Retail Market Analysis

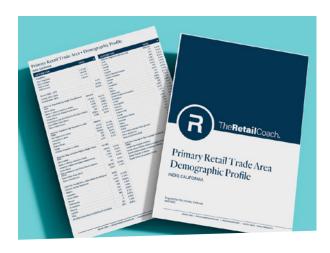

Custom Retail Trade Area Analysis

The Retail Trade Area is the geographical area from which the community's retailers derive a majority of their business. It is the foundational piece of the retail plan and its accuracy is critical.

We utilize retail trade area data when communicating with retailers and developers to ensure that the community fully leverages the amount of shoppers coming into the community.

We will hand draw Retail Trade Areas for Hickory Creek based on cell phone/GPS data from shoppers as well as on-the-ground analysis from The Retail Coach Team.

Demographic Profiling

A community must be able to instantaneously provide information and data sets sought by retailers during the site selection and site evaluation process. The data must be accurate, current, and readily available.

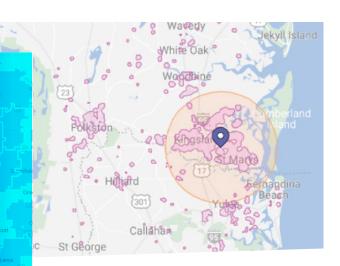

Our demographic profiles include population and projected population growth, ethnicities, average and median household incomes, median age, households and household growth, and educational attainment.

We will create comprehensive 2010 Census, 2022, and 2027 Demographic Profiles for the Retail Trade Area and Hickory Creek community.

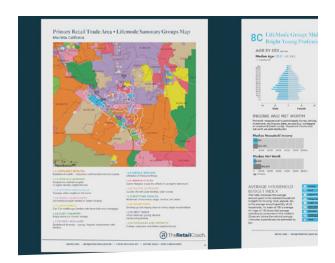

Mobile Data for Location Decisions:

We will utilize mobile location technology that analyzes retail location and behavioral data collected from mobile devices to determine consumer visits to Hickory Creek.

This high-confidence data is used to verify Retail Trade Areas and validate retail site selection decisions.

Retail Market Analysis

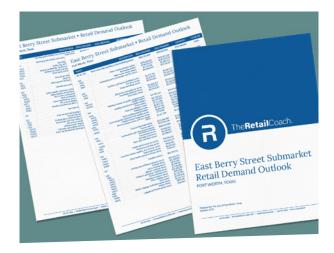

As retail site selection has evolved from an art to a science, psychographic lifestyle segmentation has become an essential element of retailers' preferred location criteria. Understanding a consumer's propensity to purchase certain retail goods and services—as well as specific retail brands—is valuable to national, regional, and independent retailers. Knowing the retail sectors and products that consumers demand removes a great deal of risk for an independent business.

Based on the market segmentation system developed by ESRI, we will develop a Tapestry Segmentation Profile of the households in the Retail Trade Area.

This is done by using the most advanced socioeconomic and demographic data to measure consumer attitudes, values, lifestyles, and purchasing behaviors to understand the sectors and brands of retailers that may be of interest.

Retail Demand Outlook

A community is able to quantify its retail demand through a Retail Demand Outlook, which provides a summary of the primary projected retail demand growth — or opportunities — for 68 retail sectors. The analysis is ultimately used to identify recruitment targets for the community.

The Retail Demand Outlook will:

- Identify retail demand growth opportunities for more than 68 retail sectors
- Distinguish retail sectors with the highest prospect for success and qualify their potential

We will determine the level of retail demand for the designated Retail Trade Area and use projected demand to help identify opportunity areas and prioritize market segments for recruitment.

Marketing & Branding

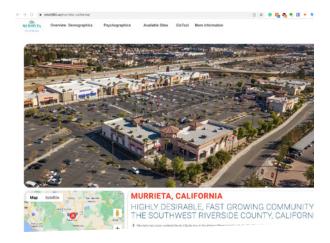

Retail Market Profile

To attract targeted retailers, the most critical step is to provide accurate and current community data and site-specific information on available vacancies and sites. It is important that this marketing information positively reflects the community's attributes and brand to corporate site selectors, real estate brokers, and developers, because it is essential in making initial decisions about locating in the community.

We will develop a Retail Market Profile tailored to the specific needs of targeted retailers' essential site selection and location criteria for Hickory Creek.

The profile serves as a community introduction, and includes:

- · Retail Trade Area Map
- · Location Map
- · Traffic Count Map
- · Demographic Profile Summary
- · Appropriate Logo and Contact Information

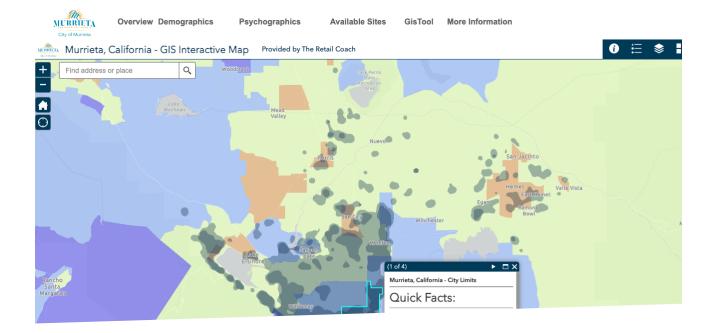

Online Retail Dashboard

Being able to quickly and easily access and share retail opportunity information greatly increases a community's opportunity for success. To assist with this, we develop a custom online retail dashboard that can be accessed online anytime through a branded Retail 360° link.

We will create a Retail 360° Retail Dashboard for Hickory Creek, which will be available for visual presentation and easy downloading of all data sets and marketing information. With a few clicks, retailers, brokers and developers can learn about your community's retail potential like never before.

Marketing & Branding

Interactive Site Mapping

Retail site selectors do much of their research while in hotel rooms and in airports, so a visual GIS platform that streamlines data and sites into one interactive and centralized location is a powerful tool.

We will develop a concise, easy-to-access, interactive site mapping platform for Hickory Creek, along with the preloaded prime vacancies and development/redevelopment sites that we will be marketing.

Data can be presented by demographic, socioeconomic, psychographic, and retail spending layers that are detailed down to the block level, to meet the needs of each individual user – whether they be a retailer, developer, or even a local entrepreneur.
