## Oversight Items

### • Financial Report & Invoice Register

Motion by Council Member Dutson to pay bills as monies become available; second by Council Member Musser. **Vote:** Unanimous approval. Discussion covered budget overages in wastewater maintenance, construction revenue, and various line items.

### • Mayor & Department Head Reports

**Police Chief Report:** Presented traffic survey data showing 85th percentile speeds at 72-73 mph with vehicles exceeding 120 mph. Discussed enforcement strategy focusing on excessive speeders and proposed 20 mph zones near schools.

**Mayor's Report:** Met with potential finance director for deliverable-based services including monthly reports, audit support, budget assistance, and revenue building.

**Council Member Dutson:** Asked Roger Carter how we are going to pay for a Finance Director because we do not have the revenue for it.

**Court Monitor Roger Carter:** explained that we cannot NOT afford to have a Finance Director. This particular individual has the goal of training the local staff.

**Mayor Jessop:** Explained that we are letting Pat Walker go so she can go back into retirement, and we left that in our budget. That is where the funds are going to come from. Also, this is not full-time and it's not hourly.

**Court Monitor Roger Carter:** Explained that a city of this size usually has the Recorder filling the Finance Advisor position, so what this individual is going to do is train in the Recorder until she's comfortable doing it. It won't take long.

**Council Member Merideth:** Mentioned that we have paid for not having a Finance Director to the tune of \$600,000.

Mayor Jessop disclosed that the next item involves her neighbor but stated she did not believe it would affect her property value.

Presentation by Planning Representative: The property is located at the intersection of Field Avenue and Oak Street. Unlike the previous item, there are no pressure zone issues with this property. The proposal involves rezoning to R1-10 and splitting the lot into three parcels. The project contains an existing structure that will be accommodated with existing yard facilities.

**Details provided:**

- Current utilities are located on Oak Street and will need to be extended along Field Avenue to service new lots
- Lot will be split into two quarter-acre lots and one 0.37-acre lot (middle lot with existing house)
- Total current lot size is 0.85 acres
- All new lots will meet the 10,000 square foot minimum requirement
- Existing structure is located in the middle of the current lot

Legal counsel reminded the council that once rezoned, the property owner can configure lots in any way that meets the 10,000 square foot requirement.
