## Walk Hendo

### Steering Committee Meeting #1

June 10, 2022

10:00AM-11:30AM

## Meeting Notes

Meeting video recording can be found [here](#).

Interactive map feedback for both virtual and in-person can be found [here](#).

Provide feedback on preferred logo by taking [this poll](#).

In attendance: Carl Taylor (Henderson County Public Schools), Dawn Barr (resident, BRBC president), Diana Lewis (resident, Sammy Williams volunteer), Adela Gutierrez (City of Hendersonville), LoriKay Paden (YMCA), Philip Ellis (interested citizen, Robinson Design Engineers), Janna Bianculli (Henderson County Planning Department), Landon Coley (Henderson County Planning Department), David White (WNCSource), Luke Huntley (WNCSource), Matt Manley (City of Hendersonville), Brent Detwiler (City of Hendersonville), Kristy Carter (Traffic Planning and Design), Christy Staudt (Traffic Planning and Design).

On Zoom: Joe Sanders (Blue Ridge Bike Club, AARP), Jennifer Hensley (City Council), Rebekah Robinson (Conserving Carolina), Tom Wooten (City of Hendersonville), Richard Regan (resident).

Kristy and Christy opened the meeting with introductions of the project team and asked attendees to introduce themselves.

Comments on draft vision and goals statements:

- Joe Sanders: Network is a critical part, first phrase in second sentence. Bicycle and pedestrian items should be emphasized as a "critical or important part"
- Janna Bianculli: Pointed out the need to reference all users since "safe for me isn't necessarily safe for someone else". Idea was discussed to add a note to the final sentence .... "interconnected with the regional transportation system AND safe and accessible for all users."

Other questions/comments not indicated on map:

- Several comments were made about the importance of audible pedestrian signals (APS) for individuals with vision impairment. Key locations noted included King Street, Asheville Highway, Four Seasons Boulevard and Church Street.
- A desire for a committee was expressed to deal with ADA priorities such as APS.

The presentation concluded and the meeting transitioned to the printed map (in person) and concept board interaction. See the interactive map feedback [link](#) for these recorded comments.
