Location: Town of Hilliard, Florida

I. PROJECT DESCRIPTION.

- B. Transportation.* Provides private streets that comply with rights-of-way, safety access and off street parking per the LDR.
- D. Public Facilities and Capital Improvement.* Enhances the appearance of the subdivision in that it requires all utilities to be underground, and as needed to either meet fire flow requirements in Phase 1, but mandatory for the commencement of construction of residences in Phase 2. adds public infrastructure to the Town of Hilliard by the extension of the water line along Henry Smith Road from Pine Street to the Southwest corner of the Project, being approximately 1,325 lineal feet, or a ¼ of a mile;

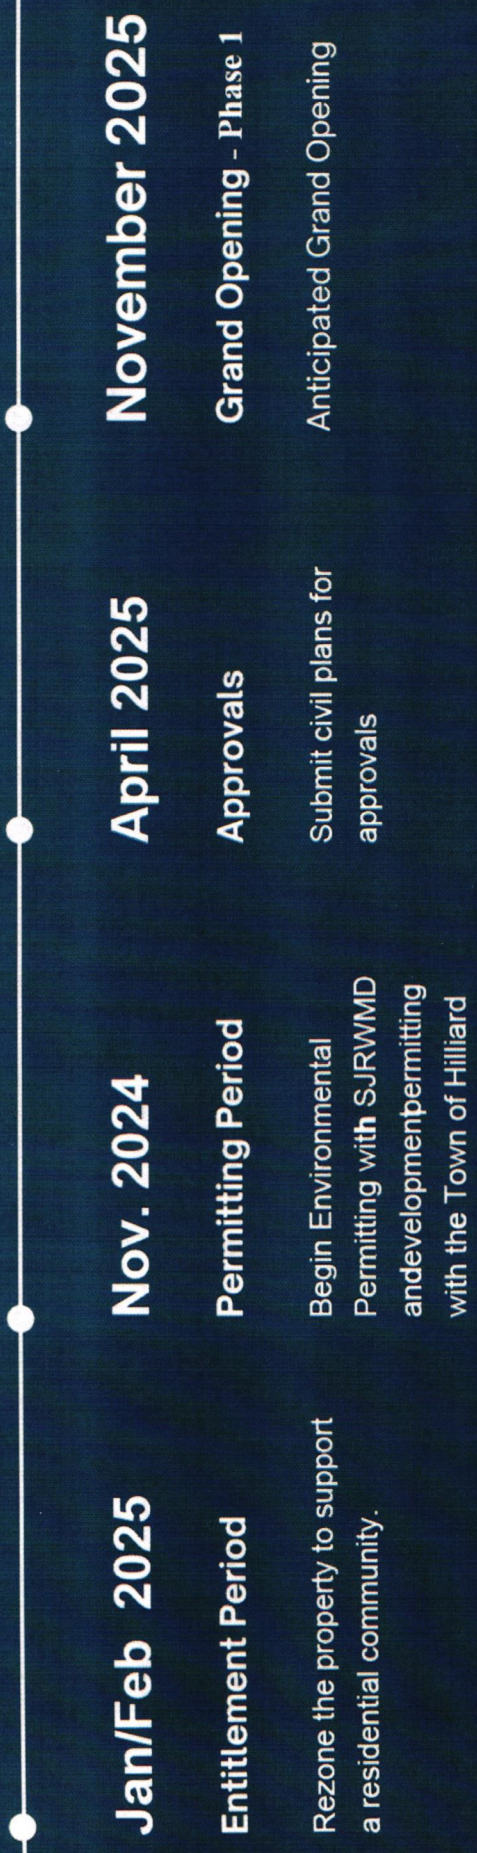

III. DESIGN GUIDELINES.

F. Utilities.

- a. Water will be provided by the Town of Hilliard, with fire hydrants installed in accordance with the LDR throughout the subdivision and within the extension of the water line along Henry Smith Road from Pine Street as needed to either meet fire flow requirements in Phase 1, but mandatory for the commencement of construction of residences in Phase 2. The looped waterline servicing the Project shall be not less than 86" on the main, and branches shall be sized but may be upsized within the Project to 8" if required to meet fire flow capabilities. Impacts and construction location and materials shall be coordinated with the Town of Hilliard and the St John River Water Management District for the portion of the looped water main that crosses through the southern wetlands on the adjacent property. Upon completion and certification, the water system shall be conveyed to the Town of Hilliard with utility easements within the Project's ROW for service and maintenance.

- H. Stormwater:** Stormwater will be handled on site within stormwater facilities designed and permitting under the standards of the LDR and the St. Johns River Water Management District. Stormwater shall be collected with grading and street gutters, and transported via underground piping to the retention ponds, with appropriate easements for maintenance. Stormwater currently being discharged from the adjacent communities, being Southern Glen Subdivision and Lorena Subdivision, shall be incorporated into the stormwater management facilities to be engineered and constructed.
- J. Configuration:** The location and design of all access points and private interior access roads, along with parks, stormwater facilities and development areas depicted on the Site Plan (“Exhibit B”) are conceptual and may be modified and reconfigured during the development process and shall not require amendment so long as the reconfiguration does not reduce the acreage of parks or any other design requirements herein; and shall nevertheless be subject to the review and administrative approval of the Town of Hilliard’s Planning and Zoning Department in coordination with its Building and Safety Officials.
