Town Council Meeting

February 26, 2024 at 6:00 PM
Howey-in the-Hills Town Hall
101 N. Palm Ave.,
Howey-in-the-Hills, FL 34737

Join Zoom Meeting: https://us06web.zoom.us/j/86412249492?pwd=ICsLIOvrfvd2TRIp70X7ggTH7Ggc5u.1
Meeting ID: 864 1224 9492 | **Passcode:** 660238

AGENDA

Call the Town Council Meeting to order
Pledge of Allegiance to the Flag
Invocation by Councilor Reneé Lannamañ

ROLL CALL
Acknowledgement of Quorum

AGENDA APPROVAL/REVIEW

CONSENT AGENDA
Routine items are placed on the Consent Agenda to expedite the meeting. If Town Council/Staff wish to discuss any item, the procedure is as follows: (1) Pull the item(s) from the Consent Agenda; (2) Vote on the remaining item(s); and (3) Discuss each pulled item and vote.

1. The approval of the minutes and ratification and confirmation of all Town Council actions at the January 22, 2024 Town Council Meeting.

2. The approval of the minutes and ratification and confirmation of all Town Council actions at the January 22, 2024 Town Council Workshop Meeting.

PUBLIC HEARING

3. Consideration and Approval: (transmittal hearing) **Ordinance 2023-013 - Comprehensive Plan Amendment - Future Land Use Element**

   AN ORDINANCE OF THE TOWN OF HOWEY-IN-THE-HILLS, FLORIDA, PERTAINING TO COMPREHENSIVE PLANNING; AMENDING THE FUTURE LAND USE ELEMENT (FLUE) OF THE TOWN'S ADOPTED COMPREHENSIVE PLAN PURSUANT TO SECTION 163.3184 OF FLORIDA STATUTES; DESCRIBING THE ANALYSIS AND REEVALUATION UNDERTAKEN BY TOWN COUNCIL REGARDING RESIDENTIAL DENSITIES AND LOT SIZES IN POST-2010 RESIDENTIAL DEVELOPMENT IN THE TOWN; AMENDING CERTAIN FLUE POLICIES TO MODIFY THE REQUIREMENTS IN THE "VILLAGE TOWN CENTER" AND "MEDIUM DENSITY RESIDENTIAL" LAND-USE DESIGNATIONS REGARDING DWELLING UNITS PER ACRE, LOT SIZES, AND OPEN SPACE; AMENDING

OTHER RELATED REQUIREMENTS FOR THE TWO LAND-USE DESIGNATIONS; AMENDING POLICY 1.2.6 OF THE FUTURE LAND USE ELEMENT TO SPECIFY AREAS WHERE THE TOWN MAY ALLOW LOTS SMALLER THAN ONE-FOURTH ACRE (10,890 SQ. FT.); PROVIDING FOR CODIFICATION, SEVERABILITY, AND AN EFFECTIVE DATE.

- Mayor MacFarlane will read the Ordinance title.
- Town Planner will explain Ordinance 2023-013.
- Mayor MacFarlane will open Public Comment and Questions for this item only.
- Mayor MacFarlane will close Public Comment.
- Motion to approve Ordinance 2023-013.
- Council Discussion.
- Roll Call Vote.

4. Discussion: (second reading) **Ordinance 2024-001 Mission Rise PUD Rezoning**

AN ORDINANCE OF THE TOWN OF HOWEY-IN-THE-HILLS, FLORIDA, PERTAINING TO LAND USE; REZONING FOUR PARCELS OF LAND LOCATED GENERALLY IN THE SOUTHWEST PART OF THE TOWN AND COMPRISING THE PROPOSED PLANNED UNIT DEVELOPMENT TO BE KNOWN AS "MISSION RISE" ON AN L-SHAPED AGGREGATE OF ABOUT 243.3 ACRES WEST AND SOUTH OF THE DEVELOPMENT KNOWN AS "THE RESERVE AT HOWEY-IN-THE-HILLS" (NOW ALSO KNOWN AS "HILLSIDE GROVES"), WITH PART OF THE LANDS BEING SOUTH OF NUMBER TWO ROAD AND EAST OF SILVERWOOD LANE AND OTHER PARTS OF THE LAND BEING WEST OF STATE ROAD 19 AND SOUTH OF REVELS ROAD, THE FOUR PARCELS BEING IDENTIFIED WITH LAKE COUNTY PROPERTY APPRAISER ALTERNATE KEY NUMBERS 1780616, 1780811, 1030421, AND 3835991; AMENDING THE TOWN'S ZONING MAP TO APPROVE PLANNED-UNIT-DEVELOPMENT (PUD) ZONING FOR THE PARCELS; PROVIDING FINDINGS OF THE TOWN COUNCIL; APPROVING PUD ZONING FOR THE PARCELS, WITH DEVELOPMENT TO BE GOVERNED BY A DEVELOPMENT AGREEMENT AND A REVISED CONCEPTUAL LAND USE PLAN AND BY THE TOWN'S LAND DEVELOPMENT CODE AND OTHER TOWN ORDINANCES GOVERNING THE DEVELOPMENT OF LAND; REPEALING PRIOR ORDINANCES AND SUPERSEDING CONFLICTING ORDINANCES; PROVIDING FOR SEVERABILITY, CODIFICATION AND AN EFFECTIVE DATE.

- Mayor MacFarlane will read the Ordinance title
- Town Planner will explain Ordinance 2024-001
- Mayor MacFarlane will open Public Comment for this item only.
- Mayor MacFarlane will close Public Comment.
- Council Discussion

OLD BUSINESS

5. Consideration and Approval: **Hillside Groves Intersection Roundabout Requirement**

NEW BUSINESS

6. Consideration and Approval: **Removal of Board Member Ellen Yarckin from the Planning and Zoning Board**

7. Consideration and Approval: **Sara Maude Mason Boardwalk Revitalization Contract**

MEMBERS PRESENT:
Councilor Reneé Lannamañ (via Zoom) | Councilor David Miles (via Zoom) | Councilor George Lehning | Mayor Pro Tem Marie V. Gallelli | Mayor Martha MacFarlane

STAFF PRESENT:
Sean O'Keefe, Town Manager | Tom Harowski, Town Planner | Tom Wilkes, Town Attorney | Tara Hall, Library Director | John Brock, Town Clerk

Motion made by Mayor Pro Tem Gallelli to allow Councilor Miles and Councilor Lannamañ to participate and vote in the meeting remotely via Zoom; seconded by Councilor Lehning. Motion passed unanimously by voice-vote.

Voting
Yea: Councilor Lehning, Mayor Pro Tem Gallelli, Mayor MacFarlane
Nay: None

AGENDA APPROVAL/REVIEW

Motion made by Councilor Lehning to approve the meeting's agenda; seconded by Mayor Pro Tem Gallelli. Motion passed unanimously by voice-cote.

Voting
Yea: Councilor Lannamañ, Councilor Miles, Councilor Lehning, Mayor Pro Tem Gallelli, Mayor MacFarlane
Nay: None

CONSENT AGENDA

Routine items are placed on the Consent Agenda to expedite the meeting. If Town Council/Staff wish to discuss

any item, the procedure is as follows: (1) Pull the item(s) from the Consent Agenda; (2) Vote on the remaining item(s); and (3) Discuss each pulled item and vote.

1. The approval of the minutes and ratification and confirmation of all Town Council actions at the January 08, 2024, Town Council Meeting.

2. Consideration and Approval: **Water Treatment Plant Design Proposal - Halff Contract**

Motion made by Councilor Lehning to approve the Consent Agenda; seconded by Mayor Pro Tem Gallelli. Motion approved unanimously by voice-vote.

Voting
Yea: Councilor Lannamañ, Councilor Miles, Councilor Lehning, Mayor Pro Tem Gallelli, Mayor MacFarlane
Nay: None

PUBLIC HEARING

3. Discussion: (first reading) **Ordinance 2024-001 Mission Rise PUD Rezoning**

   Mayor MacFarlane read Ordinance 2024-001 out loud by title only:

   AN ORDINANCE OF THE TOWN OF HOWEY-IN-THE-HILLS, FLORIDA, PERTAINING TO LAND USE; REZONING FOUR PARCELS OF LAND LOCATED GENERALLY IN THE SOUTHWEST PART OF THE TOWN AND COMPRISING THE PROPOSED PLANNED UNIT DEVELOPMENT TO BE KNOWN AS "MISSION RISE" ON AN L-SHAPED AGGREGATE OF ABOUT 243.3 ACRES WEST AND SOUTH OF THE DEVELOPMENT KNOWN AS "THE RESERVE AT HOWEY-IN-THE-HILLS" (NOW ALSO KNOWN AS "HILLSIDE GROVES"), WITH PART OF THE LANDS BEING SOUTH OF NUMBER TWO ROAD AND EAST OF SILVERWOOD LANE AND OTHER PARTS OF THE LAND BEING WEST OF STATE ROAD 19 AND SOUTH OF REVELS ROAD, THE FOUR PARCELS BEING IDENTIFIED WITH LAKE COUNTY PROPERTY APPRAISER ALTERNATE KEY NUMBERS 1780616, 1780811, 1030421, AND 3835991; AMENDING THE TOWN'S ZONING MAP TO APPROVE PLANNED-UNIT-DEVELOPMENT (PUD) ZONING FOR THE PARCELS; PROVIDING FINDINGS OF THE TOWN COUNCIL; APPROVING PUD ZONING FOR THE PARCELS, WITH DEVELOPMENT TO BE GOVERNED BY A DEVELOPMENT AGREEMENT AND A REVISED CONCEPTUAL LAND USE PLAN AND BY THE TOWN'S LAND DEVELOPMENT CODE AND OTHER TOWN ORDINANCES GOVERNING THE DEVELOPMENT OF LAND; REPEALING PRIOR ORDINANCES AND SUPERSEDING CONFLICTING ORDINANCES; PROVIDING FOR SEVERABILITY, CODIFICATION AND AN EFFECTIVE DATE.

   Mayor MacFarlane asked Town Planner, Tom Harowski, to introduce and explain this item. Mr. Harowski reviewed his staff report that was included in the meeting's packet.

   Mr. Harowski reviewed the Planning and Zoning Board's recommendations for this proposed Development. The Planning and Zoning Board's recommendation included approval of Ordinance 2024-001 and the Village Mixed Use PUD for Mission Rise only if the proposed Development Agreement was modified to include:

   1) 80% of the residential lots can be no smaller than 1/4 acre in size (10,890 sq feet) – the remainder of the lots can be 75' lots as proposed by the applicant.

   2) Access to Number Two Rd can be constructed but cannot be open to access until Phases 1 and 2 have been completed and access to Number Two Rd shall be constructed and ready to open before a certificate of occupancy is issued for 50% of the lots in Phase 3.

3) The open space area between Phase 2 and Phase 3 shall be redesigned to eliminate the drainage ponds (as recommended in the Town Planner's staff report).

Mayor MacFarlane asked the representatives for the applicant to introduce themselves and give their presentation to the Town Council. Jonathan Huel, applicant's Land Use Attorney, introduced the applicant's project team, which included: Rhea Lopes (Project Planner), Jason Humm (owner representative), Mike Ripley (from Land Advisors), Jacque St. Juste (from Atwell), Charlotte Davidson (Traffic Mobility Consultants), and Mark Ausley (Bio-Tech Consulting).

Ms. Lopes gave a PowerPoint presentation to Councilors in support of the proposed Mission Rise development. Ms. Lopes stated that the submitted development agreement and concept plans for Mission Rise were the Town's current Comprehensive Plan. Ms. Lopes stated that certain conditions that the Planning and Zoning Board had made on their recommendation were not feasible, that the stormwater area was required as it was and that requested larger lots would not be feasible due to the additional cost.

Mayor MacFarlane opened Public Comment for this item only.

Eric Gunesch, 448 Avila Pl. – Mr. Gunesch stated that the developer obviously did not listen to the Planning and Zoning Board, and he wanted fifteen-foot side setbacks between homes.

Tim Everline, 1012 N Lakeshore Blvd. – Mr. Everline stated that he was frustrated with developers that said that developments would "fit in" within the Town's current homes. He did not agree and wanted the owners of the Mission Rise land to drive around the town and see what the town was really like. Mr. Everline stated that he did not believe the Mission Rise traffic study included Venezia Townhomes trips in its study.

Frances O'Keefe Wagler, 409 W. Central Ave. – Mrs. Wagler identified herself as a Planning and Zoning Board member and reminded everyone that the Mission Rise development was recommended only with certain conditions, which the developer was not implementing.

Ken Dunsmoor, 9950 Orange Blossom Rd (unincorporated Lake County) – Mr. Dunsmoor wanted to know how the developer would discourage people from driving down Orange Blossom Rd.

Mayor MacFarlane closed Public Comment for this item.

Mayor Pro Tem Gallelli asked why there were changes in proposed lots from what the developer had shown her during the previous week. Mr. Huel apologized for the confusion but explained that this was what had been proposed to the Planning and Zoning Board and what had previously been shown to her was showing a willingness for the plan to evolve and a willingness to negotiate with the Town. Mr. Huel stated that the applicants' message to the Town was that they are willing to work with the Town and wanted to find conditions that could be met that would work for the Town and the developer.

Mayor Pro Tem Gallelli stated that, in the current proposal from the developer, 83% of the lots were small 55' width lots and that was much too large of a percentage for small width lots. Mayor Pro Tem Gallelli stated that the developer needed to get rid of the 55' width lots.

Councilor Lannamañ stated that she thought 55' width lots were too small for the Town.

Councilor Miles stated that he had been muted during the last 10 minutes of the previous workshop. Councilor Miles stated that the Councilors had received a 300-page packet for the Town Council meeting, the Friday evening before the meeting and he did not think that was enough time to review the items in the packet.

Councilor Miles asked Mr. Harowski about the Hillside Groves Road upgrade area of Number Two Rd. and those road upgrades, along with the upgrades that Mission Rise would have to do, and if those upgrades would make the portion of Number Two Rd, which was within the Town's borders, up to standard. Mr. Harowski explained what would be required of the developer and that it was his expectation that the area that the developers would be required to upgrade would be within standards. Mr. Harowski stated that Hillside Groves and Mission Rise were only upgrading the portion of Number Two Road adjacent to their property, if there were other areas of Number Two Road (such as in front of the Town's 9 acres of land), they would need other funding sources to be upgraded.

Councilor Miles stated that he could not hear or understand Ms. Rhea Lopes' presentation, nor could he see it since he was on the phone and not attending in-person.

Councilor Miles corrected Ms. Lopes' presentation in which Ms. Lopes stated that Hillside Groves was approved for 740 units, when she should have stated that they were approved for 728 units and that the initial approval for this was made in 2005, not recently.

Councilor Miles stated he was concerned about the size of the two proposed parks in Mission Rise. Mr. Huel stated that two parks would be approximately 16.9 acres and that future plans could be specific for the two sizes. Councilor Miles stated that he would need to know the specific proposed size for each park.

Councilor Miles stated that developers were using the old, approved density of 4 units per acre, but the Town was in the process of lowering the amount that would be approved to 3 units per acre. Councilor Miles stated that they would need to lower their density to a max of 3 units per acre.

Councilor Miles stated that the development only had 129.3 acres of residential area, but in the developer's density calculation they included 153 acres (this included non-residential areas). Councilor Miles stated that he disagreed with the method of calculating and that 129.3 acres should be used to calculate the density.

Councilor Miles stated that the original approval (which was no longer in effect) for Mission Rise was for only 400 units. Currently the developer was asking for 499 units, and Councilor Miles stated that he would only allow the original number of units.

Councilor Miles stated that his vote for this Ordinance and proposed development, as it stands, would be for denial. Councilor Miles asked the Town Attorney if he could make a motion for denial during the current meeting, or to table the first reading to a time when he could attend in person.

Town Attorney, Tom Wilkes, stated that State law allowed for the developer to have two readings for their proposed development, so there was no cutting it off during this meeting.

Councilor Miles asked Mr. O'Keefe to read out loud text comments into the meeting's record. Mr. O'Keefe read out:

> *"Sean,*
>
> *I have provided John and you my four comments on the minutes from Jan 8 and also two messages with three comments on the ordinance on the comp plan for the workshop. I will attend by Zoom.*
>
> *I am going through the very length info for the Monday night meeting. Just got this long agenda yesterday. I am limited in reading it as only have iPhone here.*

I am going to ask to table the Mission Rise item until first meeting in Feb. to give us more adequate time to review and adequately comment on their proposal. I will say the idea of having 80% of their lots being 55x120 is a non-starter with me. Even the remaining 20% at 75x120 are too small. I am not happy with set backs either. Minimum front needs to be 25 feet, minimum rear needs to be 30 feet, minimum side needs to be 12.5 feet. Minimum side street needs to be 15 feet. Maximum house size under air sb 3,500 sq ft and minimum s/b 1,600 sq ft. Minimum garage size is 21x21= 441 sq ft, 2 car. Require all garages to be side entrance. I would support 90x120 lots (10,800 sq ft) and 80 x 135 lots (also 10,800 sq ft). Maximum number of lots for 129.3 acres of residences is 388, the max Number of single-family houses I would support. If they move 4 acres from the nonresidential category to residential category, I would support that, which would allow a max of 400 lots. That by the way, I believe, was the max that was approved in their expired PUD previously in place. 400 lots is my maximum and all lots must be 10,800 sq ft or larger. That gives them 90 square feet per lot or 36,000 square feet of benefit for a 400-lot development. Their 499 units is a non-starter for me.

Also I don't want any 22' width alleys. All streets should be 24' widths on 50' width ROW's.

I have more, but that is enough for now.

Sean,

Also all streets, all water and all wastewater lines, pumps and lift stations to be dedicated to Town. All storm water drainage facilities can be dedicated to HOA. Electric facilities dedicated to Duke. Natural Gas to Teco. Would like community to offer natural gas to all lots.

Sean,

One more issue with the Mission Rise proposal. They state they are reducing their density request from 592 lot units to 499 lot units, as if this is a decrease. In fact their previous PUD approval that expired in 2017 was for only 400 lot units! Thus this new proposal actually is asking to increase density over their previous proposal by 99 lot units to 499, that's almost a 25% increase in density for this property. I will not vote for any proposal on this property unless it is 400 lot units or less."

Councilor Miles stated that a developer should not look at Hillside Groves as a precedent that the Town will allow in other new developments.

Mayor MacFarlane stated that she would like to see natural gas added to the community. Mayor MacFarlane noted that all the parks were listed as passive parks (such as trails and trailheads); she would like to see more active parks (such as Pickle Ball courts) in the development.

Mayor MacFarlane said that, while she loved seeing alleys in communities (with garages not facing the main road), they needed to be careful that they did not make them too small, due to emergency needs and bottlenecks. Mayor MacFarlane was concerned about a lack of off-street parking.

Mayor MacFarlane stated that 55' lots would be a non-starter for the community.

Councilor Miles made a motion to table the 1st reading of this item to the first meeting in February, so that there would be an additional 1st reading on this item. There was no second for this motion. This concluded the first reading of this item.

OLD BUSINESS

4. Discussion: **Wastewater Options**

Sean O'Keefe, Town Manager, stated that Woodard and Currann had notified the Town about a grant opportunity that would allow the Town to get funding for a Wastewater Study. Mr. O'Keefe stated that, with the assistance of Woodard and Curran, the Town had submitted a grant for the Clean Water Facility Planning study. Mr. O'Keefe stated that Justin deMello, Project Manager for Woodard and Curran, was at the meeting to answer questions. Mr. O'Keefe then reviewed the PowerPoint presentation that had previously been presented to the Town Council during the December 12, 2023, Town Council Workshop.

Mr. O'Keefe explained that a gap in the previous presentation had been the estimated Operating Cost of a Town-owned wastewater treatment facility. Mr. O'Keefe stated that, based off of the cost of other municipalities' costs, the estimated operating cost would be roughly $2.33 million (this was created by prorating the cost of a wastewater treatment plant in the city of Tavares).

Councilor Lehning did not agree with the estimated cost that the Town Manager had come up with and believed there were better ways to come up with an estimated cost.

Councilor Miles stated that there were three things that would go into the operating cost of a treatment facility. They were electricity, chemicals, and labor costs. Councilor Miles believes that the staffing for a Town-run plant would be one person for 8 hours a day for only 5 days a week. Councilor Miles stated that, given additional time, he can come up with a better estimated operating cost.

Mr. O'Keefe stated that, based off of the Mayor's feedback in the last meeting, he had removed the proposed Wastewater Improvement fee from the Talichet and Venezia neighborhoods.

Mayor MacFarlane stated that, if the Town goes through with the proposed changes to the Land Development Code and the Comprehensive Plan, it will create a situation with even less proposed new homes utilizing a Town-owned wastewater treatment facility. This would increase the cost per person to operate the treatment plant.

Mr. O'Keefe stated that the next step for the Town would be to contract out for a study that would create a Clean Water Facility Planning document. Mr. O'Keefe stated that the Town should get the results from the Florida Department of Environmental Protection (FDEP) on whether the Town was selected to get a grant to pay for the necessary study.

Justin deMello from Woodard and Curran was asked how long it would take to conduct the Clean Water Facility Planning document. Mr. deMello stated that it would take at least 6 to 9 months to conduct the study. Mr. deMello stated that, if the State were going to assist with the funding of the proposed Wastewater Treatment Plant, they would require that the Town submit the Clean Water Treatment Planning document with the request for assistance.

Councilor Miles asked Mr. deMello to describe what services Woodard and Curran provides for the City of Tavares and the City of Groveland and how much Woodward and Curran charges each municipality. Mr. deMello stated that Woodard and Curran has a general engineering contract for the City of Tavares and is paid roughly $200,000 to $300,000 annually. Mr. deMello stated that Woodard and Curran

operates the wastewater plants for the City of Groveland and that the contract would be worth roughly $3 to $5 million a year.

Councilor Miles noted that the rate that the City of Groveland is currently charging the City of Mascotte for wastewater treatment services was $18.18 per 1,000 gallons. Councilor Miles also noted that the Central Lake CDD was currently charging the Town of Howey-in-the-Hills $24.00 per 1,000 gallons for the treatment of wastewater and that rate had been in place since 2006.

Mr. O'Keefe stated that he recommended that the Town Council hold off till March (when it will find out from FDEP if its grant submission was approved) before making any further decisions on the Wastewater options. Mayor MacFarlane agreed with Mr. O'Keefe.

Councilor Miles asked Mr. deMello if it would really take 6 to 9 months to complete the study. Mr. deMello stated that it would, and sometimes it takes up to 12 months.

Mayor MacFarlane suggested that, while the Town was waiting to see if it was selected to receive the grant from FDEP, that the Town Manager should research getting an SRF loan to pay for the study if the Town is not selected for the grant.

Mayor MacFarlane opened Public Comment for this item only.

Tim Everline, 1012 N. Lakeshore Blvd. – Mr. Everline stated that he had seen this analysis a few times already and would like the Central Lake CDD to be invited to come make a wastewater presentation before the Town Council.

Mayor MacFarlane closed Public Comment for this item.

NEW BUSINESS

5. Discussion: **Potential Library Expansion**

Tara Hall, Library Director, explained that the last expansion of the Town's library was four years ago and it added the Library Education Center (LEC) space that was used for library programming. Mrs. Hall stated that the next expansion of the Town Library should be for study rooms, quiet rooms, and additional stack space for children's literature and fiction. The first step of this expansion would be planning and drawing out designs for the space. The last time that the library was expanded, it took five years of creating impact fee submissions to the County prior to getting funding.

Councilor Miles stated that he wanted to see this in writing on a CIP form, so that it would explain what the library was attempting to do. Councilor Miles wanted Mrs. Hall to come back during the CIP to explain what her request was. Councilor Miles stated that the world was evolving and that a lot of books could be attained through electronic media and Councilor Miles wondered if more electronic format books would reduce the need for space in the library.

Mayor MacFarlane opened Public Comment for this item only.

Tim Everline, 1012 N. Lakeshore Blvd. – Mr. Everline wanted to know how specifically the LEC was used and for what age groups the programming in the LEC was created for. Mr. Everline wanted people to be quieter in the main library.

Hannah VanWagner, Town Library Assistant - Ms. VanWagner stated that the programming in the LEC was typically for all ages and that study rooms were a common addition to libraries.

DEPARTMENT REPORTS

6. Town Manager

Sean O'Keefe, Town Manager, reminded all that were attending the meeting that there would be a CIP workshop at 4pm on Monday February 12, 2024, directly before the 6pm regular Town Council meeting.

COUNCIL MEMBER REPORTS

7. Mayor Pro Tem Gallelli

Mayor Pro Tem Gallelli stated that she was working on the Town's fire truck restoration project but did not currently have an update. Mayor Pro Tem Gallelli thanked the residents for coming to the Town Council meetings.

8. Councilor Lehning

Councilor Lehning wanted to know the status of the well drilling project. Mr. O'Keefe stated that he didn't know the current depth of the second well.

Councilor Lehning wanted the non-emergency phone number for the Town's Police Department placed on the Town's electronic sign board.

Councilor Lehning also wanted a Development Status document added to the Town's reports each month.

9. Councilor Miles

Councilor Miles stated that he thought Councilor Lannamañ's idea of fixing up and painting the Town retired water tower for the Town's 100th anniversary was a good idea and he volunteered to create the CIP form for this project.

10. Councilor Lannamañ

Councilor Lannamañ stated that she would want to see all the required information before she would be comfortable making a decision about the Town's wastewater future.

11. Mayor MacFarlane

Mayor MacFarlane mentioned a House Bill that was going through the State Legislature this session, that, if passed, would have the effect of reducing the Town's Ad Valorem tax base.

Mayor MacFarlane told everyone that there was a Fish and Wildlife meeting set for January 24, 2024, from 3pm to 8pm in the Leesburg Venetian Garden building that would let the public know how the State was going to be chemically treating the Harris Chain of Lakes to reduce weed growth. Mayor MacFarlane asked interested or concerned individuals to attend that meeting.

Mayor MacFarlane stated that all of the proposed changes to the Town's Land Development Code and Comprehensive Plan would slow down or stop certain development, and that the State and County would still be making rules and demands on the Town that would be increasing costs. The Town would still need to pay for the cost increases by some means and, if the Town was not growing, it would still need to cover these costs by whatever means was necessary.

Mayor MacFarlane asked the Town Manager again to please have the empty cabinets at the back of the meeting room removed.

Councilor Lehning stated the Mayor was correct about costs going up and that Town's taxes would have to go up to cover these costs.

PUBLIC COMMENTS

Any person wishing to address the Mayor and Town Council and who is not on the agenda is asked to speak their name and address. Three (3) minutes is allocated per speaker.

Tom Ballou, 1105 N. Tangerine Ave. – Mr. Ballou stated that he would like to see the Town Hall meeting room's speaker system fixed.

Banks Helfrich, 9100 Sams Lake Rd., Clermont – Mr. Helfrich spoke about the purpose of groups.

ADJOURNMENT

There being no further business to discuss, a motion was made by Councilor Lannamañ to adjourn the meeting; Mayor Pro Tem Gallelli seconded the motion. Motion was approved unanimously by voice vote.

The Meeting adjourned at 8:57 p.m. | **Attendees: 42**

OLD BUSINESS

1. Discussion: **Ordinance 2023-013 - Comprehensive Plan Amendment - Future Land Use Element**

   AN ORDINANCE OF THE TOWN OF HOWEY-IN-THE-HILLS, FLORIDA, PERTAINING TO COMPREHENSIVE PLANNING; AMENDING THE FUTURE LAND USE ELEMENT (FLUE) OF THE TOWN'S ADOPTED COMPREHENSIVE PLAN PURSUANT TO SECTION 163.3184 OF FLORIDA STATUTES; DESCRIBING THE ANALYSIS AND REEVALUATION UNDERTAKEN BY TOWN COUNCIL REGARDING RESIDENTIAL DENSITIES AND LOT SIZES IN POST-2010 RESIDENTIAL DEVELOPMENT IN THE TOWN; AMENDING CERTAIN FLUE POLICIES TO MODIFY THE REQUIREMENTS IN THE "VILLAGE TOWN CENTER" AND "MEDIUM DENSITY RESIDENTIAL" LAND-USE DESIGNATIONS REGARDING DWELLING UNITS PER ACRE, LOT SIZES, AND OPEN SPACE; AMENDING OTHER RELATED REQUIREMENTS FOR THE TWO LAND-USE DESIGNATIONS; AMENDING POLICY 1.2.6 OF THE FUTURE LAND USE ELEMENT TO SPECIFY AREAS WHERE THE TOWN MAY ALLOW LOTS SMALLER THAN ONE-

FOURTH ACRE (10,890 SQ. FT.); PROVIDING FOR CODIFICATION, SEVERABILITY, AND AN EFFECTIVE DATE.

Mayor MacFarlane asked the Town Manager to read out loud the comments on the Comprehensive Plan amendments that Councilor Miles had emailed the Town Manager. Sean O'Keefe, Town Manager, read out the comments that had been submitted to him. Mr. O'Keefe read out loud:

Message 1

Just to be sure I have two changes to the attachment to Ordinance 2023-013 that I would like to see as follows:

1. Page I-29, 3rd paragraph: Change minimum lot area from "10,800 square feet" to "10,890 square feet" for consistency throughout the rest of the document.

2. Page I-37, policy 1.2.6 starting after the colon change to read: "areas in or adjacent to the Town Center (e.g. the Town central commercial district) and areas abutting major arterial and collector road corridors such as state roads, county roads, and major Town collector roads, such as Central Avenue and N. Citrus Avenue, but not neighborhood roads…"

Message 2

Page I-29, 3rd paragraph: Change to read as follows; "One hundred percent (100%) of single family lots must have a minimum lot area of 10,890 square feet, exclusive of any wetlands or waterbodies that might be included with the lot.":

Mayor MacFarlane stated that her recollection was that the Town Council wanted to go from 40% to 50% of single family lots must have a minimum lot area of 10,890, not 100%. Mr. O'Keefe stated that he believed that confusion comes from different statements being made at different times. Councilor Miles stated that the discussion in December was that all lots were to be 10,890 square feet. Mayor MacFarlane then agreed with Councilor Miles.

Councilor Lehning stated that on page I-9 of the proposed ordinance, under the Village Mixed Use (VMU) section, he wanted the section that states "*town council may allow up to four dwelling units per acre if the development includes substantial recreation facilities for field sports, court games, and/or indoor recreation facilities.*" to be removed. Councilor Lehning stated that after that section was removed, he would like a sentence added that would describe what sort of parks and recreation facilities he would like to see added into VMU developments. Councilor Lehning stated that, after that sentence, he would like an addition of a requirement that 10% of all land would need to be set aside for parks and recreational facilities.

Councilor Lehning stated that he would like to see something regulating the minimum width of roads and parking added to the Comprehensive Plan. Councilor Lehning stated that he knows these regulations are in other areas of Town Code, but his fear is that the Town Council will never get around to changing those sections. Councilor Lehning said that he wanted to see 24' width roads, with additional parking space on both sides of the road, added into all zoning categories. Mayor MacFarlane stated that the Town Clerk had noted that road sizes and parking requirements were in the Land Development Code (LDC). Councilor Lehning said that he feared that the Council would not get around to changing the LDC.

Town Attorney, Tom Wilkes, said that he was just about completed with another ordinance that would be making the requested changes to the LDC, which would include the road widths and parking requirements in the Ordinance. Mr. Wilkes stated that a draft of the ordinance, which would make the

requested changes to the LDC, would be sent to the Town Councilors for review within the next two weeks. Mr. Wilkes stated that the Town Councilors should be able to vote on the ordinance to amend the LDC even earlier than they will be able to adopt any amendments to the Town's Comprehensive Plan.

Councilor Lannamañ said that all Town Councilors should keep in mind that HOAs will have their own declarations. As an example, Councilor Lannamañ stated the Venezia HOA declaration does not allow any parking on the roads overnight.

Councilor Miles stated that he did not see the necessity to put road widths and parking within the Comprehensive Plan, that they should stay in the LDC. It was decided that the road widths and parking requirements would be left within the LDC.

Councilor Lehning stated that he would like to identify what sort of recreational facilities he wanted to see in the VMU developments, and not leave it up to the developers. Councilor Lehning stated that when there is an area identified as a park, he wants it to be a larger size, not just the size of a leftover lot. Councilor Miles suggested that prior to construction, or the issuance of any permits, the developer must get approval of all recreational facilities in those parks. Mr. Wilkes stated that, in anticipation of that request, he had already added that into the proposed LDC amendment ordinance.

Councilor Lehning stated that he believed that the Council should state what a minimum size for a park should be. Councilor Lehning stated that he was open to discussion from other Councilors, but that 2 acres was what he thought the minimum size of a park should be. Mayor MacFarlane stated that she was concerned that too much of the Town's park space was dedicated to passive parks, and she wanted to see more active areas.

Councilor Miles reiterated that, prior to construction, or the issuance of any permits, the developer has to get approval of all recreational facilities in those parks.

Mr. Wilkes stated that he had already placed in the proposed LDC amendment that the Town Council would need to approve the plans for the developments prior to the approval of the first final plat for a development.

Councilor Lehning stated that he wanted to require developers to get a bond for the construction of parks and recreational facilities that were to be built in later phases.

Councilor Lehning summarized that what he was looking for was larger lots, bigger setbacks, wider roads, more parks.

Councilor Lannamañ stated that she agreed with Councilor Lehning and wanted to know what parks would look like prior to approval.

Mayor MacFarlane asked the Town Council to do their due diligence more, and if they know that an item is coming before the Council, that has been noticed, to get with the staff ahead of time if they want changes to the ordinance. This was so that the cost of noticing the hearing is not wasted.

Councilor Miles stated that he wanted the staff to follow the Town Council's directions more closely.

PUBLIC COMMENTS

Any person wishing to address the Mayor and Town Council and who is not on the agenda is asked to speak their name and address. Three (3) minutes is allocated per speaker.

Eric Gunesch, 448 Avila Pl. – Mr. Gunesch suggested changes to Councilor Lehning's wording of the 10% requirement for park space and recreation facilities. Mr. Gunesch stated that he would like to see the open space

requirement for VMU be increased from 25% to 30%, reduce the residential area to a minimum of 60% to a maximum of 70%, and remove all refence to any wetlands being used as open space. Mr. Gunesch stated that all the changes that were just recommended would also need to be changed on I-29.

Tim Everline, 1012 N Lakeshore Blvd. – Mr. Everline stated that the Town should know the plan for the parks even earlier, prior to grading, not the issuance of building permits. Mr. Everline had questions about Councilor Miles' other suggestions that were read out earlier.

Joshua Huseman, 671 Avila Pl. – Mr. Huseman suggested that the Town specify how much park space would have to be active versus passive park space.,

Mayor MacFarlane suggested that half of the required 10% area set aside for parks and recreation facilities needed to be active parks. There was a consensus from the Town Council that half of the required 10% had to be structured, active parks.

Tom Ballou, 1105 N. Tangerine Ave. – Mr. Ballou thanked the Town Councilors for their hard work.

Councilor Lehning said that the staff was much too slow with this amendment process.

ADJOURNMENT

There being no further business to discuss, a motion was made by Mayor Pro Tem Gallelli to adjourn the meeting; Councilor Lehning seconded the motion. Motion was approved unanimously by voice vote.

The Meeting adjourned at 5:02 p.m. | **Attendees: 18**

MEMORANDUM

TO: Howey-in-the-Hills Town Council
CC: J. Brock, Town Clerk, T. Wilkes, Town Attorney
FROM: Thomas Harowski, AICP, Planning Consultant
SUBJECT: Ordinance 2023-013 Comprehensive Plan Amendment
DATE: January 26, 2024

I was unable to fully participate in the workshop where the provisions for Ordinance 2013-013 were reviewed in preparation for the transmittal hearing. After reviewing the proposed amendments, there are two items that give me some concern, and I wish to call these to the Council's attention to consider modification to the policy amendments as current constructed.

Policy 1.2.6

The first item is with the revised Policy 1.2.6, page I-39, lines 20 and 21. This proposed amendment allows the Town to consider smaller lot sizes in areas supporting the Central Avenue commercial district, but the specific area cited is the Town Center Commercial (TC-C) district. Except for some provisions for existing single-family lots, the TC-C district does not allow single-family housing. Dwelling units added to this area must be done in conjunction with commercial development with the residential use located above the commercial space. Other than a handfull of existing homes there will be no single-family located in the Town Center Commercial area.

A more appropriate area for designation is the Town Center Overlay. The overlay includes the Town Center Residential (TC-R) and Town Center Flex (TC-F) which do include single-family development and will allow new single-family as infill or redevelopment. If any efforts are to be made to employ single-family housing in support of the Town Center Commercial area, the Town Center Overlay area is the best option to do that.

As a practical matter nearly all of the area encompassed by the Town Center Overlay is platted and substantially developed, so the proposed policy amendment is likely to have minimal impact on the built environment. There may be a few instances where lot splits or replacement units might result in some additional units supporting the Central Avenue commercial area and limiting the lot size options to the TC-C district will exclude these opportunities.

Policy 1.1.1 Active Recreation Requirement

Policy 1.1.1 on page I-31 proposes some new rules for recreation facilities in Village Mixed Use projects. I have a concern that the wording as proposed may result in less overall recreation opportunity in these larger projects and the prospect of under-utilized and poorly maintained facilities. I understand the Council's desire to include more items such as court games, swimming pools, playfields, playgrounds, and perhaps indoor activities in community buildings as a component of the recreation options offered in the larger communities. Facilities such as walking trails should be considered more passive recreation or they will continue to dominate the recreation provided. We presume the Council will desire a project to offer both active and passive recreation opportunities.

It is important to understand that active recreation facilities are going to be more expensive to build than passive recreation, and therefore developers are going to want to limit the active recreation insofar as possible. Passive recreation facilities tend to be large by their nature. While a project may be willing to provide an extensive area for passive recreation they will not do that if every additional passive recreation acre needs to be matched by an active facility acre. This situation creates a disincentive for including passive recreation facities and drives the project toward the minimum level of recreation, both passive and active, required by the policy.

The current policy directs that active recreation to be 50% of the minimum park area. If we use a minimum VMU project of 100 acres, then the project is obligated to a recreation component of 10 acres (10% of the area), of which five acres are active and five acres are passive. Five acres of active recreation facility can accommodate a lot of facilities. The following table shows some comparisons for various facilities based on recommended sizes.

Facility	Size	Acres
Minimum Requirement	217,800 s.f.	5.00
Tennis Court	2,808 s.f.	0.06
Pickleball Court	880 s.f.	0.02
Basketball Court	4,700 s.f.	0.11
Swimming Pool	4,860 s.f.	0.11
Baseball Field	160,000 s.f.	3.67
Soccer Field	81,000 s.f.	1.88

Based on a minimum active requirement of five acres, the development could easily accommodate a major playfield area and a grouping and variety of play courts. We can expect a development to select active recreation facilities based on their projected

As a side note we have been very successful in negotiating the inclusion of walking trails and bicycle facilities in our village mixed use projects, including projects where active recreation facilities are included. Both Watermark and Hilltop Groves include trail networks along with active recreation opportunities. The Lake Hills development agreement also calls for both active and passive recreation opportunities while the proposed Mission Rise plan has a robust recreation component.

market. A development targeting seniors is more likely to include courts, pools and community centers than field play areas, while a family oriented developmen may chose more of a mixture.

In this example, the five acres for passive recreation is not a lot of area in a 100-acre development, but anytime the developer adds area for walking trails he has to also increase the active recreation component, and as more active facilities are added the active component can quickly outgrow the demand. At some point, more tennis courts or pickleball courts will go unused as there is insufficent demand.

Our Recreation and Open Space Element includes a population served factor for a variety of recreation facilities. This table is reproduced below.

Population Guidelines for User-Oriented Outdoor Recreation Activities

Activity	Resource* Facility	Population Served
Golf	9-hole golf course	25,000
Golf	18-hole golf course	50,000
Tennis	Tennis court	2,000
Baseball/softball	Baseball/softball field	3,000
Football/soccer	Football/soccer field	4,000
Handball/racquetball	Handball/racquetball court	10,000
Basketball	Basketball court	5,000
Swimming (Pool)	Swimming (Pool)*	8,700
Shuffleboard	Shuffleboard court	1,000
Freshwater fishing non-boat	800 feet of Fishing pier	5,000
Freshwater fishing power boating, water skiing, and sailing	Boat ramp lane	1,500

* Based on a standard community swimming pool measuring 81 ft x 60 ft (4,860 ft).

In the example used here of a minimum sized Village Mixed Use project, the expected population is 717 people. (100 acres x 3units/acre x 2.39 people/unit) As is seen from a comparison of project population to the service capacity of the facilities cited above, the minimum village mixed use project would not trigger a service demand for more than one of any of these facilities. When compared to the sizes of each type of active recreation facilities in the previous table, the active recreation demand can be met in a far smaller area than the minimum five acres required by the proposed policy. Essentially the proposed policy is demanding much more in active recreation than our comprehensive plan policies would expect from any development. A smaller active recreation requirement will enable the Town to meet active recreation needs and still negotiate for larger passive recreation areas.

Summary

The requirement for an active recreation component in the VMU development is a laudable effort. This analysis, however, suggests that the 50% minimum for active recreation, may result in facilities that exceed the probable demand. The currently proposed rule is likely to result in facilities that will be under-utilized and likely poorly maintained as a result. As structured, the requirement also serves as a disincentive to provide any recreation facilities above the minimum level required or to provide more passive recreation than the minimum requirement. The culprit seems to be the 50% active recreation requirement rather than the 10% total area requirement.

If the active recreation component were set at 30%, the project could still accommodate a soccer field, a basketball court, four tennis courts and four pickleball courts (2.42 acres) in the three acre minimum with some space left over. The policy may also need some room to negotiate a total area devoted to active recreation facilities relative to passive recreation uses. I suggest the Council consider a lesser minimum percentage for active recreation and provide a more flexible opportunity to negotiate for these types of facilities in the Village Mixed Use projects.

ORDINANCE NO. 2023-013

AN ORDINANCE OF THE TOWN OF HOWEY-IN-THE-HILLS, FLORIDA, PERTAINING TO COMPREHENSIVE PLANNING; AMENDING THE FUTURE LAND USE ELEMENT (FLUE) OF THE TOWN'S ADOPTED COMPREHENSIVE PLAN PURSUANT TO SECTION 163.3184 OF FLORIDA STATUTES; DESCRIBING THE ANALYSIS AND REEVALUATION UNDERTAKEN BY TOWN COUNCIL REGARDING RESIDENTIAL DENSITIES AND LOT SIZES IN POST-2010 RESIDENTIAL DEVELOPMENT IN THE TOWN; AMENDING CERTAIN FLUE POLICIES TO MODIFY THE REQUIREMENTS IN THE "VILLAGE TOWN CENTER" AND "MEDIUM DENSITY RESIDENTIAL" LAND-USE DESIGNATIONS REGARDING DWELLING UNITS PER ACRE, LOT SIZES, OPEN SPACE REQUIRMENTS, AND PARKS AND RECREATION SPACE REQUIREMENTS; AMENDING OTHER RELATED REQUIREMENTS FOR THE TWO LAND-USE DESIGNATIONS; AMENDING POLICY 1.2.6 OF THE FUTURE LAND USE ELEMENT TO LIMIT THE AREAS WHERE THE TOWN MAY ALLOW LOTS SMALLER THAN ONE-FOURTH ACRE (10,890 SQ. FT.); PROVIDING FOR CODIFICATION, SEVERABILITY, AND AN EFFECTIVE DATE.

Be it ordained by the Town Council of the Town of Howey-in-the-Hills, Florida:

Section 1. Findings. In adopting this ordinance, the Town Council of the Town of Howey-in-the-Hills, Florida finds and declares the following:

(1) Under Section 163.3184 of Florida Statutes, the Town Council adopted a comprehensive plan, which includes the statutorily required Future Land Use Element (FLUE). Among other things the FLUE sets requirements and provides certain allowances for residential development in the Town.

(2) After 2010, substantial amounts of approved residential development were constructed at substantially increased densities and substantially smaller lot sizes than were prevalent in the Town's development from its incorporation in 1925 to 2010.

(3) In 2022 and 2023 the Town Council and its Planning and Zoning Board undertook an analysis and reevaluation of the post 2010 densities and lot sizes, with robust public participation in the reevaluation.

(4) The consensus on Town Council, at the Planning and Zoning Board, and among Town residents was that the increased densities and smaller lot sizes are inconsistent with the

development pattern, character, and ambiance of the Town's historical neighborhoods. For that reason, the Town Council determines that adjustment of density and open-space requirements in the Future Land Use Element of the Town's adopted Comprehensive Plan is justified and desirable.

(5) Under Section 163.3184 of the Florida Statutes, on _____, 2024, the Town approved the transmittal to the Florida Department of Commerce and other required review agencies of the proposed amendments to the Future Land Use Element. The Town held a second public hearing for adoption on the comprehensive plan amendments on _____, 2024, after the Town received responsive comments from the Florida Department of Commerce.

(6) The Town Council has determined that it is in the interest of the citizens, residents, and property owners of the Town to adopt the proposed amendments to the Future Land Use Element of the Town's adopted Comprehensive Plan.

Section 2. Adoption of Amendments to the Future Land Use Element. The amendments to the Future Land Use Element of the Town's adopted Comprehensive Plan, as contained in **Attachment A** to this ordinance with the underscore and strike-through format, are hereby approved and adopted by the Town Council.

Section 3. Codification. The amendments to the Future Land Use Element are hereafter part of the Town's adopted Comprehensive Plan and are to be codified and posted on the Town's website accordingly. Goals, objectives, and policies of the Future Land Use Plan may be renumbered or reorganized for editorial or codification purposes. Such renumbering or reorganization shall not constitute or be deemed a substantive change to the adopted Future Land Use Element.

Section 4. Severability. If any provision or portion of this ordinance is declared by a court of competent jurisdiction to be void, unconstitutional, or unenforceable, then all remaining provisions and portions of this ordinance shall remain in full effect. To that end, this ordinance is declared to be severable.

Section 5. Effective Date. This ordinance shall become effective 31 days after its passage and approval as a non-emergency ordinance at two regular meetings of the Town Council. If challenged timely pursuant to section 163.3187(5) of the Florida Statutes, the amendments shall take effect when the state land planning agency or the Administration Commission, as appropriate, issues a final order.

[signatures on the following page]

LIST OF MAPS

CHAPTER 1
FUTURE LAND USE ELEMENT

The data and analysis presented in the Future Land Use Element and other elements of the comprehensive plan is updated from the information used to develop the 2010 Comprehensive Plan Update. Some of the data was developed in 2017 as part of the Evaluation and Appraisal Review of the comprehensive plan. Where appropriate additional data has been included in the 2018 analysis.

A. INTRODUCTION

1. Purpose

The purpose of the *Future Land Use Element* is the designation of future land use patterns as reflected in the goals, objectives and policies of the local government comprehensive plan elements.

The *Future Land Use Element* sets forth the physical plan for the future development of the Town. The *Future Land Use Element* describes the appropriate location for the future land uses and promulgates the policies regulating the location and development of all land uses. The *Future Land Use Element* sets forth not only the density and intensity of land uses, but also considers other factors affecting land use development, such as timing, cost, and current development trends.

While each *Element* within the *Comprehensive Plan* is important, the *Future Land Use Element* is arguably the most important as it must be consistent with all other *Comprehensive Plan Elements* and articulate the *Goals, Objectives and Policies* of these other *Elements* in the form of specific land use policies.

The *Existing Land Use Map* included as part of this *Element*, describes the location and distribution of land uses in Howey-in-the-Hills in 2018. The *Future Land Use Map* (also included in this *Element*) is the focus of the *Comprehensive Plan*. It indicates the proposed location and distribution of land uses in the year 2035. All policies contained within this *Plan* must be consistent with the *Comprehensive Plan* and the *Future Land Use Map*. All land development regulations in effect subsequent to the adoption of this *Plan* must be consistent with the *Future Land Use Map* and the goals, objectives and policies of the *Comprehensive Plan*.

This *Future Land Use Element* is a required element; the minimum criteria for its contents are established in Florida Statutes Chapter 163. This *Plan Element* was formulated to be consistent with relevant sections of Chapter 163, Part II, F.S., the State *Comprehensive Plan*, and the *Comprehensive East Central Florida Regional Policy Plan*.

B. Population Estimates and Forecasts

In order to plan for growth, it is first necessary to project the number of persons that will reside

in the Town. The effectiveness of a local government's comprehensive plan depends principally on the accuracy of population projections for both resident and seasonal populations. These predictions for the future are the basis of planning for future land use, housing, recreation and open space, and public services and infrastructure needs.

A population projection to 2035 has been prepared to coordinate with long-range utility planning for water and sewer services. This estimate assumes the Town will continue to undergo a steady residential development pattern based on single-family homes as the predominant housing type. Projections for small populations are notoriously tricky given the small base size of the population and the ability for a single project to significantly affect total population and the timing of housing production. Therefore, a table presenting the major approved projects with total approved unit count has been included.

The table also indicates which projects have met concurrency requirements and which projects still must meet concurrency tests for water and sewer service at the time subdivision or site plan approval is sought. In theory, the projects without concurrency approval are vulnerable to development denial if necessary public services are not available. This "check process" should provide a safety valve should the water and/or sewer demand be out of line with system capacity at the time the development seeks approval. The projection for resident and seasonal populations is provided below.

TABLE 1: POPULATION ESTIMATES AND PROJECTIONS 2010 -2035

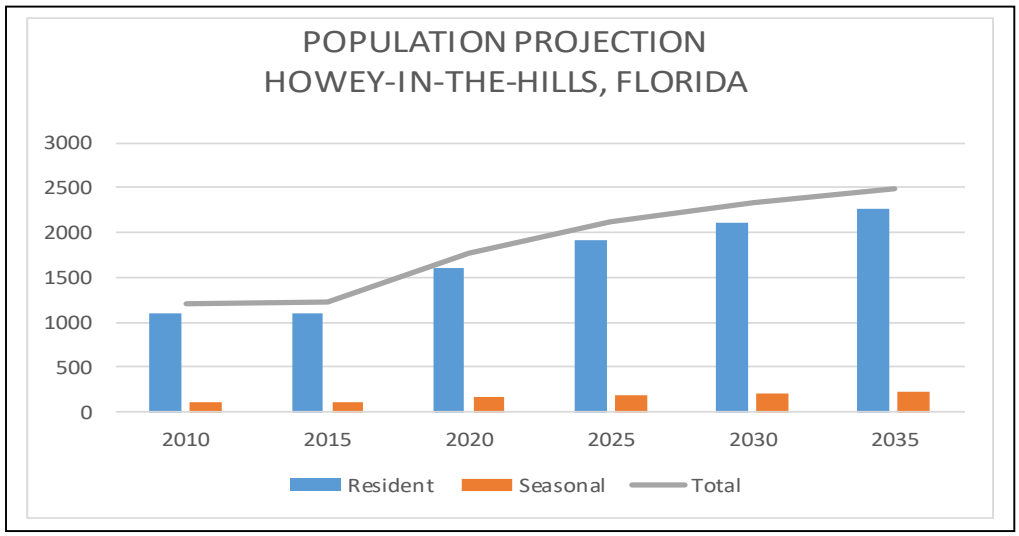
POPULATION PROJECTION
HOWEY-IN-THE-HILLS, FLORIDA

Year	Resident	Seasonal	Total
2010	1098	110	1208
2015	1106	111	1217
2020	1604	160	1764
2025	1925	193	2118
2030	2118	212	2330
2035	2266	227	2493

Source: US Census, BEBR and TMH Consulting projections.

Since 2015, the Town has seen the impact of development in the Venezia South subdivision with the 2017 BEBR estimate being set at 1,355 people. The projections assume this rate of development will continue to 2020 resulting in a total population increase of about 45%. This rate of growth is likely unsustainable over the long term, but it is also likely that at least one of pending major projects will move forward as the rater of development in Venezia South slows. The projections assume a declining rate of growth over the succeeding time increments, while still projecting a significant increase. If multiple large projects move forward at the same time or if significant levels of multi-family housing enter the market, population growth will be

accelerated over these projections. The graph below offers a visual representation of this data.



The following table provides a summary of major developments that have received some level of approval through the Town's planning and development review process. The approved projects with 2018 concurrency certifications are Venezia South and Whispering Hills. The other projects have received planning level approval but must still pass a concurrency review at the time development in the form of subdivision or site plan review is proposed. Venezia North (Talichet) is currently pursuing a new development agreement to increase the project size from 93 to 139 units.

TABLE 2: SIGNIFICANT DEVELOPMENT PROJECTS

PROJECT	SFR	MFR	TOTAL	NOTES
Venezia South	172	113	285	Already connected to systems
Talichet	93		93	
Whispering Hills	156		156	
Lake Hills			780	No SFR/MFR split available
Mission Rise	400		400	
The Reserve	403	330	733	
Total	1224	443	2447	

C. Existing Conditions

1. Existing Land Use

The amount of acreage located within the Town's current boundaries is presented in Table 3 by the existing land use categories. The Town has had no annexations since 2010, and the only change in existing land use is the development of 129.31 acres of

single-family residential in the Venezia South Village Mixed Use classification. This area has been deducted from the vacant Village Mixed Use Category and added to the single-family residential totals.

Table 3: Acreage within Existing Land Use Categories, 2017

Existing Land Use	Acreage	Percentage of Total
Residential (includes all residential uses except vacant Village Mixed Use)	673.63	28.71%
Single-family Residential	321.69	13.71%
Condominium	14.10	0.60%
Multi-family less than 10 units	1.07	0.05%
Vacant Residential	336.44	14.34%
Vacant Lakefront Residential	0.33	0.01%
Commercial (except Village Mixed Use)	120.09	5.12%
Vacant Commercial	114.53	4.88%
Recreation (includes golf courses, recreation other, and vacant preserve/passive park)	4.50	0.19%
Golf Courses (Mission Inn golf course is included in the Vacant Planned Unit Development/Mixed Use acreage)	1.06	0.05%
Recreation (other)	218.85	9.33%
Vacant Preserve/Passive Park (Sarah Maude Mason Preserve of 54 acres included in Conservation acreage)	0.95	0.04%
Public Use (includes utilities, roads, ROWs, educational facilities, institutional, and government facilities)	165.29	7.05%
Utilities	37.15	1.58%
Roads	4.14	0.18%
Educational Facilities	6.99	0.30%
Government Facilities	4.34	0.19%
Institutional	6.48	0.28%
Vacant Institutional	2.36	0.10%
Conservation	517.58	22.06%
Industrial	24.27	1.03%
Vacant Planned Unit Development/Village Mixed Use	780.69	33.28%
Total	**2,345.94**	**100.00%**

Source: TMH Consulting update of 2010 tabulations.

Residential - This category on the *Existing Land Use Map* denotes all land used for residential purposes, including single family, accessory apartments, rectories, and mobile home structures, but specifically excludes recreational vehicles, travel trailers, or similar vehicles. Single family residential use is permitted in all areas of the Town except the public use, recreational, industrial, and conservation areas in Town. The permitted density for residential lands in Howey-in-the-Hills as of the Town's 2023 reevaluation and analysis of residential land uses is featured in Table 4.

Commercial - This category on the *Existing Land Use Map* denotes all land used for retail and wholesale trade, offices, restaurants, hotels and motels, and professional services. Most of the commercial uses in Town are found along Central Avenue. Commercial land use is permitted in the Town Center Overlay, Town Center Mixed Use, Village Center Mixed Use, and Neighborhood Commercial. The maximum intensity for commercial uses in Town is presented in Table 4.

Industrial – This category on the *Existing Land Use Map* denotes all land used for warehousing, assembly and distribution of goods, light processing, heavy equipment, large durable goods, or other land uses requiring heavy truck traffic. The Town permits industrial uses on Light Industrial lots with conditions. Cell towers are also permitted in this land use under certain conditions. The intensity of industrial uses permitted in Town is featured in Table 4.

Public Use - This category on the *Existing Land Use Map* denotes all land used for public service activities, water plants, electric sub-stations and telephone facilities except for cell towers. On the *Existing Land Use Map*, this category includes and is used for utilities, government owned facilities, and institutional facilities such as educational facilities, day care facilities, churches or residential care facilities. The Town permits an intensity of 0.50 impervious surface ratio or 0.25 floor area ratio (see Table 4).

Recreation - This category on the *Existing Land Use Map* denotes all land primarily used for outdoor recreational activities such as picnicking, jogging, cycling, outdoor courts, golf courses, and playing fields. These lands include both private and public recreational facilities. The Town permits an impervious surface ratio of 0.30 on recreational land uses (see Table 4).

Conservation - This category on the *Existing Land Use Map* denotes all land used for wetlands, some uplands, public managed lands, floodplains, flood prone areas, and other areas in which valuable natural resources are found. No buildings are allowed on conservation lands in Town except for boardwalks, docks, observation decks, or similar facilities allowed by the Town and all regulatory agencies.

Planned Unit Development(PUD)/Village Mixed Use - In 1992, the Town approved a *Planned Unit Development Mixed Use District Ordinance* which permits a variety of residential structures and a diversity of building arrangements as well as complementary and compatible commercial uses and public or quasi-public facilities developed in accordance with an approved development plan. A large percentage of the lots in this category on the *Existing Land Use Map* are vacant. The permitted maximum density and intensity standards for planned unit development/mixed use are presented in Table 4.

2. Availability of Public Facilities and Services

The following data and analysis describes the availability of services and facilities to support development.

a. Sanitary Sewer

The Town has entered into an agreement with the Central Lake Community Development District to provide wastewater treatment for the Town. New Village Mixed Use development is required to connect to sanitary sewer, and the Town has begun the process of providing sanitary sewer on Central Avenue. Infill development in the largely developed portions of the Town will continue to use septic tanks until sanitary sewer service can be made available. The Town will own and maintain the collection system (mains, lift stations, etc.) within the Town limits.

b. Potable Water

The Town currently owns, operates and maintains a central potable water treatment and distribution system. The Town's potable water system provides water for both residential and non-residential purposes, including fire-fighting demands. The Town's water system consists of two water plants located approximately one mile apart with a total of three active wells, one out-of-service well, one 500,000-gallon ground storage tank and one 15,000-gallon hydropneumatic tank. The elevated storage tank remains in place but is not active.

The *Comprehensive Plan* sets two different levels of service for potable water usage. The first LOS standard is 242.0 gallons per day per capita for the overall customer usage and the second LOS standard is 150.8 gallons per day per resident for the residential customers.

The Town currently holds a consumptive use permit for 10-MGD. The permit is in the process of being revised as the Town has exceeded the consumption level. The permit revision is part of a larger planning process for master plans for both water and sewer. These plans are expected to be completed by the end of 2018, and once completed will identify projects for inclusion in the capital improvements program.

Table 4: Permitted Maximum Density/Intensity within Land Use Categories
(as of amendments approved _____, 202___)

Future Land Use	Maximum Density/Intensity	Description
Rural Lifestyle (RL)	Must have a minimum of 2 acres for this land use. 1 dwelling unit per 2 acres; all buildings not to exceed .15 FAR; 20% max. impervious surface coverage; 50% open space required.	Primarily single-family detached homes with agricultural uses.
Low Density Residential (LDR)	2 dwelling units per acre	Primarily single-family detached homes.
Medium Density Residential (MDR)	~~4~~ 3 dwelling units per acre; 25% minimum open space required Developments with 100 units or more shall be required to have a public recreation component. Developments with either more than 300 proposed dwelling units or more than 100 acres must use the Village Mixed Use designation.	Single-family detached homes, townhomes, etc.; this category may also include support community facilities and elementary schools.

Town Center Mixed Use (TCMU)	The Town Center Overlay District denotes where specific uses are permitted within the Town Center (see the Town's *Town Center Overlay Map*). For areas designated Commercial Core, all new buildings must be 2 stories or provide a minimum street façade elevation of at least 15-feet to create a vertical enclosure along Central Avenue. A max. 2.0 FAR is permitted if parking requirements are achieved. Where new residential uses are constructed in the Commercial Core, these uses shall be located on the second floor of buildings. (Existing single-family units on Central Avenue west of Dixie Drive and units fronting on Oak street and Holly Street are considered permitted uses. Single-family residences may not be constructed elsewhere within the Town Center Commercial area. Properties in the Town Center Commercial Area within the designated sections of W. Central Avenue, Oak street and Holly Street may be converted to non-residential uses, and once converted, may not revert to single-family residential use.) For areas designated Office/Services or Residential, 40% max. impervious surface coverage. May live and/or work in these areas. For areas designated Residential, a max. of 4 units per acre. There is a total of 81.73 acres in the Town Center Overlay. About 23.3% of the Town Center Overlay is comprised of roads which are laid out in a grid system. About 52.5% of the Town Center Overlay area is designated for residential use. About 16% of the Town Center is designated for commercial/office/professional services use (with the possibility of residential on the second floor) and about 8.2% is designated as flex space, where either office, professional services, or residential uses – or a live/work combination of those uses is permitted. Open space within the Town Center will not be defined as it is for other areas	The size of each individual business shall be regulated through the Land Development Regulations.

Future Land Use	Maximum Density/Intensity	Description
	within the Town. Rather, the Town has established maximum impervious surface coverage standards that may not be surpassed within the various uses in the Town Center. The areas designated as Commercial Core have a maximum impervious surface coverage of 100%. Areas designed office/professional services and/or residential shall have a maximum impervious surface coverage of 40% and areas designated as residential in the Town Center shall have a maximum impervious surface of 50%. In the commercial core of the Town Center, the Town anticipates a master stormwater system which will allow maximum coverage for buildings and surface parking.	

Village Mixed Use (VMU)	Must have a minimum of ~~25~~ 100 acres for this land use. Maximum of three ~~four~~ dwelling units per acre; ~~May be increased to 6 dwelling units per acre if the development includes 20% usable public open space (no wetlands)~~. All single-family lots must have a minimum lot area of 10,890 square feet (1/4 acre) exclusive of any wetlands or waterbodies that might be included with the lot. Residential areas shall comprise a minimum of 70% of the Net Land Area and a max. of 85% of the Net Land Area. Commercial/non-residential areas shall comprise a minimum of 15% of the Net Land Area and a maximum of 30% of the Net Land Area. This includes community facilities and schools. ~~For developments with more than 100 acres, 5%~~ Five percent (5%) of the non-res. land shall be dedicated for public/civic buildings. Commercial/non-residential may be 2 stories with 50% coverage as long as parking and other support facilities (stormwater) are met. Public recreational uses must occupy a minimum of 10% of the useable open space (no wetlands). A minimum of 25% open space and a minimum of 10% dedicated to park and recreation uses is required. Park and recreation areas count toward the 25% open-space requirement. No less than 50% of areas dedicated to park and recreation uses must contain active recreation uses. To be counted against the 10% park/recreation requirement, parcels dedicated to park uses may be no smaller than ____ ac. The	A mix of uses is permitted and required in this category in order to promote sustainable development, including the provisions of reducing dependence ~~the dependability~~ on the automobile, protecting more open land, and providing quality of life by allowing people to live, work, socialize, and recreate in close proximity. Elementary, middle, and high schools are also permitted in this category.

Future Land Use	Maximum Density/Intensity	Description
	Land Development Code must require that plans for active recreation uses be submitted for approval by Town Council no later than application for final plat approval. Town Council may require a performance surety bond for park and recreation improvements.	
Neighborhood Commercial (NC)	0.50 floor area ratio; 70% max. impervious surface coverage	Commercial uses to support Town residents are permitted in this category. The size of each individual business shall be regulated through the Land Development Regulations. Elementary and middle schools are also permitted in this category.
Light Industrial (LI)	70% max. impervious surface coverage; 0.6 floor area ratio	Manufacturing, distribution High schools are also permitted in this category.
Institutional (INST)	0.25 floor area ratio; 40% max. impervious surface coverage; 25% open space required	Educational facilities (public or private), religious facilities, day care (child and adult), government buildings (including fire and police), cemeteries, group homes, nursing homes, or community residential facilities, hospitals (general and emergency care).

Future Land Use	Maximum Density/Intensity	Description
Recreation (REC)	Max. 30% impervious surface coverage	Public or private recreational facilities.
Conservation (CON)	No buildings	Boardwalks, docks, observation decks, and similar facilities as allowed by the Town and all regulatory agencies.
Public/Utilities (PUB)	0.25 floor area ratio; max. impervious surface coverage of 50%	Government buildings and essential utilities, with cell towers being a special exception or conditional use.

Notes: Open Space: Open space is figured on the Gross Land Area. Up to ~~50%~~ 25% of the open space requirement may be met with wetlands. Open space may include landscaped buffers and stormwater facilities if they are designed to be a park-like setting with pedestrian amenities and free form ponds. Open space may be passive or active. Open space may include public recreational components of developments. Most of the open space shall be permeable; however, up to 10% may be impervious (plazas, recreational facilities, etc.). Wet ponds are not counted as part of that 10%.

Densities shall be determined by the Net Land Area. The Net Land Area is figured by taking the Gross Land Area (total property less any lakes or water bodies), then subtracting from that any open space requirements, then subtracting from that any remaining unbuildable acreage (remaining wetlands).

c. Stormwater Drainage

Stormwater drainage within the Town is currently accommodated by both natural and man-made drainage features. Although culverts and drainage pipes comprise a large portion of the stormwater system, the Town does not know where the underground pipes lead and where their outfalls are located. This system was installed decades ago and no engineering studies or plans for the drainage system are available to determine the design capacity of the system. In addition to these features, there are private retention/detention areas which were constructed to provide fill for the Mission Inn Complex. These ponds provide on-site retention/detention and a certain amount of percolation of runoff to the aquifer.

Increased development and land coverage could increase the need to construct additional drainage facilities to protect Little Lake Harris from nutrient runoff. Drainage problems do exist with stormwater runoff believed to be discharging directly from State Road 19 into Little Lake Harris. The Town has received one grant for a baffle box system to address this issue and plans to continue to seek funds to address the concern. There are no major flooding problems associated with stormwater runoff.

Level of service standards established in the *Comprehensive Plan* will continue to remain consistent with State statutes pertaining to the performance of the drainage system. The Town ensures the provision of adequate stormwater drainage systems through the development review process. Permits are also required from all applicable State, Federal, and local agencies regarding stormwater. No development is approved or is allowed to begin construction until all such permits are received by the Town.

d. Solid Waste

Solid waste disposal is achieved through franchise agreements with one solid waste hauler. The Town will continue to dispose refuse at the County's incinerator facility approximately 10 miles west of Town. The County will deposit waste ash in an ash monofill south of the incinerator near the Sumter County Line. There is a separate disposal area for construction and demolition debris.

e. Transportation

Only two major roads provide access into Town: (1) County Road 48 and (2)

State Road 19. County Road 48 provides a direct connection to the City of Leesburg and US 27. State Road 19 provides direct access to the Florida Turnpike, cities of Groveland and Tavares. All the streets in Howey-in-the-Hills are paved.

The Town's adopted level of service is D for minor arterials, collector roadways, and local roads. There are no roads in Town that are over capacity. The Town requires all development to provide adequate analysis of its impact on the roads in the Town to determine if the adopted LOS will be maintained. The capacities or deficiencies for the Town's road network is featured in the *Transportation Element*.

f. Recreation and Open Space

Overall, there are about 174 acres (115 acres of golf courses, 54 acres of preserve in Sarah Maude Nature Preserve, and 5 acres of other recreational facilities) of recreational land available to meet the recreational needs of Howey-in-the-Hills' residents and visitors.

The Town has adopted a level of service standard of 6.5 acres of park land for every 1,000 residents. There are 22.93 acres of parkland in Howey-in-the-Hills. The largest park in Town is the Sarah Maude Nature Preserve, which is about 54 acres of preserve and 17 acres of upland (the Town only includes the upland acres in the overall parkland acres) and the smallest Town park is Tangerine Point Park at 0.1 acres.

There is 4.5 acres designated as Recreation lands on the Town's *Future Land Use Map,* almost all this land is considered to be open spaces. Most of these open spaces is adjacent to the lakes in Town and lack the space needed to accommodate development other than small recreational uses.

There are no major public open spaces or natural preservations within a half mile of the Town limits. Recreational lands within the Town are depicted on the *Existing Land Use Map* and *Future Land Use Map*.

g. Public School Facilities

The Town continues to support public school concurrency and participates in an interlocal agreement with the School district and other local governments in Lake County. School concurrency is reviewed as part of the development approval process.

3. Land Available for Development

There are about 1640 acres of vacant land (about 516 of those acres are Conservation land uses) in the Town (see the Town's *Vacant Land Map*). Most of this land does not have any major environmental constraints and is very suitable for development. Also, most of the vacant lands in the Town currently have a *Village Mixed Use Future Land Use* category.

4. Soils and Topography

Soils are an important aspect in land development. The physical and chemical properties of soils restrict the intensity of development through limitations on road construction, septic tank operation, and building placement.

There are a variety of soil types in Howey-in-the-Hills (see the Town's *Soils Map*). The general descriptions of the soils in the Town are found below in Table 5. All upland soils are suitable for development and show little limitation for the use of septic tanks.

The Town lies on the Lake Wales Ridge, a physiographic high that has a high potential for aquifer recharge to the Floridan Aquifer. There is little topographic relief within the Town (90 feet). The upper limit is approximately 170 feet above sea level located south of E. Revels Road, west of Sunset Drive, and east of State Road 19. Around this area, there is a difference of about 80 feet in elevation (see the Town's *Contour Map*). This topographic relief poses little, if any, limitations to development of vacant lands. See *Conservation Element* for a further discussion of soils and soil limitations.

Table 5: Soils

Map Unit Name	Hydric Soil	Drainage Class	Steel Corrosion	Concrete Corrosion	Acres
Anclote and Myakka Soils	Yes	Very Poorly Drained	High	Moderate	14.34
Apopka Sand, 0 to 5 Percent Slopes	No	Well Drained	Moderate	High	51.88
Apopka Sand, 5 to 12 Percent Slopes	No	Well Drained	Moderate	High	28.00
Arents	No	Somewhat Poorly Drained	Unranked	Unranked	141.21
Borrow Pits	Partially Hydric	Unranked	Unranked	Unranked	2.82

Map Unit Name	Hydric Soil	Drainage Class	Steel Corrosion	Concrete Corrosion	Acres
Candler Sand, 0 to 5 Percent Slopes	No	Excessively Drained	Low	High	760.47
Candler Sand, 12 to 40 Percent Slopes	No	Excessively Drained	Low	High	3.16
Candler Sand, 5 to 12 Percent Slopes	No	Excessively Drained	Low	High	299.71
Immokalee Sand	Partially Hydric	Poorly Drained	High	High	32.30
Kendrick Sand, 5 to 8 Percent Slopes	No	Well Drained	Moderate	High	6.24
Lake Sand, 0 to 5 Percent Slopes	No	Excessively Drained	Low	High	114.40
Lake Sand, 5 to 12 Percent Slopes	No	Excessively Drained	Low	High	12.98
Lochloosa Sand	No	Somewhat Poorly Drained	High	High	11.98
Myakka Sand	Partially Hydric	Poorly Drained	High	High	95.48
Ocoee Mucky Peat	Yes	Very Poorly Drained	High	High	4.11
Oklawaha Muck	Yes	Very Poorly Drained	High	Low	6.14
Paola Sand, 0 to 5 Percent Slopes	No	Excessively Drained	Low	High	1.97
Placid and Myakka Sands, Depressional	Yes	Very Poorly Drained	High	High	23.83
Pompano Sand	Partially Hydric	Poorly Drained	High	Moderate	13.86
Sparr Sand, 0 to 5 Percent Slopes	No	Somewhat Poorly Drained	Moderate	High	18.44
Swamp	Yes	Very Poorly Drained	Unranked	Unranked	55.94
Tavares Sand, 0 to 5 Percent Slopes	No	Moderately Well Drained	Low	High	309.40
Water	Unranked	Unranked	Unranked	Unranked	317.67
Wauchula Sand	Partially Hydric	Poorly Drained	High	High	19.59

Notes: Drainage Class - Identifies the natural drainage conditions of the soil and refers to the frequency and duration of wet periods.
Concrete Corrosion - Susceptibility of concrete to corrosion when in contact with the soil.
Steel Corrosion - Susceptibility of uncoated steel to corrosion when in contact with the soil.

Source: U.S. Department of Agriculture, Natural Resources Conservation Service's Lake County Soils Geographic Information Systems database.

5. Natural Resource Management

In this section, natural resource protection which is applicable to Howey-in-the-Hills is discussed. The Town contains no Areas of Critical State Concern as established in Chapter 380.05, Florida Statutes. According to SJRWMD and the Army Corps of Engineers, there are no dredge spoil disposal sites within the Town.

a. Surface Waters

Lake Illinois and several unnamed lakes are within the Town limits. Additionally, the Town is adjacent to Little Lake Harris. Most of these lakes are maintained by the County. There are no lakes in Town classified as "A Florida Outstanding Water". The lakes are used for boating, swimming, fishing and other water activities.

b. Floodplains

Floodplains are valuable resources which provide a rich diversity of vegetation and wildlife. These areas are sources for groundwater recharge that filters through soils during high water levels. The 100-year floodplains are also subject to inundation during a 100-year storm, causing potential loss of life and property, disruption of services, and economic loss. These areas cannot tolerate continued development which, in effect, retards their ability to absorb water and restrict the flow of water from adjacent higher elevation areas.

The County's Geographic Information Systems (GIS) database shows that there are 100-year floodplains in the Town (see the Town's *Floodplains Map*). The FEMA flood zone designations in Howey-in-the-Hills are as follows:

- Zone A – Areas with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Because detailed analyses are

not performed for such areas; no depths or base flood elevations are shown within these zones.

- Zone AE - The base floodplain where base flood elevations are provided. AE Zones are now used on new format FIRMs instead of A1-A30 Zones.

Development within floodplains will continue to be closely scrutinized to ensure compliance with established regulations.

c. Wetlands

Wetlands by definition are transitional lands between terrestrial and aquatic systems where the water table is usually at or near the surface, or the land is covered with shallow waters. Wetland functions are interconnected with the hydrology of the area. This connection determines the presence, extent, movement, and quality of water in the wetland. It is estimated that wetlands account for about 515 acres in the Town (see the Town's *Wetlands Map*).

d. Natural Groundwater Aquifer Recharge Areas

The Floridan aquifer is the principal source of drinking water for Lake County. Currently almost all the ground water pumped in Lake County comes from the Upper Floridan but the potential for utilizing the lower Floridan aquifer is just beginning to be explored in Lake County.

Aquifer recharge is the process whereby rainfall percolates downward through the soil to reach the underlying aquifers. Recharge to the Floridan aquifer occurs in areas of the County where the elevation of the water table of the surficial aquifer is higher than the elevation of the potentiometric surface of the Floridan aquifer. In these areas, water moves from the surficial aquifer in a downward direction through the upper confining unit to the Floridan aquifer. The surficial aquifer system in the County is recharged by rainfall. Recharge is augmented locally by artificial recharge - wastewater or reuse water land application, rapid-infiltration basins, and septic systems.

Howey-in-the-Hills is in a recharge area with a recharge rate of 1 to 10 inches per year and discharge rate of less than 1 inch per year.

e. Cone of Influence

Cone of influence is defined as an area around one or more major wellfields, the boundary of which is determined by the government agency having specific statutory authority to make such a determination based on groundwater travel or

drawdown depth. The term waterwell is defined by Rule 9J-5, F.A.C., as a well excavated, drilled, dug, or driven for the supply of industrial, agricultural, or potable water for general public consumption.

Generally, the term cone of influence can be defined as the land area surrounding a well on which a present or future land use has the potential to negatively impact an aquifer as a result of the induced recharge from that well's cone of depression. The purpose of delineating a cone of influence is to protect the current and future water supply.

The Town restricts development (except facilities related to the public water system) from occurring within a 150-foot radius of any existing or proposed public well (Primary Protection Zone). No septic tanks, sanitary sewer facilities, or solid waste or disposal facilities are permitted within a 200-foot radius of any existing or proposed public well (Secondary Protection Zone). The Town also has established a 500-foot radius wellhead protection area within which manufacturing or light industrial uses are prohibited. The wellhead protection areas for the Town's potable water supply wells are shown on the *Existing* and *Future Land Use Maps*.

f. Air Quality

Air quality is another example of a natural resource that impacts the Town's and surrounding areas quality of life. The Florida Department of Environmental Protection and the United States Environmental Protection Agency monitor air quality data in Lake County. Lake County does not have an established program dedicated to monitoring air quality. Overall, Lake County's air quality can be considered good.

6. Historic Resources

The Florida Division of Historical Resources maintains and regularly updates the *Florida Master Site File*. The *Florida Master Site File* is a paper file archive and computer database of recorded historical cultural resources in Florida. Categories of resources recorded at the Site File include archaeological sites, historical structures, historical cemeteries, historical bridges and historic districts. The *Site File* also holds copies of survey reports and other manuscripts relevant to Florida history and prehistory. As of March 2010, there were 7 historic structures or sites in the Town that were added to the State's *Master Site File*. The Howey House was listed in the National Register of Historic Places (see Table 5 and the Town's *National Register of Historic Resources Map*).

Table 6: Historic Sites and Structures

Site Name	Address/Site Type	Year Built	Architectural Style/ Archaeological culture	Date Certified
TOM Line	Pre-historic Mound		St. Johns, 700 B.C. – A.D. 1500	
Flagship 1	Land-terrestrial		Prehistoric	
Flagship 2	Land-terrestrial		20th Century American, 1900-present	
Howey Water Tower	316 Grant Street	1926	Unspecified	
Howey Academy		1923	Unspecified	
Howey House	Citrus Street	1925	Mediterranean Revival ca. 1880-1940	1/27/1983
Griffin Airways Landing Strip	Designed Historic Landscape	1950s-1960s	Griffin Airways Landing Strip is not a man-made construction. It was a cleared dirt strip of land that served as an airstrip for Prop planes. C.V. Griffin used the strip to fly in investors to the area as he tried to foster industrial development.	

Source: Florida Department of Historical Resources, Florida Master Site File – March 2010.

D. ANALYSIS

1. Economic Vitality

The Town is now and plans to continue primarily as a residential community with commercial support to serve the residents and visitors. The small downtown business district along Central Avenue from Lakeshore Boulevard to S. Mare Avenue, primarily serves the immediate convenience needs of the Town's residents. The Town has prepared a redevelopment plan for this area to include a land use plan, master stormwater system and public parking areas. Various cities and towns in Lake County provide additional employment and needed services within reasonable commuting areas of the Town. As future development occurs in the Village Mixed Use areas, additional employment and service opportunities will be made available for the Town's residents and others. This will provide for much improved sustainability for the Town over the planning period.

2. Nonconforming and Incompatible Uses

Land use conflicts arise when uses are introduced in dissimilar areas without proper buffering. The *Future Land Use Map* and the Howey-in-the-Hills Land Development Regulations set forth the appropriate locations for land uses in the Town in order to eliminate existing land use conflicts. The Town's Land Development Regulations addresses incompatibilities through control of nonconforming uses.

3. Availability of Facilities and Services

This section provides an overview of the availability of public facilities and services in Howey-in-the-Hills during the planning period.

As previously mentioned, the Town of Howey-in-the-Hills currently has a limited central wastewater system. The Wastewater Treatment Facility (WWTF) is owned by the Central Lake Community Development District with the Town owning and maintaining the collection system up to the CDD facility. In 2006, through a wastewater impact fee study performed in anticipation of possible creation of a Town-owned wastewater collection and treatment system, the Town established a wastewater Level of Service value of 120 gallons per person per day.

As previously mentioned, the Town's potable water system provides water for both residential and non-residential purposes, including fire-fighting demands. The system has enough capacity to support the population demand during the planning period of this *Comprehensive Plan* (2025).

The Town's solid waste level of service standard for solid waste is 6 pounds per person

per day. There is enough capacity in the County's landfill to support the population demand during the short-range (2011-2015) and long-range (2025) planning period.

The Town shall continue to require development to provide for the 100-year, 24-hour rainfall event and provide retention for water quality consistent with new and innovative techniques. The Town shall also continue to require that all new development provide evidence to show that LOS ratings in stormwater conveyances serving the new development will not be degraded to an LOS lower than currently exists as a result of the new development's construction and stormwater runoff contribution.

There are more than adequate recreational facilities and open spaces readily available and accessible to the residents and guests of Howey-in-the-Hills. The Town shall continue to coordinate with the County on establishing measures to enhance the recreation and open space opportunities in and around Town. The Town will also continue to solicit grants from public and private agencies and collect park impact fees to fund future parks and facilities.

There are no public school facilities planned in the Town during the planning period.

4. Groundwater Recharge

As previously mentioned, Howey-in-the-Hills is in a recharge area with a recharge rate of 1 to 10 inches per year and discharge rate of less than 1 inch per year. There are no known groundwater recharge problems in Howey-in-the-Hills. The Town shall continue to protect the quality of groundwater recharge through enforcing the Town's Land Development Regulations and the guidelines established in this *Comprehensive Plan*. The quality of groundwater recharge shall also be protected by ensuring that all stormwater conveyances serving new development does not degrade the level of service lower than currently exists as a result of the new development's construction and stormwater runoff contribution.

5. Analysis of Existing Vacant Lands

As previously mentioned, there are 1,769 acres of vacant land (516 acres of this land is Conservation land use) in Town. About 51% (909 acres) of the vacant lands is in the Village Mixed Use Future Land Use category and 19% (335 acres) is designated for Residential uses (see the Town's *Vacant Lands Map)*. The soils on these vacant lands are overall suitable for development. The elevation on these vacant lands range from 75 feet mean sea level (MSL) to 170 feet MSL. There are no known sinkholes located on these vacant lands. There are also no known environmentally sensitive lands or significant natural resources located on these vacant lands that will prevent any development.

6. Analysis of Land Needed to Accommodate Projected Population

Most of the vacant land in the Town is in Village Mixed Use planned communities. The Town has approved conceptual developments for all but one of the Village Mixed Use properties. These properties contain enough land area for residential, commercial, civic and recreational uses for the projected population to the end of the planning period. These projects are summarized in Table 2.

7. 2023 Analysis and Reevaluation of Residential Densities and Lot Sizes

In 2023 the Town Council and the Town's Planning and Zoning Board analyzed and reevaluated post-2010 residential development in the Town. Residential development under the Village Mixed Use designation resulted after 2010 in substantially increased housing densities and substantially smaller residential lots than were prevalent in the Town's historical development.

The evaluation and analysis was accompanied by robust public participation. Public sentiment agreed overwhelmingly with Town Council: the increased densities and downsized lots after 2010 were inconsistent with the character, appearance, and ambiance of the Town's historical neighborhoods. Contrary to FLUE Policy 1.1.2, development in Village Mixed Use had failed to "maintain the unique charm of the Town."

Consequently, the Town Council determined that amendments to this Future Land Use Element to redirect future residential densities and lot sizes were warranted and desirable.

8. Analysis of Need for Redevelopment

The Town Center Overlay District needs redevelopment. The Town has completed a redevelopment plan for the Central Avenue business core and made recommended changes to selected comprehensive plan policies in support of this plan. The Town is currently working on a program for installation of sanitary sewer on Central Avenue as an essential precursor to broader redevelopment proposals. Howey-in-the-Hills will promote a live-work environment as well as shopping and restaurants to serve the local area.

9. Analysis of Flood Prone Areas

The Town shall continue to ensure that development within floodplains will be closely scrutinized to ensure compliance with established Land Development Regulations. Most vacant lots in Town are very suitable for building.

10. An analysis of Land Use Problems and Potential Use Problems

No major current or potential land use problems are seen within the Town.

11. Urban Sprawl

The Town does not and will continue not to promote the approval of development that will contribute to "urban sprawl." An analysis corresponding to measures the Town implements to discourage a proliferation of urban sprawl is featured in this section

1. Promotes, allows or designates for development substantial areas of the jurisdiction to develop as low-intensity, low-density, or single-use development or uses in excess of demonstrated need.

   The Town has adopted a Planned Unit Development ordinance and Village Mixed Use and Town Center Mixed Use land uses. There has not been any significant development of low intensity single family subdivisions. The Town's Concurrency Management System, subdivision regulations, and zoning regulations discourages this type of development.

2. Promotes, allows or designates significant amounts of urban development to occur in rural areas at substantial distances from existing urban areas while leaping over undeveloped lands which are available and suitable for development.

   All new development must prove that it will be served by adequate public facilities prior to the issuance of a development order. The new development must also demonstrate that it will not degrade the level of service beyond the adopted standard.

3. Promotes, allows or designates urban development in radial, strip, isolated or ribbon patterns generally emanating from existing urban developments.

   The Town's Village Mixed Use and Town Center Overlay Mixed Use categories preclude strip commercial-type development and isolated single uses.

4. As a result of premature or poorly planned conversion of rural land to other uses, fails adequately to protect and conserve natural resources, such as wetlands, floodplains, native vegetation, environmentally sensitive areas, natural groundwater aquifer recharge areas, lakes, rivers, shorelines, beaches, bays, estuarine systems, and other significant natural systems.

The Town protects and conserves all natural resources by enforcing the requirements of this *Comprehensive Plan* and the Town's Land Development Regulations. The Town delineates wetlands and other environmentally sensitive lands as Conservation on the Town's *Existing* and *Future Land Use Maps*. No buildings are permitted on Conservation lots in Town except for boardwalks, docks, observation decks, and similar facilities as allowed by the Town and all regulatory agencies.

5. Fails adequately to protect adjacent agricultural areas and activities, including silviculture, and including active agricultural and silvicultural activities as well as passive agricultural activities and dormant, unique and prime farmlands and soils.

The Town has adopted a Rural Lifestyle land use category on the *Future Land Use Map*. This land use is primarily for single-family detached homes with allowable agricultural practices. There is a minimum of 2 acres required for this land use. There is a maximum density of 1 dwelling unit per 2 acres, 0.15 floor area ratio, 20% maximum impervious surface coverage, and 50% open space requirement on the Rural Residential lots in Town. The Town feels that the adopted standard is adequate to protect these agricultural areas in Town to serve as a buffer for nearby rural areas.

6. Fails to maximize use of existing public facilities and services.

The Town annually updates and adopts a Concurrency Management System Report to ensure that existing public facilities and services have enough capacity to support the population demand. All deficiencies are identified along with capital plans to address those deficiencies. Any deficiencies are incorporated in the *Capital Improvements Element*.

7. Fails to maximize use of future public facilities and services.

The Town annually updates and adopts a *Concurrency Management System Report* to ensure that future public facilities and services are adequately signed to address future needs.

8. Allows for land use patterns or timing which disproportionately increase the cost in time, money and energy, of providing and maintaining facilities and services, including roads, potable water, sanitary sewer, stormwater

management, law enforcement, education, health care, fire and emergency response, and general government.

The Town has concurrency requirements for potable water, sewer, solid waste, drainage, parks and recreation, roads, and public schools.

9. Fails to provide a clear separation between rural and urban uses.

The Town feels that the adopted open space, and minimum development intensity and density standards are sufficient to ensure a clear separation between rural and urban uses.

10. Discourages or inhibits infill development or the redevelopment of existing neighborhoods and communities.

The Town promotes infill development or redevelopment of existing neighborhoods and communities and has created a Town Center Overlay to address infill and redevelopment in the historic Town Center.

11. Fails to encourage an attractive and functional mix of uses.

The Town has adopted a Planned Unit Development Ordinance which would permit an attractive and functional mix of uses in appropriate areas of the Town. There are about 855 acres of land designated as Village Mixed Use on the Town's *Future Land Use Map* and majority of this land is vacant.

12. Results in poor accessibility among linked or related land uses.

Solutions to better manage traffic within the historic downtown area and to discourage additional traffic have been implemented. Uses have also been linked with bicycle paths and sidewalks. The Town requires new subdivisions or developments to address circulation, access control, off-street parking and landscaping of median strips and rights-of-way.

13. Results in the loss of significant amounts of functional open space.

The Town requires that levels of service be met for park land and open space. Each new development will include open space and recreational components.

The Town shall continue to discourage the approval of any development or redevelopment projects that will promote urban sprawl.

12. Energy Efficiency, Energy Conservation, and Greenhouse Gas Emission

The Town has identified strategies for producing energy efficient land use patterns, increasing energy conservation, and reducing greenhouse gas emissions. This section provides an overview of the energy related strategies implemented by the Town.

a. Producing Energy Efficient Land Use Patterns

The Town has adopted the Village Mixed Use and Town Center Mixed Use land uses as a tool to produce energy efficient land use patterns in Howey-in-the-Hills. The Town will ensure that developments within these mixed-use areas are compact, walkable neighborhoods.

The Town has also established a "build-out" area (the Town's Utility Service Area) to determine the maximum extent of where urban development will be approved by Town Council. During the preparation of the *Future Land Use Map*, the Town reviewed all land uses to ensure that the higher gross density and intensity standards were appropriately established in all areas planned for urban development within the "build-out" area.

The Town's minimum density and intensity standards apply to all areas planned for urban development and redevelopment. These standards and the buffering requirements established in the Land Development Regulations ensure that the land uses in Howey-in-the-Hills will remain compatible and consistent with the surrounding land uses.

b. Increasing Energy Conservation

The Town is in the process of establishing an *Energy Management Plan* to increase energy conservation (see Policy 1.17.3 of this *Element*). The *Energy Management Plan* will be used as a tool to minimize electric, fuel and water resources in Town buildings, fleet vehicles and on public properties.

The Town promotes "green" development in both private and municipally-supported housing. Green development specifically relates to the environmental implications of development. Green building integrates the built environment with natural systems, using site orientation, local sources, sustainable material selection and window placement to reduce energy demand and greenhouse gas emissions. The Town is in the process of amending the Land Development

Regulations to establish green building practices and sustainability development guidelines.

The Town requires energy-efficient and water saving measures to be implemented in all new construction and redevelopment projects.

c. Reducing Greenhouse Gas Emissions

The Village Mixed Use and Town Center Mixed Use land uses will serve as a tool to reduce vehicle miles traveled in Town, which will reduce the greenhouse gas emissions. Residents and guests of Howey-in-the-Hills can easily access the historical downtown or Little Lake Harris area by walking or biking. The Town is actively involved with the Lake-Sumter MPO regarding expanding the pedestrian and bicycle facilities in Town. The Town will continue to promote mixed-use developments, bicycling, and walking as a tool to reduce the greenhouse gas emissions in the Howey-in-the-Hills area.

The Town is amending its Land Development Regulations to ensure that the removal of regulatory barriers and establishment of incentives to promote energy efficiency and conservation is implemented in Howey-in-the-Hills.

E. Future Land Use Goals, Objectives, and Policies

Upon the effective date of the ordinance adopting this *Comprehensive Plan*, all rules, regulations, criteria, and principles set forth in the *Plan* become effective. Where a policy refers to the Land Development Regulations, the intent of the policy and its contents remain effective with the *Plan* adoption date. Regulations established by State or Federal statutes or administrative codes referenced in objectives or policies shall pertain to the most recent adopted regulation or code as may be amended by said parties from time to time without immediate notice to the Town.

GOAL 1: Retention of the quaint distinctive residential character of the Town by promotion of high quality residential development together with an appropriate level of supporting service and retail opportunities and live-work environments as well as preserving the natural features of the area and minimizing threats to the citizens caused by hazards, nuisances, incompatible land uses or environmental degradation while providing a sense of place and history.

OBJECTIVE 1.1: ***Identifying Land Use Patterns and Permitted Densities and Intensities.*** To identify the appropriate land use patterns, residential densities, and non-residential intensities of land use permitted in Howey-in-the-Hills.

POLICY 1.1.1: ***Land Use Designations.*** The Town shall establish, adopt and implement density and intensity standards for all future land uses, as applicable, and as indicated on the *Future Land Use Map* and the adopted Town Zoning Map.

Density and intensity standards for land uses in Howey-in-the-Hills are featured below

Land Use	Maximum Residential Density
Residential:	
Low Density Residential (LDR)	Up to 2.0 dwelling units per acre. Maximum building height is 2-1/2 stories and no higher than 30 feet.
Medium Density Residential (MDR)	Up to ~~4.0~~ 3.0 dwelling units per acre. A 25% minimum open space is required. Developments with 100 units or more shall be required to have a public recreation component. Developments with either more than 300 proposed dwelling units or more than 100 acres must use the Village Mixed Use designation. May include support community facilities and elementary schools. Maximum building height is ~~2-1/2 stories and no higher than~~ 30 feet.

Rural Lifestyle (RL)	Up to 1.0 per 2 acres. Must have a minimum of 2 acres for this land use. A 50% minimum open space is required. All buildings shall not exceed a 0.15 floor area ratio. The maximum impervious surface coverage is 0.20. Maximum building height is 2-1/2 stories and no higher than 30 feet.
Land Use	**Maximum Land Intensity**
Neighborhood Commercial (NC)	The maximum floor area ratio is 0.50. The maximum impervious surface coverage is 0.70. The maximum building height is 35 feet and limited to two-stories. The maximum building size is 5,000 sq. ft. unless a special exception is granted to the developer by the Town Council. Elementary and middle schools are also permitted in this category.
Light Industrial (LI)	The maximum impervious surface is 0.70. The maximum floor area ratio is 0.60. High schools are permitted in this category.
Institutional (INST)	The maximum floor area ratio is 0.25. The maximum impervious surface coverage is 0.40. A 25% minimum open space is required. Maximum building height is 2-1/2 stories and no higher than 30 feet.
Recreation (REC)	Maximum impervious surface coverage is 0.30. Restricted to passive or active recreational facilities as established in the *Recreation and Open Space Element* or by the Town Council.
Conservation (CON)	No buildings. Restricted to boardwalks, docks, observation decks, and similar facilities as allowed by the Town and all regulatory agencies.
Public/Utility (PUB)	The maximum floor area ratio is 0.25. The maximum impervious surface coverage is 0.50. For utilities, the maximum building height is 1 story or no higher than 20 feet for building; 2 story and 35 feet for other facilities.

Village Mixed Use (VMU)	Minimum of ~~25~~ 100 acres to apply for this land use. Maximum density of ~~4~~ 3.0 dwelling units per acre.~~, which may be increased to 6 dwelling units per acre if the development includes 20% usable public open space (no wetlands).~~ Residential areas shall comprise a minimum of 70% of the net land area and a maximum of 85% of the net land area. Commercial/non-residential areas shall comprise a minimum of 15% of the net land area and a maximum of 30% of the net land area. This includes community facilities and schools. All single-family lots must have a minimum lot area of 10,890 square feet (1/4 acre) exclusive of any wetlands or waterbodies that might be included with the lot. ~~For developments with more than 100 acres,~~ Five percent (5%) of the non-residential land shall be dedicated for public/civic buildings. Commercial/non-residential may be 2 stories with 50% coverage as long as parking and other support facilities (stormwater) are met. The maximum building height is 35 feet. Public recreational uses must occupy a minimum of 10% of the useable open space (no wetlands). A minimum of 25% open space and a minimum of 10% dedicated to park and recreation uses is required. Park and recreation areas count toward the 25% open-space requirement. No less than 50% of areas dedicated to park and recreation uses must contain active recreation uses. To be counted against the 10% park/recreation requirement, parcels dedicated to park uses may be no smaller than ___ ac. The Land Development Code must require that plans for active recreation uses be submitted for approval by Town Council no later than application for final plat approval. Town Council may require a performance surety bond for park and recreation improvements. The maximum building size is 30,000 sq. ft.; unless a special exception is granted to the developer by the Town Council.

Town Center Mixed Use (TCMU)	The Town Center Overlay Map denotes where specific uses are permitted within the Town Center (see the Town's *Town Center Overlay Map*). For areas designated Commercial Core, all new buildings must be 2 stories or provide a minimum street façade elevation of at least 15-feet to create a vertical enclosure along Central Avenue. The maximum building height is 35 feet. In order to maintain the historic character of the downtown area, the Land Development Regulations will cap the maximum size of any one business in the Town Center Overlay at 5,000 square feet. A maximum 2.0 floor area ratio is permitted if parking requirements are achieved. Where new residential uses are constructed in the commercial core, these uses shall be located on the second floor of buildings. (Existing single-family units on Central Avenue west of Dixie Drive and units fronting on Oak Street and Holly Street are considered permitted uses. Single-family residences may not be constructed elsewhere within the Town Center Commercial Area. Properties in the Town Center Commercial Area within the designated sections of W. Central Avenue, oak Street and Holly Street may be converted to non-residential uses, and once converted, may not revert to single-family residential use. For areas designated Office/Services or Residential, the maximum impervious surface coverage is 0.40. May live and/or work in these areas. For areas designated Residential, the maximum density is 4 units per acre. There is a total of 81.73 acres in the Town Center Overlay. About 23.3% of the Town Center Overlay is comprised of roads which are laid out in a grid system. About 52.5% of the Town Center Overlay area is designated for residential use. About 16% of the Town Center is designated for commercial/office/professional services use (with the possibility of residential on the second floor) and about 8.2% is designated as flex space, where either office, professional services, or residential uses – or a live/work combination of those uses is permitted. Open space within the Town Center will not be defined as it is for other areas within the Town. Rather, the Town has established maximum impervious surface coverage standards that may not be

	surpassed within the various uses in the Town Center. The areas designated as Commercial Core have a maximum impervious surface coverage of 100%. Areas designed office/professional services and/or residential shall have a maximum impervious surface coverage of 40% and areas designated as residential in the Town Center shall have a maximum impervious surface of 50%. In the commercial core of the Town Center, the Town anticipates a master stormwater system which will allow maximum coverage for buildings and surface parking.

POLICY 1.1.2: ***Land Use Categories.*** The land use categories, as depicted on the Town's *2035 Future Land Use Map (FLUM)* shall permit the following uses and activities.

Conservation - Conservation lands shall include those lands so designated on the *FLUM*. These areas are generally composed of open land, water, marsh and wetlands and environmentally sensitive areas. Conservation lands may be either publicly or privately owned. It is intended that the natural and open character of these areas be retained and that adverse impacts, which may result from development, shall be prohibited or minimized. Adverse impacts shall be presumed to result from activities, which contaminate or degrade wetlands and environmentally sensitive areas, or natural functions and systems associated with such areas. Permitted uses within the Conservation category shall be limited to the following and shall be further controlled by the Land Development Regulations.

- Activities intended for the conservation, re-establishment and re-nourishment, or protection of natural resources.
- Recreation uses and facilities that are customarily described as passive in nature including, but not limited to, fishing, hiking and biking, canoeing, kayaking, and the use of other similar small, quiet low-speed watercraft.
- Very low intensity outdoor or water-dependent recreational related uses (excluding commercial marinas) that are determined not to conflict with the intent of the Conservation category, subject to applicable

Federal, State and local policies and permitting requirements.

Neighborhood Commercial - The Neighborhood Commercial land use category is intended to provide appropriate locations for neighborhood and community businesses providing services and retail sales for the Town and the nearby communities. Permitted uses within the Neighborhood Commercial category shall be limited to the following uses unless a special exception is granted to applicant by the Town Council.

- **General Commercial.** These areas shall include those businesses that provide retail goods and services, which serve the routine and daily needs of residents, including banks and professional services, grocery and convenience stores, retail shops, and restaurants. Public and private elementary and middle schools are also allowed.
- **Limited Commercial.** These areas shall include low intensity office, service and retail businesses that are compatible when located in close proximity to neighborhoods. These uses are intended primarily to serve the needs of the closely surrounding neighborhood.
- **Professional and Office.** These areas shall be limited to small neighborhood scale businesses and professional offices that are compatible with, and have no measurable or noticeable adverse impacts, upon surrounding residential uses. Such uses include offices for doctors and dentists (but not clinics or hospitals), accountants, architects, attorneys, engineers, land surveyors, real estate brokers, financial planners, insurance and real estate agents and the like.

Light Industrial – The Light Industrial category shall be limited to light manufacturing and production, storage, warehousing and distribution uses as further controlled by the Land Development Regulations. Light industrial uses may have outdoor storage and business-related activity, but such uses shall not include processes that create negative effects to surrounding properties due to noise, heat, fumes, debris, chemicals or hazardous materials. High schools are permitted in this category.

Rural Lifestyle – The Rural Lifestyle category shall be primarily limited to single-family detached homes with agricultural uses. Limited commercial activities are permitted such as bed and breakfast establishments, horseback riding facilities, and farm stands for fruits and vegetables grown on that location.

Low Density Residential – The Low Density Residential category shall be primarily limited to single-family detached homes. Residential uses in this category shall be permitted in those areas so designated in accordance with the applicable permitted density and as further controlled by the Land Development Regulations and the Florida Building Code.

Medium Density Residential - The Medium Density Residential category ~~shall be primarily~~ is limited to single-family detached homes~~, townhomes, or similar type of uses~~. Support community facilities and elementary schools are also permitted in this category. Residential uses in this category shall be permitted in those areas so designated in accordance with the applicable permitted density and as further controlled by the Land Development Regulations and the Florida Building Code.

Institutional – The Institutional category shall be primarily limited to schools, religious facilities, day care facilities (child and adult), government buildings, cemeteries, or similar uses as identified by the Town Council.

Recreation – These areas generally include public parks or private parks that are open and available to the public. Note: Some park and open space lands may be more appropriately designated as Conservation, such as lands with wetlands or other environmentally sensitive areas. Permitted uses shall include active and passive recreation activities including bikeways and pedestrian trails, or other similar facilities as identified by the Town Council.

Public/Utility - These areas include uses such as government facilities and essential utilities, including police, fire and Town Hall buildings and wastewater facilities.

Town Center Mixed Use – Primarily intended for mixed-use development in the historical downtown area. The historical downtown area is an economic, cultural, social, historic and architectural anchor of the Town. In order to sustain these qualities, new development and redevelopment within the Town Center Mixed Use District shall be reflective of the architectural styles and fabric of the area. Consistency and compatibility with the existing built environment shall be considered in the review and issuance of development permits within the Town Center Mixed Use District. In order to preserve the quaint character of downtown Howey-in-the-Hills, size limitations will also be placed on individual businesses. Redevelopment will focus on orienting buildings and roadways to a pedestrian scale.

Village Mixed Use – Primarily intended to create sustainability and maintain the unique charm of the Town, including the provisions of reducing ~~the dependability~~ dependence on the automobile, protecting more open land, and providing quality of life by allowing people to live, work, socialize, and recreate in close proximity. Elementary, middle, and high schools are also permitted in this category. Village Mixed Use parcels less than 100 acres shall use a planned unit development format and are not required to meet the non-residential and civic use requirements. Public recreation and open space requirements shall still apply.

POLICY 1.1.3: ***Consideration of Community Facilities.*** Necessary community facilities shall be permitted within any future land use designation except Conservation if such activity satisfies established criteria of the *Comprehensive Plan* and the Town's Code of Ordinances.

POLICY 1.1.4: ***Interpretation of Open Space and Density Designations.*** Open space ~~is~~ and parks/recreation requirements are figured on the Gross Land Area. Up to ~~50%~~ 25% of the open space requirement may be met with wetlands. Open space may include landscaped buffers and stormwater facilities if they are designed to be a park-like setting with pedestrian amenities and free form ponds. Open space may be passive or active. Open space may include public recreational components of developments. The majority of the open space shall be permeable; however, up to 10% may be impervious (plazas, recreational facilities, etc.). Wet ponds are not counted as part of that 10%.

Densities would be determined by the Net Land Area. The Net Land Area is figured by taking the Gross Land Area (total property less any lakes or water bodies), then subtracting from that any open space requirements, then subtracting from that any remaining unbuildable acreage (remaining wetlands).

OBJECTIVE 1.2: ***Residential Quality and Neighborhood Cohesiveness.*** Designate and promote sufficient areas for quality residential development and neighborhood cohesiveness and require the availability of adequate facilities to support demands necessitated by existing and future housing development and associated populations.

POLICY 1.2.1: ***Adequate Residential Land Area.*** The Town shall ensure that adequate residential land uses needed to support the population during the planning period shall be designated on the *Future Land Use Map.* The residential land uses shall continue to reflect a pattern that promotes neighborhood cohesiveness and identity. All residential uses shall be subject to the requirements established in the Town's Land Development Regulations.

POLICY 1.2.2: ***Open Space Requirements.*** The Town shall continue to ensure that residential development is consistent with the open space requirements established below:

	Minimum open space requirements
Rural Lifestyle	50%
Low Density Residential	2 dwelling units per acre
Medium Density Residential	25%
Town Center Mixed Use	Within the Town Center Overlay, open space as defined herein is not required. The areas designated as Commercial Core have a maximum impervious surface coverage of 100%. Areas designed office/professional services and/or residential shall have a maximum impervious surface coverage of 40% and areas designated as residential in the Town

	Center shall have a maximum impervious surface of 50%.
Village Mixed Use	25%
Neighborhood Commercial	0.50 floor area ratio; 70% max. impervious surface coverage
Light Industrial	70% max. impervious surface coverage; .6 FAR
Institutional	25%
Recreation	Max. 30% impervious surface coverage
Conservation	No buildings except boardwalks, docks, observation decks, and similar facilities as allowed by the Town and all regulatory agencies.
Public/Utilities	0.25 FAR; max. impervious surface coverage of 50%

Open Space: Open space is figured on the Gross Land Area. No greater than ~~50%~~ 25% of the open space requirement may be met with wetlands. Open space may include landscaped buffers and stormwater facilities if they are designed to be a park-like setting with pedestrian amenities and free form ponds. Open space may be passive or active. Open space may include public recreational components of developments. The majority of the open space shall be permeable; however, up to 10% may be impervious (plazas, recreational facilities, etc.). Wet ponds are not counted as part of that 10%.

POLICY 1.2.3: ***Encroachment of Incompatible Non-residential Development.*** Residential areas delineated on the *Future Land Use Map* shall be protected from the encroachment of incompatible non-residential development. Community facilities and services which best serve the health, safety, and welfare of citizens when located in residential areas, shall be permitted uses therein so long as the activity complies with criteria established in this *Plan* and those in the Town's Code of Ordinances.

POLICY 1.2.4: ***Residential Screening Techniques.*** The Town shall require new commercial, light industrial, and manufacturing development to install landscaping, visually obstructive fencing or man-made

berms, or other appropriate screening techniques obstructing view of the commercial, light industrial, or manufacturing site from areas designated for low or medium density residential if the proposed commercial, light industrial, or manufacturing building is incompatible with the residential area.

POLICY 1.2.5: ***Access to and Circulation within Residential Areas.*** Transportation systems within designated residential areas delineated on the *Future Land Use Map* shall be designed to accommodate traffic conditions that maintain public safety, encourage alternative modes of transportation, and limit nuisances. Access to residential areas shall comply with policies established within the *Transportation Element*.

POLICY 1.2.6: ~~***Transition of Residential Densities.*** The Town shall continue to orient the transition of residential densities on the *Future Land Use Map* toward higher densities along major transportation corridors and areas adjacent to commercial or other intensive land uses, while lower residential densities shall be directed towards areas further from the Town center (i.e., the central commercial district) and in areas adjacent to agricultural lands.~~

Reorientation of Residential Densities. For residential development of ten homes or more, the Town may allow lot sizes smaller than one-fourth acre (10,890 sq. ft.) only in the following locations:

i. areas in or adjacent to the Town center (that is, the Town central commercial district);
ii. areas abutting major arterial and collector road corridors such as state roads, county roads, and major Town collector roads such as Central Avenue and North Citrus Avenue, but not just neighborhood roads with higher traffic counts, and
iii. areas abutting commercial or industrial land uses.

The Town shall require single family residential lots in all other areas to be one-fourth of an acre (10,890 sq. ft.) or larger.

POLICY 1.2.7: ***Compatibility of Residential Densities and Public Facilities.*** Residential densities shall be compatible with available public facilities and their capacity to serve development. Residential

areas designated on the *Future Land Use Map* shall be allocated according to a pattern that promotes efficiency in the provision of public facilities and services and furthers the conservation of natural resources. Public facilities shall be required to be in place concurrent within the impacts of development.

POLICY 1.2.8: ***Concurrency Management System Criteria.*** All public facilities and services must be in place consistent with the criteria established within the Town's Concurrency Management System. Development applications for new residential development shall not be approved unless water, sewer, drainage, park, transportation, solid waste, and public school capacities are available consistent with level of service standards and according to deadlines established within the Concurrency Management System.

POLICY 1.2.9: ***Residential Density and the Future Land Use Map.*** The Town shall ensure that residential density on the *Future Land Map* is based on the following considerations:

- past and anticipated future population and housing trends and characteristics;
- provision and maintenance of quality residential neighborhoods and preservation of cohesive neighborhoods;
- protection of environmentally sensitive lands; and
- transition of density between low, medium and high residential districts.

POLICY 1.2.10: ***Group Home and Foster Care Facilities.*** The Town shall continue to allow the location of group homes and foster care facilities in residential areas. These facilities shall serve as alternatives to institutionalization.

OBJECTIVE 1.3: ***Conservation of Environmentally Sensitive Lands, Other Natural Resources, Historically Significant Sites.*** Manage and control existing and future land uses located within or adjacent to environmentally sensitive lands, open space, other significant natural resources, and historically significant sites.

POLICY 1.3.1: ***Limiting Development in Wetland Areas.*** The Town shall limit development within all wetland areas to land uses supporting conservation facilities and water-related passive recreation activities, as defined in the *Recreation and Open Space Element*.

Wetlands shall be identified on the *Future Land Use Map* Series as Conservation lands. No development shall be permitted in wetlands except for conservation or passive recreation uses as defined within policies cited herein.

POLICY 1.3.2: ***Wetlands and Natural Buffer Zones.*** Wetlands shall be protected from impacts generated by adjacent land uses through natural buffer zones.

1. No development of disturbance of area is permitted within 25 feet of a designated wetland area. These areas shall be marked with appropriate signage as conservation areas.

2. No building or impervious surface area (with the exception of wet retention areas) is permitted within 50 feet of a designated wetland area.

POLICY 1.3.3: ***Protection of Floodplains.*** Development within the 100 Year Floodplain shall provide necessary mitigation to maintain the natural stormwater flow regime. The 100 Year Floodplain Zone shall be delineated within the *Future Land Use Map* series. The boundary of the 100 Year Floodplain Zone shall be determined by the most recent Flood Insurance Maps prepared by the Federal Emergency Management Agency.

POLICY 1.3.4: ***Floodplain Mitigation.*** All development within the 100 Year Floodplain shall adhere to the following:

a. ***Prohibited Land Uses and Activities.*** Storing or processing materials that would, in the event of a 100 Year Storm, be buoyant, flammable, explosive, or potentially injurious to human, animal or plant life is prohibited. Material or equipment immune to substantial damage by flooding may be stored if securely anchored to prevent flotation or if readily removable from the area upon receipt of a flood warning. Manufacturing and light industrial land uses shall be prohibited from encroaching into the 100 Year Floodplain Zone.

b. ***Minimum Floor Height Elevation.*** All new construction and substantial improvements of existing construction

occurring within a 100 Year Flood Zone must have the first-floor elevation for all enclosed areas at eighteen inches above the 100-year flood elevation.

c. ***Construction Materials and Methods.*** All new construction and substantial improvements of existing construction shall be constructed with material and utility equipment resistant to flood damage and using methods and practices that will minimize flood damage and prevent the pollution of surface waters during a 100-year flood event.

d. ***Service Facilities and Utilities.*** Electrical heating, ventilation, plumbing, air conditioning, and other service facilities shall be designed or located to prevent water from entering or accumulating within the components during a base flood. All new and replacement water supply and sanitary sewage systems shall be designed to minimize or eliminate both infiltration of flood water into the systems and discharges from the systems into flood waters.

e. ***Residential Subdivision Plans and Design.*** Plans for subdivisions shall minimize potential flood damage by locating recreation and conservation uses, if included in the plans, to areas within the Flood Zone, reserving as much land as possible outside the flood zone for other land uses. Also, 100-Year Flood Zones shall be identified on all final development plans submitted to the Town.

f. ***Stormwater Facilities.*** The Town shall require development to have drainage facilities in place and functioning concurrent with the impacts of development, as stipulated by deadlines established within its Concurrency Management System. Such drainage facilities shall be designed to comply with the Town's established level of service standard.

POLICY 1.3.5: ***Aquifer Recharge.*** The Town rests on an area possessing high aquifer recharge potential. To maintain the natural rate of percolation within aquifer recharge areas, the Town shall enforce the following:

a. ***Impervious Surface Ratio and Open Space.*** Enforce the impervious surface ratios and open space standards established in this *Comprehensive Plan*.

b. ***Manufacturing or Light Industrial Uses and Recharge Areas.*** Ensure that the *Future Land Use Element* does not allocate any manufacturing or light industrial land use activities adjacent to lake front areas or within high recharge groundwater aquifer areas that generate pollutants that may adversely impact the quality of surface and ground waters. The guidelines established in the Town's Land Development Regulations regarding manufacturing uses permitted within commercial districts and light industrial uses shall serve as a guide to monitor the type and intensity of such uses in the Town.

c. ***Permeable Parking Lots.*** Promote the application of permeable parking lot surfaces for commercial developments proposed within high recharge areas.

d. ***Land Use Activities and Densities.*** Promote land use activities and development densities which are compatible to high recharge potential percolation rates.

POLICY 1.3.6: ***Lake Shore Protection.*** To protect the lake front areas from the encroachment of development, a shoreline protection zone shall be delineated. There shall be no disturbance within 50 feet of the landward extent of wetlands as set forth in Rule 62-340, except for pilings for docks or piers. There shall be no buildings, pools, ponds, or other structures in this protection zone. There shall be no septic tanks within 75 feet of the landward extent of wetlands as set forth in Rule 62-340. All development shall be subject to the building setback requirements regarding the shoreline protection zone established in the Town's Land Development Regulations.

POLICY 1.3.7: ***Upland Vegetative and Wildlife Habitat Protection.*** Upland vegetative communities and wildlife habitats (particularly those identified as primary habitat for endangered or threatened species) for which the Town or State deems environmentally significant shall be protected from adverse impacts associated with development. Upland areas identified within the *Conservation*

Element as essential breeding, feeding or habitat sites for endangered or threatened flora or fauna creatures shall be protected according to the following activities:

a. ***Conservation Designation.*** Important upland habitat may be designated as conservation under the following circumstances:

1. The site is owned by a government body or agency;
2. The site is programmed for purchase by a government agency within the first three years of the *Five-Year Schedule of Capital improvements*; and
3. A request to designate the site as conservation is made by the land owner.
4. The Town requires the designation as a part of the development review process.

Development proposed to occur within areas designated as Conservation are subject to all policies pertaining to open space requirements and development restrictions.

b. ***Sites with Endangered or Threatened Species.*** Any areas identified within the *Conservation Element* as refuge, breeding, feeding, or habitat areas of endangered or threatened species shall be subject to the following activities:

1. An applicant of a property designated for development shall prepare a Critical Habitat Management Plan prepared by a professional biologist, ecologist, or other related professional. As a minimum, this Plan shall analyze the following issues:

a.) Affected species;
b.) Land needs to support continued on-site presence of the species;
c.) Impacts of proposed development which will disturb the species;
d.) Recommended management plans and measures necessary to protect the subject species; and
e.) Cost to developer to implement the recommended management plan.

The adequacy of the study shall be determined by the Town of Howey-in-the-Hills. The final development plan shall conform to recommendations determined within the study as approved by the Town Council. The Town will reserve the right to have a State agency review the Critical Habitat Management Plan and provide a written response.

POLICY 1.3.8: ***Historically Significant Sites.*** The Town shall use the Florida Master Site File as a resource to identify archeological resources and historically significant structures. The Howey House and any other historically significant sites listed on the Florida Master File or the National Register of Historic Places shall be identified on the *Future Land Use Map* Series. In addition, the Town shall also distinguish buildings as historic if the following criteria are met:

a. The age of the subject site exceeds fifty years;
b. Whether the building, structure, or object represents the last remaining example of its kind in the neighborhood or Town;
c. Whether documented proof indicates that the site played a significant role in the history of Howey-in-the-Hills, Lake County or the State of Florida.

If type, density and intensity of adjacent land use shown on the *Future Land Use Map* is not compatible to the preservation of the historic site, then appropriate buffering and screening techniques shall be requirements imposed on encroaching adjacent new development. Such requirements shall be stipulated within the Land Development Regulations.

POLICY 1.3.9: ***Rehabilitating, Relocating, or Demolition of Historic Sites.*** Criteria established in the Land Development Regulations pertaining to the rehabilitation or relocation of a designated historic structure shall follow the U.S. Secretary of the Interior's "Illustrated Guidelines for Rehabilitating Historic Buildings". Additional criteria for approving the relocation, demolition, or rehabilitation of a historic structure shall include the following factors:

a. the historic character and aesthetic interest the building, structure, or object and how it contributes to its present setting;

b. whether there are definite plans for the area to be vacated and the effect of those plans on the character of the surrounding neighborhood;
c. whether the building, structure, or object can be moved without significant and irreversible damage to its physical integrity;
d. whether the building, structure, or object represents the last remaining example of its kind in the neighborhood or Town;
e. whether definite plans exist to reuse the subject property if a proposed demolition is carried out, and the effect of those plans on the character of the surroundings; and
f. whether reasonable measures can be taken to save the building, structure, or object to a level safe for occupation.

POLICY 1.3.10: ***Preventing Destruction of Discovered Archaeological Sites.*** Development shall cease construction activities on a development site when artifacts are uncovered during either land preparation or construction. The developer shall notify the Town of such potential discovery, and the Town and / or developer shall contact the Florida Department of State of such discovery. Construction shall not begin until the State has determined the archaeological significance of the discovery and the restrictions which shall be imposed on development. Development may continue in areas which will not impact the site of the discovery.

OBJECTIVE 1.4: ***Commercial Planning Activities.*** Ensure the Town's sustainability by allocating sufficient land area to accommodate commercial activities which provide a level of employment as well as goods and services demanded by local residents and guest with consideration to fiscal and environmental impacts to the Town of Howey-in-the-Hills.

POLICY 1.4.1: ***Location and Distribution of Commercial Sites.*** The location and distribution of commercial land use districts delineated on the *Future Land Use Map* shall be determined according to the following criteria:

a. Promote mixed use land use categories to prevent strip commercial centers and reduce the dependability on the automobile;
b. Promote the integration of uses to include live-work environments;

c. Ability to comply with adopted performance standards for preventing or minimizing nuisance impacts, such as emission of air pollutants, noise, odor, and generation of hazardous waste or products;
d. Impact to the conservation and preservation of natural resources;
e. Demand on existing and planned public services, utilities, water resources and energy resources;
f. Impact on designated scenic and aesthetic transportation corridors;
g. Compatibility with surrounding land uses;
h. The size of each individual business permitted in the Neighborhood Commercial, Village Mixed Use, or Town Center Mixed Use land uses shall comply with the guidelines established within the Policy 1.4.6; and
i. The height of each business permitted in the Neighborhood Commercial, Village Mixed Use, or Town Center Mixed Use land uses shall comply with the guidelines established in Policy 1.4.7 of this *Element*.

POLICY 1.4.2: ***Screening Requirement.*** The Town shall require new commercial, light industrial, and manufacturing development to install landscaping, visually obstructive fencing or man-made berms, or other appropriate screening techniques concealing the commercial, light industrial, or manufacturing site from areas designated for low or medium density residential if the proposed commercial, light industrial, or manufacturing building is not compatible.

POLICY 1.4.3: ***Availability of Facilities to Support Commercial Development.*** The density and intensity of commercial uses shall be compatible with the ability of public facilities to provide adequate services according to adopted level of service standards.

POLICY 1.4.4: ***Provision of Open Space.*** All new commercial development shall be subject to the open space standards established in Policy 1.2.2 of this *Element*.

POLICY 1.4.5: ***Maximum Intensity of Commercial Uses.*** Maximum intensity of use for commercial development is outlined within the respective land use categories and further refined in the Land Development Regulations.

POLICY 1.4.6: ***Commercial Building Size Limitations.*** Individual businesses within the Town Center Mixed Use and Neighborhood Commercial shall be limited to 5,000 sq. ft. unless a waiver is granted to the developer by the Town Council. Individual businesses within the Village Mixed Use land uses shall be limited to 30,000 sq. ft. unless a waiver is granted to the developer by the Town Council. These guidelines shall be used to determine the maximum allowable size for all new commercial buildings in Town. Waivers shall be based on the particular needs of the individual business, the compatibility of the proposed building and business with the business site and other affected development, enhanced architectural design of the proposed building, and other factors which the Town Council determines as relevant to development of the proposed site and impacts to the general area.

POLICY 1.4.7: ***Commercial Building Height Limitations.*** Commercial buildings within the Town Center Mixed Use, Village Mixed Use, and Neighborhood Commercial land uses shall be limited to a maximum of 35 feet in height.

POLICY 1.4.8: ***Acceptable Uses within Commercial Areas.*** Activities allowed within areas designated for commercial uses established in the Town Center Mixed Use, Village Mixed Use, or Neighborhood Commercial land uses shall be limited to the following:

1. Retail business (drive-thru establishments in the Town Center Mixed Use shall be located to the rear of properties fronting on Central Avenue)
2. Community centers and fraternal lodges;
3. Hotels or motels;
4. Marinas;
5. Service businesses, Personal Services such as barber/beauty, personal training, spa, salons, pottery shops, art/painting galleries or studios, dance studios, etc.;
6. Professional and Business offices;
7. Veterinarian offices, provided the facility has no outside kennels;
8. Financial Institutions and banks;
9. Residential development, low, medium, or high density (second story);

10. Recreation and Parks;
11. Manufacturing, as permitted according to policies cited in this *Element*;
12. Elementary and middle schools in the Neighborhood Commercial land use; and
13. Elementary, middle, and high schools in the Village Mixed Use land use.

A more detailed matrix is available in the Land Development Regulations.

POLICY 1.4.9: ***Strip Commercial Development and State Road 19 and County Road 48.*** The Town shall discourage strip commercial style development from occurring along State Road 19 and County Road 48. Prior to the approval of each proposed annexations along the State Road 19 and County Road 48 corridors, the Town shall consider the potential of a strip commercial style development being established as a direct result of such annexation.

POLICY 1.4.10: ***Adequate Commercial Land and the Future Land Use Map.*** The Town will ensure that adequate land is designated on the *Future Land Use Map* to support the commercial needs of the residents and guests of Howey-in-the-Hills during the planning period. All such lands shall be compatible and consistent with the surrounding land uses.

OBJECTIVE 1.5: ***Limiting Manufacturing Land Uses.*** Limit manufacturing land uses within the Town due to the presence of high aquifer recharge areas and lack of central sanitary sewer facilities.

POLICY 1.5.1: ***Manufacturing as a Conditional Use in Light Industrial Designations.*** The Town shall permit non-polluting manufacturing land uses within Light Industrial land use designations on a conditional basis.

POLICY 1.5.2: ***Acceptable Manufacturing Uses.*** Manufacturing uses allowed within Light Industrial designations shall be limited to those primarily involved with the assembly of goods and products processed without the use of excessive chemicals, heat, or machinery. Activities which might be obnoxious or offensive by

reason of emission of odor, dust, smoke, gas or noise beyond the building are prohibited.

POLICY 1.5.3: ***Maximum Intensity of Use.*** Maximum intensity of use for manufacturing uses shall be 0.70 for the impervious surface coverage and 0.60 for the floor area ratio.

OBJECTIVE 1.6: ***Public Services and Facilities.*** To assure that needed public services and facilities are developed concurrent with the impact of new development.

POLICY 1.6.1: ***Coordinating Public Facilities with Land Use.*** The Town shall extend public facilities only to existing and proposed land use activities, as shown on the *Future Land Use Map*, which shall require and demand such services. Undeveloped land shall not be designated for development without assurance through the *Comprehensive Plan* that public facilities shall be available concurrently with the impacts of development. The impacts of land uses, including their densities and intensities, shall be coordinated with the Town's ability to finance or require provision of necessary public facilities at conditions at or exceeding the adopted minimum level of service standards.

POLICY 1.6.2: ***Coordinating Public Facilities with Concurrency Management System.*** The timing and location of public facilities shall be coordinated with the Town's Concurrency Management System to assure that development occurs in an orderly and timely manner consistent with the availability of facility capacities.

POLICY 1.6.3: ***Land Use Allowed within Wellfield Protection Zones.*** A wellfield protection zone shall be established within a radius distance of seventy-five, two hundred, and five hundred feet from potable water wells. The following guidelines apply to the wellhead protection zone:

a. No new development (except facilities related to the public water system) shall be permitted within one-hundred and fifty feet from a well.

b. Within a two-hundred-foot radius distance, septic tanks, sanitary sewer facilities, or solid waste or disposal facilities shall be prohibited.

c. Within a five-hundred-foot radius of a well, manufacturing or light industrial uses shall be prohibited, including activities that require the storage, use handling, production or transportation of restricted substances; agricultural chemicals, petroleum products, hazardous/toxic wastes, industrial chemicals, etc. In addition, wastewater treatment plants, percolation ponds, mining activities and similar activities are prohibited. Low density single family, commercial, retail, and office land uses shall be allowed within the 500-foot zone for potable water wells.

d. All wells and wellhead protection zones shall be delineated on the Town's *Existing* and *Future Land Use Maps*.

POLICY 1.6.4: ***Public Facility and Service Standards.*** The Town shall continue to ensure that public facilities and services meet or exceed the standards established in the *Capital Improvements Element* required by Chapter 163.3177, F.S. and are available when needed for the development, or that development orders and permits are conditioned on the availability of these public facilities and services necessary to serve the proposed development.

POLICY 1.6.5: ***Meeting LOS Standards.*** The Town shall require, prior to approval of a building permit and/or development order, that the locally established "Level of Service of Standards" are being met or that facility improvements will be available concurrently with the impact of new construction or development such that level of service standards are maintained.

OBJECTIVE 1.7: ***Land Use Coordination and Soils and Topography.*** To require that soil conditions, topography, and availability of facilities and services be coordinated with land uses.

POLICY 1.7.1: ***Coordinating Future Land Uses with Soil Conditions.*** Land use activities, including their densities and intensities, shall be compatible to soil types whose properties are capable of supporting the structures, parking areas, ancillary uses, and facilities proposed to be placed on them.

In the event the *Future Land Use Map* identifies a land use allowed

within an incompatible soil type, a field study may be performed on the site by a professional hydrologist, registered engineer, or other similar profession to delineate actual boundaries and soil types exhibited on the subject site. The Town shall reserve the right to have such a field study verified by the local U.S. Soil Conservation Office or a comparable State agency.

POLICY 1.7.2: ***Engineering Practices, Topography, and Soils.*** The Town shall maintain a unified Land Development Code and continue to require that sound engineering practices be required with respect to the topography and soil conditions, prior to the approval of development activities in Town.

OBJECTIVE 1.8: ***Coordination of Land Patterns, New Development, and the Concurrency Management System.*** Assure that future land use patterns and new development in Howey-in-the-Hills are coordinated consistently with the Town's Concurrency Management System.

POLICY 1.8.1: ***Availability of Public Facilities.*** Development orders and permits shall not be issued unless the necessary facilities and services are available concurrent with the impacts of development. Future land use allocations, including their related densities and intensities, shall not exceed the financial and legal ability of the Town to provide or require provision of public facilities to serve those land uses delineated on the *Future Land Use Map*. The Town's Concurrency Management System shall be used to determine whether adequate public facility capacities are available to meet the demands generated by new development and redevelopment.

POLICY 1.8.2: ***Efficiency in the Provision of Public Facilities.*** Allocation of future land use shall occur in a manner which promotes efficient distribution and provision of public facilities. Land use allocations shall assure that future sites can be acquired for public facilities programmed within the *Five-Year Schedule of Capital Improvements* or determined necessary to meet demands generated by growth and development anticipated during the planning period.

POLICY 1.8.3: ***Mandatory Compliance with the Concurrency Management System.*** The Town shall issue no development order or permit for development unless the applicant demonstrates that impacts associated with the proposed development meet criteria set forth

within the Town's Concurrency Management System. All applicants of development shall demonstrate through narrative and graphic information that:

1.) necessary facilities and resources are in place and functional concurrent with the impacts of development; and

2.) the subject development shall not reduce the levels of service below the minimum adopted standard established in the *Public Facilities Element* policy for each applicable public facility.

For proposed developments which shall require public facilities or services provided by the Town, no development order or permit for development shall be issued until a maximum capacity for a public facility is assigned to and reserved for the subject development. The reservation of capacity for a public facility shall be granted to an applicant of development only upon satisfactory compliance with the Town's Concurrency Management System and other applicable ordinances. All rights pertaining to the assignment and forfeit of capacity allocations shall be defined within the Town's Concurrency Management System.

POLICY 1.8.4: ***Amendments to the Comprehensive Plan.*** The Town shall require all applicants pursuing an amendment to the *Future Land Use Map* to demonstrate that all facilities or service capacities are currently available and shall be available concurrent with the impacts of development. Any necessary facilities or services shall be part of the *5-year CIP* or the *Long-range Capital Plan*. An amendment to the *Future Land Use Map* shall not constitute the reservation of capacity for any public facility. Reservation of capacities shall only be granted to development orders or permits which demonstrate specific impacts which a development will place on public capacities. The Town shall consult with the St. Johns River Water Management District, prior to the approval of a building permit or its functional equivalent, to determine whether adequate water supplies and related facilities to serve new development will be available no later than the anticipated date of issuance by the Town a certificate of occupancy or its functional equivalent.

OBJECTIVE 1.9: ***Blighted Areas.*** Blighted areas shall be redeveloped, and the Town shall take the necessary action to prevent or limit their occurrence.

POLICY 1.9.1: ***Amending the Comprehensive Plan to Address Blighted Areas.*** At the time blighted areas are identified within Howey-in-the-Hills, the Town shall amend the *Comprehensive Plan* to include appropriate policies which address the redevelopment needs of that area. Such policies shall be based on an evaluation and analysis which shall be prepared within the Date Inventory and Analysis Section. The Town shall also re-evaluate the future land use designation for the blighted area to determine if a more appropriate designation, density and intensity of development would better encourage the private section to invest in redevelopment.

POLICY 1.9.2: ***Identifying Blighted Areas.*** The Town shall annually survey all areas of the Town to determine if blighted areas are occurring.

POLICY 1.9.3: ***Code Enforcement.*** The Town shall enforce its Codes to require needed improvements within the Town and discourage the creation of blighted areas in Town.

OBJECTIVE 1.10: ***Urban Sprawl.*** Discourage urban sprawl through a future land use pattern which promotes orderly, compact development.

POLICY 1.10.1: ***Promote Orderly, Compact Growth.*** Land use patterns delineated on the *Future Land Use Map* shall promote orderly, compact growth. The Town shall encourage growth and development in developed areas where public facilities and services are presently in place, and in those areas which public facilities can provide the most efficient service.

POLICY 1.10.3: ***Coordination with Lake County.*** The Town of Howey-in-the-Hills shall coordinate with Lake County to promote a regional development concept that directs future growth to urbanized or urban/rural transitional areas where public facilities and services are available or proposed to be available as required in the Town's Concurrency Management System.

OBJECTIVE 1.11: ***Innovative Land Development Applications.*** Future growth and development shall be managed through the preparation, adoption, implementation and

enforcement of innovative land development regulations.

POLICY 1.11.1: ***Use of Mixed Use Developments.*** To discourage urban sprawl and to maximize existing and planned public facilities, the Town has adopted the Village Mixed Use and Town Center Mixed Use land uses.

Mixed Use designations may include single family, multiple family, commercial, recreation, open space and institutional land uses not to exceed development densities and intensities of use established for these land uses in this *Element*.

POLICY 1.11.2: ***Use of Cluster Developments.*** To promote the conservation of permeable surface area and maintain the Town's rural character, cluster developments shall be promoted by the Town during the development review process. Developers of Mixed Use/Planned Unit Developments and residential subdivisions shall be encouraged to cluster development in order to preserve open space.

POLICY 1.11.3: ***Maintaining Innovative Land Development Regulations.*** The Town shall maintain innovative land development regulations that encourage mixed-use developments and incorporate site design planning techniques that will enhance the quality of large scale developments or redevelopment area(s).

POLICY 1.11.4: ***Establishing Architectural Guidelines.*** The Town shall apply the architectural standards in the Land Development Regulations to the Town Center Mixed Use and Village Mixed Use land uses to maintain the unique and hometown charm of Howey-in-the-Hills. The Town shall encourage historical and traditional styles native to the Howey-in-the-Hills area and new and innovative architectural design when appropriate.

POLICY 1.11.5: ***Requiring Underground Utilities.*** The Town shall require all new subdivisions, residential and commercial developments, approved after the adoption of this *Comprehensive Plan*, to have underground telephone, cable and electrical utility lines to provide a more attractive, efficient, and safer development.

POLICY 1.11.6: ***Promoting Interconnected neighborhoods.*** The Town shall encourage the development of interconnected neighborhoods using pedestrian linkages, bicycle facilities, and golf carts.

POLICY 1.11.7 ***Multiple access to subdivisions***. The Town shall require new developments consisting of 50 lots or more to have a minimum of two points of vehicular access. This policy shall not be construed as prohibiting private streets or prohibiting the use of emergency access only points in addition to the standard vehicular access point.

OBJECTIVE 1.12*:* ***Identifying a Defined Planning Area.*** To identify an area surrounding the existing Town limits as the defined planning area for the Town.

POLICY 1.12.1: ***Defined Planning Area Definition.*** To protect the Town's unique charm and hometown character, the Town hereby adopts the Utility Service Area as the maximum planning area (see the Town's *Utility Service Area Map*). The Town shall not annex outside this boundary.

POLICY 1.12.2: ***Defined Planning Area and Concurrency.*** All land within the defined planning area established in Policy 1.12.1 that annexes into the Town shall be subject to the Town's adopted Concurrency Management System and level of service standards. Prior to the approval of annexing land within the defined planning area, the Town shall ensure that timely development occurs before the annexation and connection to the Town's utility service system is made available. The Town shall also ensure that the availability of public infrastructure is made only to proposed developments that are adjacent to existing developments within the Town as opposed to sporadic "leap frog" development resulting in urban sprawl.

OBJECTIVE 1.13: ***Electric Infrastructure.*** To maintain, encourage, and ensure adequate and reliable electric infrastructure is readily available in the Town.

POLICY 1.13.1: ***Permitting New Electric Distribution Substations.*** The Town shall allow new electric distribution substations in all land use categories except Conservation. The Town shall, if possible, avoid locating substations where they would be incompatible with adjacent land uses.

POLICY 1.13.2: ***Compatibility of New Electric Distribution Substations.*** The Town shall require the compatibility of new electric distribution

substations with surrounding land uses (including heightened setback, landscaping, buffering, screening, lighting, etc.) as part of a joint public/private site planning effort.

POLICY 1.13.3: ***New Electric Distribution Substation Standards.*** The following standards shall apply to new distribution electric substations:

In nonresidential areas, the substation must comply with the setback and landscaped buffer area criteria applicable to other similar uses in that district, if any.

Unless the Town Council approves a lesser setback or landscape requirement, in residential areas, a setback of up to 100 feet between the substation property boundary and permanent equipment structures shall be maintained as follows:

1. For setbacks between 100 feet and 50 feet, an open green space shall be formed by installing native landscaping, including trees and shrub material, consistent with the relevant local government's land development regulations. Substation equipment shall be protected by a security fence consistent with the Town's Land Development Regulations.

2. For setbacks of less than 50 feet, a buffer wall 8-feet high or a fence 8-feet high with native landscaping consistent with the relevant local government's regulations shall be installed around the substation.

POLICY 1.13.4: ***New Electric Distribution Substation Compliance.*** All new distribution electric substations in Town shall comply with the guidelines and standards established in Chapter 163.3208, F.S.

OBJECTIVE 1.14: ***Consistency and Compatibility with the Adopted Comprehensive Plan.*** To ensure the Town's Land Development Regulations, Zoning Districts, and Performance Standards are consistent with and compatible to the adopted *Comprehensive Plan*.

POLICY 1.14.1: ***Land Development Regulations Consistency.***

The Land Development Regulations for the Town of Howey-in-the-Hills shall be consistent with, and serve to implement the goals, objectives and policies established within the *adopted Comprehensive Plan*. To implement the goals, objectives and policies of the *adopted Comprehensive Plan*, provisions shall be incorporated into the Land Development Regulations, and shall contain specific and detailed provisions which as a minimum:

a. Regulate the subdivision of land;

b. Regulate the use of land and water consistent with this Element, ensure the compatibility of adjacent land uses, and

provide for open space;

c. Protect the environmentally sensitive lands designated in the *Comprehensive Plan*, particularly those identified in the *Future Land Use Map* series;

d. Regulate development within areas which experience seasonal and periodic flooding;

e. Specify drainage and stormwater management requirements;

f. Protect potable water wellfields and aquifer recharge areas;

g. Specify minimum design standards for sanitary sewer and septic tank systems;

h. Regulate signage;

i. Ensure safe and convenient on-site and off-site traffic flow and parking needs of motorized and non-motorized transportation;

j. Require that development meet all appropriate provisions of the Town's Concurrency Management System, including level of service standards adopted by the Town Council, prior to the issuance of a development order or permit; and

k. Provide that public facilities and services meet or exceed the standards established in the capital improvements element required by ~~Chapter~~section 163.3177 of Florida Statutes~~, F.S.~~ and are available when needed for the development, or that development orders and permits are conditioned on the availability of these public facilities and services necessary to serve the proposed development.

POLICY 1.14.2: ***Consistency of Zoning Districts with the Future Land Use Map.*** The Town may elect to further regulate land use activities within land use districts shown on the *Future Land Use Map* through the establishment of zoning districts. Such zoning districts shall be defined within the Land Development Regulations, and a Zoning Map shall illustrate the demarcations of each district. The density and intensity of land use activities established for each zoning district shall be consistent with density and intensity qualitative

standards set forth on the *Future Land Use Map* for the associated land use district.

Land development regulations adopted to implement this *Comprehensive Plan* shall be based on and be consistent with the residential densities and non-residential intensities established herein.

POLICY 1.14.3: ***Consistency with Performance Standards.*** Performance standards established within the Land Development Regulations shall be consistent with the goals, objectives and policies established within the *adopted Comprehensive Plan*. By December 2012, the Land Development Regulations shall be amended to ensure that the performance standards comply with the adopted *Comprehensive Plan*.

OBJECTIVE 1.15: ***Protection of Natural Resources.*** To ensure the protection of natural resources in the Howey-in-the-Hills area.

POLICY 1.15.1: ***Policies for Managing Environmentally Sensitive Areas.*** Policies in the *Conservation Element* for managing environmentally sensitive natural systems, including but not limited to Little Lake Harris, Lake Illinois, wetlands, floodplain areas, significant vegetative communities and wildlife habitats of endangered and threatened species, shall be implemented through performance standards stipulated in the Land Development Regulations.

POLICY 1.15.2: ***Intergovernmental Coordination and Natural Resource Management.*** The Town shall coordinate with State agencies including, the St. Johns River Water Management District, the Florida Department of Environmental Protection, and the East Central Florida Regional Planning Council as well as Lake County and other agencies concerned with managing natural resources for the purpose of protecting the function and existence of natural systems.

POLICY 1.15.3: ***Protection of Endangered and Threatened Animal and Plant Species.*** The Town shall protect endangered and threatened animal and plant species by assuring the preservation of native habitat required for their propagation and survival. Policies pertaining to the adoption of performance standards and development regulations, as herein cited in this *Comprehensive Plan* shall implement the protection of habitat used by these species.

OBJECTIVE 1.16: ***Compatible and Consistent Land Uses.*** To ensure that land uses are compatible and consistent with surrounding land uses.

POLICY 1.16.1: ***Existing Non-Compatible Land Uses.*** The Town shall reduce or eliminate existing non-complying land use activities to the greatest reasonable and practical extent without intruding on the constitutional rights of the effected landowners. No existing non-conforming structure shall be increased or expanded. The Land Development Regulations shall define circumstances under which the existing non-conforming use shall be eliminated or reduced in intensity and shall provide principles for regulating improvements to existing non-complying structures as well as changes to non-conforming uses.

POLICY 1.16.2: ***Managing Future Land Use.*** The *Future Land Use Map* and related policies together with the Land Development Code shall be applied as a planning and management tool in order to prevent development of land uses which do not conform to the Town's character as reflected in the Town's adopted *Future Land Use Map*, *Zoning Map*, and other applicable laws, ordinances, and administrative rules.

OBJECTIVE 1.17: ***Renewable Energy Resources.*** To encourage the development and use of renewable energy resources, efficient land use patterns, and reducing greenhouse gas emissions in order to conserve and protect the value of land, buildings, and resources, and to promote the good health of the Town's residents.

POLICY 1.17.1: ***Energy Efficient Land Use Pattern.*** The Town shall maintain an energy efficient land use pattern and shall continue to promote the use of transit and alternative methods of transportation that decrease reliance on the automobile.

POLICY 1.17.2: ***Promoting Walking and Bicycling.*** The Town shall continue to encourage and develop the "walk-ability and bike-ability" of the Town as a means to promote the physical health of the Town's residents, access to recreational and natural resources, and as a means to reduce greenhouse gas emissions.

POLICY 1.17.3: ***Establishing an Energy Management Plan.*** By December 2012, the Town shall develop and implement an Energy Management Plan to minimize electric, fuel and water resources in Town buildings, fleet vehicles and on public properties.

POLICY 1.17.4: ***Solar Collectors.*** No action of the Town shall prohibit or have the effect of prohibiting solar collectors, or other energy devices based on renewable resources from being installed on a building and as further set forth within Section 163.04, Florida Statutes.

POLICY 1.17.5: ***Construction of Public Facilities and Buildings.*** Public buildings and facilities shall be constructed and adapted where reasonably feasible to incorporate energy efficient designs and appropriate "green" building standards. Green Building standards that should be observed are contained in the Green Commercial Buildings Designation Standard, Version 1.0, published by the Florida Green Building Coalition, Inc.

POLICY 1.17.6: ***Energy Efficient Design and Construction Standards.*** The Town shall continue to promote and enforce energy efficient design and construction standards as these become adopted as part of the State Building Codes. The Town shall also promote commercial and residential standards that are promulgated from time to time by the Florida Green Building Coalition, Inc.

POLICY 1.17.7: ***Promoting Mixed Use Developments.*** The Town shall continue to promote mixed-use developments in areas planning for urban development or redevelopment as a mean to produce energy efficient land use patterns and reduce greenhouse gas emissions.

POLICY 1.17.8: ***Development Incentives for Smart Growth Development*****.** The Town shall revise its Land Development Regulations by December 2012 to offer incentives and flexibility for development projects that will make development application, review and approval processes easier, faster and more cost effective for projects that are consistent with the Smart Growth Principles of the C*omprehensive Plan* and that can be demonstrated to reduce infrastructure costs, promote the preservation of open space and habitat lands, provide energy efficient land use patterns, and reduce greenhouse gas emissions. Other incentives shall also be evaluated for projects that participate in energy-efficient development programs such as:

- U.S. Environmental Protection Agency's Energy Star Buildings and Green Lights Program to increase energy efficiency through lighting upgrades in buildings;
- Rebuild America;
- Building for the 21st Century;
- Energy Smart Schools;
- National Industrial Competitiveness through Energy;

- U.S. Department of Environmental Protection's Pollution Prevention (P2) Program;
- U.S. Green Building Council (LEED);
- Florida Water Star[SM] Program; or
- Florida Green Building Coalition (FGBC), including pursuing certification as a Green Government.

OBJECTIVE 1.18: ***Mechanism to Manage Growth and Development.*** To ensure that the *Comprehensive Plan* represents the primary mechanism which manages growth and development within the Town of Howey-in-the-Hills.

POLICY 1.18.1: ***Precedence Over Other Land Use Control Mechanisms.*** Growth management and land use controls stipulated in the adopted *Comprehensive Plan* through goals, objectives and policies shall take precedence over all other land use policies established in other land use control mechanisms adopted by the Town of Howey-in-the-Hills, including but not limited to the Land Development Regulations and other components of the Code of Ordinances.

POLICY 1.18.2: ***Growth Management through Maintenance of Land Development Regulations.*** The Town shall maintain the Land Development Regulations to reflect growth management controls established within the updated *Comprehensive Plan*.

POLICY 1.18.3: ***Compliance with State and Federal Laws.*** The *Comprehensive Plan* shall not violate Statutes established in Florida Law or Administrative Rule, nor shall it violate the Constitution of the State of Florida or that of the United States of America.

MEMORANDUM

TO: Howey-in-the-Hills Town Council
CC: J. Brock, Town Clerk
FROM: Thomas Harowski, AICP, Planning Consultant
SUBJECT: Mission Rise Planned Development Proposal
DATE: January 12, 2024

The Town has received an application for approval of a planned unit development agreement for the Mission Rise parcel which lies south of and west of The Reserve (Hilltop Groves) development. The request is a zoning action which requires the Town Council to consider a proposed development agreement that will govern development of the parcel. The applicant has submitted a conceptual development plan and draft development agreement along with a traffic study and required application forms. The project has been reviewed by the Development Review Committee (DRC) on several occasions. While not all of the comments offered by the DRC have been adopted, the project has reached the stage where it needs to move to the policy decision stage.

Project Description

The project is requesting approval for 499 single-family homes with lots measuring 55 x 120 and 75 x 120. The larger lots are located at the perimeter of the project and the smaller lots are located toward the interior of the project site. The project will access from SR-19 via Revels Road on the eastern side and access from Number Two Road on the north side. There is also a minor connection to Orange Blossom Road on the south. The site design provides for connections to the Hilltop Groves portion of The Reserve on the east and to Silverwood Lane on the west.

The residential portion of the project proposes three phases as shown on the graphic submitted with the application. The units by phase are as follows:

Proposed Development Phasing			
Phase	**55-foot lots**	**75-foot lots**	**Total**
Phase 1	150	41	191
Phase 2	100	13	113
Phase 3	166	29	195
Total	416	83	499

The project contains about 60 acres of wetlands with half of the total being credited to the required project open space and the balance identified as additional open space. The proposed plan will impact 0.3 acres which is for a road and utility crossing. The site includes an active eagles nest location, and the plan identifies 330 foot and 660 foot protection zones. No development activity is permitted within the 330 foot protection zone, but some development is proposed within the 660 foot protection zone. The development outside the 330 foot protection zone but within the 660 foot protection zone consists of single-family homes and roads. Some development within the outer protection zone is allowed.

Community facilities and parks are provided. Phase 1 and Phase 3 each include an amenity center including a cabana and pool. The project includes a multi-use trail along the central collector road to join with the Town's overall trail system, including a trail head adjacent to the Phase 1 amenity center. Phase 2 and Phase 3 each include smaller active miniparks, and Phase 2 includes a larger and more passive neighborhood park area. The neighborhood park area includes walking trails that connect to the multi-use trail.

Village Mixed Use Policy Assessment

The project is required to meet the village mixed use land use criteria as presented in Policy 1.1.1 of the future land use element. As a threshold requirement the project must comply with these criteria.

Maximum density is four units per net acre:
The net land area is identified as 153.1 acres which would allow a maximum of 612 units. The proposed project size is 499 units.

Residential land use maximum is 85%
Maximum allowable residential acreage is 130 acres and the propsoed project will apply 129.3 acreas to residential use.

Non-Residential land use minimum is 15%
Non-Residential land use will occupy 23.1 acres including the amenity centers, park areas, and multi-use trail area outside the right-of-way. The application includes a graphic identifying the non-residential land assignments.

Five percent of the non-residential land is to be applied to public/civic uses
Public and civic land use minimum is 1.16 acres. The two amenity centers will occupy 2.6 acres as civic land uses.

Public recreational uses must be at least 10% of the usable open space
Ten percent of the usable open space is 3.0 acres. Passive and active park areas are reported as 16.9 acres.

Total open space is 25% of the gross project area.
Total open space required is 60.8 acres which may include up to 50% of wetlands on the site. Total wetlands are reported as 60.1 acres, and when applied to the open space calculation the total site open space comes to 90.2 acres. Note that 0.3 acres of wetland will be impact by road construction.

Comprehensive Plan Assessment

The proposed project has been reviewed in comparison to the applicable comprehensive plan policies. The applicant has submitted a project narrative that offers their view on compliance with the goals, objectives and policies laid out in the comprehensive plan. The primary policy relating to Village Mixed Use development is Policy 1.1.1 of the Future Land Use Element. This policy lays out the minimum standards that a village mixed use project must meet including the percentage of land allocated to various uses, including open space, and associated activities such as civic activities and recreation. As noted in the preceeding section, the application meets these basic requirements. Additionally, the applicant cites compliance with Policy 1.11.2 encouraging cluster development.

The applicant also cites compliance with Policy 1.3.1 regarding wetlands protection. The plan as proposed does include wetland areas in the designated open space areas. There is a minor wetland impact in the central area of the project where there is some disturbance, about 0.3 acres for a road and utility crossing. This type of limited wetland impact has been approved in other developments. The open space preservation areas also include the flood prone areas in Zone AE. The project will be required to provide the 25-foot wetland buffer and 50 foot setback from wetlands to upland structures as part of the Preliminary Subdivision Plan should the zoning package be approved. This action is required by Conservation Element Policy 1.2.3 as well as Future Land Use Policy 1.3.1.

Policy 1.2.6 encourages the allocation of more dense residential development along the major road corridors and in areas that support the Central Avenue commercial area. The proposed central collector is part of the recommended traffic network and could support some increased density. Serving as a parallel facility to SR-19 it can help direct traffic to the Central Avenue commercial area as that portion of the Town develops. Compiance with the policy might benefit from a reduced density and/or larger lot sizes at the western and southern perimeter of the project.

For evaluation of the proposed project design, Policy 1.1.2 as it relates to Village Mixed Use areas may be the key determinant. The effective portions of the policy read as follows:

POLICY 1.1.2: ***Land Use Categories.*** The land use categories, as depicted on the Town's *2035 Future Land Use Map (FLUM)* shall permit the following uses and activities.

Village Mixed Use – Primarily intended to create sustainability and maintain the unique charm of the Town, including the provisions of reducing the dependability on the automobile, protecting more open land, and providing quality of life by allowing people to live, work, socialize, and recreate in close proximity. Elementary, middle, and high schools are also permitted in this category.

The applicant has submitted a statement with the project narrative offering their position on how the plan complies with the policy. The Town is deep into a process of assessing how other village mixed use projects have performed relative to the policy. The recent summary of this village mixed use evaluation is captured in the draft amendments to the comprehensive plan that have emerged from the recent series of workshops and public discussions. The Town Attorney framed the findings from this process as follows:

7. 2023 Analysis and Reevaluation of Residential Densities and Lot Sizes

In 2023 the Town Council and the Town's Planning and Zoning Board analyzed and reevaluated post-2010 residential development in the Town. Residential development under the Village Mixed Use designation resulted after 2010 in substantially increased housing densities and substantially smaller residential lots than were prevalent in the Town's historical development.

The evaluation and analysis was accompanied by robust public participation. Public sentiment agreed overwhelmingly with Town Council: the increased densities and downsized lots after 2010 were inconsistent with the character, appearance, and ambiance of the Town's historical neighborhoods. Contrary to FLUE Policy 1.1.2, development in Village Mixed Use had failed to "maintain the unique charm of the Town."

Consequently, the Town Council determined that amendments to this Future Land Use Element to redirect future residential densities and lot sizes were warranted and desirable.

As the Town Coouncil is well aware, the discussion about consistency of character, appearance and ambiance has focused on lot sizes. Newer developments have represented current housing markets as demanding smaller and narrower lots than is typical for the older neighborhoods in Howey. The Reserve located adjacent to the subject property on the east includes the Hilltop Groves residential development that includes single-family lots with 50-foot widths and groupings of townhouse units. This project was approved in the 2006 time frame and amended in 2018 including a redesign that stressed a higher percentage of owner-occupied units. The first phase final plat has recently been approved by the Town, and the Town will be able to assess the design impacts and contributions once construction begins.

The Venezia and Talichet developments are the most recent large scale developments including lot sizes ranging from 60-foot wide lots to 75-foot and 85-foot wide lots. Reaction to these developments has been mixed with the primary concern being the visual massing of large houses on smaller lots and lesser setbacks than the

Town's traditional neighborhoods. These projects have also been called out as lacking some public recreation elements. The proposed Mission Rise project includes a fairly robust recreation and civic facility support. The Watermark development has been approved with somewhat larger lots as a minimum of 50% of the 225 lots required to be 80-feet wide and the balance are allowed at 70-feet.

During the Development Review Committee phase of the Mission Rise project review, the applicants were clearly advised of the ongoing community debate regarding lot sizes and dimensions so these factors could be considered in their development proposal. The town Council now has the task of assessing the current application in comparison to Policy 1.1.2 as addressed by the applicant and as considered within the context of the ongoing policy review.

Conceptual Development Plan Review

The conceptual development plan includes a series of graphics and a written development agreement. The conceptual plan has done a good job of identifying wetland and flood prone areas and including them in the open space areas of the project. The residential development areas clearly break out into three sub-areas that form the three project phases, and each phase is supported by recreation and/or civic facilities and an integrated bicycle and pedestrian network. The bicycle network will tie into the bicycle facilities in the adjacent Hilltop Groves development to provide a loop system connecting cyclists from both projects and offering a high quality cycling opportunity for Howey citizens generally.

The project design includes connected open space areas between Phase 1 and Phase 2 and again between Phase 2 and Phase 3. The staff has requested the applicant eliminate the stormwater retention area in the open space area between Phase 2 and Phase 3 in order to preserve more trees in this upland area and to maximize the open space connectivity. The staff believes that the stormwater retention is a residential support activity and should be located in the residential portions of the project. The applicants have been responsive to a number of other design suggestions, but have chosen to keep the stormwater retention area in the open space corridor.

The conceptual development plan package includes layouts for both the proposed 55-foot and 75-foot wide lots showing a minimum of 20 feet from the front property line to the garage and rear setbacks for the principal structure of 25-feet. The Town has been asking for these setbacks to provide for adequate off-street parking and to allow for accessory structures like swimming pools while meeting thesetbacks for accessory structures.

Concurrency Considerations

Concurrency issues relate to the provision of necessary public services to support new developments. There are two concurrency issues related to the Mission Rise project, sanitary sewer service and traffic.

Sanitary Sewer: The project does not currently have an agreement with the Central Lake Community Development District, which is the current provider for the Town. The CLCDD reports that they do not have currently available capacity. The applicants will need to reach an agreement with the CLCDD on service or arrange for service from an alternate provider. The Town is currently reviewing options for alternative treatment sources to provide options to the CLCDD.

The applicant has addressed the sewage treatment issue in the development agreement by linking the project approval to the acquistion of treatment service. Section 10 of the development agreement provides a two year window from the date of approval of the agreement for the applicants to obtain a commitment for sewage treatment. If the commitment is obtained, the project may move forward to submit plans for constuction. If a commitment is not obtained within the prescribed time period, the Town Council may vacate the agreement.

Traffic Considerations: The applicants prepared a traffic analysis which projected traffic based on current conditions, anticipated traffic from the proposed development, and anticipated traffic from other projects which have been approved, but not yet constructed. Planned traffic improvements were considered, and given the concerns related to Number 2 Road, the capacity for Number 2 Road was reduced by 25%. The study reported two roadway links and three intersections that will have capacity concerns. The affected links are on SR -19 The first is from Lane Park Road to Central Avenue, and the second is from CR 455 to CR 478. Both of these segments will have capacity issues without the Mission Rise project, and both may be affected by re-classification of the roadway capacities to more accurately reflect currnt conditions.

The affected intersections are also on SR 19 and include the intersections at CR 48, Central Avenue and Revels Road. Typically the project is required to contribute a “fair share” amount to the improvements at each intersection. The applicant has proposed an alternative of paying for the full upgrade of the SR 19 and Revels road intersection. The upgrade may be a traffic signal if warranted or a roundabout. After discussion with the town’s traffic engineer, this alternative is preferred as it will result in an actual physical improvement addressing one of the potential impact sites. The standard approach would likely result in a fair share payment sitting idle until sufficient funding is found to complete an improvement.

On Number 2 Road the project will provide additional right-of-way to help bring the right-of-way up to standard. The project will also provide turn lanes and bring the current lane width up to standard for the length of the project frontage. Combined with the approved upgrades from Hilltop Groves, the combined project will bring the road close to standard from the western terminus of the project to approximately Mare Avenue. Based on the timing for the proposed development as stated in the termination provisions, it may be up to four years before units in Phase 1 appear and another three years before Phase 2 units begin construction. The proposal for the collector road is to built the road with each residential phase, the actual connection to Number 2 Road could be five to ten years in the future.

The project design includes a connection to the Hilltop Groves project in Phase 2 of Mission Rise. The model predicts this connection willdraw up to 10% of the project traffic primarily as a link to the commercial area in The Reserve development. This link also offers an indirect connection to SR-19. Lake County is discouraging use of the southerly connection to Orange Blossom Road due to the poor condition of that roadway.

Summary of Findings

The list of findings presented below is offered to summarize for the Town Council the most salient points from the discussion to this point.

- The applicants have presented a conceptual plan that meets the minimum Village Mixed Use requirements as presented in Future Land Use Policy 1.1.1.
- The development agreement includes setbacks that address the issues related to onsite parking and adequate area to accommodate accessory structures.
- The conceptual plan includes recreation and civic components that have been issues for other VMU projects.
- The development agreement includes minimum and maximum dwelling unit sizes in an effort to address the building mass concerns from other VMU projects.
- The conceptual development provides some larger lots at the project periphery, but the project is dominated by 50 x 120 lots.
- Compliance with Future Land Use Policy 1.1.2 relating to community character is an open discussion item.
- The project development agreement provides a tiered termination clause so that the project has specific sunset action points.
- The project needs to obtain sanitary sewer service sufficient to serve the project.
- The project traffic will impact three intersections on SR 19, and the applicant has proposed full improvement of the SR-19 and Revels Road intersection as a “fair share” contribution.
- While the traffic study shows that Number 2 Roard and most segments on SR-19 will operate within the designated level of service, there will be additional traffic added to each facility.
- The project will provide limited improvements to Number 2 Road.
- Based on the timing for phased development the actual connection of the central collector road to Number 2 Road is expected to occur between five and ten years from the project start.

Planning Board Analysis and Recommendation

The Town's planning board considered the application at their December 21, 2023 regular meeting. The Board review the planning staff report and heard an extensive presentation from the applicant. Public testimony was also considered. The Planning Board found that the project as presented did not adequately support Future Land Use Policy 1.1.2, but could support the policy with specific changes. The Planning Board recommended a conditional approval of the project including the following conditions:

1. Eighty percent of the single-family lots meet a minimum lot size of 10,840 square feet.
2. Up to 20% of the residential lots may have lot widths of 75 feet as proposed by the applicant.
3. Access connection to Number 2 Road cannot be opened until after Phase 1 and Phase 2 have been completed, but should be opened when 50% of the units in Phase 3 have received a certificate of occupancy.
4. The open space area between Phase 2 and Phase 3 shall be redesigned to eliminate stormwater retention ponds from this area.

Action Options

The Town Council has received the recommendation from the Planning Board and has the opportunity to consider:

- Whether to approve the project based on the conditions proposed by the Planning Board;
- Approve the project with other conditions either in place of or supplementary to the Planning Board recommendation;
- Approve the project as submitted; or
- Deny project.

An action to deny the project needs to be accompanied by a statement as to why the project fails to meet the conditions for approval either through the comprehensive plan goals, objectives, and policies or through the failure to comply with other elements of the land development regulations.

If the Town Council takes an action including conditions recommended by the Planning Board or other conditions that will result in changes to the lot patterns proposed in the development, the project will need to undergo a revision to the conceptual development plan that conforms to these conditions. If the applicant elects to redesign the project in line with the Planning Board recommendations or meeting other conditions that the Town Council may apply, some work will need to done to clarify the conditions to be certain about how and when they would be satisfied.

Planning & Zoning Board Meeting

December 21, 2023 at 6:00 PM

Howey-in the-Hills Town Hall
101 N. Palm Ave.,
Howey-in-the-Hills, FL 34737

MINUTES

CALL TO ORDER
ROLL CALL

BOARD MEMBERS PRESENT:
Board Member Alan Hayes | Board Member Richard Mulvany | Board Member Ellen Yarckin | Board Member Shawn Johnson | Board Member Frances Wagler | Vice-Chair Ron Francis III | Chair Tina St. Clair

STAFF PRESENT:
Sean O'Keefe, Town Manager | John Brock, Town Clerk | Tom Harowski, Town Planner | Tom Wilkes, Town Attorney

CONSENT AGENDA

Routine items are placed on the Consent Agenda to expedite the meeting. If a Planning & Zoning Board Member wishes to discuss any item, the procedure is as follows: (1) Pull the item(s) from the Consent Agenda; (2) Vote on the remaining item(s); and (3) Discuss each pulled item and vote.

1. Consideration and Approval of the November 16, 2023, Planning and Zoning Board Meeting minutes.

Motion made by Board Member Johnson to approve the Consent Agenda; seconded by Board Member Mulvany. Motion approved unanimously by voice-vote.

Voting
Yea: Board Member Hayes, Board Member Mulvany, Board Member Yarckin, Board Member Johnson, Board Member Wagler, Vice-Chair Francis III, Chair St. Clair
Nay: None

PUBLIC HEARING

2. Consideration and Recommendation: **Mission Rise Development PUD Rezoning Submittal**

   Town Planner, Tom Harowski, introduced and explained this item. Mr. Harowski reviewed his staff report with the Board. Mr. Harowski explained that the project included 499 single-family homes with lots measuring 55' x 120' and 75' x 120'.

Mr. Harowski summarized that the applicants have presented a conceptual plan that meets the minimum Village Mixed Use requirements as presented in Future Land Use Policy 1.1.1 and that the proposed development agreement includes setbacks that address the issues related to onsite parking and adequate area to accommodate accessory structures.

Mr. Harowski explained to the Board that there were three options before the Board. Those options included: recommending approval of the proposed development as submitted; recommending denial of the proposed application (based on a failure to comply with Policy 1.1.2 regarding community character, the addition of traffic to road segments that are projected to fall below the level of service standard [even though the road segments will still fail without the project], failure to comply with Policy 1.2.6 on the allocation of residential density in the community, and/or other findings that the Planning Board may determine); or recommending a conditional approval providing the project make some changes.

Chair St. Clair asked the applicant to introduce themselves and give their presentation to the Board. Jonathan Huels (Attorney for the applicant) introduced himself and the group of applicant representatives. They included Jason Humm (Owner Representative), Jacqueline St. Juste (Engineer), Charlotte Davidson (Transportation Planner), Mark Ausley (Biologist), Jack Caldwell (Landscape Architect), and Alexis Crespo (Planner). Ms. Crespo gave the applicant's presentation to the Board.

Board Member Yarckin quoted proposed changes to the Town's Comprehensive Plan that would require developers to have at least 50% of all Single-Family Residences to have a minimum area of 10,800 square feet and the applicant's biggest lots were only 9,000 square feet. Mr. Huels stated that this is a policy under consideration and has not yet been adopted and the applicant has been working with the existing regulations.

Chair St. Clair open Public Comment for this item only.

Eric Gunesch, 448 Avila Place – Mr. Gunesch stated that he wanted a recommendation of denial until the applicant comes back with a site plan that follows the Town's MDR-2 zoning requirements.

Greg Kiffer, 11348 Valley View Dr., Howey-in-the-Hills (unincorporated Lake County) – Mr. Kiffer had questions about school concurrency. Mr. Kiffer was concerned about the traffic getting worse in the area.

Frank Martinez, 10400 Woodland Hills Ct., Howey-in-the-Hills (unincorporated Lake County) – Mr. Martinez stated that he appreciated the applicant's consideration as it relates to the connection to Orange Blossom on the south side of the project but does not think it is enough. Mr. Martinez stated that he wanted a recommendation for denial.

Nathaniel White, Owner of Contours Landscaping Solutions – Mr. White was concerned about the flow of traffic around his business and wanted an access to the neighborhood through the south side of his property.

Janice McLain, 109 S Lakeshore Blvd. – Ms. McLain stated that she thought her 65' wide lot that she lives on is too small and that she wanted the Board to make a recommendation of denial.

Tim Everline, 1012 N Lakeshore Blvd. – Mr. Everline stated that Florida is no longer a paradise due to growth. Mr. Everline stated that he believed the lots were too small and that Number Two Rd. may not be fixed in 10 years. Mr. Everline stated that he wanted a recommendation for denial.

Ken Dunsmoor, 9950 Orange Blossom Rd., Howey-in-the-Hills (unincorporated Lake County) – Mr. Dunsmore stated that he did not think they could stop people from exiting out onto Orange Blossom Rd. and he was not in favor of this proposed development.

David Miles (Town Councilor), 500 E Camelia Way – Councilor Miles stated that he thinks 100% of all future lots should be at least 10,800 square feet and reminded the audience that he had stated this in a recent Town Council Meeting. Councilor Miles stated that he thought the Town's staff was dragging their feet on getting the Town's Comprehensive Plan amended.

Councilor Miles stated that he will make a motion in a future Town Council meeting to put a moratorium on building within the Town if they cannot come get this developer to change their path.

Councilor Miles asked the Planning and Zoning Board to reject this proposal. Councilor Miles stated that this proposal would not get his vote and that it would not get several other Councilors' votes.

Sandy Russ, 6813 Lakeview Dr. Yalaha, FL. – Mrs. Russ stated that she did not think Number Two Road could handle more traffic. Mrs. Russ wanted to know what employment opportunities this development would bring. Mrs. Russ stated that the board should not recommend approval.

Chair St. Clair closed Public Comment for this item.

Mr. Huels addressed several points from the public's comments.

Board Member Wagler stated that Number Two Rd was a major concern and was dangerous. Board Member Wagler stated the Planning and Zoning Board and Town Council were in favor of restoring larger lot sizes for the Town.

Board Member Mulvany said that the Town Planner has told developers to look at lot sizes and to look at keeping traffic off of Number Two Rd. and developers have yet to come back with larger lots. Board Member Mulvany stated that 55' x 120' was an unacceptable size for a lot.

Vice-Chair Francis stated that his 1/4-acre lot was too small and 55' x 120' lot was also too small.

Mr. Wilkes explained that the property that the Board was reviewing was currently zoned as PUD and without an active Development Agreement the owners could not develop their land. Mr. Wilkes explained that there had to be a negotiated agreement between the Town and the landowner. Mr. Wilkes explained that the Town cannot refuse to give the landowners a Development Agreement, and that there needed to be a reasonable negotiation. The Planning and Zoning Board was tasked with making a recommendation to the Town Council.

Board Member Wagler asked if the applicant had secured wastewater rights yet. Mr. Huels stated that they had not yet, but that the Development Agreement would have a time frame to allow for them to secure the rights.

Board Member Yarckin stated that she liked the clubhouse and the trail head, but she only wanted to allow them to have 250 homes in the development.

Board Member Wagler made a motion that was seconded by Board Member Yarckin. Board Member Wagler moved that the Planning and Zoning Board recommend approval of Ordinance 2024-001 and the Village Mixed Use PUD for Mission Rise only if the proposed Development Agreement is modified to include:

1) 80% of the residential lots can be no smaller than 1/4 acre in size (10,890 sq feet) – the remainder of the lots can be 75' lots as proposed by the applicant.

2) Access to Number Two Rd can be constructed but cannot be open to access until Phases 1 and 2 have been completed and access to Number Two Rd shall be constructed and ready to open before a certificate of occupancy is issued for 50% of the lots in Phase 3.

3) The open space area between Phase 2 and Phase 3 shall be redesigned to eliminate the drainage ponds (as recommended in the Town Planner's staff report).

Board Member Hayes made a motion to amend the current motion to require 100% of all the residential lots to be 1/4 acre lots. There was no second to his motion to amend the standing motion, so the motion to amend died.

Motion made by Board Member Wagler; seconded by Board Member Yarckin. Board Member Wagler moved that the Planning and Zoning Board recommend approval of Ordinance 2024-001 and the Village Mixed Use PUD for Mission Rise only if the proposed Development Agreement is modified to include:

1) 80% of the residential lots can be no smaller than 1/4 acre in size (10,890 sq feet) – the remainder of the lots can be 75' lots as proposed by the applicant.

2) Access to Number Two Rd can be constructed but cannot be open to access until Phases 1 and 2 have been completed and access to Number Two Rd shall be constructed and ready to open before a certificate of occupancy is issued for 50% of the lots in Phase 3.

3) The open space area between Phase 2 and Phase 3 shall be redesigned to eliminate the drainage ponds (as recommended in the Town Planner's staff report).

Motion was approved by roll call vote.

Voting
Yea: Board Member Mulvany, Board Member Yarckin, Board Member Johnson, Board Member Wagler, Vice-Chair Francis III, Chair St. Clair
Nay: Board Member Hayes

3. Consideration and Recommendation: **Ordinance 2023-013 Comprehensive Plan Amendment - Future Land Use Element**

Town Planner, Tom Harowski, introduced and explained this item. Mr. Harowski reviewed his staff report with the Board. Town Attorney, Tom Wilkes, explained that this Ordinance would amend the Town Comprehensive Plan and would create limitations on future Town Councils.

Mr. Harowski said that, if you limit the lot size too much, the developers would not be able to create amenities to their developments.

Board Member Yarckin stated that she wanted a moratorium on all development within the Town until after the Town changes its Comprehensive Plan and LDC.

Chair St. Clair open Public Comment for this item only.

David Miles (Town Councilor), 500 E Camelia Way – Councilor Miles stated that three developers had already taken advantage of the Town. Those three developments were filled with affordable housing due to the small lot sizes. Councilor Miles stated that he had provided 12 pages of recommendations for amendments to the Comprehensive Plan and LDC. Councilor Miles submitted those recommendations in June of 2023. Councilor Miles had stated that many of the recommendations were designed to create larger setbacks.

Councilor Miles reminded everyone that the Talichet neighborhood had no amenities and narrow streets. Councilor Miles also stated that he wanted to get rid of PUDs in the Town.

Tim Everline, 1012 N. Lakeshore Blvd. – Mr. Everline stated that Mission Inn was not what it was, people do not like the small lots in Las Colinas and people cannot get tee times on the golf course because there are too many people living there. Mr. Everline stated he had met with a Talichet resident that told him that they didn't like cars parked on the street in their neighborhood.

David Miles (Town Councilor), 500 E Camelia Way – Councilor Miles stated he wanted a High Density Residential (HDR)-1 and a HDR-2 zoning category to be created. Councilor Miles wanted to know if the Planning and Zoning Board had received all of the Comprehensive Plan and Land Development Code (LDC) comments that the Town Councilors had created and submitted to Mr. Harowski. Many of the Planning and Zoning Board members stated that they had not and would like a copy of them.

Joshua Husemann, 671 Avila Pl. – Mr. Husemann suggested that the Town should create rules that only allow parking on one side of the road to make it easier for emergency vehicles to travel through the Town. Mr. Husemann was also concerned that, if the Town did not allow PUDs in the future, it would remove potential for new parks.

Greg Kiffer, 11348 Valley View Dr., Howey-in-the-Hills (unincorporated Lake County) – Mr. Kiffer stated that, with the size of homes these days, 1/4 of an acre lot may not be big enough.

Chair St. Clair closed Public Comment for this item.

Board Member Wagler reviewed Policy 1.2.6 and recommended striking the current version and rewriting it. After discussion by the Board, it was decided Policy 1.2.6 should be changed to the following:

Reorientation of Residential Densities*. The Town may allow lot sizes smaller than one-fourth acre (10,890 sq. ft.) only in the following locations: areas in or adjacent to the Town center (e.g., the Town central commercial district) and areas abutting major arterial road corridors such as state roads and county roads, not neighborhood roads with higher traffic counts and areas abutting commercial or industrial land uses. The Town shall require single family residential lots in all other areas to be one-fourth of an acre (10,890 sq. ft.) or larger.*

Motion made by Board Member Wagler to strike through the original Policy 1.2.6 and amend it to the above listed policy; seconded by Board Member Hayes. Motion approved unanimously by roll call vote.

Voting

NEW BUSINESS

None

PUBLIC COMMENTS

Any person wishing to address the Planning and Zoning Board and who is not on the agenda is asked to speak their name and address. Three (3) minutes is allocated per speaker.

David Miles (Town Councilor), 500 E Camelia Way – Councilor Miles thanked the Planning and Zoning Board for their hard work.

Janice McLain, 109 S Lakeshore Blvd - Mrs. McLain stated that there was a stop sign and a Do Not Enter sign posted before an alleyway in front of her house. Mrs. McLain stated that no one pays attention to the signs, and she wanted them removed. Sean O'Keefe, Town Manager, said that he would speak with Mrs. McLain after the meeting.

BOARD COMMENTS

Board Member Mulvany stated that he wanted the Board to discuss a letter that the Town had received from Lake County in reference to Number Two Road and he wanted it added to the next Board Meeting's agenda.

ADJOURNMENT

There being no further business to discuss, a motion was made by Board Member Yarckin to adjourn the meeting; Vice-Chair Francis III seconded the motion. Motion was approved unanimously by voice vote.

The Meeting adjourned at 9:12 p.m. | **Attendees: 38**

ORDINANCE NO. 2024 - 001

AN ORDINANCE OF THE TOWN OF HOWEY-IN-THE-HILLS, FLORIDA, PERTAINING TO LAND USE; REZONING FOUR PARCELS OF LAND LOCATED GENERALLY IN THE SOUTHWEST PART OF THE TOWN AND COMPRISING THE PROPOSED PLANNED UNIT DEVELOPMENT TO BE KNOWN AS "MISSION RISE" ON AN L-SHAPED AGGREGATE OF ABOUT 243.3 ACRES WEST AND SOUTH OF THE DEVELOPMENT KNOWN AS "THE RESERVE AT HOWEY-IN-THE-HILLS" (NOW ALSO KNOWN AS "HILLSIDE GROVES"), WITH PART OF THE LANDS BEING SOUTH OF NUMBER TWO ROAD AND EAST OF SILVERWOOD LANE AND OTHER PARTS OF THE LAND BEING WEST OF STATE ROAD 19 AND SOUTH OF REVELS ROAD, THE FOUR PARCELS BEING IDENTIFIED WITH LAKE COUNTY PROPERTY APPRAISER ALTERNATE KEY NUMBERS 1780616, 1780811, 1030421, AND 3835991; AMENDING THE TOWN'S ZONING MAP TO APPROVE PLANNED-UNIT-DEVELOPMENT (PUD) ZONING FOR THE PARCELS; PROVIDING FINDINGS OF THE TOWN COUNCIL; APPROVING PUD ZONING FOR THE PARCELS, WITH DEVELOPMENT TO BE GOVERNED BY A DEVELOPMENT AGREEMENT AND A REVISED CONCEPTUAL LAND USE PLAN AND BY THE TOWN'S LAND DEVELOPMENT CODE AND OTHER TOWN ORDINANCES GOVERNING THE DEVELOPMENT OF LAND; REPEALING PRIOR ORDINANCES AND SUPERSEDING CONFLICTING ORDINANCES; PROVIDING FOR SEVERABILITY, CODIFICATION AND AN EFFECTIVE DATE.

BE IT ORDAINED BY THE TOWN COUNCIL OF THE TOWN OF HOWEY-IN-THE-HILLS, FLORIDA:

Section 1. Findings. In enacting this ordinance, the Town Council of the Town of Howey-in-the-Hills, Florida declares the following findings, purposes, and intent:

A. Approximately 243.3 acres of land more specifically described in **Attachment A** and generally located in southwest Howey-in-the-Hills on an L-shaped group of lands west and south of the land development known as "The Reserve at Howey-in-the-Hills (now also known as "Hillside Groves"), with part of the subject lands being south of No. 2 Road and east of Silverwood Lane and other parts of the

subject lands being west of State Road 19 and south of Revels Road (**Property**), are currently designated on the Future Land Use Map of the Town's Comprehensive land for Village Mixed Use. Planned Unit Development (**PUD**) zoning is required to develop land designated for Village Mixed Use.

B. The current PUD zoning was approved by Town Council through the enactment of Ordinances 2005-353, 2005-354, 2005-355, 2005-356, and 2005-357 and by that certain Mission Rise Developer's Agreement between the Town and the then-owners, Richard H. Langley and Roxbury Ventures, LLC, dated February 6, 2007. No development occurred on the Property under those 2005 ordinances and the 2007 development agreement. The current PUD zoning and the 2007 development agreement have both expired under the terms of the development agreement.

C. The owners of the Property have applied for PUD zoning to develop the Property with a mix of single-family residential, institutional, and recreational land uses in a Planned Unit Development to be known as "Mission Rise." The Owners have requested Town Council approval of the PUD zoning subject to a new Development Agreement in the form in **Attachment B**, including its conceptual land use plan for the Property.

D. The Town Council has determined that approval of the PUD zoning on the Property as requested by the owners and subject to the requirements and restrictions of the Development Agreement would be consistent with the Town's Comprehensive Plan and the Town's Land Development Code (**LDC**) and will not adversely affect the public health, safety, and welfare of the Town.

Section 2. Amendment of the Official Zoning Map. The Town Council hereby approves the PUD – planned unit development zoning for the Property. Development and use of the Property under its PUD zoning is subject to the conditions, requirements, restrictions, and other terms of the following:

A. This Ordinance 2024-001. Ordinances 2005-353, 2005-354, 2005-355, 2005-356, and 2005-357 are repealed.

B. The Development Agreement for Mission Rise PUD between the Town and ASF TAP FL I, LLC (**Owner**). The Development Agreement is approved for execution and delivery by the Mayor and Town Clerk in the form and substance contained in Attachment B, subject to such changes, if any, approved by Town Council. The Mission Rise Developer's Agreement dated February 6, 2007, is

rescinded and superseded in its entirety by the Development Agreement approved hereby.

C. The Town's Land Development Code.

D. All other Town ordinances governing the development of land.

Section 3. Severability. If any part of this ordinance is declared by a court of competent jurisdiction to be void, unconstitutional, or unenforceable, the remaining parts of this ordinance shall remain in full effect. To that end, this ordinance is declared to be severable.

Section 4. Conflicts. In a conflict between this ordinance and other existing ordinances, this ordinance shall control and supersede.

Section 5. Codification. The PUD zoning for the Property, as approved in Section 2, may be codified and made part of the Town's Official Zoning Map.

Section 6. Effective Date. This ordinance shall take effect upon the later of (i) its enactment by the Town Council or (ii) the date on which the Development Agreement in Attachment B takes effect.

ORDAINED AND ENACTED this ____ day of _____, 2024, by the Town Council of the Town of Howey-in-the-Hills, Florida.

MISSION RISE PUD
DEVELOPMENT AGREEMENT

This **MISSION RISE PUD DEVELOPMENT AGREEMENT** ("Agreement") is made as of the _____ day of _____, 2023 ("Effective Date"), between the **Town of Howey-in-the-Hills**, Florida, a Florida municipal corporation (the "Town"), and **ASF TAP FL I, LLC,** a Delaware limited liability company (the "Owner").

RECITALS

A. The Owner owns approximately 243 acres of property more particularly described in Attachment A to this Agreement ("the Property").

B. The Property is within the corporate limits of the Town. The Town has assigned the Property a future-land-use designation of Village Mixed Use. To be developed the Property must be zoned PUD - Planned Unit Development.

C. The Property was zoned PUD in or about 2010, but the PUD zoning and its related development agreement expired.

D. The Owner intends to develop and use the Property as a mixed-use planned development consisting of single-family residential, civic and public uses more specifically set forth herein ("the Project"), to be known as the "Mission Rise PUD."

E. In connection with the Owner's request for Village Mixed Use PUD zoning, the Town and the Owner now enter into this Agreement to set forth the terms and conditions of approval negotiated between them for the development and use of the Property as the Mission Rise PUD.

NOW, THEREFORE, the Town and the Owner agree as follows:

Section 1. Land development and uses. Development and use of the Property is subject to the following conditions, requirements, restrictions, and terms:

(a) **General**. Development of the Project and use of the Property shall be governed by this Agreement, the Town's Comprehensive Plan, the Town's Land Development Code ("LDC") and Code of Ordinances ("Town Code"), and all other applicable state laws and regulations and Town ordinances and rules.

Unless otherwise noted, the definition of terms in this Agreement shall be the same as the definitions set forth in the LDC. Where in conflict, the terms of this Agreement shall supersede and prevail over the LDC and Town Code, but only to the extent of the conflict.

The Conceptual Land Use Plan, or Conceptual Plan, is contained in Attachment B to this Agreement and consists of seven pages of the following graphics:

i. Conceptual Plan;

ii. Phasing Plan;

iii. Parks, Trails & Open Space Plan;

iv. Non-Residential Areas;

v. Buffer Typicals;

vi. Street Cross Sections; and

vii. Lot Fit.

In the Conceptual Land Use Plan for the Project the term "conceptual" means the location of land uses on the site, including areas for residential development, open space, stormwater management, parks, and roads in relation to the site area and other uses on the site. Subsequent plan development may refine the details based on detailed engineering design. "Conceptual" does not mean or contemplate the modification of proposed housing types or the relocation of land uses and roads other than minor adjustments dictated by engineering needs and best practices.

(b) **Phasing**. The Project will be developed in three phases, as shown on the Conceptual Land Use Plan or "Conceptual Plan" in Attachment B to this Agreement. Each phase must be designed and built to operate independently with all necessary public services and utilities infrastructure, including roads, multimodal trails, and master stormwater systems, consistent with Conceptual Land Use Plan. Building permits for residential units in Phase 2 will not be issued until permits for residential units have been issued for Phase 1. Building permits for residential units in Phase 3 will not be issued until permits for residential units have been issued for Phase 2. Revisions to the phasing schedule shall be considered as minor amendments to this Agreement that may be approved by Town Council with no formal amendment to this Agreement required.

(c) **Purpose**. The purpose of the Mission Rise PUD is to:

1. Create an attractive and high-quality single-family housing development compatible with the scale and character of existing residential development and land uses in the Town;
2. Develop a residential area that is safe, comfortable and attractive for and to pedestrians;

3. Create a community with direct visual and physical access to open land, with a strong community identity, and with amenities in the form of community open space;
4. Provide a network of open space for future homeowners; and
5. Provide a variety of lot sizes and housing choices for diverse age and income groups and residential preferences.

(d) **Land uses**. The Conceptual Land Use Plan for the Project in Attachment B is an integral part of the approval of the Project. Elements in the Concept Plan include single-family detached homes, civic uses, multimodal trails and approximately 90 [??] acres of open space. No manufactured or modular homes are allowed. Uses that would be prohibited under the LDC for SFR, MDR-1, or MDR-2 zoning are likewise prohibited in residential areas of the Project.

(e) **Development standards**.

Lot Size
A range of lot sizes shall be provided in order to create variety and offer opportunity for different income households. Minimum lot size will be 55' x 120'. The Project may consist of up to 499 total single-family residential detached lots of 55' x 120' and 75' x 120'.

Setbacks
The setbacks for single family residential lots shall be as follows:

Front:	20 feet / 15 feet (w/ recessed garage)
Rear:	25 feet
Side:	7.5 feet
Corner:	12.5 feet
Pool / Accessory	10 feet

Dwelling Size
The minimum dwelling size for all single-family residences shall be 1,400 square feet of heated/air-conditioned space under roof plus a two-car garage with a minimum of 400 square feet. Maximum dwelling size shall be 4,600 square feet of heated/air-conditioned space under roof.

Lot Width
The minimum lot width at building line shall be 55 feet for 55-foot wide lots and 75 feet for 75-foot wide lots, with a minimum street frontage for all lots of 30 feet.

Lot Coverage
Lots may have a maximum lot coverage of 60%, to include principal dwelling, all paved areas, and swimming pools.

Height of Structures
No residential structure may exceed 35 feet in height.

Building Design
If and to the extent not inconsistent with Florida law, building design shall be in accordance with the Architectural Requirements of the Town's LDC and will comply specifically with the design requirements of LDC Sections 4.06.02 and 4.06.03.

The following principles seek to promote a high-quality development that will create a sense of place and community through the development of the site.

- If and to the extent not inconsistent with Florida law, housing styles, shapes and materials shall meet the Towns Land Development Regulations.
- The different housing types shall be integrated architecturally in order to give the development a harmonious appearance.
- The creation of visual richness shall be considered when choosing materials and details. Local characteristics are encouraged.
- Side entrances for garages are encouraged.
- A variety of roof heights, pitches and materials are encouraged.
- Landscaping shall be incorporated into the overall design as a means of linking the development areas with the open spaces.
- Each exterior wall for a single-family home must be a minimum of two materials and a minimum of two colors. Primary facades must have one base color and a complementary wall material may be used to meet the second color requirement.
- Block face restrictions may be reduced to 300 linear feet. The same house model may not be used more than three times within a single block face. For purposes of this requirement, a different house model is a different floor plan, not the same floor plan flipped in a different direction and not the same floor plan with a different exterior treatment.

(f) **Wetlands**. Impacts to wetlands, if any, and wetland buffering shall be subject to the Town's Land Development Regulations, as well as St. Johns River Water Management District regulations.

(g) **Potable water, wastewater, and reclaimed water**. For potable water and wastewater service, well and septic systems are not allowed. The Project must be connected to and served by the Town's potable-water and wastewater systems prior to a certificate of occupancy being issued for a structure in the Project (except temporary construction uses).

Except as may be set forth otherwise in this Agreement, the Owner must install all on-site potable-water, wastewater, and reclaimed-water infrastructure and connect to central water and wastewater systems, and to the Town's reclaimed-water system when available at the Property boundary, all at no cost to the Town. The Owner must pay potable-water, wastewater, and reclaimed-water capital and connection charges, impact fees, and other Town rates, fees, and charges, either applicable currently or in the future.

1. *Potable Water*. The Town will provide potable water, and may in the future provide reclaimed water, to the Project in accordance with its applicable ordinances, resolutions, operating regulations, policies and procedures. The Town will provide potable water to the Property in sufficient quantities for development of the Project as contemplated herein,

subject to the limitations and requirements of permits issued to the Town from time to time by the St. John's River Water Management District in connection with water consumption.

The Owner shall construct, at no expense to the Town, all off-site potable-water-system facilities, lines, pumps, valves, control structures, and appurtenances (other than water-treatment plants) necessary to serve the Project. The construction and route of off-site lines and other structures shall be done according to engineering plans prepared by the Owner and approved by the Town Manager. Potable water shall not be used for irrigation.

2. *Wastewater*. The Town will provide wastewater-collection and transmission service to the Project, transmitting Project wastewater either to the Central Lake Community Development District ("CDD") or to another wastewater utility service provider of the Town's choosing with available capacity to treat and dispose the Project's wastewater ("Wastewater Utility"). The Owner must obtain from the CDD or Wastewater Utility a contract right for the Project to receive treatment and disposal of its wastewater at such provider's treatment and disposal facilities.

The Owner shall construct, at no expense to the Town, all off-site wastewater-system transmission and disposal facilities, lines, lift stations, pumps, valves, control structures, and appurtenances (other than wastewater-treatment plants) necessary to serve the Project. The construction and route of off-site lines, lift stations, pumps, and other structures shall be done according to engineering plans prepared by the Owner and approved by the Town Manager.

3. *Town Option to Oversize Water and Wastewater Lines*. In its review and processing of the preliminary subdivision plans for each phase of the Project, the Town may elect to oversize the off-site lines, pumps, improvements, or other facilities or appurtenances for the Town's water or wastewater system, or for both, necessary to serve such phase. If the Town elects to oversize one or both systems, it must inform the Owner in writing of the specifications for the oversizing(s) prior to or as part of the Town's first round of review comments on the preliminary subdivision plan application. The Town shall reimburse the Owner for the difference in the increase in cost of design, materials and construction to oversize the improvements based on plans and cost estimates provided by the Owner to the Town and approved by the Town Manager, which approval shall not be unreasonably withheld, conditioned or delayed. The Town shall reimburse the Owners for the difference in the costs within 60 days following (i) completion of the improvements and (ii) receipt by the Town of documentation reasonably demonstrating that the Owner has completed the work and has incurred the costs attributable to the over-sizing, all in keeping with the plans and cost estimate previously approved by the Town Manager.

4. *Permit-Induced Costs, Restrictions, Requirements, and Risks.* Under state and federal laws and regulations, the Town may provide its potable-water and wastewater services to the Property and the Owner and its successors only if the Town first has been issued certain required permits. The Owner acknowledges that the permits are inevitably conditioned with requirements and restrictions that typically impose costs and risks. The Owner further acknowledges that, for the Town to operate its potable-water and wastewater systems in an orderly, dependable, and cost-effective manner, the Town must have the ability legally to spread the costs and risks among customers and property owners benefiting from the services. The

Owner acknowledges, therefore, that (i) from time to time the Town may impose rates, fees, and charges and may issue potable-water system and wastewater-system regulations and policies that impose restrictions and requirements on its customers and benefiting property owners, such as the Owner and it successors, and (ii) so long as the Owner or successors are required to pay only their fair share for such rates, fees, and charges, then the imposition of such rates, fees, and charges and the issuance of such system regulations are not prohibited by or otherwise a breach of this Agreement.

5. *Reclaimed Water*. The Owner must install reclaimed water lines, both on-site and off-site as directed by the Town and as required by the Town's Code of Ordinances. Until such time as reclaimed water is available to the Property the Owner and its successors shall use the reclaimed water lines to irrigate properties within the Project boundaries, but only with stormwater from on-site stormwater-retention ponds or with sources other than potable water as may be approved by the Town and St. John's River Water Management District. Except for installation of reclaimed lines at the time of development as noted above, connection to reclaimed water after the development of the Project may not result in additional costs to the Owner or developer.

(h) **Solid Waste**. Solid Waste collection shall be pursuant to Town regulations.

(i) **Drainage**. The maintenance, repair, and replacement of the drainage system shall be the responsibility of the homeowners association(s).

(j) **Transportation**

1. Roadways

A. The Project must have a connected street system that serves vehicles, pedestrians and bicycles and that connects to recreation facilities and adjacent residential/community areas.

B. There must be ingress and egress points at Revels Road, County Number Two Road and Orange Blossom Road in the approximate location shown on the Conceptual Land Use Plan.

C. The access at County Road Number Two must be a full intersection, with dedication of right-of-way sufficient for both (i) construction of turn lanes and (ii) reconstruction of No. 2 Road lanes along the Project frontage with 12-foot travel lanes, 4-foot curb lanes, and 2-foot curb and gutter. Otherwise, design of the No. 2 Road improvements are subject to review and approval by Lake County.

D. Ingress and egress points at the western and eastern boundaries of the Property must also be provided, as shown on the Conceptual Land Use Plan. On the west the Project internal roads must connect to Silverwood Lane. On the east the internal roads must connect to Road DD shown on the Master Site Plan for The Reserve at Howey-in-the-Hills PUD that is to be stubbed to the boundary of the Property. If for whatever reason the internal roads

cannot be connected by the Owner to Silverwood Lane on the west or to Road DD in The Reserve on the east, the Owner must stub the Project roads to the Property boundary for future connection.

E. Revels Road and the north-south Spine Road must be constructed in phases consistent with the phasing plan shown on the Conceptual Land Use Plan. Revels Road and the Spine Road must be public, dedicated to and maintained by the Town. Revels Road and the Spine Road must have a minimum 90-foot right-of-way, 2-foot curb and gutter, and a minimum 32-foot-wide pavement with minimum 12-foot travel lanes and 4-foot curb lanes.

F. All other internal neighborhood roads must have a minimum 50-foot right-of-way, curb and gutter, and a minimum 24-foot-wide pavement with minimum 12-foot travel lanes, which may be reduced to 11-foot travel lanes when adjacent to on-street parking. All alley roads must have a minimum 22-foot right-of-way, curb and gutter, and a minimum 20-foot-wide pavement. Provision must be made in the rights-of-way for underground utilities.

2. Sidewalks and trails.

All portions of the development must be accessible by a direct, convenient, attractive, safe, and comfortable system of pedestrian facilities. The development must provide appropriate pedestrian amenities. A multimodal trail with minimum width of twelve feet must be constructed within each phase of the Project consistent with Conceptual Land Use Plan and the Town's bicycle/pedestrian plan. The multimodal trail and all sidewalks within rights-of-way must be dedicated to and will be maintained by the Town.

2. Intersection Improvements in Lieu of Proportionate Fair Share Mitigation

The Owner has offered, and the Town accepts the Owner's offer , (i) to undertake and complete at no cost to the Town the reconstruction of the intersection at Revels Road and State Road 19 as a roundabout facility, in return for (ii) the Town waiving its customary transportation-concurrency review and a proportionate fair-share payment by the Owner. The intersection and its design are subject to required approval and permits from the Florida Department of Transportation (FDOT).

The intersection construction must be complete before the issuance of the 51st residential building permit in Phase 2 of the Project.

If the Owner cannot obtain required state permits for an intersection roundabout, the Owner shall undertake and complete construction of the intersection with a traffic signal if allowed by FDOT. For either intersection type both Revels Road and State Road 19 must be constructed in the intersection as four-lane roads.

If the Owner obtains the required state permits for the roundabout intersection or, alternatively, the signalized intersection, the Town will be deemed to have waived its

transportation-concurrency review. If the Owner cannot obtain required state permits for reconstruction of the intersection in either configuration, the Project must undergo transportation-concurrency review. The Owner must complete and submit for review prior to final development order a traffic-impact analysis.

If the results of the traffic-impact analysis require any mitigation for traffic generation, the Town and the Owner will work together and with any other applicable jurisdiction as required by applicable law to address such mitigation requirements through Owner's funding of its proportionate fair share of traffic improvements. Payment of the Owner's fair share must be made in pro-rata amounts upon the issuance of each building permit.

(k) **Schools**. The Project must apply for concurrency review at Lake County Public Schools. The school district has a specific application process. The Project must be shown to have appropriate school concurrency before building permits are issued.

(l) **Landscaping Requirements**. All landscaping and buffer requirements shall be in accordance with the LDC and as illustrated on the Conceptual Land Use Plan with the exception of the following:

1. All buffer, street, and canopy trees planted at the Project will be a minimum of a 2" caliper;
2. the Owner shall require homebuilders to plant at least one canopy tree for each single-family lot of at least 3" DBH; and
3. the developer will replace the equivalent of 30% of total tree-inches removed.

All trees planted at the Project shall adhere to the current guidelines established by the Florida Grades and Standards for nursery-grown trees and must be Florida grade #1 or better.

Developer must install street trees along each roadway where a common areaabuts the road as required by the LDC.

(m) **Tree Protection**. Under no circumstances may any tree, regardless of size or species, be removed from any designated wetland or conservation easement. Trees proposed to be maintained on-site must comply with LDC requirements. No construction activity, equipment or material is permitted inside a tree protection barrier.

(n) **Lighting**. Decorative street lighting (Sanibel fixture, a Duke Energy standard fixture) must be installed (i) at every intersection, (ii) at the end of each cul-de-sac, and (iii) at intervals of 300 feet or as approved otherwise by the Town Manager. Street lighting must be installed by the Owner. All lighting must be directional, shielded lighting designed to minimize light pollution. All lighting must be maintained by the HOA.

(o) **Utilities**. All utilities must be underground.

(p) **Signage**. Entrance signs and informational signage may be located in buffers, setbacks/and or signage easements as approved by the Planning and Zoning Board. Unless stated otherwise in this Agreement all signage must comply with requirements and restrictions in the

LDC. The Owner shall present a sign plan for review and approval by the Planning and Zoning Board with the final site plan for each phase of the Project.

The Owner and/or builder(s) may erect temporary vertical marketing flags, also known as feather banners, with the following stipulations:

1. Feather banners must be placed no less than 200 feet apart.
2. A maximum of 10 feather banners, in total.
3. Feather banners cannot be placed within the right of way.
4. Feather banners cannot be located offsite of PUD property.
5. Feather banners cannot exceed 12 feet in height.
6. Feather banners must be replaced or removed if they become faded, torn, or tattered.
7. Feather banners must be removed when 90% of the homes in the development have received building permit approval.

Billboards and pole signs are prohibited. Unless defined differently in the LDC, a pole sign is a permanent sign supported by at least one upright pole, pylon, or post secured to the ground, with the bottom of the sign face four feet or higher above the finished grade.

(q) **Maintenance of Common Areas**. Maintenance of each common area within the Project is the responsibility of the homeowners' association(s) for the affected subdivision.

(r) **Parks, Trails, and Open Spaces.** Each phase of the Project must include (i) the recreation and civic facilities for the phase and (ii) an integrated bicycle network that ties into the bicycle facilities in The Reserve PUD so as to loop the system to connect cyclists from both developments. Structures, facilities, and other improvements to be constructed and installed at the sites designated on the Conceptual Land Use Plan as parks, trails and open spaces must be included for review and approval as part of the final site plan approval for each phase or subdivision of each phase. Plans submitted must be in sufficient detail to provide reasonable understanding and certainty of the improvements, facilities, and uses to be made at each such site..

Section 2. Amendments. Amendments to the Conceptual Land Use Plan that occur after the effective date of this Agreement shall take effect only if and when approved by the Town Council or Town staff as applicable. Major amendments include material changes such as:

- changes to the location of individual land uses;
- any increase in the total number of residential units; and
- relocation and realignment of roads and routes for pedestrian and bicycle facilities.

Major amendments take effect only if approved by the Town Council in the manner required by law or otherwise as determined by Town Council, which may include public notice(s) and hearing(s).

Minor amendments shall include lesser changes such as:

- minor adjustments of roads, trails and pedestrian ways based on more detailed site-specific data;
- modifications to the phasing schedule;
- adjustments to utility locations based on more detailed engineering data; or
- adjustments to parks and open space based on more detailed subdivision design.

Minor amendments may be approved by the Town Manager without referral to the Planning and Zoning Board or Town Council. Whether a proposed amendment is major or minor will be determined by the Town Manager. Minor amendments to the Conceptual Land Use Plan shall be deemed incorporated into this Agreement and shall modify or replace the Conceptual Land Use Plan in Attachment B to the extent of such amendment to the Conceptual Land Use Plan, without the necessity for an amendment to this Agreement.

Section 3. Notices. All notices or payments required to be made hereunder shall be made at the following addresses:

To Town:	Sean O'Keefe, Town Manager Town of Howey-in-the-Hills 101 North Palm Avenue Howey-in-the-Hills, FL 34737 sokeefe@howey.org
With copies to:	John Brock, CMC, Town Clerk Town of Howey-in-the-Hills 101 North Palm Avenue Howey-in-the-Hills, FL 34737 jbrock@howey.org Thomas J. Wilkes, Town Attorney Gray Robinson, P.A. 301 East Pine Street, Suite 1400 Orlando, FL 32801 twilkes@gray-robinson.com

Section 4. Severability. If any provision or portion of this Agreement is declared by a court of competent jurisdiction to be void, unconstitutional, or unenforceable, then all remaining provisions and portions of this Agreement shall remain in full force and effect. To that end, this Agreement is declared to be severable.

Section 5. Binding Effect. This Agreement runs with the land and is binding on and enforceable by and against the parties hereto and all their successors in interest. However, no Lot Owner shall have the obligations imposed on the Owner as the developer of the Project under this Agreement. For that purpose, a "Lot Owner" means an end-user of a lot created within the Property with a completed residential unit constructed thereon, for which a certificate of occupancy has been issued. Each party covenants to each other party that this Agreement is a legal, valid, and binding agreement, enforceable against the party in accordance with its terms.

Section 6. Negotiated Agreement. The land uses, densities, intensities, and other conditions of approval of the Project have been negotiated and agreed to by the Owner and the Town. The Conceptual Land Use Plan and this Agreement together constitute an agreement between the parties with the knowledge that the Owner's successors in title, the future homeowners, and other landowners within the Property, as well as the Town and its affected property owners and residents, all will rely justifiably on the agreed-to land uses, densities, and intensities authorized hereby for the Property. For that reason, the Owner and the Owner's successors in interest have the contract right to develop the PUD with the uses, densities, and intensities approved by the Town, subject to the restrictions and requirements in the conditions of approval set forth in this Agreement. Neither the Owner (and its successors in interest) nor the Town shall have the right in the future to rezone or downzone the property, or otherwise alter the uses, densities and intensities, or delete, waive or amend any conditions of approval except through an amendment to the Plan negotiated and approved by the Town Council and the owner or owners of the then-

subject parcel or parcels. This section shall survive the termination and expiration of this Agreement.

Section 7. Homeowners' Association(s).

(a) **Association Responsibilities**. A homeowner's association and/or a property owner's association ("HOA") must be created by the Owner. Membership in the HOA shall be mandatory for all property owners within the Project. The HOA, not the Town, must maintain, repair, and replace all parks, open-space and buffer areas, streetlights, stormwater-management areas and drainage systems, entrance features, boundary walls and/or fences, access tracts, and landscaped tracts within the Project. The Town may opt, however, to undertake any such project of maintenance, repair, and replacement of those structures, facilities and systems. If the Town exercises its option, it may charge or assess either the HOA or its homeowners and property owners to recover the cost of the project.

(b) **Requirement for Plat Recording**. Before a plat may be recorded for the Property and the Project, the Owner shall furnish to the Town copies of the pertinent documents for the homeowners' or property owners' association or associations, which documents must contain the covenants, conditions and restrictions for the Property and must set forth the requirements and restrictions imposed on the HOA and its homeowners and property owners as enumerated in this section 7 and other applicable parts of this Agreement.

Section 8. Additional Requirements.

(a) **Letter of credit**. Construction and dedication to the Town of the public facilities and improvements required under this Agreement and the LDC for each phase of the Project is a condition precedent to final plat approval for such phase. In lieu of construction and dedication, however, the Owner may post a letter of credit or performance bond with the Town for 125% of the cost of such improvements not completed at the time of plat, in which event this condition precedent to final plat approval (but not the requirement to complete construction and to dedicate the public facilities and improvements required under this Agreement and the LDC) will be deemed satisfied.

(b) **Conveyances to the Town**. Property dedicated or otherwise conveyed to the Town under this Agreement must be free and clear of encumbrances unless and to the extent an encumbrance is acceptable to the Town. Encumbrances discovered after the Effective Date of this Agreement must be removed or resolved by the Owner or its successor developer prior to dedication or conveyance of the affected property to the Town.

(c) **Changes in status of land**. Until completion of the Project, the Owner or its successor developer of the Project has a continuing duty (i) to disclose promptly to the Town all changes in ownership, encumbrances, and other matters of record affecting the Property and (ii) to resolve all issues, title or otherwise, that may be identified by the Town as a result of such changes. Failure to disclose such changes or to resolve resulting issues may result in delay in issuance of building and other development permits.

(d) **Developer representations binding**. If at Town Council hearings on the approval of the Project the Owner makes a written or oral promise or representation, and if the

promise or representation was relied upon by Town Council in approving the Project or otherwise acted to induce or materially influence Town Council in its vote to approve the Project, the promise or representation is a condition of approval of the Project. The promise or representation is binding on the Owner and its successors and enforceable by the Town against the Owner and its successors as if set forth fully in this Agreement.

Section 9. Governing Law. This Agreement shall be governed by the laws of the State of Florida. Venue for any judicial proceeding pertaining to the Agreement shall be in the Fifth Judicial Circuit of Florida, in Lake County, Florida.

Section 10. Effective Date; Termination.

(a) **Effective Date**. This Agreement shall take effect upon the Effective Date above, or on the date when it has been executed by both the Town Council and the Owner, whichever is later.

(b) **Termination**. This Agreement shall remain in effect unless and until terminated under one of the following conditions:

1. If as of the second anniversary of the Effective Date of this Agreement an Owner's contract right to treatment and disposal services by the CDD or Wastewater Utility, as required under Section 1(g) above, has not taken effect, the Town may terminate this Agreement by vote of its Town Council. The vote must occur no later than (i) the third anniversary of the Effective Date or (ii) the CDD or Wastewater Utility Contract Date, whichever occurs first. The "Contract Date" is the date on which the Owner's contract right to treatment and disposal services by the CDD or Wastewater Utility takes effect.

2. If as of the second anniversary of the Contract Date no building permit for a residential unit in the Project has been issued, the Town may terminate this Agreement by vote of its Town Council. The vote must occur no later than (i) the third anniversary of the Contract Date or (ii) the date a building permit is issued, whichever occurs first.

3. If as of the fifth anniversary of the Contract Date no building permit for a residential unit in the second phase of the Project has been issued, the Town may terminate this Agreement by vote of its Town Council, but only as it applies to development of the second phase. The vote must occur no later than (i) the sixth anniversary of the Contract Date or (ii) the date a building permit is issued for a residential unit in the second phase, whichever occurs first. Termination of the Agreement for this reason will not act to preclude the Owner or its successor from completing the first phase of the Project.

4. If as of the tenth anniversary of the Contract Date no building permit for a residential unit in the third phase of the Project has been issued, the Town may terminate this Agreement by vote of its Town Council, but only as it applies to development of the third phase. The vote must occur no later than (i) the eleventh anniversary of the Contract Date or (ii) the date a building permit is issued for a residential unit in the third phase, whichever occurs first. Termination of the Agreement for this reason will not act to preclude the Owner or its successor from completing the first or second phase of the Project.

Termination of this Agreement, in whole or in part, under this section shall be without prejudice to the Owner or its successor to apply for Town approvals to undertake or continue development of the Property in light of the circumstances and subject to the land-development regulations then existing in the Town.

Section 11. Recording. This Agreement shall be recorded by the Town, at the Owner's expense, in the Public Records of Lake County, Florida, and shall constitute a covenant running with the land.

Section 12. Authority. This Agreement is entered into by the Town under the home-rule powers granted to it by the Florida constitution (including specifically Article VIII, Section 2(b) thereof), the home-rule powers granted municipalities by statute (including specifically Chapter 166, Florida Statutes), and the Town's Charter. This Agreement does not constitute a "development agreement" under the Florida Local Government Development Agreement Act.

Section 13. Entire Agreement. This Agreement constitutes the entire agreement of the parties with respect to the transactions contemplated herein. It supersedes all prior understandings or agreements between the parties relating to the Property and the Project. No amendment to the terms of this Agreement shall be effective unless in writing signed by all parties hereto. Amendments to this Agreement will take effect and will be binding against the Town only if approved by a vote of the Town Council.

Section 14. Waiver. The failure of a party hereto to insist upon or enforce any right or privilege granted hereunder shall not constitute or operate as a waiver thereof and nothing shall constitute a waiver of any party's right to insist upon strict compliance with the terms hereof. However, any party may waive in writing the benefit of any provision or condition for its benefit which is contained herein. Waivers of material provisions of either this Agreement or the Town's LDC will be valid and binding against the Town only if approved by a vote of the Town Council.

[Signature pages follow]

IN WITNESS WHEREOF, the parties are signing this Agreement as of the Effective Date or, if later, the date by which both parties have fully executed this Agreement.

The plan is conceptual in nature. Final densities, layout, development parameters, calculations, and site conditions may change upon further development of the Preliminary and/or Master Site Plan, and upon evaluation of topographic survey, water management and existing historic and specimen trees to remain.

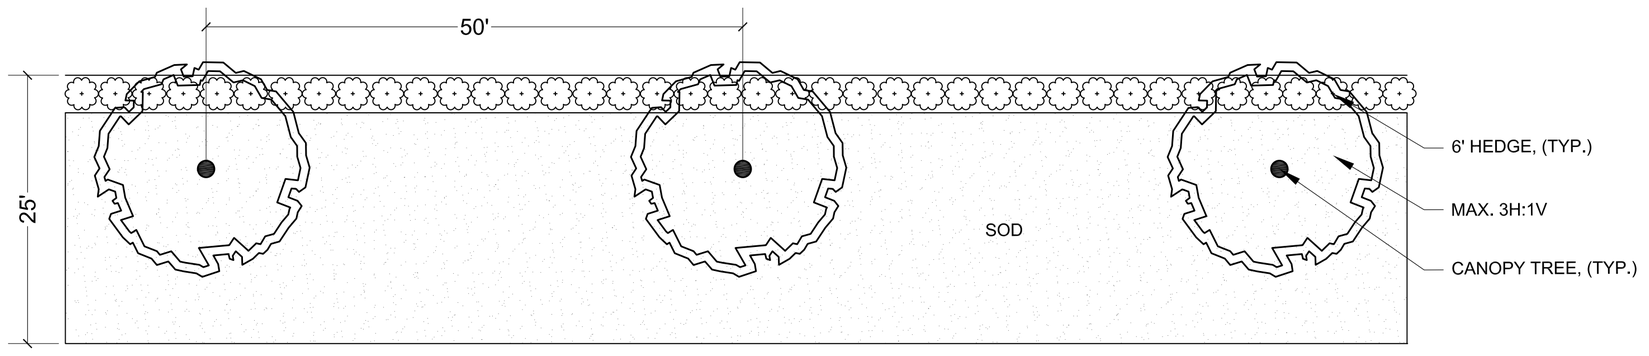
RESIDENTIAL BUFFERS

25’ LANDSCAPE BUFFER, TYPICAL

A landscaped berm with a total depth of at least 25 feet and no steeper than 3H:1V. The berm shall be at least three feet (3’) in height and the berm together with the landscaping, shall comprise a continuous screen of at least 5 and one half feet (5.5’) at time of planting and six feet (6’) within one year of planting. Canopy trees shall also be planted every 50 feet along the berm.

For single family subdivisions, these buffers shall be on common property and dedicated to the homeowners’ association for ownership and maintenance responsibilities.

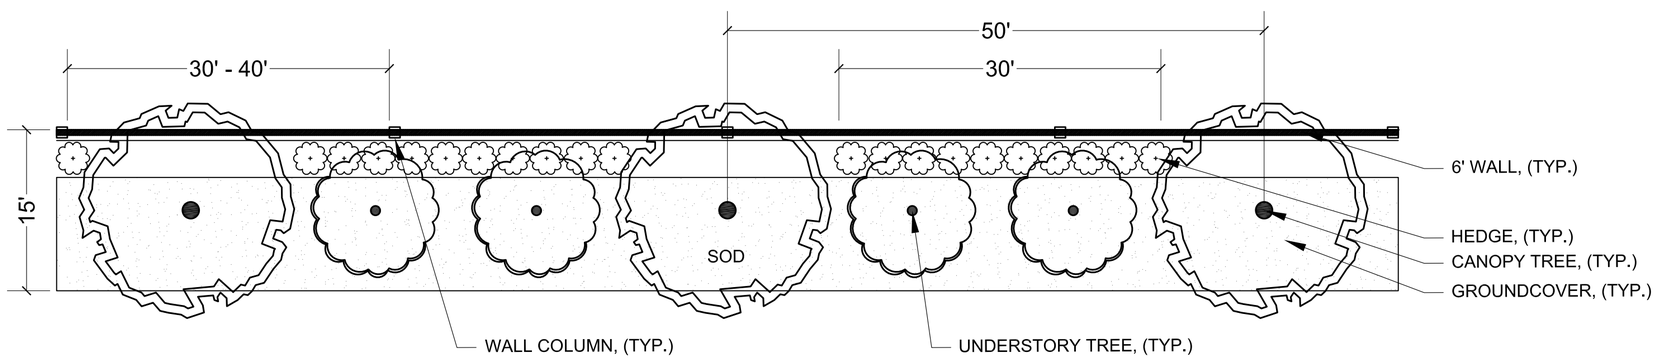


15’ LANDSCAPE BUFFER, TYPICAL

A landscaped wall buffer with a minimum depth of 15 feet. The wall shall maintain a height of six feet (6’) from grade on highest side and all walls shall have a decorative exterior (no exposed block). Acceptable materials for wall faces are brick, stucco or stone or a combination of those materials. Wall columns shall have a maximum spacing of thirty feet (30’) on walls up to two hundred feet (200’) in length and forty feet (40’) on walls more than two hundred feet (200’) in length. Wall columns may extend up to two feet (2’) above the height of the wall.

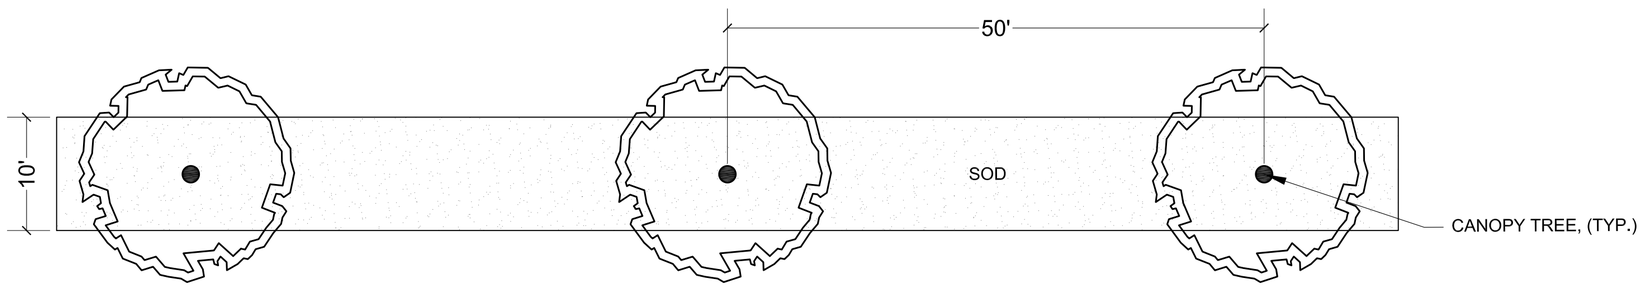
Within each fifty-foot (50’) increment along the wall, two (2) canopy trees, two (2) understory trees, and 30 linear feet of shrubs shall be planted. The trees shall not be closer than five feet (5’) to a walk or wall. The shrubs shall be at least 30” in height at time of planting.

For single family subdivisions, these buffers shall be on common property and dedicated to the homeowners’ association for ownership and maintenance responsibilities.



10’ LANDSCAPE BUFFER, TYPICAL

Ten-foot-wide (10’) landscaped buffer with trees spaced no more than 50 feet on center.



NON-RESIDENTIAL BUFFERS

15’ LANDSCAPE BUFFER, TYPICAL

The landscaped buffer shall contain at least one (1) canopy tree, two understory trees and 30 linear feet of shrubs and ground cover for each 50 linear feet of buffer. Canopy tress shall be located no less than five feet (5’) and no more than eight feet (8’) from sidewalks and other walkways in order to provide shade while minimizing conflicts between tree roots and sidewalks. Similarly, canopy trees shall be used to shade parking areas that adjoin buffers. Understory trees may be planted in groupings and palms may be planted in place of understory trees when clustered in groupings of three or more trees.

EXECUTIVE SUMMARY

Project Information

Name:	Mission Rise
Location:	West of SR 19 (South Palm Avenue), east of Silverwood Lane, and south of Number 2 Road in the Town of Howey-in-the-Hills, Lake County, Florida
Description:	499 Single Family Residential Units
Access Plan:	One (1) full access at the intersection of Number 2 Road and Spine Road One (1) full access at the intersection of SR 19 and Revels Road One (1) full access at the intersection of Revels Road and Orange Blossom Road (expected to carry limited traffic)

Findings

Trip Generation:	4,428 Daily Trips / 322 AM Peak Hour Trips / 451 PM Peak Hour Trips
Roadway Capacity:	The segments of SR 19, from Lane Park Road to Central Avenue and from CR 455 to CR 478 are projected to operate over their capacities at the project buildout.
Intersection Capacity:	The intersections of SR 19 and CR 48, SR 19 and Central Avenue, SR 19 and Revels Road, and SR 19 and CR 455 are projected to experience delays in the buildout condition. The project does not have a significant impact on the intersections.

Recommendations

Intersection Improvements:	Retime the signal or construct a roundabout at the intersections of SR 19 and CR 48 to maintain LOS standards. Provide traffic signals on SR 19 at Central Avenue, Revels Road, and CR 455 to maintain LOS standards. A signal warrant analysis is recommended and should be provided in separate reports. Construct a 430-foot northbound left turn lane and a 405-foot southbound right turn lane at the intersection of SR 19 and Revels Road. Construct a 655-foot westbound left turn lane and a 420-foot eastbound right turn lane at the intersection of Number 2 Road and Spine Road.

PROFESSIONAL ENGINEERING CERTIFICATION

I hereby certify that I am a Professional Engineer properly registered in the State of Florida practicing with Traffic & Mobility Consultants LLC, a corporation authorized to operate as an engineering business, CA-30024, by the State of Florida Department of Professional Regulation, Board of Professional Engineers, and that I have prepared or approved the evaluations, findings, opinions, conclusions, or technical advice attached hereto for:

TABLE OF CONTENTS

LIST OF TABLES

LIST OF FIGURES

1.0 INTRODUCTION

This Traffic Impact Analysis (TIA) was conducted to assess the impact of the proposed Mission Rise development in the town of Howey-in-the-Hills, Florida. The proposed development consists of 499 single-family units with an anticipated buildout year of 2033. This study conforms to the Tier 2 TIA requirements of the Town of Howey-in-the-Hills and Lake County. The analysis was prepared in accordance with the approved methodology. The study has been updated to incorporate comments received from the Town of Howey-in-the-Hills. The methodology and the response to comments letter are included in **Appendix A**.

The site is located east of Silverwood Lane, west of SR 19 (South Palm Avenue), and south of Number 2 Road. **Figure 1** depicts the site location and the surrounding transportation network.

The development will be accessed via the intersections of Number 2 Road and Spine Road (future road), SR 19 and Revels Road, and Revels Road and Orange Blossom Road. The preliminary development site plan is provided in **Appendix B**.

Data used in the analysis consisted of site plan/development information provided by the project engineers, AM and PM peak hour intersection traffic counts obtained by Traffic & Mobility Consultants LLC, FDOT's *2023 Multimodal Quality/Level of Service (MQ/LOS) Handbook* and roadway capacities obtained from the *2022 Lake County Congestion Management Process (CMP) Database*.

1.1 Study Area

The project study area was established based on the standard requirements of the Lake Sumter Metropolitan Planning Organization (LSMPO) methodology and the Town of Howey-in-the-Hills *Land Development Code* (*LDC*). In accordance with the requirements of Tier 2 TIA methodology, the impact area includes roadway segments and intersections within a 4.55-mile radius of the site in addition to roadways where the development traffic is expected to consume 5% or more of their adopted Level of Service (LOS) capacities. The roadway segments characteristics were obtained from the *2022 Lake County Congestion Management Process (CMP) Database* and 2023 *FDOT Multimodal Quality/Level of Service (Q/LOS) Handbook Appendix B,* included in **Appendix C**. The project study area determination is provided in **Table 1,** as determined in the approved methodology.

Source: 2022 Lake County CMP Database

** 2023 FDOT Multimodal Quality/Level of Service Handbook, Appendix B: Florida's Generalized Service Volume Tables*

Bold numbers represent capacity equal or higher than 5%.

Based on the study area analysis presented in **Table 1**, the following roadway segments were analyzed for the PM peak hour:

- SR 19
  - Lane Park Road to CR 48
  - CR 48 to Central Avenue
  - Central Avenue to CR 455
  - CR 455 to US 27 / SR 25
  - US 27 / SR 25 to CR 478

- Central Avenue
  - SR 19 to Mare Avenue

- Number 2 Road
  - Mare Avenue to Silverwood Lane
  - Silverwood Lane to CR 48

The following intersections were analyzed for the AM and PM peak hours:

- SR 19 and CR 48 (Signalized)
- SR 19 and Central Avenue (Unsignalized)
- Central Avenue and South Florida Avenue (Unsignalized)
- SR 19 and Revels Road (Unsignalized) (East Project Access)
- SR 19 and CR 455 (Unsignalized)
- Spine Road and Interconnect Road (Proposed)
- Number 2 Road and Spine Road (North Project Access) (Proposed)
- Revels Road and Spine Road (Proposed)
- Revels Road and Orange Blossom Road (South Project Access)

2.0 EXISTING CONDITIONS ANALYSIS

Existing conditions in the vicinity of the site were analyzed to establish a baseline for the traffic conditions prevailing in the vicinity of the proposed development. The analysis included a review of existing roadway segment capacity and analysis of the intersection operations at the study intersections.

2.1 Roadway Segment Capacity

Existing roadway conditions were analyzed by comparing the existing traffic volumes within the study area and the adopted level of service (LOS) standards for the roadway segments. **Table 2** summarizes the roadway segment capacity analysis.

Table 2

** Counts were obtained from PM Peak Turning Movement Counts*
***A reduction of 25% was applied to the Peak Hour Directional Capacity of 530, as Number 2 Road is a substandard road*

The analysis indicates that all study roadway segments currently operate adequately within their capacities except the segments of SR 19 from CR 455 to CR 478 which currently operate over capacity.

2.2 Intersection Capacity

The intersection capacity analysis was performed for the AM and PM peak hour periods. The capacity analysis was performed using *Synchro* and the methods of the *Highway Capacity Manual (HCM)*. Turning movement volumes obtained during the AM and PM peak hour are displayed in **Figure 2** and **Figure 3**, respectively. The counts at SR 19 and CR 455 were collected on January 24, 2023, which coincides with a seasonal factor of 1.0. The remaining intersection turning movement counts were collected on July 19, 2023, during the off-peak season; therefore, a seasonal factor of 1.06 was applied to these counts. The turning movement counts and the seasonal factor report are included in **Appendix D**.

The results of the intersection capacity analysis, summarized in **Table 3,** reveal that all study intersections are currently operating at adequate LOS. Detailed *HCM* analysis worksheets are included in **Appendix E**.

3.0 PROJECT TRAFFIC

3.1 Trip Generation

The Trip Generation Analysis was conducted using the Institute of Transportation Engineers (ITE) *Trip Generation Manual, 11th Edition*. The ITE Information sheets are included in **Appendix F**. **Table 4** summarizes the resulting trip generation analysis.

Table 4
Trip Generation Analysis

ITE Code	Land Use	Size	Daily		AM Peak Hour				PM Peak Hour			
			Rate	Trips	Rate	Total	Enter	Exit	Rate	Total	Enter	Exit
210	Single Family Residential (Detached)	499 DU	8.87	4,428	0.64	322	81	241	0.90	451	284	167

Trip Generation analysis based on ITE Trip Generation Manual, 11th Edition.

The proposed development is projected to generate 4,428 new daily trips, of which 322 trips occur during the AM peak hour and 451 trips occur during the PM peak hour.

3.2 Trip Distribution

A trip distribution pattern was developed using the *Central Florida Regional Planning Model (CFRPMv7).* The model distribution was slightly adjusted based on local knowledge, professional engineering judgement, and the location of the development with respect to the study area attractions and activity centers to reflect the prevailing travel patterns in the study area and the surrounding transportation network. The raw model plots are provided in **Appendix G**, and the project trip distribution pattern is shown in **Figure 4.** Detailed trip distribution near the project site is shown in **Figure 5.**

Figure 5

4.0 PROJECTED CONDITIONS ANALYSIS

An analysis of projected conditions was conducted to determine the impact of the proposed development on the roadway segments capacity, as well as the proposed access connections and intersections to the site. The project buildout year for the analysis is 2033.

4.1 Planned and Programmed Improvements

The *Lake-Sumter Metropolitan Planning Organization (LSMPO) 2023-2027 Transportation Improvement Program (TIP),* as well as *LSMPO 2022 List of Priority Projects (LOPP)* were reviewed to identify any planned or programmed improvements to the transportation facilities in this area. The improvements are listed in **Table 5**. Construction is not planned to be completed within the next three (3) years for either improvement. Excerpts from the *LSMPO TIP* and *LSMPO LOPP* are provided in **Appendix H**.

Table 5
Planned and Programmed Improvements

FM #	Project Name	From	To	Proposed Phase	Proposed Phase FY	Description of Improvement
2383191	SR 19 *	CR 48	CR 561	PDE-PE-ENV	2023	Add Lanes & Reconstruct
238319-1	SR 19 **	Howey Bridge	CR 561	-	-	Road Widening

** LSMPO TIP Fiscal Year 2023-2027*
*** LSMPO 2022 LOPP Tier 2 project*

4.2 Background Traffic Projection

Projected traffic includes background traffic volumes, the project trips, and committed trips. Projected background traffic for the buildout year of 2033 was estimated by applying the growth rates obtained from *2022 Lake County CMP Database* to the existing traffic volumes. A minimum of 2% annual growth rate was applied to existing traffic volumes for which published annual growth rates are below 2%. The committed trips for the following approved developments within the study area are included in **Appendix I**:

- Whispering Hills
- Talichet Phase 1 and Phase 2
- The Reserve at Howey in the Hills
- Lake Hills (Four Seasons). Trips were estimated based on the trip generation analysis and the trip distribution obtained from the methodology.
- Watermark (Simpson)

4.3 Roadway Segment Capacity

Projected roadway conditions were analyzed by comparing the projected traffic volumes on the study segments to their service volumes and adopted LOS standards. The total projected traffic volume is composed of background traffic, vested trips and project trips. **Table 6** summarizes the roadway segment capacity analysis, which reveals the following:

- SR 19 from Lane Park Road to Central Avenue and from CR 455 to CR 478 are projected to operate over their capacities due to background traffic.
- All remaining roadway segments are projected to continue to operate adequately at project buildout.

Roadway Segment Capacity Analysis with Recommended Mitigation

Number 2 Road is a substandard road with reduced capacity. It is projected to operate at an acceptable LOS; however, operational safety is a concern due to its narrow width. Lake County would need to improve it in the future to achieve safety.

SR 19 from CR 48 to CR 561 is programmed in the *TIP* to be widened to four (4) lanes. The roadway segment capacity analysis reveals that the widening of SR 19 to 4-lanes is projected to improve the capacity of the segment from Lane Park Road to CR 48. The segments of SR 19 from CR 48 to Central Avenue and from CR 455 to CR 478 would need to be widened to 4-lanes to achieve acceptable LOS conditions at project buildout, as summarized in **Table 7**.

Table 6

Source: 2022 Lake County Annual Traffic Counts
**Exiting Counts were obtained from PM Peak Turning Movement Counts*
***A reduction of 25% was applied to the Peak Hour Directional Capacity of 530, as Number 2 Road is a substandard road*

Note: Roadway mitigations are necessitated by background traffic. Number 2 Road is an existing substandard facility.
The development is not responsible for these improvements, per Florida Statutes.

4.4 Intersection Capacity Analysis

The projected volumes for the intersection capacity and operations analysis were calculated by assigning the project trips to the project driveways and adding those volumes to the background volumes and vested trips at the study intersections. Projected background traffic was estimated as discussed in the previous section. Projected background traffic on the proposed Spine Road and Revels Road were estimated based on the *CFRPMv7* model daily volumes. The AADT model plots are included in **Appendix J**.

Intersection Capacity Analysis

The projected AM and PM peak hour volumes are illustrated in **Figure 6** and **Figure 7**, respectively. The analysis includes right and left turn lanes on SR 19, and a right turn lane on Revels Road at the intersection of SR 19 and Revels Road. It also includes right and left turn lanes on Number 2 Road at the intersection of Spine Road and Number 2 Road. The results of the analysis are summarized in **Table 8,** and the analysis worksheets are included in **Appendix K**. The intersection volume projection sheets are included in **Appendix L**.

Projected PM Peak Hour Intersection Volumes
Mission Rise
23017, v1.3

Figure 7

The analysis reveals the following:

- The intersection of SR 19 and CR 48 is projected to operate with delay during the AM and the PM peak hour. Further review is needed.
- The intersection of SR 19 and Central Avenue is projected to operate with delay in the eastbound and westbound directions. The westbound movement does not carry any project traffic and it is projected to operate at volume to capacity ratio less than 1.0. Further review is needed.
- The intersection of SR 19 and Revels Road is projected to operate with delay in the eastbound and westbound directions. The westbound movement does not carry any project traffic. Further review is needed.
- The intersection of SR 19 and CR 455 is projected to operate with delay for the westbound left movement. Project trips contribute no traffic to the movement. Further review is needed.

The remaining study intersections are projected to operate adequately at the project buildout.

Intersection Capacity Analysis with Recommended Mitigation

The proposed project does not significantly impact study area intersections. Four (4) intersections have been reviewed further. The intersections are determined to need the following improvements to achieve acceptable LOS conditions at project buildout:

- Retiming the signal is recommended at the intersection of SR 19 and CR 48 OR constructing a 2-lane roundabout at the intersection of SR 19 and CR 48.
- Installing a signal is recommended at the intersection of SR 19 and Central Avenue.
- Installing a signal is recommended at the intersection of SR 19 and Revels Road.
- Installing a signal is recommended at the intersection of SR 19 and CR 455.

The traffic operations for the mitigated intersections are projected to have acceptable LOS, as detailed in **Table 9**. The background conditions and the buildout conditions with the mitigation analysis worksheets are included in **Appendix M**.

Table 9
Projected Intersection Capacity Analysis with Mitigation

Intersection	Traffic Control	Peak Period	Scenario	EB		WB		NB		SB		Overall	
				Delay	LOS	Delay	LOS	Delay	LOS	Delay	LOS	Delay	LOS

			Mitigation	--	--	130.1	F	6.4	A	62.3	E	44.1	D

Average delay is in seconds

The analysis reveals the following:

- The intersection of SR 19 and CR 48 is projected to operate at an acceptable overall LOS by optimizing the signal timing or by constructing a 2-lane roundabout. Since the intersection can operate adequately by retiming the traffic signal; the project is not responsible to add a roundabout.
- The intersection of SR 19 and Central Avenue is projected to operate adequately at buildout with a signal. The westbound movement does not carry any project traffic. Project contribute 5.9% of the total traffic.
- The intersection of SR 19 and Revels Road is projected to operate adequately at buildout with a signal. The westbound movement does not carry any project traffic. Project contributes 13.6% of the total traffic.
- The intersection of SR 19 and CR 455 is projected to operate adequately at buildout with a signal. The westbound movement does not carry any project traffic. Project contribute 9.0% of the total traffic.

In lieu of contributing a proportionate share to the three (3) intersections needing new traffic signals, the developer is recommending to construct the new traffic signal at SR 19 and Revels Road, which serves as the main access to the project.

5.0 ACCESS REVIEW

The development will be accessed via the intersections of Number 2 Road and Spine Road (future road), SR 19 and Revels Road, and Revels Road and Orange Blossom Road. SR 19 is a 2-lane undivided facility with a posted speed limit of 55 miles per hour (mph) near the project entrance. Number 2 Road is a 2-lane undivided facility with a posted speed limit of 30 mph in the east direction and 45 mph in the west direction near the project entrance. Orange Blossom Road is a 2-lane undivided facility with a posted speed limit of 30 mph near the project entrance.

5.1 Turn Lane Review

A review of the need for turn lanes at the project entrance intersections was conducted based on the Lake County *Land Development Code (LDC)* guidelines, which are provided in **Appendix N**. In accordance with the *LDC* guidelines, right and left turn lanes are warranted at the intersections of SR 19 and Revels Road, and at Number 2 Road and Spine Road. The intersection of Orange Blossom Road and Revels Road is expected to carry limited traffic; therefore, exclusive turn lanes are not recommended.

The recommended lengths of the turn lanes on SR 19 were calculated based on the requirements of the *FDOT Design Manual Exhibit 212-1*, provided in **Appendix O**, and the recommended lengths of the turn lanes on Number 2 Road were calculated based on the Lake County *LDC* guidelines. Per Lake County requirement for turn lane widening on Number 2 Road, the length of tapers will need to be twice the standard length. The calculations are provided as follows:

SR 19 and Revels Road

Left Turn Lane Length = Deceleration Distance + Queue Length
Deceleration at 60 mph (design speed) = 405 feet
95th Percentile Queue Length = 1 x 25 = 25 feet
Northbound Left Turn Lane = 405 feet + 25 feet = 430 feet (including a 50-foot taper)

Right Turn Lane Length = Deceleration Distance
Deceleration at 60 mph (design speed) = 405 feet
Southbound Right Turn Lane = 405 feet

Number 2 Road and Spine Road

Left Turn Lane Length = Taper Length + Storage Length
Taper Length at 50 mph (design speed) = 230 feet x 2 = 460 feet
Storage Length at 50 mph (design speed) = 195 feet
Westbound Left Turn Lane = 460 feet + 195 feet = 655 feet

Right Turn Lane Length = Taper Length + Storage Length
Taper Length at 35 mph (design speed) = 170 feet x 2 = 340 feet
Storage Length at 35 mph (design speed) = 80 feet
Eastbound Right Turn Lane = 340 feet + 80 feet = 420 feet

6.0 STUDY CONCLUSIONS

This traffic analysis was conducted to assess the impact of the proposed Mission Rise development in the Town of Howey-in-the-Hills, Florida. The project will include 499 single family residential units. The analysis included a determination of project trip generation, a review of existing and projected roadway and intersection capacity.

The results of the traffic analysis are summarized as follows:

- The proposed development is projected to generate 4,428 trips per day, of which 322 trips occur during the AM peak hour and 451 trips occur during the PM peak hour.

- SR 19 SR 19 from Lane Park Road to Central Avenue and from CR 455 to CR 478 are projected to operate over their capacities due to background traffic. The development is not responsible for mitigating background deficiencies, per Florida's Statutes.

- SR 19 from CR 48 to CR 561 is programmed in the *TIP* to be widened to 4 lanes.

- All remaining roadway segments are projected to continue to operate adequately at project buildout.

- The intersection of SR 19 and CR 48 is projected to operate with delay during the AM and the PM peak hour. It is recommended to retime the signal or implement a 2-lane roundabout to maintain LOS standards. The development is not responsible to implement a roundabout.

- The intersection of SR 19 and Central Avenue is projected to operate with delay in the eastbound and the westbound movement. The westbound movement does not carry any project traffic.

- The intersection of SR 19 and Revels Road is projected to operate with delay in the eastbound and westbound directions. The westbound movement does not carry any project traffic.

- The intersection of SR 19 and CR 455 is projected to operate with delay for the westbound left movement. Project trips contribute no traffic to the movement.

- In lieu of contributing a proportional share to the three (3) intersections where traffic signals are projected to be needed, the developer is recommending to construct the traffic signal at the intersection of SR 19 and Revels Road.

- A traffic signal at SR 19 and Revels Road traffic signal needs to be warranted based on a signal warrant study of the in-field traffic volumes. An Intersection Control Evaluation (ICE) study will also need to be coordinated with FDOT.

- All remaining study intersections are projected to operate adequately at project buildout.

- The turn lane recommendations are as follows:
    - Construct a 430-foot northbound left turn lane and a 405-foot southbound right turn lane at the intersection of SR 19 and Revels Road.
    - Construct a 655-foot westbound left turn lane and a 420-foot eastbound right turn lane at the intersection of Number 2 Road and Spine Road.

APPENDICES

Study Methodology and Response to Comments Letter

MEMORANDUM

May 23, 2023

Re: Mission Rise
Traffic Impact Analysis Methodology, v1.1
Town of Howey-In-The-Hills, Florida
Project № 23017.1

This methodology outlines the proposed Traffic Impact Analysis (TIA) for the above referenced project. This methodology was prepared in accordance with the requirements of the Town of Howey-In-The-Hills and the Lake~Sumter Metropolitan Planning Organization (LSMPO) TIA guidelines for a Tier 2 TIA. This methodology has been revised in accordance with the comments provided by the Town of Howey-In-The-Hills. The comments and response to comments letter are included in the **Attachments**.

Project Description

The ±243.3-acre site is a single-family residential development consisting of 592 dwelling units. The project site consists of parcels 34-20-25-0001-000-00100, 34-20-25-0004-000-01003, 02-21-25-0002-000-04800, and 27-20-25-0004-000-01200. The anticipated buildout year is 2033. A preliminary site plan is included in the **Attachments**.

Project Location

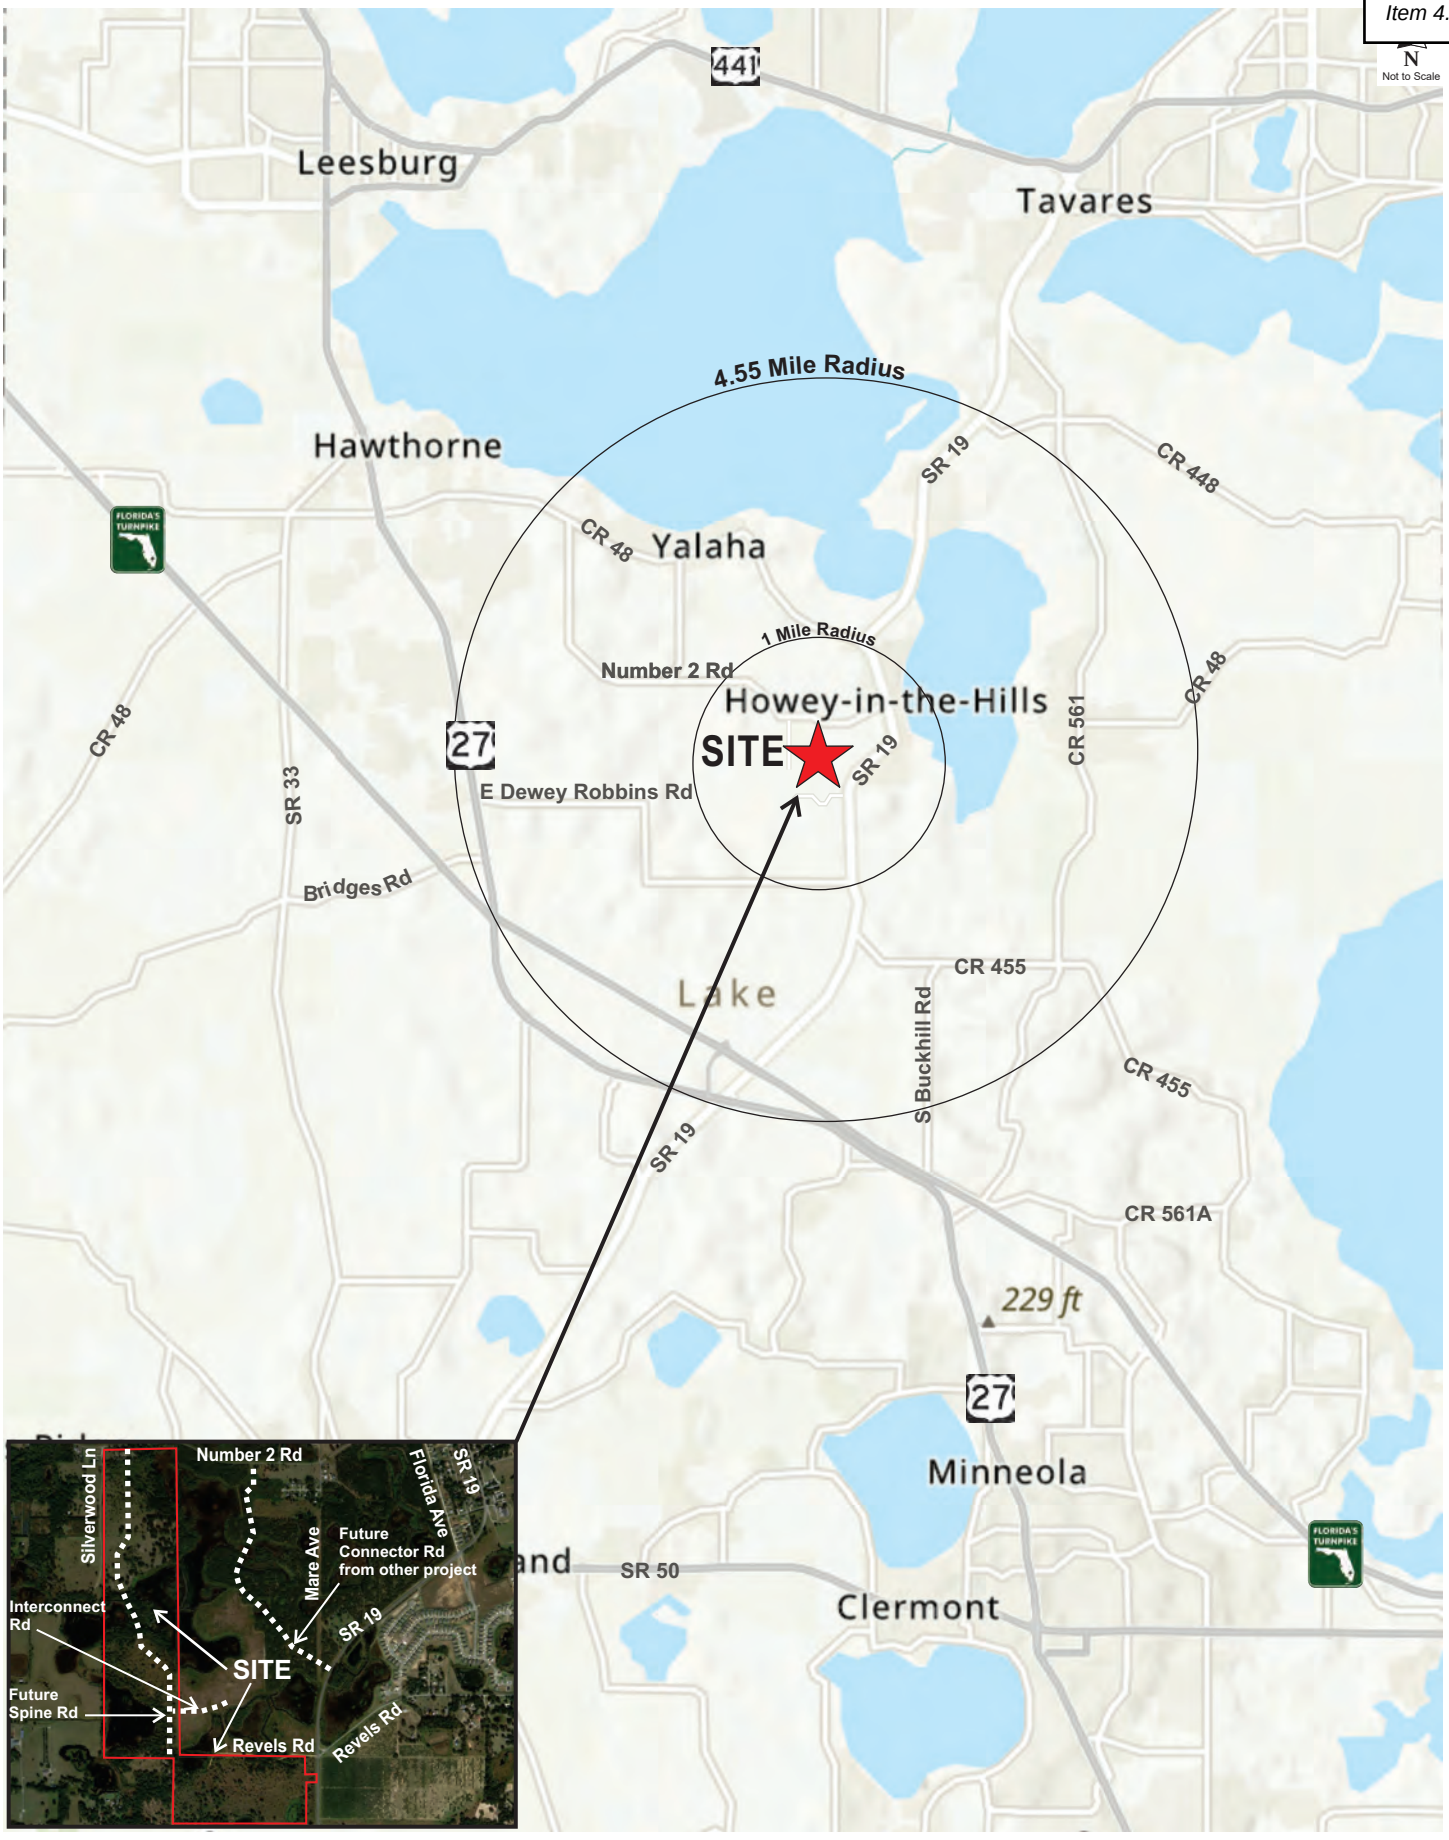
The site is located east of Silverwood Lane, west of SR 19 (South Palm Avenue), and south of Number 2 Road in the Town of Howey-in-the-Hills, Florida. The site will be crossed from north to south by a future two-lane spine road that will connect Number 2 Roadway with Revels Road, as shown in **Figure 1**.

Project Access

The project has access to the external network via one (1) full access driveway on Number 2 Road and one (1) full access driveway on SR 19. In addition, there is an emergency access to the south via Orange Blossom Road. The access configuration is depicted in the preliminary site plan included in the **Attachments**.

Trip Generation

A trip generation analysis was performed for the development using the trip generation information from the Institute of Transportation Engineers (ITE) *Trip Generation Manual, 11th Edition.* The ITE information sheets are included in the **Attachments**. The trip generation of the proposed development is summarized in **Table 1**.



Site Location Map
Mission Rise v1.1
23017.1

Figure

Table 1
Trip Generation Analysis

ITE Code	Land Use	Size	Daily		AM Peak Hour				PM Peak Hour			
			Eqvlt Rate	Trips	Eqvlt Rate	Total	Enter	Exit	Eqvlt Rate	Total	Enter	Exit
210	Single Family Residential (Detached)	592 DU	8.75	5,181	0.63	376	94	282	0.89	529	333	196

Trip Generation analysis based on ITE Trip Generation Manual, 11th Edition.

The proposed development at project buildout is projected to generate 5,181 new daily trips of which 376 trips occur during the AM peak hour, and 529 trips occur during the PM peak hour.

Trip Distribution

A trip distribution pattern in the general vicinity of the project site was initially determined based on the *Central Florida Regional Planning Model (CFRPM v7)*. Two (2) future connections (Spine Road and Connector Road) from SR 19 to Number 2 Road were included in the model for this project. The model distribution was modified to reflect the local network and prevailing traffic patterns. The proposed trip distribution pattern is provided in **Figure 2**. Detailed trip distribution near the project site is shown in **Figure 3**. The model distribution plots are included in the **Attachments**.

Study Area

In accordance with the LSMPO requirements for a Tier 2 TIA methodology, the study area will include a minimum 1-mile radius plus all roadway segments within a 4.55-mile radius in addition to roadways where the development is projected to consume 5% or more of their adopted Level of Service (LOS), unless otherwise specified by the City/LSMPO.

The extent of the study impact area shall be determined by the area of influence of the project. The area of influence shall be established as one-half (½) the total trip length associated with the land use of the proposed development, based upon the *2021 Lake County Transportation Impact Fee Update Study Final Report*. The total trip length for single-family is 9.1-miles. Accordingly, the area of influence will encompass all roadway segments within 4.55-mile radius. Excerpts of the *2022 Lake County Congestion Management Process (CMP) Database*, the *2021 Lake County Transportation Impact Fee Update Study Final Report*, and the *2023 FDOT Multimodal Quality/Level of Service (Q/LOS) Handbook Appendix B* are included in the **Attachments**. **Table 2** lists all roadway segments within the area of influence along with their capacities and percentages consumed by the project trips.

Source: 2022 Lake County CMP Database
** 2023 FDOT Multimodal Quality/Level of Service Handbook, Appendix B: Florida's Generalized Service Volume Tables*
Bold numbers represent capacity equal or higher than 5%.

Based on the study area analysis, the following roadway segments will be analyzed for the PM peak hour:

- SR 19
  - Lane Park Road to CR 48
  - CR 48 to Central Avenue
  - Central Avenue to CR 455
  - CR 455 to US 27 / SR 25
  - US 27 / SR 25 to CR 478

- Central Avenue
  - SR 19 to Mare Avenue

- Number 2 Road
  - Mare Avenue to Silverwood Lane
  - Silverwood Lane to CR 48

The following intersections will be analyzed for the AM and PM peak hours:

- SR 19 and CR 48 (Signalized)
- SR 19 and Central Avenue (Unsignalized)
- SR 19 and South Florida Avenue (Unsignalized)
- SR 19 and Revels Road (Unsignalized)
- SR 19 and CR 455 (Unsignalized)
- Spine Road and Interconnect Road (Proposed)
- Number 2 Road and Spine Road (North Project Access) (Proposed)
- Revels Road and Spine Road (South Project Access) (Proposed)

Projected Traffic

Projected traffic includes background traffic volumes, the project trips, and committed trips. Projected background traffic will be calculated using the historical growth rates obtained from the *Lake County CMP* database and *FDOT Florida Traffic Online* web-based database. A 2%, minimum growth rate will be applied if the calculated growth rates are lower than 2%. The committed trips for the following approved developments within the study area will be added to the background traffic:

- The Reserve (traffic study obtained)
- Talichet Phase 2 (traffic study obtained)
- Whispering Hills (traffic study obtained)
- Lake Hills (City to provide traffic study)
- Watermark (City to provide traffic study)

Planned and Programmed Improvements

The *Lake-Sumter Metropolitan Planning Organization (LSMPO) 2023-2027 Transportation Improvement Program (TIP),* as well as *LSMPO 2022 List of Priority Projects (LOPP)* were reviewed to identify any planned or programmed improvements to the transportation facilities in this area. As shown in **Table 3**, construction is not planned to be completed within the next three (3) years for either improvement. Excerpts from the *LSMPO TIP* and *LSMPO LOPP* are provided in the **Attachments**.

Table 3
Planned and Programmed Improvements

FM #	Project Name	From	To	Proposed Phase	Proposed Phase FY	Description of Improvement
2383191	SR 19 *	CR 48	CR 561	PDE-PE-ENV	2023	Add Lanes & Reconstruct
238319-1	SR 19 **	Howey Bridge	CR 561	-	-	Road Widening

** LSMPO TIP Fiscal Year 2023-2027*
*** LSMPO 2022 LOPP Tier 2 project*

Capacity Analysis

The traffic study will include existing and 2033 buildout conditions for the roadway segment and intersection capacity analyses. A capacity analysis of the study roadway segments will be conducted for the PM peak hour under existing and projected conditions. The capacity analysis will be based on service volumes, capacities, and existing volumes, as documented in *2022 Lake County CMP Database* and the *FDOT's 2023 Multimodal Quality/Level of Service (MQ/LOS) Handbook,* included in the **Attachments***.*

The intersection turning movement counts will be seasonally adjusted, if needed, using the *2022 FDOT Peak Season Factor Category Report* obtained from the *Florida Traffic Online (FTO)* website.

Right and left turn lane warrant reviews will be performed at the Spine Road accesses on Number 2 Road and at SR 19 and Revels Road in accordance with the Lake County requirements for turn lanes.

In cases where projected conditions require mitigation as a result of the proposed development, an analysis including the recommended mitigation will be conducted.

Alternative Mode Analysis

A review of transit, pedestrian, and bicycle facilities will be conducted in accordance with the LSMPO requirements.

Report

A TIA report detailing the methods and findings of the study, including all associated graphics, tables, calculations, and supporting information will be prepared for submittal to the Town of Howey-In-The-Hills.

Re: Mission Rise
Response to Methodology Comments
TMC Project № 23017.1
Town Howey-In-The-Hills, Florida

Dear Mr. Brock,

Please find below our responses to the review comments prepared on behalf of The Town of Howey-In-The-Hills by TMH Consulting Inc dated May 8, 2023, regarding the above referenced Methodology dated April 28, 2023. The comments are listed in **bold** typeface and the TMC responses follow in *italic* typeface. Additionally, a revised Methodology is provided under cover reflecting the changes resulting from these comments.

1. **The Revels Road access to the south cannot be limited to emergency access as this is a public road now. Since we have received comments from residents to the south, it will be very useful to get some type of prediction about how many trips are likely to use this access point as opposed to SR 19 and Number 2 Road.**

   TMC Response: The emergency access on Orange Blossom Road will be restricted to emergency vehicles only; therefore, no trips were assigned to that access.

2. **There is an interconnect between the Mission Rise parcel and The Reserve parcel. Is the model sensitive enough to determine if this interconnect will impact trip assignments? The Reserve has an approved connecting road which is discussed in the TMC methodology. The Reserve also includes a future commercial development area that might be an attractor.**

   TMC Response: Noted. The Reserve Subdivision includes a future commercial development, therefore, 10% of the trips are assumed to originate from The Reserve's commercial development and use the interconnect road to access the project site.

3. **The study needs to include those projects that have some level of approval. TMC has done the traffic studies for several of these and been provided with traffic studies from others. The projects that need to be included are:**

   - **The Reserve**
   - **Watermark**
   - **Talichet Phase 2 (Phase 1 is mostly in the background traffic by now.)**
   - **Whispering Heights**
   - **Lake Hills**

TMC Response: Noted. The vested trips from The Reserve, Watermark, Talichet Phase 2, Whispering Heights [Whispering Hills], and Lake Hills will be included in the traffic study as indicated in the revised methodology (attached).

4. **The study needs to include CFRPM distributions that show the percentages of future background through traffic that will use the new roads in Mission Rise and The Reserve that link No 2 Road to SR 19. Use that data to project future background traffic volumes on those links.**

   TMC Response: Noted. As reflected in Figure 2, the future Spine Road, which transverses the project site from north to south and connects Number 2 Road with Revels Road, and the future Connector Road, which connects SR 19 and Number 2 Road are included in the project trip distribution Figure 2 in the revised methodology (attached).

5. **The project trip distribution map is basically unreadable. They need to provide a graphic that someone can review and understand.**

   TMC Response: Noted. The distribution map has been revised to show an inset with the detail project distribution within the project site. See Figure 2 in the revised methodology (attached).

6. **SR 19 at Central Avenue is listed as signalized, but it is only a flashing light. The analysis cannot assume it is a true signal.**

   TMC Response: Noted. SR 19 at Central Avenue intersection is listed as an unsignalized intersection in the revised methodology (attached).

7. **The ITE land use, code 210, shows traffic generation as 9.43 trips per unit with 0.70% for the AM Peak and 0.94% for the PM Peak. Why did they use 8.75, 0.63 and 0.89 respectively for the project traffic generation?**

   TMC Response: Per the Trip Generation Handbook, 3rd Edition Figure 4.2 (Process for selecting average rate or equation in trip generation manual data) linear curve equations should be used for the weekday, AM, and PM peak period trip generation calculation. The linear curve equations have an R^2 equal to 0.75 or greater, therefore, the fitted curve equations were used instead of average rate.

   The linear curve equations used for the 592 dwelling residential units corresponding to the weekday, AM, and PM trips are as follows:

   Weekday: Ln(T)=0.92 Ln(X)+2.68 which is equivalent to an average rate of 8.75 (5,181/592).
   AM: Ln(T)=0.91 Ln(X)+0.12 which is equivalent to an average rate of 0.63 (376/592).
   PM: Ln(T)=0.94 Ln(X)+0.27 which is equivalent to an average rate of 0.89 (529/592).

END OF COMMENTS

We trust these responses and the revised Methodology adequately address the review comments. We remain available to discuss this matter further or to answer any questions you may have.

Re: Mission Rise
Response to Traffic Impact Analysis Comments
TMC Project № 23017.1
Howey-in-the-Hills, Florida

Dear Mr. Brock,

Please find below our responses to the review comments prepared by Griffey Engineering Inc. on behalf of The Town of Howey-in-the-Hills, dated October 9, 2023, regarding the above referenced Traffic Impact Analysis dated August 2023. The comments are listed in **bold** typeface and the TMC responses follow in *italic* typeface. Additionally, a revised Traffic Impact Analysis is provided under cover reflecting the changes resulting from these comments.

Traffic Study

1. **Figures in the report are missing. They need to be included.**

   TMC Response: Figures have been included in the report.

2. **For the future condition analysis of the intersection of SR 19 & CR 48, evaluate for a roundabout as well as signal timing adjustment.**

   TMC Response: A roundabout at the intersection of SR19 & CR 48 has been evaluated and the results of the analysis have been included in the TIA v1.3 report.

Recommended Improvements

3. **The traffic study identifies three intersections along SR 19 that will need to be signalized in the future (SR 19 & Central Ave., SR 19 & Revels Rd., and SR 19 & CR 455). The Development Agreement has a section that addresses proportionate share payment for off-site impacts. In the study's mitigation analysis it states: "In lieu of contributing a proportionate share to the three (3) intersections needing new traffic signals, the developer is recommending to construct the new traffic signal at SR 19 and Revels Road, which serves as the main access to the project." This is a reasonable mitigation alternative provided that there is a binding commitment for the developer to construct (or fund) the signal when it is deemed warranted by FDOT. This would be in addition to the turn lanes that the development will need to install at the intersection (right & left on SR 19, and right & through/left on EB Revels).**

   TMC Response: Acknowledged.

END OF COMMENTS

We trust these responses and the revised Traffic Impact Analysis adequately address the review comments. We remain available to discuss this matter further or to answer any questions you may have.

Kind regards,

Appendix B
Preliminary Development Plan

PRELIMINARY AREA SUMMARY

Total Property Acreage	**+/- 241.3 Ac**
Required Open Space	+/- 60.3 Ac
Additional Wetlands	+/- 31.0 Ac
Developable (Net Land Area)	**+/- 148.0 Ac**

OPEN SPACE ACREAGE

Required (Min 25%)	**+/- 60.3 Ac**
Provided (27.3%)	**+/- 66.0 Ac**
Stormwater (15.4%)	+/- 17.8 Ac
Misc. Open Space	+/- 18.1 Ac
Wetlands (50% Allowed)	+/- 30.1 Ac

DEVELOPMENT SUMMARY

Total Site Parcel Length	**+/- 29,080 LF**
Total Buildable Parcel	+/- 27,626 LF*
Total SFD 55'x120' Parcel	**+/- 23,590 LF**
Total Buildable SFD	+/- 22,410 LF*
Total 55' Units	**407 Lots (86%)**
Total SFD 75'x120' Parcel	**+/- 5,490 LF**
Total Buildable SFD	+/- 5,215 LF*
Total 75' Units	**69 Lots (14%)**
Total SFD Units	**476 Units**
Development Density	**3.2 du/ac**

*Assumes a 5% loss of developable area

NON-RESIDENTIAL ACREAGE

Required (Min 15%)	**+/- 22.2 Ac**
Provided (15%)	**+/- 22.2 Ac**
Civic (5%)	+/- 1.1 Ac
Amenities	+/- 4.2 Ac
Mis. Open Space	+/- 6.6 Ac
Stormwater	+/- 4.7 Ac
Bike Trail	+/- 5.6 Ac

MISSION RISE • **CONCEPTUAL PLAN**

- Town of Howey Hills, FL
- December 22, 2022
- # 22003786
- Turnstone Group

0 300' 600'

SCALE: 1" = 300'

The plan is conceptual in nature. Final densities, layout, development parameters, calculations, and site conditions may change upon further development of the Preliminary and/or Master Site Plan, and upon evaluation of topographic survey, water management and existing historic and specimen trees to remain.

C3C & C3R

Motor Vehicle Arterial Generalized Service Volume Tables

(C3C-Suburban Commercial)

Peak Hour Directional

	B	C	D	E
1 Lane	*	760	1,070	**
2 Lane	*	1,520	1,810	**
3 Lane	*	2,360	2,680	**
4 Lane	*	3,170	3,180	**

Peak Hour Two-Way

	B	C	D	E
2 Lane	*	1,380	1,950	**
4 Lane	*	2,760	3,290	**
6 Lane	*	4,290	4,870	**
8 Lane	*	5,760	5,780	**

AADT

	B	C	D	E
2 Lane	*	15,300	21,700	**
4 Lane	*	30,700	36,600	**
6 Lane	*	47,700	54,100	**
8 Lane	*	64,000	64,200	**

(C3R-Suburban Residential)

	B	C	D	E
1 Lane	*	970	1,110	**
2 Lane	*	1,700	1,850	**
3 Lane	*	2,620	2,730	**

	B	C	D	E
2 Lane	*	1,760	2,020	**
4 Lane	*	3,090	3,360	**
6 Lane	*	4,760	4,960	**

	B	C	D	E
2 Lane	*	19,600	22,400	**
4 Lane	*	34,300	37,300	**
6 Lane	*	52,900	55,100	**

Adjustment Factors

The peak hour directional service volumes should be adjust by multiplying by 1.2 for one-way facilities
The AADT service volumes should be adjusted by multiplying 0.6 for one way facilities 2 Lane Divided Roadway with an Exclusive Left Turn Lane(s): Multiply by 1.05
2 lane Undivided Roadway with No Exclusive Left Turn Lane(s): Multiply by 0.80

Exclusive right turn lane(s): Multiply by 1.05
Multilane Undivided Roadway with an Exclusive Left Turn Lane(s): Multiply by 0.95
Multilane Roadway with No Exclusive Left Turn Lane(s): Multiply by 0.75
Non-State Signalized Roadway: Multiply by 0.90

This table does not constitute a standard and should be used only for general planning applications. The table should not be used for corridor or intersection design, where more refined techniques exist.
* Cannot be achieved using table input value defaults.
** Not applicable for that level of service letter grade. For the automobile mode, volumes greater than level of service D become F because intersection capacities have been reached.

C1 & C2

Motor Vehicle Highway Generalized Service Volume Tables

(C1-Natural & C2-Rural)

Peak Hour Directional

	B	C	D	E
1 Lane	240	430	730	1,490
2 Lane	1,670	2,390	2,910	3,340
3 Lane	2,510	3,570	4,370	5,010

Peak Hour Two-Way

	B	C	D	E
2 Lane	440	780	1,330	2,710
4 Lane	3,040	4,350	5,290	6,070
6 Lane	4,560	6,490	7,950	9,110

AADT

	B	C	D	E
2 Lane	4,600	8,200	14,000	28,500
4 Lane	32,000	45,800	55,700	63,900
6 Lane	48,000	68,300	83,700	95,900

Adjustment Factors

2 Lane Divided Roadway with Exclusive Left Turn Adjustment: Multiply by 1.05
Multilane Undivided Highway with Exclusive Left Turn Adjustment: Multiply by 0.95
Multilane Undivided Highway without Exclusive Left Turn Adjustment:: Multiply by 0.75

This table does not constitute a standard and should be used only for general planning applications. The table should not be used for corridor or intersection design, where more refined techniques exist.

Appendix F
ITE Trip Generation Sheets

Single-Family Detached Housing
(210)

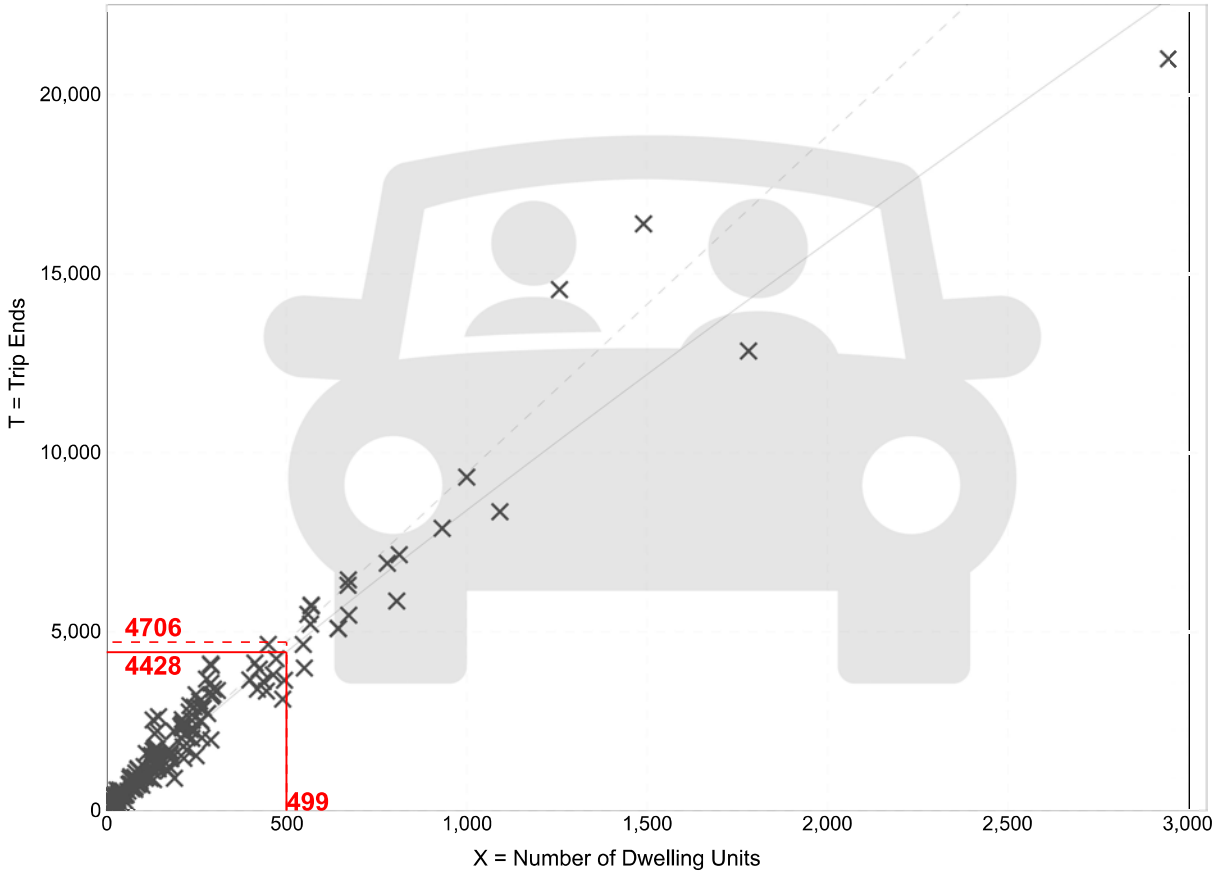
Vehicle Trip Ends vs: **Dwelling Units**
On a: **Weekday**

Setting/Location: **General Urban/Suburban**
Number of Studies: 174
Avg. Num. of Dwelling Units: 246
Directional Distribution: 50% entering, 50% exiting

Vehicle Trip Generation per Dwelling Unit

Average Rate	Range of Rates	Standard Deviation
9.43	4.45 - 22.61	2.13

Data Plot and Equation



Fitted Curve Equation: Ln(T) = 0.92 Ln(X) + 2.68 **R^2= 0.95**

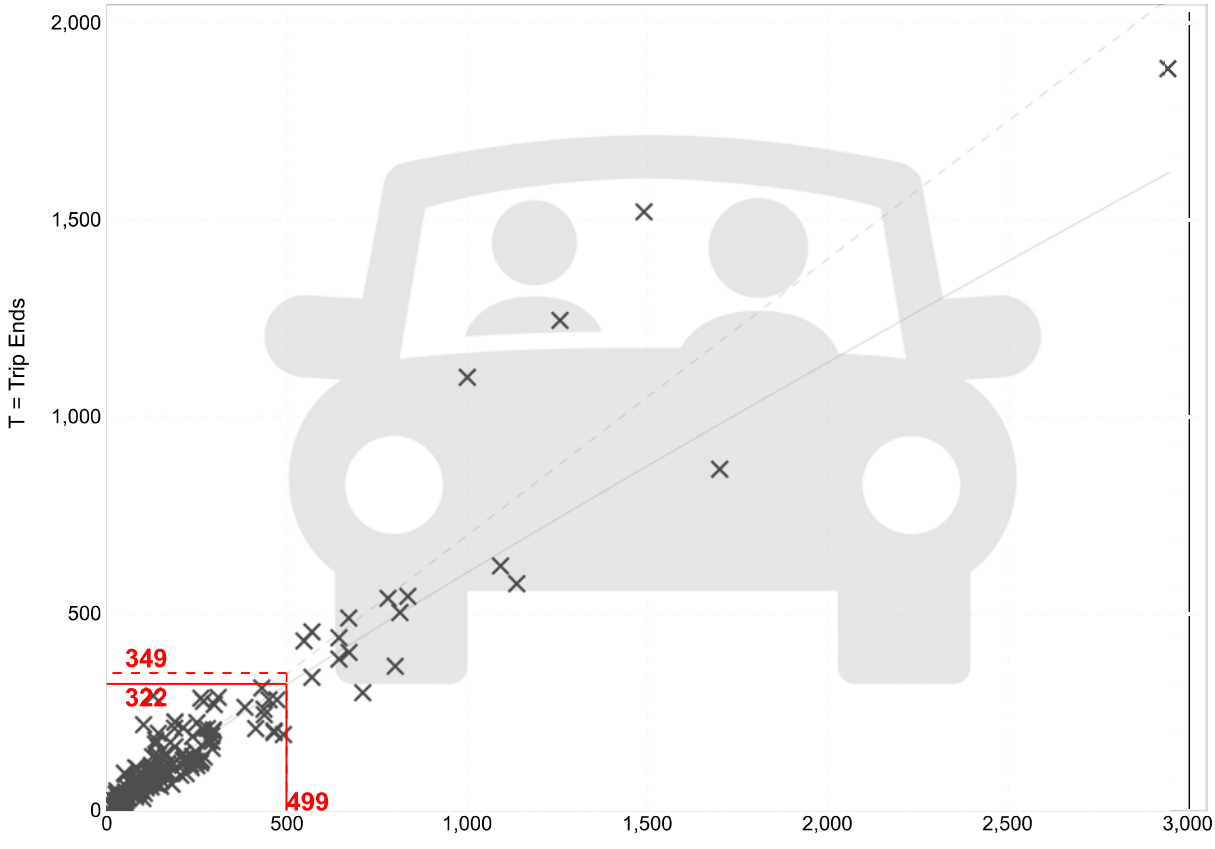
Single-Family Detached Housing
(210)

Vehicle Trip Ends vs: **Dwelling Units**
On a: **Weekday,**
Peak Hour of Adjacent Street Traffic,
One Hour Between 7 and 9 a.m.
Setting/Location: **General Urban/Suburban**
Number of Studies: 192
Avg. Num. of Dwelling Units: 226
Directional Distribution: 25% entering, 75% exiting

Vehicle Trip Generation per Dwelling Unit

Average Rate	Range of Rates	Standard Deviation
0.70	0.27 - 2.27	0.24

Data Plot and Equation



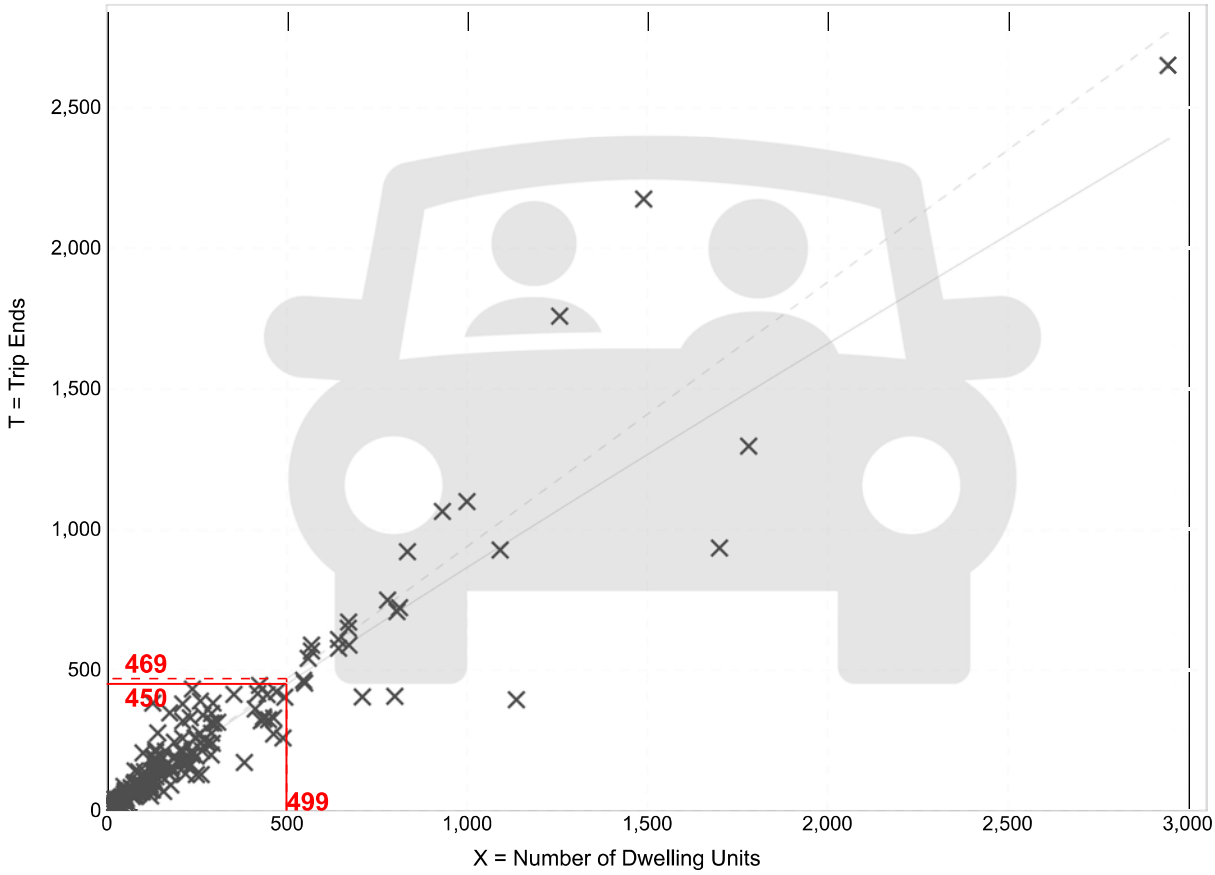
Single-Family Detached Housing
(210)

Vehicle Trip Ends vs: **Dwelling Units**
On a: **Weekday,**
Peak Hour of Adjacent Street Traffic,
One Hour Between 4 and 6 p.m.
Setting/Location: **General Urban/Suburban**
Number of Studies: 208
Avg. Num. of Dwelling Units: 248
Directional Distribution: 63% entering, 37% exiting

Vehicle Trip Generation per Dwelling Unit

Average Rate	Range of Rates	Standard Deviation
0.94	0.35 - 2.98	0.31

Data Plot and Equation



Fitted Curve Equation: Ln(T) = 0.94 Ln(X) + 0.27 **R^2= 0.92**

Table 1
Trip Generation Calculations – Phase 1 (2026)

ITE Code	Land Use	Size	Daily		AM Peak Hour				PM Peak Hour			
			Rate	Trips	Rate	Total	Enter	Exit	Rate	Total	Enter	Exit
210	Single-Family Detached	184 DU	9.61	1,768	0.71	131	34	97	0.96	177	112	65
215	Single-Family Attached	146 DU	7.27	1,061	0.48	70	22	48	0.57	83	47	36
Total Trip Generation (Phase 1)				2,829		201	56	145		260	159	101

Source: ITE Trip Generation Manual, 11th Edition
ITE equations were used as R^2 were greater than 0.75 and with more than 20 studies

Phase 1 of the proposed development is projected to generate 2,829 new daily trips of which 201 trips occur during the AM peak hour, and 260 trips occur during the PM peak hour.

Table 2
Trip Generation Calculations – Phase 1 and Phase 2 (2030)

ITE Code	Land Use	Size	Daily		AM Peak Hour				PM Peak Hour			
			Rate	Trips	Rate	Total	Enter	Exit	Rate	Total	Enter	Exit
210	Single-Family Detached	358 DU	9.11	3,261	0.66	236	61	175	0.92	329	207	122
215	Single-Family Attached	292 DU	7.45	2,175	0.50	146	45	101	0.59	172	98	74
Total Trip Generation Buildout (Phase 1 + Phase 2)				5,436		382	106	276		501	305	196

Source: ITE Trip Generation Manual, 11th Edition
ITE equations were used as R^2 were greater than 0.75 and with more than 20 studies

The proposed development at project buildout is projected to generate 5,436 new daily trips of which 382 trips occur during the AM peak hour, and 501 trips occur during the PM peak hour.

Trip Distribution

A trip distribution pattern was estimated using the *Central Florida Regional Planning Model, version 7 (CFRPM V7)*. The model distribution was adjusted based on local knowledge, professional engineering judgement, and the location of the development with respect to the study area attractions and activity centers to reflect prevailing travel patterns in the vicinity of the site and the surrounding transportation network. The raw model plots are provided in the **Attachments**, and the adjusted trip distribution is shown in **Figure 2.**

Study Area

In accordance with the LSMPO requirements for a Tier 2 TIA methodology and the Town of Howey-In-The-Hills Land Development Code, the study area will encompass roadway segments and intersections within a 1-mile radius at minimum. The study will also include segments and intersections within a 4.55-mile radius, (½ the trip length for residential land use), where the project's peak hour trips consume five percent (5%) or more of a roadway's two-way peak hour generalized service volume, based on the adopted LOS and committed number of lanes. The total trip length was obtained from the *Lake County Transportation Impact Fee Schedule Table 9-1* (dated 12/21/2001), included in the **Attachments**. The roadway segments identified by the significance test will be analyzed in the Tier 2 TIA. Excerpts from the *2020 Lake County Congestion Management Plan (CMP) Database* are included in the **Attachments**. The study area significance analysis is summarized in **Table 3**.

Appendix N

Lake County Land Development Code (LDC)

2. Turn Lanes

Turn lanes consist of left-turn lanes and right-turn lanes (deceleration lanes). Turn lanes shall be installed on the road which is being accessed at the proposed entrance(s) to the development, as deemed necessary by the County Manager or Designee. The County Manager or Designee may also require turn lanes at adjacent or nearby intersections in lieu of, or in addition to, turn lanes at the development entrances.

Conditions which are to be considered in determining the need for turn lanes include the following:

a) If the property accessing the road is projected to generate 500 or more vehicle trips per day, or 50 or more vehicle trips in any hour;

b) If a traffic analysis indicates that turn lanes would be necessary to maintain capacity on fronting roads and/or on adjacent or nearby intersections.

c) If entrances are proposed at locations where grade, topography, site distance, traffic, or other unusual conditions indicate that turn lanes would be needed for traffic safety. The need for turn lanes to accommodate right turn movements and left turn movements shall be based upon anticipated traffic distribution and projected turning movement volumes among other considerations, including traffic safety.

C. ***Traffic Analysis***

1. Transportation Concurrency Management System

Transportation Concurrency Management System is administered by the Lake-Sumter Metropolitan Planning Organization (LSMPO). All information regarding traffic study could be found on LSPMO website www.lakesumtermpo.com/concurrency/index.aspx

D. ***Road Classification***

1. Arterial Roads

An arterial road is a route providing service which is relatively continuous and of relatively high traffic volume, long average trip length, high operating speed and of high mobility importance.

Arterial roads are grouped into the following sub-categories:

a) Principal Arterial
b) Minor Arterial

The classification of roads as arterials shall be based upon criteria established by the Florida Department of Transportation utilizing their most recent, adopted functional classification system.

2. Collector Roads

A collector road is a route providing services which is of relatively moderate traffic volume, moderate trip length and moderate operating speed. Collector roads collect and distribute the traffic between local roads and arterial roads and serves as a linkage between land access and mobility needs.

101 N. Palm Ave., P.O. Box128,
Howey-In-The-Hills, Florida 34737

RE: Mission Rise PUD

Dear: Mr. Harowski

Enclosed please find responses to Staff's comments below in bold. The following items are resubmitted in response to Staff''s comments:

1. Revised Conceptual Land Use Plan
2. Revised Development Agreement
3. Revised Traffic Impact Analysis

PLANNING REVIEW COMMENTS:
CONCEPT PLAN:

1. The project still fails to meet the 15% non-residential land area requirements of the Village Mixed Use land use classification. The stormwater areas allocated to the non-residential use calculation are in fact engineering elements of other land uses. The civic land use, the amenity centers and the park areas can count toward the non-residential land use as proposed. Staff is willing to include the major trail area that falls outside the central collector road right-of-way (so long as this area is not already counted as park area).

   RESPONSE: Please see page 4 of the Conceptual Land Use Plan, which provides distinct details of the non-residential land area proposed within the development. Stormwater areas have been excluded from the calculation. An additional park area is proposed in the southern part of Phase 2.

2. The proposed recreational facilities have been better detailed, but the "regional" park still fails to meet the definition included in the comprehensive plan. Perhaps revising the name to a neighborhood facility is more appropriate given that the park is unlikely to draw significant interest from residents outside the neighborhood.

   RESPONSE: The "regional" park has been renamed to "neighborhood" parks. In turn, the previous "neighborhood parks" have been renamed to "mini" parks. The mini parks are planned as recreational space for the use of the residents of the community. The neighborhood parks are intended to serve the larger community and facilitate access and use of the multiuse trail system.

3. The area in the center designated as regional park is a bonafide park area. The highlighted areas in Phase 3 and at the south end of Phase 2 are just open space and should not be

counted as park area.

RESPONSE: The proposed park areas have been detailed, in terms of the proposed features/amenities on page 3 of the Conceptual Land Use Plan.

4. The applicant has elected to retain stormwater retention areas within the central core area which staff recommended for tree preservation and green space. As noted in our comments last time, the retention ponds are part of the residential land use and should be located there. Be advised this item will be a comment in the staff report.

   RESPONSE: Acknowledged.

5. The park area developments have been detailed but outside of the amenity centers are essentially passive designs. As an additional item, the applicant could consider including some court activities as part of the overall program. We renew our suggestions for repurposing the small residential development at the southeast corner of Phase 2 as a central community facility.

   RESPONSE: Active recreational amenities may be provided in the park area in the southern part of Phase 2. The planned facilities/amenities and design of the park areas are intended to be further detailed at the subdivision/site plan process.

6. The applicant needs to address how the double-frontage lots located in Phase 2 and Phase 3 will be addressed. These lots have access from a parallel street so that the rear yards of these properties will front on the central collector road. Perhaps some sort of buffer such as a landscaped berm or wall is appropriate.

   RESPONSE: The double-frontage lots will have a 10' landscaped buffer along the Collector Road to protect views from this roadway.

7. For the 55-foot-wide lots where no alley access is proposed, what design options are suggested to reduce the impact of a garage-dominate streetscape.

   RESPONSE: In accordance with LDC Section 4.06.02.A.3., at least 25% of the lots in the development will have to provide recessed garages. Further, side-loaded garages are encouraged, as stated in the proposed Development Agreement.

8. The unit totals provided for the phase allocations do not add correctly on the table provided.

   RESPONSE: The unit totals have been revised on the Phase Development Table. Please see page 2 of the Conceptual Land Use Plan.

9. The note to the table needs to be removed. Movement of units between phases will be considered a major amendment of the development agreement. As an alternative the applicant could propose language in the development agreement allowing for a specifc level of shifting units between phases for Town Council consideration.

   RESPONSE: Acknowledged. The note has been removed and language related to movement of units between phases will be added to the Development Agreement.

10. At the last DRC meeting the applicant was requested to provide a timing proposal for construction of the central collector road. The agreement needs to include a proposed timing.

    RESPONSE: Please see the revised Development Agreement.

11. Map 2 seems to be unclear. Phase lines are similar to the symbols for pathways, parking, non-residential areas etc. Perhaps the information can be divided into more maps that will present a clearer summary.

    RESPONSE: Please see page 2 of the Conceptual Land Use Plan where the phase line type has been updated for better readability.

PUD/DEVELOPMENT AGREEMENT:

1. On page two the development agreement states the project is 592 units while the concept plan has 499. These documents need to be in agreement.

   RESPONSE: Please see the revised Development Agreement.

2. On page three the minimum lot width at the building line needs to be 75 feet for the 75 x 120 lot size.

   RESPONSE: Please see the revised Development Agreement.

3. On page three the wetland buffer needs to reflect the town requirements in Sec. 3.02.03C as well as the water management district and DEP requirements. The Town's requirements vary in some respects from the state requirements.

   RESPONSE: Please see the revised Development Agreement.

4. On page four, the language setting the timing for the Town to ask for utility upgrades is still not satisfactory. The proposed 270 days from approval of the plan is still not what we need. The timing should be triggered by the application for final subdivision approval for the phase of the project proposed. The final subdivision approval gives authorization to construct subdivision improvements. The Town should be required to make its needs and commitments at this point. If final subdivision approval is sought by phase, then the Town's opportunity to seek utility line upgrades should attach to each phase.

   RESPONSE: Please see the revised Development Agreement.

5. On page 6, the Town is not requiring all roads to be public. The applicant has the choice to use gated access for the project or for sub-areas within the project. While the collector road should remain with full public access, the applicant may wish to revise the proposed language to preserve the option for gated areas.

   RESPONSE: Please see the revised Development Agreement.

6. On page eleven, the termination language related to sewer service acquisition should be modified to include other options than the CLCDD.

   RESPONSE: Please see the revised Development Agreement.

TRAFFIC IMPACT ASSESSMENT:

1. Defer to the Town engineer comments

   RESPONSE: Acknowledged.

ENGINEERING REVIEW COMMENTS:
TRAFFIC STUDY:

1. The conceptual land use plan states the maximum number of lots is 499. The traffic study and the development agreement states 592 lots. All three need to be the same.

   RESPONSE: The Traffic Impact Analysis and Development Agreement have been revised to state a maximum of 499 units.

2. The methodology states that Lake Hills & Watermark are to be included in the background traffic projection. The submitted study left these developments out.

   RESPONSE: Please see the revised Traffic Impact Analysis.

3. For the future condition intersection analysis for SR 19 & Revels Rd. include right & left turn lanes on SR 19 and a right turn lane on revels.

   RESPONSE: Please see the revised Traffic Impact Analysis.

4. For the future condition intersection analysis for the Spine Rd. and Number 2 Rd., include right & left turn lanes on Number 2 Rd.

   RESPONSE: Please see the revised Traffic Impact Analysis.

5. Per the MPO TIS Guidelines the study needs to include a section for Mitigation Strategies. This needs to address the road segments and intersections with deficiencies. For unsignalized intersections, side streets with deficient delays need to be evaluated for mitigation. Also, the narrow width of Number 2 Road needs to be addressed in this section. While capacity is not an issue, operational safety is.

   RESPONSE: Please see the revised Traffic Impact Analysis.

6. There is no proposed widening of SR 19 at Central Avenue as stated in the study.

   RESPONSE: Please see the revised Traffic Impact Analysis.

7. Based on Lake County's requirement for turn lane widening on Number 2 Road (all on the south side) the length of tapers will need to be twice the standard length.

   RESPONSE: Please see the revised Traffic Impact Analysis.

CONCEPT PLAN:

1. The main N-S spine road and realigned Revels Road should not have driveway connections or on-street parking. They should have full pedestrian accommodation including the multi-use trail and raised crosswalks/speed tables at key points along its length connecting the trail and sidewalks to amenity, open space, and park areas.

   RESPONSE: On-street parking/driveway connections along the Collector Road have been removed from the plan. All lots abutting the Collector Road will have access from another local street or alley.

2. The curb & gutter for the neighborhood roads should 2' wide Type F or Drop Curb.

   RESPONSE: Please see page 6 of the Conceptual Land Use Plan, where the curb and gutter has been updated to 2' width.

Development Agreement

1. Section 1. (f) Wetlands: Wetland impacts and buffering shall also be subject to the Town's land development regulations as well as the St Johns River Water Management District.

   RESPONSE: Please see the revised Development Agreement.

2. Section 1. (j) Transportation, Streets and Sidewalks: Revels Road and the Spine Road must have a minimum 90-foot right-of-way, 2' curb and gutter, and a minimum 32-foot-wide pavement with 12-foot travel lanes and 4' curb lanes.

   RESPONSE: Please see the revised Development Agreement.

Thank you in advance for your consideration of the above information. If you require further information, please do not hesitate to contact me at 607.216.2390 or rlopes@rviplanning.com

Sincerely,

MISSION RISE
PUD REZONE
PROJECT NARRATIVE, COMPREHENSIVE PLAN & REZONE CRITERIA COMPLIANCE
Revised July 2023

I. PROJECT OVERVIEW

On behalf of the Property Owner, ASF TAP FL I, LLC. ("Applicant"), enclosed please find a Rezone Application to amend the Planned Unit Development ("PUD") zoning of the Mission Rise Property ("Property"). The Property consists of 243+/- acres including 4 parcels, PIDs: 02-21-25-0002-000-04800; 34-20-25-0004-000-01003; 34-20-25-0001-000-00100; 27-20-25-0004-000-01200. It is generally located south of Number Two Road, west of SR 19, and east of Silverwood Lane in the southwestern portion of the Town of Howey-in-the-Hills (see Aerial Map, included in the application materials).

The Property is designated as Village Mixed Use (VMU) and Conservation (CON) based on the Town of Howey-in-the-Hills Future Land Use Map. In 2005, the Property was rezoned to PUD per Ordinance 2005-357, with a binding conceptual development plan allowing for development of 400 dwelling units. The Developer's Agreement related to the Rezone was approved in 2007 and expired 10 years later in February 2017. The Property is currently vacant, consisting of pasturelands and wetlands. The Property can be accessed from Number 2 Road and Revels Road.

The purpose of this petition is to rezone the Property from PUD to PUD with a new Conceptual Land Use Plan and Developer's Agreement, to allow for a maximum of **499 dwelling units**, along with supportive amenities and infrastructure. A multi-use trail and parks system as well as a trailhead site is also included as the non-residential use within the PUD.

II. SURROUNDING USES

While a majority of land surrounding the Property is predominantly vacant currently, many properties are entitled for development.

The surrounding lands to the north, south, and west of the Property consist of vacant agricultural lands, groves, or pastures along with a few dispersed single-family residential dwellings. The Reserve (Hillside Grove) PUD was approved to the east in November 2021 (Ordinance 2021-010), allowing for 284 single-family homes, 291-single-family cluster homes, and 153 townhouse units, along with up to 300,000 square feet of commercial uses and 100,000 square feet of institutional uses. Lands to the east of SR 19, known as the Simpson Parcels, was also rezoned to PUD as the Watermark PUD (Ordinance 2022-016). The PUD was approved for 275 single-family dwelling units. Table 1 below provides a comprehensive inventory of the surrounding land use pattern.

TABLE 1: INVENTORY OF SURROUNDING USES

	Future Land Use	Zoning	Existing Land Use
North	Village Mixed Use (VMU), Conservation	AR (Lake County), PUD (The Reserve, Ordinance 2021-010)	ROW (Number 2 Road) Agriculture/Pasture

	(CON), Urban Low Density (Lake County)		
South	Rural Transition (Lake County)	A (Lake County)	Single-family residential
East	Village Mixed Use (VMU), Conservation (CON), Medium Density Residential (MDR)	PUD (The Reserve, Ordinance 2021-010 & Watermark PUD, Ordinance 2022-016), LI	Future Residential (The Reserve (Lennar) PUD/Agriculture (Orange Grove)/Pasture
West	Village Mixed Use (VMU), Conservation (CON)	AG, A (Lake County), R-3 (Lake County)	Agriculture/Pasture/Single-family/Manufactured Home

Based on the development of the adjacent Reserve PUD and Watermark PUD, the surrounding area will be transitioning into denser residential or mixed-use neighborhoods.

III. HISTORY

Following annexation into the Town limits in 2005, the Property was rezoned to PUD per Ordinance 2005-037. The conceptual development plan, approved by the Town Council, authorizes the development of 400 single-family residential units. The Mission Rise Developer's Agreement was approved in February 2007, to establish mutually agreed upon terms regarding the development of the Property. This agreement expired 10 years following the effective date. In 2018, Hanover Properties attempted to secure zoning entitlements through a PUD rezone for 629 single-family residential units with associated amenities and infrastructure on the Property. However, this rezone request was denied by the Town Council.

IV. REZONE REQUEST

The Applicant is requesting to rezone the Property from PUD to PUD with a new Binding Development Plan and Developer's Agreement, to allow for a maximum of 499 dwelling units, along with supportive amenities and infrastructure. A regional multi-use trail and park system and a civic tract is planned as the non-residential component of this PUD, consistent with the requirements of the VMU future land use district.

The proposed density of 499 dwelling units is within the limitations of the base density permitted per the Town's Comprehensive Plan. The proposed density calculations are as follows:

Net Land Area = Total acreage – Waterbodies acreage[1] – Required open space[2] – Remaining Wetlands acreage[3]

[1] Only pre-existing water bodies are to be included in the calculation.
[2] 25% of gross land area has to be reserved as open space. Per Policy 1.2.2 of the Future Land Use Element of the Town's Comprehensive Plan, no more than 50% of the open space requirement can be met with wetlands. Landscaped buffers and stormwater facilities may be counted towards open space if designed in a park-like setting with pedestrian facilities and free-form ponds. Up to

10% of open space may be impervious.
[3] Wetlands not counted towards the open space requirement.

Net Land Area	= 243.3 – 0 – 60.8 – 29.4 = 153.1 acres
Total Yield	= 153.1 x 4 = **612 dwelling units**
Max. Potential Units per FLU	**= 612 dwelling units.**
Max. Units Requested	**= 499 dwelling units.**

Only single-family detached residential units are proposed within the PUD, including a mix of 75-foot-wide and 55-foot-wide lots. The smaller lots are strategically located in the interior of the Property, with larger lots proposed along the boundaries. Compatibility with the adjacent properties will be addressed via sensitive site design that addresses the placement of buffers, open space/preserve areas, and proposed residential development tracts. The proposed density and lot sizes is consistent with the recent approval for the Reserve PUD to the immediate east.

Access to the project will be via Number 2 and Revels Road, as shown on the proposed Conceptual Land Use Plan. The N-S spine roadway (Connector #1) passing through the Property, connecting Number Two Road and SR 19 through Revels Road, will be designed as a two-lane Collector roadway with a 90' right-of-way. This roadway will traverse through the proposed development providing interconnectivity. Additional future potential access points connecting to the Reserve PUD to the east and to the west are also proposed. A full access point is proposed to the south, connecting to Orange Blossom Road.

Connector #1 is designed with a continuous multimodal trail of min. 12' that will provide for pedestrian and bicycle connectivity across the project. The multimodal trail will be designed to capture natural viewsheds along the preserved wetlands, serving as an amenity for the project's residents as well as the Town as a whole. Additional pedestrian paths are planned along stormwater ponds throughout the development forming a system of parks adjacent to the N-S Spine Roadway. The system of multi-use trails and parks are designed to take advantage of the natural features of the site.

Over 25% of open space is provided within the project, consistent with the requirements of the Comprehensive Plan. On-site wetlands have been preserved along with upland buffers to the greatest extent possible, with minimal planned impacts.

V. INFRASTRUCTURE

Transportation:
Traffic & Mobility Consultants have prepared a Transportation Impact Analysis for this project, which is included in the application materials. Please see the report for additional details on the impacts of the proposed development.

Utilities:
Potable water will be provided through the Town's public water supply system. Sanitary sewer service will be secured through the Mission Inn Wastewater Treatment Plant, which is operated by the Central Lakes Community Development District (CDD). The Applicant is working with the Town and CDD to establish

available capacity to serve the project.

Fire and EMS:
Fire and EMS services will be provided by the Lake County Fire District.

Schools:
Lake County School District has reviewed this project (application reviewed for 592 dwelling units, as initially proposed) and provided an Adequate Public Facilities Determination Letter.

VI. ENVIRONMENTAL

An Environmental Assessment for the Property was prepared by Bio-Tech Consulting Inc., which contains information related to soils, land use types, listed and protected flora and fauna species, wetland delineation, and other environmental constraints.

Only 0.3 +/- acres of impacts to the 60.1 +/- acres of on-site wetlands is proposed, as reflected on the proposed Conceptual Land Use Plan. Consistent with Section 3.02.03 of the Land Development Code (LDC), no development is proposed within 25' of a wetland and no building or impervious surface area with the exception of stormwater ponds is planned within 50' of a wetland.

Any impacts to protected/listed species or wetlands will be permitted in accordance with relevant State and Federal guidelines as further described in the Environmental Assessment. Required buffers are maintained from the identified bald eagle's nest.

The project is in the X, A and AE flood zones. The proposed development is designed to have a majority of development, outside of areas prone to flooding per FEMA.

VII. STORMWATER MANAGEMENT

The project will provide adequate stormwater management facilities to ensure water quality and attenuation in accordance with all applicable local, state and federal regulations. It is understood that the Applicant will obtain an Environmental Resource Permit (ERP) from the St. John's River Water Management District (SJRWMD) and any required Section 404 permits from the Florida Department of Environmental Protection (FDEP) prior to construction.

Stormwater runoff from the developed portions of the project will be conveyed to stormwater management ponds. Approximately 26.8+/- acres of the Property are planned as stormwater ponds. The ponds will treat and attenuate the stormwater runoff in accordance with SJRWMD and Town's requirements prior to discharging off site. Stormwater will be detained within the ponds where chemical and physical processes within the ponds will improve water quality. The ponds will attenuate the project's runoff rate by holding back water, reducing the discharge rate.

Information related to proposed impervious surfaces will not be available until detailed design, which will be provided during at later stages of the Town's permitting process. Management of stormwater run-off, considering changes in existing and proposed impervious surfaces, will comply with SJRWMD and the Town of Howey-in-the-Hills requirements.

VIII. FUTURE LAND USE/COMPREHENSIVE PLAN COMPLIANCE

The proposed amendment is consistent with the Goals, Objectives and Policies of the Howey-in-the-Hills County Comprehensive Plan as follows:

Policy 1.1.1: Land Use Designations, Village Mixed Use (VMU)

- *Minimum of 25 acres to apply for this land use. Maximum density of 4 dwelling units per acre, which may be increased to 6 dwelling units per acre if the development includes 20% usable public open space (no wetlands).*

  RESPONSE: The Property is 243 +/- acres in size, meeting the minimum threshold to be developed under the VMU future land use designation. The PUD is proposed for a maximum of 499 dwelling units, that is under the maximum base density of 4 dwelling units per acre, as demonstrated by the calculations included earlier in this narrative.

- *Residential areas shall comprise a minimum of 70% of the net land area and a maximum of 85% of the net land area.*
- *Commercial/non-residential areas shall comprise a minimum of 15% of the net land area and a maximum of 30% of the net land area. This includes community facilities and schools.*

  RESPONSE: 15.2 % of the net land area or 23.2 acres is planned as non-residential areas within the project. This includes a mix of community recreational areas and the system of multi-use trails and parks, with trailhead site. The remainder of the net land area is proposed for residential uses.

- *For developments with more than 100 acres, 5% of the non-residential land shall be dedicated for public/civic buildings.*

  RESPONSE: A 1.2 +/- acre site (5% of non-residential area) along SR 19 is designated as a civil tract which is planned to be developed with a trailhead to support the proposed trail and park system.

- *Commercial/non-residential may be 2 stories with 50% coverage as long as parking and other support facilities (stormwater) are met. The maximum building height is 35 feet.*

  RESPONSE: The project will comply with this requirement.

- *Public recreational uses must occupy a minimum of 10% of the useable open space (no wetlands).*

  RESPONSE: Over 10% of usable open space or 6.8 +/- acres is planned as public recreation areas.

- *A minimum of 25% open space is required.*

  RESPONSE: 28.5% or 69.4 +/- acres is planned as open space within the project. Please note that any areas accredited towards non-residential area requirements are not included in this open space calculation.

- *The maximum building size is 30,000 sq. ft.; unless a special exception is granted to the developer*

by the Town Council.

RESPONSE: The project will comply with the maximum building size requirement of 30,000 SF. No special exception is being requested.

Policy 1.1.2: Village Mixed Use – Primarily intended to create sustainability and maintain the unique charm of the Town, including the provisions of reducing the dependability on the automobile, protecting more open land, and providing quality of life by allowing people to live, work, socialize, and recreate in close proximity. Elementary, middle, and high schools are also permitted in this category.

RESPONSE: The project meets the required mix of residential and non-residential areas for the VMU future land use designation. Non-residential areas are planned as the multi-use trail and park system that will be compatible with the residential development and maximize the natural features of the site. Special emphasis has been paid to multimodal connectivity across the project, especially connecting to the non-residential areas, consistent with the intent of this category.

Policy 1.3.1: Limiting Development in Wetland Areas. The Town shall limit development within all wetland areas to land uses supporting conservation facilities and water-related passive recreation activities, as defined in the Recreation and Open Space Element. Wetlands shall be identified on the Future Land Use Map Series as Conservation lands. No development shall be permitted in wetlands except for conservation or passive recreation uses as defined within policies cited herein.

RESPONSE: On-site wetlands are preserved to the greatest extent feasible with only 0.3 +/- acres of impacts proposed. This impact area is to accommodate the north-south Connector #1, consistent with the Town's 2035 Future Transportation Map.

Policy 1.11.2 Use of Cluster Developments. To promote the conservation of permeable surface area and maintain the Town's rural character, cluster developments shall be promoted by the Town during the development review process. Developers of Mixed Use/Planned Unit Developments and residential subdivisions shall be encouraged to cluster development in order to preserve open space.

RESPONSE: As seen on the proposed Conceptual Land Use Plan, the development is clustered consistent with this policy to allow for maximum preservation of on-site natural wetlands and native habitat. Approximately 25% of the site is wetland habitat, almost all of which is proposed to be preserved along with required upland buffers. 28.5% of open space has been provided within the project, only including 50% of on-site wetlands within the open space calculation. Thus, the development will help conserve permeable surface area and maintain the Town's rural character.

Based on the above analysis, the proposed rezone petition is in substantial compliance with the Goals, Objectives and Policies of the Town's Comprehensive Plan.

IX. REZONING CRITERIA COMPLIANCE

1. Is the rezoning request consistent with the Town's comprehensive plan?

   Yes, the rezoning request is consistent with the Town's Comprehensive Plan, as further detailed in Section VIII above.

2. Describe any changes in circumstances of conditions affecting the property and the surrounding area that support a change in the current zoning.

   The Property is currently zoned PUD. This request does not seek to change the zoning designation of the subject property. Instead, it seeks approval of a new Conceptual Land Use Plan and Developer's Agreement for the Property, as the prior Conceptual Land Use Plan and Developer's Agreement expired in February 2017.

   The proposed density is consistent with the maximum permitted per the underlying future land use of VMU. The proposed development will meet all requirements of the VMU category. Further, at current, development in the surrounding including the Reserve PUD and Watermark PUD is supportive of the requested density. The proposed lot sizes within the project are consistent with the lot sizes approved in the Reserve PUD that is immediately to the east of the Property. It uses clustering principles to allow for wetland preservation and open space enhancement to maximize the natural features of the Property.

   Overall, the proposed rezoning will be consistent with the underlying future land use and mimics the nature of development seen in the surrounding area.

3. Will the proposed rezoning have any negative effects on adjacent properties?

   No, the proposed rezoning will not have a negative effect on adjacent properties. The site has been sensitively designed such that preserved wetlands, stormwater ponds, and open space form a natural buffer adjacent to a majority of the Property's boundaries. Where residential use is proposed adjacent to single-family development to the west, larger 75'-wide-lots are planned. Smaller lots are strategically located in the interior of the Property and adjacent to the Reserve PUD, where similar lot sizes are approved. In terms of connectivity, the Conceptual Land Use Plan depicts the north-south Connector #1. This 90' ROW will connect Number Two Road to SR 19, improving connectivity in the area. Thus, the proposed development will not have any negative effects on adjacent properties and instead serve as a continuation of the existing development pattern with enhanced connectivity.

4. Will the proposed rezoning have any impacts upon natural resources?

   No, the proposed rezoning will not have any impacts upon natural resources. Please see the attached Environmental Assessment by Bio-Tech Consulting Inc. which provides detailed information of natural resources on site.

   On-site wetlands have been preserved to the greatest extent feasible, along with upland buffers as required by the Town's Comprehensive Plan. Any impacts to listed species and their habitat will be permitted through relevant State and Federal agencies. Required buffers have been maintained from the identified bald eagle's nest on site, in accordance with the U.S Fish and Wildlife Service's management plans.

5. Will the proposed rezoning have any impacts upon adjacent properties?

   The proposed rezoning is a continuance of development seen in the adjacent area in recent years with approval of the Reserve PUD and Watermark PUD. Consistent with the intent of

PUDs, the proposed Conceptual Land Use Plan proposes a clustered development with greater extent of environmental protection, open space, and public recreational areas. The proposed development meets all requirements of the VMU future land use designation, as described in Section VIII of this narrative. Further, the project will help interconnectivity within the area through the inclusion of the north-south Connector #1. This roadway is to be designed as a two-lane roadway with dedicated continuous min. 12' multimodal trail to ensure both vehicular and pedestrian connectivity from Number Two Road down to Revels Road and SR 19.

6. Will the rezoning create any impacts on services including schools, transportation, utilities, stormwater management and solid waste disposal?

   - **Schools - An Adequate School Facilities Determination Letter has been provided by the Lake County School District.**

   - **Transportation –Transportation & Mobility Consultants, Inc. has prepared a Traffic Impact Analysis based on a methodology approved by the Town.**

   - **Utilities – Potable water will be provided through the Town's public water supply system; the Town has indicated adequate capacity to serve the project. Sanitary sewer service will be secured through the Mission Inn Wastewater Treatment Plant, which is operated by the Central Lakes Community Development District (CDD). The Applicant is working with the CDD to establish available capacity to serve the project.**

   - **Stormwater Management – Please see Section VII of this narrative. Stormwater systems will be designed to manage stormwater on-site and receive applicable permits from the SJRWMD and the Town, prior to construction.**

   - **Solid Waste – Solid waste service will be provided through the Town.**

7. Are there any mistakes in the assignment of the current zoning classification?

   No, the proposed rezoning is not to change the current zoning classification of PUD, but instead to seek approval of a new Conceptual Land Use Plan and Developer's Agreement for the Mission Rise Property.

X. CONCLUSION

The proposed petition seeks approval of a new Conceptual Land Use Plan and Developer's Agreement for the Mission Rise site. The proposed development will continue to meet all requirements of the VMU future land use designation, be consistent with the requirements of the LDC and uphold the Goals, Objectives and Policies of the Town of Howey-in-the-Hills' Comprehensive Plan. For these reasons, the Applicant respectfully requests approval of rezoning and reserves the right to modify this application through the review process.

RVi Planning + Landscape Architecture

MISSION RISE PUD REZONE

Town of Howey-in-the-Hills Town Council

January 22, 2024

PROJECT TEAM

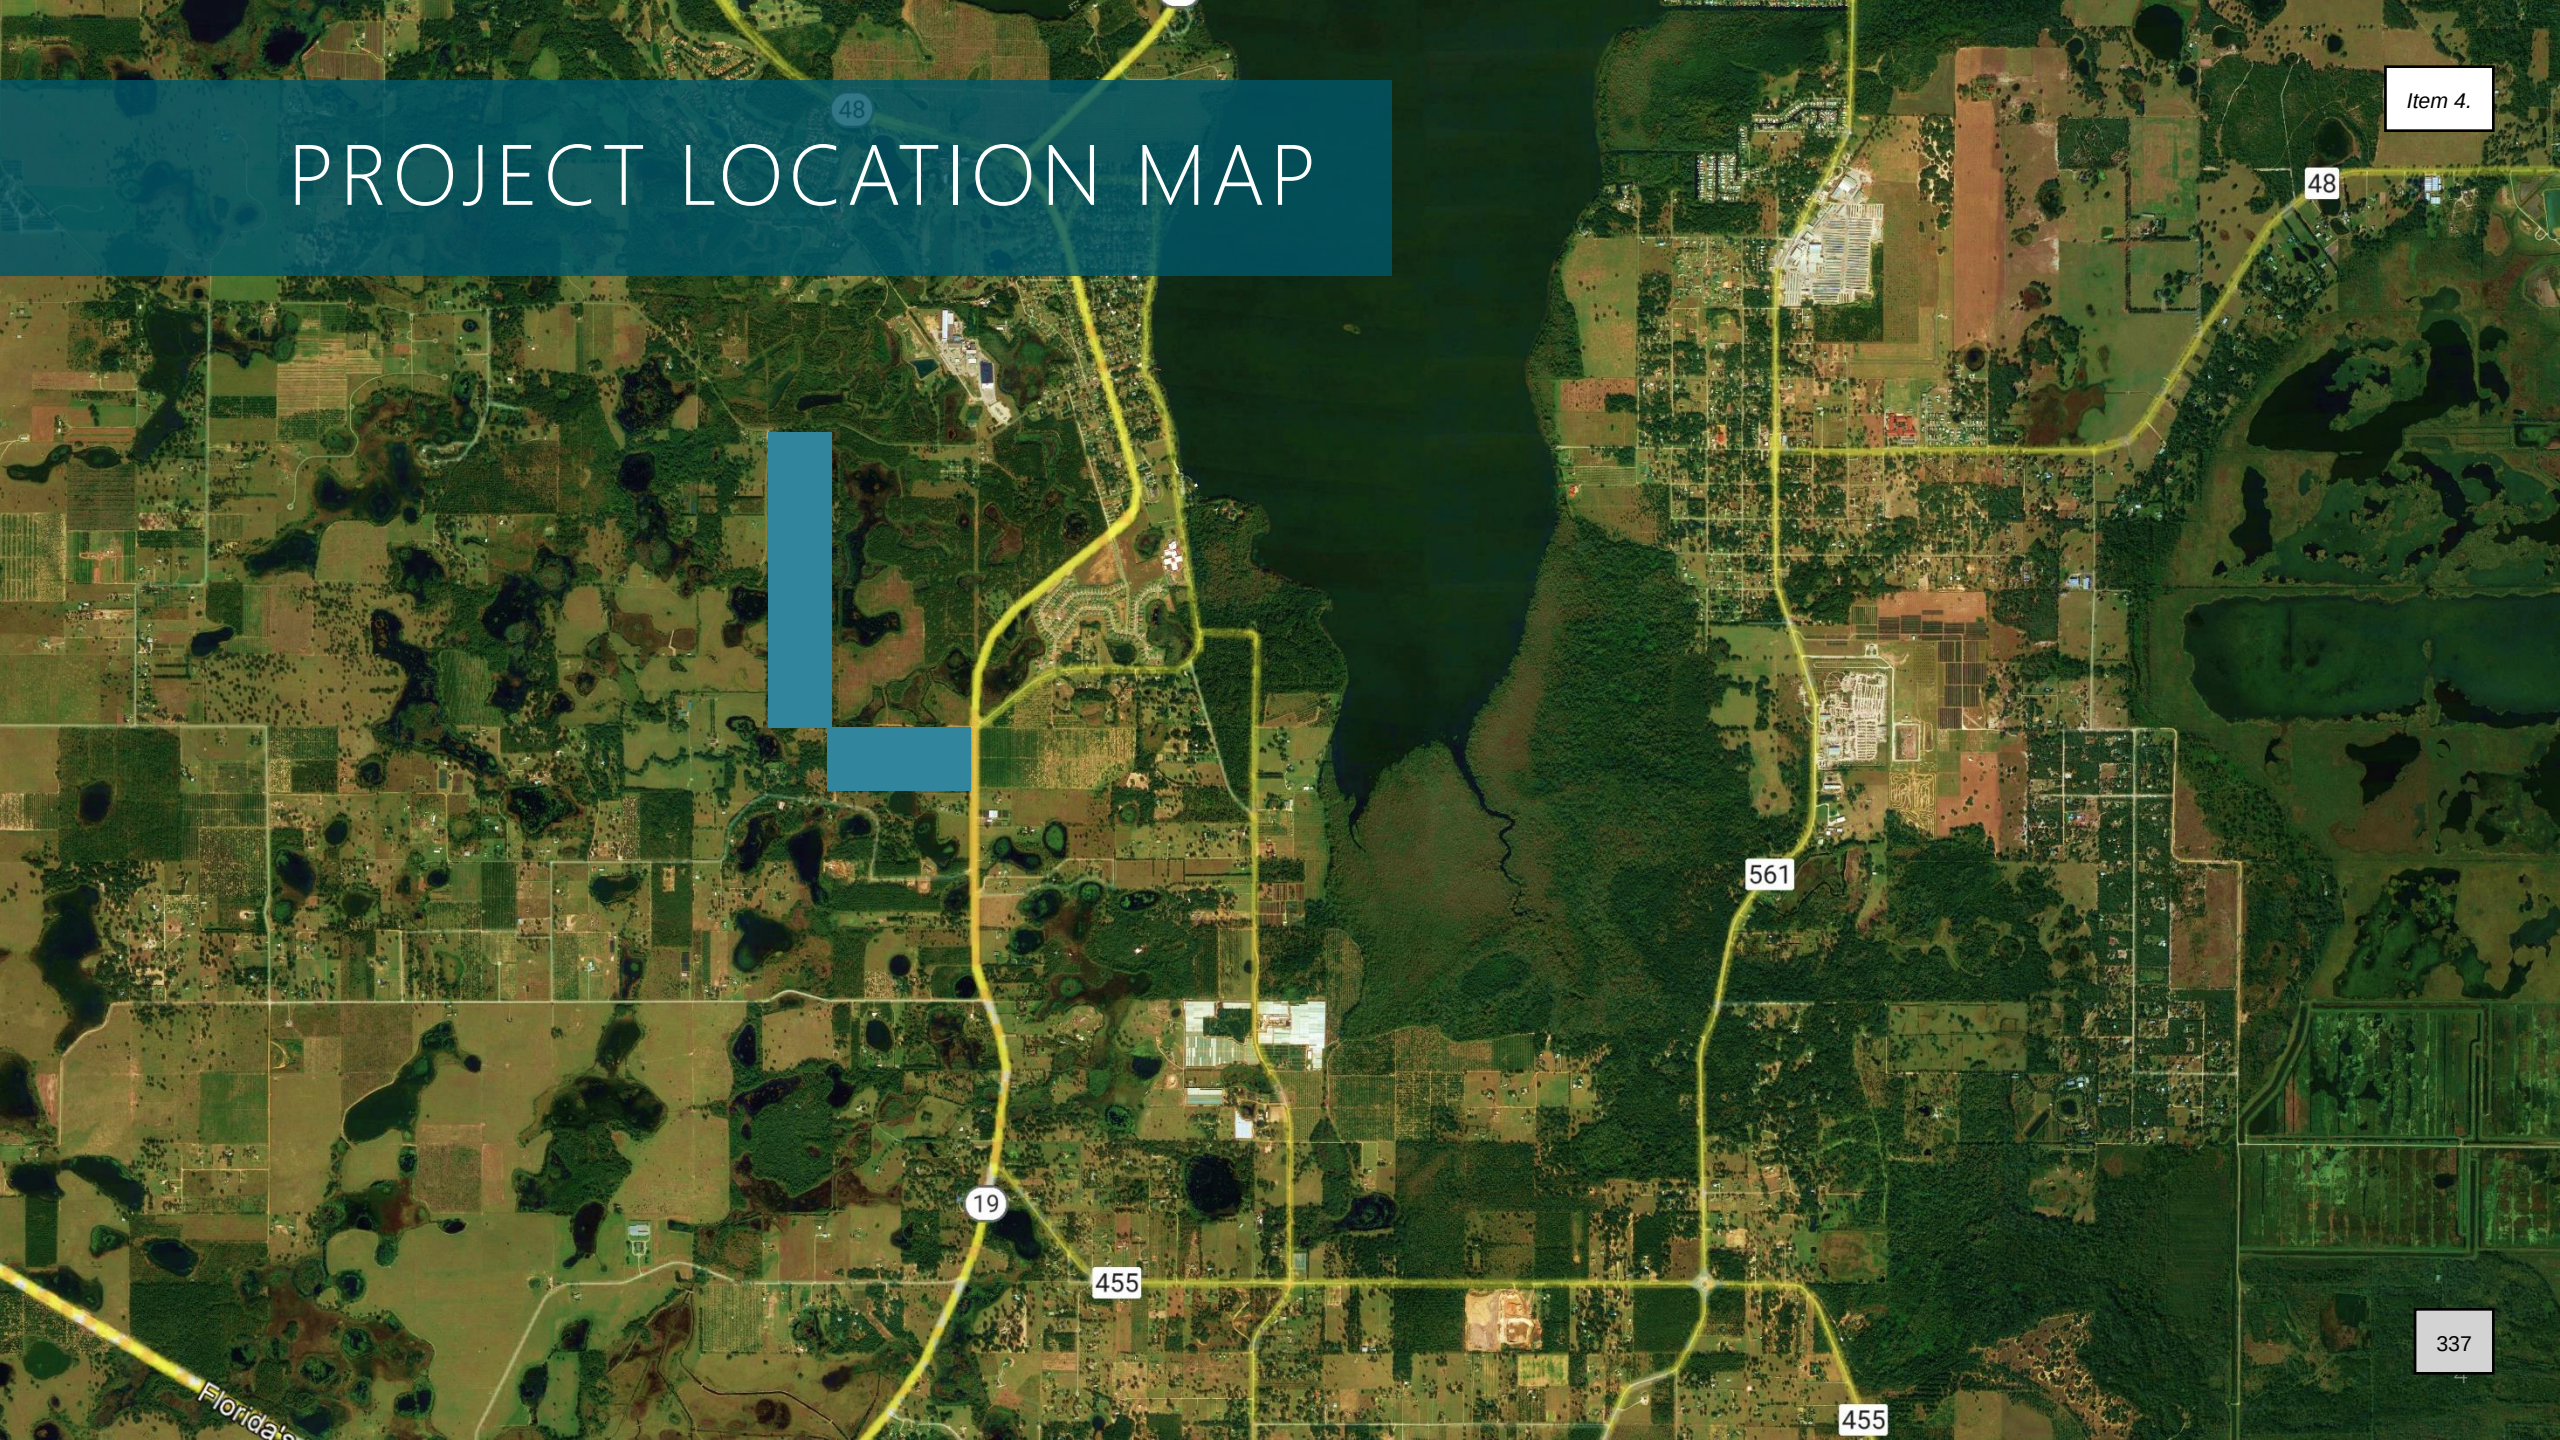
MISSION RISE PUD

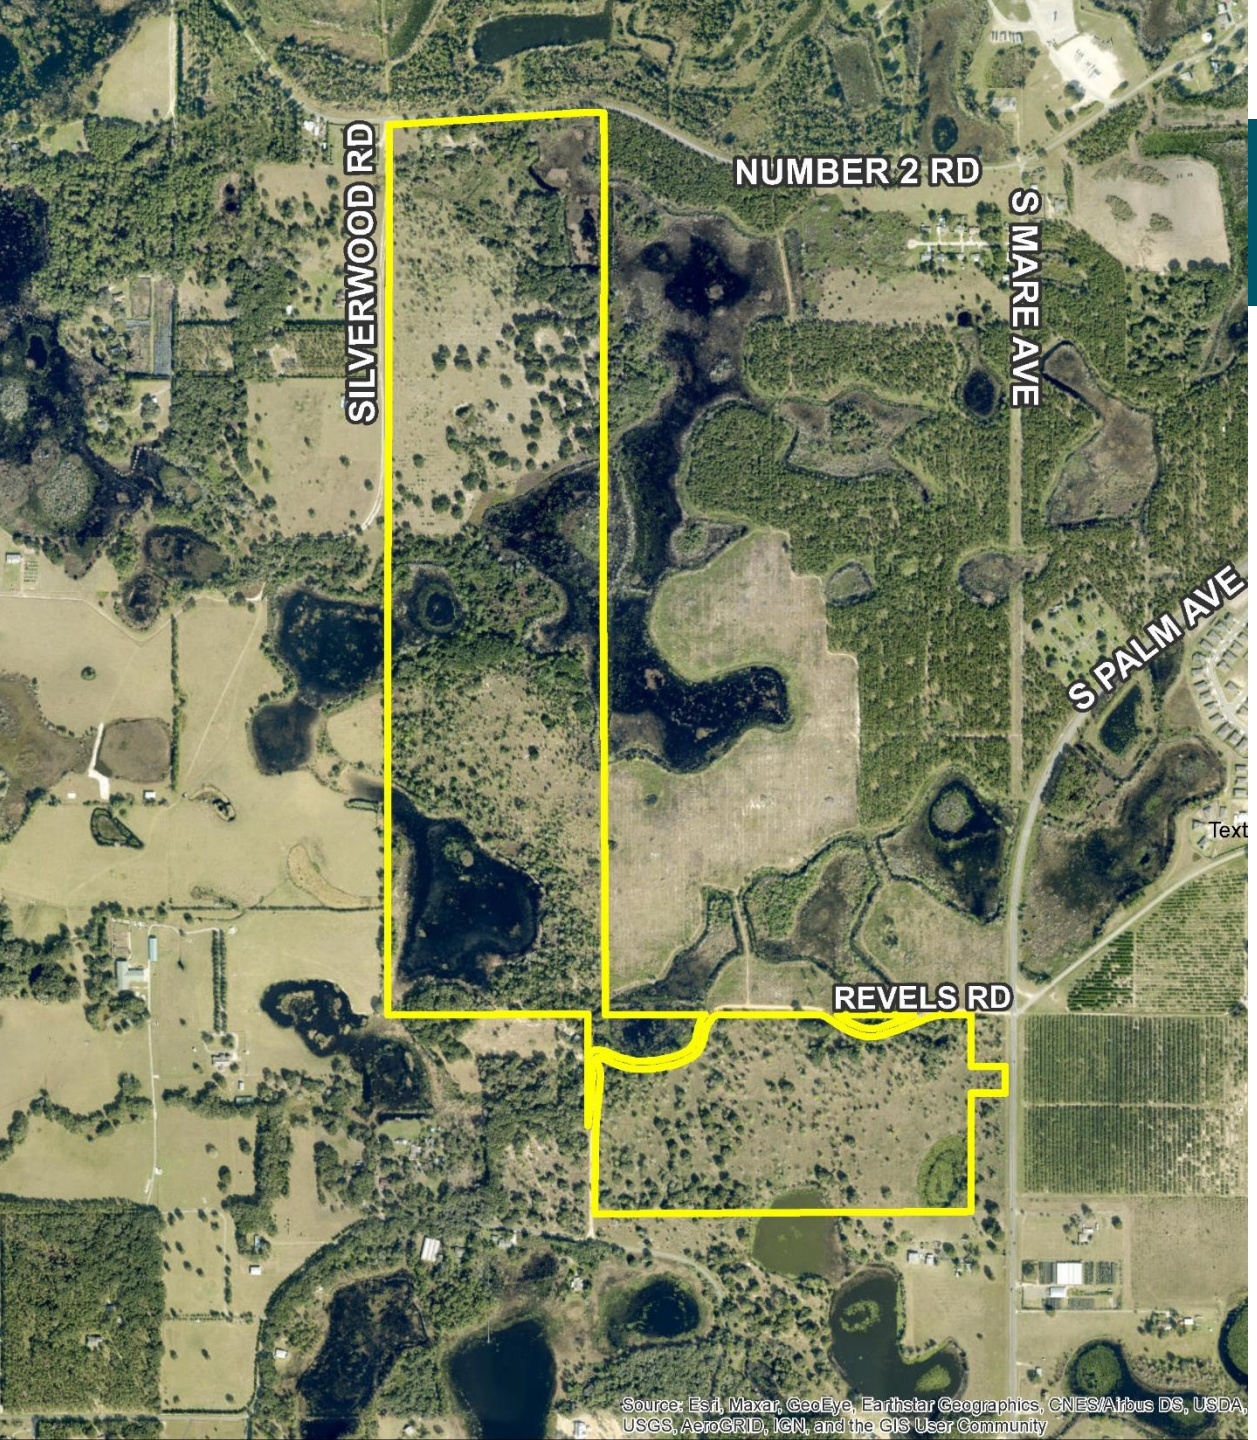
- Jason Humm, ASF TAP FL I LLC
- Jonathan Huels, Lowndes
- Mike Ripley, Land Advisors
- Jacqueline St. Juste, Atwell
- Charlotte Davidson, Traffic Mobility Consultants
- Mark Ausley, Bio-Tech Consulting
- Jack Caldwell, Alexis Crespo & Rhea Lopes, RVi Planning + Landscape Architecture

REQUEST SUMMARY

Rezone 243 acres from PUD to PUD to allow for a maximum of 499 single-family dwelling units, public and private recreational amenities, 90+/- acres of combined open space and wetland preservation areas, and substantial public benefits via binding Developers Agreement

PROJECT LOCATION MAP





SITE OVERVIEW

- 243+/- acres
- Accessed from S.R. 19 and Number 2 Road
- Currently vacant
- FLU: Village Mixed Use (VMU)
- Existing Zoning: Planned Unit Development (PUD)
  - Ordinance 2005-357 – 400 DUs
  - Developer's Agreement Expired in 2017

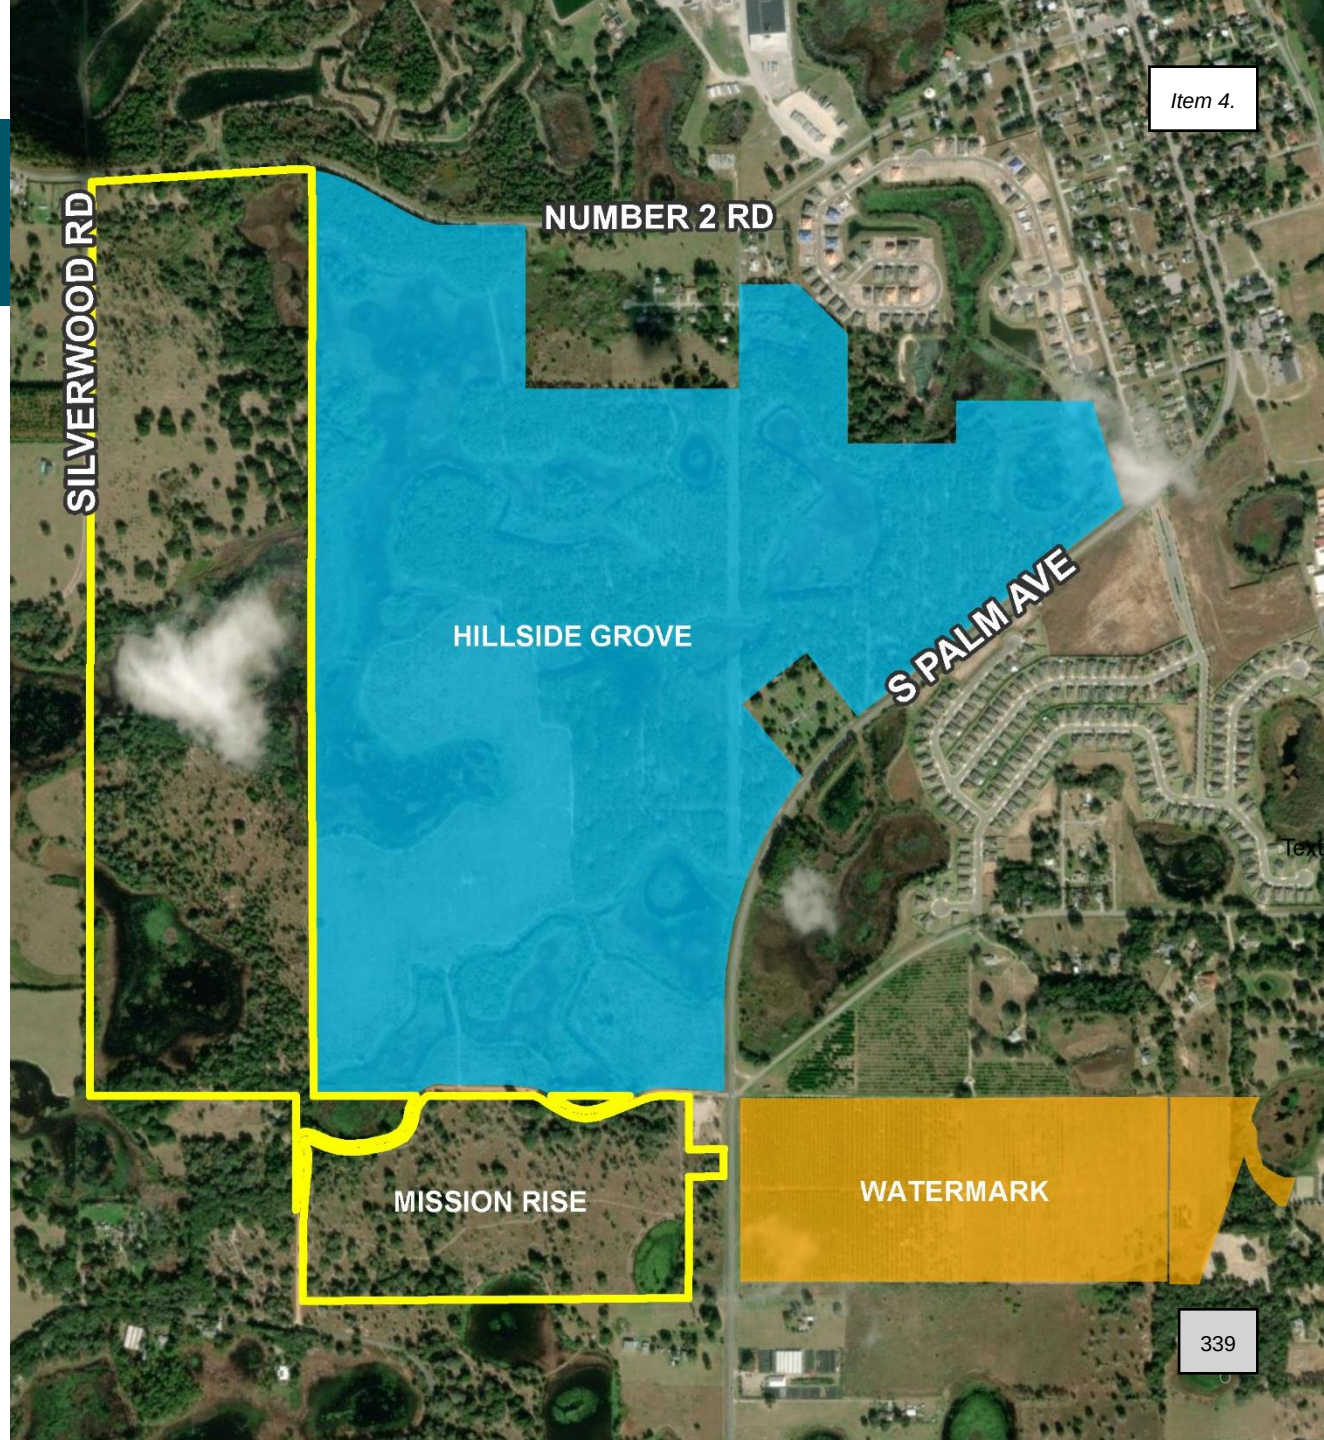
SURROUNDING PUDS

Hillside Grove (The Reserve)

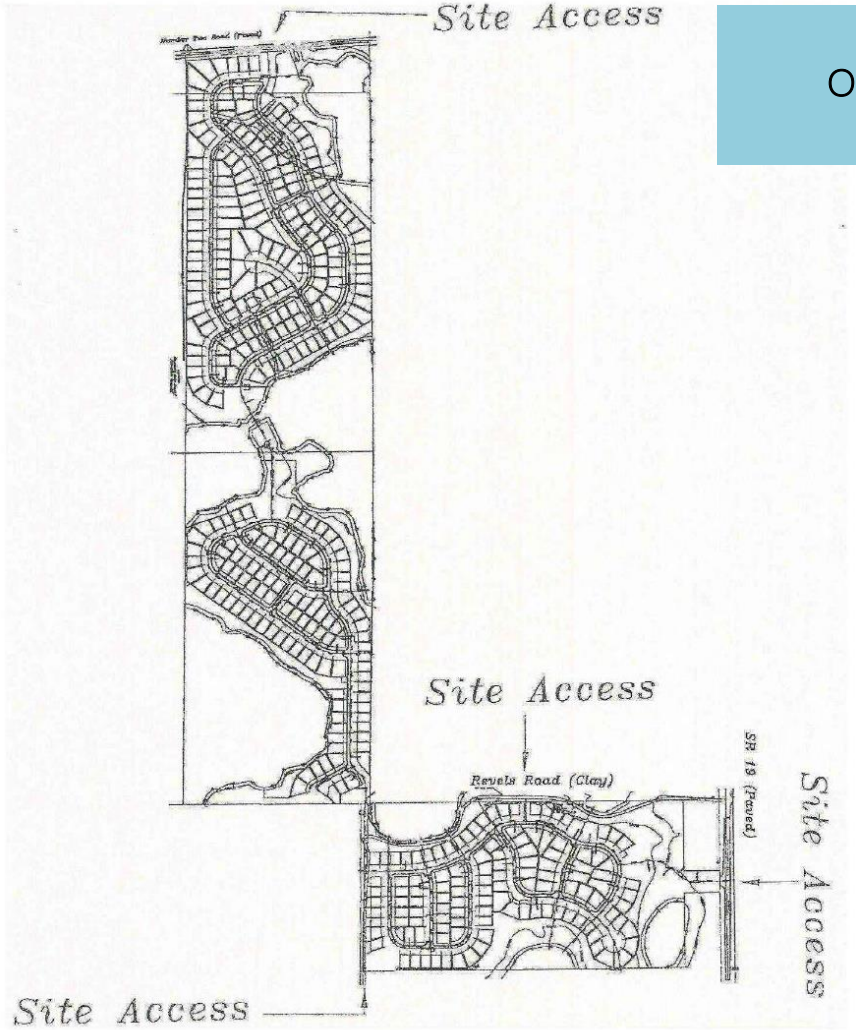
- FLU: Village Mixed Use (VMU)
- Zoning: Planned Unit Development (PUD)
- Entitlements:
  - 740 SFD Residential
  - 105,716 SF Office/Storage
  - 300,000 SF Retail/Office
  - 100,000 SF Institutional
- Lot Sizes
  - 50 x 80
  - 27 x 115
  - 50 x 115

Watermark (Simpsons Parcel)

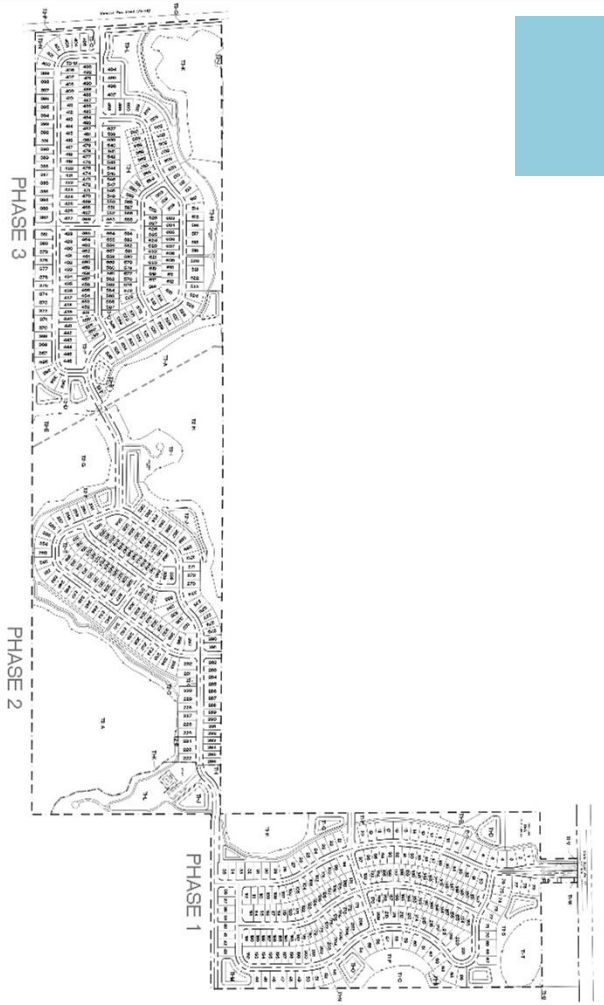
- FLU: Medium Density Residential (MDR)
- Zoning: Planned Unit Development (PUD)
- Entitlements:
  - 225 SFD Residential
- Lot Sizes
  - 70 x 120
  - 80 x 120



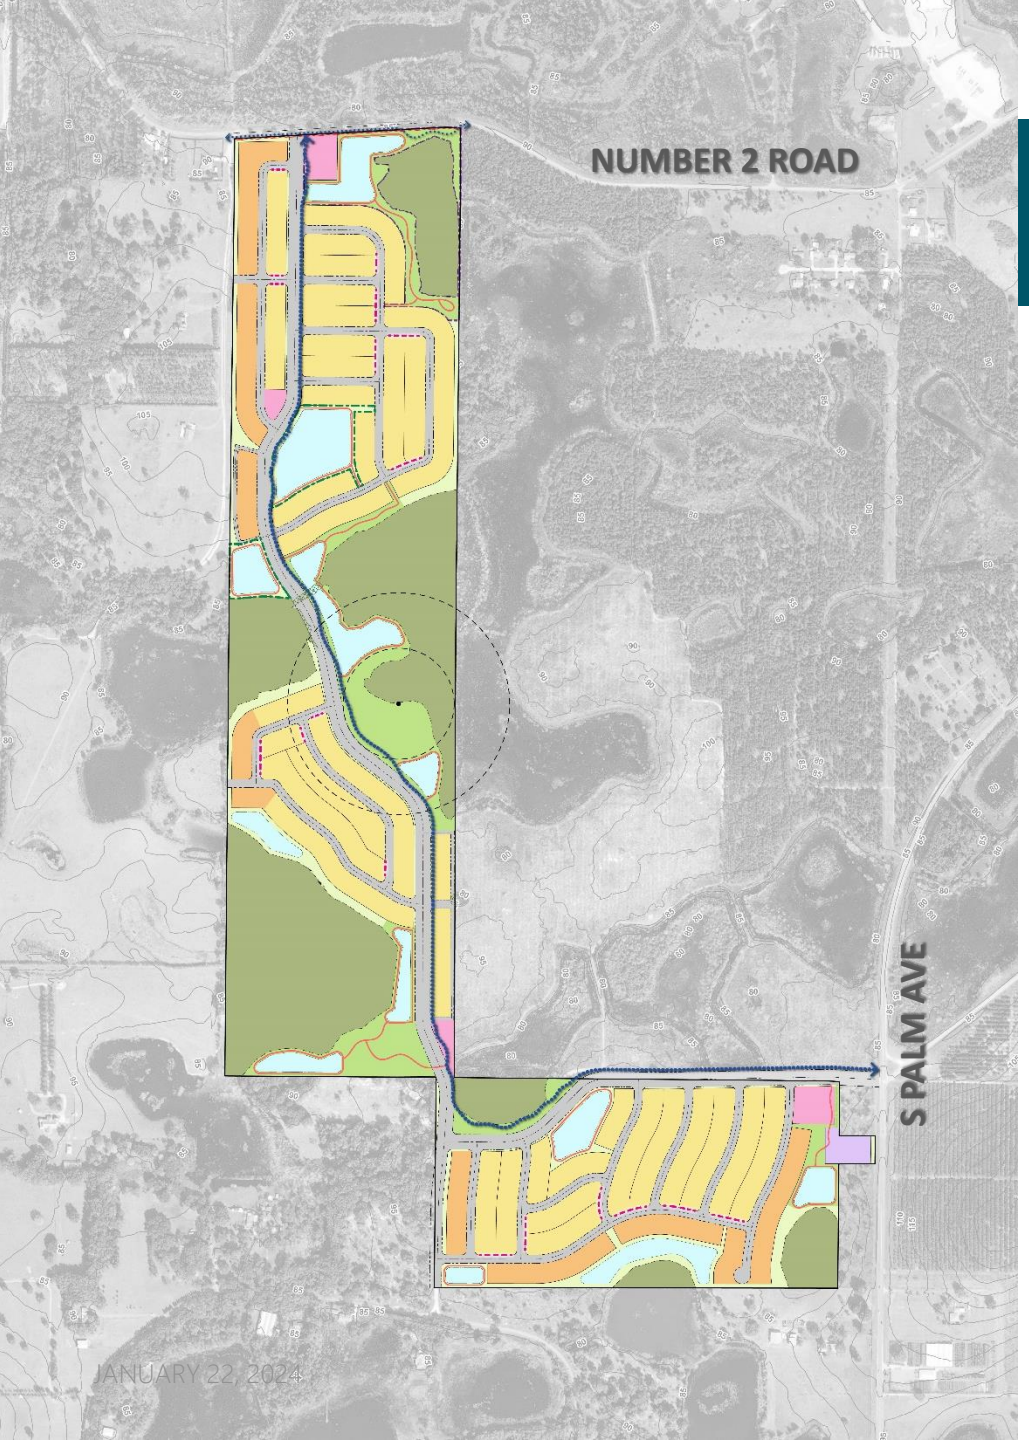
PREVIOUS APPROVALS



2005 Zoning
Ordinance 2005-037
400 SFD LOTS



2019 Zoning
(Not Approved)
629 SFD LOTS



REQUEST SUMMARY

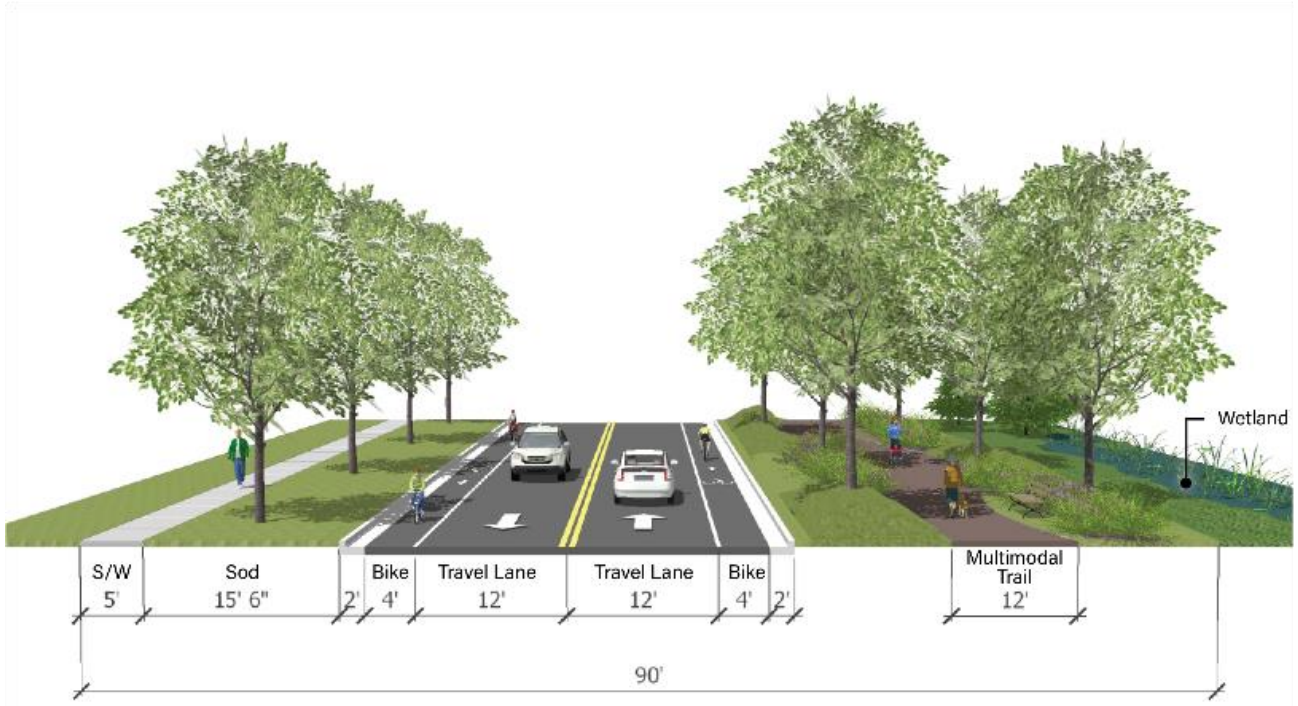
- Rezone to PUD with Binding Conceptual Land Use Plan & Developer's Agreement
- Residential Program
  - Maximum of 499 DU
  - Net Density: 3.3 DU/NA (Net Acreage: 153 AC)
- Non-Residential Program
  - Regional Multi-use Trail with Trail Head & 2 Public Parks
- Project Highlights
  - Open Space: 69.4 AC (28.5%)
  - 99% Wetland Preservation (±60.1 AC) & Eagle's Nest Buffer
  - On-site Amenities
  - 90' Wide Collector Roadway
  - Intersection Improvements at SR 19 & Revels Road

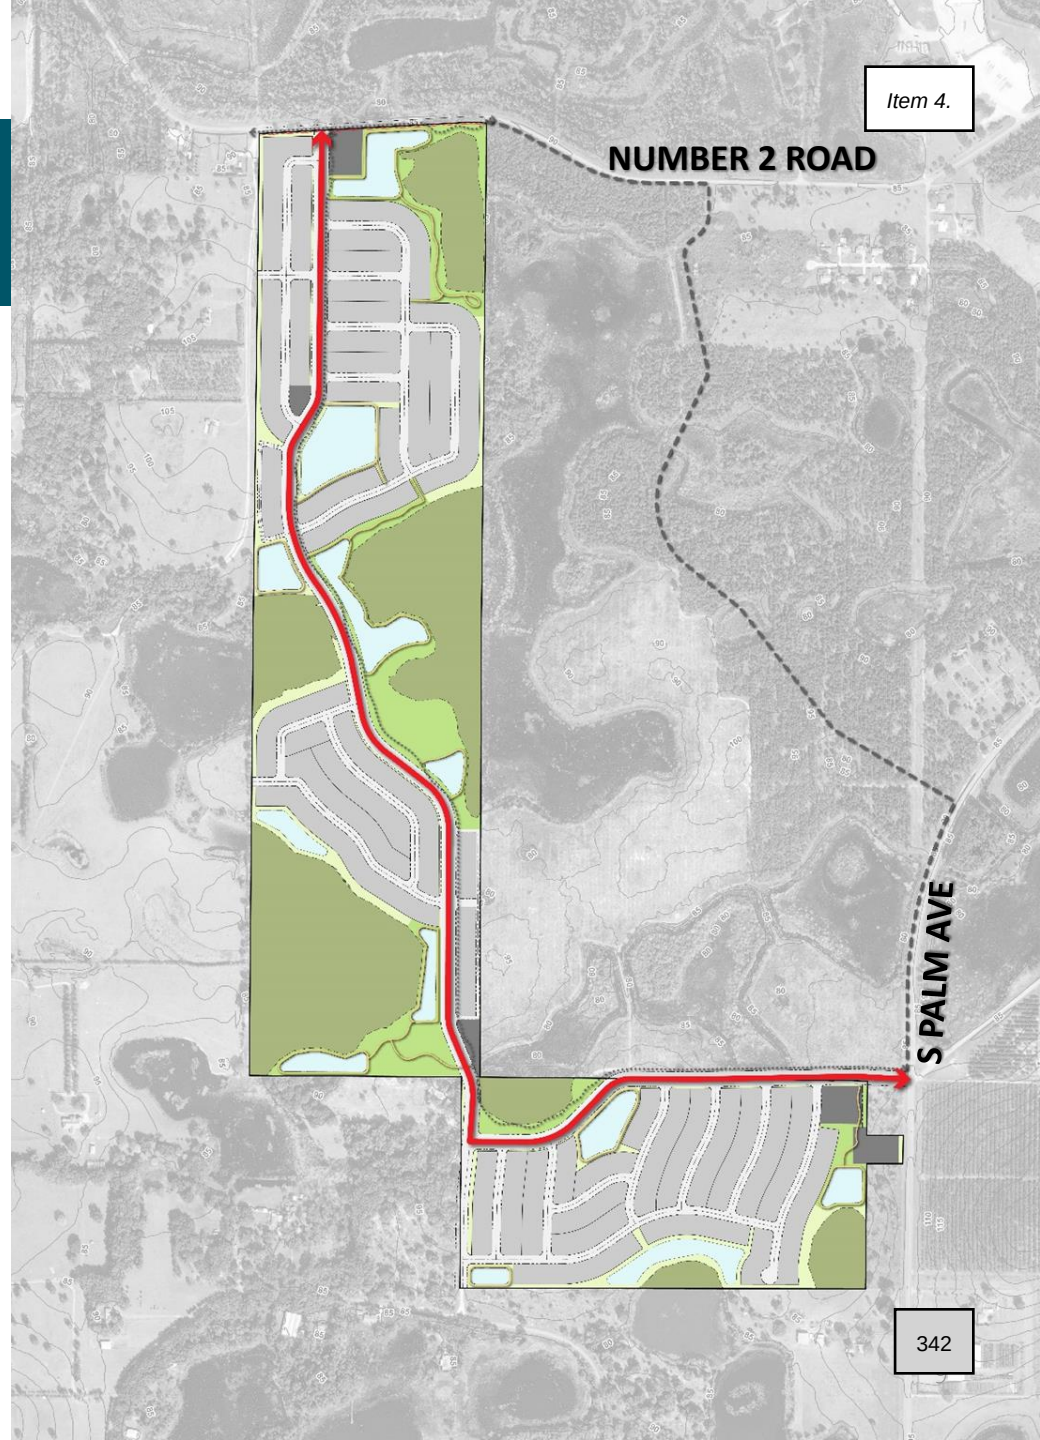
COLLECTOR ROAD

- Required per the Comprehensive Plan

SPINE ROAD

90' ROW WITH BIKE LANE & 12' MULTIMODAL TRAIL





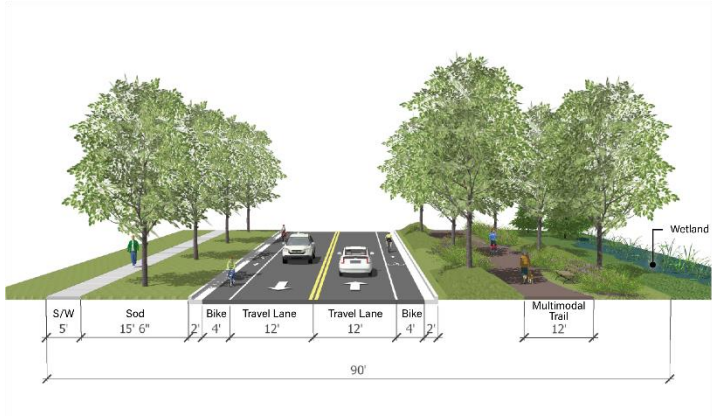
NON-RESIDENTIAL PROGRAM

- Site not suitable for commercial uses
  - Lack of frontage on major roadway
  - Shape of the property
  - Proximity to larger residential lots
- Multimodal Trail & Park System
- Trailhead along S.R. 19

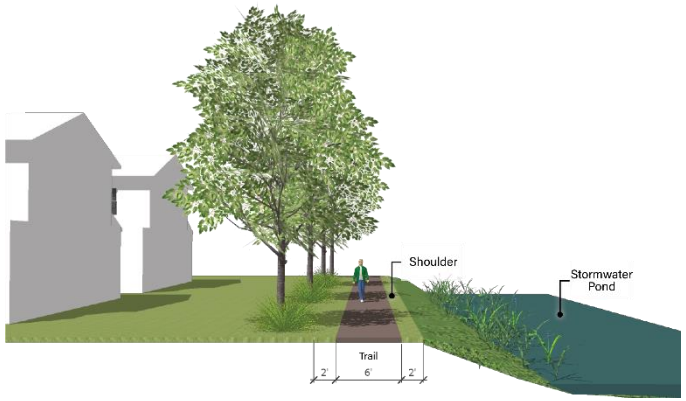
MULTI-USE TRAIL & PARKS SYSTEM

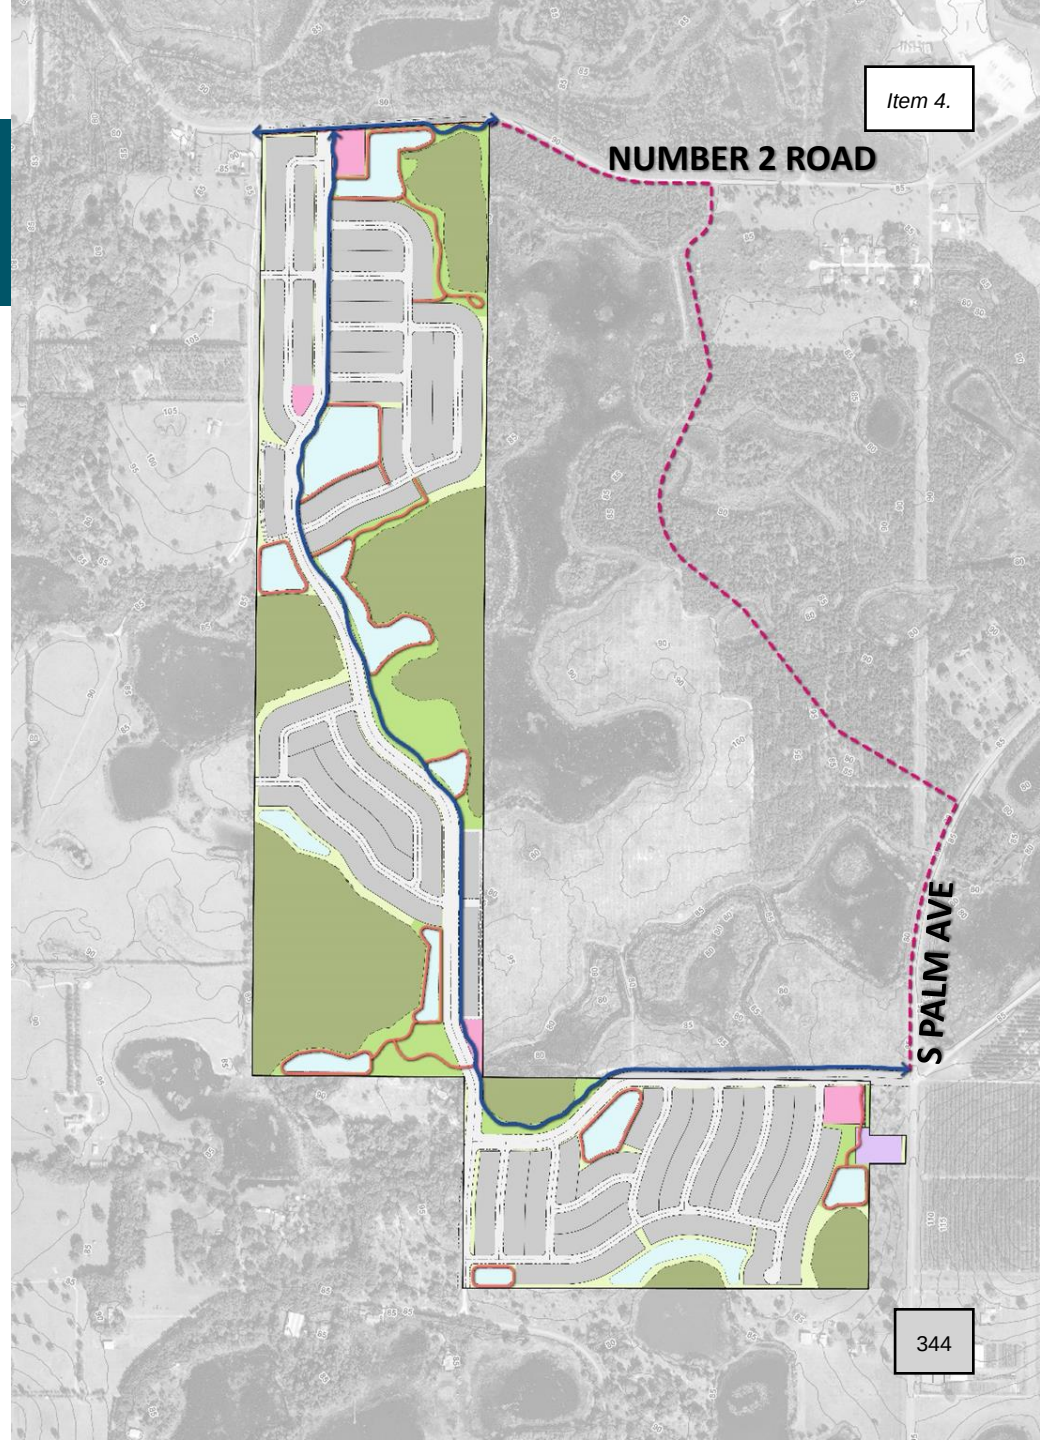
- Min. 12’ wide
- Located near the Collector Roadway
- Viewsheds along Preserved Wetlands, Ponds
- Pedestrian Trails along Ponds

SPINE ROAD
90’ ROW WITH BIKE LANE & 12’ MULTIMODAL TRAIL



PEDESTRIAN PATH
6’ TRAIL





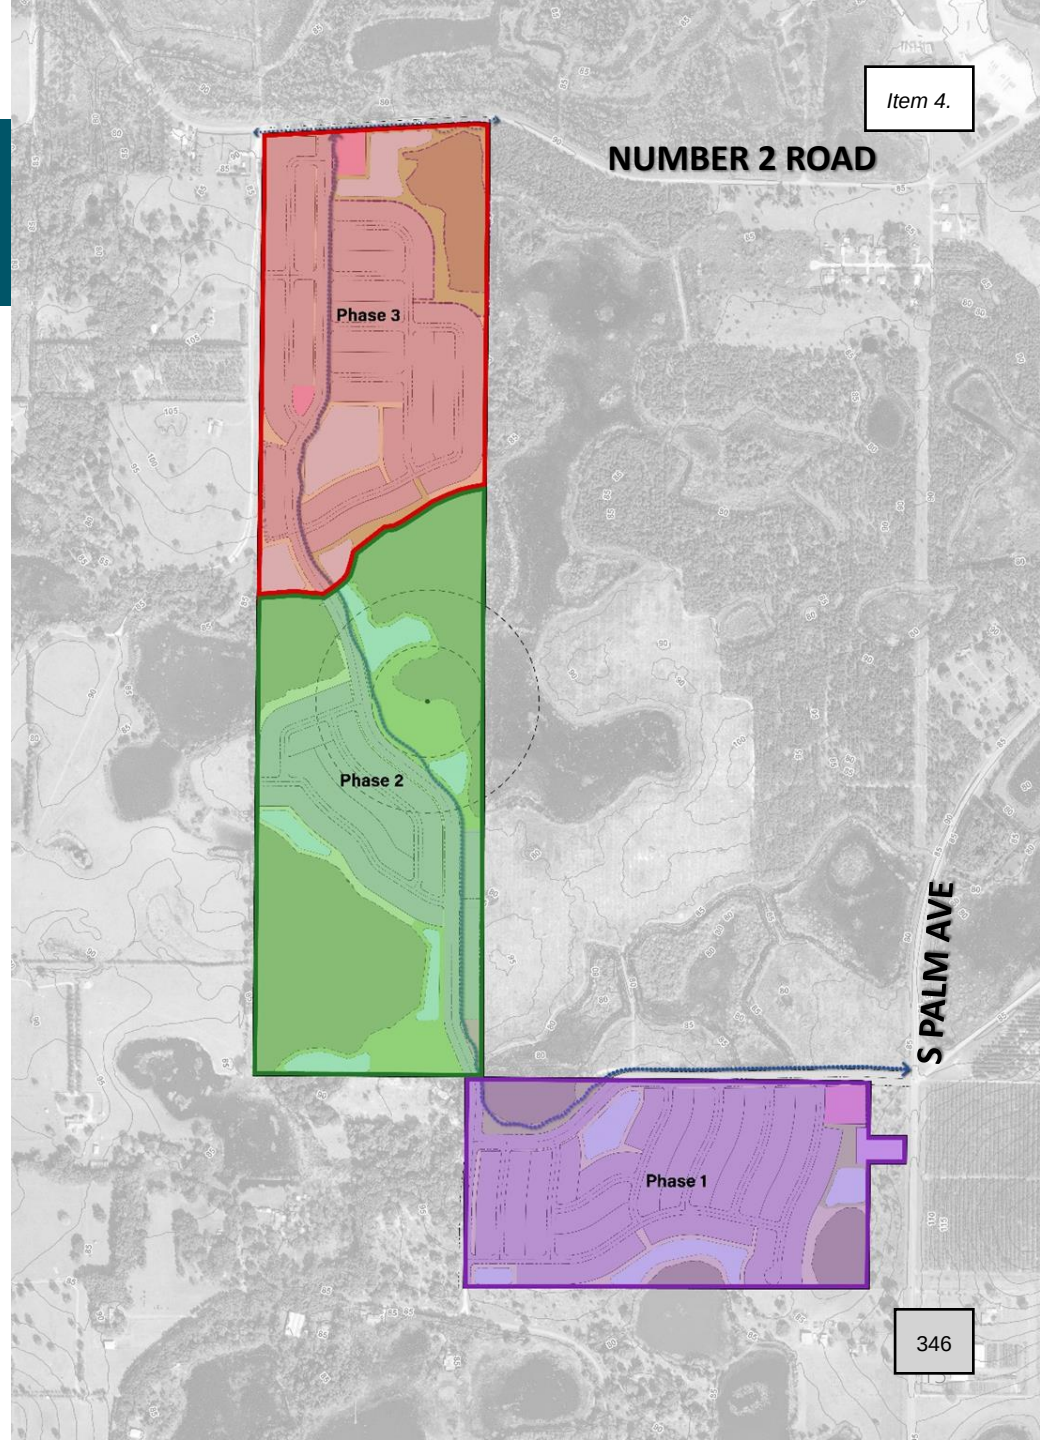
MULTI-USE TRAIL & PARKS SYSTEM

- Programmed Park Space
  - Trails
  - Benches
  - Picnic Tables

- Amenitized Trail head Site at S.R. 19 with Phase 1 of Project
  - Parking
  - Restrooms
  - Bike Maintenance Station
  - Cooling Station
  - Water Station
  - Benches
  - Picnic Tables

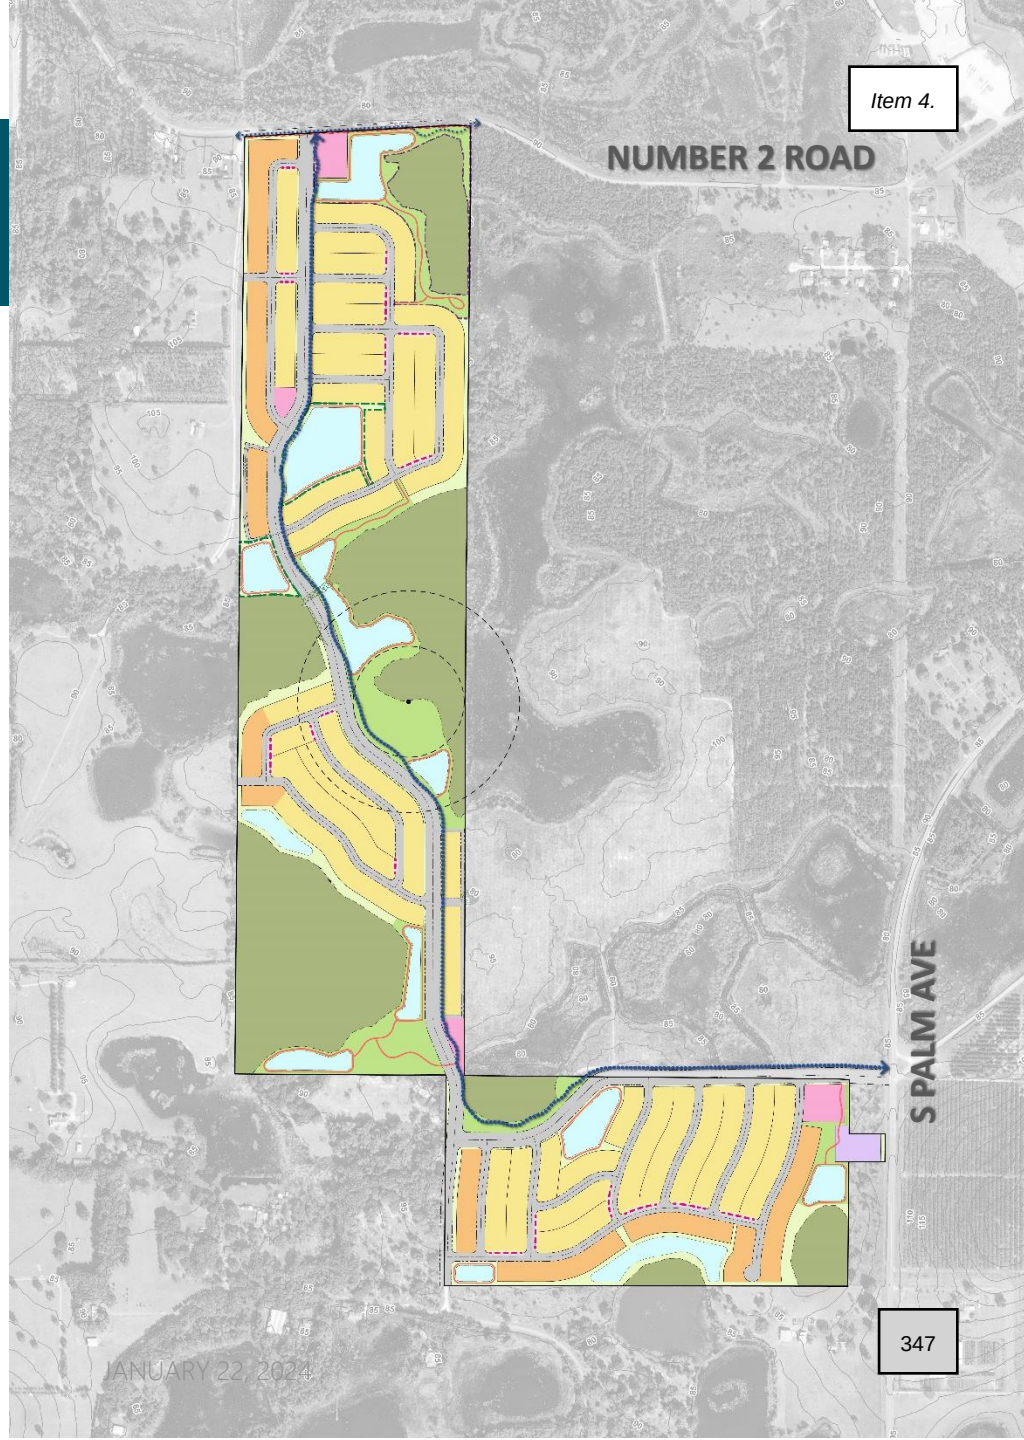
RESIDENTIAL PROGRAM

- 499 DU (Maximum 611 permitted per FLU)
- All Single-Family Detached Lots
- 3 Phases of Development
- Access from S.R. 19 & Number 2 Road
- Connectivity across Property through Spine Road (Collector Road per the Comprehensive Plan)
- Realignment of Revels Road
- Gated Access to Orange Blossom Road as directed by Town/County



PROPOSED LOT DESIGN

- 75’-wide Lots along all the Perimeters
- 55’-wide Lots only internal to the Development



JANUARY 22, 2024

DESIGNED FOR COMPATIBILITY

- Design Standards to Preserve Views from the Collector Road:
  - Limited units on Collector Road with Alley Access
  - 10’ Landscaped Buffer along Collector Road for Double-Frontage Lots

- Design Standards to prevent Monotony (DA):
  - Requirements for a variety of materials
  - Block-face restrictions
  - Specific Standards will be finalized at Subdivision Plans Stage

DESIGN WITH NATURE

- Development Footprint: 50% of the site
- 99% Wetlands Preservation
- 1% Wetland Impact for Collector Roadway Crossing
- Multi-use trail and park spaces located around preserved wetlands & vegetated areas
- Tree Preservation per LDC
- 330’ no-development buffer around eagle’s nest

INFRASTRUCTURE

- Development Agreement to address all infrastructure needs of the Project
- Traffic
  - Project includes 90’ ROW Collector Road – to be constructed by the Developer in Phases
  - Commitment for intersection improvement at Revels Road & S.R. 19
- Stormwater
  - Master Stormwater System (Public & Private Components)
- Utilities
  - Potable Water – Town of Howey-in-the-Hills
  - Wastewater – Mission Inn CDD or other options
- Publicly Accessible Multiuse trail & Parks

CONSISTENCY WITH THE COMPREHENSIVE PLAN

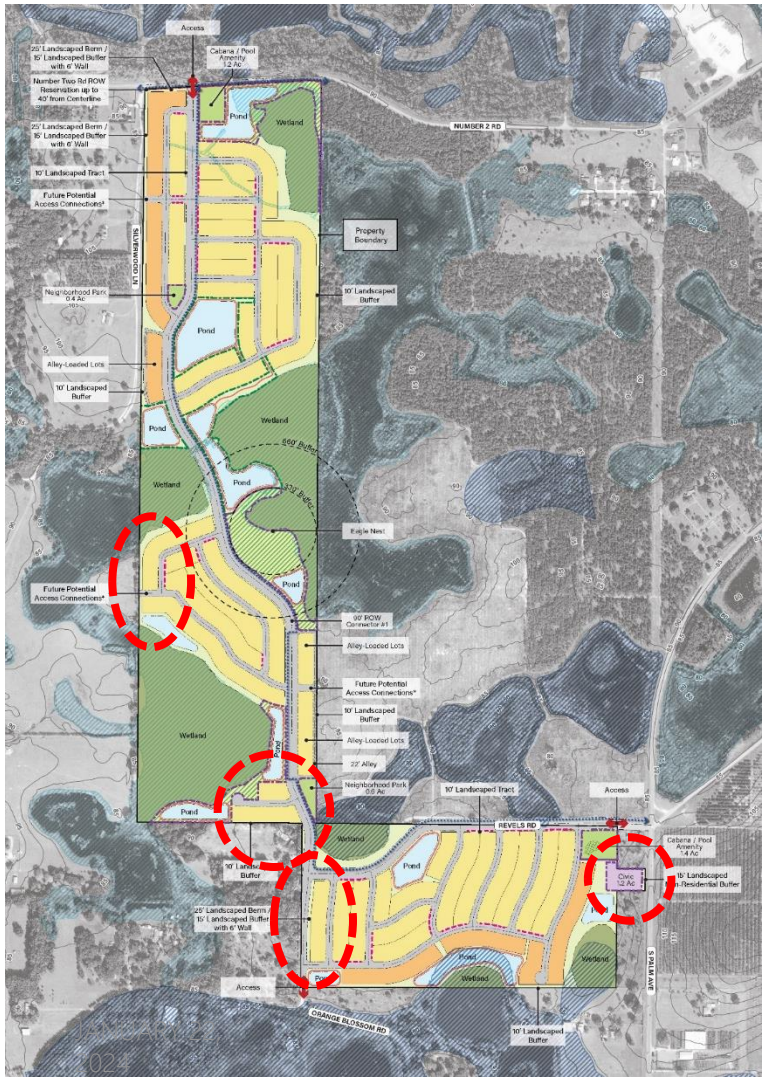
- VMU District – Increased Density with Enhanced Requirements for Open Space, Non-Residential Areas, Civic Space

Detail	VMU Requirement	Proposal
Residential Areas	85% NLA (max.) = 130.1 AC	84.5% NLA = 129.3 AC
Non-Residential Areas	15% NLA (min.) = 22.97 AC	15.2% NLA = 23.2 AC
Open Space	25% GA (min.) = 60.8 AC	28.5% GA = 69.4 AC
Public Recreational Area	10% of usable open space (min.) = 3.9 AC	17.4% of usable open space = 6.8 AC
Public/Civic Space	5% of non-residential land (min.) = 1.14 AC	5.7% of non-residential land = 1.3 AC

- **Policy 1.11.2:** Use of Cluster Developments. To promote the conservation of permeable surface area and maintain the Town's rural character, ***cluster developments shall be promoted by the Town*** during the development review process. Developers of Mixed Use/Planned Unit Developments and residential subdivisions shall be encouraged to cluster development in order to preserve open space.

- 90' Collector Roadway – per 2035 Future Transportation Map

PLAN EVOLUTION



Community Workshop August '23

Current Plan

CONCLUSION

MISSION RISE PUD

- CONSISTENT with the Comprehensive Plan & LDC
- Additional measures for COMPATIBILITY with adjacent properties
- ENVIRONMENTALLY-SENSITIVE site design
- SUBSTANTIAL PUBLIC BENEFITS via roadway improvements, public parks & multi-use trail system

THANK YOU!

QUESTIONS?

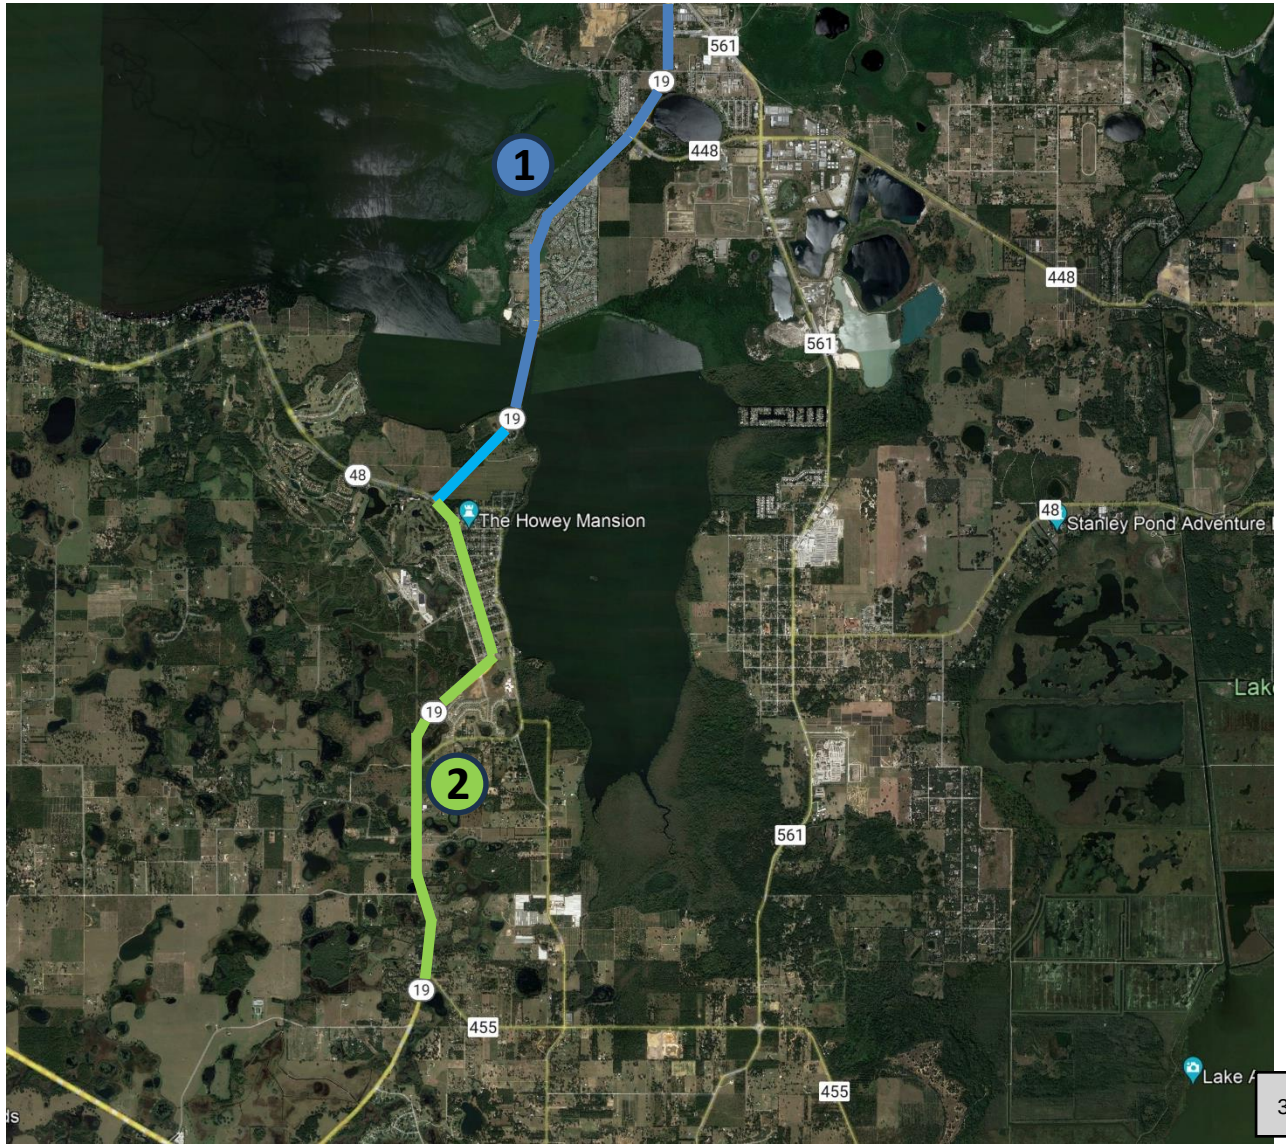
Planned Transportation Improvements

1. SR 19 from CR 48 to CR 561
   Widen to 4 Lanes

   Environmental, PD&E, Preliminary Engineering

2. SR 19 from CR 48 to CR 455
   Widen to 4 Lanes

   Partially Funded
   Per Lake-Sumter MPO TIP



BENEFITS OF CLUSTERING

- Reduced Development Footprint; Greater Open Space
- Lesser Landscaped Areas; Greater Natural Vegetation Preserve
- Smaller Lawns; Lower Irrigation Costs
- Community Gathering Space

Sean O'Keefe, Town Manager
Town of Howey-in-the-Hills
101 N. Palm Avenue
Howey-in-the-Hills, FL 34737

RE: Hillside Groves SR 19 Access Connection

Dear Sean:

This letter is a follow up to the town council meeting of January 8, 2024 regarding the SR 19 access connection for Hillside Groves. At that meeting I reported on our prior meeting with FDOT regarding the width of the proposed access connection (three lanes versus a four lane divided boulevard). As I discussed with the council, FDOT would only permit the three lane connection at this time, and that they would reevaluate the connection configuration when the commercial portion of the project came forward for permitting.

In my report to the council, I also looked at a roundabout as an alternate type of connection, and it was my opinion that it was preferable to the standard turn lanes as shown in the construction plans. During our discussion council members expressed concerns that changing the connection at this point in the process would create delays, and that there would be an increase in cost. My working assumptions during the meeting were that a roundabout would cost less than the turn lane option, and that, while it might cause some delay, it would not be inordinately long. At the conclusion of our discussion I told the council that I would work with FDOT and the developer to determine if a roundabout would be a viable alternative.

I have since had communications with the developer's consultants and with FDOT, and it turns out that my assumptions were not correct. The project engineers have provided us with cost estimates for both options and they assert that a roundabout would be costlier. I've also been in contact with FDOT, and while they are generally positive, they seem to be bound by their processes and procedures. It looks like the roundabout option would result in a time delay to the project. Based on those findings, my recommendation is to continue forward with the access connection as shown in the approved construction plans, and issue a Local Government Letter of Authorization for the FDOT Notice of Intent to Issue Permit (NOI).

It should be noted that this intersection will likely require signalization in the future. Also, the primary need for a signal will be project generated traffic. Accordingly, the majority of the cost of the signal should be borne by the project developer. As the later phases of Hillside Groves (residential and commercial) come forward in the future, this intersection will be reevaluated by the town and FDOT. We will certainly look closely into future signalization.

Sincerely,

Donald A. Griffey, P.E.

NOTES:

Bid Qualifications:

1. This proposal is valid no more than 15 days from bid due date.
2. Due to the current landscape of the utility market, all underground utility pricing is subject to change and will be priced at time of shipping.
3. This proposal is based on Engineered plans provided by CW Engineering dated August 2022.
4. Proposal excludes mobilization (included in mass grading bid). If additional mobilizations are required due to situations outside of HBC's control additional costs may occur.
5. Permits, bonds and fees are excluded.
6. Construction layout is included for HBC scope of work only. Staking of utilities including power, telecommunications, gas, and irrigation is excluded.
7. Certified as-builts included for HBC scope of work only. Record drawings are by others and excluded.
8. Density testing is included.
9. Clearing unit price is based upon open burning onsite. Pit burning and/or grinding is excluded.
10. Topo to be field verified before breaking ground.
11. Dewatering is included. Any unforeseen circumstances such as springs, wells, extreme weather conditions, acts of God and any other conditions that were not readily apparent at time of proposal are excluded. Temporary holding ponds, settling basins, and chemical testing of discharge water are also excluded.
12. Proposal is based on all on-site excavating materials being suitable for use in site fills.
13. Unsuitable, contaminated, muck or hazardous material removal and/or replacement is excluded. Over excavation of any clay soils is excluded.
14. Dust control included in earthwork operations consists of one water truck while earthwork crew is onsite. Additional dust control required in addition to one truck is excluded.
15. Retaining wall is quoted as a standard gray color segmental block retaining wall with geogrid tie-back system. Adequacy of the proposed system for site specific conditions cannot be verified until structural design is performed after awarding of contract. Screen wall excluded.
16. HBC is not responsible for the cleanup and/or disposal of waste generated by any subcontractor not contracted by HBC.
17. Proposal includes fine grading ROW one time only. Regrading due to utility installation not included within HBC's contract scope is excluded.
18. Sidewalk quantity included is for open tract areas only based upon attached exhibit. All other sidewalk is excluded.
19. Sodding quantity included is based upon attached exhibit and includes pond slopes, site slopes 4:1 and greater, swales, etc. Any sodding beyond the limits of the attached exhibit is excluded.
20. Conduit crossings and telephone relocation are excluded.
21. Irrigation, landscaping, fencing and hardscaping are excluded.
22. Well abandonment is excluded.
23. Price given for conservation signs as each, not shown in plans.
24. This proposal is furnished as a complete scope of work as defined above and shall be contracted to HBC in its entirety. Individual line items shall not be removed without prior authorization of HBC. Items not defined in this proposal shall be considered excluded.
25. Payment terms shall be per the Contract agreement or no later than 30 days after issuance of HBC invoice.
26. Prices quoted are based on current FOB refinery prices on liquid asphalt and diesel fuel at $4.50 including taxs & fees. Such prices are not guaranteed by the major oil company's and are subject to sudden adjustment during the time of the contract. The base prices for liquid asphalt and fuel are based on the current FDOT index. If the cost of these materials increase the owner/contractor will make adjustments to the contract based on the index. Hughes Brothers Construction, Inc. will make adjustments to the contract based on this index.
27. HBC warrants all installation and workmanship for the above-referenced project in accordance with the plans, specifications, and other relevant documents for a period of one year from date of final completion. This warranty excludes normal wear and tear, product abuse/misuse, material defects, alterations of any kind performed by persons other than HBC, and damage resulting from vandalism and acts of God.
