Financial Report
The financial report for July 31, 2026 was reviewed.

Managers' Report

1. Fuel sales for the month of August were discussed. Staff reported the Airport is waiting for Mascott to repair the slow delivery of 100LL.

2. Staff discussed the FAA transition plan to an unleaded aviation fuel from 100LL. The current deadline is to have a replacement in place by 2030. Currently there is no "drop in" replacement available. At least four entities are working to receive approvals from the FAA, engine manufacturers and aircraft manufacturers for their product. There is a concern the some of the proposed replacement fuels may not meet the needs of every airplane requiring fuel at the Airport. Staff will continue to monitor these developments to keep the Board informed.

3. Staff presented the 5 Year Capital Improvement Plan (CIP) showing projects and proposed expenditures through 2032. The largest proposed expenditure by the Airport is in 2030 when the existing runway is rehabilitated and a proposed 500' runway extension is constructed. The Board these projects and the potential funding for the runway extension.

The meeting was adjourned at 4:40 pm.

The next regular meeting date: Wednesday October 7, 2026.
