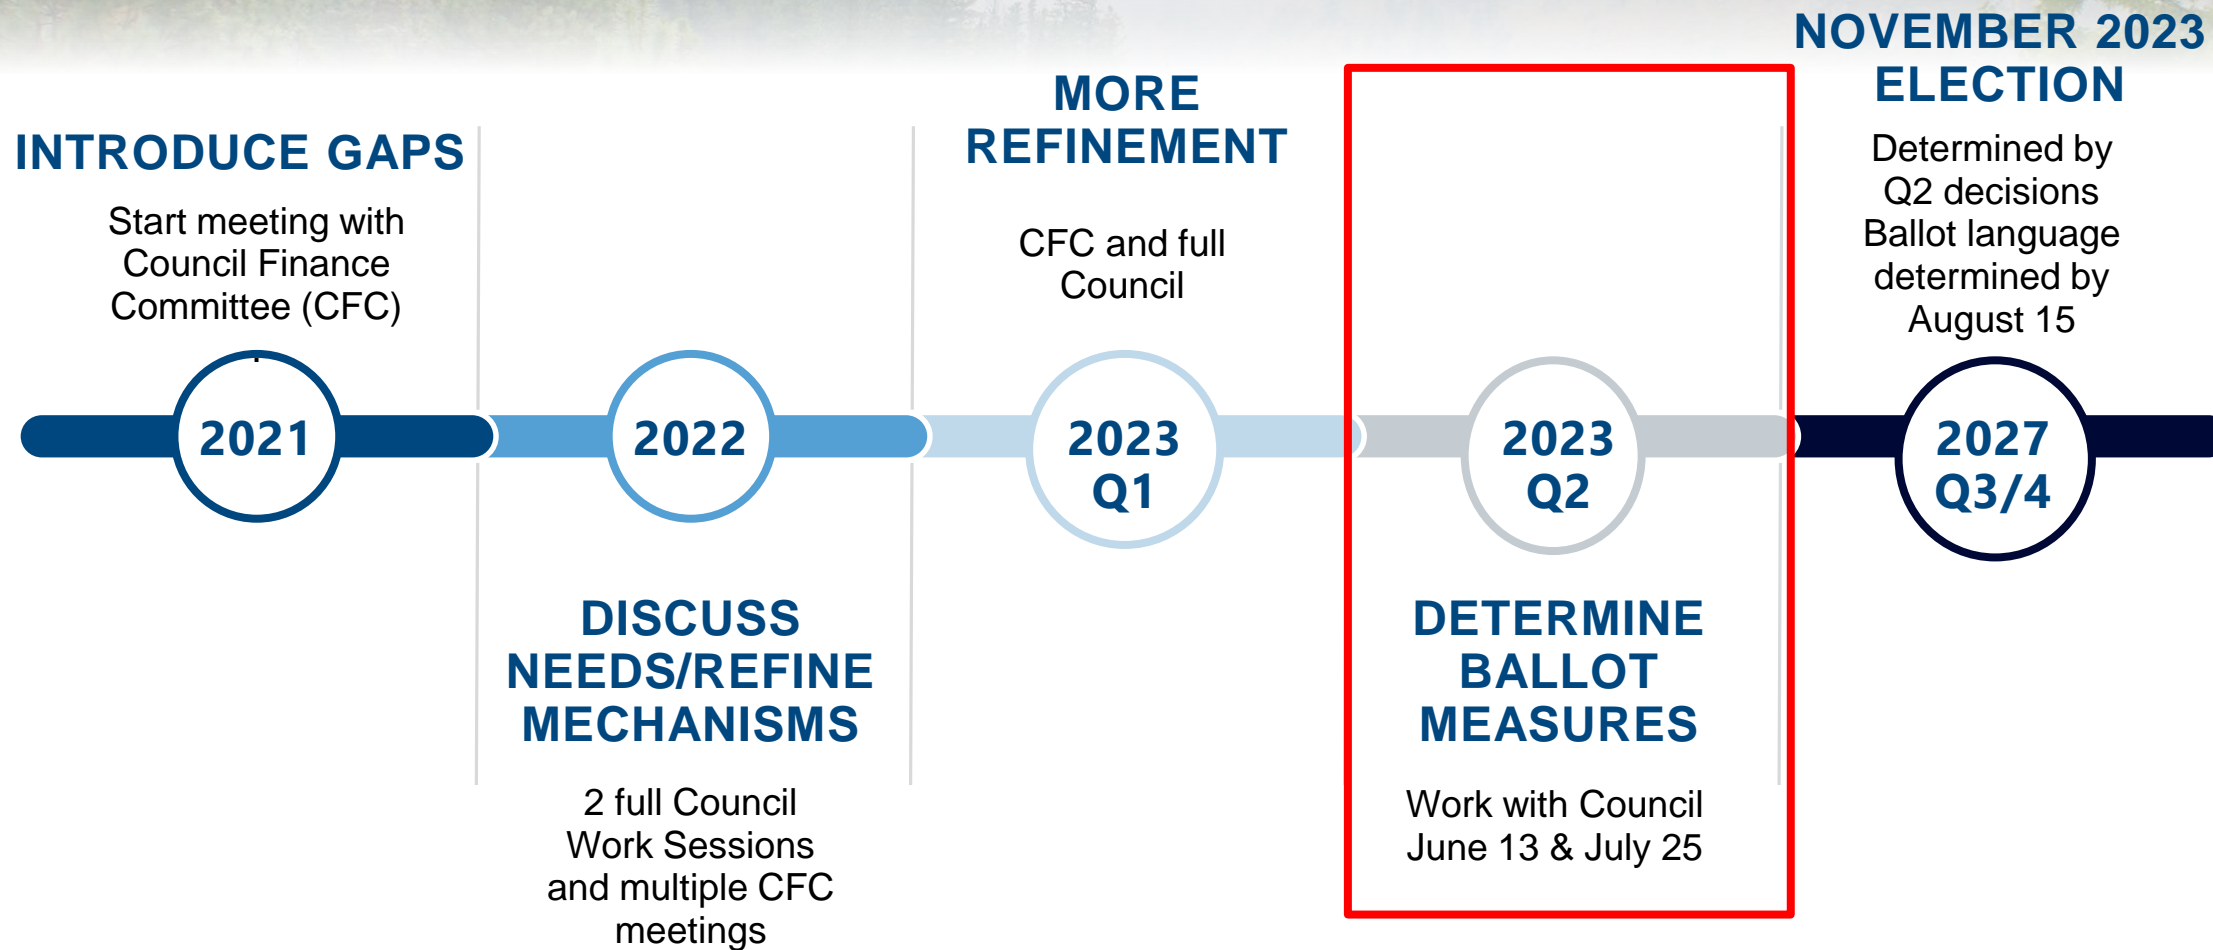

3

Any specific direction as to the timing of updates to the Franchise Fee?

- Direction to proceed with property tax (Parks & Recreation), sales tax (Transit, Housing, Climate), and franchise fee updates (Climate)
- Additional detail desired on Recreation Capital strategy

Category	Funding Mechanism	Timing	Use	Annual Revenue Estimate	Resident Annual Impact
Franchise Fee to 3%	Natural Gas Bills	2023 (Active in 2024)	Climate	\$1M	<ul style="list-style-type: none"> • Council action only – does not require voter approval • 2% increase. ~ \$14/household
Property Tax	5 Mills	2023	Parks & Rec w/ Aquatics Capital	\$18M	<ul style="list-style-type: none"> • Residential increase of \$143 on \$400K home • Residential increase of \$179 on \$500K home • Residential increase of \$268 on \$750K home • Residential increase of \$358 on \$1M home • Commercial increase of \$626
Sales Tax	Additional ¼ Cent Dedicated Tax	2023	Climate Umbrella	\$10M	<ul style="list-style-type: none"> • \$31 per resident/ \$78* per household • Sales tax on food would remain at 2.25% • Visitors also impacted
				\$29M+	<ul style="list-style-type: none"> • \$235 net annual increase per household* + impact of substance tax

Parks/Recreation/Aquatics

Parks and Recreation Infrastructure Replacement

Fort Collins system includes over 50 parks, 45 miles of paved trails, and 10 recreation facilities

Maintain appropriate levels of service

- \$11M funding represents 2.4% of asset value
- Replacement value of recreation facilities \$200M+
- Park infrastructure asset value \$260M+

Examples:

- Repaving parking lots
- Roofing repairs/replacement, HVAC replacements, electrical upgrades including LED
- Conversion of courts from asphalt to post-tension concrete
- Irrigation system renovation, including replacement of water management equipment such as flow sensors & controllers

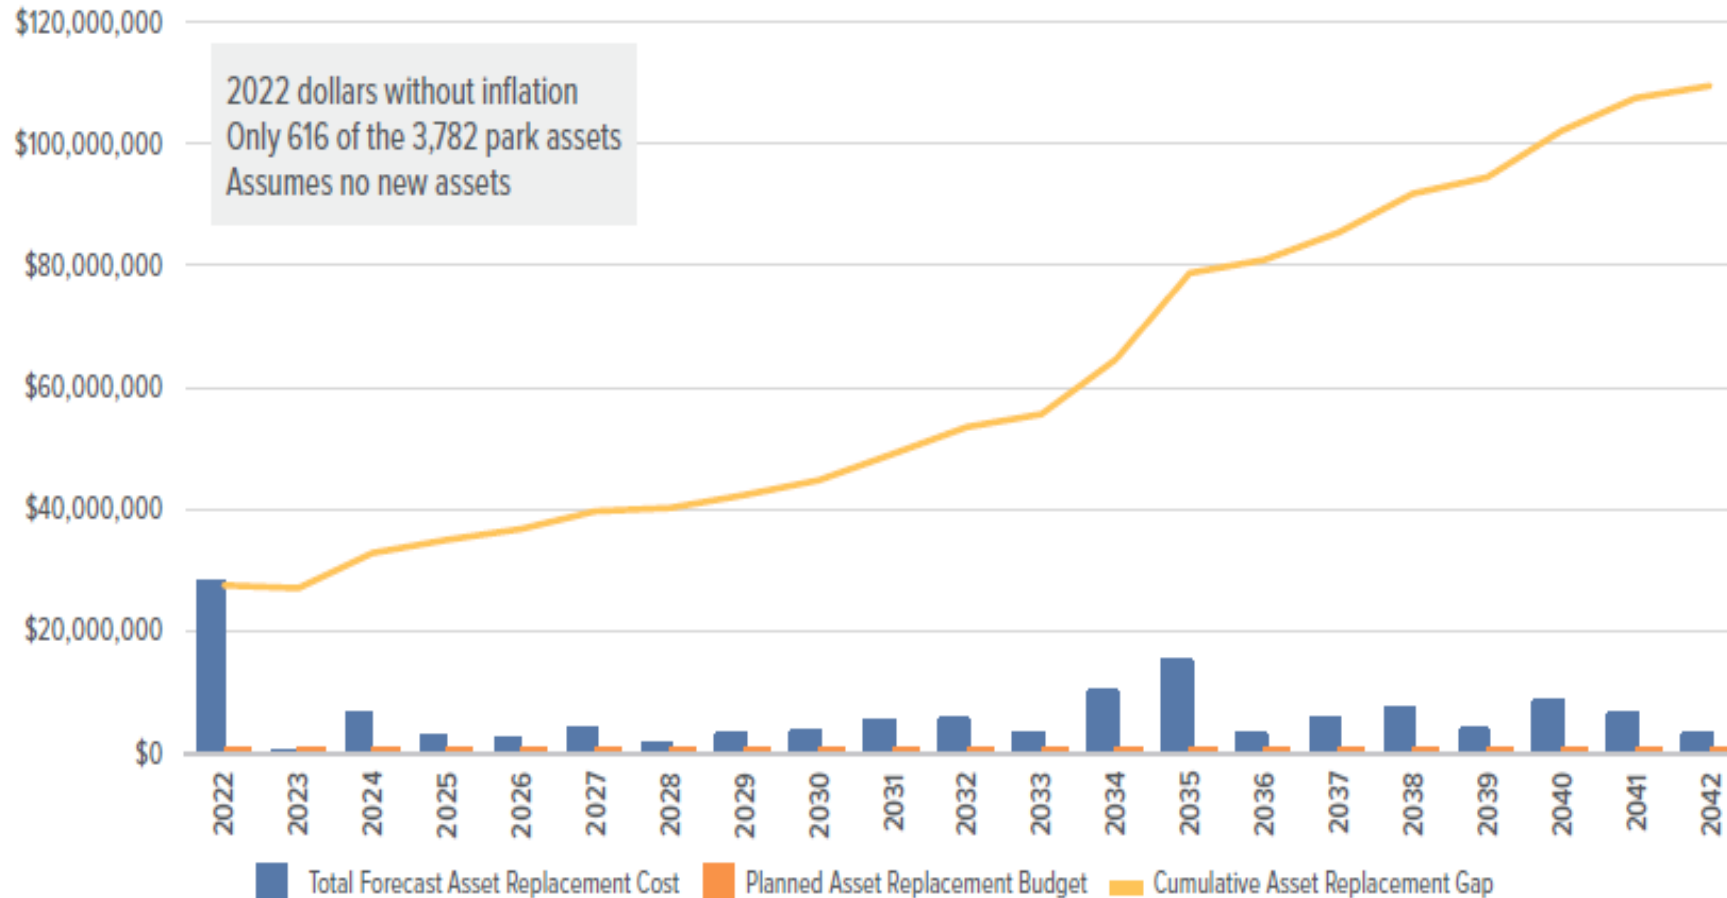

Provide equitable access to parks & recreation experiences as identified in 2021 Parks and Recreation master plan.

- Currently 51% of playgrounds are beyond expected lifespan.

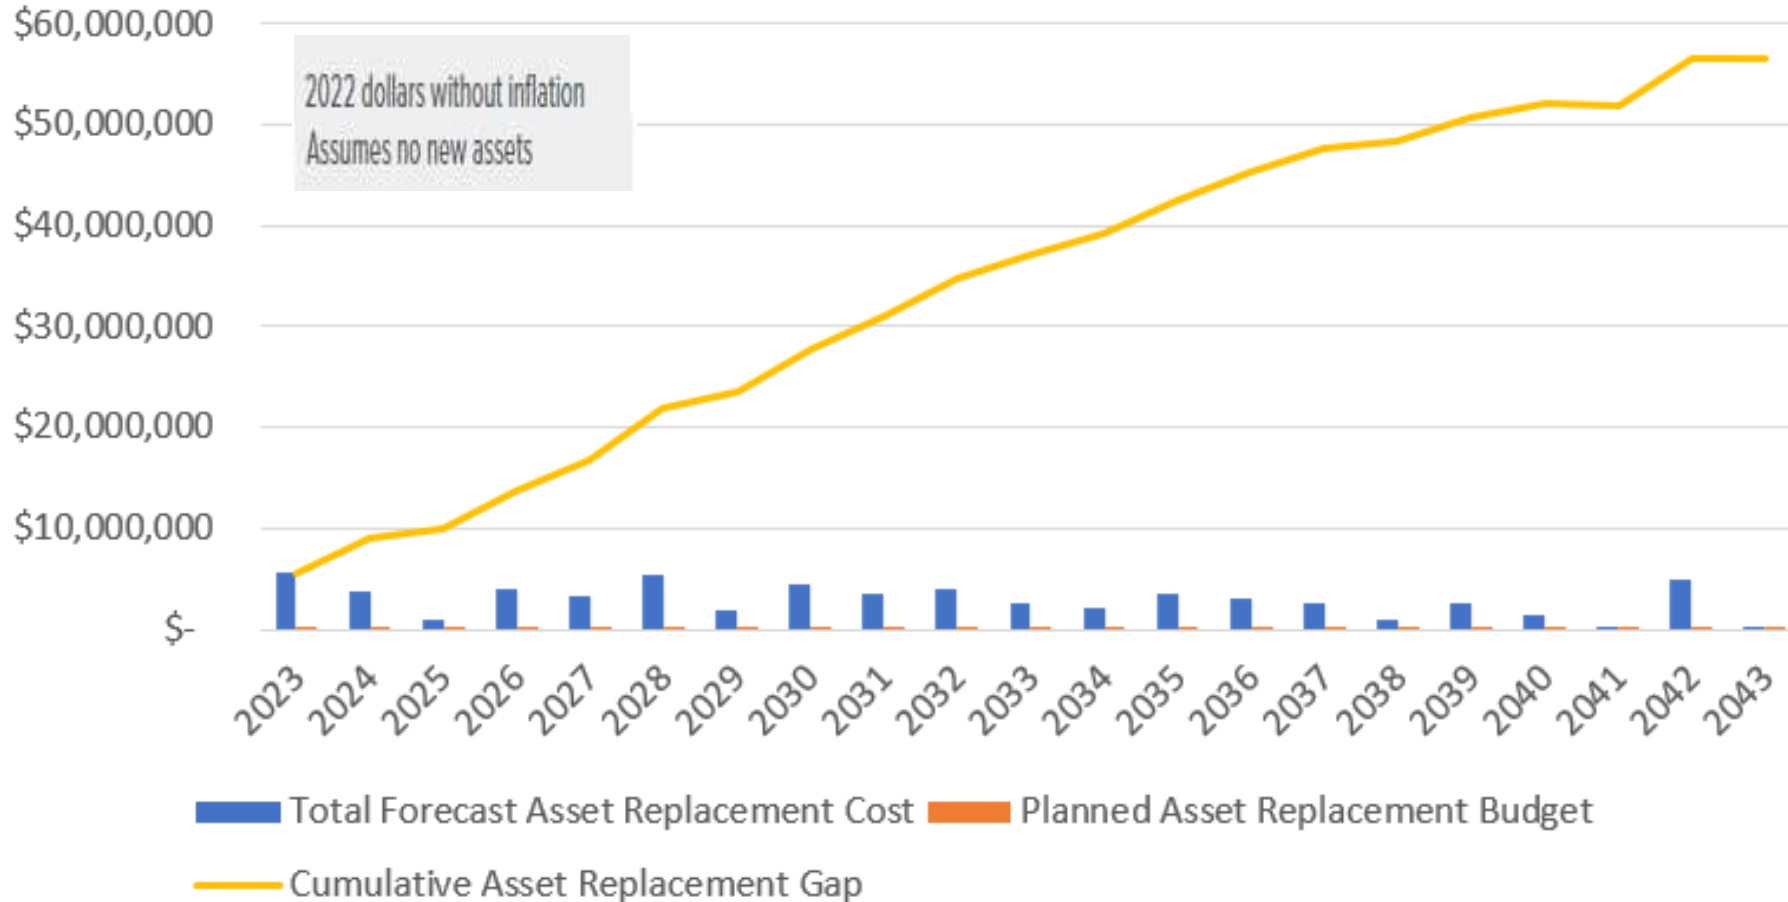

Examples:

- Replace play equipment, changing surfaces from sand to ADA compliant material
- Repair sections of cracked walkways, bringing walkway slopes up to ADA standards
- Locker room and restroom upgrades/replacement
- Pedestrian bridge replacements, fencing repairs, water feature renovations, bike park renovations, pedestrian lighting replacement

PARKS ASSET REPLACEMENT BUDGETARY GAP

RECREATION ASSET & CAPITAL NEEDS VS. 2 MILLS REVENUE

- Additional 2 Mills could provide option to fund major capital outside of CCIP
- SE Community Center and Mulberry replacement are identified as current priorities
- Major facilities are likely to need significant refresh every 50+ years

Sample Ballot Language

Parks, Recreation, and Aquatics Property Tax

SHALL CITY OF FORT COLLINS TAXES BE INCREASED BY \$ [REDACTED] IN THE FIRST FULL FISCAL YEAR OF PROPERTY TAX COLLECTION (2025), AND BY SUCH AMOUNTS COLLECTED ANNUALLY THEREAFTER, FROM A MILL LEVY OF [REDACTED] MILLS IMPOSED FOR PROPERTY TAXES ASSESSED IN 2024 AND COLLECTED IN 2025, WHICH WOULD BE THE CITY'S FIRST PROPERTY TAX INCREASE SINCE 1992, FOR THE EXCLUSIVE PURPOSES OF FUNDING:

- THE REPLACEMENT, ACCESSIBILITY, MAINTENANCE, AND UPGRADE TO PARKS, RECREATION, AND AQUATICS FACILITIES; AND
- THE CONSTRUCTION OF INDOOR AND OUTDOOR RECREATION AND AQUATICS FACILITIES;

AND WITH ALL THE TAX REVENUES, AND INVESTMENT EARNINGS THEREON, TO BE COLLECTED, RETAINED AND SPENT AS A VOTER-APPROVED REVENUE CHANGE NOTWITHSTANDING THE SPENDING AND REVENUE LIMITATIONS OF ARTICLE X, SECTION 20 OF THE COLORADO CONSTITUTION?

“Our Climate Future” Tax

SHALL CITY OF FORT COLLINS TAXES BE INCREASED BY \$ [REDACTED] IN THE FIRST FULL FISCAL YEAR (2024), AND BY SUCH AMOUNTS COLLECTED ANNUALLY THEREAFTER, FROM A .25% SALES AND USE TAX BEGINNING JANUARY 1, 2024, AND ENDING AT MIDNIGHT ON DECEMBER 31, 2050, WITH THE PROCEEDS USED EXCLUSIVELY TO ADVANCE THE OBJECTIVES OF THE CITY’S OUR CLIMATE FUTURE PLAN, TO INCLUDE FUNDING FOR:

- TRANSIT, HOUSING AFFORDABILITY, AND GREENHOUSE GAS AND AIR POLLUTION REDUCTION; AND
- ANY OTHER PROGRAMS AND PROJECTS SUPPORTING THE CITY’S STATED 2030 GOAL OF 80% GREENHOUSE GAS REDUCTION AND 100% RENEWABLE ENERGY AND 2050 GOAL OF COMMUNITY-WIDE CARBON NEUTRALITY;

BUT THIS TAX SHALL NOT APPLY TO:

- ITEMS EXEMPT UNDER THE CITY CODE FROM CITY SALES AND USE TAX;
- FOOD FOR HOME CONSUMPTION; AND
- MANUFACTURING EQUIPMENT, BUT FOR THE USE TAX ONLY;

AND WITH ALL THE TAX REVENUES, AND INVESTMENT EARNINGS THEREON, TO BE COLLECTED, RETAINED, SPENT AS A VOTER-APPROVED REVENUE CHANGE NOTWITHSTANDING THE SPENDING AND REVENUE LIMITATIONS OF ARTICLE X, SECTION 20 OF THE COLORADO CONSTITUTION?

Franchise Fee Update

- Staff has been in contact with Xcel energy regarding the timing of updates and adding a rebate feature for low-income earners
- Exploring implementation timing of Spring 2024, after the cold-weather months
- Staff proposes bringing Resolution to Council in Nov/Dec 2023 to schedule 2024 Fee Update and confirm existence of low-income program

Councilmember Direction Requested

1

What adjustments, if any, need to be made to the current draft ballot language?

2

Are there any questions or inputs into the Recreation Capital strategy?

3

Any specific direction as to the timing of updates to the Franchise Fee?

Thank you!

Travis Storin, Chief Financial Officer
Ginny Sawyer, Sr. Project Manager

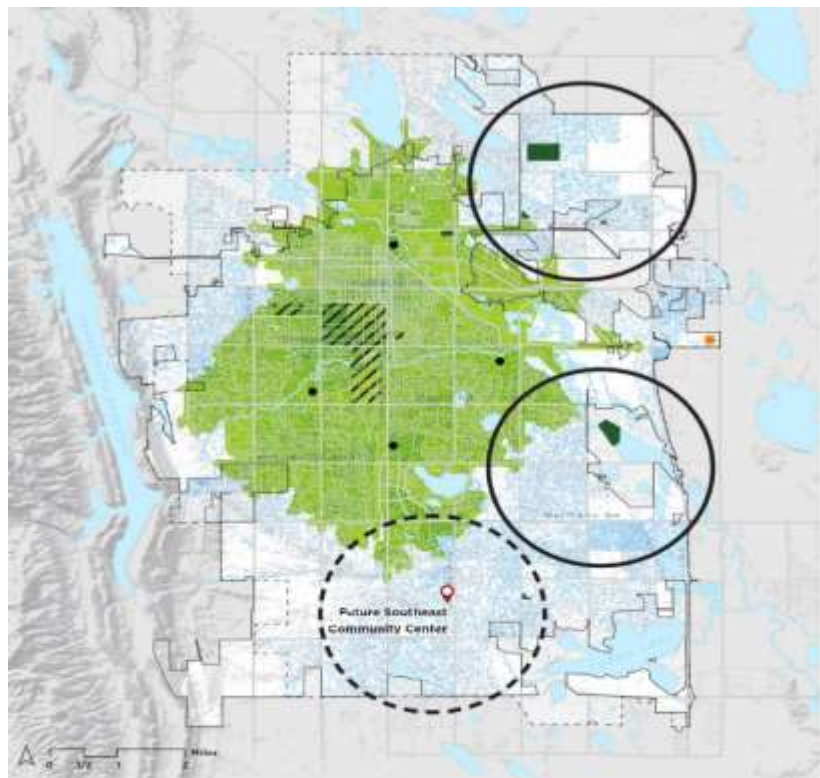

Appendix / Back-up

Item 20. Create: Parks & Rec Master Plan Recommendation

Community & Neighborhood Recreation Centers
 +3 by 2040

Pools
 +2 by 2040

Pool Priority Investment Rating was 197
 Paved, Multi-use trails were second at 157

Community Centers — Access Standard — 5-Minute Drive

Pools — Access Standard — 5-Minute Drive

- Population Density 2040
- New Park in Progress
- Planned School
- CSU Campus
- Service Gap/ Potentially Filled by New Amenity in Planned Park
- Service Gap/ New Amenity Focus Area
- Park Amenity Existing 5-Minute Drive Idealized 5-Minute Drive

- Population Density 2040
- New Park in Progress
- Planned School
- CSU Campus
- Service Gap/ Potentially Filled by New Amenity in Planned Park
- Service Gap/ New Amenity Focus Area
- Park Amenity Existing 5-Minute Drive Idealized 5-Minute Drive

- Build out calls for 3 new recreation centers including the Southeast.
- Build out calls for 2 new pools.
- Mulberry Pool needs replacement.
Recreation has utilized CCIP ¼-cent:
 - \$3M EPIC match (1985)
 - \$10M replacement of Northside Aztlan (1997)
 - \$5.5M Senior Center Expansion (2006)
 - \$18M Southeast Facility (2015)
- Dedicated funding would free up space in the program for other priorities.
- Funding would support the infrastructure replacement at new facilities plus partial O&M

	2019-2022 AVG Revenue Baseline	2022 Revenue Baseline
Current Fee Rate – 1.07%	\$ 515,905	\$ 727,633
Proposed Rate – 3.00%	\$ 1,446,462	\$ 2,040,093
Potential New Revenue for Climate Initiatives (estimated)	\$ 930,557	\$ 1,312,460

Considerations:

- Does not require voter approval
- Current franchise fee of 1.07% generates ~\$445k/yr to General Fund
- New portion of revenue could be allocated for a variety of climate uses
- Peer communities charge a 3% Franchise Fee
 - City's legal agreement allows up to a 3% fee

MONTHLY ON-BILL FRANCHISE FEE COST

Customer Type	2022 Average Monthly Bill	Current Avg. Monthly Franchise Fee 1.07%	Total Avg. Monthly Franchise Fee 3.00%	Net Avg. Monthly Franchise Fee Increase 3.00%	Net Annual Franchise Fee Cost Increase
Residential	\$ 58.19	\$ 0.62	\$ 1.75	\$ 1.13	\$ 13.56
Commercial/ Industrial	\$ 344.02	\$ 3.68	\$ 10.32	\$ 6.64	\$ 79.69

Considerations:

- Already appears as line item on customer bills
- City could adopt a rebate program to provide relief to low-income customers

\$14.7M Annual Gap

Masterplan to Build Out Projects

\$8-9.5+ Annual Gap

To Achieve 10% Affordable Housing Stock

\$9.5M+ Annual Gap

To Accelerate Community Transition From Fossil Fuels

ANNUAL REVENUE GAP = \$40M TO \$46M+

Value of Parks and Recreation

- Environmental – air quality, water, biodiversity
- Social – livability, connection, gathering, health and well-being
- Economic – property value, tourism, sales activity

Infrastructure Replacement Plan (IRP) Current State

- Fort Collins system includes over 50 parks, 45 miles of paved trails, and 10 recreation facilities
 - Parks IRP is currently funded at \$0.75M per year (originally \$0.6M in 1993)
 - Recreation IRP is currently funded at \$0.2M per year
- Deferred needs have been growing

**OUR
CLIMATE
FUTURE**

Big Move	Focus	Investment Target
4	Transit	\$14.7M
4	Active Modes	\$1.5M
6	Building Efficiency & Electrification	\$2.85M
7	Housing Affordability	\$8-9.5M
13	Electric Vehicles	\$1.85M
2 & 10	Zero Waste	\$2M
Total Annual Investments:		\$31M+

- Ongoing FC Utilities Climate Investments:
 - Energy Efficiency, Customer Renewable and Grid Flexibility programs; \$6.6M annually
 - EPIC Loan program; up to \$2.5M annually in available financing
 - Streetlight LED conversion; \$1M annually
 - Efficiency Works programs (via Platte River budgeting); ~\$5M annually
- Ongoing Housing Investments:
 - Competitive Process for Affordable Housing Development; \$1.5-\$3M awarded annually
 - From all sources – Federal, City General Fund & CCIP
- Ongoing Transit Investments:
 - Building, Operating & Maintaining Routes; \$22M annually
 - Includes local, federal, grant, and partner funding

OUR IMPACT

Community-wide total electricity use would be over 20% higher without Utilities energy programs since 2005

Big Move 4 – Convenient Transportation Choices: Transit

Improve route frequencies and service

- ***Bus operator resiliency***
- Remain fare-free
- Procure additional buses and increase operational frequencies
- Add new route with 30-minute frequency on Lemay/Trilby
- New ***southeast micro-transit service***

Local match for major capital projects

Unprecedented Federal dollars in grant funding available to fund 60-80% of large transit projects.

- ***West Elizabeth bus rapid transit***
- North transit maintenance facility
- ***North College MAX extension***
- Mobility hubs

Estimated investment needed: \$14.7M annually

Big Move 7 – Healthy Affordable Housing

City competitive process

- ***Housing acquisition***
(redevelopment/preservation)
- Land acquisition
- New construction costs
- Affordable homeownership renovation
- ***Renovate affordable rental housing***
- Homeownership assistance

City-led efforts

- Acquire properties for Land Bank (expand)
- ***Offset fees*** for affordable projects (expand)
- ***Develop incentive programs*** (energy efficiency, voluntary affordability restrictions, etc.)
- Explore redevelopment partnerships

Estimated investment needed: \$8-\$9.5M annually

• Big Move 13 – Electric Cars and Fleets

Resident Support

- Support **home electrical panel** and service upgrades for EVs
- **Public charging** strategy, implementation and maintenance

City Efforts

- Transition all Transfort buses to **zero emission** vehicles by 2040
- Explore providing **incentives for community members for installation of charging equipment** in homes and businesses
- Explore expansion of level 3 public charging opportunities for EVs

Estimated investment needed: \$1.85M annually

• Big Move 6 – Efficient, Emissions Free Buildings

- **Expand programs and incentives for electrification** of space and water heating
- Propose adding minimum building performance standards (BPS) for commercial building stock and resources to support
- Develop requirements for **residential energy disclosure** at point of listing/sale
- Support **home electrical panel** and service upgrades for electrification
- Evaluate **proactive upgrades of infrastructure** to support building and transportation electrification
- **Expand grid flexibility** options in residential and commercial buildings through battery storage and other solutions
- Explore Utility scale distributed energy resource solutions (solar and battery installations)

Estimated investment needed: \$2.65M annually

- **Big Move 4 – Convenient Transportation Choices: Active Modes**

- ***Rebates*** for E-bikes
- Install in-street ***protected bike lanes*** and bicycle and pedestrian crossing improvements
- Local match to leverage many state and federal grant opportunities available
- ***Grade-separated crossings***

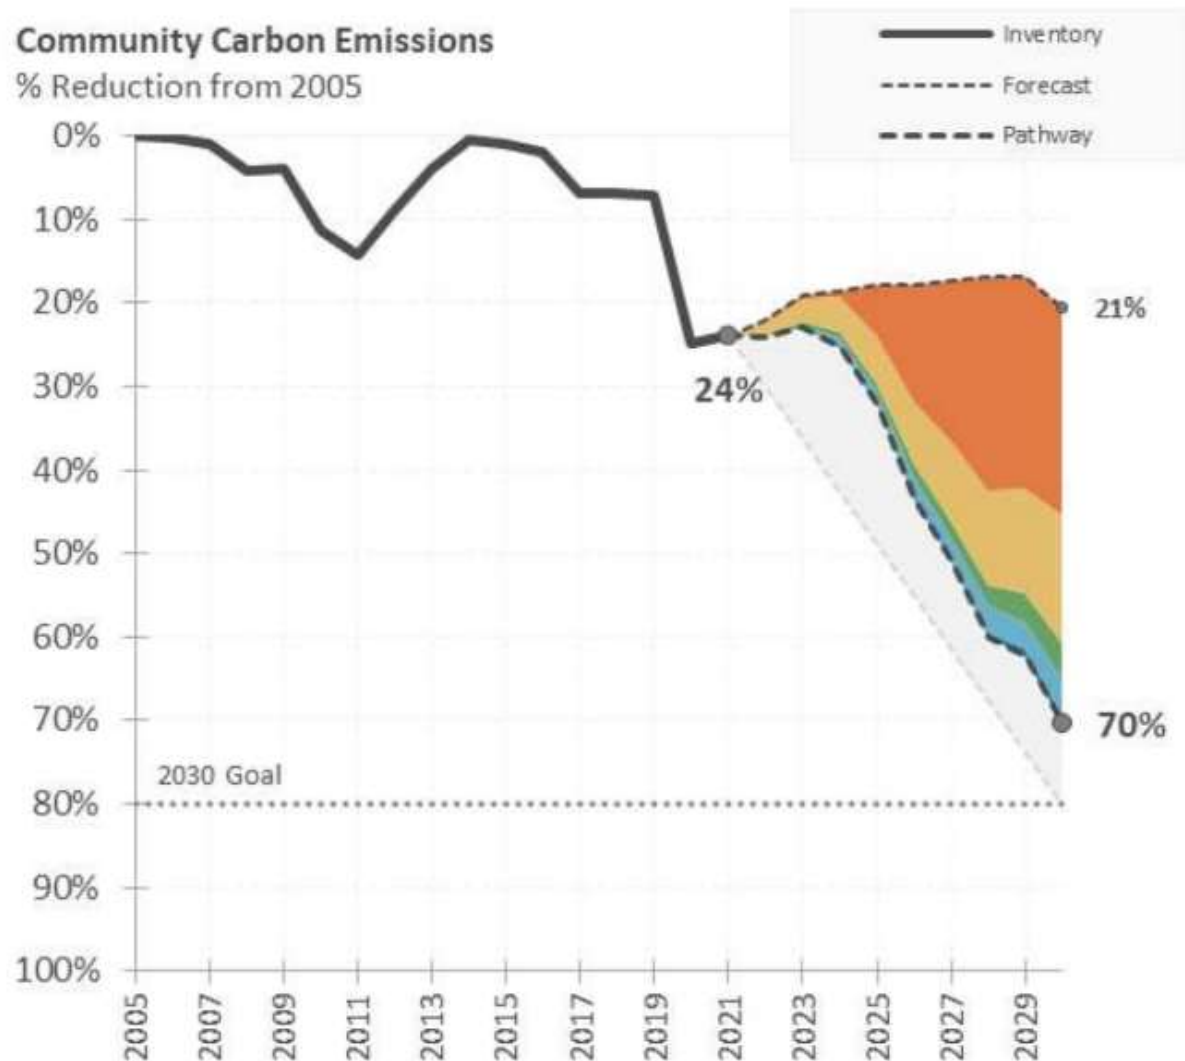

Estimated investment needed: \$1.5M annually

• Big Moves 2 & 10 – Zero Waste

- Improving recycling education and ***removing barriers to reusing and recycling***
- Growing the circular/sharing/reuse economy
- ***Increasing recycling services*** through local waste infrastructure and operational support
- Local waste infrastructure investments

Estimated investment needed: \$2M annually

Item 20. Community Emissions Pathways to 2030 GHG Goal

Pathways

2030

MEMORANDUM

Date: July 25, 2023
To: Mayor and City Council
From: Travis Storin, Chief Financial Officer
Ginny Sawyer, Policy and Project Manager
Thru: Tyler Marr, Deputy City Manager 
RE: Work Session Summary – July 25, 2023 Sustainable Funding

Mayor Arndt, and Councilmembers Canonico, Pignataro, Peel, Gutowsky, Francis, and Ohlson were present.

There was discussion, and ultimate direction, to switch the funding mechanisms and bring forward the following:

- A 3-Mill property tax increase dedicated to affordable housing in perpetuity; and
- A .5-cent dedicated tax to be split evenly (in 10-year timeframes) across parks and recreation, climate, and transit for 26 years (sunset in 2050.)

Discussion included:

- Affordable housing needs have been under-estimated/stated in the conversation.
- On-going uncertainty on number/amount of public pool facilities desired:
 - Conversation on supporting indoor aquatics at Southeast Community Center and completing whatever a Mulberry replacement might look like.
 - Suggestions to include any future recreation/aquatic facilities in the community capital tax (this would not include on-going maintenance.)
- Differing viewpoints provided on opportunity/responsibility to “solve” deficits in parks and whether asking the public to solve a problem that has been created through deferred maintenance over time is appropriate.
- Points made asking Councilmembers if commitments could be made to fund deferred maintenance (i.e. Rolland Moore work that has gone unfunded.)
- Continued discussion on not displacing existing funding for parks, transit, housing, or climate and maintain the intent of new revenue.

Based on current direction, staff is providing updated estimates and highlighting areas of needed clarity.

Presented option based on previous direction:

Property Tax	5 Mills	2023 - Indefinite	Parks, Recreation, and Aquatics Capital (Asset Management & New Construction)	\$10.8M: Parks & Rec Asset Management \$7.2M: New & Replacement Rec & Aquatics Capital
Sales Tax	1/4 Cent Dedicated Tax	2023 - 2050	Climate Goals, Transit, and Affordable Housing	\$3.3M: Climate Goals \$3.3M: Transit \$3.3M: Affordable Housing

Current direction provided:

Property Tax	3 Mills	2023 - Indefinite	Affordable Housing	\$10.8M
Sales Tax	1/2 Cent Dedicated Tax	2023 - 2050	33%: Climate Goals 33%: Transit 33%: Parks & Rec Asset Management	\$6.7M: Climate Goals \$6.7M: Transit \$6.7M: Parks & Rec Asset Management

Estimated annual costs to households:

Household Valuation	\$400K	\$500K	\$750K	\$1M
5 Mills & 1/4 Cent	\$ 221	\$ 256	\$ 346	\$ 435
3 Mills & 1/2 Cent	\$ 241	\$ 262	\$ 316	\$ 370

*Assumes a household size of 2.5 (American Community Survey 2021 1-year estimates, table DP04)

Revenue generation per Identified Gap:

Eligible Use	Previous Package	Council-Directed Package	Difference
Parks & Rec Asset Management	\$10.8M	\$6.7M	- \$4.1M
Rec & Aquatics New Capital	\$7.2M	\$0	- \$7.2M
Affordable Housing	\$3.3M	\$10.8M	+ \$7.5M
Climate Goals	\$3.3M	\$6.7M	+ \$3.4M
Transit	\$3.3M	\$6.7M	+ \$3.4M
Total	\$28M	\$30.8M	

New direction **does not provide** guaranteed funding for Southeast indoor swim lanes or full Mulberry replacement.

Ballot Preparation

New draft language for the measures includes:

Parks & Recreation, Climate, and Transit Tax

...WITH THE TAX REVENUES SPENT ONLY FOR THE FOLLOWING:

- 34% FOR THE REPLACEMENT, ACCESSIBLITLY, MAINTENANCE, AND UPGRADE OF PARKS AND RECREATION FACILITIES, AND FOR THE CONSTRUCTION OF INDOOR AND OUTDOOR AQUATICS FACILITIES,
- 33% FOR PROGRAMS AND PROJECTS ADVANCING GREENHOUSE GAS AND AIR POLLUTION REDUCTION, THE CITY'S 2030 GOAL OF 100% RENEWABLE ENERGY, AND THE CITY'S 2050 GOAL OF COMMUNITY-WIDE CARBON NEUTRALITY, AND
- 33% FOR TRANSIT;

AND WHILE CITY COUNCIL MAY EXERCISE ITS DISCRETION IN DECIDING THE TIMING OF SPENDING FOR EACH CATEGORY, THAT SPENDING SHALL BE RECONCILED TO THE STATED PERCENTAGES WITHIN THE FIRST 10 YEARS, THE SECOND 10 YEARS, AND THE LAST 8 YEARS OF THE TAX...

Affordable Housing

Potential ballot use language could include:

- *Increase funding appropriated to the City's housing programming to be used for purposes including, but not limited to, affordable and attainable housing development, preservation and rehabilitation of existing housing, support for home ownership, land acquisition for community housing development, and supportive services.*
- *Expanding City-led efforts identified in the Housing Strategic Plan to improve housing affordability including but not limited to development of energy efficiency and other improvements for multifamily housing units for low-income, homeless, senior and disabled populations; extending existing affordability restrictions for future generations; and expanding eligibility for housing programs that support low- and moderate-income residents facing housing instability.*

Deed restricted housing would be exempt from the new mills.

If Councilmembers have any feedback on any options presented to help prepare language and materials for August 15th please provide through City Manager and/or Deputy City Manager.

Additional Information

Low Energy Assistance Program (LEAP) eligibility is defined by utility payer. If a resident pays for their utilities —regardless of living within an affordable housing property—they are eligible to participate in LEAP if they meet the other respective terms set by the State of CO.

Affordable housing residents are not universally excluded from LEAP because of use of a housing voucher.

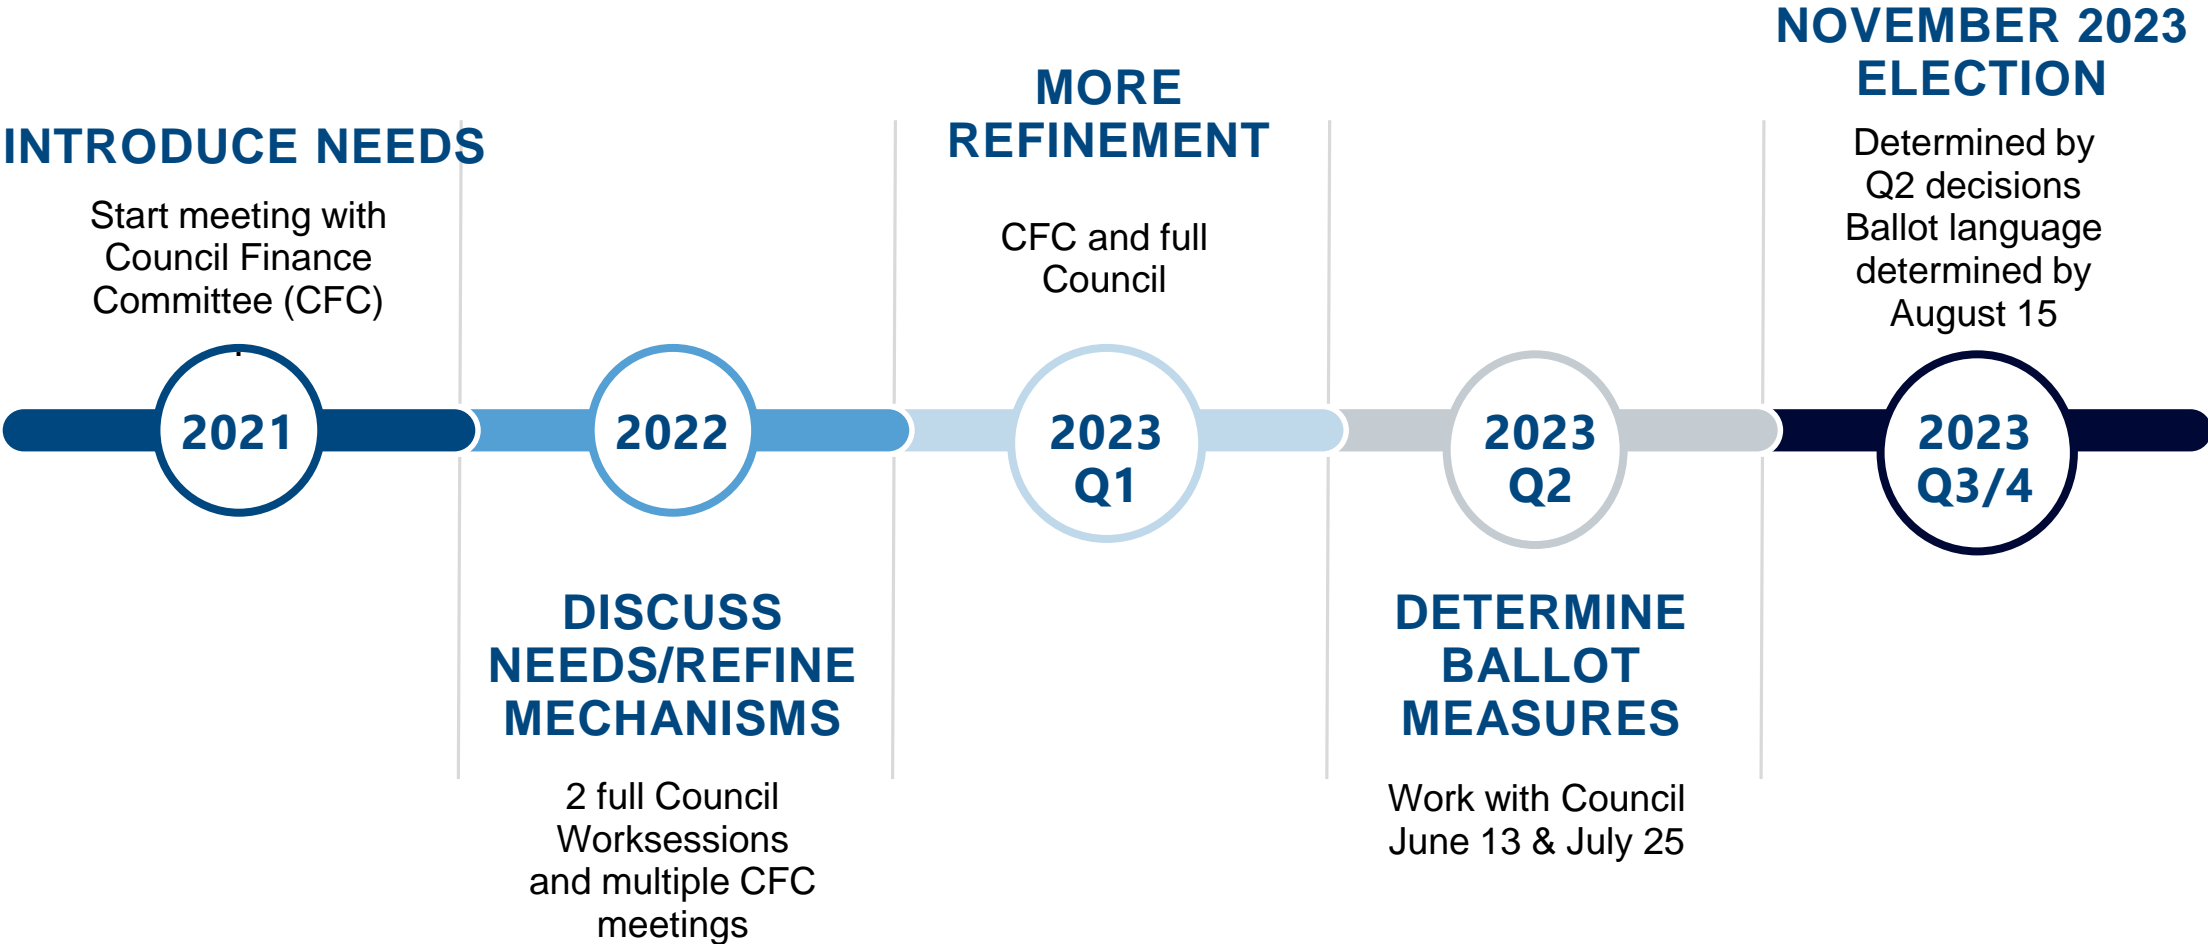

City Council Regular Meeting

Consideration of Ballot Measures to Address Sustainable Funding Initiative

Travis Storin, Chief Financial Officer

August 15, 2023

\$8-12M Annual Gap

Replacements & Masterplan Projects

\$14.7M Annual Need

Masterplan to Build Out Projects

\$8-9.5+ Annual Need

To Increase Affordable Housing Stock

\$9.5M+ Annual Need

To Accelerate Community Transition From Fossil Fuels

ANNUAL REVENUE NEEDS = \$40M TO \$46M+

- Early work with Council Finance Committee considering over 12 variations of taxes/fee
- Initial Direction:
 - Clearly define and articulate revenue needs and level of service considerations.
 - Thoroughly research funding options including impacts and the context of existing and potential new tax measures (local and regionally.)
 - Work to keep overall resident impact and tax burden as low as possible.
 - Consider existing dedicated tax renewals and associated election timelines in a strategic manner.
- Most feasible options to emerge:
 - Property Tax
 - Dedicated Sales Tax

Category	Funding Mechanism	Timing	Use	Annual Revenue Estimate	Resident Annual Impact
Property Tax	3 Mills	2023	Housing	\$11M	<ul style="list-style-type: none"> Residential increase of \$86 on \$400K home Residential increase of \$107 on \$500K home Residential increase of \$161 on \$750K home Residential increase of \$215 on \$1M home Commercial increase of \$376 on \$432K biz
Sales Tax	Additional ½ Cent Dedicated Tax	2023	Parks, Recreation, Transit, & Climate	\$20M	<ul style="list-style-type: none"> \$62 per resident/ \$156* per household Sales tax on food would remain at 2.25% Visitors also impacted
Total				\$32M+	<ul style="list-style-type: none"> \$256 net annual increase per household

*Assumes a household size of 2.5 (American Community Survey 2021 1-year estimates, table DP04)

Item 20. **Lot Option-3 Mills in Perpetuity for Housing**

Option A: State and define “Affordable Housing”

“Used for the **exclusive purpose of funding “affordable housing”, as defined by city council**, to include:”

Option B: Focus on “Strategic Housing” and reference tactics in the Housing Strategic Plan

“Used for the **exclusive purpose of advancing the city’s housing goals under the City’s 2021 housing strategic plan, as later amended or replaced by city council**, to include funding for:”

Both Options:

- The City’s development, construction, acquisition, operation, and maintenance of affordable housing;
- Grants and incentives for the development, construction, acquisition, operation, and maintenance of affordable housing by private and other public entities; and
- Programs and services provided by the City, other public entities, and non-profit organizations to subsidize affordable housing and provide housing support for it;

Item 20. **Lot Option- .50-cent Dedicated Tax, Sunset in 2050**

Option A: Even Split of Revenue

- 34% Parks facilities and replacement and construction of indoor and outdoor recreation and pool facilities
- 33% Programs and projects advancing green house gas reduction
- 33% Expanding the transit system

Option B: Greater percentage for Parks, Recreation, & Pools

- 50% Parks facilities and replacement and construction of indoor and outdoor recreation and pool facilities
- 25% Programs and projects advancing green house gas reduction
- 25% Expanding the transit system

Both Options:

- XX% for the replacement, upgrade, maintenance, and accessibility of parks facilities and for the replacement and construction of indoor and outdoor recreation and pool facilities,
- XX% for programs and projects advancing greenhouse gas and air pollution reduction, the city's 2030 goal of 100% renewable energy, and the city's 2050 goal of community-wide carbon neutrality, and
- XX% for expansion of the city's transit system, including construction of infrastructure, purchase of equipment, and expanded services;

AGENDA ITEM SUMMARY

City Council

STAFF

Sylvia Tatman-Burruss, Sr. Project Manager
Aaron Guin, Legal

SUBJECT

Items Relating to City Council’s Direction to Address Existing Occupancy Regulations.

EXECUTIVE SUMMARY

Possible Public Hearing and Motion(s) Regarding Protest(s) of Ballot Language.

- A. Resolution 2023-075 Directing City Staff to Prepare and Present to Council Amendments to the City of Fort Collins Land Use Code Increasing Occupancy Allowed in Residential Dwellings.
- B. Resolution 2023-076 Referring to the Registered Electors of the City of Fort Collins Resolution 2023-075, Concerning Amending the Fort Collins Land Use Code to Increase the Occupancy Allowed in Residential Dwellings.

Any protest of the proposed ballot language must be received no later than Monday, August 14, 2023, at 12:00 p.m. Protest(s) shall be heard, considered, and resolved by Council prior to adoption of the related Resolution. If protests are received, copies will be included in Council’s “Read Before the Meeting” packet.

STAFF RECOMMENDATION

Staff recommends adoption of Option 2 within the Resolution directing staff to draft amendments to the City’s Occupancy Ordinance that would expand housing efficiency while maintaining neighborhood quality.

BACKGROUND / DISCUSSION

The City has had an Ordinance regulating occupancy since 1963. The current version of this Ordinance, Section 3.8.16 of the Land Use Code (also known as “U+2”), limits occupancy of residential dwellings to a family of any size plus one additional unrelated occupant, or to no more than three unrelated occupants. Active enforcement of the Ordinance began in 2005, when violation was classified as a civil infraction. Since then, Council has had several in-depth conversations about occupancy and nuisance regulation as part of the community dialogue regarding neighborhood livability. Council also has reviewed regular evaluations of the occupancy Ordinance and its impacts.

Over the years, adjustments have been made to the Ordinance to allow for designations as extra occupancy rentals in some zoning districts through a development review process outlined in Land Use Code Section 3.8.28, and the addition of a Host Family Permit.

The City's Housing Strategic Plan formally adopted in March 2021, addresses how the occupancy Ordinance limits housing options and poses challenges related to fair housing compliance. Additional concerns with the occupancy Ordinance include underutilization of the City's existing housing stock and how the application of the definition of "family" in the Ordinance no longer reflects the demographic makeup of many households in the community.

Numerous types of analysis have been completed over time including existing conditions (Root Policy Research); housing stock analysis; occupancy cases and enforcement review; peer city comparisons; community surveys and engagement; and overall analysis by Corona Insights in 2005, 2009, and 2019.

The Council continues to hear strong arguments from the community on both the effectiveness of the Ordinance and its disadvantages.

The proposed Resolutions seek to acknowledge the history of the occupancy Ordinance, the change in demographics and economic conditions over the last twenty-odd years, the difficulty in applying a "family" definition and the desire to make effective modifications that will benefit the community. The proposed Resolutions also seek to confirm, through ballot referral, that the work necessary to amend the Ordinance will meet the needs and desires of the community.

Two options are presented in Resolution 2023-076. Both options eliminate familial relatedness as a mechanism for regulating occupancy. Resolution Option 1 proposes that occupancy limits be set based on a maximum number of adults living in the dwelling. Option 2 proposes more general language with instruction to staff to develop, by no later than a certain date, new regulations that increase the maximum occupancy allowed in residential dwellings based on the number of adults per dwelling unit, based on building size or number of sleeping rooms (bedrooms), or by some other method.

RESOLUTION 2023-075
OF THE COUNCIL OF THE CITY OF FORT COLLINS
DIRECTING CITY STAFF TO PREPARE AND PRESENT TO COUNCIL AMENDMENTS
TO THE CITY OF FORT COLLINS LAND USE CODE INCREASING OCCUPANCY
ALLOWED IN RESIDENTIAL DWELLINGS

WHEREAS, the City of Fort Collins began regulating occupancy in 1963; and

WHEREAS, the current version of the City’s occupancy ordinance, Section 3.8.16 of the Land Use Code (hereafter, the “Ordinance”), limits occupancy of residential dwellings to a family of any size plus one additional unrelated occupant, or to no more than three unrelated occupants; and

WHEREAS, active enforcement of the Ordinance began in 2005, when violation of the Ordinance was classified as a civil infraction; and

WHEREAS, since then, Council has had several in-depth conversations about occupancy and nuisance regulation as part of the community dialogue regarding neighborhood livability, and has reviewed regular evaluations of the Ordinance and its impacts; and

WHEREAS, adjustments have been made to the Ordinance over the years to allow for designations as extra occupancy rentals in some zoning districts through a development review process outlined in Land Use Code Section 3.8.28, as well as the addition of a Host Family Permit; and

WHEREAS, the City’s Housing Strategic Plan, formally adopted in March 2021, addresses how the Ordinance limits housing options and poses challenges related to fair housing compliance; and

WHEREAS, additional concerns with the Ordinance include underutilization of the City's existing housing stock and how the application of the definition of “family” in the Ordinance no longer reflects the demographic makeup of many households in the community; and

WHEREAS, numerous types of analysis have been completed over time, including analysis of existing conditions (Root Policy Research), housing stock analysis, occupancy cases and enforcement, peer city comparisons, and community surveys and engagement; and

WHEREAS, the City partnered with Corona Insights in 2005, 2009, and 2019 to evaluate the overall impacts of the Ordinance on the community; and

WHEREAS, compared to the previous survey in 2005, the 2019 Corona Insights study reported a dramatic shift in the demographics of households in violation of occupancy regulations, suggesting that, compared to 2005, a wider cross-section of households are bringing in roommates in violation of the Ordinance, likely in an effort to defray high housing costs; and

WHEREAS, from the period of 2005 to 2018, a price escalation of 78% for rent payments, paired with low rental vacancy rates under 5%, likely resulted in occupants “doubling up” to afford housing for a broad range of household configurations; and

WHEREAS, the City’s population was estimated to be between 169,000-172,000 residents in 2020-2021, and there were roughly between 14,718 and 17,718 more bedrooms in the City than there were residents; and

WHEREAS, these figures demonstrate a noteworthy underutilization of the City’s existing housing stock; and

WHEREAS, the issue of occupancy limits in the Land Use Code has become an issue of considerable interest and debate among residents of the City; and

WHEREAS, the City Council continues to hear strong arguments from the community on both the perceived effectiveness of regulation of occupancy as well as its perceived disadvantages; and

OPTION 1 WHEREAS, the City Council is of the opinion that City Staff should prepare and present for Council consideration amendments to the Land Use Code to eliminate familial relatedness as a mechanism for regulating occupancy and to increase the limits on occupancy to no more than [redacted] adults per dwelling unit.

OPTION 2 WHEREAS, the City Council is of the opinion that City Staff should prepare and present for Council consideration amendments to the Land Use Code to eliminate familial relatedness as a mechanism for regulating occupancy and to develop new regulations that increase the maximum occupancy allowed in residential dwellings based on the number of adults per dwelling unit, or based on building size or number of sleeping rooms (bedrooms), or by some other method.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

OPTION 1 Section 2. That City Staff are hereby directed to prepare amendments to the Land Use Code to increase the limits on occupancy to no more than [redacted] adults per dwelling unit and to eliminate familial relatedness as a mechanism for regulating occupancy, and present them to the City Council for consideration no later than [DATE].

OPTION 2 Section 2. That City Staff are hereby directed to prepare amendments to the Land Use Code to eliminate familial relatedness as a mechanism for regulating occupancy and to develop new regulations that increase the maximum occupancy allowed in residential dwellings based on the number of adults per dwelling unit, or based on building size or number of sleeping

rooms (bedrooms), or by some other method, and present them to Council for consideration no later than [DATE].

Passed and adopted at a regular meeting of the Council of the City of Fort Collins this 15th day of August, 2023.

Mayor

ATTEST:

Chief Deputy City Clerk

RESOLUTION 2023-076
OF THE COUNCIL OF THE CITY OF FORT COLLINS
REFERRING TO THE REGISTERED ELECTORS OF THE CITY OF FORT COLLINS
RESOLUTION 2023-075, CONCERNING AMENDING THE FORT COLLINS
LAND USE CODE TO INCREASE OCCUPANCY ALLOWED
IN RESIDENTIAL DWELLINGS

OPTION 1 WHEREAS, the City Council passed and adopted Resolution 2023-075, directing City Staff to prepare amendments to the Land Use Code to increase the limits on occupancy to no more than [redacted] adults per dwelling unit and to eliminate familial relatedness as a mechanism for regulating occupancy, and present them to the City Council for consideration no later than [DATE]; and

OPTION 2 WHEREAS, the City Council passed and adopted Resolution 2023-075, directing City Staff to prepare amendments to the Land Use Code to eliminate familial relatedness as a mechanism for regulating occupancy and to develop new regulations that increase the maximum occupancy allowed in residential dwellings based on the number of adults per dwelling unit, or based on building size or number of sleeping rooms (bedrooms), or by some other method, and present them to Council for consideration no later than [DATE]; and

WHEREAS, Article X, Section 3 of the Charter of the City of Fort Collins authorizes the City Council to refer any adopted ordinance or resolution to the vote of the people at a regular election; and

WHEREAS, accordingly, the City Council desires to refer to the Fort Collins electors Resolution 2023-075 which directs City staff to draft amendments to the Land Use Code as stated below.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FORT COLLINS as follows:

Section 1. That the City Council hereby makes and adopts the determinations and findings contained in the recitals set forth above.

Section 2. That the following ballot question, with its title and submission clause, is hereby adopted for referring Resolution 2023-075, concerning amending the Fort Collins Land Use Code to increase the limits on occupancy in residential dwellings, to the voters at the November 2023 Election:

**CITY-REFERRED
RESOLUTION 2023-075
(Occupancy Limits)**

OPTION 1 Shall Resolution 2023-075, directing City Staff to prepare amendments to the Land Use Code to increase the occupancy allowed to no more than [redacted] adults per dwelling

unit and to eliminate familial relatedness as a mechanism for regulating occupancy, and present them to the City Council for consideration no later than [DATE], be approved?

_____ Yes/For
_____ No/Against

OPTION 2 Shall Resolution 2023-075, directing City Staff to prepare amendments to the Land Use Code to eliminate familial relatedness as a mechanism for regulating occupancy and to develop new regulations that increase the maximum occupancy allowed in residential dwellings based on the number of adults per dwelling unit, or based on building size or number of sleeping rooms (bedrooms), or by some other method, and present them to Council for consideration no later than [DATE], be approved?

_____ Yes/For
_____ No/Against

Passed and adopted at a regular meeting of the Council of the City of Fort Collins this 15th day of August 2023.

Mayor

Chief Deputy City Clerk

Consideration of Occupancy Related Ballot Measure

City Council Regular Meeting

Sylvia Tatman-Burruss, Sr. Project Manager

Arnon Guin, Legal

August 15, 2023

The City's occupancy ordinance limits occupancy of residential dwellings to a family of any size plus one additional unrelated occupant *OR* no more than three unrelated occupants.

Active enforcement of the ordinance (Section 3.8.16 of the Land Use Code, also called "U+2") began in 2005.

Adjustments have been made to the Ordinance allowing for extra occupancy designation in some zones and the addition of a Host Family Permit.

Numerous types of analysis have been completed demonstrating trends over time and anticipated and perceived impacts and opinions.

City Council continues to hear strong arguments from the community on both the effectiveness and the detriments of the ordinance.

Council discussion under other business at the July 25, 2023 meeting resulted in ballot resolution and question being brought forward.

Purpose:

Refer a question to voters on desire for Council to direct staff to consider changes to the existing ordinance that would:

- Allow some increase to the allowed occupancy based on housing type/size, zone, or other policy measure
- Remove the existing definition of family and replace with non-familial language

Materials include two options within the Resolution and associated ballot language. Both options eliminate familial relatedness as regulation mechanism, and both allow for an increase from the currently allowed occupancy.

Option 1:

Proposes occupancy limits set based on a max number of adults allowed to reside in a dwelling (to be filled in by Council.)

Option 2:

Proposes more general language to address new occupancy regulations in residential dwellings based on the number of adults per dwelling unit, building size and/or bedrooms, or by some other method.

AGENDA ITEM SUMMARY

City Council

 Chris Hayes, Legal

SUBJECT

Appeal of Planning and Zoning Commission Approval of the Ziegler-Corbett Overall Development Plan Major Amendment.

EXECUTIVE SUMMARY

The purpose of this quasi-judicial item is to consider an appeal of the Planning and Zoning Commission's decision on March 23, 2023, approving the Ziegler-Corbett Overall Development Plan Major Amendment (#MJA22004 or "Major Amendment") located on the west side of Ziegler Road between Front Range Village and The English Ranch neighborhood.

Two Notices of Appeal were filed, both on April 5, 2023, alleging that the Planning and Zoning Commission failed to properly interpret and apply relevant provisions of the Land Use Code, City Code, and/or Charter. One of the appeals also alleges the Commission failed to conduct a fair hearing by ignoring previously established rules of procedure.

BACKGROUND / DISCUSSION

Overall Development Plan Overview

An Overall Development Plan (ODP) is required by Land Use Code Section 2.1.3 when a project will be developed in multiple phases over time. Per the Land Use Code, an ODP's purpose and effect is to:

establish general planning and development control parameters for projects that will be developed in phases with multiple submittals while allowing sufficient flexibility to permit detailed planning in subsequent submittals. Approval of an overall development plan does not establish any vested right to develop property in accordance with the plan.

An ODP establishes high-level details that future project development plan (PDP) submittals are evaluated against, including proposed land-uses, density/intensity, stormwater drainage, and transportation access and connectivity.

Ziegler-Corbett Overall Development Plan Major Amendment (MJA220004) Project Overview

- The original Ziegler-Corbett Overall Development Plan (ODP) was approved in February 2022 with the following characteristics:

- Mixed-use development on approximately 31 acres in the Harmony Corridor (HC) zone district. The ODP proposes 400-700 dwelling units, 50,000 square feet of office or community facility space, and a childcare center.
- The residential dwellings are comprised of three housing types: single-family attached, multifamily, and mixed-use dwellings.
- Primary access to the site along Ziegler Road is located midway between Hidden Pond Drive to the north and the Front Range Village Shopping Center service access to the south using a 'Channelized T' intersection. Secondary access to the site is gained via Corbett Drive to the east.
- Two modifications of standards and one alternative compliance request were approved with the ODP:
 - Modification of standard to permit a greater percentage of secondary uses (e.g., residential dwellings) in the Harmony Corridor (HC) zone district.
 - Modification of standard to permit portions of the site to incorporate a 4th floor for residential-only buildings, primarily abutting Front Range Village.
 - Alternative compliance to require a bike/pedestrian connection from the ODP to Paddington Road in The English Ranch Neighborhood instead of a local street connection with vehicular access, which would otherwise be required by Land Use Code Section 3.6.3(E) and (F).
- The Major Amendment challenged by this appeal has the following characteristics:
 - Enlarging the size of the original ODP by incorporating one additional 1.4-acre parcel ('Young Property').
 - Reconfiguring the location and traffic control for the site's primary access from Ziegler Road.
 - Shifting primary access to the site along Ziegler Road northward to align with Hidden Pond Drive and the construction of a new privately funded traffic signal.
 - Because of spacing requirements, this new signal would prevent the installation of a signal at the nearby intersection of Ziegler Road and Paddington Road/Grand Teton Place directly to the north.
 - Current residents use the Ziegler/Paddington/Grand Teton intersection, which currently lacks a traffic signal, to access The English Ranch and Woodland Park neighborhoods, English Ranch Park, and Linton Elementary School.
 - No changes to the land uses or development intensity of the original ODP.
 - There are minor shifts in the proposed location of land uses and street network within the ODP as a result of the change in size and shape of the ODP boundary.

Policy & Project Timeline Related to Ziegler-Corbett Overall Development Plan Major Amendment:

- (1990s - 2011) – Prior versions of the Master Street Plan indicate that Corbett Drive, a collector street, should connect from Harmony Road northward to Paddington Road in The English Ranch Neighborhood. Part of this collector street alignment traverses what is now the Ziegler-Corbett Overall Development Plan site.
- (Mid-2000s) – The Harmony Corridor Plan is updated to change land use designations near Harmony and Ziegler Roads to permit the construction of Front Range Village, a lifestyle/regional shopping center. During construction, Front Range Village extends Corbett Drive northward from Harmony Road to its current terminus along the western edge of the Ziegler-Corbett Overall Development Plan site.
- (2010-2011) – During updates to City Plan and the Master Street Plan, English Ranch neighbors request removal of the Corbett Drive connection on the Master Street Plan to Paddington Road in The English Ranch neighborhood. The request relates to concerns about cut-through traffic through the neighborhood destined for Front Range Village if the street connection is made. City staff conduct

neighborhood meetings, surveys, and a work session with City Council to evaluate the request. At a 2010 work session, City Council indicates support for removing the connection and the Master Street Plan is amended in 2011 to remove the Corbett Drive collector street connection to Paddington Road.

The 2010 work session materials describe tradeoffs and potential scenarios resulting from the removal of the Corbett Drive connection, including that a local street connection from the ODP site to Paddington Road may still be required or that the location of traffic signals and access points along Ziegler Road may be affected.

- (2021-2022) The Applicant submits the Ziegler-Corbett Overall Development Plan application on October 8, 2021, for a mixed-use project as described in the project overview section above. The original ODP excludes the Young Property, which limits the location where the project may take access from Ziegler Road. The project is also approved with alternative compliance to Land Use Code Section 3.6.3(E) and (F) to provide a bicycle/pedestrian connection to the north of the ODP instead of the local street connection this Section would otherwise require. The Planning and Zoning Commission approves the original ODP on February 17, 2022.
- (2022-2023) The Applicant applies for a Major Amendment to the original ODP on November 15, 2022. The amendment proposes incorporating the Young Property into the boundaries of the original ODP and shifting the project's Ziegler Road access to align with Hidden Pond Drive and the construction of a privately funded traffic signal.
 - Like the original ODP, approved in 2022, the Major Amendment relies on alternative compliance to Land Use Code Section 3.6.3(E) and (F). This section would otherwise require a local street connection from the ODP site and the English Ranch neighborhood to the north.

The Planning and Zoning Commission approves the Major Amendment on March 23, 2023.

Notices of Appeal

On April 5, 2023, Appellants Craig Latzke, Lacey Joyal, and Tamara Burnside filed two notices of appeal. Both appeals are attached.

The first appeal, filed by Mr. Latzke, alleges that the Planning and Zoning Commission substantially ignored its previously established rules of procedure by inviting the project applicant to address the Commission on a proposed condition during deliberation.

It further alleges a failure to properly interpret and apply the following Land Use Code, City Code or Charter provisions:

- Land Use Code Section 3.6.3 (Street Pattern and Connectivity Standards)
- City of Fort Collins City Code, Policy LIV 4.2

The second appeal, filed by Ms. Joyal and Ms. Burnside, alleges a failure to properly interpret and apply the following Land Use Code, City Code or Charter provisions:

- Land Use Code Section 3.6.3 (Street Pattern and Connectivity Standards)
- Land Use Code Section 1.2.2 (Purpose)
- City of Fort Collins City Code, Policy LIV 4.2

Relevant materials and files on record for the appeal of the March 23, 2023, Planning and Zoning Commission decision are attached and highlighted below:

March 23, 2023, Planning and Zoning Commission Hearing

- Video of hearing and verbatim transcript
- Major Amendment Staff report and various attachments such as the original ODP staff report, ODP plan drawings, and traffic studies
- Staff presentation
- Applicant presentation
- Supplemental documents and other items presented at the hearing

August 15, 2023, City Council Appeal Hearing

- Public Hearing Notice
- Notices of Appeal
- Agenda Item Summary
- Staff presentation

The issues for Council to consider in the appeal are:

- 1) Did the Planning and Zoning Commission fail to conduct a fair hearing because it substantially ignored previously established rules of procedure by allowing the Applicant to address the Commission during deliberation about a proposed condition for approval?
- 2) Did the Planning and Zoning Commission fail to properly interpret and apply Land Use Code Section 3.6.3 - Street Pattern and Connectivity Standards?
- 3) Did the Planning and Zoning Commission fail to properly interpret and apply Land Use Code Section 1.2.2 – Purpose?
- 4) Did the Planning and Zoning Commission fail to properly interpret and apply City Plan Policy LIV 4.2?

First Issue on Appeal:

Did the Planning and Zoning Commission substantially ignore previously established rules of procedure by allowing the project applicant to address the Commission during deliberation?

The Latzke Notice of Appeal alleges the Planning and Zoning Commission ignored rules of procedure by allowing the Applicant to address the Commission on a proposed condition during deliberation—after the Chair had previously remarked there would be no further opportunity to engage with the Applicant. The condition proposed during deliberations would have burdened the Applicant.

Pertinent evidence in the record addressing the Appellant’s argument includes the following (please note: the parties to the appeal may cite to additional material in the record related to this issue):

Document	Page Number	Notes
Verbatim Transcript	21	Chair comments that this will be the last opportunity to engage with the Applicant prior to deliberation.
	30	Invitation from the Commission Chair during deliberations for the Applicant to address a potential condition of approval that the Commission was deliberating imposing upon the Applicant.

Second Issue on Appeal:

Did the Planning and Zoning Commission fail to properly interpret and apply Land Use Code Section 3.6.3 (Street Pattern and Connectivity Standards)?

The Latzke Notice of Appeal alleges the Planning and Zoning Commission failed to properly interpret and apply Land Use Code Section 3.6.3(E) and (F). The Notice of Appeal also references the alternative compliance to these Code sections approved with the original ODP (Land Use Code Section 3.6.3(H)). These Land Use Code Standards read as follow:

Land Use Code Section 3.6.3(E) Distribution of Local Traffic to Multiple Arterial Streets.

All development plans shall contribute to developing a local street system that will allow access to and from the proposed development, as well as access to all existing and future development within the same section mile as the proposed development, from at least three (3) arterial streets upon development of remaining parcels within the section mile, unless rendered infeasible by unusual topographic features, existing development or a natural area or feature.

The local street system shall allow multi-modal access and multiple routes from each development to existing or planned neighborhood centers, parks and schools, without requiring the use of arterial streets, unless rendered infeasible by unusual topographic features, existing development or a natural area or feature.

Land Use Code Section 3.6.3(F) Utilization and Provision of Sub-Arterial Street Connections to and From Adjacent Developments and Developable Parcels.

All development plans shall incorporate and continue all sub-arterial streets stubbed to the boundary of the development plan by previously approved development plans or existing development. All development plans shall provide for future public street connections to adjacent developable parcels by providing a local street connection spaced at intervals not to exceed six hundred sixty (660) feet along each development plan boundary that abuts potentially developable or redevelopable land.

Land Use Code Section 3.6.3(H) Alternative Compliance.

Upon request by an applicant, the decision maker may approve an alternative development plan that may be substituted in whole or in part for a plan meeting the standards of this Section.

1) *Procedure.* Alternative compliance development plans shall be prepared and submitted in accordance with submittal requirements for plans as set forth in this Section. The plan and design shall clearly identify and discuss the alternatives proposed and the ways in which the plan will better accomplish the purpose of this Section than would a plan which complies with the standards of this Section.

2) *Review Criteria.* To approve an alternative plan, the decision maker must first find that the proposed alternative plan accomplishes the purposes of this Division equally well or better than would a plan and design which complies with the standards of this Division, and that any reduction in access and circulation for vehicles maintains facilities for bicycle, pedestrian and transit, to the maximum extent feasible.

In reviewing the proposed alternative plan, the decision maker shall take into account whether the alternative design minimizes the impacts on natural areas and features, fosters nonvehicular access, provides for distribution of the development's traffic without exceeding level of service standards, enhances neighborhood continuity and connectivity and provides direct, sub-arterial street access to any parks, schools, neighborhood centers, commercial uses, employment uses

and Neighborhood Commercial Districts within or adjacent to the development from existing or future adjacent development within the same section mile.

The Lutzke Notice of Appeal alleges three errors:

- The Major Amendment changes the original ODP significantly such that the previously approved alternative compliance to 3.6.3(E) and (F) are no longer applicable.
- The alternative compliance in the Major Amendment is substantially different from the alternative compliance in the original ODP as the Major Amendment presents different considerations and tradeoffs and that alternative compliance in the Major Amendment has additional negative consequences.
- City staff and the Planning and Zoning Commission should have been aware of the prior City Council decision when removing the Corbett Drive collector street connection as a local street connection should still be made.

The Joyal Notice of Appeal alleges the original ODP’s alternative compliance request was based on the property not containing the Young Property that was added during the Major Amendment proposal. It argues that additional acreage of the Young Property opens additional traffic mobility considerations, and the original alternative compliance should not have been continued or considered.

Pertinent evidence in the record addressing the Appellant’s argument includes the following (please note: the parties to the appeal may cite to additional material in the record related to this issue):

Document	Page Number	Notes
Staff Report Attachment (Feb 2022 ODP Staff Report)	13-16	Staff evaluation of alternative compliance request to Section 3.6.3(E) and (F)
Staff Report	3-4	Overview of Major Amendment considerations and neighborhood input on a local street connection
Staff Report Attachment (Traffic Study)	17, 21-30	Operational Analysis, Level of Service, and Conclusion Recommendations from Major Amendment ODP Traffic Study
Staff Report Attachment (2010 Council Work Session Materials - Corbett Drive Connection)	9-12, 21-29	Staff overview of tradeoffs and scenarios for future development if the Corbett Drive collector street connection is removed from Master Street Plan.
Staff Report Attachment (January 2023 Neighborhood Meeting)	2, 4	Neighbor comments discussing tradeoffs / consequences of having no local street connection and no signalized intersection available for Woodland Park residents.
Staff Report Attachment (Public Comments)	1-3, 5, 9-13	Public comments referencing tradeoffs to a signal at the Ziegler/Paddington/Grand Teton or Ziegler/Hidden Pond intersections.

Document	Page Number	Notes
Supplemental Documents (Public Comments received after Final Hearing Packet Posted)	1, 5-8, 10, 12, 15, 20, 22-23, 26, 28, 30	Public comments referencing tradeoffs to a signal at the Ziegler/Paddington/Grand Teton or Ziegler/Hidden Pond intersections.
Verbatim Transcript	5-7	Staff summary of major traffic considerations and public input on street connection and signal scenarios.
	8-13	Commission questions with City and Applicant Traffic Engineers on local street connection, signal warrants, Ziegler Road traffic conditions and delays, Paddington Rd's traffic volumes and status as a collector street.
	10-11	Question and response regarding bicycle/pedestrian detection at a proposed Ziegler/Hidden Pond signalized intersection.
	13-19	Various public testimony regarding tradeoffs of the alternative compliance outcome (no local street connection) and considerations of a signal at either Ziegler/Paddington or Ziegler/Hidden Pond intersections.
	23	Commission deliberation on review of the alternative compliance request as part of the Major Amendment and references to prior Front Range Village development agreement on potential Paddington Road street connection traffic calming.
	25, 27, 31-32	Continued deliberation on alternative compliance review and meeting requirements for LUC Section 3.6.3(E) and (F)

Third Issue on Appeal:

Did the Planning and Zoning Commission fail to properly interpret and apply Land Use Code Section 1.2.2 – Purpose?

The Joyal Notice of Appeal alleges that the Commission failed to properly interpret and apply Land Use Code Section 1.2.2(K), which sets out the general purpose of the Land Use Code:

1.2.2 - Purpose

The purpose of this Code is to improve and protect the public health, safety and welfare by:

- A) ensuring that all growth and development which occurs is consistent with this Code, City Plan and its adopted components, including, but not limited to, the Structure Plan, Principles and Policies and associated sub-area plans.
- B) encouraging innovations in land development and renewal.

- C) fostering the safe, efficient and economic use of the land, the city's transportation infrastructure, and other public facilities and services.
- D) facilitating and ensuring the provision of adequate public facilities and services such as transportation (streets, bicycle routes, sidewalks and mass transit), water, wastewater, storm drainage, fire and emergency services, police, electricity, open space, recreation, and public parks.
- E) avoiding the inappropriate development of lands and providing for adequate drainage and reduction of flood damage.
- F) encouraging patterns of land use which decrease trip length of automobile travel and encourage trip consolidation.
- G) increasing public access to mass transit, sidewalks, trails, bicycle routes and other alternative modes of transportation.
- H) reducing energy consumption and demand.
- I) minimizing the adverse environmental impacts of development.
- J) improving the design, quality and character of new development.
- K) fostering a more rational pattern of relationship among residential, business and industrial uses for the mutual benefit of all.**
- L) encouraging the development of vacant properties within established areas.
- M) ensuring that development proposals are sensitive to the character of existing neighborhoods.
- N) ensuring that development proposals are sensitive to natural areas and features.
- O) encouraging a wide variety of housing opportunities at various densities that are well-served by public transportation for people of all ages and abilities.

The Notice of Appeal alleges the Commission did not properly interpret and apply subsection (K) (emphasized above) on the basis that a signalized intersection at the Ziegler and Hidden Pond does not foster a rational or common sense pattern of development. This appeal argues that nearby residents instead favor and anticipate a traffic signal at the Ziegler/Paddington/Grand Teton intersection.

The Land Use Code Purpose statements contained in Section 1.2.2 outline the broad goals and intent of the Land Use Code and what it aims to achieve in the context of development standards.

Pertinent evidence in the record addressing the Appellant's argument includes the following (please note: the parties to the appeal may cite to additional material in the record related to this issue):

Document	Page Number	Notes
Staff Report	3-4	Overview of Major Amendment considerations and neighborhood input on a local street connection
Staff Report Attachment (January 2023 Neighborhood Meeting)	All	Neighbor comments discussing desirability of a traffic signal at the Ziegler/Paddington/Grand Teton intersection and history of traffic impacts and concerns regarding the intersection.
Staff Report Attachment (Public Comments)	All	Neighbor comments discussing desirability of a traffic signal at the Ziegler/Paddington/Grand Teton intersection and history of traffic impacts and concerns regarding the intersection.

Document	Page Number	Notes
Supplemental Documents (Public Comments received after Final Hearing Packet Posted)	All	Neighbor comments discussing desirability of a traffic signal at the Ziegler/Paddington/Grand Teton intersection and history of traffic impacts and concerns regarding the intersection.
Verbatim Transcript	5-7	Staff summary of major traffic considerations and public input on street connection and signal scenarios.
	13-19	Various public testimony regarding tradeoffs of the alternative compliance outcome (no local street connection) and considerations of a signal at either Ziegler/Paddington or Ziegler/Hidden Pond intersections.

Fourth Issue on Appeal:

Did the Planning and Zoning Commission fail to properly interpret and apply City Code Policy LIV 4.2?

Both Notices of Appeal allege the Planning and Zoning Commission failed to properly interpret and apply City Plan Policy LIV 4.2. LIV 4.2 is a policy statement from City Plan, the comprehensive plan, rather than a specific Land Use Code, City Code, or Charter standard. LIV 4.2 states:

Policy LIV 4.2 - COMPATIBILITY OF ADJACENT DEVELOPMENT

Ensure that development that occurs in adjacent districts complements and enhances the positive qualities of existing neighborhoods. Developments that share a property line and/or street frontage with an existing neighborhood should promote compatibility by:

- » Continuing established block patterns and streets to improve access to services and amenities from the adjacent neighborhood;
- » Incorporating context-sensitive buildings and site features (e.g., similar size, scale and materials); and
- » Locating parking and service areas where impacts on existing neighborhoods—such as noise and traffic—will be minimized.

The Notices of Appeal allege the Major Amendment’s proposal does not include a street connection to the English Ranch neighborhood and would therefore prevent a traffic signal at Ziegler/Paddington. These appeals argue that this does not continue an established block pattern or improve access to services and amenities.

Pertinent evidence in the record addressing the Appellant’s argument includes the following (please note: the parties to the appeal may cite to additional material in the record related to this issue):

Document	Page Number	Notes
Staff Report Attachment (Feb. 2022 Staff Report)	13-16	Staff evaluation of alternative compliance request to Section 3.6.3(E) and (F)

PUBLIC OUTREACH

Three neighborhood meetings were held for the original ODP and Major Amendment on the following dates:

- September 8, 2021 – First Neighborhood Meeting: Original ODP
- February 2, 2022 – Second Neighborhood Meeting: Original ODP
- January 5, 2023 – Third Neighborhood Meeting: ODP Major Amendment

In addition, select City staff held meetings with a small group of neighbors from The English Ranch neighborhood on March 6, 2023, and a small group of neighbors from the Woodland Park Estates neighborhood on March 21, 2023.

PUBLIC HEARING NOTICE

Appeals of the Planning and Zoning Commission Decision regarding the Ziegler/Corbett ODP Major Amendment 220004 located at 4105 Ziegler Road

The Fort Collins City Council will hold a public hearing on the enclosed appeals.

Appeal Hearing Date: August 15, 2023

Time: 6:00 pm (or as soon thereafter as the matter may come on for hearing)

Location: Council Chambers, City Hall, 300 LaPorte Avenue, Fort Collins, CO

Agenda Materials: Available after 3 pm, August 10, 2023, in the City Clerk's office and at fcgov.com/agendas.

Why am I receiving this notice? City Code requires that a Notice of Hearing be provided to Parties-in-Interest, which means you are the applicant of the project being appealed, have a possessory or proprietary interest in the property at issue, received a City mailed notice of the hearing that resulted in the decision being appealed, submitted written comments to City staff for delivery to the decision maker prior to the hearing resulting in the decision being appealed, or addressed the decision maker at the hearing that resulted in the decision being appealed.

Further information is available in the Appeal guidelines online at fcgov.com/appeals.

The Notices of Appeal and any attachments, any new evidence that has been submitted and presentations for the Appeal Hearing can be found at fcgov.com/appeals.

If you have questions regarding the appeal process, please contact the City Clerk's Office (970.221.6515). For questions regarding the project itself, please contact Paul Sizemore, Community Development and Neighborhood Services Director (psizemore@fcgov.com or 970.224.6140).

The City of Fort Collins will make reasonable accommodations for access to City services, programs, and activities and will make special communication arrangements for persons with disabilities. Please call the City Clerk's Office at 970.221.6515 (V/TDD: Dial 711 for Relay Colorado) for assistance.

A petición, la Ciudad de Fort Collins proporcionará servicios de acceso a idiomas para personas que no dominan el idioma inglés, o ayudas y servicios auxiliares para personas con discapacidad, para que puedan acceder a los servicios, programas y actividades de la Ciudad. Para asistencia, llame al 221-6515 (V/TDD: Marque 711 para Relay Colorado). Por favor proporcione 48 horas de aviso previo cuando sea posible.

A handwritten signature in blue ink that reads "Rita Knoll".

Rita Knoll, Chief Deputy City Clerk

April 5, 2023

NOTICE OF APPEAL

FOR CITY CLERK'S
USE ONLY:
DATE FILED: 4-5-2023
INITIALS:

Action Being Appealed: Zielger Corbett ODP
MJA 220004

Date of Action: Mar 23, 2023 Decision Maker: Planning and Zoning Commission

Appellant/Appellant Representative (if more than one appellant):

Name: Lacey Joyal Phone #: (970) 231-8273
Address: 3209 Grand Canyon ST Email: lacey_joyal@yahoo.com
Fort Collins, CO 80525

INSTRUCTIONS

For each allegation marked below, attach a separate summary of the facts contained in the record which support the allegation of no more than two pages, Times New Roman 12-point font. Please restate allegation at top of first page of each summary.

GROUND S FOR APPEAL

The Decision Maker committed one (1) or more of the following errors (check all that apply):

- Failure to properly interpret and apply relevant provisions of the City Code, the Land Use Code, and Charter. List relevant Code and/or Charter provision(s) here, by specific Section and subsection/subparagraph:
 Land Use Code 1.2.2 (Purpose)
 Land Use Code 3.b.3 (Street pattern and Connectivity Standards)
 FC City Code Policy LIV 4.2 (Compatibility)

Failure to conduct a fair hearing in that:

- (a) The Board, Commission, or other Decision Maker exceeded its authority or jurisdiction as contained in the Code or Charter. [New evidence not allowed]
- (b) The Board, Commission or other Decision Maker substantially ignored its previously established rules of procedure. [New evidence not allowed]
- (c) The Board, Commission or other Decision Maker considered evidence relevant to its findings which was substantially false or grossly misleading. [New evidence allowed]
- (d) The Board, Commission or other Decision Maker improperly failed to receive all relevant evidence offered by the appellant. [New evidence allowed]
- (e) The Board, Commission or other Decision Maker was biased against the appellant by reason of a conflict of interest or other close business, personal or social relationship that interfered with the Decision Maker's independence of judgment. [New evidence allowed]

NEW EVIDENCE

All new evidence the appellant wishes Council to consider at the hearing on the appeal must be submitted to the City Clerk within seven (7) calendar days after the deadline for filing a Notice of Appeal and must be clearly marked as new evidence. No new evidence will be received at the hearing in support of these allegations unless it is submitted to the City Clerk by the deadline (7 days after the deadline to file appeal) or offered in response to questions posed by Councilmembers at the hearing.

APPELLANTS

Parties-in-interest have the right to file an appeal.

A party-in-interest is a person who, or organization which, has standing to appeal the final decision of a board, commission or other decision maker. Such standing to appeal is limited to the following:

- The applicant.
- Anyone who owns or occupies the property which was the subject of the decision made by the board, commission or other decision maker.
- Anyone who received the mailed notice of, or spoke at, the hearing of the board, commission or other decision maker.
- Anyone who provided written comments to the appropriate City staff for delivery to the board, commission or other decision maker prior to or at the hearing on the matter that is being appealed.
- A City Councilmember.

Fort Collins CO 80521

RE: Notice of appeal for the ODP Major Amendment Decision MJA220004.

Dear City of Fort Collins Council Members,

This appeal is made by a cohort of residents of the affected neighborhoods near the Ziegler/Corbett ODP. This written notice of appeal is filed within the required 14 calendar days following the decision made March 23, 2023 by the Planning and Zoning Commission. The commission vote in favor of MJA220004.

We believe the Planning and Zoning commission is not applying these three relevant provisions of the City Code, the Land Use Code and charter to the Major Amendment MJA220004:

1. Land Use Code 1.2.2-Purpose

(K) “Fostering a **more rational** pattern of relationship among residential, business, and industrial uses for the mutual benefit of all.” (emphasis mine)

2. City of Fort Collins Land Use Code

3.6.3 - Street Pattern and Connectivity Standards

(E) Distribution of Local Traffic to Multiple Arterial Streets. *All development plans shall contribute to developing a local street system that will allow access to and from the proposed development, as well as access to all existing and future development within the same section mile as the proposed development, from at least three (3) arterial streets upon development of remaining parcels within the section mile, unless rendered infeasible by unusual topographic features, existing development or a natural area or feature.*

The local street system shall allow multi-modal access and multiple routes from each development to existing or planned neighborhood centers, parks and schools, without requiring the use of arterial streets, unless rendered infeasible by unusual topographic features, existing development or a natural area or feature.

(F) Utilization and Provision of Sub-Arterial Street Connections to and From Adjacent Developments and Developable Parcels. *All development plans shall incorporate and continue all sub-arterial streets stubbed to the boundary of the development plan by previously approved development plans or existing development. All development plans shall provide for future public street connections to adjacent developable parcels by providing a local street connection spaced at intervals not to exceed six hundred sixty (660) feet along each development plan boundary that abuts potentially developable or redevelopable land.*

3. City of Fort Collins City Code

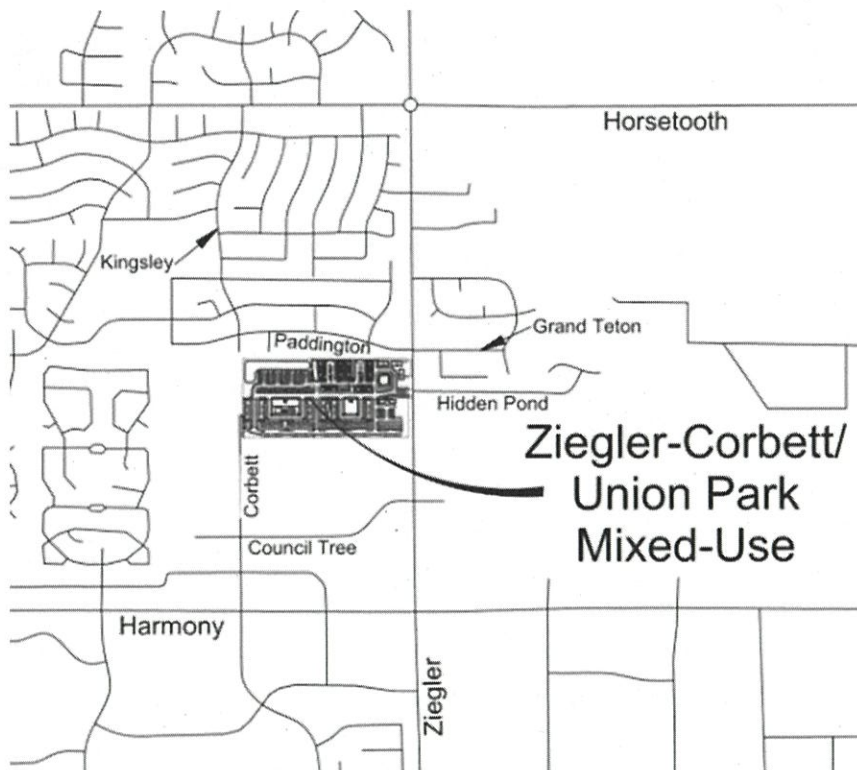

POLICY LIV 4.2 - COMPATIBILITY OF ADJACENT DEVELOPMENT

Ensure that development that occurs in adjacent districts complements and enhances the positive qualities of existing neighborhoods. Developments that share a property line and/or street frontage with an existing neighborhood should promote compatibility by:

- Continuing established block patterns and streets to improve access to services and amenities from the adjacent neighborhood;

Further, we believe the P&Z Commission neglected (or diluted) pertinent facts in the privately funded traffic study. Additionally, we believe the traffic study is lacking traffic queuing studies pertinent to the proposed traffic solution.

Please refer to this map for understanding the Ziegler/Corbett corridor. Understanding the minor streets is essential to understanding this appeal.

Summary of Facts Regarding Land Use Code 1.2.2-Purpose (Fostering a more rational pattern of relationship...)

From the March 23rd hearing, many committee members and members of the public asked for common sense to prevail. The Major Amendment puts a light at Hidden Pond/Ziegler. It is likely the cheapest means to an end for the applicant, ie the minimum necessary to gain committee approval. Yet it makes no rational sense and doesn't follow the Master Street Plan. The natural connector in the MSP is at Paddington/Grand Teton and Ziegler, just 400ft farther north than the proposal of a traffic light at Hidden Pond. This 400ft makes the placement of the light awkward, and frankly, janky. It does not serve the hundreds of residents and homes of English Ranch or Woodland Park.

Long-time residents of these neighborhoods have waited patiently for the Paddington/Ziegler intersection to be developed so that a light would go in—organically and naturally with development. That the light would be suggested at Hidden Pond is irrational and a mockery of the residents who have endured difficult traffic conditions for years. If this amendment prevails, it will do the opposite of “fostering a more rational pattern...” It will have allowed the developer to undermine the planning principles of our city.

Summary of Facts Regarding City of Fort Collins Land Use Code 3.6.3 - Street Pattern and Connectivity Standards

All development needs access. The original ODP (2/2022) was granted “Alternative Compliance” to replace a local street connection south of the English Ranch neighborhood with a bike/pedestrian-only connection. That is, *cars* couldn't access the new development, but bikes/pedestrians could. This was partially due to a “hole” in developed acreage (the “Young parcel”), and partially due to 2010 Master Street Plan update that made unclear the legal use of Paddington or Edmonds (or other streets in English Ranch) for connected use. The City Planner, Ryan Mounce, used this exact language in the materials for the P&Z committee: “Staff also felt absent **Council** guidance, a local street connection could duplicate a condition which stakeholders and City Council had previously taken action to remove.”

We believe the Major Amendment was just that—major. It adds many acres of land, the “Young parcel,” and by so doing fills the “hole.” It opens traffic mobility. An “Alternate Compliance” should no longer be considered. Full compliance should be natural and frankly, mandatory for a development of this size and use. With the large additional acreage, it needs additional access. It simply doesn't meet these guidelines (LUC 3.6.3, *E&F*) for access: “All development plans shall provide for future public street connections to adjacent developable parcels by providing a local street connection.” And to and from at “least three (3) arterial streets.”

Regarding the 2010 change to the MSP, City Planner Ryan Mounce provided this documentation from those hearings.

\$75,000 for a neighborhood traffic calming plan along Corbett Drive through 2015. A section of the agreement related to streets also notes the potential for a street connection to the English Ranch:

"It is understood and agreed that future development(s) may connect the public street system in the English Ranch neighborhood with this Development, and that such connectivity has the potential to allow cut-through traffic and other perceived negative impacts to the English Ranch neighborhood. In recognition of this potential and in response to comments at public meetings preceding the Development's PDP approval, City staff and representatives of the Developer considered a variety of traffic calming options for the neighborhood that can be implemented in the future when the street connections are completed."

The draft Master Street Plan appendix outlines the preliminary staff analysis. All the data is not in yet, but a preliminary recommendation is that the Corbett connector street connection be removed from the MSP. A local street connection from within the currently vacant property may still be necessary and required by the Land Use Code at the time the vacant property south of English Ranch develops, regardless of the removal of the collector street designation from the MSP. The decision about street access and connections will be made after input from the neighborhood and developer, in conjunction with the submittal of a development plan for the vacant property. An initial list of positives and negatives associated with the Corbett Drive extension is below. This list, as well as the overall analysis, will be updated based on input received in December.

This documents that the residents of English Ranch "understood" that future developments like this one, would REQUIRE connections to the public street system. (They literally made a list of a variety of traffic calming options and money (\$75K!) to fund them once new developments were "COMPLETED.") **City Council should affirm** the use of Kingsley or Edmonds or other desirable streets for connection use for this Major Amendment. We are attaching a picture of the ODP (provided by Ryan Mounce) with the green arrows suggesting possible streets of ingress/egress. Kingsley is the left-most arrow, Edmonds is the middle arrow. Allowing either of these streets as connectors would serve the LUC 3.6.3, E& F mandate. They would also, more importantly, feed to a more rational light at Ziegler. These English Ranch connectors will better serve the residents and businesses of this development as well.

Summary of Facts Regarding City of Fort Collins City Code POLICY LIV 4.2

LIV 4.2 asks that developers try "Continuing established block patterns and streets to improve access to services"

Woodland Park and Hidden Pond have been onerously left-out of access to nearby schools and parks. The afore-mentioned MSP change in 2010 broke the traffic connector (Corbett) from these neighborhoods to their schools, Traut Core Knowledge Elementary and Preston Middle School. Additionally, because of the volume of traffic through Ziegler, and lack of a traffic signals, these neighborhoods don't have access to their closest park (English Ranch Park) or their neighborhood elementary school, Linton Elementary. Because parents must drive their children to school (riding a bike or walking is just too dangerous), parents have opted to drive their children elsewhere. Parents have chosen Liberty, Kruse, Traut, and O'Dea elementaries over their neighborhood school. Frankly, Linton could have used the enrollment these subdivisions could have provided had there been a safe way to walk/bike to school.

Summary of Facts from the Privately Funded Traffic Study (Delich)

An independent traffic study was performed by Delich Associates prepared for Landmark Homes.

Fact 1: The traffic study **agrees** that a light is needed at the Ziegler/Paddington-Grand Teton intersection.

From the private traffic study, referring to the Ziegler/Paddington-Grand Teton intersection, it states (p. 9): “It is acknowledged that the calculated delay for the minor street left turns is high, especially in the afternoon peak hour. This is due to high through volumes on Ziegler Road. **There is little that can be done to alleviate this condition except signalization of the Ziegler/Paddington-Grand Teton intersection.**”

Fact 2: With the proposed traffic signal at Hidden Pond, the city still fails its Woodland Park and English Ranch neighbors.

We are reprinting the findings of the traffic study here, snippets only of the impacted neighborhoods.

Table 3, Short-Range (2028) peak hour operation (Current traffic configuration, ie a stop sign at Hidden Pond)

Intersection	Movement	Level of Service	
		AM	PM
Ziegler/Paddington-Grand Teton (stop sign)	OVERALL	A	A
	EB LT/T/RT	C	D
	WB LT/T/RT	F (109.9 secs)	F (166.9 secs)
	NB LT	B	B
	SB LT	B	B
	OVERALL	A	A

Table 4: Long Range (2045) Background Peak Hour Operation (With a stop sign at Hidden Pond)

Ziegler/Paddington-Grand Teton (stop sign)	OVERALL	A	A
	EB LT/T/RT	F (59.3 secs)	F (255.3 secs)
	WB LT/T/RT	F (396.6 secs)	F (518.4 secs)
	NB LT	B	C
	SB LT	B	C
	OVERALL	A	A

Table 5: Short Range (2028) Total Peak Hour Operation (With a signal at Hidden Pond, per the Major Amendment)

Ziegler/Paddington-Grand Teton (stop sign)	OVERALL	D	C
	EB LT/T/RT	C	E (38.9 secs)
	WB LT/T/RT	F (182.7 secs)	F (275.8 secs)
	NB LT	B	C
	SB LT	B	B
	OVERALL	A	A

Table 6: Long Range (2045) Total Peak Hour Operation (With a signal at Hidden Pond, per the Major Amendment)

	OVERALL	A	D
Ziegler/Paddington-Grand Teton (stop sign)	EB LT/T/RT	F (85.7 secs)	F (476.9 secs)
	WB LT/T/RT	F (648.7 secs)	F (723.7 secs)
	NB LT	C	C
	SB LT	B	C
	OVERALL	A	B
	WR I T/RT	A	R

We find it onerous that the P&Z committee would neglect or dilute these findings. Even in the short-range study, residents of Woodland Park or English Ranch can expect 3 minutes (AM) or 4.5 minutes (PM) to enter/exit their subdivision. This isn't acceptable at any level. If proper controls are not put in with this development, **THE CITY WILL** have to intervene in the future. These findings reinforce the need for a light at Paddington-Grand Teton/Ziegler. The residents in these neighborhoods need a controlled entrance/exit to their neighborhoods. Additionally, while our English Ranch neighbors have several choices for ingress/egress, the residents of Woodland Park can only enter/exit onto Ziegler. They have no other option. Also, the traffic study did not include any verbiage to note that many Grand Teton neighbors choose to enter/exit at Mesa Verde because of the current difficulty at Grand Teton/Ziegler. Likewise, our English Ranch neighbors choose other routes to enter/exit other than Paddington. Traffic on minor streets (like Grand Teton) may not be completely accounted for because of these behavior patterns.

Fact 3: Additionally, and importantly, we find the traffic study lacked a comprehensive queue length study. Per the major amendment, there is only 400 ft between Hidden Pond and Paddington-Grand Teton along the Ziegler corridor. We believe its possible that with the proposal of the light at Hidden Pond, when south-bound traffic is stopped at a red light, traffic could potentially queue back into the Paddington intersection. This would effectively block south-bound traffic from Paddington or Grand Teton. Residents will be blocked from entering/exiting their subdivisions!

The Federal Highway Administration (FHWA), Office of Operations, suggests a simple way to divine queue length. (There are very sophisticated models for determining queue length, but we're using this formula for simplicity and because its origins are the FHWA.)

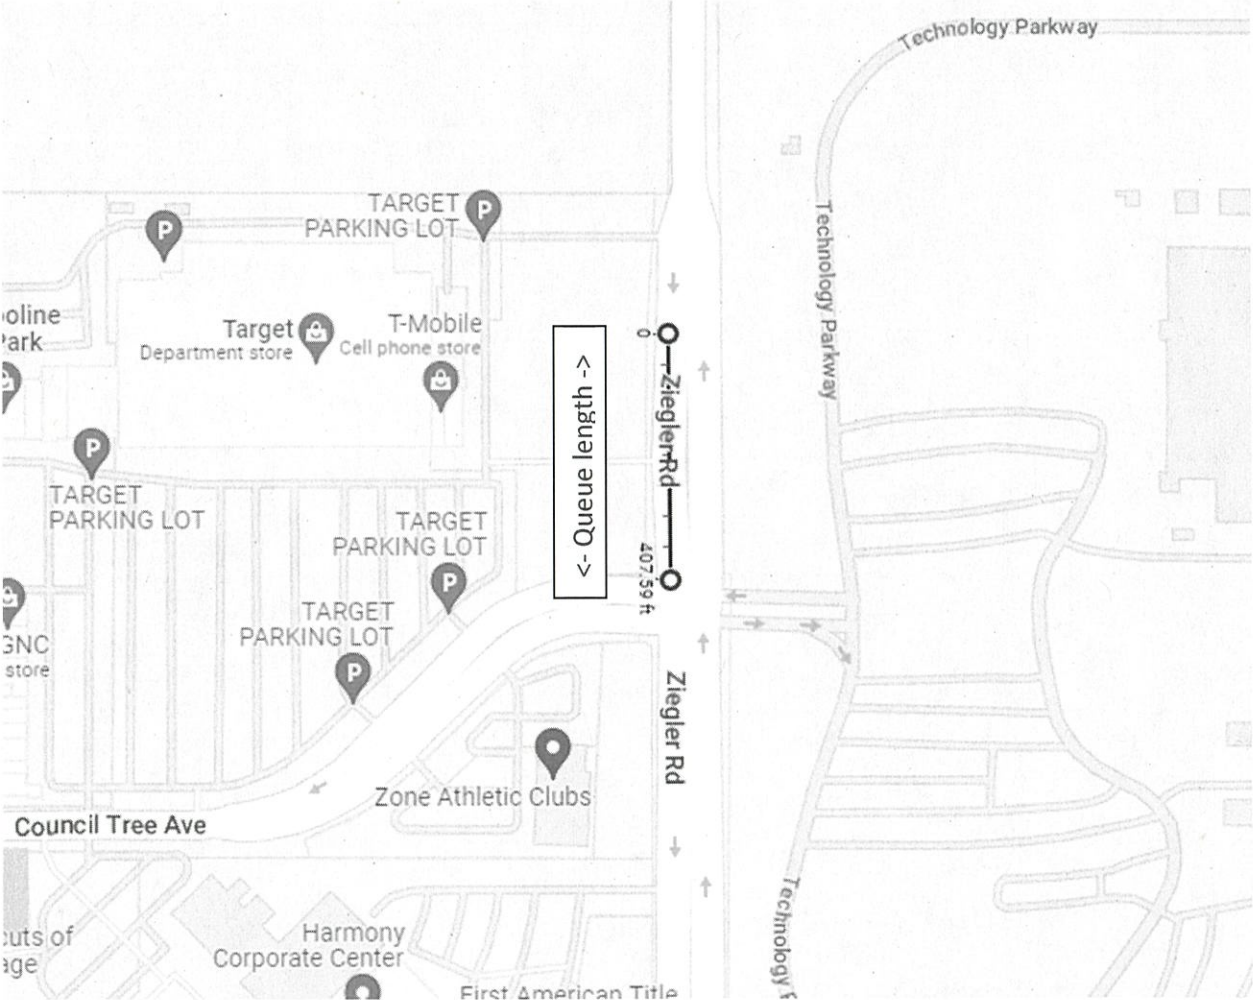

Equation 3-4

$$Queue_{avg} = \frac{v}{3600/C}$$

where $Queue_{avg}$ is the average queue in vehicles per lane; v is the volume of the movement in vehicles per hour per lane, and C is the cycle length in seconds. For example, a volume of 150 vehicles per hour per lane under a cycle length of 90 seconds will result in an average queue length of approximately $150 / (3600 / 90) = 3.75$ vehicles. If using this value for timing or design, this queue length should be rounded up to the nearest vehicle, in this case 4 vehicles.

Using a “Commonly Assumed Cycle Length” of $C=60$ from FHWA, and $v=(1735 \times .65 = 1128)$ cars per lane (data directly from the private traffic study), the queue length is 19 vehicles. If we assume 21ft per car (15ft for the average American car + 6 ft space), the queue CAN line up to 399ft reaching the Paddington/Grand Teton neighborhoods. If the cycle time is modulated at all (ie if the red light gets longer) this queue length will grow proportionally.

To add credibility to this calculated queue length, current southbound traffic often gets saturated at peak times at the Council Tree/Broadcom traffic signal. Traffic will queue almost to the Target Service Access road. We’ve attached a picture to help describe how far back the traffic queues. With the help of Google Maps, we can see that traffic CURRENTLY queues 407ft back from the signaled intersection at Council Tree. There is no reason to believe similar queue behavior will not occur at Hidden Pond.

We reiterate that the private traffic study was lacking any professional comprehensive queue length study that would be highly pertinent to this amendment and the feasibility of a light at Hidden Pond.

Conclusion

We ask that the City Council reverse the decision of the Planning and Zoning commission. This was a Major Amendment—it added several acres of land and significant traffic disruption. There is no reason why this developer should get preferential treatment and be allowed “Alternate Compliance” given the vast changes proposed to the original approval. It sets a bad precedence for any future development. It is not fully compliant to the Land Use Code. It doesn’t meet rational planning standards or livability standards set by our community. It puts an unnatural traffic signal at Hidden Pond and not at the long-awaited Paddington intersection. By voting “no” to this major amendment, allow the developer to seek other solutions (amendments) to get to full compliance. We ask that you voice approval of using English Ranch streets as appropriate connectors to aid the developer in this request. We do wish the developer the opportunity to develop the “Young parcel,” but to do it in a way that that is compliant to our city’s published norms.

Get The Light Right!

NOTICE OF APPEAL

FOR CITY CLERK'S
USE ONLY:
DATE FILED: 4-5-2023
INITIALS:

Action Being Appealed: Ziegler - Corbett Overall Development
Plan Major Amendment, Project # MJA 220004
Date of Action: 3/23/2023 Decision Maker: Planning and Zoning Commission

Appellant/Appellant Representative (if more than one appellant):

Name: Craig Latzke Phone #: 970-227-7444
Address: 3908 Mesa Verde St Email: craig@latzke.us
Fort Collins, CO 80525

INSTRUCTIONS

For each allegation marked below, attach a separate summary of the facts contained in the record which support the allegation of no more than two pages, Times New Roman 12-point font. Please restate allegation at top of first page of each summary.

GROUND FORS FOR APPEAL

The Decision Maker committed one (1) or more of the following errors (check all that apply):

- Failure to properly interpret and apply relevant provisions of the City Code, the Land Use Code, and Charter. List relevant Code and/or Charter provision(s) here, by specific Section and subsection/subparagraph:
City of Fort Collins Land Use Code, Section 3.6.3(E,F)
City of Fort Collins City Code, Policy LIV 4.2

Failure to conduct a fair hearing in that:

- (a) The Board, Commission, or other Decision Maker exceeded its authority or jurisdiction as contained in the Code or Charter. [New evidence not allowed]
- (b) The Board, Commission or other Decision Maker substantially ignored its previously established rules of procedure. [New evidence not allowed]
- (c) The Board, Commission or other Decision Maker considered evidence relevant to its findings which was substantially false or grossly misleading. [New evidence allowed]
- (d) The Board, Commission or other Decision Maker improperly failed to receive all relevant evidence offered by the appellant. [New evidence allowed]
- (e) The Board, Commission or other Decision Maker was biased against the appellant by reason of a conflict of interest or other close business, personal or social relationship that interfered with the Decision Maker's independence of judgment. [New evidence allowed]

NEW EVIDENCE

All new evidence the appellant wishes Council to consider at the hearing on the appeal must be submitted to the City Clerk within seven (7) calendar days after the deadline for filing a Notice of Appeal and must be clearly marked as new evidence. No new evidence will be received at the hearing in support of these allegations unless it is submitted to the City Clerk by the deadline (7 days after the deadline to file appeal) or offered in response to questions posed by Councilmembers at the hearing.

APPELLANTS

Parties-in-interest have the right to file an appeal.

A party-in-interest is a person who, or organization which, has standing to appeal the final decision of a board, commission or other decision maker. Such standing to appeal is limited to the following:

- The applicant.
- Anyone who owns or occupies the property which was the subject of the decision made by the board, commission or other decision maker.
- Anyone who received the mailed notice of, or spoke at, the hearing of the board, commission or other decision maker.
- Anyone who provided written comments to the appropriate City staff for delivery to the board, commission or other decision maker prior to or at the hearing on the matter that is being appealed.
- A City Councilmember.

Statement of Facts and Evidence in Support of Appeal

At a high level, Land Use Code, City Code, and other standards exist to promote neighborhood livability, sustainable patterns of development, safety, transportation, compatibility with existing neighborhoods, and other goals. The Planning and Zoning Commission is tasked “To take final action to approve, disapprove or approve with conditions planning items in accordance with this Code and Charter.” City Charter Sec. 2-176.(a)(4)

When the Planning and Zoning Commission approved this major amendment they failed to act in accordance with Land Use Code, City Code, previous City Council policy decisions, and their own established hearing procedures. In doing so they violated both the letter and spirit of these codes and undermined the future livability, compatibility, safety, and access of this PUD, adjacent/nearby neighborhoods like Woodland Park Estates and English Ranch, and ultimately the City.

The major amendment included two main components:

- Incorporation of an additional property (“the Young property”) into the parcel/ODP.
- Alternative compliance for street connections. Where the local connection is to be restricted to pedestrians and bicycles, not a street connection, and a signal is to be installed at Hidden Pond.

The latter, the alternative compliance or lack of full compliance with Code, is the focus of our appeal.

Statements at the hearing from most P&Z members, multiple city staff, the applicant (developer), and many spoken and written public comments established a broad consensus that the most optimal solution for street connections is for there to be a local connection between this ODP and Paddington Rd (presumably at Edwards) and then possibly a traffic signal at Paddington Rd / Grand Teton PL and Ziegler Rd.

PZ Member comments, which are taken verbatim from the hearing:

David Katz @ 1:15:25

I think we can all see that when we do zoom out, like physically zoom out, it, it does look like Paddington makes the most sense. Logically, it's consistent with some of the comments we've seen.

David Katz @ 1:55:01

Logic rarely prevails. And I think Miss Wilson said common sense rarely prevails. When you zoom out and look at the map. Paddington does make the most sense. It does.

...

For no other reasons, but a safety for the people in Woodland Park to get across. I, I wish this light could be at Paddington.

...

Looking at it on the surface, and maybe even deeper than the surface, Paddington seems to make the most sense.

...

From a safety aspect, I really wish it was at Paddington.

Ted Shepard @ 2:16:00

So without getting into specifics, maybe just refer to a local street connection, so as to enable the warrants to be met, so a traffic signal could be constructed at Paddington and Teton where in the big picture of our community, the arterial system is where it's needed.

...

A local street connection to Paddington Road from Union Park, uh in any conceivable alignment that's practical with willing parties would be a superior overall development plan attribute than the alternative compliance that was approved in February of 2022. In February of 22 we didn't have the information that we have now and the information that we have now is critical.

Michelle Haefele @ 2:22:30

The best possible outcome is a connection from English Ranch to the new neighborhood and a light at Paddington and Grand Teton at Ziegler.

David Katz @ 2:27:35

We've heard the public if it was, if there was a clear path to putting it there I think we all agree, there being Paddington, excuse me, uh, we would all prefer that - most people, maybe not everybody.

Julie Stackhouse @ 2:30:29

The motion I'm gonna make [to approve the major amendment] I don't like, I'll be up front, because I don't think we're solving the real problem here and that, that bothers me.

...

I still think that the right outcome here is a connection from, from the O D P to Paddington. And I'd, I'd love to see that still happen and I know that's not desirable on the part of everyone. But honestly, if we step back and look at it in a holistic way for the betterment of the cities of Fort Collins. It's, it's the right thing to do, but that's not the proposal that we have in front of us tonight.

Michelle Haefele @ 2:36:23

If [the developer] come[s] back, hopefully they will come back with another proposal that is the best possible which is connecting the neighborhoods.

City Staff comments:

Steve Gilcrest, Traffic Operations @ 0:55:23

Is this hidden pond location the ideal location? No. Within our land use code, within our standards, Paddington would be typically the intersection we signalize.

...

Paddington would be, you know, our typical collector street.

...

So ultimately, yes, Zigler and Paddington would be the ideal location.

...

Our preference, you know, the city's, if we had our ultimate goal of that, that grid pattern would be, you know, that main half mile street would have that full traffic signal that just allows for good progression. That's good, good access, those types of things.

Ryan Mounce, City Planner @1:46:36

I guess kind of zooming out again from the staff perspective is, you know, we do have these connectivity standards in the land use code. We, we do want to knit neighborhoods together and that's kind of the terminology use is is knitting. Um And we certainly recognize that, you know, no one necessarily wants more traffic in, in their development or their neighborhood. Um But that is kind of the, the intent and kind of the philosophy behind the community that these, these different developments, they aren't partitioned amongst themselves, they're, they're woven together. Um And there should be multiple access point points to different arterial streets within your sort of section mile. And so, you know, of hearing a lot of, of, of support for the idea of a signal at Paddington and Grand Teton, and we've talked a little bit about how sort of under the ideal scenario, that's where it would be located and kind of, that's how, how the transportation network is kind of set up and designed.

...

If there is gonna be the work to, to look at a proposal to connect somehow between this neighborhood or the O D P site and the the neighbor to the North English Ranch, um You know, I guess the staff perspective is we would really like to see as much connectivity as possible at that point. That is sort of the base standard in the land use code and, and as mentioned, there are different amenities uh like the park and school that that would be beneficial to uh you know, get people to and from.

Ryan Mounce, City Planner @ 2:02:17

[Edmonds] was the original identified spot for a connection originally as a Collector Street. Um There, you know, if you look at the English Ranch O D P from the nineties, it identifies that as the spot for, for that connection. And so there has been, you know, thinking and planning for it.

Applicant/Developer Comments:

Jason Sherrill @ 1:44:38

I feel like with the, the, the, the way that the communities have evolved - a connection at Edmunds, you know, might be, you know, the best solution.

Public comments to similar ends can be found in the packet.

Not surprisingly, this “best possible,” “ideal,” “right thing to do,” “most sense,” “safest,” and “superior,” solution is the solution that would comply fully/normally with code and would not require alternative compliance found in the major amendment.

To understand why a major amendment was approved in this context, and why the amendment should have instead been disapproved, we will evaluate the accusations or errors indicated under “grounds for appeal” on the notice to appeal.

Failure to properly interpret and apply relevant provisions of the City Code, the Land Use Code, and Charter.

City of Fort Collins Land Use Code

3.6.3 - Street Pattern and Connectivity Standards

(E) Distribution of Local Traffic to Multiple Arterial Streets. All development plans shall contribute to developing a local street system that will allow access to and from the proposed development, as well as access to all existing and future development within the same section mile as the proposed development, from at least three (3) arterial streets upon development of remaining parcels within the section mile, unless rendered infeasible by unusual topographic features, existing development or a natural area or feature.

The local street system shall allow multi-modal access and multiple routes from each development to existing or planned neighborhood centers, parks and schools, without requiring the use of arterial streets, unless rendered infeasible by unusual topographic features, existing development or a natural area or feature.

(F) Utilization and Provision of Sub-Arterial Street Connections to and From Adjacent Developments and Developable Parcels. All development plans shall incorporate and continue all sub-arterial streets stubbed to the boundary of the development plan by previously approved development plans or existing development. All development plans shall provide for future public street connections to adjacent developable parcels by providing a local street connection spaced at intervals not to exceed six hundred sixty (660) feet along each development plan boundary that abuts potentially developable or redevelopable land.

City of Fort Collins City Code

POLICY LIV 4.2 - COMPATIBILITY OF ADJACENT DEVELOPMENT

Ensure that development that occurs in adjacent districts complements and enhances the positive qualities of existing neighborhoods. Developments that share a property line and/or street frontage with an existing neighborhood should promote compatibility by:

- *Continuing established block patterns and streets to improve access to services and amenities from the adjacent neighborhood;*

By not having a local street connection (pedestrian / bike - only connection does not substitute), the major amendment does not comply with the above-cited Land Use Code or City Code. Instead it makes use of alternative compliance.

The ODP was approved in February 2022 using alternative compliance. There was some deliberation suggesting that because the previously-approved DOP does not achieve full/normal compliance by having a local street connection, but relies on alternative compliance instead, that this major amendment should therefore not be evaluated on whether it complies. This is an error in three ways:

1. The major amendment, with the added property/acreage, changes the ODP significantly such that the previous alternative compliance is not applicable. As amended, the ODP does not comply.
2. The alternative compliance in the major amendment is substantially different from the previous alternative compliance with different considerations and tradeoffs. Given these differences and resulting changes in character to the ODP, they are not mere substitutes. Notably, the alternative compliance in the major amendment has additional negative impacts relative to the previously-approved alternative compliance. This was the topic of many of the public comments received (written and spoken) as well as comments from staff and P&Z members:
 - “We've also heard that many feel that the signal at this particular location kind of prioritizes new development over some of those existing conditions that these [existing] neighborhoods have faced for many years.” (Ryan Mounce @ 0:50:33)
 - “And we've also heard about some concerns with the signal at this location [~400ft from Paddington/GrandTeton] if that would maybe cause backups and traffic backups during peak periods and completely block the Teton and Paddington intersection.” (Ryan Mounce @ 0:50:57)
 - **“The big implication with this [signal at Hidden Pond] is that it does preclude the future of a traffic signal at the Paddington and Grand Teton intersection along Ziegler and that's true, vice versa as well. So there's kind of a one shot, you know, one signal along the stretch of Zeigler given sort of our spacing requirements. It doesn't necessarily follow the traditional location of where a signal would be placed.”** (Ryan Mounce @ 0:49:29)

- Uncertainty around bicycle detection on the east side of the intersection. Undesirable pedestrian navigation/routes. Undesirable bicycle navigation/routes in context of the low-stress bicycle network that is on Paddington. (see York questions starting at 1:04:25)

Unfortunately, these negatives seem to have been overlooked during deliberations resulting in the Commission members forming subjective opinions that this new alternative compliance (which negatively impacts Woodland Park Estates and English Ranch neighborhoods) is preferable to the existing negative compliance (“channel-T” - which does not negatively impact these neighborhoods). Ignoring these real and objective harms to these neighborhoods is itself an example of prioritizing new development over compatibility with and livability of existing neighborhoods.

3. Unlike in February, 2022 when the ODP was approved without a local street collector: City Staff and the Planning & Zoning Commission are now (or should be) aware that City Council’s intentions when removing a collector street connection in this vicinity (Corbett-Kingsley) circa 2010 was that there would still be a local street connection from this parcel (subject of ODP) to Paddington. Evidence for this includes:

- Packet page 318 contains a portion of a document which references the development agreement for Front Range Village, a recorded document between the city and the developer, containing the text, “It is understood and agreed that future development(s) may connect the public street system in the English Ranch neighborhood with this Development, and that such connectivity has the potential to allow cut-through traffic and other perceived negative impacts to the English Ranch neighborhood.”
- Packet page 318 contains a portion of a document from 2010 related to the Master Street Plan change, which states, “...a preliminary recommendation is that the Corbett connector street connection be removed from the MSP. A local street connection from within the currently vacant property may still be necessary and required by the Land Use Code at the time the vacant property south of English Ranch develops, regardless of the removal of the collector street designation from the MSP.”
- A slide in the staff presentation includes a slide from a “2010 Master Street Plan Council Work Session” with a bullet point indicating “If Corbett Drive removed from MSP, Land Use Code may require a non Corbett street connection to the property north of Front Range Village.”

4. Unlike in February, 2022 when the ODP was approved without a local street collector: City Staff and the Planning & Zoning Commission are now (or should be) aware that they

can expect compliance with the above-mentioned sections of the Land Use Code and City Code regarding local street connection.

- “The local connection wouldn't require approval by council.” (Steve Gilcrest @ 1:00:04)

Also that public concerns regarding more traffic in neighborhoods from a local street connection (or collector street connection) is not a contraindication to enforcing Land Use and City Code requirements for these connections.

- “I guess kind of zooming out again from the staff perspective is, you know, we do have these connectivity standards in the land use code. We, we do want to knit neighborhoods together and that's kind of the terminology used is is knitting. Um And we certainly recognize that, you know, no one necessarily wants more traffic in, in their development or their neighborhood. Um But that is kind of the, the intent and kind of the philosophy behind the community that these, these different developments, they aren't partitioned amongst themselves, they're, they're woven together.” (Ryan Mounce @ 1:46:36)

In summary: Without a local street connection the major amendment does not comply with the above-cited Land Use Code or City Code. The major amendment changes the ODP significantly. My not having a local street collector as code requires and instead using alternative compliance the major amendment causes significant and permanent harm to adjacent and nearby neighborhoods (Woodland Park Estates, English Ranch) that the previous alternative compliance does not. The commission has the authority to require adherence to these portions of Code even, or especially, in context of historical decisions by Council and concerns regarding the traffic they are intended to allow.

Given these considerations and because of the failure to comply with Code, the major amendment should have been disapproved.

Instead of acting under their authority to disapprove a major amendment that failed to comply with code, they hoped and wished that the developer would make a good-faith effort.

- (“hope” is found twice in the transcript in this context)
- (“wish” is found twice in the transcript in this context)
- (“good faith” is found three times in the transcript in this context)

That is no substitute for faithfully applying and requiring compliance with Code.

The Board, Commission or other Decision Maker substantially ignored its previously established rules of procedure.

Before deliberations the commission chairman makes this statement...

"Thank you so much. Um Ryan, um We're gonna give the commission members one last opportunity to ask clarifying questions. Uh And this will be the last opportunity that that the commission has to engage with the applicant. So before we get into uh any deliberation, do any commission members have any final clarifying questions?" (David Katz @ 1:49:33)

Later, after deliberations have started, the applicant is invited to participate which seems out of order...

(At 2:27:57 in the recording)

Julie Stackhouse: "Could we hear from the developer. Um be what uh their reaction to our discussion."

David Katz: "If Jason would like to speak to that, I would invite him up. Um Come on up. I, I mean, I, I work with a lot of developers and uh I, I know what I'm about to hear."

Jason Sherrill (applicant): "So yeah, uh I appreciate that..."

It may or may not be notable that a citizen was not likewise given an exception and allowed to speak during deliberations but explicitly denied...

(2:04:37 in the recording)

Citizen: May I ask a question?

David Katz: No. Sorry. Trying to follow the rules.

Conclusion and Request

We respectfully ask that the City of Fort Collins simply comply with and enforce the Land Use Code, the City Code, and Charter as written so that they may serve their intent and philosophy. Reviewing the evidence above, the ODP as amended by this major amendment does not comply. There is no legal requirement to approve an inferior alternative compliance, nor goal or purpose to doing so, and we believe approving it was inappropriate.

We request the City Council overturn the decision of the Planning and Zoning Commission's to approve the major amendment to this ODP, thereby disapproving the major amendment.

Alternatively, if the City Council possesses the necessary legal and procedural authority, we request that the City Council **modify** the decision of the Planning and Zoning Commission to achieve an outcome where the the addition of the Young property to the parcel/ODP (which is not contested) is approved but with a requirement that street connections be made in full compliance with Code, including a local connection to Paddington which is not limited to bike/ped, without the use of alternative compliance.

We look to the City to do the right thing, and ensure this development, along with its street connections, is a benefit to the community and surrounding neighborhoods for years to come.

Planning and Zoning
Commission**

March 23, 2023

Planning & Zoning Commission Hearing: March 23, 2023

MJA220004, Ziegler-Corbett ODP Major Amendment

Summary of Request

This is a request for a Major Amendment to the Ziegler-Corbett Overall Development Plan (ODP) located southwest of the intersection of Ziegler Road and Paddington Road (parcel #s 8732000002, 8732400008, 8732000009). The original ODP, approved in February 2022, is a mixed-use project consisting of 400-700 residential dwelling units, a childcare center, and 50,000 square feet of commercial or community facility space. A major amendment is required to incorporate an additional enclaved parcel into the boundary of the ODP. No additional development is proposed; however, the boundary change creates an opportunity to shift the site's primary access along Ziegler Road to align with Hidden Pond Drive and install a private traffic signal, which has implications for broader circulation patterns in the vicinity.

Zoning Map

Next Steps

If approved by the decision maker, future Project Development Plans (PDPs) will be reviewed for compliance with the amended Overall Development Plan and brought forward for P&Z consideration.

Site Location

The project is located southwest of the intersection of Ziegler Road and Paddington Road, between Front Range Village and The English Ranch neighborhood (Parcel #s 8732000002, 8732400008, 8732000009).

Staff Recommendation

Approval

1. Project Introduction

A. PROJECT DESCRIPTION

The Major Amendment (MJA) proposes expanding the boundary of the Ziegler-Corbett ODP by incorporating one additional parcel along the western frontage of Ziegler Road. Alongside this expanded boundary, the major amendment also proposes shifting the primary access point north to align with the Hidden Pond Drive intersection and the installation of a privately funded traffic signal. As a result of the shift in the location of primary access, the ODP's primary east-west circulation route also shifts to the north. No changes are proposed to the land uses or the number of dwelling units and commercial square footage approved with the original ODP.

B. DEVELOPMENT BACKGROUND & CONTEXT

The 33-acre site is currently undeveloped and was annexed into the City as part of the Spring Creek Farms 4th Annexation in 1994. Adjacent development includes the Front Range Village shopping center to the south, The English Ranch subdivision to the north, Affinity Fort Collins, a senior apartment building to the west, and the Broadcom/HP Campus and Woodland Park subdivision to the east across Ziegler Road.

The original Ziegler-Corbett ODP was approved in February 2022 for a mixed-use project consisting of 400 – 700 single family attached, multifamily, and mixed-use dwelling units, a childcare center, and 50,000 square feet of office or community facility space. As part of the original ODP approval, the following modification of standards and alternative compliance requests were approved:

- Modification to Section 4.26(D)(2), to permit up to 100% secondary land uses across the site.
- Modification to Section 4.26(D)(3)(a), to permit up to 4 residential stories, with conditions, in certain areas of the site.
- Alternative Compliance to Section 3.6.3, to replace a local street connection north to The English Ranch neighborhood with a bike/pedestrian only connection.

In consideration of the ODP and the Modification of Standards, the project was approved with a condition that the future project development plan submittals demonstrate compliance with the following City Plan policies:

Policy LIV 3.5 – Distinctive Design

Require the adaptation of standardized corporate architecture to reflect local values and ensure that the community's appearance remains unique. Development should not consist solely of repetitive design that may be found in other communities.

Policy LIV 3.6 – Context-Sensitive Development

Ensure that all development contributes to the positive character of the surrounding area. Building materials, architectural details, color range, building massing, and relationships to streets and sidewalks should be tailored to the surrounding area.

Surrounding Zoning and Land Uses

	North	South	East	West
Zoning	The English Ranch Neighborhood (LMN)	Front Range Village Regional Shopping Center (HC)	Woodland Park Estates (RL) and Broadcom/HP Campus (HC)	Front Range Village (HC) and Affinity Fort Collins Apartments (HC)
Land Use	Single family detached units	Retail	Single family attached & detached units; office campus	Retail; multifamily

An important element to this site's background is the history of changes to street connectivity to/from the property and potential downstream impacts on traffic operations for this section of the community. Prior to the construction of the southern portion of The English Ranch neighborhood and the Front Range Village shopping center, a previous ODP (Symbios Logic) and the City's Master Street Plan both envisioned Corbett Drive, a collector street, traversing across the ODP site to create a connection between Harmony Road and Paddington Road within The English Ranch Neighborhood.

In the early 2000's the Harmony Corridor Plan was amended to allow for a regional shopping center (Front Range Village) northwest of Harmony and Ziegler Roads and south of the Ziegler-Corbett ODP site. During the review of Front Range Village, neighbors in English Ranch raised concerns about having a direct connection between the shopping center and the neighborhood via Corbett Drive and additional cut-through retail traffic.

In 2010 during a Master Street Plan update, staff and neighbors shared these concerns with City Council, who sought input and tradeoffs for removing the Corbett collector street connection on the Master Street Plan between Front Range Village and The English Ranch neighborhood. While Council ultimately decided to remove the connection, it was indicated a local street connection may still be required and that the issue would need to be addressed at the time of future development.

In 2021-2022 during the review of the Ziegler-Corbett ODP, staff held two neighborhood meetings and heard feedback from English Ranch neighbors indicating strong concern about including a local street connection from the ODP site north to Paddington Road. Similar to the 2010-era discussions, neighbors are concerned about potential cut-through traffic to Front Range Village, impacts to neighborhood traffic speeds/safety, and some frustration that a street connection was again being considered given the prior Council decision and process from 2010.

During the Ziegler-Corbett ODP review, an alternative compliance request was approved that converted what would typically have been a required local street connection to a bike/ped only connection. Similar to the 2010 Master Street Plan discussion, staff found that while the surrounding arterial streets could continue to function without this connection, a tradeoff of removing this street connectivity could impact the timing and location of a future traffic signals along Ziegler, which is desired by many nearby residents. In addition to the neighborhood input opposing the street connection, staff also felt absent updated Council guidance, a local street connection would duplicate a condition which stakeholders and City Council had previously taken action to remove.

A compilation of previous meeting notes and Council work session materials pertaining to consideration of the removal of the Corbett Drive Master Street Plan connection from 2010 is attached.

C. OVERVIEW OF MAIN CONSIDERATIONS

Given no proposed changes to development intensity/capacity of the ODP site, the main consideration of the major amendment relates to the potential longer-term impacts of moving the primary Ziegler Road access to align with Hidden Pond and installing a privately funded traffic signal. A traffic signal at the Ziegler/Hidden Pond intersection precludes a future signal at the Ziegler/Paddington/Grand Teton intersection due to signal spacing requirements.

A revised ODP traffic study indicates warrants for a traffic signal at the Ziegler/Hidden Pond intersection considering the anticipated number of trips from both the ODP site, the small number of existing Hidden Pond Drive users east of Ziegler, as well as some trips from Front Range Village and Affinity apartments. The installation of the proposed signal would be privately funded without eligibility for Street Oversizing reimbursement.

Long term transportation planning for this area originally anticipated the potential for a signalized intersection at the Ziegler/Paddington intersection, given Paddington is a designated collector street at half-mile spacing between the Ziegler/Harmony and Ziegler/Horsetooth intersections. While current traffic levels at the Ziegler/Paddington/Grand Teton intersection do not warrant a signal, a connection between the Ziegler-Corbett ODP site and Paddington Road in The English Ranch neighborhood likely would have reached warrants for a signal that could serve English Ranch, Woodland Park and the Ziegler-Corbett ODP site.

During a neighborhood meeting for the major amendment, staff shared several traffic and connectivity scenarios, including information about tradeoffs of a signal at Ziegler/Hidden Pond preventing a future signal at Ziegler/Paddington/Grand Teton. Ultimately, input from neighbors in the vicinity remains mixed. While many neighbors express a desire for a light at the Ziegler/Paddington/Grand Teton intersection, many neighbors in English Ranch and the English Ranch HOA oppose a street connection between the ODP site and Paddington Road that would help generate the warrant for the signal.

Many Woodland Park neighbors are equally frustrated and input from these neighbors tend to be more in favor of a connection to help support a signal at the Ziegler/Paddington/Grand Teton intersection. Woodland Park neighbors point out the only access to their subdivision comes from Ziegler Road while English Ranch has multiple access points to other arterial streets and a signal would be quite beneficial for their neighborhood.

Input has also been shared by Hidden Pond Estates neighbors that a signalized intersection at Ziegler/Hidden Pond could generate accidental traffic trying to use their private street even though it has no outlet.

Staff feels a signalized intersection at the Ziegler/Hidden Pond intersection or a connection between the ODP site and Paddington Road and a signal at Ziegler/Paddington/Grand Teton are both feasible options, and preferable to the original ODP access point using a 'Channelized-T' intersection located between the Ziegler/Hidden Pond intersection and the Front Range Village service access entrance. A warrant for a signal along this stretch of Ziegler Road will provide a bicycle and pedestrian crossing solution which has been identified as a need in the Active Modes Plan. A signal may also provide some limited relief breaking up the constant flow of traffic created by the Ziegler/Horsetooth roundabout further north.

Ultimately, staff is recommending the proposed ODP access point aligning at the Ziegler/Hidden Pond intersection with a traffic signal. While neighborhood input has been mixed, a connection between the ODP site and English Ranch that would generate the warrant for a signal at Ziegler/Paddington/Grand Teton remains strongly opposed for similar reasons it was originally removed as a collector street connection by City Council in 2010. During the 2010 era deliberations, staff had shared that removing the Corbett connection could result in shifts in the location of future Ziegler Road traffic signals. A signal at Ziegler/Hidden Pond mimics this earlier prediction and would result in a more immediate benefit in providing a bike/pedestrian crossing across this stretch of Ziegler.

D. CITY PLAN PRINCIPLES AND POLICIES:

The City's comprehensive plan (2019 City Plan) was developed with the participation of thousands of community members and embodies the vision and values of the community for the future. A basic aspect of the vision pertinent to the proposal is the unique character and sense of place in Fort Collins.

The City Plan's Structure Plan Map includes place types—or land use categories—which provide a framework for the ultimate buildout of Fort Collins. These place types provide a policy structure that can apply to several specific zone districts within each place type by outlining a range of desired characteristics. The subject property is consistent with the "Mixed Employment place type" land use designation, which is the overlying land use designation for both the E and HC zone districts.

City Plan provides guidance that the Structure Plan is not intended to be used as a stand-alone tool; rather, it should be considered in conjunction with the accompanying principles, goals and policies contained in City Plan as a tool to guide future growth and development. Key principles and policies relevant to the project include the following:

OUTCOME AREA "LIV" -- NEIGHBORHOOD LIVABILITY AND SOCIAL HEALTH – Managing Growth: These principles help the City to manage growth by encouraging infill and redevelopment, ensuring this development is compatible with the character of the surrounding neighborhood or area.

PRINCIPLE LIV 2: Promote Infill and Redevelopment:

POLICY LIV 2.1 - REVITALIZATION OF UNDERUTILIZED PROPERTIES. Support the use of creative strategies to revitalize vacant, blighted or otherwise underutilized structures and buildings, including, but not

limited to: Infill of existing surface parking lots—particularly in areas that are currently, or will be, served by bus rapid transit (BRT) and/or high-frequency transit in the future.

PRINCIPLE LIV 3: Maintain and enhance our unique character and sense of place as the community grows:

POLICY LIV 3.1 - PUBLIC AMENITIES. Design streets and other public spaces with the comfort and enjoyment of pedestrians in mind ...such as plazas, pocket parks, patios, children’s play areas, sidewalks, pathways...

POLICY LIV 3.6 - CONTEXT-SENSITIVE DEVELOPMENT. Ensure that all development contributes to the positive character of the surrounding area. Building materials, architectural details, color range, building massing, and relationships to streets and sidewalks should be tailored to the surrounding area.

PRINCIPLE LIV 4 – Enhance neighborhood livability:

POLICY LIV 4.2 - COMPATIBILITY OF ADJACENT DEVELOPMENT. Ensure that development that occurs in adjacent districts complements and enhances the positive qualities of existing neighborhoods. Developments that share a property line and/or street frontage with an existing neighborhood should promote compatibility by: Continuing established block patterns and streets to improve access to services and amenities from the adjacent neighborhood; Incorporating context-sensitive buildings and site features (e.g., similar size, scale and materials); and Locating parking and service areas where impacts on existing neighborhoods—such as noise and traffic—will be minimized.

Principle LIV 5 – Create more opportunities for housing choices.

POLICY LIV 5.3 - LAND FOR RESIDENTIAL DEVELOPMENT. Use density requirements to maximize the use of land for residential development to positively influence housing supply and expand housing choice.

2. Public Outreach

A neighborhood meeting was held on January 5, 2023 for the Major Amendment. A video recording of the meeting may be viewed online at: https://www.youtube.com/watch?v=Cwhdjgz_xrA. Two previous neighborhood meetings were also held during the original ODP review and featured similar discussion topics. Those meeting summaries can be found as attachments. Staff also had the opportunity to discuss the proposal with the English Ranch HOA virtually on March 6, 2023.

Main Topics discussed at the meeting included:

1. Concerns about the potential for a street connection between the ODP site to Paddington Road in the English Ranch neighborhood.
2. Desire to find solutions, including a possible signal, at the Ziegler/Paddington/Grand Teton intersection.
3. Concern about the density and amount of traffic generated by future ODP development.
4. Concern a signalized intersection at Ziegler/Hidden Pond is favoring new development over traffic issues faced by existing neighborhoods.
5. Discussion of alternative traffic and connection scenarios shared by neighbors.

Both prior to and at the neighborhood meeting, neighbors shared an idea about a connectivity scenario where an angled street connection from the ODP site through the English Ranch detention pond could be made to Paddington Road closer to the intersection with Ziegler Road. The goal behind this proposal was to make a connection that would not impact English Ranch neighbors with additional cut-through traffic through main segments of the neighborhood and generate additional traffic/connectivity to warrant a traffic signal at the Ziegler/Paddington/Grand Teton intersection. Many neighbors felt this idea was compelling and sought additional evaluation of feasibility.

After additional analysis, staff has major concerns about the feasibility of the idea as a potential solution. Key concerns include:

- The angle and intersection spacing where the proposed connection would connect to Paddington Road near the intersection with Ziegler Road would likely not meet standards for spacing and driver visibility issues, creating potential safety hazards.
- The street connection would traverse an existing detention pond serving English Ranch. Based on current standards the pond is undersized and any modification could create additional nonconformity or require alternate off-site drainage locations.
- The detention pond is also not owned by the City or applicant and would require sale/consent of the English Ranch HOA as existing property owners and no formal communication has been received about the potential use or modification of the pond.

3. Land Use Code Article 2 – Applicable Standards

A. PROJECT DEVELOPMENT PLAN PROCEDURAL OVERVIEW

1. Conceptual Design Review – CDR220035

A conceptual design review meeting was held on May 5, 2022.

2. First Submittal – MJA220004

The Major Amendment was submitted on November 15, 2022.

3. Neighborhood Meeting

Pursuant to *LUC Section 2.2.2 – Step 2: Neighborhood Meetings*, a neighborhood meeting is required for Planning and Zoning Commission (Type 2) projects. An in-person neighborhood meeting was held on January 5, 2023.

4. Notice (Posted, Written and Published)

Posted Notice: November 18, 2022, Sign #719.

Written Hearing Notice: March 8, 2023, 938 addresses mailed.

Published Coloradoan Hearing Notice: Scheduled for March 5, 2023

B. MAJOR AMENDMENT OVERVIEW

Section 2.2.10 outlines the process and review procedures for minor and major amendments to approved plans, including Overall Development Plans. Per minor amendment criteria 2.2.10(A)(2)(e), minor amendments exclude changes that would result in site improvements outside the boundaries of the originally approved plan. Given the expansion of the ODP boundaries this change automatically results in a major amendment review.

Additionally, while the proposed ODP changes do not alter previously approved development program and capacity, the resulting impact of the shift in the ODP's main access point and long term implications of installing a traffic signal at the Ziegler/Hidden Pond intersection should be evaluated as a change in character appropriate to a major amendment review.

Attached is the staff report for the original Ziegler-Corbett ODP approved in February 2022 which documents in detail compliance with standards in Articles 2 Land Use Code where ODP standards are located. As relatively few internal changes are proposed, the remaining sections of this staff report summarize

compliance with applicable ODP standards contained in Section 2.3.2 as a result of the proposed Major Amendment.

C. ODP STANDARDS – SECTION 2.3.2

Section 2.3.2 (H) of the Land Use Code identifies seven criteria for reviewing an ODP, which are summarized as follows:

1) **Section 2.3.2(H)(1) – Permitted Uses and District Standards**

This standard requires the ODP to be consistent with the permitted uses and applicable zone district standards and any applicable general development standards that can be applied at the level of detail required for an ODP submittal.

The major amendment proposes no changes to land uses within the ODP, which are proposed to include single-family attached, multifamily, and mixed-use dwellings, a childcare center, and office and/or community facility space. All land uses are permitted in the Harmony Corridor (HC) zone district.

Additionally, the HC zone district prescribes a minimum of 75% primary employment uses and a maximum of 25% secondary uses. The ODP is proposing a ratio of secondary uses exceeding the 25% secondary use maximum. A modification of standard was previously approved permitting up to 100% secondary uses for the ODP.

2) **Section 2.3.2(H)(2) – Density**

This standard requires that the Overall Development Plan be consistent with the required density range of residential land uses.

For residential developments, the HC district requires an overall minimum average density of seven dwelling units per net acre. No changes to density are associated with the Major Amendment. Between 400 – 700 residential units are proposed, complying with the standard, and representing a gross density of approximately 12 to 21 units per acre.

3) **Section 2.3.2(H)(3) and 2.3.2(H)(4) – Master Street Plan, Street Pattern, Connectivity, Transportation Connections to Adjoining Properties**

These standards require the ODP to conform to the Master Street Plan, Street Pattern and Connectivity standards, and also to conform with Transportation Level of Service requirements. There are no issues with ODP compliance related to these standards with the exception of 3.6.3(E) *Distribution of Local Traffic to Multiple Arterial Streets* and 3.6.3(F) *Utilization and Provision of Sub-Arterial Street Connections to and from Adjacent Developments and Developable Parcels*. An alternative compliance request was approved with the original ODP approval regarding these standards related to converting a local street connection to a bike/ped connection between the ODP site north to Paddington Road in The English Ranch neighborhood.

As discussed previously in this report, this connection point is subject to opposition by many neighbors in The English Ranch neighborhood and was subject to a community dialogue and Council decision in 2010 that removed a collector-street level connection over cut-through traffic concerns. A local street connection duplicates many of these concerns and conditions that originally lead to the decision to remove a connection initially. Updated traffic studies and analysis indicate the nearby arterial street network can continue to function and meet Transportation Level of Service requirements absent this connection, however, impacts to the timing and location of signalized intersections along Ziegler Road result from removing a local street connection.

4) Section 2.3.2(H)(5) – Natural Features

This standard requires an ODP to show the general location and size of all natural areas, habitats and features within its boundaries and shall indicate the rough estimate of the buffer zone as per Section 3.4.1(E)

The ODP does not contain any natural areas, habitats of features as identified on the City's *Natural Habitats and Features* inventory map and no natural habitat buffer zones are required within the ODP boundary.

5) Section 2.3.2(H)(6) – Drainage Basin Master Plan

This standard requires an ODP to be consistent with the appropriate Drainage Basin Master Plan.

The ODP is located within the Fox Meadows Drainage Basin. A drainage report has been reviewed by stormwater staff and there are no drainage issues associated with the ODP. The ODP map indicates the approximate location and sizing of future detention areas. Future project reviews within the ODP boundary will comply with the City's stormwater management, water quality requirements, and low impact development standards.

6) Section 2.3.2(H)(7) – Housing Density and Mix of Uses

This section requires that any standards relating to housing density and mix of uses will be applied over the entire ODP and not on each individual PDP.

Within the HC zone district, a mix of housing types is required for projects proposing residential dwellings. For projects greater than 30 acres in size, a minimum of three housing types are required.

No changes are associated with the Major Amendment to the ODP's mix of housing types. Housing types shall include single-family attached, multifamily, and mixed-use dwellings. Additional housing types may be provided when individual PDPs are reviewed as multifamily buildings with varying unit numbers per building may count as additional housing types in the HC district.

In addition to these recognized housing types in the HC district, 12 live-work units are proposed that will feature street-oriented commercial storefronts.

4. Findings of Fact/Conclusion

In evaluating the request for the Ziegler-Corbett ODP Major Amendment, MJA220004, Staff makes the following findings of fact:

1. The Major Amendment complies with the applicable procedural and administrative requirements of Article 2 of the Land Use Code.
2. The Major Amendment complies with the applicable review standards for Overall Development Plans of Section 2.3.2(H)(1) through (7).

5. Recommendation

Staff recommends that the Planning and Zoning Commission make a motion to approve the Ziegler-Corbett ODP Major Amendment, MJA220004, based on the Findings of Fact and supporting explanations found in the staff report and hearing materials.

November 11, 2022

Ziegler – Corbett ODP

Statement of Planning Objectives

This proposal is for a Major Amendment to the approved Overall Development Plan (ODP) submittal for the Ziegler-Corbett property located west of Ziegler Road and South of Paddington Rd. The properties are owned by ZIEGLER 1924B LLC, JAR PLUS 3 LLC and DAVID L YOUNG TRUST and contains approximately 32.6 acres total. The property is located in the Harmony-Corridor (HC) Zone District and will be subject to a Type 2 review with required neighborhood meeting.

The property currently is undeveloped and will include primary and/or secondary uses as allowed by the previously approved modifications and the Ft Collins Land Use Codes.

Property Owners within the ODP area:

Parcel Number: 8732000002
JAR PLUS 3 LLC

Parcel Number : 8732400008
DAVID L YOUNG TRUST

Parcel Number: 8732000009
ZIEGLER 1924B LLC

Parcel Number: 8732400010
ZIEGLER 1924B LLC

Uses surrounding the property consist of the following:

South: Front Range Village – Commercial / Retail / Office
West: Affinity – Multi-Family
North: English Ranch Subdivision – Single Family
East: Avago Technologies – Corporate Campus

Vehicular access for the project will be from Ziegler Road via a new full movement lighted intersection that provides access into the neighborhood from the east and access from Corbett Dr. on the west. The site design will incorporate pedestrian access and connectivity utilizing sidewalks and open space, including pedestrian controlled access across Ziegler Rd.

The project will be designed to be compatible with the surrounding neighborhoods as required by the City Code. Architectural compatibility will be achieved by incorporating design elements from the surrounding neighborhood such as building materials, horizontal lap siding, shingle siding and board and batten siding in contrasting colors. In addition, there will be brick and stone veneer accents. The roofs will consist of asphalt shingles and / or standing seam metal

(i) **Statement of appropriate City Plan Principles and Policies achieved by the proposed plan:**

The Ziegler-Corbett ODP meets the following applicable City Plan Principles and Policies:

Livability and Social Health

Principle LIV 2: Promote infill and Redevelopment

Policy LIV 2.1 - REVITALIZATION OF UNDERUTILIZED PROPERTIES
Support the use of creative strategies to revitalize vacant, blighted or otherwise underutilized structures and buildings.

Policy LIV 2.2 - PRIORITY LOCATIONS FOR INFILL AND REDEVELOPMENT Ensure appropriate use of the City's public investments in infrastructure/improvements in the following areas to achieve the City's strategic goals:

Being underutilized, this project is an ideal infill project, and is within walking distance to many destinations including other targeted 'areas of activity' as described throughout the City Plan.

Principle LIV 5: Create more opportunities for housing choices.

Policy LIV 5.1 - HOUSING OPTIONS
To enhance community health and livability, encourage a variety of housing types and densities, including mixed-used developments that are well served by public transportation and close to employment centers, shopping, services and amenities.

Policy LIV 5.3 - LAND FOR RESIDENTIAL DEVELOPMENT

Use density requirements to maximize the use of land for residential development to positively influence housing supply and expand housing choice.

The project provides an opportunity for development of an existing vacant site and the design of the buildings will be compatible with the surrounding neighborhood and setting.

Policy LIV 5.6 - EXISTING NEIGHBORHOODS
Expand housing options in existing neighborhoods
(Where permitted by underlying zoning) by
encouraging:

- **Infill development on vacant and underutilized lots;**
- **Internal ADUs such as basement or upstairs apartments;**
- **Detached ADUs on lots of sufficient size; and**
- **Duplexes, townhomes or other alternatives to detached single-family homes that are compatible with the scale and mass of adjacent properties.**

This development has the opportunity and ability to incorporate different housing types to provide variety along the streetscape. This can be accomplished with the use of different facades and/or materials even if similar models are adjacent to each other.

Principle LIV 6: Improve access to housing that meets the needs of residents regardless of their race, ethnicity, income, age, ability or background.

Policy LIV 6.1 - BASIC ACCESS

Support construction of housing units with practical features that provide access and functionality for people of all ages and widely varying mobilities.

Policy LIV 6.8 - MONITOR HOUSING AFFORDABILITY

Collect, maintain and disseminate information on housing affordability such as cost, demand and supply of affordable housing stock.

The development will provide housing targeted towards all age groups and demographics.

Principle LIV 7: A variety of housing types and densities for all income levels shall be available throughout the Growth Management Area.

Policy LIV 7.1 – Encourage Variety in Housing Types and Locations
Policy LIV 7.4 – Maximize Land for Residential Development

This development has the opportunity and ability to incorporate different housing types to provide variety along the streetscape. This can be accomplished with the use of different facades and/or materials even if similar models are adjacent to each other.

Principle LIV 9: Encourage development that reduces impacts on natural ecosystems and promotes sustainability and resilience.

Policy LIV 9.1 - EFFICIENCY AND RESOURCE

CONSERVATION Reduce net energy and water use of new and existing buildings through energy-efficiency programs, incentives, building and energy code regulations, and electrification and integration of renewable energy technologies.

Policy LIV 9.2 - OUTDOOR WATER USE

Promote reductions in outdoor water use by selecting low-water-use plant materials, using efficient irrigation, improving the soil before planting and exploring opportunities to use non-potable water for irrigation.

The project will provide an attractive streetscape with street trees and detached sidewalks along the main drive. Water conservation and the use of low water consuming plants and grasses will be encouraged.

Culture and Recreation

Principle CR 2: Provide a variety of high-quality outdoor and indoor recreational opportunities that are accessible to all residents.

Policy CR 2.1 - RECREATION OPPORTUNITIES

Maintain and facilitate the development of a well-balanced system of parks, trails, natural areas and recreation facilities that provide residents and visitors of all races/ethnicities, incomes, ages, abilities and backgrounds with a variety of recreational opportunities.

Policy CR 2.2 - INTERCONNECTED SYSTEM

Support an interconnected regional and local system of parks, trails and open lands that balances recreation needs with the need to protect wildlife habitat and other environmentally sensitive areas. Where appropriate, place trails along irrigation ditches and storm drainageways to connect to destinations such as schools, open lands and neighborhood centers.

A variety of open spaces and parks are envisioned for this development. These could include pocket parks, open spaces areas and trails.

Principle CR 3: Adapt and expand parks and recreation facilities and programs to meet the needs of a changing community.

Policy CPR 3.4 – Adhere to Best Management Practices

Follow Environmental Best Management Practices for the maintenance of parks and recreation facilities, such as water conservation and the use of untreated water for irrigation purposes in appropriate areas, managing turf and adhering to policies for weed and pest control, utilizing low emission equipment and providing renewal energy opportunities, reducing solid waste through composting and recycling, and certifying sanctuary areas through Audubon International.

Water conservation and the use of low water consuming plants and grasses will be encouraged. This development will utilize quality landscape materials throughout the site, including enhanced entryway and screening in any appropriate areas.

Economic Health

Policy EH 4.1: The City will encourage the redevelopment of strategic areas within the community as defined in the Community and Neighborhood Livability and Neighborhood Principles and Policies.

AND

Policy EH 4.2 – Reduce Barriers to Infill Development and Redevelopment

The project, is an ideal infill project and is within walking distance to many destinations including other targeted 'areas of activity' as described throughout the City Plan. Residential / Mixed use is an ideal transition to the single-family neighborhood and the commercial district of Front range Village

Environmental Health

Principle ENV 19: The City will pursue opportunities to protect and restore the natural function of the community's urban watersheds and streams as a key component of minimizing flood risk, reducing urban runoff pollution, and improving the ecological health of urban streams.

Policy ENV 19.2 – Pursue Low Impact Development

Low Impact Development (LID) encompasses many aspects of the proposed design. Permeable pavers will be utilized within private drives and/or parking lots as required. The site will be planned with the intent to provide green space buffers and swales to minimize directly connected impervious areas and promote infiltration. Rain Gardens and/or drywells will be utilized where applicable to treat stormwater prior to entering detention areas.

Safe Community

Principle SC 1: Create public spaces and rights-of-way that are safe and welcoming to all users.

Policy SC 1.1 - NEIGHBORHOOD RELATIONS

Provide and expand opportunities for neighborhood safety and involvement by fostering good neighborhood relations, building a sense of community pride and involvement, promoting safe and attractive neighborhoods, and encouraging compliance with City codes and regulations.

A mix of land uses and programming will provide multiple efficient options for movement throughout this development. Bike trails and bike lanes will be used where appropriate to provide alternative methods of travel throughout the development. Development streets will be safe for cars, pedestrian and bicycles as well as attractive. The use of street trees and street lighting will contribute to the safety and aesthetics.

Policy SC 1.2 - PUBLIC SAFETY THROUGH DESIGN

Provide a sense of security and safety within buildings, parking areas, walkways, alleys, bike lanes, public spaces and streets through creative placemaking and environmental design considerations, such as appropriate lighting, public art, visibility, maintained landscaping and location of facilities.

The street system will provide an interconnected network with transportation options to cars, bicycles and pedestrians while providing direct access to community amenities, employment areas and commercial development.

Transportation

Principle T 8: Transportation that provides opportunities for residents to lead healthy and active lifestyles will be promoted.

Policy T 8.1 – Support Active Transportation

Policy T 8.2 – Design for Active Living

Principle T10: Using transit will be a safe, affordable, easy, and convenient mobility option for all ages and abilities.

Policy T 10.1 – Transit Stops

Policy T 10.6 – High Frequency Transit Service

Principle T11: Bicycling will be a safe, easy, and convenient mobility option for all ages and abilities

The location of this project with quick access to the Harmony Street Corridor will promote and support the idea of a predominance of the daily trips of the residents of this project utilizing alternative modes of transportation (walking/biking) or public transportation which includes a Transfort bus stop walking distance along Harmony.

High Performing Community

N/A

- (ii) **Description of proposed open space, wetlands, natural habitats and features, landscaping, circulation, transition areas, and associated buffering on site and in the general vicinity of the project.**

Pedestrian and bicycle trails as well natural buffer areas, parks and/or pocket parks will be integrated into the development. Various modes of circulation will be provided between specified uses, parks and natural areas. These connections will provide access to the harmony Corridor as well as providing the same connection for the neighborhood to the north.

- (iii) **Statement of proposed ownership and maintenance of public and private open space areas; applicant's intentions with regard to future ownership of all or portions of the project development plan.**

Common open space will be owned and maintained by the HOA.

- (iv) **Estimate of number of employees for business, commercial, and industrial uses.**

The type and quantity of commercial has not yet been determined therefore an estimated number of employees cannot be determined. This information will be provided at PDP.

- (v) **Description of rationale behind the assumptions and choices made by the applicant.**

The rationale behind the project is to provide multi-family, single-family attached housing units and mixed-use in a location that is currently in need for more of these housing types.

- (vi) **The applicant shall submit as evidence of successful completion of the applicable criteria, the completed documents pursuant to these regulations for each proposed use. The planning Director may require, or the applicant may choose to submit, evidence that is beyond what is required in that section. Any variance from the criteria shall be described.**

The submitted documents reflect the applicable criteria for the proposed use. Included are two modifications requesting the reduction on the limits of secondary uses and to increase residential buildings to 4 stories.

- (vii) **Narrative description of how conflicts between land uses or disturbances to wetlands, natural habitats and features and or wildlife are being avoided to the maximum extent feasible or are mitigated.**

No existing ecological significance or native habitat is known or documented.

- (viii) **Written narrative addressing each concern/issue raised at the neighborhood meeting(s), if a meeting has been held.**

- (ix) **Name of the project as well as any previous name the project may have had during Conceptual Review.**

The project is currently named Ziegler-Corbett ODP.

- (x) **Parking narrative describing the parking demand generated with consideration of: the number of employees, tenants, and/or patrons; the amount and location of parking provided; where anticipated spill-over parking will occur; and, any other considerations regarding vehicle parking.**

Parking will meet or exceed the parking requirements for the uses anticipated in the ODP.

Ziegler-Corbett ODP Major Amendment Neighborhood Meeting Summary

Neighborhood Meeting Date: January 5, 2023

City Staff – Attendees:

Em Myler – Development Review Liaison
Ryan Mounce – City Planner
Sophie Buckingham – Engineering
Dave Betley – Engineering
Steve Gilchrist – Traffic
Tyler Stamey – Traffic
Noah Beals – Development Review Manager

Applicant Team:

Jason Sherrill, Landmark Homes
Jason Claeys, Highland Development Services

Project Information Presented:

- Em Myler provided an overview of the neighborhood meeting process and next steps after the meeting.
- City Planner Ryan Mounce provided an overview of the history of the original Overall Development Plan (ODP) approval for this project and background information on previous decisions made by the City concerning the potential for a street connection between Front Range Village, this development site, and The English Ranch neighborhood. City staff shared this meeting was prompted to share new information about an amendment to the ODP that could change the potential connectivity to the site and the location of future traffic signals along Ziegler Road. Staff also handed out supplementary information on three potential traffic and connectivity scenarios for discussion and feedback at the meeting (attached to the end of this summary).
- The applicant shared a brief summary of the original ODP layout and that it is a mixed-use project consisting of different types of residential units (400-700 units), a childcare center, and commercial space.

Questions/Comments and Answers (answers primarily provided by City staff unless otherwise noted).

- **Clarification on what criteria and metrics the City reviews to evaluate installing new lights and special pedestrian crossings (reference to a new tunnel under Timberline Rd near Bacon Elementary). Why do some areas receive these improvements but not others?**

Multiple metrics are reviewed for potential traffic signals at intersections, including the level of traffic, turning movements, pedestrian and bike crossings, safety, and more. For the current Ziegler & Paddington intersection the metrics do not currently warrant a signal.

The City has been working to install new bike and pedestrian infrastructure across the entire community over many years. The recently adopted Active Modes Plan identifies a need for a crossing along this stretch of Ziegler Rd, which helps prioritize future funding and projects. The new tunnel near Bacon Elementary is part of a larger capital project that is also expanding Timberline Road that has been in planning for many years.

- **Comment: It appears a light at Hidden Pond/Ziegler benefits only a few homes in Hidden Pond Estates, meanwhile there are larger numbers of residents in English Ranch and Woodland Park struggling to access Ziegler Rd that could really benefit from a light.**

A light at Hidden Pond isn't primarily being driven by traffic on the east side (Hidden Pond) but rather new traffic from the proposed development and additional traffic from Front Range Village and Affinity Multifamily to the west. Traffic studies indicate those combined users would meet traffic levels and warrants for a light. There are tradeoffs in that if there was connectivity north of the site to Paddington Rd then it would warrant a light at Paddington/Ziegler that could also serve English Ranch and Woodland Park neighbors, however, many residents are also concerned about cut-through traffic this would generate within English Ranch.

- **Comment: Would really like a light at Paddington/Ziegler that could serve both Woodland Park and English Ranch. These neighborhoods have always struggled with access onto Ziegler, especially left turns, and it keeps getting worse.**
- **This is all being driven by density, what is the analysis on the level of density and traffic levels?**
The density for the overall ODP is approximately 20 units per acre across the entire site. The Harmony Corridor zone district generally encourages higher intensity uses and has density minimums for the zone district and restricts the amount of single-family detached units that can be built. In terms of density levels, the ODP is similar to a multifamily project that could be found in the Medium Density Mixed Use Neighborhood Zone District and the Affinity project located just to the west of the site.

The traffic analysis comes from a traffic study for development proposal. Copies of these studies are available for review for this project and any development proposal.

[Applicant]: The original analysis and shape of the ODP limited the site to a channelized-T intersection on Ziegler but now with these proposed changes it opens new options and a potential light along Ziegler. Through this process we're hoping to understand what the different options are on potentially installing a light along this stretch of Ziegler Rd.

- **Is there a pass-through between Hidden Pond and Woodland Park so Woodland Park residents could also use the light?**
There is no street connectivity between those two neighborhoods.
- **Comment: What's troubling to many residents on either side of Ziegler is that we've been struggling for so long and we have a lot of residents that feel like we don't matter, and what matters is really this new development. Ever since the roundabout at Horsetooth & Ziegler was installed, it's created a constant flow of traffic that never allows for left turns onto Ziegler.**

- **The ODP was approved for 4-stories, however I thought this was just for the buildings right by Target. Has this changed?**

[Applicant]: There are no proposed changes to heights from the original ODP. There would be 4-story buildings near Front Range Village, and then a partial 4th story near the English Ranch detention pond. There are restrictions on those as they are not a full 4th story but it acts as a stairwell/roof access to a small patio.

- **I had heard the City may move the traffic circle at Horsetooth and Ziegler – is that true?**
At a previous neighborhood meeting it was shared the City may require adjustments to the Ziegler/Horsetooth intersection in the future based on a potential development proposal northeast of the intersection (Strauss Lakes). There hasn't been any new information on that potential development recently and the intersection would be studied extensively if/when a submittal is made.
- **Comment: I think a light at Horsetooth/Ziegler makes a lot of sense. As you've heard from everyone here we have to run a gauntlet because the roundabout doesn't provide any breaks in traffic.**
The City is very interested in finding a location for a light that can help address these issues. In an ideal scenario a connection to Paddington from this vacant site and then a light at Ziegler/Paddington would potentially serve all neighborhoods. We're here tonight to listen to you all because we also know there's many who don't want a connection to English Ranch from this site, however, because of spacing requirements it's not likely there could be two lights, one at Paddington and then another at Hidden Pond.
- **Comment: I would suggest the City put together both options, a light at Paddington or Hidden Pond to show everyone how their lives could be improved. Right now the traffic issue stinks for everyone. I would be interested if there are any substantial impacts if the light goes in at one intersection versus the other. I would also ask the applicant and City to be sensitive to the last remaining 1 acre development site in English Ranch where we plan to continue our 1-story patio homes.**
- **Hidden Pond is a private road. Will the streets in this development be private as well? Does the City maintain the light?**
It's undetermined if any/all of the future streets in the development will be public or private. If the streets are private the full construction cost of the light would fall to the developers. The City would maintain the light after its initial construction just as if a light were installed at Paddington. It would be privately funded, not privately owned.
- **Comment: Is it possible to build a special access through the English Ranch detention pond area on the far right side of the proposed development so the site could access the Paddington/Ziegler intersection and have the traffic warrants for a signal? (Multiple attendees echoed support for this idea)**
This would take a lot more study and has several potential issues as begun to explore the idea. The land where this access would traverse is not owned by the City or the applicants and would need the consent from the owners. Based on current standards, the detention pond is also undersized and adding an access point through it would likely make it more deficient.

[Applicant] Some of the properties further west of our site were also developed with no detention or undersized detention which is putting additional stormwater requirements we're having to manage on our proposed development site to help make up the shortfall.

- **The Harmony Corridor Plan was amended. Did it not used to have the minimum density requirement? We're getting hammered with density.**

The minimum density requirement is in the Land Use Code for the zone district. The Harmony Corridor Plan did have to be amended to allow for a regional shopping center (Front Range Village), and the most recent amendments created new standards for the gateway area near the I-25 interchange, but no changes to density in this portion of the corridor.

- **Comment: I think the City and applicant should consider a 5-way intersection at the corner of Paddington and this development site so everyone still has access to the light but there are still separate entrances for Paddington and this development.**
- **The neighborhood is concerned about additional traffic in the neighborhood, but are you willing to accept additional neighborhood traffic in your development to access the light?**
[Applicant]: Yes, we're willing to accept that.
- **Comment: I want to mention that English Ranch, while not ideal, has multiple access points to Ziegler and also other arterial roads. Woodland Park only has access to Ziegler Rd and no other options to get out onto the arterial street network and a light at Paddington would really help us.**
- **Is there any possibility the funding for the light could instead be used to install a light at Ziegler/Horsetooth and remove the roundabout?**
That type of study or analysis hasn't been completed. Likely a trigger for something like this would be the Strauss Lakes development near the roundabout.
- **If there is a light at Paddinton/Ziegler, how would that change the main access point into the development site?**
Some additional study would be needed, but it could mean it would potentially be limited to a right-in, right-out only, and the users of Hidden Pond would still have full movement.
- **Comment: I feel like a connection to Paddington and then a light at Paddington/Ziegler could solve a lot of the issues raised this evening.**
- **Additional comments expressing interest in the idea to put an access point through the English Ranch detention pond to Paddington.**
- **With a light at Hidden Pond, will there be a crosswalk so pedestrians can also cross Ziegler?**
Yes, that is part of any new signal.

ZIELGER ROAD TRAFFIC SOLUTIONS

Option 1: Signal at Hidden Pond, no vehicle connection to English Ranch

Pros

- New development and Hidden Pond can access new signal
- New development vehicles cannot access English Ranch

Cons

- English Ranch cannot access new signal
- Prevents any future signal into English Ranch

Option 2: Signal at Paddington, vehicle connection to English Ranch

Pros

- New multifamily development and English Ranch have access to new signal

Cons

- Prevents any future signal at Hidden Pond
- New multifamily development traffic can access English Ranch

Option 3: No signal on Zielger, no vehicle connection to English Ranch

Pros

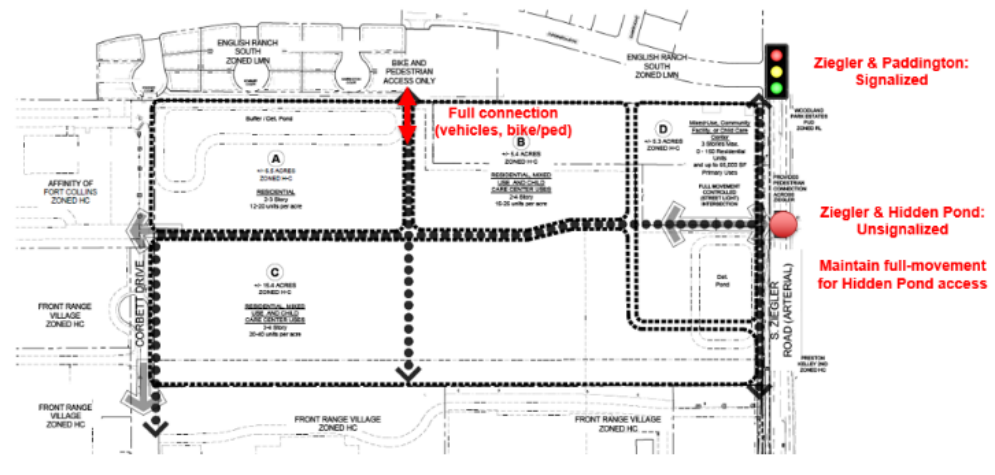

- Upholds agreement for no vehicle access between new multifamily development and English Ranch

Cons

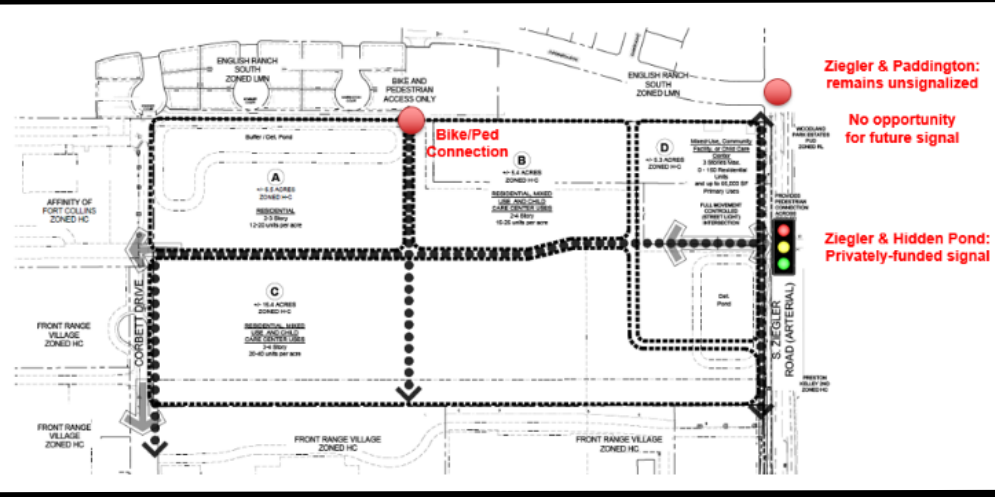

- No signal at Paddington or Hidden Pond

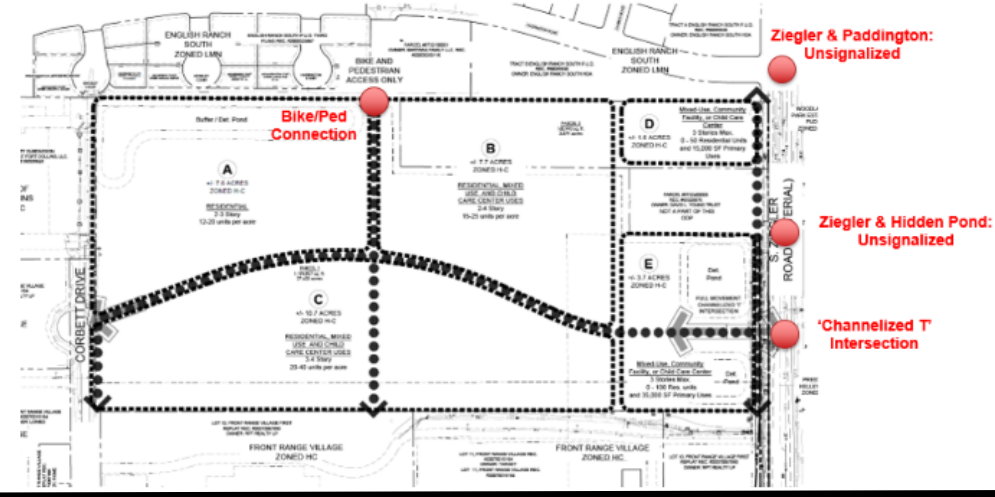

Item 22. **Option 1**

Option 2

Option 3

Comments

Corbett & Ziegler Overall Development Plan Neighborhood Meeting Summary

Meeting Date: February 2nd, 2022

Location: [Virtual Zoom Meeting](#)

City Staff Attending:

Yani Jones - Neighborhood Services
 Ryan Mounce - Planning
 Nicole Hahn - Traffic Operations
 Spencer Smith-Traffic Operations
 Sophie Buckingham—Engineering

Applicant Team:

Jason Sherrill, Landmark homes
 Jon Mosier, Landmark Homes
 Chris Beabout, Landmark Homes
 Mike Walker, TB Group
 Jason Claeys, Highland Development Services
 Matt Delich, Delich Associates

Summary

- **Meeting Topic:** An Overall Development Plan (ODP) for land between Front Range Village and English Ranch. The ODP is a high level “master plan” showing general land uses, road connections, etc. The applicants are proposing mostly residential or mixed-use dwellings on the site, with opportunities for office, childcare or community facility space on the eastern portions of the property. The plans would require two modifications—one to allow more than 25% of the site to be used for residential development, and one to increase the maximum height of residential buildings from three to four stories. A key change since the first neighborhood meeting is a vehicular connection north from the site to Paddington Road is not longer proposed and would be bike/pedestrian access only. This change is an Alternative Compliance request as part of the proposal's street connectivity standards.
- **Meeting Details:**
 - Approximately 50 attendees, including staff and applicants
 - Meeting was recorded and posted online at fcgov.com/developmentreview/agendas
- Overview
 - Q&A and comments primarily focused on:
 - Clarifications that the proposal would no longer make a vehicular connection to English Ranch and Paddington Road;
 - Comments about existing and future traffic issues in the area; including difficulty making left turns onto Ziegler Road and concerns about additional traffic associated with this proposal and another development proposal near Ziegler/Horsetooth Roads.
 - Comments to make sure the City reviews the operation of the roundabout at Horsetooth and Ziegler as traffic volumes increase.
 - Concern about the proposed number of units and proposed building heights, and a lack of compatibility with surrounding homes.

Corbett & Ziegler Overall Development Plan Neighborhood Meeting Summary

Meeting Date: September 8th, 2021

Location: [Virtual Zoom Meeting](#)

City Staff Attending:

Alyssa Stephens—Neighborhood Services
Ryan Mounce—Planning
Nicole Hahn—Traffic
Dave Betley—Engineering
Sophie Buckingham—Engineering

Applicant Team:

Jason Sherrill, Landmark homes
Jon Mosier, Landmark Homes
Chris Beabout, Landmark Homes
Mike Walker, TB Group
Jason Claeys, Highland Development Services
Matt Delich, Delich Associates

Summary

- **Meeting Topic:** An Overall Development Plan (ODP) for land between Front Range Village and English Ranch. The ODP is a high level “master plan” showing general land uses, road connections, etc. The applicants are proposing mostly residential uses on the site, including lower density single-family homes on the north side and higher density multifamily housing on the south side near Front Range Village. The conceptual plans also included mixed-use (commercial and residential) buildings along Ziegler. The plans would require two modifications—one to allow more than 25% of the site to be used for residential development, and one to increase the maximum height of residential buildings from three to four stories. This was the first opportunity to review early ODP documents prior to submitting them to the City for official review and comment.
- **Meeting Details:**
 - Appr. 105 attendees, including staff and applicants
 - Meeting was recorded and posted online at OurCity.FCGov.com/DevReview
- Overview
 - Q&A primarily focused on:
 - Desire to prevent connections between the new development and English Ranch, particularly any connection to Paddington;
 - Concerns about safety for pedestrians due to any new connections and increased overall traffic, and desire for improved bike and pedestrian infrastructure in the area; and
 - Concern about the proposed number of units and proposed building heights, and a lack of compatibility with surrounding homes.
 - Attendees who spoke or submitted questions into the chat were mostly opposed to the development.

Subject: [EXTERNAL] Ziegler-Corbett Overall Development Plan Major Amendment MJA220004
Date: Saturday, January 7, 2023 12:38:02 PM

Dear Mr. Mounce:

After the holiday travel, I have just opened my mail which included a notice for the public hearing held 1/5 on the above amendment. I therefore missed the meeting, but I would like to voice my support for this change that may allow for a stoplight at Hidden Pond Dr.

As a resident of Woodland Park Estates, I have communicated to the city on many occasions my concern about the increased traffic on Ziegler Rd. And the difficulty in safely exiting our community onto Ziegler Rd., Especially for cyclists and pedestrians wishing to cross Ziegler. A proposed controlled pedestrian crossing at Grand Teton/Paddington is 10-20 years out on the city's long range traffic plan. If this change will address my concerns sooner, I am in favor.

Sincerely,
Pam Starling

Subject: [EXTERNAL] Ziegler Corbett Overall Development Plan Major Amendment
Date: Sunday, January 8, 2023 6:06:52 PM

I was unable to attend the Jan 6 meeting but would like to inquire and register my objection to putting in a light at the Hill Pond intersection.

Inquiry, why is primary access for this subdivision on Ziegler when there is a cutout on Paddington to the North and also on Corbet to the west? A subdivision that has so many access options should not have priority to a stop light that the residents east of Ziegler have been requesting for 20 years at the Paddington/Grand Teton intersection?

A street light if installed would back up south bound traffic past Paddington/Grand Teton and make a left hand turn from Grand Teton nearly impossible virtually the entire day.

Date: Thursday, January 19, 2023 11:22:43 PM

Hi Ryan,

I attended the Woodland Park Estates board meeting this evening and summarized the Development Meeting discussion points regarding north/east access to the new development. Many folks, for some reason were unaware of the Jan 5 meeting, some just weren't able to attend. Many would like voice their support for a traffic light at Paddington and Zeigler feeling that this is the best option for our community and makes more sense than a light further south.

I mentioned six options for the new development to connect to Paddington on the north. Did your team come up with the best option or two for the Paddington connection? Your team knows best what is possible and most likely to succeed. Will there be another meeting to discuss all the options being considered? More folks from Woodland Park would like to attend the next meeting.

Thanks

Hi Ryan,
Thanks for the update and re-consideration of a solution that works, is acceptable, for all parties involved. It would be great if your team could identify the best option for a paddington connection. My guess would be a local vs Corbett connection. Perhaps as close as possible to Ziegler. Consideration of control of flow toward Ziegler. A one way exit to Paddington. The entrance to the development can still be off Ziegler. More traffic calming humps in English ranch to discourage cut through. Just some thoughts. You most likely have considered some of these. I am sure that Woodland Park has at least, if not more, citizens that support a Paddington light vs those that oppose it. All the English Ranch folks at the last meeting seemed to be ok with considering this possible solution.
Thanks

Hello Daniel,

Thanks for sharing information and passing along these comments from your neighbors.

Regarding the Paddington light and connection, it's been a long and ongoing process evaluating these issues even before this specific proposal came about. For a long period of time the vision for this area was always to have connections from the area that eventually became Front Range Village to Paddington, which would help connectivity/traffic volumes to support a light at Ziegler and Paddington. When Front Range Village was eventually proposed many neighbors in English Ranch petitioned City Council in 2010 to remove the connection of Corbett Drive to Paddington over concerns about a lot of retail traffic cutting through the neighborhood. City Council agreed to remove any collector-street level connection, but left unresolved the issue of a local street connection.

At the moment this has become a very 50-50 type of issue, with many English Ranch neighbors opposed to a connection over concerns of cut-through traffic impacts, and many Woodland Park Estates residents desiring the connection to help support construction of a light at Ziegler/Paddington. A difficulty from the staff perspective is we see benefits for a light at Ziegler/Paddington so both neighborhoods have a controlled intersection to make left-hand turns onto Ziegler, and especially for

Woodland Park Estates which doesn't have the same level of connectivity that English Ranch has to multiple other arterial streets. On the other hand, getting a connection from the proposal to English Ranch to support a light essentially creates a very similar type of connection that City Council had previously directly removed from the City's Master Street Plan in 2010.

We're still evaluating all the options and the specific applicant proposal for a privately-funded light at Hidden Pond and Ziegler. We would like to have some additional follow-up with neighbors once we have more analysis and information to share, but at this time there isn't a concrete timeline on when another meeting or follow-up would occur until we complete some additional research and evaluation.

Date: Saturday, January 28, 2023 5:51:15 PM

I am reaching out regarding the Ziegler-Corbett Development MJa220004

I am the HOA president and wanted to share input I have been receiving regarding the proposed traffic (light) solutions.

I understand that 3 options were presented but the ongoing consensus of the neighbors within English Ranch is that there should be no connecting streets from English Ranch into the new development.

Of the 3 traffic solutions proposed, Option 1 would uphold the agreement for no vehicle access from English Ranch into the new development and still provide a light at hidden pond to address the signal/safety issues of crossing Ziegler.

Thank you for listening

Tracey Ryssman
HOA President, English Ranch

ZIEGLER ROAD TRAFFIC SOLUTIONS

Option 1: Signal at Hidden Pond, no vehicle connection to English Ranch

Pros

- New development and Hidden Pond can access new signal
- New development vehicles cannot access English Ranch

Cons

- English Ranch cannot access new signal
- Prevents any future signal into English Ranch

Option 2: Signal at Paddington, vehicle connection to English Ranch

Pros

- New multifamily development and English Ranch have access to new signal

Cons

- Prevents any future signal at Hidden Pond
- New multifamily development traffic can access English Ranch

Option 3: No signal on Zieglar, no vehicle connection to English Ranch

Pros

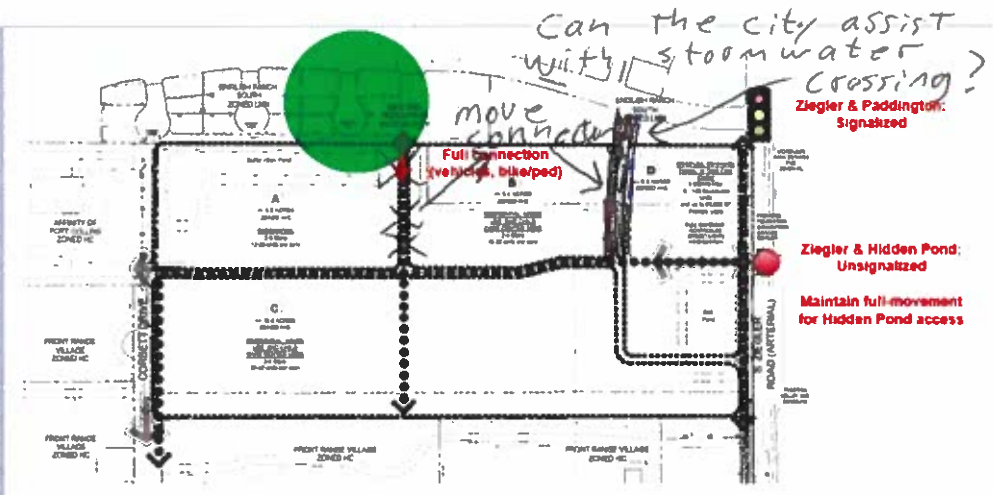

- Upholds agreement for no vehicle access between new multifamily development and English Ranch

Cons

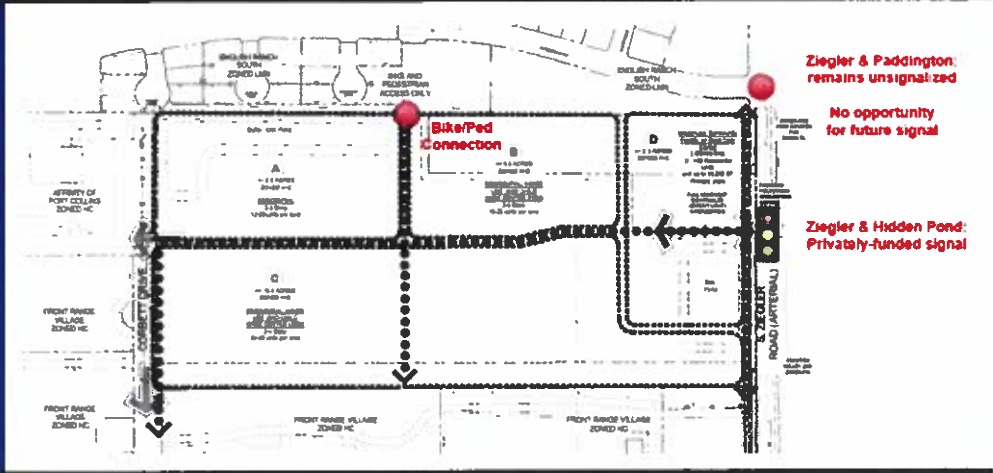

- No signal at Paddington or Hidden Pond

Planning & Zoning Commission Hearing: February 17, 2022

ODP210004, Ziegler-Corbett Overall Development Plan

Summary of Request

This is a request for an Overall Development Plan for a mixed-use development on approximately 31.3 acres in the Harmony Corridor (H-C) zone district. The ODP proposes modifications of standards to Section 4.26(D)(2) concerning the proportion of primary and secondary uses and Section 4.26(D)(3)(a) concerning residential building heights, as well as a request for Alternative Compliance to Section 3.6.3 regarding street pattern and connectivity standards.

Zoning Map

Next Steps

If approved by the decision maker, future Project Development Plans (PDPs) can be submitted and reviewed for compliance with the Overall Development Plan for this property.

Site Location

The Ziegler – Corbett ODP is located between Ziegler Road and Corbett Drive, north of Front Range Village, or approximately 1,800 feet northwest of the Harmony Road and Ziegler Road intersection (parcels 8732000002 & 8732000009).

Staff Recommendation

Approval of the Modification of Standards to Section 4.26(D)(2) and Section 4.26(D)(3)(a), approval of the Alternative Compliance request to Section 3.6.3 and approval of the Overall Development Plan.

1. Project Introduction

A. PROJECT DESCRIPTION

The Overall Development Plan (ODP) proposes a 31-acre, mixed-use development located in the Harmony Corridor (HC) zone district. Land-uses include a combination of 400 – 700 single family attached, multifamily, and mixed-use dwelling units, a childcare center, and 50,000 square feet of office or community facility space. The ODP prioritizes higher residential and mixed-use intensity along the Ziegler Road frontage and southern property boundary and single-family attached and drainage/buffer areas along the north and northwestern edges of the site, adjacent to existing single family detached units.

The ODP access and transportation network envisions two primary corridors for movement; one corridor oriented east-west connecting the primary site access from Ziegler Road on the east and Corbett Drive on the west. A second north-south corridor would serve the site internally as well as provide opportunities for connections to both the north and south of the site pending future development or redevelopment of adjacent properties. An alternative compliance request proposing a bike/pedestrian-only connection to the north has been submitted as part of this ODP.

While all of the land uses proposed within the ODP are permitted in the HC zone district, a modification of standard to Section 4.26(D)(2) regarding the proportion of primary and secondary uses has been submitted, requesting a reduction in the amount of primary uses (e.g. office or light industrial space) that would be provided in relation to the amount of secondary uses (residential dwellings). Separately, a modification of standard related to the maximum height for residential buildings is proposed, requesting up to 4-stories for portions of the ODP site.

B. DEVELOPMENT BACKGROUND & CONTEXT

The 31-acre ODP site is currently undeveloped and was annexed into the City as part of the Spring Creek Farms 4th Annexation in 1994. Adjacent development includes the Front Range Village shopping center to the south, The English Ranch residential subdivision to the north, Affinity Fort Collins, a senior apartment building, to the west, and the Broadcom/HP Campus to the east across Ziegler Road.

The ODP property is located within the HC zone district, designed to implement the policies and goals of the Harmony Corridor Plan. Since adoption of the Harmony Corridor Plan, the site has been included under the 'Basic Industrial and Non-Retail Employment Activity Center' designation, requiring a ratio of at least 75% primary and up to 25% secondary uses for the site.

In 1996, a previous ODP (Symbios Logic ODP) was approved for large portions of the site and areas further south. This original ODP indicated secondary uses such as hotels, retail, and residential land uses for the property, while areas further south would be reserved for primary uses such as office, light industrial or research uses. In the early 2000s, City Council amended the Harmony Corridor Plan and updated the designation for the property to the south to allow for a regional shopping center (Front Range Village).

Portions of the Ziegler-Corbett ODP site are impacted by or relate to the development of Front Range Village, including a berm easement along the southern property boundary of the ODP, as well as incorporating drainage and stormwater improvements along the Ziegler Road frontage that will serve the ODP site, Front Range Village and properties to the west within the Fox Meadows Drainage Basin.

Surrounding Zoning and Land Uses

	North	South	East	West
Zoning	The English Ranch Neighborhood (LMN)	Front Range Village Regional Shopping Center (HC)	Woodland Park Estates (RL) and Broadcom/HP Campus (HC)	Front Range Village Regional Shopping Center (HC) and Affinity Fort Collins Apartments (HC)
Land Use	Single family detached units	Retail	Single family attached & detached units; office campus	Retail; multifamily

C. OVERVIEW OF MAIN CONSIDERATIONS

The ODP property represents one of the few remaining large parcels for Harmony Corridor development. The Harmony Corridor Plan envisions a mixed-use, employment-focused corridor that generally supports more intensive development while compatibly transitioning to adjacent residential zoning. The land use and transportation connectivity for surrounding properties have changed dramatically from what was outlined originally in the Harmony Corridor Plan and Master Street Plan for this area. These changes play a significant role in several requested modifications of standards for the project.

Surrounding the site are a number of amenities. Within the nearby Harmony Corridor are many jobs and employers, and Front Range Village immediately south provides a mix of neighborhood and regional shopping destinations. Both Ziegler and Harmony Roads are envisioned for additional transit enhancements in the future. Given these opportunities, many City policies and goals align with the Harmony Corridor Plan’s characterization that the zone district is suitable for more intensive development. At the same time, the ODP property abuts existing single-family residential development to the north. A significant portion of this project review has revolved around balancing the efficient use of the property for intensive development and creating a framework to compatibly transition to existing nearby residential zoning.

Based on community and neighborhood input, the primary consideration for the project has been the possible vehicular connection between the ODP site and The English Ranch neighborhood to the north, which would have the effect of connecting the neighborhood to the Front Range Village shopping center. When Front Range Village was originally developed, concerns over a vehicle connection with the neighborhood eventually led City Council to remove a collector-street connection from the Master Street Plan between the neighborhood and the shopping center. Requirements for a local street connection that mimics the previous collector street alignment have been questioned by many neighbors who believe the issue was resolved in 2010 when Council amended the Master Street Plan.

D. CITY PLAN PRINCIPLES AND POLICIES:

The City’s comprehensive plan (2019 City Plan) was developed with the participation of thousands of community members and embodies the vision and values of the community for the future. A basic aspect of the vision pertinent to the proposal is the unique character and sense of place in Fort Collins.

The City Plan’s Structure Plan Map includes place types—or land use categories—which provide a framework for the ultimate buildout of Fort Collins. These place types provide a policy structure that can apply to several specific zone districts within each place type by outlining a range of desired characteristics.

The subject property is consistent with the “Mixed-Employment District” place type, which applies to this property and is typically the overlying land use designation for the Harmony Corridor and Employment zone districts, and those areas with existing or potential for more intensive development with an employment focus.

City Plan states that the Structure Plan is not intended to be used as a stand-alone tool; rather, it should be considered in conjunction with the accompanying principles, goals and policies contained in City Plan as a tool to guide future growth and development. Key principles and policies relevant to the project include the following:

OUTCOME AREA “LIV” -- NEIGHBORHOOD LIVABILITY AND SOCIAL HEALTH – Managing Growth:
These principles help the City to manage growth by encouraging infill and redevelopment, ensuring this development is compatible with the character of the surrounding neighborhood or area.

PRINCIPLE LIV 2: Promote Infill and Redevelopment:

POLICY LIV 2.1 - REVITALIZATION OF UNDERUTILIZED PROPERTIES. Support the use of creative strategies to revitalize vacant, blighted or otherwise underutilized structures and buildings, including, but not limited to: Infill of existing surface parking lots—particularly in areas that are currently, or will be, served by bus rapid transit (BRT) and/or high-frequency transit in the future.

PRINCIPLE LIV 3: Maintain and enhance our unique character and sense of place as the community grows:

POLICY LIV 3.1 - PUBLIC AMENITIES. Design streets and other public spaces with the comfort and enjoyment of pedestrians in mind ...such as plazas, pocket parks, patios, children’s play areas, sidewalks, pathways...

POLICY LIV 3.6 - CONTEXT-SENSITIVE DEVELOPMENT. Ensure that all development contributes to the positive character of the surrounding area. Building materials, architectural details, color range, building massing, and relationships to streets and sidewalks should be tailored to the surrounding area.

PRINCIPLE LIV 4 – Enhance neighborhood livability:

POLICY LIV 4.2 - COMPATIBILITY OF ADJACENT DEVELOPMENT. Ensure that development that occurs in adjacent districts complements and enhances the positive qualities of existing neighborhoods. Developments that share a property line and/or street frontage with an existing neighborhood should promote compatibility by: Continuing established block patterns and streets to improve access to services and amenities from the adjacent neighborhood; Incorporating context-sensitive buildings and site features (e.g., similar size, scale and materials); and Locating parking and service areas where impacts on existing neighborhoods—such as noise and traffic—will be minimized.

Principle LIV 5 – Create more opportunities for housing choices.

POLICY LIV 5.3 - LAND FOR RESIDENTIAL DEVELOPMENT. Use density requirements to maximize the use of land for residential development to positively influence housing supply and expand housing choice.

2. Public Outreach

Two virtual neighborhood meetings were held to discuss the project on September 9, 2021 and February 2, 2022. A video of the September 8, 2021 meeting can be viewed at: https://www.youtube.com/watch?v=jRu3oU_Ba5M, and a video of the February 2nd, 2022 meeting can be viewed at: <https://youtu.be/a3N3ZpMljJlv>.

Summaries of both neighborhood meetings are attached to this report.

Main Topics discussed at the meetings included:

1. Concerns about a vehicular connection north to Paddington Road and additional neighborhood traffic from vehicles accessing Front Range Village;

2. Concerns about existing and increased congestion as a result of the project and nearby proposals at Horsetooth and Ziegler roads; increased traffic would exacerbate issues making left hand turns on to Ziegler Road;
3. Concerns about density, compatibility, and height of the proposal.

3. Land Use Code Article 2 – Applicable Standards

A. OVERALL DEVELOPMENT PLAN PROCEDURAL OVERVIEW

1. Conceptual Review – CDR210051

A conceptual review meeting was held on July 8, 2021.

2. First Submittal – ODP210004

The Overall Development Plan was submitted on October 8, 2021.

3. Neighborhood Meeting

Pursuant to *LUC Section 2.2.2 – Step 2: Neighborhood Meetings*, a neighborhood meeting is required for ODP projects. Two virtual neighborhood meetings were held on September 8, 2021 and February 2, 2022.

Written Hearing Notice: February 3, 2022, 845 addresses mailed.

Published Coloradoan Hearing Notice: Scheduled for February 6, 2022

B. DIVISION 2.8 – MODIFICATION OF STANDARDS

The applicant requests two modifications of standards. These modifications address:

- 4.26(D)(2) Secondary Uses
- 4.26(D)(3)(a) Dimensional Standards (Residential Building Height)

The Land Use Code is adopted with the recognition that there will be instances where a project would support the implementation of City Plan, but due to unique and unforeseen circumstances would not meet a specific standard of the Land Use Code as stated. Accordingly, code standards include provisions for modifications. The modification process and criteria in Land Use Code Division 2.8.2(H) provide for evaluation of these instances on a case-by-case basis, as follows:

Land Use Code Modification Criteria:

"The decision maker may grant a modification of standards only if it finds that the granting of the modification would not be detrimental to the public good, and that:

(1) the plan as submitted will promote the general purpose of the standard for which the modification is requested equally well or better than would a plan which complies with the standard for which a modification is requested; or

(2) the granting of a modification from the strict application of any standard would, without impairing the intent and purpose of this Land Use Code, substantially alleviate an existing, defined and described problem of city-wide concern or would result in a substantial benefit to the city by reason of the fact that the proposed project would substantially address an important community need specifically and expressly defined and described in the city's Comprehensive Plan or in an adopted policy, ordinance or resolution of the City Council, and the strict application of such a standard would render the project practically infeasible; or

(3) by reason of exceptional physical conditions or other extraordinary and exceptional situations, unique to such property, including, but not limited to, physical conditions such as exceptional narrowness, shallowness or topography, or physical conditions which hinder the owner's ability to install a solar energy system, the strict application of the standard sought to be modified would result in unusual and exceptional practical difficulties, or exceptional or undue hardship upon the owner of such property, provided that such difficulties or hardship are not caused by the act or omission of the applicant; or

(4) the plan as submitted will not diverge from the standards of the Land Use Code that are authorized by this Division to be modified except in a nominal, inconsequential way when considered from the perspective of the entire development plan and will continue to advance the purposes of the Land Use Code as contained in Section 1.2.2.

Any finding made under subparagraph (1), (2), (3) or (4) above shall be supported by specific findings showing how the plan, as submitted, meets the requirements and criteria of said subparagraph (1), (2), (3) or (4).

1. Modification to Section 4.26(D)(2) Secondary Uses.

The standard:

*"Secondary Uses. All secondary uses shall be integrated both in function and appearance into a larger employment-based development plan that emphasizes primary uses. A secondary use shall be subject to administrative review or Planning and Zoning Board review as required for such use in subsection 4.26(B). The following permitted uses shall be considered secondary uses in this zone district and together **shall occupy no more than twenty-five (25) percent of the total gross area of the development plan.**"*

- (a) Community facilities.
- (b) Public facilities.
- (c) Child care centers.
- (d) Print shops.
- (e) Food catering.
- (f) Workshops and custom small industry uses.
- (g) Residential uses (except mixed-use dwellings when the residential units are stacked above a primary use which occupies the ground floor).
- (h) Lodging establishments.
- (i) Convenience shopping centers.
- (j) Standard restaurants.
- (k) Bed and breakfast establishments.
- (l) Clubs and lodges.

- (m) Health and membership clubs.
- (n) Convention and conference centers.
- (o) Places of worship or assembly.
- (p) Limited indoor recreation establishments.
- (q) Unlimited indoor recreation use and facility.
- (r) Food truck rally.
- (s) Microbrewery/distillery/winery.
- (t) Seasonal overflow shelters.

Overview

This modification is being requested because the ODP proposes a mix of secondary land uses (residential dwellings, childcare center and community facilities) in excess of 25% of the total gross area of the ODP site. The Harmony Corridor Plan and HC zone district envision an employment-focused corridor and seek to maximize employment-generating land uses, such as office or light industrial, in areas of the corridor designated as ‘Basic Industrial Non-Retail Activity Centers.’ The ODP site is located within such an area in the Harmony Corridor Plan.

The applicant is requesting 100% secondary uses for the site, although 50,000 square feet of primary use is proposed on Parcels D & E. Primary uses in the Harmony Corridor can be measured by gross area of the development site or on a square footage basis. By gross area, Parcels D and E represent 17% of the ODP land area.

When compared with other lower-intensity primary uses in the Harmony Corridor by square footage, such as non-campus professional and medical office, many of these developments range in intensity between 2,500 – 7,500 square feet of primary use per gross acre. Using the midpoint of this range, the proposed 50,000 square feet represents approximately a 10-acre equivalent of primary uses, or 33% of the ODP land uses.

Primary Use Evaluation Summary

LUC Requirement	Modification Request	Proposed (Gross Land Area)	Proposed (Square Footage)
75% primary uses	0% primary uses	17% (5.3 acres of 31.3 acre ODP site)	50,000 square feet (Equivalent office intensity to 10 acres of primary employment land, or approximately 33% of ODP land area)

Ultimately, staff is evaluating the applicant’s proposal for 100% secondary uses even though primary uses are being offered, as the applicants are seeking flexibility within the ODP approval process to allow other public-benefit oriented land uses on Parcels D and E: either a childcare center or community facility. If a community facility is proposed in a subsequent Project Development Plan, this would likely result in a reduction in the amount of primary office uses being provided.

Summary of Applicant Justification

The applicant’s modification request is attached. It provides a summary of unique site characteristics, which impact the ability of the site to host large-scale employment land uses as envisioned in the Harmony Corridor Plan. The ODP is requesting no limit on the amount of secondary uses provided but is proposing to include 50,000 square feet of office, a primary use, which the applicants contend is more proportionate to the unique challenges and opportunities for primary uses at this location.

In addition, the applicants propose a series of improvements and amenities that would address important community needs and provide community benefits related to sustainability and energy use, access to

childcare, and on site park/gathering space. Specifically, the ODP proposes rooftop solar for residential units and buildings, designing and certifying townhome and condominiums buildings to LEED gold criteria, and providing enhanced park and gathering space exceeding HC zone district standards.

For the above reasons, the applicant contends that without impairing the intent of the Land Use Code, site conditions result in unusual practical difficulties and hardship in meeting the 75% primary use ratio for the site and that the additional amenities proposed would result in a substantial benefit to the city by substantially addressing an important community need described in the city's Comprehensive Plan or in an adopted policy.

Staff Findings

Staff finds that the granting of the modification would not be detrimental to the public good and that the request satisfies criteria (2), and (3) in subsection 2.8.2(H):

- A. The modification meets 2.8.2(H)(2), because the project commits to substantially address several important community priorities and provide community benefits that exceed development and building/energy code standards.
 - The ODP commits to providing a childcare center as one of the project's land-uses. In both the City's Comprehensive Plan and Strategic Plan, access to childcare is prioritized as an equity measure, for early childhood learning, and as an economic tool for workforce and business retention. "Affordable, Quality and Accessible Childcare Infrastructure" was also adopted as a 2021-2023 City Council priority. Note 12 on the ODP map references the commitment to provide a childcare as part of the ODP development.

Relevant policies/goals from City Plan:

Policy EH 3.1 – Business Programs

*Work with the local business community to ensure that economic health strategies and plans are identified to improve the local economy. Collectively identify programs and support efforts that will help existing businesses and new-business creation. Analyze barriers to the retention of businesses and employees, **including access to affordable childcare and attainable housing.***

Policy HI 2.4 – Early Learning

Encourage equitable access to childcare, early learning opportunities and other programs that help families prepare their children for school.

Relevant strategies from the 2020 Strategic Plan:

Economic Health Strategy 3.2

Understand trends in the local labor market and work with key partners to grow diverse employment opportunities.

- ***Reduce identified barriers of workforce attraction and retention, including access and affordability of quality housing and childcare.***

- The ODP also commits to providing on-site solar energy generation and greater sustainability through LEED gold certification for townhome and condominium units. City Plan and Our Climate Future include adopted goals for the community to become carbon neutral by 2050, in part through developing new distributed, renewable energy generation, improving energy codes, and designing more efficient and sustainability buildings.

The ODP addresses these goals by providing on-site solar generation for residential units and certifying townhome and condominium units to LEED gold standards, which requires minimum energy performance for buildings that exceed the community's building/energy

code standards. Notes 16 and 17 on the ODP map detail requirements for solar generation and LEED gold certification.

Relevant policies/goals from City Plan:

Policy ENV 3.1 – Renewable Electricity Supply and Integration

*Encourage the Platte River Power Authority (PRPA) to provide 100% renewable electricity supply by 2030 and continue to **integrate distributed energy resources while maintaining affordability and reliability.***

Policy ENV 3.2 – Efficient Buildings

Support continuous improvement in efficiency for existing and new buildings through incentives, reporting requirements and energy codes.

Relevant policies/goals from Our Climate Future:

Big Move 12 - 100% Renewable Energy

Everyone in the community receives affordable and reliable 100% renewable electricity, including from local sources.

The 100% renewable electricity big move means:

- Working with Platte River to increase utility scale renewable electricity sources;
- Continuing to **expand the capacity of local solar** and battery storage, and
- Deploying new capabilities and strategies to **support variable renewable energy resources with responsive homes, businesses, and electric vehicles.**

B. The modification meets 2.8.2(H)(3), because of the unique site location attributes related to visibility, commercial accessibility, and proximity to the Harmony Road frontage. These location characteristics present practical difficulties in fully achieving a 75% primary use mix for the entire ODP site as prescribed by the Harmony Corridor Plan and HC district standards.

- The Harmony Corridor Plan, “establishes the corridor as a preferred location for intense urban activity including a mix of residential, industrial, commercial and recreational uses.” While encouraging a broad mix of uses, primary employment for offices, research labs, and light industrial is emphasized through requirements for 75% primary uses in the ‘Basic Industrial Non-Retail Activity Centers,’ which comprise a large plurality of land in the corridor.

Separately, the Plan states “the focus of most development activity, especially commercial, should be at the major street intersections. The intensity of land use should decrease as distance from Harmony Road increases and as the distance from the major intersections increases.” This pattern of development is frequently observed throughout the corridor, where the majority of primary uses front Harmony Road and secondary uses, especially residential, are located furthest from the highway corridor. This was also the original land vision for the larger vicinity as originally approved in the Symbios Logic ODP from the mid-1990s which included primary uses along the Harmony Road frontage and secondary uses further to the north on what is now the proposed ODP site.

The land south of the ODP site hosts Front Range Village, a large shopping center consisting predominantly of secondary uses. The Front Range Village property was originally designated as a ‘Basic Industrial Non-Retail Activity Center’ in the Harmony Corridor Plan; however, its designation was changed by City Council in the early 2000s to permit construction of a regional shopping center.

While the original Harmony Corridor Plan envisioned a large, contiguous area of primarily employment land northeast of Harmony and Ziegler Roads, through subsequent policy changes, the area has developed predominantly as secondary uses. The only remaining land for primary uses is within the ODP property. Primary employment uses on this site would represent a departure from the traditional pattern of development and would instead see commercial/industrial primary uses abutting adjacent residential zoning, rather than fronting on Harmony Road.

- The location of the ODP property further from Harmony Road frontage also impacts the viability of the site for primary uses due to limited visibility and commercial accessibility. The ODP site features HC-zoned land that is located furthest from Harmony Road than all other HC zoned lane in the corridor.

With the exception of an assisted living facility (a primary use) and an industrial-flex development in the Harmony Technology Park, all other HC and non-HC zoned land at similar distances from the Harmony Corridor frontage are secondary uses.

As the last remaining vacant land in the vicinity, the site's access is largely dictated by the existing transportation network and pattern of development. A fully signalized intersection to the site that could offer large commercial vehicles protected movements is not planned, given the site's proximity to an existing signal to the south at Council Tree Avenue and a potential future signal at Paddington Road, a collector street to the north.

Secondary access is proposed off Corbett Drive to the west; however, the route is less direct for commercial vehicles as it travels through the Front Range Village's roundabout and a narrower 'main street' cross section when accessing Ziegler Road.

During the 2019 update to City Plan, a study was commissioned to review the remaining inventory of employment and industrial lands in the community and important factors to the success of employment and industrial development (Attachment 10). Visibility and highway/major arterial access was identified as one of the most important site attributes for these types of land uses. These characteristics are marginal for the ODP property in comparison to other HC-zoned sites featuring primary uses.

- The same employment and industrial land study also determined the community likely has an excess of employment lands and, “the buildable employment lands the City greatly exceeds the demand for new employment lands by 2040.... The excess capacity would suggest that the City could be more flexible with use of employment lands in some areas.” (City Plan Employment Land Demand Analysis, Attachment 8, Page 37).

One area identified for potential flexibility by the study were portions of the Harmony Corridor. “Certain remaining parcels along Harmony Road that are further from Harmony Road and behind larger commercial and employment uses could be considered for designation as residential uses. Specifically, the City should strive for higher density residential uses in these areas given their proximity to employment and potential enhanced transit routes” (City Plan Employment Land Demand Analysis, Attachment 8, Page 48).

Given the site’s relative lack of visibility and commercial vehicle accessibility, as well as the community excess inventory of employment land, a reduction in the amount of primary space within the ODP site does not represent a detriment to the public good nor compromise the community’s or Harmony Corridor Plan’s overall employment goals.

2. Modification to Section 4.26(D)(3)(a) Dimensional Standards.

The standard:

*“Maximum height for all nonresidential buildings, including those containing mixed-use dwelling units, shall be six (6) stories. **Maximum height for residential buildings shall be three (3) stories.**”*

Overview

This modification is being requested because the ODP includes proposed building heights and indicates a full fourth floor for residential-only buildings on Parcel ‘C’ of the ODP map and partial fourth story for residential-only buildings on Parcel ‘B’ of the ODP map.

Summary of Applicant Justification

The applicant’s modification request is attached. It provides a summary of policies and additional amenities/benefits addressed by the overall project in support of the modification, including providing a childcare center as part of the development and exceeding the park/gathering space requirements of the HC zone district by providing a 1.5-acre park. The justification request also contends unique physical constraints of the site as the ODP property must contain oversized drainage and stormwater facilities to handle drainage from portions of Front Range Village and underdeveloped infrastructure from properties further to the west. This results in less land available to host a similar number of residential units that could be accommodated while meeting the residential building height standards.

Staff Findings

Staff finds that the granting of the modification would not be detrimental to the public good and that the request satisfies criteria (1) in subsection 2.8.2(H):

- A. The modification meets 2.8.2(H)(1), because the project promotes the purpose of the standard in an equal or better way. Across the entire ODP site, building heights average three stories, and building

heights are minimized closest to existing single-family development while taller structures are proposed near commercial or buffer areas where compatibility, intensity, and privacy impacts can be minimized. This intensity framework helps achieve land use and policy guidance for the corridor to maximize intensity given nearby amenities while compatibly transitioning to adjacent development and residential zoning.

- Both the Harmony Corridor Plan and the site's 'Mixed Employment District' designation on the Structure Plan encourage a more intensive development pattern. The ODP site is well positioned to advance many community goals for access to jobs and transportation, and future users are well-served by the regional and neighborhood amenities at Front Range Village. The HC district is one of the few zones that discourages single-family only residential development, requires a minimum residential density, and supports one of tallest building heights in the community for primary uses.

While more intensive development is generally encouraged, the Harmony Corridor Plan also calls for intensities to decrease as the distance from Harmony Road and major intersections increase, and the HC district includes standards to minimize abrupt scale/height changes adjacent to existing residential development. Since most commercial development is encouraged along the Harmony Road frontage and residential uses are more likely along district edges, the three-story building height promotes a general tapering of intensity and height to enhance compatibility with development in adjacent zone districts.

The ODP continues to meet the purpose of the HC zone district by minimizing height and scale impacts adjacent to the nearest existing residential development and focuses fourth-floor buildings towards the portions of the site where large buffer/detention areas and adjacent commercial development minimizes the impacts of additional height and intensity. Specifically:

- Parcel 'C,' located on the southern portion of the ODP proposes a full fourth floor for residential buildings. Height and compatibility concerns are minimized as adjacent development includes a berm easement, stormwater drainage, and retail loading docks to the south, retail parking and loading docks to the west, and internal ODP phases to the north and east. Note 16 on the ODP map drawing further specifies a 10-ft step back requirement for at least two sides of the fourth floor.
- Parcel 'B,' located along the northern edge of the ODP proposes a recessed fourth floor for 'loft' units and rooftop amenity/patio space. Note 15 on the ODP map drawing requires fourth floor living spaces to be step backed from the floor below a minimum of 10-ft on all sides of the building and the floor area of the fourth floor shall be limited to two-thirds the floor area of the floor below.

Adjacency of existing development to the north of Parcel B consists of undeveloped land that is identified for future multifamily on the English Ranch ODP or existing stormwater and drainage areas. The drainage area buffer ranges in size from approximately 170 to 260 feet between Parcel 'B' and the nearest single-family residential property. Alongside the proposed design parameters, this larger buffer helps further mitigate potential impacts of a fourth-story in comparison to other three-story multifamily buildings found in the Harmony Corridor in closer proximity to single-family detached development.

- Parcel 'A,' represents the area of the ODP that is closest to existing residential development. While other portions of the ODP seek a modification to allow a fourth floor, this portion of the development specifies 2-3 story building heights and lower intensity townhome/condominium development. In addition to the lower building heights, a large drainage and buffer area is proposed between the existing single-

family detached homes located to the north and the senior apartments located to the west.

4. Land Use Code Article 2 – ODP Standards

Section 2.3.2 (H) of the Land Use Code identifies seven criteria for reviewing the ODP, which are summarized as follows:

1) Section 2.3.2(H)(1) – Permitted Uses and District Standards

This standard requires the ODP to be consistent with the permitted uses and applicable zone district standards and any applicable general development standards that can be applied at the level of detail required for an ODP submittal.

The ODP proposes a phased, mixed-use development consisting of multiple residential land uses (single-family attached, multifamily, and mixed-use dwellings) as well as a childcare center, community facility, and office uses. All proposed land-uses are permitted within the HC zone district.

Additionally, the HC zone district prescribes a minimum of 75% primary employment uses and a maximum of 25% secondary uses. The ODP is proposing a ratio of secondary uses exceeding the 25% secondary use maximum. A modification of standard has been requested and is reviewed in the modifications section of this report.

2) Section 2.3.2(H)(2) – Density

This standard requires that the Overall Development Plan be consistent with the required density range of residential land uses.

For residential developments, the HC district requires an overall minimum average density of seven dwelling units per net acre. The ODP proposes between 400 – 700 residential units, complying with the standard and representing an average gross density of approximately 12.7 – 22.4 units per acre.

3) Section 2.3.2(H)(3) and 2.3.2(H)(4) – Master Street Plan, Street Pattern, Connectivity, Transportation Connections to Adjoining Properties

These standards require the ODP to conform to the Master Street Plan, Street Pattern and Connectivity standards, and also to conform with Transportation Level of Service requirements. There are no issues with ODP compliance related to these standards with the exception of 3.6.3(E) *Distribution of Local Traffic to Multiple Arterial Streets* and 3.6.3(F) *Utilization and Provision of Sub-Arterial Street Connections to and from Adjacent Developments and Developable Parcels*. An alternative compliance request has been submitted for the project and is discussed below.

The ODP takes access from a collector and arterial streets and is being developed within an existing transportation network, meeting spacing requirements for full access local and collector street intersections. The City's Engineering and Traffic Operations staff have also reviewed the projects Traffic Impact Study for compliance with Level of Service requirements

Street Connectivity Standards 3.6.3(E),(F):

The ODP is required to provide for street connectivity within the same section mile, achieving access to a minimum of three arterial streets as well as continuing or creating sub-arterial connections to adjacent development, spaced at intervals not to exceed 660-feet.

3.6.3(E) Distribution of Local Traffic to Multiple Arterial Streets.

“All development plans shall contribute to developing a local street system that will allow access to and from the proposed development, as well as access to all existing and future development within the same section mile as the proposed development, from at least three (3) arterial streets upon development of remaining parcels within the section mile, unless rendered infeasible by unusual topographic features, existing development or a natural area or feature. The local street system shall allow multi-modal access and multiple routes from each development to existing or planned neighborhood centers, parks and schools, without requiring the use of arterial streets, unless rendered infeasible by unusual topographic features, existing development or a natural area or feature.”

3.6.3(F) Utilization and Provision of Sub-Arterial Street Connections to and From Adjacent Developments and Developable Parcels.

“All development plans shall incorporate and continue all sub-arterial streets stubbed to the boundary of the development plan by previously approved development plans or existing development. All development plans shall provide for future public street connections to adjacent developable parcels by providing a local street connection spaced at intervals not to exceed six hundred sixty (660) feet along each development plan boundary that abuts potentially developable or redevelopable land.”

From a transportation perspective, the site represents an infill condition, as all surrounding properties have already been developed and a system of local and collector streets are already in place. The ODP proposes a new east-west local street bisecting the property, intersecting with Ziegler Road on the east and Corbett Drive on the west. Both connections will be full movement intersections.

The length of the southern and northern boundaries of the ODP trigger requirements for additional sub-arterial connections to adjacent properties. The ODP identifies a primary north-south street through the middle of the property for internal circulation and a potential future connection to the south. A sub-arterial stub is planned along the southern boundary that could connect further south if future redevelopment occurs at Front Range Village. A large drainage area on the Front Range Village property currently prevents an immediate connection. Access to the north and The English Ranch neighborhood is proposed for bike and pedestrian access only, and the lack of a vehicular connection is the principal factor for the proposed alternative compliance request.

In the early 1990s, two ODPs were approved for the land located north and east of Harmony Road and Ziegler Road (Symbios Logic ODP and The English Ranch ODP). Pursuant to the Master Street Plan at the time, Corbett Drive was proposed to connect from Harmony Road on the south, travel north and with two 90-degree turns, and connect to Paddington Road in The English Ranch neighborhood. Both ODPs anticipated and planned for this future collector street connection.

In the early 2000s, City Council approved an amendment to the Harmony Corridor Plan to allow for the construction of a new regional shopping center (Front Range Village). This Harmony Corridor policy change represented a large shift in the anticipated land uses in the vicinity, and during the project review for Front Range Village, neighbors within The English Ranch expressed concerns about a future street connection that would generate excess cut-through traffic through the neighborhood above and beyond what would have been anticipated had the Front Range Village property remained as a business or light industrial area.

In 2011 during updates to City Plan and the Master Street Plan, neighbors in English Ranch successfully petitioned staff and City Council to amend the Master Street Plan to remove the Corbett Drive connection to Paddington Road in The English Ranch neighborhood. During a work session review of the proposed change, staff identified that nearby arterial streets would be able to accommodate any increased traffic due to the loss of the connection, however, there were tradeoffs for vehicular connectivity between the neighborhood and services to the south and vice versa to neighborhood amenities to the north (English Ranch Park, Linton Elementary school).

The Master Street Plan only identifies collector and arterial street connections, and while the Corbett Drive connection was removed from the map, Land Use Code requirements still require a local street connection to the

north. Engineering and Traffic Operations staff have reviewed the Traffic Impact Study for the proposed ODP, which analyzed scenarios with and without a vehicular connection to Paddington Road. Similar to the 2011 staff findings, nearby arterial streets are able to accommodate additional trips that result from the lack of a local street connection between the ODP property and Paddington Road. Tradeoffs remain that while any detour of vehicular trips are small in distance, it will require travel onto an arterial street, which many neighbors have expressed can be difficult when attempting left-turning movements during busy traffic periods.

Alternative Compliance:

Review Criteria for Alternative Compliance: To approve an alternative plan, the decision maker must first find that the proposed alternative plan accomplishes the purposes of this section equally well or better than would a plan and design which complies with the standards of this section, and that any reduction in access and circulation for vehicles maintains facilities for bicycles, pedestrians and transit, to the maximum extent feasible.

In reviewing the proposed alternative plan, the decision maker shall take into account whether the alternative design minimizes the impacts on natural areas and features, fosters non-vehicular access, provides for distribution of the development's traffic without exceeding level of service standards, enhances neighborhood continuity and connectivity and provides direct, sub-arterial street access to any parks, schools, neighborhood centers, commercial uses, employment uses and Neighborhood Commercial Districts within or adjacent to the development from existing or future adjacent development within the same section mile.

The applicant's alternative compliance request is attached. Staff recommends approval of alternative compliance, which recognizes the unique history and constraints of land use and transportation policy affecting nearby properties, the enhanced nature of existing and proposed bike/pedestrian connections that can be made, and the limited impact to nearby arterial streets that would result from the lack of a vehicular connection.

This recommendation is based on the following findings:

- 1) The lack of a local street connection and vehicular access does not result in any reduction to access or circulation for bicycles, pedestrians, or transit. The ODP property and adjoining north/south developments share three existing or proposed bike/ped connections along their shared boundaries.
- 2) The primary amenities to the north of the ODP property include English Ranch Park and Linton Elementary School. Both sites are located approximately half a mile (walking distance) from the center of the ODP property. City policies and goals encourage non-vehicular trips at this distance. Poudre School District bussing eligibility is typically not available within one-mile of an elementary school and no impact is anticipated to bus routes.
- 3) The land-uses and proposed amenities within the ODP partially mitigate the loss of vehicular access to the nearby park and school. The ODP commits to providing a 1.5-acre park/gathering space for the development, greatly exceeding HC zone district standards. The residential component of the ODP features attached and multifamily residential units. According to a 2015 National Association of Homebuilders study of US Census Data, on average, new multifamily units feature approximately one third the number of children versus single family detached development (21.9 versus 61.5 per 100 units).
- 4) A local street connection to Paddington Road would mean vehicles could travel to Corbett Drive through the ODP street network in nearly an identical alignment to what was previously illustrated on the Master Street Plan. The removal of a vehicular connection is being requested by many neighbors within English Ranch to reduce cut-through traffic to Front Range Village and reduce the amount of traffic within the neighborhood that they feel detracts from bike/pedestrian safety. The lack of a vehicular connection maintains the intent of the previous policy decision by City Council to remove the Corbett connection from the Master Street Plan.
- 5) The proposed alternative plan accomplishes the purposes of this section equally well or better than would a plan and design which complies with the standards of this section because the overall neighborhood including and surrounding the ODP is well served by a network of local, collector and arterial streets, has

multiple bike and pedestrian access points, and the impact to local vehicular travel distances within the section mile are minimized due to the spacing and intersection of existing local and collector streets, or mitigated by the demands for local trips by the ODP land uses and its on-site amenities.

4) Section 2.3.2(H)(5) – Natural Features

This standard requires an ODP to show the general location and size of all natural areas, habitats and features within its boundaries and shall indicate the rough estimate of the buffer zone as per Section 3.4.1(E)

The ODP does not contain any identified natural areas, habitats or features as identified on the City's *Natural Habitats and Features* inventory map and no natural habitat buffer zones are required within the ODP boundary.

5) Section 2.3.2(H)(6) – Drainage Basin Master Plan

This standard requires an ODP to be consistent with the appropriate Drainage Basin Master Plan.

The ODP is located within the Fox Meadows Drainage Basin. A drainage report has been reviewed by stormwater staff and there are no drainage issues associated with the ODP. The ODP map indicates the approximate location and sizing of future detention areas. Future project reviews within the ODP boundary will comply with the City's stormwater management, water quality requirements, and low impact development standards.

6) Section 2.3.2(H)(7) – Housing Density and Mix of Uses

This section requires that any standards relating to housing density and mix of uses will be applied over the entire ODP and not on each individual PDP.

Within the HC zone district, a mix of housing types is required for projects proposing residential dwellings. For projects greater than 30 acres in size, a minimum of three housing types are required.

The ODP proposes a minimum of three housing types, complying with this standard. Housing types shall include single-family attached, multifamily, and mixed-use dwellings. Additional housing types may be provided when individual PDPs are reviewed as multifamily buildings with varying unit numbers per building are identified as different housing types in the HC district, however, this level of detail for future PDP phases is not yet known.

In addition to these recognized housing types in the HC district, 12 live-work units are proposed that will feature street-oriented commercial storefronts.

5. Findings of Fact/Conclusion

In evaluating the request for the Ziegler - Corbett Overall Development Plan, ODP210004, Staff makes the following findings of fact:

1. The Overall Development Plan complies with the applicable procedural and administrative requirements of Article 2 of the Land Use Code.
2. The Overall Development Plan's proposed alternative street connectivity accomplishes the purposes of Section 3.6.3 equally well or better than would a plan and design which complies with the standards of this section because the overall neighborhood including and surrounding the ODP is well served by a network of local, collector and arterial streets, the plan continues to enhance the connectivity for bicycle, pedestrian and transit by providing for connectivity through the site, and the proposed on-site amenities and land uses minimize and mitigate the generation of vehicular trips to the north.
3. The Modification to Section 4.26(D)(2) Secondary Uses is not detrimental to the public good and meets criteria 2.8.2(H)(2) because the ODP plan provides a substantial benefit to the community by addressing

important community needs including access to childcare and advancing climate action and sustainability goals by providing on-site solar generation capacity and certifying a portion of residential units to LEED gold standards;

The Modification to Section 4.26(D)(2) Secondary Uses is not detrimental to the public good and meets criteria 2.8.2(H)(3) because the ODP property has unusual and practical difficulties achieving 75% primary uses due to its visibility, location, and prior policy changes which have altered the land use vision for adjacent properties. The ODP property is substantially setback from Harmony Road and major street intersections, reducing its visibility and accessibility for large-scale primary uses.

4. The Modification to Section 4.26(D)(3)(a) Dimensional Standards is not detrimental to the public good and meets criteria 2.8.2(H)(1) because the plan will promote the general purpose of the standard equally well because the overall ODP site meets the purpose and intent of the Harmony Corridor Plan to compatibly transition from more intensive development to adjacent residential neighborhoods. This is achieved by an ODP average residential building height of 3-stories and locating those buildings with taller building heights and intensity adjacent to commercial land uses or large buffer/detention areas;
5. The Modification to Section 4.26(D)(3)(a) Dimensional Standards is not detrimental to the public good and meets criteria 2.8.2(H)(2) because the ODP plan provides a substantial benefit to the community by addressing important community needs including access to childcare and advancing climate action and sustainability goals by providing on-site solar generation capacity and certifying a portion of residential units to LEED gold standards;
6. The ODP complies with the review standards of Section 2.3.2(H)(1) through (7).

6. Recommendation

Staff recommends that the Planning and Zoning Commission make a motion to approve the two Modifications of Standard to Land Use Code sections 4.26(D)(2) and 4.26(D)(3)(a); and approve the Ziegler – Corbett Overall Development Plan, ODP210004 based on the Findings of Fact and supporting explanations found in the staff report and hearing materials.

13. Troutman Parkway crossing at the Burlington Northern Santa Fe Railroad tracks
14. Keenland Drive crossing at the Union Pacific Railroad tracks

One of the major outcomes of the 2010-11 update process is that there are not any MSP street classifications that are proposed to be expanded beyond their current street classifications. For example, there are not any street classifications that are proposed to increase from a four lane arterial classification to a six lane arterial classification.

In some cases, the update process is proposing to reduce the classification for specific street segments on the MSP. For example, the project team is proposing that Lincoln Avenue between Jefferson Street and Lemay Avenue, be downgraded from a four lane arterial street classification to a two lane arterial street classification. It is important to note that the proposed amendments to the MSP network will continue to provide adequate transportation capacity for the City's short term and long-range travel needs.

3. New Overlay Map for MSP

The 2010-11 update to the Master Street Plan also includes a new "Overlay Map" to help proactively designate locations where the current Larimer County Urban Area Street Standards (LCUASS) may require revisions or flexibility to achieve the vision of special districts, Enhanced Travel Corridors, reshaping streets, and alternative vehicles and trails. These corridors may need to do more to address the street's adjacent land-uses or better fit the unique needs of the area (e.g., Downtown, North College, Lincoln, Mid-Town and along Enhanced Travel Corridors) as well as service all modes of transportation (cars, bicycles, pedestrians, transit, freight, parking, etc.)

See Attachment 6 for a copy of the City's current Master Street Plan and Attachment 7 for a copy of the TMP Appendix E – Master Street Plan Amendment Documentation for more details, including a map of the MSP segments that are under review as part of the update process as well as a draft copy of the new overlay map.

In summary, the MSP update process continues to move forward with additional technical analysis, community input opportunities, review by Boards and City Council.

The schedule is to bring forward the proposed Master Street Plan amendments to City Council for adoption as part of the overall Plan Fort Collins/Transportation Master Plan process in early 2011.

4. Master Street Plan (MSP) – Preliminary Corbett Drive Collector Street Analysis

One of the key locations being reviewed as part of the 2010-11 MSP update process is the Corbett Drive collector street extension that is currently shown on the MSP to connect the English Ranch neighborhood and the Front Range Village Shopping Center to Harmony Road. Corbett is currently constructed through the Front Range Village Shopping Center, terminating at the shopping center's north property line. There is an undeveloped property between the shopping center and the English

Ranch neighborhood, zoned HC, Harmony Corridor zone district; allowed uses could include multi-family residential, offices, and light industrial uses.

There has been a significant amount of public input from the English Ranch neighborhood, opposing this collector street connection. On November 22, 2010, staff conducted a meeting with the neighborhood (see Attachment 8, Meeting Notes from the November 22 Corbett Drive Public Meeting). City staff is continuing to gather input from the public, boards and commissions, and City Council. The public survey for residents and business will close on December 10. The final analysis will be available after the Transportation Board meeting on December 15.

The properties south of the English Ranch neighborhood have been involved in a variety of developments over the past two decades. A brief history of the public meetings potentially related to the Corbett Drive extension follows:

- English Ranch South Overall Development Plan (October 1995)
 - Planning and Zoning Board Meeting (October 1995)
 - ODP shows Corbett Drive connecting at Paddington and Edmonds
- Symbios Logic Overall Development Plan (June 1996)
 - Planning and Zoning Board Meeting (June 1996)
 - ODP shows Corbett Drive extending north from Harmony Road, turning east and connecting to Paddington. The connection is consistent with the English Ranch South ODP
- Harmony Corridor Plan Amendment (2003)
 - Amended plan to permit a lifestyle center
 - Planning and Zoning Board Meeting (June 19, 2003)
 - City Council Meeting (July 15, 2003)
- Harmony Corridor Plan Amendment (2005-06)
 - Amended plan to permit a regional shopping center
 - Planning and Zoning Board Meeting (November 21, 2005)
 - City Council Meeting (January 17, 2006)
- Front Range Village Overall Development Plan and Final Development Plan (September 2006)
 - Planning and Zoning Board Meeting (September 21, 2006)
 - Neighborhood Meeting #1 (January 14, 2006)
 - Neighborhood Meeting #2 (August 26, 2006)

The question of a vehicular connection between English Ranch and Front Range Village was directly asked at the August 26, 2006 neighborhood meeting. City staff response based on the meeting notes is below. The “back 40” refers to the undeveloped property north of Front Range Village.

“The Master Street Plan for this area calls for a street connection from the neighborhood to the “back 40” acres. Such a street connection will be required only when the “back 40” develops. While a connection ultimately may be required, it will not be made with the shopping center proposal.”

In addition, the development agreement for Front Range Village also included several sections specifically referencing the Corbett Drive extension. The agreement provided approximately

\$75,000 for a neighborhood traffic calming plan along Corbett Drive through 2015. A section of the agreement related to streets also notes the potential for a street connection to the English Ranch:

“It is understood and agreed that future development(s) may connect the public street system in the English Ranch neighborhood with this Development, and that such connectivity has the potential to allow cut-through traffic and other perceived negative impacts to the English Ranch neighborhood. In recognition of this potential and in response to comments at public meetings preceding the Development's PDP approval, City staff and representatives of the Developer considered a variety of traffic calming options for the neighborhood that can be implemented in the future when the street connections are completed.”

The draft Master Street Plan appendix outlines the preliminary staff analysis. All the data is not in yet, but a preliminary recommendation is that the Corbett connector street connection be removed from the MSP. A local street connection from within the currently vacant property may still be necessary and required by the Land Use Code at the time the vacant property south of English Ranch develops, regardless of the removal of the collector street designation from the MSP. The decision about street access and connections will be made after input from the neighborhood and developer, in conjunction with the submittal of a development plan for the vacant property. An initial list of positives and negatives associated with the Corbett Drive extension is below. This list, as well as the overall analysis, will be updated based on input received in December.

***Scenario 1: Maintain Planned
Corbett Drive Connection***

Pros

- Provides neighborhood access to Front Range Village, the Poudre River Public Library, AMD, Intel, other employers, and the Harmony Corridor.
- Safe Routes to School connection for students and parents to Preston Middle School and Traut Core Knowledge Elementary.
- Additional street connections for undeveloped property to north of Front Range Village to residences, parks, and schools.

Cons

- Potential for through traffic along Kingsley Drive and Corbett Drive to/from Front Range Village and Harmony Corridor.
- Direct pedestrian and bicycle connection already provides access to Front Range Village and Harmony Corridor.
- Surrounding arterial streets are able to handle additional traffic volumes.
- Undeveloped property to north of Front Range Village may be less reliant on Ziegler Road, reducing the access burden (i.e., the number and type of access points).

***Scenario 2: Remove Corbett Drive
Connection from MSP***

Pros

- Direct pedestrian and bicycle connection already provides access to Front Range Village and Harmony Corridor.
- Traffic projections do not anticipate any negative impact to surrounding arterial streets if connection is removed.
- Removes the potential for any through traffic along Kingsley Drive and Paddington Road.

Cons

- Inconsistent with *City Plan* and *Transportation Master Plan* goals and principles of direct connectivity and requirements in the Land Use Code.
- Development requirements in the Land Use Code must be addressed, and existing development plans must be amended (at the time of development) to remove the connection.
- Removes neighborhood Collector street connections to Preston Middle School and Traut Core Knowledge Elementary. This includes potential residential uses on the undeveloped property to the north of Front Range Village.
- Without this connection, access to the undeveloped property to the north of Front Range Village off Ziegler would become more important. This may increase the access burden and negatively impact Ziegler's safety and traffic operations. This assumes no street connection at all to the English Ranch neighborhood.
- Existing overall development plans (ODP) that include Corbett Drive must be amended to ensure compliance with the Land Use Code.

Corbett Drive Public Input Meeting – November 22, 2010

Feedback Notes:

- 1998 - 2010 MSP
- Promised no street connections-trust factor
- Concerned that lied to previously
- No problems getting around now
- Don't understand need for Corbett
- Why not traffic control on Paddington? Do not want it
- What is projection if connected?
- What is definition if connected?
- What is definition of this neighborhood?
- What about cut-through traffic?
- Stop Sign at Paddington & Kingsley
- Is there support for this connection?
- Concern about outside traffic using it
- Since current traffic calming not working, how/why do next street?
- Where do we go? Ride bike and walk through neighborhood to Avago and to Front Range Village
- Need 2 lanes entering roundabout from Horsetooth to south bound Zeigler
- High school students not using roundabout correctly, 410/450 students walk and bike
- Linton big walk and bike in school. Safety concerns

- Edmond and Paddington concern with traffic calming not working
- Concern with design Paddington not meeting collector design standard
- What is methodology of collecting traffic data? When? How long?
Ex: 24 hours
- Provide traffic data for when Paddington designed – what was it designed to serve? Are design improvements needed?
- Speeding traffic on Paddington and too much traffic
- Stop sign at Edmond
- Drainage concerns if street is built (stormwater)
- Use of bike path
- Convenience for street connection
- OK with driving around to get from neighborhood to shopping. Want to keep safer for bikes and pedestrians and students
- Concern with people using connection instead of Harmony
- Bike path supports travel by bike and walking for short trips
- Waste of time and money to put street in
- Why is this needed?
- May like option for short trips but very important concern for bicycle and pedestrian safety, especially children.
- Need to see tapes from prior City Council meetings
- Increasingly hard to make left turn from Kingsley on to Horsetooth. Concern for backing up traffic and safety
- Roundabout makes hard to get out of neighborhood because fewer gaps

- Joe Olson-option to signalize Kingsley, Paddington, Caribou? Traffic Operations reviewing.
- Need to study larger area and impacts
- Pedestrians trying to cross Zeigler at Paddington
- Signals needed today – especially for pedestrians/children. Signalized pedestrian crossing
- Developer deal with it in future
- No direct connection between Kingsley and Corbett
- Trust issues due to history; 15 years ago changed MSP alignment. RE: direct connection of Kingsley and Corbett
- Should put current info in writing frequently to keep message
- Fear of traffic will lead to fewer children being able to walk and bike
- Concern with high school drivers cutting through to restaurant
- What is City criteria for this? What will we do with this info?
- Backed up traffic at roundabout could cause cut through traffic
- Safety should be criteria
- What if 85% against and 15% support?
- Can this connection stay or go from MSP? Or is this a street going to be built? – Plan only
- Why is it still on MSP if no one wants it?
- When would it be built? With development (not before)
- What about money running out? \$75,000 is for traffic mitigation
- Triple bottom line analysis – trade offs for safety, environment
- High school traffic can get to school fine now, not need connection

- Concern with high school drivers to restaurants
- Concern with high school students on survey results – How to verify survey is property owners?
- Get data from traffic doing U-turns at cul-de-sac on north
- Two for; 148+ against.
- How is data weighted? Public opinion vs. environmental vs. developer?
- Want to keep neighborhood character, like it now. Like to walk/bike, keep neighborhood special, not do street
- What is timeline for council process? Slides on-line location/date/time of meetings?
- Concern with truck deliveries using this new street
- Has Front Range Village contacted CMO, Transportation Board about this connection? Diane Jones-Front Range Village not interested in connection. (per Melissa Moran, Bayer Properties)
- Concern with lower property values if street connection
- Concern with safety on Paddington. Too narrow. More bike and pedestrian traffic from neighborhood
- Not want to ride bike on path if street connector
- What is developer's point of view?
- Can developer not connect to Paddington?
- What land uses can be on developer's site?
- If take off MSP, what happens when development happens? Depends on developer's plan; land uses; traffic study
- When old and new Sunstone connected caused more traffic.
- Look at different width of Paddington

- Future mailings should be sent out earlier
- Kingsley and Paddington corner. People go down and turn around at end of cul-de-sac now so more concerns if connected

Corbett Drive Extension – MSP Update Process

41

City of Fort Collins

Plan Fort Collins
innovate.sustain.connect

CORBETT DRIVE AND FRONT RANGE VILLAGE

- No direct connection to Kingsley per MSP
- Front Range Village development agreement
 - Acknowledged there may be a street connection to English Ranch in the future
 - Provided \$75,000 for a neighborhood traffic calming plan along Corbett Drive
 - Secured through 2015
 - Includes traffic calming measures such as speed tables, lower speed limits, pedestrian crosswalks, and signage

42

City of Fort Collins

Plan Fort Collins
innovate.sustain.connect

CITY PLAN AND TRANSPORTATION MASTER PLAN POLICIES

- The physical organization of the City will be supported by a framework of transportation alternatives that balances access, mobility, safety, and emergency response throughout the City, while working towards reducing the rate of growth of vehicle miles traveled and dependence upon the private automobile. (City Plan and TMP)

City of
Fort Collins

43

Plan Fort Collins
innovate.sustain.connect

CITY PLAN AND TRANSPORTATION MASTER PLAN POLICIES

- A well-developed system of connections (walkways, bikeways, and streets) throughout the community will link land uses and travel within and beyond Fort Collins. (TMP)
- Neighborhood streets will be extensively interconnected, but designed to protect the neighborhood from excessive cut-through traffic. (TMP)

CORBETT DRIVE AND THE MASTER STREET PLAN

- **The MSP is adopted by City Council as part of the Transportation Master Plan**
- **The MSP is the vision for the City’s street network**
- **The adopted MSP shows an indirect connection of Corbett Drive to Paddington Road**
- **An indirect street connection has been on the MSP as far back as 1998**

City of
Fort Collins

47

Plan Fort Collins
innovate.sustain.connect

CORBETT DRIVE AND THE MASTER STREET PLAN

- **Benefits of Connection**
 - **Neighborhood access to Front Range Village, public library, AMD, Intel, other employers and the Harmony Corridor**
 - **Connection to schools for students and parents:**
 - **Linton, Fort Collins HS, Preston, Traut**
 - **Traffic calming measures along Paddington and Corbett to address concerns**
 - **Connection for future development to parks and schools**

City of
Fort Collins

STREET CONNECTIVITY NORTH OF FRONT RANGE VILLAGE

- **Current MSP**
 - **Indirect Corbett Drive street connection**
 - **No direct connection to Kingsley**
- **Bicycle and pedestrian trail will remain**
- **If Corbett Drive removed from MSP, Land Use Code may require a non-Corbett street connection to the property north of Front Range Village**
 - **Depends on land uses and traffic impact study**
 - **May impact traffic signal locations and access points along Ziegler**

City of Fort Collins

55

Plan Fort Collins
innovate.sustain.connect

NEIGHBORHOOD TRAFFIC SAFETY AND MITIGATION

- **The City has installed traffic calming measures along Kingsley Drive**
 - Speed tables, 25 mph speed limit, pedestrian crosswalks and signage
- **Front Range Village development agreement allocates \$75,000 for a neighborhood traffic calming plan**
 - Secured through 2015; applicable to Corbett Drive
 - Speed tables, lower speed limits, signage

City of Fort Collins

56

Plan Fort Collins
innovate.sustain.connect

RESIDENT FEEDBACK TO DATE

- **Confusion about where Corbett Drive could connect (Kingsley or further east)**
- **Negative impact to walking and biking in neighborhood, especially for kids**
- **The benefit of connecting Corbett Drive does not outweigh the impacts of increased traffic and noise**
- **Need additional/enhanced traffic calming measures, especially on Paddington**

I. INTRODUCTION

This Transportation Impact Study (TIS) addresses the capacity, geometric, and control requirements for the proposed Ziegler-Corbett/Union Park Mixed-Use development. The proposed Ziegler-Corbett/Union Park Mixed-Use development is located west of Ziegler Road and south of Paddington Road in Fort Collins, Colorado. This TIS addresses both the short range (2028) and the long range (2045) futures.

During the course of this analysis, numerous contacts were made with City staff, the project developer (Landmark Homes), the project planning consultant (TB Group), and the project engineering consultant (Highland Development Services, Inc.). Since this land is within the City of Fort Collins, the traffic impact study guidelines for Fort Collins, as contained in the "Larimer County Urban Area Street Standards" (LCUASS) were used. The study involved the following steps:

- Collect physical, traffic, and development data;
- Perform trip generation, trip distribution, and trip assignment;
- Determine peak hour traffic volumes;
- Conduct capacity and operational level of service analyses on key intersections;
- Analyze signal warrants and geometric requirements.

The following intersections, as agreed to in the scoping discussions, were addressed in this traffic study: Ziegler/Council Tree-HP Access, Ziegler/Target Service Access, Ziegler/Hidden Pond-Site Access, Ziegler/Paddington-Grand Teton, Corbett/Target Service Access, and Corbett/Lowes Service Access-Site Access intersections. Appendix A contains the Transportation Impact Study Base Assumptions form and related attachments for the Ziegler-Corbett/Union Park Mixed-Use development.

The long range (2045) analysis in this TIS serves as a replacement of the "Ziegler-Corbett Mixed-Use Master Transportation Impact Study," dated January 2022. It addresses the staff comments and access changes pertaining to the previous submittal. Particularly it addresses a potential signal at the Ziegler/Hidden Pond-Site Access intersection with no connection from the site to Paddington Road. It is noted that the connection to Paddington Road was removed from the Fort Collins Master Street Plan several years ago.

II. EXISTING CONDITIONS

The location of the Ziegler-Corbett/Union Park Mixed-Use site is shown in Figure 1. It is important that a thorough understanding of the existing conditions be presented.

Land Use

The project site is currently vacant. The land surrounding the site consists of primarily commercial and residential uses. There are commercial uses to the south (Front Range Village) and southeast (HP Campus) of the site. There are residential uses to the north, northeast, and west of the site. The center of Fort Collins lies to the northwest of the Ziegler-Corbett/Union Park Mixed-Use site.

Roads

The primary streets near the Ziegler-Corbett/Union Park Mixed-Use site are Ziegler Road, Council Tree Avenue, Corbett Drive, Hidden Pond Drive, and Paddington Road. The existing geometry and control at the Ziegler/Council Tree-HP Access, Ziegler/Target Service Access, Ziegler/Hidden Pond, Ziegler/Paddington-Grand Teton, Corbett/Target Service Access, and Corbett/Lowes Service Access intersections is shown in Figure 2.

Ziegler Road is to the east of (adjacent to) the Ziegler-Corbett/Union Park Mixed-Use site. It is a north-south street designated as a four-lane arterial street between Horsetooth Road and Rock Creek Drive on the Fort Collins Master Street Plan. Currently, Ziegler Road has a four-lane cross section and an existing posted speed of 40 mph. At the Ziegler/Council Tree-HP Access intersection, Ziegler Road has northbound and southbound left-turn lanes, two through lanes in each direction, and northbound and southbound right-turn lanes. The Ziegler/Council Tree-HP Access intersection has signal control. At the Ziegler/Target Service Access intersection, Ziegler Road has a northbound left-turn lane and two through lanes in each direction. The Ziegler/Target Service Access intersection has stop sign control on the Target Service Access. At the Ziegler/Hidden Pond intersection, Ziegler Road has a center two-way continuous left-turn lane and two through lanes in each direction. The Ziegler/Hidden Pond intersection has stop sign control on Hidden Pond Drive. At the Ziegler/Paddington-Grand Teton intersection, Ziegler Road has northbound and southbound left-turn lanes and two through lanes in each direction. The Ziegler/Paddington-Grand Teton intersection has stop sign control on Paddington Road-Grand Teton Place.

Council Tree Avenue is an east-west street designated as a local street on the Fort Collins Master Street Plan. Currently, Council Tree Avenue provides access to the Front Range Village shopping center and has a four-lane cross section. The east leg of the Ziegler/Council Tree-HP Access intersection provides access to the HP Campus and has a four-lane cross section. At the Ziegler/Council Tree-HP Access intersection, Council Tree Avenue-HP Access has eastbound and westbound left-turn lanes, one through lane in each direction, and a westbound right-turn lane.

SCALE: 1"=2000'

SITE LOCATION

Figure 1

Item 22.

EXISTING INTERSECTION GEOMETRY

Figure 2

Paddington Road-Grand Teton Place is to the north of the Ziegler-Corbett/Union Park Mixed-Use site. Paddington Road is designated as a collector street on the Fort Collins Master Street Plan. Paddington Road was built prior to the adoption of LCUASS. Therefore, it does not meet most of the collector street criteria (width, bike lanes, etc.). Grand Teton Place is designated as a local street. Currently, Paddington Road and Grand Teton Place have two-lane cross sections (no center lane). At the Ziegler/ Paddington-Grand Teton intersection, Paddington Road and Grand Teton Place are striped as having all eastbound and westbound movements combined into single lanes.

Corbett Drive is to the west of the Ziegler-Corbett/Union Park Mixed-Use site. Corbett Drive is designated as a collector street on the Fort Collins Master Street Plan. Currently, Corbett Drive has a two-lane cross sections (no center lane). At the Corbett/ Target Service Access and Corbett/Lowes Service Access intersections, Corbett Drive has all northbound and southbound movements combined into single lanes. Corbett Drive serves the Front Range Village to the south and Affinity Senior Housing to the north.

Existing Traffic

Recent peak hour traffic volumes at the Ziegler/Council Tree-HP Access, Ziegler/ Target Service Access, Ziegler/Hidden Pond, Ziegler/Paddington-Grand Teton, Corbett/ Target Service Access, and Corbett/Lowes Service Access intersections are shown in Figure 3. The counts at the Ziegler/Council Tree-HP Access intersection were obtained in August 2019 by the City of Fort Collins. The counts at the Ziegler/Target Service Access, Ziegler/Hidden Pond, and Ziegler/Paddington-Grand Teton intersections were obtained in September 2021. The counts at the Corbett/Target Service Access, and Corbett/Lowes Service Access intersections were obtained in January 2023. Raw traffic count data is provided in Appendix B. Since counts were obtained on different days and different years, the volumes were averaged/balanced between the intersections and are shown in Figure 4.

Existing Operation

The Ziegler/Council Tree-HP Access, Ziegler/Target Service Access, Ziegler/ Hidden Pond, Ziegler/Paddington-Grand Teton, Corbett/Target Service Access, and Corbett/Lowes Service Access intersections were evaluated and the peak hour operation is displayed in Table 1. Calculation forms are provided in Appendix C. The key intersections currently meet the Fort Collins operational criteria with existing control, signal timing, and geometry. The existing signal timing was used. The intersection was evaluated using techniques provided in the Highway Capacity Manual, 6th Edition. A description of level of service for signalized and unsignalized intersections from the Highway Capacity Manual, 6th Edition and a table showing the Fort Collins Motor Vehicle LOS Standards (Intersections) are also provided in Appendix C. At signalized intersections, acceptable operation is considered to be at level of service D overall and level of service E for any approach leg or movement. Acceptable operation is considered to be

at level of service D overall and level of service F for any approach leg at unsignalized intersections. It is important to note that a southbound right-turn lane is warranted at the Ziegler/Target Service Access intersection with the existing peak hour volumes.

In the neighborhood meeting, residents in the area mentioned that there were few gaps in the traffic on Ziegler Road that made it difficult to make minor street left-turns, particularly at the Ziegler/Paddington-Grand Teton intersection. This is reflected in the level of service F conditions shown in Table 1. It is acknowledged that the calculated delay for the minor street left turns is high, especially in the afternoon peak hour. This is due to high through volumes on Ziegler Road. Based upon research (actual delay data), the calculated delay is higher than the actual delay. There is little that can be done to alleviate this condition, except signalization of the Ziegler/Paddington-Grand Teton intersection. An alternative control would be a roundabout, but that may not be possible at this intersection. The final solution is beyond the scope of a transportation impact study for a development that will not contribute any traffic to the minor street legs. With that said, the peak hour level of service F for the minor street legs meets the operational criteria of the City of Fort Collins.

Pedestrian Facilities

There are sidewalks along all streets in the area of the Ziegler-Corbett/Union Park Mixed-Use site.

Bicycle Facilities

There are bicycle lanes along Harmony Road, Ziegler Road, Corbett Drive, and Council Tree Avenue.

Transit Facilities

Currently, this area of Fort Collins is served by Transfort Route 16 service on Harmony Road.

Accident Analysis

Accident data was obtained from the City of Fort Collins for Ziegler Road from the Ziegler/Council Tree-HP Access intersection to the Ziegler/Paddington-Grand Teton intersection for five years plus nine months of 2021.

At the Ziegler/Council Tree-HP Access intersection, there were 37 reported accidents: 11 rear-end accidents, 15 accidents involving turning vehicles, five right-angle accidents, three side-swipe accidents, two involving hitting a fixed object, and one involving a bicycle. The number and type of accidents at the Ziegler/Council Tree-HP Access intersection is typical for a signalized intersection.

At the Ziegler/Paddington-Grand Teton intersection, there were four reported accidents: three right-angle accidents and one accident that was parking related. The number and type of accidents at the Ziegler/Paddington-Grand Teton intersection is typical for a stop sign controlled intersection.

There were seven mid-block accidents in this section of Ziegler Road. All were right-angle accidents.

III. PROPOSED DEVELOPMENT

The proposed Ziegler-Corbett/Union Park Mixed-Use will consist of approximately 22,200 square feet of office, 16,825 square feet of commercial/retail, a 10,600 square foot day care center, 61 attached single-family dwelling units, and 561 apartment dwelling units. Figure 5 shows a site plan of the proposed Ziegler-Corbett/Union Park Mixed-Use site. The short range analysis (Year 2028) includes development of the proposed Ziegler-Corbett/Union Park Mixed-Use site and an appropriate increase in background traffic due to normal growth and other potential developments in the area. The long range analysis year is considered to be 2045.

Access to the Ziegler-Corbett/Union Park Mixed-Use site will be via one proposed full-movement access to/from Ziegler Road that will line up with Hidden Pond Drive. There will also be access to/from Corbett Drive on the west side of the site.

Trip Generation

Trip generation is important in considering the impact of a development on the existing and proposed street system. Trip Generation, 11th Edition, ITE was used to determine the trips that would be generated by the Ziegler-Corbett/Union Park Mixed-Use development. A trip is defined as a one-way vehicle movement from origin to destination. Table 2 shows the expected trip generation from the site on a daily and peak hour basis. The trip generation for full development of the Ziegler-Corbett/Union Park Mixed-Use site resulted in 5,390 daily trip ends, 458 morning peak hour trip ends, and 570 afternoon peak hour trip ends.

Trip Distribution

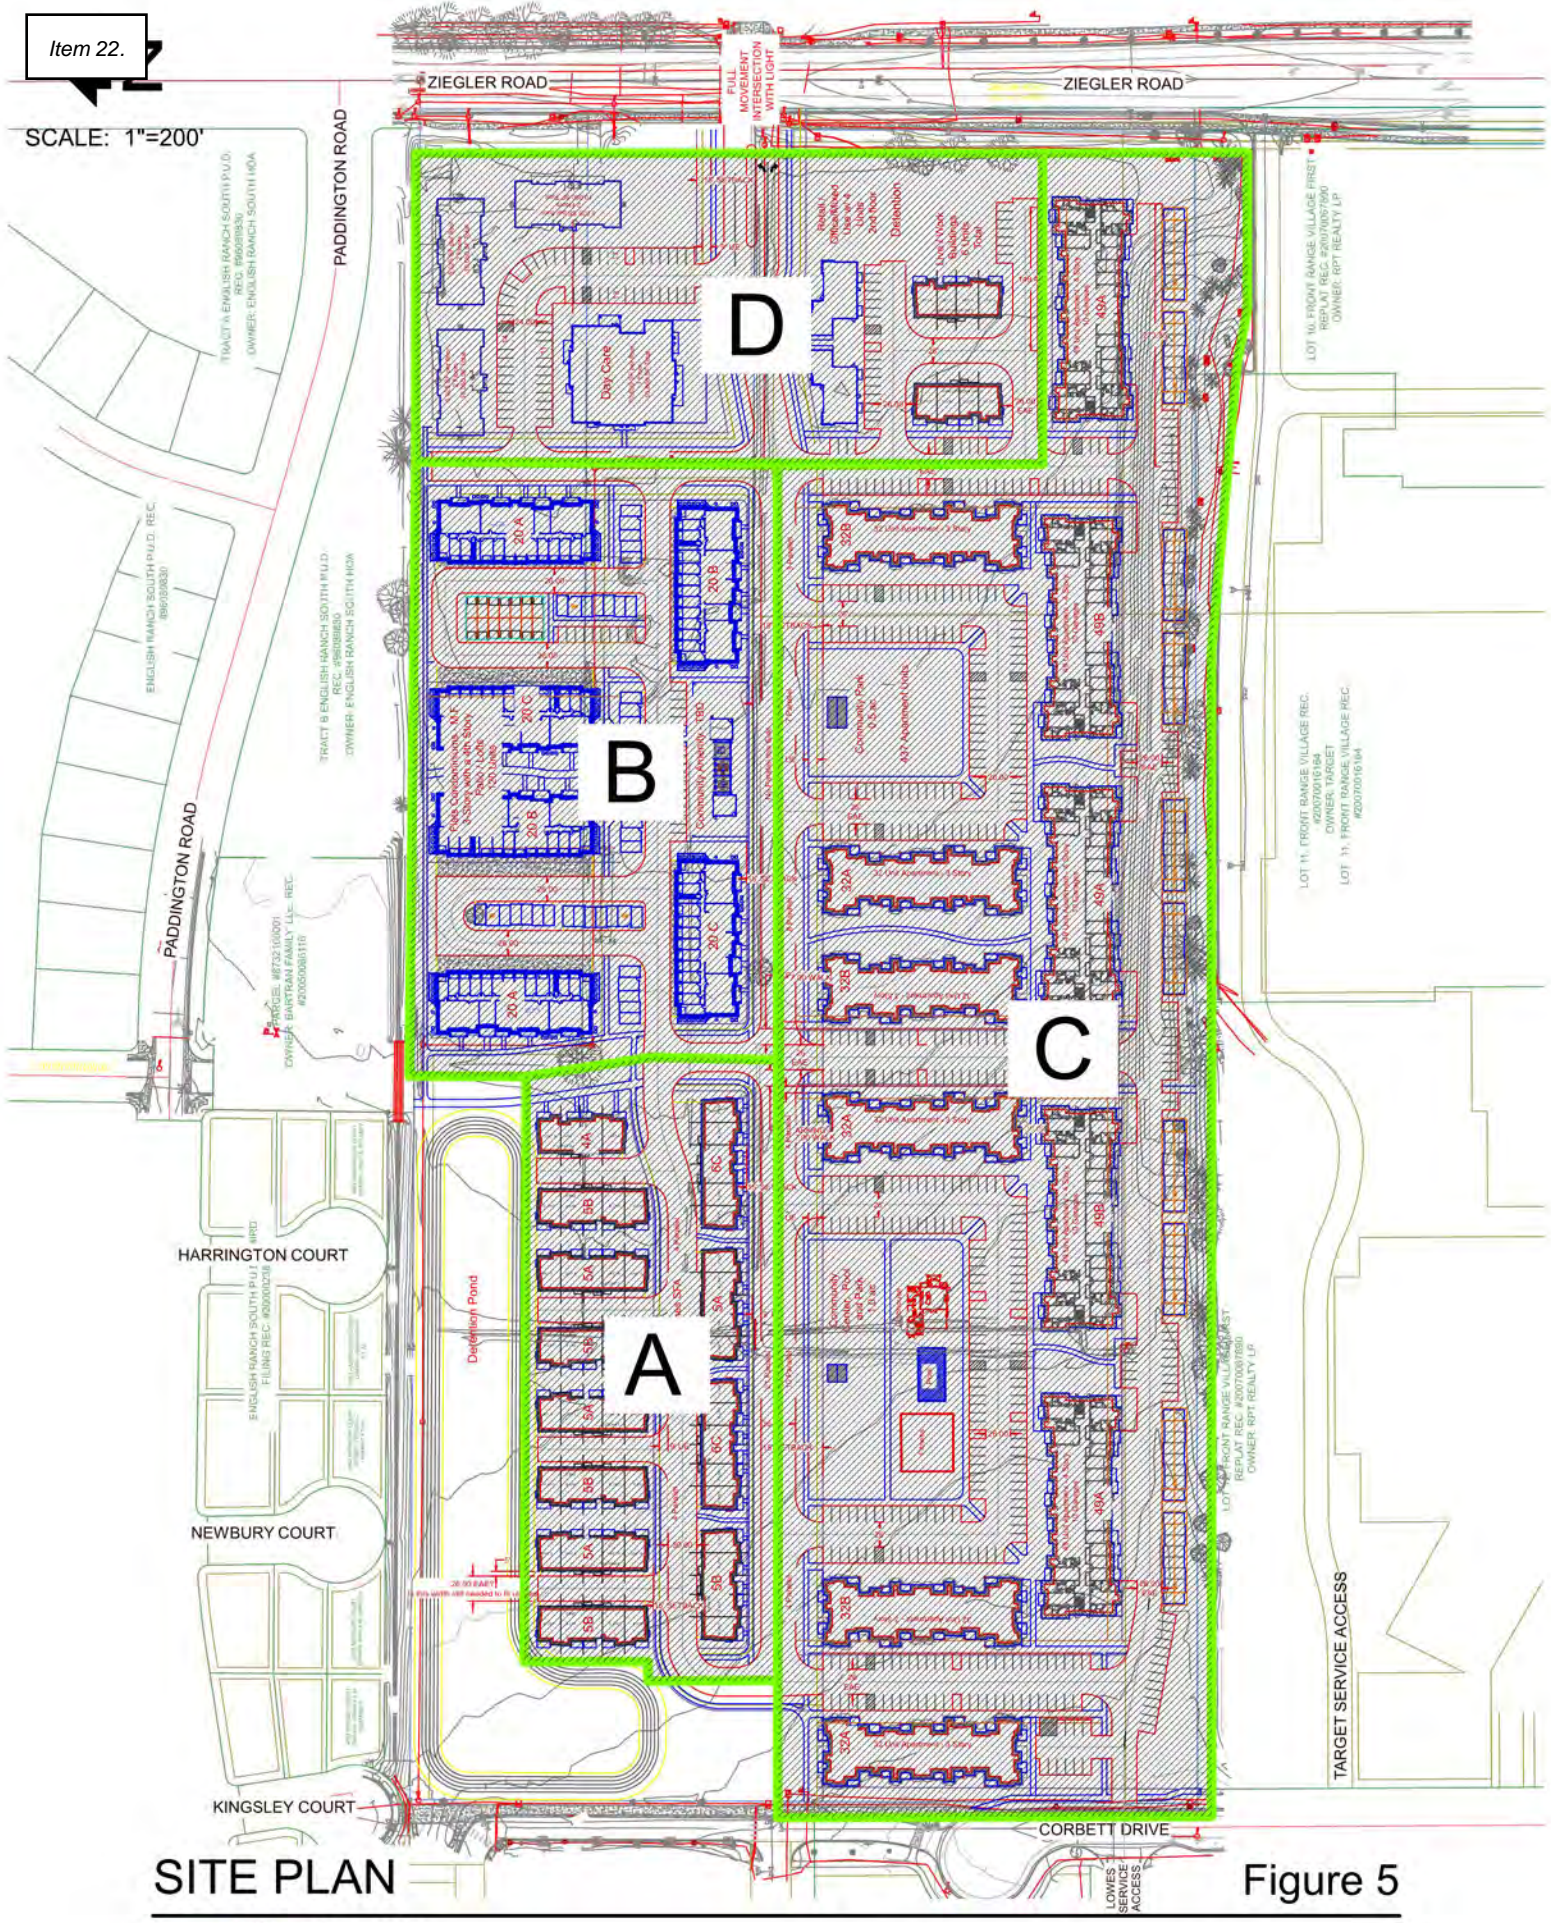

Trip distribution for the Ziegler-Corbett/Union Park Mixed-Use site was estimated using knowledge of the existing and planned street system, existing traffic patterns, development trends, and engineering judgment. Figure 6 shows the trip distribution for the short range (2028) and long range (2045) analysis futures. The trip distribution was agreed to by City of Fort Collins staff in the scoping discussions.

Background Traffic Projections

Background traffic projections for the short range (2028) and long range (2045) future horizons were developed by factoring the volumes on Ziegler Road by approximately two percent per year. The traffic on Council Tree Avenue and the HP Access was factored by approximately 0.5 percent per year. Figures 7 and 8 respectively show the short range (2028) and long range (2045) background weekday peak hour traffic at the Ziegler/Council Tree-HP Access, Ziegler/Target Service Access, Ziegler/Hidden Pond, Ziegler/Paddington-Grand Teton, Corbett/Target Service Access, and Corbett/Lowes Service Access intersections.

Traffic Assignment

Trip assignment is the product of both the trip generation and trip distribution processes. Figure 9 shows the site generated weekday peak hour traffic at the Ziegler/Council Tree-HP Access, Ziegler/Target Service Access, Ziegler/Hidden Pond-Site Access, Ziegler/Paddington-Grand Teton, Corbett/Target Service Access, and Corbett/Lowes Service Access-Site Access intersections.

Total Traffic

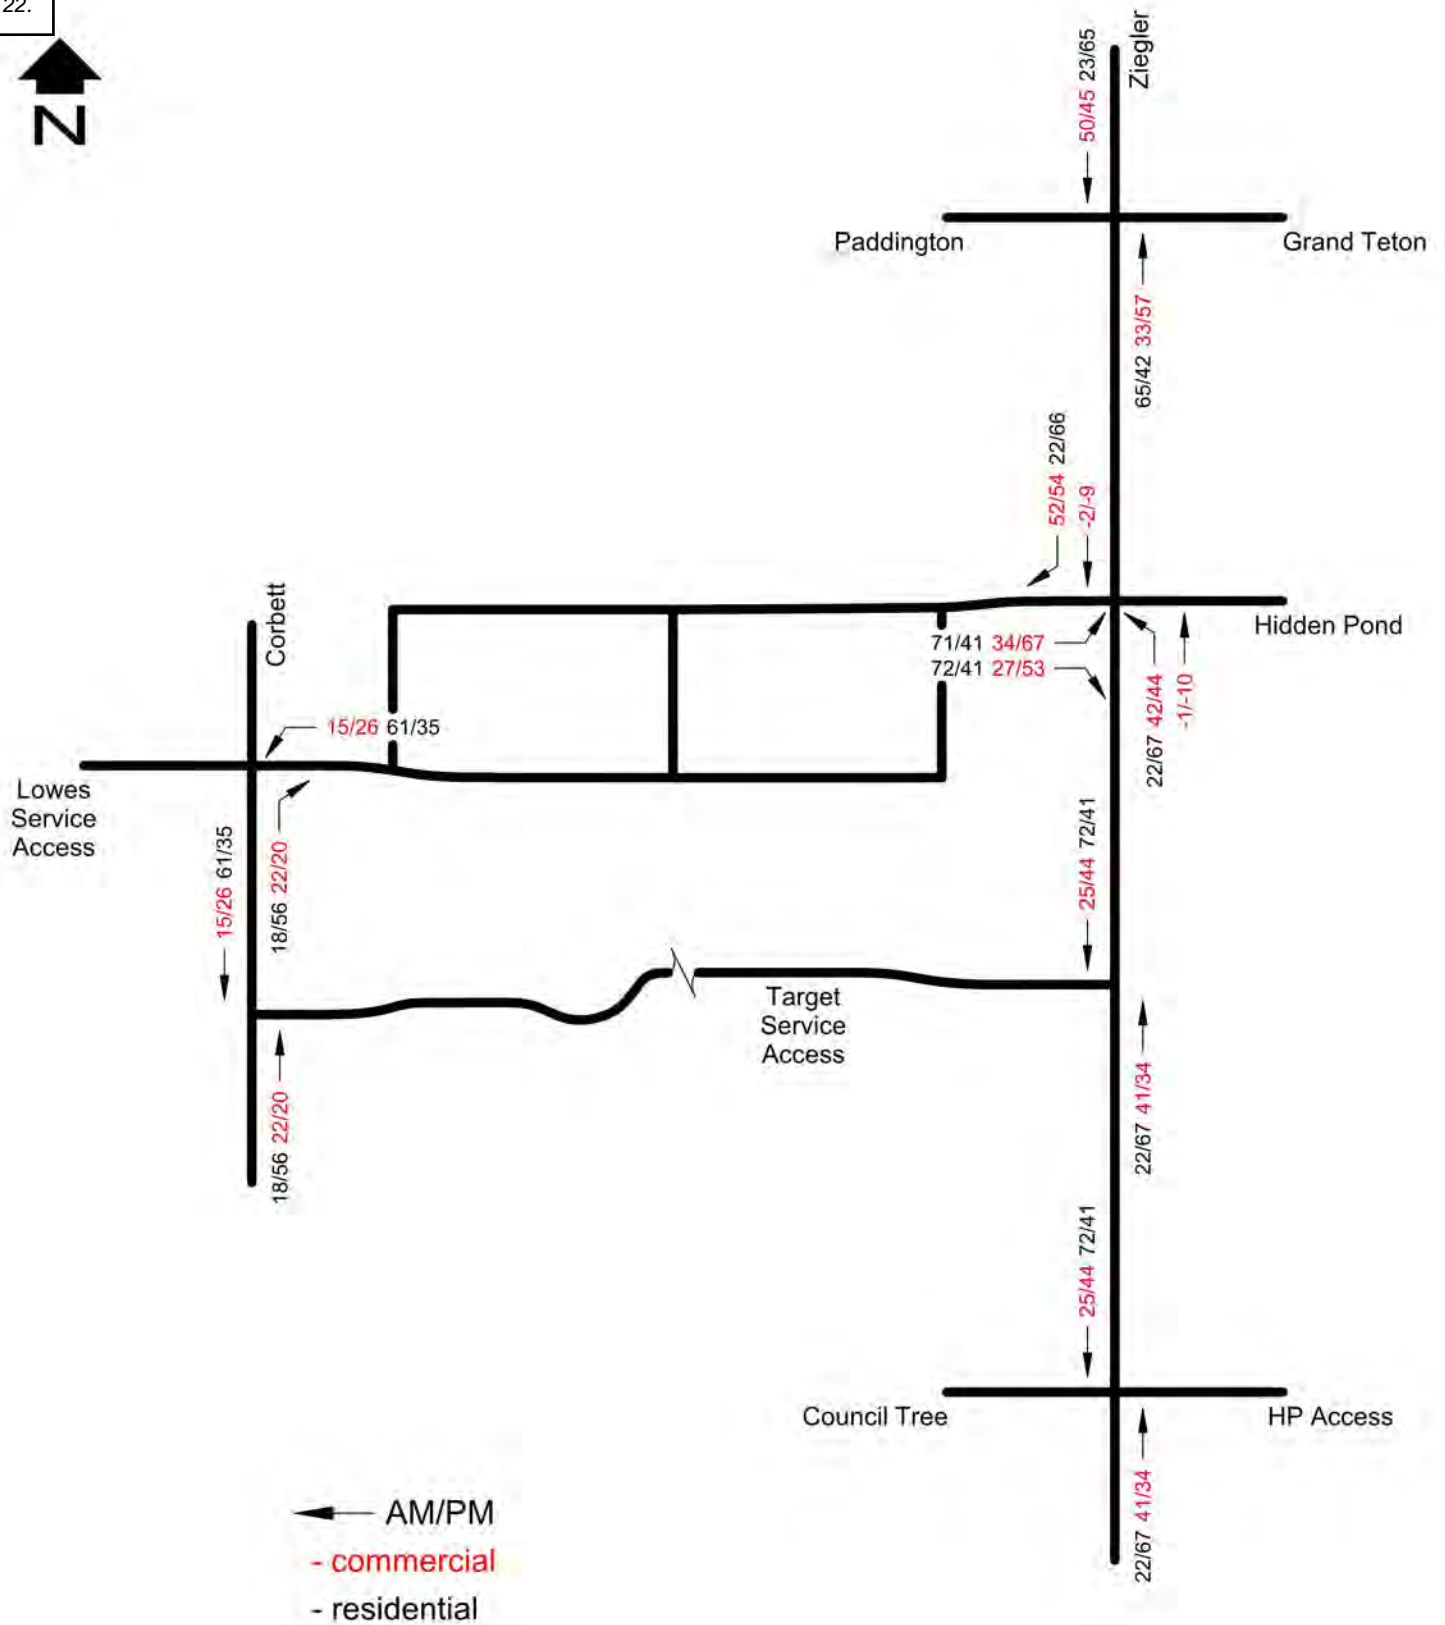

The traffic volumes generated by the proposed Ziegler-Corbett/Union Park Mixed-Use development were added to the background traffic volumes to produce the total traffic volume forecasts for the short range (2028) and long range (2045) futures. Figures 10 and 11 show the respective short range (2028) and long range (2045) total weekday peak hour traffic at the Ziegler/Council Tree-HP Access, Ziegler/Target Service Access, Ziegler/Hidden Pond-Site Access, Ziegler/Paddington-Grand Teton, Corbett/Target Service Access, and Corbett/Lowes Service Access-Site Access intersections. When the proposed signal at the Ziegler/Hidden Pond-Site Access intersection is installed, some Front Range Village and Affinity Senior Housing traffic may/will find it easier to use the newly installed signal than other routes. This adjustment in traffic volumes is reflected in the short range (2028) and long range (2045) total weekday peak hour traffic.

Signal Warrants

As a matter of policy, traffic signals are not installed at any location until such time that signal installation warrants are met according to the Manual on Uniform Traffic Control Devices. The Ziegler/Council Tree-HP Access intersection is currently signalized. For the streets in the vicinity of the Ziegler-Corbett/Union Park Mixed-Use, four hour and/or eight hour signal warrants are applicable. These warrants require much data and are applied when the traffic is actually on the area road system. As part of discussions (mid-2022), a preliminary signal warrant evaluation of the Ziegler/Hidden Pond-Site Access intersection was conducted. The Warrant 3/Peak Hour/Category A criteria was evaluated. It was concluded that the signal would be warranted.

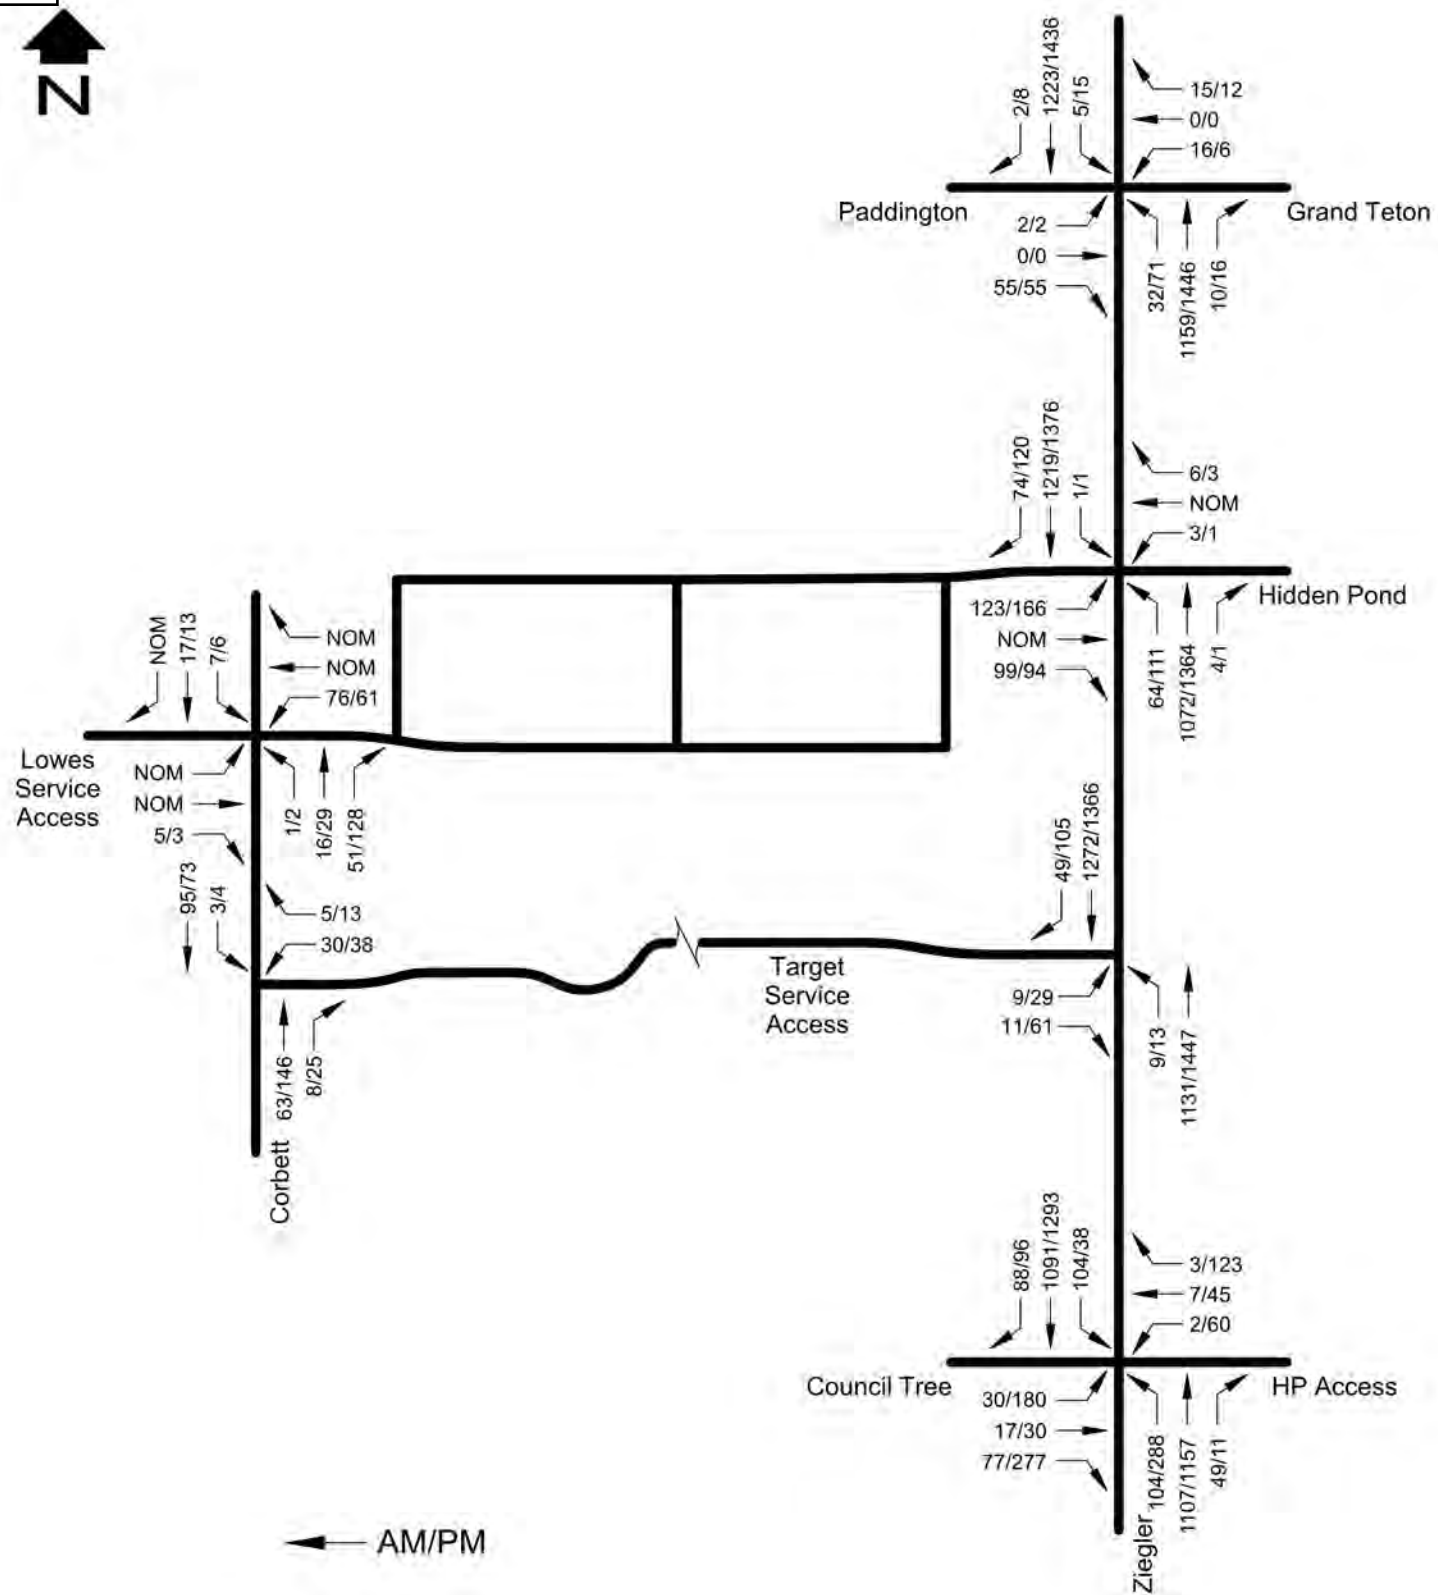

The peak hour signal warrant utilizes the major street approach volume (both directions) and the minor street approach volume (greatest on one of the minor streets). The analysis procedure is a function of the number of approach lanes on each street. Ziegler Road has two through lanes in each direction. The Site Access, approaching Ziegler Road, will have a two lane approach. Since Hidden Pond Drive has a one lane approach, the eastbound left-turn and through movement will be combined in a single lane. Therefore, only this left-turn and through movement will be used for the peak hour signal warrant. At the major street approach volumes (greater than 1,800 vehicles per hour in each peak hour), the signal warrant threshold volume is ≥ 100 vehicles per hour. Using the short range (2028) and long range (2045) total weekday peak hour traffic (Figures 10 and 11), the Ziegler/

Item 22.

SHORT RANGE (2028) TOTAL PEAK HOUR TRAFFIC

Figure 10

LONG RANGE (2045) TOTAL PEAK HOUR TRAFFIC

Figure 11

Hidden Pond-Site Access intersection will meet peak hour signal warrants during the weekday morning and afternoon peak hours. Peak hour signal warrants are provided in Appendix D.

Geometry

Figures 12 and 13 respectively show schematics of the short range (2028) and long range (2045) geometry. In the short range (2028) future, the geometry at the Ziegler/Council Tree-HP Access, Ziegler/Target Service Access, and Ziegler/Paddington-Grand Teton existing intersections was assumed to remain as it exists today.

Operation Analysis

Operation analyses were performed at the Ziegler/Council Tree-HP Access, Ziegler/Target Service Access, Ziegler/Hidden Pond-Site Access, Ziegler/Paddington-Grand Teton, Corbett/Target Service Access, and Corbett/Lowes Service Access-Site Access intersections. The operations analyses were conducted for the short range future, reflecting a year 2028 condition, and the long range future, reflecting a year 2045 condition.

Table 3 shows the short range (2028) background weekday peak hour operation at the Ziegler/Council Tree-HP Access, Ziegler/Target Service Access, Ziegler/Hidden Pond, Ziegler/Paddington-Grand Teton, Corbett/Target Service Access, and Corbett/Lowes Service Access intersections. The key intersections meet the Fort Collins level of service standards in the peak hours with the existing geometry. Calculation forms for these analyses are provided in Appendix E.

Table 4 shows the long range (2045) background weekday peak hour operation at the Ziegler/Council Tree-HP Access, Ziegler/Target Service Access, Ziegler/Hidden Pond, Ziegler/Paddington-Grand Teton, Corbett/Target Service Access, and Corbett/Lowes Service Access intersections. The key intersections meet the Fort Collins level of service standards in the peak hours with the existing geometry. Calculation forms for these analyses are provided in Appendix F.

Using the traffic volumes shown in Figure 10, Table 5 shows the short range (2028) total weekday peak hour operation at the Ziegler/Council Tree-HP Access, Ziegler/Target Service Access, Ziegler/Hidden Pond-Site Access, Ziegler/Paddington-Grand Teton, Corbett/Target Service Access, and Corbett/Lowes Service Access-Site Access intersections. Calculation forms for these analyses are provided in Appendix G. The key intersections meet the Fort Collins level of service standards in the peak hours with the recommended/existing control and geometry.

Using the traffic volumes shown in Figure 11, Table 6 shows the long range (2045) total weekday peak hour operation at the Ziegler/Council Tree-HP Access, Ziegler/Target Service Access, Ziegler/Hidden Pond-Site Access, Ziegler/Paddington-Grand Teton,

Corbett/Target Service Access, and Corbett/Lowes Service Access-Site Access intersections. Calculation forms for these analyses are provided in Appendix H. The key intersections meet the Fort Collins level of service standards in the peak hours with the recommended/existing control and geometry.

Pedestrian Level of Service

Appendix I shows a map of the area that is within 1320 feet of the Ziegler-Corbett/Union Park Mixed-Use site. The Ziegler-Corbett/Union Park Mixed-Use site is located within an area termed as "other," which sets the level of service threshold at LOS C for all measured factors. There are four destination areas within 1320 feet of the proposed Ziegler-Corbett/Union Park Mixed-Use site: 1) the residential area to the north and northwest of the site, 2) the commercial uses (Front Range Village) to the south and southwest of the site, 3) the HP Campus, and 4) the residential area to the east and northeast of the site. There are sidewalks along all streets in the area of the Ziegler-Corbett/Union Park Mixed-Use site. Sidewalks will be built throughout and adjacent to the development that will connect to existing nearby sidewalks along Ziegler Road and Corbett Road. A pedestrian/bike connection will be provided, connecting to the sidewalks along Paddington Road at Edmonds Road. There is no sidewalk on the south side of Paddington Road (Ziegler Road to Edmonds Road). This sidewalk should have been built with the English Ranch development. It is not the responsibility of the Ziegler-Corbett/Union Park Mixed-Use development to build this sidewalk since the Ziegler-Corbett/Union Park Mixed-Use development will not contribute pedestrian traffic along this segment of Paddington Road. As noted below, if the City of Fort Collins decides to signalize the Ziegler/Hidden Pond-Site Access intersection, there will be a safe, convenient pedestrian crossing at that intersection.

- **Directness** – The distance ratio to all pedestrian destinations is less than 1.2 (LOS A), except destination 4. The directness for destination 4 can be improved to LOS A with a traffic signal at the Ziegler/Hidden Pond-Site Access intersection.
- **Continuity** – The continuity to all pedestrian destinations will be acceptable at LOS B, since there are existing sidewalks adjacent to all the destination areas.
- **Street Crossings** – The street crossings will be acceptable at LOS B for destination areas 1 and 2. For destination areas 3 and 4, the LOS will be C crossing Ziegler Road at the Ziegler/Council Tree-HP Access signalized intersection and at the Ziegler/Hidden Pond-Site Access intersection, if the City decides to signalize it.
- **Visual Interest and Amenity** – The visual interest and amenity will be acceptable at LOS B for destination areas 1 and 2. For destination areas 3 and 4, the LOS will be C.
- **Security** – The security is acceptable at LOS B for destination areas 1 and 2. For destination areas 3 and 4, the LOS will be C.

Bicycle Level of Service

Appendix I shows a map of the area that is within 1320 feet of the Ziegler-Corbett/Union Park Mixed-Use site. Based upon Fort Collins bicycle LOS criteria, there is one destination area within 1320 feet of the Ziegler-Corbett/Union Park Mixed-Use site: 1) the commercial uses (Front Range Village) to the south and southwest of the site. The bicycle level of service is acceptable. The bicycle LOS Worksheet is provided in Appendix I. There are bicycle lanes along Harmony Road, Ziegler Road, Corbett Drive, and Council Tree Avenue. Bicycle lanes are not required on local streets.

Transit Level of Service

Currently, this area of Fort Collins is served by Transfort Route 16 service on Harmony Road.

IV. CONCLUSIONS/RECOMMENDATIONS

This study assessed the transportation impacts associated with the development of the Ziegler-Corbett/Union Park Mixed-Use in Fort Collins, Colorado. This study analyzed the transportation impacts in the short range (2028) and long range (2045) futures. As a result of these analyses, the following is concluded:

- Development of the Ziegler-Corbett/Union Park Mixed-Use site is feasible from a traffic engineering standpoint. The trip generation for full development of the Ziegler-Corbett/Union Park Mixed-Use site resulted in 5,390 daily trip ends, 458 morning peak hour trip ends, and 570 afternoon peak hour trip ends.
- Current operation at the Ziegler/Council Tree-HP Access, Ziegler/Target Service Access, Ziegler/Hidden Pond, Ziegler/Paddington-Grand Teton, Corbett/Target Service Access, and Corbett/Lowes Service Access intersections is acceptable based upon City of Fort Collins evaluation criteria.
- As part of discussions (mid-2022), a preliminary signal warrant evaluation of the Ziegler/Hidden Pond-Site Access intersection was conducted. The Warrant 3/Peak Hour/Category A criteria was evaluated. It was concluded that the signal would be warranted.
- Figures 12 and 13 respectively show schematics of the short range (2028) and long range (2045) geometry.
- With short range (2028) traffic and the Ziegler-Corbett/Union Park Mixed-Use development, the key intersections meet the Fort Collins level of service standards in the peak hours with the recommended/existing control and geometry.
- With long range (2045) traffic and the key intersections will meet the Fort Collins level of service standards in the peak hours using the recommended/existing control and geometry.
- With signalization of the Ziegler/Hidden Pond-Site Access intersection the pedestrian level of service will be acceptable. The bicycle level of service will be acceptable. Transfort Route 16 provides service on Harmony Road.

**Table 4-2
Fort Collins (GMA and City Limits)
Motor Vehicle LOS Standards (Intersections)**

	Overall	Any Approach Leg	Any Movement
Signalized	D ¹	E	E ²
Unsignalized Arterial/Arterial Collector/Collector	E ³	F ⁴	
Unsignalized Arterial/Collector Arterial/Local Collector/Local Local/Local	D ³	F ⁴	
Roundabout	E ^{3,5}	E ^{5,4}	E ⁵
¹ In mixed use district including downtown as defined by structure plan, overall LOS E is acceptable ² Applicable with at least 5% of total entering volume ³ Use weighed average to identify overall delay ⁴ Mitigation may be required ⁵ Apply unsignalized delay value thresholds to determine LOS			

APPENDIX D

FIGURE 4C-3. WARRANT 3, PEAK HOUR

MUTCD, 2003 EDITION, PAGE 4C-7

MAJOR STREET - TOTAL OF BOTH APPROACH - VEHICLES PER HOUR (VPH)

*Note: 150 vph applies as the lower threshold volume for a minor-street approach with two or more lanes and 100 vph applies as the lower threshold volume for a minor-street approach with one lane.

LONG RANGE (2040) TOTAL PEAK HOUR WARRANT AT ZIEGLER/PADDINGTON-GRAND TETON INTERSECTION WITHOUT A CONNECTION TO PADDINGTON ROAD

FIGURE 4C-3. WARRANT 3, PEAK HOUR

MUTCD, 2003 EDITION, PAGE 4C-7

MAJOR STREET - TOTAL OF BOTH APPROACH - VEHICLES PER HOUR (VPH)

*Note: 150 vph applies as the lower threshold volume for a minor-street approach with two or more lanes and 100 vph applies as the lower threshold volume for a minor-street approach with one lane.

SHORT RANGE (2028) TOTAL PEAK HOUR WARRANT AT ZIEGLER/HIDDEN POND-SITE ACCESS INTERSECTION

Item 22.

FIGURE 4C-3. WARRANT 3, PEAK HOUR

MUTCD, 2003 EDITION, PAGE 4C-7

The graph plots Minor Street Approach - VPH on the y-axis (400 to 600) against Major Street - Total of Both Approach - Vehicles per Hour (VPH) on the x-axis (400 to 1800). Three curves represent different lane configurations:

- 2 OR MORE LANES & 2 OR MORE LANES:** The uppermost curve, starting at approximately (400, 550) and ending at (1800, 600).
- 2 OR MORE LANES & 1 LANE:** The middle curve, starting at approximately (400, 450) and ending at (1800, 550).
- 1 LANE & 1 LANE:** The lowermost curve, starting at approximately (400, 350) and ending at (1800, 450).

Vertical lines indicate thresholds:

- EB LT/T PM 180 VPH at x ≈ 1800
- EB LT/T AM 130 VPH at x ≈ 1800
- AM 3115 VPH at x ≈ 1800
- PM 3695 VPH at x ≈ 1800

Horizontal lines indicate major street thresholds:

- *150 VPH at y ≈ 150
- *100 VPH at y ≈ 100

MAJOR STREET - TOTAL OF BOTH APPROACH - VEHICLES PER HOUR (VPH)

*Note: 150 vph applies as the lower threshold volume for a minor-street approach with two or more lanes and 100 vph applies as the lower threshold volume for a minor-street approach with one lane.

LONG RANGE (2045) TOTAL PEAK HOUR WARRANT AT ZIEGLER/HIDDEN POND-SITE ACCESS INTERSECTION

Intersection Summary

- ~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.
- # 95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

- # 95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.
- m Volume for 95th percentile queue is metered by upstream signal.

RE: Amended Overall Drainage Report - Ziegler-Corbett

Dear Wes,

We are pleased to submit for your review, the Overall Drainage Report for the Ziegler – Corbett Overall Development Plan. This report is amended to include the Young Property (described herein as *Parcel 3*) and describes the general drainage design intent to be implemented with future development and in accordance with the criteria in the City of Fort Collins Storm Drainage Manual.

I appreciate your time and consideration in reviewing this submittal. Please call if you have any questions.

Sincerely,
Highland Development Services

A handwritten signature in blue ink, appearing to read "Jason T. Claeys", is written over the company name.

Jason T. Claeys, P.E., LEED AP

ENGINEER'S CERTIFICATION BLOCK

I hereby certify that this Overall Drainage Report for Ziegler-Corbett was prepared by me (or under my direct supervision) for the owners thereof and meets or exceeds the criteria of the City of Fort Collins Stormwater Design Standards.

Jason T. Claeys, PE
Registered Professional Engineer
State of Colorado No. 42122

GENERAL DESCRIPTION AND LOCATION

SITE DESCRIPTION AND LOCATION

The Ziegler-Corbett property is located in the Southeast Quarter of Section 32, Township 7 North, Range 68 West of the Sixth Principal Meridian, City of Fort Collins, County of Larimer, State of Colorado. More specifically, the Ziegler-Corbett property is located north of the Front Range Village commercial area, east of the Affinity residences, south of the English Ranch residential subdivision, and west of Ziegler Road.

The project site is approximately 32.78 acres currently and is undeveloped agricultural and rural residential land, with one residence and multiple outbuildings. The site appears to be mostly vegetated with grass harvested for livestock feed. The site generally slopes from the west to the east at about 0.7% slope.

The intent of the Amended Overall Development Plan (ODP) is to update the existing ODP with the anticipated uses and the inclusion of *Parcel 3*. No improvements are being constructed with the ODP, but rather establishing future expectations for development. The property is anticipated to be a high-density multi-use development, mainly multi-family residential with retail space and supporting amenities.

The Ziegler-Corbett property is located within the City's Fox Meadows Drainage Basin. In addition to the City of Fort Collins Stormwater Design Standards, drainage requirements are also described in both the "Front Range Village Final Drainage and Erosion Control Study," prepared by Stantec Consulting Inc., dated February 2007, and the "Final Drainage Report for Affinity Fort Collins", prepared by JR Engineering, LLC, dated March 2, 2016.

No City or FEMA floodplains/floodways are located within the Ziegler-Corbett property.

STORM DRAINAGE CRITERIA

This Overall Drainage Report was prepared to establish future design expectations that meet or exceed the City of Fort Collins storm water criteria. The City of Fort Collins's Storm Drainage Design Criteria and amendments to the Urban Drainage Flood Control District's (UDFCD) Drainage Criteria Manual (USDCM) Volumes 1, 2 and 3 were referenced as guidelines for this design.

EXISTING CONDITIONS

The Ziegler – Corbett property overall is a part of a drainage basin that is situated north of Harmony Road, and west of Ziegler Road, which runoff is conveyed east under Ziegler Road into the existing drainage channel on the HP Harmony Campus property. It has been determined in the *Front Range Village Final Drainage Report* that this area is allowed to contribute 76.7 cfs to the HP Campus drainage channel during 100-year event peak discharge. More specific to this site, 20.1 cfs release rate was allocated to the Ziegler-Corbett & the Affinity Fort Collins properties. Per *The Final Drainage Report for Affinity Fort Collins*, the Affinity site has a 100-yr peak release rate of 2.1 cfs, allowing a 100-yr peak discharge of 18.0 cfs from the Ziegler – Corbet property.

The Harmony Village Manufactured Home Community does not provide adequate detention facilities and during a 100-yr storm event, a portion of the site that flows to the east into both the Front Range Village development as well as the Affinity Fort Collins site. This runoff was evaluated in the *Front Range Village Final Drainage Report* and was determined to be 116 cfs peak runoff during the 100-yr event. This runoff is to be collected in the Front Range Village Detention Pond D, which is intended to collect, but not detain this flow. During the 100-year event, this peak flow of 116 cfs will flow over the weir on the north side of Detention Pond D and will be conveyed via the private drive aisles to a level spreading weir on the northeast side of the Affinity Fort Collins site, where it is discharged into the Ziegler-Corbett property. This flow is then assumed to sheet flow east to be inadvertently detained on the east side of the Ziegler-Corbett property along Ziegler Road.

In reference to the *Front Range Village Final Drainage Report*, a future detention pond is planned to be incorporated into the Ziegler-Corbett site, Detention Pond 298. The volume of Detention Pond 298 will be determined by the lesser of the two following scenarios:

1. Standard detention volume required for the site, detaining the 100-yr peak developed runoff to the 2-yr historic runoff rate, plus the existing inadvertent detention volume,

the detention volume currently provided onsite due to existing constraints such as grade features and outlet restrictions, or

2. The volume required to detain the combination of 100-yr peak runoff rates from the developed onsite and existing offsite flows to the allocated release rate of 20.1 cfs.

For the purposes of this report, it is assumed that scenario 1 is the lesser of the two. Future detention volume calculations should confirm this assumption.

Based on the topographic survey of the existing conditions, the inadvertent detention volume is constrained for this site by the spill location along the north property line, at an approximate elevation of 4928.0 ft. The inadvertent detention volume is estimated to be 7.5± acre-ft. The estimated volume did not account for the 2 existing culverts along the west side of Ziegler Road that currently provide ponding relief for the Ziegler-Corbet site.

The FAA Method was utilized to estimate the required detention for the developed conditions in accordance with the City of Fort Collins requirements (the 100-year developed peak runoff detained to the 2-year historical peak runoff) to be 8.8± acre-ft. Combining the inadvertent detention and the required detention volume, a total of 16.3± acre-ft is required to accommodate the developed site, as well as account for the displacement of the historical inadvertent detention.

All supporting preliminary calculations are located in the Appendix.

DRAINAGE BASINS

The Ziegler-Corbett property conceptual developed drainage basins, percent impervious, and flow paths are to be determined with future applications. For the purposes of this study, it is assumed the site is approximately 90% impervious for high-density mixed-use sites and the corresponding runoff coefficient. Historical drainage analysis was completed for the Ziegler-Corbett property to determine the allowed 2-yr historic runoff rate.

DRAINAGE FACILITY DESIGN

DRAINAGE CONVEYANCE DESIGN

Storm infrastructure to convey runoff will potentially include overland grass-lined swales, concrete trickle pans, inlets, storm sewer and culverts. Stormwater detention and water quality enhancement will be achieved through the use of a series of extended detention basins and low impact development techniques. Storm inlets, storm sewers and the roadway culverts will be appropriately sized with the final drainage design

DETENTION/WATER QUALITY POND DESIGN

Multiple extended detention basins (EDB) with a dry bottom will be utilized as the detention and water quality facility for the Ziegler-Corbett property. The EDBs will combine to provide an estimated detention volume of $16.3 \pm$ acre-ft, accounting for the existing inadvertent detention on the site, as well as the additional detention required to accommodate the site in its developed condition. Detention volume calculations are to be confirmed with future applications. For the overall drainage study, the FAA method was used to estimate the detention volume needed. EPA SWWM or the Rational Method may be utilized for the final drainage design, as determined by the City. UDFCD is referenced for the water quality capture volume (WQCV) with a 40-yr drain time. Due to the limited grades on the site, multiple ponds are proposed throughout the site with the main detention pond being located in the northwest corner of the site. The ultimate outfall will be the existing HP Harmony Campus storm channel system, which ultimately flows into the Cache La Poudre River.

Reference the appendix for estimated calculations and the drainage plan.

LOW IMPACT DEVELOPMENT

The City of Fort Collins updated the Low Impact Development ordinance in 2016 (Ordinance No. 007, 2016) to require:

- Treat at least 75% of any newly developed or redeveloped impervious area using one or a combination of LID techniques, or
- Treat at least 50% of any newly developed or redeveloped impervious area using one or a combination of LID techniques when 25% of private drivable surfaces are permeable.

To satisfy the required implementation of Low Impact Development (LID) techniques, the Ziegler-Corbett property could utilize below grade infiltration galleries (such as ADS StormTech chamber system), bioretention ponds/rain gardens, and/or permeable pavers. Other LID techniques will be explored, but due to the limited grade available and the amount of detention volume required, shallow infiltration galleries may assist in maintaining storm drain grades and detention volumes. Infiltration galleries, rain gardens, and permeable pavers can promote infiltration while capturing fine sediment that drains off the impervious areas. Isolator rows can be implemented at the headworks to the infiltration galleries to allow larger sediment particles to settle prior to entering the infiltration gallery. The isolator rows will be accessible to remove sediments. Standard water quality is also provided, as needed, within the detention ponds in addition to these LID infiltration galleries. A Standard Operations Procedure will be provided at final design to assist in ensuring that these BMPs will adequately perform over time.

Below is a description of the 4-step process for selecting structural BMPs:

Urban Drainage and Flood Control District (UDFCD) recommends a Four Step Process for receiving water protection that focuses on reducing runoff volumes, treating the water quality capture volume (WQCV), stabilizing drainageways and implementing long-term source controls. The Four Step Process applies to the management of smaller, frequently occurring events.

Step 1: Employ Runoff Reduction Practices

To reduce runoff peaks, volumes, and pollutant loads from urbanizing areas, implement Low Impact Development (LID) strategies, including Minimizing Directly Connected Impervious Areas (MDCIA).

Captured runoff from strategic areas are routed through below grade infiltration galleries, bioretention pond/rain gardens, and/or permeable pavers. Infiltration galleries, rain gardens,

and permeable pavers will slow runoff, promote infiltration, and filter runoff prior to being released into the adjacent storm drain system.

Step 2: Implement BMPs that Provide a Water Quality Capture Volume with Slow Release

The infiltration galleries, rain gardens, and permeable pavers are designed to provide water quality capture volume per Urban Drainage's recommendations and calculations. The captured runoff is design for a 12-hr drain time.

Step 3: Stabilize Drainageways

Natural Drainageways are subject to bed and bank erosion due to increases in frequency, duration, rate, and volume of runoff during and following development. Because the site will drain to an existing storm system, bank stabilization is unnecessary with this project.

Step 4: Implement Site Specific and Other Source Control BMPs

Proactively controlling pollutants at their source by preventing pollution rather than removing contaminants once they have entered the stormwater system or receiving waters is important when protecting storm systems and receiving waters. This can be accomplished through site specific needs such as construction site runoff control, post-construction runoff control and pollution prevention / good housekeeping. It will be the responsibility of the contractor to develop a procedural best management practice for the site.

STORMWATER POLLUTION PREVENTION

Erosion and sedimentation can be controlled on-site by use of sediment control logs, inlet protection, a gravel construction entrance, seeding, mulch, and turf. The measures are designed to limit the overall sediment yield increase due to construction as required by the City of Fort Collins. During overlot and final grading the soil will be roughened and furrowed perpendicular to the prevailing winds.

During the performance of the work required by these specifications or any operations appurtenant thereto, whether on right-of-way provided by the City or elsewhere, the contractor shall furnish all labor, equipment, materials, and means required. The Contractor shall conduct proper efficient measures wherever and as necessary to reduce dust nuisance, and to prevent dust nuisance that has originated from his operations from damaging crops, orchards, cultivated fields, and dwellings, or causing nuisance to persons. The Contractor will be held liable for any damage resulting from dust originating from his operations under these specifications on right-of-way or elsewhere.

It is unlawful to track or cause to be tracked mud or other debris onto city streets or rights-of-way. Wherever construction vehicles access routes or intersect paved public roads, provisions must be made to minimize the transport of sediment by runoff or vehicles tracking onto the paved surface. Stabilized construction entrances are required with base material consisting of 6" coarse aggregate. The contractor will be responsible for clearing mud tracked onto city streets on a daily basis.

All temporary and permanent erosion and sediment control practices must be maintained and repaired as needed to assure continued performance of their intended function. Silt fence and sediment control logs will require periodic replacement. Maintenance is the responsibility of the contractor.

All disturbed areas must be seeded and mulched within 30 days of project start. Vegetation shall not be considered established until a ground cover is achieved which is demonstrated to be mature enough to control soil erosion to the satisfaction of the City Inspector and to survive severe weather conditions.

CONCLUSIONS

This Overall Drainage Report for the Ziegler-Corbett property has been prepared to comply with the stormwater criteria set by the City of Fort Collins. The proposed development's drainage system will be designed to convey the developed peak storm water runoff through the site to the existing storm drain system and to the development's detention, water quality, and LID facilities. Storm drains will be sized to provide the required roadway relief in both the 2-yr and 100-yr storm events, and to adequately convey the released runoff from the detention ponds disbursed throughout the site. Overland relief will be provided at all sump locations. The calculated 100-yr peak flows released from the Ziegler-Corbett property will adhere to the allowed rates as established in the *Front Range Village & Affinity Fort Collins* drainage studies. This overall drainage report anticipates the implementation of best management practices for erosion control, temporary and permanent, and on-site construction facilities that will be further designed and details in future Preliminary and Final Drainage Reports.

It can therefore be concluded that future development of the Ziegler-Corbett property will comply with the storm water jurisdictional criteria and will not adversely affect the adjacent properties, streets, storm drain system and/or detention/water quality facilities. Controlling the developed runoff from these improvements will improve the current situations currently existing on the site. Therefore, this preliminary report satisfies the burden of proof needed to proceed to a future Preliminary & Final Drainage Reports.

Re: Ziegler- Corbett –Intersection Spacing Variance

Dear Staff:

This variance letter pertains to the intersection spacing of the proposed Ziegler-Corbett access and the existing unsignalized Paddington Road/Grand Teton Place intersection along Ziegler Road.

According to Table 7-3 Fort Collins (GMA and City Limits) Street Standards – Technical Design Criteria in the **Larimer County Urban Area Street Standards (LCUASS)**, on four lane arterials, the distance between unsignalized intersections is a minimum of 460'. The estimated traffic generated from the Ziegler-Corbett onto Ziegler Road will meet the peak hour signal warrant with the proposed intersection aligned with the existing Hidden Pond Drive intersection. The existing intersection spacing between Hidden Pond Drive and Paddington Road/Grand Teton Place is approximately 430'. According to Section 8.2.2 Lane Alignment in LCUASS, lanes shall align through an intersection. This along with the signalization warrant, is requiring the variance of standard from the minimum intersection spacing.

The traffic memorandum “Ziegler-Corbett Traffic Analyses Related to Inclusion of the Young Property”, prepared by Delich Associates, dated September 15, 2022, analyzed Ziegler Road access scenarios and is referenced as part of this variance request. Scenario 2 is the analyses of a signalized access onto Ziegler Road, aligned with the existing Hidden Pond Road. In this report it is stated:

If the Scenario 2 intersection is implemented, the peak hour signal warrant will be met. It is acknowledged that the Ziegler/Paddington-Grand Teton intersection is approximately 430 feet to the north (does not meet intersection spacing criterion). Therefore, a variance will be required due to this. Based upon the operations analyses, the 95th percentile left-turn queues (northbound to Paddington Road and southbound to Hidden Pond Drive) will not conflict. The respective queues are not more than 25 feet. This segment can be striped as a continuous two-way left-turn lane. With a signal at the Ziegler/Site Access-Hidden Pond intersection, it is expected that gaps to the north/south through traffic on Ziegler Road will occur, which will improve the minor leg operation at the stop sign controlled Ziegler/Paddington-Grand Teton intersection.

Therefore, it is requested that the reduction from the standard minimum 460' intersection spacing to the existing 430' separation be considered.

This variance will not be detrimental to the public health, welfare, and safety. This variance will have no impact on the capital and maintenance costs of the City of Fort Collins. It is respectfully requested this variance be granted.

Sincerely,

Highland Development Services

MEMORANDUM

TO: Jason Sherill, Landmark Homes
Mike Walker, TB Group
Jason Claeys, Highland Development Services
Nicole Hahn, Fort Collins Traffic Operations
Ryan Mounce, Fort Collins Planning

FROM: Matt Delich

DATE: September 15, 2022

SUBJECT: Ziegler-Corbett Traffic Analyses Related to Inclusion of the Young Property
(File: 2166ME01)

This memorandum provides traffic analyses related to the inclusion of the Young Property in the Ziegler-Corbett Mixed-Use ODP. The **Ziegler-Corbett Mixed-Use ODP Master Transportation Impact Study (TIS)**, dated January 2022, was utilized in the following analyses. As discussed in a meeting with City staff on August 4, 2022, two access scenarios were analyzed. Scenario 1 – The proposed channelized-T intersection would continue to be the primary access to the Ziegler-Corbett Mixed-Use development. Scenario 2 – The access to the Ziegler-Corbett Mixed-Use development would be moved to the Young Property, lining up with Hidden Pond Drive on the east side of Ziegler Road. In both scenarios, all other intersections would remain as analyzed in the TIS, with no vehicular access from the Ziegler-Corbett Mixed-Use development to Paddington Road. The following analyses were conducted: trip generation, trip assignment, level of service operations, and signal warrants.

The location of the Young Property is shown on the site plan from the TIS (outlined in red) in Appendix A. The Young Property will be part of Area D. The land uses on the Young Property, as analyzed, are 20,000 square feet of retail and 20,000 square feet of general office. The trip generation table from the TIS is provided in Appendix A showing the additional trips from the Young Property. The peak hour trip generation for these additional uses were assigned to the site generated traffic as shown in Figure 1. The long range (2040) total peak hour traffic is shown in Figure 2. The alternative full-movement Ziegler/Site Access-Hidden Pond intersection (Scenario 2) is also shown in Figure 2.

The intersection level of service (LOS) was analyzed for both scenarios. Table 1 shows the peak hour operation at the Ziegler/Site Access intersection (channelized-T intersection). Calculation forms are provided in Appendix B. The calculated delay for the minor street left turns will be similar to that at the channelized-T intersection (slightly higher with the additional traffic due to the Young Property). The City of Fort Collins accepts that LOS F will occur at stop sign controlled intersections along arterial streets.

Table 2 shows the peak hour operation at the Ziegler/Site Access-Hidden Pond intersection (Scenarios 2 [4-leg intersection]). Calculation forms are provided in Appendix C. The calculated

delay for the minor street left turns and the legs will be significant. As expected, the delays will be higher than those at the channelized-T intersection. These significant delays will have a bearing on the following signal warrant analyses.

Under Scenario 1 (channelized-T intersection) the volume warrant will not be met (Warrant 3/Peak Hour/Category A). At the channelized-T intersection, the delay to the minor street left turns is considerably less than that at a conventional 4-leg intersection. This is due to the ability to execute the minor street left turns in a two-step maneuver.

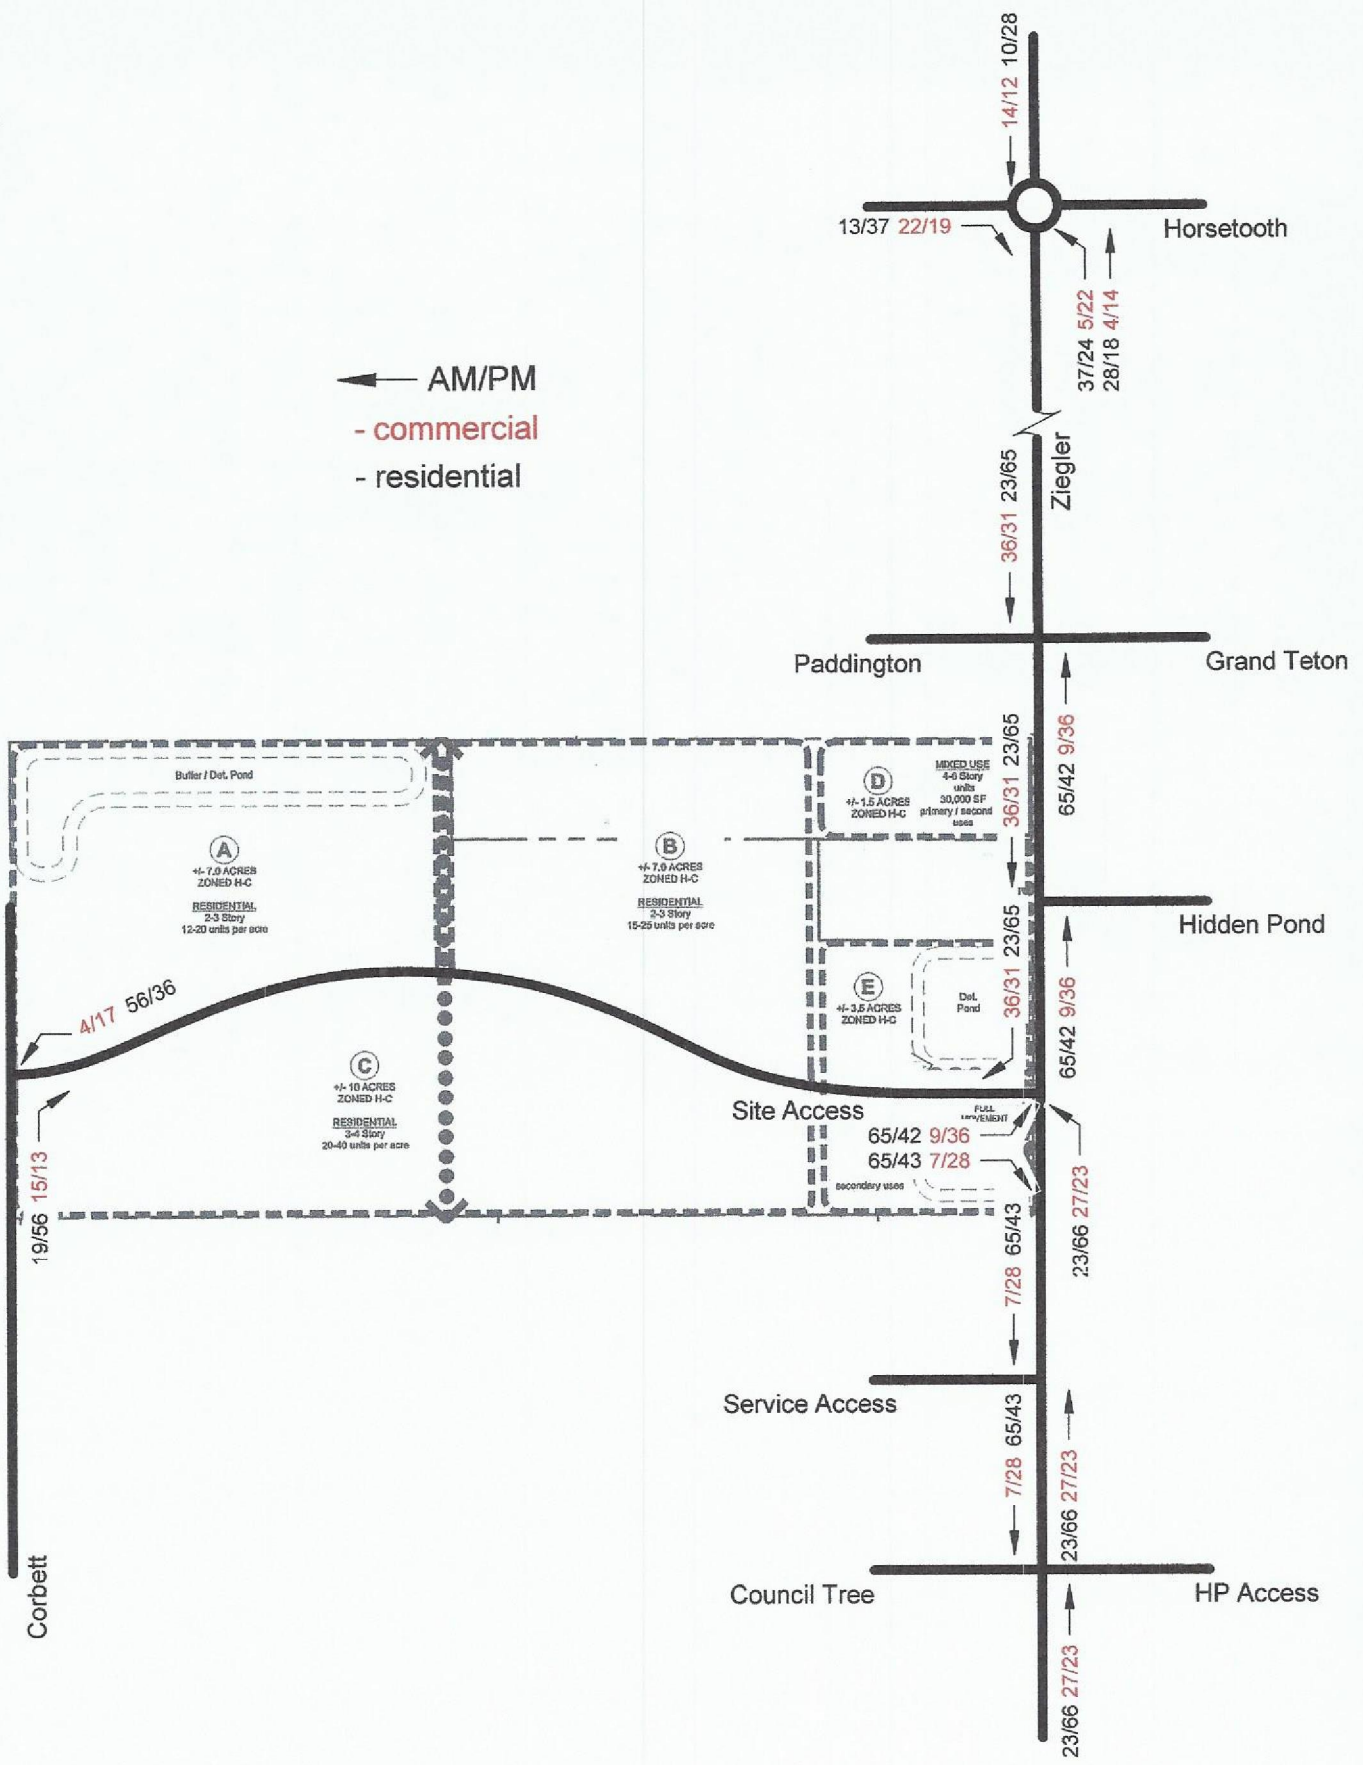

However, under Scenario 2, the delay to the minor street left turns is more significant. Under Warrant 3/Peak Hour/Category A: the total calculated stopped delay will be greater than 4 vehicle-hours, the minor street approach volume will be greater than 150 vehicles, and the total entering volume at the intersection will be greater than 800 vehicles. Therefore, the peak hour signal warrant will be met if the Ziegler-Corbett Site Access lines up with Hidden Pond Drive.

If the Scenario 2 intersection is implemented, the peak hour signal warrant will be met. It is acknowledged that the Ziegler/Paddington-Grand Teton intersection is approximately 430 feet to the north (does not meet intersection spacing criterion). Therefore, a variance will be required due to this. Based upon the operations analyses, the 95th percentile left-turn queues (northbound to Paddington Road and southbound to Hidden Pond Drive) will not conflict. The respective queues are not more than 25 feet. This segment can be striped as a continuous two-way left-turn lane. With a signal at the Ziegler/Site Access-Hidden Pond intersection, it is expected that gaps to the north/south through traffic on Ziegler Road will occur, which will improve the minor leg operation at the stop sign controlled Ziegler/Paddington-Grand Teton intersection.

The foregoing analyses indicate that moving the Ziegler-Corbett Site Access to line up with Hidden Pond Drive will meet the peak hour signal warrant. It is suggested that consideration be given to implementing Scenario 2. This should be discussed further with the City of Fort Collins staff. Do not hesitate to contact me if there are questions or if additional information is required.

**Staff Presentation
to the
Planning & Zoning
Commission
March 23, 2023**

Ziegler - Corbett ODP Major Amendment
Planning & Zoning Commission Hearing – 03.23.23

- Major Amendment to Overall Development Plan (ODP)
- Size: ~33 acres
- Zone: Harmony Corridor (HC)
- Major Amendment: Review of proposed changes to approved ODP:
 - Expand ODP by incorporating one additional property
 - Shift Ziegler Rd. access north to align with Hidden Pond Dr.
 - Install traffic signal at Ziegler/Hidden Pond intersection
 - No proposed changes to land uses or intensity of existing ODP

- Proposed Signal at Ziegler/Hidden Pond:
 - Privately-funded by project applicants; owned & maintained by the City
 - Common traffic signal with timings and activation by vehicles, bikes and pedestrians

- Traffic counts of nearby streets

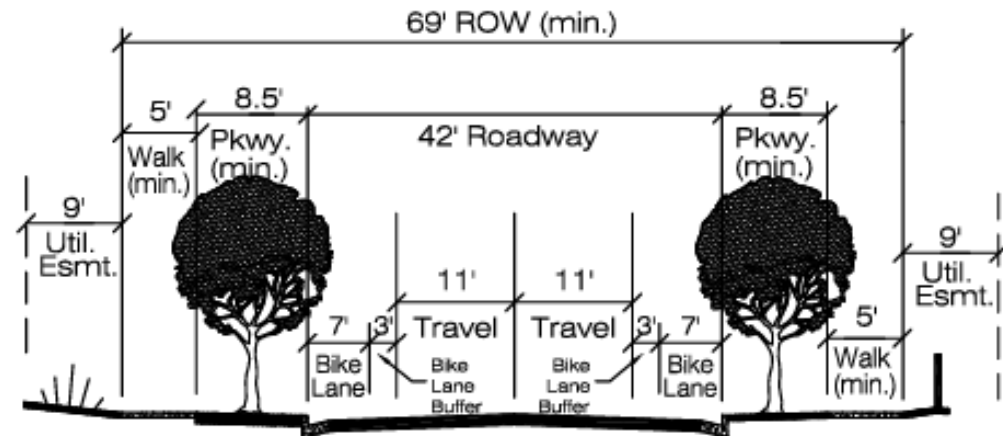

Street	Location	Data Year	24-hr Vehicle Count
Sunstone	Between Caribou & Kingsley	2021	854
Paddington	Between Kingsley & Ziegler	2018	1,177
Kingsley	Between Horsetooth & Paddington	2018	1,093
Caribou	Between Timberline & Sunstone	2022	1,691
Caribou	Between Horsetooth & Sunstone	2017	1,208

- Road classification of East-West Street thru ODP
 - Private or public local street; Master Street Plan does not identify a collector street at this location

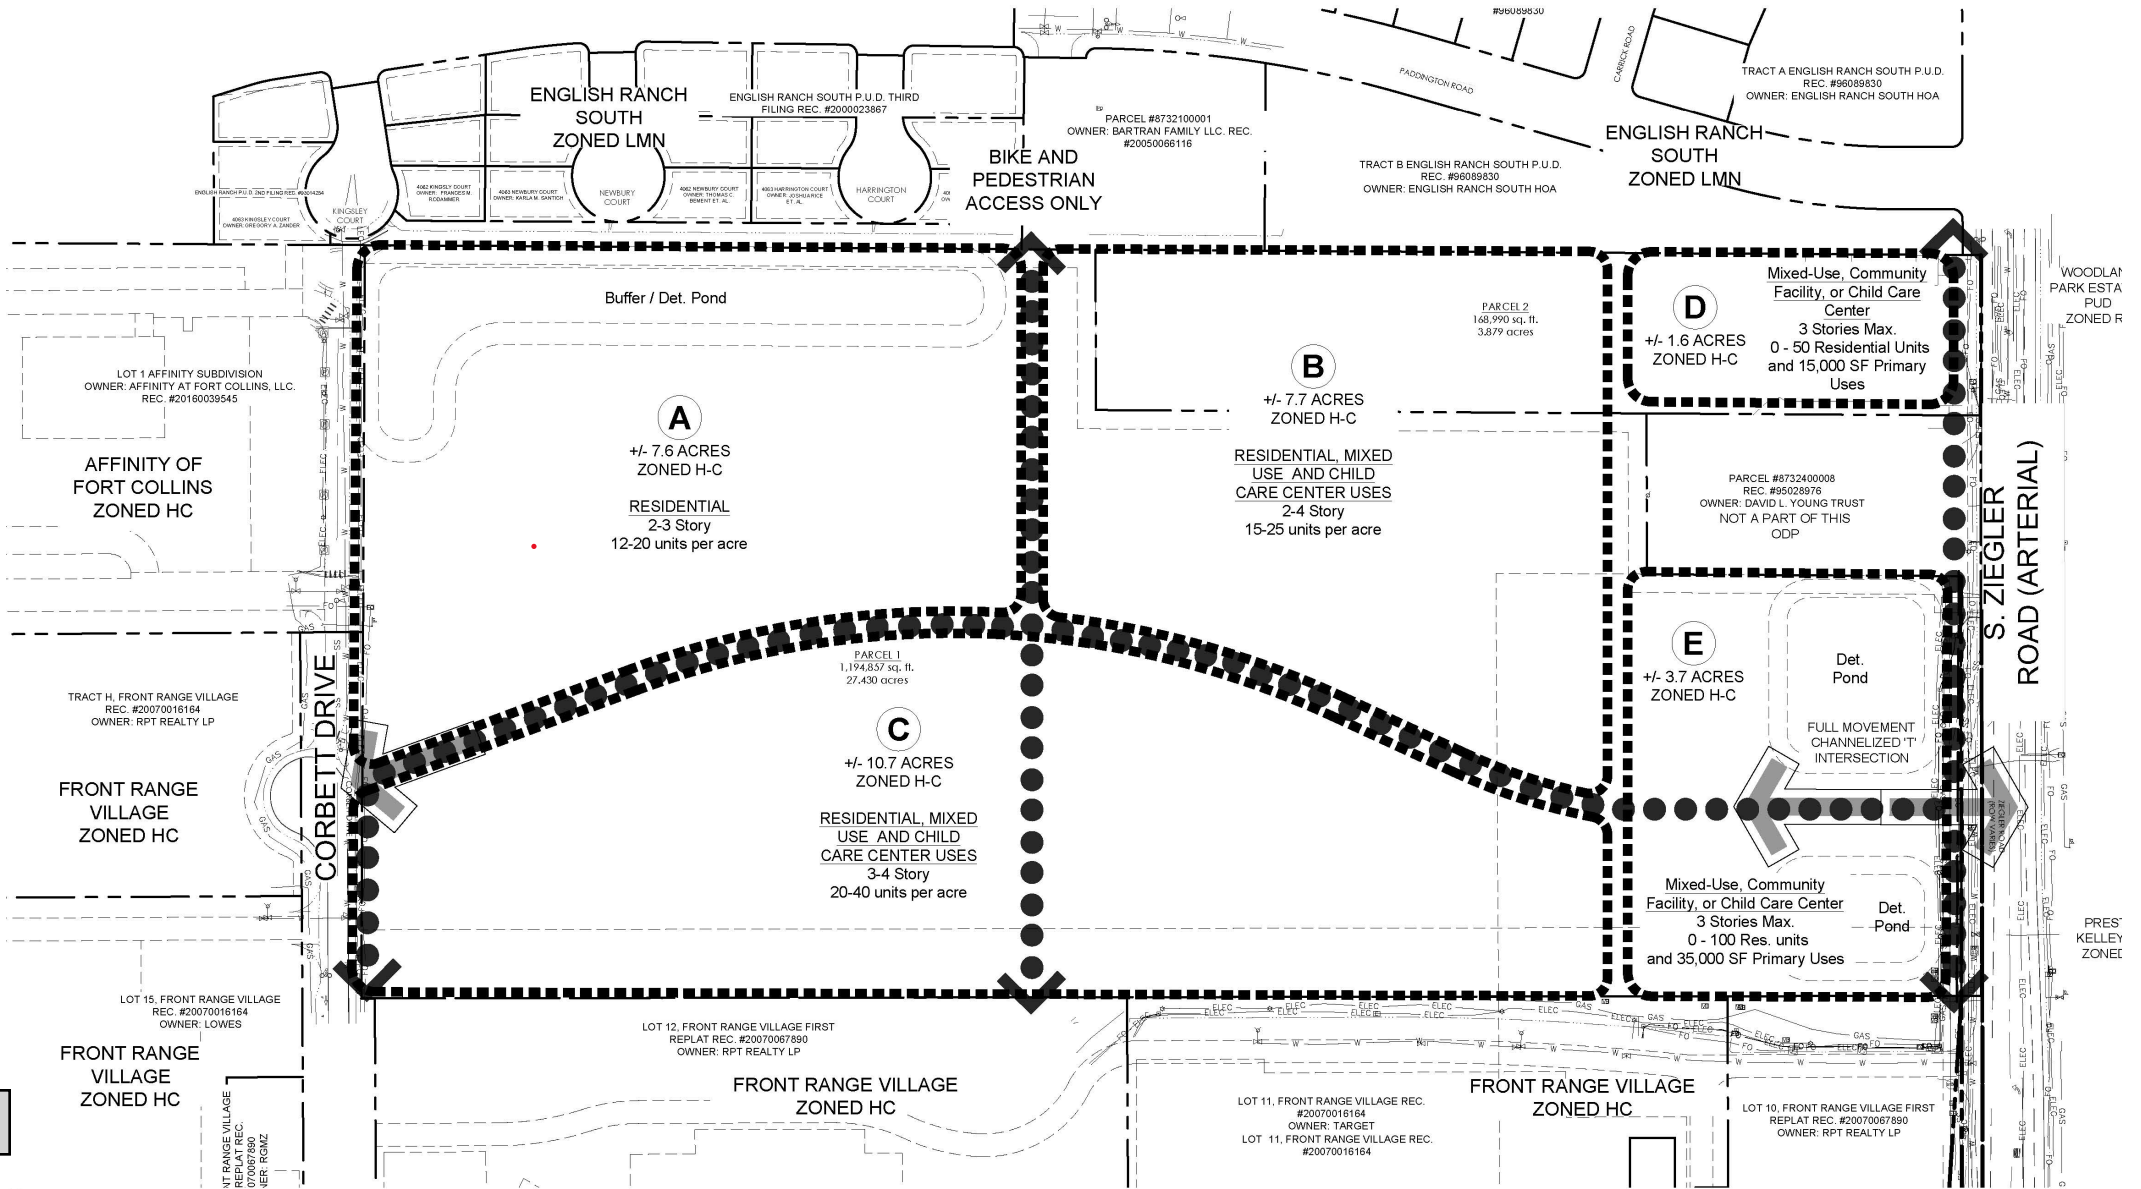

- Right-of-way (ROW) for potential street connection to Paddington Road
 - As a public street, there are multiple options for ROW width and cross-sections per Larimer County Urban Area Street Standards
 - Residential Local: 57-ft; Collector without parking: 69-ft; Collector with parking: 81-ft

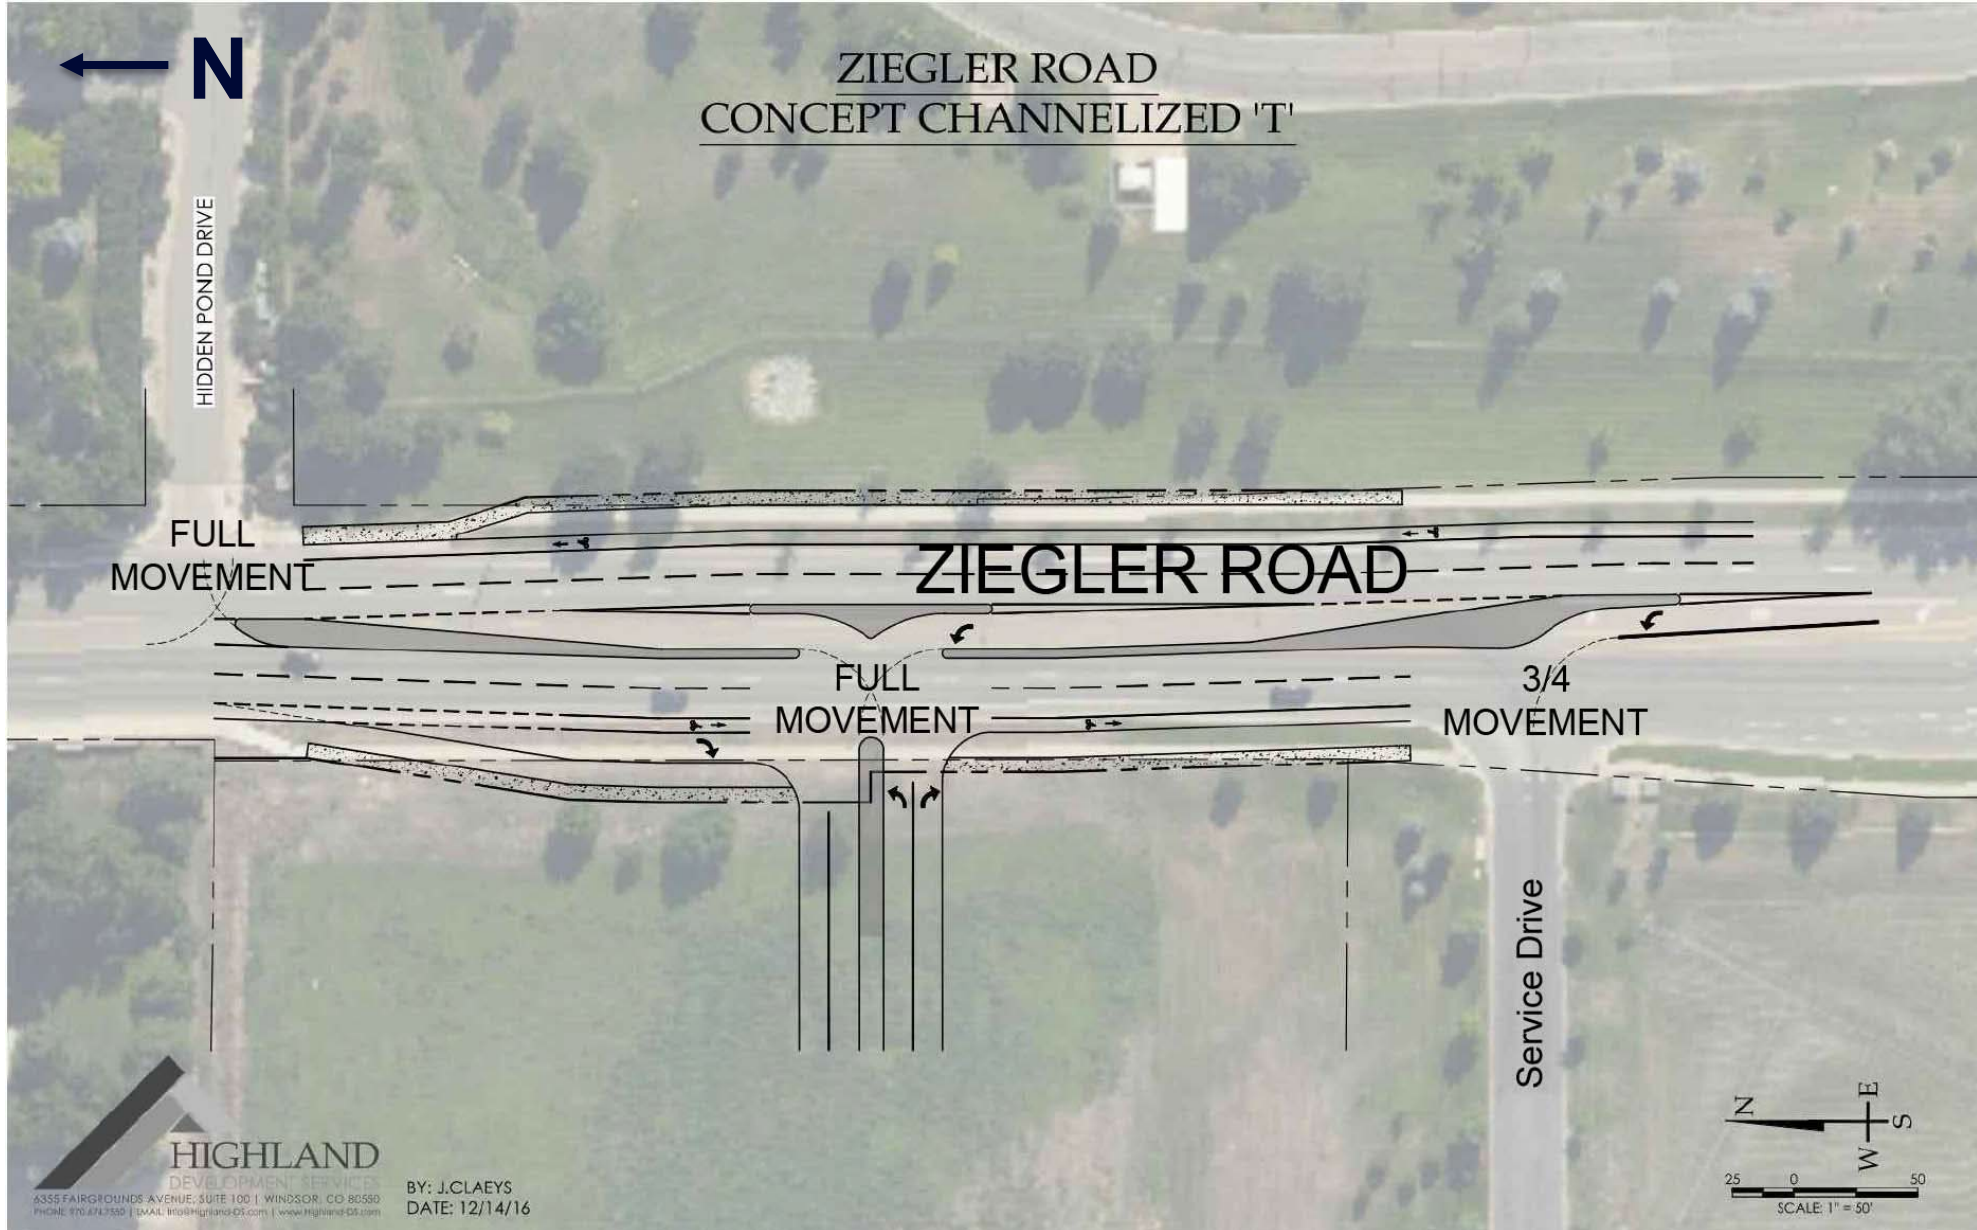

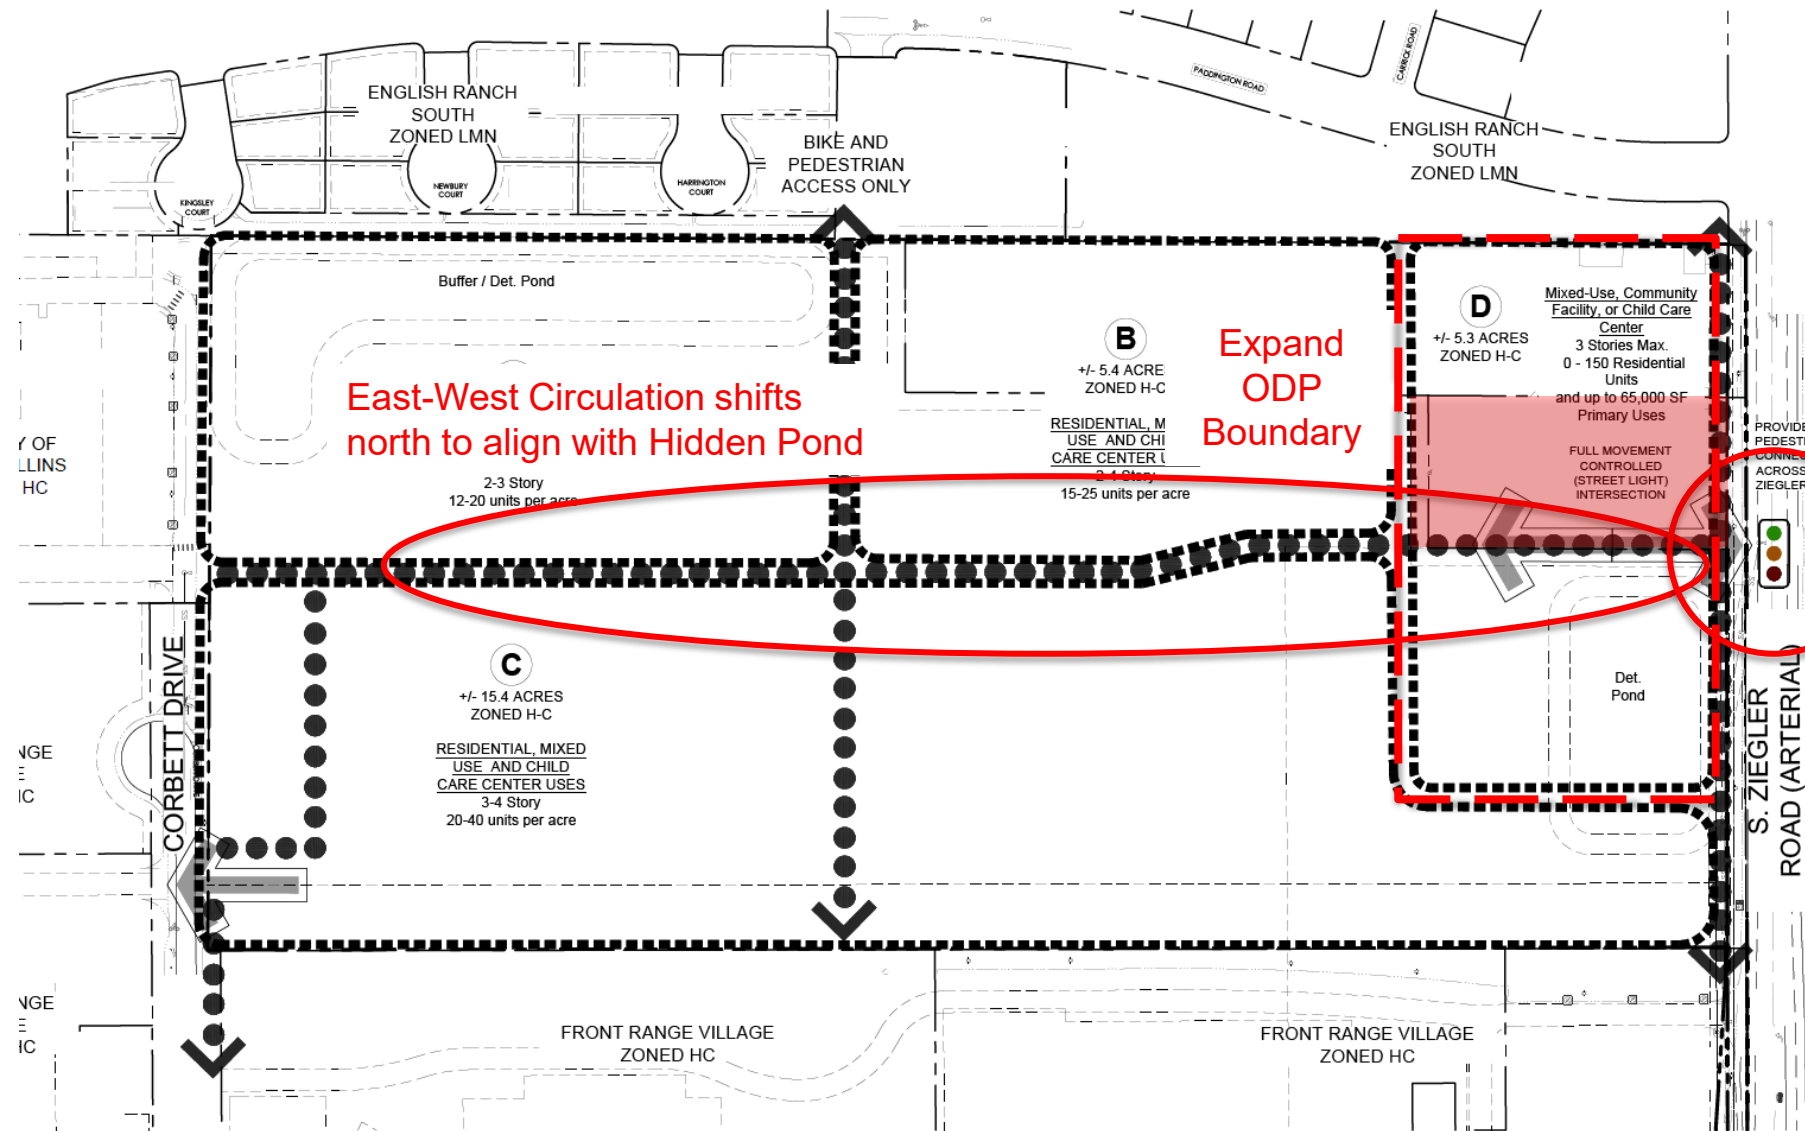

Residential Local Cross Section

Collector without Parking Cross Section

East-West Circulation shifts north to align with Hidden Pond

Expand ODP Boundary

Shape of ODP parcels shifts based on new ODP boundary. No changes in proposed land-uses or intensity

Align Ziegler access to Hidden Pond w/ signal

2.3.2(H)(1) Permitted Uses

- All proposed land uses permitted in HC District
- Previously approved modification for ratio of primary/secondary uses

2.3.2(H)(2) Density

- 400-700 units proposed (12 – 21 units/acre) complies with HC minimum density requirement (7 du/acre)

2.3.2(H)(3) & 2.3.2(H)(4) Access / Connectivity

- Alternative Compliance approved (RE: local street connection north of property converted to bike/ped only)

2.3.2(H)(5) Natural Features

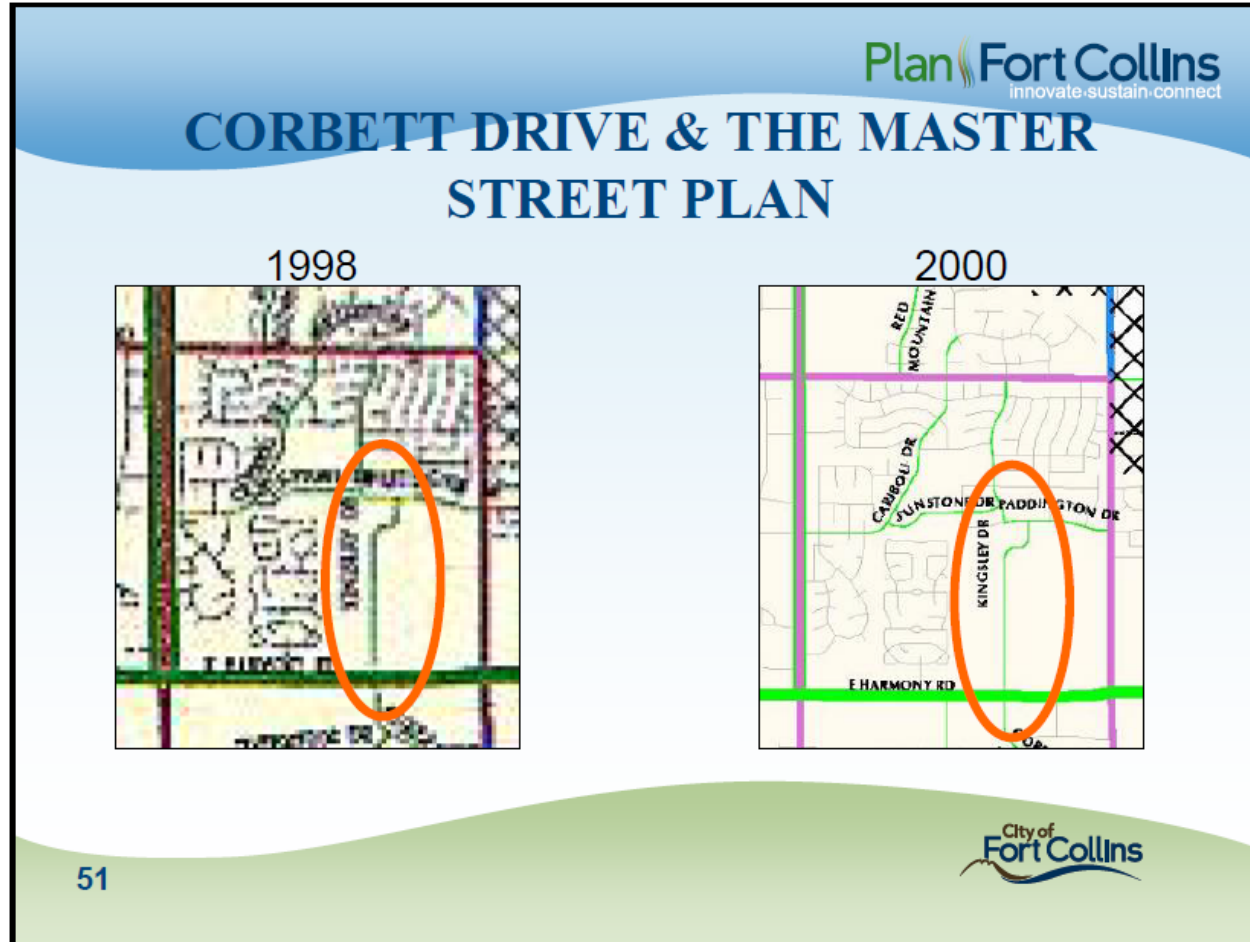

- No identified natural features; no buffer zones required

2.3.2(H)(6) Drainage

- Complies with Fox Meadows Drainage Basin Master Plan

2.3.2(H)(7) Housing Types

- At least three housing types provided. Single-family attached, multifamily, mixed-use dwellings.

2010 Master Street Plan Council Work Session

- Master Street Plan (MSP) identifies the long-range vision for the collector & arterial street network
- MSP previously identified Corbett Drive connecting from Harmony Road to English Ranch thru ODP site
- Concerns during Front Range Village development about the Corbett vehicular connection
- Council removed collector street connection during 2010 City Plan/ MSP update

Plan Fort Collins
innovate · sustain · connect

STREET CONNECTIVITY NORTH OF FRONT RANGE VILLAGE

- **Current MSP**
 - **Indirect Corbett Drive street connection**
 - **No direct connection to Kingsley**
- **Bicycle and pedestrian trail will remain**
- **If Corbett Drive removed from MSP, Land Use Code may require a non-Corbett street connection to the property north of Front Range Village**
 - **Depends on land uses and traffic impact study**
 - **May impact traffic signal locations and access points along Ziegler**

City of Fort Collins

53

Local Street Connection from ODP to Paddington Road

- Would likely generate warrants for a traffic signal at Ziegler/Paddington/Grand Teton intersection
- Generally opposed by English Ranch neighbors
- Uncertain policy guidance: recreates connectivity condition that originally led to the removal of the Corbett Dr collector street connection in 2010

Signalized Intersection at Ziegler/Paddington/Grand Teton

- Generally desired by neighbors to improve access onto Ziegler
- Ziegler Road is the only access to Woodland Park Estates neighborhood
- Signal could potentially serve more areas (English Ranch, Woodland Park, ODP/Affinity/FRV if street connection is present)
- Could fulfill Active Modes Plan goal for a bike/ped crossing along this stretch of Ziegler Rd
- Signal not warranted under current conditions without a connection to ODP site
- Paddington provides access to local school/park

Signalized Intersection at Ziegler/Hidden Pond (Major Amendment Proposal)

- Provides a signal and bike/ped connection across Ziegler (Active Modes Plan)
- Precludes future possibility of a traffic signal at the Ziegler/Paddington/Grand Teton intersection
- Does not follow typical signalized intersection location at public collector street
 - Identified as potential outcome of removing the Corbett Dr connection to English Ranch from MSP
- Accessible by ODP, Affinity, Front Range Village, Hidden Pond Estates
 - Does not address English Ranch, Woodland Park Estates concerns for Ziegler access
- Many feel this signal location prioritizes new development over traffic issues faced by existing neighborhoods
- Concern of unintended traffic on Hidden Pond Drive east of Ziegler Road
 - Private drive with no outlet
- Concern the signal will cause traffic to back-up to Paddington/Grand Teton intersection and block access

Staff considerations

- Continued opposition to a street connection between ODP site and Paddington Road that would support a signal at the Ziegler/Paddington/Grand Teton intersection
 - Existing policy guidance and public processes identified removal of this connection
- Support for a signal somewhere along this stretch of Ziegler Rd
 - Supports a near term bike/ped crossing of Ziegler Rd versus a Paddington connection which may depend on timing of future development
- ODP access aligned at Ziegler/Hidden Pond preferable to previously approved 'Channelized-T' concept

In evaluating the request for the Ziegler-Corbett ODP Major Amendment, MJA220004, Staff makes the following findings:

1. The Major Amendment complies with the applicable procedural and administrative requirements of Article 2 of the Land Use Code.
2. The Major Amendment complies with the applicable review standards for Overall Development Plans of Section 2.3.2(H)(1) through (7).

GENERAL NOTES

PARCEL SIZE: 99.5 AC (GROSS)
 EXISTING ZONING: EP (EMPLOYMENT PARK)
 MAXIMUM BLDG HEIGHT: 40 FEET (UNLESS SPECIFIC VARIANCE IS GRANTED BY THE PLANNING AND ZONING BOARD)
 PARCEL A: 59.4 ACRES
 ESTIMATED FLOOR AREA: TO BE DETERMINED
 DENSITY: UNKNOWN
 POTENTIAL USES: HOTELS/MOTELS, SIT-DOWN RESTAURANTS, NEIGHBORHOOD CONVENIENCE SHOPPING CENTERS, CHILD CARE CENTERS, ATHLETIC CLUBS, A MIX OF SINGLE FAMILY AND MULTI-FAMILY HOUSING, AND ALL OF THE POTENTIAL LANDUSES LISTED IN PARCEL B.
 PARCEL B: 44.1 ACRES
 ESTIMATED FLOOR AREA: PHASE I: 15,000 SF
 FUTURE PHASES: UNKNOWN
 POTENTIAL LAND USES: BASIC INDUSTRIAL, NON-RETAIL EMPLOYMENT, RESEARCH FACILITIES, TESTING LABS, OFFICES AND OTHER FACILITIES FOR RESEARCH AND DEVELOPMENT, INDUSTRIAL USES, HOSPITALS, CLINICS, NURSING AND PERSONAL CARE FACILITIES, REGIONAL, VOCATIONAL, BUSINESS OR PRIVATE SCHOOLS AND UNIVERSITIES, FINANCE, INSURANCE AND REAL ESTATE SERVICES, PROFESSIONAL OFFICES. ALL OF THE USES LISTED IN PARCEL A (EXCEPT RESIDENTIAL) AND OTHER SIMILAR USES AS DETERMINED BY THE PLANNING AND ZONING BOARD.
 THE POTENTIAL LAND USES LISTED ABOVE ARE IDENTIFIED IN THE HARMONY CORRIDOR PLAN AS APPROPRIATE LAND USES FOR THIS SITE.
 THE SYMBIOS LOGIC PUD WILL BE A MIXED USE DEVELOPMENT TO POTENTIALLY INCLUDE OFFICE AND MANUFACTURING FACILITIES. THE LAND USE MIX REPRESENTED ON THIS MASTER PLAN IS BASED UPON THE BEST ESTIMATE OF PROJECTED REQUIREMENTS AT THIS TIME AS CHANGES OCCUR IN THE REQUIREMENTS OF SYMBIOS LOGIC AND AS PHASING AND OTHER REQUIREMENTS ARE DETERMINED. AMENDMENTS TO THIS MASTER PLAN MAY BECOME NECESSARY.
 APPROVAL OF THIS OVERALL DEVELOPMENT PLAN BY THE CITY OF FORT COLLINS DOES NOT CONSTITUTE FINAL APPROVAL OF THESE LAND USES. RATHER, ANY FUTURE LAND USES MUST BE APPROVED ACCORDING TO THE PROCEDURES, PROCESSES, AND CRITERIA OF THE PLANNED UNIT DEVELOPMENT REGULATIONS AND OTHER RELEVANT CITY POLICIES AND STANDARDS.
 OPEN SPACE AREAS WILL BE MAINTAINED BY THE PROPERTY OWNER.
 DRAINAGE IMPROVEMENTS WILL BE DESIGNED IN ACCORDANCE WITH THE CITY'S ADOPTED BASIN STUDY FOR THE AREA.
 ADEQUATE LANDSCAPE BUFFERING WILL BE PROVIDED ALONG NORTH PROPERTY LINE IF LANDUSES ARE NOT SIMILAR.

LAND USE TABLE

PARCEL	LAND USE	GROSS AREA (ACRES)	PERCENT SITE AREA (%)	FLOOR AREA (SQ FT)

B	MIXED-USE (REFER TO POTENTIAL USES LISTED ABOVE)	44.1	44.3%	TBD
TOTALS		99.5	100.00%	TBD

LEGAL DESCRIPTION

A tract of land located in the Southeast Quarter of Section 32, Township 7 North, Range 68 West of the 6th Principal Meridian, City of Fort Collins, County of Larimer, State of Colorado, being more particularly described as follows:
 Considering the South line of the Southeast Quarter of said Section 32 as bearing North 89° 22' 00" West from a 2" brass cap at the Southeast corner of said Section 32 to a 1" pipe in a range box at the South Quarter corner of said Section 32 and with all bearings contained herein relative thereto:
 Commencing at the Southeast corner of said Section 32; thence along the East line of said Section 32, North 00° 15' 00" East, 110.25 feet; thence departing said East line, North 89° 44' 50" West, 26.06 feet to a point on the North line of Harmony Road (Colorado Highway No. 68) and the POINT OF BEGINNING; thence along said North line the following seven courses and distances, South 42° 09' 12" West, 34.02 feet; thence, South 84° 04' 12" West, 232.30 feet; thence, South 87° 45' 12" West, 265.60 feet; thence, South 89° 49' 12" West, 143.10 feet; thence, North 88° 15' 33" West, 163.00 feet; thence, North 89° 22' 48" West, 607.00 feet; thence, North 89° 15' 48" West, 22.24 feet; thence, North 00° 37' 00" East, 262.40 feet to a point on the North line of the Southeast Quarter of said Section 32; thence along said North line, South 89° 17' 18" East, 797.24 feet; thence departing said North line, South 00° 15' 00" West, 175.00 feet; thence, South 89° 17' 18" East, 600.69 feet; thence, South 00° 15' 00" West, 175.00 feet; thence, South 89° 17' 18" East, 345.00 feet to a point on the East line of County Road No. 9; thence along said East line, South 00° 15' 00" West, 447.84 feet to a curve concave to the West, having a central angle of 80° 58' 50" and a radius of 7289.44 feet and the chord of which bears South 00° 44' 38" West, 133.08 feet; thence along the arc of said curve 130.08 feet; thence, South 01° 14' 00" West, 219.14 feet to a curve concave to the East, having a central angle of 90° 28' 50" and a radius of 7688.44 feet and the chord of which bears South 00° 44' 38" West, 131.79 feet; thence along the arc of said curve 131.79 feet; thence, South 00° 15' 00" West, 1260.62 feet to the Point of Beginning.

The above described tract of land contains 99.540 acres and is subject to all assessments and rights-of-way now on record or existing.

OWNERSHIP CERTIFICATION

THE UNDERSIGNED DOES HEREBY CERTIFY THAT I/WE ARE THE LAWFUL OWNERS OF REAL PROPERTY DESCRIBED ON THIS SITE PLAN AND DO HEREBY CERTIFY THAT I/WE ACCEPT THE CONDITIONS AND RESTRICTIONS SET FORTH ON SAID OVERALL DEVELOPMENT PLAN.

Harmony Corridor Plan

Vision for mixed-use corridor with a strong employment base.

Land Use Policy Plan:

...promotes the maximum utilization of land within the corridor, higher density development, phased growth, a mix of uses and concentrated building activity.

The availability of public facilities, including streets, sewer, water, natural gas, and electricity, establishes the corridor as a preferred location for intense urban activity...

- (a) Maximize the use of existing services and facilities (streets and utilities).
- (b) Promote the development of the corridor as a high quality, self-contained and compact business center.
- (c) Provide for the location of industry and business in the city by identifying prime locations for such uses.
- (d) Provide shopping and service areas convenient to both residents and employees of the corridor.
- (e) Provide for a variety of housing types.
- (f) Preserve and protect existing residential neighborhoods from intrusive or disruptive development.

- **Mixed-Use ODP:**
 - 400 – 700 dwelling units (min. 3 housing types)
 - Childcare Center
 - 50,000sf Office/Community Facility space
- **Approved Modifications of Standards & Alternative Compliance**
 - 4.26(D)(2) Secondary Uses (*Ratio of Primary & Secondary Uses*)
 - 4.26(D)(3)(a) Dimensional Standards (*Residential Building Height*)
 - Section 3.6.3 Street Pattern & Connectivity
 - No mid-point vehicular access to north; bike/ped access only
- **Condition of Approval – ODP shall demonstrate compliance with City Plan policies:**

Policy LIV 3.5 – Distinctive Design

Require the adaptation of standardized corporate architecture to reflect local values and ensure that the community’s appearance remains unique. Development should not consist solely of repetitive design that may be found in other communities.

Policy LIV 3.6 – Context-Sensitive Development

Ensure that all development contributes to the positive character of the surrounding area. Building materials, architectural details, color range, building massing, and relationships to streets and sidewalks should be tailored to the surrounding area.

APPROVED MODIFICATIONS

THE FOLLOWING CODE SECTIONS WERE MODIFIED AND APPROVED AS FOLLOWS AND NOTED ON THIS ODP MAP.

1. 4.26(D)(2) FOR 100% SECONDARY USES
2. 4.26(D)(3)(A) TO PERMIT A 4TH STORY FOR RESIDENTIAL BUILDINGS ON PARCELS B & C.

CONDITIONS OF APPROVAL

THE ODP SHALL DEMONSTRATE COMPLIANCE WITH THE FOLLOWING CITY PLAN POLICIES:

POLICY LIV 3.5 - DISTINCTIVE DESIGN REQUIRE THE ADAPTATION OF STANDARDIZED CORPORATE ARCHITECTURE TO REFLECT LOCAL VALUES AND ENSURE THAT THE COMMUNITY'S APPEARANCE REMAINS UNIQUE. DEVELOPMENT SHOULD NOT CONSIST SOLELY OF REPETITIVE DESIGN THAT MAY BE FOUND IN OTHER COMMUNITIES.

POLICY LIV 3.6 - CONTEXT-SENSITIVE DEVELOPMENT ENSURE THAT ALL DEVELOPMENT CONTRIBUTES TO THE POSITIVE CHARACTER OF THE SURROUNDING AREA. BUILDING MATERIALS, ARCHITECTURAL DETAILS, COLOR RANGE, BUILDING MASSING, AND RELATIONSHIPS TO STREETS AND SIDEWALKS SHOULD BE TAILORED TO THE SURROUNDING AREA.

General Notes:

1. ZIEGLER - CORBETT OVERALL DEVELOPMENT PLAN WILL BE A RESIDENTIAL AND MIXED-USE DEVELOPMENT AS PART OF THE HARMONY CORRIDOR (H-C) ZONE DISTRICT. THE PROPOSED DEVELOPMENT WILL HAVE A MIX OF HOUSING TYPES AS REQUIRED/ALLOWED PER THE UNDERLYING ZONE DISTRICT AND ANY APPROVED MODIFICATIONS.
2. THE PROPOSED LAND USES AND DENSITIES SHOWN ON THIS ODP ARE APPROXIMATE. ANY ADDITIONAL LAND USES NOT ALLOWED IN THE APPLICABLE ZONE DISTRICTS MUST BE APPROVED ACCORDING TO THE CRITERIA AS SET FORTH BY THE CITY OF FORT COLLINS
3. MASTER UTILITY AND DRAINAGE PLANS HAVE BEEN SUBMITTED WITH THIS ODP.
4. TWO POINTS OF FIRE ACCESS HAVE BEEN PLANNED TO SERVE ALL AREAS OF THE PROJECT. FIRE HYDRANTS WILL BE PROVIDED AS REQUIRED BY Poudre FIRE AUTHORITY.
5. ALL PUBLIC STREETS WILL BE DESIGNED TO THE FORT COLLINS LARIMER COUNTY URBAN AREA STREET STANDARDS. THE INTERNAL ACCESS POINTS SHOWN ON THIS ODP ARE APPROXIMATE LOCATIONS ONLY. PRECISE LOCATIONS OF ACCESS POINTS WILL BE IDENTIFIED AT THE TIME OF PROJECT DEVELOPMENT PLANS (PDP).
6. THE NETWORK OF PUBLIC STREETS OR PRIVATE DRIVES AND ASSOCIATED PEDESTRIAN WALKS TO BE DETERMINED DURING THE PDP PROCESS. THIS DEVELOPMENT'S CONTRIBUTIONS TO PEDESTRIAN IMPROVEMENTS ALONG ZIEGLER ROAD AND PADDINGTON ROAD WILL BE DETERMINED BASED ON THE TRAFFIC STUDY ASSOCIATED WITH FUTURE PDP.
7. ACCESS POINTS SHOWN ON THIS ODP ARE APPROXIMATE. EXACT LOCATIONS TO BE DETERMINED DURING THE PDP PROCESS.
8. THE ACTUAL ANGLE OF THE ROAD CONNECTION FROM CORBETT DR. TO THE PROPERTY WILL BE DETERMINED AT THE TIME OF PROJECT DEVELOPMENT PLANS (PDP).
9. THE SITE IS GREATER THAN 30 ACRES IN SIZE, WHICH WILL REQUIRE A MINIMUM OF THREE HOUSING TYPES. A MIXTURE OF SINGLE FAMILY ATTACHED, MULTI-FAMILY, WORK/LIVE AND MIXED USE UNITS WILL BE APPLIED OVER THE ENTIRE ODP, AND FINALIZED AT THE PROJECT DEVELOPMENT PLAN PHASE.
10. A TOTAL OF +/- 1.5 ACRE PRIVATE PARK(S) (NOT TO BE OWNED OR MAINTAINED BY THE CITY OF FORT COLLINS) WILL BE PROVIDED AND DESIGNED AS PART OF A FUTURE PDP PROCESS
11. EXISTING TREES IF PRESENT ON THE SITE WILL BE PRESERVED TO THE EXTENT PRACTICAL.
12. A CHILD CARE CENTER WILL BE PROVIDED AS PART OF THE DEVELOPMENT IN EITHER OF THE PARCELS INDICATED.
13. COMMUNITY FACILITY WILL BE ALLOWED IN PARCELS 'D' AND 'E' AND WILL TAKE PRIORITY OVER OTHER USES IF OFFERED.
14. PARCEL B WILL BE ALLOWED A 4TH FLOOR FOR ROOF TOP DECK AND AMENITIES AND RESIDENTIAL LOFT UNITS. PARCEL C WILL BE ALLOWED A 4TH FLOOR FOR FULL RESIDENTIAL UNITS.
15. PARCEL B - 4TH STORIES SHALL BE SET BACK A MINIMUM OF 10-FT ON ALL SIDES AND THE 4TH STORY FLOOR AREA SHALL NOT EXCEED TWO-THIRDS (2/3) OF THE FLOOR AREA OF THE FLOOR BELOW, BUT NOT INCLUDING OPEN BALCONIES OR ROOFTOP PATIOS.
16. PARCEL C - 4TH STORIES OF RESIDENTIAL BUILDINGS SHALL BE SET BACK AN AVERAGE OF 10-FT ON AT LEAST TWO SIDES FROM THE FLOOR BELOW.
17. ALL RESIDENTIAL UNITS WILL BE ENHANCED WITH SOLAR PANELS.
18. TOWNHOME AND CONDOMINIUM UNITS WILL BE EITHER LEED GOLD OR ZERO ENERGY READY CERTIFIED.
19. 4 - 12 LIVE / WORK UNITS WILL BE PROPOSED AS A PART OF THE OVERALL DEVELOPMENT. THESE UNITS WILL INCLUDE STREET FACING COMMERCIAL STOREFRONT ACCESS.

- Standards require 75% primary uses in most areas of the corridor
- Harmony Corridor Plan amended by Council in early 2000s to support regional shopping center south of ODP site

Harmony Activity Centers

 Basic Industrial and Non-Retail Activity Center
 Mixed Use Activity Center

Potential Shopping Center Locations Outside of Activity Center

 Neighborhood Convenience Center

NORTH

LUC Requirement	Modification Request	Proposed Primary Uses (Gross Land Area)	Proposed Primary Uses (Square Footage)
Minimum 75% primary uses	0% primary uses (100% secondary uses)	17% (5.3 of 31.3 acres)	50,000 square feet (Equivalent intensity to 10 acres of primary employment land, or approximately 33% of ODP land area)

- Staff evaluation based based on 100% secondary use request
 - Flexibility to permit either office use OR a combination of office & community facility space in Parcels D & E

- No other secondary uses permitted within Parcels D & E

Staff Evaluation

- Meets criterion 2.8.2(H)(2) & 2.8.2(H)(3) due to existing hardship or practical difficulties and providing substantial benefits

Harmony Corridor Plan

“the focus of most development activity, especially commercial, should be at the major street intersections...”

City Plan Employment Land Demand & Inventory Analysis

- Identified access and visibility as key characteristics for viability of employment and industrial land development
 - ODP site features reduced visibility and access compared to other key Harmony Corridor properties
- Inventory of employment land exceeds anticipated demand through 2040. Harmony Corridor specific recommendation:

“Certain remaining parcels along Harmony Road that are further from Harmony Road and behind larger commercial and employment uses could be considered for designation as residential uses. Specifically, the City should strive for higher density residential uses in these areas given their proximity to employment and potential enhanced transit routes”

Providing Substantial Benefits

- ODP will provide on-site childcare
 - Adopted as 2021-2023 Council priority. Policy goals for neighborhood livability and economic health in City Plan

- Advances community energy & climate action goals
 - Residential buildings to feature solar panels
 - Townhome & condominium structures LEED gold certified

- Proposed 1.5-acre park within the development, substantially exceeding HC district standards for park/gathering space (10,000 sf minimum requirement)

Code Requirement

- HC district permits up to 6-story building height for primary uses and up to 3-story building height for residential

Modification Request:

- 4-story residential building height on Parcels B & C

Staff Evaluation:

- Meets criterion 2.8.2(H)(1) as the building heights across the ODP meet the intent of the Harmony Corridor Plan in an equal or better way

Balancing Harmony Corridor policy goals and land use guidance

- Corridor suitable for more intensive development
- Appropriate transitions to residential neighborhoods

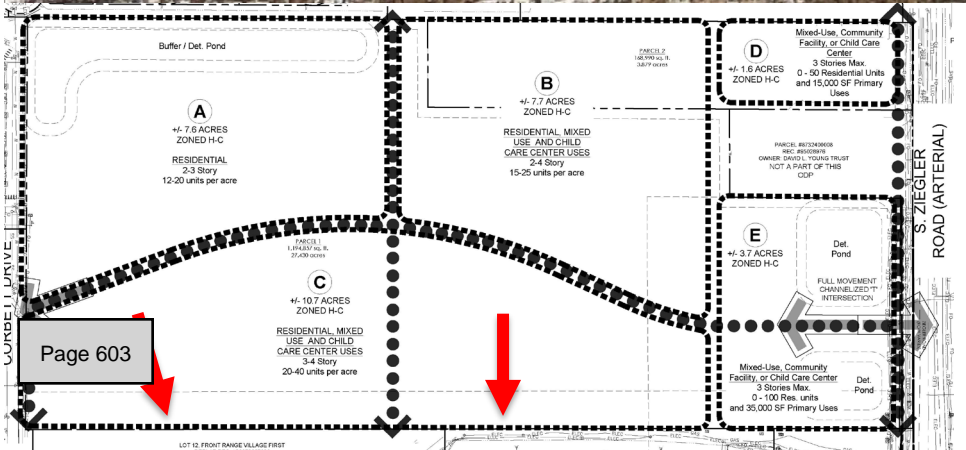

The LAND USE POLILCIES PLAN promotes the maximum utilization of land within the corridor, higher density development, phased growth, a mix of uses and concentrated building activity. The availability of public facilities, including streets, sewer, water, natural gas, and electricity, establishes the corridor as a preferred location for intense urban activity including a mix of residential, industrial, commercial and recreational uses.

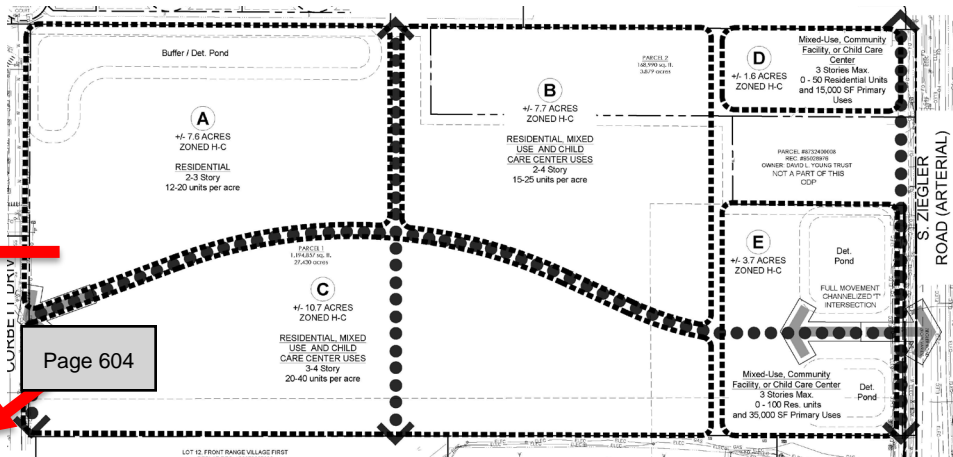

*Land Use Plan Introduction – “Issues”
The issues surrounding future land use in the Harmony Corridor appear to focus on the need to manage development to achieve a level of quality consistent with the economic, environmental, visual and other “quality of life” objectives of the community; while guiding the corridor to become a major business center in northern Colorado that attracts desirable industries and businesses and, **at the same time, provides effective transitions from residential neighborhoods.***

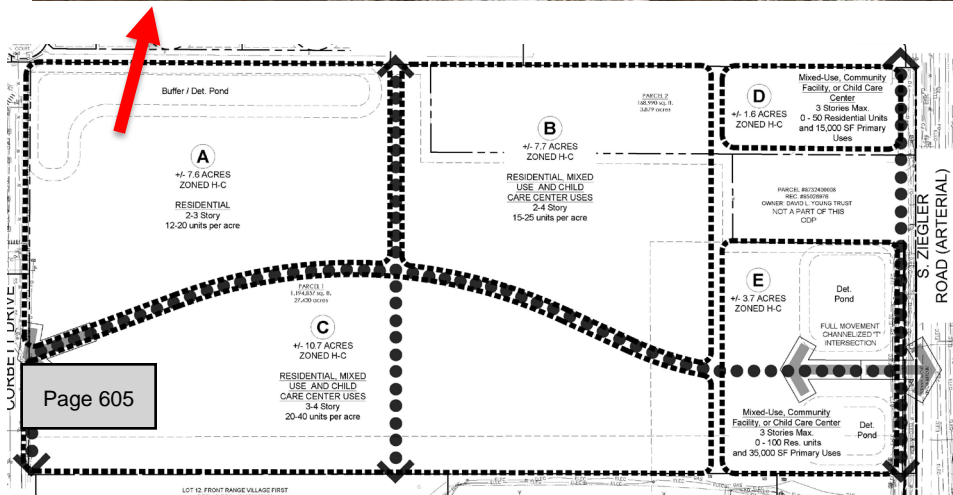

Proposed Modification – 4.26(D)(3)(a) Residential Building Height

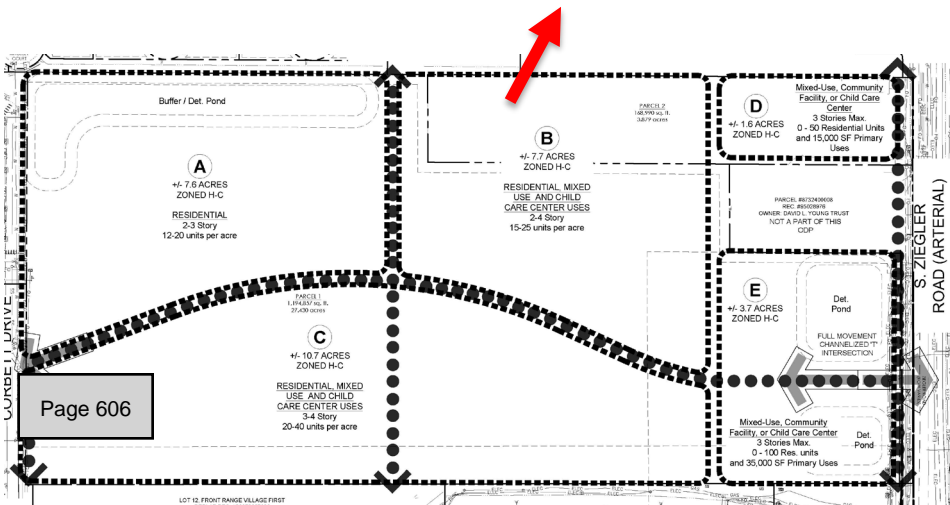

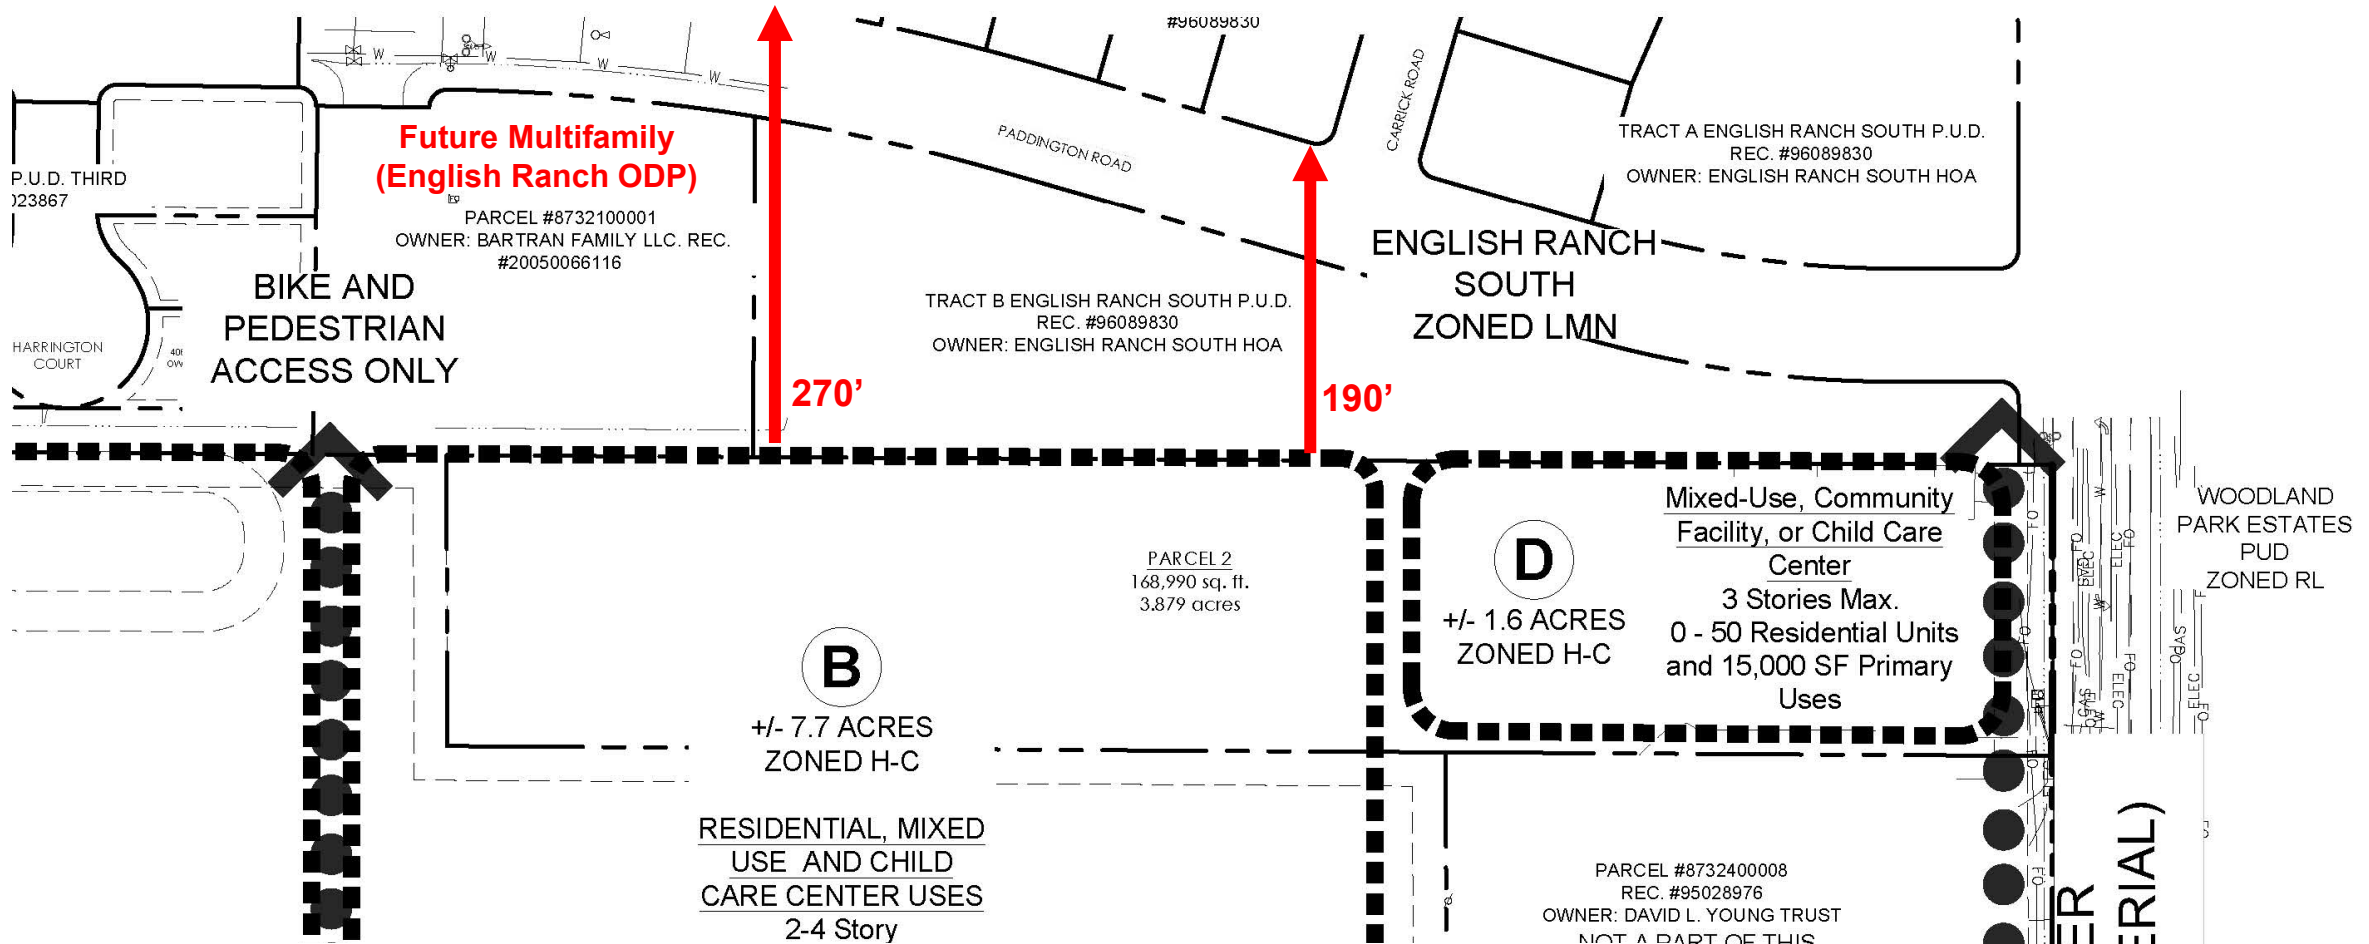

ODP Note:
PARCEL C - 4TH STORIES OF RESIDENTIAL BUILDINGS SHALL BE SET BACK AN AVERAGE OF 10-FT ON AT LEAST TWO SIDES FROM THE FLOOR BELOW.

ODP Note:

PARCEL B - 4TH STORIES SHALL BE SET BACK A MINIMUM OF 10-FT ON ALL SIDES AND THE 4TH FLOOR FLOOR AREA SHALL NOT EXCEED TWO-THIRDS (2/3) OF THE FLOOR AREA OF THE FLOOR BELOW, BUT NOT INCLUDING OPEN BALCONIES OR ROOFTOP PATIOS.

Code Requirement

3.6.3(E) Distribution of Local Traffic to Multiple Arterial Streets.

*“All development plans shall contribute to developing a local street system that will allow access to and from the proposed development, as well as access to all existing and future development within the same section mile as the proposed development, **from at least three (3) arterial streets upon development of remaining parcels within the section mile**, unless rendered infeasible by unusual topographic features, existing development or a natural area or feature. The local street system shall allow multi-modal access and multiple routes from each development to existing or planned neighborhood centers, parks and schools, without requiring the use of arterial streets, unless rendered infeasible by unusual topographic features, existing development or a natural area or feature.*”

3.6.3(F) Utilization and Provision of Sub-Arterial Street Connections to and From Adjacent Developments and Developable Parcels.

*“All development plans shall **incorporate and continue all sub-arterial streets stubbed to the boundary of the development plan by previously approved development plans or existing development**. All development plans shall provide for future public street connections to adjacent developable parcels by **providing a local street connection spaced at intervals not to exceed six hundred sixty (660) feet along each development plan boundary that abuts potentially developable or redevelopable land.**”*

Staff Evaluation

- No reduction in access / connection for bikes or pedestrians
 - ODP site features three north-south bike/ped access points
- Amenities to the north include English Ranch Park, Linton Elementary School
 - Located half-mile walking distance from center of ODP site
 - City policies / PSD walksheds encourage non-vehicular travel at these distances
 - ODP providing onsite park / gathering space; lower school enrollment demand
- TIS modeled connection / no connection. Both scenarios do not present level of service issues
- No connection requires trips to access an arterial; but detour is limited in distance
- No connection requested by neighborhood; aligns with previous policy decision made by City Council in 2010 to remove connection from MSP

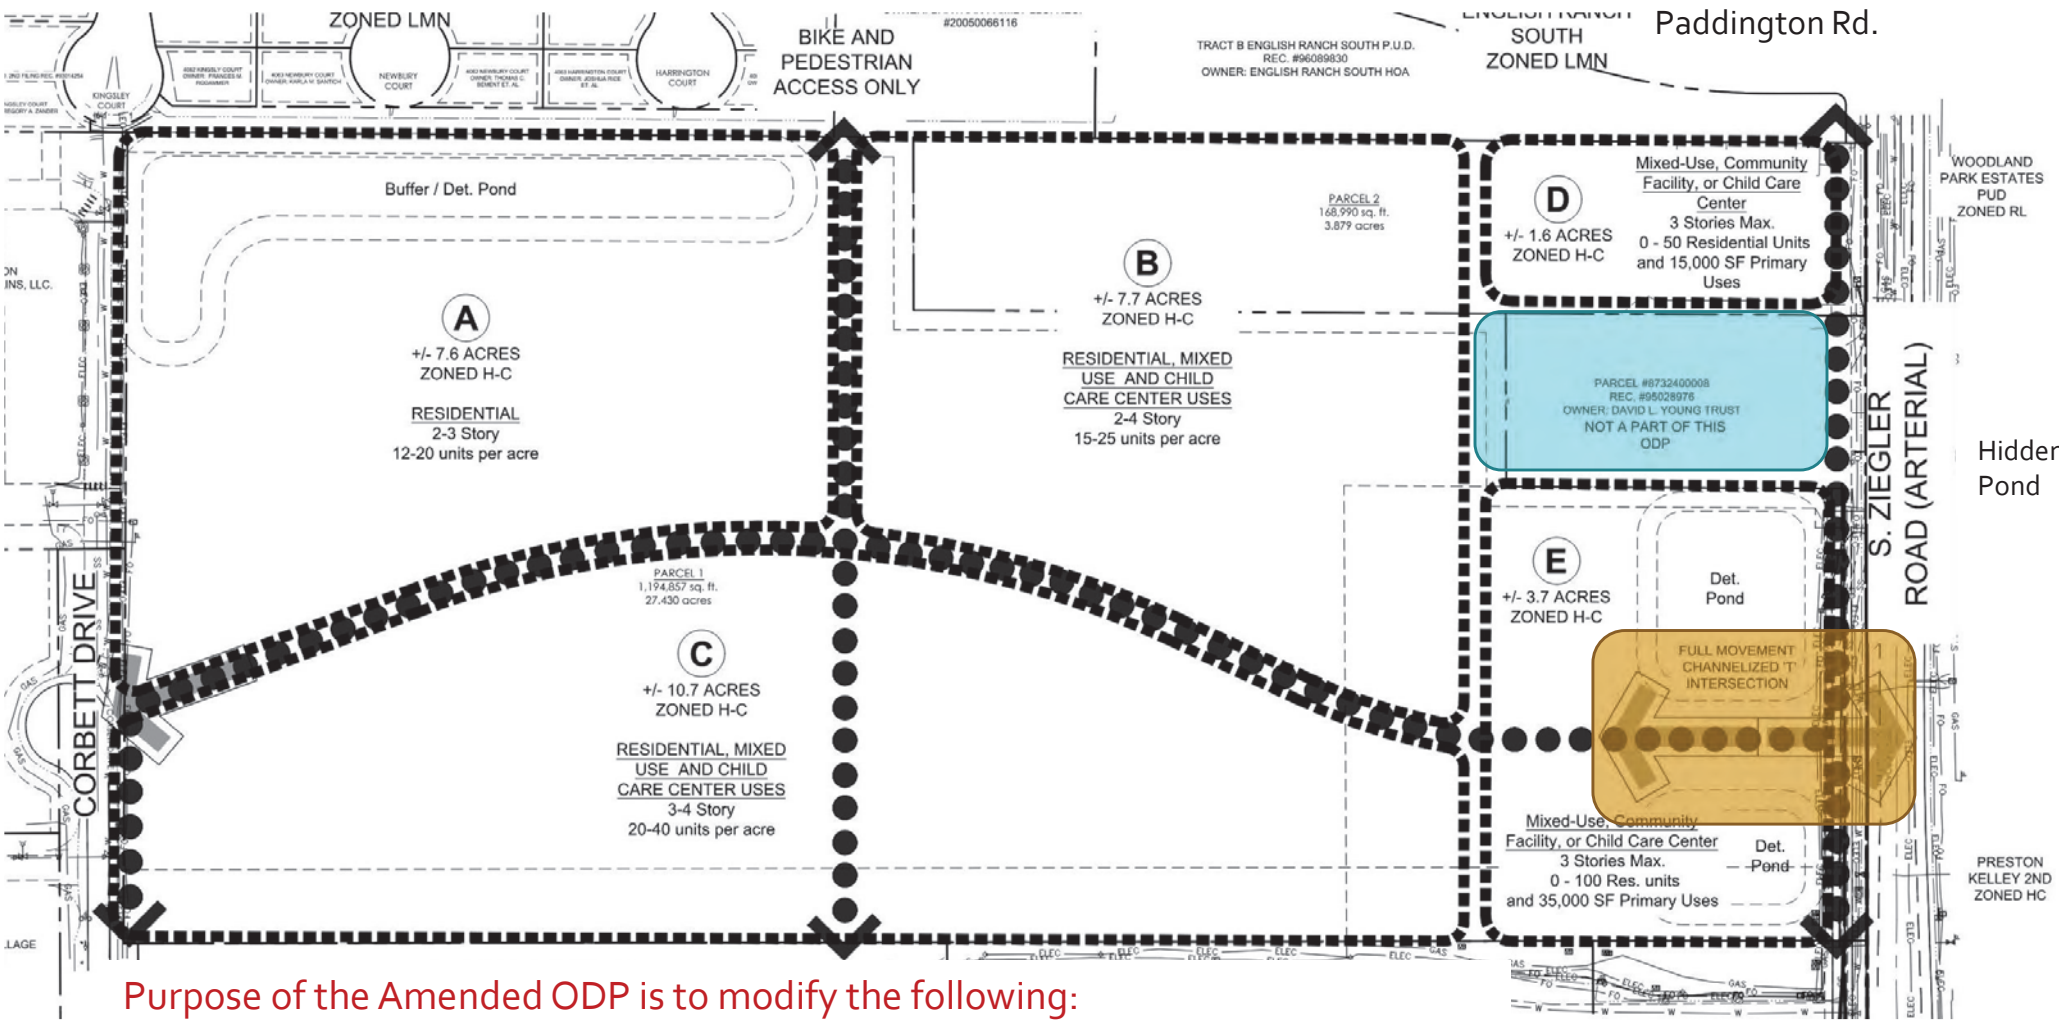

**Applicant Presentation
to
Planning & Zoning
Commission
March 23, 2023**

Ziegler - Corbett Amended ODP Planning and Zoning March 23, 2023

Ziegler - Corbett Amended ODP

Item 22.

Purpose of the Amended ODP is to modify the following:

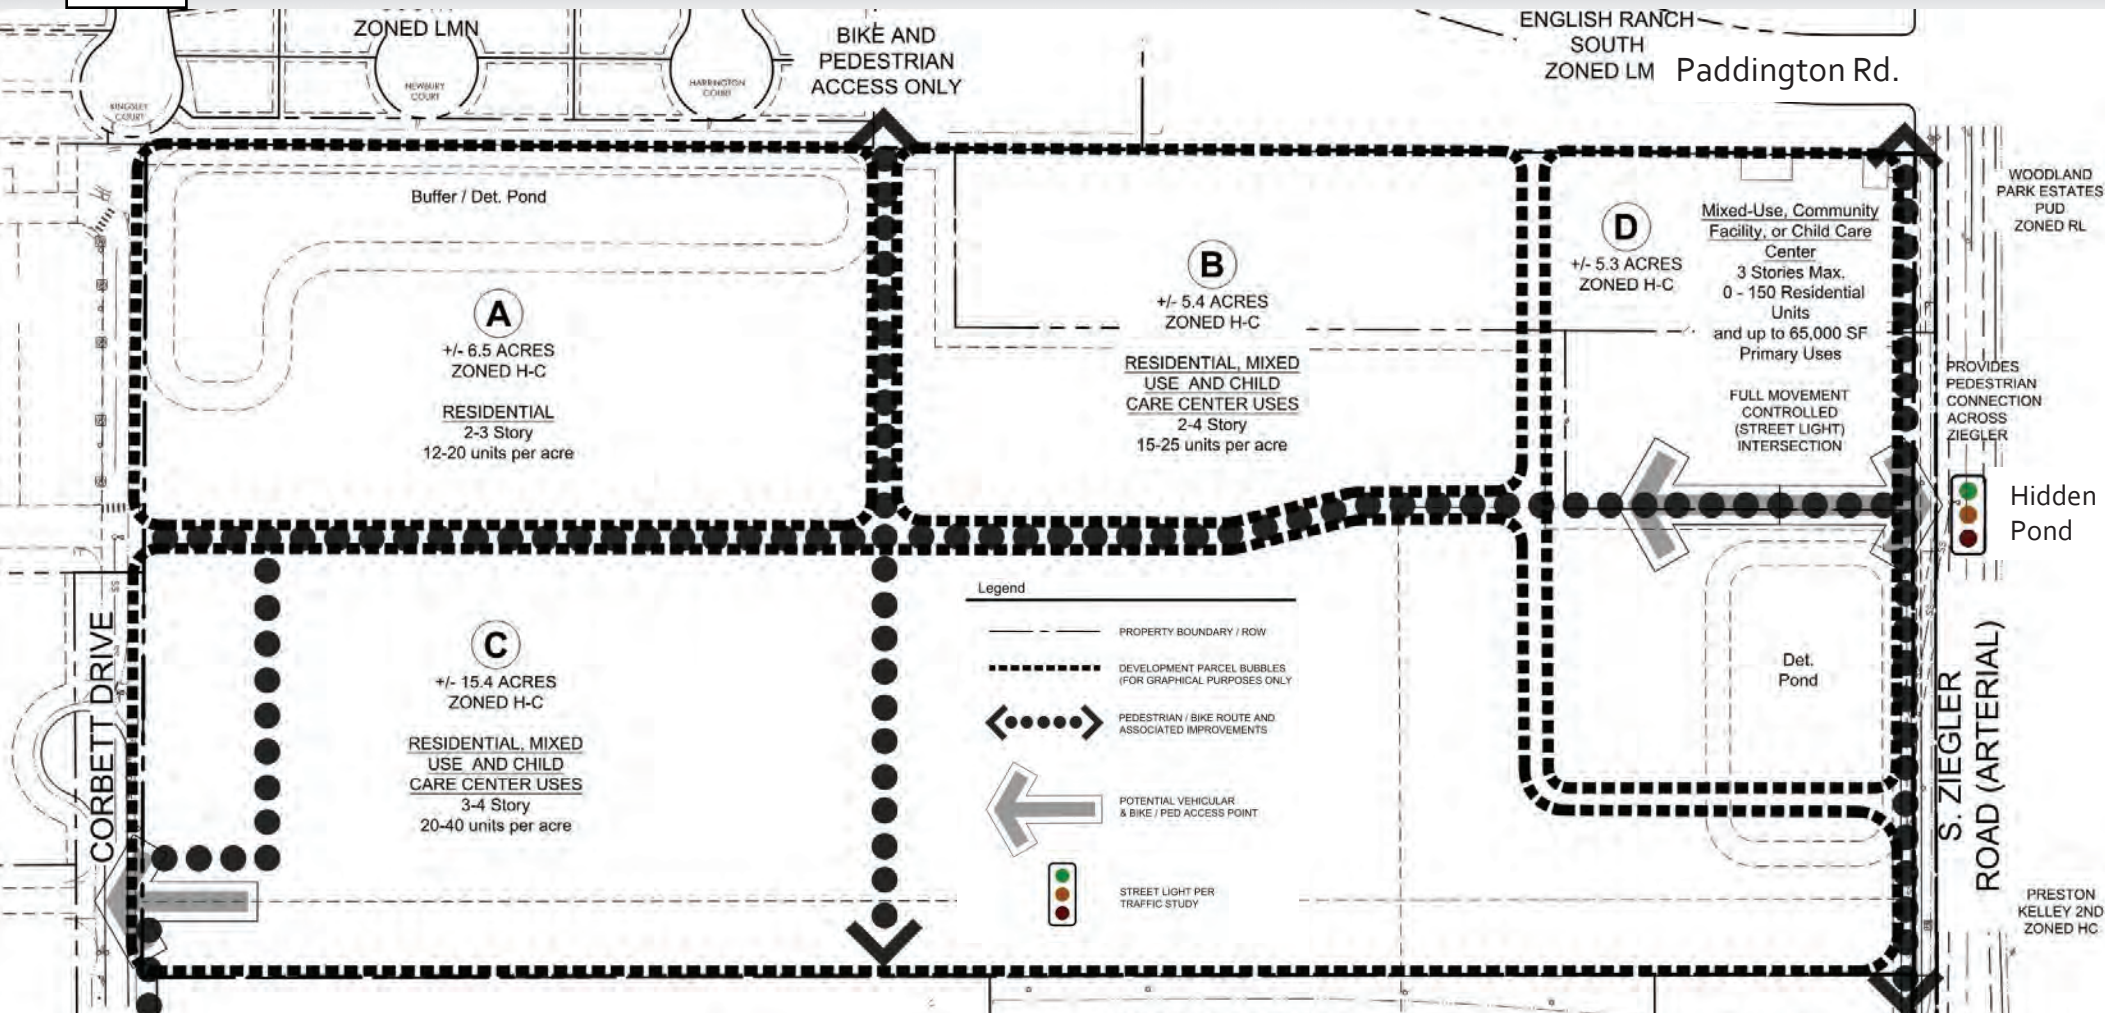

- Blue - Inclusion of the Young Property
- Orange - The approved Channelized 'T' Intersection

Additional Benefits:

- Adjusted parcel boundaries (but not modifying density / max. units allowed)

Ziegler - Corbett Amended ODP

Item 22.

- No change in density / the maximum units allowed
- No vehicular access to English Ranch remains
- All conditions and modifications previously approved remain the same.
- The "Sense of Place" remain as previously approved
- Allows the preferred location of entry to the site from Ziegler (across from an existing street)
- The 4-way signalized light at this location is warranted per the TIS.
- Provides a safer intersection for vehicles AND pedestrians vs. Channelized 'T'
- The signalized light is fully paid for by the Developer.
- Adjusted parcels provide stronger street and block network.
- This amended ODP is an improvement to the approved ODP.

Zimmer - Corbett Amended ODP

Item 22.

Benefits of Residential and Secondary Uses

- Buildings will have Solar and / or Net Zero Energy Ready Home as noted in ODP
- Commitment to a Child Day Care Center as noted in ODP
- Development that supports and is supported by Front Range Village
- Recommended City Plan Transition between large retail Center and Single-Family Housing

A Adjacent Neighborhoods
Suburban Mixed-Use districts typically about Suburban or Mixed-Use neighborhoods providing residents with access to services and amenities.

Planning & Zoning Commission Hearing
Date: March 23, 2023
Document Log

Any written comments or documents received after the agenda packet was published are listed here. Unless otherwise stated, these documents are included in the online "Supplemental Documents" for this meeting.

CONSENT AGENDA:

- 1. Draft Minutes for the P&Z January 25, 2023 Hearing
- 2. CNG Shop Expansion MA
- 3. Thompson Thrift Annexation & Zoning

DISCUSSION AGENDA:

- 4. N College Mobile Home Park Rezoning
 - Citizen emails/letters:
 -

- 5. Ziegler/Corbett ODP Major Amendment
 - Citizen emails/letters:
 - A few additional public comments were received after the public comment cutoff time of 24 hours prior to the hearing. These comments are in favor of a traffic light being placed at Ziegler & Paddington/Grand Teton. These will be included in an updated version of the hearing packet next week.
 -

GENERAL CITIZEN EMAILS/LETTERS:

- None received.

EXHIBITS RECEIVED DURING HEARING:

Item #	Exhibit #	Description:
1	a	Traffic design iteration) Jeff Jonelle (SP)

This is the most recent iteration of an idea for the signal at Paddington and Ziegler. Of note is the fact that it does not require the widening of Paddington. An easement granted by the English Ranch Sough HOA will allow a roadway to be constructed across the existing detention pond. Only mild excavation would be required to maintain the current level of stormwater detention. The detention area would be bisected by this roadway, however, the installation of culverts will maintain normal stormwater levels. The sight triangle for the merge onto Paddington is ideal for a safe transition, particularly after the relocation of the trees highlighted in green.

One of the most important features of this design is the remote triggering of the traffic signal when a designated number of cars are in the queue for a northbound left turn into the proposed development. This would also create a break in traffic for residents exiting the Hidden Pond neighborhood southbound.

Lastly, one of the arguments against this design is that the distance from the merge to Ziegler is too short. It is in fact, the same distance as the space between Paddington and Hidden Pond Drive along Ziegler road. Both distances are approximately 395 feet.

Item 22.

Subject: [EXTERNAL] Re: Ziegler-Corbett Overall Development Plan (ODP) Proposal

Hello Ryan,

I am a resident of Woodland Park Estates. The new development is overall very concerning considering how congested the area has already recently become, and how much more it will be affected by so many additional residences.

I am very surprised to hear the traffic light is planned for Hidden Pond/Ziegler. I wondering the rationale behind this? The traffic light is best suited at **Grand Teton/Ziegler**. The Hidden Pond neighborhood is private (one cannot enter the neighborhood streets unless a resident) and has significantly fewer homes (a dozen?) than Woodland Park - which has over 100 residences. Woodland Park does not have any access to Hidden Pond when exiting our neighborhood. Turning left/South is a difficulty already. Having a light exiting at Grand Teton/Zielger or would help ensure safety, helping to avoid inevitable accidents if one is not placed there. Grand Teton also directly connects across Zielger to Paddington Rd in English Ranch, providing accessible service to their residents as well.

Thank you for your help on this matter.

Sincerely,

Carolyn Meyer
 3908 Grand Canyon St

Hello Neighbors,

I have attached the most recent Ziegler-Corbett Development Plan Proposal that you should be receiving in the mail soon. Please note, the current proposal is for a traffic light to be placed at Hidden Pond/Ziegler, not at Grand Teton/Ziegler. As noted below, Ryan Mounce, City of Fort Collins Planning Services, is trying to get feedback either prior to or during the event. Please reach out to him if you would like additional information or would like to be involved in the meeting.

Please share with neighbors not currently getting this email.

Thanks,
Kathy Kulesa

Subject: RE: Re: Ziegler-Corbett Overall Development Plan (ODP) Proposal

Hi Craig,

Thanks for connecting everyone and sharing potential avenues to distribute information.

We're trying to reach as many neighbors as possible to let everyone know this proposal will be considered by the Planning and Zoning Commission at their March 23rd meeting and the iteration the Commission will be reviewing proposes aligning the sites primary access point at the Ziegler/Hidden Pond intersection with a traffic signal. Mailed notices are being sent out this week and I will be providing an email update to a distribution list we created for the project after the neighborhood meeting held in January.

A digital copy of the mailed notice is attached with all hearing details including date/time, location, and how to participate. Kathy – if this feels like something that would be appropriate to forward to the neighborhood distribution list, we would certainly appreciate the digital exposure in addition to the mailed notices that will be arriving in mailboxes. We're also trying to encourage neighbors to provide written comments in advance or testimony at the hearing and the notice contains information on how to provide those comments.

Craig, if you and any other neighbors have an interest in scheduling a call or meeting before the hearing to discuss the proposal and share thoughts in your capacity as a neighborhood resident, I'd be happy to help coordinate from the City's end and could also include colleagues from Engineering/Traffic Operations as well. Let me know if this would be helpful and if there's any particulate dates/times that tend to work well with your schedule.

Thanks again,

Ryan Mounce

Subject: [EXTERNAL] Re: Ziegler-Corbett Overall Development Plan (ODP) Proposal

Ryan,

Appreciate you reaching out about this matter. I am on the HOA board as you mention. Rest of the board (Seth, Alison, Chris) is copied on this reply.

Item 22.

bulk contact information (email addresses of all our households) with The City would seem to go beyond what our members have likely consented to their HOA doing. If you would like something forwarded broadly, please send it to Kathy (CCd) who can forward it to the neighborhood distribution list she maintains. I am also happy to cross post to our neighborhood on Nextdoor.com.

As a board/HOA we do not involve ourselves in or take positions on matters outside of our specific duties, like politics or this ODP/Amendment.

In my capacity as a resident/citizen/individual, I would be interested in attending a meeting like you mention. I am also comfortable sharing my own personal observations/opinions, especially as they seem to align with what I hear from others in the neighborhood on this topic.

Regards,
Craig

Hello Craig,

My name is Ryan Mounce and I work for the City of Fort Collins in the Planning Department. I'm part of the team reviewing the Ziegler-Corbett Major Amendment proposal for the property southwest of Woodland Park Estates along the west side of Ziegler between English Ranch and Front Range Village. You may recall we had some brief email correspondence about the original Overall Development Plan (ODP) proposal for the site back in early 2022 regarding pedestrian improvements/crossings along Ziegler Rd.

We've been trying to find a contact(s) for HOA members in Woodland Park Estates to share updates on the current major amendment proposal to the original ODP and find a time for a meeting for questions and comments about the proposal from the Woodland Park perspective. We held a call with several English Ranch HOA members earlier this week and wanted to extend a similar invitation for Woodland Park Estates.

Another Woodland Park neighbor mentioned you were an HOA board member and I wanted to reach out and see if you have any interest in such a meeting and/or if you're aware of other board members or neighbors who may also wish to attend and if was possible to share their contact information or distribute information.

I would definitely be interested in this. With spring break, many families (including mine) are out of town next week. So something the week of March 20?

It seems unfortunate meeting with folks in Woodland Park was not pursued earlier, as I get the impression the plan/proposal is already set. There seemed to be some "ah ha"s from staff and english ranch residents in response to my comments about the new development not connecting to Paddington as per original plan (keeping this traffic off Paddington is likely to result in Paddington/GrandTeton never qualifying to become signalled). Yet, because the process was so far along there was not real opportunity to revise - the proposal was there for yes/no-up/down vote, not refinement.

I fear similar here - the proposal is already seemingly fully baked, without much of our input or consideration thereof.

So as to not wait until some meeting just days before the proposal is considered, my opinions...

Short version:

There is a longstanding desire to have a safe location to cross Ziegler from Woodland Park to access the park, elementary school, walking paths, etc in English Ranch.

Item 22.

is difficult to exit Woodland Park, specifically turning left from westbound Grand Teton PI onto southbound Ziegler.

Signalizing the Paddington/GrandTeton and Ziegler intersection and shifting this development's primary access to Paddington would be a superior solution (to both of these concerns) than locating this development's primary access at Hidden Pond and signalizing that intersection.

The development proposal which abandoned Paddington and now the planned adjustment to align with Hidden Pond remain inferior solutions to the original plan of utilizing Paddington.

Long version...

1. There is a longstanding desire to have a safe location to cross Ziegler from Woodland Park to access the park, elementary school, walking paths, etc in English Ranch.

Personnel at The City have in the past suggested the roundabout at Horsetooth or the signalled intersection at Council Tree present sufficient pedestrian crossing opportunities. I believe they are not sufficiently nearby and cite two observations as evidence: (1) People in Woodland Park rarely if ever detour to those crossings enroute to the park or neighborhood school, opting instead to play Frogger(tm) by crossing Ziegler on foot. (2) Most of the existing signalled crosswalks along similar arterial streets I have surveyed are much closer to the next best option (a signalled driving intersection nearby) than the distances we would travel to the suggested crossing locations.

Non-exhaustive list of existing crosswalks closer to the next best alternative:

Power trail to Timberline (crossing Drake and Horsetooth)

Illinois Drive to Timberline (crossing Drake)

Arctic Fox Drive to Timberline (crossing Horsetooth)

Starflower to Shields (crossing Horsetooth)

Example detour distances for us:

Mesa Verde to Horsetooth

Grand Teton to Council Tree

The [Ziegler-Corbett Major Amendment proposal I have seen](#) adds a signalled intersection at Hidden Pond Drive. This would result in a pedestrian crossing that requires less of a detour than the current situation, so would address this concern to some degree (some but not all pedestrians would detour to here). Signalizing the intersection at Paddington/GrandTeton and Ziegler (as has been on The City's radar for a couple decades) and shifting this development's primary access to Paddington would fully eliminate the need for pedestrians to detour to reach a signalled crossing, maximizing the amount of pedestrian crossings which occur at a signal.

2. It is difficult to exit Woodland Park, specifically turning left from westbound Grand Teton PI onto southbound Ziegler.

It should be noted that Grand Teton PI serves as the exit point for 59 households (south half of neighborhood) whereas Hidden Pond serves 15 households.

It should also be noted that it is easier to turn left onto Ziegler from Hidden Pond than from Grand Teton. From Hidden Pond one only needs traffic to be clear in the northbound direction on Ziegler to pull into the middle/empty lane of Ziegler. From Grand Teton traffic needs to be clear on Ziegler in both directions as the middle lane on Ziegler is not available to pull into (it is serving as a left-hand turn lane into English Ranch).

Item 22.

gler-Corbett Major Amendment proposal I have seen adds a signalled intersection at Hidden Pond Drive. This does not seem like it would improve the ability to turn left onto Ziegler from Grand Teton for households in Woodland Park nor for households in English Ranch. Signalizing the intersection at Paddington/GrandTeton and Ziegler (as has been on The City's radar for a couple decades) and shifting this development's primary access to Paddington would provide ingress/egress benefits for both Woodland Park and English Ranch neighborhoods at that shared intersection. Shifting access to (and signalizing) Hidden Pond will not help with left-onto-southbound-ziegler egress from Woodland Park. However, Signalizing Paddington/GrandTeton will help left-onto-southbound-ziegler egress from Hidden Pond in this way: They could turn right onto Ziegler, then use the Paddington/GrantTeton signal to make a U-turn to head south.

Regards,
Craig

Mr. Ryan Mounce,

Regarding Amendment:
 Ziegler-Corbett Overall Development Plan Major Amendment, MJA220004
 (location map on the back of this letter).
 Sign #719, Parcel #s: 8732000002, 8732000009, 8732400008

We have been abreast of the development across the street from our home which is located at **3115 Yellowstone Cir.** and have been accepting of the change to the property behind the Council Tree Shopping Center to this point. We are **NOT** in favor of any further development and find it completely irrational and poorly planned as many home owners will be impacted by this late Major Amendment change.

The City should not add a light to this area as there are already two within a short distance from Harmony Road. All of the home owners in this area already deal with a significant amount of traffic and **DO NOT** want **any more traffic flow** either Southbound or Northbound. This will also cause a huge impact to a small roundabout that is already over-used all times of the day.

We will try to attend the virtual meeting but want you to know that we are completely opposed.

Thank you, Ryan and Julie Baker
 3115 Yellowstone Cir.
 Fort Collins, CO 80525

Hi Ryan,

I sent the message out to the Hidden Pond neighborhood. Reading your message, it sounds like it has been decided to move forward with the traffic light aligning with Hidden Pond Drive. Majority of the folks in the neighborhood are against that proposal and would prefer the light be at the intersection of Paddington / Grand Teton & Zeigler. The Woodland Park neighborhood has been requesting a traffic light at Grand Teton for years. I do understand, having lived in the English Ranch neighborhood, the strong desire to not have the new development connect with Paddington. However, our primary concerns are around the increase in traffic in to Hidden Pond - both auto and pedestrian traffic. If the light were to align with Hidden Pond Dr., what signage would be installed indicating - dead end, private road, no through traffic. Anything to mitigate the increase. Every Spring, we see an increase in foot traffic through the neighborhood. With the neighborhood directly "across the street", we know there will be an increase. Would be interested in any mitigation ideas you have.

Thanks,
 Stephen

Subject: [EXTERNAL] Meeting tonight Ziegler/Corbett

Good afternoon Mr. Mounce,

My name is Megan Engelstad and I live in Woodland Park Estes. I will not be able to attend the meeting this evening due to my kiddo's schedules of after school activities. That being said, I would like to connect with you about the proposed traffic pattern. I have to turn left from Grand Teton multiple times a day and I will wait (more often than not) for 5 minutes, there are times it has been 8 minutes. With the new building coming across the street, it is going to gravely increase the traffic for Woodland Park and English Ranch. Putting a light in has been a need for years and I am glad there is the prospect of one coming in, however putting the light at Hidden Ponds does nothing to mitigate the traffic that these two larger neighborhoods are dealing with. Hidden Ponds has (I believe) 10 houses and a light does not make sense there. They also have a turn lane that that can go into, whereas the Grand Teton/English Ranch streets do not. Please consider putting a light in this area rather than Hidden Ponds.

Thank you for your consideration,

Megan Engelstad
Woodland Park Estates resident

Hi Ryan,

My name is David Worford and I am also a resident of Woodland Park.

I cannot attend the meeting but I also want to place my concern about where a light/crossing would go with this project.

We have been promised for years to get at least a crosswalk across Ziegler. We were also told we needed to wait until this development happens to get one. Now that it is happening you are planning on putting one at Hidden Pond, where at the moment there is little need and you still leave an entire neighborhood without a light/crosswalk? I assume this is due to the complaints from English Ranch on potential traffic on Paddington. So they get their voice heard and the one thing our neighborhood really, really needs we are left in the dark again?

During this time we've all been waiting for a crosswalk I have seen one put in across Drake from Lake Sherwood to Parkwood where I have literally never seen anyone use it and neither neighborhood is cut off from the world. There has also been one put across Lemay between Drake and Prospect (again, never seen anyone use it, but I don't travel through there as much). I am sure there are more. But we have our hands tied because of this potential development. Many of us would like a light, but we need something to allow us to get out of our neighborhood. We only have two ways in and out and they are both on Ziegler.

ve kids that go to school across Zeigler, which despite being about a 15-minute walk is impossible to do so because it isn't safe to cross. Where the school is located is also the closest true park to our neighborhood. We have no way to venture out on recreation as families or individuals because it isn't safe to get across. And of course, traffic is only going to get worse to turn left and sometimes even right with cars.

We aren't a large neighborhood, but there are plenty of us here and I feel our voices have been ignored all this time. We've been told use the light at Council Tree or go to the roundabout (neither exactly stone throws away). Now the city is putting something at Hidden Pond and still getting nothing.

Please consider our neighborhood in all of this.

Thank you,

David Worford

Hi Neighbors,

I would like to remind everyone of the Zoom call scheduled for 5:00 PM tonight to give feedback on the proposed signal light on Ziegler. Please see Zoom link at bottom of this email.

The attached drawing was provided by Any Poulsen (proposed by another neighbor) as a possible alternative to a light at Hidden Pond. I believe the darker line on Paddington would be a concrete divider to allow only a right turn out of the new development onto Paddington.

This is a very important discussion and may determine traffic patterns for our entire neighborhood so please try to log in and give your input.

Thanks
 Kathy Kulesa

Hi Kathy,

Sorry for the short notice, but I just received it from a friend -- I didn't have a copy of it, and it took her a while to find it.

The attached drawing was proposed (I wish I knew whose proposal it was so I could give credit) at the last meeting at the library, and really seemed to generate a lot of interest and energy from the homeowners in attendance (both from our neighborhood and from English Ranch). However, it seemed that the developer and the folks from the city weren't interested in discussing it .

The homeowners in attendance seemed to feel that this proposal makes more sense than any of any of the others -- it allows controlled egress from all 3 neighborhoods (WP, ER, and the new development), and makes ER happy because it doesn't allow traffic from Council Tree into the ER neighborhood.

A light at Hidden Pond will provide almost no benefit to either English Ranch or Woodland Park, but the one in the attached proposal at Grand Teton/Paddington would seemingly address most of the concerns of all parties.

Could we please send this out to all homeowners as a proposal?

I'm copying Seth, Chris, and Craig on this as well, hoping to come up with a solution that benefits everyone.

Thanks!

andy

Subject: [EXTERNAL] Written Comments for Zoning Meeting on 03/23/23

Hey Ryan,

I appreciate you and the others taking the time to talk with us residents this evening. Here are a few comments I was hoping you could pass along at the next meeting:

- I think most would agree that a light for at least pedestrian crossings out of the Woodland Park/Hidden Ponds area is needed, and one with the option of vehicle traffic would be preferred. To underscore this, it is currently a 1.5 mile and 30 min walk to get to the closest park from the farthest point in our neighborhood. The lack of a crossing almost doubles the walk. To the neighborhood school is even farther. I believe the city signed on to some sort of initiative to put a park within a 10 minute walk of every neighborhood, and regardless the city has always put a high value on bike and pedestrian safety.
- In my opinion this is a major safety concern. As I mentioned in the meeting, the city installed a light controlled pedestrian crossing at both Horsetooth/Arctic Fox and Drake/ Illinois (874 feet 514 feet respectively from the nearest crosswalk) after a juvenile pedestrian was killed at these intersections. After the pedestrian crossing was removed from Ziegler I feel like we have been on borrowed time, I fear that the only way we may get a light back is if there is another tragedy, this time with one of the kids from my neighborhood name on it.
- It seems to be close to universally agreed upon that the "normal" location for the light/crossing would be Paddington and Ziegler, absent the 2010 decision which in some way impacts this.
- I think the original proposal for the light location should be a non-starter: this would still put the signal over 1500 feet from Mesa Verde and 900 feet from Grand Teton, both much further than the city has already set the precedent as reasonable to expect people to divert to find a safe crossing.
- Hidden Pond may be considered more reasonable (at 1000 feet and 400 feet) but it comes with the host of other problems and is objected to, at least in part, by all three neighborhoods it sounds like.
- Once the development plan is approved and the infrastructure is in place it will be difficult and costly to change. Why not put the light in the "ideal" location now while the developer is still playing ball so if the circumstances with English Ranch change down the road we have everything in place?
- Perhaps the city could respond to the developer that the light needs to be put in at Paddington and Ziegler for the reasons mentioned above, let them change or modify their existing plans accordingly? I may have missed it, but if there was a limited access to the commercial area of the development property at Carrick and Paddington

Item 22.

the impact to English Ranch would be close to nil, and yet it would provide a logical egress for vehicles to go northbound from the commercial development and possible the residential area behind. Then, if down the road Corbett is connected to the neighborhood and Paddington becomes a full “feeder” street the light is already in place.

Thanks for your consideration. Feel free to summarize the above.

Unfortunately we are unable to attend the meeting tonight. We would like to support the proposal by the English Ranch HOA to have the traffic light moved north on Ziegler to the Paddington and Ziegler intersection. This makes a lot more sense since it will now benefit all traffic moving through English Ranch, Woodland Park Estates, Hidden Pond and the new subdivision. If the traffic light is placed at Hidden Ponds and Ziegler it will make it even more treacherous to exit English Ranch and Woodland Park. Right now without a traffic light it is dangerous to walk across Ziegler and very difficult to drive across the intersection. Traffic comes steadily from the north since there is not a stop light at Horsetooth (just the roundabout) and the traffic from the south is also steady with vehicles driving north on Ziegler or exiting Front Range Village. If the light is placed at Paddington more vehicles will be able to move through that intersection. If the light is place at Hidden Ponds basically it only accommodates vehicles from the new development or Hidden Ponds, which is not that populated.

Thank you,
Avram and Belinda Eskin

Subject: [EXTERNAL] Ziegler-Corbett Development Proposal

Dear Ryan,

I have just seen the proposal being put forward by the English Ranch HOA at tonight's hearing regarding a signalled intersection at Grand Teton/Paddington Rd. I heartily support this proposal and feel that it is far superior to the recommendation of a signalled intersection at Hidden Pond Rd., which is too close to the current signal at Council Tree.

As I have stated in my previous communications, Grand Teton/Paddington is not only a logical major entrance to both English Ranch and Woodland Park Estates, but it also provides safe access to Woodland Park Estates' elementary school and closest city park. Crossing Ziegler Rd. is a dangerous endeavor that is only becoming more treacherous with increased development along this corridor.

I hope that the city will approve this new proposal for a traffic light at the Grand Teton/Paddington Rd. intersection.

Thank you,
Pam Starling

Hi Ryan,

I don't believe I will be able to make it to the meeting tonight, but this new proposal seems much better for English Ranch and Woodland Park (I live in WP).

As such, I would like to voice my strong support for this new proposal (with the easement from English Ranch South HOA).

Thanks so much for being willing to listen!

Mr. Mounce - our names are Robert and Trisha Schutzius and we are residents of the Woodland Park Estates neighborhood. We will not be able to attend this evening's meeting, but we did want to communicate our sentiments to you directly.

We strongly favor having the traffic light installed where Grand Teton and Paddington intersect Ziegler Road. As it now stands, those of us in the Woodland Park Estates neighborhood have no protected intersection to make a left turn onto southbound Ziegler or to safely cross the street. This will become an even bigger safety issue as the parcel north of Front Range Village gets developed.

I know that installing a light at this intersection will mean that the school district will no longer provide bus service to our neighborhood. However, in a few short years, many of these same children who now attend Linton Elementary School will be driving and will be forced to make unprotected left turns on the southbound in Ziegler. A very dangerous situation for inexperienced drivers.

I don't think that it makes any sense to install a traffic signal at Hidden Pond and Ziegler. Hidden Pond is a private road and people who do not live in the Hidden Ponds neighborhood are not allowed to have access to that road and that neighborhood. Traffic getting into an out of the Woodland Park Estates neighborhood is much greater.

I respectfully request that you consider the needs of those of us who reside in Woodland Park Estates. We desperately need a signal so that we can safely cross the street and make a left-hand turn on the southbound in Ziegler.

Sincerely,

Robert & Trisha Schutzius

Subject: [EXTERNAL] Feedback on Ziegler-Corbett ODPMA MJA220004 (traffic light placement)

Hi Ryan,

My wife, Amanda, and I have lived in the Woodland Park Estates neighborhood for the past 10 years. We are out of town and unable to attend the planning meeting tonight. We request that you strongly consider the proposal that will be presented tonight by the English Ranch South HOA regarding the traffic signal placement in Ziegler-Corbett ODPMA MJA220004. It seems to be the most common-sense solution for everyone to include the traffic signal at the intersection of Paddington and Grand Teton Place. The originally proposed placement will have a significant, negative impact on far more people than would benefit. We understand that the English Ranch covenants have prevented this from being the obvious choice and we appreciate their alternative solution to this matter.

While this is a planning issue to many of you, it's a daily issue for many of us. Over the past 10 years we have consistently remarked that the only thing we hate about our neighborhood is the increasingly difficult time we have getting out on Ziegler (our only exit road). Increased development in the area has made this treacherous and time consuming. We appreciate the additional patrolling we have seen, but it will continue to get worse without intervention. The placement of a traffic signal at Hidden Pond would make this immediately more challenging and less safe, especially as other developments are considered in areas north of us that will bring more traffic to the corridor. A traffic signal at the Grand Teton/Paddington intersection would make the entire area safer and preserve the quality of the neighborhood that we chose in 2013.

Woodland Park and English Ranch house many families with teenage drivers or children who will become teenage drivers. We are not alone in being terrified of our children having to learn to navigate such a challenging traffic setup.

I know you will hear many opinions on this. If you desire any further perspective, please e-mail us or call me at 303.808.2843 or Amanda Melby at 720.496.6750.

Thank you for your efforts in this.

 -

GENERAL CITIZEN EMAILS/LETTERS:

- None received.

EXHIBITS RECEIVED DURING HEARING:

Item #	Exhibit #	Description:
1	a	Traffic design iteration) Jeff Jonelle (SP)

This is the most recent iteration of an idea for the signal at Paddington and Ziegler. Of note is the fact that it does not require the widening of Paddington. An easement granted by the English Ranch Sough HOA will allow a roadway to be constructed across the existing detention pond. Only mild excavation would be required to maintain the current level of stormwater detention. The detention area would be bisected by this roadway, however, the installation of culverts will maintain normal stormwater levels. The sight triangle for the merge onto Paddington is ideal for a safe transition, particularly after the relocation of the trees highlighted in green.

One of the most important features of this design is the remote triggering of the traffic signal when a designated number of cars are in the queue for a northbound left turn into the proposed development. This would also create a break in traffic for residents exiting the Hidden Pond neighborhood southbound.

Lastly, one of the arguments against this design is that the distance from the merge to Ziegler is too short. It is in fact, the same distance as the space between Paddington and Hidden Pond Drive along Ziegler road. Both distances are approximately 395 feet.

Zoning Commission
Regional Hearing
March 23, 2023
6:00PM

Participation for this hybrid Planning and Zoning Commission meeting will be available online, by phone, or in person.

Public Participation (In Person): Individuals who wish to address the Planning & Zoning Commission in person may attend the meeting located in City Council Chambers at City Hall, 300 Laporte Ave.

Public Participation (Online): Individuals who wish to address the Planning & Zoning Commission via remote public participation can do so through Zoom at <https://fcgov.zoom.us/j/95758674874>. Individuals participating in the Zoom session should also watch the meeting through that site.

The meeting will be available to join beginning at 5:45 p.m. on March 23, 2023. Participants should try to sign in prior to 6:00 p.m. if possible. For public comments, the Chair will ask participants to click the "Raise Hand" button to indicate you would like to speak at that time. Staff will moderate the Zoom session to ensure all participants have an opportunity to address the Commission.

In order to participate:

Use a laptop, computer, or internet-enabled smartphone. (Using earphones with a microphone may improve your audio).
You need to have access to the internet.

City staff will manage the muting and unmuting of participants, and you may be asked to unmute yourself when it is your turn to speak.

If you have any technical difficulties during the hearing, please email smanno@fcgov.com.

Public Participation (Phone): If you do not have access to the internet, you can call into the hearing via phone. Please dial: 253-215-8782 or 346-248-7799, with Webinar ID: 957 5867 4874.

The meeting will be available beginning at 5:45 p.m. Please call in to the meeting prior to 6:00 p.m., if possible. For public comments, the Chair will ask participants to click the "Raise Hand" button to indicate you would like to speak at that time – phone participants will need to hit *9 to do this. Staff will be moderating the Zoom session to ensure all participants have an opportunity to address the Commission.

Once you join the meeting: keep yourself on muted status. If you have any technical difficulties during the hearing, please email smanno@fcgov.com.

Documents to Share: If attendees wish to share a document or presentation, City Staff needs to receive those materials via email by 24 hours before the meeting. Please email any documents to smanno@fcgov.com.

Individuals uncomfortable or unable to access the Zoom platform or unable to participate by phone or in-person are encouraged to participate by emailing general public comments you may have to smanno@fcgov.com. Staff will ensure the Commission receives your comments. If you have specific comments on any of the discussion items scheduled, please make that clear in the subject line of the email and send 24 hours prior to the meeting.

As adopted by City Council Ordinance 143, 2022, a determination has been made by the chair after consultation with the City staff liaison that conducting the hearing using remote technology would be prudent.

- ROLL CALL
- AGENDA REVIEW
- PUBLIC PARTICIPATION

Individuals may comment on items not specifically scheduled on the hearing agenda, as follows:

- Those who wish to speak are asked to sign in at the podium if they are in person or use the raise hand function if they are on Zoom or on the phone.
- The Commission Chairperson will determine and announce the length of time allowed for each speaker.
- Each speaker should state their name and address and keep their comments to the allotted time.
- Any written materials should be provided to the Secretary for record-keeping purposes.
- In-person participants will hear a timer beep once and the time light will turn to yellow to indicate that 30 seconds of speaking time remain and will beep again and turn red when a speaker's time to speak has ended. Phone and Zoom participants will be told verbally when their allotted time has ended.

- CONSENT AGENDA

The Consent Agenda is intended to allow the Planning and Zoning Commission to quickly resolve items that are non-controversial. Staff recommends approval of the Consent Agenda. Anyone may request that an item on this agenda be "pulled" for consideration within the Discussion Agenda, which will provide a full presentation of the item being considered. Items remaining on the Consent Agenda will be approved by the Planning and Zoning Commission with one vote.

The Consent Agenda generally consists of Commission Minutes for approval, items with no perceived controversy, and routine administrative actions.

1. Draft Minutes for the P&Z January Regular Hearing

The purpose of this item is to approve the draft minutes of the January 25, 2023, Planning and Zoning Commission hearing.

2. CNG Shop Expansion MA

PROJECT DESCRIPTION: This is a request to expand the existing fleet maintenance facility adding a shop area for CNG fleet vehicles.

APPLICANT: Blake Visser

City of Fort Collins
300 Laporte Ave
Fort Collins, CO 80521

STAFF ASSIGNED: Arlo Schumann, Associate Planner

3. Thompson Thrift Annexation & Zoning

PROJECT DESCRIPTION: This is a request to annex and zone 3.743 acres of land located at 423 Spaulding Lane. The annexation is subject to a series of hearings including a (Type 2) Review and public hearing by the Planning & Zoning Commission and recommendation to City Council. A specific project development plan proposal is not included with the annexation application.

APPLICANT:

Peyton Carroll/Jacob Ross
Thompson Thrift Development Inc.
111 Monument Circle, Suite 1600
Indianapolis, IN 46204

STAFF ASSIGNED:

Jenny Axmacher, Principal City Planner

Megan Keith, Senior Planner

- DISCUSSION AGENDA

4. North College Mobile Home Park Rezoning

PROJECT DESCRIPTION: This is a City initiated request to rezone 32.8 acres from the Low Density Mixed-Use Neighborhood (LMN) and Service Commercial (CS) zone districts to the Manufactured Housing (MH) zone district. The rezoning is a continuation of City efforts began in 2020 to preserve and protect existing manufactured housing communities.

APPLICANT: City of Fort Collins

300 Laporte Ave
Fort Collins, CO 80521

STAFF ASSIGNED: Ryan Mounce, City Planner

5. Ziegler/Corbett ODP Major Amendment

PROJECT DESCRIPTION: This is a request for a Major Amendment to the Ziegler-Corbett Overall Development Plan (ODP) located southwest of the intersection of Ziegler Road and Paddington Road (parcel #s 8732000002, 8732400008, 8732000009). The original ODP, approved in February 2022, is a mixed-use project consisting of 400-700 residential dwelling units, a childcare center, and 50,000 square feet of

community facility space. A major amendment is required to incorporate an enclaved parcel into the boundary of the ODP. No additional parcels are proposed; however, the boundary change creates an opportunity to

Item 22.

...s primary access along Ziegler Road to align with Hidden Pond Drive and install a private traffic signal, which has implications for broader circulation patterns in the vicinity.

APPLICANT: Chris Beabout
Landmark Homes
6341 Fairgrounds Ave, Suite 100
Windsor, CO 80550

STAFF ASSIGNED: Ryan Mounce, City Planner

- OTHER BUSINESS
- ADJOURNMENT

Planning & Zoning Commission
Regular Work Session
March 10, 2023
Virtual Meeting
Noon-3:15 pm

Participation for this virtual Planning and Zoning Commission work session will be available online or by phone. Commission members and staff will be present in-person, but interested members of the public and applicant teams are strongly encouraged to participate via Zoom. No public comment is accepted during work sessions.

Public Attendance (Online): Individuals who wish to attend the Planning and Zoning work session via remote public participation can do so through Zoom at <https://fcgov.zoom.us/j/97348069501>. Individuals participating in the Zoom session should also watch the meeting through that site.

The meeting will be available to join beginning at 11:45 a.m. on March 10, 2023. Attendees should try to sign in prior to 12:00 p.m. if possible.

In order to attend:

Use a laptop, computer, or internet-enabled smartphone. (Using earphones with a microphone will greatly improve your audio).

You need to have access to the internet.

Keep yourself on muted status.

If you have any technical difficulties during the work session, please email kclaypool@fcgov.com.

Public Attendance (Phone): If you do not have access to the internet, you can call into the work session via phone. Please dial: 253-215-8782 or 346-248-7799, with Webinar ID: 973 4806 9501.

The meeting will be available beginning at 11:45 a.m. Please call in to the meeting prior to 12:00 p.m., if possible. Once you join the meeting, keep yourself on muted status. If you have any technical difficulties during the meeting, please email kclaypool@fcgov.com.

The March 23 Planning and Zoning Commission regular meeting will be held with both remote and in-person participation options. Information on remotely participating in the March 23 Planning and Zoning regular meeting is contained in the agenda for the March 23 meeting available at <https://www.fcgov.com/cityclerk/planning-zoning.php>.

Members of the public wishing to submit documents, visual presentations, or written comments for the Commission to consider regarding any item on the agenda must be emailed to smanno@fcgov.com at least 24 hours prior to the March 23 meeting.

TOPICS:

- Consent:
 1. January 25, 2023 Hearing Draft Minutes
 2. CNG Shop Expansion MA (Schumann)
 3. Thompson Thrift Annexation & Zoning (Keith/Axmacher)
- Discussion:
 4. North College Mobile Home Park Rezoning (Mounce)
 5. Ziegler/Corbett ODP Major Amendment (Mounce)

PROJECTED TIMES:
12:00 – 12:35

12:35 – 2:00

Policy and Legislation:

- East Mulberry Plan Progress (Keith)

2:00 – 2:30

Commission Topics:

- APA Planning Officials Training Series Part 9
- Upcoming Hearing Calendar (Sizemore)
- Commission Update (Sizemore)
- Public Engagement Updates (Myler)
- Transportation Board Liaison Update (Owen)

2:30 - 3:15

Planning & Zoning Commission

March 23, 2023

CITY OF FORT COLLINS

Planning and Zoning Commission

Held March 23, 2023

Council Chambers, 300 Laporte Avenue, Fort Collins, Colorado

In the Matter of:

Ziegler-Corbett ODP Major Amendment

Meeting Time: 6:00 PM, March 23, 2023

Board Members Present:

David Katz, Chair

Julie Stackhouse, Vice Chair

Michelle Haefele

Samantha Stegner

Ted Shepard

York

Staff Members Present:

Rebecca Everette

Shar Manno

Paul Sizemore

Brad Yatabe

Ryan Mounce

Steve Gilcrest

Sophie Buckingham

1 CHAIR DAVID KATZ: We'll move on to agenda item five, the Ziegler-Corbett ODP Major
2 Amendment, and we will ask for a brief introduction from staff member Ryan Mounce whenever he is
3 ready.

4 MR. RYAN MOUNCE: We'll be just one moment, it looks like I got kicked off Zoom here.

5 CHAIR KATZ: And before that, I will say, is there any conflicts of interest from Commission
6 members on this one? I forgot to ask that.

7 COMMISSIONER TED SHEPARD: I'll just disclose that I have visited the site, I have driven
8 through the neighborhoods that are involved in this project, and I'm familiar with Front Range Village,
9 Sunstone, and Fox Meadows.

10 CHAIR KATZ: Okay, and then Shar, any new information since the agenda packet was
11 published?

12 MS. SHAR MANNO: Yes, Chair Katz, there have been a few additional public comments that
13 were received after the public comment cutoff time of twenty-four hours prior to the hearing. These
14 comments are in favor of a traffic light being placed at Ziegler and Paddington/Grand Teton. These will
15 be included in an updated version of the hearing packet after this hearing next week.

16 CHAIR KATZ: Thank you, Shar. Ryan, whenever you are ready.

17 MR. MOUNCE: Yep, we are all set. So, the presentation should be shared now...I'm just seeing
18 if it's popping up here. Okay, perfect. Again, yes, this is the Ziegler-Corbett Overall Development Plan
19 Major Amendment. As a project overview, this is a major amendment to the first overall development
20 plan, or original overall development plan, that was approved in February of 2022. The size of this
21 property is about thirty-three acres, and it's located in the Harmony Corridor zone district.

22 For this review, the major amendment, staff has been evaluating the impacts of the proposed
23 changes, not necessarily the full overall development plan. And so, those changes include first expanding
24 the size of the overall development plan by incorporating one additional property, and that's what is
25 outlined in the red shading on the map to the left. As part of that expansion, it allows for the
26 consideration of shifting the main access point to this property further north to align with Hidden Pond
27 Drive, and the proposal is to install a traffic signal at that intersection. There are no proposed changes to
28 the land uses or the density or intensity from the original overall development plan.

29 Zooming in a little bit on the site, you can see it's surrounded to the north and northeast by two
30 different types of residential zone districts, the LMN and RL zone districts. Predominantly the English
31 Ranch and Woodland Park Estates neighborhoods; there's also the Hidden Pond Estates neighborhood
32 further to the east but cut off from this map. To the west is the Affinity multi-family apartments, to the
33 south is Front Range Village, and then to the southeast is sort of the Broadcom/HP campus.

34 A few, you know, shots from the site. This is looking north towards various points in English
35 Ranch. To the northeast and southeast are some shots of Woodland Park and the HP/Broadcom campus.
36 To the south, some views towards Front Range Village, primarily kind of the rear loading areas of some
37 of the big box retail. And then to the west are the Affinity Apartments.

38 Before concluding the staff overview, I did want to follow-up with some work session questions
39 and clarifications. There were some questions about the proposed signal, what its configuration would be.
40 This would be a signal, as proposed, that would be funded by the project applicants, meaning they would
41 help pay for the installation of the signal, but ultimately it would become...it would be owned and

1 maintained by the City, and the City would work to time it with the rest of the traffic network nearby.
2 And this would be a stereotypical traffic signal that we're all pretty much familiar with...so it would
3 be...have various cycles and could be activated by bicyclists and pedestrians as well using a button.
4 There was a request to have available information about some of the traffic counts for nearby streets, and
5 as appropriate, we can come back and revisit this in the presentation...or discussion. There was a
6 question about if it was known the road classification for the main east-west road through the ODP...that
7 will likely be, you know, determined at the PDP level. As a public street, it would not likely be a
8 collector because it's not identified as such on the Master Street Plan. So, perhaps something around a
9 local street. There was also a question about the right-of-way, or width, needed if there was a potential
10 connection north from the site to Paddington Road. And so, I have a couple cross-sections that are
11 available for the discussion period. Most likely, you know, right now, it might be more of a residential,
12 local type street because of some history we'll get into with the collector-level designation. The width, or
13 right-of-way, necessary for a local street is 57 feet, and then you can see, for collectors, that's either 69 or
14 81 feet, depending on whether that collector street has parking or not. And so, with that, that will
15 conclude staff's overview.

16 CHAIR KATZ: Thank you, Ryan. At this time, the applicant has an opportunity to present. Who
17 will be presenting on behalf of the applicant? Perfect, do you think you can do it in under thirty minutes?

18 MR. CHRIS BEABOUT: Absolutely. Do you need an update on the games?

19 CHAIR KATZ: I don't, no. Whenever you are ready.

20 MR. MOUNCE: And just for clarification, I am sharing...there were some technical issues; I am
21 sharing this from staff's computer, so they will be motioning me to proceed.

22 CHAIR KATZ: Perfect, thank you, Ryan.

23 MR. BEABOUT: Thank you, Ryan, thank you, Chair, and thank you, Commission, for your time.
24 We're excited to present the amendment to the approved ODP that was approved pretty much a year ago
25 this time to the Ziegler-Corbett ODP map. Our entire team is here tonight to answer questions from you,
26 and from the public as well. We have Jason Sherrill with Landmark Homes, Jason Claeys, civil engineer
27 with Highland Development Services, and probably the man of the hour is going to be Matt Delich who
28 we all know; he's our traffic engineer and will be able to answer all of the traffic questions that come up.
29 You want to go to the next slide, that would be great.

30 So, what we have here is the ODP map that was approved last year. And as Ryan told us, we're
31 not replacing this ODP map, we're just amending it with a few changes highlighted in blue and orange.
32 The blue area is the property that currently is not included within the ODP boundary, so the one change is
33 to include that property...it's about two, two and a half acres. And because of that, what's highlighted in
34 orange was the approved channelized T intersection, and because of the Young property and lining up the
35 entry to the development from Hidden Pond, the channelized T is not needed anymore and the traffic
36 study warrants a full movement signalized intersection. And so those are really the two changes that
37 we're making to the ODP map; we're not increasing density and we are not increasing the previously
38 allowed maximum dwelling units. So, in other words, the same amount of dwelling units as was
39 approved a year ago remains the same, density within each parcel...although the boundaries are changing
40 a little bit based on the new entry points...density and the dwelling units are not increasing because of this
41 change. So, hopefully that will eliminate some fears that the public has, maybe eliminate some questions.
42 But, I'll hand it off to Jason as he will go into more detail with the actual amendments to the map.

1 MR. JASON SHERRILL: Good evening, Chair and Commissioners, Jason Sherrill with
2 Landmark Homes. I don't have a lot to add, I just want to kind of highlight a few things that I think are
3 important. We all recognize that the ODP that was approved was workable, but there was a motivation
4 both from us and the staff one day to have a chance to capture the Young property, which I think we all
5 felt, even when we submitted the ODP originally, that if we could capture that Young property, it
6 certainly would make sense, right? It would make for an all-inclusive development and not leave this
7 kind of out parcel that doesn't kind of change with the evolution of our project, and create a much more
8 robust street frontage along Ziegler, which I think is important for all of us. So, there was motivation to
9 capture that. We were fortunate that we were able to capture that property, which we're thankful for, and
10 because of that, obviously there was a need to then align our main connection to Ziegler to Hidden Pond,
11 which is a development code standard for us to align when we can. So, by adding the Young property to
12 the parcel, you know, it made much more sense, and I think it made sense to us, and it certainly made
13 sense to staff, to align to Hidden Pond.

14 The next step was a new traffic study, right? For resubmitting this...this move generated the
15 need for an amended ODP. So, in the process of that, we had to generate a new traffic study, which Matt
16 prepared for us. As we prepared that, we soon discovered that a light...our traffic warranted a light. So, I
17 know there's a lot of conversation about where is the right location for a light. The reality is, it's only this
18 intersection that warrants a light. There's not any other intersections between us and the roundabout at
19 Horsetooth that actually warrants a light. So, you know, I know there's a lot of emotion, there's a lot of
20 history with the amount of traffic on Ziegler and the different communities, but we actually feel like this
21 particular move is a win win, right? It really created, for us, an opportunity...you can just see by the
22 shape of the ODP as far as the shape of the parcels, it creates a much more uniform plan for us to build
23 from as we submit and work through the process with our PDP. It creates a much cleaner alignment to
24 Ziegler with the full movement access, and then of course our project warranted a light. I know there's,
25 again, as I mentioned, there's some conversations about the need or the desire for lights at other
26 interchanges, or other intersections, but none of those are warranted; this actually is warranted, and I
27 really do believe that even though the light isn't at some of those intersections, any light along this
28 pathway, along Ziegler, is going to provide a respite for people travelling and trying to get on Ziegler.
29 So, in particular, obviously it's going to stop northbound traffic, so those that are heading out of
30 Woodland Park and going north, there's going to be a respite so they can move north. Those heading out
31 of Paddington crossing the southbound lane heading north, they only have now one lane of traffic to
32 navigate as opposed to two lanes of traffic because there's going to be the stoppage with our light,
33 because I think the biggest concern is that movement north. So, even though this light isn't at Paddington
34 or some of the other intersections...I really think it does solve a lot of the problems. Is it perfect? I can't
35 tell you if it's perfect. But, I know that it does generate, you know, a huge benefit for the community, and
36 certainly, as we said, it's warranted at our intersection to put in a light. So, you know, we're just trying to
37 follow the Code. We think we're doing the right thing by assembling the property; we think it makes for
38 a better plan, and we think it makes for an overall improved impact to the surrounding neighborhood,
39 so...looking forward to your comments, and I know the neighbors are going to have a few things to
40 say...hopefully we can address their concerns. Thank you.

41 CHAIR KATZ: Thank you, Jason. Anyone else on your team wish to address the Commission
42 right now, or is your presentation over? Okay. Ryan, would you mind giving us a detailed analysis
43 please?

44 MR. MOUNCE: Yes, I am just switching back here. Alright, so, as mentioned, I'm going to
45 kind of move through these first couple slides quickly because I feel the applicants did address this, but I

1 wanted to kind of walk through these proposed changes to the original overall development plan and
2 show you, sort of, visually, the impacts. First, as mentioned, the original plan, kind of here on the
3 screen...this was the 2022 plan. It had its main point of access to the site further south, kind of split
4 between where Hidden Pond Drive is right now and the service access entrance to Front Range Village,
5 which is that road that runs behind Target. It was proposing to use what is called a channelized T
6 intersection, which is a somewhat different type of intersection configuration.

7 What's being proposed with this major amendment is, again, as mentioned, the addition of this
8 additional property, highlighted in red, and then as a result of that, it does allow for the consideration of
9 moving the main access point further north to align with Hidden Pond. What's being proposed is a traffic
10 signal, a full movement intersection with a traffic signal at that location. And as a result of shifting that
11 main access point further north, you can see the main access road through the ODP site, or circulation,
12 has also shifted north as a result. And as mentioned, that has shifted some of the boundaries of the
13 original ODP parcels. Again, no changes proposed to land uses or density, but some of those parcels have
14 shifted slightly in size.

15 You know, an overall development plan, it's a plan...high-level plan for future phased
16 development. It's...the standards for review are found in Article 2 of the Land Use Code, and as
17 expected for kind of a high-level plan, there's only a handful of these, and so I wanted to kind of provide
18 a rundown of how this major amendment...if it would have any impact on some of the review criteria for
19 an ODP. The first one relates to permitted uses; all of the proposed land uses in this ODP, with the major
20 amendment in mind, are permitted in the Harmony Corridor zone district. You may recall there was a
21 previous modification for the ratio of primary and secondary uses; that has not changed as a result of the
22 proposal for the major amendment. The density remains the same, and it meets the Harmony Corridor's
23 minimum density requirements. There was an approved alternative compliance request for the ODP in
24 2022, and this related to a local street connection north of the site to Paddington Road in English Ranch,
25 and that's been probably the primary factor around this particular review, and so I'll be touching on that
26 here in more detail in just a moment. There are no natural features identified on the site, and no habitat
27 buffer zone is anticipated during the PDP level. The applicants have submitted drainage reports and
28 drainage information that this will comply with the Fox Meadows Drainage Basin Master Plan. And
29 then, the ODP also complies with requirements for the number of housing types given the acreage or size
30 of this particular project, and so there will be a minimum of three housing types. So, from those overall
31 development plan standards, this is, with the major amendment in mind, meeting all of these review
32 criteria.

33 Where the kind of primary focus for staff's review of this has come in is with that realignment of
34 the main access point to Hidden Pond Drive. And, need to kind of bring in some past history here,
35 because it relates to whether there is that mid-block connection, street connection, from this ODP site
36 north to Paddington Road; they are somewhat intertwined. So, the City has a Master Street Plan; it is our
37 kind of vision as a community for our arterial and collector street network. Past iterations of the Master
38 Street Plan, and you can see a couple of those from the late '90's and early 2000's on the screen here, had
39 identified that Corbett Drive, a collector street, would be running from even farther south of Harmony,
40 but all the way up north, through what is now the ODP site, to Paddington Road. After Front Range
41 Village was developed, there was a lot of concern from neighbors about the potential for cut-through
42 traffic, especially given that Front Range Village is more, kind of, a regional destination in nature. And
43 so there was a lot of meetings, and kind of public process around 2010 or so, as the City was updating its
44 Comprehensive Plan and the Master Street Plan at that time, to look at that particular connection. And
45 through that public process, ultimately it was decided that the Corbett Drive collector street level

1 connection would be removed from the Master Street Plan, and so, it would remove the requirement for
2 this collector street to run through this particular site and connect north to Paddington Road.

3 As part of that process...again, there were a number of different neighborhood meetings, there
4 was a work session with City Council, and that's what this slide you see on your screen is sharing; it's
5 one of the slides from the work session. And it seemed, from the staff's perspective at that time, to kind
6 of outline a couple of scenarios that we're now kind of grappling with, with this major amendment ODP
7 review. And wanted to draw attention to some of the bullet points on the bottom which talk about, if the
8 Corbett street connection is removed, which it was, there still may be a requirement for a local street
9 connection north to this site. That is found through standards in our Land Use Code. It was the subject of
10 a lot of discussion during the original ODP, but ultimately staff recommended, and what was approved,
11 was this alternative compliance request for a bike and pedestrian access only. And this gives...staff gave
12 this a lot of weight given some of the policy direction from this earlier decision to remove the collector
13 level street. Staff also mentioned at the time, and included in this information, that removing the Corbett
14 connection could impact the traffic signal location and access points along Ziegler. And again, this is
15 kind of the main focus for this review, and kind of the scenario that we're grappling with.

16 And so, as part of this...I think it's helpful to kind of zoom out, from staff's perspective. We
17 have a site here that is in the middle of surrounding other development, and so most of the puzzle pieces
18 are in place when it comes to the transportation network. And so, we have a few remaining pieces left
19 that are not quite fitting, and so we're trying to find kind of the best approach that we can given some of
20 the policy history on this site and kind of where different access points can realistically be placed given
21 other standards for intersection spacing, alignments, and so forth.

22 And so, I wanted to run through...you know, we've kind of identified several particular locations
23 that might be most relevant for access to the site, and implications for where a signal along this stretch of
24 Ziegler might be...we've been having a lot of conversations with neighbors and those around the site, and
25 wanted to really kind of share what we feel as staff are some of the different considerations, and some of
26 the different kinds of comments that we're hearing. So the first part of this relates to, should the be a
27 local street, or could there be a local street connection from the ODP site north to Paddington Road? This
28 would likely generate the warrants for a traffic signal at the Ziegler and Paddington/Grand Teton
29 intersection. Right now, without that connection, it doesn't appear current conditions warrant the traffic
30 signal. We have heard, you know, pretty consistently, a lot of opposition to a local street connection at
31 that location from neighbors in English Ranch, and that's also very consistent with what we find from the
32 meeting summaries and meeting materials back in 2010 when this was being considered to remove the
33 Corbett street collector-level connection.

34 And so, for staff, that's created a lot of uncertainty for us about sort of the policy direction of this.
35 On one hand, there are requirements in the Land Use Code that would normally, again, require a local
36 street connection. But, at the same time, in terms of form and function, it would be very similar to a
37 collector-level street, which was explicitly removed by Council in 2010 from the Master Street Plan. So,
38 again, we have kind of some uncertainty here and we're trying to honor that previous decision and not
39 kind of reverse that given that a local street connection would be very similar to a collector street.

40 Sort of the next aspect to this is, could there be a signal...you know, if there was a signal at the
41 intersection of Ziegler, Paddington/Grand Teton, what are some of the considerations there? We have
42 heard from staff a pretty consistent desire by many neighbors that that would be very beneficial and kind
43 of help improve access from those particular neighborhoods onto Ziegler, especially those left-hand turn
44 movements. We've heard from many neighbors in Woodland Park that it would be particularly beneficial

1 for them as Ziegler Road is their only access point into the neighborhood. A signal at that location could
2 potentially serve a lot of different neighborhoods and developments, if there is that local street connection
3 that would accompany it. A signal here could also help fulfill the Active Modes Plan which was recently
4 adopted; it identifies the need for a bike and pedestrian connection somewhere along this stretch of
5 Ziegler. And we've also heard from many neighbors about a desire for that type of crossing as well.
6 Again, as mentioned, right now, a signal doesn't appear to be warranted at this intersection based on
7 current traffic conditions. And, I think it's also important...we've had many neighbors point out as well
8 that Paddington makes a lot of sense because it also is a route to a nearby local school and
9 park...elementary school and park as well.

10 So, the next scenario is a signalized intersection at Ziegler and Hidden Pond, and that's what's
11 being proposed before you this evening with the major amendment proposal. This also provides a signal
12 along this stretch of Ziegler which can act as a bike and pedestrian crossing, and fulfill, you know, that
13 goal in the Active Modes Plan. The big implication with this is that it does preclude the future of a traffic
14 signal at the Paddington and Grand Teton intersection along Ziegler. That's true vice versa as well, so
15 there's kind of a one shot, you know, one signal along this stretch of Ziegler given our spacing
16 requirements. It doesn't necessarily follow the traditional location of where a signal would be placed.
17 Kind of absent some of the history and guidance...policy guidance we have for this with the Corbett
18 street connection, you know, typically, this type of signal would occur at a collector/arterial street
19 intersection, which is Paddington. But, again, this was sort of pointed out by staff at the time, that
20 removing that Corbett street connection could lead to an outcome of moving the location of a future
21 traffic signal. This traffic signal would serve potentially several different developments, although perhaps
22 not as many as at Paddington/Grand Teton...it doesn't help address those particular concerns we've been
23 hearing a lot of as staff about access onto Ziegler from those neighborhoods. We've also heard that many
24 feel that a signal at this particular location kind of prioritizes new development over some of those
25 existing conditions that these neighborhoods have faced for many years. We've also heard from
26 neighbors in Hidden Pond Estates, which is further east, kind of a smaller subdivision, that having a
27 signal at their private drive could lead to some unintended additional traffic. You know, that is a private
28 drive with no outlet. And we've also heard about some concerns with the signal at this location, if that
29 would maybe cause backups...traffic backups during peak periods and completely block the Grand Teton
30 and Paddington intersection.

31 So, given sort of all of these different considerations, the comments, you know, there are maybe
32 potentially a couple of different solutions about where exact access and traffic signal locations could be.
33 Staff is ultimately recommending the major amendment as proposed before you this evening with the
34 signal at Hidden Pond, and some of our key considerations are, first and foremost, we feel that, if there is
35 going to be a signal at Paddington and Grand Teton, it should be associated with a local street connection.
36 However, we have a lot of hesitancy and uncertainty about requiring that particular local street connection
37 given the policy history here with the Master Street Plan updates in 2010. We do support trying to find a
38 location for a signal somewhere along this stretch of Ziegler Road; again, it could help meet some of
39 those Active Modes Plan goals for a bike and pedestrian crossing along this stretch of Ziegler. Really
40 only options to cross safely right now are to go all the way up north to the Horsetooth and Ziegler
41 roundabout, or down south to the Council Tree light. We also do feel that this particular access location
42 and a signal is more preferable than the original ODP approval which had that channelized T intersection
43 further south. It's somewhat of a more unusual type of intersection, and it did result in some impacts to
44 the Front Range Village service access entrance as well. And so, with that, staff is recommending
45 approval of this major amendment to the overall development plan. We do have staff here from Traffic
46 Operations and Engineering as well that can help answer questions.

1 CHAIR KATZ: Thank you, Ryan, I appreciate that. That was a great detailed analysis. At this
2 time, the Commission members have an opportunity to ask clarifying questions to both staff and the
3 applicant. I think I have a couple, but I always yield to my other fellow Commissioners. So, would
4 anybody like to go first?

5 COMMISSIONER MICHELLE HAEFELE: I have a question.

6 CHAIR KATZ: Go ahead.

7 COMMISSIONER HAEFELE: So, would there ever be a scenario where the signal at
8 Ziegler/Hidden Pond...the ODP, that new signal...the new one proposed tonight, would be removed or
9 replaced by a signal at Paddington and Ziegler? Is there any scenario under which that might happen in
10 the future under whatever conditions result?

11 MR. MOUNCE: I think it would be unlikely. Not to say that sometimes things don't change
12 within the transportation network, but, you know, this seems like it would be sort of the route forward for
13 the foreseeable future.

14 CHAIR KATZ: Ryan, you did a really good job explaining about the Master Street Plan and
15 the...Council's elimination of the Corbett connection, but, you know, maybe you could turn over to the
16 City's traffic engineers...of why this intersection makes more sense from an engineering perspective.

17 MR. STEVE GILCHREST: Good evening, Chair, Commissioners. My name is Steve Gilchrest
18 with Traffic Operations, City of Fort Collins. To give you an idea of...with the signal warrants...with
19 this location, it's, one, the amount of traffic that's going to be generated from this development will meet
20 those warrants. There are nine warrants outlined in the Federal Highway Administration guidelines for
21 Manuals on Uniform Traffic Control Devices. With the Ziegler, Paddington/Grand Teton intersection,
22 those warrants aren't met. And those warrants take into consideration volumes, delays...there's some
23 warrants that aren't really considered, you know, there's some railroad track warrants, those types of
24 things. So, the general warrants at Ziegler and Paddington, ideally, aren't met at this time. It's unlikely
25 to have them meet at any time without adding more traffic to it. You know, that's one of the
26 considerations with this is, if there was that connection from this development up to Paddington, there
27 would potentially warrant those signals at Paddington and Ziegler. But, without that, it's very unlikely.
28 Is this...the Hidden Pond location, the ideal location? No. Within our Land Use Code, within our
29 standards, Paddington would be typically the intersection we signalize. You know, we look at our grid
30 pattern, our arterials are on a mile grid pattern, half mile we have our collectors, in between that we
31 typically have possibly a ped signal at that quarter mile. Unfortunately, the way things developed, with
32 Front Range Village, the Council Tree intersection with the large size development, with the retail there,
33 it warranted a full signal. That would be kind of typically where our quarter mile ped signal would be.
34 Ziegler and Paddington would be, you know, our typical collector street, but with this area, it's a little
35 unusual because Grand Teton, number one, has no other connectivity to the east, very, kind of smaller
36 neighborhood. And same with Paddington, there's no connectivity to get anywhere except out to Ziegler.
37 So, ultimately, yes, Ziegler and Paddington would be the ideal location, but feasibly, from a standpoint by
38 our traffic standards, we wouldn't likely signalize that, you know, to a full signal, unless it met those
39 warrants.

40 CHAIR KATZ: Thank you, Steve. So, just to clarify, could you repeat who regulates these traffic
41 warrants again? You said it was the federal level?

1 MR. GILCHREST: So, the warrants are outlined in the Federal Highway Administration Manual
2 on Uniform Traffic Control Devices. Those warrants are the guidelines the City follows for any new
3 signal installation that we put in in the city.

4 CHAIR KATZ: So, the City’s preference would be to have it at Paddington, but because of these
5 federal warrants that we as a City must follow...is why that was chosen. Is that correct?

6 MR. GILCHREST: No, the warrants basically just say that the signal isn’t warranted at
7 Paddington. The placement of the signal, and this is where there’s some of those details within our Land
8 Use Code...one of the details is that no signal should typically be placed within a thousand feet of each
9 other. Drive anywhere in Fort Collins, we’ve kind of gone away from that just because of the way things
10 have developed. Our preference, you know, the City’s, if we had our ultimate goal of that grid pattern
11 would be, you know, that main half mile street would have that full traffic signal. That just allows for
12 good progression, good access, those types of things. The way Fort Collins developed, it’s just not
13 possible in all these scenarios. So, with this development, right now, they will generate enough traffic to
14 warrant a traffic signal and can justify the placement of one at Hidden Pond. Without a connection up to
15 Paddington, Paddington doesn’t warrant a traffic signal based on those federal guidelines, and unless
16 there’s more traffic added, it probably never would.

17 CHAIR KATZ: Okay, what if there was a connection from the ODP on Edmonds to Paddington?

18 MR. GILCHREST: There’s potential for a signal there then at Paddington and Grand Teton, but it
19 would require that connection, which we’ve kind of stated with Ryan’s presentation, is...would that be a
20 collector, or would that be...because it would serve more of a collector standard versus the local street
21 which it would be built as.

22 CHAIR KATZ: Okay, thank you.

23 VICE CHAIR JULIE STACKHOUSE: So, I have a couple of follow-up questions. I think it’s
24 really important that everyone is clear that the reason the signal is going in here is because this
25 development creates enough traffic to warrant it and has to do it. So, that’s just part of the...part of what
26 you have to present to us, and we understand that. The other piece though, that I continue to maybe
27 struggle with a little bit, or maybe just not understand. I do understand very clearly that this issue of
28 having a connector street from the ODP, Corbett, up north, was considered, was removed from the Master
29 Street Plan, was explicitly discussed with the City Council at some point, apparently, what, in 2010? Can
30 you clarify for me what action would...would the City Council need to take an action to amend that
31 Master Plan again for this Commission to even consider the alternative of a through street there with
32 Corbett?

33 MR. GILCHREST: Are you asking me if they would be required to approve...if it’s changed to a
34 collector street, that would be a change to the Master Street Plan then...that would need to be approved
35 by Council. The local connection wouldn’t require approval by Council.

36 CHAIR KATZ: Matt Delich, are your findings...I’d like to know if your findings are consistent
37 with City’s, just to make sure everybody is on the same page.

38 MR. MATT DELICH: Matt Delich, Delich Associates, we prepared the traffic impact study for
39 this development, as well as a previous one back in 2020, maybe, 2021, I’m not sure. Yes, basically the
40 findings are the same. We did analyses with regard to assigning some traffic with a connection to
41 Paddington, and the only place I might differ is...the slide on the screen earlier was would likely be
42 warranted, and I would change that to may be warranted as opposed to would likely be warranted.

1 And...because the finding was that it was marginally warranted in one peak hour, and as mentioned
2 earlier, the Manual on Uniform Traffic Control Devices...there's nine warrants, but typically, the ones
3 used in intersections such as these are about three or four, and it's only marginally warranted with one of
4 them.

5 CHAIR KATZ: Thank you.

6 MR. DELICH: And, let me also say, the word federal came up. The Manual on Uniform Traffic
7 Control Devices is a document essentially put out by the U.S. DOT, and it requires input from traffic
8 engineers, cities, all over the country. It's not a federal warrant, it is the traffic signal warrants for the
9 United States.

10 CHAIR KATZ: Thank you.

11 VICE CHAIR STACKHOUSE: While you're there, just to be sure I'm clear...you did the traffic
12 study with the first ODP proposal and then the traffic study with this proposal, is that right?

13 MR. DELICH: Correct.

14 VICE CHAIR STACKHOUSE: And, the first proposal did not warrant signalization; the traffic
15 was going to be through channelized T at a different location?

16 MR. DELICH: Correct.

17 VICE CHAIR STACKHOUSE: But by, I assume, changing conditions as well as the movement
18 of the ingress/egress to this development, it changed the outcome and it now warrants signalization...is
19 that correct?

20 MR. DELICH: That's correct. Now, the channelized T was not lined up with Hidden Pond; you
21 saw the graphic I think. And the channelized T...there's one a Milestone and Timberline if you can recall
22 where that is in Fort Collins...there's a bunch of them in Loveland. And, it allows left turns, minor street
23 left turns, to make a two-step turn. You cross, in this case, the southbound traffic...you only have to find
24 gaps in the southbound traffic, and then you enter a median, and then you have to find a gap in the
25 northbound traffic. So, it's two different movements, and that's why the channelized T was a solution
26 before. And now, with it lining up with Hidden Pond with the Young property coming in, it just made
27 sense to do a signal. And I might also point out that, ideally, signals are at half mile spacing. Obviously
28 this section of Ziegler can't do that because we've got one at Council Tree, but know that Hidden Pond is
29 only about four hundred feet south of Paddington, so it's not at the half mile spacing, but it's pretty close.

30 CHAIR KATZ: Thank you so much, Matt. Do any other Commissioners have clarifying
31 questions? Go ahead, York.

32 COMMISSIONER YORK: Yes, on the proposed crossing at Hidden Pond, you mentioned that it
33 would be a signal for pedestrians and bicyclists, but you said it would be button-activated. Would that be
34 only button-activated, or would it also have the cameras to be automatic if they're in a traffic lane?

35 MR. GILCHREST: So, our new standard for traffic signals will have video detection if there's
36 bikes there. It depends a little bit on the configuration of the intersection. Hidden Pond, especially on the
37 east side, is just kind of a two-lane road; there's not a great area for detection. There's a possibility we
38 can set that up to collect bike data if they come up. Same with on the west side; we should be able to do it
39 on the west side just because there's going to be a larger cross-section of the street there. But, yeah, bikes
40 should be able to get detected; pedestrians will have to push a button.

1 COMMISSIONER YORK: Okay, and then a follow-up on that was that currently the low-stress
2 network for the bicycle is on Paddington. How would that connect into that intersection...the Hidden
3 Pond intersection...for the signalization for bicyclists to continue the low-stress network?

4 MR. GILCHREST: There will still be the bike/ped connection where the proposed vehicle
5 connection was. I can't remember, is it Edmonds, I believe is the street? There will still be that bike/ped
6 connection that they can get up from this development to Paddington.

7 COMMISSIONER YORK: Right, but I was talking about crossing at Ziegler actually, because if
8 you're trying to get from Paddington to go north, you would have to go south to cross at the light, and
9 then...or, if you're going north on Ziegler and you want to go west on Paddington, then you would have
10 to cross ahead of time then go against traffic to get up to Paddington. And so, I didn't see that in the
11 documents about how the bicycling and pedestrian routes would be navigated through there. So that's the
12 reason why I was asking what would be the connection.

13 MR. GILCHREST: There isn't one other than what I proposed.

14 COMMISSIONER YORK: Okay, I'll let somebody else go for a minute.

15 CHAIR KATZ: Anybody else before public input? Ted, do you want to go?

16 COMMISSIONER SHEPARD: Clarifying question, I think for Steve or for Matt. In the traffic
17 study on page eight, I'm looking at the level of service for the current Ziegler/Paddington/Grand Teton
18 intersection, and I'm seeing that the westbound left through and right are all level of service F. And what
19 really surprises me is that the right turn is an F. I get the through at an unsignalized intersection, and the
20 left being F, but the right turn is an F. And anyway, so I'm looking at these F levels of service currently
21 as it exists out there today, and that doesn't warrant a signal?

22 MR. GILCHREST: No, it doesn't. Part of the reason behind that is the fact that it's a single lane
23 movement, so you're left turns, your through movements, they're all blocking those right turns, typically,
24 as well. So, that compounds that and just the amount of delay with the low volumes of traffic still doesn't
25 warrant a signal.

26 COMMISSIONER SHEPARD: Thank you. And, it's interesting that the traffic study tells us
27 what the delay is, and that these delays are 54.9 seconds for the A.M., and 79.2 seconds for the P.M. Do
28 we have any similar conditions like that along the arterial network where delays are that significant?

29 MR. GILCHREST: I couldn't name one off the top of my head, but I guarantee there probably
30 are.

31 MR. DELICH: If I could chime in, Matt Delich again. Yeah, there probably are a number of
32 intersections where the delays to the minor streets are that long, and perhaps even longer. A number of
33 years ago, Fort Collins, because it's an arterial street, allows level of service F for minor street
34 movements because there's just absolutely nothing you can do about it.

35 COMMISSIONER SHEPARD: What about the two-stage left? You're even prevented...that
36 even accounts for the two-stage left.

37 MR. DELICH: I'm not sure I understand.

38 COMMISSIONER SHEPARD: Well, the...those delays take into account that the left turn could
39 be a two-stage left.

1 MR. DELICH: It could be in a channelized T, a safe channelized T. To do a two-stage in an open
2 intersection like Paddington/Grand Teton and Ziegler gets a little dicey.

3 COMMISSIONER SHEPARD: Okay, thank you. While you're there, one other question for
4 clarification purposes. I recall that the mile-by-mile arterial section line grid that we have, that it was
5 acceptable to have signalized intersections at the third mile, so you'd have two within a mile, not just one
6 at the half mile. Did that get deleted as a policy? I always thought the third mile was...so you'd have
7 two signalized intersections within a one mile segment on the arterial system.

8 MR. DELICH: Steve can chime in, but it's my understanding that the better spacing for signals is
9 at or near the half mile.

10 COMMISSIONER SHEPARD: Okay, thank you.

11 MR. GILCHREST: Just to add to that, so when you talk about the...as I laid out the grid pattern
12 with the half mile spacing for a full signal, you could look at it and...that's where I talked about the
13 potential of two ped signals in between there, you could probably space those out accordingly. I don't
14 know the standard off the top of my head, but yeah, it would probably work if you had probably that third
15 mile spacing on two full signals. It would preclude, probably, any ped signals in between those though.

16 CHAIR KATZ: Yeah, if you have another clarifying question, go ahead.

17 COMMISSIONER HAEFELE: Yes. We're focusing on the traffic, and I'm sure we're going to
18 talk about traffic for a while, but the ODP, the change, adds some acreage to the development, and what
19 would be the use for that added property, what isn't being used as an intersection? Is there any change or
20 anything that we should know about for that additional piece of property?

21 MR. SHERRILL: Again, Jason Sherrill. So, it's...the location of it kind of was, in our previous
22 ODP, our kind of mixed-use, commercial area around that, so it will kind of blend into the commercial
23 component. So, what we have in our PDP is actually where the daycare center would go, and some
24 additional detention because our site is burdened by significant off-site detention. So, that's what
25 intended to be there.

26 COMMISSIONER HAEFELE: Okay, thank you.

27 CHAIR KATZ: Any other clarifying questions before we jump into public comment? Go ahead.

28 COMMISSIONER SHEPARD: Ryan, could you put up slide eight? This was the information
29 that you provided for us as a result of the work session. And I'm looking at this, and I'm looking at the
30 Paddington counts, being a 24-hour in the year 2018, at 1,177, and that's less than Kingsley. That's
31 remarkable to me. Paddington is such a short collector; it's only about a third of a mile, where Kingsley
32 is a much longer collector. Is it the difference in years, or...I guess I'm surprised at the high vehicle
33 count on Paddington between Kingsley and Ziegler, and yet I keep hearing that the Paddington/Grand
34 Teton, Ziegler intersection doesn't meet warrants. But, look at those 24-hour vehicle counts on
35 Paddington. That's not a small number.

36 CHAIR KATZ: So, we're asking questions. Is the...what's the question? Can you just clarify
37 the question?

38 COMMISSIONER SHEPARD: I guess I can't come up with a question.

39 CHAIR KATZ: Is it just what accounts for that discrepancy?

1 COMMISSIONER SHEPARD: I guess my question is, is Paddington the shortest collector in the
2 city?

3 MR. GILCHREST: I can't truly answer that at this point, but it is one of the shorter ones.

4 COMMISSIONER SHEPARD: And it's only a collector east of Kingsley?

5 MR. GILCHREST: Yes, and then in the Master Street Plan, you have Sunstone that actually
6 functions as the other collector that connects over to Caribou.

7 COMMISSIONER SHEPARD: But it's built as a local?

8 MR. GILCHREST: It's built as a local; it was built prior to the English Ranch neighborhood
9 being built.

10 COMMISSIONER SHEPARD: Does Sunstone, since it serves three neighborhoods, does it have
11 a higher vehicle count than Paddington?

12 CHAIR KATZ: Ted, I do want to make sure that we're addressing the major amendment.

13 COMMISSIONER SHEPARD: Okay, I think Michelle mentioned it, that new acreage is being
14 added to the ODP, which I think cascades into a discussion that is...broadens it for me. So...

15 CHAIR KATZ: Okay, thank you. York?

16 COMMISSIONER YORK: So, you mentioned that Master Street Plan has to be approved by City
17 Council. So, if we...if the light is approved for Hidden Pond Drive, and doing that, does that need to go
18 to City Council as well because that would be changing the Master Street Plan as it's currently
19 established?

20 MR. GILCHREST: That's not changing the Master Street Plan. The Master Street Plan only
21 aligns where the streets go, not where any traffic signals go.

22 COMMISSIONER YORK: Okay, thank you.

23 CHAIR KATZ: That's a good question. Anybody else have a clarifying question? Okay. As we
24 move into public comment, first I just want to thank you all. It is really important that our community
25 comes out and gives us new evidence. I think we can all see that, when we do zoom out, like physically
26 zoom out, it does look like Paddington makes the most sense, logically; it's consistent with some of the
27 comments we've seen, you know, even City staff said if it wasn't for other factors, that would make
28 sense. But, we do need to...you know, before we start making comments, we need to zoom out again and
29 realize it is a giant chess board, right? And, there's other things at play here, like collector streets being
30 removed, you know, this particular potential development, you know, creating and needing a traffic signal
31 in itself, and it's just kind of the order of the way that development happened. So, just think about that
32 when we're making comments. And I also really want to specify, we are only...we only need to hear
33 comments, please, for things that are relevant to this amendment to the ODP, not the ODP as a whole, we
34 already heard that last year. So, just please, you know, take that into consideration when you comment.
35 You know, make sure that it's within the framework of this amendment and this change to the ODP, and
36 not the ODP as a whole. So, thank you. With that, could I see a show of hands of who would like to
37 address the Commission? Okay, and remember those joining us via Zoom, please raise your hands using
38 the icon, or if you're joining us on the phone, star nine. I will give you a few second to raise your hands
39 now. Shar, are we seeing any hands go up?

1 MS. MANNO: Currently we have three hands raised.

2 CHAIR KATZ: Okay, well we are going to start with members that have joined us today in
3 person. Please line up, if you'd like to address the Commission, at both podiums. You can do that now.
4 And we'll just go back and forth, so please line up at both of them; try to make it as even as possible.
5 Okay, we will start in the middle, we will alternate. Please state your name and address for the record,
6 and you will have three minutes please.

7 MS. JANET ZUNIGA: Hi; I'm Janet Zuniga, and I live at 4026 Mesa Verde Street in Woodland
8 Park. I am not a voice of power or money like these gentleman behind me, but I'm a citizen of Fort
9 Collins; I've been here like thirty-four years. I've been in my home over twenty years. When we moved
10 into our house, the speed limit on Ziegler was twenty-five, and so it was no problem to get to the park, or
11 to take our kids over to sports activities at the school over there. You know, now it's forty miles an hour;
12 you just can't get across the street. Even during COVID, you were likely to get hit by a car when there
13 were hardly any cars on the road, there was that much traffic right there. And the traffic is coming, you
14 know off of I-25, people are still going fast, they're going over the speed limit all the time over there. It's
15 treacherous. And we've been asking for a light at Grand Teton and Paddington for about fifteen years,
16 over and over, we've just been denied. And in Woodland Park, it's just like living on an island; it's really
17 hard to get out of there, and it's just not safe. I don't know, maybe you guys have the information in front
18 of you on how many accidents happen at that intersection, but I know there've been quite a few.

19 So, as I say, I'm not the voice of power, but I'm a citizen of this city; I've been here a long time,
20 and I feel like it's warranted even though nobody else seems to agree with that. I'd like to be able to get
21 out safely, I'd like my kids who are driving now to be able to get out of our neighborhood safely. You
22 just can't hardly turn left. And even turning right is really hard. Thanks for your support, Ted. I know
23 you've been out there, you've supported our neighborhood all along. I just appreciate your positive
24 comments. Thank you.

25 CHAIR KATZ: Thank you, Janet. Appreciate the comments.

26 MR. JEFF JANELLE: I have a...oh, there it is, there's a visual. My name is Jeff Janelle, and
27 thank you for hearing us, letting us speak. I live at 2709 Sunstone Drive. Real quick, I think the reason
28 for those numbers on Paddington versus the Kingsley, is there's a lot of traffic that filters from Fox
29 Meadows, Sunstone using Caribou, then Sunstone, then they cut into Paddington and/or Sunstone and
30 turn at Kingsley, and there's a steady flow through there. So, that's that.

31 Something to think about...the density has been an issue to everybody in the neighborhood. It's
32 just like...huge red flag. The fact that a single thirty-three acre development warrants a signal versus 556
33 homes in English Ranch, you know, three cars a household, whatever, Woodland Park Estates, doesn't
34 make any sense. And then, to say, oh, well let's do collector, whatever. So, if the development warrants
35 a signal, it sure as heck does not need to go into English Ranch. If you've got something that can warrant
36 a signal, that's crazy...absolute craziness. So, that's just the emotional side...just, it's nuts. There's just
37 no way...Kingsley is a wonderful...we bought a house from Dan, original owners, been there all along,
38 love it. We stayed put; we love it there. The pedestrian flow on Kingsley is amazing, there are even
39 running races that utilize it. To have more traffic there would be horrible. We have a handicapped
40 individual that commutes to work on there, tons of bikes. I'm a cyclist...and the Ziegler thing over there,
41 when I come in from a long ride from the south trying to get in my neighborhood crossing Ziegler, it's
42 horrible. So, whatever.

1 Okay, so what I have over here, I think is...it may not be perfect, but I think it's forward thinking,
2 I think it's Fort Collins, I think it's trailblazing. We can set the bar for different solutions; we don't have
3 to follow a cookie cutter mold. So, let me see if this thing works; I don't want to blind anyone.
4 Okay...oh great, it's not showing on the screen. Well...

5 CHAIR KATZ: You've run out of time...we want to hear what you have to say, but you're
6 running out of time, so if you could do it without the pointer.

7 MR. JANELLE: Okay, bottom right corner, that is a protected turn lane. When it queues up to
8 three or four cars, it triggers that intersection up there. Can I borrow someone else's time?

9 CHAIR KATZ: You can keep going.

10 MR. JANELLE: Thank you, I appreciate that very much. Triggers the intersection where it
11 should be, gives a break to those people coming in, once they have completed their business, Hidden
12 Pond has a fighting chance to get in. There are multiple options within the development. Smart
13 people...I was a UPS driver, you never turn left, it's always right. People that want to go southbound
14 coming out of this corner pocket of businesses, whether it's child care or whatever, typically a distracted
15 driver, just picked up the kids, go out there. Paddington, there's a divider that prevents cut backs, that's
16 what the yellow represents. Those trees go, the visibility, the triangle, is perfect. You've got perfect
17 clearance for that intersection, that merge. There's no reason that can't be done. If someone can't
18 negotiate that, they shouldn't have a driver's license; it is picture perfect, okay? And don't go to DIA,
19 because you'll never make it if you can't work this. That divider down Paddington prevents the cut
20 backs, I probably said that. So then, you've got a dedicated...my original plan had an extra lane that was
21 a flow out. This requires no modification other than the structure for the roadway, a couple culverts, mild
22 deepening of the detention areas, and it's back where it was. Trees relocated, and then you've got the
23 crosswalks. So, I just think it makes a lot more sense. Yes, it's different; this is Fort Collins, we do
24 things differently. We can innovate; let's just do something better. I don't think it's at any extra cost
25 really. That little bit right there where the green trees are, that's English Ranch HOA. We can deed, we
26 can quick claim an easement, whatever it takes, we can make it work, and I know my neighbors would
27 support that. There's, combined, 800 people probably.

28 CHAIR KATZ: Thank you.

29 MR. JANELLE: So, anyway, done, thank you, I appreciate your willingness...

30 CHAIR KATZ: Thank you so much for the work you put into that, thank you.

31 MR. BRAD KREIKEMEIER: Brad Kreikemeier, 3380 Hidden Pond Drive. I would like the
32 Commission to consider reimplementing the connection road. Hidden Pond only has fourteen lots,
33 fourteen home sites in the neighborhood and, as discussed earlier, a light at Paddington would serve many
34 more neighborhoods, or many more neighborhoods and also a lot more traffic and households.

35 CHAIR KATZ: Thank you, Brad.

36 MR. DAN BARTRAN: I'm Dan Bartran, I'm the original builder in English Ranch. Jason, what
37 did you do? Skateboarding?

38 Yeah, and Ted, you're right, Paddington has actually three different right-of-way widths on it; it's
39 a very unique road, and a very short road. Background on when Raintree came in...I was active in the
40 approval of that, and the concerns of the neighborhood. Basically, the reason why Edmonds was taken
41 out is, the City said they would do that because the neighborhood was concerned about traffic coming

1 from there and then going through...just like we're getting from the other direction. And they're right,
2 there's a lot of traffic that goes down to Paddington. But, the City agreed that Kingsley, you know,
3 people would cut through and go to Kingsley at that point. What you have right now is, with the
4 roundabout, you've just got a continual grip of traffic going south, and then going northbound especially,
5 because I take it every day. Going north, you've got people turning right off Harmony and going down
6 the road, and unless they get stopped at the light, you wait there quite a while.

7 Looking back at what the City had said originally, my concern would be, if you opened up
8 Edmonds again, and gave the people the ability to turn left, we would get a lot of traffic in that
9 neighborhood again. You know, potentially, I don't know, you know, forcing a right-hand turn through
10 the detention, I don't know, might be...I think it's a tough decision for you guys, to be honest. So, thanks
11 for my time.

12 CHAIR KATZ: Thank you, Dan.

13 MR. STEPHEN CLARKE: Good evening, my name is Stephen Clarke; I live at 3405 Hidden
14 Pond Drive. I'm also the Hidden Pond HOA president, so I'll be representing most of the neighborhood.
15 I really like that proposal that was just shown a little bit ago. I'm not in favor of having the traffic light in
16 front of our neighborhood. As was mentioned in the proposal, it's a privately owned and maintained
17 road. We get a lot of traffic coming through even though it already has three private, dead end signs on
18 the road, we still get a lot of traffic coming through. One additional no outlet sign won't make a
19 difference. What happens is people come in, turn around and speed out of the neighborhood, because
20 they made a mistake. And I don't want to have more of that traffic. We have a lot of kids in the
21 neighborhood; I don't want to have to deal with that.

22 Lastly, if the proposal to have Hidden Pond light there, I'd like to work with the developers to see
23 how we can mitigate that traffic, how we can mitigate whatever else will come through. What would that
24 take to help minimize that traffic? As well as I'd really like to not have the Hidden Pond name continue
25 on the west side of the road; I'd like to have that separate so when people are plugging in addresses and
26 so forth, they don't make the right turn into our neighborhood by mistake, they go to Jason Lane,
27 whatever, some other name, to go a different direction, to not confuse it with our neighborhood. Thank
28 you for your time.

29 CHAIR KATZ: Thank you so much, Stephen.

30 MS. TAMARA BURNSIDE: Hi, my name is Tamara Burnside; my address is 3902 Glacier
31 Court, I live in Woodland Park Estates. I really like this new photo that you guys saw of cutting onto
32 Paddington, have it be a right turn only onto Paddington so they can't cut through English Ranch. I
33 wanted to make a point about what the developer said about the light at Hidden Pond helping us go north.
34 We don't have a problem going north, we have a problem turning left onto Ziegler going south crossing
35 two lanes of traffic, most of the time going 45 to 50 miles an hour. It's not a problem going north, and if
36 there's a light put at Hidden Pond, it's going to back up the traffic at that light and make it even harder for
37 us to turn south. That's all I wanted to say.

38 CHAIR KATZ: Thank you so much, Tamara.

39 MR. JAMES KING: My name is James King; I live at 2921 Sunstone Drive. The purpose that
40 this meeting, or this discussion, was called, was for a light at Hidden Pond. The discussion of having a
41 light at Paddington seems to be misdirecting what the purpose of the discussion was for. But, I would say
42 that anything that it would add access to Paddington from the new development would create all sorts of

1 havoc in that neighborhood, and I think that it would be best if the focus continued to be on the question
2 of a traffic light at Hidden Pond, and not a traffic light at Paddington. Thank you.

3 CHAIR KATZ: Thank you so much, James.

4 MR. CRAIG LATZKE: My name is Craig Latzke; my address is 3908 Mesa Verde Street, that’s
5 in Woodland Park. The staff seems to have done a phenomenal job representing the pros and cons, and
6 tradeoffs, and concerns, with their detailed analysis. I’m glad the developer is working to supply needed
7 housing units to our city, and I’m thankful for your time here tonight; your questions to staff represent an
8 understanding of the topic. I and many of my neighbors share concerns regarding safe pedestrian and
9 bicycle crossings of Ziegler, and the ability to safely exit our neighborhood.

10 My personal primary concern is pedestrian and bike crossing from Grand Teton to Paddington
11 across, to access the neighborhood park and school. This amendment would create a pedestrian crossing
12 closer to us, but that same signal does not make sense for that use, as York’s questions illustrated. It
13 would also make a mess of the vehicular traffic out of our neighborhood, for example, by backing up
14 southbound traffic so that it blocks our intersection. Even worse, the signal in the proposed amendment
15 ensures that a signal will never be constructed at the more logical location of Paddington and Grand
16 Teton. Staff appears to have their hands tied by a policy decision in 2010 to modify the Master Street
17 Plan. This is keeping them from being able to consider or recommend a connection from this
18 development to Paddington, and then signaling Paddington and Ziegler. You may, likewise, have your
19 hands tied. If this amendment is approved, I will appeal that decision because the amendment precludes a
20 future signal at Paddington. With that appeal, I hope Council will consider working with you and staff to
21 reevaluate the 2010 policy decision in light of different considerations at play thirteen years later, and
22 because of the negative impacts to these neighborhoods. If I misunderstand the situation, and you are
23 able to recommend to the Council that they reevaluate the 2010 policy decision, and postpone this
24 decision on this amendment to await that review, I ask you to do so.

25 Finally, I wish to contradict or clarify a statement that the developer made that the signal at
26 Paddington is not warranted. To the degree that remains true would be an outcome of the approval of this
27 amendment and placing of this signal. There are other truthful statements made by the developer which
28 similarly missed the mark on context. Thank you.

29 CHAIR KATZ: Thank you, Craig.

30 MS. SARA OLSEN: Hello, my name is Sara Olsen; I live at 3126 Mesa Verde Street in
31 Woodland Park. And I would just ask you to please let common sense prevail here. It seems like the
32 reasonable thing to do is to put that light at Paddington. It would help all the neighborhoods; those in
33 Hidden Pond are advocating for that also. They say that we can cross safely at the roundabout as
34 pedestrians and bikers. I can tell you I have done that many times, and been nearly hit many times. That
35 is not a safe route for a biker or a pedestrian, or even a car sometimes. So, I would respectfully ask you to
36 consider going to our neighborhood yourself and trying to get out at five or six P.M., or anytime between
37 seven and nine A.M., and see how difficult that is. Thank you.

38 CHAIR KATZ: Thank you so much, Sara. Is there anybody else that would like to speak in
39 person? Go ahead.

40 MS. DEANNA ORTIZ: I’m Deanna Ortiz; I live at 3103 Zion Court in Woodland Park. I just
41 wanted to back up the other comments that have been made about a concern about putting a light lined up

1 with Hidden Pond, that a more logical location I think could be found rather than there as it's really
2 needed to exit that Woodland Park Estates neighborhood. And that's all.

3 CHAIR KATZ: Thank you so much. I don't see anybody else lined up with us in the Chamber
4 today. So, at this time, we will proceed to those joining us via telephone or Zoom. So, Shar, whenever
5 you are ready.

6 MS. MANNO: Sure. We have Irene Stein up first. Irene, you are able to speak.

7 MS. IRENE STEIN: Hi, I'm Irene Stein; I live at 4050 Kingsley Court...that's the cul-de-sac
8 that's the closest to the bike and walkway that goes up between Affinity up to the Village there. And I've
9 been...I've lived here for about eighteen years, so I was at all the meetings when we talked about taking
10 Edmonds off the Master Traffic [*sic*] Plan, and I remember I was very in favor of taking that off the
11 Master Traffic [*sic*] Plan because we were worried about...in my head, the story I tell myself is the cars
12 coming from the high school, you know, going down Kingsley, and trying to get to the...cut through
13 English Ranch to get to the shopping center. And, it's like, we just don't want that. So, here we are, you
14 know, ten or so years later, and the...Edmonds would not go directly to the shopping center, Edmonds
15 would go particularly to, you know, kind of more of a residential and park area. I speak for myself, but
16 I'm not personally that worried anymore about cars coming, you know, from Horsetooth, down Kingsley,
17 Paddington, to Edmonds, and I see the problems on not having a traffic light at Paddington. I'm very in
18 favor of putting the traffic light at Paddington and Ziegler, and if it means, you know, adding that street in
19 Edmonds, especially if you make it a right turn only onto Paddington from the south, that might solve a
20 lot of problems. A second quick point is the amount of traffic that's coming down Ziegler from
21 Horsetooth at time, if there's a light at Hidden Valley [*sic*], I could see that backing up past Paddington
22 really easily. It's just constant, two lanes that are just constant coming down. So, thank you very much.

23 CHAIR KATZ: Thank you, Irene.

24 MS. MANNO: Okay, next we have Cindy S. Cindy, you are able to speak.

25 CHAIR KATZ: Cindy, are you there?

26 MS. JENNY SIMPSON: Can you hear me okay?

27 CHAIR KATZ: Yep, we can hear you now, thank you.

28 MS. SIMPSON: Alright. Hi, I'm Jenny Simpson; I'm at 2638 Stonehaven in English Ranch
29 subdivision and I have a lot of concerns about a light at Hidden Pond for many of the same reasons that
30 our neighbors have already expressed. The Woodland Park neighborhood has been asking for a light at
31 Paddington for years and years because of how difficult it really is to get out of our neighborhoods. And
32 there are three ways through English Ranch from Caribou, from Kingsley, and from Paddington, and
33 depending on what time of day it is, and if I'm coming in or out of the neighborhood, I have to adjust
34 where I enter, where I exit, because the traffic is that bad.

35 I am thrilled that the channelized T has been taken off the table because that was a terrible plan
36 that the neighbors were not in favor of. A light at Paddington would be the most ideal...I actually would
37 really like it if the exhibition that one of my neighbors...I didn't catch his name, but the gentleman in the
38 blue shirt...provided that shows a median in Paddington. That, I think, should be explored; I thought that
39 was a fantastic proposition. And, we the neighbors are who live here. We care about our neighborhoods
40 and the traffic, and we feel like we haven't been heard by this Council. I like what someone said about
41 how...this is Fort Collins, and we can innovate, and we can find a better solution. And while this is an

1 improvement than the previous proposition...this is improvement, but I think we can do better. I think, as
2 a city, we can do better.

3 And so, to the Board, please listen to the residents. You know, we fought very, very hard to not
4 have a connection to the Front Range Village shopping center at Kingsley...both at Kingsley and at
5 Edmonton [*sic*] because of the traffic through the neighborhood...that we know, it would still happen.
6 People would come off of Horsetooth, down Kingsley, out off to Paddington, to Ziegler...they do that
7 now. So, having no connection through the neighborhood, I understand, might go against the Master Plan
8 for the City, but we've had other exceptions before based on the needs of the location, and I think we can
9 do that again. I think there is a better solution than what is proposed here tonight that would make the
10 residents happy, including the new residents for the new development. So, thank you.

11 CHAIR KATZ: Thank you, Jenny. Anyone else Shar?

12 MS. MANNO: No, there are no other hands raised.

13 CHAIR KATZ: Okay, alright. Public participation is closed. We will go to the applicant first to
14 have a chance to answer some questions or provide any rebuttals.

15 MR. SHERRILL: First...again, Jason Sherrill. It's kind of...it's certainly complicated, right? In
16 that by us having the ability, which I think everyone agrees, moving the connection to Hidden Pond is a
17 plus, right? The fact is, it generates the warrants for a signal. So, that's the condition that we are held by,
18 and so, that's...you know, and the fact is, we're funding the light. So, it feels like to me...I know one of
19 the residents made mention that they didn't have issues turning northbound, and I made mention of
20 that...I might not have made myself clear, but the point is, a light at Hidden Pond will still provide some
21 relief because those that are turning southbound out of English Ranch, or even out of Woodland Park,
22 they still now only have one lane of traffic to navigate because the one lane northbound has been stopped
23 with the light at Hidden Pond. So now, they have to still navigate the southbound, but obviously the one
24 bigger concern is navigating northbound and southbound, so I think there's some benefit there that can be
25 recognized even with the light at Hidden Pond, not at Paddington.

26 You know, I'd like to address the gentleman, and we've seen it before, so I appreciate the
27 concept, but the reality is...I know that we learned today that the HOA would provide us access, an
28 easement or whatever, but the geometry of that connection through that pond, I don't really feel like is
29 realistic. Our traffic engineer tells us it's not realistic, our civil engineer tells us it's not realistic, and the
30 reality is, and Jason, I don't know if you want to speak to detention and the effects on detention?
31 Okay...I'll talk in general and if you want to ask Jason specific questions, our civil, but there are already
32 detention issues in the English Ranch neighborhood, so by removing part of that detention pond for this
33 access will only exacerbate their own detention problems, and we are already burdened with significant
34 detention issues to the west of us that we're burdened by.

35 So, you know, I'm happy to answer your questions. I don't know that there's a better solution;
36 this is the best solution that we have, that we actually control. If we had access at Edmonds, full
37 movement access, which I think makes sense. I know that ten years ago maybe, there's was a lot of push
38 for it not to make sense, but I feel like with the way that the communities have evolved, a connection at
39 Edmonds, you know, might be, you know, the best solution. You know, we're trying to find the best
40 solution given all the variables, and so everyone is going to give something, and maybe that is the best
41 solution. But, we don't control that. You know, we don't control an access through Edmonds; what we
42 control is, by purchasing this property, we now can move the connection to Hidden Pond...I'm being a
43 little redundant...and that's what the staff wanted, and that generated a light. We can go back to the

1 channelized T and still buy that property, and still use the channelized T. I mean, that's certainly an
 2 option for us. Staff didn't necessarily like that, and so it felt like this was the best solution. So,
 3 hopefully, the Planning and Zoning Commission will recognize that there's winners and losers on all
 4 sides, and we're just trying to find the best alternative with the conditions that we're subject to.

5 CHAIR KATZ: Thank you, Jason. So, Ryan, would you like to respond at all?

6 MR. MOUNCE: Yeah, there's kind of a couple points we can expand on. So, wanted to start
 7 with sort of the exhibit that was shared, sort of the neighborhood proposal. You know, we really
 8 appreciate kind of the creativity behind that, and we have kind of discussed some of that proposal, that
 9 concept, before...kind of even before the neighborhood meeting for this project. As we started looking at
 10 that as staff, we...as mentioned, we do have some concerns about the viability of that. One of the big
 11 ones is going to be featured around, or centered around, stormwater. That is stormwater for the English
 12 Ranch development right now. You know, based on current standards, it appears to be undersized, and
 13 so, if there is going to be that connection through it, that has to be made up in some manner, and that's the
 14 potential concern. There's also some potential concerns about just the exact location of where it would be
 15 in terms of, again, things like intersection spacing, how close it would be to Ziegler, if people could cut
 16 across, for instance, if there was a left hand turn at that intersection.

17 The other potential issue, and I guess kind of zooming out again from the staff perspective is, you
 18 know, we do have these connectivity standards in the Land Use Code, we do want to knit neighborhoods
 19 together, and that's kind of the terminology we use, is knitting. And we certainly recognize that, you
 20 know, no one necessarily wants more traffic in their development, or their neighborhood, but that is kind
 21 of the intent, and kind of the philosophy behind communities...that these different developments, they
 22 aren't partitioned amongst themselves, they are woven together, and there should be multiple access
 23 points to different arterial streets within your, sort of, section mile. And so, you know, hearing a lot of
 24 support for the idea of a signal at Paddington and Grand Teton, and we've talked a little bit about how,
 25 sort of under the ideal scenarios, that's where it would be located and, kind of, that's how the
 26 transportation network is kind of set up and designed. You know, we are working with some constraints;
 27 we do feel like we have a lot of uncertainty at the staff level around, sort of, whether that connection
 28 between this site and English Ranch to Paddington can be made or not. But, you know, if there is going
 29 to be the work to look at a proposal to connect somehow between this neighborhood...the ODP site and
 30 the neighborhood to the north, English Ranch, you know, I guess the staff perspective is we would really
 31 like to see as much connectivity as possible at that point. That is sort of the base standard in the Land Use
 32 Code, and as mentioned, there are different amenities, like the park and school, that would be beneficial
 33 to, you know, get people to and from.

34 I did want to pull up a couple other comments related to some of the...what we heard. There was
 35 a sort of a comment about sort of the density. You know, this is in the Harmony Corridor zone district. If
 36 you look at, sort of, the policy plan for the Harmony Corridor zone district, it's basis, it does talk a lot
 37 about sort of concentrated activity, a place for higher density development, that's why the zone district
 38 standards do have that minimum density requirement versus a lot of our other residential zones have
 39 maximums. You know, it even limits the amount of single-family dwellings that you can do in the
 40 Harmony Corridor. And this, you know, we have an ODP so far, so we have a density range of 400 to
 41 700 units, and if you kind of average that out across the new numbers with this expanded ODP, that's
 42 about twelve to twenty-one units per acre, so that's very similar to Affinity, just to the west, which is
 43 about nineteen units per acre. It's very similar to other MMN, or multi-family style developments, which
 44 we have also seen in the Harmony Corridor. So, I guess from the staff perspective, certainly it's a very
 45 large site, and because of that, it is a little higher density, and it is generating a lot of additional, you

1 know, potential trips here, but it's not necessarily out of the ordinary in terms of what we've seen and
2 experienced in the Harmony Corridor zone district in the past.

3 And I think...I just really want to mention, kind of, from the staff perspective, we've been talking
4 with a lot of neighbors, and it's been, you know, a great conversation, sometimes frustratingly so about
5 some of the different options, or lack of options, it feels like there is, kind of reviewing this. But,
6 everyone has been very, you know, very great...kind of coming out with these ideas, not moving to just
7 sort of...or moving to, sort of, this creativity aspect and collaboration process, which sometimes we don't
8 always see with some of these developments. So, I also wanted to express that. Thanks.

9 CHAIR KATZ: Thank you so much, Ryan. We're going to give the Commission members one
10 last opportunity to ask clarifying questions, and this will be the last opportunity that the Commission has
11 to engage with the applicant. So, before we get into any deliberation, do any Commission members have
12 any final clarifying questions.

13 VICE CHAIR STACKHOUSE: Mr. Chair, I would just like to...first of all, thank you to
14 everyone who spoke tonight. In my year on this Commission, the comments made tonight were just on
15 point, so thank you for doing your homework on that; it really helps us a great deal. There was one
16 comment made...I can't paraphrase it fully, but essentially raised the question of whether a signal would
17 ever be warranted at Paddington and Ziegler. And I believe at our last Commission meeting, we asked
18 that question, and without traffic flowing through to Paddington, the answer was it was unlikely that a
19 signal would ever be warranted there. Is that correct Ryan?

20 MR. MOUNCE: Yeah, I may have Steve kind of come in and chime in here, but my
21 understanding is, you know, based on current conditions, the warrant is not there. The area around, you
22 know, Paddington, is mostly developed, and we wouldn't necessarily expect to see redevelopment of
23 single-family homes, and so, I believe there's one remaining development site there, that's Mr. Bartran's
24 property, as mentioned, and you know, it's on several acres. And so, I don't know if that, on its own,
25 would generate that additional traffic, but it seems like without additional development or that connection,
26 it wouldn't generate the warrants for a signal in the future. And...okay.

27 VICE CHAIR STACKHOUSE: Yeah, and I ask that question for the benefit of the audience
28 understanding. What we have dealt with in the past, and our own frustration in knowing the fact that
29 without that through traffic, it just limits the options at that intersection.

30 CHAIR KATZ: York, go ahead. I think you had a question?

31 COMMISSIONER YORK: Yeah. I believe looking at the proposal that the neighborhood
32 brought in, that the intersection going onto Paddington, that would be a one-way road, is that correct? Do
33 I understand the drawing?

34 MR. MOUNCE: I believe so, and there may be some nods, yeah.

35 COMMISSIONER YORK: Okay. So then my question is, what rules or regulations do we have
36 for one-way roads in Fort Collins for connections. Are there any that we need to think about while we're
37 deliberating on this?

38 MR. GILCHREST: Honestly, I would have to look into that to see if there's more standards.
39 We'd have to look at, you know, some different signage, those types of things, but typically we don't
40 have a lot of one-way streets unless it's kind of a very isolated type scenario where we have one entrance
41 and one exit. But, this is not something we typically do is just put a one-way street in an area.

1 COMMISSIONER YORK: Okay, thank you.

2 CHAIR KATZ: Any last, final questions?

3 COMMISSIONER SHEPARD: I think a couple of the folks...I recall a comment from
4 Craig...let's just confirm that a local street that moves around an overall development plan does not
5 require amending a Master Street Plan, does not require going to City Council. City Council and the
6 Master Street Plan, I'm asking, only deals with arterials and collectors...is that true?

7 MR. MOUNCE: Yes, that's true.

8 COMMISSIONER SHEPARD: Okay.

9 CHAIR KATZ: Sam, I think you had a question?

10 COMMISSIONER SAMANTHA STEGNER: I just wanted to have a clarifying thing. It sounds
11 like you've done a lot of, like, engagement within that community, the English Stone [sic], right? Or the
12 one that's connecting on Edmonds there. And, but listening to a lot of this public comment, I mean, is
13 there a chance for you guys to recommunicate with that neighborhood about putting Edmonds as a
14 through way with this, at this point?

15 MR. MOUNCE: Certainly there's always additional opportunities for more engagement, and that
16 is, you know, this was a big factor in the original ODP approval, because the question came up about
17 whether to have that local street connection, and ultimately it was determined to have the alternative
18 compliance for just bike/ped. You know, and we did talk about some kind of multiple scenarios, and
19 we're trying to frame the discussion around tradeoffs at the neighborhood meeting for this major
20 amendment as well. And really, what we've been finding as staff...it's been very consistent with the,
21 kind of legacy comments that we have access to from the 2010 era discussions, about a lot of concern
22 about sort of cut through, additional neighborhood traffic, potential safety issues with the additional
23 traffic that would come from this site or Front Range Village...areas further kind of south and west. And
24 so, that seemed to be a very consistent theme, you know, for the past decade or so.

25 COMMISSIONER STEGNER: Even still to this day, it seems like? Okay.

26 CHAIR KATZ: Thank you, Sam. So, I think with that, unless somebody wants to jump in, we're
27 going to probably move into deliberation. No, we'll just push through. So, unless you have a long-
28 winded comment...okay, thanks.

29 Thank everybody...you know, what comes to mind is...I think Ms. Wilson [sic] made a comment
30 when she was at the podium...it was a conversation I had today with a client and he was asking me a
31 bunch of questions, very analytical, he's a civil engineer, and I said I'm not saying this to make you
32 laugh, but, logic rarely prevails. And I think Ms. Wilson [sic] said common sense rarely prevails. When
33 you zoom out and look at the map, Paddington does make the most sense, it does. However, we have to
34 look bigger than that. We have constraints, they are facts. The facts are the Hidden Pond warrants a
35 light. We can only really discuss what we can control. We're past that, that's what the report said. We
36 cannot control that. And again, because this was a pretty hot topic, I kind of let it slide, but we really
37 should just be discussing the amendment to the ODP. And as much as...for no other reasons but as safety
38 for the people in Woodland Park to get across, I wish this light could be at Paddington. But, from the
39 comments and the evidence today, it just seems like there's facts that we're constrained by, and that it
40 needs to be at Hidden Pond, even though, looking at it on the surface, and maybe even deeper than the
41 surface, Paddington seems to make the most sense. So, with that, I'm comfortable where it is on Hidden

1 Pond, although from a safety aspect, I really wish it was at Paddington. But, because of the evidence
2 we've heard today, I will support it...the light being at Hidden Pond...and therefore, I will be supporting
3 the major amendment.

4 VICE CHAIR STACKHOUSE: Mr. Chair, based on our comments tonight, I wonder if it might
5 be helpful if we held a discussion on a couple of items, again just so everyone leaves with a lot of clarity.
6 One is this alternative plan, and I know we've heard a little bit from staff on some of the issues with it,
7 but perhaps that warrants discussion on the part of the Commission. And then the other is this issue of the
8 Master Street Plan and what the Commission can and can't do. I want to be sure that's very clear to
9 everyone. So, I would just suggest that we might want to take those two items for discussion.

10 COMMISSIONER SHEPARD: I'd like to echo on that. Ryan, would it be possible for you to
11 pull up...I think it's your slide fifteen during your presentation...not your overview, your
12 presentation...and I wrote it down as slide fifteen; I think it's a word slide. And there was a bullet there
13 that caught my eye that I'd like to emphasize.

14 CHAIR KATZ: And while Ryan is pulling that, I do also want to emphasize that, remember, let's
15 focus on what we are considering here, and it is the change, it is the amendment. We are not discussing a
16 light that was at Paddington and is now moving down here. If we were discussing the channelized versus
17 this, I would feel more comfortable, but it's important, it's a concern to the community, and that's why I
18 did want to hear everybody and have some discussion, but I do need to kind of, you know, adjust the
19 magnifying glass and focus us to the actual amendments that we are discussing.

20 COMMISSIONER SHEPARD: Thank you, Mr. Chair. Let's see if I can recall which bullet it is.
21 The...I think it's the third bullet. If Corbett Drive is removed from the Master Street Plan, which it has
22 been, so there's no Corbett to Kingsley, that was decided during the Front Range Village deliberation
23 before Front Range Village was even developed. So, that came off the Master Street Plan, and it was
24 offset, but it still came off. The Land Use Code may require a non-Corbett street connection to the
25 property north of Front Range Village; it depends on land uses. And there was also something in the
26 packet...Ryan, thank you for putting in the packet the staff report from last year. And, in that packet,
27 there was a reference to the development agreement. There was an original development agreement for
28 Front Range Village that was going to pledge \$75,000 for traffic calming in English Ranch, and that was
29 in conjunction with the Master Street Plan being amended. I don't think the \$75,000 was ever spent; I
30 don't know...I lost track of that. But, in that development agreement, there is a statement, and it's in the
31 development agreement, so this is a recorded document between the City and the developer, and the
32 developer in this case was Front Range Village, in response to the concerns of English Ranch. And I'll
33 read it, it's on page 318 of our packet. A local street connection from within the currently vacant
34 property, which is this ODP, south of English Ranch, may still be necessary and required by the Land Use
35 Code at the time the vacant property south of English Ranch develops, regardless of the removal of the
36 collector street designation from the Master Street Plan, end quote.

37 And so, that bullet there, and this development agreement language, indicates to me that a local
38 street connection is still on the table. And, what I think is important is that the Young property changes
39 the ODP, and it changes it significantly from a land planning perspective. The applicant has more land on
40 which to be flexibly creative, and it changes a whole lot about access onto Ziegler Road. So, I think the
41 topic is open. Without the Young property being added to this ODP, we're back to the channelized T.
42 But, here we are with the Young pasture, and kudos to the applicant, or owner, for picking up the Young
43 property. That's laudable, thank you for that. And so, I think for discussion purposes and deliberation,

1 I'm open to a conversation about a local street connection to Paddington which would then warrant a
2 signal at Paddington/Grand Teton, Ziegler which isn't warranted now.

3 CHAIR KATZ: I would also like...I'm open to that, but let's also not forget the engineering
4 challenges with the detention with that. So, I think that needs to be in the conversation too, because if
5 we're going to play, you know, we need to play with a full deck, so...

6 COMMISSIONER HAEFELE: So it was my understanding that the drainage issue was only with
7 connecting near Carrick; Edmonds wouldn't necessarily have that same challenge? Maybe that's a
8 clarifying question.

9 CHAIR KATZ: Is that correct, Ryan?

10 MR. MOUNCE: I don't know the full details on that, I'm waiting to see if we have any other staff
11 that might want to respond to that. You know, that was the original identified spot for a connection,
12 originally as a collector street. There...you know, if you look at the English Ranch ODP from the '90's,
13 it identifies that as the spot for that connection. And so, there has been, you know, thinking and planning
14 for it. And certainly just another kind of topic or element I would introduce to this is, you know, there is
15 that intervening parcel in English Ranch as well, so there could be some interim conditions, or, you know,
16 it is potentially also wrapped up around what happens with development on that intervening parcel as
17 well, that connection piece. But, if there was a connection, it would sort of lay the beginnings of that.
18 And certainly, you know, that...during the PDP phase, both for the ODP site and for that other
19 intervening parcel, whenever there is development proposed, that's typically when we see those more
20 detailed analyses on stormwater, engineering, civil, kind of requirements.

21 And we do have a message from Sophie Buckingham in Engineering saying that Edmonds would
22 not present the same stormwater issues.

23 CHAIR KATZ: Thank you.

24 COMMISSIONER SHEPARD: A question for our stormwater engineer. I heard a reference that
25 the English Ranch South detention pond at Paddington and Carrick and Edmonds...well, not
26 Edmonds...is inadequate or deficient, or something like that. But, isn't it not the case that the standards
27 have changed? And that when English Ranch South was developed, or English Ranch, or both, that the
28 pond met the stormwater criteria at the time? So, maybe it's only deficient by current standards, but it
29 was approved with the subdivision. But, be that as it may, I guess the real question is, does it overtop in
30 the hundred year flood? Does it cause erosion? Is it flooding the street? I'm not hearing that; I'm only
31 hearing that it's deficient by what I think are today's standards, but it met the Code at the time that it was
32 developed.

33 CHAIR KATZ: No, sorry. Trying to follow the rules. Do we have anyone from Stormwater
34 available?

35 MR. PAUL SIZEMORE: We do have Sophie joining us online via Zoom that can kind of respond
36 to that comment and question as well.

37 MS. SOPHIE BUCKINGHAM: Good evening, everyone. Sophie Buckingham with Engineering,
38 I hope everybody can hear me okay. I am not a stormwater engineer; I'm not intimately familiar with the
39 stormwater details, but it certainly seems possible that the standards could have changed. I think any
40 work that's done now, the current standards would be applied. I don't think it really makes a big
41 difference whether previous standards were applied. Since it's an existing condition, if no changes were

1 made, I don't think we would require it to be brought up to current standards. But, if changes were made
2 such as making a street connection through the detention pond, any new detention areas to make up for
3 the loss would have to be brought up to current standards I believe. Does that answer the question?

4 COMMISSIONER SHEPARD: Yes, thank you. And I recall working on some pretty tight sites.
5 I understand that if the local street connection is made over the pond, and instead of a wide open pond,
6 there's culverts, and that there's diminished detention pond volume capacity, that's perfectly
7 understandable. And, Jason, correct me if I'm wrong, but there's also a way to gain volume, and I've
8 seen tight urban sites where volume has been gained by raising the walls, by building masonry walls that
9 are impervious, adding two or three feet to the verticality of the height of the pond adds volume. And you
10 don't want to deepen the pond because then you don't get the outfall, but I just throw that out there as an
11 engineering problem that could perhaps be solved in a way, if we go that way.

12 CHAIR KATZ: Thanks, Ted. Ryan, could you remind me specifically what the alternative
13 compliance was in 2022, is that right?

14 MR. MOUNCE: Yes, that's right. So, there are standards in the Land Use Code for sites that are
15 of a certain length, that they need to have mid-block connections. And so, in this case, that would be sort
16 of aligning with where Edmonds and Paddington intersection. And so, typically a local street would have
17 been required there. The alternative compliance in, you know, a lot of recognition of both kind of some
18 of the opposition we heard about that connection, and the policy history of removing the collector level
19 street connection, the alternative compliance request converted that to a bike and pedestrian connection
20 only. So, it was not for a local street that would carry vehicles.

21 CHAIR KATZ: And that's at Edmonds, right?

22 VICE CHAIR STACKHOUSE: Edmonds.

23 CHAIR KATZ: So, I just want to remind the Commission, and Paul, maybe you could jump in.
24 When we heard the group home recently, there was an alternative compliance, and we specifically kind of
25 had to remove that from the conversation because it was already...was that an alternative compliance, or
26 was that...it was an alternative use?

27 MR. SIZEMORE: I think you're talking about a reasonable accommodation.

28 CHAIR KATZ: Maybe that was it...that was my mistake, excuse me.

29 VICE CHAIR STACKHOUSE: So, if I might. First of all, Commissioner Shepard, like to thank
30 you for your in-depth knowledge; I can tell you were a City Planner in the past, you know this stuff. I
31 will admit that on the alternative plan presented by the residents, I have pause simply because it is
32 stormwater. And, you know, we're balancing a lot of ugly things here tonight. We are not going to make
33 everyone happy no matter what decision is made. But, to add potentially significant cost without any
34 certainty that the issues could be mitigated makes me very uncomfortable. I am certainly open to talking
35 more about, though, the connection at Edmonds and whether or not that's something the Commission
36 wants to consider.

37 CHAIR KATZ: We better also confirm that we have the authority to add that condition, that there
38 be a connection at Edmonds.

39 MR. BRAD YATABE: Yeah, I've been keeping an eye, trying to understand where the
40 conversation is going, and I'm not quite sure if Commissioner Shepard is suggesting a...in lieu of the
41 intersection, that the connection be made. I will...would like to remind the Commission that...well, one,

1 I'm not a planner; I can't tell you if that is a feasible solution or not. I think the planners, traffic,
 2 engineering, everybody could give you a better read on that. I do...at least looking...my understanding
 3 is, I don't think that's right-of-way through there, so there's going to have to be acquisition of some kind
 4 of property right to even make that connection, and that is not certain. A private developer does not have
 5 eminent domain powers, so that is a fairly uncertain aspect.

6 But, I think going back to the original application before you, you know, if the applicant is not
 7 willing to entertain a condition like that, I think you need to make a decision on the application that is
 8 before you. I know there's been a lot of concern, I know, from the neighborhood, in terms of the issue
 9 with the location of that intersection, but you do have a proposal from the developer, and to the extent it
 10 satisfies the criteria for a major amendment, I think that is something you're going to have to grant,
 11 because it simply satisfies the criteria. And, if you don't think it does, you're going to have to articulate
 12 why you do not think it satisfies the criteria.

13 But, I think that...and so, I think having some discussion and input on these different alternatives
 14 to understand the full scope of what is occurring, I think that's fine, I think that is important. But, I do
 15 want to focus you back, much as Chair Katz has tried to focus you back, a little bit on what the
 16 application is before you, before you start to run off in a lot of different directions.

17 CHAIR KATZ: Thank you for articulating that much better than I can, Brad. I appreciate you.
 18 The private property is a good point. You know, we cannot sit here and say, hey, applicant, do that
 19 because he doesn't own the land. We can't tell the City right now to impose eminent domain to do it
 20 right now, and we do have a proposal in front of us even if most of us think that there are alternatives that
 21 are potentially better. I want to circle back to the comment that was made by the applicant that we have
 22 constraints, and we can only make a decision on what we have control over. And right now, we have a
 23 proposal in front of us, and does it or does it not meet the Land Use Code? So I'm trying to make this a
 24 little bit more binary so we don't run all over the place.

25 COMMISSIONER STEGNER: I guess my only challenge is that I kind of feel like maybe the
 26 neighborhoods didn't fully realize that by implementing the stop light at Hidden Pond that it would
 27 deduce [*sic*] that ability at Paddington, and that's my only concern and challenge with this, is
 28 by...because I do feel that there is a big need for more traffic control in that spot, and that's where I'm a
 29 little challenged in that I get that this is for Hidden Pond, but I'm also really challenged with that fact of
 30 knowing how bad that intersection can be myself, and the fact that if it deducts that in future, maybe that
 31 neighborhood would be more willing to talk about the Edmonds situation now more knowing that part of
 32 it. That's just where I'm kind of at.

33 VICE CHAIR STACKHOUSE: If I might add a little bit of history. We did discuss that point at
 34 the first hearing, quite extensively. And while no one can be a hundred percent certain about what the
 35 future will hold, it seemed pretty convincing, at least to me, that if there wasn't the ability to make that
 36 connection at Edmonds, there would be virtually no likelihood that there would be a light at the
 37 intersection of Paddington. So, that was a disappointment to a lot of people at the time, and certainly a
 38 frustration to us. This proposal does bring a light in, not at the desired location, but we have the same
 39 issue of needing to get that traffic from the development through to Paddington or there may never be a
 40 light at Paddington.

41 CHAIR KATZ: Yeah, we hear the concerns. And that's why this is a tough one...feel a little
 42 handcuffed here.

1 VICE CHAIR STACKHOUSE: I'm still not clear...if I might build on the question of what
2 authority we have. First of all, I'm not clear who owns that land in question, where now we have the
3 bike/ped connection rather than the ability to create a local street. So, maybe we could clarify who owns
4 that and who has rights to that.

5 COMMISSIONER SHEPARD: The owner is...gave us some citizen input tonight. He's here in
6 the audience. For purposes of our conversation, maybe what we can do is not specifically refer to
7 Edmonds, not specifically refer to Carrington, not specifically refer to the detention pond. Maybe we just
8 refer more broadly as a local street connection. I think I heard from an HOA person earlier, one of our
9 speakers. I didn't get the name, but would it be 2790 Sunstone? 2709...and I think I heard that there is a
10 willingness on the part of the English Ranch South HOA to negotiate easement or acquisition as a willing
11 seller. And also speaking tonight, the fourth speaker, owner of the property at Paddington and Edmonds,
12 I thought I heard him speak somewhat willingly as to look for a creative...I think I heard the word
13 innovative...solution. So, that's pretty remarkable. We've come a long way in a year. There's been a
14 dramatic amount of communication and collaboration that's occurred in the last year, and I think it's
15 because everyone is so well-informed. And so, that's a credit to the applicant team, the consultants, and
16 the surrounding property owners. So, without getting into specifics, maybe just refer to a local street
17 connection to as to enable the warrants to be met so a traffic signal could be constructed at Paddington
18 and Teton, where in the big picture of our community, the arterial system, is where it's needed.

19 CHAIR KATZ: So, how would you suggest moving forward mechanically, Ted?

20 COMMISSIONER SHEPARD: Mechanically speaking, there could possibly be a Commission
21 member who makes a motion that approves the amended ODP with the condition that a local street
22 connection to Paddington Road from Union Park, in any conceivable alignment that's practical with
23 willing parties, would be a superior overall development plan attribute than the alternative compliance
24 that was approved in February of 2022. In February of '22, we didn't have the information that we have
25 now, and the information that we have now is critical. The...well, I'll leave it at that and let the Board
26 members...

27 CHAIR KATZ: Before you go away here, clarify the condition, because I'm not...I'm not sure
28 what the condition is that the applicant can unilaterally take action on.

29 COMMISSIONER SHEPARD: Well, one option would be to approve with a condition, another
30 option would be to deny the amended ODP, which I don't want to do. But, I think to clarify, the
31 condition would be, to comply with Section 3.6.3 of the Land Use Code, provide a local street connection
32 to English Ranch South to...in lieu of the signal location as proposed at Hidden Pond.

33 CHAIR KATZ: And are you requesting this condition because you feel that the proposal in front
34 of us does not comply with the Land Use Code?

35 COMMISSIONER SHEPARD: Yeah, the proposal in front of us relies on alternative compliance.
36 Now that we have a new parcel, three acres added to the ODP, which I think changes the ODP
37 significantly, we now have a chance to improve compliance with the Land Use Code by moving from
38 alternative compliance to full compliance with 3.6.3, which is the standard at issue.

39 CHAIR KATZ: So, I agree with that. But, I'm not clear what the condition is because the
40 applicant doesn't have...the condition is contingent on something that they don't have control over.
41 That's my challenge there.

1 COMMISSIONER SHEPARD: Very good question. I'm reminded of a project that we worked
2 on up northeast along Red Mountain Drive, and Suniga, and Conifer, and there was a desire to not impact
3 an existing neighborhood that was, I think, approved in the County, to provide another local street
4 connection, and in this case, it was a private drive out to Conifer which required off-site acquisition from
5 Neighbor to Neighbor, of all organizations. And that was a condition that was made, or it was agreed to
6 by the applicant that they would pursue that acquisition. I recall, my goodness, we have a source here. I
7 recall Neighbor to Neighbor was a willing conveyor of an easement.

8 VICE CHAIR STACKHOUSE: Yeah, are you talking about the one on Redwood? I don't think
9 that was pursued.

10 COMMISSIONER SHEPARD: Was it not pursued because the applicant withdrew the whole
11 project?

12 VICE CHAIR STACKHOUSE: I believe that when we discussed that, Neighbor to Neighbor
13 indicated they would consider that for an affordable housing development, which this was not. And, also,
14 there were many questions about how feasible it would be to build that connector. If that's...

15 COMMISSIONER SHEPARD: Thank you for that clarification.

16 VICE CHAIR STACKHOUSE: If I might ask, Commissioner Shepard, when you talk about a
17 condition, are you talking about a good faith effort? Because the outcome of all this is not to move the
18 road, and we will actually end up with everyone in a worse situation. So, is that the best we can do?

19 COMMISSIONER SHEPARD: I didn't understand what you said...I'm not following you.

20 CHAIR KATZ: If this was denied, basically it would go...the amendment was denied, then we're
21 back to the channelized T, which is a worse...

22 COMMISSIONER SHEPARD: That's true. I agree with that.

23 VICE CHAIR STACKHOUSE: So, I guess to go back to my question, are you saying, make a
24 good faith effort? I mean, because, you know, at some point here, there needs to be clarity for those
25 developing, and there needs to be certainty in what costs are going to be, and those sorts of things. And
26 so, I'm struggling a little bit with a condition that is fairly onerous. Obviously a lot of economics go into
27 play once you have a condition like that. Land prices go up, and things like that. So, I think we have to
28 be careful.

29 COMMISSIONER SHEPARD: Sure. I'm persuaded by the...I'm optimistic that there's a good
30 faith effort that could result in a local street connection from what I've heard tonight. And just a word
31 about off-sites: it's pretty common in land development for a developer to have to pursue and off-site
32 acquisition.

33 COMMISSIONER HAEFELE: So, I agree with you Ted...your suggestion. And the way I see it,
34 there are three possible outcomes, not necessarily ones that are available to us. The worst possible is
35 probably a channelized T, the best possible outcome is a connection from English Ranch to the new
36 neighborhood and a light at Paddington and Grand Teton at Ziegler. And then the middle option, the
37 alternative or the...what's the word...almost like the compromise, is the light at Hidden Pond and Ziegler
38 into the new neighborhood. And so...and I get that we don't necessarily have all of those options on the
39 table for us. It's either deny the ODP change tonight, and we're back to the channelized T, which might
40 be the worse possible, or approve this requested change with some kind of...I mean, can...and maybe this
41 is a question for Brad...can there be language added to the motion that encourages seeking that best

1 alternative, which is a connection through into the new neighborhood from Paddington that facilitates the
2 light at Paddington, which the English Ranch and other neighborhoods that are already existing would
3 prefer. Because I think the notion that we don't have a connection, or we have this completely
4 challenging connection that was brought by one of the neighborhood residents, which would more strictly
5 limit movement in the new neighborhood with a light at Paddington is probably asking for too much
6 considering that the English Ranch neighborhood ten years, twelve years ago, secured a change to the
7 Master Street Plan that eliminated the possibility of connections to Paddington in to their neighborhood.
8 So, in a sense of fairness, it doesn't seem fair to ask for all of that anyway. So, I tend to agree with you. I
9 think the best solution is to approve this ODP change and then suggest, formally, somehow, if that's
10 appropriate, that a better alternative would be to pursue a connection somewhere from Paddington, taking
11 into consideration the challenges with drainage that would then facilitate a light at Paddington and
12 Ziegler. Did I say that right? Did that make sense?

13 COMMISSIONER YORK: I think so...I think it also goes to a question I had, which was if we
14 approve the amendment as presented, that doesn't preclude the developer from pursuing the normal
15 compliance, right? It doesn't force them to do the light at Hidden Pond and Ziegler? They could
16 actually, if they were able to get the access into Paddington, they could do that without having to come
17 back, is that right?

18 MR. YATABE: I think Ryan may be able to better answer, but...and he can check me on
19 this...but I think if you approve the ODP as presented with the light, they would have to come back in to
20 amend the plan.

21 MR. MOUNCE: So, my understanding is that would be accurate. So, if this is approved as
22 presented, and there was the additional connection point to Paddington, or to the north, likely...I think
23 that would rise to the level of what we consider a change in character given, sort of, the feedback and
24 input we've heard about the scrutiny on that potential connection tonight. And so, I feel like it would
25 come back to this Board again...or this Commission, excuse me.

26 COMMISSIONER YORK: Thank you.

27 MR. YATABE: Well, I do want to suggest that, one, if you are thinking of imposing a condition,
28 I suggest that you ask the developer if they are amenable to that condition. Because if they are not
29 amendable to that condition, I think you're just going to have to take the...I think you're better off taking
30 the application as it stands. I mean, if they just say, this is not feasible, or this is not something we're
31 willing to do...you might want to consider that. Another possibility is, you may consider whether,
32 if...well, my understanding is there has been quite a bit of conversation about this leading up to this
33 hearing, so I don't know that there are necessarily more alternatives if this were to be continued to allow
34 some additional conversation, but that is a possibility as well. And, so, again, just kind of trying to focus
35 you on the application before you.

36 CHAIR KATZ: And, again, that's why I think...we've heard the public. If it was...if there was a
37 clear path to putting it there, I think we all agree...there being Paddington, excuse me...we would all
38 prefer that, most people, maybe not everybody. But, we have a proposal in front of us, so let's consider
39 what's in front of us.

40 VICE CHAIR STACKHOUSE: Could we hear from the developer? Their reaction to our
41 discussion?

1 CHAIR KATZ: If Jason would like to speak to that, I would invite him up. Come on up. I mean,
2 I work with a lot of developers, and I know what I'm about to hear.

3 MR. SHERRILL: Yeah, appreciate that, but again, it's...we don't control it, right? So trying to
4 commit to something that we don't control that could have an effect on a whole development is...it's
5 really not feasible for us, right? So, again, you know, we've submitted our plans to meet the Land
6 Development Code, and it meets the Land Development Code, and you know, we would really ask you to
7 consider that and approve that because that's what we can control, and we're doing our best to meet those
8 standards.

9 CHAIR KATZ: Thank you, Jason.

10 COMMISSIONER SHEPARD: A question for Mr. Gilchrest...going to brainstorm here for just a
11 moment. Would there ever be any consideration for a variance to traffic signal spacing based on local
12 conditions that would result in a traffic signal at Paddington and Grand Teton in addition to the proposed
13 traffic signal?

14 MR. GILCHREST: Given the minimum distance that it is, it's probably unlikely.

15 COMMISSIONER SHEPARD: Okay, thank you.

16 MR. GILCHREST: It would be considered, possibly, for restricted movement though.

17 COMMISSIONER SHEPARD: Thank you.

18 CHAIR KATZ: I think we've had really good discussion on this. Again, we're never going to
19 make everybody happy as much as some of us would like to. I really think we need to get back and focus
20 on the proposal that's in front of us. Does it or does it not meet the Land Use Code? And somebody
21 needs to make a motion on that. And I say that, and I do hear Ted's comment about it improving
22 compliance; that did not fall on deaf ears. I do agree with that, and I appreciate that, and the way he
23 phrased that helped me. However, there's...it's not that easy, it's more complicated. So, at this point, I
24 would personally like to hear a motion as is.

25 VICE CHAIR STACKHOUSE: Okay, well I will do that. I will say though, the motion I'm
26 going to make, I don't like, I'm going to tell you up front. Because I don't think we're solving the real
27 problem here, and that bothers me. So, I will make a motion...I'll read it first and then I'll add some
28 commentary, and there can be a second or not as the Commission wishes.

29 I move that the Fort Collins Planning and Zoning Commission approve the Ziegler-Corbett ODP
30 Major Amendment, MJA220004. The Commission finds in consideration of the approved modification
31 that the major amendment complies with all applicable Land Use Code requirements. The decision is
32 based upon the agenda materials, the information and materials presented during the work session and this
33 hearing, and the Commission discussion on this item, and further, this Commission hereby adopts the
34 information, analysis, findings of fact, and conclusions regarding this major amendment contained in the
35 staff report included in the agenda materials for this hearing. I believe we need a second and then we can
36 discuss.

37 MR. YATABE: And I did want to state, my apologies, I think there was an artifact in there about
38 an approved modification.

39 CHAIR KATZ: Could we get a friendly amendment to strike that?

1 MR. YATABE: Strike that, my apologies.

2 VICE CHAIR STACKHOUSE: I'm glad to see you make mistakes, too.

3 COMMISSIONER HAEFELE: I'll second.

4 VICE CHAIR STACKHOUSE: Thank you. Now, on my own amendment...I still think that the
5 right outcome here is a connection from the ODP to Paddington, and I'd love to see that still happen.
6 And I know that's not desirable on the part of everyone, but honestly, if we step back and look at it in a
7 holistic way, for the betterment of the city of Fort Collins, it's the right thing to do. But, that's not the
8 proposal that we have in front of us tonight. And the proposal we have in front of us tonight is better than
9 the proposal we had previously. And Michelle, thank you for making that so clear. So, I'm going to hold
10 out a little bit of hope that there's still some room for negotiation on this, and that we could come back
11 with whatever is needed swiftly and get a great outcome for everyone, but in the meantime, I feel like we
12 need to move forward with the proposal as is.

13 COMMISSIONER YORK: So, I have a question on the motion. And, you know, being kind of
14 new at this...would it be possible to amend the motion to also include not precluding the option to extend
15 Paddington and have both of those in the same motion or not? I'm just asking for clarification because I
16 don't know what...

17 VICE CHAIR STACKHOUSE: Sure...and I would not be inclined to do that because we don't
18 know what that would look like. And until we'd have a specific plan, personally, I would not be
19 comfortable with adding that.

20 COMMISSIONER YORK: Okay. Thank you.

21 CHAIR KATZ: So we have a motion and second. Any last final comments before we ask for a
22 roll call?

23 COMMISSIONER SHEPARD: Thank you, Mr. Chair. I will not be supporting the motion. The
24 motion...the ODP as amended, and it's significantly amended with the new parcel, doesn't comply with
25 3.6.3...3.6.3(E) and (F), and I think the alternative compliance that we did last year is now inapplicable
26 and it also...the amended ODP, as amended, doesn't comply with City Plan policy that talks about...LIV
27 4.2...LIV stands for livability, neighborhood livability, which says: compatibility of adjacent
28 development, that's the subtitle...continue established block patterns and streets to improve access to
29 services and amenities from the adjacent neighborhood. And I'm looking at a childcare center on one
30 side of the property line, a park and a school on the other side of the property line, and to not connect
31 these neighborhoods, I think, violates a Land Use Code standard and City Plan policy.

32 VICE CHAIR STACKHOUSE: Can I ask a point of clarification, Commissioner Shepard? And
33 you are clear that if this proposal were denied, we would have a proposal with a channelized T
34 intersection?

35 COMMISSIONER SHEPARD: I can't make that assumption.

36 CHAIR KATZ: It's not an assumption, it's what we're amending from. It's a material fact. And
37 also recall that there is a ped/bike connection.

38 COMMISSIONER SHEPARD: So, the question you're asking is, I guess, to not connect the
39 neighborhoods...

1 CHAIR KATZ: Which leaves them still not connected.

2 COMMISSIONER SHEPARD: No...I'm not...I think that's a zero-sum proposition. I'm not
3 going to agree with that statement.

4 VICE CHAIR STACKHOUSE: Just wanted to be sure it was clear.

5 COMMISSIONER SHEPARD: That's zero-sum to me. The City Code and the principles and
6 policies weren't meant to be zero-sum. We're building a community, and that requires collaboration, it
7 requires off-site improvements, it's not onerous. We can't even get into onerous; that's economics, we
8 don't do economics in the Land Use Code. So, I will not be supporting the motion.

9 VICE CHAIR STACKHOUSE: You know we did approve it the first time.

10 COMMISSIONER SHEPARD: Under alternative compliance without the Young parcel.

11 COMMISSIONER HAEFELE: I tend to agree with Ted, but denying this...and I guess maybe I
12 need clarification on this...denying this puts us back to the worst possible intersection scenario unless
13 something happens in the background, and if they come back...hopefully they will come back with
14 another proposal that is the best possible, which is connecting the neighborhoods. And I, you know,
15 going back historically, I wasn't involved in 2010, I would not have changed the Master Street Plan. You
16 know, that just seems to have made, as I look at the map, this...a lot of streets that just dead end
17 somewhere and don't connect. There are just a lot of these little snakes, and you know, I realize that in
18 the era when this area was developed, that was the style. So, I will probably support the motion, but you
19 know, as I said, because it's not the worst possible intersection solution and it's not the best.

20 CHAIR KATZ: Yeah, I kind of agree with Michelle. I think, you know, this development is kind
21 of a lag measure to previous, maybe misguided planning. So, I will be supporting. You're good?

22 COMMISSIONER YORK: I would say that I agree with Ted that I don't think it meets the goals
23 of the Land Use Code for the reasons that he stated, and, you know, looking at it from a transportation
24 point, I don't think it meets that either, so I won't be supporting it.

25 CHAIR KATZ: Any last comments?

26 COMMISSIONER SHEPARD: Thank you, Michelle, for that comment. I would like to say
27 something about that 2010 Master Street Plan amendment; that was not staff-driven.

28 CHAIR KATZ: I believe we are ready for a roll call please?

29 MS. MANNO: Stackhouse?

30 VICE CHAIR STACKHOUSE: Yes.

31 MS. MANNO: Stegner?

32 COMMISSIONER STEGNER: Yes.

33 MS. MANNO: York

34 COMMISSIONER YORK: No.

35 MS. MANNO: Shepard.

36 COMMISSIONER SHEPARD: No.

1 MS. MANNO: Haefele?

2 COMMISSIONER HAEFELE: Yes.

3 MS. MANNO: Katz?

4 CHAIR KATZ: Yes. And with that, the motion to approve the major amendment for the Ziegler
5 and Corbett ODP is approved. Want to thank all the community members that came out...you came out
6 with logic, you came out with emotion. I don't think anybody disagrees with you, but we were kind of
7 dealt a funky hand here, and because it was last to be developed, in my opinion, the proposal that was
8 brought before us was compliant. So, apologize for that.

9 VICE CHAIR STACKHOUSE: Mr. Chair, I'd also like to thank everyone for coming out tonight.
10 And, as I said, I still think you all have the right outcome here of where the light should be, and I would
11 really...I know this stuff costs money, believe me, finance is my background, I know it costs you money.
12 I really would still like to see discussions with the neighborhood about going in this other direction. You
13 know, at the end of the day, it is all about the best outcome for everyone. I know it takes a little bit more
14 time and a little bit more money, I understand that totally, but at least that good faith effort goes a long
15 way with people. So, I will just leave you with that closing thought.

16 CHAIR KATZ: Thank you.

17 COMMISSIONER SHEPARD: Mr. Chair, I just want to acknowledge that we did receive and
18 read these emails that came in today from Eskin Avrim, Theresa Varn, Kathy Kulesa, Pam Starling, Andy
19 Pulsen, and again, Kathy Kulesa, and Robert Schutzius and his wife. We did receive these emails even
20 though they came in today. And Peter Melby. So, we did get them, and we did read them.

21 CHAIR KATZ: Thank you, Ted.

Applicant Presentation to Council August 15, 2023

**Please note: Admissibility of any new
evidence is subject to Council Review**

Ziegler - Corbett Amended ODP

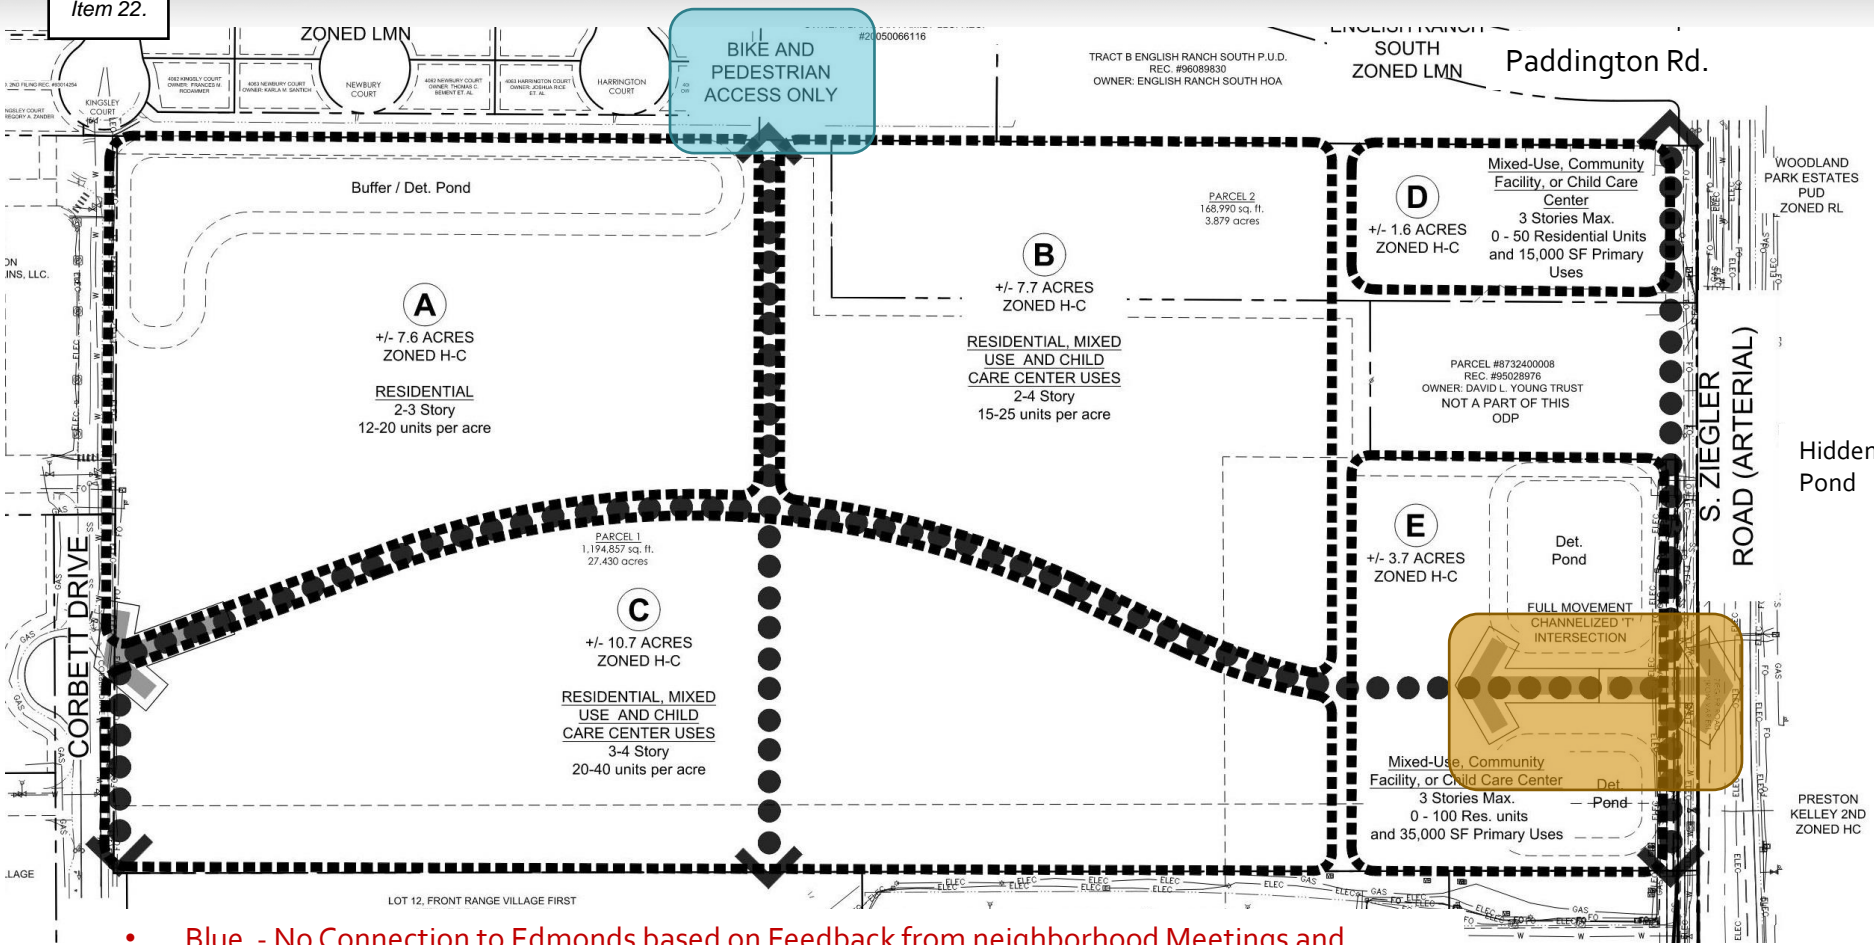

Appeal Hearing - August 15, 2023

UNION PARK

A mixed-use community featuring apartments, for sale homes, mixed use, live work and commercial all in walkable highly amenitized community close to schools, shopping, employment and I-25

Ziegler - Corbett Amended ODP

Item 22.

- Blue - No Connection to Edmonds based on Feedback from neighborhood Meetings and support from City Staff
- Orange - The Channelized 'T' Intersection provided the only viable connection from Ziegler without control of the Young Property.

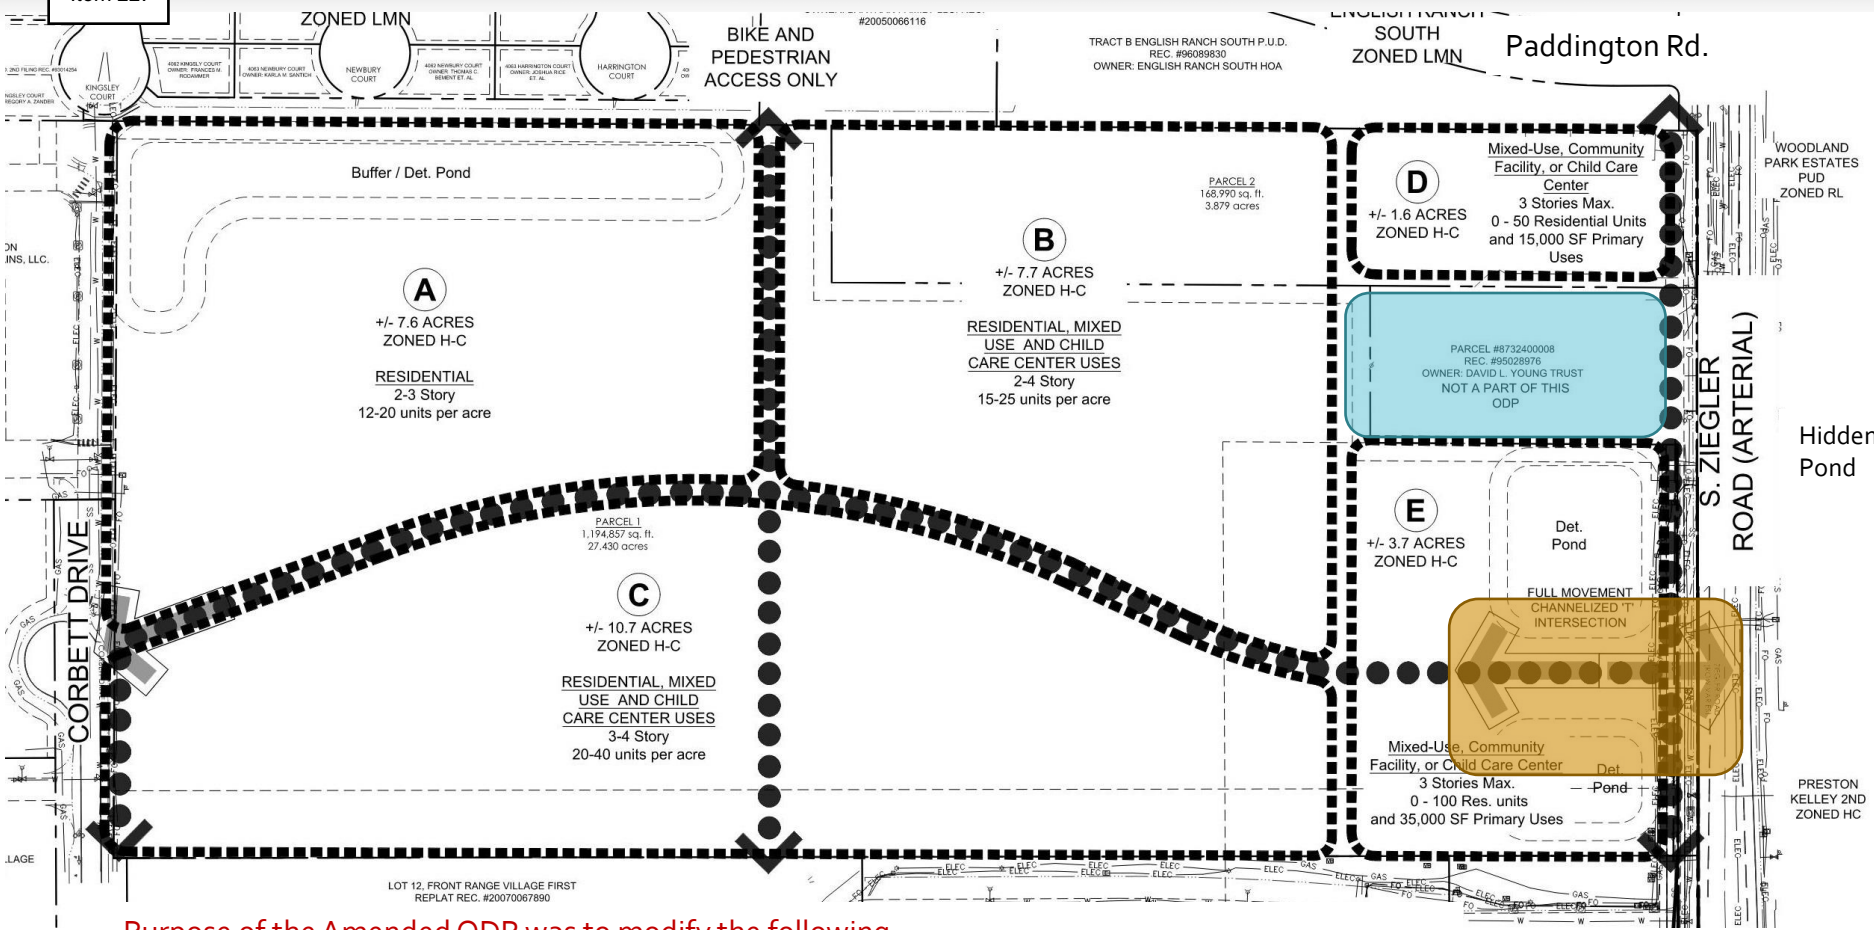

Note:

- 1) The Alternative Compliance for no connection to English Ranch was approved as part of the original ODP with support of Planning Commission, Staff and Community
- 2) Current Master Street Plan does not show a connection to English Ranch

Ziegler - Corbett Amended ODP

Item 22.

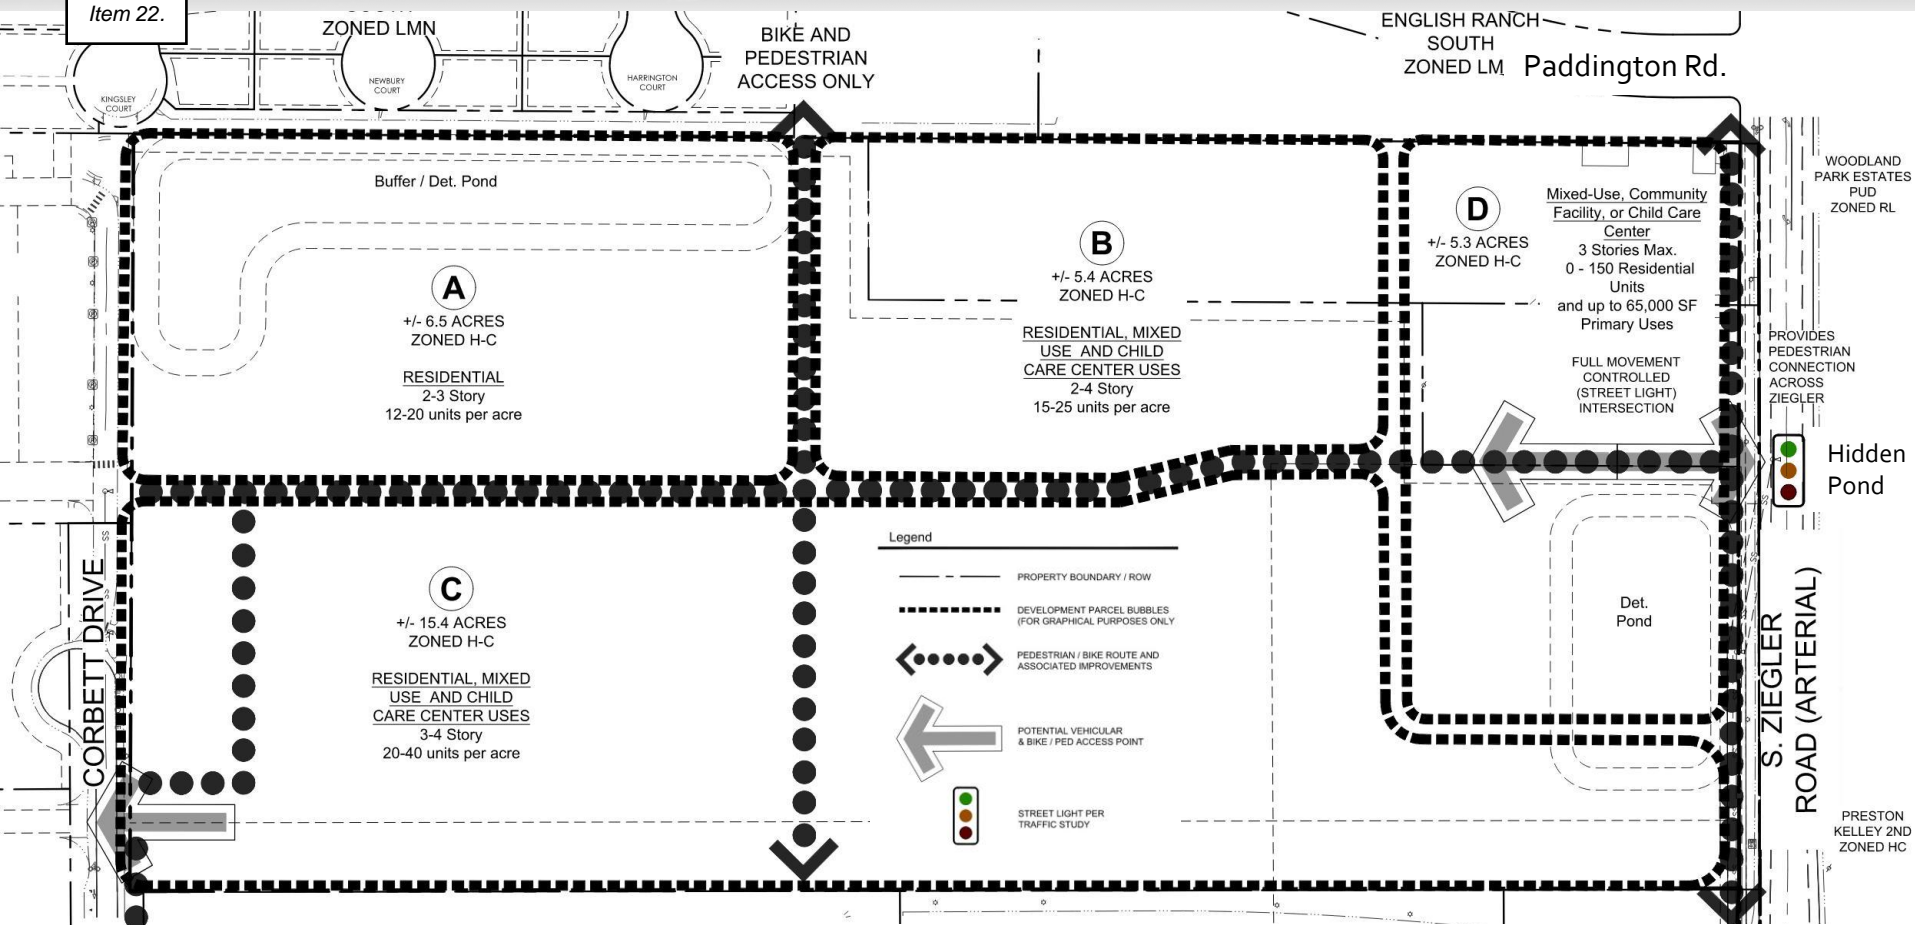

Purpose of the Amended ODP was to modify the following:

- Blue - Inclusion of the Young Property = This acquisition was encouraged by City Staff and is the preferred Entry Point per City Codes.
- Orange - The Channelized 'T' Intersection is eliminated. This was the least desired option for entry to this Development but necessary prior to the acquisition of the Young Property

Ziegler - Corbett Amended ODP

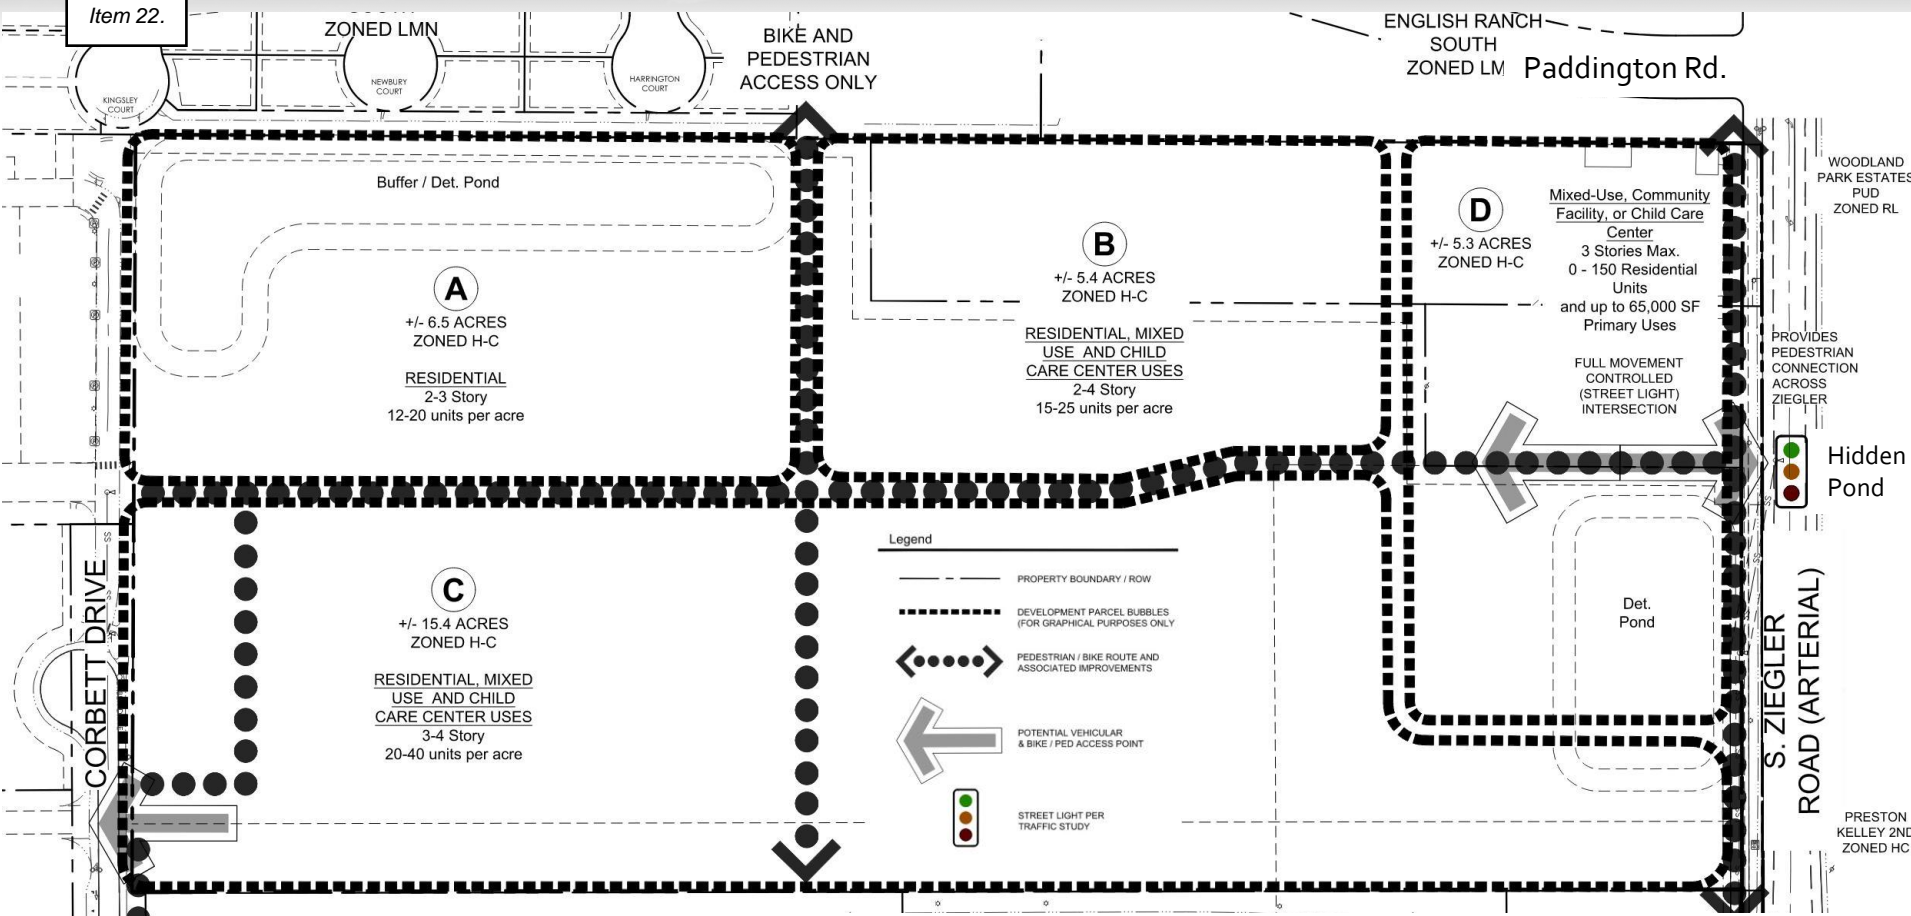

Item 22.

- No change in density / the maximum units allowed
- No vehicular access to English Ranch remained
- All conditions and modifications previously approved remain the same.
- The "Sense of Place" remain as previously approved
- Allows the preferred location of entry to the site from Ziegler (across from an existing street)
- The 4-way signalized light at this location is **warranted** per the TIS.
- Provides a safer intersection for vehicles AND pedestrians vs. Channelized 'T'
- The signalized light is fully paid for by the Developer.
- Adjusted parcels provide stronger street and block network.
- This amended ODP is an improvement to the approved ODP.

Ziegler - Corbett Amended ODP

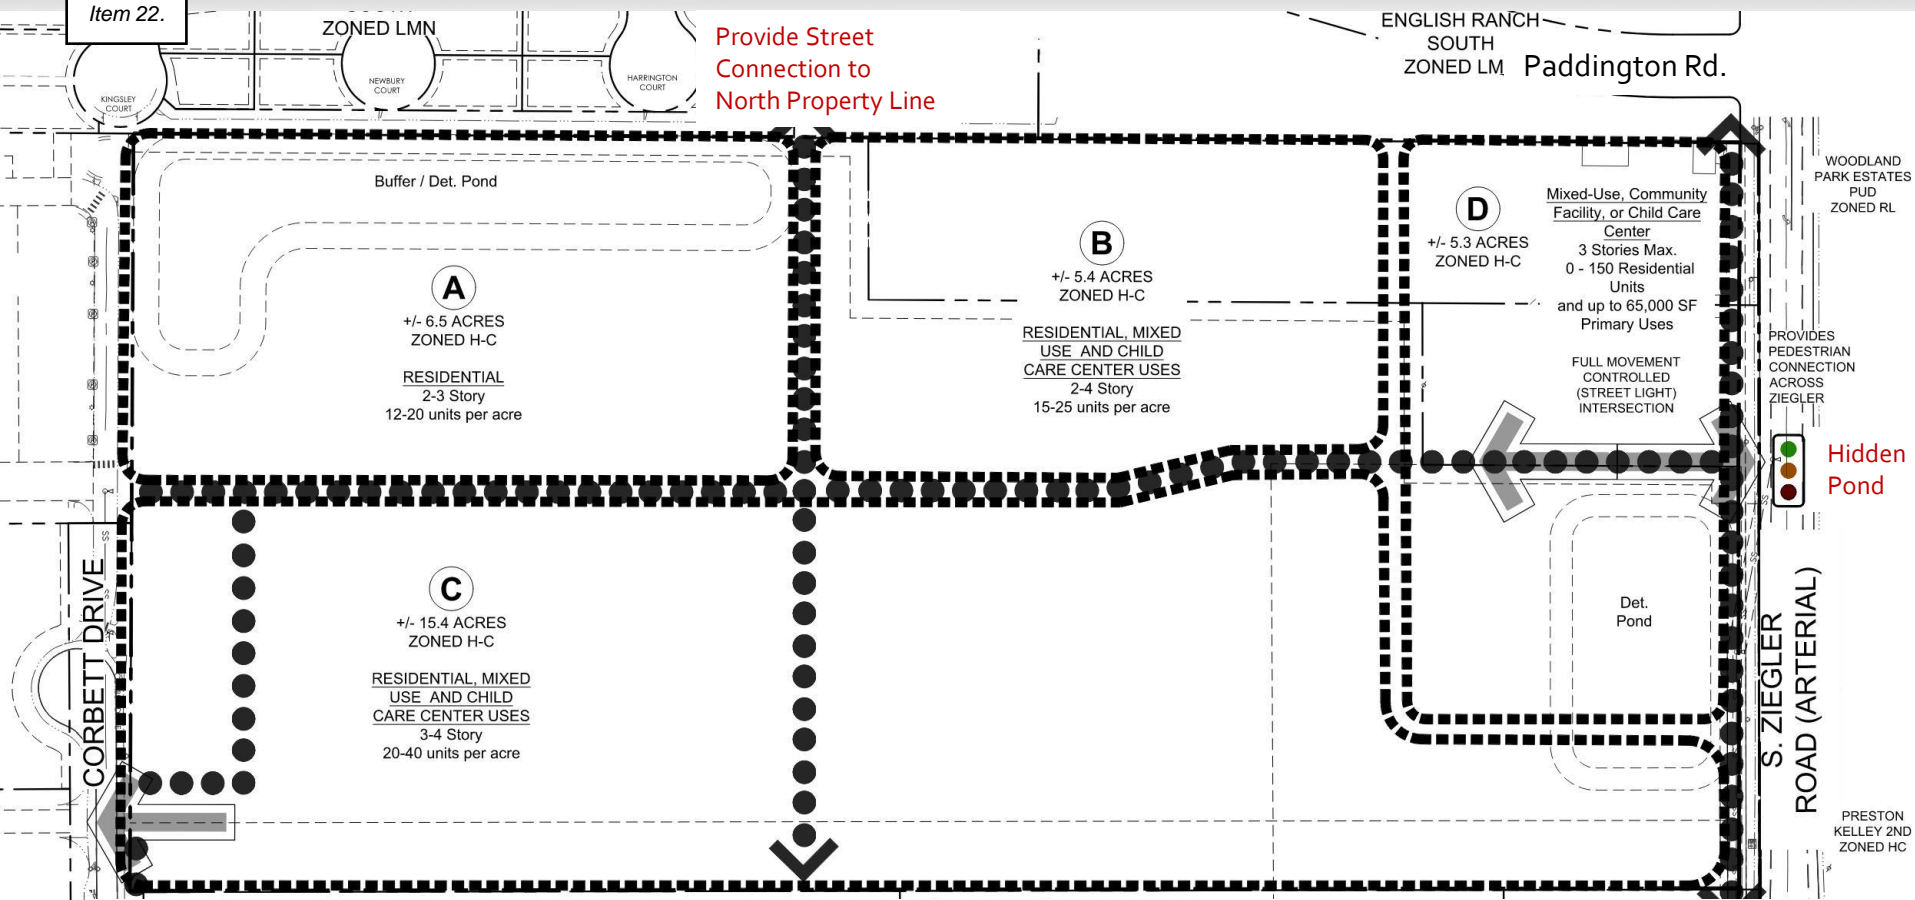

Item 22.

1. Inclusion of the Young Property = This acquisition was encouraged by and is the preferred Entry Point per City Codes
2. Provide a signal along Ziegler (funded by Landmark)
3. Improves the site plan creating a complete master planned community
4. The Channelized 'T' Intersection is eliminated. This was the least desired option for entry to this Development but necessary prior to the acquisition of the Young Property
5. The Alternative Compliance for no connection to English Ranch was approved as part of the original ODP and will still remain along with the Channelized T if the Amended ODP is denied.

Ziegler - Corbett Amended ODP

Item 22.

PREFERRED OPTION

Support and continue with the Amended ODP that Planning and Zoning Approved on March 23, 2023

PREFERRED OPTION THAT SUPPORTS THE ARGUMENT OF THE APPEAL

After multiple conversations with the Appellants and the staff we believe the best option is Support the Approved Amended ODP with the addition of our commitment to build a street connection to our northern boundary accommodating a future connection to Paddington at Edmonds

Ziebler - Corbett Amended ODP

Item 22.

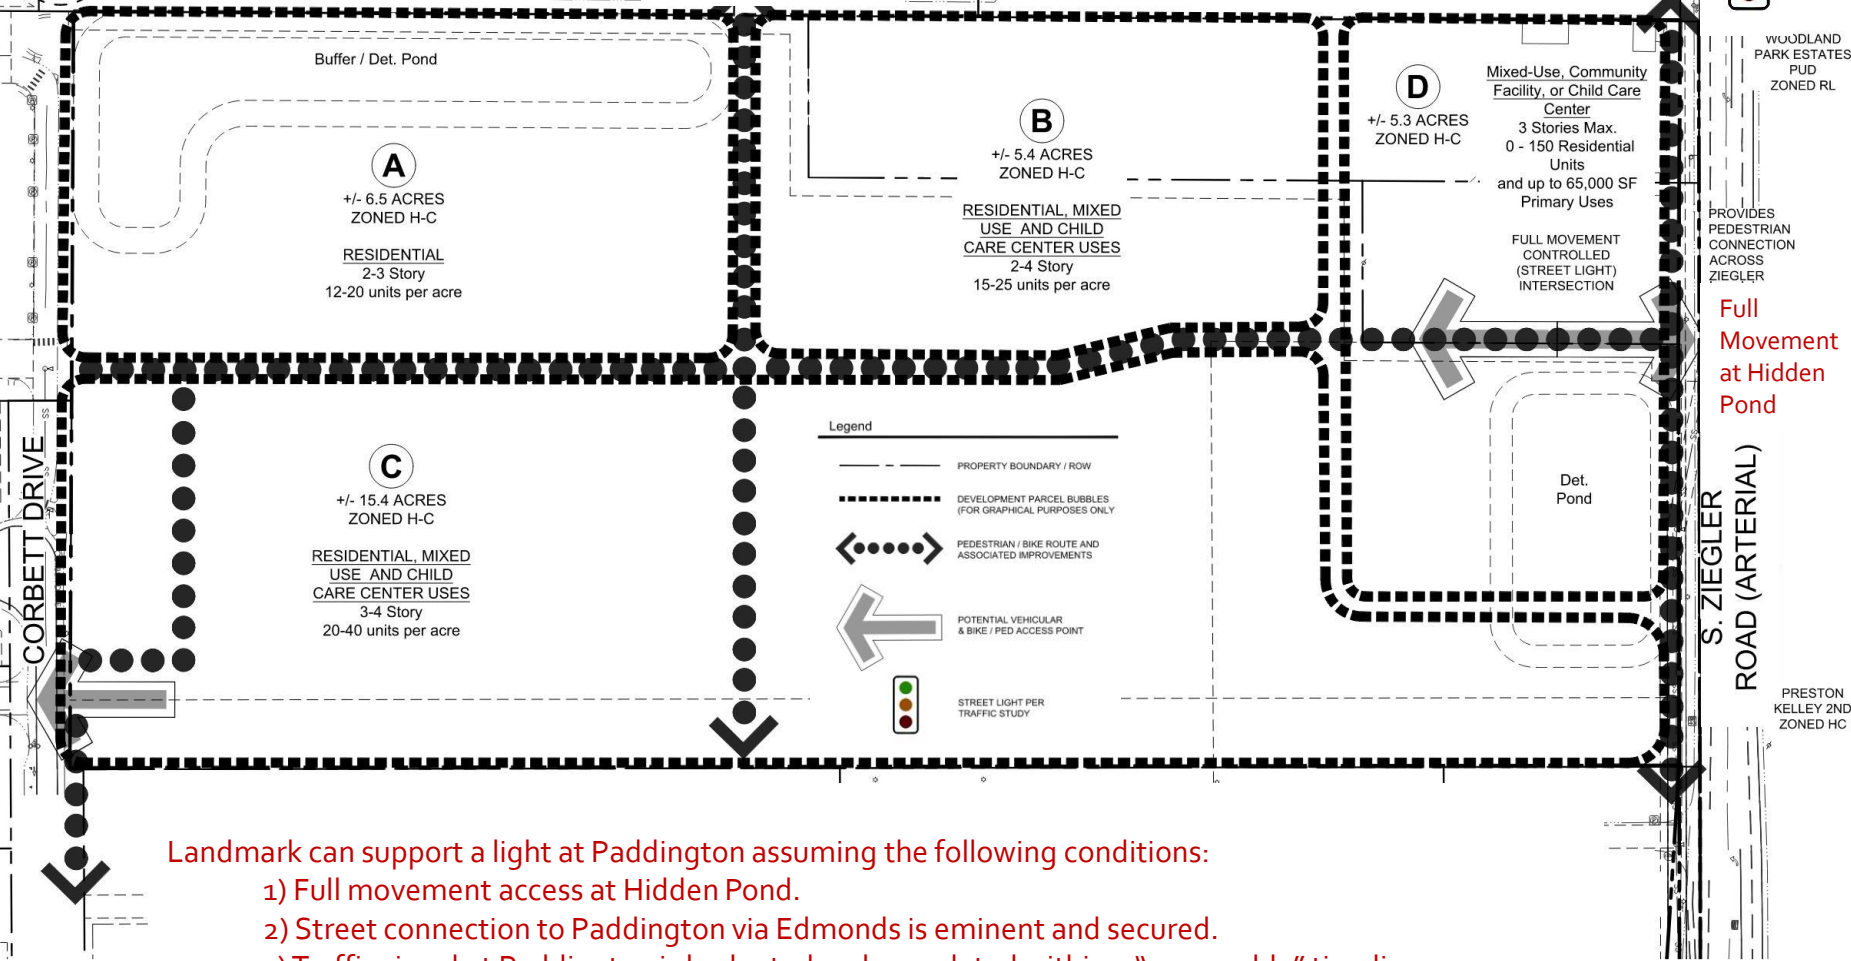

Ziebler - Corbett Amended ODP

Item 22.

Provide Edmonds connection up to North Property Line

ENGLISH RANCH SOUTH ZONED LMN
 Paddington Rd.

Full Movement at Hidden Pond

- Landmark can support a light at Paddington assuming the following conditions:
- 1) Full movement access at Hidden Pond.
 - 2) Street connection to Paddington via Edmonds is eminent and secured.
 - 3) Traffic signal at Paddington is budgeted and completed within a "reasonable" timeline.

Amended ODP

- 1) Provides a warranted traffic signal along Ziegler paid for by the developer
- 2) Provides a street connection to our northern boundary for potential future connection to Paddington.

Option 2

- 1) Landmark supports the movement of our warranted light to Paddington - albeit currently not warranted
- 2) Continue with a street connection to our northern boundary for potential future connection to Paddington
- 3) Full movement access at Hidden Pond (Union Park's Main Street serving over 600 residents and over 45,000 SF of daycare, office, retail, live-work and mixed use
- 4) Concerns over timing of light at Paddington and future connection at Edmonds.

REMINDER: Current Master Street Plan does not show a connection to English Ranch and no Public ROW is dedicated on the adjacent property to the north

Thank you for your Time and Support

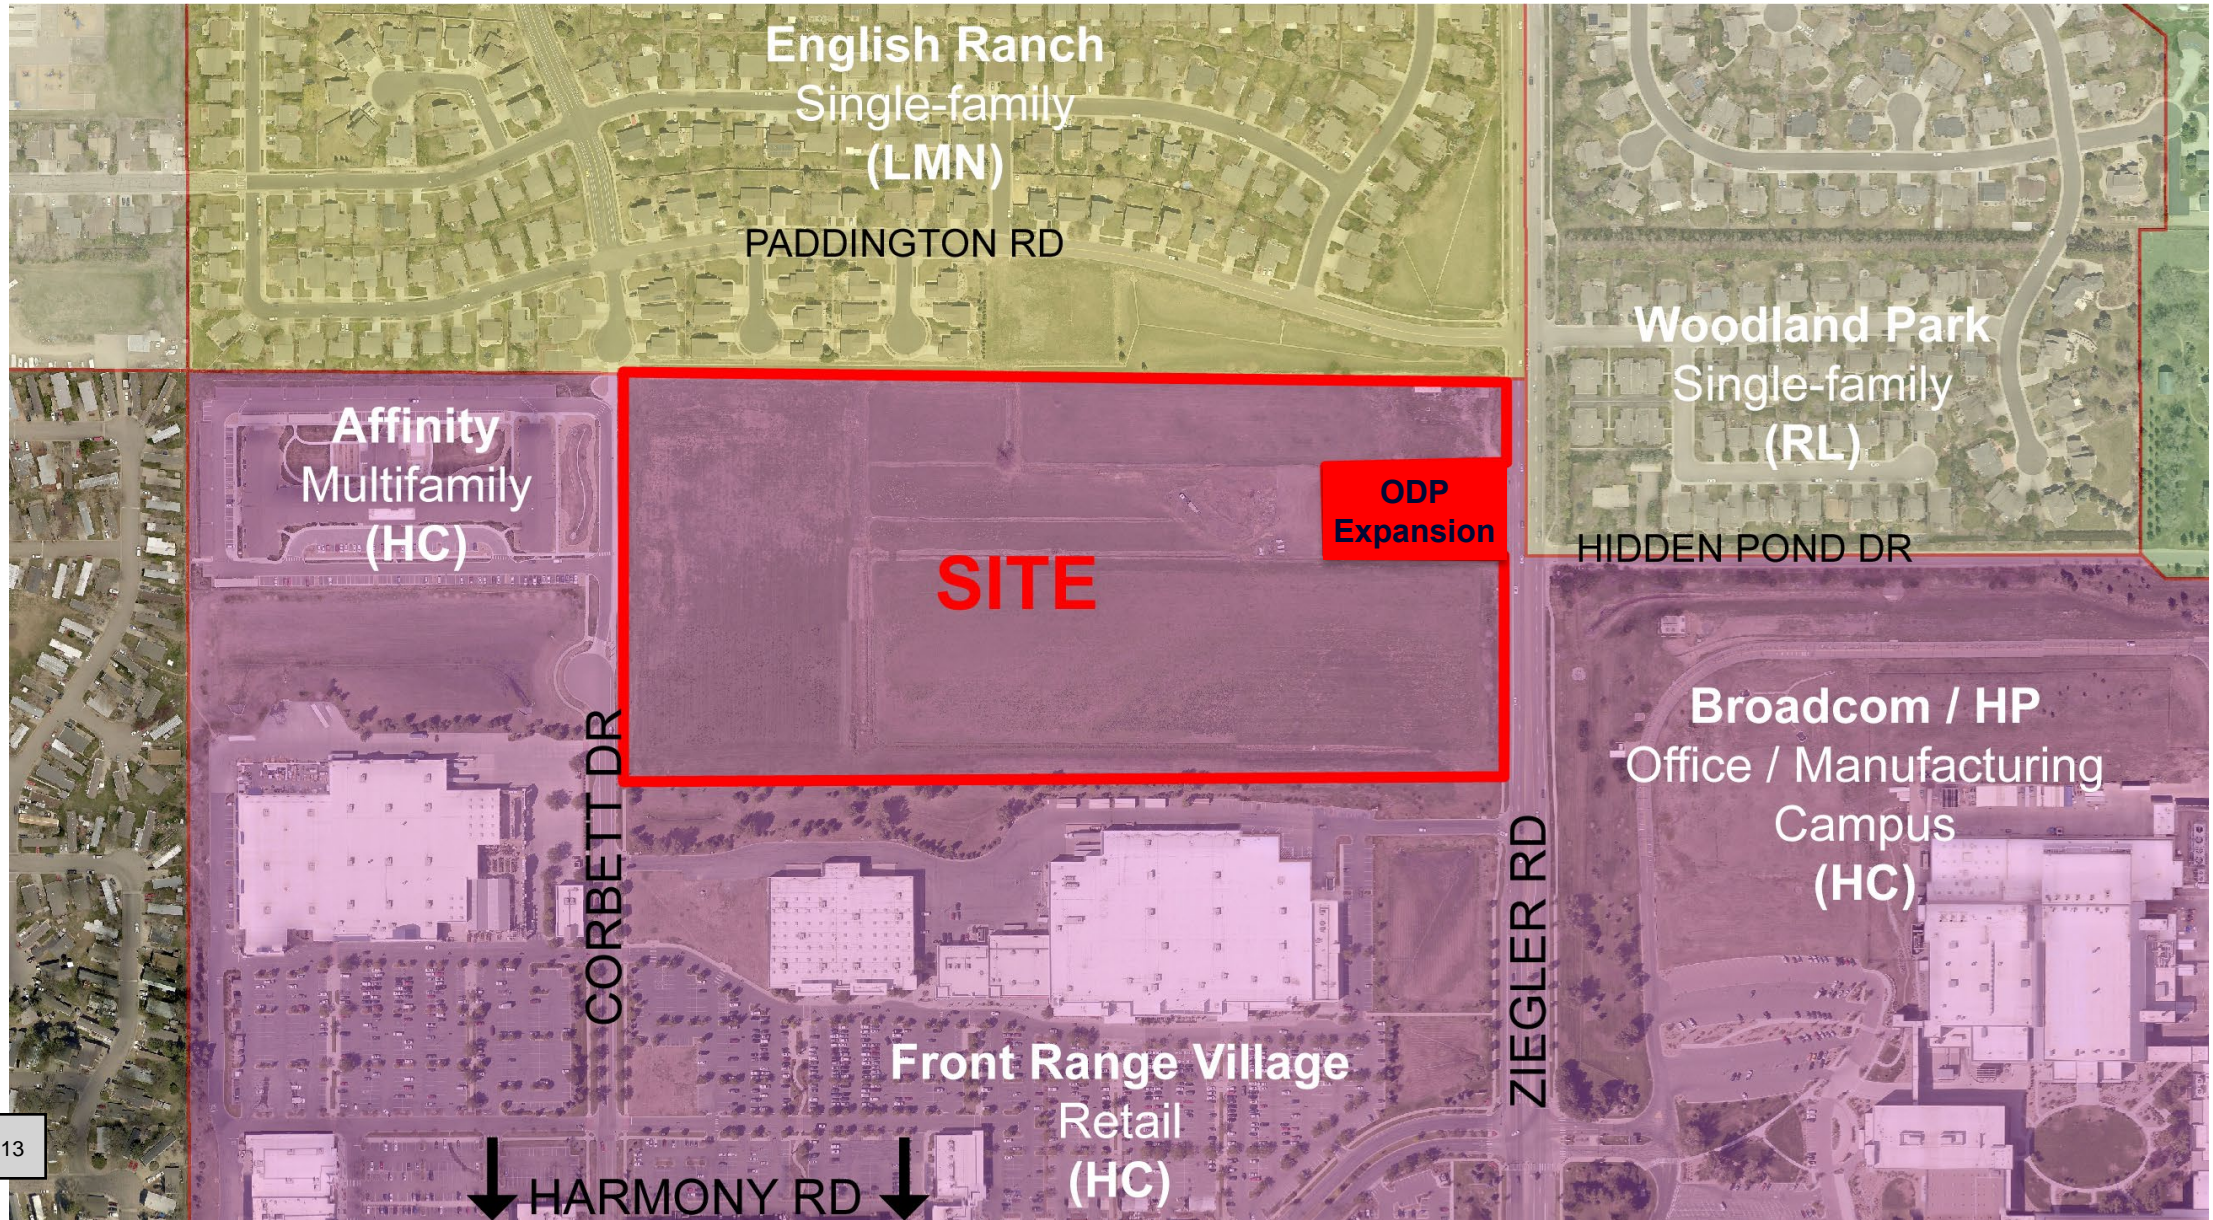

Staff Presentation to Council August 15, 2023

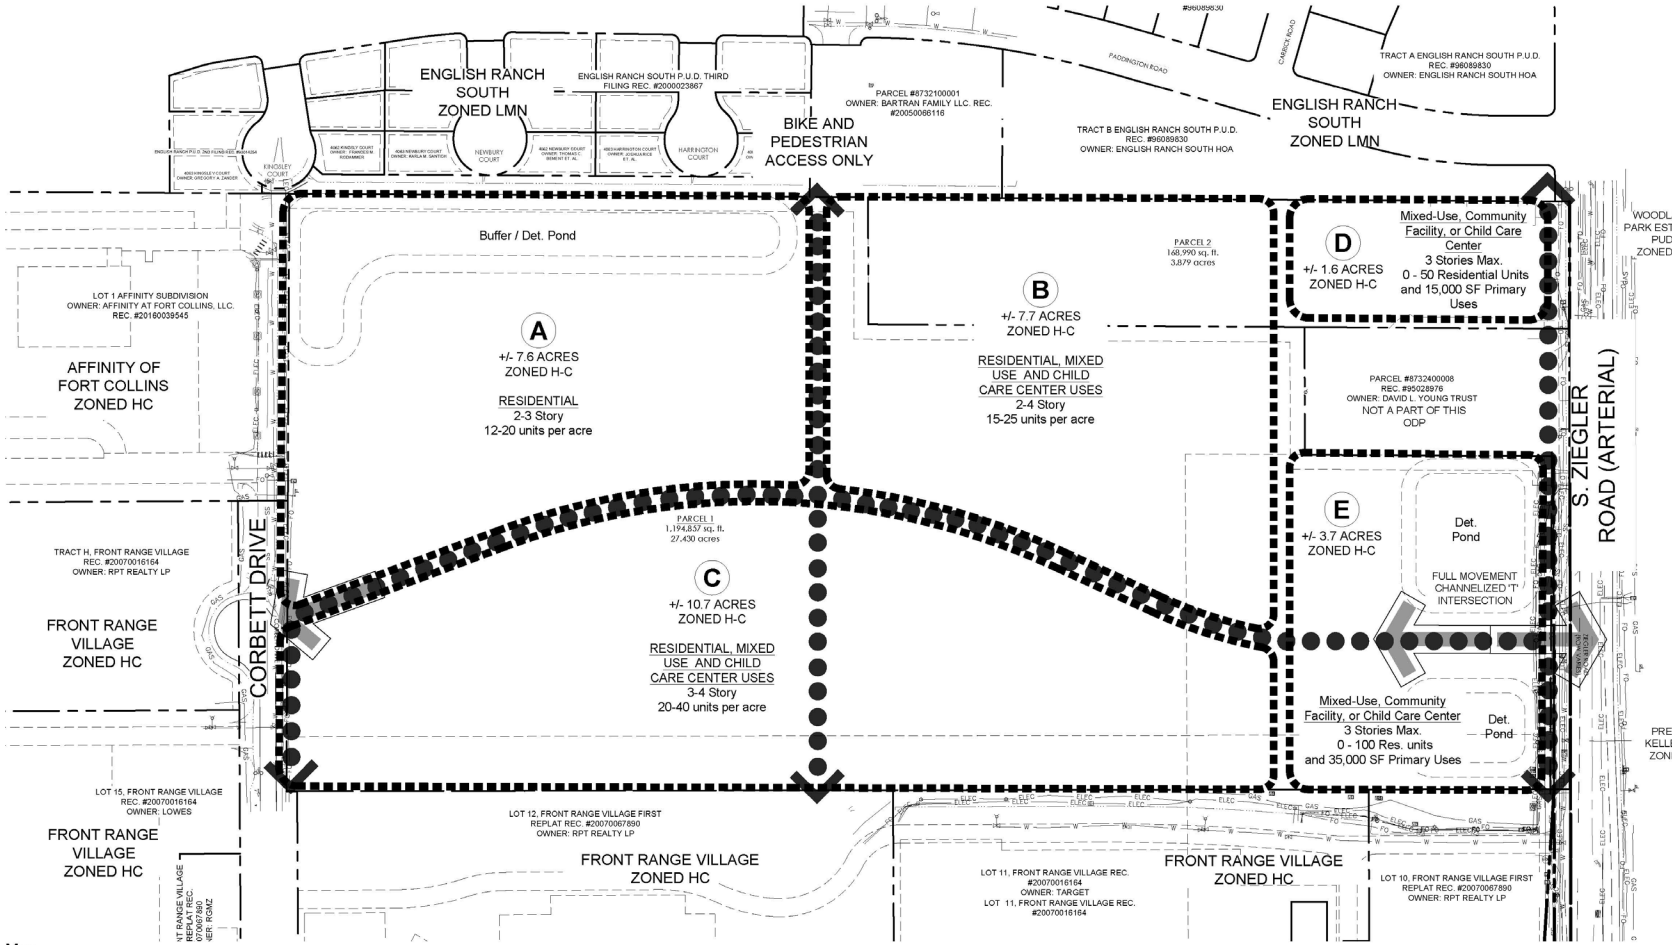

Ziegler-Corbett Overall Development Plan
Major Amendment Appeal

- Major Amendment to the Ziegler-Corbett Overall Development Plan (ODP)
- Size: ~33 acres
- Zone: Harmony Corridor (HC)
- Major Amendment Elements:
 - Expand ODP by incorporating one additional property
 - Shift Ziegler Rd access north to align with Hidden Pond Dr.
 - Install traffic signal at Ziegler/Hidden Pond intersection
 - No proposed changes to land uses or intensity

- 400 – 700 dwelling units
- 50,000sf Office/Community Facility Space
- Childcare Center
- Ziegler Rd access via ‘Channelized T’ intersection
- Modification of standards:
 - 4.26(D)(2) – Secondary Uses
 - 4.26(D)(3)(a) – Dimensional Standards
- Alternative compliance:
 - 3.6.3 for bike/ped connection in lieu of local street

- Feb. 17, 2022 – P&Z Approval of Ziegler-Corbett Overall Development Plan
 - Approval includes two modification of standards and alternative compliance to street connectivity standards

- Nov. 15, 2022 – Applicant submits Major Amendment to original ODP
 - Incorporate additional parcel into ODP boundary
 - Change in Ziegler Rd access location and installation of traffic signal

- Mar. 23, 2023 – Ziegler Corbett ODP Major Amendment approved by P&Z

- Apr. 5, 2023 – Two Notices of Appeal Filed

- Aug. 15, 2023 – City Council Hearing for Appeals

The combined appeals allege the Planning and Zoning Commission committed the following errors:

- 1) Failure to conduct a fair hearing – substantially ignored previously established rules of procedure.
- 2) Failure to properly interpret and apply Land Use Code Section 3.6.3(E) & 3.6.3(F).
- 3) Failure to properly interpret and apply Land Use Code Section 1.2.2(K).
- 4) Failure to properly interpret and apply City Code Policy LIV 4.2.

Did the Planning and Zoning Commission fail to conduct a fair hearing by substantially ignoring previously established rules of procedure?

The Latzke Notice of Appeal allege the following errors:

- The Planning and Zoning Commission allowed the Applicant to address the Commission during deliberation as they considered a condition of approval after a prior statement there would be no additional opportunity for the Commission to engage the Applicant.

Did the Planning and Zoning Commission fail to properly interpret and apply Land Use Code Section 3.6.3(E) and 3.6.3(F)?

The combined Notices of Appeal allege the following errors:

- The major amendment changes the original ODP to an extent the previously approved alternative compliance is no longer applicable.
- The alternative compliance in the Major Amendment presents substantially different tradeoffs, considerations, and additional negative consequences.
- City staff and the Planning and Zoning Commission should have been aware a prior Council decision to remove the Corbett Drive collector street connection should still result in a local street connection.
- The additional acreage of the Young Property incorporated with the Major Amendment presents new traffic mobility considerations and the original alternative compliance should not have been continued.

Did the Planning and Zoning Commission fail to properly interpret and apply Land Use Code Section 1.2.2(K)?

The Joyal Notice of Appeal allege the following errors:

- The location of a traffic signal at the Ziegler/Hidden Pond intersection does not foster a rational or common-sense pattern of development as a signalized intersection would typically occur at an arterial/collector intersection (Ziegler/Paddington/Grand Teton).

Land Use Code Section 1.2.2 outlines the purpose and broad goals for the Code and is not applied as a specific development standard similar to those found in Articles 3 and 4. Land Use Code Section 1.2.2(K) states:

fostering a more rational pattern of relationship among residential, business and industrial uses for the mutual benefit of all.

Did the Planning and Zoning Commission fail to properly interpret and apply City Code Policy LIV 4.2?

The combined Notices of Appeal allege the following errors:

- The major amendment does not continue established block patterns and streets to improve access to services.

Policy LIV 4.2 is found in the Comprehensive Plan (City Plan) and is not a Land Use Code, City Code, or Charter standard. Policy LIV 4.2 states:

Ensure that development that occurs in adjacent districts complements and enhances the positive qualities of existing neighborhoods. Developments that share a property line and/or street frontage with an existing neighborhood should promote compatibility by:

» *Continuing established block patterns and streets to improve access to services and amenities from the adjacent neighborhood;*

» *Incorporating context-sensitive buildings and site features (e.g., similar size, scale and materials); and*

» *Locating parking and service areas where impacts on existing neighborhoods—such as noise and traffic—will be minimized.*

RESOURCES

Land Use Code Section 3.6.3(E) Distribution of Local Traffic to Multiple Arterial Streets.

All development plans shall contribute to developing a local street system that will allow access to and from the proposed development, as well as access to all existing and future development within the same section mile as the proposed development, from at least three (3) arterial streets upon development of remaining parcels within the section mile, unless rendered infeasible by unusual topographic features, existing development or a natural area or feature.

The local street system shall allow multi-modal access and multiple routes from each development to existing or planned neighborhood centers, parks and schools, without requiring the use of arterial streets, unless rendered infeasible by unusual topographic features, existing development or a natural area or feature.

Land Use Code Section 3.6.3(F) Utilization and Provision of Sub-Arterial Street Connections to and From Adjacent Developments and Developable Parcels.

All development plans shall incorporate and continue all sub-arterial streets stubbed to the boundary of the development plan by previously approved development plans or existing development. All development plans shall provide for future public street connections to adjacent developable parcels by providing a local street connection spaced at intervals not to exceed six hundred sixty (660) feet along each development plan boundary that abuts potentially developable or redevelopable land.

Land Use Code Section 3.6.3(H) Alternative Compliance

Upon request by an applicant, the decision maker may approve an alternative development plan that may be substituted in whole or in part for a plan meeting the standards of this Section.

(1) Procedure. Alternative compliance development plans shall be prepared and submitted in accordance with submittal requirements for plans as set forth in this Section. The plan and design shall clearly identify and discuss the alternatives proposed and the ways in which the plan will better accomplish the purpose of this Section than would a plan which complies with the standards of this Section.

(2) Review Criteria. To approve an alternative plan, the decision maker must first find that the proposed alternative plan accomplishes the purposes of this Division equally well or better than would a plan and design which complies with the standards of this Division, and that any reduction in access and circulation for vehicles maintains facilities for bicycle, pedestrian and transit, to the maximum extent feasible.

In reviewing the proposed alternative plan, the decision maker shall take into account whether the alternative design minimizes the impacts on natural areas and features, fosters nonvehicular access, provides for distribution of the development's traffic without exceeding level of service standards, enhances neighborhood continuity and connectivity and provides direct, sub-arterial street access to any parks, schools, neighborhood centers, commercial uses, employment uses and Neighborhood Commercial Districts within or adjacent to the development from existing or future adjacent development within the same section mile.

1.2.2 - Purpose

The purpose of this Code is to improve and protect the public health, safety and welfare by:

- (A) ensuring that all growth and development which occurs is consistent with this Code, City Plan and its adopted components, including, but not limited to, the Structure Plan, Principles and Policies and associated sub-area plans.
 - (B) encouraging innovations in land development and renewal.
 - (C) fostering the safe, efficient and economic use of the land, the city's transportation infrastructure, and other public facilities and services.
 - (D) facilitating and ensuring the provision of adequate public facilities and services such as transportation (streets, bicycle routes, sidewalks and mass transit), water, wastewater, storm drainage, fire and emergency services, police, electricity, open space, recreation, and public parks.
 - (E) avoiding the inappropriate development of lands and providing for adequate drainage and reduction of flood damage.
 - (F) encouraging patterns of land use which decrease trip length of automobile travel and encourage trip consolidation.
 - (G) increasing public access to mass transit, sidewalks, trails, bicycle routes and other alternative modes of transportation.
 - (H) reducing energy consumption and demand.
 - (I) minimizing the adverse environmental impacts of development.
 - (J) improving the design, quality and character of new development.
 - (K) fostering a more rational pattern of relationship among residential, business and industrial uses for the mutual benefit of all.
 - (L) encouraging the development of vacant properties within established areas.
 - (M) ensuring that development proposals are sensitive to the character of existing neighborhoods.
 - (N) ensuring that development proposals are sensitive to natural areas and features.
- encouraging a wide variety of housing opportunities at various densities that are well-served by public transportation for people of all ages and abilities.

(B) Conduct of Public Hearing.

- (1) Rights of All Persons. Any person may appear at a public hearing and submit evidence, either individually or as a representative of a person or an organization. Each person who appears at a public hearing shall state his or her name, address and, if appearing on behalf of a person or organization, the name and mailing address of the person or organization being represented.
- (2) Exclusion of Testimony. The decision maker conducting the public hearing may exclude testimony or evidence that it finds to be irrelevant, immaterial or unduly repetitious.
- (3) Continuance of Public Hearing. The decision maker conducting the public hearing may, on its own motion or at the request of any person, continue the public hearing to a fixed date, time and place. All continuances shall be granted at the discretion of the body conducting the public hearing.

(C) Order of Proceedings at Public Hearing.

The order of the proceedings at the public hearing shall be as follows:

- (1) Director Overview. The Director shall provide an overview of the development application.
 - (2) Applicant Presentation. The applicant may present information in support of its application, subject to the determination of the Chair as to relevance. Copies of all writings or other exhibits that the applicant wishes the decision maker to consider must be submitted to the Director no less than five (5) working days before the public hearing.
 - (3) Staff Report Presented. The Director shall present a narrative and/or graphic description of the development application, as well as a staff report that includes a written recommendation. This recommendation shall address each standard required to be considered by this Code prior to approval of the development application.
 - (4) Staff Response to Applicant Presentation. The Director, the City Attorney and any other City staff member may respond to any statement made or evidence presented by the applicant.
 - (5) Public Testimony. Members of the public may comment on the application and present evidence, subject to the determination of the Chair as to relevance.
 - (6) Applicant Response. The applicant may respond to any testimony or evidence presented by the public.
- Staff Response to Public Testimony or Applicant Response. The Director, the City Attorney and any other City staff member may respond to any statement made or evidence presented by the public testimony or by the applicant's response to any such public testimony.

CORBETT DRIVE & THE MASTER STREET PLAN

1998

2000

51

- Master Street Plan (MSP) identifies the long-range vision for the collector & arterial street network
- MSP previously identified Corbett Drive connecting from Harmony Road to English Ranch thru ODP site
- Concerns during Front Range Village development about the Corbett vehicular connection
- Council removed collector street connection during 2010 City Plan/ MSP update

STREET CONNECTIVITY NORTH OF FRONT RANGE VILLAGE

- **Current MSP**
 - **Indirect Corbett Drive street connection**
 - **No direct connection to Kingsley**
- **Bicycle and pedestrian trail will remain**
- **If Corbett Drive removed from MSP, Land Use Code may require a non-Corbett street connection to the property north of Front Range Village**
 - **Depends on land uses and traffic impact study**
 - **May impact traffic signal locations and access points along Ziegler**

Local Street Connection from ODP to English Ranch (Paddington Rd)

- Generally opposed by English Ranch neighbors
- Successful petition to remove Corbett Dr (collector-level) connection in 2010
 - Local street connection nearly duplicates this condition
- Arterial roadways able to continue to meet Transportation Level of Service standards w/o connection

Signalized Intersection at Ziegler/Hidden Pond (Major Amendment Proposal)

- Provides a bike/ped crossing along this stretch of Ziegler
 - Recently identified as a need in the Active Modes Plan
- Precludes future possibility of a traffic signal at the Ziegler/Paddington/Grand Teton intersection
- Serves ODP site, Front Range Village, Affinity, Hidden Pond Estates
 - Does not directly benefit English Ranch, Woodland Park
- Identified as a potential outcome in 2010 of removing the Corbett Dr connection to English Ranch
- Many feel this prioritizes new development over traffic issues for existing neighborhoods
- May lead to accidental trips/traffic east of Ziegler Rd on Hidden Pond Dr (no outlet)

Signalized Intersection at Ziegler/Paddington/Grand Teton

- Generally desired by neighbors to improve access onto Ziegler Rd
- Generally supported by Woodland Park which only has Ziegler Rd access to their neighborhood
- Could potentially serve more locations (English Ranch, Woodland Park, ODP/Affinity/FRV via connections)
- Would also serve as a bike/ped crossing for this stretch of Ziegler Rd
- Signal not warranted under current conditions without a connection to ODP site
 - Tension between desire for signal and opposition to a street connection from ODP site to help generate traffic warrants

Misc.

- Staff support for a signal somewhere along this stretch of Ziegler Rd
- A signal at Ziegler/Paddington or Ziegler/Hidden Pond preferable to the Channelized T intersection from original ODP

Staff Evaluation

- No reduction in access / connection for bikes or pedestrians
 - ODP site features three north-south bike/ped access points
- Amenities to the north include English Ranch Park, Linton Elementary School
 - Located half-mile walking distance from center of ODP site
 - City policies / PSD walksheds encourage non-vehicular travel at these distances
 - ODP providing onsite park / gathering space; lower school enrollment demand
- TIS modeled connection / no connection. Both scenarios do not present level of service issues
- No connection requires trips to access an arterial; but detour is limited in distance
- No connection requested by neighborhood; aligns with previous policy decision made by City Council in 2010/2011 to remove connection from MSP
