PROPERTY OWNER / BUILDER LIABILITY FORM

The Huerfano County Regional Building Authority Board (HCRBA) allows for the issuing of building permits to property owners. Owners should carefully consider the liabilities and responsibilities they will be accepting under the HCRBA Contractor Licensing and Building Code Regulations.

By signing this document, the property owner understands and accepts the following:

1. It is the responsibility of the building permit applicant to ensure all subcontractors hold at a minimum a current Type "D" license approved by the HCRBA, with the exception of State Licensed Electricians, Plumbers, and Manufactured Home Set persons.

Failure to do this may result in the issuing of a Stop Work Order.

Please note: The Town of La Veta requires state licensed contractors to register with the Town before performing any work.

2. It is imperative that owners ascertain subcontractors have the required insurance in place to protect their investment. Please contact your insurance agent for guidance with this very important subject matter.
3. The property owner acting as a Permit Applicant is responsible for correcting all code deviations as required, including the work done by subcontractors.
4. It shall be the duty of the permit applicant to cause the work to remain accessible and exposed for inspection purposes. Neither the building official nor the jurisdiction shall be liable for expenses entailed in the removal or replacement of any material required to allow inspection.

SCALE BAR 3/4"=1'-0"

GENERAL NOTES

1. This project is designed in accordance with the International Residential Code (IRC) 2021 Edition.
2. Dead Loads:
 - A. Roof: 15 psf
 - B. Floor: 40 psf
 - C. Wind: 130 mph, Exposure 'C'
3. Foundation:
 - A. The structure shall be founded on spread footings placed on undisturbed, natural soil with an assumed maximum bearing capacity of 3,000 psf.
 - B. Minimum frost depth of footings shall be 36" top of finished grade to bottom of footing. Field verify all top of footing elevations.
4. Concrete:
 - A. Concrete has been designed and shall be constructed in accordance with the "Minimum Requirements for Structural Concrete" (ACI 318). All concrete shall be of stone aggregate, unless noted otherwise.
 - B. Minimum 28 day compressive strength shall be:
 - (1) Slabs: 4000 psi
 - (2) All other walls: 3000 psi
 - C. All other walls shall be built per ASTM A615, grade 60, except bars to be welded shall be ASTM A705, grade 60. Provide corner bars to match all horizontal reinforcing. Provide (2) #5 around all openings in concrete and extend bars 24" past edges of openings.
 - D. Lap Splices shall be Class B. Use the following lap lengths, U.N.O.:
 - (1) a 57 bar diameters for 3,000 psi concrete.
 - (2) 50 bar diameters for 4,000 psi concrete.
 - E. Reinforcing placement: Provide chairs, stirrups, additional reinforcement, and accessories necessary to support reinforcement at position shown. Support of reinforcement shall be allowed by wood blocks, or other unobscurable material will not be allowed.
 - F. Minimum concrete cover:
 - (1) Concrete cast against and permanently exposed to earth: 3 inches
 - (2) Concrete exposed to earth or weather:
 - a. 2 inches
 - b. #5 bar and larger: 2 inches
 - c. #5 bar and larger: 4 inches
 - G. Anchor rods (Anchor bolts) shall be grade 36, conforming to ASTM F 1554, and shall have a minimum concrete embedment of 7" with a 2" hook, unless noted otherwise.
 - H. Exterior stainless steel shall be 4" finish (minimum) reinforced steel.
 - (1) Minimum welds per AISC Specification and AWS D1.1, not less than continuous 3/16" fillet, E70XX electrodes, be done to develop 1.3 times the yield strength of the base metal.
5. Steel:
 - A. Structural steel shall be detailed and erected in accordance with the American Institute of Steel Construction Specifications and Code of Standard Practice. Minimum yield strength: 50 ksi for square/rectangular HSS (ASTM A500, GR. C) 50 ksi for all other members (ASTM A36)
 - B. Connections:
 - (1) Minimum welds per AISC Specification and AWS D1.1, not less than continuous 3/16" fillet, E70XX electrodes, be done to develop 1.3 times the yield strength of the base metal.
 - C. Column base plates that require grout shall bear on non-sink grout.
6. Wood:
 - A. Framing lumber shall be (U.N.O.):
 - (1) Studs: Hem-Fir SUD grade
 - (2) Headers: Hem-Fir #2
 - (3) Joists/Rafters: Hem-Fir #2
 - B. Wood construction shall be in conformance with the National Design Specification for Wood Construction, and Chapter 23 of the IRC. All wood shall be kiln-dried to a maximum moisture content that meets the structural calculations of these drawings. All nail holes shall be filled to produce the maximum nailing capacity. See manufacturer for solid web blocking behind certain hangers that bear on steel beams.
 - C. Simpson: 1-800-999-5099, M.T.K.: 1-800-328-5824
 - D. Splices shall be gusseted connectors, bases and anchors shall be approved by the manufacturer.
 - E. Exterior walls shall be fully sheathed with 7/16" oriented strand board (OSB), or approved equivalent.
 - F. Plywood web joists and Vers-Lam LVL (2" E - noted V.L. on plans) shall be manufactured by Boise Cascade, or approved equivalent. Joists and beams shall not be modified without the written consent of the Structural Engineer.
7. Earth-Ret. Walls:
 - A. Walls will be constructed using the Superflex process, as noted on the CallEarth website: www.callearth.org.
 - B. Sandbags are filled with moistened earth. Stabilizers such as cement, lime or asphalt emulsion will be added.
8. Drawings:
 - A. Dimensions on these Structural drawings shall be verified with the Architectural drawings and any discrepancy shall be brought to the Architect's attention.
 - B. DRAWINGS SHALL NOT BE SCALED. Written dimensions shall take precedence over scaled measurements.
 - C. Copying these drawings for shop drawing use will not be permitted.
 - D. Any and all material substitutions shall be approved by the Structural Engineer prior to construction.
 - E. Valentine Engineering's electronic or digital seal or signature is hereby acknowledged as the official seal or signature of Valentine Engineering, a professional engineering firm registered and published by Valentine Engineering, Valentine Engineering is not responsible for any subsequent modification, completion, or unauthorized use of such document. To verify validity or applicability of the seal or signature, contact Valentine Engineering.

According to Resolution 19-27, applications for building permits in subdivisions that have recorded restrictive covenants and Home Owner Associations (HOA) or Property Owner Associations (POA) with active and current status on the Colorado Secretary of State website must be approved by the Association as a condition of issuing a building permit.

I, R. Michael McCarty as a representative of Majors Ranch
Name of HOA/POA

have been granted the authority to approve this building permit application on behalf of the HOA or POA and have had the opportunity to review the proposed permit application described below.

If the HOA or POA has reviewed this application at a meeting, date of meeting:
If a motion was made regarding this application, describe the motion and the vote:

My signature represents:

- Approval, subject to actual compliance with applicable covenants.
- Approval with the following conditions:
- Denial for the following reasons:

R. Michael McCarty
Signature President
Title/role with HOA or POA

Huerfano County Building Authority Board (HCBA) Staff Report

COMPLAINT:

Spanish Peaks Inn Fire

HISTORY:

On January 3, 2023, the Spanish Peaks Inn burned, at that time the building had been condemned. The day after, on the fourth of January, the department sent out a curtesy letter explaining the need to have the damage cleaned up as quickly as possible. About a month later, an official code letter was sent because no noticeable efforts in clean-up had been made.

Since then, there have been numerous telephone conversations as well as email correspondence trying to get a timeframe on when the clean-up will happen. There has been an issue with debris flying across the highway from both buildings on the property-- the roof is coming off the building next to the burned structure. Several letters have been send trying to get clean-up initiated. At the end of last year, the department brought the issue before the Huerfano County Building Authority Board and the recommended the building department speak with them again about cleaning up the trash to keep it from going across the highway. There had been some clean-up after the meeting. Now that the wind has picked up again, more debris has been noticed around the area starting to break free.

CURRENTLY:

At this time, Huerfano County Building Department would like to bring Mr. Patel in front of the Board to specifically explain the timeframe and why it is taking so long to get the area cleaned up. We do know a large amount of time was spent waiting for the State asbestos testing and results. But the results are back and Adept Building Solutions pulled a demolition permit January 8, 2024; the demolition permit was approved and issued on January 9, 2024 and still nothing has been done. We have been in contact regularly with Adept Building Solutions and we get a different story every time. Finally, we decided to communicate in an email form, and has been stated it could take up to six months before the company can start demolition on this project.

KEY CONSIDERATIONS:

Mr. Patel has come to the Building Department and complained about security issues on the premises and needed somebody to stay 24/7 and asked the department to release power back to the building. We released the electricity for security purposes. We have driven past during the day and don't see anyone on the property, they only seem to have people there at night. The entrance to the main part of the hotel is destroyed and unsafe for public access. We asked Patel not to access that area and it seems that is where the security personnel are entering--have been parking under the area of concern.

HUERFANO COUNTY BUILDING REGULATIONS:

SECTION 116

UNSAFE STRUCTURES AND EQUIPMENT

[A] 116.1 Unsafe conditions.

Structures or existing equipment that are or hereafter become unsafe, insanitary or deficient because of inadequate *means of egress* facilities, inadequate light and *ventilation*, or that constitute a fire hazard, or

are otherwise *dangerous* to human life or the public welfare, or that involve illegal or improper occupancy or inadequate maintenance, shall be deemed an unsafe condition. Unsafe structures shall be taken down and removed or made safe, as the *building official* deems necessary and as provided for in this section. A vacant structure that is not secured against unauthorized entry shall be deemed unsafe.

[A] 116.2 Record.

The *building official* shall cause a report to be filed on an unsafe condition. The report shall state the occupancy of the structure and the nature of the unsafe condition.

[A] 116.3 Notice.

If an unsafe condition is found, the *building official shall serve on the owner of the structure, or the owner's authorized agent, a written notice that describes the* condition deemed unsafe and specifies the required repairs or improvements to be made to abate the unsafe condition, or that requires the unsafe structure to be demolished within a stipulated time. Such notice shall require the person thus notified to declare immediately to the *building official* acceptance or rejection of the terms of the order.

[A] 116.4 Method of service.

Such notice shall be deemed properly served where a copy thereof is served in accordance with one of the following methods:

1. A copy is delivered to the owner personally.
2. A copy is sent by certified or registered mail addressed to the owner at the last known address with the return receipt requested.
3. A copy is delivered in any other manner as prescribed by local law.
 - If the certified or registered letter is returned showing that the letter was not delivered, a copy thereof shall be posted in a conspicuous place in or about the structure affected by such notice. Service of such notice in the foregoing manner on the owner's authorized agent shall constitute service of notice on the *owner*.

[A] 116.5 Restoration or abatement.

Where the structure or equipment determined to be unsafe by the *building official* is restored to a safe condition, the owner, the owner's authorized agent, operator or occupant of a structure, premises or equipment deemed unsafe by the *building official* shall abate or cause to be abated or corrected such unsafe conditions either by repair, rehabilitation, demolition or other approved corrective action. To the extent that repairs, alterations or additions are made or a change of occupancy occurs during the restoration of the structure, such repairs, alterations, additions and change of occupancy shall comply with the requirements of the *International Existing Building Code*.

STAFF RECOMMENDATIONS:

To allow Mr. Patel a month to come into compliance and if it is not done within this timeframe, have the electricity shut off and the entire property fenced off to ensure no public access.

Item 6e.

Huerfano County Building Authority Board (HCBA)

Staff Report

Complaint: Received information that the landowners (Cindy and Dave Driscoll) were living in a dwelling that had no Certificate of Occupancy.

A Code Violation letter, ZV 24-024, was sent to the landowners Certified Mail with Return Receipt. The landowners then responded by the time frame set in the Code Violation Letter. An inspection of the property was conducted on March 13, 2024, by both Ryan and Cheri.

Huerfano County Building Regulations:

Section 6.03 Certificates of Occupancy

- .01 No building constructed after April 1, 2000 shall be used for human occupancy without the issuance of a Certificate of Occupancy by the Building Official.
- .02 Such Certificate of Occupancy shall be issued within ten (10) working days of the time of notification to the Building Official that the structure, building or land improvements are completed and the structure(s) ready for occupancy, provided that the structure, building or land improvements meet the requirements of Section 6.05, Adequate Water, Sewage Disposal System Requirements for Building Permits and Certificates of Occupancy.
- .03 Certificates of Occupancy shall be issued only for buildings or other structures that comply with all the provisions of these Regulations and with all building, plumbing, mechanical, fire and other codes currently adopted.
- .04 Buildings and other structures failing to meet these requirements shall be denied a Certificate of Occupancy.
- .05 A copy of all Certificates of Occupancy shall be filed in the office of the Building Official and shall be available for examination by the public.

Section 7.03 Reports and records.

- .01 The Building Official shall keep complete records of all licenses, permits, inspections, re-inspections, fees and other monies collected and other official actions performed under the Policy.
- .02 The County Building Official or the County Building Official's duly authorized representative shall act as secretary to the Authority and Board of Review and keep an accurate and permanent record of all proceedings before the Authority and Boards of Review.

Section 7.04 Owner obtained permits.

- .01 The record owner of a single-family dwelling or manufactured home, including the usual accessory buildings and quarters used exclusively for living purposes, may perform construction work on such dwelling or manufactured home without a license provided the dwelling or manufactured home upon which the work is to be performed will be occupied by the owner as the owner's principal place of residence, and a permit is issued for such work.

Huerfano County Land Use
401 Main Street, Suite 304
Walsenburg, Colorado 81089
719-738-1220, Ext. 117

Item 6e.

.02 No building permit shall be issued to an owner to construct a new single-family dwelling or manufactured home more often than once every thirty-six (36) months after the date of the Certificate of Occupancy.

Section 9.02 Building Inspection Fees

.01 Fees for Building Inspections and re-inspections will be set by resolution of the jurisdiction.

Section 9.05 Addressing and Certificates of Occupancy

- .01 The fee for the first assignment of a new address is \$150.00.
- .02 The fee for address verification or change is \$50.00 for each occurrence.
- .03 The fee for issuing a Certificate of Occupancy is \$150.00.

Key Considerations:

- The house was permitted in 2013 (BP 13-030) which was under the 2006 I.R.C. Building Codes at that time.
- There are no records of inspections being done since October 2013.
- There has been several changes in staff in the last 11 years.
- The barn is 40x80 (enclosed) with 2-12x80 (connected lean to) is an unpermitted building that was added after the dwelling was started and after the hanger was completed.
- The residence needs a CO and the barn needs a COC to be in compliance.

Staff Thoughts/Comments:

- In order to bring the dwelling up to compliance building permit fees need to be caught up to date and any other fees according to the Building Code will need to be addressed.

- In order to bring the barn into compliance a building permit application will need to be pulled and paid for with penalty.

HCBA Meeting March 21, 2024

The Board unanimously agreed that the Driscoll's should be able to get their Certificate of Occupancy for their permitted residence, without any monetary penalty. As for the unpermitted barn; the Board unanimously agreed that both the building permit fee should be paid along with the penalty of double the permit fee.

Currently:

The Driscoll's have obtained their Certificate of Occupancy for their Residence and they have paid the Building Permit Fee for the barn as well as the extra fee for not having a Building Permit to start.
