AGENDA

REGULAR COUNCIL MEETING OF THE TOWN OF JEROME
COUNCIL CHAMBERS, JEROME TOWN HALL
600 CLARK STREET, JEROME, ARIZONA

TUESDAY, NOVEMBER 10, 2026, AT 7:00 PM

Due to the length of this meeting, Council may recess and reconvene at the time and date announced.

Pursuant to A.R.S. 38-431.02 notice is hereby given to the members of the Council and to the General Public that the Jerome Town Council plans to hold the above meeting. Persons with a disability may request an accommodation such as a sign language interpreter by contacting Kristen Muenz, Deputy Clerk, at 928-634-7943. Requests should be made early enough to allow time to arrange the accommodation. For TYY access, call the Arizona Relay Service at 800-367-8939 and ask for the Town of Jerome at 928-634-7943.

Notice is hereby given that pursuant to A.R.S. 1-602.A.9, subject to certain specified statutory exceptions, parents have a right to consent before the State or any of its political subdivisions make a video or audio recording of a minor child. Meetings of the Town Council are audio and/or video recorded, and, as a result, proceedings in which children are present may be subject to such recording. Parents in order to exercise their rights may either file written consent with the Town Clerk to such recording, or take personal action to ensure that their child or children are not present when a recording may be made. If a child is present at the time a recording is made, the Town will assume that the rights afforded parents pursuant to A.R.S. 1-602.A.9 have been waived.

We acknowledge we are on the traditional lands of the Yavapai and Apache People and we, the Town of Jerome, pay respect to the elders both past and present.

1. CALL TO ORDER/ROLL CALL
Mayor/Chairperson to call meeting to order
Town Clerk to call and record the roll.

2. COUNCIL REORGANIZATION SESSION

A. Acknowledgement of Outgoing Councilmembers and List of Accomplishments

Mayor Barber will acknowledge the contributions of the outgoing councilmembers and summarize accomplishments of the past two years.

B. Oath of Office

Councilmembers-elect will Take the Oath of Office.

C. Consider the Selection of a Mayor and Vice-Mayor

Council will select the Mayor and Vice-Mayor by Nomination and Vote.

D. Consider Appointment of a Councilmember Representative to the Various Northern Arizona Council of Governments (NACOG) Committees

Council will appoint a member to represent the Town on NACOG committees.

3. FINANCIAL REPORTS

2027 - ($0.00) Expended To-Date; and Discussion Regarding the Proposal from SEC for Middle Park ADA Accessibility Features

Council will discuss, and may provide staff direction.

B. Consider Proposal from Southwestern Environmental Consultants, Inc., for the Development Design of ADA Accessible Features at the Middle Park

Council will consider and may approve the proposal.

10. NEW BUSINESS

Discussion/Possible Action

A. Consideration of Opting in to the Most Recent Opioid Settlements, Referred to as, the "Albertsons Settlement" and Authorizing the Mayor and Town Manager / Clerk to Execute All Documents Related to These Settlements

The Council will consider and may approve the opting in and authorization of the Mayor and Town Manager to execute all documents.

B. Consider Removing from the Table and Further Discussion / Possible Staff Direction Regarding Park Closure Times, Dogs and Alcohol in the Parks and on the Steps, and Other Park and Noise Ordinance Policy Considerations

Council will remove the item from the table, and may discuss and consider alternatives, along with providing staff direction.

C. Consider Removing from the Table and Further Discussion Regarding the Installation of Security Cameras on Public Safety Facilities

Council will remove the item from the table, and may discuss staff's proposal regarding the installation of security cameras and Councilmember Sheffield's proposed ordinance language.

D. Consider Removing from the Table; and then, Consideration of Proposed Fire Department Bylaw Updates

Council will consider removing from the table, and may approve the staff proposed updates to the Fire Department bylaws.

E. Consider Proposal Agreement from Willdan for a Complete Water and Wastewater Rate Analysis and Authorizing the Town Manager to Take the Necessary Steps to Execute the Agreement

Council will consider and may approve the agreement and authorize the Town Manager to execute said agreement.

F. Update on Procurement Officer's Response to the Formal Bid Protest and Supplement to the Formal Bid Protest from Technology Construction, Inc.

Council will review the Procurement Officer's response.

G. Consider Approval of a Water Infrastructure Easement Agreement between the Town and Freeport Minerals Corporation, and Authorizing the Town Manager or Mayor to Take the Necessary Steps to Execute the Agreement, Pending Town Attorney Approval of Form

Council will consider and may approve the Water Infrastructure Easement Agreement.

H. Consideration of a Special Event Permit Application from the Jerome Historical Society for A Celebration of Life (Steve Hopkins)

Council will consider and may approve the special event application.

I. Consideration of a Construction Contract and Bonds Between the Town of Jerome and Fann Environmental, LLC, for Wastewater Treatment Plant Improvements, and Authorizing the Mayor and Manager / Clerk to Take the Necessary Steps to Execute the Contract on Behalf of the Town of Jerome as Approved by the Town Attorney

Council will consider and may approve the contract and bonds and authorize the Mayor and Manager / Clerk to Execute the Contract.

J. Consider Change Order #1 to the Construction Contract for the Jerome Wastewater Treatment Plant Improvements Resulting in an Increase to the Contract in the Amount of, $449,114.63

Council will consider and may approve Change Order #1.

K. Consider Selection of a New Enterprise Resource Planning (ERP) Financial Software Suite Vendor and Entering into an Agreement with the Selected Vendor for a New ERP System

Council will consider and may approve the selection of a New ERP vendor and authorize the Mayor or Town Manager to execute the agreement on behalf of the Town following legal review.

11. TO AND FROM THE COUNCIL

Council may direct staff regarding items to be placed on a future agenda.

12. ADJOURNMENT

The Town Council may recess the public meeting and convene in Executive Session for the purpose of discussion or consultation for legal advice with the Town Attorney, who may participate telephonically, regarding any item listed on this agenda pursuant to A.R.S. § 38-431.03 (A)(3). The Chair reserves the right, with the consent of Council, to take items on the agenda out of order.

CERTIFICATION OF POSTING OF NOTICE

The undersigned hereby certifies that this notice and agenda was posted at the following locations on or before 7 p.m. on _____ in accordance with the statement filed by the Jerome Town Council with the Jerome Town Clerk: (1) 970 Gulch Road, side of Gulch Fire Station, exterior posting case; (2) 600 Clark Street, Jerome Town Hall, exterior posting case; (3) 120 Main Street, Jerome Post office, interior posting case.

_____

Kristen Muenz, Deputy Town Clerk

A. Reports by the Town Manager / Clerk, Deputy Clerk, Utilities Clerk, Accounting Clerk, Public Works Director, Building Inspector, Library Director, Municipal Magistrate, Police Chief, Fire Chief and Council Members, Which in the Case of Council Member's Reports will be Limited to a Summary of Current Events and will Involve no Action

Council will consider and may approve the staff reports.

MONTHLY STAFF REPORT TO THE MAYOR AND COUNCIL

Brett Klein, Town Manager/Clerk

My activities have included:

- Conducted the HR onboarding of new PD employee Neal Gold.
- Issued a conditional offer of employment to a PW employee and the subsequent onboarding of the new employee, Alex Curtner.
- Finalized the zoning code updates and landscape design manual, and submitted for grant payment to the Sonoran Institute.
- Finalized the request for loading / unloading on the corner of Jerome and Main.
- Attended the Transportation Summit in Flagstaff, which is an informal requirement of our RPPL grant for Verde Avenue.
- Spent considerable time on grant closeout reports and documents for the Sonoran Institute's grant.
- Spent considerable time on the closeout requirements for the Deception Water Line project grant.
- Filed all closeout documents and final pay request for the Gulch Drainage project.
- Spent considerable time reviewing the WWTP contract between the Town and Fann and the certification of Owner's and Agency Concurrence.
- Began work on the attainment of easements for the Verde Central Syphon project.
- Started work on the FY 2028 budget by updating the CIP to the extent possible prior to the Council goal setting meeting.
- Worked on obtaining like for like proposal / quotations for a new ERP system.
- Spent considerable time dealing with volunteer FF and auxiliary issues.
- Participated in final training sessions for the conversion to an upgraded agenda management system.
- Submitted for grant reimbursements for seven of our ongoing grants. Managed our seven grant-funded projects.
- Completed the documentation for an 8th grant award through the Greater Arizona Development Authority for utility infrastructure mapping and planning.
- Conducted a follow-up utility coordination meeting with UES representatives for Verde Avenue construction.
- Met with our APS Account Manager about finally adjusting our streetlights and other concerns.
- Began work on a massive public record request.
- Started the process of replacement of IT services due to the retirement of our longtime partner / provider of IT services, Peter DeBlanc.

**** CONGRATULATIONS TO ****

Carlos Godina (Police Department) on completing 1 year of service effective November 16, 2026.

November 2026 Report for October 2026 by Kristen Muenz, Finance Director & Deputy Clerk

- Posted town notices and meeting agendas throughout the month at the three locations in town (Gulch Road, Post Office, Town Hall).

- Processed Payables, Payroll, New Employee Set-Up & Employee Modifications, Check & Cash Deposits, Journal Entries and Bank Reconciliation.

- Processed all License Applications & performed file updates and adjustments.

- Maintained files from FY's 2026 & 2027 per the Secretary of State's Retention Schedule, including filing documents in the long-term file room for safety.

- Performed property management tasks Including scheduling pest control to remove a wasp nest from the third floor of 600 Clark Street.

- Permits and Licensing activities for October:

Business Licenses

- 6 Businesses were sent renewal notices.
- 3 Businesses received 2nd reminders to renew, along with a $10 late fee.
- 8 Businesses sent in their renewal application, including 2 that were overdue.
- 3 Businesses applied for a NEW business license, 2 due to moving locations.
- 10 Business License renewals were issued.
- 27 Business Licenses are pending approval.
- Spreadsheet of Tour & Mobile Food Vendor License updates attached.

STR Licenses

- No new STR applications were received in October.
- No new STR/Vacation Rental Licenses were issued.
- 1 STR has been informed they are operating without a license.
- 16 Total STR Licenses are currently issued and/or active.
- 1 STR license is still in pending status.
- 1 STR owner informed us that they have a long-term tenant and to close their STR license as they will no longer be short-term renting.
- 4 STR licenses are still ACTIVE (license was approved and property has not changed hands) but the units are currently long-term or unused.
- A total of 22 dwelling units are currently used as licensed STRs.

Library Staff Report , September - October 2026

- The New Yavapai Library Network public- facing website officially launched on October 5 2026, this milestone gives community members and fellow library consortiums a central place to learn about our Network,find member libraries and explore shared resources and services. It is now live at www.YLN,info

- The Public Library Survey for FY 25/26 will be due February 2027. This does not affect the performance period fpr the information being reported which for this year will encompass July 1 2025 to June 30 2026.

- Attended Nationwide Retirement Seminars.

- Attended Training for Book Club Kits (My Turn)

MyTurn enables patrons to reserve up to 10 book club kits directly from the owning library.

- Library Staff reviewed the updated Town of Jerome Personnel Policy Handbook.

- Arranged for new Cisco Switch to be sent to the library directly from manufacturer, this will save considerable time and allow for an earlier install.

- The Jerome Community Art Workshop classes scheduled for November and December

November 14, Essential Oil, Air Dry Clay Diffusers,	10am to Noon
November 16, Natural Dyeing with Sappenwood	10am to Noon
November 28, Felting Neck Warmers	Noon to 3 pm
December 9 Felting fingerless gloves	Noon to 3 pm

Department Meetings and Drills	Number
Rope Drill	1
Thursday night training	4

Weekly Training:

- Thursday October 1st– Airway management
- Thursday October 8th-AAR suicide/Hazmat call
- Thursday October 15th- Pumping
- Thursday October 22nd- Tagging a Hydrant
- Saturday October 24th- Ropes Anchors
- Thursday October 29th- Dance Set up
- Saturday October 31st Dance

Department Affairs and Ongoing Projects

- The Halloween Dance, this year was a catastrophic success. The storm did not stop around seven hundred people from attending the dance. We had some water issues and struggled through them until the last hour when we had to give up. I have heard many say it was a good time. The best part of the dance is that there were no injuries! The sad part is two of our Bar tenders, who are also the caretakers of the Little Daisy suffered a total loss of their house and property during the storm and flooding on Sunday.
- Joe Lee has completed his EMT class. He is waiting for the mandatory time to take his National Registry.
- Jerrith Foster has taken an I.V. course and is now able to administer I.V.s. That gives the department five qualified people. This is a vital skill with the long ambulance response times.
- We were able to hold ropes class the week of October 12th through the 18th. The class went well. We were able to send five of our new personnel through it. This bolsters our rope team significantly.
- Starting November 14th both John and Jerrith are attending the Greater Verde Valley fire onboarding Fire Academy. This will strengthen their skills and our relationships with our mutual aid partners.
- New Volunteers, we have been getting a few new volunteers in the last few months. This helps with response. With the volunteers now able to spend the night at the station we have been able to reduce the average response time. In the next few months, I will be compiling a **r**eport on the response times with and without overnight staffing.
- We had a couple of significant alarm calls this last month. The first was a suicide by chemical. This call was very difficult as the chemical was extremely toxic. We had to clear the scene for YCSO and make sure it was safe to enter. During the transport of the body the driver became ill and reported to YRMC for exposure. I worked with YCSA YCEOM to find a way to dispose of the chemical. In the end I scheduled a meeting with multiple agencies to discuss the incident. The discussion was good and we all have a better understanding of how to approach incidents like this if it were to happen again.

  The next significant alarm was a swift water rescue. On 10/15 there were multiple rescues occurring at approximately the same time. I heard on the radio that one of our partners did not have a swift water team available and put ours in service. We were dispatched to the Verde Lakes area for a person stuck on a sand bar. We responded with our team and were cancelled at the Cherry rd. and the 260 roundabouts. I would like to thank John Krmpotich and Kerry Lee for their willingness to respond to incidents like these.
- Town Siren: I have received the part from the machinist. I have ordered some material for the clutch and brakes. I am hoping all of this will work. If these repairs don't work, we will need to find original parts.

Celebrating Our 124nd Anniversary
1899 - 2026

Founded 1876
Incorporated 1899

October 2026
PUBLIC WORKS
MONTHLY REPORT

NORMAL WEEKLY DUTIES

- TRASH: Monday, Wednesday, and Friday.
- PARKS: Clean parks, Weed whip, and Mow.
- RECYCLE: Pickup cardboard Monday, Wednesday, and Friday. The trailer goes to recycle on Thursdays.
- WATER: Read water meters on Thursdays.
- HURF: Clean curb and gutters, Weed whip.
- SEWER: Repair lines.

OTHER PROJECTS

- Upon finishing the water line in deception, we were told after a few weeks that one service was left out. That was on us, we traced all lines and thought we had them all located and knew how to tie them all in. Once discovered, we ordered the parts, dug and placed a new line and back filled.
- Grade work on 1st and North Dr.
- Repair the roof above the cop shop
- We had quite a few sewer issues throughout the month that individually weren't bad, bad all totaled took up quite a bit of time.
- Weve had a lot of storms and water this month, and we've been doing a lot of repairs and or clean up from them.
- Hauled 4 or five loads of sand out to Walnut.
- Haul all pipe and fittings out to Walnut
- Do a little work on the concrete on Hull. Unfortunately, this has been a busy month with a lot of little things that have come up and put this on the back burner.
- Water leak in the Gulch Above Jane's house.
- We replaced a valve on the Giroux st. regulator.

- A few small repairs on water and gate at the apt on Verde.
- Water leak on School St. Broken service line.
- Water leak on the sprinklers in the Middle park.
- We had an issue with the regulators on School St. The upper 2 inch was not working correctly due to ware; we worked late into the night to rebuild it and the lower 2" that was affected from the upper. We were able to get it stabilized, but we realized the issue with the upper 2" and decided to pull it and install a new 2". That fixed the issue until the whole system gets replaced in the next week or so.
- Cleaned out the drainage in the lower Gulch.
- Pulle apart the 10" valve at walnut, cleaned, relubricated and put it back together.
- The pipe at Walnut is so dilapidated. As you all know we've decided to bypass the cistern and pipe the whole thing. If you have any questions about it, please contact me.

Its been a busy month for sure. We also welcomed a new employee Alex Curtner, whose first day was on the 2nd of November.

JEROME POLICE DEPARTMENT

RUSSELL SAN FELICE, CHIEF
305 MAIN STREET
POST OFFICE BOX 335
JEROME, ARIZONA 86331
(928) 634-8992
FAX (928) 649-2776

November 3, 2026

TO: Honorable Mayor and Jerome Town Council

FROM: Russell J. San Felice, Chief of Police

Attached please find the police activity reports for October 2026.

During the month of October, the police department responded to 205 calls for service. Jerome Police handled one shoplifting case, with a fairly significant value in property taken from two retailers in Jerome. The suspect was apprehended and the property recovered. We had a disorderly conduct/assault arrest in front of the big steps. We have one death investigation of a long time Jerome resident. The doors were locked and there were no signs of foul play. Preliminary investigation seems to show natural causes. We are waiting on the final report from the medical examiner.

Jerome police held a Town meeting near the end of October. We feel the meeting was very productive. We heard from residents about their concerns and some good ideas came from the meeting, helping the police department improve community relations. Ironically, at this meeting we heard some residents who would like to see more enforcement and some residents think there is too much enforcement. This seems to be the balance we are always confronted with. Jerome Police will continue to focus on the more egregious violations and use discretion when appropriate. We will continue to work on improving community relations, accountability and transparency. We will work to have more events for the community to interact with us going forward.

Jerome Police Officers and Parking Officers conducted several enforcement actions over the month of October. There were 426 parking citations written and 17 parking violation warnings. There were 55 citations and 21 warnings for various moving traffic violations.

For the October 2026 status report, here are the kiosk totals:

October 2026: $54,334.25
October 2025: $60,067.75

Current Fiscal year total (July 1, 2026-June 30, 2027): $155,721.50

Respectfully,

Russell J. San Felice
Chief of Police

JEROME MUNICIPAL COURT
Hon. Angela M. Bradshaw Napper, Magistrate
P. O. Box 335 / 600 Clark Street
Jerome, AZ 86331 Phone (928) 649-3250

TO: Jerome Town Council

FROM: Angela M. Bradshaw Napper, Magistrate

SUBJECT: Monthly Staff Report

DATE: November 3, 2026

It feels good to write this report on election day. I would like to take this opportunity to thank members of the town council, both new and not-so-new, for their service to the Town of Jerome. Leadership can be a tricky responsibility to navigate. Service leadership is even trickier – the public nature of the job and the unavoidable scrutiny of the decision-making process by peers, neighbors, and friends is not for the faint of heart. Indeed, it is a courageous endeavor to voluntarily represent the interests of others by running for and accepting a position in public office. Your jobs are not easy, with so much to learn, understand, and decide in an ever-changing landscape of competing demands and limited resources. So, thank you for your service and cheers to you for the coming year. I regret that I am unable to be there for your swearing-in ceremony on November 10. My warmest regards and best wishes to each of you.

October flew by with a one-day judicial training for me in Phoenix early in the month, a well-deserved vacation for the court clerk mid-month, hearings all month long, and a quarterly Security and Emergency Preparedness Committee (SEPC) meeting at the end of the month.

Our financials remain in excellent shape and over the past few months Defendants have been making larger payments or paying in full upon the completion of the case. Court-appointed counsel cases are slightly more in number based on the past several months, but I believe that court filings are up as well.

Updating court fees across different payment platforms remains on-going, as does updating court forms and procedures required by new legislation that has already taken effect or will take effect shortly after the first of the year. I met with Chief San Felice to review court safety standards and will meet with a contractor later this week to review developing plans to remodel and improve the court space.

Town Council members, especially new members, are always welcome to come to the Court for a tour, a visit, or to observe court proceedings. As always, I am grateful to be of service to the Town of Jerome.

Town of Jerome, Zoning Administrators Report

Town Council: Tuesday, November 10th, 2026
Prepared by: William Blodgett, Zoning Administrator

Planning & Zoning Commission-

- The regular meeting of the Planning & Zoning Commission was cancelled, with no new business awaiting review.

Design Review Board- The regular meeting of the Design Review Board was cancelled due to a lack of Quorum available to meet. Items waiting review will have to be seen at the November regular meeting.

Board of Adjustment- The Board of Adjustment did not meet in October, but has a meeting date set for Thursday, November 12.

Code Enforcement-

- 710 Clark Street- Ongoing
- 889 Hampshire- Ongoing
- 896 Hampshire- Ongoing

Administrative Approvals- None for October 2026

Other Business-

- Brownfields Grant
- EPA & ADEQ site visit
- Preparing for Tourism/Economic discussion in Camp Verde in November.
- Preparing for BoA meeting
- Reviewing and prioritizing dry-stacked stone walls throughout recent rains.
- Multiple renovation projects throughout town requiring some level of oversight.
- Successfully scanned one historic basemap from TOJ archives.

A. Consider Approval of the October 13, 2026, Regular Council Meeting Minutes

Council may approve the October 13, 2026, Regular Council Meeting minutes.

TOWN OF JEROME

POST OFFICE BOX 335, JEROME, ARIZONA 86331
(928) 634-7943
www.jerome.az.gov

DRAFT MINUTES
REGULAR COUNCIL MEETING OF THE TOWN OF JEROME
COUNCIL CHAMBERS, JEROME TOWN HALL
600 CLARK STREET, JEROME, ARIZONA

TUESDAY, OCTOBER 13, 2026, AT 7:00 PM

Due to the length of this meeting, Council may recess and reconvene at the time and date announced.

7:00PM (0:29) 1.CALL TO ORDER/ROLL CALL

Mayor/Chairperson to call meeting to order
Town Clerk to call and record the roll.

Present were Mayor Christina "Alex" Barber, Vice Mayor Jane Moore, and Councilmembers Dr. Jack Dillenberg, Issam "Izzy" Sharif and Sonia Sheffield.
Staff present were Town Manager Brett Klein, Zoning Administrator Will Blodgett, and Accounting Clerk/Administrative Specialist Michele Sharif. Also in attendance was Town of Jerome Legal Council John Gaylord from Gust Rosenfeld.

7:00PM 2. PROCLAMATIONS

7:00PM (0:43) A. Proclamation Proclaiming October as Domestic Violence Awareness Month
Mayor Barber will read or summarize the proclamation and present a copy to Verde Valley Sanctuary Board Member representative.

Mayor Barber read aloud proclaiming October as Domestic Violence Awareness Month.

7:04PM (4:51) B. Proclamation: Not in Our City; Taking a Stand Against Human Trafficking
The Mayor will read or summarize the proclamation. Members of the organization may be present.

Mayor Barber read aloud the proclamation Not in Our City; Taking a Stand Against Human Trafficking. After reading the proclamation Mayor Barber rearranged items on the agenda starting with Item 9 – New Business Item E.

7:59PM (59:01) 3. FINANCIAL REPORTS

Discussion/Possible Action

A. Financial Report and Detail Invoice Register Report for September, 2026
Council will consider and may approve the financial reports for month ending September 2026.

Mayor Barber introduced the financial reports. She pointed out that in the budget the sales tax is currently down in all three categories. She then entered a motion to approve the financial reports, receiving a second from Councilmember Dillenberg.
After calling the question the motion to approve carried by unanimous vote.

7:59PM (59:44) 4. STAFF AND COUNCIL REPORTS

Discussion/Possible Action

A. Reports by the Town Manager / Clerk, Deputy Clerk, Utilities Clerk, Accounting Clerk, Public Works Director, Building Inspector, Library Director, Municipal Magistrate, Police Chief, Fire Chief and Council Members, Which in the Case of Council Member's Reports will be Limited to a Summary of Current Events and will Involve no Action

Council will consider and may approve the staff reports.

Mayor Barber introduced the Staff and Council reports deferring to Mr. Klein for further introduction.
Mr. Klein shared that in addition to his written report he had received a formal complaint in regard to the bidding for the wastewater treatment plant. He said it is with legal counsel to review, and recommendations will be presented at an upcoming meeting. He then shared a meeting upcoming on Friday regarding the retaining wall on 89A near the intersections of Gulch Rd, East Ave and Holly St. under the Jurisin house. He also shared that Councilmember-elect Miller, and he will be attending the Rural Transportation Policy Summit as an informal requirement for the Verde Ave grant of $3.5 Million.
Mayor Barber asked if anyone on Council had anything to report.
Councilmember Dillenberg moved to approve the staff and council reports, receiving a second from Mayor Barber. Upon calling the question the motion carried.

Motion to approve staff and council reports.

After the vote, prior to moving on Mr. Klein pointed out Mayor Barber had not given her congratulations.
Mayor Barber apologized and congratulated Mr. Robert Vega on the Public Works crew for 4 years of service as of October 24, 2026. Then the meeting proceeded to the Zoning Administrator's report.

8:02PM (1:02:15) 5. ZONING ADMINISTRATOR'S REPORT/PLANNING & ZONING AND DESIGN REVIEW BOARD MINUTES

Information/Council Review

A. Report Provided by the Zoning Administrator. Minutes are Provided for Information Only and do Not Require any Action

Zoning Administrator Blodgett shared his written report adding in addition to that the Regional EPA Officer would be in town next week touring the town and buildings within the scope of the $1million Brownfields grant. He also shared that he has found a print house that successfully digitized a couple of our older maps so he would be preparing a proposal for the budget to get some of the older more fragile maps digitized to prevent further deterioration and preserve them for future use.

8:03PM (1:03:42) 6. APPROVAL OF MINUTES

Discussion/Possible Action

A. Consider Approval of the September 8, 2026, Regular Meeting Minutes, and the September 14th and September 28th, 2026, Special Council Meeting Minutes

Council will consider and may approve the September 8th, Regular and September 14th and 28th, Special Council Meeting minutes.

Mayor Barber introduced the meeting minutes. She said she noted a lot more typos on these minutes adding that it's been a busy month so she wouldn't be picky about it.
Councilmember Dillenberg made a motion to approve the meeting minutes.
Mayor Barber seconded the motion.
After the motion, but prior to the vote, Councilmember Sheffield noted that in the meeting minutes it states one of the speakers as Jason Voss, she corrected the record that the speaker was Jerome Resident Jason Hyman.
Mayor Barber then called the question and the meeting minutes for all three meetings were approved.

Motion to approve meeting minutes from the September 8, September 14, and September 28th, 2026, Council Meetings.

7:39PM (39:05) 7. PETITIONS FROM THE PUBLIC

A. Pre-Registered Petition from the Public: Dan Mulleneaux of 681 Main Street, Locally Known as The Gibson Market

New Homeowner and Resident Dan Mulleneaux recently purchased the former Gibson Market at 681 Main St. He addressed Council regarding Gulch Ln, sharing that it's a roughly 75-foot-long, 10-foot-wide, Town-owned roadway providing access to his property and an adjacent residence. He requested that the Town consider conveying the roadway to him through a quitclaim deed, with permanent access retained for adjacent property owners, utilities and emergency vehicles. He said in exchange he and his wife would assume responsibility for paving, maintenance, drainage, and liability. He further explained that paving estimates ranged from $14,000 - $19,000, with engineering costs potentially adding another $14,000, making improvements costly under the current arrangement.
Mr. Mulleneaux cited public safety and access concerns, including difficult travel for vehicles and pedestrians, limited delivery and emergency vehicle access, and an incident in which a resident and neighbor recovering from emergency surgery had to be carried down to an ambulance. He noted that rain frequently washes rock and debris onto Main St. (89A), creating traffic hazards and cleanup concerns.

Council directed staff to review the proposal with legal counsel and assess the requirements for consideration at a future meeting.

After the petition the meeting moved to 9 – New Business item G.

8:05PM (1:04:59) 8. UNFINISHED BUSINESS

Discussion/Possible Action

A. Discussion and Possible Action / Staff Direction Regarding the Middle Park Donation from the Richard J. Martin Trust; Expended by November 18, 2027 - ($0.00) Expended To-Date

Council will discuss, consider options, and may provide staff direction for expending the donated funds.

Council and the Town Manager discussed the status of the Middle Park donation from the Richard J. Martin Trust which must be expended by November 18, 2027. Mr. Klein shared that no funds have been expended to date and that this item would continue to appear on future agendas for updates or until the project is complete. He shared that his interaction with Brad Lancaster had indicated he was too busy to assist. Vice Mayor Moore said she'd continue to do further outreach to him.
Council discussed potential uses for the donation including identifying ADA-accessible park space. Vice Mayor Moore added it was always a dream for Richard to visit the park, and this would be a good addition in recognition of Richard Martin's wishes to enjoy the park despite being in a wheelchair.
Councilmember Sheffield suggested identifying a compliant accessible parking space, constructing a path to a picnic table or shaded seating area.
Vice Mayor Moore suggested terracing the hillside behind the community garden with berms or check basins to improve the appearance of the park and help manage water runoff.
Mr. Klein agreed to check with Town's engineers to evaluate the site and identify feasible locations if available for accessible parking and a compliant pathway. Staff will then provide information on feasible options for further consideration.
Council members agreed to visit the park on their own time and provide feedback to establish a priority list for the overall improvements. Discussions would continue during the Council's goal-setting meeting set to take place within the next 60 days.

9. NEW BUSINESS

Discussion/Possible Action

8:13PM (1:13:17) A. Consideration of the Jerome Chamber of Commerce Special Event Permit Application for the Annual Light up the Mountain Event

Council will consider and may approve the special event permit.

Mayor Barber introduced the application for consideration. She said the only thing on the application she questioned was the light up time.

Anastasia Darrah, Chamber President confirmed the time on the application covers the whole time, and that the park lighting will not happen at 9 pm, that time is on the application as a placeholder for those members of the public who hang around a little longer than all of the festivities.
Mayor Barber asked if there would still be the opportunity for her to say a few words to the public. Ms. Darrah confirmed that yes that would still happen.
Councilmember Sharif motioned to approve the special event permit, receiving a second from Vice Mayor Moore. Mayor Barber thanked the Chamber of Commerce for keeping these special events happening, noting it takes a lot of work behind the scenes to make these events happen. She then called the questions and the motion passed unanimously.

Motion to approve Special Event Permit for Annual Light up the Mountain.

8:154M (1:14:57) B. Consideration of the Jerome Chamber of Commerce Special Event Permit Application for the Annual Town Dinner at Spook Hall

Council will consider and may approve the special event permit.

Mayor Barber introduced the second application for the Chamber of Commerce.
Councilmember Sharif motioned to approve the special event permit receiving a second from Mayor Barber. She also noted that this event is going to be on a Sunday this year where past events were on a Saturday. She shared that the Kid's Christmas party is also in the works for the morning of the potluck.
Mayor Barber called the question, and the motion to approve the special event permit carried.

7:47PM (47:04) C. Consideration of Proposed Fire Department Bylaw Updates

Council will consider and may approve the staff proposed updates to the Fire Department bylaws.

The Fire Chief, Carl Whiting, confirmed that the department has followed the existing bylaws' procedure for presenting and voting on the proposed revisions, allowing more than a month for member review, commentary and feedback. Feedback was received from a few parties and was incorporated prior to submitting the draft to Council. Discussion focused on strengthening participation and accountability requirements, aligning conduct provisions with the Town's recently adopted personnel policy update, clarifying restrictions on gifts and potential conflicts of interest, and addressing the handling of department or Town-owned property. It was also clarified that medical equipment such as wheelchairs, crutches, walkers, etc. that the Department has to loan to the community are not affected by the bylaws and will remain available to community members that may need them. Council members raised questions about the gift provision and if it should include a specific monetary threshold. They also identified minor working and drafting issues to be corrected in the next draft for review.
Councilmember Sheffield stated that her job duties have increased and she's been focused on the Zoning Ordinance and would enter a motion to table this to the next meeting to give her time to read through and see if her questions could be answered just by reading the document. Councilmember Dillenberg seconded the motion to table.
Chief Whiting emphasized the importance of ensuring department members understand and consistently follow the bylaws to support safe, fair, and accountable operations.
Mr. Klein requested councilmembers forward any input, suggested changes, and corrections to the bylaws to Michele via email, within a week to be reviewed and incorporated as appropriate.
Mayor Barber called the question, and the Jerome Fire Department Bylaw update was tabled to the November meeting.

Motion to table to next meeting for further review and input.

After the vote the meeting moved to item 3 – Financial Reports.

8:15PM (1:15:41) D. Discussion / Consideration of the Mayor's Proposal for a Town Yard Sale in the 300 Level Lot

Council will discuss and may provide staff direction.

Mayor Barber proposed holding a centralized community yard sales for Jerome residents at no charge to them. She suggested potentially twice annually, for example November and April, explaining that a shared location with parking and Town advertising would provide an opportunity for residents whose properties are not easily accessible for individual yard sales.
Discussions identified that the use of the 300-level lot would require a review of the lease agreement and consultation with the landlord.
Council members also discussed participant sign-ups, assigning designated spaces, parking, public safety, cleanup, and potential assistance from a local nonprofit organization for the Fire Department Auxiliary to organize and arrange for such an event. Zoning Administrator Blodgett offered to share his previous research as he'd had similar ideas for a swap meet-style event at the old high school. He described that participants would provide their own tables and equipment, manage their own sales, with limited assistance and coordination rather than full Town-provided services. Ultimately no event policies or dates were established.
Council directed staff to first determine whether the 300-level lot could be used and would accommodate the event, and if not to explore alternative locations. Mr. Blodgett agreed he would help develop options for Council's consideration at a future meeting. There was no vote or other action taken with this item.

7:07PM (6:53) E. Consider Appointment of Chad Hembrough to Fill the Vacant Board of Adjustment Position with a Term Expiring February 28, 2028

Council will consider and may make the appointment.

Mayor Barber introduced the possible appointment for Board of Adjustment. She asked Council if they had any questions or other commentary about the application.
Vice Mayor Moore entered a motion to approve the appointment receiving a second from Councilmember Dillenberg. Mayor Barber called the question and the motion carried unanimously.

Motion to approve appointment of Chad Hembrough to the vacant seat on Board of Adjustment.

After the Vote the meeting moved to item 9 – New Business Item F

7:08PM (8:01) F. Consideration and Approval of the Content Contained in the Proposed Update and Complete Re-write of the Town of Jerome's Subdivision Code and Zoning Ordinance Including Landscape and Streetscape Design Elements; and Authorizing Staff to Place the First Reading of the Revised Subdivision and Zoning Code on the November 10, 2026, Council Meeting Agenda

Council will consider and may approve the content and provide authorization for the First Reading.

Mayor Barber introduced the proposed update and complete re-write of the Town of Jerome Subdivision Code and Zoning Ordinance, which included newly added landscaping and streetscape design standards. They discussed concerns regarding the residency requirement for board membership eligibility, livestock allowances in the agricultural zone, swimming pool regulations and how they may impact neighboring properties and the addition of

heavy industry as a conditional use. Staff and Planning Center representatives explained that the heavy industry designation clarifies existing use categories without changing established property rights, they also confirmed they would make the suggested changes to the board membership and regarding private swimming pools.

Councilmembers discussed multifamily housing, residential adaptive reuse, density caps, parking availability, traffic impacts, neighborhood character, and whether the proposed revisions adequately protect existing historic buildings while encouraging housing opportunities. Following the discussion the direction was given to cap multifamily dwellings at quadplexes, and it was also noted that conditional use review, existing lot coverage areas, setbacks, and minimum dwelling-size standards provide safeguards against adverse impacts.

Additional Council discussion addressed wireless communication towers, excavation and grading permits exceeding 10 cubic yards, and additional commentary about swimming pool and water-storage provisions. Staff and Planning Center representatives explained that State requirements may necessitate allowing wireless facilities in all zoning districts and that a separate comprehensive small-cell tower ordinance would be developed. Regarding the excavation and grading exceeding 10 cubic yards, the proposed language allows the Zoning Administrator to determine that a permit needs to be reviewed by Planning and Zoning rather than requiring a review for every instance of grading or excavation.

Staff was directed to incorporate all of the discussed revisions and place the first reading of the revised Subdivision and Zoning Ordinance on the November 10, 2026, meeting agenda.

Motion to approve Zoning Code re-write with proposed changes, and authorize the first reading on November Meeting Agenda.

8:22PM (1:22:55) I. Consider Approval of Change Orders #1, #2, and #3, for the Gulch Drainage Project Totaling $42,980.60, Bringing the Total Project and Final Invoice Cost to $154,562.47 from the Original Contract Amount of $133,194.68, Which Includes Unused Contingencies and Other Credits

Council will consider and may approve the change orders.

Mayor Barber introduced the Change Orders totaling $42,980.60.
Mr. Klein explained that unused contingencies and other credits reduced the original contract amount of $133,194.68 to $111,581.87 before the change orders, resulting in a final project cost of $154,562.47. He attributed additional costs to the Town's unique topography and site conditions, noting that the final cost remained well below the second-lowest bid. He reported that the drainage improvements were functioning well, with additional improvements dependent on future funding.
Councilmember sharif Moved to approve the Change Orders, receiving a second from Councilmember Dillenberg. Mayor Barber called the question, and the motion carried by unanimous vote.

Motion to approve change orders 1, 2 and 3 for Gulch Drainage Project.

8:25PM (1:25:45) 10. TO AND FROM THE COUNCIL

Council may direct staff regarding items to be placed on a future agenda.

Mayor Barber introduced To and From the Council, starting with the far end of the Dais, Councilmember Sharif, Councilmember Dillenberg and Vice Mayor Moore had no updates.
Councilmember Sheffield raised the possibility of establishing an official dog park stating that she would bring more specific information for future consideration. She initially suggested the horseshoe pit park as a potential location. Continued discussion included reports of continued use of the horseshoe pits and concerns about locating a dog park near the children's play area. No location was selected at this time.

Mayor Barber requested future discussion of playground improvements including replacement of the loose tire material with rubber mats due to concerns about potential toxicity and scattered material. She also reported that the chinaberry tree that used to shade the slide had to be removed by the Fire Department following storm damage and discovery that the tree was hollow. She expressed concern about the now-unshaded metal slide becoming too hot to the touch and suggested considering a pergola or other shade structure to replace the tree, or consider replacing the slide with a plastic one. She noted that no injuries occurred during the tree incident and that we are really lucky that nothing had happened to any kids or anyone there up to that point.

8:30PM (1:30:16) 11. ADJOURNMENT

Councilmember Dillenberg entered a motion to adjourn the meeting, receiving a second from councilmember Sharif. Mayor Barber called the question and the meeting adjourned at 8:30p.m.

A. Consider First Reading of Ordinance No. 497; An Ordinance of the Town Council of the Town of Jerome Amending the Zoning Ordinance of the Town of Jerome, to Update, Modernize, and Substantially Revise the Provisions Thereof, Including Subdivision Code Regulations and Landscape and Streetscape Design Elements; and Providing for Penalties; and Providing for Severability

Council will consider and may approve the first reading of Ordinance No. 497.

TOWN OF JEROME

Founded 1876
Incorporated 1899

POST OFFICE BOX 335
JEROME, ARIZONA 86331
(928) 634-7943
www.jerome.az.gov

ORDINANCE NO. 497

AN ORDINANCE OF THE TOWN COUNCIL OF THE TOWN OF JEROME, ARIZONA, AMENDING THE ZONING ORDINANCE OF THE TOWN OF JEROME TO UPDATE, MODERNIZE, AND SUBSTANTIALLY REVISE THE PROVISIONS THEREOF, INCLUDING SUBDIVISION REGULATIONS AND LANDSCAPE AND STREETSCAPE DESIGN ELEMENTS; PROVIDING FOR PENALTIES; AND PROVIDING FOR SEVERABILITY.

WHEREAS, the Town Council of the Town of Jerome has amended the Zoning Ordinance of the Town of Jerome (the "Zoning Ordinance"), as needed, since it was first adopted in June 1977, and such amendments have ranged from correcting minor typographical errors to making significant revisions; and

WHEREAS, the Town Council desires to update and completely rewrite the Zoning Ordinance, including its subdivision regulations and landscape and streetscape design elements (the "Amendments"); and

WHEREAS, the Town Council has determined that the Amendments do not conflict with the Town of Jerome General Plan or any applicable specific area, neighborhood, or other plan; and

WHEREAS, in accordance with Article II, Sections 1 and 2 of the Constitution of Arizona, the Town Council has considered the individual property rights and personal liberties of the residents of the Town before adopting this ordinance; and

WHEREAS, in accordance with A.R.S. § 9-462.01, the Town Council has considered a housing impact statement that includes the information required by A.R.S. § 9-462.01(J)(1)-(3); and

WHEREAS, on October 6, 2026, the Planning and Zoning Commission held a public hearing on the Amendments and recommended approval thereof, with some revisions; and

WHEREAS, the Town Council finds that the Amendments recommended by the Planning and Zoning Commission are appropriate and in the Town's best interests;

NOW, THEREFORE, BE IT ORDAINED BY THE TOWN COUNCIL OF THE TOWN OF JEROME, YAVAPAI COUNTY, ARIZONA, AS FOLLOWS:

SECTION 1. The foregoing recitals are referred to, adopted, and made a part hereof as if fully set forth herein.

SECTION 2. That certain document entitled "Jerome Zoning Ordinance as Revised February 1997 and Updated Through October 2026," of which one paper copy and one electronic copy are maintained, in compliance with A.R.S. § 44-7041, on file in the office of the Town Clerk as required by A.R.S. § 9-802, and available for public use and inspection during normal business hours, is hereby declared to be a public record, which is hereby referred to, adopted, and made a part hereof as if fully set forth herein, and said copies are hereby ordered to remain on file with the Town Clerk.

SECTION 3. The Zoning Ordinance is hereby amended as set forth in the Amendments.

SECTION 4. If any section, subsection, sentence, clause, phrase, or portion of this ordinance or any part of the Amendments adopted herein by reference is for any reason held to be invalid or unconstitutional by the decision of any court of competent jurisdiction, such decision shall not affect the validity of the remaining portions thereof.

SECTION 5. The Mayor, the Town Manager, the Town Clerk, and the Town Attorney are hereby authorized and directed to take all steps necessary to carry out the purpose and intent of this ordinance.

SECTION 6. The Amendments include the following penalty provision:

> Section 110. Violation and Penalty.
> It is hereby declared to be unlawful to construct, erect, install, alter, change, demolish, maintain, or use any house, building, structure, or fence, or to use any lot or premise contrary to or in violation of any provision of this ordinance. Violations of any provision of the Zoning Ordinance of the Town of Jerome are subject to Chapter 18 Enforcement Procedures for Violations of the Town Code and Zoning Ordinance. Every such person, firm, or corporation shall be deemed guilty of a separate offense for each and every day in which such violation is committed, continued, or permitted, and shall be punished as provided in this section.

PASSED AND ADOPTED BY THE TOWN COUNCIL OF THE TOWN OF JEROME, YAVAPAI COUNTY, ARIZONA, THIS _____ DAY OF _____ 2026.

ARTICLE I: ADMINISTRATION

SECTION 101. SHORT TITLE

This ordinance shall be known as "The Zoning Ordinance of the Town of Jerome."

SECTION 102. PURPOSE

The purposes of this ordinance are to secure safety from fire, panic, and other dangers; to provide adequate light and air; to lessen congestion in the streets; to prevent the overcrowding of land; to avoid undue concentration of population, to facilitate the adequate provision of transportation, water, sewerage, schools, parks, and other public requirements; to provide for the social, physical, and economic advantages resulting from comprehensive and orderly planned use of land resources; and to otherwise promote the health, safety, convenience and general welfare of the citizens of the Town of Jerome, Arizona.

SECTION 103. INTERPRETATION AND APPLICATION

In its interpretation and application, the provisions of this ordinance shall be held to be minimum requirements for the promotion of a general~~comprehensive~~ plan, and for the promotion of the public health, safety, and general welfare. It is not intended by this ordinance to repeal, abrogate, annul- or in any way impair or interfere with existing provisions of other laws or ordinances, except those specifically repealed by this ordinance, or with restrictions placed upon property by covenant, deed, or other agreement between parties, provided that where this ordinance imposes a greater restriction on land, buildings or structures than is imposed or required by such existing provisions of law, ordinance, contract or deed, the provisions of this ordinance shall control.

A. DEFINITIONS

For the purpose of this ordinance, certain words and terms used herein are defined as follows: all words used in the present tense include the future tense; all words in the plural number include the singular number, all words in the singular number include the plural number, unless the natural construction of the wording indicates otherwise. The word "lot" includes the word "plot"; the word "building" includes the word "structure"; and the word "shall" is mandatory and not discretionary. Other words and phrases used in this ordinance shall have the meaning established in Appendix A: Definitions.

SECTION 104. COMPUTATION OF TIME

1. When calculating a period of time prescribed by this Ordinance, the day of the act, event, or decision that starts the time period is not counted.
2. Unless otherwise expressly stated, references to "days" mean calendar days.
3. If the final day of a period falls on a Saturday, Sunday, legal holiday, or other day when Town offices are closed, the period shall extend to the next business day.

SECTION 1054. PLANNING AND ZONING COMMISSION

B. COMPOSITION; TERMS OF MEMBERS; VACANCIES; COMPENSATION OF MEMBERS

A Planning and Zoning Commission was established upon adoption of the Jerome Zoning Ordinance. At the adoption of this ordinance, the Commission shall consist of five (5) members, each of whom shall be a resident of the Town of Jerome to be appointed by the Town Council. The members of the Commission shall serve for three (3) years, except as ~~hereinafter~~ provided by this Ordinance. In the event of a death, resignation, or removal from the Commission, the vacancy shall be filled by the Council for the unexpired term. Members of the Commission may, after a public meeting, be removed by the Council for inefficiency, neglect of duty, or unethical conduct in office. A Commission member who is absent four (4) regular meetings of a year, beginning March 1st and ending February 28th, shall be deemed to have vacated their~~his or her~~ appointment without further action being taken by the Commission or Council. All members shall serve without pay. However,

members of the Commission may be reimbursed for actual expenses incurred in connection with their duties upon authorization or ratification by the Commission and approval of such expenditures by the Town Council.

[Ord. No. 313; Ord. No. 445]

C. POWERS AND DUTIES

The Planning & ZoningIt ~~shall be the duty of the~~ Commission shall:

1. Prepare~~to formulate~~ and administer any lawful plan duly adopted by the Council for the present and future growth and development of the Town of Jerome pertaining to the use of land and buildings;
2. ~~for any purpose, to make or cause to~~C ~~be made a c~~onduct ongoing~~tinuous~~ studies~~y~~ of the best present and future use and location for ~~to which~~ land and buildings ~~shall be put~~ within the Town of Jerome and in cooperation with adjacent areas;
3. ~~, and to~~ Rrecommend to the Council revisions in such plans which, in the opinion of the Commission, are in~~for~~ the best interest of the citizens of the Town of Jerome;
4. ~~to~~ Hhold public hearings where necessary;
5. M~~to m~~ake recommendations to the Council on all matters concerning or relating to the creation of zoning districts, the boundaries thereof, the appropriate regulations to be enforced therein, and amendments of this ordinance;~~t~~
6. ~~1.~~C~~o c~~arry out the specific duties as prescribed by this ordinance, and ~~to~~ undertake all activities usually associated with ~~therewith~~ and commonly known as "Planning and Zoning". The Commission is also authorized to confer and advise with other city, county, regional, or state planning commissions.

D. SELECTION OF OFFICERS

The Commission shall elect a Chair and Vice Chair from among its own members, who shall serve for one (1) year and until their successors are elected and qualified. No individual may serve consecutively as Chair~~,~~ or ~~consecutively~~ as Vice Chair~~,~~ for more than two one-year terms. The Chair shall preside at all meetings and exercise all the usual rights, duties, and prerogatives of the head of any similar organization. The Chair shall have the power to administer oaths and to take evidence. The Vice Chair shall perform the duties of the Chair in the latter's absence or disability. Vacancies created by any cause shall be filled for the unexpired term by a new election.

[Ord. No. 410]

E. QUORUM; VOTING

Three (3) members shall constitute a quorum. The affirmative vote of three (3) members shall be required for passage of any matter before the Commission. The minutes of the meeting shall reflect the "ayes" and "nays" cast on a particular measure and shall reflect the vote of each member present. A member may abstain from voting upon a declaration that he has a conflict of interest, in which case such member shall take no part in the deliberation on the matter in question.

[Ord. No. 313]

F. RULES; REGULATIONS; RECORDS; MEETINGS

The Commission shall make and publish rules and regulations governing~~, to govern~~ its proceedings and ~~to provide for its~~ meetings, subject to Council approval. All meetings of the Commission shall be open to the public. The minutes and records of all Commission proceedings shall be kept and filed as public record in the office of the Town Clerk.

SECTION 10~~6~~5. BOARD OF ADJUSTMENT

A. ESTABLISHMENT; COMPOSITION; TERM OF MEMBERS; VACANCIES; COMPENSATION OF MEMBERS

There is hereby established a Board of Adjustment of the Town of Jerome, to consist of five (5) members, each of whom shall be a resident of the Town of Jerome, to be appointed by the Town Council. The members of the Board shall serve for three (3) years, except as ~~hereinafter~~ provided in this Ordinance. The members of the first Board appointed hereunder shall serve for the following terms: two (2) members shall be appointed for a term of one (1) year, two (2) members shall be appointed for a term of two (2) years, and one (1) member shall be appointed for a term of three (3) years. In the event of a death, resignation, or removal from the Board, the vacancy shall be filled by the Council for the unexpired term. Members of the Board may, after a public hearing, be removed by the Council for inefficiency, neglect of duty, or malfeasance in office. For any reason other than absence, the Council shall file a written statement of the reasons for removal. A Board member who is absent four (4) regular meetings of a year, beginning March 1st and ending February 28th, shall be deemed to have vacated their~~his or her~~ appointment without further action being taken by the Board or Council. All members shall serve without pay. However, members of the Board may be reimbursed for actual expenses incurred in connection with their duties upon authorization or ratification by the Board and approval of such expenditures by the Town Council.

[Ord. No. 445]

B. POWER AND DUTIES

1. It shall be the duty of the Board of Adjustment to:

   a. Hear and decide appeals in which it is alleged there is an error in an order, requirement, or decision made by the Z~~z~~oning A~~a~~dministrator in the enforcement of the zoning ordinance, and to reverse or affirm, wholly or partly, or modify the order, requirement, or decision of the Z~~z~~oning A~~a~~dministrator appealed from, and make such order, requirement, decision or determination as necessary.

   b. Hear and decide appeals for variances from the terms of the zoning ordinance only if, because of special circumstances applicable to the property, including its size, shape, topography, location, or surroundings, the strict application of the zoning ordinance will deprive such property of privileges enjoyed by other property of the same classification in the same zoning district. Any variance granted is subject to such conditions that~~as~~ will assure that the ~~adjustment authorized~~authorized adjustment shall not constitute a grant of special privileges inconsistent with the limitations upon other properties in the vicinity and zoning in which such property is located.

2. The Board of Adjustment may not:

   a. Make any changes in the uses permitted in any zoning classification or zoning district, or make any changes in the terms of the zoning ordinance, provided the restrictions in this paragraph shall not affect the authority to grant variances pursuant to this article.

   b. Grant a variance if the special circumstances applicable to the property are self-imposed by the property owner.

C. SELECTION OF OFFICERS

The Board shall elect a Chair and Vice Chair from among its own members, who shall serve for one (1) year and until their successors are elected and qualified. The Chair shall preside at all meetings and exercise all the usual rights, duties, and prerogatives of the head of any similar organization. The Chair shall have the power to administer oaths and to take evidence. The Vice Chair shall perform the duties of the Chair in the latter's absence or disability. Vacancies created by any cause shall be filled for the unexpired term by a new election.

[Ord. No. 410]

D. QUORUM; VOTING

Three (3) members shall constitute a quorum. The affirmative vote of three (3) members shall be required for passage of any matter before the Board. In this connection, the minutes of the meeting shall reflect the "ayes" and "nays" cast on a particular measure and shall reflect the vote of each

member present. A member may abstain from voting only upon a declaration that he has a conflict of interest, in which case such member shall take no part in the deliberation on the matter in question.

E. RULES; REGULATIONS; RECORDS; MEETINGS

The Board shall make and publish rules and regulations to govern its proceedings and to provide for its meetings. All meetings of the Board shall be open to the public. The minutes and records of all Board proceedings shall be kept and filed as public record in the office of the Town Clerk.

SECTION 1076. HISTORIC PRESERVATION/DESIGN REVIEW BOARD

A. PURPOSE

The purpose of the Historic Preservation/Design Review Board is to review the exterior design of new buildings and structures, the alteration of buildings and structures, signs, and proposed demolition of structures~~, within the Historic Overlay District~~, in order to ensure that new development is compatible with the surrounding environment, and to preserve and protect the historic character of the Town of Jerome in accordance with the provisions of Section 304.

[Ord. No. 470]

B. COMPOSITION; TERMS OF MEMBERS; VACANCIES; COMPENSATION OF MEMBERS

The Historic Preservation/Design Review Board of the Town of Jerome shall be composed of five (5) members. The membership shall consist of five (5) residents of Jerome, who shall be persons qualified by design background, training, or experience, to be appointed by the Town Council. Each member shall serve for a term of three (3) years. Members may, after a public meeting, be removed by the Council for inefficiency, neglect of duty, or unethical conduct in office. A Board member who is absent four (4) regular meetings of a year, beginning March 1st and ending February 28th, shall be deemed to have vacated theirhis or her appointment without further action being taken by the Board or Council. In the event of death or resignation, or removal from the Board, the vacancy shall be filled by the Council for the unexpired term. All members shall serve without pay. However, members of the Board may be reimbursed for actual expenses incurred in connection with their duties upon authorization or ratification by the Board and approval of such expenditures by the Town Council.

[Ord. No. 313; Ord. No. 378; Ord. No. 410; Ord. No. 445; Ord. No. 459]

C. POWERS AND DUTIES

1. The Historic Preservation/Design Review Board shall have the power to approve, conditionally approve, or disapprove all requests for design approval as required by this Ordinance, basing its decision on the criteria as set forthdown in Section 304.
2. It shall be the responsibility of the applicant to prove that the intent and purpose established in this Section will be accomplished.
3. The Historic Preservation/Design Review Board, upon hearing an application, may impose such reasonable conditions as it may deem necessary in order to fully carry out the provisions and intent of this ordinance. Violation of any such condition shall be a violation of this ordinance, and such violation shall render any building permit null and void.

D. SELECTION OF OFFICERS

The Board shall elect a Chair and Vice Chair from among its own members, who shall serve for one (1) year and until their successors are elected and qualified. No individual may serve consecutively as Chair, or ~~consecutively~~ as Vice Chair, for more than two one-year terms. The Chair shall preside at all meetings and exercise all the usual rights, duties, and prerogatives of the head of any similar organization. The Chair shall have the power to administer oaths and to take evidence. The Vice-Chair shall perform the duties of the Chair in the latter's absence or disability. Vacancies created by any cause shall be filled for the unexpired term by a new election.

[Ord. No. 410]

E. QUORUM; VOTING

Three (3) members shall constitute a quorum. The affirmative vote of three (3) members shall be required for the passage of any matter before the Board. The minutes of the meeting shall reflect the

"ayes" and "nays" cast on a particular measure and shall reflect the vote of each member present. A member may abstain from voting upon declaration that he has a conflict of interest, in which case such member shall take no part in the deliberation on the matter in question.

[Ord. No. 313]

F. RULES; REGULATIONS; RECORDS; MEETINGS

The Board shall make and publish rules and regulations governing and providing forto govern its proceedings and to provide for its meetings, subject to Council approval. All meetings of the Board shall be open to the public. The minutes and records of all Board proceedings shall be kept and filed as public record in the office of the Town Clerk.

SECTION 1087. ZONING ADMINISTRATOR

A. CREATION; APPOINTMENT

There is hereby created the office of Zoning Administrator of the Town of Jerome, who shall be appointed from time to time by the Mayor and Council.

B. POWERS AND DUTIES

The Zoning Administrator shall:

1. Enforce the Zoning Ordinance.
2. Accomplish all administrative actions required by the Ordinance.
3. Undertake preliminary negotiation with, and provide advice to, all applicants for zoning adjustment action, use permits, design review, or other action of the Planning and Zoning Commission or Historic Preservation/Design Review Board.
4. Subject to general and specific policy laid down by the Planning and Zoning Commission and Town Council, interpret the Zoning Ordinance to members of the public, Town departments, and other branches of government.

SECTION 1098. ENFORCEMENT

This ordinance shall be enforced by the Zoning Administrator who shall enforce this ordinance, and in no case shall grant permission for the issuance of any permit for the construction, reconstruction, alteration, demolition, movement, or use of any building, structure, lot, or parcel if the building or structure as proposed to be constructioned, reconstructioned, alterationed, or used or moved or the lot or parcel as proposed to be used would be in violation of any of the provisions of this ordinance. A permit may be issued despite such a violation only if the Board of Adjustment, unless directed to issue such permit by the Board of Adjustment afterthrough an interpretation of thise ordinance or the granting of a variance, directs the Zoning Administrator to do so or by the Town Council after lawful amendment of this ordinance.

SECTION 11009. VIOLATION AND PENALTY

It is hereby declared to be unlawful to construct, erect, install, alter, change, demolish, maintain, or use any house, building, structure, or fence, or to use any lot or premise contrary to or in violation of any provision of this ordinance. VAny person, firm, or corporation, violationsng of any of the provisions of the Zoning Ordinance of the Town of Jerome are subject to Chapter 18 Enforcement Procedures for Violations of the Town Code and Zoning Ordinance. shall be guilty of a misdemeanor and upon conviction thereof, shall be punished by a fine of not more than three hundred dollars ($300.00) or by imprisonment in the Town jail for not more than ninety (90) days, or by both such fine and imprisonment. Every such person, firm, or corporation shall be deemed guilty of a separate offense for each and every day in which such violation is committed, continued, or permitted, and shall be punished therefore as herein before provided in this section.

SECTION 1110. SEVERABILITY

If any part of "The Zoning Ordinance of the Town of Jerome" is found to be invalid or unconstitutional by any Court, such action shall not apply to the ordinance as a whole. and It is

intended and declared that all parts of said "Zoning Ordinance of the Town of Jerome" shall continue in full force and effect except~~not~~ for those expressly declared to be invalid or unconstitutional. ~~shall continue in full force and effect not withstanding so much thereof as may be declared to be invalid or unconstitutional.~~

~~ARTICLE II~~ARTICLE II: ~~DEFINITIONS~~ DEFINITIONS [REMOVED]

[CODIFIER'S NOTE: This Article was rewritten with Ordinance 497 and moved to Appendix A.]

ARTICLE III: PROCEDURES

SECTION 301. AMENDMENTS OR ZONE CHANGES

A. PURPOSE

The Council may, from time to time, ~~as the public necessity, convenience, general welfare, or good zoning practice requires,~~adopt changes to the zoning district boundaries or amend, change, repeal, or supplement the regulations of the Zoning Ordinance of the Town of Jerome~~herein established~~. Such change or amendment may be initiated by the Council or the Commission on its own motion or by petition of one or more owners of real property within the area proposed to be changed.

B. PETITIONS FOR AMENDMENTS OR ZONE CHANGES

1. Petitions for change of district boundaries or amendment of regulations shall be filed with the Zoning Administrator by an owner of real property within the area proposed to be changed. Per Section 307, a pre-application meeting with Town Staff is required prior to submittal of an application. In the case of an application~~petition~~ requesting a zoning district change ~~which~~ that includes ~~other~~ property ~~in addition to that~~ owned by others, not including the petitioner, the petition shall include the signatures of all ~~the~~ real property owners ~~representing at least seventy-five (75) percent~~ of the land in the area proposed to be changed. ~~Such a~~All petitions ~~shall be filed on a form provided for the purpose and~~ shall include:

    a. A map showing the particular property or properties for which the change of zone is requested and ~~substantially the~~ adjoining properties, ~~and the~~ public streets, and ~~ways~~rights-of-way within ~~a radius of~~ three hundred (300) feet of the exterior boundary of the area proposed to be changed~~ies thereof~~.

    b. A Tentative Development Plan, which shall show the following:

        1) Topography.

        2) Proposed street system.

        3) Proposed block layouts.

        4) Proposed reservation for parks, parkways, playgrounds, recreation areas, and other open spaces.

        5) Off-street parking space.

        6) Types and uses of structures.

        7) Locations of structures, garages, and/or parking spaces.

        8) A tabulation of the total number of acres in the proposed project and a percentage thereof designated for the proposed structures.

        9) Preliminary plans and elevations of the structure types.

    c. Reasons justifying the petition;

    d. A true statement revealing any conditions or restrictions of record ~~(if any)~~ which would affect the permitted "uses" of the property if rezoned as requested and the ~~data or~~ dates ~~(if any)~~ of expiration thereof; and

    e. Such photographs, drawings, and other supporting documents ~~(if any)~~ as the applicant may desire to present.

    f. Payment of a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the offices of the Town Clerk. No part of the filing fee shall be returnable. Payment of the filing fee shall be waived when the change or amendment is initiated by the Council or the Commission or when the petitioner is the Town, County, State, or Federal government.

~~f.~~

2. Within fourteen (14) ~~calendar~~ days ~~Upon~~ of receipt of an ~~complete~~ application ~~for amendment~~, the Zoning Administrator shall determine the completeness of the application. If the application is incomplete, the Zoning Administrator shall provide the applicant with a comprehensive list of the specific deficiencies in a written notice. A resubmittal of an incomplete application shall be reviewed for completeness within seven (7) days. If the application is determined to be complete, the Zoning Administrator shall forward the application to the Planning and Zoning Commission after conducting a substantive review of the complete application materials.

3. Any plan approved by the Zoning Administrator under the provisions of Section 303 must substantially conform to the Tentative Development Plan submitted as part of the petition for a change of district boundaries.

C. COMMISSION ACTION

1. Upon receipt of any complete application for, and prior to holding a public hearing on, ~~rezoning or ordinances~~ actions that impose a new land use regulation or modify an existing land use regulation, a Neighborhood Meeting may~~shall~~ be required in accordance with Section 306 of this zoning ordinance.

2. After a Neighborhood Meeting has been held, if applicable, in accordance with Section 306, t~~T~~he Zoning Administrator~~Commission~~ shall then ~~fix~~ choose a reasonable time for the hearing ~~of the proposed zone change, amendment, or addition,~~ and shall give notice ~~thereof~~ to interested parties and to the public by publication of a notice in ~~a the official~~ newspaper of general circulation in the Town of Jerome~~the Town~~, and by posting one notice of the hearing on the area of the property requesting ~~the area included in~~ the proposed change, not less than fifteen (15) days prior to the hearing. The notice shall set forth the time and place of the hearing, including a general explanation of the matter to be considered, and ~~including~~ a general description of the area affected.

~~4.~~3. The Commission may recommend approval or denial to the Council, or ~~for any reason, when it deems such action necessary or desirable,~~ continue the application and~~such~~ hearing to a time and place certain. T~~Within thirty (30) days after the close of the hearing, t~~he Commission shall render its decision in the form of a written recommendation to the Council, which may be via a request for Council action or via the transmission of the Commission meeting minutes to Council. ~~The recommendation shall include the reasons for the recommendation.~~

~~5.~~4. Prior to publishing a petitioned Zoning Map change, the Commission may, on its own motion, delimit or extend the boundaries of such area, so as to constitute a more reasonable zone district boundary.

~~6.~~5. The Commission may, on its own motion, propose any amendments to this ordinance and map. After holding a public hearing as required by this section, the Commission shall either:

a. Transmit such proposal to the Council, which shall then~~reupon~~ proceed in accordance with the procedures~~as set forth herein~~ of this Ordinance for any other amendment;~~,~~ or

b. Vote to quash the Commission~~-~~initiated proposal, in which case no further action need be taken by the Commission or Council.

[Ord. No. 406]

D. COUNCIL ACTION

1. The Council shall, within forty-five (45) days after the Commission action, ~~Once the Commission has held a public hearing, the Council may adopt the recommendations of the Commission~~

~~without holding a public hearing if there is no objection, request for public hearing, or other protest. The Council shall~~ hold a public hearing ~~if requested by the party aggrieved or any member of the public or of the governing body~~on the request. Notice of the time and place of the hearing shall be provided in accordance with S~~given in the time and manner provided for the giving of notice of the hearing by the Commission as specified in Subs~~ection 301.C.2 of this Ordinance. In addition, the Town may give notice of the hearing in such other manner as it may deem necessary or desirable.

2. If the owners of twenty (20) percent or more of the property within the zoning area, as defined by A.R.S. § 9-462.04 as the area within one hundred fifty feet, including all rights-of-way, of the affected property subject to the proposed amendment or change or change...~~either of the area of the lots included in a proposed change, or of those immediately adjacent in the rear or any side thereof extending one hundred fifty (150) feet therefrom, or of those directly opposite thereto extending one hundred fifty (150) feet from the street frontage of the opposite lots~~, file a protest in writing against a proposed amendment or zone change, it shall not become effective except by the favorable vote of three-fourths (3/4) of all members of the Council. If any members of the Council are absent or unable to vote on such a question because of a conflict of interest, then the required number of votes for passage of the question shall be three-fourths (3/4) of the remaining membership of the Council, providing that such required number of votes shall in no event be less than a majority of the full membership of the legally established governing body.

~~3. If the Council's recommendation is to overrule the recommendation of the Commission, such decision shall require the vote of a majority of the number of members of the Council who are present and qualified to vote on the matter. For example, if one Council member is disqualified from voting due to a conflict of interest, a majority of the remaining four members would be required to overrule the recommendation.~~

~~4.~~3. The Council may approve, deny, or continue the application and hearing to a time and place certain by a vote of a majority of the number of members of the Council who are present and qualified to vote on the matter. The Council ~~shall not~~may also remand ~~make any changes in any~~a proposal recommended by the Commission back to the Commission for further consideration. ~~until the proposed changes have been referred back to the Commission for a report., Failure of the Commission to file a report back to the Council within thirty (30) days from date of receipt of the recommended changes shall be deemed to be approval of the proposed change(s) as recommended by the Council.~~

~~5.~~4. At the time of rezoning, the Council shall establish a schedule for development of the specific use or uses for which rezoning is requested. The staff recommendation for rezoning requests that involve a zoning violation is a one-year period. For rezoning requests that do not involve a zoning violation, a five-year time period is recommended. A five-year time extension may be requested if the initial five-year time period expires. Requesting a time extension initiates a staff review to determine whether the request should be approved or denied, and whether conditions should be revised to reflect new conditions or practice. New conditions may be added during the staff review. The time extension request shall be noticed for a public hearing and heard only by the Council in accordance with the standards of this section. The Town Council may grant a time extension for a period of five years or less from the most recent public hearing on the case. If, at the expiration of this period, the property has not been improved for the use for which it was conditionally approved, ~~it~~ the ~~Mayor and~~ Council may elect to close the rezoning, in which case, it shall revert to its former zoning classification upon legislative action.

[Ord. No. 453]

E. RECONSIDERATION OF DENIED AMENDMENTS

I~~n the event that~~ a petition for an amendment is denied by the Council~~,~~ or is withdrawn after the Commission hearing, the Commission shall not consider the petition, ~~or~~ any other petition

seekingfor the same amendment for the same property or any part of itof this Ordinance as it applies to the same property described in the original petition, or any part thereof, forwithin a period of one (1) year from the date of such denial action. , Tunless this restriction does not apply if thee conditions upon which the original denial was based have changed.

F. EXCEPTIONS

In the event that a request for amendment concerns only the amendment of general requirements of this Ordinance, no signature of affected property owners or posting of property shall be required; provided, however, that all other provisions of this Section shall be complied with.

G. TIMEFRAME

The review periods specified in this Ordinance do not include time required for applicant responses, review of additional information, application revisions or corrections, and could vary due to public hearing notification requirements and other Town procedures. Review periods may be extended as reasonably necessary for projects involving complex technical, environmental, legal, or planning considerations.

SECTION 302. CONDITIONAL USE PERMITS

A. PURPOSE

~~Every zoning district contains certain buildings, structures and uses of land which are normal and complementary to Permitted Principal Uses in the district, but which, by reason of their typical physical or operational characteristics, influence on the traffic function of adjoining streets, or similar conditions, are often incompatible with adjacent activities and uses.~~ It is the intent of this Ordinance to permit Conditional Uses in appropriate zoning districts, but only in ~~specific~~ locations within such districts that can be designed and developed in a manner that~~which~~ assures maximum compatibility with adjoining uses. It is the purpose of this Section to establish principles and procedures ~~essential~~ to provide~~per~~ guidance and control of such uses.

B. GENERAL REGULATIONS

1. ~~Zoning district regulations established elsewhere in this Ordinance specify that~~ Certain buildings, structures and uses of land may be authorized by the Commission as Permitted Conditional Uses in a given district subject to the provisions of this Ordinance. ~~of this Section and to requirements set forth in district regulations.~~ The Planning and Zoning Commission is empowered to make recommendations to the Town Council regarding granting or denying applications for use permits and to impose reasonable conditions upon them. Prior to becoming effective, all actions by the Planning and Zoning Commission concerning a use permit application must be acted upon by the Town Council in accordance with the provisions of subsection 302.~~.~~E.

2. Any building, structure, or use existing on the effective date of this Ordinance which is reclassified by this Ordinance as a Permitted Conditional Use, ~~by this Ordinance~~ within~~for~~ the zoning district in which it is located, shall be deemed to satisfy~~considered as meeting~~ all~~the~~ conditions that~~which~~ would otherwise be imposed upon such use by this Ordinance.~~,~~ I~~ and it~~s continued operation~~ance~~ shall not be subject to issuance of a Conditional Use Permit; provided, however, to the extent that the building, structure, or use does not~~such fails to~~ conform to the requirements of this Ordinance, it shall be considered nonconforming as described in Section 501, and its continuance shall be governed by all applicable nonconforming use regulations ~~applicable thereto~~.

3. Every Conditional Use Permit issued shall be personal to the permittee and applicable only to the specific use and to the specific property for which it is issued. Use Permits may contain specific limitations on the scope, nature, and duration of the use, as well as transferability of the Use Permit, as deemed necessary to secure the objectives of this Ordinance. The conformance~~maintenance~~ to~~of~~ special conditions imposed by the Permit, as well as compliance with other provisions of this Ordinance, shall be the responsibility of the property owner.

C. CONDITIONAL USE PERMIT APPLICATION

1. The a~~A~~pplication for a use permit shall be filed with the Zoning Administrator on a form prescribed by the Zoning Administrator~~Commission~~.

2. ~~The application shall be forwarded to the Planning and Zoning Commission by the Zoning Administrator, and when required by the Commission,~~The Zoning Administrator shall provide guidance to the applicant regarding the preparation of the application to ensure it satisfies the intent of this Section. When required by the Zoning Administrator, the application shall be accompanied by a detailed site plan prepared in accordance with Section 303.1, showing all information necessary to demonstrate that the proposed use will comply with all special conditions as well as other regulations and requirements of this Ordinance. The applicant shall furnish any additional information the ~~Commission~~Zoning Administrator ~~any additional information~~may consider relevant to ~~investigation of the case~~ the evaluation of the application.

~~4.~~3. The application shall be reviewed in accordance with Section 301.B.2.

D. COMMISSION ACTION AND FINDINGS

1. Commission Action on Conditional Use Permit Applications is as outlined in Section 301.C, except that:

   a. ~~It is the express intent of this Ordinance that any use for which a Conditional Use Permit is required shall be permitted as a Principal Use in the particular zoning district, provided that all special conditions and requirements of this Ordinance are met. Therefore, the action of the Commission shall be one of approval or denial based upon its judgment as to whether the specified conditions have been or will be met.~~ In its review of the application, ~~T~~the Commission shall consider not only the nature of the use and the special conditions influencing its location in the particular district, but also the proposed location of buildings, parking and other facilities within the site, the amount of traffic likely to be generated and how it will be accommodated, and the influence that such factors are likely to exert on adjoining properties. The Commission may make such suggestions as it considers desirable ~~and shall provide all possible guidance to the applicant in his preparation of application, plans, and data in such manner as~~ to satisfy the intent of this Section. The applicant shall furnish the Commission with any additional information it may consider relevant to the evaluation of the application.

   ~~b. The Commission shall choose~~consider the application at their next regular meeting if the application was filed at least fifteen (15) days prior to such meeting. Otherwise it shall be carried over until the next regularly scheduled meeting. The Commission may reach a decision, continue the matter to a specified date (but not later than the next regularly scheduled meeting), or may set the matter for public hearing. Prior to holding a public hearing, a Neighborhood Meeting may be required in accordance with Section 306 of this Zoning Ordinance. If the Commission does set the matter for public hearing, notice thereof shall be given to the public by publication of a notice in the official newspaper of the Town and by posting the property included in the application not less than fifteen (15) days prior to the hearing. The notice shall set forth the time and place of the hearing and include a general explanation of the matter to be considered and a general description of the area affected.

   ~~c.~~b. In order to recommend approval of~~grant~~ any use permit, the ~~findings of the~~ Commission must find~~be~~ that the establishment, maintenance, or operation of the use or building applied for will not be detrimental to the public health, safety, and ~~peace, convenience, comfort, and general welfare of persons residing or working in the neighborhood of such proposed use or be detrimental or injurious to property and improvements in the neighborhood or to the~~ general welfare of the Town and its citizens.

   ~~d.~~c. The Commission may designate such conditions in connection with the use permit as it deems necessary to secure the intent and purposes of this ~~o~~Ordinance and may require guarantees and evidence that such conditions are being or will be complied with.

   ~~e.~~d. If the Commission finds that the application and supporting data do not indicate that all applicable conditions and requirements of this Ordinance will be met, it shall recommend denial of~~y~~ the permit. ~~Notice of denial, including reasons therefore, shall be mailed to the applicant at the address shown in the application, and the Commission shall report its actions to the Council at its next regular meeting.~~

~~5. If the Commission approves the application it shall direct the Zoning Administrator to draft a Conditional Use Permit setting forth all conditions and requirements governing such use, shall make the approved site plan a part of the record of the case, and shall submit the permit to the Town Council for action at the Council's next regular meeting, but.~~

~~6.~~1. ~~Failure of the applicant to comply with the conditions and safeguards which are a part of the terms under which a Conditional Use Permit is granted shall be deemed a violation of this Ordinance and punishable under Section 109.~~

E. COUNCIL ACTION

~~1. Upon receipt from the Zoning Administrator of a Planning and Zoning Commission recommended action on a Conditional Use Permit application, the Town Clerk shall place the permit on the regular Council meeting agenda first following the 15th day after approval of the permit by the Planning Commission.~~

1. The Council shall, within forty-five (45)~~fifteen (15)~~ days after the~~ir regular meeting or public hearing~~Commission action on a Conditional Use Permit, act on the recommendation of the Planning and Zoning Commission by either affirming, denying,~~reversing~~ or modifying the recommendation~~action~~ of the Planning and Zoning Commission. ~~-~~The Town Council may make a decision based on its own findings.

2. The Council may designate such conditions in connection with the permit as it deems necessary to secure the intent and purpose of this Ordinance and may require such guarantees and evidence that such conditions are being, or will be, complied with.

3. The Council's decision shall be final and shall become effective immediately. Notice of the decision shall be mailed to the applicant at the address shown in the application.

Failure of the applicant to comply with the conditions and safeguards ~~which~~that are a part of the terms under which a Conditional Use Permit is granted shall be deemed a violation of this Ordinance and punishable under Section 1101~~09~~.

~~3.~~4.

[Ord. No. 470]

F. TIME LIMITS

1. Use permits become effective immediately upon action by the Town Council.

2. Any use permit issued by the Town Council shall be commenced within six (6) months from the date of Council ratification, and diligently pursued, otherwise it shall become null and void.

3. No person shall reapply for the same or substantially the same use permit on the same or substantially the same plot, lot, or parcel of land within a period of one (1) year from the date of denial or revocation of said use permit.

4. An extension of approval may be granted by the Town Council if the applicant files for the extension prior to the approval becoming void ~~and the extension is granted by the t~~Town ~~e~~Council. The Town Council may grant up to two additional extensions provided the approval is in compliance with all ordinances and requirements in effect at the time of the extension request. An application for an extension shall be accompanied by a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the office of the Town Clerk.

[Ord. No. 470]

G. REVOCATION

Use permits granted in accordance with the provisions of this ordinance may be revoked if any of the conditions of terms of the permit are violated or if any law or ordinance is violated in connection ~~there~~with the permit.

The Zoning Administrator shall notify the permittee~~, by regular First-Class mail, of a violation or~~ by both Certified Mail and First-Class Mail of a violation or the termination of a use permit. If no attempt to change the violation is made within ~~fifteen~~ twenty (2015) days ~~after receipt of~~of the date the Zoning Administrator sends the notification, the permit shall be revoked and considered null and void. Notice shall be deemed served on the date that the notice is deposited in the United States Mail by Certified Mail and First-Class Mail to the permittee's address of record. Failure to accept or claim a mailed notice does not delay the 20-day period granted to address the violation.

Any use permit shall be considered null and void if construction does not conform to the originally approved site plan. SubstantialAny deviations requested from the originally approved site plan shall be processed as a new use permit. In the case of Conditional Use Permits, substantial deviations are any deviation from the originally approved permit that materially alters the intensity, location, design, operation, or impact of the approved use, as determined by the Zoning Administrator

[Ord. No. 470]

H. FEE

The application for a conditional use permit shall be accompanied by a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the office of the Town Clerk. No part of the filing fee shall be returnable. Payment of the filing fee shall be waived when the petitioner is the Town, County, State or Federal Government.

I. TIMEFRAME

See Section 301.G

[Ord. No. 406; Ord. No. 407; Ord. No. 470]

SECTION 303.1. SITE PLAN REVIEW

A. PURPOSE

The purpose of the site plan review is to provide for the public health, safety and general welfare, and to protect the environment and the historical character of the Town of Jerome. The plan review will include examination of all proposed site work and excavation and grading regulations, with special regulation of work on sites with extreme slope or unstable soils. Essential to this purpose is the review of possible impacts on surrounding properties.

[Ord. No. 293; Ord. No. 470]

B. PROJECTS REQUIRING REVIEW BY THE PLANNING AND ZONING COMMISSION AND COUNCIL

1. Additions and alterations to residential, commercial, or industrial structures.
2. Decks.
3. Grading, excavation, clearing, and grubbing in accordance with Section 303.3.
4. Lot splits and lot line adjustments.
5. Modifications to nonconforming structures.
6. New residential, commercial, or industrial structures.
7. Sheds and accessory structures.
8. Projects not specifically listed as exempt (Section 303.1.D) or requiring Zoning Administrator review per Section 303.1.C.

[Ord. No. 470]

C. PROJECTS REQUIRING REVIEW BY THE ZONING ADMINISTRATOR

1. Parking areas.
2. Patios.
3. Replacement of exterior stairs with metal or other fire-resistant materials, provided there is less than a 10 percent change in the original footprint. Approval by the Fire Inspector is also required.

[Ord. No. 470]

D. PROJECTS EXEMPT FROM SITE PLAN REVIEW

1. Repair, replacement, and maintenance of existing structures, provided that the same materials are used.

~~2. 1.2. Landscaping (not including accessory structures such as gazebos, pergolas, shade structures, and sheds).~~

[Ord. No. 470]

E. PROCEDURE

1. Site plan review may be accomplished by either the Zoning Administrator or the Planning and Zoning Commission and Council, depending on the project as noted in Sections 303.1.B and 303.1.C.
2. Applications for site plan review shall be submitted to the Zoning Administrator for review by the Building Inspector, Fire Inspector, Zoning Administrator, and ~~Planning and~~ other applicable reviewing bodies~~Zoning Commission~~. Once submitted, the Zoning Administrator shall have fourteen (14) calendar days from the date of submission of a site plan application to review said plan for completeness. If the application is incomplete, the Zoning Administrator shall provide the applicant with a comprehensive list of specific deficiencies in a written notice.

3. If the application is determined to be complete, the Zoning Administrator shall determine whether a public hearing is required for the application. If required, the Zoning Administrator shall forward the application to the Planning & Zoning Commission after conducting a substantive review of the complete application materials, and the application shall be processed in accordance with Section 302 of this Ordinance. ~~The site shall be posted according to a procedure outlined by the Zoning Administrator. Such posting will include, but not be limited to, proposed improvements and usage of said property and will commence fifteen (15) days prior to site plan review and remain until after final approval.~~ If the site plan can be reviewed and approved by the Zoning Administrator, then site posting and a neighborhood meeting ~~is~~ are not required, but the Zoning Administrator may request design review recommendations on the site plan from the Historic Preservation/Design Review Board.

4. The Zoning Administrator or the Council shall approve, conditionally approve, or deny a site plan application. Once denied, the original plan shall not be resubmitted.

5. The Historic Preservation/Design Review Board ~~Commission~~ approval of the design elements of the site plan is outlined in Section 304.

F. SITE PLAN CONTENT REQUIREMENTS

Site Plan Applications~~s submitted~~ shall include the following:

1. Site Plan Application Form

2. Written narrative of the proposed project (include uses, hours of operation, number of employees, etc.)

~~1.~~3. Plot plan or site layout; a~~A~~ directional north arrow; scale used; lot dimensions referenced to a legal description; and street dedications, easements and utilities, both public and private. When~~In cases where~~ the location of a property perimeter is unclear, the Building Inspector may require a boundary survey with ~~corners identified on the~~ ground-staked corners.

~~2.~~4. A vicinity sketch showing the location of the site in relation to the surrounding street system. Adjacent properties and their uses shall be identified.

~~3.~~5. Location, perimeter size, and use of all existing and proposed buildings and structures, as well as the number of stories of all proposed buildings and structures.

~~4.~~6. Size and dimensions of required yards and lot coverage for the zoning district and the space between buildings.

~~5.~~7. Location and height of all existing and proposed walls and fences.

~~6.~~8. Location, number of spaces, dimensions, circulation patterns, and surface materials for all off-street parking and loading areas proposed. All parking shall comply with Section 510 of the Jerome Zoning Ordinance.

~~7.~~9. Existing drainage. Show how proposed drainage will be directed, indicating both adequate disposal and protection of neighboring properties.

~~8.~~10. Natural features, such as rock outcroppings, trees over twelve (12) inches in diameter, washes, and man-made features such as existing roads and structures, walkways, and stairways, with indication as to which are to be retained, removed, or altered.

~~9.~~11. Existing and proposed grades, by spot grades or topographic representation. The Building Inspector may require a topographic survey and additional engineering.

a. Slopes exceeding thirty-five (35) percent shall require a topographic survey by a licensed engineer or surveyor. In addition, the applicant shall provide a satisfactory assessment by a licensed engineer regarding soil/geological stability, bearing qualities and drainage. If

indicated by this assessment, a structural engineer shall design all foundations and retaining structures.

b. Exceptions. The additional studies required in number 9(a) may be waived, if the dollar amount of the project does not require a licensed contractor according to A.R.S. 32-1121.

~~10.~~12. All proposed excavation and grading shall conform to Section 303.3 of this ordinance.

~~11.~~13. Any other information that the Zoning Administrator may find necessary to establish compliance with this and any other ordinances.

~~12.~~14. Application for sign permits shall be filed in accordance with the provisions of Section 509.

[Ord. No. 293; Ord. No. 470]

~~F.~~G. FEE

The application for Plan Approval shall be accompanied by a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the offices of the Town Clerk. No part of the filing fee shall be returnable. Payment of the filing fee shall be waived when the petitioner is the Town, County, State, or Federal government.

H. TIMEFRAME

See Section 301.G

[Ord. No. 293]

~~**G. REVIEW PROCEDURES**~~

~~Site plan review may be accomplished by either the Zoning Administrator or the Planning and Zoning Commission in accordance with the provisions of this section. Once submitted, the Zoning Administrator shall have fifteen (15) days from the date of submission of a site plan application to review said plan for completeness. If Planning and Zoning Commission review is required, a completed site plan shall be submitted for review by the commission at the next available meeting, if received by the submission deadline. The Zoning Administrator may request design review recommendation on the site plan. The Zoning Administrator or Planning and Zoning Commission shall approve, conditionally approve, or deny said plan. Once denied, the original plan shall not be resubmitted.~~

~~[Ord. No. 293; Ord. No. 470]~~

SECTION 303.2. FINAL SITE PLAN REVIEW

A. FINAL SITE PLAN PROCEDURES

If desired by the applicant or requested by the Planning and Zoning Commission or Town Council, projects may also be submitted for Final Site Plan Review. An application for a Final Site Plan shall be in accordance with Section 303.1 and shall ~~The~~ include the following information ~~shall be submitted~~:

1. Any additional features required as a result of engineering and/or soil studies;
2. Compliance with all applicable standards ~~the appropriate sections~~ of thise Zoning Ordinance. ~~for the Zoning District including:~~

   ~~a. Lot Area~~

   ~~b. Lot Width~~

   ~~c. Maximum Lot Coverage~~

   ~~d. Yard Requirements~~

   ~~e. Off-Street Parking and Loading~~

   ~~f. Building Height~~

   ~~g. Accessory Building Height~~

   ~~h. Any other property development standards specific to the zone.~~
3. Compliance with all applicable codes, including the Uniform Building Code.
4. Compliance with any conditions recommended by the Planning and Zoning Commission, Historic Preservation and ~~Commission~~Design Review Board, Building Inspector, Fire Inspector, and/or the Zoning Administrator from the previous review.

[Ord. No. 470]

B. REVIEW

~~1.~~ Review for a Final Site Plan is in accordance with Section 303.1.~~The final plan shall be checked for completeness by the Zoning Administrator within fifteen (15) days. A completed final plan shall be presented to the Planning and Zoning Commission and the Design Review Board, when necessary, at the earliest possible meetings.~~

1.

~~1. POST-APPROVAL PROCEDURETHE PLANNING AND ZONING COMMISSION MAY APPROVE, APPROVE WITH CONDITIONS, OR DENY. ONCE DENIED, THE ORIGINAL PLAN SHALL NOT BE RESUBMITTED.~~

~~2.~~C. ~~THE DESIGN REVIEW BOARD APPROVAL OF THE DESIGN ELEMENTS OF THE FINAL PLAN IS OUTLINED IN SECTION 304.~~

~~3.~~1. All copies of the approved plan, with any conditions from the approving board, shall be dated and signed by the Zoning Administrator. One (1) copy of said approved plan and conditions, together with a notification of all design review requirements and procedures, shall be distributed to the applicant, and one (1) copy shall be filed with the Building Inspector.

[Ord. No. 293; Ord. No. 470]

D. TIMEFRAME

See Section 301.G

SECTION 303.3. GRADING AND EXCAVATION REQUIREMENTS

All excavation and grading shall be performed in accordance with these provisions.

This section shall not affect existing legal uses of property or the right to continuation of such legal use. However, if a nonconforming use of a structure or land is discontinued for six (6) months, any further use shall comply with these requirements.

Where the combined proposed cut and fill exceeds ten (10) cubic yards, the applicant must obtain a separate grading permit from the Building Inspector. An assessment by a civil, structural, or soil engineer may be required to~~show~~ demonstrate site stability and ~~lack of~~ the absence of negative impact.

Six (6) months from the date of approval of a grading permit, the approval becomes void if the grading permit has not been issued.

Exploratory excavation of ten (10) cubic yards or less can proceed with the approval of the Zoning Administrator and Building Inspector. The applicant shall submit plans for approval by the Building Inspector~~Planning and~~ and Zoning Administrator~~Commission~~ for all excavation in excess of ten (10) cubic yards. The Zoning Administrator may determine that excavation in excess of ten (10) cubic yards requires review and approval by the Planning & Zoning Commission.

[Ord. No. 470]

A. APPROVAL PROCEDURE

1. Any person wishing to do any grading, filling, excavation, cutting, or other site earthwork shall submit plans, drawings, and supporting data, including the quantity of cut and the quantity of fill, and any other information required by the Zoning Administrator and/or Building Inspector. ~~The Planning and Zoning Commission will look for compliance with these requirements in making its decision.~~
2. Grading shall be done in conjunction with a site plan filed with the Zoning Administrator. ~~Such plan will be presented to the Planning and Zoning Commission at its next regularly scheduled meeting.~~ Grading, excavation, and fill shall not:
    a. adversely affect the lateral support of adjacent property or structures;
    b. increase the stresses in or pressures upon any adjacent or contiguous property;
    c. physically infringe on adjacent property;
    d. include detrimental excavation or stockpiling;
    e. be in a public right-of-way; or
    f. have a negative impact on existing drainage.
3. The effect of the proposal on scenic views will be considered for potential impact.
4. Where the slope exceeds thirty-five (35)~~,~~ percent, engineering reports shall be required under the Site Plan requirements of the Jerome Zoning Ordinance.

[Ord. No. 470]

B. POST-APPROVAL PROCEDURE

If approved by the Building Inspector and Zoning Administrator~~Planning and Zoning Commission~~, the activity will be carried out as stipulated in these requirements. The activities described below shall be performed by licensed contractors where required by law.

1. All grading and excavation shall be performed with safety precautions and any anti-erosion or drainage devices required by the Building Inspector.
2. Construction equipment parking and storage needs shall be identified, and provisions made not to interrupt normal traffic flow more than absolutely necessary.

3. Dust control measures shall be taken and loads covered to prevent spilling and blowing.
4. Fencing of hazardous sites shall be required.
5. Safety fencing to protect neighboring property may be required.
6. The Building Inspector may require adequate inspection and compaction control by an approved soil testing agency. This may include certification concerning the inspection of cleared areas and benches to receive fill and the compaction of fills.
7. Cuts shall be accomplished to blend scale, form, and visual character into the natural landforms and minimize exposed scars.
8. Cuts shall be adequately fenced.
9. Driveway slope shall not exceed fifteen (15) percent, where possible, within topographic constraints. In every case, driveways shall blend ~~in~~ with the surrounding natural colors~~,~~ and shall include~~have~~ adequate measures ~~taken~~ for runoff and drainage.
10. Fills shall be accomplished to blend scale, form, and visual character into the natural landforms and minimize exposed scars.
11. The Building Inspector may require further supporting data to ensure stability.

[Ord. No. 470]

C. RESPONSIBILITIES OF THE APPLICANT

1. The applicant, ~~his~~ their agent, contractor, or employee shall carry out the proposed work in accordance with the approved plans and specifications and in compliance with all Jerome Zoning Ordinance requirements.
2. During grading operations, the applicant shall be responsible for the prevention of damage to any street or drainage facilities or to any public utilities or services.
3. The applicant is responsible for the prevention of damage to adjacent propert~~l~~y, and no person shall excavate on land sufficiently close to the property line to endanger any adjoining public street, sidewalk, alley, or other public or private property prior to supporting and protecting such property from settling, cracking, or other damage that might result.
4. No modification of the approved grading, excavating, or fill plans may be made without the approval of the Building Inspector and Zoning Administrator~~Planning and Zoning Commission~~.
5. Neither the issuance of a permit or approval under these requirements, nor the compliance with anythe provision~~s hereof,~~ of or ~~with any~~ conditions imposed in the issued permi~~tt issued hereunder~~, shall relieve any person from responsibility for damage to other persons or property, nor impose any liability upon the Town of Jerome for damage to other persons or property.
6. An as-built plan including original ground surface elevations, as-built surface elevations, site drainage patterns, and location and elevations of all surface and sub-surface drainage facilities shall be submitted upon completion of work. If required by the Building Inspector, a civil engineer's certification shall be provided for the final plan.

SECTION 303.4. APPEALS AND EXPIRATION OF APPROVALS

A. APPEALS

1. Any applicant, person residing within 300 feet of ~~a~~the project ~~or proposed activity~~subject to the procedures in this Ordinance, or person adversely affected may appeal a decision of the Planning and Zoning Commission to the Town Council by filing a written notice of appeal with the Town Clerk not later than fifteen (15) days from the date of the commission's decision. If the appellant is not the applicant and resides beyond 300 feet of the project, the appellant shall clearly demonstrate how they might be adversely affected by the proposed project. Appeals of decisions by the Zoning Administrator are per Section 305 of this Ordinance.

2. When a written appeal is filed with the Town Clerk, the ~~Council shall evaluate the appeal at their next available regular or special meeting. Where an appeal has been filed, the Council may elect to set the matter for a public hearing~~Town Clerk shall promptly provide notice of such an application to the Zoning Administrator. The appeal shall state the grounds for appeal and demonstrate how the appellant has been aggrieved or affected by the decision. The Zoning Administrator shall review the appeal to validate its completeness within three (3) days of receipt. If the appeal is deemed defective, the Zoning Administrator shall notify the applicant of the type and nature of the defect or defects within one (1) day of making said determination. If an appeal is determined to be complete, the Zoning Administrator shall schedule the appeal for Council consideration no later than 45 days from the determination of an application's completeness. ~~such action is taken~~Once scheduled,~~,~~ a legal notice shall be published at least once in ~~a~~the official newspaper of general circulation within the ~~f the~~ Town of Jerome; the site shall be posted at least fifteen (15) days prior to the hearing date; and notice by First-Class mail shall be ~~mailed~~ given to property owners within 300 feet of the site. Notice shall also be given to the Planning and Zoning Commission and the appellant. The Zoning Administrator shall submit a report to the Council with all relevant information and set forth the reasons for action taken by the Planning and Zoning Commission.

3. An appeal may be filed by persons aggrieved or by any officer, department, board, or bureau of the municipality affected by a decision of the Zoning Administrator. Appeals will be forwarded to the Board of Adjustment by filing a written notice of appeal with the Zoning Administrator not later than fifteen (15) ~~-~~days from the date of the Zoning Administrator's decision.

[Ord. No. 470]

B. BUILDING PERMIT ISSUANCE; EXPIRATION OF APPROVAL

1. Six (6) months from the date of approval, a plan approval becomes void if a building permit has not been issued and/or work has not commenced.

2. A building permit shall not be issued by the Building Inspector until the fifteen (15) day appeal period has expired.

3. An extension of approval may be granted if the applicant files for an extension prior to the approval becoming void and the extension is granted by the approving board. The approving board may grant a second extension, provided the approval ~~is in~~ compli~~esance~~ with all ordinances and requirements in effect at the time of the extension request. Any additional extension requests require review by the Town Council. Application for an extension shall be accompanied by a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the office of the Town Clerk.

[Ord. No. 470]

C. VIOLATION AND ENFORCEMENT

1. Prior to the issuance of a building permit, the Building Inspector shall ascertain that the plans presented with the Building Permit application are in conformance with those plans approved by

the Town Council or Zoning Administrator~~Planning and Zoning Commission has approved plans that are in conformance to those presented with the Building Permit application~~ and that the time limitations imposed by this ordinance have not elapsed.

2. The Zoning Administrator shall ensure that all matters are undertaken according to the conditions of the approved plan. If, during the course of work, changes in the approved plan are necessitated by conditions found at the site, an appropriately licensed engineer's approval may be required for the modified plans. In the event of a violation, the Zoning Administrator shall notify the permittee, by mail, that he is in violation of the conditions of the approved plan. If there are no plans, approved by the Zoning Administrator, to eliminate the violation within fifteen (15) days after notification, the building permit shall be revoked and considered null and void.
3. If, thirty (30) days after written notification by the Zoning Administrator, the applicant is still in violation of this ordinance, the Zoning Administrator shall take appropriate legal action to abate the violation.

[Ord. No. 293; Ord. No. 470]

SECTION 304. HISTORIC PRESERVATION/DESIGN REVIEW BOARD

A. PURPOSE

The purpose of this section~~Design Review~~ is to enable the Historic Preservation/Design Review Board to review the exterior design of proposed new buildings and structures, proposed alterations of buildings and structures, proposed signs, and proposed demolition of structures~~, within the Historic Overlay District,~~ in order to ensure that new development is compatible with the surrounding environment, and to preserve and protect the historical character of the Town of Jerome. Design review provided by the Historic Preservation/Design Review Board is intended to promote and preserve Jerome's economic and environmental well-being, which depends exclusively upon its distinctive character, natural attractiveness, and overall architectural quality, which contribute substantially to its viability as a recreational and tourist center and which contributed to its designation as a National Historic Landmark. Design review~~Design Review~~ is intended to enrich the lives of all the citizens of Jerome by promoting harmonious, attractive, and compatible development, and is therefore considered to be in furtherance of the general welfare. ~~The provisions of this Section shall apply to all new construction, exterior alterations, demolitions, and signs, in the Historic Overlay District.~~

[Ord. No. 470]

B. APPLICATION

The provisions of this Section shall apply to all new construction, exterior alterations, demolitions, and signs.

~~B.~~C. PROJECTS REQUIRING REVIEW BY THE HISTORIC PRESERVATION/DESIGN REVIEW BOARD~~COMMISSION~~

1. Awnings and permanent~~s~~ signs
2. Additions and exterior modifications
3. Decks
4. Demolitions of existing structures
5. Fences and walls
6. New structures
7. Paint, stain, and similar coatings
8. Sheds and accessory structures
9. Projects not specifically listed as exempt or requiring Zoning Administrator review

[Ord. No. 470]

~~C.~~D. PROJECTS REQUIRING REVIEW BY THE ZONING ADMINISTRATOR

1. Changes in roof material or color, provided the new roof has limited reflectivity.
2. Parking areas.
3. Patios.
4. Replacement of exterior stairs with metal or other fire-resistant materials, provided there is less than a 10 percent change in the original footprint and the change is approved by the Fire Inspector.
5. Window and door replacement, provided the new window or door replicates the same size and style of the window or door being removed.

[Ord. No. 470]

~~D.~~E. PROJECTS EXEMPT FROM DESIGN REVIEW BY THE HISTORIC PRESERVATION/DESIGN REVIEW BOARD~~COMMISSION~~

Landscaping (not including accessory structures such as gazebos, pergolas, shade structures, and sheds), provided any grading and excavation is in compliance with Section 303.3.

~~and~~ Rrepair, replacement, and maintenance of existing structures, provided that the same materials are used.

Nothing in this section shall be construed to prevent the ordinary maintenance or repair of any exterior elements of any building or structure; nor shall anything in this article be construed to prevent the construction, reconstruction, alteration, or demolition of any such elements that the authorized municipal officers, i.e., Building Inspector, Town Engineer, etc., shall certify as required by public safety.

[Ord. No. 470]

~~E.~~F. REVIEW PROCEDURE

1. Applications for design review shall be submitted to the Zoning Administrator for review by the Building Inspector, Fire Inspector, Zoning Administrator, and Historic Preservation/Design Review Board in accordance with the provisions of this section. Review may be accomplished by either the Zoning Administrator or the Historic Preservation/Design Review Board, as stated in Section 304.C and 304.D. The Zoning Administrator shall have fourteen (14) days from the date of submission of a design review application to review said application for completeness. If the application is incomplete, the Zoning Administrator shall provide the applicant with a comprehensive list of the specific deficiencies in a written notice. If the application is determined to be complete, the Zoning Administrator shall forward the application to the Historic Preservation/Design Review Board after conducting a substantive review of the complete application materials.

2. Upon receipt of any complete application for design review, and prior to holding a public hearing, a Neighborhood Meeting may be required in accordance with Section 306 of the Zoning Ordinance of the Town of Jerome.

3. After a Neighborhood Meeting has been held, if applicable, in accordance with Section 306, the Zoning Administrator shall then choose a reasonable time for the hearing of the application, and shall give notice to interested parties and to the public by publication of a notice in a newspaper of general circulation in the Town of Jerome, and by posting one notice of the hearing on the subject property requesting the proposed change, not less than fifteen (15) days prior to the hearing. The notice shall set forth the time and place of the hearing, including a general explanation of the matter to be considered, and a general description of the area affected.

~~1.~~4. ~~Once submitted, the Zoning Administrator shall have fifteen (15) days from the date of submission of an application to review the application for completeness.~~ If a review is required by the Historic Preservation/Design Review Board, the application shall be submitted for review by the board at the next available meeting. If Site Plan Review is required according to Section 303, the application shall be submitted concurrently. The applicant shall receive approval from the Historic Preservation/Design Review Board prior to being scheduled for Site Plan Review by the Planning and Zoning Commission. The Historic Preservation/Design Review Board or Zoning Administrator shall approve, conditionally approve, or deny the application. Once denied, the original plan shall not be resubmitted.

~~2.~~5. When, in the opinion of the Historic Preservation/Design Review Board, upon hearing and considering all relevant information, a project is not in keeping with either the tenets of this ordinance or the Jerome General Plan, the project shall be denied by specific motion of the Historic Preservation/Design Review Board.

6. When approved, a~~A~~ll copies of the approved plan, including~~with~~ any conditions imposed by the reviewing body~~shown thereon or attached thereto~~, shall be dated and signed by the Zoning Administrator. One (1) copy of said approved plan and conditions, together with a notification of

all Design Review requirements and procedures, shall be distributed to the applicant, and one (1) copy shall be filed with the Building Inspector.

~~3.~~7. The Historic Preservation/Design Review Board shall utilize the current edition and applicable standards of the Secretary of the Interior's Standards for the Treatment of Historic Properties to evaluate applications for historic properties and structures.

[Ord. No. 470]

~~F.~~G. APPLICATIONS FOR APPROVAL AND PERMIT

1. A prescribed application form for Design Review approval shall be filed with the Zoning Administrator, which details the information that must be provided by the applicant, along with the plans and other documents that must be submitted.

2. An ~~prescribed~~ application ~~form~~ for the ~~*Approval of the Demolition, Partial Demolition or Removal*~~ demolition or removal of an e~~E~~xisting b~~B~~uilding or s~~S~~tructure shall be filed with the Zoning Administrator on a form prescribed by the Administrator, which details the information that must be provided by the applicant, along with the plans and other documents that must be submitted.

[Ord. No. 470]

~~G.~~H. FEE

The application for Design Review shall be accompanied by a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the offices of the Town Clerk. No part of the filing fee shall be returnable. Payment of the filing fee shall be waived when the petitioner is the Town, County, State, or Federal Government.

[Ord. No. 470]

~~H.~~I. REVIEW CRITERIA FOR NEW CONSTRUCTION

1. The Historic Preservation/Design Review Board and Zoning Administrator shall use the criteria below to review proposed applications for new construction. The Zoning Administrator, Historic Preservation/Design Review Board, and the applicant shall use photographs, lithographs, and other depictions of the Town of Jerome~~,~~ to support their findings. If photographs, etc., are unavailable, then the determination or finding shall be based on the works of a recognized historic preservation authority,~~;~~ such as, but not limited to, text~~-~~books or an architect/historian. Each of the following criteria must be satisfied before an application can be approved.

   a. PROPORTION – The relationship of the width of a building or structure to its height shall be visually compatible with~~to~~ buildings, structures, and places to which it is visually related

   b. OPENINGS – The relationship of the width of the windows and doors~~,~~ to the height of windows and doors in a building shall be visually compatible with buildings, structures, and places to which the building is visually related.

   c. PATTERN – The relationship of solids to voids in the facade of a building or structure shall be visually compatible with buildings, structures, and places to which it is visually related.

   d. SPACING – The relationship of buildings or structures to the open space between them~~it~~ and adjoining buildings shall be visually compatible with~~to~~ the buildings, structures, and places to which it is visually related.

   e. ENTRANCES, PORCHES, DECKS, AND PROJECTIONS – The height, projection, supports, and relationship to streets and sidewalks~~,~~ of entrances, porches, decks, awnings, canopies, and balconies of a building shall be visually compatible with~~to~~ the buildings, structures, and places to which it is visually related

   f. MATERIALS, TEXTURE, AND COLOR – The materials, texture, and color of the facade of a building or structure~~,~~ shall be visually compatible with the predominant materials, textures, and colors used in the building and structures to which it is visually related.

g. ROOFS – The roof shape of a building shall be visually compatible with the buildings to which it is visually related.

h. ARCHITECTURAL DETAILS – Doors, windows, eaves, cornices, and other architectural details of a building or structure shall be visually compatible with buildings and structures to which it is visually related.

i. ACCESSORY BUILDINGS - Garages, carports, and sheds shall be visually compatible with buildings, structures, and places to which they are visually related.

j. ACCESSORY FEATURES – Fences, walkways, decks, stairways, lighting, antennae, and other manmade structures shall be visually compatible with buildings, structures, and places to which they are visually related.

k. LANDSCAPING – Landscaping shall be visually compatible with the landscaping around the buildings, structures, and places to which it is visually related.

l. SCREENING – The proposed addition, alteration, or other changes shall be screened with appropriate materials and in an appropriate design so as to be visually compatible with related properties, when, in the opinion of the Historic Preservation/Design Review Board, all other means of assuring visual compatibility are not reasonably possible.

m. SOLAR INSTALLATIONS – Refer to "Solar Energy System Design Guidelines" approved by the Town Council in June 2015, utilizing best practices for installing solar on historical buildings as recommended by the Department of the Interior. These guidelines are available at Jerome Town Hall, the Jerome Library, and on the Town of Jerome website.

2. The Historic Preservation/Design Review Board and Zoning Administrator shall review a submitted application for *Design Approval of Alterations, Additions, or Renovations to Existing Buildings or Structures*, and shall have the power to approve, conditionally approve, or disapprove all such requests, basing their decision on the following criteria:

   a. ARCHITECTURAL FEATURES AND DETAILS – Original porches, decks, balconies, canopies, doors, windows, walls, fences, stairways, eaves, cornices, and other architectural features and details shall be preserved and retained where feasible. Necessary replacement of these features should be as near as possible to the original feature in design and material.

   b. ROOFS – Original roof shape, design, and material shall be preserved and retained where feasible. Where contemporary roofing material is used, it should be as near as possible to the appearance of the original roofing material.

   c. COLOR – Exterior colors should be as near as possible to the original colors appropriate to the years during which the particular building or structure was built.

   d. MATERIALS AND TEXTURE – The original exterior materials and texture shall be preserved and retained where feasible. Where contemporary materials are used, they should be as~~,~~ near as possible to the original material and texture.

3. The Historic Preservation/Design Review Board shall review a submitted application for *Approval of the Demolition, Partial Demolition, or Removal of Existing Buildings or Structures*, and shall have the power to approve, conditionally approve, or disapprove, all such requests; in accordance with the following procedures and criteria.

   a. In passing on an application for demolition, partial demolition, or removal, the Historic Preservation/Design Review Board shall consider, among other things, the architectural or aesthetic quality or significance of the building or structure to the public interests of the Town.

   b. If the Historic Preservation/Design Review Board finds that the public interest and the preservation and protection of historic places ~~and the public interest~~ will best be served by

postponing the demolition, partial demolition, or removal of a building or structure, it may postpone such action for a designated period, which shall not exceed one hundred eighty (180) days from the receipt of the application, and shall notify the applicant of such postponement. DuringWithin the period of postponement of such demolition or alteration of any building, the Historic Preservation/Design Review Board shall take steps to ascertain what the Town Council can or may do to preserve such building, including consultation with private civic groups, interested private citizens, and other public boards or agencies, and and including investigationconsideration of the potential use of the power of eminent domain when the preservation of a given building is clearly in the interest of the general welfare of the community and of certain historic and architectural significance. The Historic Preservation/Design Review Board shall thereaftern make such recommendations thereabout to the Town Council as the Board may determine to submit.

4. The Historic Preservation and CommissionDesign Review Board shall review a submitted application for Design Approval of Signs and shall have the power to approve, conditionally approve, or disapprove all such requests, basing its decision on the following criteria:

   a. MATERIALS – Signs made of durable, weather- resistant materials such as acrylic, resin, steel, aluminum, or composite materials are preferred.

   b. LETTERING – Lettering and symbols on signs should be routed, applied, or painted on the surface of the signing material.

   c. COLORS – Colors of a sign shall be visually compatible withto the colors of buildings, structures, and signs to which the sign is visually related.

   d. EXCEPTIONS – The Historic Preservation/Design Review Board may waive the requirements of this Section and Section 507 in order to allow the preservation or restoration of signs or commercial graphics which are determined to be of historical significance or of particular interest.

[Ord. No. 374; Ord. No. 406; Ord. No. 451; Ord. No. 470; Ord. No. 472]

I.J. APPEALS AND EXPIRATION OF APPROVALS

1. Any applicant, person residing within 300 feet of the project, or person adversely affected, may appeal a decision of the Historic Preservation/Design Review Board to the Town Council by filing a written notice of appeal with the Town Clerk not later than fifteen (15) days from the date ofthe board's decision. If the appellant is not the applicant and resides beyond 300 feet of the project, the appellant shall clearly demonstrate how they might be adversely affected by the proposed project.

2. When a written appeal is filed with the Town Clerk, the Town Clerk shall promptly provide notice of such an application to the Zoning Administrator. The appeal shall state the grounds for appeal and demonstrate how the appellant has been aggrieved or affected by the decision. The Zoning Administrator shall review the appeal to validate its completeness within three (3) days of receipt. If the appeal is deemed defective, the Zoning Administrator shall notify the applicant of the type and nature of the defect or defects within one (1) day of making said determination. If an appeal is determined to be complete, the Zoning Administrator shall schedule the appeal for Council consideration no later than 45 days from the determination of an application's completeness. Once scheduled, the Council shall evaluate the appeal at their next available regular or special meeting. Where an appeal has been filed, the Council may elect to set the matter for a public hearing. If such action is taken, a legal notice shall be published at least once in athe official newspaper of general circulation in the Town of Jerome, the site shall be posted at least fifteen (15) days prior to the hearing date, and notice shall be mailed to property owners within 300 feet of the site. Notice shall also be given to the Historic Preservation/Design Review Board and the appellant. The Zoning Administrator shall submit a report to the Council with all

relevant information and set forth the reasons for action taken by the Historic Preservation/Design Review Board.

3. An appeal may be filed by persons aggrieved or by any officer, department, board, or bureau of the municipality affected by a decision of the Zoning Administrator. Appeals will be forwarded to the Board of Adjustment by filing a written notice of appeal with the Zoning Administrator, no later than fifteen (15) days from the date of the Zoning Administrator's decision.
4. Six (6) months from the date of approval, a plan approval becomes void if a building permit has not been issued and/or work has not commenced.
5. A building permit may not be issued by the Building Inspector until the fifteen (15) -day appeal period has expired.
6. An extension of approval may be granted if the applicant files for an extension prior to the approval becoming void and the extension is granted by the approving board. The approving board may grant a second extension, provided the approval ~~is in~~ compli~~es~~ance with all ordinances and requirements in effect at the time of the extension request. Any additional extension requests require review by the Town Council. Application for an extension shall be accompanied by a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the office of the Town Clerk.

[Ord. No. 470]

~~J.~~K. VIOLATIONS AND ENFORCEMENT

1. Prior to the issuance of a building permit, the Building Inspector shall ascertain that the plans presented with the Building Permit application are in conformance with those plans approved by the Mayor and Council, Historic Preservation/Design Review Board, or the Zoning Administrator~~that the Design Review Board has approved plans in conformance to those presented with the building permit application~~ and that the time limitations imposed by this ordinance have not elapsed.
2. The Zoning Administrator shall ensure that all matters are undertaken according to the conditions of the design approval. In the event of a violation, the Zoning Administrator shall notify the permittee, by both Certified and First-Class mail, that he is in violation of the conditions of the design approval. If no attempt is made to change the circumstances of the violation ~~is made~~ within fifteen (15) days after notification, the building permit shall be revoked and considered null and void.
3. Violations, Enforcements, and Fines. If, fifteen (15) days after written notification by the Zoning Administrator, a citizen is still in violation of this ordinance, the Zoning Administrator shall take appropriate legal action to abate the violation.

[Ord. No. 470]

SECTION 305. ADMINISTRATIVE APPEALS AND VARIANCES

A. APPEALS TO THE BOARD OF ADJUSTMENT

1. Appeals to the Board of Adjustment concerning the interpretation or administration of this Ordinance may be taken by any person aggrieved or by any officer or department of the Town affected by any decision of the Zoning Administrator.
2. Applications for any matter to be considered by the Board shall be filed with the Zoning Administrator, on forms furnished for the purpose, within thirty (30) days ofafter the action being appealed from, and shall specify the grounds for the appealthereof. The Zoning Administrator shall promptlyforthwith transmit to the Board all papers constituting the record upon whichof the action appealed from is taken.
3. The appeal stays all proceedings in the matter appealed from, unless the Zoning Administrator, certifies to the board that, by reason of the facts stated in the certificate, a stay would, in theirhis opinion, cause imminent peril to life or property. In such case, proceedings shall not be stayed, except by a restraining order granted by the Board, or by a court of record on application and notice to the Zoning Administrator.
4. The Board shall hear the appeal within thirty (30) days, and shall give notice of hearing by publication of a notice in athe official newspaper of general circulation in the Town of Jerome and by posting the property affected not less than fifteen (15) days prior to the hearing. The notice shall set forth the time and place of the hearing and include a general explanation of the matter to be considered.
5. Any party may appear at the hearing in person or by agent or attorney. Parties in interest shall have the right to present their case by oral or documentary evidence, to submit rebuttal evidence, and to conduct such cross-examination of witnesses as may be required for a full and true disclosure of the facts.

B. VARIANCES

1. Any aggrieved person may appeal to the Board of Adjustment for a variance from the terms of the Zoning Ordinance only, if because of special circumstances applicable to the property, including its size, shape, topography, location, or surroundings the strict application of the zoning ordinance will deprive such property of privileges enjoyed by other property of same classification in the same zoning district. Any variance granted is subject to such conditions as will assure that the adjustment authorized shall not constitute a grant of special privileges inconsistent with the limitations upon other properties in the vicinity and zone in which such property is located.
2. A variance shall not be granted by the Board unless the alleged hardship caused by literal interpretation of the provisions of this Ordinance results in more than personal inconvenience and/or financial hardship, and is not the result of actions by the appellant.
3. In granting a vVariance, the Board may impose such conditions and safeguards as are appropriate to einsure that the purpose and intent of this Ordinance will be fulfilled. Failure to comply with such conditions and safeguards, when made a part of the terms under which a vVariance is granted, shall be deemed a violation of this Ordinance.
4. No nonconforming use or violations of this Ordinance with respect to neighboring lands, structures, or buildings, in the samne zoning district, and no permitted use of lands, structures, or buildings in other zoning districts, shall be considered grounds for granting a variance.
5. Every vVariance granted shall be personal to the appellant therefore and shall be transferrable and shall run with the land only after completion of any authorized structure or structures.

6. Nothing herein contained shall be construed to empower the Board to change the terms of this Ordinance, to authorize uses which violate any other Town Ordinance, to effect changes in the Zoning Map, or to add to the uses permitted in any zoning district.

C. APPEALS FROM THE BOARD

The decision of the Board shall be final; provided, however, that any person aggrieved by a decision of the Board, or a taxpayer, or a municipal officer may, at any time within thirty (30) days after athe filing of the decision in the office of the Board, petition the court for a writ of certiorari for review of the Board's decision. Allowance of the writ shall not stay proceedings upon the decision appealed from, but the court may, on application, on notice to the Board, and for good cause shown, grant a restraining order, and on final hearing may reverse or affirm, wholly or partly, or may modify the decision reviewed.

D. FEES

1. Upon filing an application for appeal, the appellant shall pay a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the offices of the Town Clerk. No part of the filing fee shall be returnable. Payment of the filing fee shall be waived when the petitioner is the Town, County, State, or Federal Government.

2. In the case of an appeal for a variance to more than one provision of this Ordinance, the filing fee shall equal the total amount chargeable for all provisions as prescribed by the fee schedule.

SECTION 306. NEIGHBORHOOD MEETINGS

A. PURPOSE

Neighborhood Meetings provide an opportunity for informal communication between an applicant, neighboring residents, and property owners who may be affected by development projects, use permits, rezoning, or ordinances that impose a new land use regulation or modify an existing land use regulation. The purposes of the Neighborhood Meeting are to inform the affected public about the project and encourage communication among the applicant and neighboring residents and property owners.

B. GENERAL REGULATIONS

1. Prior to any public hearing by the Planning and Zoning Commission on rezoning or ordinances that impose a new land use regulation or modify an existing land use regulation, the applicant or an appointed representative of the applicant shall arrange a meeting with the planning staff to identify development issues as well as to discuss arrangements and scheduling for the Neighborhood Meeting described in Subsection 4 below.
2. When required pursuant to Section 302.D.1 of the Jerome Zoning Ordinance, prior to any public hearing by the Planning and Zoning Commission on a use permit, the applicant or an appointed representative of the applicant shall arrange a meeting with the planning staff to identify development issues as well as to discuss arrangements and scheduling, if required, for the Neighborhood Meeting described in Subsection 4 below.
3. Prior to any public hearing by the Historic Preservation/Design Review Board on a development project, the applicant or an appointed representative of the applicant shall arrange a meeting with the planning staff to identify development issues as well as to discuss arrangements and scheduling, if required, for the Neighborhood Meeting described in Subsection 4 below.
4. A Neighborhood Meeting designed to inform adjoining residents and property owners about the proposed development project, use permit, ordinances that impose a new land use regulation or modify an existing land use regulation, or rezoning will, if required to be held, be arranged by the Zoning Administrator. The meeting should be held at~~in~~ a location~~place that is~~ generally accessible to neighbors who~~that~~ reside near the subject site.
5. At least 15 days prior to a scheduled Neighborhood Meeting, the Zoning Administrator shall notify all property owners within 300 feet of the subject site by first-class mail, and the actual property shall be posted with the meeting date and time. The mailed notification shall include the date, time, and place for the Neighborhood Meeting, as well as a description of the proposed land uses, project, or conditional use permit.
6. At the Neighborhood Meeting, it is the responsibility of the applicant or their representative to provide an opportunity for a question-and-answer period by the participants~~,~~ and identify a point of contact to the public for follow-up questions and comments.
7. The applicant shall prepare a written summary of the meeting, including a list of attendees, their addresses, and the issues and concerns discussed, and submit a copy of the summary to the Zoning Administrator within 15 days after the neighborhood meeting. The summary shall be made available, upon request, to any meeting attendee. Attendees may, at their discretion, also submit their comments to the Zoning Administrator.
8. If the application is substantially modified from what was presented at the initial Neighborhood Meeting, the Zoning Administrator may require that one or more additional Neighborhood Meetings be held in compliance with this section to present the modified application.
9. For rezonings of property initiated by the Town, the Town shall be deemed the applicant and shall conduct a Neighborhood Meeting as required by Subsections 2 through 5 of this section 306 B.~~-~~ For ordinances that impose a new land use regulation or modify an existing land use

regulation, the Town's obligations under this Section 306 shall be satisfied by complying with the notice and hearing requirements otherwise imposed by this Zoning Ordinance.

[Ord. No. 470 (reference to 304.F.5.deleted)]

C. FEE

A fee shall be assessed to the applicant in an amount established by Resolution of the Council and paid in the offices of the Town Clerk. No part of the fee shall be returnable. Payment of the fee shall be waived when the petitioner is the Ttown, Ceounty, Sstate, or Ffederal Ggovernment.

[Ord. No. 406]

SECTION 307. PRE-APPLICATION MEETINGS

A. PURPOSE

The purpose of this section is to provide applicants with early guidance on zoning requirements, development standards, and review procedures before submitting a formal application. This process helps identify potential issues, improve project design, ensure compliance with applicable regulations, and streamline the overall development review process.

B. GENERAL REGULATIONS

1. Prior to the submittal of any applications ~~as part of~~for subdivision plats, zone changes, conditional use permits, development packages for new construction, or any other application as determined by the Zoning Administrator, an applicant shall first participate in a pre-application review with ~~the~~ Town staff.

C. PRE-APPLICATION PROCEDURES

An applicant shall file a request for pre-application review with the Zoning Administrator on an application established by the Zoning Administrator that may require additional information, such as a time as, and all applicable portions of Section 304 shall apply to proposed development outside the Historic Overlay District.

ARTICLE IV: ZONING DISTRICTS

SECTION 401. ESTABLISHMENT OF ZONING DISTRICTS

In order to carry out the purposes of this ordinance, the Town of Jerome is hereby divided into the following zoning districts:

"AR" Zone - Agricultural Residential.

"R1-10" Zone - Single Family Residential

"R1-5" Zone - Single Family Residential

"R-2" Zone - Multiple Family Residential

"C-1" Zone - General Commercial

"I-1" Zone - Light Industrial

Historic Overlay District

SECTION 402. LOCATION AND BOUNDARIES OF DISTRICTS

1. The locations and boundaries of the zoning districts are established as they are shown on the map entitled "Zoning Map of the Town of Jerome,[1]" which is hereby incorporated into this ordinance.
2. Where uncertainty exists with respect to the boundaries of any zoning districts as shown on the zoning map, the following rules shall apply:
    a. Where district boundaries are shown by specific dimensions, such specific dimensions shall apply.
    b. Where district boundaries are indicated as approximately following streets, alleys, or right-of-way lines, such streets, alleys, or right-of-way lines shall be deemed to be such boundaries.
    c. Where district boundaries are so indicated that they approximately follow the lot lines, such lot lines shall be deemed to be said boundaries.
    d. Where district boundaries are so indicated that they are approximately parallel to the streets, alleys, or right-of-way lines, such district boundaries shall be deemed as being parallel thereto and at such distance therefrom as indicated on the zoning map. If no distance is given, such dimensions shall be determined by the use of the scale shown on the zoning map.
    e. Where the application of the above rules does not clarify the zone boundary location, then the Board of Adjustment shall determine the location.
3. Unzoned territory annexed to the Town subsequent to the effective date of this Ordinance shall, upon the date that said annexation becomes effective, automatically become zoned as AR, agricultural-residential, and shall so remain until such time as the Town Council shall see fit to approve a change of zone request for the annexed area.

[1] Codifier's note: The current Zoning Map is that map dated February 14, 2022, as adopted by Ordinance 477.

SECTION 403. "AR" ZONE, AGRICULTURAL RESIDENTIAL

A. PURPOSE

This district is intended to promote and preserve low-density residential development and non-commercial farming and agriculture. Land use is composed chiefly of individual homes, while also accommodating compatible~~together with required~~ recreational, religious, and educational facilities.

B. PERMITTED AND CONDITIONAL USES

The permitted and conditional uses of the AR zone are listed in Table 410: Use Matrix of Section 410.

C. USE/ZONE-SPECIFIC STANDARDS

Standards for the zoning district and specific uses are provided in Table 411: Use/Zone-Specific Standards Matrix and Table 412: Development Standards Matrix

~~**PERMITTED USES**~~

- ~~One (1) single-family dwelling or one (1) modular home per lot. Mobile homes are prohibited.~~
- ~~Customary accessory uses and buildings, provided such uses are incidental to the principal use.~~
- ~~Temporary buildings for uses incidental to construction work, which buildings shall be removed upon completion of or abandonment of the construction work.~~
- ~~Publicly owned and operated parks and recreation areas and centers.~~
- ~~Home occupations.~~
- ~~Noncommercial farming and agriculture, not including the keeping of livestock.~~
- ~~Keeping of cattle and horses owned by members of the family occupying the premises, but not to exceed one (1) head per 20,300 square feet of lot area.~~

~~**CONDITIONAL USES**~~

- ~~Animals, fowl, and other typical farm livestock, except as otherwise prohibited herein.~~
- ~~Commercial stables~~
- ~~Churches or similar places of worship~~
- ~~Schools: Public or private elementary and high.~~
- ~~Colleges, universities, and professional schools having a regular curriculum.~~
- ~~Nursery Schools and Day Care Centers.~~
- ~~Privately owned and operated recreation areas and centers.~~
- ~~Public buildings other than hospitals.~~
- ~~Public utility buildings, structures, or appurtenances thereto for public service use.~~
- ~~Model Homes~~
- ~~Bed and Breakfast~~
- ~~Viniculture use, pursuant to Chapter 16, "Vineyards," of the Jerome Town Code.~~
- ~~Beekeeping~~

[Ord. No. 380; Ord. No. 474]

~~**ZONE RESTRICTIONS**~~

- ~~Cattle, horses, sheep, goats, dogs, cats, birds, fowl, and any other living animals, and the pens, stalls, stables, yards, shelters, cages, areas, places, and premises where they are held or kept, shall be so maintained that flies, insects, or vermin, rodent harborage, odors, ponded water, the~~

accumulation of manure, garbage, refuse or other noxious material do not become a public health nuisance and do not disturb the peace, comfort, or health of any person.

- Any person, firm, or corporation is prohibited from keeping or sheltering any animal, bird, or fowl other than a household pet within one hundred (100) feet of a building, other than his own, used for human habitation.
- Pigs shall not be kept within the city limits.

PROPERTY DEVELOPMENT STANDARDS

- MINIMUM LOT AREA: Ten thousand (10,000) square feet.
- MINIMUM LOT WIDTH: One hundred (100) feet
- MINIMUM SQUARE FOOTAGE OF DWELLING: Eight hundred and fifty (850) square feet of enclosed floor space exclusive of any attached garage.
- MAXIMUM LOT COVERAGE: Not more than forty (40) percent of the net area of the lot may be covered by the main building and all accessory buildings.
- YARDS:
  - Front Yard
    - There shall be a front yard not less than twenty (20) feet in depth.
    - Where lots have a double frontage on two (2) streets, the required front yard of twenty (20) feet shall be provided on both streets.
  - Side Yard
    - There shall be a side yard along interior lot lines of not less than ten (10) feet in width.
    - Where a side lot line abuts a street, there shall be a side yard of not less than twenty (20) feet in width.
  - Rear Yard
    - There shall be a rear yard of not less than twenty (20) feet in depth, except where the rear lot line is in common with or separated by an alley from the side lot line of another lot, there shall be a rear yard of not less than ten (10) feet in depth.
    - Where the rear lot line abuts an alley, the required rear yard shall be measured from the center line of the alley.
- MAXIMUM BUILDING HEIGHT: No building shall exceed the height of twenty five (25) feet as defined in "building, height of". On slopes over forty-five percent (45%) there will be a one (1) foot reduction in height for each additional five percent (5%) of slope or portion thereof. Notwithstanding these provisions, no face of any building shall exceed thirty-five (35) feet above the low point of original grade as defined in "original grade". (see Appendix for diagrams).
- ACCESSORY BUILDINGS
  - Accessory buildings shall be considered in determining yard, lot and area requirements.
  - Accessory buildings shall not be used for human habitation.
  - Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.
  - Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."

[Ord. No. 446]

GENERAL PROVISIONS

The provisions of Section 502 shall apply.

SIGNS

The provisions of Section 509 shall apply.

PARKING AND LOADING

The provisions of Section 510 shall apply.

PLAN REVIEW

The provisions of Section 303 shall apply.

DESIGN REVIEW

The provisions of Section 304 shall apply to all property, buildings and structures within the Historic Overlay District.

SECTION 404. "R1-10" ZONE, SINGLE FAMILY RESIDENTIAL

A. PURPOSE

This district is intended to promote and preserve low density residential development. Regulations and property development standards are designed to protect the single-family residential character of the district and to prohibit all incompatible activities. Land use is composed chiefly of individual homes, while also accommodating compatible~~together with required~~ recreational, religious and educational facilities.

B. PERMITTED AND CONDITIONAL USES

The permitted and conditional uses of the R1-10 zone are listed in Table 410: Use Matrix of Section 410.

C. USE/ZONE-SPECIFIC STANDARDS

Standards for the zoning district and specific uses are provided in Table 411: Use/Zone-Specific Standards Matrix and Table 412: Development Standards Matrix

~~One (1) single-family dwelling or one (1) modular home per lot. Mobile homes are prohibited.~~

~~Customary accessory uses and buildings provided such uses are incidental to the principal use.~~

~~Temporary buildings for uses incidental to construction work, which buildings shall be removed upon completion of or abandonment of the construction work.~~

~~Publicly owned and operated parks and recreation areas and centers.~~

~~Home Occupations.~~

~~**CONDITIONAL USES**~~

~~Churches or similar places of worship.~~

~~Schools: Public or private elementary and high.~~

~~Colleges, universities, and professional schools having a regular curriculum.~~

~~Nursery Schools and Day Care Centers.~~

~~Public buildings other than hospitals.~~

~~Public utility buildings, structures, or appurtenances thereto for public service use.~~

~~Libraries.~~

~~Model Homes.~~

~~Bed and Breakfast~~

~~Beekeeping~~

[Ord. No. 474]

~~**PROPERTY DEVELOPMENT STANDARDS**~~

~~MINIMUM LOT AREA: Ten thousand (10,000) square feet~~

~~MINIMUM LOT WIDTH: One hundred (100) feet~~

~~MINIMUM SQUARE FOOTAGE OF DWELLING: Eight hundred and fifty (850) square feet of enclosed floor space exclusive of any attached garage.~~

~~MAXIMUM LOT COVERAGE: Not more than forty (40) percent of the net area of the lot may be covered by the main building and all accessory buildings.~~

~~Yards:~~

~~Front Yard:~~

- There shall be a front yard of not less than twenty (20) feet in depth.
- Where lots have a double frontage on two (2) streets, the required front yard of twenty (20) feet shall be provided on both streets.

- Side Yard:
  - There shall be a side yard along interior lot lines of not less than ten (10) feet in width.
  - Where a side lot line abuts a street, there shall be a side yard of not less than twenty (20) feet in width

- Rear Yard:
  - There shall be a rear yard of not less than twenty (20) feet in depth, except where the rear lot line is in common with or separated by an alley from the side lot line of another lot, there shall be a rear yard of not less than ten (10) feet in depth.
  - Where the rear lot line abuts an alley, the required rear yard shall be measured from the center line of the alley.

- MAXIMUM BUILDING HEIGHT: No building shall exceed the height of twenty-five (25) feet as defined in "building, height of." On slopes over forty-five (45) percent there will be a one (1) foot reduction in height for each additional five (5) percent of slope or portion thereof. Notwithstanding these provisions, no face of any building shall exceed thirty-five (35) feet above the low point of original grade as defined in "original grade." (see Appendix for diagrams).

- ACCESSORY BUILDINGS
  - Accessory buildings shall be considered in determining yard, lot, and area requirements.
  - Accessory buildings shall not be used for human habitation.
  - Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.
  - Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."

[Ord. No. 446]

- **GENERAL PROVISIONS**

  The provisions of Section 502 shall apply.

- **SIGNS**

  The provisions of Section 509 shall apply.

- **PARKING AND LOADING**

  The provisions of Section 510 shall apply.

- **PLAN REVIEW**

The provisions of Section 303 shall apply.

- **DESIGN REVIEW**

  The provisions of Section 304 shall apply to all property, buildings, and structures within the Historic Overlay District.

SECTION 405. "R1-5" ZONE, SINGLE FAMILY RESIDENTIAL

A. PURPOSE

This district is intended to fulfill the need for medium density single family residential development. Regulations and property development standards are designed to protect the single family residential character of the district and to prohibit all incompatible activities. Land use is composed chiefly of individual homes, while also accommodating compatible~~together with required~~ recreational, religious, and educational facilities.

B. PERMITTED AND CONDITIONAL USES

The permitted and conditional uses of the R1-5 zone are listed in Table 410: Use Matrix of Section 410.

~~One (1) single-family dwelling or one (1) modular home per lot. Mobile homes are prohibited.~~

~~Customary accessory uses and buildings, provided such uses are incidental to the principal use.~~

~~Temporary buildings for uses incidental to construction work, which buildings shall be removed upon completion of or abandonment of the construction work.~~

~~Publicly owned and operated parks and recreation areas and centers.~~

~~Home occupations.~~

~~**CONDITIONAL USES**~~

~~Churches or similar places of worship.~~

~~Schools: Public or private elementary and high.~~

~~Colleges, universities, and professional schools having a regular curriculum.~~

~~Nursery Schools and Day Care Centers.~~

~~Public buildings.~~

~~Public utility buildings, structures, or appurtenances thereto for public service use.~~

~~Libraries.~~

~~Model homes~~

~~Bed and Breakfast~~

~~Beekeeping~~

[Ord. No. 474]

C. USE/ZONE-SPECIFIC STANDARDS

Standards for the zoning district and specific uses are provided in Table 411: Use/Zone-Specific Standards Matrix and Table 412: Development Standards Matrix.

~~MINIMUM LOT AREA: Five thousand (5,000) square feet.~~

~~MINIMUM LOT WIDTH: Fifty (50) feet.~~

~~MINIMUM SQUARE FOOTAGE OF DWELLING: Eight hundred and fifty (850) square feet of enclosed floor space exclusive of any attached garage.~~

~~MAXIMUM LOT COVERAGE: Not more than sixty (60) percent of the net area of the lot may be covered by the main building and all accessory buildings.~~

~~Yards:~~

~~Front Yard:~~

- There shall be a front yard of not less than ten (10) feet in depth except when the following conditions prevail:
- A front yard is required equal to that established by any building within one hundred (100) feet on either or both sides of the lot. Where more than one (1) such building is within one hundred (100) feet of the lot then the front yard of the nearest such building shall be the required front yard of the lot, except that where the lot is between two such buildings, each within one hundred (100) feet of a lot, then the front yard of this lot shall be that established by a line joining the nearest front corner of the other such building. Nothing in the above shall require that a front yard in this district exceed twenty (20) feet.
- Where lots have a double frontage on two (2) streets, the required front yard shall be provided on both streets.
- Side Yard:
- There shall be a side yard along interior lot lines of not less than five (5) feet in width.
- Where a side lot line abuts a street, the side yard shall be considered a front yard for the purpose of determining width.
- Rear Yard:
- There shall be a rear yard of not less than twenty (20) feet in depth. Except where the rear lot line is in common with or separated by an alley from the side lot line of another lot, there shall be a rear yard of not less than ten (10) feet in depth.
- Where the rear lot line abuts an alley, the required rear yard shall be measured from the center line of the alley.
- MAXIMUM BUILDING HEIGHT: No building shall exceed the height of twenty five (25) feet as defined in "building, height of." On slopes over forty-five (45) percent there will be a one (1) foot reduction in height for each additional five (5) percent of slope or portion thereof. Notwithstanding these provisions, no face of any building shall exceed thirty-five (35) feet above the low point of original grade as defined in "original grade". (see Appendix for diagrams).
- ACCESSORY BUILDINGS
- Accessory buildings shall be considered in determining yard, lot and area requirements.
- Accessory buildings shall not be used for human habitation.
- Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.
- Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."

[Ord. No. 446]

- **GENERAL PROVISIONS**

  The provisions of Section 502 shall apply.

- **SIGNS**

  The provisions of Section 509 shall apply.

- **PARKING AND LOADING**

  The provisions of Section 510 shall apply.

- **PLAN REVIEW**

  The provisions of Section 303 shall apply.

- **DESIGN REVIEW**

~~The provisions of Section 304 shall apply to all property, buildings and structures within the Historic Overlay District.~~

SECTION 406. "R-2" ZONE, SINGLE- AND TWO-FAMILY RESIDENTIAL

A. PURPOSE

This district is intended to fulfill the need for medium density residential development regulations and property development standards are designed to allow maximum flexibility and variety in residential development while prohibiting all incompatible activities. Land use is composed chiefly of single- and two-family homes, while also accommodating compatible~~together with required~~ recreational, religious, and educational facilities.

B. PERMITTED AND CONDITIONAL USES

The permitted and conditional uses of the R-2 zone are listed in Table 410: Use Matrix of Section 410.~~One (1) single-family dwelling or one (1) two-family dwelling or one (1) modular home per lot. Mobile homes are prohibited.~~

~~Customary accessory uses and buildings, provided such uses are incidental to the principal use.~~

~~Temporary buildings for uses incidental to construction work, which buildings shall be removed upon completion of or abandonment of the construction work.~~

~~Publicly owned and operated parks and recreation areas and centers.~~

~~Home occupations.~~

C. USE/ZONE-SPECIFIC STANDARDS

Standards for the zoning district and specific uses are provided in Table 411: Use/Zone-Specific Standards Matrix and Table 412: Development Standards Matrix.~~Any conditional use in the R1-5 zone.~~

~~**PROPERTY DEVELOPMENT STANDARDS**~~

~~MINIMUM LOT AREA: Five thousand (5,000) square feet.~~

~~MINIMUM LOT WIDTH: Fifty (50) feet.~~

~~MINIMUM SQUARE FOOTAGE OF DWELLING: Eight hundred and fifty (850) square feet of enclosed floor space exclusive of any attached garage.~~

~~MAXIMUM LOT COVERAGE: Not more than sixty (60) percent of the net area of the lot may be covered by the main building and all accessory buildings.~~

~~Yards:~~

~~a. Front Yard:~~

~~1) There shall be a front yard of not less than ten (10) feet in depth except when the following conditions prevail:~~

~~A front yard is required equal to that established by any building within one hundred (100) feet on either or both sides of the lot. Where more than one such building is within one hundred (100) feet of the lot then the front yard of the nearest such building shall be the required front yard of the lot, except that where the lot is between two such buildings, each within one hundred (100) feet of a lot, then the front yard of this lot shall be that established by a line joining the nearest front corner of the other such building. Nothing in the above shall require that a front yard in this district exceed twenty (20) feet.~~

~~2) Where lots have a double frontage on two (2) streets, the required front yard shall be provided on both streets.~~

~~b. Side Yard:~~

~~1) There shall be a side yard along interior lot lines of not less than five (5) feet in width.~~

~~2) Where a side lot line abuts a street, the side yard shall be considered a front yard for the purpose of determining width.~~

c. Rear Yard:

1) There shall be a rear yard of not less than twenty (20) feet in depth. Except where the rear lot line is in common with or separated by an alley from the side lot line of another lot, there shall be a rear yard of not less than ten (10) feet in depth.

2) Where the rear lot line abuts an alley, the required rear yard shall be measured from the center line of the alley.

MAXIMUM BUILDING HEIGHT: No building shall exceed the height of twenty five (25) feet as defined in "building, height of." On slopes over forty five (45) percent there will be a one (1) foot reduction in height for each additional five (5) percent of slope or portion thereof. Notwithstanding these provisions, no face of any building shall exceed thirty five (35) feet above the low point of original grade as defined in "original grade". (see Appendix for diagrams).

ACCESSORY BUILDINGS

Accessory buildings shall be considered in determining yard, lot and area requirements.

Accessory buildings shall not be used for human habitation.

Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.

Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."

[Ord. No. 446; Ord. No. 454]

GENERAL PROVISIONS

The provisions of Section 502 shall apply.

SIGNS

The provisions of Section 509 shall apply.

PARKING AND LOADING

The provisions of Section 510 shall apply.

PLAN REVIEW

The provisions of Section 303 shall apply.

DESIGN REVIEW

The provisions of Section 304 shall apply to all property, buildings and structures within the Historic Overlay District.

SECTION 407. "C–1" ZONE, GENERAL COMMERCIAL

A. PURPOSE

This district is intended to provide for and encourage orderly development in existing and future commercial areas within the Town.

B. PERMITTED AND CONDITIONAL USES

The permitted and conditional uses of the C-1 zone are listed in Table 410: Use Matrix of Section 410.~~Retail sales of apparel and accessories, dry goods, foods, drugs, flowers and plants, garden supplies, hardware, gifts and novelties, pet and hobby supplies, art and art supplies, jewelry, liquor, tobacco, newspapers and magazines, music and records, household supplies, stationary, books, paint, wallpaper and glass, sporting goods, toys, variety store goods, appliances, auto parts and supplies, furniture, office supplies, leather and leather products, carpet, antiques, fabrics, photo supplies, second hand and used goods and similar convenience goods.~~

~~Repair services such as, but no more objectionable or intensive in character than, watches, jewelry, shoes, locksmith, minor household appliances.~~

~~Personal services such as: barbers, beauty shops, health clubs, laundries and cleaners, mortuaries.~~

~~Hotels.~~

~~Establishments serving food or beverages inside a building such as: restaurants, cafes, coffee shops, bars, taverns, cocktail lounges, excluding entertainment and dancing in connection therewith.~~

~~Manufacturing incidental to a permitted use is permitted, but subject to the following limitations:~~

~~All products incidental to a permitted use which are manufactured or processed on the premises shall be sold at retail only and on the premises only.~~

~~Such manufacturing activity shall be restricted to not over fifty (50) percent of the ground floor area of the building allocated to the permitted use.~~

~~Pawn shops.~~

~~Printers and print shops.~~

~~Radio and TV studios provided that no masts, towers, or antenna used for transmission or broadcasting purposes are erected on the premises.~~

~~Banks, stock brokerage firms, savings and loan associations, loan companies, and credit unions.~~

~~Governmental services, public utility offices and exchanges, excluding storage or repair services.~~

~~Offices related to any of the following occupations: executive, administrative, professional, accounting, banking, writing, clerical, stenographic, graphic art, real estate, and sales.~~

~~Medical and dental offices and clinics.~~

~~Establishments primarily supplemental in character to other permitted principal uses, such as: pharmacy, apothecary shop, sales of corrective garments, prosthetic devices, optical goods, and medical and dental laboratories.~~

~~Establishments whose principal function is basic research, design, and pilot or experimental product development, when conducted within a completely enclosed building.~~

~~Business and trade schools, dancing, art, and music schools and studios.~~

~~Headquarters buildings of charitable, philanthropic, and welfare organizations, provided that their primary activities are administrative and clerical rather than residential in nature.~~

~~Accessory buildings, structures and other uses customarily incidental to a permitted use except as otherwise provided in this Ordinance.~~

Any other such uses as determined by the Planning and Zoning Commission and approved by the Town Council to be similar to those uses listed above and not detrimental to the public health, safety and general welfare in accordance with the provisions of this Ordinance.

[Ord. No. 293; Ord. No. 465]

CONDITIONAL USES

- Any "Permitted" or "Conditional" Uses in the "R1-10", "R1-5" or "R-2" Zones.
- Establishments serving food or beverages for consumption on the premises, but outside of an enclosed building.
- Establishments serving food or beverages which include entertainment or dancing.
- Temporary outdoor sales, displays and other outdoor activities.
- Indoor commercial recreation establishments, such as bowling alleys, billiard parlors, skating rinks and similar establishments.
- Outdoor commercial recreation establishments.
- Indoor theaters, assembly halls, ballrooms and similar places of assembly.
- Taxi stands, bus stops, parking lots and garages.
- Gas service stations.
- Outdoor sales of nursery stock.
- Pet shops.
- Any such other uses as determined by the Planning and Zoning Commission and approved by the Town Council to be similar to those uses listed above and not detrimental to the public health, safety and general welfare in accordance with the provisions of this Ordinance.
- Residential use of a building, including apartment houses, when in the opinion of the Planning and Zoning Commission, said use has little or no adverse effect on the public health, safety and general welfare. Residential use with historic precedence in the subject buildings are exempt from the well-being criteria but remain subject to nonconforming use clauses.
- Hospitals, nursing homes and convalescent homes.
- Spirituous Liquor Tasting Facilities.

[Ord. No. 293; Ord. No. 408; Ord. No. 454; Ord. No. 465]

C. USE/ZONE-SPECIFIC STANDARDS

Standards for the zoning district and specific uses are provided in Table 411: Use/Zone-Specific Standards Performance Standard Matrix and Table 412: Development Standards Matrix. All activities, except as otherwise addressed herein, shall be conducted entirely within enclosed buildings.

Outdoor storage or display of goods or materials shall be prohibited.

Warehousing or indoor storage of goods or materials, exceeding that normally incidental to permitted uses, shall be prohibited.

[Ord. No. 293;]

PROPERTY DEVELOPMENT STANDARDS

MINIMUM LOT AREA: None, provided all other provisions of the ordinance are met.

MINIMUM LOT WIDTH: None, provided all other provisions of the ordinance are met.

MINIMUM SQUARE FOOTAGE OF MAIN BUILDING: None, provided all other provisions of the Ordinance are met.

MAXIMUM LOT COVERAGE: None provided all other provisions of the ordinance are met.

YARDS:

Front Yard:

There shall be a front yard of not less than ten (10) feet in depth except when the following conditions prevail:

The front yard is required equal to that established by any commercial building within one hundred (100) feet on either or both sides of the lot. Where more than one such building is within one hundred (100) feet of the lot then the front yard of the nearest such building shall be the required front yard of the lot, except that where the lot is between two (2) such buildings, each within one hundred (100) feet of a lot, then the front yard of this lot shall be that established by a line joining the nearest front corner of the other such building. Nothing in the above shall require that a front yard in this district exceed twenty (20) feet.

Where lots have a double frontage on two (2) streets, the required front yard shall be provided on both streets.

Side Yard:

Where the side lot line is in common with the side lot line of a property in a commercial or industrial zone, no side yard shall be required on that side.

Where a side lot line abuts a street, the side yard shall be considered a front yard for the purpose of determining width.

Where the side lot line is in common with the side lot line of a property in a residential zone, the side yard requirements of the residential zone shall apply to that side yard, provided nothing shall require such a side yard to be greater than ten (10) feet in width.

Rear Yard:

There shall be a rear yard of not less than twenty (20) feet in depth, except where the rear lot line is in common with or separated by an alley from the side lot line of a lot in a commercial or industrial zone, there shall be a rear yard of not less than ten (10) feet in depth.

Where the rear lot line abuts an alley, the required rear yard shall be measured from the centerline of the alley.

MAXIMUM BUILDING HEIGHT: The maximum building height shall not exceed the height of twenty-five (25) feet except when the following conditions prevail:

The maximum building height shall not exceed that established by any building within one hundred (100) feet on either or both sides of the lot. Where more than one such building is within one hundred (100) feet of the lot, then the maximum building height of the nearest such building shall be the maximum building height of the lot. Except that where the lot is between two (2) such buildings, each within one hundred (100) feet of the lot, then the maximum building height of the center of this lot shall be that established by a line joining the highest point of the other such buildings. Nothing in the above shall require that the maximum building height in this district be less than twenty-five (25) feet. (see Appendix for diagrams).

Notwithstanding these provisions, no face of any building shall exceed thirty-five (35) feet above the low point of original grade as defined in "original grade."

ACCESSORY BUILDINGS

Accessory buildings shall be considered in determining yard, lot, and area requirements.

Accessory buildings shall not be used for human habitation.

Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.

Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."

[Ord. No. 446]

GENERAL PROVISIONS

The provisions of Section 502 shall apply.

SIGNS

The provisions of Section 509 shall apply.

PARKING AND LOADING

The provisions of Section 510 shall apply.

PLAN REVIEW

The provisions of Section 303 shall apply.

DESIGN REVIEW

The provisions of Section 304 shall apply to all property, buildings, and structures within the Historic Overlay District.

SECTION 408. "I-1" ZONE, LIGHT INDUSTRIAL

A. PURPOSE~~URPOSE~~

This district is intended to provide for commercial, industrial, and manufacturing activities, while ensuring that these activities will in no manner affect in a detrimental way any of the surrounding districts.

B. PERMITTED AND CONDITIONAL USES

The permitted and conditional uses of the I-1 zone are listed in Table 410: Use Matrix of Section 410.~~Any permitted use in the C-1 Zone.~~

~~USE AND CONDITIONAL USES~~

~~ANY CONDITIONAL USE IN THE C-1 ZONE.~~

~~LIGHT INDUSTRIES SUCH AS, BUT NO MORE OBJECTIONABLE OR INTENSIVE IN CHARACTER THAN: JEWELRY, CLOTHING, AND FURNITURE MANUFACTURERS.~~

~~WAREHOUSES.~~

~~WHOLESALE ESTABLISHMENTS.~~

~~AUTOMOBILE REPAIR GARAGES.~~

~~ACCESSORY BUILDINGS, STRUCTURES, AND USES CUSTOMARILY INCIDENTAL TO A PERMITTED USE EXCEPT AS OTHERWISE PROVIDED IN THIS ORDINANCE.~~

~~ANY SUCH OTHER USES AS DETERMINED BY THE PLANNING AND ZONING COMMISSION AND APPROVED BY THE CITY COUNCIL TO BE SIMILAR TO THOSE USES LISTED ABOVE AND NOT DETRIMENTAL TO THE PUBLIC HEALTH, SAFETY, AND GENERAL WELFARE IN ACCORDANCE WITH THE PROVISIONS OF THIS ORDINANCE.~~

C. USE/ZONE-SPECIFIC ~~DISTRICT~~ STANDARDS~~RESTRICTIONS~~

Standards for the zoning district and specific uses are provided in Table 411: Use/Zone-Specific Standards ~~Performance Standard~~ Matrix and Table 412: Development Standards Matrix.~~Same as C-1 Zone.~~

~~PROPERTY DEVELOPMENT STANDARDS~~

~~Same as C-1 Zone.~~

~~PERFORMANCE STANDARDS~~

~~Any permitted or conditional use in the I-1 zone must conform to the following performance standards. In conjunction with the plan review process, the developer-applicant shall provide to both the Zoning Administrator and the Planning and Zoning Commission data which are sufficient to show that the proposed use and the manner of its conduct will meet these performance standards.~~

- ~~NOISE: At no point on the property line shall the sound pressure level of any individual operation exceed the decibel levels in the designated octave bands shown below. (Excluding operation of motor vehicles or other transportation facilities.)~~

Octave band cycles per second	Maximum sound pressure level in decibels .0002 dynes per CM²
0—75	72
75—150	67
150—300	59
300—600	52
600—1200	46
1200—2400	40
2400—4800	34
Above 4800	32

Sound levels shall be measured with a sound level meter and associated octave band filter manufactured according to standards prescribed by the American Standards Association. Measurements shall be made using the flat network of the sound level meter.

Impulsive type noises shall be subject to the performance standards provided that such noises shall be capable of being accurately measured with such equipment. Noise capable of being so measured, for the purpose of this section, shall be those noises which cause rapid fluctuations of the needle of the sound level meter with a variation of not more than plus or minus two (2) decibels. Noises incapable of being so measured, such as those of an irregular or intermittent nature, shall be controlled so as not to become a nuisance to adjacent uses.

SMOKE: No emission of smoke from any source shall be permitted to exceed a greater density than that density described as No. 1 on the Ringleman Chart. However, smoke may be emitted, which is equal to but not darker than No. 2 on the Ringleman Chart, for not more than four (4) minutes in any thirty (30) minute period. For the purpose of grading the density of smoke, the Ringleman Chart, as published by the U.S. Bureau of Mines shall be the standard.

GLARE OR HEAT: Any activity producing intense glare or heat shall be performed within a completely enclosed building in such a manner as not to create a nuisance or hazard along lot lines.

VIBRATION: No vibration shall be permitted which is discernible beyond the lot line to the human sense of feeling for three (3) minutes or more duration in any one (1) hour of the day between the hours of 7:00 a.m. to 7:00 p.m., or of thirty (30) seconds or more duration in any one (1) hour during the hours of 7:00 p.m. and 7:00 a.m.

FLY ASH, DUST, FUMES, VAPORS, GASES AND OTHER FORMS OF AIR POLLUTION: No emission shall be permitted which can cause damage to health, to animals, or vegetation, or other forms of property, or which can cause any excessive soiling.

LIQUIDS AND SOLID WASTE: No wastes shall be discharged in the public sewage system which endangers the normal operation of the public sewage system.

ODORS: No emission of odorous gases or other odorous matter shall be permitted in such quantities as to be offensive in such a manner as to create a nuisance or hazard beyond the property lines.

GENERAL PROVISIONS

The provisions of Section 502 shall apply.

SIGNS

The provisions of Section 509 shall apply.

PARKING AND LOADING

The provisions of Section 510 shall apply.

PLAN REVIEW:

~~The provisions of Section 303 shall apply.~~

~~**DESIGN REVIEW**~~

~~The provisions of Section 304 shall apply to all property, buildings, and structures within the Historic Overlay District.~~

SECTION ~~5.11~~409. HISTORIC OVERLAY DISTRICT

A. PURPOSE

The purpose of the Historic Overlay District is to preserve and protect the historical quality and distinctive architectural character of the Town of Jerome since Jerome's economic and environmental well-being depends exclusively upon its distinctive character, natural attractiveness, and overall architectural quality which contribute substantially to its viability as a recreation and tourist center and which contributed to its designation as a National Historic Landmark.

B. DISTRICT RESTRICTIONS

The exterior designs of proposed new buildings and structures, proposed alterations of buildings and structures, landscaping plans, proposed signs, and proposed demolition of buildings and structures within the Historic Overlay District shall be reviewed by the Historic Preservation and ~~Commission~~Design Review Board in accordance with the provisions of Section 304 of this Ordinance to ensure that all new development is compatible with the surrounding environment.

C. DISTRICT BOUNDARIES

The Historic Overlay District shall include all areas within the corporate limits of the Town of Jerome as of 10/13/2026. Future annexations of land without historic resources shall not be included within the district boundaries.

SECTION 410. USE MATRIX

Table 410: Use Matrix

P = Permitted Use
C = Conditional Use; some conditionally permitted uses are also subject to the standards of Table 411: Use/Zone-Specific Standards Matrix.
X = Prohibited Use
U = Permitted subject to the standards of Table 411: Use/Zone-Specific Standards Matrix

Uses	AR	R1-10	R1-5	R-2	C-1	I-1

Any other such uses as determined by the Zoning Administrator to be similar to those uses conditionally permitted in the zoning district and not detrimental to the public health, safety and general welfare in accordance with the provisions of this Ordinance	X	X	X	X	C	C

SECTION 411. USE/ZONE-SPECIFIC STANDARDS MATRIX

Table 411: Use/Zone-Specific Standards Matrix

Use	Zone	Standard
Adaptive Residential Reuse	AR, R1-10, R1-5, R-2, C-1, I-1	1. Residential use of a building or portion of a building is permitted when in the opinion of the Zoning Administrator, said use has little or no adverse effect on the public health, safety and general welfare; or 2. Residential uses are permitted by right in a building with a documented historic residential use, whether that use is active or not
Beekeeping	AR, R1-10, R1-5, R-2, C-1, I-1	The following standards and requirements apply to the keeping of any hive, colony, or apiary bees within the town limits: 1. All persons shall be required to obtain a conditional use permit prior to the keeping of bees. The application form shall include the name, address and telephone number of the person seeking the permit as well as the name, address, and telephone number of the property owner. If the applicant is other than the property owner, then the application shall also include written permission of the owner for the use of the property for keeping a hive, colony, or apiary. The form shall also include a drawing of the property indicating the location for the keeping of the hive, colony or apiary and an acknowledgement that, prior to the placing of the hive, colony or apiary upon the property, an adequate supply of water and other nutrients are available on the property near the hive, colony or apiary. 2. Upon receipt of a beekeeping application, and at least 15 days prior to review by the Planning and Zoning Commission, public notification shall be mailed by the Town to properties within 100 feet of the subject property. 3. No more than two hives shall be allowed on a parcel. 4. Hives shall be located in the area behind the primary structure and in front of the rear lot line and set back from the side and rear property lines a minimum of five (5) feet. 5. A flyway barrier consisting of a solid wall, fence, dense vegetation, or combination of these materials at least six (6) feet high shall be provided and extend at least ten (10) feet beyond the hives on each end of an apiary. 6. Each beekeeper shall ensure that a constant and easily accessible supply of fresh water and other nutrients of sufficient quantity to meet the needs of all bees being maintained or kept is always available to the bees so that they are discouraged from congregating at pet water bowls, birdbaths, pools, spas or other water sources where they may cause human or domestic pet contact.

		7. Initial hives shall contain a queen selected from stock bred for gentleness, and bees who are relatively gentle and non-defensive. If a colony becomes too defensive, then the beekeeper shall be obligated to move that colony to a different location or to replace the queen with a gentler queen. 8. The first violation of this Section shall be treated as a petty offense. All subsequent violations within a succeeding two-year period shall be treated as Class I misdemeanors, subject to penalties as set forth in Article 1-8 of the Jerome Town Code. 9. The provisions of this Section shall not apply to any property owner upon whose property a swarm of transient bees is attempting to or has established a domicile. 10. Any honeybee colony not residing in a structure intended for beekeeping, or any colony residing in a standard or homemade hive that, by virtue of its condition, has obviously been abandoned by the beekeeper, or any hive, colony or apiary which does not contain the water and nutrient requirements of standard 6 of these requirements or any hive, colony or apiary for which no permit has been issued, is unlawful and shall be deemed a public nuisance. 11. The Town, upon a complaint, may take any actions necessary to remove the abandoned hive, colony, or apiary from the property. [Ord. 474, 8/10/21 *NOTE: Ord. 474 incorrectly established the "Beekeeping" paragraph as Paragraph O. This was corrected during codification to Paragraph P.]
Live/Work Dwelling	AR, R1-10, R1-5, R-2, C-1, I-1	1. Home occupations shall be clearly incidental and subordinate to the use of the property and dwelling unit for dwelling purposes, and shall not change the character thereof. 2. There shall be no employees other than members of the immediate family residing on the premises. 3. No business shall be conducted which requires delivery vehicles or other services not customary to a residence. 4. Signs shall be subject to applicable provisions of Section 509. 5. All materials and equipment used and maintained in connection with a home occupation must be used and stored inside the dwelling and accessory buildings. 6. No public display of items for sale shall be permitted. 7. A home occupation shall not create any nuisance or hazard, or other offensive condition such as that resulting from noise, smoke, fumes, dust, odors or other noxious emissions. Electrical or mechanical equipment

		that causes fluctuation in line voltage, creates any interference in either audio or video reception or causes any perceivable vibration on adjacent properties is not permitted. 8. The use shall not generate more pedestrian or vehicular traffic than is typical to the zone in which it is located. [Ord. No. 442]
All Permitted or Conditional Uses of the Zoning District	AR	1. Cattle, horses, sheep, goats, dogs, cats, birds, fowl, and any other living animals, and the pens, stalls, stables, yards, shelters, cages, areas, places, and premises where they are held or kept, shall be so maintained that flies, insects, or vermin, rodent harborage, odors, ponded water, the accumulation of manure, garbage, refuse or other noxious material do not become a public health nuisance and do not disturb the peace, comfort, or health of any person. 2. Any person, firm, or corporation is prohibited from keeping or sheltering any animal, bird, or fowl other than a household pet within one hundred (100) feet of a building, other than his own, used for human habitation. 3. Pigs shall not be kept within the city limits.
Viniculture	AR	1. The irrigated area in any parcel of viniculture shall not exceed one-half (1/2) acre. 2. Adjoining parcels including up to one-half (1/2) acre of irrigated area shall be considered separate parcels for the purposes of this Article. 3. A separate water meter shall be required for each parcel of viniculture, and each shall require an application for water service and payment of applicable water hookup fees, in accordance with the provisions of Chapter 13, "Water," of the Jerome Town Code. 4. Water usage for each parcel used for viniculture shall be subject to Town water restrictions. 5. If water availability decreases for any reason, including but not limited to drought, climate conditions or system failure, restrictions may be placed on water use according to the Town's Demand Reduction Strategies or any emergency measures in place or enacted at any future time. 6. The Town of Jerome shall not be held responsible for any loss of revenue or crop failures experienced as a result of water restrictions placed by the Town. 7. Flood irrigation will not be permitted. 8. A plan for a drip irrigation system must be submitted as provided in Section 16-5-2 below. 9. Each parcel used for viniculture activities shall require a Conditional Use Permit

		10. Conditional Use Permit applications for viniculture activities shall be required to: a. Provide estimated peak monthly water usage for each parcel of viniculture. b. Demonstrate that fifty percent (50%) of the proposed peak monthly water use can be provided through methods other metered distribution, such as catchment, cistern, hauling, greywater or overflow. c. Provide a plan for drip irrigation in conjunction with the site plan. d. Provide a written release holding the Town of Jerome harmless for any loss of revenue, crop failures, or additional expenses experienced as a result of restrictions and regulations imposed by the Town for purposes of controlling water supply, soil erosion, vista protection slope restrictions, water drainage, planning and zoning, and restoration of natural vegetation upon termination of conditional use permit. e. Provide a fully-executed agreement to waive rights and remedies under Arizona Revised Statutes §12-1134 (Prop 207) 11. Viniculture operations are strongly encouraged to utilize organic methods and minimize the use of chemicals. The Town reserves the right to place restrictions in this regard in accordance with regulations or recommendations which may be promulgated by the Town, County, State or Federal government. 12. Town water shall not be provided for irrigation, agriculture or viniculture located outside of Town limits, except as provided herein. 13. Vineyards located outside of Town limits which are in existence and which purchase water from the Town of Jerome as of the adopted date of this Ordinance will be entitled to continue to purchase Town water at rates established from time to time by the governing body, subject to the standards above. 14. Vineyards located outside of Town limits which are in existence and which purchase water from the Town of Jerome as of the adopted date of this Ordinance will be required to submit documentation to the Town regarding the size of the area of their plantings and the number of vines planted. This information will be subject to verification by the Town of Jerome. 15. Any expansion of an existing vineyard outside of Town limits shall be considered a new vineyard for the purposes of this Article, and will not be eligible to purchase water from the Town of Jerome. 16. Vineyards located outside of Town limits which receive water from the Town of Jerome shall be

		subject to all of the provisions of Chapter 13, "Water," of the Jerome Town Code.
Manufacturing incidental to a permitted use	C-1, I-1	1. All products incidental to a permitted use which are manufactured or processed on the premises shall be sold at retail only and on the premises only. 2. Such manufacturing activity shall be restricted to not over fifty (50) percent of the ground floor area of the building allocated to the permitted use, unless in the opinion of the Town Council such activity is not detrimental to public health, safety and general welfare.
Research and Product Development	C-1, I-1	1. All activities shall be conducted entirely within enclosed buildings
All Permitted or Conditional Nonresidential Uses of the Zoning District	C-1	1. All activities, except as otherwise addressed herein, shall be conducted entirely within enclosed buildings. 2. Outdoor storage or display of goods or materials shall be prohibited. 3. Warehousing or indoor storage of goods or materials, exceeding that normally incidental to permitted uses, shall be prohibited.
Wireless Communication Facilities	AR, C-1, I-1	1. New wireless communication facilities~~communication towers~~ shall be stealth design to minimize or mitigate the adverse visual impact through proper design and aesthetics that ensure the communication tower is compatible with the built environment in which it is located. Because of differing circumstances specific to each site, a communication tower that is considered to be stealth in one location may not be considered to be stealth in a different location. Methods of stealth design include, but are not limited to: a) Design that mimics surrounding existing vegetation not to exceed forty feet in height. b) Mounting antennas on existing structures that blend with the architecture of the structure on which the antennas are located. c) Using color schemes that make the communication tower less noticeable. d) Using church steeples, clock towers, bell towers, roof features or other such vertical architectural elements to conceal antennas and equipment. e) Placing antennas on new or existing street signs, outdoor lighting poles, flag poles, windmills (both functional and faux), chimneys, cupolas, silos, smokestacks and utility poles which are designed to match the context and color of the host structure. 2. The applicant shall submit documentation detailing that applicable Federal Communications Commission and Federal Aviation Administration regulations have been reviewed and that the regulations are being

		complied with or that the communication tower is exempt from regulation prior to the issuance of the building permit. 3. The applicant shall submit with the site plan before and after photo simulations showing the tower and surrounding area. 4. Applicants for cellular phone antennas must provide evidence in writing that at least one cellular phone provider is committed to located on the tower. 5. For new towers the applicant shall submit a narrative explanation describing the community necessity for the new tower and resulting increase in coverage. The narrative shall list, and include a discussion of, the pros and cons of each prospective new tower site and co-location opportunity considered (along with maps showing the locations of each site) and shall state the reasons why each of the alternative sites and co-locations was not considered to be feasible. The narrative report shall be accompanied by before and after propagation maps prepared and signed by a radio frequency engineer evidencing that a gap in coverage exists and demonstrating how the proposed tower will eliminate the existing gap. 6. Facilities owned and operated by the Town for its use are not subject to the standards of this table. 7. Collocation of small wireless facilities within a right-of-way that are exempt from zoning pursuant to A.R.S. § 9-592 (I) or (J) do not require a conditional use permit or other zoning approval.
All Permitted or Conditional Nonresidential Uses of the Zoning District	I-1	1. NOISE: At no point on the property line shall the sound pressure level of any individual operation exceed the decibel levels in the designated octave bands of Table 411.a. (Excluding operation of motor vehicles or other transportation facilities.) Sound levels shall be measured with a sound level meter and associated octave band filter manufactured according to standards prescribed by the American Standards Association. Measurements shall be made using the flat network of the sound level meter. Impulsive type noises shall be subject to the performance standards provided that such noises shall be capable of being accurately measured with such equipment. Noise capable of being so measured, for the purpose of this section, shall be those noises which cause rapid fluctuations of the needle of the sound level meter with a variation of not more than plus or minus two (2) decibels. Noises incapable of being so measured, such as those of an irregular or intermittent nature, shall be controlled so as not to become a nuisance to adjacent uses.

		2. SMOKE: No emission of smoke from any source shall be permitted to exceed a greater density than that density described as No. 1 on the Ringleman Chart. However, smoke may be emitted, which is equal to but not darker than No. 2 on the Ringleman Chart, for not more than four (4) minutes in any thirty (30) minute period. For the purpose of grading the density of smoke, the Ringleman Chart, as published by the U.S. Bureau of Mines shall be the standard. 3. GLARE OR HEAT: Any activity producing intense glare or heat shall be performed within a completely enclosed building in such a manner as not to create a nuisance or hazard along lot lines. 4. VIBRATION: No vibration shall be permitted which is discernible beyond the lot line to the human sense of feeling for three (3) minutes or more duration in any one (1) hour of the day between the hours of 7:00 a.m. to 7:00 p.m., or of thirty (30) seconds or more duration in any one (1) hour during the hours of 7:00 p.m. and 7:00 a.m. 5. FLY ASH, DUST, FUMES, VAPORS, GASES AND OTHER FORMS OF AIR POLLUTION: No emission shall be permitted which can cause damage to health, to animals, or vegetation, or other forms of property, or which can cause any excessive soiling. 6. LIQUIDS AND SOLID WASTE: No wastes shall be discharged in the public sewage system which endangers the normal operation of the public sewage system. 7. ODORS: No emission of odorous gases or other odorous matter shall be permitted in such quantities as to be offensive in such a manner as to create a nuisance or hazard beyond the property lines.

Table 411.a: Octave Bands

Octave band cycles per second	**Maximum sound pressure** level in decibels .0002 dynes per CM^2
0 - 75	72
75 - 150	67
150 - 300	59
300 - 600	52
600 - 1200	46
1200 - 2400	40
2400 - 4800	34
Above 4800	32

SECTION 412. DEVELOPMENT STANDARDS MATRIX

Table 412: Development Standards Matrix

	Zone					
Development Standard	AR	R1-10	R1-5	R-2	C-1	I-1
Minimum Lot Area	10,000 SF	10,000 SF	5,000 SF	5,000 SF	None	None

Minimum Square Footage of Dwelling/Building	850 SF of enclosed floor space exclusive of any attached garage	850 SF of enclosed floor space exclusive of any attached garage	850 SF of enclosed floor space exclusive of any attached garage	850 SF of enclosed floor space exclusive of any attached garage	None	None
Maximum Lot Coverage	40%, including main building and all accessory buildings	40%, including main building and all accessory buildings	60%, including main building and all accessory buildings	~~Not more than sixty (~~60%~~,)~~ including ~~percent of the net area of the lot may be covered by the~~ main building and all accessory buildings	None	None
Setbacks						
Front[1]	20 Feet	20 Feet	10 Feet	10 Feet	10 Feet	10 Feet
Rear	20 Feet[2]	20 Feet[2]	20 Feet[2]	20 Feet[2]	20 Feet[3]	20 Feet[3]
Side	10 Feet[4]	10 Feet[4]	5 Feet[4]	5 Feet[4]	Notes[4, 5]	Notes [4, 5]
Maximum Building Height	25 Feet[6]	25 Feet[6]	25 Feet[6]	25 Feet[6]	25 Feet[7]	25 Feet[7]
Accessory Buildings[8]						
Setbacks	Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.	Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.	Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.	Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.	Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.	Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.
Maximum Height	Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."	Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."	Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."	Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."	Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."	Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."

[1] The minimum front yard setback shall be ten (10) feet, except that where adjacent buildings within one hundred (100) feet establish a different front building setback, a new building may align with that established setback. Where a lot is situated between two (2) such buildings, the front yard setback shall be established by a line connecting the nearest front corners of the adjacent buildings. Where a lot has frontage on two (2) streets, the required front yard shall be provided on both streets unless access is denied to one of the streets, then a rear yard shall be required.

[2] There shall be a rear yard of not less than twenty (20) feet in depth, except where the rear lot line is in common with, or separated by an alley from~~,~~ the side lot line of another lot, there shall be a rear yard of not less than ten (10) feet in depth. Where the rear lot line abuts an alley, the required rear yard shall be measured from the center line of the alley.

[3] There shall be a rear yard of not less than twenty (20) feet in depth, except where the rear lot line is in common with or separated by an alley from the side lot line of a lot in a commercial or industrial zone, there shall be a rear yard of not less than ten (10) feet in depth.

[4] Where a side lot line abuts a street, the side yard shall be considered a front yard for the purpose of determining width.

[5] Where the side lot line is in common with the side lot line of a property in a commercial or industrial zone, no side yard shall be required on that side. Where the side lot line is in common with the side lot line of a property in a residential zone, the side yard requirements of the residential zone shall apply to that side yard, provided nothing shall require such a side yard to be greater than ten (10) feet in width.

[6] As defined in "Building, Height Of". On slopes over forty-five percent (45%) there will be a one (1) foot reduction in height for each additional five percent (5%) of slope or portion thereof. Notwithstanding these provisions, no face of any building shall exceed thirty-five (35) feet above the low point of original grade as defined in "original grade". (see Appendix for diagrams).

[7] The maximum building height shall not exceed that established by any building within one hundred (100) feet on either or both sides of the lot. Where more than one such building is within one hundred (100) feet of the lot then the maximum building height of the nearest such building shall be the maximum building height of the lot. Except that where the lot is between two (2) such buildings, each within one hundred (100) feet of the lot, then the maximum building height of the center of this lot shall be that established by a line joining the highest point of the other such buildings. Nothing in the above shall require that the maximum building height in this district be less than twenty-five (25) feet. (see Appendix for diagrams). Notwithstanding these provisions no face of any building shall exceed thirty-five (35) feet above the low point of original grade as defined in "original grade."

[8] Accessory buildings shall be considered in determining yard, lot and area requirements. Accessory buildings shall not be used for human habitation.

~~ARTICLE V~~ARTICLE V: USE REGULATIONS

SECTION 501. NONCONFORMING ~~-~~SITUATIONS

A. DEFINITIONS

A nonconforming situation ~~is a condition that~~ occurs when, on the effective date of this Ordinance, any prior ~~or a previous~~ Ordinance, or on the effective date of an Ordinance text amendment or rezoning, an existing lot, structure, building, sign, development, or use ~~of an existing lot or structure~~ does not conform to ~~one or more or~~ the regulations currently applicable to the district in which the lot, structure, building, sign, development or use is located.

[Ord. No. 293]

B. PURPOSE

While permitting the use and maintenance of nonconforming structures, this section is intended to limit the number and extent of nonconforming uses and structures by prohibiting their being moved, altered, enlarged, or restored after destruction in a manner which would increase the discrepancy between conditions existing at the time of adoption of the Ordinance and the standards prescribed in this Ordinance, except as provided for by A.R.S. 9-462.02.

C. APPLICATION

1. Any nonconforming structure or portion thereof declared unsafe by a proper authority may be restored to a safe condition.
2. The lawful use of land, buildings, or structures existing on the effective date~~at the time of the passage~~ of this Ordinance, June 14, 1977, or any amendment thereof, may continue even ~~al~~though such use does not conform to the provisions of this Ordinance ~~hereof for said land., may be continued, but~~ However, if such nonconforming uses are~~is~~ discontinued for a period of six (6) months, any future use of said land or structure shall be in conformity with the provisions of this Ordinance.
3. No nonconforming use shall be extended to replace a conforming use.
4. A nonconforming use of a building or lot shall not be changed to another nonconforming use whatsoever. Changes in use shall be made only to a conforming use.
5. Once changed to a conforming use, no building or land shall be permitted to revert to a nonconforming use.
6. A nonconforming building may not be reconstructed or structurally altered during its life to an extent which would increase the discrepancy between conditions existing at the time of the adoption of this Ordinance and the standards prescribed in this Ordinance.
7. No repairs, alterations, or additions shall be made to any building used for a nonconforming use or a nonconforming building which has been damaged by fire, flood, wind, earthquake, explosion or other calamity, act of God, ~~or~~ act of the public enemy, or ~~which has been dismantled or demolished~~ by the owner, to an extent which would increase the discrepancy between conditions at the time of such damage and the standards prescribed in this Ordinance.
8. A nonconforming use shall not be extended, but the extension of a lawful use to any portion of a nonconforming building which existed prior to the enactment of this Ordinance shall not be deemed the extension of such nonconforming use.
9. Nothing herein contained shall require any change in plans, construction, or designated use of a building for which a building permit has been issued prior to the enactment of this Ordinance, provided the construction shall be diligently prosecuted within sixty (60) days of the date of this Ordinance, and the building is completed and used according to such plans as filed within one (1) year from the date of the Ordinance.

~~10.~~ A building, or portion thereof, designed or clearly intended for a nonconforming use, but not so used at the time of the effective date of this Ordinance, may be used for such nonconforming purpose if the use commences within six (6) months of the effective date of this Ordinance and no alteration occurs except as permitted herein. If the use does not commence within six (6) months, the building shall thereafter be used only in conformity with this Ordinance. ~~A nonconforming building or portion thereof which was specifically designed, or beyond a reasonable doubt, intended by the nature of its arrangement and construction to be used in any way which would be nonconforming under this Ordinance, but was not so used at the time this Ordinance became effective, may, if not altered or repaired as prohibited elsewhere in this Ordinance be occupied or used for the purpose for which it was designed, arranged or intended provided such building is so used within six (6) months after the effective date of this Ordinance. Otherwise the use of such building shall conform to the provisions of this Ordinance.~~

10.

11. Notwithstanding any other provisions of this Ordinance, any automobile wreck yard or any other junkyard in existence in any zone at the date of enactment of this Ordinance shall (have), at the expiration of three (3) from such date, become a prohibited and unlawful use and shall be (have been) discontinued.
12. Whenever the boundaries of a zone shall be changed so as to transfer an area from one zone to another zone of a different classification, the foregoing provisions shall also apply to any nonconforming uses existing therein.
13. Nothing in this article shall be interpreted as authorization for approval of the continuance of the use of a building or premises in violation of regulations in effect at the time of the effective date of this Ordinance.
14. Notwithstanding any other provisions of this Ordinance, a building may be constructed on any lot of record before the adoption of this Ordinance in any zone in which such buildings are permitted even though such lot fails to meet the area or width requirements for with the zone, except that such construction shall conform to any lot coverage, yard and parking and loading requirements of the zone.
15. Where two (2) or more vacant contiguous lots of record, having continuous frontage, are owned by the same person at the time of the passage of the controlling ordinance, the land included in the lots shall be considered to be an undivided parcel and no portion of said parcel shall be used as a building site or sold which does not meet the area and width requirements of the zone in which the lot is located.

[Ord. No. 293]

SECTION 502. GENERAL PROVISIONS

A. APPLICATION

Except as hereinafter provided, no building, structure, or premise shall be used and no building or structure or part thereof shall be constructed, altered, repaired, improved, moved, removed, erected, demolished, or materially altered except in conformity with the provisions of the zone in which it is located. The provisions of this section are applicable to all zoning districts. Any use that is not specifically permitted is hereby declared to be a prohibited use, except as hereinafter provided.

B. USE RESTRICTIONS

1. PRINCIPAL USES: Only those uses and groups of uses specifically designated as "Permitted Principal Uses" in zoning district regulations shall be permitted as principal uses; all other uses shall be prohibited as principal uses, except as otherwise provided herein.
2. CONDITIONAL USES: Certain specified uses designated as "Conditional Uses" may be permitted as principal uses subject to special conditions of location, design construction, operation, and maintenance ~~hereinafter~~ specified in this Ordinance or imposed by the Planning and Zoning Commission.
3. ACCESSORY USES: Uses that are normally accessory and incidental to a permitted principal or conditional uses shall be permitted as ~~hereinafter~~ specified in this Ordinance.
4. UNSPECIFIED USES: Whenever a use is proposed which is not listed as a permitted or conditional use in any zone district, the Zoning Administrator shall complete a review of the proposed use to determine its basic characteristics and similarity to existing permitted uses and make a determination as to whether the proposed use is permitted within the zone district. The Zoning Administrator's determination can be appealed as specified in this Ordinance.~~and submit this report to the Planning and Zoning Commission. The Commission shall review the Administrator's report and recommendation and determine in which zone district the proposed use should be placed and forward a recommendation to the Town Council. The Town Council, after reviewing the Administrator's report, Commission's Recommendation and other testimony, shall determine the similarity to the listed permitted uses and shall determine by minute order the proper zone district for the location of the proposed use. A copy of the minute order shall be added to the permitted use section of the appropriate zone district.~~

C. NONCONFORMING LOTS OF RECORD

1. Notwithstanding any other provisions of this ordinance, a building may be constructed on any lot of record before the adoption of this Ordinance in any zone in which such buildings are permitted, even though such lot fails to meet the area or width requirements for within the zone, except that such construction shall conform to any lot coverage and yard requirements of the zone.
2. Where two (2) or more vacant contiguous lots of record are owned by the same person at the time of the passage of the controlling ordinance, the land included in the lots shall be considered to be an undivided parcel and no portion of said parcel shall be used as a building site or sold which does not meet the area and width requirements of the zone in which the lot is located.

D. REDIVIDING OF RECORDED LOTS

No lot may be divided to create a lot not in conformance with these regulations, unless. No lot shall be divided or combined in any manner other than through subdivision procedures as specified by the Subdivision Regulations.

E. STREET AND UTILITY REQUIREMENTS

1. All lots shall abut a public street or legally recorded easement.
2. A building permit shall not be issued for a lot which abuts an undedicated portion of a partly-dedicated public street.

3. A building permit shall not be issued for any lot for which public sewerage or water supply is not available, unless and until the proposed mode of water supply and sewage disposal has been reviewed and approved in writing by the Yavapai County Health Department.

F. DRIVEWAYS

1. General Requirement

   All lots shall obtain vehicular access to a public street, either directly or through an approved shared-access easement, private access easement, or private street. No driveway shall be constructed, relocated, widened, resurfaced, altered, or otherwise modified without first obtaining the necessary permit(s) from the Town.

2. Driveways May Be Denied

   The Town may deny additional driveway connections where:

   a. Reasonable access already exists through an existing driveway or easement;

   b. Multiple driveways would create traffic or safety concerns;

   c. There is not sufficient space for adequately extending a driveway to park a vehicle entirely outside the right-of-way; or

   d. The property does not provide sufficient on-site area to:

      i. Allow vehicles to safely enter and exit the property; or

      ii. Prevent vehicles from routinely backing into the public street when leaving the site.

3. Driveway Surfacing

   Driveway surfacing shall extend from the parking area to the edge of the public roadway pavement and shall continue within the public right-of-way to meet existing roadway surfacing, or to a point designated by the Town Engineer where future roadway surfacing is anticipated.

   Acceptable surfacing materials shall be established by Town standards and may include asphaltic concrete, portland cement concrete, chip seal, permeable pavement, or other approved materials.

4. Residential Development

   Single-family residential driveways may remain unsurfaced unless otherwise required by the Town Engineer. Where surfacing is installed, it shall comply with Section 502.F.4.

5. Multifamily and Nonresidential Development

   All multifamily and nonresidential development shall provide paved driveway access between the public street and all required parking, loading, and circulation areas, unless modified by the Town Engineer to meet site constraints such as, but not limited to, topography, existing nearby access, and recorded easements. Such surfacing shall extend through the right-of-way as required by the Town Engineer.

6. Driveway Alterations

   Any relocation, widening, reconstruction, pavement change, additional curb cut, or modification of an existing driveway shall require a permit approved by the Town.

7. Culverts and Drainage

   Where a culvert is required, culvert ends shall be protected against crushing and erosion and shall conform to Town engineering standards. Alternative treatments may be approved by the Town Engineer.

8. Access Management

The number, width, spacing, and location of driveways shall be subject to approval by the Town Engineer. The Town may require shared driveways, cross-access easements, reciprocal access agreements, or driveway closures when necessary to promote traffic safety and efficient roadway operations.

~~F.~~G. SITE UNSUITABILITY

No land shall be used or structure erected where the land is held by the Commission to be unsuitable for such use or structure by reason of flooding, concentrated runoff, inadequate drainage, adverse soil or rock formation, extreme topography, low percolation rate or bearing strength, erosion susceptibility, or any other features likely to be harmful to the health, safety and general welfare of the community. The commission, in applying the provisions of this section, shall state in writing the particular facts upon which its conditions are based. The applicant shall have the right to present evidence contesting such determination to the Council if he desires, whereupon the Council may affirm, modify, or withdraw the determination of the unsuitability.

~~G.~~H. DUMPING OR DISPOSAL

1. The use of land for the dumping or disposal of scrap iron, junk, garbage, rubbish, or other refuse, or of ashes, slag, or other industrial wastes or by-products, shall be prohibited in every district except as otherwise provided in this Ordinance.
2. The dumping of dirt, sand, rock or other material excavated from the earth shall be permitted in any district, provided that the surface of such material is graded, leaving the ground surface in a condition suitable for other use permitted in the district, provided that such fill does not so increase the elevation of the site as to prevent its development or use for other purposes and provided that such does not increase the susceptibility of the ground to erosion, landslide, flooding, or result in any other dangerous condition.
3. No person, firm, or corporation shall strip, excavate, or otherwise remove top-soil for sale or for use other than on the premises from which the same shall be taken, except in connection with the construction or alteration of a building on such premises and excavation or grading incidental thereto.
4. No yard or other open space surrounding an existing building in any residential zone, or which is hereinafter provided around any building in any residential zone, shall be used for the storage of junk, debris, or abandoned or inoperable vehicles; except as specifically permitted herein, and as provided and regulated in any other applicable Town Ordinances.

~~H.~~I. YARD, LOT, AND AREA REQUIREMENTS

1. No building shall be erected; nor shall any existing building be altered, enlarged, moved, or rebuilt, nor shall any open space surrounding any building be encroached upon or reduced in any manner, except in conformity with the yard, lot, area and building location regulations hereinafter designated for the zone in which such building or open space is located, except, as otherwise specifically provided.
2. No yard or other open space provided about any building for the purpose of complying with the provisions of these Restrictions shall be considered as a yard or open space for any other building; and no yard or other open space on one (1) lot shall be considered as a yard or open space for a building on any lot.
3. Awnings, fire-escape stairs, window-type refrigeration units, suspended or roof evaporative coolers, and forced air furnaces~~,~~ may not project more than five (5) feet over any required yard, provided that they shall be no closer than three (3) feet to any lot line.
4. Architectural details such as canopies, cornices, and eaves may project not more than three (3) feet over any required yard, provided that they shall be no closer than three (3) feet to any lot line.

5. Sills, leaders, be1t courses and similar ornamental features may project not more than six (6) inches over or into any required yard.
6. Accessory Buildings (attached) – A private automobile garage, carport or accessory building having any part of a wall in common with a dwelling shall be considered an integral part of the main building in determining yard, lot, and area requirements.
7. Accessory Buildings (detached) – Any detached accessory building or swimming pool in any zone shall not be located in the front yard, shall be at least five (5) feet from the main structure, shall be at least five (5) feet from the rear and interior side lot lines, and shall maintain side yard setbacks from the street side lot lines as required for the main structure in that zone.
8. No automobile service station pump shall be located closer than twelve (12) feet to a street property line.
9. Except as provided herein, every part of a required yard shall be open to the sky and unobstructed. Trees, shrubbery, etc., shall not be considered obstructions.
10. No portion of any deck shall be located within five (5) feet of the lot line except in those districts where residential use is not a permitted use. In those districts, decks should conform to the required yard for that zone. Decks shall not encroach into any public easement. Square footage of decks shall be included in lot coverage for each zoning district.

[Ord. No. 374]

~~I.~~J. BUILDING HEIGHT REQUIREMENTS

1. No building shall be erected, reconstructed, or structurally altered to exceed in height the limit hereinafter designated for the zone in which such building is located, except as otherwise specifically provided.
2. Height regulations established elsewhere in this Ordinance shall not apply:
   a. In any district, to church spires, belfries, cupolas and domes not for human occupancy, monuments, water towers, flagpoles, non-commercial radio or television antennas, provided that such structures and antennas shall be so located and constructed that if it should collapse, its reclining length would still be contained on the property on which it was constructed.
   b. In industrial districts, to chimneys, smokestacks, derricks, conveyors, grain elevators, or similar structures wherein the industrial process involved customarily requires a height greater than otherwise permitted, provided that such structure shall be so located and constructed that if it should collapse, its reclining length would still be contained on the property on which it was constructed.
3. In any district, the height of a deck may not exceed twenty-seven (27) feet from the natural grade.

[Ord. No. 374]

~~J.~~K. WALLS AND FENCES

1. No freestanding wall or fence shall be constructed until a permit for such construction has been issued by the Building Inspector. No such permit shall be issued until the application for such permit has been reviewed and approved by the Zoning Administrator and Historic Preservation and ~~Commission~~Design Review Board in accordance with the provisions of Section 303 and Section 304.
2. In any residential or commercial zone, no wall or fence over three (3) feet high shall be constructed or maintained nearer to the street line than the front and side walls of the building erected, nor be more than six (6) feet in height on any side or rear-lot-line. Provided, however,

that open wire fences exceeding the above heights may be built around schools and other public or quasi-public institutions when necessary for the safety or restraint of the occupants thereof.

3. No fence or wall shall contain barbed wire, electrical current or charge of electricity, broken glass, or similar hazardous materials or devices, provided, however, that fences enclosing storage areas in industrial districts may use barbed wire so long as such wire is located not less than six (6) feet above grade.

~~K.~~L. EXTERIOR LIGHTING

[CODIFIER'S NOTE: This subsection was rewritten with Ordinance 490 and moved to new **Section 502.1.**]

~~L.~~M. REMOVAL OR DEMOLITION OF BUILDINGS OR STRUCTURES

No building or structure which has been wholly or partially erected on any property located within the Town of Jerome shall be demolished or removed until a permit for such demolition or removal has been issued by the Zoning Administrator. A permit for removal or demolition of any building or structure shall not be issued until the application for such a permit has been reviewed and approved by the Historic Preservation and ~~Commission~~Design Review Board in accordance with the provisions of Section 304.

N. HOME OCCUPATIONS

~~M.~~ [CODIFIER'S NOTE: This subsection was moved to Table 411: Use/Zone-Specific Standards in Section 411 and the use renamed to Live/Work Dwelling with Ordinance 497.]

~~1. Home occupations shall be clearly incidental and subordinate to the use of the property and dwelling unit for dwelling purposes, and shall not change the character thereof.~~

~~2. There shall be no employees other than members of the immediate family residing on the premises.~~

~~3. No business shall be conducted which requires delivery vehicles or other services not customary to a residence.~~

~~4. Signs shall be subject to applicable provisions of Section 509.~~

~~5. All materials and equipment used and maintained in connection with a home occupation must be used and stored inside the dwelling and accessory buildings.~~

~~6. No public display of items for sale shall be permitted.~~

~~7. A home occupation shall not create any nuisance or hazard, or other offensive condition such as that resulting from noise, smoke, fumes, dust, odors or other noxious emissions. Electrical or mechanical equipment that causes fluctuation in line voltage, creates any interference in either audio or video reception or causes any perceivable vibration on adjacent properties is not permitted.~~

~~8. The use shall not generate more pedestrian or vehicular traffic than is typical to the zone in which it is located.~~

~~[Ord. No. 442]~~

~~N.~~O. ANIMALS AND PETS

Except as otherwise permitted in this Ordinance, the keeping of animals in connection with each dwelling shall not exceed a total of three (3) pets, such as dogs, cats, and similar household pets, exclusive of animals under the age of six (6) months, and exclusive of birds, fish and other pets which at all times are kept within a fully enclosed building or accessory building, and which do not create odor or sound which is detectable on an adjoining lot.

~~O.~~P. OFF-STREET PARKING REQUIREMENTS

1. Automobile off-street parking must be provided as required in Section 510.

2. Mobile homes, house trailers, commercial trailers, boat trailers, campers, or travel trailers shall not be stored, parked, or located in any zone other than as listed in the zone regulations, except that the storage of one boat trailer and not more than one uninhabited camper or uninhabited travel trailer shall be allowed for each residence. Such vehicles may not be stored in front yard of a residence.
3. A proposed development shall have adequate provisions for such items as convenience of access for public service vehicles, such as garbage collection vehicles, movement of emergency vehicles, and convenience of access to parking sites and other site improvements by site residents or users.
4. Ingress, egress, internal traffic circulation, off-street parking facilities, loading and service areas, and pedestrian ways shall be so designed as to promote safety and convenience.

Q. BEEKEEPING

~~P.~~ [CODIFIER'S NOTE: This subsection was rewritten with Ordinance 497 and moved to new Table 411: Use/Zone-Specific Standards in Section 411.]

~~The following standards and requirements apply to the keeping of any hive, colony, or apiary bees within the town limits:~~

~~1. All persons shall be required to obtain a conditional use permit prior to the keeping of bees. The application form shall include the name, address and telephone number of the person seeking the permit as well as the name, address, and telephone number of the property owner. If the applicant is other than the property owner, then the application shall also include written permission of the owner for the use of the property for keeping a hive, colony, or apiary. The form shall also include a drawing of the property indicating the location for the keeping of the hive, colony or apiary and an acknowledgement that, prior to the placing of the hive, colony or apiary upon the property, an adequate supply of water and other nutrients are available on the property near the hive, colony or apiary.~~

~~2. Upon receipt of a beekeeping application, and at least 15 days prior to review by the Planning and Zoning Commission, public notification shall be mailed by the Town to properties within 100 feet of the subject property.~~

~~3. No more than two hives shall be allowed on a parcel.~~

~~4. Hives shall be located in the area behind the primary structure and in front of the rear lot line and set back from the side and rear property lines a minimum of five (5) feet.~~

~~5. A flyway barrier consisting of a solid wall, fence, dense vegetation, or combination of these materials at least six (6) feet high shall be provided and extend at least ten (10) feet beyond the hives on each end of an apiary.~~

~~6. Each beekeeper shall ensure that a constant and easily accessible supply of fresh water and other nutrients of sufficient quantity to meet the needs of all bees being maintained or kept is always available to the bees so that they are discouraged from congregating at pet water bowls, birdbaths, pools, spas or other water sources where they may cause human or domestic pet contact.~~

~~7. Initial hives shall contain a queen selected from stock bred for gentleness, and bees who are relatively gentle and non-defensive. If a colony becomes too defensive, then the beekeeper shall be obligated to move that colony to a different location or to replace the queen with a gentler queen.~~

~~8. The first violation of this Section shall be treated as a petty offense. All subsequent violations within a succeeding two-year period shall be treated as Class I misdemeanors, subject to penalties as set forth in Article 1-8 of the Jerome Town Code.~~

~~9. The provisions of this Section shall not apply to any property owner upon whose property a swarm of transient bees is attempting to or has established a domicile.~~

~~10. Any honeybee colony not residing in a structure intended for beekeeping, or any colony residing in a standard or homemade hive that, by virtue of its condition, has obviously been abandoned by the beekeeper, or any hive, colony or apiary which does not contain the water and nutrient requirements of Section 502.Q.6 or any hive, colony or apiary for which no permit has been issued, is unlawful and shall be deemed a public nuisance.~~

~~11. The Town, upon a complaint, may take any actions necessary to remove the abandoned hive, colony, or apiary from the property.~~

R. ~~[ORD. 474, 8/10/21 *NOTE: ORD. 474 INCORRECTLY ESTABLISHED THE "BEEKEEPING" PARAGRAPH AS PARAGRAPH O. THIS WAS CORRECTED DURING CODIFICATION TO PARAGRAPH P.]~~SWIMMING POOLS

1. Construction

   a. All swimming pools within the Town of Jerome are to be designed and constructed in accordance with the International Swimming Pool and Spa Code, 2018 Edition, published on or after August 31, 2017, by the International Code Council Inc.

2. Enclosures

   a. A swimming pool, or other contained body of water with eighteen inches or more in depth at any point and that is wider than eight feet at any point and is intended for swimming, shall be protected by an enclosure surrounding the pool area, as provided in this section.

   b. A swimming pool or other contained body of water required to be enclosed by subsection A, whether a below-ground or above-ground pool, shall meet the following requirements:

      1) Be entirely enclosed by at least a five-foot wall, fence, or other barrier as measured on the exterior side of the wall, fence, or barrier.

      2) Have no openings in the wall, fence, or barrier through which a spherical object four inches in diameter can pass. Any horizontal parts of a wall, fence, or barrier must either:

         i. Be spaced at least 45 inches apart vertically, or

         ii. Be located on the pool side of the barrier, in which case the barrier must not have any horizontal openings wider than 1¾ inches.

         iii. Wire mesh or chain link fences shall have a maximum mesh size of one and three-quarter inches measured horizontally.

      3) The wall, fence, or barrier shall not contain openings, handholds, or footholds accessible from the exterior side of the enclosure that can be used to climb the wall, fence or barrier.

      4) The wall, fence or barrier shall be at least twenty inches from the water's edge.

      5) Gates for the enclosure shall:

         i. A pool gate must be self-closing and self-latching. The latch must either be at least 54 inches above the ground, or be located on the pool side of the gate with the release mechanism at least 5 inches below the top and no openings larger than ½ inch within 24 inches of the release. Alternatively, the gate may be secured with a padlock or similar locking mechanism that requires a key, electric opener, or combination, in which case the latch may be at any height.

         ii. Open outward from the pool.

c. If a residence or living area constitutes part of the enclosure required by subsection B for a swimming pool or other contained body of water in lieu of the requirements of subsection B, there shall be one of the following:

1) Between the swimming pool or other contained body of water and the residence or living area, a minimum four-foot wall, fence, or barrier to the pool area which meets all of the requirements of Section502. ~~Q~~R.2.b.1-.5.

2) The pool shall be protected by a motorized safety pool cover which requires the operation of a key switch that meets the American Society of Testing and Materials emergency standards 13-89 and which does not require manual operation other than the use of the key switch.

3) All ground-level doors or other doors with direct access to the swimming pool or other contained body of water shall be equipped with a self-latching device that meets the requirements of Section 502.R.2.b.5.i. Emergency escape or rescue windows from sleeping rooms with access to the swimming pool or other contained body of water shall be equipped with a latching device not less than fifty-four inches above the floor. All other openable dwelling unit or guest room windows with similar access shall be equipped with a screwed-in-place wire mesh screen, or a keyed lock that prevents opening the window more than four inches, or a latching device located not less than fifty-four inches above the floor.

4) The swimming pool shall be an aboveground swimming pool that has non-climbable exterior sides that are a minimum height of four feet. Any access ladder or steps shall be removable without tools and secured in an inaccessible position with a latching device not less than fifty-four inches above the ground when the pool is not in use.

d. This section does not apply to:

1) A system of sumps, irrigation canals, irrigation, flood control or drainage works constructed or operated for the purpose of storing, delivering, distributing or conveying water.

2) Stock ponds, storage tanks, livestock operations, livestock watering troughs or other structures used in normal agricultural practices.

3) Public or semi-public swimming pools.

4) A swimming pool or contained body of water or barrier constructed prior to the effective date of this article.

e. A person on entering into an agreement to build a swimming pool or contained body of water or sell, rent or lease a dwelling with a swimming pool or contained body of water shall give the buyer, lessee or renter a notice explaining safety education and responsibilities of pool ownership as approved by the Arizona Department of Health Services.

3. Location

a. The requirements for the location of permanent pools shall be the same as the requirements for the location of accessory buildings and structures within the property's zoning district, except that:

1) Swimming pools shall be located on a lot in compliance with all applicable setback, grading, drainage, and other requirements of this Ordinance. Pools shall be designed, constructed, operated, and maintained so that drainage, overflow, backwash, or water released from the pool does not drain onto adjacent properties or adversely impact adjacent properties or public rights-of-way.

4. Permit Required

b. No swimming pool, except temporary pools, shall be constructed, enlarged, or altered until a permit has been obtained from the Town. Application for a permit shall be accompanied by plans and specifications in sufficient detail to indicate the following:

1) Lot or plot plan showing lot lines, easements, if any, pool area plan, and elevations with dimensions drawn to scale.

2) Pool dimensions, depths and volume in gallons.

3) Type and size of filter system, filtration and backwash capacities.

4) Pool piping layout, with all pipes and valves shown, and the type of materials to be used.

5) Size, type, and rated capacity of the pool pump.

6) Location and type of water supply, and waste disposal system.

7) Location and type of all electrical fixtures.

8) Conformity with provisions of this Section as required.

9) Conformity with provisions of Town Building, Plumbing and Electrical Codes as required.

10) Conformity with The International Swimming Pool and Spa Code

c. Exceptions

~~1)~~ Any above-ground pool or water feature designed to hold less than 5,000 gallons or that is less than 18 inches deep shall not require a permit.

1)

~~being notified by the~~

SECTION 502.1 GENERAL PROVISIONS – EXTERIOR LIGHTING

[Section 502.1 created with Ord. No. 490]

A. INCORPORATION BY REFERENCE

A.R.S. Title 49, Chapter 7, Light Pollution is hereby incorporated by reference

B. PURPOSE

This section is intended to establish procedures and standards that ensure minimal light pollution, reduce glare, increase energy conservation, and afford every citizen and business of Jerome the flexibility to engage in the pursuit of safe, inexpensive lighting for the purpose of commerce and private use without detrimentally impacting the pristine nighttime environment free from light pollution, waste, trespass, or clutter.

C. APPLICABILITY

1. This chapter shall apply to all outdoor lighting, including, but not limited to, search, spot, or floodlights for:
    a. Buildings and Structures;
    b. Recreational Areas;
    c. Parking Lot Lighting;
    d. Landscape Lighting
    e. Other Outdoor Lighting
2. New lighting shall meet the requirements of this Code with regard to shielding and lamp type. The total outdoor light output after the new lighting is installed shall not exceed that on the site before the new lighting was installed, or that is permitted by this Code, whichever is less.
3. If the total cumulative increase in floor area is greater than 50 percent for single family residential or greater than 25 percent for all other uses, or if the total cumulative cost of any exterior modification, alteration or repair is greater than 25 percent of the valuation of the building as determined by the ~~Planning and~~ Zoning Administrator~~Director~~, then all exterior lighting fixtures shall comply with this Code. Cumulative modification, replacement, or repair of outdoor lighting constituting 25 percent or more of the permitted lighting output level for the parcel, no matter the actual amount of lighting already on the site, shall require all exterior lighting to comply with this Code.
4. Exemptions
    a. **Emergency Lighting**

        Lighting used only under emergency conditions, as declared by the Governor of the State of Arizona, Town of Jerome Mayor, or authorized County or Town public safety representative, shall not be subject to this Section 502.1

    b. **Seasonal Lighting**

        Temporary seasonal lighting between the months of October and January 15 shall not be subject to this Section 502.1, provided such lighting does not create glare to motorists or result in light trespass onto adjacent properties.

    c. **Lighting Required by FAA or FCC**

        Lighting required by the Federal Aviation Administration, or the Federal Communications Commission shall not be subject to this Section.

    d. **Special Events**

Special events that have been issued a special event permit shall be allowed temporary lighting for the duration of the event, provided such lighting does not create glare to motorists or result in light trespass onto adjacent properties.

e. **Street Lighting**

With the exception of shielding requirements, this Code does not apply to street lighting within Town and state rights-of-way.

5. Nonconforming Lighting

a. Existing historic nonconforming lighting in use prior to the adoption of this ordinance may continue to be used; if historic fixtures are damaged, they may be restored or repaired in efforts to preserve their historic nature.

b. Lighting that does not conform to all provisions of this Code shall be brought into compliance, in accordance with Section 502.1(C)(3). Until this time, no modification or replacement shall be made to a nonconforming fixture unless the fixture thereafter conforms to the provisions of this Code, except that identical lamp replacement is allowed.

c. In the event that an outdoor lighting fixture is abandoned or damaged to the point of requiring repairs for safe operation, the repaired or replacement fixture shall comply with the provisions of this Code.

D. DEFINITIONS

As used in this Code, unless the context clearly indicates otherwise, certain words and phrases shall mean the following:

1. *Abandonment* means the discontinuation of use for a period of six months.
2. *Adaptive Controls* means hardware and/or electronics, used in conjunction with outdoor light fixtures, intended to dynamically alter or adjust the operation of those fixtures. Examples of adaptive controls include, but are not limited to, motion/occupancy sensors, dusk-to-dawn ('astronomical') timers, and photocells.
3. *Class 1 Lighting* means all outdoor lighting used for, but not limited to, outdoor sales or eating areas, assembly or repair areas, advertising and other signs, recreational facilities, and other similar applications where color rendition is important.
4. *Class 2 Lighting* means all outdoor lighting used for, but not limited to, illumination for walkways, roadways, equipment yards, and parking lots where general illumination of the grounds is the primary concern.
5. *Class 3 Lighting* means any outdoor lighting used for decorative effects, including but not limited to architectural illumination, flag monument lighting, and illumination of trees, bushes, etc.
6. *Correlated Color Temperature (CCT)* means the temperature of a source of blackbody radiation whose spectrum best approximates the spectrum of a particular light source, expressed in units of Kelvins. Lamps with a CCT greater than 4000K are considered "cool" sources.
7. *Direct Illumination* means illumination resulting from light emitted directly from a lamp, luminaire, or reflector, not light diffused through translucent signs, or reflected from other surfaces such as the ground, building faces, or luminaire optics.
8. *Footcandle (abbreviated 'fc')* means a unit of illuminance or illumination, equivalent to the illumination produceds by a source with luminous intensity of one candela at a distance of one foot and equal to one lumen incident per square foot (approximately 10.764 lux).

9. *Fully Shielded Fixture* means that fixtures are shielded in such a manner that light rays emitted by the fixture, either directly from the lamp or indirectly from the fixture, are projected below a horizontal plane running through the lowest point on the fixture where light is emitted.
10. *Initial Lumens* means the lumens rating of a lamp at the time of manufacture, not accounting for losses due to normal lamp aging, or the lumens rating for a brand new light bulb. -Initial lumens are measured by manufacturers specifications and usually provided along with product packaging.
11. *Installed* means attached, or fixed in place, whether or not connected to a power source.
12. *Lighting Zone* means an overlay zoning system, establishing legal limits for lighting for particular parcels, areas, or districts in a community.
13. *Light Trespass* is spill light falling over property lines that illuminates adjacent grounds or buildings in an objectionable manner.
14. *Lumen* is the unit used to measure the actual amount of visible light, which is produced by a lamp as defined by the manufacturer.
15. *Luminaire* means the complete lighting assembly, less the support assembly.
16. *Lux (abbreviated 'lx')* means a unit of illuminance or illumination equal to one lumen per incident square meter (approximately 0.093 fc).
17. *Multi-class Lighting* means any outdoor lighting used for more than one purpose, when the purpose fall under the definitions for two or more lighting lasses as defined for Class 1, 2 and 3 Lighting above.
18. *Motion Sensing Lighting* means a fixture designed, and properly adjusted, to illuminate an area around a residence or other building by means of switching on a lamp when motion is detected inside an area or perimeter, and switching the lamp off when the detected motion ceases.
19. *Neon Lighting* means lighting using luminous gas filled tubes often formed into text, symbols, or decorative elements. Neon lighting includes tubes with typical diameters of 10 to 20 millimeters filled with neon, argon, xenon, or other gasses and producing various colors of light. -Not included are replaceable T-8 (1-inch diameter) and T-12 (1.5-inch diameter) or PL ("compact") fluorescent tubes.
20. *Net Acreage* means the remaining ground area of a parcel after deleting all portions for proposed and existing public right-of-way and undeveloped area.
21. *Opaque* means only that the material must not transmit light from the internal illuminating source: the color of such opaque backgrounds is not restricted.
22. *Outdoor Light Fixtures* means all outdoor illuminating devices, reflective surfaces, lamps, and other devices, either permanently installed or portable, which are used for illumination or advertisement. Such devices shall include, but are not limited to, search, spot, and floodlights for:

    d. Buildings and Structures

    e. Recreational Areas

    f. Parking Lot Lighting

    g. Landscape and Architectural Lighting

    h. Billboards and other Signs (advertising or other)

    i. Street Lighting

    j. Product Display Area Lighting

k. Building Overhangs and Open Ceanopies

23. *Person* includes a corporation, company, partnership, firm, association, or society, as well as a natural person.

24. *Planning and Zoning Director* means the Director of Planning and Zoning for the Town of Jerome or theirhis or her designated representative.

25. *Temporary Lighting* means lighting which does not conform to the provisions of this Code and which will not be used for more than one thirty (30) day period within a calendar year. Temporary lighting is intended for uses which by their nature are of limited duration; e.g., holiday decorations, civic events, or construction projects.

26. *Total Outdoor Light Output* means the maximum total amount of light measured in lumens, from all outdoor light fixtures on a property. For lamp types that vary their output as they age (such as high--pressure sodium and metal halide), the initial output, as defined by the manufacturer, is the value to be considered.

27. *Translucent* means light is transmitted from the internal illumination source.

28. *Unshielded* means a fixture that allows light to be emitted above the horizontal directly from the lamp or indirectly from the fixture or a reflector.

29. *Watt* is the unit used to measure the electrical power consumption (not the light output) of a lamp.

E. GENERAL REQUIREMENTS

All light fixtures and streetlamps where able, shall be aimed or shielded so that the direct illumination shall be confined to the property boundaries of the source. Direct illumination must not fall onto or across any public or private street or road. Motion--sensing lighting fixtures shall be properly adjusted, according to the manufacturer's instructions, to turn off when detected motion ceases. All new development, qualified enhancements, and requirements as outlined in 502.1 must follow the Total Light Output requirements indicated in Section 502.1.L.Appendix A.

1. **Class 1 Lighting (High Activity Areas)**

   Lighting used for outdoor sales or eating areas, assembly or repair areas, signage, recreational facilities, and other similar applications where accurate color rendition is important to preserve the effectiveness of the activity. Commonly used in Lighting Zones 2 -4. (See Section 502.1.LAppendix A)

2. **Class 2 Lighting (Security and Public Safety)**

   Lighting used for illumination of walkways, roadways, equipment yards, parking lots, and outdoor security where general illumination for safety or security of the grounds is the primary purpose. Commonly used in Lighting Zones 1-3. (See Section 502.1.LAppendix A)

3. **Class 3 Lighting (Decorative and Accent)**

   Lighting used for decorative effects such as architectural illumination, flag and monument lighting, and illumination of landscaping elements. All Class 3 lighting shall be selected, designed, installed, and aimed so that there is a minimum amount of spill beyond the area(s) to be lighted. Commonly used in Lighting Zones 0-2. (See Section 502.1.LAppendix A)

4. **Multi-Class Lighting**

   Lighting used for more than one purpose, such that the use falls within more than one class as defined for Class 1, 2, or 3 lighting. Multi-class lighting must conform to the standards that apply to the most restrictive included class.

5. **Lighting Plan Submittal Required**

Whenever new exterior lighting is proposed, the applicant shall submit an application, and as part of the application, shall submit sufficient information to enable the ~~Planning and~~ Zoning Administrator~~Director~~ to determine whether proposed lighting complies with this Code. All applications may be subject to review and action by the Planning and Zoning Commission at the discretion of the ~~Planning and~~ Zoning Administrator~~Director~~. The lighting plan shall include information as determined by the ~~Planning and~~ Zoning Administrator~~Director~~.

6. **Plan Approval**

   If the ~~Planning and~~ Zoning Administrator~~Director~~ determines that any proposed lighting does not comply with this Code, the associated permit shall not be issued, or the application approved, unless an alternative is approved pursuant to Section 502.1(E)(7) below.

7. **Discretionary Approval of Lighting Alternatives**

   The ~~Planning and~~ Zoning Administrator~~Director~~ may approve alternative lighting designs, materials, or methods of installation or operation not specifically prescribed by this Code, provided the proposed alternative:

   a. Results in approximate equivalence to the applicable specific requirement of this Code; and

   b. Complies with the purpose of this Code as stated in subsection 502.1(B).

8. **Warm Lighting Requirements and Alternatives**

   a. All Class 2 Lighting shall be either low-pressure sodium (LPS) lamps, narrow spectrum amber LEDs, or warm lighting alternatives not to exceed 2,700 Kelvin

   b. For Class 1 Lighting, a development may be eligible for an additional 10 percent increase in the total lighting output level allowed if 50 percent or more of the Class 1 lighting complies with subsection 502.1(E)(8)(a).

9. **Prohibited Lighting Types and Fixtures**

   a. Outdoor floodlighting by floodlight projection above the horizontal plane is prohibited.

   b. Mercury vapor light bulbs and fixtures.

   c. Lamps emitting a Correlated Color Temperature (CCT) in excess of 4,000 Kelvin

   d. Searchlights, laser source lights, strobe or flashing lights, illusion lights or any similar high intensity light shall not be permitted, except in emergencies by police and fire personnel.

   e. Unshielded lights.

   f. Permanent exposed string lighting for mixed-use and nonresidential uses is prohibited, except as allowed in the subsection immediately below

   g. Ambiaence lighting for outdoor dining/bar areas, interior courtyards, and/or event venues~~,~~ may be allowed subject to compliance with all other provisions of this Code and with approval by the ~~Planning and~~ Zoning Administrator~~Director~~ on a case-by-case basis. ~~-~~In reviewing proposals for such lighting, the ~~Planning and~~ Zoning Administrator~~Director~~ shall consider lighting types, locations, and time of use. Permanent outdoor string lighting shall not flash, blink, fade, or strobe and shall be included in the total partially shielded lumen count for the property. ~~-~~Such lighting, if allowed by the ~~Planning and~~ Zoning Administrator~~Director~~, shall be extinguished immediately after outdoor hours of operation.

10. **Shielding and Light Trespass**

    a. All light fixtures are required to be fully shielded, unless approved by the Planning and Zoning Director pursuant to Section 502.1(E)(6-7).

b. Partially shielded light fixtures approved by the ~~Planning and~~ Zoning Administrator~~Director~~ as part of a lighting alternative pursuant to 502.1(E)(7) are limited to a maximum of 3,850 initial lumens per net acre and shall not exceed 1,400 initial lumens per lamp.

c. All light fixtures shall be aimed and shielded so that the direct illumination shall be confined to the property boundaries of the source. Lighting shall not be aimed onto adjacent properties, except in cases of shared parking, pursuant to 502.1(E)(7), shared pedestrian pathways, or for coordinated development sites spanning multiple parcels.

11. **Lighting Controls**

d. Motion Sensors

2) May be used where the sensor is triggered by activity within the property lines and not triggered by activity outside the property lines.

3) Motion-sensing fixtures shall be fully shielded and properly adjusted, according to the manufacturer's instructions, to turn off in a reasonable timeframe after the detected motion ceases.

e. Lighting Time Limitations

4) Except for flagpole lighting and landscape lighting, Class 1, and Class 3 lighting shall be extinguished during nonbusiness hours. Lodging businesses are encouraged to reduce lighting during off-peak hours overnight.

5) Landscape lighting shall be extinguished by close of business or 10:00p.m. whichever is later.

6) Multi-class lighting shall conform to the time limitations of the strictest class.

F. UPLIGHTING, EXTERIOR BUILDING LIGHTING AND SIGN ILLUMINATION

1. Subject to the approval of the ~~Planning and~~ Zoning Administrator~~Director~~, uplighting or ground-mounted lighting may be allowed to accent unique features of a building and/or surrounding landscaping such as exceptional architectural features, specimen trees with dense year-round foliage, or large native shrub masses, and shall be designed and installed to minimize glare with special consideration to vehicular and pedestrian traffic.
2. All lighting shall be fully shielded to contain and direct the light onto the feature to be illuminated.
3. All uplighting shall be considered partially shielded for the purposes of calculating lighting output levels.
4. All Class 3 lighting shall be selected, designed, installed, and aimed so that there is a minimum amount of spill beyond the area intended to be lighted.
5. Exterior building lighting may be considered Class 1, 2 or 3 Lighting depending on the size, function, illumination, design, and lighting intent.
6. Soffit-mounted light fixtures should be recessed into the soffit or otherwise fully shielded.
7. Architectural lighting shall only be used to highlight special features. The lighting of expansive wall planes or lighting resulting in hot spots on wall or roof planes shall be prohibited.
8. Lighting above entryways or along building perimeters shall use fully shielded fixtures.
9. Lighting used for all externally illuminated signs shall conform to all restrictions of the Code, shall be fully shielded, and shall be turned off at 10:00p.m. or when the business closes, whichever is later.
10. Outdoor internally illuminated advertising signs shall either be constructed with an opaque background and translucent letters and symbols or with a colored (not white, cream, off-white,

yellow, or other light color) translucent background with either translucent or opaque letters and symbols. Opaque means only that the material must not transmit light from the internal illumination source: the color of such opaque backgrounds is not restricted by this section. Lamps used for internal illumination of such signs shall not be included in the lumens per net acre limit set forth. All internally illuminated signs shall be turned off at 10:00 p.m. or when the business closes, whichever is later.

G. PARKING AREA AND PEDESTRIAN WALKWAY LIGHTING

Parking area and pedestrian walkway lighting is considered Class 2 lighting.

1. Parking lot lighting shall use fully shielded fixtures.
2. Parking lot poles shall not exceed 12 feet in height.
3. Low-level pedestrian walkway lighting;
   a. Considered Class 2 lighting shall utilize fully shielded fixtures;
   b. Shall use shatterproof lamp coverings;
   c. Shall not cause the site to exceed the lighting output level established in this Code;
   d. Shall not be located to present hazards for pedestrians or vehicles.
4. Post or bollard-type walkway lights shall be painted in darker colors such as black, dark brown, dark gray, or other dark earth tones.

H. OUTDOOR DISPLAY LOTS

Light for outdoor display lots shall be considered Class 1, and shall conform to the lumens per acre limits established except as follows:

1. All such lighting shall be fully shielded~~,~~ partially shielded fixtures shall be prohibited.
2. If the proposed lumens exceed the per-acre limits, the installation shall be designed to achieve no greater than the minimum illuminance levels for the activity as recommended by the ~~i~~Illuminating Engineering Society of North America and shall require approval by the Planning and Zoning Director pursuant to 502.1(E)(7).
3. Outdoor display lot illumination design shall be certified by an Arizona registered engineer as conforming to all applicable restrictions of this Code.
4. Outdoor display lot lighting shall conform to the hours of operation as established under Class 1 lighting standards pursuant to Section 502.1(E)(11)(b).

I. INSTALLATION AND MAINTENANCE

1. For all projects where the total initial output of the proposed lighting equals or exceeds 70,000 fixture lumens, or if the ~~Planning and~~ Zoning Administrator~~Director~~ determines it is necessary, certification that the lighting, as installed, conforms to the approved plans shall be provided by a certified engineer before a Certificate of Occupancy is issued. Until this certification is submitted, approval for the use of a Certificate of Occupancy shall not be issued for the project.
2. Any proposed change to the type of light source after a permit has been issued shall require submitting a change request to the ~~Planning and~~ Zoning Administrator~~Director~~ for approval prior to the substitution.

J. TEMPORARY LIGHTING PERMITS

1. The ~~Planning and~~ Zoning Administrator~~Director~~ may grant a permit for temporary lighting if he or she finds all of the following:
   a. The purpose of which the lighting is proposed is not intended to extend beyond thirty (30) days;

b. The proposed lighting is designed in such a manner as to minimize light as much as feasible;

c. The proposed lighting will comply with the general intent of this Code; and

d. The permit will be in the public interest.

2. The ~~Planning and~~ Zoning Administrator~~Director~~ shall rule on the application within five (5) ~~business~~ days from the date of submission of the request and notify the applicant in writing of their~~his or her~~ decision. The ~~Planning and~~ Zoning Administrator~~Director~~ may grant one (1) renewal of the permit for an additional thirty (30) days if they ~~he or she~~ find~~s~~ that, because of an unanticipated change in circumstances, a renewal would be in the public interest. The ~~Planning and~~ Zoning Administrator~~Director~~ is not authorized to grant more than one temporary permit and one renewal for the same property within one calendar year.

K. VARIANCES

Any person desiring to install an outdoor lighting fixture in violation of this Code may apply to the Board of Adjustment for a variance from the regulation in question. Such variances shall be allowed only as provided by Section 1065 of Jerome Zoning Ordinance.

L. TOTAL LIGHTING OUTPUT

1. Lighting Zones

a. Zone O

1) Applies to areas in which permanent lighting is not expected or, use is limited to the amount of lighting and period of operation.

2) Includes undeveloped areas, wilderness parks and preserves, astronomical observatories, or areas where a dark environment is critical.

3) Special review should be required for any permanent lighting in this zone.

b. Zone 1

1) Areas that desire low ambient lighting levels.

2) Typically single and two family residential communities, rural town centers, business parks and agricultural areas.

3) May also include developed area in parks or other natural settings.

4) Can be Class 2 or Class 3 Lighting.

c. Zone 2

1) Areas with moderate ambient lighting levels.

2) Typically multifamily residential use, institutional residential use, schools, churches, hospitals, hotels/motels, recreation facilities, and commercial or business districts with moderate nighttime activities.

3) Can be used to accommodate outdoor sales or light industry in an area other LZ-1

4) Can be Class 1, Class 2, or Class 3 Lighting.

d. Zone 3

1) Areas with moderately high lighting levels.

2) Typically include commercial corridors, high intensity suburban commercial areas, town centers, mixed use areas, industrial and shipping and rail yards with high nighttime activity.

3) Can also include High use recreational facilties and playing fields, regional shopping malls, car dealerships, gas stations, and other nighttime active retail areas.

4) Can be Class 1, Class 2, or Class 3 Lighting

e. Zone 4

1) Areas with High Ambient lighting levels

2) Should only be used for special cases and is not appropriate for most cities.

3) May be used for unusual installations such as high-density entertainment, heavy industrial use, or major manufacturing.

4) Typically, only Class 1 lighting is used in this Zone.

5) Currently, there are no known uses for this Class or Zone within the limits of the Town of Jerome.

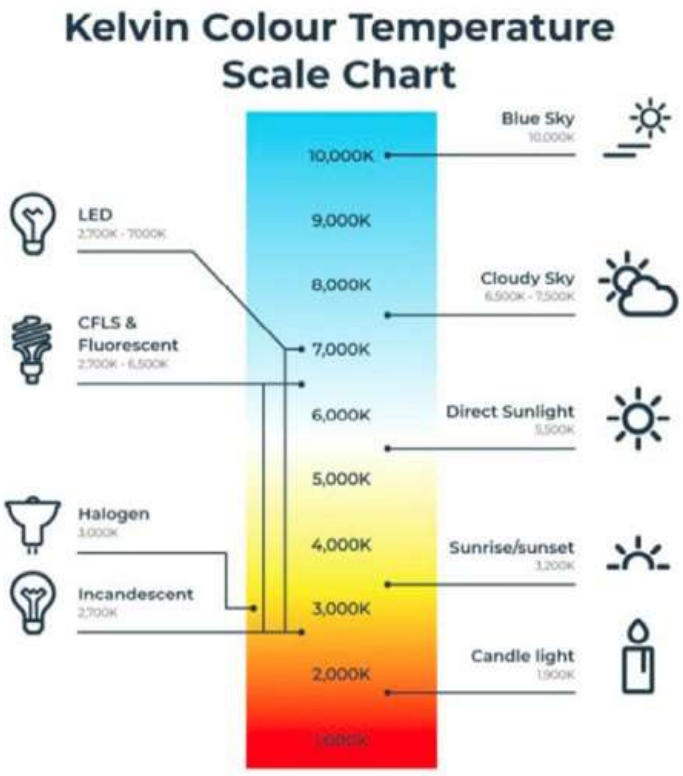
2. Lighting Applications

Table 502.1.L.2a Residential/Agricultural Lighting Applications

Residential/Agricultural Application	LZ 0	LZ 1	LZ 2	LZ 3	LZ 4
Allowed Lumens Per SF	0.5	1.25	2.5	5.0	7.5
Allowed Base Lumens Per Site	0	3,500	7,000	14,000	21,000
Residential Max Allowed Luminaire Lumens* for Unshielded Luminaires at one entry	0	420	630	630	630
Residential Max Allowed Luminaire Lumens* for Fully Shielded Luminaire	630	1,260	1,260	1,260	1,260
Residential Max Allowed Luminaire Lumens* for Unshielded Luminaires Excluding Main Entry	0	315	315	315	315
Residential Max Allowed Luminaire Lumens* for each Shielded Directional Flood Lighting	0	0	1,260	2,100	2,100
Residential Max Allowed Luminaire Lumens* for each Low Voltage Landscape Lighting	0	315	525	525	525
Residential Max Allowed Luminaire Lumens* for each Landscape Lighting	0	0	1,050	2,100	2,100

*Luminaire Lumens equals initial Lamp Lumens for a lamp, multiplied by the number of lamps in the luminaire

Table 502.1.L.2b Commercial Lighting Applications



Commercial Application	LZ 0	LZ 1	LZ 2	LZ 3	LZ 4
Allowed Lumens Per SF	0.5	1.25	2.5	5.0	7.5
Allowed Base Lumens Per Site	0	3,500	7,000	14,000	21,000
Non-Residential Outdoor Lighting (Hardscape Area Method) Base Allowance	.5/SF of Hardscape	1.25/SF of Hardscape	2/SF of Hardscape	5/SF of Hardscape	7/SF of Hardscape
Commercial Building Entrances/Exits (Allowance is per door. Luminaires must be within 20 feet of the door)	400	1,000	2,000	4,000	6,000
Commercial Building Facades (Allowance is lumens per unit area of building façade that are illuminated. Luminaires must be aimed at the façade and capable of illuminating it without obstruction.)	0	0	8/SF	16/SF	24/SF
Canopies (Allowance is lumens per unit area for total area within drip line of canopy. To use allowance luminaires must be located under the canopy.)	0	3/SF	6/SF	12/SF	18/SF
Outdoor Dining (Allowance is lumens per unit area for the total illuminated hardscape of outdoor dining. Luminaires must be within 2 mounting heights of the hardscape	0	1/SF	5/SF	10/SF	15/SF

Table 502.1.L.2c Lumens vs Watts Comparison Chart

Actual Light Generated	Incandescent Bulbs	Fluorescent Bulbs (CFL)	LED Bulbs (Light Emitting Diode)
Lumens	Watts	Watts	Watts
250	25	4-9	3
450	40	9-13	4-5
800	60	13-15	6-8
1,100	75	18-25	9-13
1,600	100	23-30	16-20
2,000	125	28-40	20-25
2,600	150	30-55	25-28

~~*appendices a and b are located under "appendices" at the end of this zoning ordinance.*~~

Chart 502.1.L.2a Kelvin Color Temp Scale Chart

SECTION 503. "AR" ZONE, AGRICULTURAL RESIDENTIAL

[CODIFIER'S NOTE: This subsection was rewritten with Ordinance 497 and moved to new Section 403.]

~~**A. PURPOSE**~~

~~This district is intended to promote and preserve low density residential development and noncommercial farming and agriculture. Land use is composed chiefly of individual homes, together with required recreational, religious, and educational facilities.~~

~~**B. PERMITTED USES**~~

~~1. One (1) single-family dwelling or one (1) modular home per lot. Mobile homes are prohibited.~~

~~2. Customary accessory uses and buildings, provided such uses are incidental to the principal use.~~

~~3. Temporary buildings for uses incidental to construction work, which buildings shall be removed upon completion of or abandonment of the construction work.~~

~~4. Publicly owned and operated parks and recreation areas and centers.~~

~~5. Home occupations.~~

~~6. Noncommercial farming and agriculture, not including the keeping of livestock.~~

~~7. Keeping of cattle and horses owned by members of the family occupying the premises, but not to exceed one (1) head per 20,300 square feet of lot area.~~

~~**C. CONDITIONAL USES**~~

~~1. Animals, fowl, and other typical farm livestock, except as otherwise prohibited herein.~~

~~2. Commercial stables~~

~~3. Churches or similar places of worship~~

~~4. Schools: Public or private elementary and high.~~

~~5. Colleges, universities, and professional schools having a regular curriculum.~~

~~6. Nursery Schools and Day Care Centers.~~

~~7. Privately owned and operated recreation areas and centers.~~

~~8. Public buildings other than hospitals.~~

~~9. Public utility buildings, structures, or appurtenances thereto for public service use.~~

~~10. Model Homes~~

~~11. Bed and Breakfast~~

~~12. Viniculture use, pursuant to Chapter 16, "Vineyards," of the Jerome Town Code.~~

~~13. Beekeeping~~

~~[Ord. No. 380; Ord. No. 474]~~

~~**D. ZONE RESTRICTIONS**~~

~~1. Cattle, horses, sheep, goats, dogs, cats, birds, fowl, and any other living animals, and the pens, stalls, stables, yards, shelters, cages, areas, places, and premises where they are held or kept, shall be so maintained that flies, insects, or vermin, rodent harborage, odors, ponded water, the accumulation of manure, garbage, refuse or other noxious material do not become a public health nuisance and do not disturb the peace, comfort, or health of any person.~~

~~2. Any person, firm, or corporation is prohibited from keeping or sheltering any animal, bird, or fowl other than a household pet within one hundred (100) feet of a building, other than his own, used for human habitation.~~

3. Pigs shall not be kept within the city limits.

E. PROPERTY DEVELOPMENT STANDARDS

1. MINIMUM LOT AREA: Ten thousand (10,000) square feet.

2. MINIMUM LOT WIDTH: One hundred (100) feet

3. MINIMUM SQUARE FOOTAGE OF DWELLING: Eight hundred and fifty (850) square feet of enclosed floor space exclusive of any attached garage.

4. MAXIMUM LOT COVERAGE: Not more than forty (40) percent of the net area of the lot may be covered by the main building and all accessory buildings.

5. YARDS:

a. Front Yard

1) There shall be a front yard not less than twenty (20) feet in depth.

2) Where lots have a double frontage on two (2) streets, the required front yard of twenty (20) feet shall be provided on both streets.

b. Side Yard

1) There shall be a side yard along interior lot lines of not less than ten (10) feet in width.

2) Where a side lot line abuts a street, there shall be a side yard of not less than twenty (20) feet in width.

c. Rear Yard

1) There shall be a rear yard of not less than twenty (20) feet in depth, except where the rear lot line is in common with or separated by an alley from the side lot line of another lot, there shall be a rear yard of not less than ten (10) feet in depth.

2) Where the rear lot line abuts an alley, the required rear yard shall be measured from the center line of the alley.

6. MAXIMUM BUILDING HEIGHT: No building shall exceed the height of twenty five (25) feet as defined in "building, height of". On slopes over forty-five percent (45%) there will be a one (1) foot reduction in height for each additional five percent (5%) of slope or portion thereof. Notwithstanding these provisions, no face of any building shall exceed thirty-five (35) feet above the low point of original grade as defined in "original grade". (see Appendix for diagrams).

7. ACCESSORY BUILDINGS

e. Accessory buildings shall be considered in determining yard, lot and area requirements.

f. Accessory buildings shall not be used for human habitation.

g. Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.

h. Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."

[Ord. No. 446]

F. GENERAL PROVISIONS

The provisions of Section 502 shall apply.

G. SIGNS

The provisions of Section 509 shall apply.

H. PARKING AND LOADING

The provisions of Section 510 shall apply.

I. PLAN REVIEW

The provisions of Section 303 shall apply.

~~**J. DESIGN REVIEW**~~

~~The provisions of Section 304 shall apply to all property, buildings and structures within the Historic Overlay District.~~

SECTION 504. "R1-10" ZONE, SINGLE FAMILY RESIDENTIAL

[CODIFIER'S NOTE: This subsection was rewritten with Ordinance 497 and moved to new Section 404.]

~~**A. PURPOSE**~~

~~This district is intended to promote and preserve low density residential development. Regulations and property development standards are designed to protect the single-family residential character of the district and to prohibit all incompatible activities. Land use is composed chiefly of individual homes, together with required recreational, religious and educational facilities.~~

~~**B. PERMITTED USES**~~

~~1. One (1) single-family dwelling or one (1) modular home per lot. Mobile homes are prohibited.~~

~~2. Customary accessory uses and buildings provided such uses are incidental to the principal use.~~

~~3. Temporary buildings for uses incidental to construction work, which buildings shall be removed upon completion of or abandonment of the construction work.~~

~~4. Publicly owned and operated parks and recreation areas and centers.~~

~~5. Home Occupations.~~

~~**C. CONDITIONAL USES**~~

~~1. Churches or similar places of worship.~~

~~2. Schools: Public or private elementary and high.~~

~~3. Colleges, universities, and professional schools having a regular curriculum.~~

~~4. Nursery Schools and Day Care Centers.~~

~~5. Public buildings other than hospitals.~~

~~6. Public utility buildings, structures, or appurtenances thereto for public service use.~~

~~7. Libraries.~~

~~8. Model Homes.~~

~~9. Bed and Breakfast~~

~~10. Beekeeping~~

~~[Ord. No. 474]~~

~~**D. PROPERTY DEVELOPMENT STANDARDS**~~

~~1. MINIMUM LOT AREA: Ten thousand (10,000) square feet~~

~~2. MINIMUM LOT WIDTH: One hundred (100) feet~~

~~3. MINIMUM SQUARE FOOTAGE OF DWELLING: Eight hundred and fifty (850) square feet of enclosed floor space exclusive of any attached garage.~~

~~4. MAXIMUM LOT COVERAGE: Not more than forty (40) percent of the net area of the lot may be covered by the main building and all accessory buildings.~~

~~5. Yards:~~

~~a. Front Yard:~~

~~1) There shall be a front yard of not less than twenty (20) feet in depth.~~

~~2) Where lots have a double frontage on two (2) streets, the required front yard of twenty (20) feet shall be provided on both streets.~~

~~b. Side Yard:~~

3) There shall be a side yard along interior lot lines of not less than ten (10) feet in width.

4) Where a side lot line abuts a street, there shall be a side yard of not less than twenty (20) feet in width

c. Rear Yard:

5) There shall be a rear yard of not less than twenty (20) feet in depth, except where the rear lot line is in common with or separated by an alley from the side lot line of another lot, there shall be a rear yard of not less than ten (10) feet in depth.

6) Where the rear lot line abuts an alley, the required rear yard shall be measured from the center line of the alley.

6. MAXIMUM BUILDING HEIGHT: No building shall exceed the height of twenty five (25) feet as defined in "building, height of." On slopes over forty five (45) percent there will be a one (1) foot reduction in height for each additional five (5) percent of slope or portion thereof. Notwithstanding these provisions, no face of any building shall exceed thirty five (35) feet above the low point of original grade as defined in "original grade." (see Appendix for diagrams).

7. ACCESSORY BUILDINGS

a. Accessory buildings shall be considered in determining yard, lot, and area requirements.

b. Accessory buildings shall not be used for human habitation.

c. Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.

d. Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."

[Ord. No. 446]

E. GENERAL PROVISIONS

The provisions of Section 502 shall apply.

F. SIGNS

The provisions of Section 509 shall apply.

G. PARKING AND LOADING

The provisions of Section 510 shall apply.

H. PLAN REVIEW

The provisions of Section 303 shall apply.

I. DESIGN REVIEW

The provisions of Section 304 shall apply to all property, buildings, and structures within the Historic Overlay District.

SECTION 505. "R1-5" ZONE, SINGLE FAMILY RESIDENTIAL

[CODIFIER'S NOTE: This subsection was rewritten with Ordinance 497 and moved to new Section 405.]

~~**A. PURPOSE**~~

~~This district is intended to fulfill the need for medium density single family residential development. Regulations and property development standards are designed to protect the single family residential character of the district and to prohibit all incompatible activities. Land use is composed chiefly of individual homes, together with required recreational, religious, and educational facilities.~~

~~**B. PERMITTED USES**~~

~~1. One (1) single-family dwelling or one (1) modular home per lot. Mobile homes are prohibited.~~

~~2. Customary accessory uses and buildings, provided such uses are incidental to the principal use.~~

~~3. Temporary buildings for uses incidental to construction work, which buildings shall be removed upon completion of or abandonment of the construction work.~~

~~4. Publicly owned and operated parks and recreation areas and centers.~~

~~5. Home occupations.~~

~~**C. CONDITIONAL USES**~~

~~1. Churches or similar places of worship.~~

~~2. Schools: Public or private elementary and high.~~

~~3. Colleges, universities, and professional schools having a regular curriculum.~~

~~4. Nursery Schools and Day Care Centers.~~

~~5. Public buildings.~~

~~6. Public utility buildings, structures, or appurtenances thereto for public service use.~~

~~7. Libraries.~~

~~8. Model homes~~

~~9. Bed and Breakfast~~

~~10. Beekeeping~~

~~[Ord. No. 474]~~

~~**D. PROPERTY DEVELOPMENT STANDARDS**~~

~~1. MINIMUM LOT AREA: Five thousand (5,000) square feet.~~

~~2. MINIMUM LOT WIDTH: Fifty (50) feet.~~

~~3. MINIMUM SQUARE FOOTAGE OF DWELLING: Eight hundred and fifty (850) square feet of enclosed floor space exclusive of any attached garage.~~

~~4. MAXIMUM LOT COVERAGE: Not more than sixty (60) percent of the net area of the lot may be covered by the main building and all accessory buildings.~~

~~5. Yards:~~

~~a. Front Yard:~~

~~7) There shall be a front yard of not less than ten (10) feet in depth except when the following conditions prevail:~~

8) A front yard is required equal to that established by any building within one hundred (100) feet on either or both sides of the lot. Where more than one (1) such building is within one hundred (100) feet of the lot then the front yard of the nearest such building shall be the required front yard of the lot, except that where the lot is between two such buildings, each within one hundred (100) feet of a lot, then the front yard of this lot shall be that established by a line joining the nearest front corner of the other such building. Nothing in the above shall require that a front yard in this district exceed twenty (20) feet.

9) Where lots have a double frontage on two (2) streets, the required front yard shall be provided on both streets.

b. Side Yard:

10) There shall be a side yard along interior lot lines of not less than five (5) feet in width.

11) Where a side lot line abuts a street, the side yard shall be considered a front yard for the purpose of determining width.

c. Rear Yard:

12) There shall be a rear yard of not less than twenty (20) feet in depth. Except where the rear lot line is in common with or separated by an alley from the side lot line of another lot, there shall be a rear yard of not less than ten (10) feet in depth.

13) Where the rear lot line abuts an alley, the required rear yard shall be measured from the center line of the alley.

6. MAXIMUM BUILDING HEIGHT: No building shall exceed the height of twenty five (25) feet as defined in "building, height of." On slopes over forty-five (45) percent there will be a one (1) foot reduction in height for each additional five (5) percent of slope or portion thereof. Notwithstanding these provisions, no face of any building shall exceed thirty-five (35) feet above the low point of original grade as defined in "original grade". (see Appendix for diagrams).

7. ACCESSORY BUILDINGS

a. Accessory buildings shall be considered in determining yard, lot and area requirements.

b. Accessory buildings shall not be used for human habitation.

c. Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.

d. Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."

[Ord. No. 446]

E. GENERAL PROVISIONS

The provisions of Section 502 shall apply.

F. SIGNS

The provisions of Section 509 shall apply.

G. PARKING AND LOADING

The provisions of Section 510 shall apply.

H. PLAN REVIEW

The provisions of Section 303 shall apply.

I. DESIGN REVIEW

The provisions of Section 304 shall apply to all property, buildings and structures within the Historic Overlay District.

SECTION 506. "R-2" ZONE, SINGLE- AND TWO-FAMILY RESIDENTIAL

[CODIFIER'S NOTE: This subsection was rewritten with Ordinance 497 and moved to new Section 406.]

~~**A. PURPOSE**~~

~~This district is intended to fulfill the need for medium density residential development regulations and property development standards are designed to allow maximum flexibility and variety in residential development while prohibiting all incompatible activities. Land use is composed chiefly of single- and two-family homes, together with required recreational, religious, and educational facilities.~~

~~**B. PERMITTED USES**~~

~~1. One (1) single-family dwelling or one (1) two-family dwelling or one (1) modular home per lot. Mobile homes are prohibited.~~

~~2. Customary accessory uses and buildings, provided such uses are incidental to the principal use.~~

~~3. Temporary buildings for uses incidental to construction work, which buildings shall be removed upon completion of or abandonment of the construction work.~~

~~4. Publicly owned and operated parks and recreation areas and centers.~~

~~5. Home occupations.~~

~~**C. CONDITIONAL USES**~~

~~Any conditional use in the R1-5 zone.~~

~~**D. PROPERTY DEVELOPMENT STANDARDS**~~

~~1. MINIMUM LOT AREA: Five thousand (5,000) square feet.~~

~~2. MINIMUM LOT WIDTH: Fifty (50) feet.~~

~~3. MINIMUM SQUARE FOOTAGE OF DWELLING: Eight hundred and fifty (850) square feet of enclosed floor space exclusive of any attached garage.~~

~~4. MAXIMUM LOT COVERAGE: Not more than sixty (60) percent of the net area of the lot may be covered by the main building and all accessory buildings.~~

~~5. Yards:~~

~~d. a. Front Yard:~~

~~e. 1) There shall be a front yard of not less than ten (10) feet in depth except when the following conditions prevail:~~

~~f. A front yard is required equal to that established by any building within one hundred (100) feet on either or both sides of the lot. Where more than one such building is within one hundred (100) feet of the lot then the front yard of the nearest such building shall be the required front yard of the lot, except that where the lot is between two such buildings, each within one hundred (100) feet of a lot, then the front yard of this lot shall be that established by a line joining the nearest front corner of the other such building. Nothing in the above shall require that a front yard in this district exceed twenty (20) feet.~~

~~g. 2) Where lots have a double frontage on two (2) streets, the required front yard shall be provided on both streets.~~

~~h. b. Side Yard:~~

~~i. 1) There shall be a side yard along interior lot lines of not less than five (5) feet in width.~~

j. 2) Where a side lot line abuts a street, the side yard shall be considered a front yard for the purpose of determining width.

k. e. Rear Yard:

l. 1) There shall be a rear yard of not less than twenty (20) feet in depth. Except where the rear lot line is in common with or separated by an alley from the side lot line of another lot, there shall be a rear yard of not less than ten (10) feet in depth.

m. 2) Where the rear lot line abuts an alley, the required rear yard shall be measured from the center line of the alley.

6. MAXIMUM BUILDING HEIGHT: No building shall exceed the height of twenty five (25) feet as defined in "building, height of." On slopes over forty-five (45) percent there will be a one (1) foot reduction in height for each additional five (5) percent of slope or portion thereof. Notwithstanding these provisions, no face of any building shall exceed thirty-five (35) feet above the low point of original grade as defined in "original grade". (see Appendix for diagrams).

7. ACCESSORY BUILDINGS

a. Accessory buildings shall be considered in determining yard, lot and area requirements.

b. Accessory buildings shall not be used for human habitation.

c. Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.

d. Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."

[Ord. No. 446; Ord. No. 454]

E. GENERAL PROVISIONS

The provisions of Section 502 shall apply.

F. SIGNS

The provisions of Section 509 shall apply.

G. PARKING AND LOADING

The provisions of Section 510 shall apply.

H. PLAN REVIEW

The provisions of Section 303 shall apply.

I. DESIGN REVIEW

The provisions of Section 304 shall apply to all property, buildings and structures within the Historic Overlay District.

SECTION 507. "C–1" ZONE, GENERAL COMMERCIAL

[CODIFIER'S NOTE: This subsection was rewritten with Ordinance 497 and moved to new Section 407.]

~~**A. PURPOSE**~~

~~This district is intended to provide for and encourage orderly development in existing and future commercial areas within the Town.~~

~~**B. PERMITTED USES**~~

~~1. Retail sales of apparel and accessories, dry goods, foods, drugs, flowers and plants, garden supplies, hardware, gifts and novelties, pet and hobby supplies, art and art supplies, jewelry, liquor, tobacco, newspapers and magazines, music and records, household supplies, stationary, books, paint, wallpaper and glass, sporting goods, toys, variety store goods, appliances, auto parts and supplies, furniture, office supplies, leather and leather products, carpet, antiques, fabrics, photo supplies, second hand and used goods and similar convenience goods.~~

~~2. Repair services such as, but no more objectionable or intensive in character than, watches, jewelry, shoes, locksmith, minor household appliances.~~

~~3. Personal services such as: barbers, beauty shops, health clubs, laundries and cleaners, mortuaries.~~

~~4. Hotels.~~

~~5. Establishments serving food or beverages inside a building such as: restaurants, cafes, coffee shops, bars, taverns, cocktail lounges, excluding entertainment and dancing in connection therewith.~~

~~6. Manufacturing incidental to a permitted use is permitted, but subject to the following limitations:~~

~~a. All products incidental to a permitted use which are manufactured or processed on the premises shall be sold at retail only and on the premises only.~~

~~b. Such manufacturing activity shall be restricted to not over fifty (50) percent of the ground floor area of the building allocated to the permitted use.~~

~~7. Pawn shops.~~

~~8. Printers and print shops.~~

~~9. Radio and TV studios provided that no masts, towers, or antenna used for transmission or broadcasting purposes are erected on the premises.~~

~~10. Banks, stock brokerage firms, savings and loan associations, loan companies, and credit unions.~~

~~11. Governmental services, public utility offices and exchanges, excluding storage or repair services.~~

~~12. Offices related to any of the following occupations: executive, administrative, professional, accounting, banking, writing, clerical, stenographic, graphic art, real estate, and sales.~~

~~13. Medical and dental offices and clinics.~~

~~14. Establishments primarily supplemental in character to other permitted principal uses, such as: pharmacy, apothecary shop, sales of corrective garments, prosthetic devices, and optical goods, and medical and dental laboratories.~~

~~15. Establishments whose principal function is basic research, design, and pilot or experimental product development, when conducted within an a completely enclosed building.~~

~~16. Business and trade schools, dancing, art, and music schools and studios.~~

~~17. Headquarters buildings of charitable, philanthropic, and welfare organizations, provided that their primary activities are administrative and clerical rather than residential in nature.~~

18. Accessory buildings, structures and other uses customarily incidental to a permitted use except as otherwise provided in this Ordinance.

19. Any other such uses as determined by the Planning and Zoning Commission and approved by the Town Council to be similar to those uses listed above and not detrimental to the public health, safety and general welfare in accordance with the provisions of this Ordinance.

[Ord. No. 293; Ord. No. 465]

C. CONDITIONAL USES

1. Any "Permitted" or "Conditional" Uses in the "R1-10", "R1-5" or "R-2" Zones.

2. Establishments serving food or beverages for consumption on the premises, but outside of an enclosed building.

3. Establishments serving food or beverages which include entertainment or dancing.

4. Temporary outdoor sales, displays and other outdoor activities.

5. Indoor commercial recreation establishments, such as bowling alleys, billiard parlors, skating rinks and similar establishments.

6. Outdoor commercial recreation establishments.

7. Indoor theaters, assembly halls, ballrooms and similar places of assembly.

8. Taxi stands, bus stops, parking lots and garages.

9. Gas service stations.

10. Outdoor sales of nursery stock.

11. Pet shops.

12. Any such other uses as determined by the Planning and Zoning Commission and approved by the Town Council to be similar to those uses listed above and not detrimental to the public health, safety and general welfare in accordance with the provisions of this Ordinance.

13. Residential use of a building, including apartment houses, when in the opinion of the Planning and Zoning Commission, said use has little or no adverse effect on the public health, safety and general welfare. Residential use with historic precedence in the subject buildings are exempt from the well-being criteria but remain subject to nonconforming use clauses.

14. Hospitals, nursing homes and convalescent homes.

15. Spirituous Liquor Tasting Facilities.

[Ord. No. 293; Ord. No. 408; Ord. No. 454; Ord. No. 465]

D. ZONE RESTRICTIONS

1. All activities, except as otherwise addressed herein, shall be conducted entirely within enclosed buildings.

2. Outdoor storage or display of goods or materials shall be prohibited.

3. Warehousing or indoor storage of goods or materials, exceeding that normally incidental to permitted uses, shall be prohibited.

[Ord. No. 293]

E. PROPERTY DEVELOPMENT STANDARDS

1. MINIMUM LOT AREA: None, provided all other provisions of the ordinance are met.

2. MINIMUM LOT WIDTH: None, provided all other provisions of the ordinance are met.

3. MINIMUM SQUARE FOOTAGE OF MAIN BUILDING: None, provided all other provisions of the Ordinance are met.

4. MAXIMUM LOT COVERAGE: None provided all other provisions of the ordinance are met.

5. YARDS:

a. Front Yard:

1) There shall be a front yard of not less than ten (10) feet in depth except when the following conditions prevail:

The front yard is required equal to that established by any commercial building within one hundred (100) feet on either or both sides of the lot. Where more than one such building is within one hundred (100) feet of the lot then the front yard of the nearest such building shall be the required front yard of the lot, except that where the lot is between two (2) such buildings, each within one hundred (100) feet of a lot, then the front yard of this lot shall be that established by a line joining the nearest front corner of the other such building. Nothing in the above shall require that a front yard in this district exceed twenty (20) feet.

Where lots have a double frontage on two (2) streets, the required front yard shall be provided on both streets.

b. Side Yard:

1) Where the side lot line is in common with the side lot line of a property in a commercial or industrial zone, no side yard shall be required on that side.

2) Where a side lot line abuts a street, the side yard shall be considered a front yard for the purpose of determining width.

3) Where the side lot line is in common with the side lot line of a property in a residential zone, the side yard requirements of the residential zone shall apply to that side yard, provided nothing shall require such a side yard to be greater than ten (10) feet in width.

c. Rear Yard:

1) There shall be a rear yard of not less than twenty (20) feet in depth, except where the rear lot line is in common with or separated by an alley from the side lot line of a lot in a commercial or industrial zone, there shall be a rear yard of not less than ten (10) feet in depth.

2) Where the rear lot line abuts an alley, the required rear yard shall be measured from the centerline of the alley.

6. MAXIMUM BUILDING HEIGHT: The maximum building height shall not exceed the height of twenty-five (25) feet except when the following conditions prevail:

a. The maximum building height shall not exceed that established by any building within one hundred (100) feet on either or both sides of the lot. Where more than one such building is within one hundred (100) feet of the lot, then the maximum building height of the nearest such building shall be the maximum building height of the lot. Except that where the lot is between two (2) such buildings, each within one hundred (100) feet of the lot, then the maximum building height of the center of this lot shall be that established by a line joining the highest point of the other such buildings. Nothing in the above shall require that the maximum building height in this district be less than twenty-five (25) feet. (see Appendix for diagrams).

b. Notwithstanding these provisions, no face of any building shall exceed thirty-five (35) feet above the low point of original grade as defined in "original grade."

7. ACCESSORY BUILDINGS

a. Accessory buildings shall be considered in determining yard, lot, and area requirements.

b. Accessory buildings shall not be used for human habitation.

c. Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.

d. Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."

[Ord. No. 446]

F. GENERAL PROVISIONS

The provisions of Section 502 shall apply.

G. SIGNS

The provisions of Section 509 shall apply.

H. PARKING AND LOADING

The provisions of Section 510 shall apply.

I. PLAN REVIEW

The provisions of Section 303 shall apply.

J. DESIGN REVIEW

The provisions of Section 304 shall apply to all property, buildings, and structures within the Historic Overlay District.

SECTION 508. "I-1" ZONE, LIGHT INDUSTRIAL

[CODIFIER'S NOTE: This subsection was rewritten with Ordinance 497 and moved to new Section 408.]

~~**A. PURPOSE**~~

~~This district is intended to provide for commercial, industrial, and manufacturing activities, while ensuring that these activities will in no manner affect in a detrimental way any of the surrounding districts.~~

~~**B. PERMITTED USES**~~

~~Any permitted use in the C-1 Zone.~~

~~**C. CONDITIONAL USES**~~

~~1. Any conditional use in the C-1 Zone.~~

~~2. Light industries such as, but no more objectionable or intensive in character than: jewelry, clothing, and furniture manufacturers.~~

~~3. Warehouses.~~

~~4. Wholesale establishments.~~

~~5. Automobile repair garages.~~

~~6. Accessory buildings, structures, and uses customarily incidental to a permitted use except as otherwise provided in this ordinance.~~

~~7. Any such other uses as determined by the Planning and Zoning Commission and approved by the City Council to be similar to those uses listed above and not detrimental to the public health, safety, and general welfare in accordance with the provisions of this Ordinance.~~

~~**D. ZONE RESTRICTIONS**~~

~~Same as C-1 Zone.~~

~~**E. PROPERTY DEVELOPMENT STANDARDS**~~

~~Same as C-1 Zone.~~

~~**F. PERFORMANCE STANDARDS**~~

~~Any permitted or conditional use in the I-1 zone must conform to the following performance standards. In conjunction with the plan review process, the developer-applicant shall provide to both the Zoning Administrator and the Planning and Zoning Commission data which are sufficient to show that the proposed use and the manner of its conduct will meet these performance standards.~~

~~1. NOISE: At no point on the property line shall the sound pressure level of any individual operation exceed the decibel levels in the designated octave bands shown below. (Excluding operation of motor vehicles or other transportation facilities.)~~

Octave band cycles per second	**Maximum sound pressure** level in decibels .0002 dynes per CM^2
0—75	72
75—150	67
150—300	59
300—600	52
600—1200	46
1200—2400	40
2400—4800	34
Above 4800	32

Sound levels shall be measured with a sound level meter and associated octave band filter manufactured according to standards prescribed by the American Standards Association. Measurements shall be made using the flat network of the sound level meter.

Impulsive type noises shall be subject to the performance standards provided that such noises shall be capable of being accurately measured with such equipment. Noise capable of being so measured, for the purpose of this section, shall be those noises which cause rapid fluctuations of the needle of the sound level meter with a variation of not more than plus or minus two (2) decibels. Noises incapable of being so measured, such as those of an irregular or intermittent nature, shall be controlled so as not to become a nuisance to adjacent uses.

2. SMOKE: No emission of smoke from any source shall be permitted to exceed a greater density than that density described as No. 1 on the Ringleman Chart. However, smoke may be emitted, which is equal to but not darker than No. 2 on the Ringleman Chart, for not more than four (4) minutes in any thirty (30) minute period. For the purpose of grading the density of smoke, the Ringleman Chart, as published by the U.S. Bureau of Mines shall be the standard.

3. GLARE OR HEAT: Any activity producing intense glare or heat shall be performed within a completely enclosed building in such a manner as not to create a nuisance or hazard along lot lines.

4. VIBRATION: No vibration shall be permitted which is discernible beyond the lot line to the human sense of feeling for three (3) minutes or more duration in any one (1) hour of the day between the hours of 7:00 a.m. to 7:00 p.m., or of thirty (30) seconds or more duration in any one (1) hour during the hours of 7:00 p.m. and 7:00 a.m.

5. FLY ASH, DUST, FUMES, VAPORS, GASES AND OTHER FORMS OF AIR POLLUTION: No emission shall be permitted which can cause damage to health, to animals, or vegetation, or other forms of property, or which can cause any excessive soiling.

6. LIQUIDS AND SOLID WASTE: No wastes shall be discharged in the public sewage system which endangers the normal operation of the public sewage system.

7. ODORS: No emission of odorous gases or other odorous matter shall be permitted in such quantities as to be offensive in such a manner as to create a nuisance or hazard beyond the property lines.

G. GENERAL PROVISIONS

The provisions of Section 502 shall apply.

H. SIGNS

The provisions of Section 509 shall apply.

I. PARKING AND LOADING

The provisions of Section 510 shall apply.

~~**J. PLAN REVIEW:**~~

~~The provisions of Section 303 shall apply.~~

~~**K. DESIGN REVIEW**~~

~~The provisions of Section 304 shall apply to all property, buildings, and structures within the Historic Overlay District.~~

SECTION 509. SIGNS

A. PURPOSE

This section provides a set of standards for the design and construction of signs within the Town of Jerome. The purpose of this section is to encourage the preservation of historic buildings and artifacts, to protect the general public from damage and injury, to protect property values, to preserve the beauty and unique character of Jerome, to aid in the free flow of traffic within the town, and to promote the tourist industry, which is important to the economy of Jerome, and the Historic Overlay District.

B. APPLICATION

The provisions of this section are applicable to all zone districts of this Ordinance.

C. DEFINITIONS

Within and for the purposes of this section, the following definitions, and only these definitions, apply.

1. Area – Sign area is calculated as the area within a continuous perimeter that encloses the limits of text and graphics of a sign, together with any frame or other material or color forming an integral part of the display or used to differentiate the sign's message from the background against which it is placed. The area excludes the structure upon which the sign is placed and sign supports.
2. Barber pole – a type of sign used by barbers to signify the place or shop where they perform their craft. The sign includes a staff or pole with a helix of colored stripes (usually red, white, and blue). The pole may be stationary or may rotate, often with the aid of an electric motor.
3. Billboard – Any free-standing sign exceeding fifty (50) square feet in surface area on any one face.
4. Clear vision triangle – A triangle-shaped zone formed by the existing or proposed curb lines of two or more intersecting streets, roads, or alleys and a third line connecting said curb lines at a distance of thirty (30) feet in each direction from the point of the curb line intersection, in order to provide vehicular traffic an unobstructed view of cross traffic at intersections. In locations without curbs, the edge of the drivable surface of the street or road shall be treated the same as a curb.
5. Flying banner – a flexible or rigid pole attached to one side of a flexible fabric, generally in the shape of a feather, used for the primary purpose of advertising or attention getting by the public display of visually communicative images. Such banners are also known and sold under names that include, but are not limited to, "quill sign," "wing banner," "banana banner," "blade banner," "flutter banner," "flutter flag," "bowflag," "teardrop banner," and others. The definition includes functionally similar display devices.
6. Mannequin/skeleton/statue – a styled and three-dimensional representation of the human form.
7. Mural – See definition for *Sign, Painted*.
8. Organization – An organized body of people with a particular non-profit or for-profit purpose, such as a society, association, civic or charitable group.
9. Sign – An object meant to convey a message through the use of words or symbols. A sign can be painted on one or multiple surfaces, be freestanding, supported by a pole or attached to a building. All exterior signs, whether public or private, are regulated by this ordinance.
10. Sign, A-frame – A temporary, movable, freestanding sign placed on but not permanently anchored in the ground. This definition includes T-frame signs and other similar temporary signs. A-frame signs are typically constructed of wood, cardboard, plastic, or other lightweight and rigid material, and are often referred to as sandwich boards.

11. ~~Sign, Balloon – any sign painted onto or otherwise attached to or suspended from a balloon, whether anchored or affixed to any portion of the premises or tethered to and floating above any portion of the premises.~~ Sign, Aerial – A balloon or other airborne flotation device which is tethered to the ground or to a building or other structure that directs attention to a business, commodity, service, or entertainment conducted, sold, or offered.

12. Sign, Animated or Moving – Any sign or part of a sign which changes physical position or light intensity by any movement or rotation or that gives the appearance of such movement or rotation.

13. Sign, Awning – A sign that is mounted, painted, or otherwise applied on or attached to an awning or other fabric, plastic, or structural protective cover over a door, entrance, or window of a building. A marquee or a canopy is not an awning.

14. Sign, Back-lit – An indirect source of light which illuminates a sign by shining through a translucent surface of a sign, including plastic signs, lit from an internal light source.

~~11.~~15. Sign, Banner – A sign of lightweight fabric or similar nonridged material that is mounted with no enclosing framework.

~~12.~~16. ~~Sign, Banner – A sign made of fabric or similar material with no enclosing framework that is mounted to a building or structure (Does not include a flying banner).~~ Sign, Bench – A bench or similar device containing either off-premise or on-premise advertising.

~~13.~~17. ~~Sign, Canopy – A sign mounted or painted on a canopy or awning.~~Sign, Canopy – A sign that is mounted, painted, or otherwise applied on or attached to a freestanding canopy or structural protective cover over an outdoor service area. An awning or a marquee is not a canopy.

18. Sign, Changeable-Copy – A sign, or portion thereof, with characters, letters, or illustrations that can be changed or rearranged manually without altering the face or surface of the sign. Examples include whiteboards, chalkboards, and menu boards.

19. Sign, Commemorative – A sign, tablet, or plaque commemorating or memorializing a person, event, structure, or site.

20. Sign, Construction -A temporary sign providing information about future development or current construction on a site and the parties involved in the project.

~~14.~~21. Sign, Direct Illumination – A sign whose light source is either located in the interior of the sign so that the rays go through the face of the sign, or which is attached to the face of the sign and is perceived as a design element of the sign.

22. ~~Sign, Directional – An exterior sign that indicates whether a business is open or closed or directs people to a particular entrance of a building.~~ Sign, Directional – Signs limited to providing directions necessary or convenient for visitors or clients coming onto a premises including signs marking entrances and exits, parking areas, loading zones, or circulation direction.

23. Sign, Directory – A sign, other than an identification sign, listing the names, uses, or locations of the various businesses or activities conducted within a building or group of buildings, that is centrally located and intended to provide on-site directions.

24. Sign, Electronic Message Board – Signs whose alphabetic, pictographic, or symbolic informational content can be changed or altered on a fixed display screen composed of electrically illuminated segments.

~~15.~~25. Sign, Fascia – A single-faced sign attached flush to a building.

~~16.~~26. Sign, Freestanding – A sign not attached to or supported by a building.

~~17.~~27. Sign, Gas-generated – Gas-generated signs or signs illuminated by gas-generated lighting.

28. Sign, Height – The vertical distance from the ground directly under the sign to the highest point of the sign.

29. Sign, Holiday Decoration – Temporary seasonal signs, in the nature of decorations, clearly incidental to and customarily associated with nationally recognized holidays and which contain no advertising message.

30. Sign, Home Occupation – A sign listing only the name or occupation of a permitted home occupation.

~~18.~~31. Sign, Indirect Illumination – Illumination of a sign that is effected by a source of light not contained within the sign itself.

32. Sign, Interior – Signs within a building not visible from outside. Interior signs are not regulated by this ordinance.

33. Sign, Marquee – A roof-like structure of a permanent nature that projects from the wall of a building or its supports and may overhang the public way.

34. Sign, Monument – A freestanding sign supported primarily by an internal structural framework or integrated into landscaping or other solid structural features other than support poles.

~~19.~~35. Sign, Multitenant – An identification sign for a commercial site with multiple tenants, displaying the names of each tenant on the site.

~~20.~~36. Sign, Nameplate - A sign typically used to identify the business or residents of the premises, not exceeding 2 by 12 inches (2" x 12").

~~21.~~37. Sign, Off-premise – A permanent or temporary sign not located on the premises of the business that it advertises.

~~22.~~38. Sign, On-premise – A permanent or temporary sign located on the premises of the business that it advertises, referring exclusively to the name, location, products, persons, accommodations, services, or activities of or on those premises, or the sale or lease of those premises.

~~23.~~39. Sign, Open/Closed – An exterior sign that indicates whether a business is open or closed.~~See definition of *Sign, Directional.*~~

~~24.~~40. Sign, Painted – A sign painted directly on the building façade.

~~25.~~41. Sign, Permanent – A sign permanently attached to a structure or affixed to the ground. Includes *Wall Signs, Free standing Signs, Projecting Signs, Painted Signs, and Barber poles.* Permanent signs are intended to advertise or call attention to any item, business, activity, or place; are visible from outside a building; and are intended to be in place for longer than thirty days.

42. Sign, Projecting – A mounted sign that projects from and is supported by a wall of a building.

~~26.~~43. Sign, Real Estate – A temporary sign that relates to the sale, lease, or rental of property or buildings, or to construction activities on a site.

44. Sign, Service – An interior sign whose purpose is not to advertise the business displaying the sign, but to inform or provide for the safety of the public. Signs such as credit card placards, and "No Smoking" signs are examples of service signs.

45. Sign, Shingle – A sign suspended from and located entirely under a covered porch, covered walkway, or an awning.

~~27.~~46. Sign, Statuary – Any sign which is a modeled or sculptured likeness of a living creature or inanimate object intended to be used as an advertising device.

~~28.~~47. Sign, Temporary – A sign not permanently attached to a structure or to the ground. Examples of temporary signs include garage sale signs, temporary sale signs, contractor signs, banner signs, A-frame signs, T-frame signs, candidate signs, and real estate signs. Temporary signs shall only be displayed for a limited period. The definition of *temporary sign* does not include flags.

~~29.~~48. Sign Walker – A person (or persons) waving "sales theme signs" with arrows at entrances to major highways or at corners of high traffic intersections directing customers to a sale. Also called sign twirlers, sign holders, human billboards, and sign events.

49. Sign, Wall - A sign attached flush to the exterior surface of a building, or permanently applied to the exterior of a window of a building. The sign must not project above the roof. Light sources aimed at the wall sign may project further out from the wall.

~~30.~~50. Sign, Window – A sign affixed to the interior or exterior of a window or placed immediately behind a window pane so as to attract the attention of persons outside the building.

[Ord. No. 457; Ord. No. 472; Ord. No. 478]

D. APPLICABILITY

The provisions of this section shall apply to all signs placed or maintained within the Town of Jerome, with the exception of the following:

1. Non-illuminated names of buildings, dates of erection, monument citations, commemorative tablets and the like when carved into stone, concrete, metal, or any other permanent type construction and made an integral part of a permitted structure or made flush to the ground.
2. Signs required by law or signs of a duly constituted governmental body, such as traffic signs, warning signs, or no trespassing signs.
3. Signs placed by a public utility for the safety, welfare, or convenience of the public, such as signs identifying high voltage, public telephone, or underground cables.
4. Notices regarding parking, directions, or trespassing on private property.
5. Signs upon a vehicle, provided that any such vehicle is actively used for bona fide delivery or other business purposes.
6. Bumper stickers on a vehicle.
7. Temporary signs for town-sponsored or co-sponsored events.

[Ord. No. 457; Ord. No. 478]

E. PERMITS

1. A sign permit shall be required before a permanent sign may be placed, constructed, re-constructed, or altered within the Town of Jerome, with the exception of the following:
   a. A-frame signs which are on private property (see additional standards regarding A-frame signs in paragraph G.9 of this Section).
   b. Changeable-Copy Signs.
   c. Directional Signs.
   d. Exterior temporary signs in the residential districts.
   e. Name-plate signs and business door identifiers not exceeding two -by twelve inches (2" x 12").
   f. Repainting or maintenance of signs, provided there is no change in size, shape, wording, composition, or color.
   g. Signs not permanently affixed to a window and located entirely within an enclosed building.

2. An application for a permanent sign permit shall be filed with the Zzoning Aadministrator on a form prescribed by the zoning department and shall be accompanied by the required number of copies. Each copy shall be on one or more sheets of paper measuring no larger than 24 by 36 inches drawn to scale, which shall show the following:
   a. Signature of the applicant.
   b. The name and address of the sign owner and sign erector.
   c. Drawings showing the design, dimensions, color, material, and structure of the sign.
   d. A drawing or photograph of the building facade indicating the proposed location of the sign, and all other existing signs maintained on the premises and regulated by this ordinance.
   e. Proposed method of lighting the sign.
   f. Any additional information that the Historic Preservation/Design Review Board may require in order to decide on the application, in accordance with Section 304.H.4 of the Zoning Ordinance.
   g. Payment of a nonrefundable, one-time filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the offices of the town clerk. Applicant may resubmit a modified plan without paying an additional fee. Payment of the filing fee shall be waived when the applicant is an agent of the town, county, state, or federal government.
3. Plan Review

   The ~~z~~Zoning ~~a~~Administrator shall review and accept completed plans in accordance with the provisions of Section 304. These plans shall be placed on the agenda of the next Historic Preservation/Design Review Board meeting.
4. Design Review

   The Historic Preservation/Design Review Board shall, in accordance with the provisions of Section 304, deny, approve, or conditionally approve any application for a sign permit. Upon approval of an application by the Historic Preservation/Design Review Board, the ~~z~~Zoning ~~a~~Administrator shall be instructed to issue the sign permit.
5. The Historic Preservation/Design Review Board may waive the requirements of this section in order to allow the preservation or restoration of signs or commercial graphics determined to be of historical significance.

[Ord. No. 457; Ord. No. 472; Ord. No. 478]

F. REGULATIONS APPLICABLE TO SIGNS IN ALL ZONES

1. The design, color, shape, materials, and style of permanent signs shall be subject to review and approval of the Historic Preservation/Design Review Board.
2. All signs shall be constructed, designed, or attached to structures in conformance with the building code adopted by the Town of Jerome.
3. No sign, mannequin, skeleton or statue shall be constructed or placed in the clear vision triangle, erected or lit in such a manner as to interfere in any way with the flow of traffic on the public right of way, or present a traffic hazard.
4. No sign or mannequin/skeleton/statue shall be constructed or placed in such a manner as to interfere with pedestrian traffic on public or private walkways, stairs, and/or handrails.
5. Freestanding signs shall not exceed four (4) feet in height.
6. Organizations as defined herein are allowed temporary signs without a permit or review for temporary special event banners or signs. Banners for special events must be removed within three (3) days of the close of any event and may not be hung on Town property without

permission of the Town of Jerome. The town manager may approve special event banners to be hung on town property for recurring events. Banners to be hung on town property for first-time events shall be approved by the town council.

7. Lighting shall be directed at the sign from an external light source and shall be installed so as to avoid any glare or reflection into any adjacent property, or onto a street or alley so as to create a traffic hazard. These restrictions shall apply to internally lighted signs, which may be allowed if constructed of metal or wood. No internally lit signs that are constructed of acrylic or plastic are allowed. No sign that flashes or blinks shall be permitted outside. No visible bulbs, neon tubing, or luminous paints shall be permitted as part of any sign.
8. Any existing nonconforming, permanent sign legally constructed or permitted prior to the adoption of this ordinance may be continued in use; if such a sign is damaged, it may be restored or repaired. If a new sign is constructed, it must conform to the provisions of this Section 509 and Section 501.
9. Signs shall be removed within thirty (30) days of business relocation or closure.
10. If any sign becomes a danger to the public or becomes deteriorated or is abandoned, the property owner or owner of the sign shall be notified to remove or repair the sign. If they do not comply within ten (10) days, the zoning administrator shall have the sign removed and the cost assessed to the owner of the property on which such sign is located.
11. Painted Signs. Painted signs shall be subject to review by the Historic Preservation/Design Review Board in accordance with Section 304.H.4 of the Zoning Ordinance. The maximum number and area of painted signs shall be subject to the same restrictions and standards as other permanent signs.
12. Flags. Unless otherwise required by state law or specified in this article, no more than two (2) flags may be displayed on a flagpole, from a flag bracket, or on a flag stanchion. Examples of flags include, but are not limited to, the insignia of any nation, organization of nations, state, province, county, city; any religious, civic, or fraternal organization, or educational institution. The area of each flag shall not exceed sixteen (16) square feet, and the height of the flag shall be no taller than the building to which it is attached. For the purpose of determining the area of a flag, only one side of the flag shall be counted. Flags may be externally illuminated. A sign permit is not required for a flag.

[Ord. No. 457; Ord. No. 472; Ord. No. 478]

G. REGULATIONS APPLICABLE TO SIGNS IN RESIDENTIAL ZONES

1. One nameplate sign not exceeding 2 by 12 inches indicating the names of the occupants or business, and one set of numbers ~~4~~ 4 by 12 inches indicating the street address shall be allowed for each dwelling unit without a permit.
2. One nonilluminated sign not exceeding eight (8) square feet in area shall be allowed on premises only to identify a home business and requires a permit and review by the Historic Preservation/Design Review Board. A two-sided sign is one sign.
3. No sign shall extend above the eaves line of a building or extend higher than ten (10) feet above the ground directly below it.
4. Temporary signs shall be permitted in the residential zones without a permit, subject to the following provisions:
   a. The sum area of all temporary signs does not exceed five (5) square feet in size.
   b. If the temporary sign pertained to an event (such as an open house or garage sale), the sign shall be removed within three (3) days of the completion of the event or activity that is being advertised.

c. Signs shall maintain a minimum setback from the right of way of ten (10) feet, unless there is a primary structure on the lot located closer to the right of way than ten (10) feet, in which case the sign may be placed at the same setback as the primary structure.

d. The maximum height of a temporary sign is four (4) feet.

e. Signs shall not be illuminated.

[Ord. No. 457; Ord. No. 472; Ord. No. 478]

H. REGULATIONS APPLICABLE TO SIGNS IN COMMERCIAL AND INDUSTRIAL ZONES

1. No more than two (2) permanent signs are permitted for any one business except that a business having frontage on and physical access from two (2) or more streets will be allowed a total of three (3) signs.
2. The maximum area of all permanent signs shall not exceed 32 square feet.
3. The area of any single wall, projecting, freestanding or canopy sign shall not exceed 16 square feet.
4. No sign shall extend above the roof of the building to which it is attached.
5. The bottom of any projecting sign shall be no lower than 8 feet above the ground directly below it.
6. No part of any projecting or freestanding sign may project over any roadway.
7. One (1) set of address numbers not exceeding 4 4 by 12 inches in total area shall be allowed in addition to normal sign allowances.
8. Temporary signs, which are promotional in nature and intended to advertise a specific event, activity, or business, are allowed in addition to other signs. Examples of temporary signs include, but are not limited to banner signs. Temporary signs must meet all restrictions for signs in this section in addition to the following:
   a. The sum area of all temporary signs shall not exceed sixteen (16) square feet.
   b. A maximum of one (1) temporary sign may be placed on the property.
   c. No business may display a temporary sign for more than thirty (30) consecutive days twice per calendar year.
   d. If the temporary sign pertained to an event (such as an open house or garage sale), the sign shall be removed within three (3) days of the completion of the event or activity which is being advertised.
   e. Temporary signs shall maintain a minimum setback from the right of way of three (3) feet, unless there is a primary structure on the lot which is located closer to the right of way than three (3) feet, in which case the sign may be placed at the same setback as the primary structure.
   f. Temporary signs require administrative approval from the zoning administrator. Applications shall be submitted on a form prepared by the zoning administrator and shall demonstrate compliance with the standards of this section.
   g. Application for a temporary sign shall include payment of a nonrefundable, one-time filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the offices of the town clerk. Payment of the filing fee shall be waived when the applicant is an agent of the town, county, state, or federal government.
   h. Temporary signs shall not be illuminated.
9. A-frame signs are allowed without a permit provided they meet the following requirements:

a. They do not exceed four (4) square feet in size.

b. They do not exceed four (4) feet in height.

c. They are located entirely on private property owned by the business that they are advertising.

d. They are not left outside during non-business hours.

10. Changeable-copy signs are allowed without a permit provided they do not exceed four (4) square feet in size and are attached to the façade of a building. A maximum of one sign per business is allowed.

11. Directional signs are permitted in addition to normal sign allowances. No more than two (2) directional signs are allowed with a maximum total area of eight8 square feet. Directional signs do not require a permit.

12. Service signs offering information on incidental services or recommendations, e.g., VISA, MasterCard, WiFi, etc., are permitted in addition to normal sign allowances provided:

e. They conform to all provisions contained in this section.

f. They are inside a window.

g. There is no more than one (1) sign per incidental service per public entrance to the business.

h. Each sign does not exceed 16 square inches in area.

[Ord. No. 457; Ord. No. 472; Ord. No. 478]

I. PROHIBITED SIGNS

1. Abandoned signs
2. Billboards
3. Digital or electronic signs with changeable copy
4. Flying banners
5. Flashing or blinking signs
6. Gas-generated signs
7. Inflatable and balloon signs
8. Mannequins/skeletons/statues displaying, wearing, or holding any advertising content such as flyers, business cards, or other promotional materials.
9. Moving and rotating signs – including rotating barber poles
10. Off-premise signs in the commercial or industrial zoning districts
11. Signs attached to or painted on trees, rocks or other natural features
12. Signs emitting any sound designed to attract attention
13. Signs in the clear vision triangle
14. Signs in the right-of-way
15. Signs blocking pedestrian pathways, stairs, or handrails
16. Signs painted on fences
17. Sign walkers
18. Signs with visible bulbs or luminous paints

[Ord. No. 472; Ord. No. 478]

SECTION 510. PARKING AND LOADING REQUIREMENTS

A. PURPOSE

The purpose of this section is to alleviate or prevent congestion of the public streets, and to promote the safety and welfare of the public by establishing minimum requirements for the off-street parking of motor vehicles in accordance with the use to which the property is put, It is the further purpose of this section to place upon the property owner the primary responsibility for relieving public streets of the burden of on-street parking.

B. APPLICATION

The provisions of this section are applicable to all zone districts of this Ordinance.

~~B.~~C. GENERAL REGULATIONS

1. A parking space shall mean an area of not less than one hundred sixty (160) square feet with a minimum width of eight (8) feet and a minimum depth of twenty (20) feet, which is specifically designated for and used for the parking of automobiles and light trucks.
2. An applicant for a new building permit must submit plans showing the off-street parking required by this subsection. These plans must show location, arrangement, and dimensions of the off-street parking, turning spaces, drives, aisles, and ingress and egress, and must be approved by the Zoning Administrator in accordance with the provisions of Section 303.
3. Whenever a permit has been issued in compliance with the requirements of this section, subsequent use of the structure, or use of land, is conditioned upon the unqualified availability of off-street parking as shown in the plans submitted in support of ~~prerequisite to~~ receiving the permit.
4. A base number of parking spaces shall be established for an existing building's designated use~~,~~ at the time of the passage of thise o Ordinance. A building's subsequent change of use that would normally decrease the number of off-street parking spaces shall not reduce the established base number of parking spaces. A change of use that would decrease the parking spaces would be able to change back to a higher use without penalty of losing spaces for five (5) years. Any subsequent change of use that requires an increase of off street parking spaces beyond the established base number of parking spaces shall be in accordance with the schedules set forth in Section 510.D.
5. It is unlawful to reduce the amount of existing parking below the minimum required by this section without first supplying other spaces as are required.
6. In the event of mixed uses, the total requirement for off-street parking spaces is the sum of the requirements of the various uses computed separately.
7. All off-street parking shall have access to/from a public street.
8. In calculating the total number of required off-street parking spaces, fractional amounts over fifty (50) percent shall be regarded as the next highest number.
9. A minimum of one (1) space is required for any use.

~~C.~~D. DESIGN AND LOCATION OF PARKING SPACES

1. Residential Uses:
   a. Required off-street parking shall be located on the same lot or parcel as the use it is intended to serve, unless parking on a property within 500 feet that shares the same zoning designation as the subject property is available to the property owner. Those spaces may count toward the required parking. As part of the application, the property owner shall provide satisfactory assurance that the separate lot or parcel is permanently committed to parking use by deed restriction or recorded easement.
   b. Off-street parking spaces, driveways, and access ways shall be properly graded to prevent impoundment of surface water.

2. Non-residential Uses:

   a. Required off-street parking shall be located within the C.1. Zone. Whenever the use of a separate lot or parcel is proposed for fulfillment of minimum parking requirements, the owner shall submit, as part of ~~his~~ their application, satisfactory assurance that the separate lot or parcel is permanently committed to parking use by deed restriction or recorded easement.

   b. Off-street parking spaces, driveways, and access ways shall be fully improved with an all-weather, dust-free surface, and properly drained to prevent impoundment of surface water.

   c. Off-street parking spaces shall be situated in a manner which will not result in automobiles backing onto a public street.

   d. A variance from the requirement of Section DC.2.c. may be granted by the Board of Adjustment if compliance with this section is geographically impossible. If such a variance is granted, it shall be required as a condition of the variance that traffic signs shall be placed by the Town, after approval by the Historic Preservation/Design Review Board, and paid for by the applicant, alerting crossing traffic of automobiles backing onto public streets in all areas except those abutting the State highway.

~~D.~~E. SCHEDULE OF REQUIRED OFF-STREET PARKING SPACES

1. Off-street parking spaces shall be provided for each specified use in accordance with the following schedule. "Usable area" as used herein shall mean the area capable of being devoted to the specified use (does not include such spaces as kitchens, restrooms, hallways, etc.). If the use of any structure is changed, off-street parking shall be required and provided under the new use.

	USE	SPACE REQUIRED
a.	Bowling alley	4 spaces per alley or lane
b.	Church or other place of worship	1 space per 6 seats (each 30 inches of bench space is considered 1 seat), plus 1 space per 50 sq. ft. of usable area not used for seating
c.	Day care center	2 spaces plus 1 space per 500 sq. ft. of usable floor area
d.	Home occupation	No additional space
e.	Hospital or nursing home	1 space per 2 beds
f.	Hotel	1 space per rental unit
g.	Manufacturing, industry	1 space per 500 sq. ft. of wholesaling usable area
h.	Medical, dental office, or clinic	3 spaces per doctor
i.	Offices	1 space per 300 sq. ft. of usable area
j.	Public assembly place such as auditorium meeting hall or theater	1 space per 6 seats (each 30 inches of bench space is considered 1 seat), plus. 1 space per 100 sq. ft. of usable area
k.	Residential (except apartment)	2 spaces per dwelling unit
l.	Residential (apartment)	1 ½ spaces per dwelling unit
m.	Restaurant or bar	1 space per 6 seats (each 30 inches of bench space is considered 1 seat) plus 1 space per 100 sq. ft. of usable area
n.	Retail and service uses	1 space per 300 sq. ft. of usable area
o.	School (elementary and middle)	1 space per employee
p.	School (other than elementary and middle)	1 space per 10 seats in main auditorium or 3 spaces per classroom whichever is greater
q.	Service station	2 spaces, plus 1 space per service bay
r.	Warehouse	1 space per 2,000 sq. ft. of usable area

s.	Studio	1 space per 500 sq. ft. of usable area
t.	Spirituous Liquor Tasting Facility	1 space per 300 sq. ft. of usable area

2. Requirements for a specific use not listed in this section shall be determined by the Planning and Zoning Commission based on the requirements of the most similar use listed.

[Ord. No. 324; Ord. No. 408; Ord. No. 465]

F. ALTERNATIVE OFF-STREET PARKING STANDARDS

1. Because of the unique topography and history of development in the Town of Jerome, the ability to meet off-street parking standards can often be challenging. Providing greater flexibility to meet off-street parking requirements through shared parking agreements, existing public parking and shuttle services, and a parking justification analysis that establishes the minimum parking need for a use will create more opportunities for the preservation, rehabilitation, restoration, and reconstruction of properties throughout the Town of Jerome. The following standards are provided as an alternative and may be used in lieu of the standards in Section 510.D.

2. Neighborhood Meeting Required Near Existing Residential Development

   a. Applicants within 300 feet of an existing residence who opt-in to these alternative parking standards shall hold a neighborhood meeting prior to submittal of the application in accordance with Section 306 of this Ordinance.

3. Parking Requirements

   a. At least two off-street spaces shall be provided for residential uses except apartments.

   b. For all other uses, a parking justification analysis shall be provided.

      1) The Parking Justification Analysis shall include the following minimum contents:

         i. An analysis of the parking demand for existing and proposed onsite buildings and uses, including hours of operation and peak use time and demand for each proposed building or use.

         ii. The number and location of proposed onsite parking spaces, including ADA-accessible spaces.

         iii. The data source used to establish the number of proposed onsite parking spaces.

         iv. The existing and future anticipated available parking within and in the vicinity of the proposed development.

         v. If parking demand is proposed to be addressed offsite, reference to or copies of any shared parking agreement or other evidence of a right to park in that location.

         vi. Off-street loading requirements and impacts on surrounding uses and properties.

         vii. A summary of the neighborhood meeting, including topics discussed, concerns raised by neighboring property owners, and the applicant's response.

         viii. Any other information deemed appropriate by the Town Engineer, including, without limitation, a traffic study.

      2) Parking Justification Analysis Procedure

         i. The parking justification analysis shall be submitted to the Zoning Administrator in conjunction with a site plan. The Zoning Administrator shall circulate the parking justification analysis to the Town Engineer for comment. The Zoning Administrator and/or Town Engineer shall review the application and provide comments on specific deficiencies of the application. An applicant may revise the parking

justification analysis until it is deemed satisfactory by the Zoning Administrator and Town Engineer.

ii. Within fourteen (14) days of receipt of a parking justification application, the Zoning Administrator shall determine the completeness of the application. If the application is incomplete, the Zoning Administrator shall provide the applicant with a comprehensive list of the specific deficiencies in a written notice. A resubmittal of an incomplete application shall be reviewed for completeness within seven (7) days. If the application is deemed to be complete, the Zoning Administrator shall forward the parking justification analysis to the Planning and Zoning Commission, which shall hear the application for parking justification.

iii. The Zoning Administrator shall then choose a reasonable time for the hearing, and shall give notice to interested parties and to the public by publication of a notice in a newspaper of general circulation in the area, and by posting one notice of the hearing on the property requesting the parking modification, not less than fifteen (15) days prior to the hearing. The notice shall set forth the time and place of the hearing, including a general explanation of the matter to be considered.

iv. The Commission shall act by recommending approval, denial, or continuing the application and hearing to a time and place certain.

v. The Council shall, within forty-five (45) days after the Commission action on a parking justification application, act on the recommendation of the Planning and Zoning Commission by either affirming, denying, or modifying the recommendation of the Planning and Zoning Commission. The Town Council may make a decision based on its own findings.

vi. The Council may designate such conditions in connection with the proposed alternative parking request as it deems necessary to secure the intent and purpose of this Ordinance and may require such guarantees and evidence that such conditions are being, or will be, complied with.

vii. The Council's decision shall be final and shall become effective immediately. Notice of the decision shall be mailed to the applicant at the address shown in the application.

viii. Failure of the applicant to comply with the conditions and safeguards that are a part of the terms under which an alternative parking request is granted shall be deemed a violation of this Ordinance and punishable under Section 110.

3) Standards for Parking Justification Analysis Consideration

i. The application for a parking justification analysis may be denied if it fails to address any adverse impacts on surrounding properties or the public.

ii. Parking demand may be based on standard modeling practices and may consider, as applicable, hours of operation, peak use periods, occupancy or capacity, employee and visitor demand, shared parking opportunities, availability of public parking and the Town shuttle, walkability, seasonality and tourism patterns, and other relevant site-specific or market-based factors.

SECTION 511. HISTORIC OVERLAY DISTRICT

~~i.~~ [CODIFIER'S NOTE: This subsection was rewritten with Ordinance 497 and moved to new Section 409.]

SECTION 512. LANDSCAPE REQUIREMENTS

Exceptions to the standards of this section may be granted by the ~~Zoning Administrator~~ Town Council when it is determined that landscaping may interfere with defensible space techniques for wildfires or that the circumstances of a property make it infeasible to comply without significant expense to the property owner. Any individual may apply for a waiver to the standards of this section. Any appeals of decisions made by the Mayor and Council or Zoning Administrator to the standards of this section shall be heard by the Board of Adjustment.

A. NATIVE PLANT & CULTURAL LANDSCAPE INVENTORY PLANS

This section is intended to protect and celebrate the unique local environment within the Town of Jerome and the greater Verde Valley.

1. Purpose:

Preserve the Town of Jerome's sense of place by ensuring development reflects the character of the local environment, promotes water conservation through the use and retention of native plant species adapted to local conditions, protects vegetation that provides habitat for native wildlife, and conserves designed landscapes, historically significant plants, and spatial relationships that contribute to the Town's cultural and historic character.

Development shall incorporate into Landscape Plans protected native plant species and cultural landscape features existing on a project site prior to construction, in quantities not less than those identified within the limits of disturbance. A qualified Plant Professional (defined below in *Section 512.A.6: Professional Expertise*) shall inventory all protected plants, including individual specimens and contributing landscape features such as gardens and plazas, and shall determine and document the minimum number of protected plants to be included in the Landscape Plans. Plant salvage is encouraged but not required; salvaged material and/or nursery stock may be used to meet these requirements. Cultural and designed landscapes that meet the eligibility requirements of the National Register of Historic Places but are not listed shall be included in the inventory.

2. Applicability:

a. All new development requiring a Site Plan or Preliminary Plat review.

~~expansion of an existing non-residentialcommercial development.~~

3. Exceptions:

a. The site is for one single-family dwelling unit or a single duplex, triplex, or quadplex.

b. The site does not contain any:

1) Plants listed as Endangered or Threatened under the Federal Endangered Species Act (ESA); ~~or~~

2) Plants listed on the Protected Native Plant List curated and maintained by the Town of Jerome; ~~or~~

3) ~~any f~~Features or plants that contribute to the cultural landscape of the Town of Jerome; or

4) Other protected plants or features listed in *Section 512.A.8: Protected Plants and Landscapes*.

c. Existing constructed landscape does not require inventory unless it has been deemed historic and is listed on a local, State, or Federal registry.

d. ~~At the discretion of the Zoning Administrator (e.g., site has been disturbed, plant health is poor, etc.)~~Sites that have been completely disturbed, or the proposed development area of a site has been completely disturbed, and no cultural landscapes exist.

e. If a Native Plant Exception is approved by the Town Council.

1) The Town Council may approve an exception to the requirements of this section upon recommendation of the Planning and Zoning Commission if the applicant demonstrates that:

i. Strict compliance with this Section is impractical due to site conditions, prior disturbance, public safety concerns, or the limited presence and/or poor condition of protected plants or cultural landscape features on the site;

ii. The requested exception is the minimum necessary to address the circumstances supporting the request; and

iii. The exception will not result in the unnecessary removal of protected plants, cultural landscape features, or historic resources.

iv. If the requested relief may be granted through the variance process established by this Ordinance, the applicant shall pursue a variance. A Native Plant Exception shall not be scheduled for consideration by the Planning and Zoning Commission or Town Council unless the Zoning Administrator determines that the requested relief is not eligible for a variance.

v. A Native Plant Exception shall be processed in accordance with the procedures outlined in Section 303.1.

4. Submittal Requirements:

a. A Native Plant & Cultural Landscape Inventory Plan is required in conjunction with a project's Landscape Plans and must be approved through the Site Plan or Preliminary Plat review process.

b. The Native Plant & Cultural Landscape Inventory Plan shall be in 24x36-inch format unless information can be shown clearly on a smaller sheet size.

c. The Native Plant & Cultural Landscape Inventory Plan shall feature the ~~following~~ content requirements as provided by the Zoning Administrator in the Landscape Guide for the Town of Jerome.~~:~~

5. Plan Approval Prior to Site Modifications:

a. No grubbing, grading, construction, or plant salvage may take place on the project site until approval of the required Native Plant & Cultural Landscape Inventory Plan. No grading permits shall be issued prior to submittal and approval of the Native Plant & Cultural Landscape Inventory Plan.

6. Professional Expertise

a. Native plant inventory must be performed by a Plant Professional who can identify plant species in the field. Unless otherwise directed or approved by the Zoning Administrator, plant professionals include:

1) Arborist (certified by the International Society of Arboriculture)

2) Landscape Architect

3) Horticulturist, Biologist, or Botanist with a minimum B.A. or B.S. in an appropriate environmental resource field

7. Plant Inventory Standards

a. Plant Professional shall conduct a plant survey and tag all protected species within the project's grading limits.

b. All protected plants shall be tagged with an embossed metal tag, or other approved equivalent, bearing an inventory number that corresponds to the inventory table.

8. Protected Plants and Landscapes

a. Edible/ornamental trees and plants at the discretion of the Zoning Administrator

b. Individual plants within Cultural Landscapes that have been deemed historic and are listed on a local, State, or Federal registry.

c. Endangered or Threatened plants listed under the Federal Endangered Species Act.

d. Other plants as listed on the Town of Jerome's Protected Native Plant List.

B. LANDSCAPE PACKAGES

This section is intended to establish minimum standards for the installation and maintenance of plant material appropriate for the region, including irrigation for constructed landscapes.

1. Purpose:

Reinforce the Town of Jerome's sense of place by ensuring constructed landscapes reflect the character of the local environment and respond to the semi-arid high desert climate, while establishing minimum standards for plant materials and irrigation.

Constructed landscapes shall incorporate native, near-native, and drought-tolerant plant species to reduce water demand and reflect the surrounding environment. Design shall minimize heat gain through canopy trees, reduce erosion and runoff, and control dust from site disturbance.

Landscape Packages shall incorporate passive rainwater harvesting and efficient irrigation, including smart technologies, to reduce potable water use. A Registered Landscape Architect, or similar design professional, shall prepare a Landscape Package demonstrating compliance with this section, including a Planting Plan, Irrigation Plan, Rainwater Harvesting Plan, and associated construction details.

2. Applicability:

a. All new development that is proposed to disturb existing vegetation on a property.

b. Expansion of existing development that removes existing vegetation on a site

1) If the expansion removes less than 50% of the existing vegetation on a site, then the standards of this section only apply to the proposed expansion area.

2) If the expansion area removes more than 50% of the existing vegetation on a site, then the standards of this section apply to the entire site.

3. Exceptions:

a. Single-Family dwelling units or a single duplex, triplex, or quadplex.

b. An applicant may apply for a Landscape Exception to waive the standards of this section. The Landscape Exception shall be approved by the Town Council. To approve a Landscape Exception, the Town Council shall determine that the required landscape standard would provide limited community benefit, create security or public safety concerns, adversely affect the historic character of a building or place, or that existing site features provide an equivalent level of buffering or screening. A Landscape Exception shall follow the process outlined in Section 303.1. If the requested relief may be granted through the variance process established by this Ordinance, the applicant shall pursue a variance. A Landscape Exception shall not be scheduled for consideration by the Planning and Zoning Commission

or Town Council unless the Zoning Administrator determines that the requested relief is not eligible for a variance.

4. Submittal Requirements

a. A Landscape Package~~lan~~ must be submitted for approval with the Site Plan or Preliminary Plat at the time of the Site Plan or Preliminary Plat review process.

b. The Landscape Package~~lan~~ shall be in 24x36-inch format unless information can be shown clearly on a smaller sheet size.

~~-~~The Landscape Package~~lan~~ shall feature the~~-~~ content requirements as provided by the Zoning Administrator in the Landscape Guide for the Town of Jerome and within Section 512 of this Ordinance.~~:~~

~~c.~~c.

5. Plan Approval Prior to Site Modifications:

a. No grubbing, grading, construction, or plant salvage may take place on the project site until approval of the required Landscape Package~~lans~~. No grading permits shall be issued prior to submittal and approval of the Landscape Package~~lans~~.

6. Professional Expertise

a. Landscape Packages~~lans~~ must be prepared and sealed by a Landscape Architect, registered in the State of Arizona, or other design professional, such as an architect or engineer.

7. Planting Standards

a. Plant Material: All plant material used for landscaping must be selected from the Arizona Department of Water Resources (ADWR) Verde Valley Low Water Use Drought Tolerant Plant List or other plants as determined by the Town Council through a landscape exception~~Zoning Administrator~~.

1) Exceptions

i. Oasis Areas and/or Natural Turf Area may be approved by the Town Council ~~Zoning Administrator~~ as a landscape exception.

1. Oasis areas may feature plants not listed in the Arizona Department of Water Resources Low Water Use and Drought Tolerant Plant List.

2. Oasis areas must be limited in scope and shall only include areas with outdoor seating/furnishings for gathering/assembly. Oasis areas shall not exceed 10% of the total project area.

3. Oasis areas include: planting areas (beds or planters) for annual flowers, protected courtyards, vegetable gardens, etc.

4. Natural Turf areas may feature grasses not listed in the ADWR Verde Valley Low Water Use and Drought Tolerant Plant List. Common Bermuda Grass is prohibited. Hybrid Bermuda Grass (sterile hybrid varieties) is permitted.

5. Natural Turf Area shall be limited to accessible park space for residential projects only. Natural turf shall not be planted for aesthetic purposes. Natural turf area may exceed 3% of the total project area when used for active recreation~~per the discretion of the Zoning Administrator~~.

ii. The Town Council ~~Zoning Administrator~~ may approve plants not on the Verde Valley Low Water Use Drought Tolerant Plant List if it is determined that the use of an unlisted plant preserves or furthers the historic character of the Town of Jerome.

b. Perimeter Landscape Borders: Perimeter Landscape Borders are intended to create a natural transition between dissimilar land use intensities to enhance the overall aesthetic of the community and promote compatibility between uses.

1) Perimeter Landscape Border shall feature:

i. A minimum width or quantity as determined by the Zoning Administrator;

ii. One tree every 33 linear feet (minimum) unless site constraints prohibit the placement of trees;

iii. Understory plants;

iv. Screen (e.g., decorative masonry wall, opaque ornamental fence, or vegetative hedge) at the back of the border. ~~May be waived at the discretion of the Zoning Administrator.~~

2) Perimeter Landscape Border shall be located entirely on project property, unless use of right-of-way for landscape improvement is approved by the Town Engineer (or ADOT as necessary).

3) Exceptions:

i. No perimeter landscape border shall be required along boundaries where zero lot line development is proposed.

ii. No perimeter landscape border shall be required along boundaries where the proposed project use intensity matches the existing adjacent use intensity.

iii. No perimeter landscape border shall be required along boundaries where the project has preserved natural open space (10' width minimum).

iv. ~~Perimeter landscape border and/or screening requirements may be waived, at the discretion of the Zoning Administrator, for instances where the border and/or screen may provide limited community value, security concerns, or impact the historic character of a building or place~~A Landscape Exception approved by the Town Council.

c. Parking Lot Landscape: Parking lots shall feature canopy trees to shade hardscape surfaces and parked vehicles. Generally, canopy trees should be planted along the edges of a parking lot, but site constraints may make this unfeasible. The Zoning Administrator shall have the authority to designate the location and quantity of parking lot trees.

d. Amenity Landscape: Amenity Landscape includes building foundation plantings, building entry plantings, plazas, courtyards, streetscapes, parks, and recreational open space, in addition to general landscaped common area.

1) Amenity Landscape shall feature:

i. Residential Projects: Minimum of one tree and three understory plants (i.e., shrubs, cacti, succulents, ornamental grasses, vegetative groundcovers) per residential unit or residential lot. Trees may be placed within front yards, within parks, along streetscapes, or within general common area. The Zoning Administrator may waive any portion of this standard for existing residential development being renovated, rehabilitated, or reconstructed.

1. Multifamily – New Construction: Trees shall be placed around buildings, along walkways, within plazas/courtyards, or within recreational areas.

2. Multifamily – Existing/Expansions: Per the direction of the Zoning Administrator and to the greatest extent possible, trees should be placed around buildings, along walkways, within plazas/courtyards, or within recreational areas.

ii. Streetscapes: The design of streetscapes has been influenced by the topography of the area and helps contribute to the unique character that defines the Town of Jerome. The following streetscape standards are meant to apply only to new streets and extensions of existing streets into previously undeveloped areas.

1. Proposed streetscapes shall feature a minimum of one tree and five understory plants (i.e., shrubs, cacti, succulents, ornamental grasses, vegetative groundcovers) for every 50 linear feet, on both sides of the road within 20' of the edge of pavement.

a. Exceptions:

i. Local residential roads that provide access to the front of residential lots. Front yard landscape may count toward streetscape requirements when trees and understory are located within 20' of the edge of pavement.

ii. Roadways adjacent to natural open space (set aside in perpetuity), or agricultural uses.

iii. ~~At the discretion of the Zoning Administrator~~ A Landscape Exception approved by the Town Council.

iii. Minimum Parks and Recreational Open Space (e.g., ball fields, sports courts, playgrounds, dog parks, fitness spaces, trails, pools, picnic spaces, etc.) Requirements

1. Residential Subdivision: 200 SF per lot, if subdivision is more than four (4) lots.

2.Multifamily: 200 SF per unit, if multifamily development is more than 25 units. Indoor recreation or fitness centers may count toward the total Parks and Recreational Open Space.

3. Parks and Recreational Open Space shall be designed in a contiguous manner to the extent feasible, in order to provide a maximum recreational value (e.g., a single large park is preferable to four small parks within a large subdivision).

4. An in-lieu fee may be paid to reduce the required Parks and Recreational Open Space square footage by 50% with the approval of the Zoning Administrator. Standard in-lieu fee = $1,500 per unit or lot.

e. Plant Sizes at Installation:

1) Trees: 15 Gallon minimum

2) Shrubs/Cacti: 5 Gallon minimum

3) Ornamental Grasses: 1 Gallon minimum

4) Vegetative Groundcovers: 1 Gallon minimum

5) Site Salvaged Plant Material: any size

f. Revegetation Standards

1) All areas of a project site that are disturbed during the construction process but not improved with structures, parking areas, or landscape shall be revegetated with native plants or native seed mixes.

i. Native Plant species shall be selected by the Landscape Architect and identified in the planting plans, along with Pure Live Seed (PLS) seeding rate lb. per acre.

ii. Native Seed Mixes shall be applied as a hydroseed slurry with tackifier, fertilizer, and mulch as necessary (according to soil conditions) to ensure plant establishment.

iii. Revegetation shall be designed and installed to achieve successful establishment consistent with site soils, slope, and climatic conditions.

2) Exceptions:

i. Revegetation shall not be required when the lack of vegetation is a defining element contributing to the character of a historic cultural landscape.

g. Irrigation Standards

1) All landscaped common area (unless noted as xeric – without the need for irrigation) shall feature a water-conserving irrigation system for all new plantings.

2) System Specifications

i. Meter: Water meter shall be a dedicated irrigation meter.

ii. Reduced Pressure Backflow Preventer (RPBP): A reduced-pressure backflow preventer shall be installed to prevent contaminated water from mixing with clean municipal water supplies.

iii. All landscape areas shall feature permanent point-source drip irrigation systems. Drip systems shall irrigate with low-flow emitters. Spray irrigation systems may only be used for turf applications unless otherwise approved by the Zoning Administrator. Temporary spray systems may be used to establish hydroseeded areas.

iv. Permanent irrigation systems shall be fitted with irrigation controllers/timers (hardwired, battery-operated, or solar) to operate zone valves that respond to plant water needs throughout each season of the year.

v. Irrigation controllers shall accommodate contemporary smart technologies. All systems shall include a minimum of: one (1) flow sensor and one (1) weather-based sensor/application (i.e., rain sensors, tensionmeters, soil moisture gauges, weather stations, automatic seasonal adjustment applications, internet-connected weather data applications, etc.).

vi. Pipes carrying water under constant pressure must be buried to a depth of 24 inches. Those that are under intermittent pressure must be buried to a minimum depth of 18 inches, as necessary to prevent freezing.

vii. All non-pressure irrigation piping shall be buried a minimum of 12 inches, with greater depth required where necessary to prevent freezing or damage.

viii. Pipes under paved surfaces must be contained within pipe sleeves.

ix. All irrigation equipment shall be protected (boxes, cages, cabinets, etc.) to ensure that irrigation equipment is not exposed to adverse weather conditions (freezing, solar degradation, etc.) or vandalism.

3) System Design

i. Irrigation zones shall consider plant irrigation needs throughout seasons, plant establishment periods, and maturity.

1. It is recommended that trees and understory be kept on separate irrigation zones.

2. It is recommended that amenity area landscape and landscape borders be kept on separate irrigation zones.

ii. Irrigation zones that feature native plants (or drought-tolerant plants with similar irrigation demands) may be turned off after plant establishment periods, as long as plant growth and health do not decline.

4) Maintenance

i. Irrigation systems must be maintained and replaced as necessary to continue to conserve water. Detection and repair of leaky or broken pipes, valves, and fittings, as well as malfunctioning and/or misaligned heads and emitters must be a part of a regular maintenance program for the site.

h. Rainwater Harvesting Standards

1) All landscaped areas shall be depressed between 4" and 9" to collect rainwater.

i. Exceptions

1. Areas identified by the project engineer or Town Engineer that cannot accommodate rainwater harvesting (for purposes of safety or functionality),

2. Areas with a cross slope greater than 4%,

3. Within 10' of a building foundation,

4. Within 10' of a utility,

5. Within a utility or access easement.

6. Landscape areas that feature plants with limited water tolerance (e.g., Opuntia spp., Cylindropuntia spp., Yucca baccata, Agave parryi) shall be designed to minimize supplemental irrigation. Basins may be terraced to accommodate plants with varying water needs. Plants with high water needs shall be located at basin bottoms. Plants with moderate water needs shall be located at basin terraces/side slopes. Plants with limited water needs shall be located at the top of basins.

2) Rainwater Basin Design

i. Basin slopes shall not exceed 3:1.

ii. Basin depths shall not exceed 9".

iii. Basin floor soils shall be loosened to a depth of at least 12".

iv. Basin sides and bottoms shall be covered in 1"+ screened rock or bark mulch (no "minus" material is permitted) to a depth of 2". Alternatively, basins may be seeded with native seed mix.

v. Scuppers, curb cuts, and rooftop downspouts shall correspond to the location of rainwater harvesting basins

vi. Basins shall receive water from adjacent hardscape surfaces to the greatest extent feasible. Some basins, however, may only collect rainwater where it falls.

vii. Berms, gabions, check dams, weirs, and other drainage structures are all recommended to direct, disperse, and slow the movement of rainwater in landscape areas. Rainwater harvesting structures shall be depicted in both the Landscape Plans and Drainage Plans.

viii. Maximum reveal at the edge of public sidewalks and pedestrian circulation paths should be two inches or less to minimize the risk of injury to pedestrians. A minimum 12" wide shoulder with a maximum 2% cross slope away from public sidewalks or pedestrian paths is required.

ARTICLE VI: EMERGENCY CLAUSE

WHEREAS, the immediate operation of the provisions of this Ordinance is necessary for the preservation of the public health, safety and welfare, and to carry out the expressed intent and purposes of said Ordinance, an EMERGENCY is hereby declared to exist, and this Ordinance shall be in full force and effect from and after the date of its passage by the Council.

PASSED AND ADOPTED by the Council of the Town of Jerome this ____ day of _____, 19___.

ARTICLE VII: SUBDIVISION REGULATIONS

SECTION 701. TITLE, PURPOSE, AND ADMINISTRATION

A. PREAMBLE

The purpose of these regulations is to provide for the health, safety, general welfare, and harmonious development of the Town of Jerome and environs, ~~; to insure that all future development shall be referenced and~~ in accordance with the principles, goals, and objectives of the adopted General~~Comprehensive~~ Plan and~~;~~ to ~~e~~insure that: all new development will strengthen the Town's economic base and valuation~~;: to einsure that~~, future development will preserve and enhance the Town's natural scenic attributes~~; to einsure that~~ , and all new development will maintain and encourage a pleasing environment and be in harmony with the special character and historical quality of Jerome. ~~-~~The purpose of these regulations is also to secure adequate provisions for streets and traffic circulation, water supply and distribution, sanitary sewerage, drainage and flood control, and in the development of lots and properties having optimum utility and livability. These regulations shall also facilitate the provision of lands for recreation and other public uses; promote the conveyance of land by accurate legal description; and establish procedures that~~which~~ will provide~~achieve~~ a basis of mutual understanding and equitable relationships between public and private interests.

B. AUTHORITY

The Jerome Subdivision Regulations are authorized by Title Nine, Chapter 4, Article 6, section 9-471 to 9-479 and Chapter 6, Article 1, Section 9-601 of the Arizona Revised Statutes, as amended, and are hereby declared to be in accordance with all provisions of these Statutes.

~~C. SHORT TITLE~~

~~For the purpose of identification, these regulations shall hereafter be referred to as the "Jerome Subdivision Regulations."~~

~~D.~~C. APPLICATION OF REGULATION

1. Final Plat Approval: No final plat shall be recorded or offered for record, nor shall any land be offered for sale with reference to such plat, until said plat has been recommended for approval to the Town Council by the Planning and Zoning Commission and approved by the Town Council. The Planning and Zoning Commission shall ascertain~~-~~, before recommending to the Council, that said plat has satisfied all requirements of these regulations.

2. Plans, Plats and Replats: All plans of streets, highways, alleys, or other portions of the same intended to be dedicated to a public use or to the use of purchasers or owners of lots fronting thereon or adjacent thereto, and all plans, plats, and replats of land laid out in a subdivision or building lots, shall be submitted to the Planning and Zoning Commission for approval. The Planning and Zoning Commission shall ascertain, before approving it, that said plan, plat, plot, or replat~~,~~ has satisfied all of the requirements of these regulations.

~~E.~~D. JURISDICTION

These regulations shall govern the subdivision of all land that lies within the corporate limits of the Town of Jerome. ~~The plat of a subdivision outside and within three (3) miles of the corporate limits which conforms to applicable regulations shall be approved and so recommended for approval to the Planning and Zoning Commission of Yavapai County. Any plat which does not conform to these regulations, or which is approved subject to changes, shall be so reported to the Planning and Zoning Commission, with the reasons therefor.~~

~~F.~~E. ADMINISTRATION

The Jerome Planning and Zoning Commission is hereby authorized to receive, process, and otherwise act upon preliminary and final subdivision plats in accordance with these regulations. ~~-~~The Town Zoning Administrator, the Town Engineer, and the County Health Department are hereby designated as Planning and Zoning Advisories to the Commission and the Town Council and charged

with the duty of investigating and reporting upon matters referred to them in accordance with these regulations.

No Final plat of a subdivision shall be approved by the Planning and Zoning Commission and accepted by the Town Council unless it conforms to the provisions of these regulations and to the provisions of the Zoning Ordinance for Jerome, Arizona.

~~G.~~F. FILING FEE SCHEDULE

The submission of a tentative or final plat, abandonment, amended plat, recording fee deed restrictions, exceptions, improvement drawing, etc., shall include payment submitted to the Town Zoning Administrator of a filing fee for the County Recorder. Fees shall be set by Resolution of the Town Council.

[Ord. 473, 8/10/2021]

NOTICE: The Final plat fees shall not be applied to subdivisions outside the Town of Jerome corporate limits.

The Town of Jerome may negotiate with the subdivider to acquire land for present or future municipal purposes in accordance with the laws of the State of Arizona.

SECTION 702. GENERAL REQUIREMENTS AND PROCEDURES FOR SUBMISSION OF PLATS

A. APPROVAL OF SUBDIVISION REQUIRED

1. ~~Until a preliminary plat and a final plat of a subdivision shall have been approved in accordance with this Chapter~~N, ~~n~~o person proposing a subdivision or owning unapproved lots or parcels within Jerome shall subdivide or file a record of survey, map or plat for record, or sell any part of said subdivision, or unapproved lots or parcels, or proceed with any grading, construction, or other work on said lot~~same.~~ until a preliminary and final plat of a subdivision have been approved in accordance with this Section.

2. Duties of Subdivider: While a subdivision is in the preliminary planning stage, the subdivider shall consult the Zoning Administrator to determine conformity ~~to~~ with the General~~Comprehensive~~ Plan, ~~including the Circulation Plan~~Element, ~~Minor Street Plan, District Map, and Zoning Regulations~~Map, ~~~~ and compliance with the provisions of *Article VII Subdivision Regulations*, any other applicable sections of the Zoning Ordinance~~Code~~ of the Town of Jerome~~of these regulations~~, and requirements for the design and installation of public improvements as required by the Town of Jerome.

3. The following factors should be considered in the preliminary stage of planning a subdivision:

   a. Need for additional residential sites in the area.

   b. Type and quality of homes to be built.

   c. Lot sizes most adaptable to the use proposed.

   d. Areas to be reserved for business or industrial use.

   e. Special scenic locations or areas of historical importance which need to be reserved.

   f. School and/or park sites that will be required.

   g. Access features which may be desirable along arterial and collector streets.

   h. Areas subject to flooding.

   i. Suitability of land for urban development.

   j. Water, sanitary sewer, solid waste disposal, storm sewer, electric, and gas utility services to be provided.

   k. Fire and police protection

   l. Integration of the subdivision with existing and proposed development.

   m. Whether the site is appropriate for the proposed use.

   n. Legal or tax problems likely to be encountered.

4. Preliminary Plat and Engineering Drawings. The subdivider shall prepare a preliminary plat of the proposed subdivision and other exhibits as specified in Section 703.B.

5. Final Plat and Recording. The subdivider shall prepare a final plat as specified in Section 703.D, which shall conform substantially to the preliminary plat as approved, and if desired by the subdivider, it may constitute only that portion of the approved preliminary plat which is proposed to be recorded and developed at the time, provided, however, that such portions conform to all requirements of these regulations. The approved and executed copy will be recorded in the Yavapai County Recorder's office after full compliance with the regulations, and one copy will be filed in the Planning and Zoning Commission's office, and one with the Town Engineer.

6. Building Permits and Certificates of Occupancy:

a. Building Permits. No Building shall be erected, or shall a building permit be issued for a building, unless the street giving access to the lot upon which such a building is proposed to be placed shall have been properly improved as required in Section 710.A.3.

b. Certificates of Occupancy. No certificate of occupancy shall be issued for any building unless all requirements of these regulations and any and all requirements of any other regulatory code, ordinance, or regulation have been met.

B. ~~MASTER PLAN AND~~ SKETCH PLAN AND MASTER PLAN REQUIREMENTS

1. ~~Pre-application Sketch Plan. Since agreement on the tentative plat is deemed a step of primary importance in these proceedings, I~~it is strongly recommended that the subdivider review the initial proposal for the subdivision with the Zoning Administrator prior to ~~the~~ preparingation of the required tentative plat, while ~~his~~ plans for the proposed subdivision are still in preliminary form and other elements of the proposed development remainare ~~still~~ flexible. The purpose at this stage is to make available general advice on the purpose and effect of these regulations, the General~~Comprehensive~~ Plan, zoning, and other Town planning, engineering, drainage, sewage, water systems, and similar standards, requirements, and plans. All applications requiring a pre-application meeting per Section 307 of this Ordinance shall provide a sketch plan with the form requesting a pre-application meeting. The sketch plan shall include:~~.~~

a. Property dimensions on all sides of proposed or existing lots

b. North arrow and scale

c. Proposed driveways and easements

d. Adjacent street names

e. Proposed disturbance area and grading limits

f. Location and setbacks of all existing/proposed structures

g. Square footage of existing/proposed structures

h. Building height of existing/proposed structures

i. Location of existing/proposed septic

~~1.~~j. Adjacent properties zoning/use

2. The Zoning Administrator ~~upon the request of the Planning and Zoning Commission,~~ may require that the developer prepare and submit a Master Development Plan (MDP) where:

a. The tract is sufficiently large to comprise an entire neighborhood;

b. T~~t~~he tract proposed for platting is only a portion of a larger land holding of the developer;

~~a.~~c. T~~t~~he tract is a part of a larger land area of which the development is complicated by unusual topography and land use.

~~2.~~3. ~~Preparation:~~ The ~~Master Development Plan~~MDP shall be prepared to scale and accuracy commensurate with its purpose, and, in addition to the required elements of the sketch plan, shall include:

a. General Street pattern of major arterial and collector streets.

b. Indication of single- family and multi-family residential areas and indication of general lot size and number of lots per acre anticipated.

c. General location and size of school sites, parks, or other public areas.

d. Location of shopping centers and other non-residential proposed land uses, and indicating their proposed use.

e. Methods proposed for sewage disposal, water supply, and storm drainage.

f. An indication of the areas to be developed in accordance with a planned development schedule.

~~3.~~4. Approval: Upon acceptance of the general design approach by the Zoning Administrator, the ~~Master Development Plan (~~MDP~~)~~ shall be submitted to the Planning and Zoning Commission for its consideration. ~~-~~If general approval and notice to proceed with the platting process is given, notice to that effect shall be recorded in the minutes of the Planning and Zoning Commission meeting and a copy of said minutes transmitted to the subdivider and ~~his~~ their engineer. ~~-~~If a development is to take place in several parts, the MDP should be submitted as supporting data for each part.

~~1. Preliminary Plat and Engineering Drawings. The subdivider shall cause to be prepared a preliminary plat of the proposed subdivision and other exhibits as specified herein Section 703.B. The Zoning Administrator shall review the preliminary plat and submit its recommendations to the Planning and Zoning Commission as specified herein.~~

~~2. Final Plat and Recording. The subdivider shall cause to be prepared a final plat as specified in Section 403, which shall conform substantially to the preliminary plat as approved, and if desired by the subdivider, it may constitute only that portion of the approved preliminary plat which is proposed to be recorded and developed at the time, provided, however, that such portions conform to all requirements of these regulations. The approved and executed copy will be recorded in Yavapai County Recorder's office after full compliance with the regulations, and one copy will be filed in the Planning and Zoning Commission's office and one with the Town Engineer.~~

~~3. Building Permits and Certificates of Occupancy:~~

~~a. Building Permits. No Building shall be erected, or shall a building permit be issued for a building, unless the street giving access to the lot upon which such a building is proposed to be placed shall have been properly improved as required in Section 601(C).~~

~~b. Certificates of Occupancy. No certificate of occupancy shall be issued for any building unless all of the requirements of these regulations and any and all requirements of any other regulatory code, ordinance or regulation have been met and complied with.~~

SECTION 703. SPECIFICATIONS FOR PLANS AND PLATS

A. PRELIMINARY PLAT AND ENGINEERING DRAWINGS:

1. Preliminary Plat to be Submitted: After the pre-application conference and general approval of the Sketch Plan and/or Master Development Plan, if required, the subdivider shall ~~cause to be~~ prepare~~d~~ a preliminary plat of the proposed subdivision and other exhibits as ~~hereinafter~~ specified by this Ordinance. ~~,~~ Copies of the preliminary plat and all required supplementary material, the number to be determined by the Zoning Administrator, ~~and~~ shall be submitted to the Zoning Administrator, who shall determine the completeness of the application within fourteen (14) days of submission. An application that is deemed complete shall be circulated for departmental review. If the application is incomplete, the Zoning Administrator shall provide the applicant with written notice of the specific deficiencies in the application. ~~a preliminary plat application with twelve (12) copies of the preliminary plat and all required supplementary material, at least fourteen (14) days prior to the meeting at which it is to be considered.~~

2. Departmental Review of Preliminary Plat: The Zoning Administrator shall refer copies of the preliminary plat to the following reviewing offices, who shall make known their recommendations in writing addressed to the Zoning Administrator.

   a. ~~(1) the~~ Town Engineer,

   b. County Highway Department (when plat abuts a county highway)

   c. ~~(2)~~ County ~~the~~ Health Department,

   d. Arizona Department of Transportation (ADOT) (when plat abuts a state highway)

   e. Fire Chief, and

   f. ~~(3)~~ A~~a~~ll interested utilities ~~y companies~~ and agencies.

   These entities shall review the plat for matters within their jurisdiction and promptly report their recommendations to the Zoning Administrator, who shall check the plat for conformity to these regulations, ~~,~~ add their own written comments and recommendations, and provide these comments to the applicant to be addressed in a resubmittal of the application until the Zoning Administrator determines that the substantive review of the application is complete. ~~, and shall submit the recommendations to the Planning and Zoning Commission at a meeting thereof not later than thirty-five (35) days from receipt of the preliminary plat application.~~

   The subdivider's engineer may act as agent.

~~2.~~3. Planning and Zoning Commission Findings: After substantive review of the preliminary plat application has been completed~~Within Forty (40) days after the submission of a preliminary plat and other material submitted in conformity to these regulations~~, and the Zoning Administrator has forwarded the application to the Planning and Zoning Commission, the Commission shall hold a public hearing and express its approval, ~~and~~ any conditions of approval, ~~if any,~~ or its disapproval, and its reasons therefor.

~~3.~~4. The action of the Planning and Zoning Commission, including any conditions, shall be noted on two (2) copies of the preliminary plat ~~and conditions determined shall be referenced and attached thereto~~. One (1) copy shall be returned to the subdivider, and the other shall be retained in the Planning and Zoning Commission's records.

~~4.~~5. Approval or conditional approval of the preliminary plat shall not constitute approval of the final plat. Rather it shall be deemed an expression of approval to the layout submitted on the preliminary plat as a guide to the preparation of the final plat. The final plat shall be submitted for approval by~~of~~ the Planning and Zoning Commission and the Town Council upon fulfillment of the requirements of these regulations and the conditions of the conditional preliminary plat approval, if any.

5.6. Preliminary Plat Requirements: Preliminary plat shall be submitted on one ore more sheets of not larger than thirty-six inches by forty-two inches (36" x 42") at a scale not greater than two hundred feet (200') to an inch and preferablye one inch equal to one hundred feet (100') to the inch.

Preliminary plats of subdivisions outside the Town, but within a three (3) mile radius of the Town will be submitted by the Yavapai County Planning and Zoning Commission to the Town Planning and Zoning Commission for recommendation, pursuant to ARS 9-474 as amended.

All preliminary plats shall contain the following information:

a. Proposed name of subdivision and its location by section, township, and range; small--scale vicinity map showing relative location of the plat; reference by dimension and bearing to section corners; and subdivision boundaries clearly identified.

b. Name, address, and phone number of landowner (and subdivider, if not the same).

c. Name, address, and phone number of engineer, surveyor, landscape architect, or land planner preparing the plat, including registration number if registered.

d. Scale, north point, and date of preparation, including dates of any subsequent revisions.

e. Topography by contours relating to USGS survey datum or other datum approved in writing by the County Engineer, to be shown on the same map as the proposed subdivision layout. Location and elevation of the benchmark used should also be shown on the plat. -Acceptable contour interval: grades up to five percent (5%), two feet (2'); five percent (5%) to 10 percent (10%) grades, five feet (5'); grades over ten percent (10%), ten feet (10').

f. Location by survey of streams, washes, canals, irrigation laterals, private ditches, culverts, lakes, or other water features, including direction of flow and water level elevations, and location and extent of areas subject to inundation and whether such inundation is frequent, periodic, or occasional.

g. Location, widths, and names of all existing streets, pathways and improvements therein; railroads; utility easements or rights-of-way, including any existing facilities therein; public areas, all existing structures, with an indication of whether or not they are to remain; and municipal corporation lines within or adjacent to the tract, and to be accompanied with a Preliminary Title Report.

h. Name, book, and page number of any recorded subdivisions within or having a common boundary with the tract, or notation "unsubdivided" where appropriate.

i. Location, width, and names of proposed streets, alleys, drainage ways, crosswalks, and easements, including all connections to adjoining platted or unplatted tracts.

j. Lot Layout, including minimum building setback lines related to all streets; typical lot dimensions (scaled); dimensions of all corner lots and lots on curvilinear sections of street; each lot numbered individually

k. Designation of all land to be dedicated or reserved for public or semi-public use, with use indicated.

l. Reference by note to the source of proposed electricity, gas, and telephone service, and whether such service will be underground.

m. If Plat includes land for which multi-family, commercial, or industrial use is proposed, such areas shall be clearly designated together with existing zoning classification, present district boundary lines and status of any pending zoning change.

n. Preliminary draft of proposed deed restrictions, including provisions for use and maintenance of commonly-owned facilities, if any.

o. Sewage disposal: It shall be the responsibility of the subdivider to furnish the County Health Department such evidence as that Department may require for its satisfaction as to the design and operation of sanitary sewage facilities proposed. -A statement as to the type of facilities proposed shall appear on the preliminary plat.

p. Subdivisions Utilizing Septic Tanks: Where the proposed sewage disposal system will be by individual lot septic tanks, percolation tests and test boring logs in accordance with the requirements of the County Health Department shall be taken on the proposed subdivision and submitted with the preliminary plat.

q. Water Supply: It shall be the responsibility of the subdivider to furnish the County Health Department such evidence as that Department may require for its satisfaction as to the facilities for supplying domestic water. -A statement as to the type of facilities proposed shall appear on the preliminary plat.

r. Storm Water Disposal: Preliminary layout of proposed system, location and invert elevation of outlet, and statement as to extent of improvements proposed, if any.

B. FINAL PLAT, ENGINEERING DRAWINGS, AND RECORDING

The final plat stage includes submittal, review, and approval of the final plat by the Town Council and recording of the plat with the County Recorder. Application for approval of the final plat is made to the Zoning Administrator.

1. Final Plat to be Submitted: A f~~F~~inal plat shall be submitted to the Zoning Administrator within one ~~hundred eighty~~ (1~~8~~0) yeardays of preliminary plat approval. The Zoning Administrator shall determine the completeness of the application within fourteen (14) days of submission. An application that is deemed complete shall be circulated for departmental review. If the application is incomplete, the Zoning Administrator shall provide the applicant with written notice of the specific deficiencies in the application. ~~The final plat shall be filed at least twenty (20) working days prior to the regular meeting at which the applicant desires to be heart. Upon receipt of the final plat, the department shall immediately verifycheck its for completeness. If the final plat is innot complete, it will be immediately returned to the subdivider.~~

   The final plat shall confoirm to the approved preliminary plat and any stipulation attached thereto by the Zoning Administrator or Planning and Zoning Commission. C~~Ten (10) c~~opies of such final plat, the number to be determined by the Zoning Administrator, shall be filed with the Department, including one (1) electronic and one (1) hard-copy original ~~in accordance with 402.05~~, which shall bear the original signatures of the owner or owners and be duly acknowledged~~, and one 18" x 24" clear film positive reduced to 1" = 400' scale~~. -The final plat shall be submitted, along with an application form and~~,~~ the final plat filing fee, to the Zoning Administrator.

2. Departmental Review of Final Plat: Departmental Review of Final Plats shall be in accordance with Section 703.A.2, except that:~~The Zoning Administrator shall refer copies of the final plat to the following reviewing offices who shall make known their recommendations in writing addressed to e Planning and Zoning Commission.~~

   - ~~City Engineer~~

     ~~County Highway Department (when plat abuts a county highway)~~

     ~~County Health Department~~

     ~~State Highway Department (when plat abuts a state highway)~~

     ~~All interested utilities and agencies (including the Soil Conservation District)~~

     ~~The Zoning Administrator shall assemble the recommendations of these various reviewing offices, prepare a concise summary of these recommendations and submit said summary~~

~~together with the reviewer's recommendations at the regular meeting of the Town Council at which the applicant desires to be heard.~~

If additional information or changes are recommended by any of the reviewing departments, a revised final plat must be submitted to the Zoning Administrator until all reviewing departments and agencies are satisfied. Resubmittals of a final plat shall not require a separate filing fee. ~~-~~Referral and scheduling of a revised final plat shall be the same as that required for the original final plat. ~~Plats not in conformance with the requirements of this Ordinance will not be scheduled for consideration by the Planning and Zoning Commission or Town Council.~~

If the final plat is complete but the time limit has expired or it is not in conformance with the preliminary plat or stipulations attached thereto, it will either be returned to the subdivider for compliance or be referred to the Planning and Zoning Commission for review and recommendation before being forwarded to the Town Council.

If a subdivision is predicated upon a change of zoning, the final plat will not be approved ~~schedule for consideration~~ until the necessary zoning has been adopted by the Town Council.

3. Planning and Zoning Commission Findings: Once a final plat has been accepted by the reviewing departments and the Zoning Administrator, it shall be referred to the Planning and Zoning Commission, which shall hold a public hearing and recommend approval, recommend approval with conditions, or recommend denial and the reasons therefor. The Commission shall render its decision in the form of a written recommendation to the Council, which may be via a request for Council action or via the transmission of the Commission meeting minutes to Council.

4. Town Council Approval: The Town Council shall hold a public hearing for all final plats proposed within the Town of Jerome, and shall either approve, approve with conditions, or deny an application for a final plat.

When the final plat has been approved by the Town Council, the Mayor shall be authorized to sign the plat for recording at the time that all ~~of the~~ Subdivision Improvement Requirements of Section 710~~Chapter 6~~ of this Ordinance~~ese regulations~~ have been met. ~~-~~After the Town Council's approval, the plat shall be assigned to the Zoning Administrator who~~ich~~ shall transfer the recording fee and approved final plat to the County Recorder's Office for recording after the improvement requirements and stipulations have been met. ~~-~~The subdivider will be notified of the date book and page number of the official recording.

If the Town Council disapproves the final plat, it shall express the reasons therefor within the minutes of the meeting of which one copy shall be attached to the plat and returned to the subdivider.

The subdivider or ~~his~~ their agent ~~and his~~ , engineer or land surveyor shall be present at the meeting set for the date of approval.

~~4.~~5. Legal Survey: The final plat shall be based on a survey of the subdivision and shall conform to the approved preliminary plat and any stipulations attached thereto by the Planning and Zoning Commission. The plat shall show the title or name under which the subdivision is to be recorded, with the name of the engineer or surveyor platting the tract.

The engineer or surveyor shall in every case have a Certificate from the Arizona State Board of Registration for Engineers and Land Surveyors. The name or title of the subdivision shall not duplicate the name of any existing subdivision.

~~5.~~6. Final Plat Requirements: The record plat shall be drawn on plastic or other non-shrinking material on a sheet not exceeding thirty-six inches by forty-two inches (36" x 42") in size. ~~-~~Copies of the record plat shall be reproduced in the form of blueline, or blackline prints on a white background. The plat shall be drawn to an accurate scale of not more than two hundred feet (200') to an inch and preferably one hundred feet (100') to an inch.

The final plat shall contain the following information:

a. A Title, which includes the name of the subdivision and its location by section, township, range and county.

b. Name, registration number and seal of the registered professional engineer or land surveyor responsible for preparing the plat.

c. Scale (written and graphic), north point and date of plat preparation.

d. Location and description of cardinal points to which all dimensions, angles, bearing and similar data on the plat shall be referenced.

e. Any excepted parcel(s) within the plat boundary, accurately described by bearings and distances. Proper street and alley dedications adjacent to any proposed tracts or excepted parcels shall be provided by the subdivider by inclusion within the plat or by separate dedication noted on the plat.

f. Boundaries of the tract to be subdivided fully balanced and closed, showing all bearing and distances determined by an accurate survey in the field. All dimensions shall be expressed in feet and decimals thereof to the hundredth. No plat showing plus or minus distances will be approved. Corners of the plat should be noted and monuments found or set should be indicated; each of the two (2) corners of the subdivision traverse shall be tied by course and distance to separate section corners or quarter-section corners or other survey monuments as may be acceptable to the Town Engineer. The Planning and Zoning Commission may make such office and field checks as may be necessary to assure the correctness of the plat and may require the owner of the subdivision to pay for such checking.

g. Names, centerlines, right-of-way lines, courses, lengths and widths of all public streets, pathways, alleys, crosswalks and utility easements; radii, points of tangency and central angles of all curvilinear streets and alleys, and radii of all rounded street line intersections.

h. All drainage-ways shall be shown on the plat. The rights-of-way of all major drainage-ways, as designated by the Town Engineer, shall be dedicated to the public.

i. The location, width and use of all public or private utility easements shall be noted. All private utility easements shall be marked private easements.

j. Location and dimensions of all lots shall be shown. All minimum setback lines shall also be located and dimensioned.

k. All lots shall be numbered consecutively throughout the plat. Other Parcels, “tracts” and private parks shall be so designated, lettered or names and clearly dimensioned.

l. The accurate outline of all property which is offered for dedication for public use with the purpose indicated thereon, and all property that may be reserved by deed covenant for the common use of the property owners in the subdivision.

m. Name, book and page number of adjacent recorded subdivision, with location of existing adjacent lots, easements and rights-of-way, shown, or notation “unsubdivided” where appropriate. All proposed conditions should be graphically differentiated from existing conditions on adjacent properties and on excepted parcels within the plat.

n. The original and one copy of any private deed restrictions to be imposed upon the plat or any part or parts thereof shall be submitted with the final plat. Said deed restrictions must be in proper form to be recorded as a separate instrument. Space for cross-referencing to the deed restrictions shall be provided on the plat, to be completed by the County Recorder, e.g. “See Restrictions Recorded in Docket _____, Page _____, Yavapai County Recorder’s Office.”

o. Dedications: Statement of dedication of all roads, streets, alleys, crosswalks, drainage ways, and other easements for public uses, as shown on the plat, by the person holding title by

deed to the lands, by persons holding any other title of record, by persons holding title as vendees under land contract, and by wives of said parties. If lands dedicated are mortgages, the mortgagee shall also sign the plat. Dedication shall include a written description of the tract. Signatures must be witnessed. If the plat contains private streets, the public shall be reserved the right to install and maintain utilities in the street and the right to maintain and control drainage and flood diversion channel.

p. Acknowledgement of Dedication: Execution of dedication, acknowledged and certified by a notary public.

q. Space for approval by the Town Council under the signature of the Mayor and attested by the Town Clerk.

SECTION 704. HILLSIDE SUBDIVISIONS

A. PURPOSE

Planning, platting and development of hillside subdivisions involve special problems and require special handling by the subdivider and ~~his~~ their engineer, and by the Planning and Zoning Commission, staff, and reviewing officials. Hillside problems include the preservation of scenic beauty for the benefit of the general public, safe construction of public improvements commensurate with lower density and lesser public use, and safe construction of private improvements related to sewage disposal, water supply, storm drainage, and foundation bearing.

B. LOT WIDTH AND AREA

Lot width and area shall be closely related to the terrain, drainage, percolation factors, or construction of sanitary sewers, with emphasis placed on the selection of homesites.

1. Existing topography shown by suitable contour interval with location of major and minor washes. A separate sheet showing proposed contours may also be required if extensive regrading is proposed.
2. Road profiles and cross-sections may be required at the discretion of the Town Engineer.
3. Percolation tests and test boring logs in accordance with the requirements of the County Health Department should be taken at the proposed subdivision prior to the submittal of the preliminary plat.

C. PLAT PROCESSING TIME

Due to problems requiring special field and office review by the County Health Department, the Town Engineer, and the Staff, subdividers should expect processing time for hillside plats to exceed that otherwise required for normal plats.

D. HILLSIDE SUBDIVISION DESIGN

Special problems of hillside subdivision design are discussed under ~~the~~ Section 709 Design S~~tandardsection~~.

SECTION 705. REVISIONS OF PLATS OR REPLATS

A. Any Division of a lot in a recorded subdivision into five (5) or more parcels, or any changes in lot lines involving five (5) or more adjoining lots in a recorded subdivision, but creating no new street, may be processed in accordance with Final Plat Procedures on these Subdivision Regulations, after a Pre-Application Conference with the Zoning Administrator.

B. Any replat involving dedication or abandonment of land for a public street shall comply with all procedures set forth in these requirements, Sections 7406 and 7407.

C. If abandonment of a street, pathway, alley or public utility easement in a previously recorded subdivision is necessary, the replat of that area shall not be forwarded to the Town Council for final action until abandonment proceedings are completed and recording data noted on the final plat.

SECTION 706. ABANDONMENT OF A RECORDED SUBDIVISION OR REVERSION TO ACREAGE

A. If no lots in the subdivision, for which a final map has been approved and recorded, have been sold within three (3) years from the date of recordation, or if none of the improvements have been made within two (2) years from the date of approval, the Town Council may on its own motion hold a public hearing after notice, to determine whether the approval of such final map should be revoked. Such revocation shall be effective upon recordation of a certified copy of such resolution; and thereupon, all streets, rights of way, and easements dedicated or offered for dedication by such map shall be of no further force or effect.

B. Pursuant to provisions of Title 18, Chapter 2, Article 1, Section 18-201, and Chapter 5, Article 1, Sections 18-501-508, ARS, the abandonment of all or part of a recorded subdivision may be initiated by written petition to the Town Council, said petition to be signed by teno (10) or more owners of real property in Jerome, requesting abandonment of all streets, alleys and easements within said subdivision and giving the legal description and recording information thereof.

C. Applications or petitions for abandonment are filed with the Clerk of the Town Council and referred for recommendation to the Zoning Administrator, Town Engineer, and utility companies concerned.

D. Such abandonment may necessitate consideration for rezoning.

E. Any action considered by the Council relating to revocation of all or part of a subdivision whether plots or lots and rights-of-way shall be referred to the Planning and Zoning Commission for evaluation for the following:

   1. Conformancerrelations with the Town's General Plan.
   2. Correlations with proposed development in adjacent areas.
   3. Recommendation as to whether or not zoning changes should accompany such action.
   4. Effect of such action on existing development in areas affected by proposed reversion or abandonment.

F. Any other actions applicable to the above process and permitted by State Laws are permissible.

G. Requisite actions under Article 1, Chapter 520, Title 18, Arizona Revised Statutes to abandon the streets and easements should be carried on separately and simultaneously with any procedure to abandon a subdivision or revert it to acreage.

SECTION 707. AMENDED SUBDIVISION~~S~~ MAPS

A. Any map of a subdivision that has been filed for record may be amended to correct an error in any course or distance or other necessary item that was omitted therefrom, or to correct a drafting, graphic, technical or similar type error; by the filing for record of an amended map of said subdivision. The County Recorder shall examine such amended map and if such examination discloses that the only changes on the amended map are changes above authorized, he shall certify this to be a fact over his signature on the amended map. Thereafter, the amended map shall be entitled to be recorded in the office of the Recorder in which the original subdivision map was recorded. Such map shall be marked "AMENDED MAP OF _____". Subsequently, if more than one amended map is necessary, the successive maps shall be titles "SECOND AMENDED MAP OF _____" and follow in numerical sequence order. The use of the terminology of "Amended Map" shall not be used to change or vary or add any lot lines, streets, or easements or statements that were not contained on the approved preliminary map, since such actions necessitate re-processing of the plat.

SECTION 708. SUBDIVISIONS WITHIN THREE (3) MILES OF TOWN

~~A.~~ In accordance with Arizona Revised Statutes, Section 9-474 as amended: ~~The subdividers of land outside the Town but within three (3) miles of the corporate limits shall submit all plats to the Town of Jerome for review and , comment and approval as follows:~~

~~B.~~A. When the owner of land, the whole or part of which is an unincorporated area within three (3) miles from the corporate limits of the Town of Jerome, desires to subdivide the land into lots for the purpose of selling it by reference to a map or plat they shall first given written notice to the Town of their~~his~~ intention to subdivide the land, naming and describing the land so that it may be identified upon the ground, and shall submit to the Town a tentative plat of the land showing the manner in which he desires to subdivide the land.

~~C.~~B. If the Town desires that the streets or alleys of the tract conform with the projected streets or alleys f the Town of Jerome, or of an adopted plan of the Town of Jerome, then the Town may, at its cost, project the lines of its streets and alleys to the nearest outer boundary lines of the subdivision and thereon mark the same, and shall supply the owner with the courses of the lines.

~~D.~~C. The Town of Jerome may also submit to the owner a written report recommending changes in the submitted plat of the location or dimension of streets, pathways, alleys, parks, easement for rights-of-way or property intended to be devoted to the use of the public. ~~-~~ One copy of the report shall be delivered to the Board of Supervisors of the County.

D. If the report is given to the owner, or the lines are so marked and the courses given the owner within thirty (30) days from the date of service of notice of intention to the Town, then the owner shall cause the land to be subdivided into blocks, lots, streets, alleys, parks and parkways, so as reasonably to conform to the report and the projected ~~street~~ lines and courses thereof, and shall prepare in duplicate an accurate map or plat thereof on cloth, drawn and attested by a registered civil engineer or registered land surveyor from their survey of the ground. The engineer or registered land surveyor shall, in making the surveys, leave sufficient permanent monuments so that another surveyor or engineer may retrace their work. The nature and location of the monuments shall be plainly shown on the plat. ~~-~~

E. The plat shall particularly set forth and describe:

1. Parcels of ground within the tract or subdivision to be used for public purposes or offered for dedication for public uses, and their dimensions, boundaries and courses.
2. Either by number or letter, lots intended for sale, or reserved for private use, and their dimensions, boundaries and courses.
3. The location of the subdivision into lots with reference to adjacent subdivisions, the maps or plats of which have been previously recorded, or if none, then with reference to corners of a United States survey, or if on land unsurveyed by the United States, then to some prominent artificial monument established for such purpose.

SECTION 709. DESIGN STANDARDS

A. GENERAL

1. The Planning and Zoning Commission shall insure that appropriate provisions are made for the harmonious development of the Town by requiring (1) the coordination of streets within subdivisions with existing or planned streets or with other features of the General~~Comprehensive~~ Plan, (2) a regulation of population density and traffic volume which will create conditions favorable to public health, safety and convenience, and by (3) recommending adequate spaces for public use (such as for parks, schools, recreational areas, etc.).
2. Adequate access shall be provided from an existing public road to land being subdivided. Approval of such access shall be a condition of approval of the plat by the Commission and Council.
3. In all subdivisions, it is urged that due regard be shown for all natural features such as trees, water courses, historical and archaeological sites, and similar community assets which, if preserved, will add attractiveness and value to the property and community.
4. Portions of property within the ownership of the subdivider, contiguous to the subdivided property shall not be excluded from within the boundaries of a subdivision when needed or required for any traffic, drainage or flood control facility pertinent to said subdivision.
5. Portions of property within the ownership of the subdivider, contiguous to the subdivided property but not included within the boundaries of the subdivision, shall be of such size or shape that they could be used for some purpose compatible to surrounding development and meet the specifications of other Town regulations.
6. Separate parcels omitted from a preliminary plat, that form lots or building sites of less than five (5) acres each, or that could be part of this development by extending proposed roads shall be included in the proposed plat.
7. The design of those elements of a subdivision involving structural matters, location and design and building of roads, pathways, drainage provisions, water supply and sewage disposal shall be made by an engineer registered in the State of Arizona and qualified to specify the standards for such design or by an assistant under their~~his~~ direction and supervision.
8. A supplementary set of standards may be adopted by the Commission and approved by the Council on each item as described. These standards shall be separate from this Ordinance and shall be developed by the Town Engineer. They may be revised whenever environmental circumstances or technological improvements necessitate or justify such changes.
9. It is the responsibility of the developer to comply with these regulations. ~~-~~At any time in the processing of a subdivision tract that non-compliance is detected notification by certified or registered mail of said non-compliance shall be transmitted to the developer. If compliance is made by the developer processing shall proceed from date of compliance as if the non-compliance had not existed. ~~-~~If compliance is not made within thirty (30) days of the mailing of the certified letter, processing shall be terminated. Once processing is terminated, a tract must be resubmitted.

B. SUITABILITY OF THE LAND

1. The Planning and Z~~z~~oning Commission shall not approve the division of land as submitted if, from adequate investigations, it has determined that said land is not suitable for the kind of development proposed due to such factors as flooding, bad drainage, steep slopes, rock formations, soils or design features likely to be harmful to the safety, welfare and general health of the future residents, unless reasonable corrections acceptable to the Commission are submitted by the developer.

C. WATER COURSES

1. In the event that the subdivision is traversed by or is contingent to lakes, streams, or other bodies of water, the subdivider shall provide a right-of-way for storm drainage conforming substantially with the line of such natural water course, channel, stream, or creek, or provide an acceptable realignment of said water course.

D. STREETS, GENERAL

2. The arrangement, character, extent, grade, width, and location of all streets shall conform to the General~~Comprehensive~~ Plan or the preliminary plans of said Commission.
3. Where such is not shown on the General~~Comprehensive~~ Plan or preliminary plans, the arrangement of streets shall provide continuation or appropriate projection of existing major streets in surrounding areas. ~~-~~All center lines shall be contiguous territory. ~~-~~In cases where straight continuations are not physically possible, such center lines may be continued by curves.
4. The minimum width of right-of-way, measured from lot line to lot line, shall be as prescribed by the Town Engineer, the General~~Comprehensive~~ Plan, and these regulations. ~~-~~Proposed streets shall extend or project existing streets at their same or greater width, but never at a width less than that prescribed by established standards.
5. All streets and highways shall be graded, surfaced, and improved to cross sections and grades approved by the Town Engineer and as established by these regulations. ~~-~~The subdivider shall improve the extension of all subdivision streets and other public ways ~~,~~ to the intercepting shoulder line of any County road, Town street, or State highway.

   Grades given are the maximum allowed for certain short-range distances and do not imply permission for~~of~~ an extensive distance at maximum grade.
6. Structures or culverts shall be installed as deemed necessary by the Town Engineer for drainage, access, and public safety. ~~-~~ Such structures and culverts are to be placed to grades and shall be of a design and size approved by the Town Engineer. ~~-~~Adequate drainage of the subdivision public ways shall be provided by means of said structures or culverts and by other approved means, in accordance with the engineering standards adopted by the Town Engineer.
7. All roads developed or improved in conjunction with subdividing shall either be:
   a. Built to Town standards, dedicated by the map and accepted by the Council.
   b. Built to Town Council standards, dedicated by the map and approved by the Council in conjunction with providing a Performance Bond of Assurance of Completion Bond.
   c. Built and offered for dedication by the subdivider, refused by the Council, but approved as private roads with adequate assurances of upkeep.
8. Adequate provisions shall be made in the design of subdivisions for access to each lot or parcel, and for access to adjacent properties.
9. Half roads or partial width rights-of-way should only be approved as partial major roads along a section line where no alternative design exists, or where said partial rights-of-way would require the dedication of additional contiguous rights-of-way to make it full width, provided that that developer or their~~his~~ representative shall include evidence that the additional right-of-way is available or is permanently reserved for future road purposes. ~~-~~ Half roads should also be accepted where they are a portion of the road system approved in the General~~Comprehensive~~ Plan.
10. When a tract fronts on an arterial road, the Commission may require such lots to have reverse frontage.
11. Provisions shall be made for railroad and other public or private utility crossing necessary to provide access to or circulation within the proposed subdivision, including the obtaining of all

necessary permits from the public or private utilities involved, and any regulatory agencies having jurisdiction. The cost of such crossings shall not be assumed by the Town.

12. Minor Residential Streets: minor residential streets shall be designed to provide proper circulation of local traffic.

13. Dead-End Streets or Cul-de-Sacs:

    a. Minor terminal streets designed to have one end permanently closed shall not be more than six (6) times the minimum lot width nor one thousand three hundred twenty feet (1,320') long unless necessitated by topography. They shall be provided at the closed end with a circular turn-around or a cul-de-sac having a right-of-way radius, or at least forty-five feet (45').

    b. Where, in the opinion of the Commission, it is desirable to provide street access to adjoining properties, proposed streets shall be extended by dedication to the boundary of such property. Such dead-end streets shall be provided with a temporary turn-around having a roadway radius of at least forty-five feets (45').

14. Intersections:

    a. Street intersections shall be as nearly at right angles as possible, and no intersection shall be less than sixty (60) degrees.

    b. Property line radii at street intersections shall not be less than twenty-fgive feet (25'); the Town Engineer may require a greater curb radius.

    c. Whenever necessary to permit the construction of a curb having a desirable radius without curtailing the sidewalk at a street corner to less than normal width, the property line at such a corner shall be rounded or otherwise set back sufficiently to permit such construction.

15. Jogs in Minor Streets: Street jogbs with centerline offset of less than one hundred thirty-five feet (135') shall not be approved.

16. Street Names: Proposed streets which are obviously in alignment with other existing names or numbered streets in that vicinity, as determined by the Zoning Administrator, shall be given the designation of said existing street. In no case shall the name for proposed streets duplicate those of existing streets within the same planning area, except as aforementioned, irrespective of the use of such varying suffixes as street, avenue, road, boulevard, drive, place, court, or other designation. Through its index of street names and numbers, the Commission can assist the subdivider in avoiding such duplications.

17. Street Standards and Improvements: Unless specifically requested by the subdivider and/or designated by the Planning and Zoning Commission or Town Council and agreed to by both parties, the following general street standards shall apply:

(see following page for general street standards)

Classification	Min. R/W	Street Section	Paved Section	General Thickness	Type Curbs	Maximum Grade	Minimum Curve Radius
Large Lot Residential (1-acre lots or larger)	50’	28’	24’	As Req’d by Town Engineer	W/O Curb With Wedge Curb	12%	100’
Residential	50’	36’	32’	As Req’d by Town Engineer	*Rolled or Vertical	12%	100’
Residential Collector	60’	42’	40’	As Req’d by Town Engineer	Vertical	8%	200’
Major Urban Collector	80’	58’	48’	As Req’d by Town Engineer	Vertical	6%	300’
Major Arterials (Rural Areas)	110’	28’	24’	As Req’d by Town Engineer	W/O Curb With Wedge Curb	6%	500’
Major Arterial (Urban Areas)	110’	2-40’ Divided	60’	As Req’d by Town Engineer	Vertical	6%	500’
Cul-de-sacs	45’ Radius	38’ Radius to back of curb		Roll	Rolled or Vertical		

*Except that for subdivisions wherein all lots are 18,000 sq. ft. or larger and haveing a minimum 100-foot frontages, redwood headers are permitted to protect paving at shoulders in lieu of concrete curbs; lots fronting on a cul-de-sac within such a subdivision may be excepted from the 100-foot frontage requirement.

Other types to be approved by the Zoning Administrator & Town Engineer.

All improvements to be installed in accordance with Town Engineering Standards.

18. Alleys: Alleys shall be provided to the rear of all lots used for business purposes, as deemed necessary, but will not be required for residential areas. ~~-~~Alleys may be permitted where a subdivider can produce evidence satisfactory to the Commission of the desirability of such provisions.

19. Sidewalks: Concrete sidewalks shall be constructed along at least one side of every street shown on the plat in accordance with applicable standard specifications of the Town. Minimum width shall be four feet (4'); except sidewalks shall not be required in subdivisions with all lots containing over eighteen thousand (18,000) square feet each.

20. Pathways may be constructed at locations other than adjacent to streets and may eliminate the need for~~of~~ sidewalks when approved by the Planning and Zoning Commission.

21. Block Design: The length, width, and shape of blocks shall be determined with due regard to provisions for adequate building sites, the zoning requirements as to lot area and dimensions, limitations and opportunities of topography, and needs for convenient access, ~~and~~ circulation, control, and safety to streets and pedestrian traffic.

    a. Length: Block shall not be more than one thousand three hundred twenty feet (1,320) in length except as the Commission considers necessary to secure efficient use of land or as a desired feature of street design.

       Any block having a length of six~~e~~ hundred feet (600') or greater may be required by the Planning and Zoning Commission to have provisions made for a pedestrian walk-through having a twelve-foot (12') right-of-way, when deemed essential for pedestrian circulation, access to schools, playgrounds, etc.

    b. Width: Blocks shall be wide enough to allow two (2) tiers of lots.

E. LOTS

1. Arrangement: The lot area, width, depth, shape, ~~and~~ orientation, and the minimum building setback lines shall be appropriate for the location of the subdivision, for the type of development and use contemplated, and shall conform to the zoning requirements and these regulations.
2. Insofar as practical, side lot lines shall be at right angles to straight street lines or radial to curved street lines. Each lot must front upon a public street or road or approved access.
3. Accessibility: Eachst lot shall be accessible to the street on which it fronts. ~~-~~Where necessary, lots shall be graded as a condition of approval of a final map to ~~ei~~nsure access to and adequate use of the property.
4. Minimum Size: The size, shape, and orientation of lots shall be such as the Commission deems appropriate. Each lot shall be suitable for the purpose for which it is intended and shall contain a usable building site. The area of a lot shall be deemed the area shown, exclusive of any area designed for road purposes or any easement for access or road purposes shown on the map.
5. Where lots are designed with minimum areas, corner lots shall be wider than minimum to provide adequate usable area, if necessary.
6. Large Tracts or Parcels: When the land is subdivided into larger than ordinary building lots, such parcels shall be arranged so as to allow for the opening of future streets and logical re-subdivision.
7. Lot Numbering:
   a. Each lot shall be designated by an ~~"~~Arabic numeral.
   b. If block designations are not used, numbering shall be in consecutive sequence within the block beginning with the number "1" or wherever lots have common side boundaries within a subdivision or within a block along each street and consecutive numbering shall follow from one block to another.
   c. When block designations are used, numbering shall be in consecutive sequence within each block area commencing with the number "1" for each block.
   d. Parcels and/or tracts shall be designated by capital letters and be designated in alphabetical sequence starting with the letter "A".

~~d.~~8. Lot line adjustments, lot ties, and lot combinations may be administratively approved by Town staff without a public hearing, subject to application and review procedures established by the Zoning Administrator.

F. REFUSE, SANITARY SEWAGE, AND WATER SYSTEMS

1. Where a public sanitary sewer system is reasonable accessible, the subdivider shall connect with such sewer and provide a connection to each lot.
2. A sewer collection and treatment system shall be provided as a condition of approval for any subdivision containing lots or parcels less than one acre in area.
3. When connection to a sanitary sewer system is not available for lots or parcels of one acre or more, septic tanks or other disposal methods may be permitted provided that a statement is submitted to the Planning and Zoning Commission by the County Health Officer or their~~his~~ authorized representative certifying that field investigation has shown that ground slopes and soil conditions will allow for satisfactory disposal by this method with the lot arrangement and size as shown on the subdivision map and that necessary drainage fields are either contained within the property or permitted by adjoining land owners.

4. In areas where public sanitary sewers are not reasonable accessible, but where the future owning agency agrees to effect temporary disposal of sewage, the subdivider shall plan and construct sewers within and for the subdivision for connection with a future public system.
5. Water mains connecting with the existing Town system shall be installed to serve each lot. All connections shall be subject to the approval of the Town Engineer.
6. Water mains and fire hydrants shall be installed to grades, location, design, and sizes on plans submitted by a registered engineer in the State of Arizona and approved by the Town Engineer and the Town Fire Department.
7. When connection to a Town water system is not available, the subdivider may provide service by establishment of a mutual water system in which case water mains and fire hydrants shall be installed to grades, location, design and sizes as submitted by a registered engineer in the State of Arizona and approve by the Town Engineer, and the source of supply developed and improved to the satisfaction of the County Health Officer or their~~his~~ representative so that the subdivision may be adequately supplied with water.
8. A Water system shall be provided as a condition of approval for any subdivision containing lots or parcels less than two (2) acres in area.
9. In the case of a subdivision with lots over two (2) acres in area, water supply may be from other than a community system. In this case sufficient evidence shall be submitted showing that potable water is available and can be obtained for all lots in the subdivision.
10. Minimum lot size may be affected by requirements of the County Health Department pertinent to water and sanitary sewage systems.
11. Public Sanitary Sewage and Water Systems: The requirements for development of public water supplies and sewage disposal systems shall not be less than those outlined by the Arizona State Health Department regulations and engineering criteria for such installations.
12. Refuse Disposal: The subdivider shall indicate the method of refuse collection and disposal.

G. EASEMENTS AND UTILITIES

1. Except where alleys are provided for that purpose, easements at least eight feet (8') in total width shall be provided along rear lot lines for poles, wires, conduits, sanitary sewers, gas mains, water mains, or for other utilities. Where necessary, additional easements shall be located along the side lot lines. Half or partial easements may only be approved where written commitment of dedication of necessary additional easements are on record. All easements shall be in accordance with those approved by the utility companies concerned.

H. MONUMENTS

1. Survey monuments acceptable by the Town Engineer shall be set for all points of reference on the outside boundary, at each lot corner and/or at all points of curvature or tangency of the subdivision.

   Whenever streets are improved to the extent that paving is included, survey monuments will be required at all street intersections and at the points of curvature and point of tangency of all curves. Monuments shall be set as approved by the Town Engineer.

I. PUBLIC REQUIREMENTS

1. During the design and layout of the subdivision, consideration shall be given to the requirements for public land and open spaces as specified in the General~~Comprehensive~~ Plan. The Planning and Zoning Commission may require certain lands to be reserved for public purposes in conformance with the General~~Comprehensive~~ plan as specified in these regulations.

J. AESTHETIC CONSIDERATIONS

1. The subdivider shall give consideration to preserving natural features in the design and layout of a subdivision. ~~-~~Lots and buildings should be oriented to make advantageous use of any views or natural features.

   All utility installations shall be located underground, except as exempted below, to assure that they do not detract from the design and amenity of the subdivision.

   Exemptions:

   a. Electric transmission lines over 600 Volts, and electric distribution feeder lines, as defined elsewhere herein, together with switchyards, substations and equipment.

   b. Temporary service facilities, such as facilities to furnish emergency service during an outage, facilities to provide service to construction sites, or other service of limited duration.

   c. Above ground appurtenance of underground utility systems with a total height not to exceed seven feet (7').

K. SPECIAL DEVELOPMENT SUBDIVISION

1. Modified standards and requirements of these regulations may be accepted by the Planning and Zoning Commission in the case of a plan and program for a neighbor unit, which in the judgement of the Planning and Zoning Commission provide adequate public recreation, light, air and service needs for the tract when fully developed and populated, and which also provides such covenants or other legal provisions as will assure conformity to an achievement of the General~~Comprehensive~~ Plan or zoning regulation.
2. When such a preliminary development is submitted for appraisal, it shall be accompanied by a petition for variance, as outlined in these regulations, setting out all deviations from standards as herein required, and explaining the reasons therefor.
3. Special development variations may include (1) Streets of less width than standard requirements, but with adequate provisions for off-street parking; (2) up to four (4) lots served by a common driveway where topographic conditions would justify such treatment; (3) up to four (4) buildings per site in a cluster of less than minimum lot area of a corresponding contiguous area plus the building site areas brings the total combination of building sites and common area to minimum area standards; and provisions are made that each lot owner has an equal undivided interest in the contiguous parcel and it is restricted to be used only for recreational purpose or to remain "open land"; (4) special common sanitation facilities.
4. Special development subdivisions shall be regulated as outlined in the zoning regulations.

L. SPECIAL DESIGN STANDARDS FOR HILLSIDE SUBDIVISIONS

1. Street grades shall not exceed twelve percent (12%)
2. Street grades of twelve percent (12%) shall have a maximum length of six hundred feet (600').
3. Minimum dedicated street right-of-way; to be justified by extreme cross-slope cut and fill areas or similar conditions.
4. "T" or "Y" type turning and backing areas may be substituted for circular turn-arounds.
5. "Panhandle", double frontage, and other unorthodox lots may be permitted so long as it can be adequately demonstrated that no such lot will adversely affect any other lot.
6. Private streets or drives serving not more than three (3) lots shall be permitted to a maximum length of three hundred feet (300').

SECTION 710.~~7~~ IMPROVEMENTS

A. GENERAL

The subdivider shall cause to be installed and constructed all street and road improvements, public utilities, survey monuments and markers and lot grading. All such improvements shall conform to the requirements of these regulations and all other applicable Town, County and State standards, specifications, codes and regulations. These standards may be obtained, among others, from the Town Clerk, Town Council, Zoning Administrator, County Health Department, County Highway Department.

1. The Subdivider shall be responsible for the cost of the following:
    a. Setting of survey monuments and markers.
    b. Street and road construction for all street improvements including base, grading, curbs, gutters, sidewalks, pavement, street trees, street name signs, culverts and bridges.
    c. Water and sewer line installations including fire hydrants and manholes.
    d. Required storm water system and/or other drainage improvements.
    e. All field density and related testing of base, subbase and other compacted backfill, gradation tests, concrete cylinder tests, asphalt tests and/or other related tests required to insure minimum standard requirements.
2. The subdivider shall be responsible for assuring the installation of the following, by negotiating with private companies, or by providing the cash for their installation when considered necessary by the Planning and Zoning Commission and the Town Council.
    a. Electric Lines.
    b. Streetlights.
    c. Gas Lines.
    d. Street Naming Signs.
    e. Telephone Lines.
3. Building permits will not be issued for new construction until all required street and utility improvements adjacent the property to be improved are installed, or assurance provided that they will be constructed by the subdivider.

B. ENGINEERING DRAWINGS

1. Within one hundred and twenty (120) days from final plat approval, the subdivider or developer shall submit to the Planning and Zoning Commission and the Board of Supervisors engineering drawings and construction plans for approval prior to the commencement of any work by the subdivider.

    At the time of submitting improvement plans and engineering drawings, the subdivider shall submit an estimate of the costs of constructing the required improvements to determine the amount of performance or surety guarantee to be required. The estimate shall specify the sources used as a basis to determine unit and project costs. The Planning and Zoning Commission and/or Board of Supervisors shall make any checks and revisions in the estimates as they deem necessary prior to approval.

    All required supplementary engineering studies or tests as required by the Planning and Zoning Commission and/or Board of Supervisors shall be approved prior to any construction activities by or for the subdivider.
2. All required engineering studies and exhibits shall be prepared by qualified and legally registered or certified engineers or engineering firms.
3. Contractors engaged by the subdivider to install required improvements shall be licensed and registered as required by State or local law.

4. A time construction schedule of installation of public improvements shall be submitted to and approved by the Planning and Zoning Commission and the Town Council prior to the commencement of any and all construction activities. The approved schedule shall be flexible enough to allow delays due to inclement weather or other unavoidable circumstances. In the event that construction at some time can no longer adhere to the approved schedule; the subdivider shall submit a revised schedule to the Planning and Zoning Commission and the Town Council for approval.
5. It may be desirable, during construction of improvements, for the subdivider to modify some standards and specifications of the approved engineering drawings. In this event, the subdivider shall, prior to making such modifications, submit a schedule of such modifications with reasons of necessity to the Planning and Zoning Commission and the Town Council for approval.
6. At the completion of all new construction relating to street or utility improvements the subdivider shall submit "as built drawings" to the Town Engineer prior to approval of the work by the Engineer.
7. The subdivider shall submit an estimate for the costs of constructing the required improvements to determine the amount of performance guarantee to be required. The estimate shall specify the sources used as a basis to determine unit and project costs. The Planning and Zoning Commission and/or Town Council shall make any checks and revisions in the estimates as they deem necessary prior to approval. The Town Engineer shall advise the Commission and Council of the adequacy of the estimate submitted.

C. REQUIRED IMPROVEMENTS

1. The subdivider shall cause to be set permanent survey monuments at locations approved by the Planning and Zoning Commission or Town Engineer, provided that ordinarily such monuments shall not be more than one thousand three hundred fee (1,320') nor less than six hundred sixty fee (660') apart; and, in addition, monuments of iron pipe, steel bars, or concrete, shall be set at all street intersections, at all tangent points as may be required by the Planning and Zoning Commission to make the retracing of the lines shown on the Town Official maps reasonable convenient.
2. The subdivider shall cause to be installed public water facilities including fire hydrants, public sanitary sewer systems, and a storm sewer system and/or other drainage improvements designed and constructed according to specifications approved by the Planning and Zoning Commission and the Town Council where required.
3. The subdivider shall cause to be installed and constructed according to specifications approved by the Planning and Zoning Commission and the Town Council, all street improvements including grading, surfacing, curb and gutter, sidewalks, street name signs, streetlights and telephone lines where required.

D. GUARANTEES OF PERFORMANCE

1. Before recording of a plat by the Town Council, the subdivider shall have dedicated all streets, pathways and alleys in the proposed subdivision together with sidewalks, curbs and gutters, in accordance with the requirements thatof the Planning and Zoning Commission may impose and specify as to grading, paving, width, location, drainage, courts, culverts, bridges, and other necessary requirement. The subdivider shall enter into a written agreement with the Town Council wherein the subdivider shall have deposited a performance bond in an amount established by the Town Council or have deposited with the Town of Jerome sufficient funds to cover the cost of such improvements. The amount of the performance bond orf the funds in escrow shall be determined from the cost estimates as specified in 7610.B02.7 (G) and/or 710.B.1(A) above, or letter of assurance from an acceptable financial institution that sufficient funds have been set aside for pledged to complete such improvements.

E. MINIMUM STANDARDS FOR SUBDIVISION STREET PAVING

1. Streets; Improvement Security: All streets covered by these regulations shall be paved, with curbs and gutters installed when required prior to the public sale of any land appurtenant to said streets. In lieu of the installation of paved streets, curbs and gutters by the subdivider, and in order to insure the proper installation of said paved streets, curbs and gutters, the subdivider may provide security as follows: (1) post bond, (2) establish a trust, or (3) provide for other appropriate security; provided however, that the following requirements are met:

    a. The subdivider shall declare their~~his~~ intention of proceeding under this Section in their~~his~~ letter of intent, and further, they shall designate whether a bond, trust, or some other appropriate security shall be provided. The letter shall be notarized.

    b. That said bond, trust, or other appropriate security be submitted to the Town Council for acceptance prior to recording the final plat by said Council.

    c. That the amount of said bond, trust, or other appropriate security be based on a cost estimate prepared by a registered professional engineer in an amount to cover the complete installation of the improvements and be approved by the Town Engineer prior to submission of said estimate to the Town Council.

    d. That the completion date for the installation of said paved streets, curbs and gutters be declared and notice given to the Town Council and approval given by the council prior to the final plat approval by said Council.

    e. The security as herein before required shall provide for its forfeiture to the Town unless good and sufficient reasons can be provided that said improvements have not been installed in accordance with these regulations or are not accepted by the Town by the declared completion date due to the default of the subdivider; the amount of forfeiture shall be the cost to the Town to complete the installation of said improvements in accordance with these regulations.

    f. All matters contained in this Section may be referred to the Planning and Zoning Commission by the Town Council for preliminary study and recommendation.

    g. The Town Council considering recommendations from the Planning and Zoning Commission may require improvement security, as delineated for streets in this ordinance, for private streets, road, or driveways in an approved planned area development prior to recording a final subdivision plat.

2. Waiver of Street Improvements in Certain Subdivisions: Paving widths, curbs, gutters and sidewalks may be waived by the Town Council considering recommendations of the Planning and Zoning Commission, subject to topographic terrain or aesthetic conditions.

3. Acceptance of Streets: Subdivision streets will be accepted for maintenance by the Town only when they meet requirements of the minimum standards as set forth by the Town Engineer and all other applicable Section of these regulations.

F. PARTIAL DEVELOPMENT; DECLARATION OF IMMEDIATE IMPROVEMENT

1. The subdivider may provide plans for the partial development of subdivisions, whereby Town Council in accepting the final plat for recording, shall require that the bond, trust or other appropriate security be sufficient to cover that portion of the subdivision premises which the subdivider has elected to immediately improve, as that portion is described in a “declaration of immediate improvement” which the subdivider shall submit to the Town Council, provided that no improvement or sale of lots shall be commenced in any other area of the subdivision not covered by a “declaration of immediate improvement” on the new area, and provided further that the proper security is approved as specified herein, and provided further that a completion date for the improvements for each area be declared in each “declaration of immediate improvement”.

SECTION 711. VARIANCE AND APPEALS

A. HARDSHIP

The Planning and Zoning Commission and the Town Council may authorize variances from the terms of these regulations, where, by reason of exceptional or extraordinary situation or condition of a tract of land, the strict application of any regulation enacted herein would result in peculiar and exceptional practical difficulties to, or undue hardship upon, the subdivider. Such variance may be given provided such relief may be granted without detriment to the public good and without impairing the intent and purposes of these regulations.

B. APPEALS

Any aggrieved person whose preliminary~~final~~ plat has been rejected or disapproved by the Planning and Zoning Commission may appeal to the Town Council for a hearing within thirty~~sixty~~ (3~~6~~0) days after such rejection. The Council's decision for both preliminary and final plats shall be final and shall become effective immediately. Notice of the decision shall be mailed to the applicant at the address shown in the application.

SECTION 712. LEGAL PROCEDURE, VIOLATION, PENAL~~I~~TIES AND REMEDIES

A. LEGAL PROCEDURES

Any use of development of pr~~e~~op~~e~~rty contrary to the provisions of the Subdivision Regulations shall be and the same is hereby declared to be unlawful, against the public safety and welfare, and a public nuisance and the Town Attorney shall, upon order of the Town Council, or in their~~his~~ own initiative, immediately commence all necessary actions or proceedings for the abatement, enjoinment and removal thereof in the manner provided by law, shall take such other lawful steps and shall apply to such court or courts as may have jurisdiction to grant such relief as will abate, enjoin and restrain any person, firm, or corporation from setting, developing, erecting, building, moving, or maintaining any such building or using any property contrary to these provisions of these Subdivision Regulations, or otherwise violating these Subdivision Regulations.

B. VIOLATIONS AND PENALTIES

Any violations of this Ordinance shall be subject to the enforcement provisions and penalties set forth in Chapter 18 of the Jerome Town Code~~Any person, firm, corporation, or other legal entity who violates any provision of these regulations shall be guilty of a misdemeanor and, upon conviction thereof, shall be punished by a fine of not more than three hundred dollars ($300.00). Each day that a violation is permitted to exist may constitute as separate offense. The imposition of any sentence shall not exempt the offender from compliance with the requirements of these regulations~~.

C. REMEDIES

All remedies provided for herein shall be cumulative and not exclusive. The conviction and punishment of any person hereunder shall not relieve such person from the responsibility to correct said prohibited conditions. In addition to the other remedies provided in the Section, any adjacent or neighboring property owner who shall be especially damaged by the violations of any provisions of these Subdivision Regulations may institute, in addition to the other remedies provided by law, injunction, mandamus, abatement or any other appropriate action, proceeding or proceedings to prevent or abate or remove such unlawful erection, constructions, reconstruction, alteration, maintenance or use.

SECTION 713. AMENDMENTS

A. AMENDMENTS

The Planning and Zoning Commission and the Town Council may amend these regulations after giving public notice of any such proposed amendment and after holding a hearing thereon.

B. SUBDIVISION REVISIONS

No changes, erasures, modifications or revisions shall be made in the final plat after approval of the plat has been given by the Town Council.

SECTION 714. ENFORCEMENT AND EFFECTUATION

A. ACCEPTANCE

No final plat of a subdivision shall be approved by the Planning and Zoning Commission and accepted by the Town Council unless it conforms to all of the provisions of these regulations.

B. INTERPRETATION

1. In the interpretation and application of the provisions of these regulations, the regulations shall be regarded as the minimum requirements for the protection of the public health, safety, comfort, morals, convenience, prosperity and welfare.
2. These regulations shall not abrogate or annul any permits issued before the effective date of these regulations, nor shall they abrogate or annul any easement, covenant, or any other private agreement.

C. SEPARABILITY

1. If any article, section, subsection, sentence, clause, or phrase of these regulations is for any reason held to be unconstitutional or invalid by a decision of any court of competent jurisdiction, such holding shall not affect the validity of the remaining portions. ~~-~~The Planning and Zoning Commission hereby declares that it would have adopted these regulations and each article, section, subsection, sentence, clause and phrase thereof separately and irrespective of the fact that if any one or more of the articles, sections, subsections, sentences, clauses, or phrases be deemed unconstitutional or invalid.
2. If the application of any provisions of these regulations to any tract of land is declared to be invalid by a decision of any court of competent jurisdiction, it is hereby declared to be the intent that the effect of such decision shall be limited to that tract of land immediately involved. Such a decision shall not affect, impair or nullify these regulations as a whole or in any part in its application to any other tract of land.

D. REPEALS

All regulations or codes of the Town of Jerome inconsistent herewith, to the extent of such inconsistency, and no further, are hereby repealed. ~~-~~The repeal of any of the above-mentioned regulations, or codes, does not revive any other regulation or code. Such repeals shall not affect nor prevent the prosecution or punishment of any person for the violation of any regulation or code repealed hereby, for an offense committed prior to the repeal.

~~E. EFFECTIVE DATE~~

~~Effective Date: The provisions of these regulations shall be effective thirty (30) days after final approval and adoption by the Town Council of Jerome, Arizona, as provided in Title Nine, 474-479, of the Arizona Revised Statues, as amended.~~

APPENDICES

APPENDIX A~~SECTION 201.~~ DEFINITIONS~~G~~

Abutting - the condition of two adjoining properties having a common property line or boundary, including cases where to or more lots adjoin only a corner or corners.

~~**Access - denotes the right vested in the owner of land which adjoins a road or other highway to go and return from his own land to the highway without obstruction. Access to property does not necessarily carry with it possession**~~

Access, Direct – The provision for immediate ingress and egress of vehicles from an abutting property to an adjacent street.

Access, Indirect – The provision for ingress and egress of vehicles from an abutting property to an adjacent street, is shared by two or more properties or is channeled by some means indirectly to the adjacent street

Access Point – A driveway or other opening for vehicles to enter from or exit to a street.

Access, Private – A private access is an access not in public ownership or control by means of deed, dedication, or easement.

Access, Public – A means of physical approach available to the general public.

~~**Accessory building - a building or structure which is visually subordinate to and the use of which is incidental to that of the main building, structure or use on the same lot or parcel. Accessory buildings or structures shall not be used for human habitation.**~~

Accessory Building or Structure - A building~~use~~ or structure that is subordinate in size and~~or~~ purpose to the principal structure ~~or use~~ of the same lot or parcel ~~of ground~~ and serving a purpose customarily incidental to the use of the principal structure or use of land.

Accessory building, Height of - the vertical measurement down from the highest point on the structure to an intersection with the horizontal projection of a plane established as the median between the highest and lowest points of original grade beneath the enclosed portion of the structure. (See Appendix for diagrams.)

Accessory feature - any manmade structure erected upon or appurtenant to real property

Accessory use - a use incidental, related, appropriate, and clearly subordinate to the main use of the lot or building, which accessory use does not alter the principal use of the subject lot or parcel.~~,~~

~~**Access Street or Service Road** - A street or road which is parallel to and adjacent to a major arterial street and provides a means of direct ingress and egress to abutting property.~~

Acre - an area of land containing 43,560 square feet.

Adjacent~~**, adjoining**~~ - nearby, but not necessarily touching.

Administrative and Professional Office - any building, structure, or portion thereof used or intended to be used as an office for a lawyer, architect, engineer, surveyor, planner, optometrist, accountant, doctor, dentist, or other similar professions.

Agriculture - the tilling of the soil, raising of crops, horticulture, viticulture, silviculture, small livestock farming, dairying and/or pasture and range livestock production, including all uses customarily incidental thereto but not including slaughter houses, fertilizer yards, or plants for the reduction of animal matter or any other industrial use which is similarly objectionable because of noise, odor, smoke, dust or fumes. Agriculture does not include the concentrated single-use operation of feed lots, hog, turkey, chicken, fur-bearing animals or other similar farms, unless these operations are operated in conjunction with or are a part of the crop production of the same or adjoining parcel under common ownership.

~~**Alley** - a public dedicated right-of-way, affording a secondary means of access to abutting property and is not intended for general traffic circulation.~~

~~Alley(Subdivision Manual): A public, dedicated right-of-way used primarily as a service of secondary means of ingress and egress to the service side of abutting property.~~**Alley** - An unnamed public or private right-of-way less that is primarily designed to serve as secondary access to the rear or side of those properties whose principal frontage is on some other street.

Amendment - a change in the wording, context, or substance of this ordinance, or an addition or deletion or a change in the zone district boundaries or classifications of the zoning map.

~~**Animal hospital** - facilities for the care, treatment, and boarding of animals including the term "veterinary clinic."~~**Animal Hospital** - Any building or portion of a building designed or used for the care, boarding, observation, and treatment of animals, including a veterinary clinic.

~~**Antenna** - accessory feature used for electronic signal reception or transmission.~~**Antenna** - Any structure designed for transmitting signals to a receiver or receiving station or for receiving television, radio, data, communication, or other signals from other antennas, satellites, or other services.

Antique - a product that is sold or exchanged because of value derived or~~,~~ because of oldness as respects the present age, and not simply because same is not a new product.

~~**Apartment** - a room or suite of two (2) or more rooms in a multiple dwelling, occupied or suitable for occupancy as a residence for one (1) family.~~**Apartment** - A part of a building consisting of a room or rooms intended, designed, or used as a residence by an individual or a single family.

~~**Apartment House** - A building containing apartments with two (2) or more families living independently of each other.~~

Appeal - an action which permits anyone to arrange for a hearing from other than the individual or group from whose decision the appellant seeks redress.

ARS - Arizona Revised Statutes (Arizona State Law).

Artist - O~~o~~ne who practices the fine~~an~~ arts in which imagination and taste presides over the execution, including painting, drawing, sculpture, poetry, music, dancing, and dramatic art. This is not deemed to include the business of teaching the mechanics of the art.

Attached building - (see Building, Attached).

~~**Automobile Service Station** - (see Service Station).~~ **Automobile Sales** – Storage and display for sale of more than two motor vehicles or any type of trailer provided the trailer is unoccupied, and where repair or body work is incidental to the operation of the new or used vehicle sales.

Automobile Service Station – Any building, structure, or land used primarily for the dispersal, sale, or offering for sale of automotive fuels, oils or accessories, including lubrication of automobiles and replacement or installation of minor parts and accessories, but not including major repair work such as motor replacement or rebuilding, body and fender repair or painting.

~~**Automobile Repair Garage** - a structure or part thereof, other than a private garage, where motor vehicles are repaired or painted.~~ **Automobile Repair Services Establishment** – Any building, structure, improvements, or land used for the repair and maintenance of automobiles, motorcycles, trucks, trailers, or similar vehicles, including but not limited to body, fender, muffler, or upholstery work, oil change and lubrication, painting, tire service and sales, or installation of radios, car alarms, or stereo equipment. Does not include private- garages used for the storage or maintenance of the owner or occupants' automobile.

Automobile Wrecking Yard – The dismantling or wrecking of used motor vehicles or trailers, or the storage, sale, or dumping of dismantled or wrecked vehicles or their parts.

Bed and breakfast - a building or buildings containing central kitchen facilities and not more than three (3) rooms used to provide lodging for compensation; provided that the owner or caretaker lives on the premises, smoke alarms are installed and parking has no negative effect on the neighborhood.

Beekeeping and Associated Definitions

~~**Apiary** – one or more hives or colonies of bees at one location.~~**Apiary** – A place where bee colonies are kept.

Beekeeper – a person who owns and/or breeds bees, especially for their honey.

Beekeeping (or apiculture) – the maintenance of bee colonies, commonly in man-made hives by humans. May include the manufacture of honey, beeswax, and other byproducts of the beekeeping process.

Colony – the inhabitants of the hive, including the queen, drones, worker bees and brood.

Flyway barrier – a solid wall, fence, dense vegetation, or combination of these materials at least six (6) feet high that extends at least ten (10) feet beyond the hives on each end of a bee colony.

Block - An area of land within a subdivision that is entirely bounded on all sides by streets and/or exterior boundary or boundaries of a subdivision.

Board of Adjustment - (see Section 1065)

Boundary, Zone - the limit and extent of each zone district classification as shown on the official zoning map.

Building - a structure having a roof supported by columns or walls (see Structure).

Building, Attached - a building which has at least part of a wall in common with another building, or which is connected to another building by a roof.

Building, Detached - a building which is separated from another building or buildings on the same lot.

Building, Height of - the vertical measurement down from the highest point on the structure to an intersection with the horizontal projection of a plane established as the median between the highest and lowest points of original grade beneath the enclosed portion of the structure. (See Appendix for diagrams.)

Building, ~~Main~~ Principal - a building, or buildings, in which is conducted the principal use of the lot on which it is situated. In any residential district, any dwelling shall be deemed to be the main building of the lot on which the same is situated.

Building Area - the total areas, taken on a horizontal plane at the mean grade level, of the principal buildings and all accessory buildings ~~(including decks)~~, exclusive of decks, uncovered porches, terraces, and steps.

~~**Building Permit** - a permit required for the erection, construction, modification, addition to or moving of any building, structure or use in the incorporated area of the Town of Jerome.~~**Building Permit** – An official document or certification that is issued by the building official and which authorizes the construction, alteration, enlargement, conversion, reconstruction, remodeling, rehabilitation, erection, demolition, moving, or repair of a building or structure.

Building Inspector – A governmental employee charged with enforcement of the building code, and such other ordinances as may be assigned to their department.

Building Scale – The perceived relative height and bulk of a building to that of neighboring buildings.

Building Setback - the minimum distance as prescribed by this ordinance between any property line and the closest point of the foundation or any supporting post or pillar of any building or structure related thereto.

~~**Building Site** - the ground area of a building or buildings together with all open spaces adjacent thereto, as required by this ordinance, does not include any streets, alleys, access easements or other rights-of-way necessary for access to the property, or as a means of access through one property to another parcel of land.~~**Building Site** – Land occupied or intended to be occupied by a building or interrelated buildings, together with all open space required by this ordinance, which is located on a lot that has been lawfully created and meets all criteria of this ordinance for the intended use. Does not include any streets, alleys, access easements or other rights-of-way necessary for access to the property, or as a means of access through one property to another parcel of land.

Business Day – Any day that Town Hall is open for the conduct of regular business, excluding Saturdays, Sundays, holidays, and other days on which Town offices are officially closed. Holidays are those recognized by the Town of Jerome.

Business or Commerce - The purchase, sale or other transaction involving the handling or disposition (other than defined in the term "industry") of any article, substance or commodity for livelihood or profit, including in addition, operation, or provision of any service or service establishment, office building, outdoor advertising sign or structure, recreational or amusement enterprise conducted for livelihood or profit.~~profit or livelihood.~~

Calendar Day – Every day shown on a calendar, including Saturdays, Sundays, and holidays

Campground - any lot, parcel, or tract of land used, designed, maintained, and intended for rent of plots or sites to accommodate temporary camping by the travelling public with or without sanitary facilities and water, whether or not a charge is made for the use of the park and its facilities.

Caretaker, Property – Any person who resides on the property and who performs maintenance or repair services on a regular basis.

Caretaker's Residence – A single-family dwelling unit accessory to an agricultural, professional, commercial, or industrial use for occupancy by the property caretaker.

Cargo Container – A standardized, reusable vessel that is or appears to be: (1) originally, specifically or formerly designed for or used in the packing, shipping, movement or transportation of freight, articles, goods, or commodities, or (2) designed for or capable of being mounted or moved on a rail car, or (3) designed for or capable of being mounted on a chassis or bogie for movement by truck trailer or loaded on a ship.

Carport - an accessory structure or portion of a main structure open on one~~two~~ (1~~2~~) or more sides designed for the storage of motor vehicles, without full enclosure.

Cemetery - land used or intended to be used for the burial of the dead, and dedicated for such purposes, including columbariums, crematoriums, mausoleums, and mortuaries when operated in conjunction with and within the boundaries of such premises.

Child Care Center – A facility other than a private residence that provides care, supervision, education, instruction, developmental activities, or a combination thereof for minor children for periods of less than 24 hours per day. The facility is generally described as child care center, day care center, day nursery, nursery school, parent cooperative pre-school, play group, or drop-in center. "Child care center" or "day care center" does not include a Sunday school conducted by a religious organization where children are cared for during short periods of time while persons responsible for such services are attending religious activities.

Child Day Care Home – A private residence in which more than six but not more than 12 minor children are given care and supervision for periods of less than 24 hours a day, unattended by a parent or legal guardian, except children for whom the provider is a parent, stepparent, guardian, custodian, or other relative.

~~**Church** – a permanently located building commonly used for religious worship fully enclosed with walls, but including windows and doors, and having a structurally solid and sound roof.~~ **Church** – A building wherein persons regularly assemble for religious worship and which is maintained and controlled by a religious body organized to sustain a public worship, together with all accessory buildings and uses customarily associated with such primary purpose.

Circulation Plan - That portion of the General~~Comprehensive~~ Plan adopted by the Planning and Zoning Commission and Town Council designating and defining the physical street system for Jerome, Arizona.

~~**Clinic** – a place for the provision of group medical services, not involving overnight housing of patients.~~ **Clinic** – A facility providing medical, psychiatric, or surgical service for sick or injured persons exclusively on an outpatient basis, including emergency treatment, diagnostic services, training, administration, and services to outpatients, employees, or visitors.

~~**Club** – an association of persons for some common non-profit purposes, but not including groups organized primarily to render a service which is customarily carried on as a business.~~**Club** – Buildings and

facilities, owned or operated by a corporation, association, person or persons, for a social, educational, or recreational purpose, to which membership is required for participation and not primarily operated for profit nor to render a service that is customarily carried on as a business.

~~**Clubhouse** - a structure and related facilities for conducting or continuing the social purposes for which the club was organized.~~**Clubhouse** – A building to house a club or social organization not conducted for private profit, as documented by state or federal records, and which not an adjunct to or operated by or in connection with a public tavern, café, or other public place.

Commission - Town of Jerome Planning and Zoning Commission. (See Section 1~~0~~54.)

Common Area – Land in a development held in common or single ownership and not reserved for the exclusive use or benefit of an individual tenant or owner.

~~**Comprehensive Plan (General Plan)** - a plan developed and adopted by the planning and zoning commission and town council as a guide for future growth and development within the Town of Jerome, including any other plan adopted as a part or any amendments to such plan or parts thereof.~~

Conditional Approval – An affirmative action by a commission or council indicating that approval will be contingent upon satisfaction of certain specified stipulations.

~~**Contiguous** - in actual contact.~~**Contiguous** – In contact, adjoining, or touching another object or item, as distinguished from being adjacent.

Convalescent Home - (same as Nursing Home).

Cooking Facility – An area containing facilities for the storage, cooking, or preparation of food, that is accessory to a principal use. A cooking facility may be located in an enclosed or unenclosed area. Specifically includes a sink, refrigerator, stove, and oven, but not microwaves, hotplates, or other similar appliances.

Cornice – Any horizontal member, structural or nonstructural, of any building, projecting outward from the exterior walls at the roof line, including eaves and other roof overhang.

Council - Jerome Town Council.

~~**Court** - any space other than a yard on the same lot with a building or group of buildings and which is unobstructed and open to the sky from above the floor level of any room having a window or door opening on such court. The width of a court shall be its least horizontal dimension.~~**Court** – An open, unoccupied space, other than a yard, on the same lot with a building or group of buildings, which is bounded on two or more sides by such building or buildings.

County - Yavapai County, State of Arizona.

~~**Covenants** - Shall mean a privately prepared recorded document designed to govern the use of parcels within a subdivision.~~**Covenant, Protective** – A contract entered into between private parties which constitutes a restriction on the use of a particular parcel of property.

Cultural Resources – Those resources that possess qualities of significance in national, state, or local history, architecture, archaeology, and culture and which are present in districts, sites, structures, and objects that possess integrity of location, design, setting, materials, workmanship, and association.

Cupola – A small dome and the shaft that supports it; sits on top of a building.

Dancehall – A place of assembly, open to the public and operated for profit, where dances, parties, receptions, and other gatherings are held. Dance halls may provide live entertainment, may serve alcoholic beverages, and may serve catered meals provided the owner or operator holds the appropriate licenses and permits.

~~**Cul-de-Sac Street** - A street or road having a traffic outlet on one end only and having at the other end facilities for turning around of vehicular traffic.~~

Day Care - (see Child Care Center~~School, Nursery~~).

Dead-End Street - A street or road having a traffic outlet on one end only. A dead-end street may or may not have temporary provisions for the turning around of vehicular traffic.

~~**Deck** - An open, unroofed porch or platform structure built at least twelve (12) inches above the ground that is located in the front, rear, or side yard or court of a property. When a structure has a roof or wall enclosure that keeps out the elements, it is not a deck and shall be deemed part of the primary structure for purposes of this Ordinance.~~ **Deck** – A roofless outdoor space built as a platform structure at least twelve (12) inches above ground, projecting from the wall of a building, and connected by structural supports at grade or by the building structure.

~~**Design Review Board** - (see Section 106).~~**Dormer** – A window vertical in a roof or the roofed structure containing such a window.

~~**Drive-In Restaurant** - any establishment where food or beverages are dispensed and may be consumed on the premises, but not within a closed building.~~

Drive-In Theater - an open air theater where the performance is viewed by all, or part, of the audience from motor vehicles.

Drive-Through Establishment - A business establishment so developed that its retail or service character is dependent on providing a driveway approach or parking spaces for motor vehicles so as to serve patrons while in the motor vehicle rather than within a building or structure. (For restaurants, see Restaurant, Fast Food.)

Driveway – A private roadway providing access for vehicles to a parking space, garage, dwelling, or other structure.

Dump ~~–~~ (See Landfill)~~a place used for the disposal, abandonment or discarding by burial, incineration or by any other means of any garbage, sewage, trash, refuse, rubble, waste material, offal, or dead animals. Such use shall not include any industrial or commercial processes, and/or material.~~

Dwelling - A building or portion thereof designed or used primarily as living quarters for one or more families, but not including fraternity and sorority houses, nursing homes, hotels, motor lodges, or other accommodations for the transient public.~~**Dwelling** - a building portion thereof designed exclusively for residential purposes, including one-family, two-family, three-family and multiple dwellings; but not including hotels, fraternity and sorority houses, rest homes and nursing homes, or child care nurseries.~~

Dwelling, Single~~One~~-Family - a detached building designed exclusively for occupancy by or occupied by one (1) family for residential purposes.

Dwelling, Duplex – A building designed as a single structure, containing two separate living units, each of which is designed to be occupied as a separate permanent residence for one family.

Dwelling, Triplex – A building designed as a single structure, containing three separate living and housekeeping units, each of which is designed to be occupied as a separate permanent residence for one family.

Dwelling, Quadplex - A building designed as a single structure, containing four separate living and housekeeping units, each of which is designed to be occupied as a separate permanent residence for one family.

Dwelling, Live/Work - a dwelling unit combining residential use types with limited nonresidential-use types.

Dwelling (Home), Manufactured – A factory-built, single-family structure that is manufactured under the authority of the National Manufactured Home Construction and Safety Standards Act, is transportable in one or more sections, is built on a permanent chassis, and is used as a place of human habitation; but which is not constructed with a permanent hitch or other device allowing transport of the unit other than for the purpose of delivery to a permanent site, and which does not have wheels or axles permanently attached to its body or frame.

Dwelling, Modular - a dwelling unit or habitable room thereof which is either wholly or insubstantial part manufactured at an off-site location to be assembled on site, except that it does not include a mobile home as defined in this article.

~~**Dwelling, Two-Family** - a building designed exclusively for occupancy by or occupied by two (2) families living independently of each other (i.e., duplex).~~

~~**Dwelling, Three-Family** - a building designed exclusively for occupancy by or occupied by three (3) families living independently of each other (i.e., triplex).~~

Dwelling, Multi-Family - a building designed exclusively for occupancy by or occupied by five~~four~~ (5~~4~~) or more families living independently of each other (i.e., five~~our~~ plex or apartment).

~~**Dwelling Unit** - a room or group of rooms within a dwelling containing one (1) cooking accommodation, occupied exclusively by one (1) or more persons living as a single non-profit family housekeeping unit.~~**Dwelling Unit** – A portion of a building designated as the residence of a one family or individual with suitable approved provisions for eating, sleeping, cooking, and sanitation.

~~**Easement** - a space on a lot or parcel of land reserved or used for location and/or access to utilities, drainage or other physical access purposes. No structure or other physical obstruction may be located within an easement.~~**Easement** – Shall mean any recorded interest in land owned by another for a specific (limited) use (i.e., access)

Eave – The projecting lower edges of a roof overhanging the wall of a building.

Electric Transmission Line - An electr~~on~~ic line used for the bulk transmission of electricity between generating or receiving points and major substations or delivery points and having a rating of over twelve thousand (12,000) volts.

Eminent Domain – The authority of a government to take, or to authorize the taking of, private property for public use.

~~**Erect** - the word "erect" includes built, built upon, added to, altered, constructed, reconstructed, moved upon, or any physical operations on the land, required for a building.~~**Erect** – The acts of building, constructing, altering, reconstructing, moving a structure upon, or any physical operations on the premises which are for construction. Excavation, fill, drainage, material storage, hauling, and the like shall be considered a part of erection.

Essential Services -Services provided by public and private utilities, necessary for the exercise of the principal use or service of the principal structure. These services include underground, surface, or overhead gas, electrical, steam, water, sanitary sewerage, stormwater drainage, and communication systems and accessories thereto, such as poles, towers, wires, mains, drains, vaults, culverts, laterals, sewers, pipes, catch basins, water storage tanks, conduits, cables, fire alarm boxes, police call boxes, traffic signals, pumps, lift stations, and hydrants, but not including buildings used or intended to be used for human habitation.

Façade – The exterior side of a building which faces, and is most nearly parallel to, a public or private street. The façade shall include the entire building walls, including wall faces, parapets, fascia, windows, doors, canopies, and visible roof structures of one complete elevation.

Factory-Built Building – A residential or nonresidential building, including a dwelling unit or habitable room thereof, which is either wholly or in substantial part manufactured at an off-site location to be assembled on-site, except that it does not include a manufactured home, recreational vehicle, or mobile home.

Family - an individual, or two (2) or more persons related by blood or marriage, or a group of persons not related by blood or marriage, living together as a single housekeeping group in a dwelling unit.

Farm – Any land or buildings or structures on or in which agriculture and farming operations are carried on and shall include the residence or residences of owners, occupants, or employees located on such land.

Farming - land used or cultivated which is intended only as a supplementary source of income or livelihood.

~~**Fence** – a structure built to separate two (2) parcels of land or separate a parcel of land into different use areas.~~**Fence** – An artificially constructed barrier of wood, masonry, stone, wire, metal, or other manufactured material or combination of materials erected to enclose, screen, or separate areas.

Final Plat - the final drawing of a property being subdivided as prepared by a land surveyor or engineer for recording and approval by the Planning and Zoning Commission and the Town Council. ~~and prepared in accordance with 403 of these regulations.~~

Floodplain - the areas adjoining the channel of a watercourse, or areas where drainage is or may be restricted by man-made structures which have been or may be covered partially or wholly by floodwater, but shall compose an area not less than that area confined by the fifty-year flood and shall not exceed that area confined by the one hundred-year flood.

Floor Area Ratio (FAR) – The ratio of gross building floor area to the net lot area of the building site.

Frontage - the linear distance of property along a public right of way.

Garage, P~~p~~rivate - an accessory building or a main building or portion thereof, used for the shelter or storage of self-propelled vehicles, owned or operated by the occupants of a main building wherein there is no service or storage for compensation.

Garage, Public - any building, except one herein defined as a private or storage garage used for the storage, care or repair or self-propelled vehicles or where any such vehicles are equipped for operation or kept for hire.

Garage, Repair - (see Automobile Repair Service Establishment~~Garage~~).

General Plan - a plan developed and adopted by the planning and zoning commission and town council as a guide for future growth and development within the Town of Jerome, including any other plan adopted as a part or any amendments to such plan or parts thereof.

Governmental Agency - includes any agency of the federal, state, county or municipal governments.

Greenhouse - a building or structure constructed chiefly of glass, glass like translucent material, cloth or lath, which is devoted to the protection or cultivation of flowers or other tender plants.

Greenhouse, Industrial – Wholesale business whose principal activity is the growing and selling of plants within an enclosed building.

Guest House – (See Accessory Dwelling Unit)

~~**Guest Room** – a room having no cooking facilities intended for occupancy by one or more persons not members of the family. Does not include dormitories for sleeping purposes.~~**Guest Room** – One or more rooms intended as one occupancy overnight (or longer) by other than a member of the family. If such contains cooking facilities, it is deemed a dwelling unit. Does not include dormitories for sleeping purposes.

Half Street - A street having on a portion, usually one half (1/2), of its required right-of-way width dedicated for public use.

Hardship – A restriction on property so unreasonable that it results in an arbitrary and capricious interference with basic property rights. Hardship relates to the physical characteristics of the property, not the personal circumstances of the owner or user, and the property is rendered unusable without the granting of a variance.

Hedge – A row of closely planted shrubs, bushes, or any kind of plant forming a boundary or fence.

Height, Building or Structure - (see Building, Height of, and Accessory Building, Height of).

Hives – the domicile of bees, including any receptacles or containers inhabited by bees.

Hillside – Land that has an average percent of slope equal to or exceeding 15 percent.

Historic District – A district or zone designated by a local authority or state or federal government within which buildings, structures, appurtenances, and places are of basic and vital importance because of their association with history; or because of their unique architectural style and scale, including color, proportion, form, and architectural detail; or because of their being a part of or related to a

square, park, or area the design or general arrangement of which should be preserved or developed according to a fixed plan based on cultural, historical, or architectural motives or purposes.

Historic Preservation – The preservation of historically significant structures and neighborhoods until such time as, and in order to facilitate, restoration and rehabilitation of the building(s) to a former condition.

Historic Preservation/Design Review Board – (see Sections 107 and 304)

Historic Resource, Contributing – A resource in a registered historic district or historic complex supporting the district's or complex's historical significance through location, design, setting, materials, workmanship, feeling, and association.

Historic Resource, Noncontributing – A building, site, structure, or object that does not add to the historic architectural qualities, historic association, or cultural values of the area because it was not present during the period of significance or does not relate to the documented significance of the property due to alterations, disturbances, additions, or other changes, or because it no longer possesses historic integrity nor is capable of yielding important information about the period.

Historic Resources Survey – A comprehensive survey involving the identification, research, and documentation of buildings, sites, and structures of any historical, cultural, archaeological, or architectural importance.

Historic Structure – Any structure that is: (a) listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register; (b) certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district; (c) individually listed on the Arizona Register of Historic Places; or (d) individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified by the Arizona State Historic Preservation Office (SHPO).

Home Occupation - an occupation, profession, activity or use that is clearly a customary, incidental and secondary use of a residential dwelling unit and which does not alter the exterior of the property or affect the residential character of the neighborhood.

Horticulture – The use of land for the growing or production for income of fruits, vegetables, flowers, nursery stock, including ornamental plants and trees, and cultured sod.

~~**Hospital** - a place for the treatment or care of human ailments, and unless otherwise specified, the term shall include sanitarium, preventorium, clinic and maternity home.~~**Hospital** – An institution, licensed by the state department of health, providing primary health services and medical or surgical care to persons, primarily inpatients, suffering from illness, disease, injury, deformity, and other abnormal physical or mental conditions, and including as an integral part of the institution, related facilities such as laboratories, outpatient facilities, or training facilities. The term shall include sanitariums, preventoriums, and maternity homes.

~~**Hotel** - a building in which lodging is provided and offered to the public for compensation and which is open to transient guests.~~**Hotel** – An establishment providing, for a fee, sleeping accommodations and customary lodging services, including maid service, the furnishing and upkeep of furniture and bed linens, and telephone and desk service. Related ancillary uses may include, but shall not be limited to, conference and meeting rooms, restaurants, bars, and recreational facilities.

Impervious surface – Any hard-surfaced, man-made area that does not readily absorb or retain water, including but not limited to building roofs, parking and driveway areas, graveled areas, sidewalks, and paved recreation areas.

Industry, Heavy – Manufacturing or other enterprises with significant external effects, or which pose significant risks due to the involvement of explosives, radioactive materials, poisons, pesticides, herbicides, or other hazardous materials in the manufacturing or other process.

~~**Industry, Light** - those industrial uses which do not result in extensive open yard area, storage of extensive raw materials, nor otherwise result in noise, odors, dust, lights, vibration, waste products or~~

~~adversely affect the surrounding properties.~~**Industry, Light** – Manufacturing or other enterprise which assembles, improves, treats, compounds, or packages goods or materials in a manner which does not create a noticeable amount of noise, dust, odor, smoke, glare or vibration outside of the building in which the activity takes place, which does not require extensive outside storage of goods or materials, and which does not generate objectionable amounts of truck traffic.

Infill Development - Development or redevelopment of land that has been bypassed, remained vacant, and/or is underused as a result of the continuing urban development process. Generally, the areas and/or sites are not particularly of prime quality; however, they are usually served by or are readily accessible to existing infrastructure (services and facilities). Use of such lands for new housing and/or other urban development is considered a more desirable alternative than to continue to extend the outer development pattern laterally and horizontally, thus necessitating a higher expenditure for capital improvements than would be required for infill development.

~~**Ingress** The movement of traffic from the street to abutting property and the movement from major streets to minor streets.~~**Ingress** – Access or entry point or entrance.

Intensification of Use – To alter the character of a use to the extent that the use generates new or different impacts on the health, safety, or welfare of the surrounding neighborhood, including but not limited to the level or amount of traffic, noise, light, smoke, odor, vibration, outside storage, or other similar conditions associated with the use.

Intensity – A relative measure of development impact as defined by characteristics such as the number of dwelling units per acre, the amount of traffic generated, and the amount of site coverage.

Irrigated – Watered by an artificial or controlled means, including but not limited to sprinklers, furrows, ditches, or spreader dikes.

Junk Yard - the use of two hundred (200) or more square feet of any lot or parcel of land for outside storage of any used or secondhand materials, including but not limited to lumber, auto parts, household appliances, pipe, drums, machinery or furniture. The outside storage of used or secondhand materials in an area less than two hundred (200) square feet is permitted only on the rear half of a lot or parcel.

Kitchen - any room in a building containing facilities~~or dwelling unit~~ which are~~is~~ used or intended to be used for storage, cooking, and ~~or~~ ~~the~~ preparation of food, specifically a sink, refrigerator, stove, and oven.

Kindergarten - same as nursery school, except when operated in conjunction with a school of general instruction and having accredited instruction.

Laundry, Self Help - a building in which domestic type washing machines and/or dryers are provided on a rental basis for use by individuals doing their laundry.

Land - any lot or parcel, developed or undeveloped, and capable of being located, surveyed, staked and described by a legal description

Land split - A division of land whose area is two and one-half acres or less into two or three tracts or parcels of land or lots for the purpose of sale or lease.

Land Surveyor – A person registered in the state in the field of land surveying.

Land Trust – A private, nonprofit conservation organization formed to protect natural resources such as productive farm and forest land, natural areas, historic structures, and recreational areas. Land trusts purchase and accept donations of conservation easements. They educate the public about the need to conserve land, and some provide land-use and estate planning services to local governments and individual citizens.

Landscape Plan – A plan associated with a subdivision or development plan that indicates the placement of landscape materials, including specifications, species, quantities, and method of installation.

Light Pollution – Any adverse effect of man-made light.

Light Trespass – Light spill falling over property lines that illuminates adjacent grounds or buildings in an objectionable manner.

Live ~~Live~~ Entertainment – Any musical act (not including karaoke), theatrical act (including stand-up comedy), play, revue, scene, dance act, or song and dance act, or any combination thereof, performed by one or more persons, whether or not they are compensated for the performance, in a privately owned premises that is open to the public, whether or not admission is charged. Activities, such as but not limited to, billiards tables, dart boards, shuffleboards, tabletop games, card games, arcade-style games, and similar patron amenities, are not considered live entertainment provided they are not conducted as organized tournaments or other activities intended to attract patrons primarily for entertainment purposes. The presence of such incidental recreational amenities shall not, by itself, constitute entertainment requiring a Conditional Use Permit.

Live/Work Space – Areas within buildings that are jointly used for commercial/industrial and residential purposes where the residential use of the space is clearly secondary or accessory to the primary use as a place of work.

Loading, Off-Street – An unobstructed area provided and maintained for the temporary parking of trucks and other motor vehicles for the purpose of loading and unloading goods, wares, materials, and merchandise.

~~**Lodge** – an order or society of persons organized for some common non-profit purpose, but not including groups organized primarily to render a service which is customarily carried on as a business.~~**Lodge** – A membership organization that holds regular meetings and that may, subject to other regulations controlling such uses, maintain dining facilities, serve alcohol, or engage professional entertainment for the enjoyment of dues-paying members and their guests. There are no sleeping facilities. This definition shall not include fraternities or sororities.

~~**Lot** – land occupied or to be occupied by a building and its accessory structures, together with such surrounding open spaces as are required under the provisions of this ordinance, achieving not less than the minimum area required by this ordinance for a lot in the district in which such lot is situated and having frontage on a dedicated street or legally recorded easement.~~**Lot –** A parcel of land occupied or intended for occupancy by a use permitted in this chapter, including one main building, together with any accessory buildings, open spaces, and parking spaces required by this chapter and having its principal frontage upon a street, officially approved place, or legally recorded easement.

Lot Area - the total horizontal area within the lot lines of a lot.

Lot, Corner – A lot located at the intersection of two or more streets.

Lot Coverage -– A measure of intensity of land use that represents the portion of a site that is impervious, This portion includes but is not limited to all areas covered by buildings, parked structures, driveways, roads, sidewalks, and any area of concrete asphalt. ~~that portion of a lot or building site which is occupied by any building or structure, excepting paved areas, walks and swimming pools.~~

~~**Lot depth** – the depth of a lot shall be the horizontal length of a straight line connecting the bisecting points of the front and rear lot lines.~~**Lot Depth** – The horizontal distance from the midpoint of the front-lot line to the midpoint of the rear-lot line, or to the rear most point of the lot where there is no rear-lot line.

~~**Lot, double frontage** – a lot having frontage on and with access on more than one street.~~**Lot, Double Frontage –** A lot having frontage on two parallel or approximately parallel streets. For the purposes of this definition, a lot which has been denied access to one of the parallel or approximately parallel streets shall not be deemed a double frontage lot.

Lot Line – A line dividing one lot from another or from a street or any public place.

Lot Line, Rear - a lot line which is opposite and most distant from the front lot line.

~~**Lot Line, Side** – those property lines connecting the front and rear property lines.~~**Lot Line, Side** – Any lot line not considered a front or rear lot line.

Lot of Record - a lot which is part of a subdivision, the map of which has been recorded in the Yavapai county recorder's office; or parcel of land, the deed of which is recorded in the office of the county recorder.

Lot Split – The division or redivision of a tract or parcel of land into two lots, building sites, or other divisions for the purpose, whether immediate or future, of sale, legacy, or building development.

~~**Manufacturing** (see Industry, Light).~~**Manufacturing** – The mechanical or chemical transformation of materials or substances into new products, including the assembling of component parts, the creation of products, and the blending of materials including but not limited to oils, plastics, resins, etc. Includes light or heavy industry.

Marijuana Dispensary – A marijuana dispensary refers to the following:

(a) "Nonprofit Medical Marijuana Dispensary" as set forth in The Arizona Medical Marijuana Act, A.R.S. § 36-2801.12; (b) "Dual Licensee" as set forth in The Arizona Smart and Safe Act, A.R.S. § 36-2850.9; (c) "Marijuana Establishment," as set forth in the Arizona Smart and Safe Act, A.R.S. § 36—2850.21(a).

Membership Organization – A group that holds regular meetings and that may, subject to other regulations controlling such uses, maintain dining facilities, serve alcohol, or engage professional entertainment for the enjoyment of dues-paying members and their guests. There are no sleeping facilities.

Mine – An area of land upon which operations to extract valuable mineral deposits or other materials have been conducted, are being conducted, or are planned to be conducted.

Minor Street Plan - A part of the street and traffic circulation plan that ~~is~~the complementary to and interrelated with the General~~Comprehensive~~ Plan.

Mixed-Use Development – A tract of land or building or structure developed for two or more different uses such as, but not limited to, residential, office, manufacturing, retail, public, or entertainment.

Mixed-Use, Horizontal – A development pattern in which two or more different land uses, such as residential, commercial, office, civic, or recreational, are located on the same site or within the same development area but are arranged side-by-side on separate lots or in separate buildings, rather than vertically within a single structure. The uses function as a cohesive development through shared access, interconnected circulation, coordinated site design, or complementary amenities.

Mixed-Use, Vertical – A development pattern in which two or more different land uses, such as residential, commercial, office, civic, or recreational, are located within a single building.

Mobile Food Unit - A temporary food service establishment that is a vehicle-mounted food service establishment designed to be readily movable.

Mobile Home or Mobile Housing - a movable or portable dwelling over thirty-two (32) feet in length or over eight (8) feet wide, constructed to be towed on its own chassis and designed so as to be installed with or without a permanent foundation for human occupancy as a residence which may include one (1) or more components that can be retracted for towing purposed and subsequently expanded for additional capacity, or two (2) or more units separately towable but dwelling composed of a single unit. Does not include recreational vehicle as defined in this Appendix~~article~~. The removal of the wheels and running gear shall ***not*** change the meaning of this term. Mobile homes are only those units produced prior to June 15, 1976. Units produced after June 15, 1976, are considered manufactured homes as defined in this Appendix.

National Register of Historic Places – A list maintained by the Secretary of the Interior composed of buildings, sites. Structures, objects, and districts of national, state, or local significance in American history, architecture, archaeology, engineering, and culture.

Natural - the condition of the land, vegetation, rocks, and other surface features which have not been physically disturbed, changed or added to by any action of man or machine.

Natural Resource – Existing natural elements relation to land, water, air, plant, and animal life, including but not limited to soils, geology, topography, surface and subsurface waters. Wetlands, vegetation, and animal habitats.

Newspaper of general circulation -– A newspaper that is published or circulated within the Town that is regularly issued for the dissemination of news of a general and public character at stated short intervals of time. ~~*The Verde Independent*~~.

Nonconforming building - (see Section 501).

Nonconforming use - (see Section 501).

Non-Residential Subdivision - The division of a tract of land into parcels for occupancy by non-residential uses and/or structures whether for sale or for building development for leasing and/or renting.

~~**Nuisance** - anything, condition or use of property which endangers life or health, gives offense to the senses, and/or obstructs the reasonable and comfortable use of other property.~~**Nuisance** – Any thing, condition, or conduct that endangers health and safety, or unreasonably offends the senses, or obstructs the free use and comfortable enjoyment of property, or essentially interferes with the comfortable enjoyment of life.

~~**Nurseries** - a commercial operation for the growth and sale or plants, storage of equipment for landscaping and the wholesale-retail sale of commercial gardening supplies.~~**Nursery** – An establishment for the growth, storage, display, and/or sale of plants, shrubs, trees, and materials used in indoor or outdoor planting, conducted within or without an enclosed building.

~~**Nursing Home** - a structure operated as a lodging house in which nursing, dietary and other personal services are rendered to convalescents, not including persons suffering from contagious diseases and in which surgery is not performed and primary treatment, such as customarily is given in hospitals and sanitariums, is not provided. A convalescent home shall be deemed a nursing home.~~ **Nursing Home** – A use providing bed care and inpatient services for persons requiring regular medical attention but excluding a facility providing surgical or emergency medical services and excluding a facility providing care for alcoholism, drug addiction, mental disease, or communicable disease.

~~**Office** - a room or rooms and accessory facilities for the managing or conducting of a business.~~**Office** – A room or group of rooms used for conducting the affairs of a business, profession, service industry, or government.

Off-Street Loading Facilities - a site or a portion of a site devoted to the loading or unloading of motor vehicles or trailers, including loading berths, aisles, and access drives. (see Section 510).

Off-Street Parking Facilities - a site or a portion of a site devoted to the off-street parking of motor vehicles including parking spaces, aisles, and access drives. (see Section 510).

Open Area - any area used or intended to be used for parking, recreation, open space, agriculture, landing fields and other similar uses.

~~**Open Space** - any area used or intended to be used for recreation and/or conservation purposes for an unspecified period of time. This term implies that the environment will remain in its natural state and not be physically disturbed in any way.~~**Open Space –** An area or portion of land, either landscaped or essentially unimproved and which is used to meet human recreational or spatial needs, or to protect water, air, or plant areas.

Open Space, Natural – An area or portion of land maintained in its native condition, often characterized by intact natural landscapes, native vegetation, wildlife habitat, and natural landforms. Allowable activities are limited to passive or low-impact uses such as natural earth walking trails, scientific research, and environmental education.

Original Grade - the condition of the surface of the property at the time of submittal of preliminary site plan with no grading changes made.

Overlay Zoning District – A zoning district to be mapped as an overlay to a use district and which modifies or supplements the regulations of the general district in recognition of distinguishing

circumstances such as historic preservation, wellhead protection, floodplain or unit development while maintaining the character and purposes of the general use district area over which it is superimposed.

Parapet – That part of any wall entirely above the roof line.

~~**Park** - a public or private parcel of land developed and used for passive or active recreation.~~**Park –** A public or private area of land, with or without buildings, intended for outdoor active or passive recreational uses.

~~**Parking Area** - an area designed and constructed and used exclusively for the parking, storage and maneuvering of vehicles.~~**Parking Area** – Any public or private land area designed and used for parking motor vehicles including parking lots, garages, private driveways, and legally designated areas of public streets.

Parking District - a public parking district maintained by the federal, state, county or town government, to special district

~~**Pathways** - Any dedicated right-of-way used for non-motor vehicle circulation and service.~~**Path, Multi-Use** – A pathway, which may be paved or unpaved, and is physically separated from motorized vehicular traffic by an open space or barrier and is either within the highway right-of-way or within an independent tract, or easement. Multi-use path activities may include walking, hiking, jogging, horseback riding, bicycling, and roller skating.

Patio - an area, usually paved, that is used for outdoor lounging, dining, and/or recreating that is less than 12 inches above the ground surface. When a structure has a roof or wall enclosure that keeps out the elements, it is not a patio and shall be deemed part of the primary structure for purposes of this Ordinance.

Performance Standard – Zoning regulations that permit uses based on a particular set of standards of operation rather than on particular type of use. Performance standards provide specific criteria limiting noise, air pollution, emissions, odors, vibration, dust, dirt, glare, heat, fire hazards, wastes, traffic impacts, and visual impact of a use.

Permit - A document issued by Jerome, Arizona, granting permission to perform an act or service which is regulated by the Town.

~~**Person** - included are: individual association, company, firm, corporation, Partnership, co-partnership, joint venture, city, county, special district, trust or any other legal group acting as an entity.~~**Person** – A corporation, company, association, firm, partnership, as well as any individual, state, or political subdivision of a state or agency thereof.

Planning and Zoning Commission - T~~he Commission, t~~he Planning and Zoning Commission and the Planning Commission of Jerome, Arizona are synonymous.

Plat – A document, prepared by a registered surveyor or engineer, that delineates property lines and shows monuments and other landmarks for the purpose of identifying property.

~~**Playground** - an area used by children for recreation purposes. Also may include a "tot-lot".~~ **Playground** – A land use designed principally to offer recreation, passive or active, to the public. Also may include a "tot-lot".

~~**Professional Office** - any building, structure, or portion thereof used or intended to be used as an office for a lawyer, architect, engineer, surveyor, planner, optometrist, accountant, doctor, dentist, or other similar professions.~~

Property Lines - Those lines outlining the boundaries of properties on lots for the purpose of description in sale, lease, building development, or other separate use of property.

Public Building - facilities for conducting public business constructed for various public agencies, including federal, state, county, and town offices and buildings.

Public Hearing - hearings held as required by law.

Public Utility - private or public facilities for distribution of various services, such as water, power, gas, communication, etc., to the public.

Preservation – Means the act or process of applying measures necessary to sustain the existing form, integrity and materials of an historic property. Work, including preliminary measures to protect and stabilize the property, generally focuses upon the ongoing maintenance and repair of historic materials and features rather than extensive replacement and new construction. New exterior additions are not within the scope of this treatment; however, the limited and sensitive upgrading of mechanical, electrical and plumbing systems and other code-required work to make properties functional is appropriate within a preservation project.

Quorum – A majority of the authorized members of a board or commission.

Radial - A line forming right angles with the tangent of any given arc.

Reconstruction - means the act or process of depicting, by means of new construction, the form, features, and detailing of a non-surviving site, landscape, building, structure, or object for the purpose of replicating its appearance at a specific period of time and in its historic location.

Record of Survey – A map prepared by a professional land surveyor that re-establishes survey controls, boundaries, locations of improvements, or the alignment of right-of-ways for recording.

Recreation, Active – Those recreational pursuits which require physical alteration to the area in which they are performed. Such areas are intensively used and include, but are not limited to, playgrounds, ball courts, golf courses, and swimming pools.

~~**Right-of-Way** - includes any public or private right-of-way and includes any area required for public use pursuant to any general or official plan.~~

~~**Right-of-Way** - The entire dedicated tract or strip of land that is to be used by the public for circulation and service. (The length and width of a right-of-way shall be sufficient to provide adequate accommodations for all the physical features to be included in said right-of-way.)~~

Recreational **Facilities** - include~~s~~ buildings, structures or areas built or developed for purposes of entertaining, exercising or observing various activities participated in either actively or passively by individuals or organized groups.

Recreational Facility, Commercial – Recreational facilities operated as a business and open to the general public for a fee.

Recreational Facility, Private – Clubs or recreation facilities for which a membership charge may be made and which are open only to bona fide members and their guests, such as a gaming, shooting, golf, or tennis club, or other similar activities. A private recreational facility may not be open or available to members of the general public. ~~.~~

Recreation, Passive – Those recreational pursuits which can be carried out with little alteration or disruption to the area in which they are performed. Such uses include but are not limited to hiking and picnicking.

Recreational Vehicle - a vehicular type unit primarily designed as temporary living quarters for recreational, camping or travel use, which either has its own motor power or is mounted on or drawn by another vehicle.

Recreational vehicle park - facilities for the temporary storage, parking and maneuvering of recreational vehicles (motor homes, travel trailers, campers etc.) with adequate roads and stall sites, including sanitary and water facilities. Site locations are provided on a day to day basis. Does not constitute a mobile home or trailer park.

Rehabilitation - means the act or process of making possible an efficient compatible use for a property through repair, alterations and additions while preserving those portions or features that convey its historical, cultural or architectural values.

Replat – The act of platting the lots, parcels, and easements in a recorded subdivision or partition plat to achieve a reconfiguration of the existing subdivision or partition plat or to increase or decrease the number of lots in the subdivision.

Restoration - means the act or process of accurately depicting the form, features and character of a property as it appeared at a particular period of time by means of the removal of features from other periods in its history and reconstruction of missing features from the restoration period. The limited and sensitive upgrading of mechanical, electrical and plumbing systems and other code-required work to make properties functional is appropriate within a restoration project.

~~**Retail store** - a commercial business for selling goods, services, ware or merchandise directly to the customer.~~

Residence - a structure containing a dwelling unit designed for occupancy or occupied by one (1) family living as a single non-profit family housekeeping unit.

~~**Restaurant** - an establishment which serves food or beverages only to persons seated within the building. This includes cafes and tea rooms.~~**Restaurant** – Any establishment, however designated, at which food and/or beverage is sold for consumption on the premises to patrons seated within an enclosed building, or elsewhere on the premises.

Restaurant, Drive-In - any establishment where food or beverages are dispensed and may be consumed on the premises, but not within a closed building.

Restaurant, Fast Food – An establishment engaged primarily in the business of preparing food and purveying it on a self-serve or semi-self-serve basis. Customer orders and/or service may be by means of walk-up counter or window designed to accommodate automobile traffic. Consumption may be either on or off the premises.

~~**Retail store** - a commercial business for selling goods, services, ware or merchandise directly to the customer.~~**Retail Sales Establishment** – A commercial enterprise that provides goods and/or services directly to the consumer, where such goods are available for immediate purchase and removal from the premises by the purchaser.

~~**Right-of-Way** - includes any public or private right-of-way and includes any area required for public use pursuant to any general or official plan.~~

~~**Right-of-Way** - The entire dedicated tract or strip of land that is to be used by the public for circulation and service. (The length and width of a right-of-way shall be sufficient to provide adequate accommodations for all the physical features to be included in said right-of-way.)~~**Right-of-Way** – A strip of land acquired by reservation, dedication, prescription, or condemnation and intended to be occupied by a street, trail, water line, sanitary sewer, and/or other public utilities or facilities.

Roof, Gabled – A roof which slopes from both sides of a ridge.

Roof, Gambrel – A gabled roof with two slopes on each side, the lower steeper than the upper.

Roof, Hipped – A roof with slopes on all four sides, continuous from peak to eaves.

Roof, Mansard – A roof with two slopes on each of four sides, the lower steeper than the upper.

School, Charter – A public school established by a contract with the state board of education, the state board for charter schools, a university under the jurisdiction of the Arizona board of regents, a community college district or a group of community college districts, pursuant to Title 15, Chapter 1, Article 8 of the Arizona Revised Statutes, to provide learning that will improve pupil achievement.

School, **Eelementary, Jjunior Hhigh, Hhigh** ~~**school**~~ - public and other non-profit institutions conducting regular academic instruction at kindergarten, elementary and secondary levels and ~~. Such institutions shall~~ offering general academic instruction~~s~~ equivalent to the standards prescribed by the state board of education.

School, Nursery - ~~a school or the use of a site or a portion of a site for an organized program devoted to the education or day care of five (5) or more children of elementary school age or younger, than those residents on the site. Includes day care center.~~(See Child Care Center)

School, Trade - schools offering preponderant instruction in the technical, commercial or trade skills, such as real estate schools, business colleges, electronic schools, automotive and aircraft technicians schools and similar commercial establishments operated by a non-governmental organization.

Screen – A structure providing enclosure and a visual barrier between the area enclosed and the adjacent property. A screen may also be nonstructured, consisting of shrubs or other growing materials.

School, Private or Parochial - an institution conducting regular academic instruction at kindergarten, elementary, and secondary levels operated by a non-governmental organization.

Service Establishment – Any establishment whose primary activity is the provision of assistance, as opposed to products, to individuals, business, industry, government, and other enterprises.

~~**Service Station** - an occupancy engaged in the retail sales of gasoline, oil, tires, batteries, and new accessories and which provides for the servicing of motor vehicles and operations incidental thereto, including: automobile washing, waxing and polishing, tire changing and repairing, but not including recapping. May also include battery service, radiator cleaning, flushing and repair, installation of minor accessories, lubrication of motor vehicles, rental of utility trailers, testing, adjustment and replacement of motor parts and accessories.~~

Setbacks - (see Yard).

~~**Sewage Disposal, Community** - a sewage system publicly or privately owned having approval to collect and dispose of domestic and/or industrial waste materials.~~**Sewage System, Private** – A sewage disposal system that collects, treats, and disposes of sewage independent of any public sewage facilities.

Sewage System, Public – An off-site system for the treatment and disposal of sewage in which sewage is conveyed by interceptor to a publicly operated treatment plant and disposed of through means approved by the State of Arizona.

~~**Shed** - a simple roofed accessory building or structure, typically made of wood or metal, used as a storage space or a workshop.~~**Shed** – A relatively small structure often purchased pre-built or as a kit in pre-fabricated sections. It is not designed to be served by heat, electricity, or plumbing, and does not need to be placed on a permanent foundation. The structure is intended to be used as a storage space or a workshop.

Short-Term Rental – Any individually or collectively owned single-family or one-to-four-family house or dwelling unit or any unit or group of units in a condominium or cooperative that is also a transient public lodging establishment or owner-occupied residential home offered for transient use if the accommodations are not classified for property taxation under A.R.S § 42-12001. Does not include a unit that is used for any nonresidential use, including retail, restaurant, banquet space, event center or another similar use.

Sidewalk - That paved portion of the right-of-way between the curb lines or lateral lines of the roadbed and the boundary line of said right-of-way designed and intended for the movement of and use of pedestrian traffic~~.~~

Sign - (see Section 509).

Site - a parcel of land, subdivided or unsubdivided, occupied or to be occupied by a use or structure.

Site Plan – A plan, to scale, showing uses and structures proposed for a parcel of land as required by the regulations. May include, but is not limited to, lot lines, streets, building sites, reserved open space, buildings, and major landscape features, both natural and manmade.

Spirituous Liquor Tasting Facility - An establishment promoting the retail sales of vinous, spirituous or malt liquor to consumers, and allowing tasting of those vinous, spirituous or malt liquors on the premises of the tasting facility. ~~-~~A vinous, spirituous or malt liquor tasting facility may include snacks, not meals, to consume with vinous, spirituous or malt liquor as a complement to but not as the primary function of the tasting facility. Vinous, spirituous or malt liquor tasting facilities may not include dining room seating. Vinous, spirituous or malt liquor tasting facilities may have an "Other Food" License for ware washing and appetizer preparation only, not for meal preparation. A ~~vinous, S~~spirituous ~~or malt l~~Liquor T~~t~~asting F~~f~~facility shall not include establishments ~~have~~with a Series 12 restaurant liquor license.

Stable - a detached accessory structure including, but not limited to, a corral or paddock for the keeping of one or more horses owned by the occupants of the premises and which are not kept for remuneration, hire or sale.

Stable, Commercial - a structure including, but not limited to, a corral or paddock for the keeping of horses for remuneration, hire or sale.

Storm Sewer - A constructed conduit necessary, useful, or convenient for the collection and carrying of surface waters to a drainage course.

Story - that portion of a building included between the surface of any floor and the finished ceiling next above it or the finished under surface of the roof directly over that particular floor.

Street - Any existing or proposed street, avenue, boulevard, road, lane, parkway, place, bridge, viaduct or easement for public or private vehicular access or a street in a plat duly filred and recorded in the County Recorder's office. A street includes all land within the street right-of-way, whether improved or unimproved, and includes such improvements as pavement, shoulders, curbs, gutters, sidewalks, parking spaces, bridges and viaducts.

Street, Arterial Street - A street or road with the principal function to serve as a part of a major network for the through traffic flow, separate from local traffic, to and from areas of principal tragic generation, of adequate design, capacity and construction to provide for the safe and rapid distribution and collection of through traffic and to provide limited ingress and egress to and from collector and local streets.

Street, Collector Street - A street or road that serves local traffic movement within an area, and traffic between major arterials and local streets and provides a means of ingress and egress to local streets and abutting property; also serves to connect adjacent neighborhoods and includes the principal entrance streets into residential neighborhoods. There may also be provisions for parking and loading or unloading on collector streets.

Street, Cul-de-sac - A local street of relatively short length with one end open to traffic and the other end permanently terminating in a vehicular turnaround.

Minor Street, Minor - A street or road used primarily for direct access and egress to residential, commercial, and industrial areas and having major service functions of loading, unloading, and direct access and egress to abutting property, and being controlled in such fashion as to discourage through traffic and maintain relatively slow speed. There may also be provisions for parking on minor streets.

Street, Frontage Road - A minor street, parallel to and adjacent to an arterial street, whose primary purpose is providing access to abutting properties.

Street, Stub - A short dead-end street or road, no more than one lot deep in length, formed at the boundaries of a subdivision to provide access to abutting property.

Street Line - the boundary line between street right-of-way and abutting property.

Structure - anything constructed or erected which requires a fixed location on the ground, including a building but not including a fence or wall, unless the wall is part of the building used as a fence.

Structure, Main - a structure housing the principal use of a site or functioning as the principle use.

Structure Alteration - any change in the supporting members of a building, such as foundations, bearing walls, columns, beams, floor or roof joints, or any change in the exterior dimensions of a building, excepting those changes which may result from providing minor repairs and building maintenance.

Subdivision of Land - (see Arizona Revised Statutes, Section 9-463).

Subdivider - Any individual, firm, association, syndicate, co-partnership, corporation, trust or any other legal entity commencing proceedings under the regulations of Article VII Subdivision Standards, to effect a subdivision of land hereunder for himself or for another.

Subdivision - Improved or unimproved land or lands divided for the purpose of financing sale or lease, whether immediate or future, into four (4) or more lots, tracts, or parcels of land, or, if a new street is involved, any such property which is divided into two (2) or more lots, tracts, or parcels of land, or any such property, the boundaries of which have been fixed by a recorded plat, which is divided into more than two (2) parts. This definition includes land splits. Also includes any condominium, cooperative, community apartment, townhouse or similar project containing four (4) or more

parcels, in which an undivided interest in the land is coupled with the right of exclusive occupancy of any unit located thereon, but plats of such projects need not show the buildings or the manner in which the buildings or airspace above the property shown on the plat are to be divided.

Swarming – Swarming is a natural process in the life of a honeybee colony. Swarming occurs when a large group of honeybees leaves an established colony and flies off to establish a new colony. Swarming is a natural method of propagation that occurs in response to crowding within the colony.

Swimming Pool - any above or below-groundpermanent structure containing or intended to contain water for recreational uses, including wading pools.

Tentative Plat or Preliminary Plat - That portion of a preliminary plan or any separate drawing of a parcel of land that conforms with the requirements of the subdivision regulations intended for subdivision and approval of the Planning and Zoning Commission. and which is prepared in accordance with Section 401 and Section 402 of these regulations.

Town - the Town of Jerome, Yavapai County, Arizona.

Travel Trailer - a vehicle without motive power, portable structure with wheels built on a chassis, designed as a temporary dwelling for travel recreation and vacation purposes, having a body width not exceeding eight (8) feet and its body length does not exceed thirty-two (32) feet.

Trailer Park or Court - facilities for the storage, parking, and maneuvering of mobile homes or trailers with adequate road and stall sites, and providing adequate sanitation and water facilities required to meet the needs of the residents. Site location is provided on a rent or lease basis. Includes mobile home parks.

Tree, Heritage – A designated tree that is unique and important to the cultural landscape of Jerome community because of its species, age, size, location, and/or historical significance.

~~**Town** - the Town of Jerome, Yavapai County, Arizona.~~

Unapproved Lot or Parcel - A lot or parcel of land that may be legally described on a deed, appear on a recorded or unrecorded map or been assigned a parcel number by the County Recorder but has never been officially approved by any past or present Jerome Town Council.

~~**Use** - the purpose for which a site or structure is arranged, designed, intended, constructed, moved, erected, altered or enlarged or for which either a site or structure is or may be occupied and maintained.~~**Use** – Any purpose for which a lot, building, or other structure or a tract of land may be designated, arranged, intended, maintained, or occupied; or any activity, occupation, business, or operation carried on or intended to be carried on in a building or other structure or on a tract of land.

~~**Use, Conditional** - a use which is listed as a conditional use in any given district in this ordinance. Conditional uses may be required to meet certain requirements as a condition precedent to the granting of a use permit which will allow the establishing of a conditional use in any given district.~~**Use, Conditional** – A use of property that may be permitted only bye conditional use permit and which use must comply with all terms and conditions of the permit.

~~**Use, Permitted** - a use which is listed as a permitted use in any given district in this ordinance. Permitted uses may not meet special requirements as a condition precedent to be allowed to establish in a given district, except as may be required by the provisions of this ordinance.~~**Use, Permitted** – A use permitted in a district without the need for special administrative review and approval, upon satisfaction of the standards and requirements of this ordinance.

Variance - (see Arizona Revised Statutes, Section 9-462, and Section 305 of this Ordinance).

Vineyard - is an area of land planted with cultivated grapevines.

Viniculture - is the science, cultivation and study of grapes which deals with the series of events that occur in a vineyard, which vineyard produces grapes specifically for winemaking, whether for commercial, non-commercial or domestic use. The term "viniculture" shall not apply to plantings of one hundred (100) vines or less.

Wall - any structure or device forming a physical barrier which is so constructed that fifty (50) percent or more of the vertical surface is closed preventing the passage of light, air and vision through said surface.

Warehouse - a building or buildings used for the commercial storage of goods, where no retail or wholesale operations are conducted at the site.

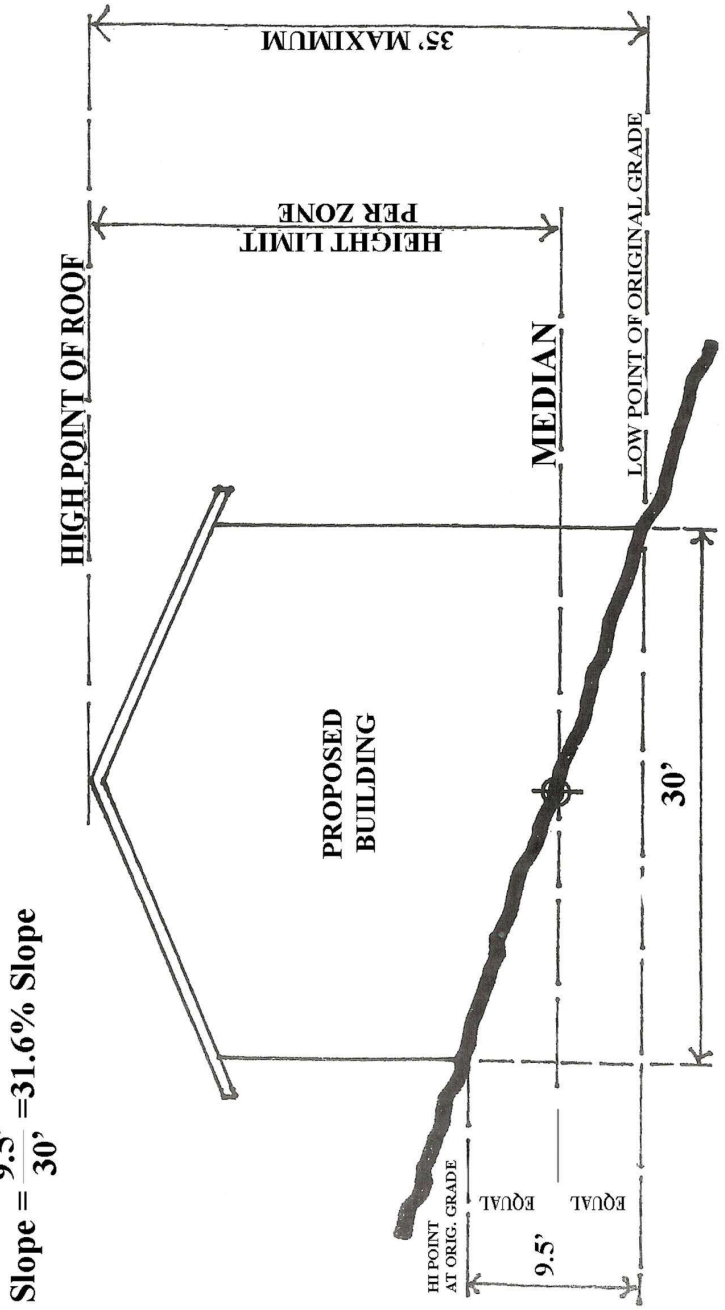
Wholesale - the sale of goods or materials for the purposes of resale.

Water System, Community - a water supply system publicly or privately owned having an authorized permit, which serves the needs of the residents.

~~**Yard** - open and unoccupied space on a lot or parcel.~~**Yard** – An open space at grade between a building and the adjoining lot line, unoccupied or unobstructed by any portion of a structure from the ground upward, except as otherwise provided in this ordinance.

Yard, Front - a yard, the depth of which is the minimum required horizontal distance between the front line and a line parallel thereto on the lot, which yard extends across the full width of the lot.

Yard, Rear - a yard, the depth of which is the minimum required horizontal distance between the rear lot line and a line parallel thereto on the lot, which yard extends across the full width of the lot.



Yard, Side - a yard, the width of which is the minimum required horizontal distance between the side lot line and a line parallel thereto on the lot, not including any portion of required front yard or required rear yard.

Zone - a district classification established by this ordinance which limits or permits various and specific uses.

Zone District - a zone area in which the same zoning regulations apply throughout the district.

Zoning Area – The area within one hundred fifty feet, including all rights-of-way, of the affected property subject to the proposed amendment or change and the area of the proposed amendment or change.

502.1 Appendix A - Total Lighting Output

Lighting Zones

Zone 0

- Applies to areas in which permanent lighting is not expected or, use is limited to the amount of lighting and period of operation.
- Includes undeveloped areas, wilderness parks and preserves, astronomical observatories, or areas where a dark environment is critical
- Special review should be required for any permanent lighting in this zone.
- If lighting is used, it is typically Class 3 lighting or Class 2 ground illumination lighting.

Zone 1

- Areas that desire low ambient lighting levels.
- Typically single and two family residential communities, rural town centers, business parks and agricultural areas.
- May also include developed areas in parks or other natural settings.
- Can be Class 2 or Class 3 Lighting.

Zone 2

- Areas with moderate ambient lighting levels.
- Typically multifamily residential use, institutional residential use, schools, churches, hospitals, hotels/motels, recreation facilities, and commercial or business districts with moderate nighttime activities.
- Can be used to accommodate outdoor sales or light industry in an area other than LZ-1
- Can be Class 1, Class 2, or Class 3 Lighting.

Zone 3

- Areas with moderately high lighting levels.
- Typically include commercial corridors, high intensity suburban commercial areas, town centers, mixed use areas, industrial and shipping and rail yards with high nighttime activity.
- Can also include High use recreational facilities and playing fields, regional shopping malls, car dealerships, gas stations and other nighttime active retail areas.
- Can be Class 1, Class 2, or Class 3 Lighting

Zone 4

- Areas with High Ambient lighting levels
- Should only be used for special cases and is not appropriate for most cities.
- May be used for unusual installations such as high density entertainment, heavy industrial use, or major manufacturing.
- Typically only Class 1 lighting is used in this Zone.
- Currently there are no known uses for this Class or Zone within the limits of the Town of Jerome.

ORDINANCE NO. 177

ADOPTED JUNE 14, 1977

AN ORDINANCE OF THE MAYOR AND COUNCIL OF THE TOWN OF JEROME, ARIZONA, IMPOSING REGULATIONS, PROHIBITIONS, AND RESTRICTIONS FOR THE PROMOTION OF HEALTH, SAFETY, CONVENIENCE, AND WELFARE; REGULATING AND RESTRICTING HEIGHT, NUMBER OF STORIES, SIZE OF BUILDINGS AND OTHER STRUCTURES, THE PERCENTAGE OF LOT THAT MAY BE OCCUPIED, THE SIZE OF YARDS, COURTS, AND OTHER OPEN SPACES, THE DENSITY OF POPULATION, THE LOCATION AND USE OF BUILDINGS, STRUCTURES, AND LAND FOR TRADE, INDUSTRIAL, COMMERCIAL, RESIDENTIAL OR OTHER PURPOSES; ESTABLISHING STANDARDS OF PERFORMANCE AND DESIGN; AND FOR SUCH PURPOSES DIVIDING THE TOWN INTO DISTRICTS OF SUCH NUMBER, SHAPE, AND AREA AS MAY BE DEEMED BEST SUITED FOR THE PURPOSES HEREOF; AND ADOPTING A MAP OF SAID DISTRICTS; CREATING BOARDS AND DEFINING THE POWERS AND DUTIES OF SAID BOARDS; PRESCRIBING PROCEDURES FOR CHANGES OF DISTRICTS, CONDITIONAL USE PERMITS, VARIANCES, AND OTHER PERMITS; PRESCRIBING PENALTIES FOR VIOLATIONS OF SAID ORDINANCE; AND DECLARING AN EMERGENCY.

WHEREAS, it has been found necessary for the welfare of the Town of Jerome that a Zoning Ordinance shall be enacted; and

WHEREAS, by authority conferred by Title 9, Chapter 4, Article 6, Sections 1 through 6, Arizona Revised Statutes, 1956, and statutes amendatory thereto, the Town of Jerome is authorized and empowered to enact such an ordinance;

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE TOWN OF JEROME as follows:

APPENDICES 124

APPENDIX A DEFINITIONS 124

ARTICLE I: ADMINISTRATION

SECTION 101. SHORT TITLE

This ordinance shall be known as “The Zoning Ordinance of the Town of Jerome.”

SECTION 102. PURPOSE

The purposes of this ordinance are to secure safety from fire, panic, and other dangers; to provide adequate light and air; to lessen congestion in the streets; to prevent the overcrowding of land; to avoid undue concentration of population, to facilitate the adequate provision of transportation, water, sewerage, schools, parks, and other public requirements; to provide for the social, physical, and economic advantages resulting from comprehensive and orderly planned use of land resources; and to otherwise promote the health, safety, convenience and general welfare of the citizens of the Town of Jerome, Arizona.

SECTION 103. INTERPRETATION AND APPLICATION

In its interpretation and application, the provisions of this ordinance shall be held to be minimum requirements for the promotion of a general plan, and for the promotion of the public health, safety, and general welfare. It is not intended by this ordinance to repeal, abrogate, annul or in any way impair or interfere with existing provisions of other laws or ordinances, except those specifically repealed by this ordinance, or with restrictions placed upon property by covenant, deed, or other agreement between parties, provided that where this ordinance imposes a greater restriction on land, buildings or structures than is imposed or required by such existing provisions of law, ordinance, contract or deed, the provisions of this ordinance shall control.

A. DEFINITIONS

For the purpose of this ordinance, certain words and terms used herein are defined as follows: all words used in the present tense include the future tense; all words in the plural number include the singular number, all words in the singular number include the plural number, unless the natural construction of the wording indicates otherwise. The word “lot” includes the word “plot”; the word “building” includes the word “structure”; and the word “shall” is mandatory and not discretionary. Other words and phrases used in this ordinance shall have the meaning established in Appendix A: Definitions.

SECTION 104. COMPUTATION OF TIME

1. When calculating a period of time prescribed by this Ordinance, the day of the act, event, or decision that starts the time period is not counted.
2. Unless otherwise expressly stated, references to "days" mean calendar days.
3. If the final day of a period falls on a Saturday, Sunday, legal holiday, or other day when Town offices are closed, the period shall extend to the next business day.

SECTION 105. PLANNING AND ZONING COMMISSION

B. COMPOSITION; TERMS OF MEMBERS; VACANCIES; COMPENSATION OF MEMBERS

A Planning and Zoning Commission was established upon adoption of the Jerome Zoning Ordinance. At the adoption of this ordinance, the Commission shall consist of five (5) members, each of whom shall be a resident of the Town of Jerome to be appointed by the Town Council. The members of the Commission shall serve for three (3) years, except as provided by this Ordinance. In the event of a death, resignation, or removal from the Commission, the vacancy shall be filled by the Council for the unexpired term. Members of the Commission may, after a public meeting, be removed by the Council for inefficiency, neglect of duty, or unethical conduct in office. A Commission member who is absent four (4) regular meetings of a year, beginning March 1st and ending February 28th, shall be deemed to have vacated their appointment without further action being taken by the Commission or Council. All members shall serve without pay. However, members

of the Commission may be reimbursed for actual expenses incurred in connection with their duties upon authorization or ratification by the Commission and approval of such expenditures by the Town Council.

[Ord. No. 313; Ord. No. 445]

C. POWERS AND DUTIES

The Planning & Zoning Commission shall:

1. Prepare and administer any lawful plan duly adopted by the Council for the present and future growth and development of the Town of Jerome pertaining to the use of land and buildings;
2. Conduct ongoing studies of the best present and future use and location for land and buildings within the Town of Jerome and in cooperation with adjacent areas;
3. Recommend to the Council revisions in such plans which, in the opinion of the Commission, are in the best interest of the citizens of the Town of Jerome;
4. Hold public hearings where necessary;
5. Make recommendations to the Council on all matters concerning or relating to the creation of zoning districts, the boundaries thereof, the appropriate regulations to be enforced therein, and amendments of this ordinance;
6. Carry out the specific duties as prescribed by this ordinance, and undertake all activities usually associated with and commonly known as “Planning and Zoning”. The Commission is also authorized to confer and advise with other city, county, regional, or state planning commissions.

D. SELECTION OF OFFICERS

The Commission shall elect a Chair and Vice Chair from among its own members, who shall serve for one (1) year and until their successors are elected and qualified. No individual may serve consecutively as Chair or as Vice Chair for more than two one-year terms. The Chair shall preside at all meetings and exercise all the usual rights, duties, and prerogatives of the head of any similar organization. The Chair shall have the power to administer oaths and to take evidence. The Vice Chair shall perform the duties of the Chair in the latter’s absence or disability. Vacancies created by any cause shall be filled for the unexpired term by a new election.

[Ord. No. 410]

E. QUORUM; VOTING

Three (3) members shall constitute a quorum. The affirmative vote of three (3) members shall be required for passage of any matter before the Commission. The minutes of the meeting shall reflect the “ayes” and “nays” cast on a particular measure and shall reflect the vote of each member present. A member may abstain from voting upon a declaration that he has a conflict of interest, in which case such member shall take no part in the deliberation on the matter in question.

[Ord. No. 313]

F. RULES; REGULATIONS; RECORDS; MEETINGS

The Commission shall make and publish rules and regulations governing its proceedings and meetings, subject to Council approval. All meetings of the Commission shall be open to the public. The minutes and records of all Commission proceedings shall be kept and filed as public record in the office of the Town Clerk.

SECTION 106. BOARD OF ADJUSTMENT

A. ESTABLISHMENT; COMPOSITION; TERM OF MEMBERS; VACANCIES; COMPENSATION OF MEMBERS

There is hereby established a Board of Adjustment of the Town of Jerome, to consist of five (5) members, each of whom shall be a resident of the Town of Jerome, to be appointed by the Town Council. The members of the Board shall serve for three (3) years, except as provided in this Ordinance. The members of the first Board appointed hereunder shall serve for the following terms:

two (2) members shall be appointed for a term of one (1) year, two (2) members shall be appointed for a term of two (2) years, and one (1) member shall be appointed for a term of three (3) years. In the event of a death, resignation, or removal from the Board, the vacancy shall be filled by the Council for the unexpired term. Members of the Board may, after a public hearing, be removed by the Council for inefficiency, neglect of duty, or malfeasance in office. For any reason other than absence, the Council shall file a written statement of the reasons for removal. A Board member who is absent four (4) regular meetings of a year, beginning March 1st and ending February 28th, shall be deemed to have vacated their appointment without further action being taken by the Board or Council. All members shall serve without pay. However, members of the Board may be reimbursed for actual expenses incurred in connection with their duties upon authorization or ratification by the Board and approval of such expenditures by the Town Council.

[Ord. No. 445]

B. POWER AND DUTIES

1. It shall be the duty of the Board of Adjustment to:
    a. Hear and decide appeals in which it is alleged there is an error in an order, requirement, or decision made by the Zoning Administrator in the enforcement of the zoning ordinance, and to reverse or affirm, wholly or partly, or modify the order, requirement, or decision of the Zoning Administrator appealed from, and make such order, requirement, decision or determination as necessary.
    b. Hear and decide appeals for variances from the terms of the zoning ordinance only if, because of special circumstances applicable to the property, including its size, shape, topography, location, or surroundings, the strict application of the zoning ordinance will deprive such property of privileges enjoyed by other property of the same classification in the same zoning district. Any variance granted is subject to such conditions that will assure that the authorized adjustment shall not constitute a grant of special privileges inconsistent with the limitations upon other properties in the vicinity and zoning in which such property is located.
2. The Board of Adjustment may not:
    a. Make any changes in the uses permitted in any zoning classification or zoning district, or make any changes in the terms of the zoning ordinance, provided the restrictions in this paragraph shall not affect the authority to grant variances pursuant to this article.
    b. Grant a variance if the special circumstances applicable to the property are self-imposed by the property owner.

C. SELECTION OF OFFICERS

The Board shall elect a Chair and Vice Chair from among its own members, who shall serve for one (1) year and until their successors are elected and qualified. The Chair shall preside at all meetings and exercise all the usual rights, duties, and prerogatives of the head of any similar organization. The Chair shall have the power to administer oaths and to take evidence. The Vice Chair shall perform the duties of the Chair in the latter's absence or disability. Vacancies created by any cause shall be filled for the unexpired term by a new election.

[Ord. No. 410]

D. QUORUM; VOTING

Three (3) members shall constitute a quorum. The affirmative vote of three (3) members shall be required for passage of any matter before the Board. In this connection, the minutes of the meeting shall reflect the "ayes" and "nays" cast on a particular measure and shall reflect the vote of each member present. A member may abstain from voting only upon a declaration that he has a conflict of interest, in which case such member shall take no part in the deliberation on the matter in question.

E. RULES; REGULATIONS; RECORDS; MEETINGS

The Board shall make and publish rules and regulations to govern its proceedings and to provide for its meetings. All meetings of the Board shall be open to the public. The minutes and records of all Board proceedings shall be kept and filed as public record in the office of the Town Clerk.

SECTION 107. HISTORIC PRESERVATION/DESIGN REVIEW BOARD

A. PURPOSE

The purpose of the Historic Preservation/Design Review Board is to review the exterior design of new buildings and structures, the alteration of buildings and structures, signs, and proposed demolition of structures, in order to ensure that new development is compatible with the surrounding environment, and to preserve and protect the historic character of the Town of Jerome in accordance with the provisions of Section 304.

[Ord. No. 470]

B. COMPOSITION; TERMS OF MEMBERS; VACANCIES; COMPENSATION OF MEMBERS

The Historic Preservation/Design Review Board of the Town of Jerome shall be composed of five (5) members. The membership shall consist of five (5) residents of Jerome, who shall be persons qualified by design background, training, or experience, to be appointed by the Town Council. Each member shall serve for a term of three (3) years. Members may, after a public meeting, be removed by the Council for inefficiency, neglect of duty, or unethical conduct in office. A Board member who is absent four (4) regular meetings of a year, beginning March 1st and ending February 28th, shall be deemed to have vacated their appointment without further action being taken by the Board or Council. In the event of death or resignation, or removal from the Board, the vacancy shall be filled by the Council for the unexpired term. All members shall serve without pay. However, members of the Board may be reimbursed for actual expenses incurred in connection with their duties upon authorization or ratification by the Board and approval of such expenditures by the Town Council.

[Ord. No. 313; Ord. No. 378; Ord. No. 410; Ord. No. 445; Ord. No. 459]

C. POWERS AND DUTIES

1. The Historic Preservation/Design Review Board shall have the power to approve, conditionally approve, or disapprove all requests for design approval as required by this Ordinance, basing its decision on the criteria as set forth in Section 304.
2. It shall be the responsibility of the applicant to prove that the intent and purpose established in this Section will be accomplished.
3. The Historic Preservation/Design Review Board, upon hearing an application, may impose such reasonable conditions as it may deem necessary in order to fully carry out the provisions and intent of this ordinance. Violation of any such condition shall be a violation of this ordinance, and such violation shall render any building permit null and void.

D. SELECTION OF OFFICERS

The Board shall elect a Chair and Vice Chair from among its own members, who shall serve for one (1) year and until their successors are elected and qualified. No individual may serve consecutively as Chair, or as Vice Chair, for more than two one-year terms. The Chair shall preside at all meetings and exercise all the usual rights, duties, and prerogatives of the head of any similar organization. The Chair shall have the power to administer oaths and to take evidence. The Vice-Chair shall perform the duties of the Chair in the latter's absence or disability. Vacancies created by any cause shall be filled for the unexpired term by a new election.

[Ord. No. 410]

E. QUORUM; VOTING

Three (3) members shall constitute a quorum. The affirmative vote of three (3) members shall be required for the passage of any matter before the Board. The minutes of the meeting shall reflect the "ayes" and "nays" cast on a particular measure and shall reflect the vote of each member present. A member may abstain from voting upon declaration that he has a conflict of interest, in which case such member shall take no part in the deliberation on the matter in question.

[Ord. No. 313]

F. RULES; REGULATIONS; RECORDS; MEETINGS

The Board shall make and publish rules and regulations governing and providing for its proceedings and meetings, subject to Council approval. All meetings of the Board shall be open to the public. The minutes and records of all Board proceedings shall be kept and filed as public record in the office of the Town Clerk.

SECTION 108. ZONING ADMINISTRATOR

A. CREATION; APPOINTMENT

There is hereby created the office of Zoning Administrator of the Town of Jerome, who shall be appointed from time to time by the Mayor and Council.

B. POWERS AND DUTIES

The Zoning Administrator shall:

1. Enforce the Zoning Ordinance.
2. Accomplish all administrative actions required by the Ordinance.
3. Undertake preliminary negotiation with, and provide advice to, all applicants for zoning adjustment action, use permits, design review, or other action of the Planning and Zoning Commission or Historic Preservation/Design Review Board.
4. Subject to general and specific policy laid down by the Planning and Zoning Commission and Town Council, interpret the Zoning Ordinance to members of the public, Town departments, and other branches of government.

SECTION 109. ENFORCEMENT

The Zoning Administrator shall enforce this ordinance, and in no case shall grant permission for the issuance of any permit for the construction, reconstruction, alteration, demolition, movement, or use of any building, structure, lot, or parcel if the proposed construction, reconstruction, alteration, or use would be in violation of any of the provisions of this ordinance. A permit may be issued despite such a violation only if the Board of Adjustment, through an interpretation of this ordinance or the granting of a variance, directs the Zoning Administrator to do so.

SECTION 110. VIOLATION AND PENALTY

It is hereby declared to be unlawful to construct, erect, install, alter, change, demolish, maintain, or use any house, building, structure, or fence, or to use any lot or premise contrary to or in violation of any provision of this ordinance. Violations of any provision of the Zoning Ordinance of the Town of Jerome are subject to Chapter 18 Enforcement Procedures for Violations of the Town Code and Zoning Ordinance. Every such person, firm, or corporation shall be deemed guilty of a separate offense for each and every day in which such violation is committed, continued, or permitted, and shall be punished as provided in this section.

SECTION 111. SEVERABILITY

If any part of “The Zoning Ordinance of the Town of Jerome” is found to be invalid or unconstitutional by any Court, such action shall not apply to the ordinance as a whole. It is intended and declared that all parts of said “Zoning Ordinance of the Town of Jerome” shall continue in full force and effect except for those expressly declared to be invalid or unconstitutional.

ARTICLE II: DEFINITIONS [REMOVED]

[CODIFIER'S NOTE: This Article was rewritten with Ordinance 497 and moved to Appendix A.]

ARTICLE III: PROCEDURES

SECTION 301. AMENDMENTS OR ZONE CHANGES

A. PURPOSE

The Council may, from time to time, adopt changes to the zoning district boundaries or amend, change, repeal, or supplement the regulations of the Zoning Ordinance of the Town of Jerome. Such change or amendment may be initiated by the Council or the Commission on its own motion or by petition of one or more owners of real property within the area proposed to be changed.

B. PETITIONS FOR AMENDMENTS OR ZONE CHANGES

1. Petitions for change of district boundaries or amendment of regulations shall be filed with the Zoning Administrator by an owner of real property within the area proposed to be changed. Per Section 307, a pre-application meeting with Town Staff is required prior to submittal of an application. In the case of an application requesting a zoning district change that includes property owned by others, not including the petitioner, the petition shall include the signatures of all real property owners of the land in the area proposed to be changed. All petitions shall include:

    a. A map showing the particular property or properties for which the change of zone is requested and adjoining properties, public streets, and rights-of-way within three hundred (300) feet of the exterior boundary of the area proposed to be changed.

    b. A Tentative Development Plan, which shall show the following:

        1) Topography.

        2) Proposed street system.

        3) Proposed block layouts.

        4) Proposed reservation for parks, parkways, playgrounds, recreation areas, and other open spaces.

        5) Off-street parking space.

        6) Types and uses of structures.

        7) Locations of structures, garages, and/or parking spaces.

        8) A tabulation of the total number of acres in the proposed project and a percentage thereof designated for the proposed structures.

        9) Preliminary plans and elevations of the structure types.

    c. Reasons justifying the petition;

    d. A true statement revealing any conditions or restrictions of record which would affect the permitted “uses” of the property if rezoned as requested and the dates of expiration thereof; and

    e. Such photographs, drawings, and other supporting documents as the applicant may desire to present.

    f. Payment of a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the offices of the Town Clerk. No part of the filing fee shall be returnable. Payment of the filing fee shall be waived when the change or amendment is initiated by the Council or the Commission or when the petitioner is the Town, County, State, or Federal government.

2. Within fourteen (14) days of receipt of an application, the Zoning Administrator shall determine the completeness of the application. If the application is incomplete, the Zoning Administrator shall provide the applicant with a comprehensive list of the specific deficiencies in a written notice. A resubmittal of an incomplete application shall be reviewed for completeness within seven (7) days. If the application is determined to be complete, the Zoning Administrator shall forward the application to the Planning and Zoning Commission after conducting a substantive review of the complete application materials.
3. Any plan approved by the Zoning Administrator under the provisions of Section 303 must substantially conform to the Tentative Development Plan submitted as part of the petition for a change of district boundaries.

C. COMMISSION ACTION

1. Upon receipt of any complete application for, and prior to holding a public hearing on, actions that impose a new land use regulation or modify an existing land use regulation, a Neighborhood Meeting may be required in accordance with Section 306 of this zoning ordinance.
2. After a Neighborhood Meeting has been held, if applicable, in accordance with Section 306, the Zoning Administrator shall then choose a reasonable time for the hearing, and shall give notice to interested parties and to the public by publication of a notice in a newspaper of general circulation in the Town of Jerome, and by posting one notice of the hearing on the area of the property requesting the proposed change, not less than fifteen (15) days prior to the hearing. The notice shall set forth the time and place of the hearing, including a general explanation of the matter to be considered, and a general description of the area affected.
3. The Commission may recommend approval or denial to the Council, or continue the application and hearing to a time and place certain. The Commission shall render its decision in the form of a written recommendation to the Council, which may be via a request for Council action or via the transmission of the Commission meeting minutes to Council.
4. Prior to publishing a petitioned Zoning Map change, the Commission may, on its own motion, delimit or extend the boundaries of such area, so as to constitute a more reasonable zone district boundary.
5. The Commission may, on its own motion, propose any amendments to this ordinance and map. After holding a public hearing as required by this section, the Commission shall either:
    a. Transmit such proposal to the Council, which shall then proceed in accordance with the procedures of this Ordinance for any other amendment; or
    b. Vote to quash the Commission-initiated proposal, in which case no further action need be taken by the Commission or Council.

[Ord. No. 406]

D. COUNCIL ACTION

1. The Council shall, within forty-five (45) days after the Commission action, hold a public hearing on the request. Notice of the time and place of the hearing shall be provided in accordance with Section 301.C.2 of this Ordinance. In addition, the Town may give notice of the hearing in such other manner as it may deem necessary or desirable.
2. If the owners of twenty (20) percent or more of the property within the zoning area, as defined by A.R.S. § 9-462.04 as the area within one hundred fifty feet, including all rights-of-way, of the affected property subject to the proposed amendment or change and the area of the proposed amendment or change, file a protest in writing against a proposed amendment or zone change, it shall not become effective except by the favorable vote of three-fourths (3/4) of all members of the Council. If any members of the Council are absent or unable to vote on such a question

because of a conflict of interest, then the required number of votes for passage of the question shall be three-fourths (3/4) of the remaining membership of the Council, providing that such required number of votes shall in no event be less than a majority of the full membership of the legally established governing body.

3. The Council may approve, deny, or continue the application and hearing to a time and place certain by a vote of a majority of the number of members of the Council who are present and qualified to vote on the matter. The Council may also remand a proposal recommended by the Commission back to the Commission for further consideration.

4. At the time of rezoning, the Council shall establish a schedule for development of the specific use or uses for which rezoning is requested. The staff recommendation for rezoning requests that involve a zoning violation is a one-year period. For rezoning requests that do not involve a zoning violation, a five-year time period is recommended. A five-year time extension may be requested if the initial five-year time period expires. Requesting a time extension initiates a staff review to determine whether the request should be approved or denied, and whether conditions should be revised to reflect new conditions or practice. New conditions may be added during the staff review. The time extension request shall be noticed for a public hearing and heard only by the Council in accordance with the standards of this section. The Town Council may grant a time extension for a period of five years or less from the most recent public hearing on the case. If, at the expiration of this period, the property has not been improved for the use for which it was conditionally approved, the Council may elect to close the rezoning, in which case, it shall revert to its former zoning classification upon legislative action.

[Ord. No. 453]

E. RECONSIDERATION OF DENIED AMENDMENTS

If a petition for an amendment is denied by the Council or is withdrawn after the Commission hearing, the Commission shall not consider the petition, or any other petition seeking the same amendment for the same property or any part of it, for a period of one (1) year from the date of such denial action. This restriction does not apply if the conditions upon which the original denial was based have changed.

F. EXCEPTIONS

In the event that a request for amendment concerns only the amendment of general requirements of this Ordinance, no signature of affected property owners or posting of property shall be required; provided, however, that all other provisions of this Section shall be complied with.

G. TIMEFRAME

The review periods specified in this Ordinance do not include time required for applicant responses, review of additional information, application revisions or corrections, and could vary due to public hearing notification requirements and other Town procedures. Review periods may be extended as reasonably necessary for projects involving complex technical, environmental, legal, or planning considerations.

SECTION 302. CONDITIONAL USE PERMITS

A. PURPOSE

It is the intent of this Ordinance to permit Conditional Uses in appropriate zoning districts, but only in locations within such districts that can be designed and developed in a manner that assures maximum compatibility with adjoining uses. It is the purpose of this Section to establish principles and procedures to provide guidance and control of such uses.

B. GENERAL REGULATIONS

1. Certain buildings, structures and uses of land may be authorized by the Commission as Permitted Conditional Uses in a given district subject to the provisions of this Ordinance. The Planning and Zoning Commission is empowered to make recommendations to the Town Council regarding granting or denying applications for use permits and to impose reasonable conditions upon them. Prior to becoming effective, all actions by the Planning and Zoning Commission concerning a use permit application must be acted upon by the Town Council in accordance with the provisions of subsection 302.E.

2. Any building, structure, or use existing on the effective date of this Ordinance which is reclassified by this Ordinance as a Permitted Conditional Use, within the zoning district in which it is located, shall be deemed to satisfy all conditions that would otherwise be imposed upon such use by this Ordinance. Its continued operation shall not be subject to issuance of a Conditional Use Permit; provided, however, to the extent that the building, structure, or use does not conform to the requirements of this Ordinance, it shall be considered nonconforming as described in Section 501, and its continuance shall be governed by all applicable nonconforming use regulations.

3. Every Conditional Use Permit issued shall be personal to the permittee and applicable only to the specific use and to the specific property for which it is issued. Use Permits may contain specific limitations on the scope, nature, and duration of the use, as well as transferability of the Use Permit, as deemed necessary to secure the objectives of this Ordinance. The conformance to special conditions imposed by the Permit, as well as compliance with other provisions of this Ordinance, shall be the responsibility of the property owner.

C. CONDITIONAL USE PERMIT APPLICATION

1. The application for a use permit shall be filed with the Zoning Administrator on a form prescribed by the Zoning Administrator.

2. The Zoning Administrator shall provide guidance to the applicant regarding the preparation of the application to ensure it satisfies the intent of this Section. When required by the Zoning Administrator, the application shall be accompanied by a detailed site plan prepared in accordance with Section 303.1, showing all information necessary to demonstrate that the proposed use will comply with all special conditions as well as other regulations and requirements of this Ordinance. The applicant shall furnish any additional information the Zoning Administrator may consider relevant to the evaluation of the application.

3. The application shall be reviewed in accordance with Section 301.B.2.

D. COMMISSION ACTION AND FINDINGS

1. Commission Action on Conditional Use Permit Applications is as outlined in Section 301.C, except that:

   a. In its review of the application, the Commission shall consider not only the nature of the use and the special conditions influencing its location in the particular district, but also the proposed location of buildings, parking and other facilities within the site, the amount of traffic likely to be generated and how it will be accommodated, and the influence that such factors are likely to exert on adjoining properties. The Commission may make such suggestions as it considers desirable to satisfy the intent of this Section. The applicant shall

furnish the Commission with any additional information it may consider relevant to the evaluation of the application.

b. In order to recommend approval of any use permit, the Commission must find that the establishment, maintenance, or operation of the use or building applied for will not be detrimental to the public health, safety, and general welfare of the Town and its citizens.

c. The Commission may designate such conditions in connection with the use permit as it deems necessary to secure the intent and purposes of this Ordinance and may require guarantees and evidence that such conditions are being or will be complied with.

d. If the Commission finds that the application and supporting data do not indicate that all applicable conditions and requirements of this Ordinance will be met, it shall recommend denial of the permit.

E. COUNCIL ACTION

1. The Council shall, within forty-five (45) days after the Commission action on a Conditional Use Permit, act on the recommendation of the Planning and Zoning Commission by either affirming, denying, or modifying the recommendation of the Planning and Zoning Commission. The Town Council may make a decision based on its own findings.
2. The Council may designate such conditions in connection with the permit as it deems necessary to secure the intent and purpose of this Ordinance and may require such guarantees and evidence that such conditions are being, or will be, complied with.
3. The Council's decision shall be final and shall become effective immediately. Notice of the decision shall be mailed to the applicant at the address shown in the application.
4. Failure of the applicant to comply with the conditions and safeguards that are a part of the terms under which a Conditional Use Permit is granted shall be deemed a violation of this Ordinance and punishable under Section 110.

[Ord. No. 470]

F. TIME LIMITS

1. Use permits become effective immediately upon action by the Town Council.
2. Any use permit issued by the Town Council shall be commenced within six (6) months from the date of Council ratification, and diligently pursued, otherwise it shall become null and void.
3. No person shall reapply for the same or substantially the same use permit on the same or substantially the same plot, lot, or parcel of land within a period of one (1) year from the date of denial or revocation of said use permit.
4. An extension of approval may be granted by the Town Council if the applicant files for the extension prior to the approval becoming void. The Town Council may grant up to two additional extensions provided the approval is in compliance with all ordinances and requirements in effect at the time of the extension request. An application for an extension shall be accompanied by a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the office of the Town Clerk.

[Ord. No. 470]

G. REVOCATION

Use permits granted in accordance with the provisions of this ordinance may be revoked if any of the conditions of terms of the permit are violated or if any law or ordinance is violated in connection with the permit.

The Zoning Administrator shall notify the permittee by both Certified Mail and First-Class Mail of a violation or the termination of a use permit. If no attempt to change the violation is made within

twenty (20) days of the date the Zoning Administrator sends the notification, the permit shall be revoked and considered null and void. Notice shall be deemed served on the date that the notice is deposited in the United States Mail by Certified Mail and First-Class Mail to the permittee's address of record. Failure to accept or claim a mailed notice does not delay the 20-day period granted to address the violation.

Any use permit shall be considered null and void if construction does not conform to the originally approved site plan. Substantial deviations requested from the originally approved site plan shall be processed as a new use permit. In the case of Conditional Use Permits, substantial deviations are any deviation from the originally approved permit that materially alters the intensity, location, design, operation, or impact of the approved use, as determined by the Zoning Administrator

[Ord. No. 470]

H. FEE

The application for a conditional use permit shall be accompanied by a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the office of the Town Clerk. No part of the filing fee shall be returnable. Payment of the filing fee shall be waived when the petitioner is the Town, County, State or Federal Government.

I. TIMEFRAME

See Section 301.G

[Ord. No. 406; Ord. No. 407; Ord. No. 470]

SECTION 303.1. SITE PLAN REVIEW

A. PURPOSE

The purpose of the site plan review is to provide for the public health, safety and general welfare, and to protect the environment and the historical character of the Town of Jerome. The plan review will include examination of all proposed site work and excavation and grading regulations, with special regulation of work on sites with extreme slope or unstable soils. Essential to this purpose is the review of possible impacts on surrounding properties.

[Ord. No. 293; Ord. No. 470]

B. PROJECTS REQUIRING REVIEW BY THE PLANNING AND ZONING COMMISSION AND COUNCIL

1. Additions and alterations to residential, commercial, or industrial structures.
2. Decks.
3. Grading, excavation, clearing, and grubbing in accordance with Section 303.3.
4. Lot splits and lot line adjustments.
5. Modifications to nonconforming structures.
6. New residential, commercial, or industrial structures.
7. Sheds and accessory structures.
8. Projects not specifically listed as exempt (Section 303.1.D) or requiring Zoning Administrator review per Section 303.1.C.

[Ord. No. 470]

C. PROJECTS REQUIRING REVIEW BY THE ZONING ADMINISTRATOR

1. Parking areas.
2. Patios.
3. Replacement of exterior stairs with metal or other fire-resistant materials, provided there is less than a 10 percent change in the original footprint. Approval by the Fire Inspector is also required.

[Ord. No. 470]

D. PROJECTS EXEMPT FROM SITE PLAN REVIEW

1. Repair, replacement, and maintenance of existing structures, provided that the same materials are used.

[Ord. No. 470]

E. PROCEDURE

1. Site plan review may be accomplished by either the Zoning Administrator or the Planning and Zoning Commission and Council, depending on the project as noted in Sections 303.1.B and 303.1.C.
2. Applications for site plan review shall be submitted to the Zoning Administrator for review by the Building Inspector, Fire Inspector, Zoning Administrator, and other applicable reviewing bodies. Once submitted, the Zoning Administrator shall have fourteen (14) calendar days from the date of submission of a site plan application to review said plan for completeness. If the application is incomplete, the Zoning Administrator shall provide the applicant with a comprehensive list of specific deficiencies in a written notice.
3. If the application is determined to be complete, the Zoning Administrator shall determine whether a public hearing is required for the application. If required, the Zoning Administrator

shall forward the application to the Planning & Zoning Commission after conducting a substantive review of the complete application materials, and the application shall be processed in accordance with Section 302 of this Ordinance. If the site plan can be reviewed and approved by the Zoning Administrator, then site posting and a neighborhood meeting are not required, but the Zoning Administrator may request design review recommendations on the site plan from the Historic Preservation/Design Review Board.

4. The Zoning Administrator or the Council shall approve, conditionally approve, or deny a site plan application. Once denied, the original plan shall not be resubmitted.
5. The Historic Preservation/Design Review Board approval of the design elements of the site plan is outlined in Section 304.

F. SITE PLAN CONTENT REQUIREMENTS

Site Plan Applications shall include the following:

1. Site Plan Application Form
2. Written narrative of the proposed project (include uses, hours of operation, number of employees, etc.)
3. Plot plan or site layout; a directional north arrow; scale used; lot dimensions referenced to a legal description; and street dedications, easements and utilities, both public and private. When the location of a property perimeter is unclear, the Building Inspector may require a boundary survey with ground-staked corners.
4. A vicinity sketch showing the location of the site in relation to the surrounding street system. Adjacent properties and their uses shall be identified.
5. Location, perimeter size, and use of all existing and proposed buildings and structures, as well as the number of stories of all proposed buildings and structures.
6. Size and dimensions of required yards and lot coverage for the zoning district and the space between buildings.
7. Location and height of all existing and proposed walls and fences.
8. Location, number of spaces, dimensions, circulation patterns, and surface materials for all off-street parking and loading areas proposed. All parking shall comply with Section 510 of the Jerome Zoning Ordinance.
9. Existing drainage. Show how proposed drainage will be directed, indicating both adequate disposal and protection of neighboring properties.
10. Natural features, such as rock outcroppings, trees over twelve (12) inches in diameter, washes, and man-made features such as existing roads and structures, walkways, and stairways, with indication as to which are to be retained, removed, or altered.
11. Existing and proposed grades, by spot grades or topographic representation. The Building Inspector may require a topographic survey and additional engineering.
    a. Slopes exceeding thirty-five (35) percent shall require a topographic survey by a licensed engineer or surveyor. In addition, the applicant shall provide a satisfactory assessment by a licensed engineer regarding soil/geological stability, bearing qualities and drainage. If indicated by this assessment, a structural engineer shall design all foundations and retaining structures.
    b. Exceptions. The additional studies required in number 9(a) may be waived, if the dollar amount of the project does not require a licensed contractor according to A.R.S. 32-1121.
12. All proposed excavation and grading shall conform to Section 303.3 of this ordinance.

13. Any other information that the Zoning Administrator may find necessary to establish compliance with this and any other ordinances.
14. Application for sign permits shall be filed in accordance with the provisions of Section 509.

[Ord. No. 293; Ord. No. 470]

G. FEE

The application for Plan Approval shall be accompanied by a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the offices of the Town Clerk. No part of the filing fee shall be returnable. Payment of the filing fee shall be waived when the petitioner is the Town, County, State, or Federal government.

H. TIMEFRAME

See Section 301.G

[Ord. No. 293]

SECTION 303.2. FINAL SITE PLAN REVIEW

A. FINAL SITE PLAN PROCEDURES

If desired by the applicant or requested by the Planning and Zoning Commission or Town Council, projects may also be submitted for Final Site Plan Review. An application for a Final Site Plan shall be in accordance with Section 303.1 and shall include the following information:

1. Any additional features required as a result of engineering and/or soil studies;
2. Compliance with all applicable standards of this Zoning Ordinance.
3. Compliance with all applicable codes, including the Uniform Building Code.
4. Compliance with any conditions recommended by the Planning and Zoning Commission, Historic Preservation and Design Review Board, Building Inspector, Fire Inspector, and/or the Zoning Administrator from the previous review.

[Ord. No. 470]

B. REVIEW

1. Review for a Final Site Plan is in accordance with Section 303.1.

C. POST-APPROVAL PROCEDURE

1. All copies of the approved plan, with any conditions from the approving board, shall be dated and signed by the Zoning Administrator. One (1) copy of said approved plan and conditions, together with a notification of all design review requirements and procedures, shall be distributed to the applicant, and one (1) copy shall be filed with the Building Inspector.

[Ord. No. 293; Ord. No. 470]

D. TIMEFRAME

See Section 301.G

SECTION 303.3. GRADING AND EXCAVATION REQUIREMENTS

All excavation and grading shall be performed in accordance with these provisions.

This section shall not affect existing legal uses of property or the right to continuation of such legal use. However, if a nonconforming use of a structure or land is discontinued for six (6) months, any further use shall comply with these requirements.

Where the combined proposed cut and fill exceeds ten (10) cubic yards, the applicant must obtain a separate grading permit from the Building Inspector. An assessment by a civil, structural, or soil engineer may be required to demonstrate site stability and the absence of negative impact.

Six (6) months from the date of approval of a grading permit, the approval becomes void if the grading permit has not been issued.

Exploratory excavation of ten (10) cubic yards or less can proceed with the approval of the Zoning Administrator and Building Inspector. The applicant shall submit plans for approval by the Building Inspector and Zoning Administrator for all excavation in excess of ten (10) cubic yards. The Zoning Administrator may determine that excavation in excess of ten (10) cubic yards requires review and approval by the Planning & Zoning Commission.

[Ord. No. 470]

A. APPROVAL PROCEDURE

1. Any person wishing to do any grading, filling, excavation, cutting, or other site earthwork shall submit plans, drawings, and supporting data, including the quantity of cut and the quantity of fill, and any other information required by the Zoning Administrator and/or Building Inspector.
2. Grading shall be done in conjunction with a site plan filed with the Zoning Administrator. Grading, excavation, and fill shall not:
    a. adversely affect the lateral support of adjacent property or structures;
    b. increase the stresses in or pressures upon any adjacent or contiguous property;
    c. physically infringe on adjacent property;
    d. include detrimental excavation or stockpiling;
    e. be in a public right-of-way; or
    f. have a negative impact on existing drainage.
3. The effect of the proposal on scenic views will be considered for potential impact.
4. Where the slope exceeds thirty-five (35) percent, engineering reports shall be required under the Site Plan requirements of the Jerome Zoning Ordinance.

[Ord. No. 470]

B. POST-APPROVAL PROCEDURE

If approved by the Building Inspector and Zoning Administrator, the activity will be carried out as stipulated in these requirements. The activities described below shall be performed by licensed contractors where required by law.

1. All grading and excavation shall be performed with safety precautions and any anti-erosion or drainage devices required by the Building Inspector.
2. Construction equipment parking and storage needs shall be identified, and provisions made not to interrupt normal traffic flow more than absolutely necessary.
3. Dust control measures shall be taken and loads covered to prevent spilling and blowing.
4. Fencing of hazardous sites shall be required.

5. Safety fencing to protect neighboring property may be required.
6. The Building Inspector may require adequate inspection and compaction control by an approved soil testing agency. This may include certification concerning the inspection of cleared areas and benches to receive fill and the compaction of fills.
7. Cuts shall be accomplished to blend scale, form, and visual character into the natural landforms and minimize exposed scars.
8. Cuts shall be adequately fenced.
9. Driveway slope shall not exceed fifteen (15) percent, where possible, within topographic constraints. In every case, driveways shall blend with the surrounding natural colors and shall include adequate measures for runoff and drainage.
10. Fills shall be accomplished to blend scale, form, and visual character into the natural landforms and minimize exposed scars.
11. The Building Inspector may require further supporting data to ensure stability.

[Ord. No. 470]

C. RESPONSIBILITIES OF THE APPLICANT

1. The applicant, their agent, contractor, or employee shall carry out the proposed work in accordance with the approved plans and specifications and in compliance with all Jerome Zoning Ordinance requirements.
2. During grading operations, the applicant shall be responsible for the prevention of damage to any street or drainage facilities or to any public utilities or services.
3. The applicant is responsible for the prevention of damage to adjacent property, and no person shall excavate on land sufficiently close to the property line to endanger any adjoining public street, sidewalk, alley, or other public or private property prior to supporting and protecting such property from settling, cracking, or other damage that might result.
4. No modification of the approved grading, excavating, or fill plans may be made without the approval of the Building Inspector and Zoning Administrator.
5. Neither the issuance of a permit or approval under these requirements, nor the compliance with any provision of or conditions imposed in the issued permit, shall relieve any person from responsibility for damage to other persons or property, nor impose any liability upon the Town of Jerome for damage to other persons or property.
6. An as-built plan including original ground surface elevations, as-built surface elevations, site drainage patterns, and location and elevations of all surface and sub-surface drainage facilities shall be submitted upon completion of work. If required by the Building Inspector, a civil engineer's certification shall be provided for the final plan.

SECTION 303.4. APPEALS AND EXPIRATION OF APPROVALS

A. APPEALS

1. Any applicant, person residing within 300 feet of a project subject to the procedures in this Ordinance, or person adversely affected may appeal a decision of the Planning and Zoning Commission to the Town Council by filing a written notice of appeal with the Town Clerk not later than fifteen (15) days from the date of the commission's decision. If the appellant is not the applicant and resides beyond 300 feet of the project, the appellant shall clearly demonstrate how they might be adversely affected by the proposed project. Appeals of decisions by the Zoning Administrator are per Section 305 of this Ordinance.
2. When a written appeal is filed with the Town Clerk, the Town Clerk shall promptly provide notice of such an application to the Zoning Administrator. The appeal shall state the grounds for appeal and demonstrate how the appellant has been aggrieved or affected by the decision. The Zoning Administrator shall review the appeal to validate its completeness within three (3) days of receipt. If the appeal is deemed defective, the Zoning Administrator shall notify the applicant of the type and nature of the defect or defects within one (1) day of making said determination. If an appeal is determined to be complete, the Zoning Administrator shall schedule the appeal for Council consideration no later than 45 days from the determination of an application's completeness. Once scheduled, a legal notice shall be published at least once in a newspaper of general circulation within the Town of Jerome; the site shall be posted at least fifteen (15) days prior to the hearing date; and notice by First-Class mail shall be given to property owners within 300 feet of the site. Notice shall also be given to the Planning and Zoning Commission and the appellant. The Zoning Administrator shall submit a report to the Council with all relevant information and set forth the reasons for action taken by the Planning and Zoning Commission.
3. An appeal may be filed by persons aggrieved or by any officer, department, board, or bureau of the municipality affected by a decision of the Zoning Administrator. Appeals will be forwarded to the Board of Adjustment by filing a written notice of appeal with the Zoning Administrator not later than fifteen (15) days from the date of the Zoning Administrator's decision.

[Ord. No. 470]

B. BUILDING PERMIT ISSUANCE; EXPIRATION OF APPROVAL

1. Six (6) months from the date of approval, a plan approval becomes void if a building permit has not been issued and/or work has not commenced.
2. A building permit shall not be issued by the Building Inspector until the fifteen (15) day appeal period has expired.
3. An extension of approval may be granted if the applicant files for an extension prior to the approval becoming void and the extension is granted by the approving board. The approving board may grant a second extension, provided the approval complies with all ordinances and requirements in effect at the time of the extension request. Any additional extension requests require review by the Town Council. Application for an extension shall be accompanied by a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the office of the Town Clerk.

[Ord. No. 470]

C. VIOLATION AND ENFORCEMENT

1. Prior to the issuance of a building permit, the Building Inspector shall ascertain that the plans presented with the Building Permit application are in conformance with those plans approved by the Town Council or Zoning Administrator and that the time limitations imposed by this ordinance have not elapsed.

2. The Zoning Administrator shall ensure that all matters are undertaken according to the conditions of the approved plan. If, during the course of work, changes in the approved plan are necessitated by conditions found at the site, an appropriately licensed engineer's approval may be required for the modified plans. In the event of a violation, the Zoning Administrator shall notify the permittee, by mail, that he is in violation of the conditions of the approved plan. If there are no plans, approved by the Zoning Administrator, to eliminate the violation within fifteen (15) days after notification, the building permit shall be revoked and considered null and void.
3. If, thirty (30) days after written notification by the Zoning Administrator, the applicant is still in violation of this ordinance, the Zoning Administrator shall take appropriate legal action to abate the violation.

[Ord. No. 293; Ord. No. 470]

SECTION 304. HISTORIC PRESERVATION/DESIGN REVIEW BOARD

A. PURPOSE

The purpose of this section is to enable the Historic Preservation/Design Review Board to review the exterior design of proposed new buildings and structures, proposed alterations of buildings and structures, proposed signs, and proposed demolition of structures in order to ensure that new development is compatible with the surrounding environment, and to preserve and protect the historical character of the Town of Jerome. Design review provided by the Historic Preservation/Design Review Board is intended to promote and preserve Jerome's economic and environmental well-being, which depends exclusively upon its distinctive character, natural attractiveness, and overall architectural quality, which contribute substantially to its viability as a recreational and tourist center and which contributed to its designation as a National Historic Landmark. Design review is intended to enrich the lives of all the citizens of Jerome by promoting harmonious, attractive, and compatible development, and is therefore considered to be in furtherance of the general welfare.

[Ord. No. 470]

B. APPLICATION

The provisions of this Section shall apply to all new construction, exterior alterations, demolitions, and signs.

C. PROJECTS REQUIRING REVIEW BY THE HISTORIC PRESERVATION/DESIGN REVIEW BOARD

1. Awnings and permanent signs
2. Additions and exterior modifications
3. Decks
4. Demolitions of existing structures
5. Fences and walls
6. New structures
7. Paint, stain, and similar coatings
8. Sheds and accessory structures
9. Projects not specifically listed as exempt or requiring Zoning Administrator review

[Ord. No. 470]

D. PROJECTS REQUIRING REVIEW BY THE ZONING ADMINISTRATOR

1. Changes in roof material or color, provided the new roof has limited reflectivity.
2. Parking areas.
3. Patios.
4. Replacement of exterior stairs with metal or other fire-resistant materials, provided there is less than a 10 percent change in the original footprint and the change is approved by the Fire Inspector.
5. Window and door replacement, provided the new window or door replicates the same size and style of the window or door being removed.

[Ord. No. 470]

E. PROJECTS EXEMPT FROM DESIGN REVIEW BY THE HISTORIC PRESERVATION/DESIGN REVIEW BOARD

Landscaping (not including accessory structures such as gazebos, pergolas, shade structures, and sheds), provided any grading and excavation is in compliance with Section 303.3.

Repair, replacement, and maintenance of existing structures, provided that the same materials are used.

Nothing in this section shall be construed to prevent the ordinary maintenance or repair of any exterior elements of any building or structure; nor shall anything in this article be construed to prevent the construction, reconstruction, alteration, or demolition of any such elements that the authorized municipal officers, i.e., Building Inspector, Town Engineer, etc., shall certify as required by public safety.

[Ord. No. 470]

F. REVIEW PROCEDURE

1. Applications for design review shall be submitted to the Zoning Administrator for review by the Building Inspector, Fire Inspector, Zoning Administrator, and Historic Preservation/Design Review Board in accordance with the provisions of this section. Review may be accomplished by either the Zoning Administrator or the Historic Preservation/Design Review Board, as stated in Section 304.C and 304.D. The Zoning Administrator shall have fourteen (14) days from the date of submission of a design review application to review said application for completeness. If the application is incomplete, the Zoning Administrator shall provide the applicant with a comprehensive list of the specific deficiencies in a written notice. If the application is determined to be complete, the Zoning Administrator shall forward the application to the Historic Preservation/Design Review Board after conducting a substantive review of the complete application materials.
2. Upon receipt of any complete application for design review, and prior to holding a public hearing, a Neighborhood Meeting may be required in accordance with Section 306 of the Zoning Ordinance of the Town of Jerome.
3. After a Neighborhood Meeting has been held, if applicable, in accordance with Section 306, the Zoning Administrator shall then choose a reasonable time for the hearing of the application, and shall give notice to interested parties and to the public by publication of a notice in a newspaper of general circulation in the Town of Jerome, and by posting one notice of the hearing on the subject property requesting the proposed change, not less than fifteen (15) days prior to the hearing. The notice shall set forth the time and place of the hearing, including a general explanation of the matter to be considered, and a general description of the area affected.
4. If a review is required by the Historic Preservation/Design Review Board, the application shall be submitted for review by the board at the next available meeting. If Site Plan Review is required according to Section 303, the application shall be submitted concurrently. The applicant shall receive approval from the Historic Preservation/Design Review Board prior to being scheduled for Site Plan Review by the Planning and Zoning Commission. The Historic Preservation/Design Review Board or Zoning Administrator shall approve, conditionally approve, or deny the application. Once denied, the original plan shall not be resubmitted.
5. When, in the opinion of the Historic Preservation/Design Review Board, upon hearing and considering all relevant information, a project is not in keeping with either the tenets of this ordinance or the Jerome General Plan, the project shall be denied by specific motion of the Historic Preservation/Design Review Board.
6. When approved, all copies of the approved plan, including any conditions imposed by the reviewing body, shall be dated and signed by the Zoning Administrator. One (1) copy of said approved plan and conditions, together with a notification of all Design Review requirements and procedures, shall be distributed to the applicant, and one (1) copy shall be filed with the Building Inspector.
7. The Historic Preservation/Design Review Board shall utilize the current edition and applicable standards of the Secretary of the Interior's Standards for the Treatment of Historic Properties to evaluate applications for historic properties and structures.

[Ord. No. 470]

G. APPLICATIONS FOR APPROVAL AND PERMIT

1. A prescribed application form for Design Review approval shall be filed with the Zoning Administrator, which details the information that must be provided by the applicant, along with the plans and other documents that must be submitted.
2. An application for the demolition or removal of an existing building or structure shall be filed with the Zoning Administrator on a form prescribed by the Administrator, which details the information that must be provided by the applicant, along with the plans and other documents that must be submitted.

[Ord. No. 470]

H. FEE

The application for Design Review shall be accompanied by a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the offices of the Town Clerk. No part of the filing fee shall be returnable. Payment of the filing fee shall be waived when the petitioner is the Town, County, State, or Federal Government.

[Ord. No. 470]

I. REVIEW CRITERIA FOR NEW CONSTRUCTION

1. The Historic Preservation/Design Review Board and Zoning Administrator shall use the criteria below to review proposed applications for new construction. The Zoning Administrator, Historic Preservation/Design Review Board, and the applicant shall use photographs, lithographs, and other depictions of the Town of Jerome to support their findings. If photographs, etc., are unavailable, then the determination or finding shall be based on the works of a recognized historic preservation authority, such as, but not limited to, textbooks or an architect/historian. Each of the following criteria must be satisfied before an application can be approved.
    a. PROPORTION – The relationship of the width of a building or structure to its height shall be visually compatible with buildings, structures, and places to which it is visually related
    b. OPENINGS – The relationship of the width of the windows and doors to the height of windows and doors in a building shall be visually compatible with buildings, structures, and places to which the building is visually related.
    c. PATTERN – The relationship of solids to voids in the facade of a building or structure shall be visually compatible with buildings, structures, and places to which it is visually related.
    d. SPACING – The relationship of buildings or structures to the open space between them and adjoining buildings shall be visually compatible with the buildings, structures, and places to which it is visually related.
    e. ENTRANCES, PORCHES, DECKS, AND PROJECTIONS – The height, projection, supports, and relationship to streets and sidewalks of entrances, porches, decks, awnings, canopies, and balconies of a building shall be visually compatible with the buildings, structures, and places to which it is visually related
    f. MATERIALS, TEXTURE, AND COLOR – The materials, texture, and color of the facade of a building or structure shall be visually compatible with the predominant materials, textures, and colors used in the building and structures to which it is visually related.
    g. ROOFS – The roof shape of a building shall be visually compatible with the buildings to which it is visually related.
    h. ARCHITECTURAL DETAILS – Doors, windows, eaves, cornices, and other architectural details of a building or structure shall be visually compatible with buildings and structures to which it is visually related.

i. ACCESSORY BUILDINGS - Garages, carports, and sheds shall be visually compatible with buildings, structures, and places to which they are visually related.

j. ACCESSORY FEATURES – Fences, walkways, decks, stairways, lighting, antennae, and other manmade structures shall be visually compatible with buildings, structures, and places to which they are visually related.

k. LANDSCAPING – Landscaping shall be visually compatible with the landscaping around the buildings, structures, and places to which it is visually related.

l. SCREENING – The proposed addition, alteration, or other changes shall be screened with appropriate materials and in an appropriate design so as to be visually compatible with related properties, when, in the opinion of the Historic Preservation/Design Review Board, all other means of assuring visual compatibility are not reasonably possible.

m. SOLAR INSTALLATIONS – Refer to "Solar Energy System Design Guidelines" approved by the Town Council in June 2015, utilizing best practices for installing solar on historical buildings as recommended by the Department of the Interior. These guidelines are available at Jerome Town Hall, the Jerome Library, and on the Town of Jerome website.

2. The Historic Preservation/Design Review Board and Zoning Administrator shall review a submitted application for *Design Approval of Alterations, Additions, or Renovations to Existing Buildings or Structures*, and shall have the power to approve, conditionally approve, or disapprove all such requests, basing their decision on the following criteria:

   a. ARCHITECTURAL FEATURES AND DETAILS – Original porches, decks, balconies, canopies, doors, windows, walls, fences, stairways, eaves, cornices, and other architectural features and details shall be preserved and retained where feasible. Necessary replacement of these features should be as near as possible to the original feature in design and material.

   b. ROOFS – Original roof shape, design, and material shall be preserved and retained where feasible. Where contemporary roofing material is used, it should be as near as possible to the appearance of the original roofing material.

   c. COLOR – Exterior colors should be as near as possible to the original colors appropriate to the years during which the particular building or structure was built.

   d. MATERIALS AND TEXTURE – The original exterior materials and texture shall be preserved and retained where feasible. Where contemporary materials are used, they should be as near as possible to the original material and texture.

3. The Historic Preservation/Design Review Board shall review a submitted application for *Approval of the Demolition, Partial Demolition, or Removal of Existing Buildings or Structures*, and shall have the power to approve, conditionally approve, or disapprove, all such requests; in accordance with the following procedures and criteria.

   a. In passing on an application for demolition, partial demolition, or removal, the Historic Preservation/Design Review Board shall consider, among other things, the architectural or aesthetic quality or significance of the building or structure to the public interests of the Town.

   b. If the Historic Preservation/Design Review Board finds that the public interest and the preservation and protection of historic places will best be served by postponing the demolition, partial demolition, or removal of a building or structure, it may postpone such action for a designated period, which shall not exceed one hundred eighty (180) days from the receipt of the application, and shall notify the applicant of such postponement. During the period of postponement of such demolition or alteration of any building, the Historic Preservation/Design Review Board shall take steps to ascertain what the Town Council can or may do to preserve such building, including consultation with private civic groups,

interested private citizens, and other public boards or agencies, and consideration of the use of eminent domain when the preservation of a given building is clearly in the interest of the general welfare of the community and of certain historic and architectural significance. The Historic Preservation/Design Review Board shall thereafter make such recommendations to the Town Council.

4. The Historic Preservation and Design Review Board shall review a submitted application for Design Approval of Signs and shall have the power to approve, conditionally approve, or disapprove all such requests, basing its decision on the following criteria:

   a. MATERIALS – Signs made of durable, weather-resistant materials such as acrylic, resin, steel, aluminum, or composite materials are preferred.

   b. LETTERING – Lettering and symbols on signs should be routed, applied, or painted on the surface of the sign material.

   c. COLORS – Colors of a sign shall be visually compatible with the colors of buildings, structures, and signs to which the sign is visually related.

   d. EXCEPTIONS – The Historic Preservation/Design Review Board may waive the requirements of this Section and Section 507 in order to allow the preservation or restoration of signs or commercial graphics which are determined to be of historical significance or of particular interest.

[Ord. No. 374; Ord. No. 406; Ord. No. 451; Ord. No. 470; Ord. No. 472]

J. APPEALS AND EXPIRATION OF APPROVALS

1. Any applicant, person residing within 300 feet of the project, or person adversely affected, may appeal a decision of the Historic Preservation/Design Review Board to the Town Council by filing a written notice of appeal with the Town Clerk no later than fifteen (15) days from the date ofthe board's decision. If the appellant is not the applicant and resides beyond 300 feet of the project, the appellant shall clearly demonstrate how they might be adversely affected by the proposed project.

2. When a written appeal is filed with the Town Clerk, the Town Clerk shall promptly provide notice of such an application to the Zoning Administrator. The appeal shall state the grounds for appeal and demonstrate how the appellant has been aggrieved or affected by the decision. The Zoning Administrator shall review the appeal to validate its completeness within three (3) days of receipt. If the appeal is deemed defective, the Zoning Administrator shall notify the applicant of the type and nature of the defect or defects within one (1) day of making said determination. If an appeal is determined to be complete, the Zoning Administrator shall schedule the appeal for Council consideration no later than 45 days from the determination of an application's completeness. Once scheduled, a legal notice shall be published at least once in a newspaper of general circulation in the Town of Jerome, the site shall be posted at least fifteen (15) days prior to the hearing date, and notice shall be mailed to property owners within 300 feet of the site. Notice shall also be given to the Historic Preservation/Design Review Board and the appellant. The Zoning Administrator shall submit a report to the Council with all relevant information and set forth the reasons for action taken by the Historic Preservation/Design Review Board.

3. An appeal may be filed by persons aggrieved or by any officer, department, board, or bureau of the municipality affected by a decision of the Zoning Administrator. Appeals will be forwarded to the Board of Adjustment by filing a written notice of appeal with the Zoning Administrator, no later than fifteen (15) days from the date of the Zoning Administrator's decision.

4. Six (6) months from the date of approval, a plan approval becomes void if a building permit has not been issued and/or work has not commenced.

5. A building permit may not be issued by the Building Inspector until the fifteen (15)-day appeal period has expired.

6. An extension of approval may be granted if the applicant files for an extension prior to the approval becoming void and the extension is granted by the approving board. The approving board may grant a second extension, provided the approval complies with all ordinances and requirements in effect at the time of the extension request. Any additional extension requests require review by the Town Council. Application for an extension shall be accompanied by a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the office of the Town Clerk.

[Ord. No. 470]

K. VIOLATIONS AND ENFORCEMENT

1. Prior to the issuance of a building permit, the Building Inspector shall ascertain that the plans presented with the Building Permit application are in conformance with those plans approved by the Mayor and Council, Historic Preservation/Design Review Board, or the Zoning Administrator and that the time limitations imposed by this ordinance have not elapsed.

2. The Zoning Administrator shall ensure that all matters are undertaken according to the conditions of the design approval. In the event of a violation, the Zoning Administrator shall notify the permittee, by both Certified and First-Class mail, that he is in violation of the conditions of the design approval. If no attempt is made to change the circumstances of the violation within fifteen (15) days after notification, the building permit shall be revoked and considered null and void.

3. Violations, Enforcements, and Fines. If, fifteen (15) days after written notification by the Zoning Administrator, a citizen is still in violation of this ordinance, the Zoning Administrator shall take appropriate legal action to abate the violation.

[Ord. No. 470]

SECTION 305. ADMINISTRATIVE APPEALS AND VARIANCES

A. APPEALS TO THE BOARD OF ADJUSTMENT

1. Appeals to the Board of Adjustment concerning the interpretation or administration of this Ordinance may be taken by any person aggrieved or by any officer or department of the Town affected by any decision of the Zoning Administrator.
2. Applications for any matter to be considered by the Board shall be filed with the Zoning Administrator, on forms furnished for the purpose, within thirty (30) days of the action being appealed, and shall specify the grounds for the appeal. The Zoning Administrator shall promptly transmit to the Board all papers constituting the record of the action appealed.
3. The appeal stays all proceedings in the matter appealed from, unless the Zoning Administrator certifies to the board that, by reason of the facts stated in the certificate, a stay would, in their opinion, cause imminent peril to life or property. In such case, proceedings shall not be stayed, except by a restraining order granted by the Board, or by a court of record on application and notice to the Zoning Administrator.
4. The Board shall hear the appeal within thirty (30) days and shall give notice of hearing by publication of a notice in a newspaper of general circulation in the Town of Jerome and by posting the property affected not less than fifteen (15) days prior to the hearing. The notice shall set forth the time and place of the hearing and include a general explanation of the matter to be considered.
5. Any party may appear at the hearing in person or by agent or attorney. Parties in interest shall have the right to present their case by oral or documentary evidence, to submit rebuttal evidence, and to conduct such cross-examination of witnesses as may be required for a full and true disclosure of the facts.

B. VARIANCES

1. Any aggrieved person may appeal to the Board of Adjustment for a variance from the terms of the Zoning Ordinance only, if because of special circumstances applicable to the property, including its size, shape, topography, location, or surroundings the strict application of the zoning ordinance will deprive such property of privileges enjoyed by other property of same classification in the same zoning district. Any variance granted is subject to such conditions as will assure that the adjustment authorized shall not constitute a grant of special privileges inconsistent with the limitations upon other properties in the vicinity and zone in which such property is located.
2. A variance shall not be granted by the Board unless the alleged hardship caused by literal interpretation of the provisions of this Ordinance results in more than personal inconvenience and/or financial hardship and is not the result of actions by the appellant.
3. In granting a variance, the Board may impose such conditions and safeguards as are appropriate to ensure that the purpose and intent of this Ordinance will be fulfilled. Failure to comply with such conditions and safeguards, when made a part of the terms under which a variance is granted, shall be deemed a violation of this Ordinance.
4. No nonconforming use or violations of this Ordinance with respect to neighboring lands, structures, or buildings, in the same zoning district, and no permitted use of lands, structures, or buildings in other zoning districts, shall be considered grounds for granting a variance.
5. Every variance granted shall be personal to the appellant and shall be transferable and shall run with the land only after completion of any authorized structure or structures.
6. Nothing herein contained shall be construed to empower the Board to change the terms of this Ordinance, to authorize uses which violate any other Town Ordinance, to effect changes in the Zoning Map, or to add to the uses permitted in any zoning district.

C. APPEALS FROM THE BOARD

The decision of the Board shall be final; provided, however, that any person aggrieved by a decision of the Board, or a taxpayer, or a municipal officer may, at any time within thirty (30) days after a decision of the Board, petition the court for a writ of certiorari for review of the Board's decision. Allowance of the writ shall not stay proceedings upon the decision appealed from, but the court may, on application, on notice to the Board, and for good cause shown, grant a restraining order, and on final hearing may reverse or affirm, wholly or partly, or may modify the decision reviewed.

D. FEES

1. Upon filing an application for appeal, the appellant shall pay a filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the offices of the Town Clerk. No part of the filing fee shall be returnable. Payment of the filing fee shall be waived when the petitioner is the Town, County, State, or Federal Government.
2. In the case of an appeal for a variance to more than one provision of this Ordinance, the filing fee shall equal the total amount chargeable for all provisions as prescribed by the fee schedule.

SECTION 306. NEIGHBORHOOD MEETINGS

A. PURPOSE

Neighborhood Meetings provide an opportunity for informal communication between an applicant, neighboring residents, and property owners who may be affected by development projects, use permits, rezoning, or ordinances that impose a new land use regulation or modify an existing land use regulation. The purposes of the Neighborhood Meeting are to inform the affected public about the project and encourage communication among the applicant and neighboring residents and property owners.

B. GENERAL REGULATIONS

1. Prior to any public hearing by the Planning and Zoning Commission on rezoning or ordinances that impose a new land use regulation or modify an existing land use regulation, the applicant or an appointed representative of the applicant shall arrange a meeting with the planning staff to identify development issues as well as to discuss arrangements and scheduling for the Neighborhood Meeting described in Subsection 4 below.
2. When required pursuant to Section 302.D.1 of the Jerome Zoning Ordinance, prior to any public hearing by the Planning and Zoning Commission on a use permit, the applicant or an appointed representative of the applicant shall arrange a meeting with the planning staff to identify development issues as well as to discuss arrangements and scheduling, if required, for the Neighborhood Meeting described in Subsection 4 below.
3. Prior to any public hearing by the Historic Preservation/Design Review Board on a development project, the applicant or an appointed representative of the applicant shall arrange a meeting with the planning staff to identify development issues as well as to discuss arrangements and scheduling, if required, for the Neighborhood Meeting described in Subsection 4 below.
4. A Neighborhood Meeting designed to inform adjoining residents and property owners about the proposed development project, use permit, ordinances that impose a new land use regulation or modify an existing land use regulation, or rezoning will, if required to be held, be arranged by the Zoning Administrator. The meeting should be held at a location generally accessible to neighbors who reside near the subject site.
5. At least 15 days prior to a scheduled Neighborhood Meeting, the Zoning Administrator shall notify all property owners within 300 feet of the subject site by first-class mail, and the actual property shall be posted with the meeting date and time. The mailed notification shall include the date, time, and place for the Neighborhood Meeting, as well as a description of the proposed land uses, project, or conditional use permit.
6. At the Neighborhood Meeting, it is the responsibility of the applicant or their representative to provide an opportunity for a question-and-answer period by the participants and identify a point of contact to the public for follow-up questions and comments.
7. The applicant shall prepare a written summary of the meeting, including a list of attendees, their addresses, and the issues and concerns discussed, and submit a copy of the summary to the Zoning Administrator within 15 days after the neighborhood meeting. The summary shall be made available, upon request, to any meeting attendee. Attendees may, at their discretion, also submit their comments to the Zoning Administrator.
8. If the application is substantially modified from what was presented at the initial Neighborhood Meeting, the Zoning Administrator may require that one or more additional Neighborhood Meetings be held in compliance with this section to present the modified application.
9. For rezonings of property initiated by the Town, the Town shall be deemed the applicant and shall conduct a Neighborhood Meeting as required by Subsections 2 through 5 of this section 306 B. For ordinances that impose a new land use regulation or modify an existing land use

regulation, the Town's obligations under this Section 306 shall be satisfied by complying with the notice and hearing requirements otherwise imposed by this Zoning Ordinance.

[Ord. No. 470 (reference to 304.F.5.deleted)]

C. FEE

A fee shall be assessed to the applicant in an amount established by Resolution of the Council and paid in the offices of the Town Clerk. No part of the fee shall be returnable. Payment of the fee shall be waived when the petitioner is the Town, County, State, or Federal Government.

[Ord. No. 406]

SECTION 307. PRE-APPLICATION MEETINGS

A. PURPOSE

The purpose of this section is to provide applicants with early guidance on zoning requirements, development standards, and review procedures before submitting a formal application. This process helps identify potential issues, improve project design, ensure compliance with applicable regulations, and streamline the overall development review process.

B. GENERAL REGULATIONS

1. Prior to the submittal of any application for subdivision plats, zone changes, conditional use permits, development packages for new construction, or any other application as determined by the Zoning Administrator, an applicant shall first participate in a pre-application review with Town staff.

C. PRE-APPLICATION PROCEDURES

An applicant shall file a request for pre-application review with the Zoning Administrator on an application established by the Zoning Administrator that may require additional information, such as a time as, and all applicable portions of Section 304 shall apply to proposed development outside the Historic Overlay District.

ARTICLE IV: ZONING DISTRICTS

SECTION 401. ESTABLISHMENT OF ZONING DISTRICTS

In order to carry out the purposes of this ordinance, the Town of Jerome is hereby divided into the following zoning districts:

"AR" Zone - Agricultural Residential.

"R1-10" Zone - Single Family Residential

"R1-5" Zone - Single Family Residential

"R-2" Zone - Multiple Family Residential

"C-1" Zone - General Commercial

"I-1" Zone - Light Industrial

Historic Overlay District

SECTION 402. LOCATION AND BOUNDARIES OF DISTRICTS

1. The locations and boundaries of the zoning districts are established as they are shown on the map entitled "Zoning Map of the Town of Jerome,[1]" which is hereby incorporated into this ordinance.
2. Where uncertainty exists with respect to the boundaries of any zoning districts as shown on the zoning map, the following rules shall apply:
    a. Where district boundaries are shown by specific dimensions, such specific dimensions shall apply.
    b. Where district boundaries are indicated as approximately following streets, alleys, or right-of-way lines, such streets, alleys, or right-of-way lines shall be deemed to be such boundaries.
    c. Where district boundaries are so indicated that they approximately follow the lot lines, such lot lines shall be deemed to be said boundaries.
    d. Where district boundaries are so indicated that they are approximately parallel to the streets, alleys, or right-of-way lines, such district boundaries shall be deemed as being parallel thereto and at such distance therefrom as indicated on the zoning map. If no distance is given, such dimensions shall be determined by the use of the scale shown on the zoning map.
    e. Where the application of the above rules does not clarify the zone boundary location, then the Board of Adjustment shall determine the location.
3. Unzoned territory annexed to the Town subsequent to the effective date of this Ordinance shall, upon the date that said annexation becomes effective, automatically become zoned as AR, agricultural-residential, and shall so remain until such time as the Town Council shall see fit to approve a change of zone request for the annexed area.

[1] Codifier's note: The current Zoning Map is that map dated February 14, 2022, as adopted by Ordinance 477.

SECTION 403. "AR" ZONE, AGRICULTURAL RESIDENTIAL

A. PURPOSE

This district is intended to promote and preserve low-density residential development and non-commercial farming and agriculture. Land use is composed chiefly of individual homes, while also accommodating compatible recreational, religious, and educational facilities.

B. PERMITTED AND CONDITIONAL USES

The permitted and conditional uses of the AR zone are listed in Table 410: Use Matrix of Section 410.

C. USE/ZONE-SPECIFIC STANDARDS

Standards for the zoning district and specific uses are provided in Table 411: Use/Zone-Specific Standards Matrix and Table 412: Development Standards Matrix

[Ord. No. 380; Ord. No. 474]

[Ord. No. 446]

SECTION 404. "R1-10" ZONE, SINGLE FAMILY RESIDENTIAL

A. PURPOSE

This district is intended to promote and preserve low density residential development. Regulations and property development standards are designed to protect the single-family residential character of the district and to prohibit all incompatible activities. Land use is composed chiefly of individual homes, while also accommodating compatible recreational, religious and educational facilities.

B. PERMITTED AND CONDITIONAL USES

The permitted and conditional uses of the R1-10 zone are listed in Table 410: Use Matrix of Section 410.

C. USE/ZONE-SPECIFIC STANDARDS

Standards for the zoning district and specific uses are provided in Table 411: Use/Zone-Specific Standards Matrix and Table 412: Development Standards Matrix

[Ord. No. 474]

[Ord. No. 446]

SECTION 405. "R1-5" ZONE, SINGLE FAMILY RESIDENTIAL

A. PURPOSE

This district is intended to fulfill the need for medium density single family residential development. Regulations and property development standards are designed to protect the single family residential character of the district and to prohibit all incompatible activities. Land use is composed chiefly of individual homes, while also accommodating compatible recreational, religious, and educational facilities.

B. PERMITTED AND CONDITIONAL USES

The permitted and conditional uses of the R1-5 zone are listed in Table 410: Use Matrix of Section 410.

[Ord. No. 474]

C. USE/ZONE-SPECIFIC STANDARDS

Standards for the zoning district and specific uses are provided in Table 411: Use/Zone-Specific Standards Matrix and Table 412: Development Standards Matrix.

[Ord. No. 446]

SECTION 406. "R-2" ZONE, SINGLE- AND TWO-FAMILY RESIDENTIAL

A. PURPOSE

This district is intended to fulfill the need for medium density residential development regulations and property development standards are designed to allow maximum flexibility and variety in residential development while prohibiting all incompatible activities. Land use is composed chiefly of single- and two-family homes, while also accommodating compatible recreational, religious, and educational facilities.

B. PERMITTED AND CONDITIONAL USES

The permitted and conditional uses of the R-2 zone are listed in Table 410: Use Matrix of Section 410.

C. USE/ZONE-SPECIFIC STANDARDS

Standards for the zoning district and specific uses are provided in Table 411: Use/Zone-Specific Standards Matrix and Table 412: Development Standards Matrix.

[Ord. No. 446; Ord. No. 454]

SECTION 407. "C–1" ZONE, GENERAL COMMERCIAL

A. PURPOSE

This district is intended to provide for and encourage orderly development in existing and future commercial areas within the Town.

B. PERMITTED AND CONDITIONAL USES

The permitted and conditional uses of the C-1 zone are listed in Table 410: Use Matrix of Section 410.

[Ord. No. 293; Ord. No. 408; Ord. No. 454; Ord. No. 465]

C. USE/ZONE-SPECIFIC STANDARDS

Standards for the zoning district and specific uses are provided in Table 411: Use/Zone-Specific Standards Matrix and Table 412: Development Standards Matrix.

[Ord. No. 293; Ord. No. 446]

SECTION 408. "I-1" ZONE, LIGHT INDUSTRIAL

A. PURPOSE

This district is intended to provide for commercial, industrial, and manufacturing activities, while ensuring that these activities will in no manner affect in a detrimental way any of the surrounding districts.

B. PERMITTED AND CONDITIONAL USES

The permitted and conditional uses of the I-1 zone are listed in Table 410: Use Matrix of Section 410.

C. USE/ZONE-SPECIFIC STANDARDS

Standards for the zoning district and specific uses are provided in Table 411: Use/Zone-Specific Standards Matrix and Table 412: Development Standards Matrix.

SECTION 409. HISTORIC OVERLAY DISTRICT

A. PURPOSE

The purpose of the Historic Overlay District is to preserve and protect the historical quality and distinctive architectural character of the Town of Jerome since Jerome's economic and environmental well-being depends exclusively upon its distinctive character, natural attractiveness, and overall architectural quality which contribute substantially to its viability as a recreation and tourist center and which contributed to its designation as a National Historic Landmark.

B. DISTRICT RESTRICTIONS

The exterior designs of proposed new buildings and structures, proposed alterations of buildings and structures, landscaping plans, proposed signs, and proposed demolition of buildings and structures within the Historic Overlay District shall be reviewed by the Historic Preservation and Design Review Board in accordance with the provisions of Section 304 of this Ordinance to ensure that all new development is compatible with the surrounding environment.

C. DISTRICT BOUNDARIES

The Historic Overlay District shall include all areas within the corporate limits of the Town of Jerome as of 10/13/2026. Future annexations of land without historic resources shall not be included within the district boundaries.

SECTION 410. USE MATRIX

Table 410: Use Matrix

P = Permitted Use
C = Conditional Use; some conditionally permitted uses are also subject to the standards of Table 411: Use/Zone-Specific Standards Matrix.
X = Prohibited Use
U = Permitted subject to the standards of Table 411: Use/Zone-Specific Standards Matrix

SECTION 411. USE/ZONE-SPECIFIC STANDARDS MATRIX

Table 411: Use/Zone-Specific Standards Matrix

Use	Zone	Standard
Adaptive Residential Reuse	AR, R1-10, R1-5, R-2, C-1, I-1	1. Residential use of a building or portion of a building is permitted when in the opinion of the Zoning Administrator, said use has little or no adverse effect on the public health, safety and general welfare; or 2. Residential uses are permitted by right in a building with a documented historic residential use, whether that use is active or not
Beekeeping	AR, R1-10, R1-5, R-2, C-1, I-1	The following standards and requirements apply to the keeping of any hive, colony, or apiary bees within the town limits: 1. All persons shall be required to obtain a conditional use permit prior to the keeping of bees. The application form shall include the name, address and telephone number of the person seeking the permit as well as the name, address, and telephone number of the property owner. If the applicant is other than the property owner, then the application shall also include written permission of the owner for the use of the property for keeping a hive, colony, or apiary. The form shall also include a drawing of the property indicating the location for the keeping of the hive, colony or apiary and an acknowledgement that, prior to the placing of the hive, colony or apiary upon the property, an adequate supply of water and other nutrients are available on the property near the hive, colony or apiary. 2. Upon receipt of a beekeeping application, and at least 15 days prior to review by the Planning and Zoning Commission, public notification shall be mailed by the Town to properties within 100 feet of the subject property. 3. No more than two hives shall be allowed on a parcel. 4. Hives shall be located in the area behind the primary structure and in front of the rear lot line and set back from the side and rear property lines a minimum of five (5) feet. 5. A flyway barrier consisting of a solid wall, fence, dense vegetation, or combination of these materials at least six (6) feet high shall be provided and extend at least ten (10) feet beyond the hives on each end of an apiary. 6. Each beekeeper shall ensure that a constant and easily accessible supply of fresh water and other nutrients of sufficient quantity to meet the needs of all bees being maintained or kept is always available to the bees so that they are discouraged from congregating at pet water bowls, birdbaths, pools, spas or other water sources where they may cause human or domestic pet contact.

		7. Initial hives shall contain a queen selected from stock bred for gentleness, and bees who are relatively gentle and non-defensive. If a colony becomes too defensive, then the beekeeper shall be obligated to move that colony to a different location or to replace the queen with a gentler queen. 8. The first violation of this Section shall be treated as a petty offense. All subsequent violations within a succeeding two-year period shall be treated as Class I misdemeanors, subject to penalties as set forth in Article 1-8 of the Jerome Town Code. 9. The provisions of this Section shall not apply to any property owner upon whose property a swarm of transient bees is attempting to or has established a domicile. 10. Any honeybee colony not residing in a structure intended for beekeeping, or any colony residing in a standard or homemade hive that, by virtue of its condition, has obviously been abandoned by the beekeeper, or any hive, colony or apiary which does not contain the water and nutrient requirements of standard 6 of these requirements or any hive, colony or apiary for which no permit has been issued, is unlawful and shall be deemed a public nuisance. 11. The Town, upon a complaint, may take any actions necessary to remove the abandoned hive, colony, or apiary from the property. [Ord. 474, 8/10/21 *NOTE: Ord. 474 incorrectly established the "Beekeeping" paragraph as Paragraph O. This was corrected during codification to Paragraph P.]
Live/Work Dwelling	AR, R1-10, R1-5, R-2, C-1, I-1	1. Home occupations shall be clearly incidental and subordinate to the use of the property and dwelling unit for dwelling purposes, and shall not change the character thereof. 2. There shall be no employees other than members of the immediate family residing on the premises. 3. No business shall be conducted which requires delivery vehicles or other services not customary to a residence. 4. Signs shall be subject to applicable provisions of Section 509. 5. All materials and equipment used and maintained in connection with a home occupation must be used and stored inside the dwelling and accessory buildings. 6. No public display of items for sale shall be permitted. 7. A home occupation shall not create any nuisance or hazard, or other offensive condition such as that resulting from noise, smoke, fumes, dust, odors or other noxious emissions. Electrical or mechanical equipment

		that causes fluctuation in line voltage, creates any interference in either audio or video reception or causes any perceivable vibration on adjacent properties is not permitted. 8. The use shall not generate more pedestrian or vehicular traffic than is typical to the zone in which it is located. [Ord. No. 442]
All Permitted or Conditional Uses of the Zoning District	AR	1. Cattle, horses, sheep, goats, dogs, cats, birds, fowl, and any other living animals, and the pens, stalls, stables, yards, shelters, cages, areas, places, and premises where they are held or kept, shall be so maintained that flies, insects, or vermin, rodent harborage, odors, ponded water, the accumulation of manure, garbage, refuse or other noxious material do not become a public health nuisance and do not disturb the peace, comfort, or health of any person. 2. Any person, firm, or corporation is prohibited from keeping or sheltering any animal, bird, or fowl other than a household pet within one hundred (100) feet of a building, other than his own, used for human habitation. 3. Pigs shall not be kept within the city limits.
Viniculture	AR	1. The irrigated area in any parcel of viniculture shall not exceed one-half (1/2) acre. 2. Adjoining parcels including up to one-half (1/2) acre of irrigated area shall be considered separate parcels for the purposes of this Article. 3. A separate water meter shall be required for each parcel of viniculture, and each shall require an application for water service and payment of applicable water hookup fees, in accordance with the provisions of Chapter 13, “Water,” of the Jerome Town Code. 4. Water usage for each parcel used for viniculture shall be subject to Town water restrictions. 5. If water availability decreases for any reason, including but not limited to drought, climate conditions or system failure, restrictions may be placed on water use according to the Town’s Demand Reduction Strategies or any emergency measures in place or enacted at any future time. 6. The Town of Jerome shall not be held responsible for any loss of revenue or crop failures experienced as a result of water restrictions placed by the Town. 7. Flood irrigation will not be permitted. 8. A plan for a drip irrigation system must be submitted as provided in Section 16-5-2 below. 9. Each parcel used for viniculture activities shall require a Conditional Use Permit

		10. Conditional Use Permit applications for viniculture activities shall be required to: a. Provide estimated peak monthly water usage for each parcel of viniculture. b. Demonstrate that fifty percent (50%) of the proposed peak monthly water use can be provided through methods other metered distribution, such as catchment, cistern, hauling, greywater or overflow. c. Provide a plan for drip irrigation in conjunction with the site plan. d. Provide a written release holding the Town of Jerome harmless for any loss of revenue, crop failures, or additional expenses experienced as a result of restrictions and regulations imposed by the Town for purposes of controlling water supply, soil erosion, vista protection slope restrictions, water drainage, planning and zoning, and restoration of natural vegetation upon termination of conditional use permit. e. Provide a fully-executed agreement to waive rights and remedies under Arizona Revised Statutes §12-1134 (Prop 207) 11. Viniculture operations are strongly encouraged to utilize organic methods and minimize the use of chemicals. The Town reserves the right to place restrictions in this regard in accordance with regulations or recommendations which may be promulgated by the Town, County, State or Federal government. 12. Town water shall not be provided for irrigation, agriculture or viniculture located outside of Town limits, except as provided herein. 13. Vineyards located outside of Town limits which are in existence and which purchase water from the Town of Jerome as of the adopted date of this Ordinance will be entitled to continue to purchase Town water at rates established from time to time by the governing body, subject to the standards above. 14. Vineyards located outside of Town limits which are in existence and which purchase water from the Town of Jerome as of the adopted date of this Ordinance will be required to submit documentation to the Town regarding the size of the area of their plantings and the number of vines planted. This information will be subject to verification by the Town of Jerome. 15. Any expansion of an existing vineyard outside of Town limits shall be considered a new vineyard for the purposes of this Article, and will not be eligible to purchase water from the Town of Jerome. 16. Vineyards located outside of Town limits which receive water from the Town of Jerome shall be

		subject to all of the provisions of Chapter 13, "Water," of the Jerome Town Code.
Manufacturing incidental to a permitted use	C-1, I-1	1. All products incidental to a permitted use which are manufactured or processed on the premises shall be sold at retail only and on the premises only. 2. Such manufacturing activity shall be restricted to not over fifty (50) percent of the ground floor area of the building allocated to the permitted use, unless in the opinion of the Town Council such activity is not detrimental to public health, safety and general welfare.
Research and Product Development	C-1, I-1	1. All activities shall be conducted entirely within enclosed buildings
All Permitted or Conditional Nonresidential Uses of the Zoning District	C-1	1. All activities, except as otherwise addressed herein, shall be conducted entirely within enclosed buildings. 2. Outdoor storage or display of goods or materials shall be prohibited. 3. Warehousing or indoor storage of goods or materials, exceeding that normally incidental to permitted uses, shall be prohibited.
Wireless Communication Facilities	AR, C-1, I-1	1. New wireless communication facilities shall be stealth design to minimize or mitigate the adverse visual impact through proper design and aesthetics that ensure the communication tower is compatible with the built environment in which it is located. Because of differing circumstances specific to each site, a communication tower that is considered to be stealth in one location may not be considered to be stealth in a different location. Methods of stealth design include, but are not limited to: a) Design that mimics surrounding existing vegetation not to exceed forty feet in height. b) Mounting antennas on existing structures that blend with the architecture of the structure on which the antennas are located. c) Using color schemes that make the communication tower less noticeable. d) Using church steeples, clock towers, bell towers, roof features or other such vertical architectural elements to conceal antennas and equipment. e) Placing antennas on new or existing street signs, outdoor lighting poles, flag poles, windmills (both functional and faux), chimneys, cupolas, silos, smokestacks and utility poles which are designed to match the context and color of the host structure. 2. The applicant shall submit documentation detailing that applicable Federal Communications Commission and Federal Aviation Administration regulations have been reviewed and that the regulations are being complied with or that the communication

		tower is exempt from regulation prior to the issuance of the building permit. 3. The applicant shall submit with the site plan before and after photo simulations showing the tower and surrounding area. 4. Applicants for cellular phone antennas must provide evidence in writing that at least one cellular phone provider is committed to located on the tower. 5. For new towers the applicant shall submit a narrative explanation describing the community necessity for the new tower and resulting increase in coverage. The narrative shall list, and include a discussion of, the pros and cons of each prospective new tower site and co-location opportunity considered (along with maps showing the locations of each site) and shall state the reasons why each of the alternative sites and co-locations was not considered to be feasible. The narrative report shall be accompanied by before and after propagation maps prepared and signed by a radio frequency engineer evidencing that a gap in coverage exists and demonstrating how the proposed tower will eliminate the existing gap. 6. Facilities owned and operated by the Town for its use are not subject to the standards of this table. 7. Collocation of small wireless facilities within a right-of-way that are exempt from zoning pursuant to A.R.S. § 9-592 (I) or (J) do not require a conditional use permit or other zoning approval,
All Permitted or Conditional Nonresidential Uses of the Zoning District	I-1	1. NOISE: At no point on the property line shall the sound pressure level of any individual operation exceed the decibel levels in the designated octave bands of Table 411.a. (Excluding operation of motor vehicles or other transportation facilities.) Sound levels shall be measured with a sound level meter and associated octave band filter manufactured according to standards prescribed by the American Standards Association. Measurements shall be made using the flat network of the sound level meter. Impulsive type noises shall be subject to the performance standards provided that such noises shall be capable of being accurately measured with such equipment. Noise capable of being so measured, for the purpose of this section, shall be those noises which cause rapid fluctuations of the needle of the sound level meter with a variation of not more than plus or minus two (2) decibels. Noises incapable of being so measured, such as those of an irregular or intermittent nature, shall be controlled so as not to become a nuisance to adjacent uses.

		2. SMOKE: No emission of smoke from any source shall be permitted to exceed a greater density than that density described as No. 1 on the Ringleman Chart. However, smoke may be emitted, which is equal to but not darker than No. 2 on the Ringleman Chart, for not more than four (4) minutes in any thirty (30) minute period. For the purpose of grading the density of smoke, the Ringleman Chart, as published by the U.S. Bureau of Mines shall be the standard. 3. GLARE OR HEAT: Any activity producing intense glare or heat shall be performed within a completely enclosed building in such a manner as not to create a nuisance or hazard along lot lines. 4. VIBRATION: No vibration shall be permitted which is discernible beyond the lot line to the human sense of feeling for three (3) minutes or more duration in any one (1) hour of the day between the hours of 7:00 a.m. to 7:00 p.m., or of thirty (30) seconds or more duration in any one (1) hour during the hours of 7:00 p.m. and 7:00 a.m. 5. FLY ASH, DUST, FUMES, VAPORS, GASES AND OTHER FORMS OF AIR POLLUTION: No emission shall be permitted which can cause damage to health, to animals, or vegetation, or other forms of property, or which can cause any excessive soiling. 6. LIQUIDS AND SOLID WASTE: No wastes shall be discharged in the public sewage system which endangers the normal operation of the public sewage system. 7. ODORS: No emission of odorous gases or other odorous matter shall be permitted in such quantities as to be offensive in such a manner as to create a nuisance or hazard beyond the property lines.

Table 411.a: Octave Bands

Octave band cycles per second	**Maximum sound pressure** level in decibels .0002 dynes per CM^2
0 - 75	72
75 - 150	67
150 - 300	59
300 - 600	52
600 - 1200	46

SECTION 412. DEVELOPMENT STANDARDS MATRIX

Table 412: Development Standards Matrix

	Zone					
Development Standard	AR	R1-10	R1-5	R-2	C-1	I-1
Minimum Lot Area	10,000 SF	10,000 SF	5,000 SF	5,000 SF	None	None
Minimum Lot Width	100 Feet	100 Feet	50 Feet	50 Feet	None	None
Minimum Square Footage of Dwelling/Building	850 SF of enclosed floor space exclusive of any attached garage	850 SF of enclosed floor space exclusive of any attached garage	850 SF of enclosed floor space exclusive of any attached garage	850 SF of enclosed floor space exclusive of any attached garage	None	None
Maximum Lot Coverage	40%, including main building and all accessory buildings	40%, including main building and all accessory buildings	60%, including main building and all accessory buildings	60%, including main building and all accessory buildings	None	None
Setbacks						
Front[1]	20 Feet	20 Feet	10 Feet	10 Feet	10 Feet	10 Feet
Rear	20 Feet[2]	20 Feet[2]	20 Feet[2]	20 Feet[2]	20 Feet[3]	20 Feet[3]
Side	10 Feet[4]	10 Feet[4]	5 Feet[4]	5 Feet[4]	Notes[4, 5]	Notes [4, 5]
Maximum Building Height	25 Feet[6]	25 Feet[6]	25 Feet[6]	25 Feet[6]	25 Feet[7]	25 Feet[7]
Accessory Buildings[8]						
Setbacks	Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.	Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.	Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.	Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.	Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.	Detached accessory buildings shall meet all required setbacks and maintain a space of five (5) feet from the main building or other structures.
Maximum Height	Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."	Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."	Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."	Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."	Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."	Detached accessory buildings shall be constructed to a height not greater than fourteen (14) feet to the peak or highest point of the roof, as defined in "Accessory Building, Height of."

[1]The minimum front yard setback shall be ten (10) feet, except that where adjacent buildings within one hundred (100) feet establish a different front building setback, a new building may align with that established setback. Where a lot is situated between two (2) such buildings, the front yard setback shall be established by a line connecting the nearest front corners of the adjacent buildings. Where a lot has frontage on two (2) streets, the

required front yard shall be provided on both streets unless access is denied to one of the streets, then a rear yard shall be required.

[2] There shall be a rear yard of not less than twenty (20) feet in depth, except where the rear lot line is in common with, or separated by an alley from the side lot line of another lot, there shall be a rear yard of not less than ten (10) feet in depth. Where the rear lot line abuts an alley, the required rear yard shall be measured from the center line of the alley.

[3] There shall be a rear yard of not less than twenty (20) feet in depth, except where the rear lot line is in common with or separated by an alley from the side lot line of a lot in a commercial or industrial zone, there shall be a rear yard of not less than ten (10) feet in depth.

[4] Where a side lot line abuts a street, the side yard shall be considered a front yard for the purpose of determining width.

[5] Where the side lot line is in common with the side lot line of a property in a commercial or industrial zone, no side yard shall be required on that side. Where the side lot line is in common with the side lot line of a property in a residential zone, the side yard requirements of the residential zone shall apply to that side yard, provided nothing shall require such a side yard to be greater than ten (10) feet in width.

[6] As defined in "Building, Height Of". On slopes over forty-five percent (45%) there will be a one (1) foot reduction in height for each additional five percent (5%) of slope or portion thereof. Notwithstanding these provisions, no face of any building shall exceed thirty-five (35) feet above the low point of original grade as defined in "original grade". (see Appendix for diagrams).

[7] The maximum building height shall not exceed that established by any building within one hundred (100) feet on either or both sides of the lot. Where more than one such building is within one hundred (100) feet of the lot then the maximum building height of the nearest such building shall be the maximum building height of the lot. Except that where the lot is between two (2) such buildings, each within one hundred (100) feet of the lot, then the maximum building height of the center of this lot shall be that established by a line joining the highest point of the other such buildings. Nothing in the above shall require that the maximum building height in this district be less than twenty-five (25) feet. (see Appendix for diagrams). Notwithstanding these provisions no face of any building shall exceed thirty-five (35) feet above the low point of original grade as defined in "original grade."

[8] Accessory buildings shall be considered in determining yard, lot and area requirements. Accessory buildings shall not be used for human habitation.

ARTICLE V: USE REGULATIONS

SECTION 501. NONCONFORMING SITUATIONS

A. DEFINITIONS

A nonconforming situation occurs when, on the effective date of this Ordinance, any prior Ordinance, or on the effective date of an Ordinance text amendment or rezoning, an existing lot, structure, building, sign, development, or use does not conform to the regulations currently applicable to the district in which the lot, structure, building, sign, development or use is located.

[Ord. No. 293]

B. PURPOSE

While permitting the use and maintenance of nonconforming structures, this section is intended to limit the number and extent of nonconforming uses and structures by prohibiting their being moved, altered, enlarged, or restored after destruction in a manner which would increase the discrepancy between conditions existing at the time of adoption of the Ordinance and the standards prescribed in this Ordinance, except as provided for by A.R.S. 9-462.02.

C. APPLICATION

1. Any nonconforming structure or portion thereof declared unsafe by a proper authority may be restored to a safe condition.
2. The lawful use of land, buildings, or structures existing on the effective date of this Ordinance, June 14, 1977, or any amendment thereof, may continue even though such use does not conform to the provisions of this Ordinance. However, if such nonconforming uses are discontinued for a period of six (6) months, any future use of said land or structure shall be in conformity with the provisions of this Ordinance.
3. No nonconforming use shall be extended to replace a conforming use.
4. A nonconforming use of a building or lot shall not be changed to another nonconforming use whatsoever. Changes in use shall be made only to a conforming use.
5. Once changed to a conforming use, no building or land shall be permitted to revert to a nonconforming use.
6. A nonconforming building may not be reconstructed or structurally altered during its life to an extent which would increase the discrepancy between conditions existing at the time of the adoption of this Ordinance and the standards prescribed in this Ordinance.
7. No repairs, alterations, or additions shall be made to any building used for a nonconforming use or a nonconforming building which has been damaged by fire, flood, wind, earthquake, explosion or other calamity, act of God, act of the public enemy, or by the owner, to an extent which would increase the discrepancy between conditions at the time of such damage and the standards prescribed in this Ordinance.
8. A nonconforming use shall not be extended, but the extension of a lawful use to any portion of a nonconforming building which existed prior to the enactment of this Ordinance shall not be deemed the extension of such nonconforming use.
9. Nothing herein contained shall require any change in plans, construction, or designated use of a building for which a building permit has been issued prior to the enactment of this Ordinance, provided the construction shall be diligently prosecuted within sixty (60) days of the date of this Ordinance, and the building is completed and used according to such plans as filed within one (1) year from the date of the Ordinance.
10. A building, or portion thereof, designed or clearly intended for a nonconforming use, but not so used at the time of the effective date of this Ordinance, may be used for such nonconforming

purpose if the use commences within six (6) months of the effective date of this Ordinance and no alteration occurs except as permitted herein. If the use does not commence within six (6) months, the building shall thereafter be used only in conformity with this Ordinance.

11. Notwithstanding any other provisions of this Ordinance, any automobile wreck yard or any other junkyard in existence in any zone at the date of enactment of this Ordinance shall (have), at the expiration of three (3) from such date, become a prohibited and unlawful use and shall be (have been) discontinued.
12. Whenever the boundaries of a zone shall be changed so as to transfer an area from one zone to another zone of a different classification, the foregoing provisions shall also apply to any nonconforming uses existing therein.
13. Nothing in this article shall be interpreted as authorization for approval of the continuance of the use of a building or premises in violation of regulations in effect at the time of the effective date of this Ordinance.
14. Notwithstanding any other provisions of this Ordinance, a building may be constructed on any lot of record before the adoption of this Ordinance in any zone in which such buildings are permitted even though such lot fails to meet the area or width requirements for with the zone, except that such construction shall conform to any lot coverage, yard and parking and loading requirements of the zone.
15. Where two (2) or more vacant contiguous lots of record, having continuous frontage, are owned by the same person at the time of the passage of the controlling ordinance, the land included in the lots shall be considered to be an undivided parcel and no portion of said parcel shall be used as a building site or sold which does not meet the area and width requirements of the zone in which the lot is located.

[Ord. No. 293]

SECTION 502. GENERAL PROVISIONS

A. APPLICATION

Except as hereinafter provided, no building, structure, or premise shall be used and no building or structure or part thereof shall be constructed, altered, repaired, improved, moved, removed, erected, demolished, or materially altered except in conformity with the provisions of the zone in which it is located. The provisions of this section are applicable to all zoning districts. Any use that is not specifically permitted is hereby declared to be a prohibited use, except as hereinafter provided.

B. USE RESTRICTIONS

1. PRINCIPAL USES: Only those uses and groups of uses specifically designated as "Permitted Principal Uses" in zoning district regulations shall be permitted as principal uses; all other uses shall be prohibited as principal uses, except as otherwise provided herein.
2. CONDITIONAL USES: Certain specified uses designated as "Conditional Uses" may be permitted as principal uses subject to special conditions of location, design construction, operation, and maintenance specified in this Ordinance or imposed by the Planning and Zoning Commission.
3. ACCESSORY USES: Uses that are normally accessory and incidental to a permitted principal or conditional uses shall be permitted as specified in this Ordinance.
4. UNSPECIFIED USES: Whenever a use is proposed which is not listed as a permitted or conditional use in any zone district, the Zoning Administrator shall complete a review of the proposed use to determine its basic characteristics and similarity to existing permitted uses and make a determination as to whether the proposed use is permitted within the zone district. The Zoning Administrator's determination can be appealed as specified in this Ordinance.

C. NONCONFORMING LOTS OF RECORD

1. Notwithstanding any other provisions of this ordinance, a building may be constructed on any lot of record before the adoption of this Ordinance in any zone in which such buildings are permitted, even though such lot fails to meet the area or width requirements for within the zone, except that such construction shall conform to any lot coverage and yard requirements of the zone.
2. Where two (2) or more vacant contiguous lots of record are owned by the same person at the time of the passage of the controlling ordinance, the land included in the lots shall be considered to be an undivided parcel and no portion of said parcel shall be used as a building site or sold which does not meet the area and width requirements of the zone in which the lot is located.

D. REDIVIDING OF RECORDED LOTS

No lot may be divided to create a lot not in conformance with these regulations, unless. No lot shall be divided or combined in any manner other than through subdivision procedures as specified by the Subdivision Regulations.

E. STREET AND UTILITY REQUIREMENTS

1. All lots shall abut a public street or legally recorded easement.
2. A building permit shall not be issued for a lot which abuts an undedicated portion of a partly-dedicated public street.
3. A building permit shall not be issued for any lot for which public sewerage or water supply is not available, unless and until the proposed mode of water supply and sewage disposal has been reviewed and approved in writing by the Yavapai County Health Department.

F. DRIVEWAYS

1. General Requirement

All lots shall obtain vehicular access to a public street, either directly or through an approved shared-access easement, private access easement, or private street. No driveway shall be constructed, relocated, widened, resurfaced, altered, or otherwise modified without first obtaining the necessary permit(s) from the Town.

2. Driveways May Be Denied

   The Town may deny additional driveway connections where:

   a. Reasonable access already exists through an existing driveway or easement;

   b. Multiple driveways would create traffic or safety concerns;

   c. There is not sufficient space for adequately extending a driveway to park a vehicle entirely outside the right-of-way; or

   d. The property does not provide sufficient on-site area to:

      i. Allow vehicles to safely enter and exit the property; or

      ii. Prevent vehicles from routinely backing into the public street when leaving the site.

3. Driveway Surfacing

   Driveway surfacing shall extend from the parking area to the edge of the public roadway pavement and shall continue within the public right-of-way to meet existing roadway surfacing, or to a point designated by the Town Engineer where future roadway surfacing is anticipated.

   Acceptable surfacing materials shall be established by Town standards and may include asphaltic concrete, portland cement concrete, chip seal, permeable pavement, or other approved materials.

4. Residential Development

   Single-family residential driveways may remain unsurfaced unless otherwise required by the Town Engineer. Where surfacing is installed, it shall comply with Section 502.F.4.

5. Multifamily and Nonresidential Development

   All multifamily and nonresidential development shall provide paved driveway access between the public street and all required parking, loading, and circulation areas, unless modified by the Town Engineer to meet site constraints such as, but not limited to, topography, existing nearby access, and recorded easements. Such surfacing shall extend through the right-of-way as required by the Town Engineer.

6. Driveway Alterations

   Any relocation, widening, reconstruction, pavement change, additional curb cut, or modification of an existing driveway shall require a permit approved by the Town.

7. Culverts and Drainage

   Where a culvert is required, culvert ends shall be protected against crushing and erosion and shall conform to Town engineering standards. Alternative treatments may be approved by the Town Engineer.

8. Access Management

   The number, width, spacing, and location of driveways shall be subject to approval by the Town Engineer. The Town may require shared driveways, cross-access easements, reciprocal access agreements, or driveway closures when necessary to promote traffic safety and efficient roadway operations.

G. SITE UNSUITABILITY

No land shall be used or structure erected where the land is held by the Commission to be unsuitable for such use or structure by reason of flooding, concentrated runoff, inadequate drainage, adverse soil or rock formation, extreme topography, low percolation rate or bearing strength, erosion susceptibility, or any other features likely to be harmful to the health, safety and general welfare of the community. The commission, in applying the provisions of this section, shall state in writing the particular facts upon which its conditions are based. The applicant shall have the right to present evidence contesting such determination to the Council if he desires, whereupon the Council may affirm, modify, or withdraw the determination of the unsuitability.

H. DUMPING OR DISPOSAL

1. The use of land for the dumping or disposal of scrap iron, junk, garbage, rubbish, or other refuse, or of ashes, slag, or other industrial wastes or by-products, shall be prohibited in every district except as otherwise provided in this Ordinance.
2. The dumping of dirt, sand, rock or other material excavated from the earth shall be permitted in any district, provided that the surface of such material is graded, leaving the ground surface in a condition suitable for other use permitted in the district, provided that such fill does not so increase the elevation of the site as to prevent its development or use for other purposes and provided that such does not increase the susceptibility of the ground to erosion, landslide, flooding, or result in any other dangerous condition.
3. No person, firm, or corporation shall strip, excavate, or otherwise remove topsoil for sale or for use other than on the premises from which the same shall be taken, except in connection with the construction or alteration of a building on such premises and excavation or grading incidental thereto.
4. No yard or other open space surrounding an existing building in any residential zone, or which is hereinafter provided around any building in any residential zone, shall be used for the storage of junk, debris, or abandoned or inoperable vehicles; except as specifically permitted herein, and as provided and regulated in any other applicable Town Ordinances.

I. YARD, LOT, AND AREA REQUIREMENTS

1. No building shall be erected; nor shall any existing building be altered, enlarged, moved, or rebuilt, nor shall any open space surrounding any building be encroached upon or reduced in any manner, except in conformity with the yard, lot, area and building location regulations hereinafter designated for the zone in which such building or open space is located, except, as otherwise specifically provided.
2. No yard or other open space provided about any building for the purpose of complying with the provisions of these Restrictions shall be considered as a yard or open space for any other building; and no yard or other open space on one (1) lot shall be considered as a yard or open space for a building on any lot.
3. Awnings, fire-escape stairs, window-type refrigeration units, suspended or roof evaporative coolers, and forced air furnaces may not project more than five (5) feet over any required yard, provided that they shall be no closer than three (3) feet to any lot line.
4. Architectural details such as canopies, cornices, and eaves may project not more than three (3) feet over any required yard, provided that they shall be no closer than three (3) feet to any lot line.
5. Sills, leaders, be1t courses and similar ornamental features may project not more than six (6) inches over or into any required yard.
6. Accessory Buildings (attached) – A private automobile garage, carport or accessory building having any part of a wall in common with a dwelling shall be considered an integral part of the main building in determining yard, lot, and area requirements.

7. Accessory Buildings (detached) – Any detached accessory building or swimming pool in any zone shall not be located in the front yard, shall be at least five (5) feet from the main structure, shall be at least five (5) feet from the rear and interior side lot lines, and shall maintain side yard setbacks from the street side lot lines as required for the main structure in that zone.
8. No automobile service station pump shall be located closer than twelve (12) feet to a street property line.
9. Except as provided herein, every part of a required yard shall be open to the sky and unobstructed. Trees, shrubbery, etc., shall not be considered obstructions.
10. No portion of any deck shall be located within five (5) feet of the lot line except in those districts where residential use is not a permitted use. In those districts, decks should conform to the required yard for that zone. Decks shall not encroach into any public easement. Square footage of decks shall be included in lot coverage for each zoning district.

[Ord. No. 374]

J. BUILDING HEIGHT REQUIREMENTS

1. No building shall be erected, reconstructed, or structurally altered to exceed in height the limit hereinafter designated for the zone in which such building is located, except as otherwise specifically provided.
2. Height regulations established elsewhere in this Ordinance shall not apply:
   a. In any district, to church spires, belfries, cupolas and domes not for human occupancy, monuments, water towers, flagpoles, non-commercial radio or television antennas, provided that such structures and antennas shall be so located and constructed that if it should collapse, its reclining length would still be contained on the property on which it was constructed.
   b. In industrial districts, to chimneys, smokestacks, derricks, conveyors, grain elevators, or similar structures wherein the industrial process involved customarily requires a height greater than otherwise permitted, provided that such structure shall be so located and constructed that if it should collapse, its reclining length would still be contained on the property on which it was constructed.
3. In any district, the height of a deck may not exceed twenty-seven (27) feet from the natural grade.

[Ord. No. 374]

K. WALLS AND FENCES

1. No freestanding wall or fence shall be constructed until a permit for such construction has been issued by the Building Inspector. No such permit shall be issued until the application for such permit has been reviewed and approved by the Zoning Administrator and Historic Preservation and Design Review Board in accordance with the provisions of Section 303 and Section 304.
2. In any residential or commercial zone, no wall or fence over three (3) feet high shall be constructed or maintained nearer to the street line than the front and side walls of the building erected, nor be more than six (6) feet in height on any side or rear-lot-line. Provided, however, that open wire fences exceeding the above heights may be built around schools and other public or quasi-public institutions when necessary for the safety or restraint of the occupants thereof.
3. No fence or wall shall contain barbed wire, electrical current or charge of electricity, broken glass, or similar hazardous materials or devices, provided, however, that fences enclosing storage areas in industrial districts may use barbed wire so long as such wire is located not less than six (6) feet above grade.

L. EXTERIOR LIGHTING

[CODIFIER'S NOTE: This subsection was rewritten with Ordinance 490 and moved to new **Section 502.1.**]

M. REMOVAL OR DEMOLITION OF BUILDINGS OR STRUCTURES

No building or structure which has been wholly or partially erected on any property located within the Town of Jerome shall be demolished or removed until a permit for such demolition or removal has been issued by the Zoning Administrator. A permit for removal or demolition of any building or structure shall not be issued until the application for such a permit has been reviewed and approved by the Historic Preservation and Design Review Board in accordance with the provisions of Section 304.

N. HOME OCCUPATIONS

[CODIFIER'S NOTE: This subsection was moved to Table 411: Use/Zone-Specific Standards in Section 411 and the use renamed to Live/Work Dwelling with Ordinance 497.]

O. ANIMALS AND PETS

Except as otherwise permitted in this Ordinance, the keeping of animals in connection with each dwelling shall not exceed a total of three (3) pets, such as dogs, cats, and similar household pets, exclusive of animals under the age of six (6) months, and exclusive of birds, fish and other pets which at all times are kept within a fully enclosed building or accessory building, and which do not create odor or sound which is detectable on an adjoining lot.

P. OFF-STREET PARKING REQUIREMENTS

1. Automobile off-street parking must be provided as required in Section 510.
2. Mobile homes, house trailers, commercial trailers, boat trailers, campers, or travel trailers shall not be stored, parked, or located in any zone other than as listed in the zone regulations, except that the storage of one boat trailer and not more than one uninhabited camper or uninhabited travel trailer shall be allowed for each residence. Such vehicles may not be stored in front yard of a residence.
3. A proposed development shall have adequate provisions for such items as convenience of access for public service vehicles, such as garbage collection vehicles, movement of emergency vehicles, and convenience of access to parking sites and other site improvements by site residents or users.
4. Ingress, egress, internal traffic circulation, off-street parking facilities, loading and service areas, and pedestrian ways shall be so designed as to promote safety and convenience.

Q. BEEKEEPING

[CODIFIER'S NOTE: This subsection was rewritten with Ordinance 497 and moved to new Table 411: Use/Zone-Specific Standards in Section 411.]

R. SWIMMING POOLS

1. Construction
    a. All swimming pools within the Town of Jerome are to be designed and constructed in accordance with the International Swimming Pool and Spa Code, 2018 Edition, published on or after August 31, 2017, by the International Code Council Inc.
2. Enclosures
    a. A swimming pool, or other contained body of water with eighteen inches or more in depth at any point and that is wider than eight feet at any point and is intended for swimming, shall be protected by an enclosure surrounding the pool area, as provided in this section.
    b. A swimming pool or other contained body of water required to be enclosed by subsection A, whether a below-ground or above-ground pool, shall meet the following requirements:

1) Be entirely enclosed by at least a five-foot wall, fence, or other barrier as measured on the exterior side of the wall, fence, or barrier.

2) Have no openings in the wall, fence, or barrier through which a spherical object four inches in diameter can pass. Any horizontal parts of a wall, fence, or barrier must either:

   i. Be spaced at least 45 inches apart vertically, or

   ii. Be located on the pool side of the barrier, in which case the barrier must not have any horizontal openings wider than 1¾ inches.

   iii. Wire mesh or chain link fences shall have a maximum mesh size of one and three-quarter inches measured horizontally.

3) The wall, fence, or barrier shall not contain openings, handholds, or footholds accessible from the exterior side of the enclosure that can be used to climb the wall, fence or barrier.

4) The wall, fence or barrier shall be at least twenty inches from the water's edge.

5) Gates for the enclosure shall:

   i. A pool gate must be self-closing and self-latching. The latch must either be at least 54 inches above the ground, or be located on the pool side of the gate with the release mechanism at least 5 inches below the top and no openings larger than ½ inch within 24 inches of the release. Alternatively, the gate may be secured with a padlock or similar locking mechanism that requires a key, electric opener, or combination, in which case the latch may be at any height.

   ii. Open outward from the pool.

c. If a residence or living area constitutes part of the enclosure required by subsection B for a swimming pool or other contained body of water in lieu of the requirements of subsection B, there shall be one of the following:

1) Between the swimming pool or other contained body of water and the residence or living area, a minimum four-foot wall, fence, or barrier to the pool area which meets all of the requirements of Section502.R.2.b.1-.5.

2) The pool shall be protected by a motorized safety pool cover which requires the operation of a key switch that meets the American Society of Testing and Materials emergency standards 13-89 and which does not require manual operation other than the use of the key switch.

3) All ground-level doors or other doors with direct access to the swimming pool or other contained body of water shall be equipped with a self-latching device that meets the requirements of Section 502.R.2.b.5.i. Emergency escape or rescue windows from sleeping rooms with access to the swimming pool or other contained body of water shall be equipped with a latching device not less than fifty-four inches above the floor. All other openable dwelling unit or guest room windows with similar access shall be equipped with a screwed-in-place wire mesh screen, or a keyed lock that prevents opening the window more than four inches, or a latching device located not less than fifty-four inches above the floor.

4) The swimming pool shall be an aboveground swimming pool that has non-climbable exterior sides that are a minimum height of four feet. Any access ladder or steps shall be removable without tools and secured in an inaccessible position with a latching device not less than fifty-four inches above the ground when the pool is not in use.

d. This section does not apply to:

1) A system of sumps, irrigation canals, irrigation, flood control or drainage works constructed or operated for the purpose of storing, delivering, distributing or conveying water.

2) Stock ponds, storage tanks, livestock operations, livestock watering troughs or other structures used in normal agricultural practices.

3) Public or semi-public swimming pools.

4) A swimming pool or contained body of water or barrier constructed prior to the effective date of this article.

e. A person on entering into an agreement to build a swimming pool or contained body of water or sell, rent or lease a dwelling with a swimming pool or contained body of water shall give the buyer, lessee or renter a notice explaining safety education and responsibilities of pool ownership as approved by the Arizona Department of Health Services.

3. Location

a. The requirements for the location of permanent pools shall be the same as the requirements for the location of accessory buildings and structures within the property's zoning district, except that:

1) Swimming pools shall be located on a lot in compliance with all applicable setback, grading, drainage, and other requirements of this Ordinance. Pools shall be designed, constructed, operated, and maintained so that drainage, overflow, backwash, or water released from the pool does not drain onto adjacent properties or adversely impact adjacent properties or public rights-of-way.

4. Permit Required

b. No swimming pool, except temporary pools, shall be constructed, enlarged, or altered until a permit has been obtained from the Town. Application for a permit shall be accompanied by plans and specifications in sufficient detail to indicate the following:

1) Lot or plot plan showing lot lines, easements, if any, pool area plan, and elevations with dimensions drawn to scale.

2) Pool dimensions, depths and volume in gallons.

3) Type and size of filter system, filtration and backwash capacities.

4) Pool piping layout, with all pipes and valves shown, and the type of materials to be used.

5) Size, type, and rated capacity of the pool pump.

6) Location and type of water supply, and waste disposal system.

7) Location and type of all electrical fixtures.

8) Conformity with provisions of this Section as required.

9) Conformity with provisions of Town Building, Plumbing and Electrical Codes as required.

10) Conformity with The International Swimming Pool and Spa Code

c. Exceptions

1) Any above-ground pool or water feature designed to hold less than 5,000 gallons or that is less than 18 inches deep shall not require a permit.

SECTION 502.1 GENERAL PROVISIONS – EXTERIOR LIGHTING

[Section 502.1 created with Ord. No. 490]

A. INCORPORATION BY REFERENCE

A.R.S. Title 49, Chapter 7, Light Pollution is hereby incorporated by reference

B. PURPOSE

This section is intended to establish procedures and standards that ensure minimal light pollution, reduce glare, increase energy conservation, and afford every citizen and business of Jerome the flexibility to engage in the pursuit of safe, inexpensive lighting for the purpose of commerce and private use without detrimentally impacting the pristine nighttime environment free from light pollution, waste, trespass, or clutter.

C. APPLICABILITY

1. This chapter shall apply to all outdoor lighting, including but not limited to, search, spot, or floodlights for:
    a. Buildings and Structures;
    b. Recreational Areas;
    c. Parking Lot Lighting;
    d. Landscape Lighting
    e. Other Outdoor Lighting
2. New lighting shall meet the requirements of this Code with regard to shielding and lamp type. The total outdoor light output after the new lighting is installed shall not exceed that on the site before the new lighting was installed, or that is permitted by this Code, whichever is less.
3. If the total cumulative increase in floor area is greater than 50 percent for single family residential or greater than 25 percent for all other uses, or if the total cumulative cost of any exterior modification, alteration or repair is greater than 25 percent of the valuation of the building as determined by the Zoning Administrator, then all exterior lighting fixtures shall comply with this Code. Cumulative modification, replacement, or repair of outdoor lighting constituting 25 percent or more of the permitted lighting output level for the parcel, no matter the actual amount of lighting already on the site, shall require all exterior lighting to comply with this Code.
4. Exemptions
    a. **Emergency Lighting**

        Lighting used only under emergency conditions, as declared by the Governor of the State of Arizona, Town of Jerome Mayor, or authorized County or Town public safety representative, shall not be subject to this Section 502.1

    b. **Seasonal Lighting**

        Temporary seasonal lighting between the months of October and January 15 shall not be subject to this Section 502.1, provided such lighting does not create glare to motorists or result in light trespass onto adjacent properties.

    c. **Lighting Required by FAA or FCC**

        Lighting required by the Federal Aviation Administration, or the Federal Communications Commission shall not be subject to this Section.

    d. **Special Events**

Special events that have been issued a special event permit shall be allowed temporary lighting for the duration of the event, provided such lighting does not create glare to motorists or result in light trespass onto adjacent properties.

e. **Street Lighting**

With the exception of shielding requirements, this Code does not apply to street lighting within Town and state rights-of-way.

5. Nonconforming Lighting

a. Existing historic nonconforming lighting in use prior to the adoption of this ordinance may continue to be used; if historic fixtures are damaged, they may be restored or repaired in efforts to preserve their historic nature.

b. Lighting that does not conform to all provisions of this Code shall be brought into compliance, in accordance with Section 502.1(C)(3). Until this time, no modification or replacement shall be made to a nonconforming fixture unless the fixture thereafter conforms to the provisions of this Code, except that identical lamp replacement is allowed.

c. In the event that an outdoor lighting fixture is abandoned or damaged to the point of requiring repairs for safe operation, the repaired or replacement fixture shall comply with the provisions of this Code.

D. DEFINITIONS

As used in this Code, unless the context clearly indicates otherwise, certain words and phrases shall mean the following:

1. *Abandonment* means the discontinuation of use for a period of six months.
2. *Adaptive Controls* means hardware and/or electronics, used in conjunction with outdoor light fixtures, intended to dynamically alter or adjust the operation of those fixtures. Examples of adaptive controls include, but are not limited to, motion/occupancy sensors, dusk-to-dawn ('astronomical') timers, and photocells.
3. *Class 1 Lighting* means all outdoor lighting used for, but not limited to, outdoor sales or eating areas, assembly or repair areas, advertising and other signs, recreational facilities, and other similar applications where color rendition is important.
4. *Class 2 Lighting* means all outdoor lighting used for, but not limited to, illumination for walkways, roadways, equipment yards, and parking lots where general illumination of the grounds is the primary concern.
5. *Class 3 Lighting* means any outdoor lighting used for decorative effects, including but not limited to architectural illumination, flag monument lighting, and illumination of trees, bushes, etc.
6. *Correlated Color Temperature (CCT)* means the temperature of a source of blackbody radiation whose spectrum best approximates the spectrum of a particular light source, expressed in units of Kelvins. Lamps with a CCT greater than 4000K are considered "cool" sources.
7. *Direct Illumination* means illumination resulting from light emitted directly from a lamp, luminaire, or reflector, not light diffused through translucent signs, or reflected from other surfaces such as the ground, building faces, or luminaire optics.
8. *Footcandle (abbreviated 'fc')* means a unit of illuminance or illumination, equivalent to the illumination produced by a source with luminous intensity of one candela at a distance of one foot and equal to one lumen incident per square foot (approximately 10.764 lux).

9. *Fully Shielded Fixture* means that fixtures are shielded in such a manner that light rays emitted by the fixture, either directly from the lamp or indirectly from the fixture, are projected below a horizontal plane running through the lowest point on the fixture where light is emitted.
10. *Initial Lumens* means the lumens rating of a lamp at the time of manufacture, not accounting for losses due to normal lamp aging, or the lumens rating for a brand new light bulb. Initial lumens are measured by manufacturers specifications and usually provided along with product packaging.
11. *Installed* means attached, or fixed in place, whether or not connected to a power source.
12. *Lighting Zone* means an overlay zoning system, establishing legal limits for lighting for particular parcels, areas, or districts in a community.
13. *Light Trespass* is spill light falling over property lines that illuminates adjacent grounds or buildings in an objectionable manner.
14. *Lumen* is the unit used to measure the actual amount of visible light, which is produced by a lamp as defined by the manufacturer.
15. *Luminaire* means the complete lighting assembly, less the support assembly.
16. *Lux (abbreviated 'lx')* means a unit of illuminance or illumination equal to one lumen per incident square meter (approximately 0.093 fc).
17. *Multi-class Lighting* means any outdoor lighting used for more than one purpose, when the purpose fall under the definitions for two or more lighting lasses as defined for Class 1, 2 and 3 Lighting above.
18. *Motion Sensing Lighting* means a fixture designed, and properly adjusted, to illuminate an area around a residence or other building by means of switching on a lamp when motion is detected inside an area or perimeter, and switching the lamp off when the detected motion ceases.
19. *Neon Lighting* means lighting using luminous gas filled tubes often formed into text, symbols, or decorative elements. Neon lighting includes tubes with typical diameters of 10 to 20 millimeters filled with neon, argon, xenon, or other gasses and producing various colors of light. Not included are replaceable T-8 (1-inch diameter) and T-12 (1.5-inch diameter) or PL ("compact") fluorescent tubes.
20. *Net Acreage* means the remaining ground area of a parcel after deleting all portions for proposed and existing public right-of-way and undeveloped area.
21. *Opaque* means only that the material must not transmit light from the internal illuminating source: the color of such opaque backgrounds is not restricted.
22. *Outdoor Light Fixtures* means all outdoor illuminating devices, reflective surfaces, lamps, and other devices, either permanently installed or portable, which are used for illumination or advertisement. Such devices shall include, but are not limited to, search, spot, and floodlights for:

    d. Buildings and Structures

    e. Recreational Areas

    f. Parking Lot Lighting

    g. Landscape and Architectural Lighting

    h. Billboards and other Signs (advertising or other)

    i. Street Lighting

    j. Product Display Area Lighting

k. Building Overhangs and Open Canopies

23. *Person* includes a corporation, company, partnership, firm, association, or society, as well as a natural person.
24. *Planning and Zoning Director* means the Director of Planning and Zoning for the Town of Jerome or their designated representative.
25. *Temporary Lighting* means lighting which does not conform to the provisions of this Code and which will not be used for more than one thirty (30) day period within a calendar year. Temporary lighting is intended for uses which by their nature are of limited duration; e.g., holiday decorations, civic events, or construction projects.
26. *Total Outdoor Light Output* means the maximum total amount of light measured in lumens, from all outdoor light fixtures on a property. For lamp types that vary their output as they age (such as high-pressure sodium and metal halide), the initial output, as defined by the manufacturer, is the value to be considered.
27. *Translucent* means light is transmitted from the internal illumination source.
28. *Unshielded* means a fixture that allows light to be emitted above the horizontal directly from the lamp or indirectly from the fixture or a reflector.
29. *Watt* is the unit used to measure the electrical power consumption (not the light output) of a lamp.

E. GENERAL REQUIREMENTS

All light fixtures and streetlamps where able, shall be aimed or shielded so that the direct illumination shall be confined to the property boundaries of the source. Direct illumination must not fall onto or across any public or private street or road. Motion-sensing lighting fixtures shall be properly adjusted, according to the manufacturer's instructions, to turn off when detected motion ceases. All new development, qualified enhancements, and requirements as outlined in 502.1 must follow the Total Light Output requirements indicated in Section 502.1.L..

1. **Class 1 Lighting (High Activity Areas)**

   Lighting used for outdoor sales or eating areas, assembly or repair areas, signage, recreational facilities, and other similar applications where accurate color rendition is important to preserve the effectiveness of the activity. Commonly used in Lighting Zones 2 -4. (See Section 502.1.L)

2. **Class 2 Lighting (Security and Public Safety)**

   Lighting used for illumination of walkways, roadways, equipment yards, parking lots, and outdoor security where general illumination for safety or security of the grounds is the primary purpose. Commonly used in Lighting Zones 1-3. (See Section 502.1.L)

3. **Class 3 Lighting (Decorative and Accent)**

   Lighting used for decorative effects such as architectural illumination, flag and monument lighting, and illumination of landscaping elements. All Class 3 lighting shall be selected, designed, installed, and aimed so that there is a minimum amount of spill beyond the area(s) to be lighted. Commonly used in Lighting Zones 0-2. (See Section 502.1.L)

4. **Multi-Class Lighting**

   Lighting used for more than one purpose, such that the use falls within more than one class as defined for Class 1, 2, or 3 lighting. Multi-class lighting must conform to the standards that apply to the most restrictive included class.

5. **Lighting Plan Submittal Required**

   Whenever new exterior lighting is proposed, the applicant shall submit an application, and as part of the application, shall submit sufficient information to enable the Zoning Administrator to

determine whether proposed lighting complies with this Code. All applications may be subject to review and action by the Planning and Zoning Commission at the discretion of the Zoning Administrator. The lighting plan shall include information as determined by the Zoning Administrator.

6. **Plan Approval**

   If the Zoning Administrator determines that any proposed lighting does not comply with this Code, the associated permit shall not be issued, or the application approved, unless an alternative is approved pursuant to Section 502.1(E)(7) below.

7. **Discretionary Approval of Lighting Alternatives**

   The Zoning Administrator may approve alternative lighting designs, materials, or methods of installation or operation not specifically prescribed by this Code, provided the proposed alternative:

   a. Results in approximate equivalence to the applicable specific requirement of this Code; and

   b. Complies with the purpose of this Code as stated in subsection 502.1(B).

8. **Warm Lighting Requirements and Alternatives**

   a. All Class 2 Lighting shall be either low-pressure sodium (LPS) lamps, narrow spectrum amber LEDs, or warm lighting alternatives not to exceed 2,700 Kelvin

   b. For Class 1 Lighting, a development may be eligible for an additional 10 percent increase in the total lighting output level allowed if 50 percent or more of the Class 1 lighting complies with subsection 502.1(E)(8)(a).

9. **Prohibited Lighting Types and Fixtures**

   a. Outdoor floodlighting by floodlight projection above the horizontal plane is prohibited.

   b. Mercury vapor light bulbs and fixtures.

   c. Lamps emitting a Correlated Color Temperature (CCT) in excess of 4,000 Kelvin

   d. Searchlights, laser source lights, strobe or flashing lights, illusion lights or any similar high intensity light shall not be permitted, except in emergencies by police and fire personnel.

   e. Unshielded lights.

   f. Permanent exposed string lighting for mixed-use and nonresidential uses is prohibited, except as allowed in the subsection immediately below

   g. Ambiance lighting for outdoor dining/bar areas, interior courtyards, and/or event venues may be allowed subject to compliance with all other provisions of this Code and with approval by the Zoning Administrator on a case-by-case basis. In reviewing proposals for such lighting, the Zoning Administrator shall consider lighting types, locations, and time of use. Permanent outdoor string lighting shall not flash, blink, fade, or strobe and shall be included in the total partially shielded lumen count for the property. Such lighting, if allowed by the Zoning Administrator, shall be extinguished immediately after outdoor hours of operation.

10. **Shielding and Light Trespass**

    a. All light fixtures are required to be fully shielded, unless approved by the Planning and Zoning Director pursuant to Section 502.1(E)(6-7).

    b. Partially shielded light fixtures approved by the Zoning Administrator as part of a lighting alternative pursuant to 502.1(E)(7) are limited to a maximum of 3,850 initial lumens per net acre and shall not exceed 1,400 initial lumens per lamp.

c. All light fixtures shall be aimed and shielded so that the direct illumination shall be confined to the property boundaries of the source. Lighting shall not be aimed onto adjacent properties, except in cases of shared parking, pursuant to 502.1(E)(7), shared pedestrian pathways, or for coordinated development sites spanning multiple parcels.

11. **Lighting Controls**

d. Motion Sensors

2) May be used where the sensor is triggered by activity within the property lines and not triggered by activity outside the property lines.

3) Motion-sensing fixtures shall be fully shielded and properly adjusted, according to the manufacturer's instructions, to turn off in a reasonable timeframe after the detected motion ceases.

e. Lighting Time Limitations

4) Except for flagpole lighting and landscape lighting, Class 1, and Class 3 lighting shall be extinguished during nonbusiness hours. Lodging businesses are encouraged to reduce lighting during off-peak hours overnight.

5) Landscape lighting shall be extinguished by close of business or 10:00p.m. whichever is later.

6) Multi-class lighting shall conform to the time limitations of the strictest class.

F. UPLIGHTING, EXTERIOR BUILDING LIGHTING AND SIGN ILLUMINATION

1. Subject to the approval of the Zoning Administrator, uplighting or ground-mounted lighting may be allowed to accent unique features of a building and/or surrounding landscaping such as exceptional architectural features, specimen trees with dense year-round foliage, or large native shrub masses, and shall be designed and installed to minimize glare with special consideration to vehicular and pedestrian traffic.
2. All lighting shall be fully shielded to contain and direct the light onto the feature to be illuminated.
3. All uplighting shall be considered partially shielded for the purposes of calculating lighting output levels.
4. All Class 3 lighting shall be selected, designed, installed, and aimed so that there is a minimum amount of spill beyond the area intended to be lighted.
5. Exterior building lighting may be considered Class 1, 2 or 3 Lighting depending on the size, function, illumination, design, and lighting intent.
6. Soffit-mounted light fixtures should be recessed into the soffit or otherwise fully shielded.
7. Architectural lighting shall only be used to highlight special features. The lighting of expansive wall planes or lighting resulting in hot spots on wall or roof planes shall be prohibited.
8. Lighting above entryways or along building perimeters shall use fully shielded fixtures.
9. Lighting used for all externally illuminated signs shall conform to all restrictions of the Code, shall be fully shielded, and shall be turned off at 10:00p.m. or when the business closes, whichever is later.
10. Outdoor internally illuminated advertising signs shall either be constructed with an opaque background and translucent letters and symbols or with a colored (not white, cream, off-white, yellow, or other light color) translucent background with either translucent or opaque letters and symbols. Opaque means only that the material must not transmit light from the internal illumination source: the color of such opaque backgrounds is not restricted by this section.

Lamps used for internal illumination of such signs shall not be included in the lumens per net acre limit set forth. All internally illuminated signs shall be turned off at 10:00 p.m. or when the business closes, whichever is later.

G. PARKING AREA AND PEDESTRIAN WALKWAY LIGHTING

Parking area and pedestrian walkway lighting is considered Class 2 lighting.

1. Parking lot lighting shall use fully shielded fixtures.
2. Parking lot poles shall not exceed 12 feet in height.
3. Low-level pedestrian walkway lighting;
    a. Considered Class 2 lighting shall utilize fully shielded fixtures;
    b. Shall use shatterproof lamp coverings;
    c. Shall not cause the site to exceed the lighting output level established in this Code;
    d. Shall not be located to present hazards for pedestrians or vehicles.
4. Post or bollard-type walkway lights shall be painted in darker colors such as black, dark brown, dark gray, or other dark earth tones.

H. OUTDOOR DISPLAY LOTS

Light for outdoor display lots shall be considered Class 1, and shall conform to the lumens per acre limits established except as follows:

1. All such lighting shall be fully shielded; partially shielded fixtures shall be prohibited.
2. If the proposed lumens exceed the per-acre limits, the installation shall be designed to achieve no greater than the minimum illuminance levels for the activity as recommended by the Illuminating Engineering Society of North America and shall require approval by the Planning and Zoning Director pursuant to 502.1(E)(7).
3. Outdoor display lot illumination design shall be certified by an Arizona registered engineer as conforming to all applicable restrictions of this Code.
4. Outdoor display lot lighting shall conform to the hours of operation as established under Class 1 lighting standards pursuant to Section 502.1(E)(11)(b).

I. INSTALLATION AND MAINTENANCE

1. For all projects where the total initial output of the proposed lighting equals or exceeds 70,000 fixture lumens, or if the Zoning Administrator determines it is necessary, certification that the lighting, as installed, conforms to the approved plans shall be provided by a certified engineer before a Certificate of Occupancy is issued. Until this certification is submitted, approval for the use of a Certificate of Occupancy shall not be issued for the project.
2. Any proposed change to the type of light source after a permit has been issued shall require submitting a change request to the Zoning Administrator for approval prior to the substitution.

J. TEMPORARY LIGHTING PERMITS

1. The Zoning Administrator may grant a permit for temporary lighting if he or she finds all of the following:
    a. The purpose of which the lighting is proposed is not intended to extend beyond thirty (30) days;
    b. The proposed lighting is designed in such a manner as to minimize light as much as feasible;
    c. The proposed lighting will comply with the general intent of this Code; and
    d. The permit will be in the public interest.

2. The Zoning Administrator shall rule on the application within five (5) days from the date of submission of the request and notify the applicant in writing of their decision. The Zoning Administrator may grant one (1) renewal of the permit for an additional thirty (30) days if they find that, because of an unanticipated change in circumstances, a renewal would be in the public interest. The Zoning Administrator is not authorized to grant more than one temporary permit and one renewal for the same property within one calendar year.

K. VARIANCES

Any person desiring to install an outdoor lighting fixture in violation of this Code may apply to the Board of Adjustment for a variance from the regulation in question. Such variances shall be allowed only as provided by Section 106 of Jerome Zoning Ordinance.

L. TOTAL LIGHTING OUTPUT

1. Lighting Zones
    a. Zone O
        1) Applies to areas in which permanent lighting is not expected or, use is limited to the amount of lighting and period of operation.
        2) Includes undeveloped areas, wilderness parks and preserves, astronomical observatories, or areas where a dark environment is critical.
        3) Special review should be required for any permanent lighting in this zone.
    b. Zone 1
        1) Areas that desire low ambient lighting levels.
        2) Typically single and two family residential communities, rural town centers, business parks and agricultural areas.
        3) May also include developed area in parks or other natural settings.
        4) Can be Class 2 or Class 3 Lighting.
    c. Zone 2
        1) Areas with moderate ambient lighting levels.
        2) Typically multifamily residential use, institutional residential use, schools, churches, hospitals, hotels/motels, recreation facilities, and commercial or business districts with moderate nighttime activities.
        3) Can be used to accommodate outdoor sales or light industry in an area other LZ-1
        4) Can be Class 1, Class 2, or Class 3 Lighting.
    d. Zone 3
        1) Areas with moderately high lighting levels.
        2) Typically include commercial corridors, high intensity suburban commercial areas, town centers, mixed use areas, industrial and shipping and rail yards with high nighttime activity.
        3) Can also include High use recreational facilties and playing fields, regional shopping malls, car dealerships, gas stations, and other nighttime active retail areas.
        4) Can be Class 1, Class 2, or Class 3 Lighting
    e. Zone 4

1) Areas with High Ambient lighting levels
2) Should only be used for special cases and is not appropriate for most cities.
3) May be used for unusual installations such as high-density entertainment, heavy industrial use, or major manufacturing.
4) Typically, only Class 1 lighting is used in this Zone.
5) Currently, there are no known uses for this Class or Zone within the limits of the Town of Jerome.

2. Lighting Applications

Table 502.1.L.2a Residential/Agricultural Lighting Applications

Residential/Agricultural Application	LZ 0	LZ 1	LZ 2	LZ 3	LZ 4
Allowed Lumens Per SF	0.5	1.25	2.5	5.0	7.5
Allowed Base Lumens Per Site	0	3,500	7,000	14,000	21,000
Residential Max Allowed Luminaire Lumens* for Unshielded Luminaires at one entry	0	420	630	630	630
Residential Max Allowed Luminaire Lumens* for Fully Shielded Luminaire	630	1,260	1,260	1,260	1,260
Residential Max Allowed Luminaire Lumens* for Unshielded Luminaires Excluding Main Entry	0	315	315	315	315
Residential Max Allowed Luminaire Lumens* for each Shielded Directional Flood Lighting	0	0	1,260	2,100	2,100
Residential Max Allowed Luminaire Lumens* for each Low Voltage Landscape Lighting	0	315	525	525	525
Residential Max Allowed Luminaire Lumens* for each Landscape Lighting	0	0	1,050	2,100	2,100

*Luminaire Lumens equals initial Lamp Lumens for a lamp, multiplied by the number of lamps in the luminaire

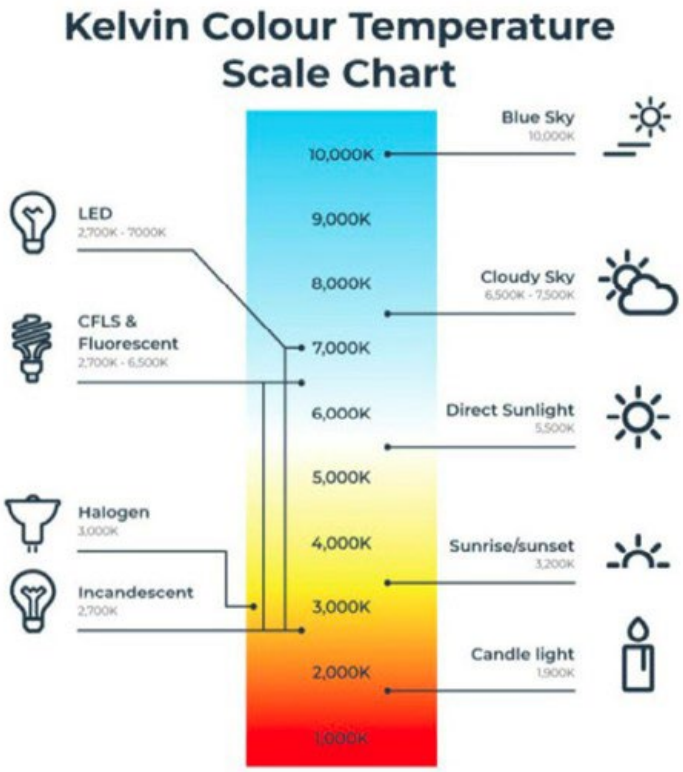

Table 502.1.L.2b Commercial Lighting Applications

Commercial Application	LZ 0	LZ 1	LZ 2	LZ 3	LZ 4
Allowed Lumens Per SF	0.5	1.25	2.5	5.0	7.5
Allowed Base Lumens Per Site	0	3,500	7,000	14,000	21,000
Non-Residential Outdoor Lighting (Hardscape Area Method) Base Allowance	.5/SF of Hardscape	1.25/SF of Hardscape	2/SF of Hardscape	5/SF of Hardscape	7/SF of Hardscape
Commercial Building Entrances/Exits (Allowance is per door. Luminaires must be within 20 feet of the door)	400	1,000	2,000	4,000	6,000
Commercial Building Facades (Allowance is lumens per unit area of building façade that are illuminated. Luminaires must be aimed at the façade and capable of illuminating it without obstruction.)	0	0	8/SF	16/SF	24/SF
Canopies (Allowance is lumens per unit area for total area within drip line of canopy. To use allowance luminaires must be located under the canopy.)	0	3/SF	6/SF	12/SF	18/SF
Outdoor Dining (Allowance is lumens per unit area for the total illuminated hardscape of outdoor dining. Luminaires must be within 2 mounting heights of the hardscape	0	1/SF	5/SF	10/SF	15/SF

Table 502.1.L.2c Lumens vs Watts Comparison Chart

Actual Light Generated	Incandescent Bulbs	Fluorescent Bulbs (CFL)	LED Bulbs (Light Emitting Diode)
Lumens	Watts	Watts	Watts
250	25	4-9	3
450	40	9-13	4-5
800	60	13-15	6-8
1,100	75	18-25	9-13
1,600	100	23-30	16-20
2,000	125	28-40	20-25

[CODIFIER'S NOTE: This subsection was rewritten with Ordinance 497 and moved to new Section 407.]

SECTION 508. "I-1" ZONE, LIGHT INDUSTRIAL

[CODIFIER'S NOTE: This subsection was rewritten with Ordinance 497 and moved to new Section 408.]

SECTION 509. SIGNS

A. PURPOSE

This section provides a set of standards for the design and construction of signs within the Town of Jerome. The purpose of this section is to encourage the preservation of historic buildings and artifacts, to protect the general public from damage and injury, to protect property values, to preserve the beauty and unique character of Jerome, to aid in the free flow of traffic within the town, and to promote the tourist industry, which is important to the economy of Jerome, and the Historic Overlay District.

B. APPLICATION

The provisions of this section are applicable to all zone districts of this Ordinance.

C. DEFINITIONS

Within and for the purposes of this section, the following definitions, and only these definitions, apply.

1. Area – Sign area is calculated as the area within a continuous perimeter that encloses the limits of text and graphics of a sign, together with any frame or other material or color forming an integral part of the display or used to differentiate the sign's message from the background against which it is placed. The area excludes the structure upon which the sign is placed and sign supports.
2. Barber pole – a type of sign used by barbers to signify the place or shop where they perform their craft. The sign includes a staff or pole with a helix of colored stripes (usually red, white, and blue). The pole may be stationary or may rotate, often with the aid of an electric motor.
3. Billboard – Any free-standing sign exceeding fifty (50) square feet in surface area on any one face.
4. Clear vision triangle – A triangle-shaped zone formed by the existing or proposed curb lines of two or more intersecting streets, roads, or alleys and a third line connecting said curb lines at a distance of thirty (30) feet in each direction from the point of the curb line intersection, in order to provide vehicular traffic an unobstructed view of cross traffic at intersections. In locations without curbs, the edge of the drivable surface of the street or road shall be treated the same as a curb.
5. Flying banner – a flexible or rigid pole attached to one side of a flexible fabric, generally in the shape of a feather, used for the primary purpose of advertising or attention getting by the public display of visually communicative images. Such banners are also known and sold under names that include, but are not limited to, "quill sign," "wing banner," "banana banner," "blade banner," "flutter banner," "flutter flag," "bowflag," "teardrop banner," and others. The definition includes functionally similar display devices.
6. Mannequin/skeleton/statue – a styled and three-dimensional representation of the human form.
7. Mural – See definition for *Sign, Painted*.
8. Organization – An organized body of people with a particular non-profit or for-profit purpose, such as a society, association, civic or charitable group.
9. Sign – An object meant to convey a message through the use of words or symbols. A sign can be painted on one or multiple surfaces, be freestanding, supported by a pole or attached to a building. All exterior signs, whether public or private, are regulated by this ordinance.
10. Sign, A-frame – A temporary, movable, freestanding sign placed on but not permanently anchored in the ground. This definition includes T-frame signs and other similar temporary signs. A-frame signs are typically constructed of wood, cardboard, plastic, or other lightweight and rigid material, and are often referred to as sandwich boards.

11. Sign, Aerial – A balloon or other airborne flotation device which is tethered to the ground or to a building or other structure that directs attention to a business, commodity, service, or entertainment conducted, sold, or offered.
12. Sign, Animated or Moving – Any sign or part of a sign which changes physical position or light intensity by any movement or rotation or that gives the appearance of such movement or rotation.
13. Sign, Awning – A sign that is mounted, painted, or otherwise applied on or attached to an awning or other fabric, plastic, or structural protective cover over a door, entrance, or window of a building. A marquee or a canopy is not an awning.
14. Sign, Back-lit – An indirect source of light which illuminates a sign by shining through a translucent surface of a sign, including plastic signs, lit from an internal light source.
15. Sign, Banner – A sign of lightweight fabric or similar nonridged material that is mounted with no enclosing framework.
16. Sign, Bench – A bench or similar device containing either off-premise or on-premise advertising.
17. Sign, Canopy – A sign that is mounted, painted, or otherwise applied on or attached to a freestanding canopy or structural protective cover over an outdoor service area. An awning or a marquee is not a canopy.
18. Sign, Changeable-Copy – A sign, or portion thereof, with characters, letters, or illustrations that can be changed or rearranged manually without altering the face or surface of the sign. Examples include whiteboards, chalkboards, and menu boards.
19. Sign, Commemorative – A sign, tablet, or plaque commemorating or memorializing a person, event, structure, or site.
20. Sign, Construction -A temporary sign providing information about future development or current construction on a site and the parties involved in the project.
21. Sign, Direct Illumination – A sign whose light source is either located in the interior of the sign so that the rays go through the face of the sign, or which is attached to the face of the sign and is perceived as a design element of the sign.
22. Sign, Directional – Signs limited to providing directions necessary or convenient for visitors or clients coming onto a premises including signs marking entrances and exits, parking areas, loading zones, or circulation direction.
23. Sign, Directory – A sign, other than an identification sign, listing the names, uses, or locations of the various businesses or activities conducted within a building or group of buildings, that is centrally located and intended to provide on-site directions.
24. Sign, Electronic Message Board – Signs whose alphabetic, pictographic, or symbolic informational content can be changed or altered on a fixed display screen composed of electrically illuminated segments.
25. Sign, Fascia – A single-faced sign attached flush to a building.
26. Sign, Freestanding – A sign not attached to or supported by a building.
27. Sign, Gas-generated – Gas-generated signs or signs illuminated by gas-generated lighting.
28. Sign, Height – The vertical distance from the ground directly under the sign to the highest point of the sign.
29. Sign, Holiday Decoration – Temporary seasonal signs, in the nature of decorations, clearly incidental to and customarily associated with nationally recognized holidays and which contain no advertising message.

30. Sign, Home Occupation – A sign listing only the name or occupation of a permitted home occupation.
31. Sign, Indirect Illumination – Illumination of a sign that is effected by a source of light not contained within the sign itself.
32. Sign, Interior – Signs within a building not visible from outside. Interior signs are not regulated by this ordinance.
33. Sign, Marquee – A roof-like structure of a permanent nature that projects from the wall of a building or its supports and may overhang the public way.
34. Sign, Monument – A freestanding sign supported primarily by an internal structural framework or integrated into landscaping or other solid structural features other than support poles.
35. Sign, Multitenant – An identification sign for a commercial site with multiple tenants, displaying the names of each tenant on the site.
36. Sign, Nameplate - A sign typically used to identify the business or residents of the premises, not exceeding 2 by 12 inches (2" x 12").
37. Sign, Off-premise – A permanent or temporary sign not located on the premises of the business that it advertises.
38. Sign, On-premise – A permanent or temporary sign located on the premises of the business that it advertises, referring exclusively to the name, location, products, persons, accommodations, services, or activities of or on those premises, or the sale or lease of those premises.
39. Sign, Open/Closed – An exterior sign that indicates whether a business is open or closed.
40. Sign, Painted – A sign painted directly on the building façade.
41. Sign, Permanent – A sign permanently attached to a structure or affixed to the ground. Includes *Wall Signs, Free standing Signs, Projecting Signs, Painted Signs, and Barber poles*. Permanent signs are intended to advertise or call attention to any item, business, activity, or place; are visible from outside a building; and are intended to be in place for longer than thirty days.
42. Sign, Projecting – A mounted sign that projects from and is supported by a wall of a building.
43. Sign, Real Estate – A temporary sign that relates to the sale, lease, or rental of property or buildings, or to construction activities on a site.
44. Sign, Service – An interior sign whose purpose is not to advertise the business displaying the sign, but to inform or provide for the safety of the public. Signs such as credit card placards, and "No Smoking" signs are examples of service signs.
45. Sign, Shingle – A sign suspended from and located entirely under a covered porch, covered walkway, or an awning.
46. Sign, Statuary – Any sign which is a modeled or sculptured likeness of a living creature or inanimate object intended to be used as an advertising device.
47. Sign, Temporary – A sign not permanently attached to a structure or to the ground. Examples of temporary signs include garage sale signs, temporary sale signs, contractor signs, banner signs, A-frame signs, T-frame signs, candidate signs, and real estate signs. Temporary signs shall only be displayed for a limited period. The definition of *temporary sign* does not include flags.
48. Sign Walker – A person (or persons) waving "sales theme signs" with arrows at entrances to major highways or at corners of high traffic intersections directing customers to a sale. Also called sign twirlers, sign holders, human billboards, and sign events.

49. Sign, Wall - A sign attached flush to the exterior surface of a building, or permanently applied to the exterior of a window of a building. The sign must not project above the roof. Light sources aimed at the wall sign may project further out from the wall.

50. Sign, Window – A sign affixed to the interior or exterior of a window or placed immediately behind a window pane so as to attract the attention of persons outside the building.

[Ord. No. 457; Ord. No. 472; Ord. No. 478]

D. APPLICABILITY

The provisions of this section shall apply to all signs placed or maintained within the Town of Jerome, with the exception of the following:

1. Non-illuminated names of buildings, dates of erection, monument citations, commemorative tablets and the like when carved into stone, concrete, metal, or any other permanent type construction and made an integral part of a permitted structure or made flush to the ground.
2. Signs required by law or signs of a duly constituted governmental body, such as traffic signs, warning signs, or no trespassing signs.
3. Signs placed by a public utility for the safety, welfare, or convenience of the public, such as signs identifying high voltage, public telephone, or underground cables.
4. Notices regarding parking, directions, or trespassing on private property.
5. Signs upon a vehicle, provided that any such vehicle is actively used for bona fide delivery or other business purposes.
6. Bumper stickers on a vehicle.
7. Temporary signs for town-sponsored or co-sponsored events.

[Ord. No. 457; Ord. No. 478]

E. PERMITS

1. A sign permit shall be required before a permanent sign may be placed, constructed, reconstructed, or altered within the Town of Jerome, with the exception of the following:
   a. A-frame signs which are on private property (see additional standards regarding A-frame signs in paragraph G.9 of this Section).
   b. Changeable-Copy Signs.
   c. Directional Signs.
   d. Exterior temporary signs in the residential districts.
   e. Name-plate signs and business door identifiers not exceeding two by twelve inches (2” x 12”).
   f. Repainting or maintenance of signs, provided there is no change in size, shape, wording, composition, or color.
   g. Signs not permanently affixed to a window and located entirely within an enclosed building.
2. An application for a permanent sign permit shall be filed with the Zoning Administrator on a form prescribed by the zoning department and shall be accompanied by the required number of copies. Each copy shall be on one or more sheets of paper measuring no larger than 24 by 36 inches drawn to scale, which shall show the following:
   a. Signature of the applicant.
   b. The name and address of the sign owner and sign erector.
   c. Drawings showing the design, dimensions, color, material, and structure of the sign.

d. A drawing or photograph of the building facade indicating the proposed location of the sign, and all other existing signs maintained on the premises and regulated by this ordinance.

e. Proposed method of lighting the sign.

f. Any additional information that the Historic Preservation/Design Review Board may require in order to decide on the application, in accordance with Section 304.H.4 of the Zoning Ordinance.

g. Payment of a nonrefundable, one-time filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the offices of the town clerk. Applicant may resubmit a modified plan without paying an additional fee. Payment of the filing fee shall be waived when the applicant is an agent of the town, county, state, or federal government.

3. Plan Review

   The Zoning Administrator shall review and accept completed plans in accordance with the provisions of Section 304. These plans shall be placed on the agenda of the next Historic Preservation/Design Review Board meeting.

4. Design Review

   The Historic Preservation/Design Review Board shall, in accordance with the provisions of Section 304, deny, approve, or conditionally approve any application for a sign permit. Upon approval of an application by the Historic Preservation/Design Review Board, the Zoning Administrator shall be instructed to issue the sign permit.

5. The Historic Preservation/Design Review Board may waive the requirements of this section in order to allow the preservation or restoration of signs or commercial graphics determined to be of historical significance.

[Ord. No. 457; Ord. No. 472; Ord. No. 478]

F. REGULATIONS APPLICABLE TO SIGNS IN ALL ZONES

1. The design, color, shape, materials, and style of permanent signs shall be subject to review and approval of the Historic Preservation/Design Review Board.

2. All signs shall be constructed, designed, or attached to structures in conformance with the building code adopted by the Town of Jerome.

3. No sign, mannequin, skeleton or statue shall be constructed or placed in the clear vision triangle, erected or lit in such a manner as to interfere in any way with the flow of traffic on the public right of way, or present a traffic hazard.

4. No sign or mannequin/skeleton/statue shall be constructed or placed in such a manner as to interfere with pedestrian traffic on public or private walkways, stairs, and/or handrails.

5. Freestanding signs shall not exceed four (4) feet in height.

6. Organizations as defined herein are allowed temporary signs without a permit or review for temporary special event banners or signs. Banners for special events must be removed within three (3) days of the close of any event and may not be hung on Town property without permission of the Town of Jerome. The town manager may approve special event banners to be hung on town property for recurring events. Banners to be hung on town property for first-time events shall be approved by the town council.

7. Lighting shall be directed at the sign from an external light source and shall be installed so as to avoid any glare or reflection into any adjacent property, or onto a street or alley so as to create a traffic hazard. These restrictions shall apply to internally lighted signs, which may be allowed if constructed of metal or wood. No internally lit signs that are constructed of acrylic or plastic are allowed. No sign that flashes or blinks shall be permitted outside. No visible bulbs, neon tubing, or luminous paints shall be permitted as part of any sign.

8. Any existing nonconforming, permanent sign legally constructed or permitted prior to the adoption of this ordinance may be continued in use; if such a sign is damaged, it may be restored or repaired. If a new sign is constructed, it must conform to the provisions of this Section 509 and Section 501.
9. Signs shall be removed within thirty (30) days of business relocation or closure.
10. If any sign becomes a danger to the public or becomes deteriorated or is abandoned, the property owner or owner of the sign shall be notified to remove or repair the sign. If they do not comply within ten (10) days, the zoning administrator shall have the sign removed and the cost assessed to the owner of the property on which such sign is located.
11. Painted Signs. Painted signs shall be subject to review by the Historic Preservation/Design Review Board in accordance with Section 304.H.4 of the Zoning Ordinance. The maximum number and area of painted signs shall be subject to the same restrictions and standards as other permanent signs.
12. Flags. Unless otherwise required by state law or specified in this article, no more than two (2) flags may be displayed on a flagpole, from a flag bracket, or on a flag stanchion. Examples of flags include, but are not limited to, the insignia of any nation, organization of nations, state, province, county, city; any religious, civic, or fraternal organization, or educational institution. The area of each flag shall not exceed sixteen (16) square feet, and the height of the flag shall be no taller than the building to which it is attached. For the purpose of determining the area of a flag, only one side of the flag shall be counted. Flags may be externally illuminated. A sign permit is not required for a flag.

[Ord. No. 457; Ord. No. 472; Ord. No. 478]

G. REGULATIONS APPLICABLE TO SIGNS IN RESIDENTIAL ZONES

1. One nameplate sign not exceeding 2 by 12 inches indicating the names of the occupants or business, and one set of numbers 4 by 12 inches indicating the street address shall be allowed for each dwelling unit without a permit.
2. One nonilluminated sign not exceeding eight (8) square feet in area shall be allowed on premises only to identify a home business and requires a permit and review by the Historic Preservation/Design Review Board. A two-sided sign is one sign.
3. No sign shall extend above the eaves line of a building or extend higher than ten (10) feet above the ground directly below it.
4. Temporary signs shall be permitted in the residential zones without a permit, subject to the following provisions:
    a. The sum area of all temporary signs does not exceed five (5) square feet in size.
    b. If the temporary sign pertained to an event (such as an open house or garage sale), the sign shall be removed within three (3) days of the completion of the event or activity that is being advertised.
    c. Signs shall maintain a minimum setback from the right of way of ten (10) feet, unless there is a primary structure on the lot located closer to the right of way than ten (10) feet, in which case the sign may be placed at the same setback as the primary structure.
    d. The maximum height of a temporary sign is four (4) feet.
    e. Signs shall not be illuminated.

[Ord. No. 457; Ord. No. 472; Ord. No. 478]

H. REGULATIONS APPLICABLE TO SIGNS IN COMMERCIAL AND INDUSTRIAL ZONES

1. No more than two (2) permanent signs are permitted for any one business except that a business having frontage on and physical access from two (2) or more streets will be allowed a total of three (3) signs.
2. The maximum area of all permanent signs shall not exceed 32 square feet.
3. The area of any single wall, projecting, freestanding or canopy sign shall not exceed 16 square feet.
4. No sign shall extend above the roof of the building to which it is attached.
5. The bottom of any projecting sign shall be no lower than 8 feet above the ground directly below it.
6. No part of any projecting or freestanding sign may project over any roadway.
7. One (1) set of address numbers not exceeding 4 4 by 12 inches in total area shall be allowed in addition to normal sign allowances.
8. Temporary signs, which are promotional in nature and intended to advertise a specific event, activity, or business, are allowed in addition to other signs. Examples of temporary signs include, but are not limited to banner signs. Temporary signs must meet all restrictions for signs in this section in addition to the following:
    a. The sum area of all temporary signs shall not exceed sixteen (16) square feet.
    b. A maximum of one (1) temporary sign may be placed on the property.
    c. No business may display a temporary sign for more than thirty (30) consecutive days twice per calendar year.
    d. If the temporary sign pertained to an event (such as an open house or garage sale), the sign shall be removed within three (3) days of the completion of the event or activity which is being advertised.
    e. Temporary signs shall maintain a minimum setback from the right of way of three (3) feet, unless there is a primary structure on the lot which is located closer to the right of way than three (3) feet, in which case the sign may be placed at the same setback as the primary structure.
    f. Temporary signs require administrative approval from the zoning administrator. Applications shall be submitted on a form prepared by the zoning administrator and shall demonstrate compliance with the standards of this section.
    g. Application for a temporary sign shall include payment of a nonrefundable, one-time filing fee in an amount established by a schedule adopted by resolution of the Council and filed in the offices of the town clerk. Payment of the filing fee shall be waived when the applicant is an agent of the town, county, state, or federal government.
    h. Temporary signs shall not be illuminated.
9. A-frame signs are allowed without a permit provided they meet the following requirements:
    a. They do not exceed four (4) square feet in size.
    b. They do not exceed four (4) feet in height.
    c. They are located entirely on private property owned by the business that they are advertising.
    d. They are not left outside during non-business hours.

10. Changeable-copy signs are allowed without a permit provided they do not exceed four (4) square feet in size and are attached to the façade of a building. A maximum of one sign per business is allowed.
11. Directional signs are permitted in addition to normal sign allowances. No more than two (2) directional signs are allowed with a maximum total area of eight8 square feet. Directional signs do not require a permit.
12. Service signs offering information on incidental services or recommendations, e.g., VISA, MasterCard, WiFi, etc., are permitted in addition to normal sign allowances provided:
    e. They conform to all provisions contained in this section.
    f. They are inside a window.
    g. There is no more than one (1) sign per incidental service per public entrance to the business.
    h. Each sign does not exceed 16 square inches in area.

[Ord. No. 457; Ord. No. 472; Ord. No. 478]

I. PROHIBITED SIGNS

1. Abandoned signs
2. Billboards
3. Digital or electronic signs with changeable copy
4. Flying banners
5. Flashing or blinking signs
6. Gas-generated signs
7. Inflatable and balloon signs
8. Mannequins/skeletons/statues displaying, wearing, or holding any advertising content such as flyers, business cards, or other promotional materials.
9. Moving and rotating signs – including rotating barber poles
10. Off-premise signs in the commercial or industrial zoning districts
11. Signs attached to or painted on trees, rocks or other natural features
12. Signs emitting any sound designed to attract attention
13. Signs in the clear vision triangle
14. Signs in the right-of-way
15. Signs blocking pedestrian pathways, stairs, or handrails
16. Signs painted on fences
17. Sign walkers
18. Signs with visible bulbs or luminous paints

[Ord. No. 472; Ord. No. 478]

SECTION 510. PARKING AND LOADING REQUIREMENTS

A. PURPOSE

The purpose of this section is to alleviate or prevent congestion of the public streets, and to promote the safety and welfare of the public by establishing minimum requirements for the off-street parking of motor vehicles in accordance with the use to which the property is put, It is the further purpose of this section to place upon the property owner the primary responsibility for relieving public streets of the burden of on-street parking.

B. APPLICATION

The provisions of this section are applicable to all zone districts of this Ordinance.

C. GENERAL REGULATIONS

1. A parking space shall mean an area of not less than one hundred sixty (160) square feet with a minimum width of eight (8) feet and a minimum depth of twenty (20) feet, which is specifically designated for and used for the parking of automobiles and light trucks.
2. An applicant for a new building permit must submit plans showing the off-street parking required by this subsection. These plans must show location, arrangement, and dimensions of the off-street parking, turning spaces, drives, aisles, and ingress and egress, and must be approved by the Zoning Administrator in accordance with the provisions of Section 303.
3. Whenever a permit has been issued in compliance with the requirements of this section, subsequent use of the structure, or use of land, is conditioned upon the unqualified availability of off-street parking as shown in the plans submitted in support of receiving the permit.
4. A base number of parking spaces shall be established for an existing building's designated use at the time of the passage of this Ordinance. A building's subsequent change of use that would normally decrease the number of off-street parking spaces shall not reduce the established base number of parking spaces. A change of use that would decrease the parking spaces would be able to change back to a higher use without penalty of losing spaces for five (5) years. Any subsequent change of use that requires an increase of off street parking spaces beyond the established base number of parking spaces shall be in accordance with the schedules set forth in Section 510.D.
5. It is unlawful to reduce the amount of existing parking below the minimum required by this section without first supplying other spaces as are required.
6. In the event of mixed uses, the total requirement for off-street parking spaces is the sum of the requirements of the various uses computed separately.
7. All off-street parking shall have access to/from a public street.
8. In calculating the total number of required off-street parking spaces, fractional amounts over fifty (50) percent shall be regarded as the next highest number.
9. A minimum of one (1) space is required for any use.

D. DESIGN AND LOCATION OF PARKING SPACES

1. Residential Uses:
    a. Required off-street parking shall be located on the same lot or parcel as the use it is intended to serve, unless parking on a property within 500 feet that shares the same zoning designation as the subject property is available to the property owner. Those spaces may count toward the required parking. As part of the application, the property owner shall provide satisfactory assurance that the separate lot or parcel is permanently committed to parking use by deed restriction or recorded easement.
    b. Off-street parking spaces, driveways, and access ways shall be properly graded to prevent impoundment of surface water.

2. Non-residential Uses:

   a. Required off-street parking shall be located within the C.1. Zone. Whenever the use of a separate lot or parcel is proposed for fulfillment of minimum parking requirements, the owner shall submit, as part of their application, satisfactory assurance that the separate lot or parcel is permanently committed to parking use by deed restriction or recorded easement.

   b. Off-street parking spaces, driveways, and access ways shall be fully improved with an all-weather, dust-free surface, and properly drained to prevent impoundment of surface water.

   c. Off-street parking spaces shall be situated in a manner which will not result in automobiles backing onto a public street.

   d. A variance from the requirement of Section D.2.c. may be granted by the Board of Adjustment if compliance with this section is geographically impossible. If such a variance is granted, it shall be required as a condition of the variance that traffic signs shall be placed by the Town, after approval by the Historic Preservation/Design Review Board, and paid for by the applicant, alerting crossing traffic of automobiles backing onto public streets in all areas except those abutting the State highway.

E. SCHEDULE OF REQUIRED OFF-STREET PARKING SPACES

1. Off-street parking spaces shall be provided for each specified use in accordance with the following schedule. “Usable area” as used herein shall mean the area capable of being devoted to the specified use (does not include such spaces as kitchens, restrooms, hallways, etc.). If the use of any structure is changed, off-street parking shall be required and provided under the new use.

	USE	SPACE REQUIRED
a.	Bowling alley	4 spaces per alley or lane
b.	Church or other place of worship	1 space per 6 seats (each 30 inches of bench space is considered 1 seat), plus 1 space per 50 sq. ft. of usable area not used for seating
c.	Day care center	2 spaces plus 1 space per 500 sq. ft. of usable floor area
d.	Home occupation	No additional space
e.	Hospital or nursing home	1 space per 2 beds
f.	Hotel	1 space per rental unit
g.	Manufacturing, industry	1 space per 500 sq. ft. of wholesaling usable area
h.	Medical, dental office, or clinic	3 spaces per doctor
i.	Offices	1 space per 300 sq. ft. of usable area
j.	Public assembly place such as auditorium meeting hall or theater	1 space per 6 seats (each 30 inches of bench space is considered 1 seat), plus. 1 space per 100 sq. ft. of usable area
k.	Residential (except apartment)	2 spaces per dwelling unit
l.	Residential (apartment)	1 ½ spaces per dwelling unit
m.	Restaurant or bar	1 space per 6 seats (each 30 inches of bench space is considered 1 seat) plus 1 space per 100 sq. ft. of usable area
n.	Retail and service uses	1 space per 300 sq. ft. of usable area
o.	School (elementary and middle)	1 space per employee
p.	School (other than elementary and middle)	1 space per 10 seats in main auditorium or 3 spaces per classroom whichever is greater
q.	Service station	2 spaces, plus 1 space per service bay
r.	Warehouse	1 space per 2,000 sq. ft. of usable area
s.	Studio	1 space per 500 sq. ft. of usable area

t.	Spirituous Liquor Tasting Facility	1 space per 300 sq. ft. of usable area

2. Requirements for a specific use not listed in this section shall be determined by the Planning and Zoning Commission based on the requirements of the most similar use listed.

[Ord. No. 324; Ord. No. 408; Ord. No. 465]

F. ALTERNATIVE OFF-STREET PARKING STANDARDS

1. Because of the unique topography and history of development in the Town of Jerome, the ability to meet off-street parking standards can often be challenging. Providing greater flexibility to meet off-street parking requirements through shared parking agreements, existing public parking and shuttle services, and a parking justification analysis that establishes the minimum parking need for a use will create more opportunities for the preservation, rehabilitation, restoration, and reconstruction of properties throughout the Town of Jerome. The following standards are provided as an alternative and may be used in lieu of the standards in Section 510.D.
2. Neighborhood Meeting Required Near Existing Residential Development
    a. Applicants within 300 feet of an existing residence who opt-in to these alternative parking standards shall hold a neighborhood meeting prior to submittal of the application in accordance with Section 306 of this Ordinance.
3. Parking Requirements
    a. At least two off-street spaces shall be provided for residential uses except apartments.
    b. For all other uses, a parking justification analysis shall be provided.
        1) The Parking Justification Analysis shall include the following minimum contents:
            i. An analysis of the parking demand for existing and proposed onsite buildings and uses, including hours of operation and peak use time and demand for each proposed building or use.
            ii. The number and location of proposed onsite parking spaces, including ADA-accessible spaces.
            iii. The data source used to establish the number of proposed onsite parking spaces.
            iv. The existing and future anticipated available parking within and in the vicinity of the proposed development.
            v. If parking demand is proposed to be addressed offsite, reference to or copies of any shared parking agreement or other evidence of a right to park in that location.
            vi. Off-street loading requirements and impacts on surrounding uses and properties.
            vii. A summary of the neighborhood meeting, including topics discussed, concerns raised by neighboring property owners, and the applicant's response.
            viii. Any other information deemed appropriate by the Town Engineer, including, without limitation, a traffic study.
        2) Parking Justification Analysis Procedure
            i. The parking justification analysis shall be submitted to the Zoning Administrator in conjunction with a site plan. The Zoning Administrator shall circulate the parking justification analysis to the Town Engineer for comment. The Zoning Administrator and/or Town Engineer shall review the application and provide comments on specific deficiencies of the application. An applicant may revise the parking justification analysis until it is deemed satisfactory by the Zoning Administrator and Town Engineer.

ii. Within fourteen (14) days of receipt of a parking justification application, the Zoning Administrator shall determine the completeness of the application. If the application is incomplete, the Zoning Administrator shall provide the applicant with a comprehensive list of the specific deficiencies in a written notice. A resubmittal of an incomplete application shall be reviewed for completeness within seven (7) days. If the application is deemed to be complete, the Zoning Administrator shall forward the parking justification analysis to the Planning and Zoning Commission, which shall hear the application for parking justification.

iii. The Zoning Administrator shall then choose a reasonable time for the hearing, and shall give notice to interested parties and to the public by publication of a notice in a newspaper of general circulation in the area, and by posting one notice of the hearing on the property requesting the parking modification, not less than fifteen (15) days prior to the hearing. The notice shall set forth the time and place of the hearing, including a general explanation of the matter to be considered.

iv. The Commission shall act by recommending approval, denial, or continuing the application and hearing to a time and place certain.

v. The Council shall, within forty-five (45) days after the Commission action on a parking justification application, act on the recommendation of the Planning and Zoning Commission by either affirming, denying, or modifying the recommendation of the Planning and Zoning Commission. The Town Council may make a decision based on its own findings.

vi. The Council may designate such conditions in connection with the proposed alternative parking request as it deems necessary to secure the intent and purpose of this Ordinance and may require such guarantees and evidence that such conditions are being, or will be, complied with.

vii. The Council's decision shall be final and shall become effective immediately. Notice of the decision shall be mailed to the applicant at the address shown in the application.

viii. Failure of the applicant to comply with the conditions and safeguards that are a part of the terms under which an alternative parking request is granted shall be deemed a violation of this Ordinance and punishable under Section 110.

3) Standards for Parking Justification Analysis Consideration

i. The application for a parking justification analysis may be denied if it fails to address any adverse impacts on surrounding properties or the public.

ii. Parking demand may be based on standard modeling practices and may consider, as applicable, hours of operation, peak use periods, occupancy or capacity, employee and visitor demand, shared parking opportunities, availability of public parking and the Town shuttle, walkability, seasonality and tourism patterns, and other relevant site-specific or market-based factors.

SECTION 511. HISTORIC OVERLAY DISTRICT

[CODIFIER'S NOTE: This subsection was rewritten with Ordinance 497 and moved to new Section 409.]

SECTION 512. LANDSCAPE REQUIREMENTS

Exceptions to the standards of this section may be granted by the Town Council when it is determined that landscaping may interfere with defensible space techniques for wildfires or that the circumstances of a property make it infeasible to comply without significant expense to the property owner. Any individual may apply for a waiver to the standards of this section. Any appeals of decisions made by the Mayor and Council or Zoning Administrator to the standards of this section shall be heard by the Board of Adjustment.

A. NATIVE PLANT & CULTURAL LANDSCAPE INVENTORY PLANS

This section is intended to protect and celebrate the unique local environment within the Town of Jerome and the greater Verde Valley.

1. Purpose:

   Preserve the Town of Jerome's sense of place by ensuring development reflects the character of the local environment, promotes water conservation through the use and retention of native plant species adapted to local conditions, protects vegetation that provides habitat for native wildlife, and conserves designed landscapes, historically significant plants, and spatial relationships that contribute to the Town's cultural and historic character.

   Development shall incorporate into Landscape Plans protected native plant species and cultural landscape features existing on a project site prior to construction, in quantities not less than those identified within the limits of disturbance. A qualified Plant Professional (defined below in *Section 512.A.6: Professional Expertise*) shall inventory all protected plants, including individual specimens and contributing landscape features such as gardens and plazas, and shall determine and document the minimum number of protected plants to be included in the Landscape Plans. Plant salvage is encouraged but not required; salvaged material and/or nursery stock may be used to meet these requirements. Cultural and designed landscapes that meet the eligibility requirements of the National Register of Historic Places but are not listed shall be included in the inventory.

2. Applicability:

   a. All new development requiring a Site Plan or Preliminary Plat review.

3. Exceptions:

   a. The site is for one single-family dwelling unit or a single duplex, triplex, or quadplex.

   b. The site does not contain any:

      1) Plants listed as Endangered or Threatened under the Federal Endangered Species Act (ESA);

      2) Plants listed on the Protected Native Plant List curated and maintained by the Town of Jerome;

      3) Features or plants that contribute to the cultural landscape of the Town of Jerome; or

      4) Other protected plants or features listed in *Section 512.A.8: Protected Plants and Landscapes*.

   c. Existing constructed landscape does not require inventory unless it has been deemed historic and is listed on a local, State, or Federal registry.

   d. Sites that have been completely disturbed, or the proposed development area of a site has been completely disturbed, and no cultural landscapes exist.

   e. If a Native Plant Exception is approved by the Town Council.

1) The Town Council may approve an exception to the requirements of this section upon recommendation of the Planning and Zoning Commission if the applicant demonstrates that:

i. Strict compliance with this Section is impractical due to site conditions, prior disturbance, public safety concerns, or the limited presence and/or poor condition of protected plants or cultural landscape features on the site;

ii. The requested exception is the minimum necessary to address the circumstances supporting the request; and

iii. The exception will not result in the unnecessary removal of protected plants, cultural landscape features, or historic resources.

iv. If the requested relief may be granted through the variance process established by this Ordinance, the applicant shall pursue a variance. A Native Plant Exception shall not be scheduled for consideration by the Planning and Zoning Commission or Town Council unless the Zoning Administrator determines that the requested relief is not eligible for a variance.

v. A Native Plant Exception shall be processed in accordance with the procedures outlined in Section 303.1.

4. Submittal Requirements:

a. A Native Plant & Cultural Landscape Inventory Plan is required in conjunction with a project's Landscape Plans and must be approved through the Site Plan or Preliminary Plat review process.

b. The Native Plant & Cultural Landscape Inventory Plan shall be in 24x36-inch format unless information can be shown clearly on a smaller sheet size.

c. The Native Plant & Cultural Landscape Inventory Plan shall feature the content requirements as provided by the Zoning Administrator in the Landscape Guide for the Town of Jerome.

5. Plan Approval Prior to Site Modifications:

a. No grubbing, grading, construction, or plant salvage may take place on the project site until approval of the required Native Plant & Cultural Landscape Inventory Plan. No grading permits shall be issued prior to submittal and approval of the Native Plant & Cultural Landscape Inventory Plan.

6. Professional Expertise

a. Native plant inventory must be performed by a Plant Professional who can identify plant species in the field. Unless otherwise directed or approved by the Zoning Administrator, plant professionals include:

1) Arborist (certified by the International Society of Arboriculture)

2) Landscape Architect

3) Horticulturist, Biologist, or Botanist with a minimum B.A. or B.S. in an appropriate environmental resource field

7. Plant Inventory Standards

a. Plant Professional shall conduct a plant survey and tag all protected species within the project's grading limits.

b. All protected plants shall be tagged with an embossed metal tag, or other approved equivalent, bearing an inventory number that corresponds to the inventory table.

8. Protected Plants and Landscapes

    a. Edible/ornamental trees and plants at the discretion of the Zoning Administrator

    b. Individual plants within Cultural Landscapes that have been deemed historic and are listed on a local, State, or Federal registry.

    c. Endangered or Threatened plants listed under the Federal Endangered Species Act.

    d. Other plants as listed on the Town of Jerome's Protected Native Plant List.

B. LANDSCAPE PACKAGES

This section is intended to establish minimum standards for the installation and maintenance of plant material appropriate for the region, including irrigation for constructed landscapes.

1. Purpose:

    Reinforce the Town of Jerome's sense of place by ensuring constructed landscapes reflect the character of the local environment and respond to the semi-arid high desert climate, while establishing minimum standards for plant materials and irrigation.

    Constructed landscapes shall incorporate native, near-native, and drought-tolerant plant species to reduce water demand and reflect the surrounding environment. Design shall minimize heat gain through canopy trees, reduce erosion and runoff, and control dust from site disturbance.

    Landscape Packages shall incorporate passive rainwater harvesting and efficient irrigation, including smart technologies, to reduce potable water use. A Registered Landscape Architect, or similar design professional, shall prepare a Landscape Package demonstrating compliance with this section, including a Planting Plan, Irrigation Plan, Rainwater Harvesting Plan, and associated construction details.

2. Applicability:

    a. All new development that is proposed to disturb existing vegetation on a property.

    b. Expansion of existing development that removes existing vegetation on a site

        1) If the expansion removes less than 50% of the existing vegetation on a site, then the standards of this section only apply to the proposed expansion area.

        2) If the expansion area removes more than 50% of the existing vegetation on a site, then the standards of this section apply to the entire site.

3. Exceptions:

    a. Single-Family dwelling units or a single duplex, triplex, or quadplex.

    b. An applicant may apply for a Landscape Exception to waive the standards of this section. The Landscape Exception shall be approved by the Town Council. To approve a Landscape Exception, the Town Council shall determine that the required landscape standard would provide limited community benefit, create security or public safety concerns, adversely affect the historic character of a building or place, or that existing site features provide an equivalent level of buffering or screening. A Landscape Exception shall follow the process outlined in Section 303.1. If the requested relief may be granted through the variance process established by this Ordinance, the applicant shall pursue a variance. A Landscape Exception shall not be scheduled for consideration by the Planning and Zoning Commission or Town Council unless the Zoning Administrator determines that the requested relief is not eligible for a variance.

4. Submittal Requirements

    a. A Landscape Package must be submitted for approval with the Site Plan or Preliminary Plat at the time of the Site Plan or Preliminary Plat review process.

b. The Landscape Package shall be in 24x36-inch format unless information can be shown clearly on a smaller sheet size.

c. The Landscape Package shall feature the content requirements as provided by the Zoning Administrator in the Landscape Guide for the Town of Jerome and within Section 512 of this Ordinance.

5. Plan Approval Prior to Site Modifications:

a. No grubbing, grading, construction, or plant salvage may take place on the project site until approval of the required Landscape Package. No grading permits shall be issued prior to submittal and approval of the Landscape Package.

6. Professional Expertise

a. Landscape Packages must be prepared and sealed by a Landscape Architect, registered in the State of Arizona, or other design professional, such as an architect or engineer.

7. Planting Standards

a. Plant Material: All plant material used for landscaping must be selected from the Arizona Department of Water Resources (ADWR) Verde Valley Low Water Use Drought Tolerant Plant List or other plants as determined by the Town Council through a landscape exception.

1) Exceptions

i. Oasis Areas and/or Natural Turf Area may be approved by the Town Council as a landscape exception.

1. Oasis areas may feature plants not listed in the Arizona Department of Water Resources Low Water Use and Drought Tolerant Plant List.

2. Oasis areas must be limited in scope and shall only include areas with outdoor seating/furnishings for gathering/assembly. Oasis areas shall not exceed 10% of the total project area.

3. Oasis areas include: planting areas (beds or planters) for annual flowers, protected courtyards, vegetable gardens, etc.

4. Natural Turf areas may feature grasses not listed in the ADWR Verde Valley Low Water Use and Drought Tolerant Plant List. Common Bermuda Grass is prohibited. Hybrid Bermuda Grass (sterile hybrid varieties) is permitted.

5. Natural Turf Area shall be limited to accessible park space for residential projects only. Natural turf shall not be planted for aesthetic purposes. Natural turf area may exceed 3% of the total project area when used for active recreation.

ii. The Town Council may approve plants not on the Verde Valley Low Water Use Drought Tolerant Plant List if it is determined that the use of an unlisted plant preserves or furthers the historic character of the Town of Jerome.

b. Perimeter Landscape Borders: Perimeter Landscape Borders are intended to create a natural transition between dissimilar land use intensities to enhance the overall aesthetic of the community and promote compatibility between uses.

1) Perimeter Landscape Border shall feature:

i. A minimum width or quantity as determined by the Zoning Administrator;

ii. One tree every 33 linear feet (minimum) unless site constraints prohibit the placement of trees;

iii. Understory plants;

iv. Screen (e.g., decorative masonry wall, opaque ornamental fence, or vegetative hedge) at the back of the border.

2) Perimeter Landscape Border shall be located entirely on project property, unless use of right-of-way for landscape improvement is approved by the Town Engineer (or ADOT as necessary).

3) Exceptions:

i. No perimeter landscape border shall be required along boundaries where zero lot line development is proposed.

ii. No perimeter landscape border shall be required along boundaries where the proposed project use intensity matches the existing adjacent use intensity.

iii. No perimeter landscape border shall be required along boundaries where the project has preserved natural open space (10' width minimum).

iv. A Landscape Exception approved by the Town Council.

c. Parking Lot Landscape: Parking lots shall feature canopy trees to shade hardscape surfaces and parked vehicles. Generally, canopy trees should be planted along the edges of a parking lot, but site constraints may make this unfeasible. The Zoning Administrator shall have the authority to designate the location and quantity of parking lot trees.

d. Amenity Landscape: Amenity Landscape includes building foundation plantings, building entry plantings, plazas, courtyards, streetscapes, parks, and recreational open space, in addition to general landscaped common area.

1) Amenity Landscape shall feature:

i. Residential Projects: Minimum of one tree and three understory plants (i.e., shrubs, cacti, succulents, ornamental grasses, vegetative groundcovers) per residential unit or residential lot. Trees may be placed within front yards, within parks, along streetscapes, or within general common area. The Zoning Administrator may waive any portion of this standard for existing residential development being renovated, rehabilitated, or reconstructed.

1. Multifamily – New Construction: Trees shall be placed around buildings, along walkways, within plazas/courtyards, or within recreational areas.

2. Multifamily – Existing/Expansions: Per the direction of the Zoning Administrator and to the greatest extent possible, trees should be placed around buildings, along walkways, within plazas/courtyards, or within recreational areas.

ii. Streetscapes: The design of streetscapes has been influenced by the topography of the area and helps contribute to the unique character that defines the Town of Jerome. The following streetscape standards are meant to apply only to new streets and extensions of existing streets into previously undeveloped areas.

1. Proposed streetscapes shall feature a minimum of one tree and five understory plants (i.e., shrubs, cacti, succulents, ornamental grasses, vegetative groundcovers) for every 50 linear feet, on both sides of the road within 20' of the edge of pavement.

a. Exceptions:

i. Local residential roads that provide access to the front of residential lots. Front yard landscape may count toward streetscape requirements when trees and understory are located within 20' of the edge of pavement.

ii. Roadways adjacent to natural open space (set aside in perpetuity), or agricultural uses.

iii. A Landscape Exception approved by the Town Council.

iii. Minimum Parks and Recreational Open Space (e.g., ball fields, sports courts, playgrounds, dog parks, fitness spaces, trails, pools, picnic spaces, etc.) Requirements

1. Residential Subdivision: 200 SF per lot, if subdivision is more than four (4) lots.

2.Multifamily: 200 SF per unit, if multifamily development is more than 25 units. Indoor recreation or fitness centers may count toward the total Parks and Recreational Open Space.

3. Parks and Recreational Open Space shall be designed in a contiguous manner to the extent feasible, in order to provide a maximum recreational value (e.g., a single large park is preferable to four small parks within a large subdivision).

4. An in-lieu fee may be paid to reduce the required Parks and Recreational Open Space square footage by 50% with the approval of the Zoning Administrator. Standard in-lieu fee = $1,500 per unit or lot.

e. Plant Sizes at Installation:

1) Trees: 15 Gallon minimum

2) Shrubs/Cacti: 5 Gallon minimum

3) Ornamental Grasses: 1 Gallon minimum

4) Vegetative Groundcovers: 1 Gallon minimum

5) Site Salvaged Plant Material: any size

f. Revegetation Standards

1) All areas of a project site that are disturbed during the construction process but not improved with structures, parking areas, or landscape shall be revegetated with native plants or native seed mixes.

i. Native Plant species shall be selected by the Landscape Architect and identified in the planting plans, along with Pure Live Seed (PLS) seeding rate lb. per acre.

ii. Native Seed Mixes shall be applied as a hydroseed slurry with tackifier, fertilizer, and mulch as necessary (according to soil conditions) to ensure plant establishment.

iii. Revegetation shall be designed and installed to achieve successful establishment consistent with site soils, slope, and climatic conditions.

2) Exceptions:

i. Revegetation shall not be required when the lack of vegetation is a defining element contributing to the character of a historic cultural landscape.

g. Irrigation Standards

1) All landscaped common area (unless noted as xeric – without the need for irrigation) shall feature a water-conserving irrigation system for all new plantings.

2) System Specifications

i. Meter: Water meter shall be a dedicated irrigation meter.

ii. Reduced Pressure Backflow Preventer (RPBP): A reduced-pressure backflow preventer shall be installed to prevent contaminated water from mixing with clean municipal water supplies.

iii. All landscape areas shall feature permanent point-source drip irrigation systems. Drip systems shall irrigate with low-flow emitters. Spray irrigation systems may only be used for turf applications unless otherwise approved by the Zoning Administrator. Temporary spray systems may be used to establish hydroseeded areas.

iv. Permanent irrigation systems shall be fitted with irrigation controllers/timers (hardwired, battery-operated, or solar) to operate zone valves that respond to plant water needs throughout each season of the year.

v. Irrigation controllers shall accommodate contemporary smart technologies. All systems shall include a minimum of: one (1) flow sensor and one (1) weather-based sensor/application (i.e., rain sensors, tensionmeters, soil moisture gauges, weather stations, automatic seasonal adjustment applications, internet-connected weather data applications, etc.).

vi. Pipes carrying water under constant pressure must be buried to a depth of 24 inches. Those that are under intermittent pressure must be buried to a minimum depth of 18 inches, as necessary to prevent freezing.

vii. All non-pressure irrigation piping shall be buried a minimum of 12 inches, with greater depth required where necessary to prevent freezing or damage.

viii. Pipes under paved surfaces must be contained within pipe sleeves.

ix. All irrigation equipment shall be protected (boxes, cages, cabinets, etc.) to ensure that irrigation equipment is not exposed to adverse weather conditions (freezing, solar degradation, etc.) or vandalism.

3) System Design

i. Irrigation zones shall consider plant irrigation needs throughout seasons, plant establishment periods, and maturity.

1. It is recommended that trees and understory be kept on separate irrigation zones.

2. It is recommended that amenity area landscape and landscape borders be kept on separate irrigation zones.

ii. Irrigation zones that feature native plants (or drought-tolerant plants with similar irrigation demands) may be turned off after plant establishment periods, as long as plant growth and health do not decline.

4) Maintenance

i. Irrigation systems must be maintained and replaced as necessary to continue to conserve water. Detection and repair of leaky or broken pipes, valves, and fittings, as well as malfunctioning and/or misaligned heads and emitters must be a part of a regular maintenance program for the site.

h. Rainwater Harvesting Standards

1) All landscaped areas shall be depressed between 4” and 9” to collect rainwater.

i. Exceptions

1. Areas identified by the project engineer or Town Engineer that cannot accommodate rainwater harvesting (for purposes of safety or functionality),

2. Areas with a cross slope greater than 4%,

3. Within 10’ of a building foundation,

4. Within 10’ of a utility,

5. Within a utility or access easement.

6. Landscape areas that feature plants with limited water tolerance (e.g., Opuntia spp., Cylindropuntia spp., Yucca baccata, Agave parryi) shall be designed to minimize supplemental irrigation. Basins may be terraced to accommodate plants with varying water needs. Plants with high water needs shall be located at basin bottoms. Plants with moderate water needs shall be located at basin terraces/side slopes. Plants with limited water needs shall be located at the top of basins.

2) Rainwater Basin Design

i. Basin slopes shall not exceed 3:1.

ii. Basin depths shall not exceed 9".

iii. Basin floor soils shall be loosened to a depth of at least 12".

iv. Basin sides and bottoms shall be covered in 1"+ screened rock or bark mulch (no "minus" material is permitted) to a depth of 2". Alternatively, basins may be seeded with native seed mix.

v. Scuppers, curb cuts, and rooftop downspouts shall correspond to the location of rainwater harvesting basins

vi. Basins shall receive water from adjacent hardscape surfaces to the greatest extent feasible. Some basins, however, may only collect rainwater where it falls.

vii. Berms, gabions, check dams, weirs, and other drainage structures are all recommended to direct, disperse, and slow the movement of rainwater in landscape areas. Rainwater harvesting structures shall be depicted in both the Landscape Plans and Drainage Plans.

viii. Maximum reveal at the edge of public sidewalks and pedestrian circulation paths should be two inches or less to minimize the risk of injury to pedestrians. A minimum 12" wide shoulder with a maximum 2% cross slope away from public sidewalks or pedestrian paths is required.

ARTICLE VI: EMERGENCY CLAUSE

WHEREAS, the immediate operation of the provisions of this Ordinance is necessary for the preservation of the public health, safety and welfare, and to carry out the expressed intent and purposes of said Ordinance, an EMERGENCY is hereby declared to exist, and this Ordinance shall be in full force and effect from and after the date of its passage by the Council.

PASSED AND ADOPTED by the Council of the Town of Jerome this ____ day of _____, 19__.

ARTICLE VII: SUBDIVISION REGULATIONS

SECTION 701. TITLE, PURPOSE, AND ADMINISTRATION

A. PREAMBLE

The purpose of these regulations is to provide for the health, safety, general welfare, and harmonious development of the Town of Jerome and environs, in accordance with the principles, goals, and objectives of the adopted General Plan and to ensure that: all new development will strengthen the Town's economic base and valuation, future development will preserve and enhance the Town's natural scenic attributes, and all new development will maintain and encourage a pleasing environment and be in harmony with the special character and historical quality of Jerome. The purpose of these regulations is also to secure adequate provisions for streets and traffic circulation, water supply and distribution, sanitary sewerage, drainage and flood control, and in the development of lots and properties having optimum utility and livability. These regulations shall also facilitate the provision of lands for recreation and other public uses; promote the conveyance of land by accurate legal description; and establish procedures that will provide a basis of mutual understanding and equitable relationships between public and private interests.

B. AUTHORITY

The Jerome Subdivision Regulations are authorized by Title Nine, Chapter 4, Article 6, section 9-471 to 9-479 and Chapter 6, Article 1, Section 9-601 of the Arizona Revised Statutes, as amended, and are hereby declared to be in accordance with all provisions of these Statutes.

C. APPLICATION OF REGULATION

1. Final Plat Approval: No final plat shall be recorded or offered for record, nor shall any land be offered for sale with reference to such plat, until said plat has been recommended for approval to the Town Council by the Planning and Zoning Commission and approved by the Town Council. The Planning and Zoning Commission shall ascertain, before recommending to the Council, that said plat has satisfied all requirements of these regulations.

2. Plans, Plats and Replats: All plans of streets, highways, alleys, or other portions of the same intended to be dedicated to a public use or to the use of purchasers or owners of lots fronting thereon or adjacent thereto, and all plans, plats, and replats of land laid out in a subdivision or building lots, shall be submitted to the Planning and Zoning Commission for approval. The Planning and Zoning Commission shall ascertain, before approving it, that said plan, plat, plot, or replat has satisfied all of the requirements of these regulations.

D. JURISDICTION

These regulations shall govern the subdivision of all land that lies within the corporate limits of the Town of Jerome.

E. ADMINISTRATION

The Jerome Planning and Zoning Commission is hereby authorized to receive, process, and otherwise act upon preliminary and final subdivision plats in accordance with these regulations. The Town Zoning Administrator, the Town Engineer, and the County Health Department are hereby designated as Planning and Zoning Advisories to the Commission and the Town Council and charged with the duty of investigating and reporting upon matters referred to them in accordance with these regulations.

No Final plat of a subdivision shall be approved by the Planning and Zoning Commission and accepted by the Town Council unless it conforms to the provisions of these regulations and to the provisions of the Zoning Ordinance for Jerome, Arizona.

F. FILING FEE SCHEDULE

The submission of a tentative or final plat, abandonment, amended plat, recording fee deed restrictions, exceptions, improvement drawing, etc., shall include payment submitted to the Town

Zoning Administrator of a filing fee for the County Recorder. Fees shall be set by Resolution of the Town Council.

[Ord. 473, 8/10/2021]

NOTICE: The Final plat fees shall not be applied to subdivisions outside the Town of Jerome corporate limits.

The Town of Jerome may negotiate with the subdivider to acquire land for present or future municipal purposes in accordance with the laws of the State of Arizona.

SECTION 702. GENERAL REQUIREMENTS AND PROCEDURES FOR SUBMISSION OF PLATS

A. APPROVAL OF SUBDIVISION REQUIRED

1. No person proposing a subdivision or owning unapproved lots or parcels within Jerome shall subdivide or file a record of survey, map or plat for record, or sell any part of said subdivision, or unapproved lots or parcels, or proceed with any grading, construction, or other work on said lot until a preliminary and final plat of a subdivision have been approved in accordance with this Section.
2. Duties of Subdivider: While a subdivision is in the preliminary planning stage, the subdivider shall consult the Zoning Administrator to determine conformity with the General Plan, and compliance with the provisions of *Article VII Subdivision Regulations*, any other applicable sections of the Zoning Ordinance of the Town of Jerome, and requirements for the design and installation of public improvements as required by the Town of Jerome.
3. The following factors should be considered in the preliminary stage of planning a subdivision:
    a. Need for additional residential sites in the area.
    b. Type and quality of homes to be built.
    c. Lot sizes most adaptable to the use proposed.
    d. Areas to be reserved for business or industrial use.
    e. Special scenic locations or areas of historical importance which need to be reserved.
    f. School and/or park sites that will be required.
    g. Access features which may be desirable along arterial and collector streets.
    h. Areas subject to flooding.
    i. Suitability of land for urban development.
    j. Water, sanitary sewer, solid waste disposal, storm sewer, electric, and gas utility services to be provided.
    k. Fire and police protection
    l. Integration of the subdivision with existing and proposed development.
    m. Whether the site is appropriate for the proposed use.
    n. Legal or tax problems likely to be encountered.
4. Preliminary Plat and Engineering Drawings. The subdivider shall prepare a preliminary plat of the proposed subdivision and other exhibits as specified in Section 703.B.
5. Final Plat and Recording. The subdivider shall prepare a final plat as specified in Section 703.D, which shall conform substantially to the preliminary plat as approved, and if desired by the subdivider, it may constitute only that portion of the approved preliminary plat which is proposed to be recorded and developed at the time, provided, however, that such portions conform to all requirements of these regulations. The approved and executed copy will be recorded in the Yavapai County Recorder's office after full compliance with the regulations, and one copy will be filed in the Planning and Zoning Commission's office, and one with the Town Engineer.
6. Building Permits and Certificates of Occupancy:
    a. Building Permits. No Building shall be erected, or shall a building permit be issued for a building, unless the street giving access to the lot upon which such a building is proposed to be placed shall have been properly improved as required in Section 710.A.3.

b. Certificates of Occupancy. No certificate of occupancy shall be issued for any building unless all requirements of these regulations and any and all requirements of any other regulatory code, ordinance, or regulation have been met.

B. SKETCH PLAN AND MASTER PLAN REQUIREMENTS

1. It is strongly recommended that the subdivider review the initial proposal for the subdivision with the Zoning Administrator prior to preparing the required tentative plat, while plans for the proposed subdivision are still in preliminary form and other elements of the proposed development remain flexible. The purpose at this stage is to make available general advice on the purpose and effect of these regulations, the General Plan, zoning, and other Town planning, engineering, drainage, sewage, water systems, and similar standards, requirements, and plans. All applications requiring a pre-application meeting per Section 307 of this Ordinance shall provide a sketch plan with the form requesting a pre-application meeting. The sketch plan shall include:
   a. Property dimensions on all sides of proposed or existing lots
   b. North arrow and scale
   c. Proposed driveways and easements
   d. Adjacent street names
   e. Proposed disturbance area and grading limits
   f. Location and setbacks of all existing/proposed structures
   g. Square footage of existing/proposed structures
   h. Building height of existing/proposed structures
   i. Location of existing/proposed septic
   j. Adjacent properties zoning/use
2. The Zoning Administrator may require that the developer prepare and submit a Master Development Plan (MDP) where:
   a. The tract is sufficiently large to comprise an entire neighborhood;
   b. The tract proposed for platting is only a portion of a larger land holding of the developer;
   c. The tract is a part of a larger land area of which the development is complicated by unusual topography and land use.
3. The MDP shall be prepared to scale and accuracy commensurate with its purpose, and, in addition to the required elements of the sketch plan, shall include:
   a. General Street pattern of major arterial and collector streets.
   b. Indication of single-family and multi-family residential areas and indication of general lot size and number of lots per acre anticipated.
   c. General location and size of school sites, parks, or other public areas.
   d. Location of shopping centers and other non-residential proposed land uses, and indicating their proposed use.
   e. Methods proposed for sewage disposal, water supply, and storm drainage.
   f. An indication of the areas to be developed in accordance with a planned development schedule.
4. Approval: Upon acceptance of the general design approach by the Zoning Administrator, the MDP shall be submitted to the Planning and Zoning Commission for its consideration. If general

approval and notice to proceed with the platting process is given, notice to that effect shall be recorded in the minutes of the Planning and Zoning Commission meeting and a copy of said minutes transmitted to the subdivider and their engineer. If a development is to take place in several parts, the MDP should be submitted as supporting data for each part.

SECTION 703. SPECIFICATIONS FOR PLANS AND PLATS

A. PRELIMINARY PLAT AND ENGINEERING DRAWINGS:

1. Preliminary Plat to be Submitted: After the pre-application conference and general approval of the Sketch Plan and/or Master Development Plan, if required, the subdivider shall prepare a preliminary plat of the proposed subdivision and other exhibits as specified by this Ordinance. Copies of the preliminary plat and all required supplementary material, the number to be determined by the Zoning Administrator, shall be submitted to the Zoning Administrator, who shall determine the completeness of the application within fourteen (14) days of submission. An application that is deemed complete shall be circulated for departmental review. If the application is incomplete, the Zoning Administrator shall provide the applicant with written notice of the specific deficiencies in the application.
2. Departmental Review of Preliminary Plat: The Zoning Administrator shall refer copies of the preliminary plat to the following reviewing offices, who shall make known their recommendations in writing addressed to the Zoning Administrator.
    a. Town Engineer,
    b. County Highway Department (when plat abuts a county highway)
    c. County Health Department,
    d. Arizona Department of Transportation (ADOT) (when plat abuts a state highway)
    e. Fire Chief, and
    f. All interested utilities and agencies.

    These entities shall review the plat for matters within their jurisdiction and promptly report their recommendations to the Zoning Administrator, who shall check the plat for conformity to these regulations, add their own written comments and recommendations, and provide these comments to the applicant to be addressed in a resubmittal of the application until the Zoning Administrator determines that the substantive review of the application is complete.

    The subdivider's engineer may act as agent.
3. Planning and Zoning Commission Findings: After substantive review of the preliminary plat application has been completed, and the Zoning Administrator has forwarded the application to the Planning and Zoning Commission, the Commission shall hold a public hearing and express its approval, any conditions of approval, or its disapproval, and its reasons therefor.
4. The action of the Planning and Zoning Commission, including any conditions, shall be noted on two (2) copies of the preliminary plat. One (1) copy shall be returned to the subdivider, and the other shall be retained in the Planning and Zoning Commission's records.
5. Approval or conditional approval of the preliminary plat shall not constitute approval of the final plat. Rather it shall be deemed an expression of approval to the layout submitted on the preliminary plat as a guide to the preparation of the final plat. The final plat shall be submitted for approval by the Planning and Zoning Commission and the Town Council upon fulfillment of the requirements of these regulations and the conditions of the conditional preliminary plat approval, if any.
6. Preliminary Plat Requirements: Preliminary plat shall be submitted on one or more sheets not larger than thirty-six inches by forty-two inches (36" x 42") at a scale not greater than one inch equal to one hundred feet (100').

    All preliminary plats shall contain the following information:

a. Proposed name of subdivision and its location by section, township, and range; small-scale vicinity map showing relative location of the plat; reference by dimension and bearing to section corners; and subdivision boundaries clearly identified.

b. Name, address, and phone number of landowner (and subdivider, if not the same).

c. Name, address, and phone number of engineer, surveyor, landscape architect, or land planner preparing the plat, including registration number if registered.

d. Scale, north point, and date of preparation, including dates of any subsequent revisions.

e. Topography by contours relating to USGS survey datum or other datum approved in writing by the County Engineer, to be shown on the same map as the proposed subdivision layout. Location and elevation of the benchmark used should also be shown on the plat. Acceptable contour interval: grades up to five percent (5%), two feet (2'); five percent (5%) to 10 percent (10%) grades, five feet (5'); grades over ten percent (10%), ten feet (10').

f. Location by survey of streams, washes, canals, irrigation laterals, private ditches, culverts, lakes, or other water features, including direction of flow and water level elevations, and location and extent of areas subject to inundation and whether such inundation is frequent, periodic, or occasional.

g. Location, widths, and names of all existing streets, pathways and improvements therein; railroads; utility easements or rights-of-way, including any existing facilities therein; public areas, all existing structures, with an indication of whether or not they are to remain; and municipal corporation lines within or adjacent to the tract, and to be accompanied with a Preliminary Title Report.

h. Name, book, and page number of any recorded subdivisions within or having a common boundary with the tract, or notation "unsubdivided" where appropriate.

i. Location, width, and names of proposed streets, alleys, drainage ways, crosswalks, and easements, including all connections to adjoining platted or unplatted tracts.

j. Lot Layout, including minimum building setback lines related to all streets; typical lot dimensions (scaled); dimensions of all corner lots and lots on curvilinear sections of street; each lot numbered individually

k. Designation of all land to be dedicated or reserved for public or semi-public use, with use indicated.

l. Reference by note to the source of proposed electricity, gas, and telephone service, and whether such service will be underground.

m. If Plat includes land for which multi-family, commercial, or industrial use is proposed, such areas shall be clearly designated together with existing zoning classification, present district boundary lines and status of any pending zoning change.

n. Preliminary draft of proposed deed restrictions, including provisions for use and maintenance of commonly-owned facilities, if any.

o. Sewage disposal: It shall be the responsibility of the subdivider to furnish the County Health Department such evidence as that Department may require for its satisfaction as to the design and operation of sanitary sewage facilities proposed. A statement as to the type of facilities proposed shall appear on the preliminary plat.

p. Subdivisions Utilizing Septic Tanks: Where the proposed sewage disposal system will be by individual lot septic tanks, percolation tests and test boring logs in accordance with the requirements of the County Health Department shall be taken on the proposed subdivision and submitted with the preliminary plat.

q. Water Supply: It shall be the responsibility of the subdivider to furnish the County Health Department such evidence as that Department may require for its satisfaction as to the facilities for supplying domestic water. A statement as to the type of facilities proposed shall appear on the preliminary plat.

r. Storm Water Disposal: Preliminary layout of proposed system, location and invert elevation of outlet, and statement as to extent of improvements proposed, if any.

B. FINAL PLAT, ENGINEERING DRAWINGS, AND RECORDING

The final plat stage includes submittal, review, and approval of the final plat by the Town Council and recording of the plat with the County Recorder. Application for approval of the final plat is made to the Zoning Administrator.

1. Final Plat to be Submitted: A final plat shall be submitted to the Zoning Administrator within one (1) year of preliminary plat approval. The Zoning Administrator shall determine the completeness of the application within fourteen (14) days of submission. An application that is deemed complete shall be circulated for departmental review. If the application is incomplete, the Zoning Administrator shall provide the applicant with written notice of the specific deficiencies in the application.

   The final plat shall conform to the approved preliminary plat and any stipulation attached thereto by the Zoning Administrator or Planning and Zoning Commission. Copies of such final plat, the number to be determined by the Zoning Administrator, shall be filed with the Department, including one (1) electronic and one (1) hard-copy original, which shall bear the original signatures of the owner or owners and be duly acknowledged. The final plat shall be submitted, along with an application form and the final plat filing fee, to the Zoning Administrator.

2. Departmental Review of Final Plat: Departmental Review of Final Plats shall be in accordance with Section 703.A.2, except that:

   If additional information or changes are recommended by any of the reviewing departments, a revised final plat must be submitted to the Zoning Administrator until all reviewing departments and agencies are satisfied. Resubmittals of a final plat shall not require a separate filing fee. Referral and scheduling of a revised final plat shall be the same as that required for the original final plat.

   If the final plat is complete but the time limit has expired or it is not in conformance with the preliminary plat or stipulations attached thereto, it will either be returned to the subdivider for compliance or be referred to the Planning and Zoning Commission for review and recommendation before being forwarded to the Town Council.

   If a subdivision is predicated upon a change of zoning, the final plat will not be approved until the necessary zoning has been adopted by the Town Council.

3. Planning and Zoning Commission Findings: Once a final plat has been accepted by the reviewing departments and the Zoning Administrator, it shall be referred to the Planning and Zoning Commission, which shall hold a public hearing and recommend approval, recommend approval with conditions, or recommend denial and the reasons therefor. The Commission shall render its decision in the form of a written recommendation to the Council, which may be via a request for Council action or via the transmission of the Commission meeting minutes to Council.

4. Town Council Approval: The Town Council shall hold a public hearing for all final plats proposed within the Town of Jerome, and shall either approve, approve with conditions, or deny an application for a final plat.

   When the final plat has been approved by the Town Council, the Mayor shall be authorized to sign the plat for recording at the time that all Subdivision Improvement Requirements of Section

710 of this Ordinance have been met. After the Town Council's approval, the plat shall be assigned to the Zoning Administrator who shall transfer the recording fee and approved final plat to the County Recorder's Office for recording after the improvement requirements and stipulations have been met. The subdivider will be notified of the date book and page number of the official recording.

If the Town Council disapproves the final plat, it shall express the reasons therefor within the minutes of the meeting of which one copy shall be attached to the plat and returned to the subdivider.

The subdivider or their agent, engineer or land surveyor shall be present at the meeting set for the date of approval.

5. Legal Survey: The final plat shall be based on a survey of the subdivision and shall conform to the approved preliminary plat and any stipulations attached thereto by the Planning and Zoning Commission. The plat shall show the title or name under which the subdivision is to be recorded, with the name of the engineer or surveyor platting the tract.

   The engineer or surveyor shall in every case have a Certificate from the Arizona State Board of Registration for Engineers and Land Surveyors. The name or title of the subdivision shall not duplicate the name of any existing subdivision.

6. Final Plat Requirements: The record plat shall be drawn on plastic or other non-shrinking material on a sheet not exceeding thirty-six inches by forty-two inches (36" x 42") in size. Copies of the record plat shall be reproduced in the form of blueline, or blackline prints on a white background. The plat shall be drawn to an accurate scale of not more than two hundred feet (200') to an inch and preferably one hundred feet (100') to an inch.

   The final plat shall contain the following information:

   a. A Title, which includes the name of the subdivision and its location by section, township, range and county.

   b. Name, registration number and seal of the registered professional engineer or land surveyor responsible for preparing the plat.

   c. Scale (written and graphic), north point and date of plat preparation.

   d. Location and description of cardinal points to which all dimensions, angles, bearing and similar data on the plat shall be referenced.

   e. Any excepted parcel(s) within the plat boundary, accurately described by bearings and distances. Proper street and alley dedications adjacent to any proposed tracts or excepted parcels shall be provided by the subdivider by inclusion within the plat or by separate dedication noted on the plat.

   f. Boundaries of the tract to be subdivided fully balanced and closed, showing all bearing and distances determined by an accurate survey in the field. All dimensions shall be expressed in feet and decimals thereof to the hundredth. No plat showing plus or minus distances will be approved. Corners of the plat should be noted and monuments found or set should be indicated; each of the two (2) corners of the subdivision traverse shall be tied by course and distance to separate section corners or quarter-section corners or other survey monuments as may be acceptable to the Town Engineer. The Planning and Zoning Commission may make such office and field checks as may be necessary to assure the correctness of the plat and may require the owner of the subdivision to pay for such checking.

   g. Names, centerlines, right-of-way lines, courses, lengths and widths of all public streets, pathways, alleys, crosswalks and utility easements; radii, points of tangency and central angles of all curvilinear streets and alleys, and radii of all rounded street line intersections.

h. All drainage-ways shall be shown on the plat. The rights-of-way of all major drainage-ways, as designated by the Town Engineer, shall be dedicated to the public.

i. The location, width and use of all public or private utility easements shall be noted. All private utility easements shall be marked private easements.

j. Location and dimensions of all lots shall be shown. All minimum setback lines shall also be located and dimensioned.

k. All lots shall be numbered consecutively throughout the plat. Other Parcels, “tracts” and private parks shall be so designated, lettered or names and clearly dimensioned.

l. The accurate outline of all property which is offered for dedication for public use with the purpose indicated thereon, and all property that may be reserved by deed covenant for the common use of the property owners in the subdivision.

m. Name, book and page number of adjacent recorded subdivision, with location of existing adjacent lots, easements and rights-of-way, shown, or notation “unsubdivided” where appropriate. All proposed conditions should be graphically differentiated from existing conditions on adjacent properties and on excepted parcels within the plat.

n. The original and one copy of any private deed restrictions to be imposed upon the plat or any part or parts thereof shall be submitted with the final plat. Said deed restrictions must be in proper form to be recorded as a separate instrument. Space for cross-referencing to the deed restrictions shall be provided on the plat, to be completed by the County Recorder, e.g. “See Restrictions Recorded in Docket _____, Page _____, Yavapai County Recorder’s Office.”

o. Dedications: Statement of dedication of all roads, streets, alleys, crosswalks, drainage ways, and other easements for public uses, as shown on the plat, by the person holding title by deed to the lands, by persons holding any other title of record, by persons holding title as vendees under land contract, and by wives of said parties. If lands dedicated are mortgages, the mortgagee shall also sign the plat. Dedication shall include a written description of the tract. Signatures must be witnessed. If the plat contains private streets, the public shall be reserved the right to install and maintain utilities in the street and the right to maintain and control drainage and flood diversion channel.

p. Acknowledgement of Dedication: Execution of dedication, acknowledged and certified by a notary public.

q. Space for approval by the Town Council under the signature of the Mayor and attested by the Town Clerk.

SECTION 704. HILLSIDE SUBDIVISIONS

A. PURPOSE

Planning, platting and development of hillside subdivisions involve special problems and require special handling by the subdivider and their engineer, and by the Planning and Zoning Commission, staff, and reviewing officials. Hillside problems include the preservation of scenic beauty for the benefit of the general public, safe construction of public improvements commensurate with lower density and lesser public use, and safe construction of private improvements related to sewage disposal, water supply, storm drainage, and foundation bearing.

B. LOT WIDTH AND AREA

Lot width and area shall be closely related to the terrain, drainage, percolation factors, or construction of sanitary sewers, with emphasis placed on the selection of homesites.

1. Existing topography shown by suitable contour interval with location of major and minor washes. A separate sheet showing proposed contours may also be required if extensive regrading is proposed.
2. Road profiles and cross-sections may be required at the discretion of the Town Engineer.
3. Percolation tests and test boring logs in accordance with the requirements of the County Health Department should be taken at the proposed subdivision prior to the submittal of the preliminary plat.

C. PLAT PROCESSING TIME

Due to problems requiring special field and office review by the County Health Department, the Town Engineer, and the Staff, subdividers should expect processing time for hillside plats to exceed that otherwise required for normal plats.

D. HILLSIDE SUBDIVISION DESIGN

Special problems of hillside subdivision design are discussed under Section 709 Design Standards.

SECTION 705. REVISIONS OF PLATS OR REPLATS

A. Any Division of a lot in a recorded subdivision into five (5) or more parcels, or any changes in lot lines involving five (5) or more adjoining lots in a recorded subdivision, but creating no new street, may be processed in accordance with Final Plat Procedures on these Subdivision Regulations, after a Pre-Application Conference with the Zoning Administrator.

B. Any replat involving dedication or abandonment of land for a public street shall comply with all procedures set forth in these requirements, Sections 706 and 707.

C. If abandonment of a street, pathway, alley or public utility easement in a previously recorded subdivision is necessary, the replat of that area shall not be forwarded to the Town Council for final action until abandonment proceedings are completed and recording data noted on the final plat.

SECTION 706. ABANDONMENT OF A RECORDED SUBDIVISION OR REVERSION TO ACREAGE

A. If no lots in the subdivision, for which a final map has been approved and recorded, have been sold within three (3) years from the date of recordation, or if none of the improvements have been made within two (2) years from the date of approval, the Town Council may on its own motion hold a public hearing after notice, to determine whether the approval of such final map should be revoked. Such revocation shall be effective upon recordation of a certified copy of such resolution; and thereupon, all streets, rights of way, and easements dedicated or offered for dedication by such map shall be of no further force or effect.

B. Pursuant to provisions of Title 18, Chapter 2, Article 1, Section 18-201, and Chapter 5, Article 1, Sections 18-501-508, ARS, the abandonment of all or part of a recorded subdivision may be initiated by written petition to the Town Council, said petition to be signed by ten (10) or more owners of real property in Jerome, requesting abandonment of all streets, alleys and easements within said subdivision and giving the legal description and recording information thereof.

C. Applications or petitions for abandonment are filed with the Clerk of the Town Council and referred for recommendation to the Zoning Administrator, Town Engineer, and utility companies concerned.

D. Such abandonment may necessitate consideration for rezoning.

E. Any action considered by the Council relating to revocation of all or part of a subdivision whether plots or lots and rights-of-way shall be referred to the Planning and Zoning Commission for evaluation for the following:

   1. Conformance with the Town's General Plan.
   2. Correlations with proposed development in adjacent areas.
   3. Recommendation as to whether or not zoning changes should accompany such action.
   4. Effect of such action on existing development in areas affected by proposed reversion or abandonment.

F. Any other actions applicable to the above process and permitted by State Laws are permissible.

G. Requisite actions under Article 1, Chapter 520, Title 18, Arizona Revised Statutes to abandon the streets and easements should be carried on separately and simultaneously with any procedure to abandon a subdivision or revert it to acreage.

SECTION 707. AMENDED SUBDIVISION MAPS

A. Any map of a subdivision that has been filed for record may be amended to correct an error in any course or distance or other necessary item that was omitted therefrom, or to correct a drafting, graphic, technical or similar type error; by the filing for record of an amended map of said subdivision. The County Recorder shall examine such amended map and if such examination discloses that the only changes on the amended map are changes above authorized, he shall certify this to be a fact over his signature on the amended map. Thereafter, the amended map shall be entitled to be recorded in the office of the Recorder in which the original subdivision map was recorded. Such map shall be marked "AMENDED MAP OF _____". Subsequently, if more than one amended map is necessary, the successive maps shall be titles "SECOND AMENDED MAP OF _____" and follow in numerical sequence order. The use of the terminology of "Amended Map" shall not be used to change or vary or add any lot lines, streets, or easements or statements that were not contained on the approved preliminary map, since such actions necessitate re-processing of the plat.

SECTION 708. SUBDIVISIONS WITHIN THREE (3) MILES OF TOWN

In accordance with Arizona Revised Statutes, Section 9-474 as amended:

A. When the owner of land, the whole or part of which is an unincorporated area within three (3) miles from the corporate limits of the Town of Jerome, desires to subdivide the land into lots for the purpose of selling it by reference to a map or plat they shall first given written notice to the Town of their intention to subdivide the land, naming and describing the land so that it may be identified upon the ground, and shall submit to the Town a tentative plat of the land showing the manner in which he desires to subdivide the land.

B. If the Town desires that the streets or alleys of the tract conform with the projected streets or alleys f the Town of Jerome, or of an adopted plan of the Town of Jerome, then the Town may, at its cost, project the lines of its streets and alleys to the nearest outer boundary lines of the subdivision and thereon mark the same, and shall supply the owner with the courses of the lines.

C. The Town of Jerome may also submit to the owner a written report recommending changes in the submitted plat of the location or dimension of streets, pathways, alleys, parks, easement for rights-of-way or property intended to be devoted to the use of the public. One copy of the report shall be delivered to the Board of Supervisors of the County.

D. If the report is given to the owner, or the lines are so marked and the courses given the owner within thirty (30) days from the date of service of notice of intention to the Town, then the owner shall cause the land to be subdivided into blocks, lots, streets, alleys, parks and parkways, so as reasonably to conform to the report and the projected lines and courses thereof, and shall prepare in duplicate an accurate map or plat thereof on cloth, drawn and attested by a registered civil engineer or registered land surveyor from their survey of the ground. The engineer or registered land surveyor shall, in making the surveys, leave sufficient permanent monuments so that another surveyor or engineer may retrace their work. The nature and location of the monuments shall be plainly shown on the plat.

E. The plat shall particularly set forth and describe:

    1. Parcels of ground within the tract or subdivision to be used for public purposes or offered for dedication for public uses, and their dimensions, boundaries and courses.

    2. Either by number or letter, lots intended for sale, or reserved for private use, and their dimensions, boundaries and courses.

    3. The location of the subdivision into lots with reference to adjacent subdivisions, the maps or plats of which have been previously recorded, or if none, then with reference to corners of a United States survey, or if on land unsurveyed by the United States, then to some prominent artificial monument established for such purpose.

SECTION 709. DESIGN STANDARDS

A. GENERAL

1. The Planning and Zoning Commission shall insure that appropriate provisions are made for the harmonious development of the Town by requiring (1) the coordination of streets within subdivisions with existing or planned streets or with other features of the General Plan, (2) a regulation of population density and traffic volume which will create conditions favorable to public health, safety and convenience, and by (3) recommending adequate spaces for public use (such as for parks, schools, recreational areas, etc.).
2. Adequate access shall be provided from an existing public road to land being subdivided. Approval of such access shall be a condition of approval of the plat by the Commission and Council.
3. In all subdivisions, it is urged that due regard be shown for all natural features such as trees, water courses, historical and archaeological sites, and similar community assets which, if preserved, will add attractiveness and value to the property and community.
4. Portions of property within the ownership of the subdivider, contiguous to the subdivided property shall not be excluded from within the boundaries of a subdivision when needed or required for any traffic, drainage or flood control facility pertinent to said subdivision.
5. Portions of property within the ownership of the subdivider, contiguous to the subdivided property but not included within the boundaries of the subdivision, shall be of such size or shape that they could be used for some purpose compatible to surrounding development and meet the specifications of other Town regulations.
6. Separate parcels omitted from a preliminary plat, that form lots or building sites of less than five (5) acres each, or that could be part of this development by extending proposed roads shall be included in the proposed plat.
7. The design of those elements of a subdivision involving structural matters, location and design and building of roads, pathways, drainage provisions, water supply and sewage disposal shall be made by an engineer registered in the State of Arizona and qualified to specify the standards for such design or by an assistant under their direction and supervision.
8. A supplementary set of standards may be adopted by the Commission and approved by the Council on each item as described. These standards shall be separate from this Ordinance and shall be developed by the Town Engineer. They may be revised whenever environmental circumstances or technological improvements necessitate or justify such changes.
9. It is the responsibility of the developer to comply with these regulations. At any time in the processing of a subdivision tract that non-compliance is detected notification by certified or registered mail of said non-compliance shall be transmitted to the developer. If compliance is made by the developer processing shall proceed from date of compliance as if the non-compliance had not existed. If compliance is not made within thirty (30) days of the mailing of the certified letter, processing shall be terminated. Once processing is terminated, a tract must be resubmitted.

B. SUITABILITY OF THE LAND

1. The Planning and Zoning Commission shall not approve the division of land as submitted if, from adequate investigations, it has determined that said land is not suitable for the kind of development proposed due to such factors as flooding, bad drainage, steep slopes, rock formations, soils or design features likely to be harmful to the safety, welfare and general health of the future residents, unless reasonable corrections acceptable to the Commission are submitted by the developer.

C. WATER COURSES

1. In the event that the subdivision is traversed by or is contingent to lakes, streams, or other bodies of water, the subdivider shall provide a right-of-way for storm drainage conforming substantially with the line of such natural water course, channel, stream, or creek, or provide an acceptable realignment of said water course.

D. STREETS, GENERAL

2. The arrangement, character, extent, grade, width, and location of all streets shall conform to the General Plan or the preliminary plans of said Commission.
3. Where such is not shown on the General Plan or preliminary plans, the arrangement of streets shall provide continuation or appropriate projection of existing major streets in surrounding areas. All center lines shall be contiguous territory. In cases where straight continuations are not physically possible, such center lines may be continued by curves.
4. The minimum width of right-of-way, measured from lot line to lot line, shall be as prescribed by the Town Engineer, the General Plan, and these regulations. Proposed streets shall extend or project existing streets at their same or greater width, but never at a width less than that prescribed by established standards.
5. All streets and highways shall be graded, surfaced, and improved to cross sections and grades approved by the Town Engineer and as established by these regulations. The subdivider shall improve the extension of all subdivision streets and other public ways to the intercepting shoulder line of any County road, Town street, or State highway.

   Grades given are the maximum allowed for certain short-range distances and do not imply permission for an extensive distance at maximum grade.
6. Structures or culverts shall be installed as deemed necessary by the Town Engineer for drainage, access, and public safety. Such structures and culverts are to be placed to grades and shall be of a design and size approved by the Town Engineer. Adequate drainage of the subdivision public ways shall be provided by means of said structures or culverts and by other approved means, in accordance with the engineering standards adopted by the Town Engineer.
7. All roads developed or improved in conjunction with subdividing shall either be:
   a. Built to Town standards, dedicated by the map and accepted by the Council.
   b. Built to Town Council standards, dedicated by the map and approved by the Council in conjunction with providing a Performance Bond of Assurance of Completion Bond.
   c. Built and offered for dedication by the subdivider, refused by the Council, but approved as private roads with adequate assurances of upkeep.
8. Adequate provisions shall be made in the design of subdivisions for access to each lot or parcel, and for access to adjacent properties.
9. Half roads or partial width rights-of-way should only be approved as partial major roads along a section line where no alternative design exists, or where said partial rights-of-way would require the dedication of additional contiguous rights-of-way to make it full width, provided that that developer or their representative shall include evidence that the additional right-of-way is available or is permanently reserved for future road purposes. Half roads should also be accepted where they are a portion of the road system approved in the General Plan.
10. When a tract fronts on an arterial road, the Commission may require such lots to have reverse frontage.
11. Provisions shall be made for railroad and other public or private utility crossing necessary to provide access to or circulation within the proposed subdivision, including the obtaining of all necessary permits from the public or private utilities involved, and any regulatory agencies having jurisdiction. The cost of such crossings shall not be assumed by the Town.

12. Minor Residential Streets: minor residential streets shall be designed to provide proper circulation of local traffic.
13. Dead-End Streets or Cul-de-Sacs:
    a. Minor terminal streets designed to have one end permanently closed shall not be more than six (6) times the minimum lot width nor one thousand three hundred twenty feet (1,320') long unless necessitated by topography. They shall be provided at the closed end with a circular turn-around or a cul-de-sac having a right-of-way radius, or at least forty-five feet (45').
    b. Where, in the opinion of the Commission, it is desirable to provide street access to adjoining properties, proposed streets shall be extended by dedication to the boundary of such property. Such dead-end streets shall be provided with a temporary turnaround having a roadway radius of at least forty-five feet (45').
14. Intersections:
    a. Street intersections shall be as nearly at right angles as possible, and no intersection shall be less than sixty (60) degrees.
    b. Property line radii at street intersections shall not be less than twenty-five feet (25'); the Town Engineer may require a greater curb radius.
    c. Whenever necessary to permit the construction of a curb having a desirable radius without curtailing the sidewalk at a street corner to less than normal width, the property line at such a corner shall be rounded or otherwise set back sufficiently to permit such construction.
15. Jogs in Minor Streets: Street jogs with centerline offset of less than one hundred thirty-five feet (135') shall not be approved.
16. Street Names: Proposed streets which are obviously in alignment with other existing names or numbered streets in that vicinity, as determined by the Zoning Administrator, shall be given the designation of said existing street. In no case shall the name for proposed streets duplicate those of existing streets within the same planning area, except as aforementioned, irrespective of the use of such varying suffixes as street, avenue, road, boulevard, drive, place, court, or other designation. Through its index of street names and numbers, the Commission can assist the subdivider in avoiding such duplications.
17. Street Standards and Improvements: Unless specifically requested by the subdivider and/or designated by the Planning and Zoning Commission or Town Council and agreed to by both parties, the following general street standards shall apply:

(see following page for general street standards)

Classification	Min. R/W	Street Section	Paved Section	General Thickness	Type Curbs	Maximum Grade	Minimum Curve Radius
Large Lot Residential (1-acre lots or larger)	50’	28’	24’	As Req’d by Town Engineer	W/O Curb With Wedge Curb	12%	100’
Residential	50’	36’	32’	As Req’d by Town Engineer	*Rolled or Vertical	12%	100’
Residential Collector	60’	42’	40’	As Req’d by Town Engineer	Vertical	8%	200’
Major Urban Collector	80’	58’	48’	As Req’d by Town Engineer	Vertical	6%	300’
Major Arterial (Rural Areas)	110’	28’	24’	As Req’d by Town Engineer	W/O Curb With Wedge Curb	6%	500’
Major Arterial (Urban Areas)	110’	2-40’ Divided	60’	As Req’d by Town Engineer	Vertical	6%	500’
Cul-de-sacs	45’ Radius	38’ Radius to back of curb		Roll	Rolled or Vertical		

*Except that for subdivisions wherein all lots are 18,000 sq. ft. or larger and have a minimum 100-foot frontage, redwood headers are permitted to protect paving at shoulders in lieu of concrete curbs; lots fronting on a cul-de-sac within such a subdivision may be excepted from the 100-foot frontage requirement.

Other types to be approved by the Zoning Administrator & Town Engineer.

All improvements to be installed in accordance with Town Engineering Standards.

18. Alleys: Alleys shall be provided to the rear of all lots used for business purposes, as deemed necessary, but will not be required for residential areas. Alleys may be permitted where a subdivider can produce evidence satisfactory to the Commission of the desirability of such provisions.
19. Sidewalks: Concrete sidewalks shall be constructed along at least one side of every street shown on the plat in accordance with applicable standard specifications of the Town. Minimum width shall be four feet (4'); except sidewalks shall not be required in subdivisions with all lots containing over eighteen thousand (18,000) square feet each.
20. Pathways may be constructed at locations other than adjacent to streets and may eliminate the need for sidewalks when approved by the Planning and Zoning Commission.
21. Block Design: The length, width, and shape of blocks shall be determined with due regard to provisions for adequate building sites, the zoning requirements as to lot area and dimensions, limitations and opportunities of topography, and needs for convenient access, circulation, control, and safety to streets and pedestrian traffic.
    a. Length: Block shall not be more than one thousand three hundred twenty feet (1,320) in length except as the Commission considers necessary to secure efficient use of land or as a desired feature of street design.

       Any block having a length of six hundred feet (600') or greater may be required by the Planning and Zoning Commission to have provisions made for a pedestrian walk-through having a twelve-foot (12') right-of-way, when deemed essential for pedestrian circulation, access to schools, playgrounds, etc.

    b. Width: Blocks shall be wide enough to allow two (2) tiers of lots.

E. LOTS

1. Arrangement: The lot area, width, depth, shape, orientation, and the minimum building setback lines shall be appropriate for the location of the subdivision, for the type of development and use contemplated, and shall conform to the zoning requirements and these regulations.
2. Insofar as practical, side lot lines shall be at right angles to straight street lines or radial to curved street lines. Each lot must front upon a public street or road or approved access.
3. Accessibility: Each lot shall be accessible to the street on which it fronts. Where necessary, lots shall be graded as a condition of approval of a final map to ensure access to and adequate use of the property.
4. Minimum Size: The size, shape, and orientation of lots shall be such as the Commission deems appropriate. Each lot shall be suitable for the purpose for which it is intended and shall contain a usable building site. The area of a lot shall be deemed the area shown, exclusive of any area designed for road purposes or any easement for access or road purposes shown on the map.
5. Where lots are designed with minimum areas, corner lots shall be wider than minimum to provide adequate usable area, if necessary.
6. Large Tracts or Parcels: When the land is subdivided into larger than ordinary building lots, such parcels shall be arranged so as to allow for the opening of future streets and logical re-subdivision.
7. Lot Numbering:
    a. Each lot shall be designated by an Arabic numeral.
    b. If block designations are not used, numbering shall be in consecutive sequence within the block beginning with the number “1” or wherever lots have common side boundaries within a subdivision or within a block along each street and consecutive numbering shall follow from one block to another.
    c. When block designations are used, numbering shall be in consecutive sequence within each block area commencing with the number “1” for each block.
    d. Parcels and/or tracts shall be designated by capital letters and be designated in alphabetical sequence starting with the letter “A”.
8. Lot line adjustments, lot ties, and lot combinations may be administratively approved by Town staff without a public hearing, subject to application and review procedures established by the Zoning Administrator.

F. REFUSE, SANITARY SEWAGE, AND WATER SYSTEMS

1. Where a public sanitary sewer system is reasonable accessible, the subdivider shall connect with such sewer and provide a connection to each lot.
2. A sewer collection and treatment system shall be provided as a condition of approval for any subdivision containing lots or parcels less than one acre in area.
3. When connection to a sanitary sewer system is not available for lots or parcels of one acre or more, septic tanks or other disposal methods may be permitted provided that a statement is submitted to the Planning and Zoning Commission by the County Health Officer or their authorized representative certifying that field investigation has shown that ground slopes and soil conditions will allow for satisfactory disposal by this method with the lot arrangement and size as shown on the subdivision map and that necessary drainage fields are either contained within the property or permitted by adjoining land owners.

4. In areas where public sanitary sewers are not reasonable accessible, but where the future owning agency agrees to effect temporary disposal of sewage, the subdivider shall plan and construct sewers within and for the subdivision for connection with a future public system.
5. Water mains connecting with the existing Town system shall be installed to serve each lot. All connections shall be subject to the approval of the Town Engineer.
6. Water mains and fire hydrants shall be installed to grades, location, design, and sizes on plans submitted by a registered engineer in the State of Arizona and approved by the Town Engineer and the Town Fire Department.
7. When connection to a Town water system is not available, the subdivider may provide service by establishment of a mutual water system in which case water mains and fire hydrants shall be installed to grades, location, design and sizes as submitted by a registered engineer in the State of Arizona and approve by the Town Engineer, and the source of supply developed and improved to the satisfaction of the County Health Officer or their representative so that the subdivision may be adequately supplied with water.
8. A Water system shall be provided as a condition of approval for any subdivision containing lots or parcels less than two (2) acres in area.
9. In the case of a subdivision with lots over two (2) acres in area, water supply may be from other than a community system. In this case sufficient evidence shall be submitted showing that potable water is available and can be obtained for all lots in the subdivision.
10. Minimum lot size may be affected by requirements of the County Health Department pertinent to water and sanitary sewage systems.
11. Public Sanitary Sewage and Water Systems: The requirements for development of public water supplies and sewage disposal systems shall not be less than those outlined by the Arizona State Health Department regulations and engineering criteria for such installations.
12. Refuse Disposal: The subdivider shall indicate the method of refuse collection and disposal.

G. EASEMENTS AND UTILITIES

1. Except where alleys are provided for that purpose, easements at least eight feet (8') in total width shall be provided along rear lot lines for poles, wires, conduits, sanitary sewers, gas mains, water mains, or for other utilities. Where necessary, additional easements shall be located along the side lot lines. Half or partial easements may only be approved where written commitment of dedication of necessary additional easements are on record. All easements shall be in accordance with those approved by the utility companies concerned.

H. MONUMENTS

1. Survey monuments acceptable by the Town Engineer shall be set for all points of reference on the outside boundary, at each lot corner and/or at all points of curvature or tangency of the subdivision.

   Whenever streets are improved to the extent that paving is included, survey monuments will be required at all street intersections and at the points of curvature and point of tangency of all curves. Monuments shall be set as approved by the Town Engineer.

I. PUBLIC REQUIREMENTS

1. During the design and layout of the subdivision, consideration shall be given to the requirements for public land and open spaces as specified in the General Plan. The Planning and Zoning Commission may require certain lands to be reserved for public purposes in conformance with the General plan as specified in these regulations.

J. AESTHETIC CONSIDERATIONS

1. The subdivider shall give consideration to preserving natural features in the design and layout of a subdivision. Lots and buildings should be oriented to make advantageous use of any views or natural features.

   All utility installations shall be located underground, except as exempted below, to assure that they do not detract from the design and amenity of the subdivision.

   Exemptions:

   a. Electric transmission lines over 600 Volts, and electric distribution feeder lines, as defined elsewhere herein, together with switchyards, substations and equipment.

   b. Temporary service facilities, such as facilities to furnish emergency service during an outage, facilities to provide service to construction sites, or other service of limited duration.

   c. Above ground appurtenance of underground utility systems with a total height not to exceed seven feet (7').

K. SPECIAL DEVELOPMENT SUBDIVISION

1. Modified standards and requirements of these regulations may be accepted by the Planning and Zoning Commission in the case of a plan and program for a neighbor unit, which in the judgement of the Planning and Zoning Commission provide adequate public recreation, light, air and service needs for the tract when fully developed and populated, and which also provides such covenants or other legal provisions as will assure conformity to an achievement of the General Plan or zoning regulation.
2. When such a preliminary development is submitted for appraisal, it shall be accompanied by a petition for variance, as outlined in these regulations, setting out all deviations from standards as herein required, and explaining the reasons therefor.
3. Special development variations may include (1) Streets of less width than standard requirements, but with adequate provisions for off-street parking; (2) up to four (4) lots served by a common driveway where topographic conditions would justify such treatment; (3) up to four (4) buildings per site in a cluster of less than minimum lot area of a corresponding contiguous area plus the building site areas brings the total combination of building sites and common area to minimum area standards; and provisions are made that each lot owner has an equal undivided interest in the contiguous parcel and it is restricted to be used only for recreational purpose or to remain "open land"; (4) special common sanitation facilities.
4. Special development subdivisions shall be regulated as outlined in the zoning regulations.

L. SPECIAL DESIGN STANDARDS FOR HILLSIDE SUBDIVISIONS

1. Street grades shall not exceed twelve percent (12%)
2. Street grades of twelve percent (12%) shall have a maximum length of six hundred feet (600').
3. Minimum dedicated street right-of-way; to be justified by extreme cross-slope cut and fill areas or similar conditions.
4. "T" or "Y" type turning and backing areas may be substituted for circular turn-arounds.
5. "Panhandle", double frontage, and other unorthodox lots may be permitted so long as it can be adequately demonstrated that no such lot will adversely affect any other lot.
6. Private streets or drives serving not more than three (3) lots shall be permitted to a maximum length of three hundred feet (300').

SECTION 710. IMPROVEMENTS

A. GENERAL

The subdivider shall cause to be installed and constructed all street and road improvements, public utilities, survey monuments and markers and lot grading. All such improvements shall conform to the requirements of these regulations and all other applicable Town, County and State standards, specifications, codes and regulations. These standards may be obtained, among others, from the Town Clerk, Town Council, Zoning Administrator, County Health Department, County Highway Department.

1. The Subdivider shall be responsible for the cost of the following:
    a. Setting of survey monuments and markers.
    b. Street and road construction for all street improvements including base, grading, curbs, gutters, sidewalks, pavement, street trees, street name signs, culverts and bridges.
    c. Water and sewer line installations including fire hydrants and manholes.
    d. Required storm water system and/or other drainage improvements.
    e. All field density and related testing of base, subbase and other compacted backfill, gradation tests, concrete cylinder tests, asphalt tests and/or other related tests required to insure minimum standard requirements.
2. The subdivider shall be responsible for assuring the installation of the following, by negotiating with private companies, or by providing the cash for their installation when considered necessary by the Planning and Zoning Commission and the Town Council.
    a. Electric Lines.
    b. Streetlights.
    c. Gas Lines.
    d. Street Naming Signs.
    e. Telephone Lines.
3. Building permits will not be issued for new construction until all required street and utility improvements adjacent the property to be improved are installed, or assurance provided that they will be constructed by the subdivider.

B. ENGINEERING DRAWINGS

1. Within one hundred and twenty (120) days from final plat approval, the subdivider or developer shall submit to the Planning and Zoning Commission and the Board of Supervisors engineering drawings and construction plans for approval prior to the commencement of any work by the subdivider.

    At the time of submitting improvement plans and engineering drawings, the subdivider shall submit an estimate of the costs of constructing the required improvements to determine the amount of performance or surety guarantee to be required. The estimate shall specify the sources used as a basis to determine unit and project costs. The Planning and Zoning Commission and/or Board of Supervisors shall make any checks and revisions in the estimates as they deem necessary prior to approval.

    All required supplementary engineering studies or tests as required by the Planning and Zoning Commission and/or Board of Supervisors shall be approved prior to any construction activities by or for the subdivider.
2. All required engineering studies and exhibits shall be prepared by qualified and legally registered or certified engineers or engineering firms.
3. Contractors engaged by the subdivider to install required improvements shall be licensed and registered as required by State or local law.

4. A time construction schedule of installation of public improvements shall be submitted to and approved by the Planning and Zoning Commission and the Town Council prior to the commencement of any and all construction activities. The approved schedule shall be flexible enough to allow delays due to inclement weather or other unavoidable circumstances. In the event that construction at some time can no longer adhere to the approved schedule; the subdivider shall submit a revised schedule to the Planning and Zoning Commission and the Town Council for approval.
5. It may be desirable, during construction of improvements, for the subdivider to modify some standards and specifications of the approved engineering drawings. In this event, the subdivider shall, prior to making such modifications, submit a schedule of such modifications with reasons of necessity to the Planning and Zoning Commission and the Town Council for approval.
6. At the completion of all new construction relating to street or utility improvements the subdivider shall submit "as built drawings" to the Town Engineer prior to approval of the work by the Engineer.
7. The subdivider shall submit an estimate for the costs of constructing the required improvements to determine the amount of performance guarantee to be required. The estimate shall specify the sources used as a basis to determine unit and project costs. The Planning and Zoning Commission and/or Town Council shall make any checks and revisions in the estimates as they deem necessary prior to approval. The Town Engineer shall advise the Commission and Council of the adequacy of the estimate submitted.

C. REQUIRED IMPROVEMENTS

1. The subdivider shall cause to be set permanent survey monuments at locations approved by the Planning and Zoning Commission or Town Engineer, provided that ordinarily such monuments shall not be more than one thousand three hundred fee (1,320') nor less than six hundred sixty fee (660') apart; and, in addition, monuments of iron pipe, steel bars, or concrete, shall be set at all street intersections, at all tangent points as may be required by the Planning and Zoning Commission to make the retracing of the lines shown on the Town Official maps reasonable convenient.
2. The subdivider shall cause to be installed public water facilities including fire hydrants, public sanitary sewer systems, and a storm sewer system and/or other drainage improvements designed and constructed according to specifications approved by the Planning and Zoning Commission and the Town Council where required.
3. The subdivider shall cause to be installed and constructed according to specifications approved by the Planning and Zoning Commission and the Town Council, all street improvements including grading, surfacing, curb and gutter, sidewalks, street name signs, streetlights and telephone lines where required.

D. GUARANTEES OF PERFORMANCE

1. Before recording of a plat by the Town Council, the subdivider shall have dedicated all streets, pathways and alleys in the proposed subdivision together with sidewalks, curbs and gutters, in accordance with the requirements that the Planning and Zoning Commission may impose and specify as to grading, paving, width, location, drainage, courts, culverts, bridges, and other necessary requirement. The subdivider shall enter into a written agreement with the Town Council wherein the subdivider shall have deposited a performance bond in an amount established by the Town Council or have deposited with the Town of Jerome sufficient funds to cover the cost of such improvements. The amount of the performance bond or the funds in escrow shall be determined from the cost estimates as specified in 710.B.7 and/or 710.B.1 above, or letter of assurance from an acceptable financial institution that sufficient funds have been set aside for pledged to complete such improvements.

E. MINIMUM STANDARDS FOR SUBDIVISION STREET PAVING

1. Streets; Improvement Security: All streets covered by these regulations shall be paved, with curbs and gutters installed when required prior to the public sale of any land appurtenant to said streets. In lieu of the installation of paved streets, curbs and gutters by the subdivider, and in order to insure the proper installation of said paved streets, curbs and gutters, the subdivider may provide security as follows: (1) post bond, (2) establish a trust, or (3) provide for other appropriate security; provided however, that the following requirements are met:

    a. The subdivider shall declare their intention of proceeding under this Section in their letter of intent, and further, they shall designate whether a bond, trust, or some other appropriate security shall be provided. The letter shall be notarized.

    b. That said bond, trust, or other appropriate security be submitted to the Town Council for acceptance prior to recording the final plat by said Council.

    c. That the amount of said bond, trust, or other appropriate security be based on a cost estimate prepared by a registered professional engineer in an amount to cover the complete installation of the improvements and be approved by the Town Engineer prior to submission of said estimate to the Town Council.

    d. That the completion date for the installation of said paved streets, curbs and gutters be declared and notice given to the Town Council and approval given by the council prior to the final plat approval by said Council.

    e. The security as herein before required shall provide for its forfeiture to the Town unless good and sufficient reasons can be provided that said improvements have not been installed in accordance with these regulations or are not accepted by the Town by the declared completion date due to the default of the subdivider; the amount of forfeiture shall be the cost to the Town to complete the installation of said improvements in accordance with these regulations.

    f. All matters contained in this Section may be referred to the Planning and Zoning Commission by the Town Council for preliminary study and recommendation.

    g. The Town Council considering recommendations from the Planning and Zoning Commission may require improvement security, as delineated for streets in this ordinance, for private streets, road, or driveways in an approved planned area development prior to recording a final subdivision plat.

2. Waiver of Street Improvements in Certain Subdivisions: Paving widths, curbs, gutters and sidewalks may be waived by the Town Council considering recommendations of the Planning and Zoning Commission, subject to topographic terrain or aesthetic conditions.

3. Acceptance of Streets: Subdivision streets will be accepted for maintenance by the Town only when they meet requirements of the minimum standards as set forth by the Town Engineer and all other applicable Section of these regulations.

F. PARTIAL DEVELOPMENT; DECLARATION OF IMMEDIATE IMPROVEMENT

1. The subdivider may provide plans for the partial development of subdivisions, whereby Town Council in accepting the final plat for recording, shall require that the bond, trust or other appropriate security be sufficient to cover that portion of the subdivision premises which the subdivider has elected to immediately improve, as that portion is described in a “declaration of immediate improvement” which the subdivider shall submit to the Town Council, provided that no improvement or sale of lots shall be commenced in any other area of the subdivision not covered by a “declaration of immediate improvement” on the new area, and provided further that the proper security is approved as specified herein, and provided further that a completion date for the improvements for each area be declared in each “declaration of immediate improvement”.

SECTION 711. VARIANCE AND APPEALS

A. HARDSHIP

The Planning and Zoning Commission and the Town Council may authorize variances from the terms of these regulations, where, by reason of exceptional or extraordinary situation or condition of a tract of land, the strict application of any regulation enacted herein would result in peculiar and exceptional practical difficulties to, or undue hardship upon, the subdivider. Such variance may be given provided such relief may be granted without detriment to the public good and without impairing the intent and purposes of these regulations.

B. APPEALS

Any aggrieved person whose preliminary plat has been rejected or disapproved by the Planning and Zoning Commission may appeal to the Town Council for a hearing within thirty (30) days after such rejection. The Council's decision for both preliminary and final plats shall be final and shall become effective immediately. Notice of the decision shall be mailed to the applicant at the address shown in the application.

SECTION 712. LEGAL PROCEDURE, VIOLATION, PENALTIES AND REMEDIES

A. LEGAL PROCEDURES

Any use of development of property contrary to the provisions of the Subdivision Regulations shall be and the same is hereby declared to be unlawful, against the public safety and welfare, and a public nuisance and the Town Attorney shall, upon order of the Town Council, or in their own initiative, immediately commence all necessary actions or proceedings for the abatement, enjoinment and removal thereof in the manner provided by law, shall take such other lawful steps and shall apply to such court or courts as may have jurisdiction to grant such relief as will abate, enjoin and restrain any person, firm, or corporation from setting, developing, erecting, building, moving, or maintaining any such building or using any property contrary to these provisions of these Subdivision Regulations, or otherwise violating these Subdivision Regulations.

B. VIOLATIONS AND PENALTIES

Any violations of this Ordinance shall be subject to the enforcement provisions and penalties set forth in Chapter 18 of the Jerome Town Code.

C. REMEDIES

All remedies provided for herein shall be cumulative and not exclusive. The conviction and punishment of any person hereunder shall not relieve such person from the responsibility to correct said prohibited conditions. In addition to the other remedies provided in the Section, any adjacent or neighboring property owner who shall be especially damaged by the violations of any provisions of these Subdivision Regulations may institute, in addition to the other remedies provided by law, injunction, mandamus, abatement or any other appropriate action, proceeding or proceedings to prevent or abate or remove such unlawful erection, constructions, reconstruction, alteration, maintenance or use.

SECTION 713. AMENDMENTS

A. AMENDMENTS

The Planning and Zoning Commission and the Town Council may amend these regulations after giving public notice of any such proposed amendment and after holding a hearing thereon.

B. SUBDIVISION REVISIONS

No changes, erasures, modifications or revisions shall be made in the final plat after approval of the plat has been given by the Town Council.

SECTION 714. ENFORCEMENT AND EFFECTUATION

A. ACCEPTANCE

No final plat of a subdivision shall be approved by the Planning and Zoning Commission and accepted by the Town Council unless it conforms to all of the provisions of these regulations.

B. INTERPRETATION

1. In the interpretation and application of the provisions of these regulations, the regulations shall be regarded as the minimum requirements for the protection of the public health, safety, comfort, morals, convenience, prosperity and welfare.
2. These regulations shall not abrogate or annul any permits issued before the effective date of these regulations, nor shall they abrogate or annul any easement, covenant, or any other private agreement.

C. SEPARABILITY

1. If any article, section, subsection, sentence, clause, or phrase of these regulations is for any reason held to be unconstitutional or invalid by a decision of any court of competent jurisdiction, such holding shall not affect the validity of the remaining portions. The Planning and Zoning Commission hereby declares that it would have adopted these regulations and each article, section, subsection, sentence, clause and phrase thereof separately and irrespective of the fact that if any one or more of the articles, sections, subsections, sentences, clauses, or phrases be deemed unconstitutional or invalid.
2. If the application of any provisions of these regulations to any tract of land is declared to be invalid by a decision of any court of competent jurisdiction, it is hereby declared to be the intent that the effect of such decision shall be limited to that tract of land immediately involved. Such a decision shall not affect, impair or nullify these regulations as a whole or in any part in its application to any other tract of land.

D. REPEALS

All regulations or codes of the Town of Jerome inconsistent herewith, to the extent of such inconsistency, and no further, are hereby repealed. The repeal of any of the above-mentioned regulations, or codes, does not revive any other regulation or code. Such repeals shall not affect nor prevent the prosecution or punishment of any person for the violation of any regulation or code repealed hereby, for an offense committed prior to the repeal.

APPENDICES

APPENDIX A DEFINITIONS

Abutting - the condition of two adjoining properties having a common property line or boundary, including cases where to or more lots adjoin only a corner or corners.

Access, Direct – The provision for immediate ingress and egress of vehicles from an abutting property to an adjacent street.

Access, Indirect – The provision for ingress and egress of vehicles from an abutting property to an adjacent street, is shared by two or more properties or is channeled by some means indirectly to the adjacent street

Access Point – A driveway or other opening for vehicles to enter from or exit to a street.

Access, Private – A private access is an access not in public ownership or control by means of deed, dedication, or easement.

Access, Public – A means of physical approach available to the general public.

Accessory Building or Structure - A building or structure that is subordinate in size and purpose to the principal structure of the same lot or parcel and serving a purpose customarily incidental to the use of the principal structure or use of land.

Accessory building, Height of - the vertical measurement down from the highest point on the structure to an intersection with the horizontal projection of a plane established as the median between the highest and lowest points of original grade beneath the enclosed portion of the structure. (See Appendix for diagrams.)

Accessory feature - any manmade structure erected upon or appurtenant to real property

Accessory use - a use incidental, related, appropriate, and clearly subordinate to the main use of the lot or building, which accessory use does not alter the principal use of the subject lot or parcel.

Acre - an area of land containing 43,560 square feet.

Adjacent - nearby, but not necessarily touching.

Administrative and Professional Office - any building, structure, or portion thereof used or intended to be used as an office for a lawyer, architect, engineer, surveyor, planner, optometrist, accountant, doctor, dentist, or other similar professions.

Agriculture - the tilling of the soil, raising of crops, horticulture, viticulture, silviculture, small livestock farming, dairying and/or pasture and range livestock production, including all uses customarily incidental thereto but not including slaughter houses, fertilizer yards, or plants for the reduction of animal matter or any other industrial use which is similarly objectionable because of noise, odor, smoke, dust or fumes. Agriculture does not include the concentrated single-use operation of feed lots, hog, turkey, chicken, fur-bearing animals or other similar farms, unless these operations are operated in conjunction with or are a part of the crop production of the same or adjoining parcel under common ownership.

Alley - An unnamed public or private right-of-way less that is primarily designed to serve as secondary access to the rear or side of those properties whose principal frontage is on some other street.

Amendment - a change in the wording, context, or substance of this ordinance, or an addition or deletion or a change in the zone district boundaries or classifications of the zoning map.

Animal Hospital - Any building or portion of a building designed or used for the care, boarding, observation, and treatment of animals, including a veterinary clinic.

Antenna - Any structure designed for transmitting signals to a receiver or receiving station or for receiving television, radio, data, communication, or other signals from other antennas, satellites, or other services.

Antique - a product that is sold or exchanged because of value derived or because of oldness as respects the present age, and not simply because same is not a new product.

Apartment - A part of a building consisting of a room or rooms intended, designed, or used as a residence by an individual or a single family.

Appeal - an action which permits anyone to arrange for a hearing from other than the individual or group from whose decision the appellant seeks redress.

ARS - Arizona Revised Statutes (Arizona State Law).

Artist - One who practices the fine arts in which imagination and taste presides over the execution, including painting, drawing, sculpture, poetry, music, dancing, and dramatic art. This is not deemed to include the business of teaching the mechanics of the art.

Attached building - (see Building, Attached).

Automobile Sales – Storage and display for sale of more than two motor vehicles or any type of trailer provided the trailer is unoccupied, and where repair or body work is incidental to the operation of the new or used vehicle sales.

Automobile Service Station – Any building, structure, or land used primarily for the dispersal, sale, or offering for sale of automotive fuels, oils or accessories, including lubrication of automobiles and replacement or installation of minor parts and accessories, but not including major repair work such as motor replacement or rebuilding, body and fender repair or painting.

Automobile Repair Services Establishment – Any building, structure, improvements, or land used for the repair and maintenance of automobiles, motorcycles, trucks, trailers, or similar vehicles, including but not limited to body, fender, muffler, or upholstery work, oil change and lubrication, painting, tire service and sales, or installation of radios, car alarms, or stereo equipment. Does not include private garages used for the storage or maintenance of the owner or occupants' automobile.

Automobile Wrecking Yard – The dismantling or wrecking of used motor vehicles or trailers, or the storage, sale, or dumping of dismantled or wrecked vehicles or their parts.

Bed and breakfast - a building or buildings containing central kitchen facilities and not more than three (3) rooms used to provide lodging for compensation; provided that the owner or caretaker lives on the premises, smoke alarms are installed and parking has no negative effect on the neighborhood.

Beekeeping and Associated Definitions

Apiary – A place where bee colonies are kept.

Beekeeper – a person who owns and/or breeds bees, especially for their honey.

Beekeeping (or apiculture) – the maintenance of bee colonies, commonly in man-made hives by humans. May include the manufacture of honey, beeswax, and other byproducts of the beekeeping process.

Colony – the inhabitants of the hive, including the queen, drones, worker bees and brood.

Flyway barrier – a solid wall, fence, dense vegetation, or combination of these materials at least six (6) feet high that extends at least ten (10) feet beyond the hives on each end of a bee colony.

Block - An area of land within a subdivision that is entirely bounded on all sides by streets and/or exterior boundary or boundaries of a subdivision.

Board of Adjustment - (see Section 106)

Boundary, Zone - the limit and extent of each zone district classification as shown on the official zoning map.

Building - a structure having a roof supported by columns or walls (see Structure).

Building, Attached - a building which has at least part of a wall in common with another building, or which is connected to another building by a roof.

Building, Detached - a building which is separated from another building or buildings on the same lot.

Building, Height of - the vertical measurement down from the highest point on the structure to an intersection with the horizontal projection of a plane established as the median between the highest and lowest points of original grade beneath the enclosed portion of the structure. (See Appendix for diagrams.)

Building, Principal - a building, or buildings, in which is conducted the principal use of the lot on which it is situated. In any residential district, any dwelling shall be deemed to be the main building of the lot on which the same is situated.

Building Area - the total areas, taken on a horizontal plane at the mean grade level, of the principal buildings and all accessory buildings, exclusive of decks, uncovered porches, terraces, and steps.

Building Permit – An official document or certification that is issued by the building official and which authorizes the construction, alteration, enlargement, conversion, reconstruction, remodeling, rehabilitation, erection, demolition, moving, or repair of a building or structure.

Building Inspector – A governmental employee charged with enforcement of the building code, and such other ordinances as may be assigned to their department.

Building Scale – The perceived relative height and bulk of a building to that of neighboring buildings.

Building Setback - the minimum distance as prescribed by this ordinance between any property line and the closest point of the foundation or any supporting post or pillar of any building or structure related thereto.

Building Site – Land occupied or intended to be occupied by a building or interrelated buildings, together with all open space required by this ordinance, which is located on a lot that has been lawfully created and meets all criteria of this ordinance for the intended use. Does not include any streets, alleys, access easements or other rights-of-way necessary for access to the property, or as a means of access through one property to another parcel of land.

Business Day – Any day that Town Hall is open for the conduct of regular business, excluding Saturdays, Sundays, holidays, and other days on which Town offices are officially closed. Holidays are those recognized by the Town of Jerome.

Business or Commerce - The purchase, sale or other transaction involving the handling or disposition (other than defined in the term “industry”) of any article, substance or commodity for livelihood or profit, including in addition, operation, or provision of any service or service establishment, office building, outdoor advertising sign or structure, recreational or amusement enterprise conducted for livelihood or profit.

Calendar Day – Every day shown on a calendar, including Saturdays, Sundays, and holidays

Campground - any lot, parcel, or tract of land used, designed, maintained, and intended for rent of plots or sites to accommodate temporary camping by the travelling public with or without sanitary facilities and water, whether or not a charge is made for the use of the park and its facilities.

Caretaker, Property – Any person who resides on the property and who performs maintenance or repair services on a regular basis.

Caretaker’s Residence – A single-family dwelling unit accessory to an agricultural, professional, commercial, or industrial use for occupancy by the property caretaker.

Cargo Container – A standardized, reusable vessel that is or appears to be: (1) originally, specifically or formerly designed for or used in the packing, shipping, movement or transportation of freight, articles, goods, or commodities, or (2) designed for or capable of being mounted or moved on a rail car, or (3) designed for or capable of being mounted on a chassis or bogie for movement by truck trailer or loaded on a ship.

Carport - an accessory structure or portion of a main structure open on one (1) or more sides designed for the storage of motor vehicles, without full enclosure.

Cemetery - land used or intended to be used for the burial of the dead, and dedicated for such purposes, including columbariums, crematoriums, mausoleums, and mortuaries when operated in conjunction with and within the boundaries of such premises.

Child Care Center – A facility other than a private residence that provides care, supervision, education, instruction, developmental activities, or a combination thereof for minor children for periods of less than 24 hours per day. The facility is generally described as child care center, day care center, day nursery, nursery school, parent cooperative pre-school, play group, or drop-in center. "Child care center" or "day care center" does not include a Sunday school conducted by a religious organization where children are cared for during short periods of time while persons responsible for such services are attending religious activities.

Child Day Care Home – A private residence in which more than six but not more than 12 minor children are given care and supervision for periods of less than 24 hours a day, unattended by a parent or legal guardian, except children for whom the provider is a parent, stepparent, guardian, custodian, or other relative.

Church – A building wherein persons regularly assemble for religious worship and which is maintained and controlled by a religious body organized to sustain a public worship, together with all accessory buildings and uses customarily associated with such primary purpose.

Circulation Plan - That portion of the General Plan adopted by the Planning and Zoning Commission and Town Council designating and defining the physical street system for Jerome, Arizona.

Clinic – A facility providing medical, psychiatric, or surgical service for sick or injured persons exclusively on an outpatient basis, including emergency treatment, diagnostic services, training, administration, and services to outpatients, employees, or visitors.

Club – Buildings and facilities, owned or operated by a corporation, association, person or persons, for a social, educational, or recreational purpose, to which membership is required for participation and not primarily operated for profit nor to render a service that is customarily carried on as a business.

Clubhouse – A building to house a club or social organization not conducted for private profit, as documented by state or federal records, and which not an adjunct to or operated by or in connection with a public tavern, café, or other public place.

Commission - Town of Jerome Planning and Zoning Commission. (See Section 105.)

Common Area – Land in a development held in common or single ownership and not reserved for the exclusive use or benefit of an individual tenant or owner.

Conditional Approval – An affirmative action by a commission or council indicating that approval will be contingent upon satisfaction of certain specified stipulations.

Contiguous – In contact, adjoining, or touching another object or item, as distinguished from being adjacent.

Convalescent Home - (same as Nursing Home).

Cooking Facility – An area containing facilities for the storage, cooking, or preparation of food, that is accessory to a principal use. A cooking facility may be located in an enclosed or unenclosed area. Specifically includes a sink, refrigerator, stove, and oven, but not microwaves, hotplates, or other similar appliances.

Cornice – Any horizontal member, structural or nonstructural, of any building, projecting outward from the exterior walls at the roof line, including eaves and other roof overhang.

Council - Jerome Town Council.

Court – An open, unoccupied space, other than a yard, on the same lot with a building or group of buildings, which is bounded on two or more sides by such building or buildings.

County - Yavapai County, State of Arizona.

Covenant, Protective – A contract entered into between private parties which constitutes a restriction on the use of a particular parcel of property.

Cultural Resources – Those resources that possess qualities of significance in national, state, or local history, architecture, archaeology, and culture and which are present in districts, sites, structures, and objects that possess integrity of location, design, setting, materials, workmanship, and association.

Cupola – A small dome and the shaft that supports it; sits on top of a building.

Dancehall – A place of assembly, open to the public and operated for profit, where dances, parties, receptions, and other gatherings are held. Dance halls may provide live entertainment, may serve alcoholic beverages, and may serve catered meals provided the owner or operator holds the appropriate licenses and permits.

Day Care - (see Child Care Center).

Dead-End Street - A street or road having a traffic outlet on one end only. A dead-end street may or may not have temporary provisions for the turning around of vehicular traffic.

Deck – A roofless outdoor space built as a platform structure at least twelve (12) inches above ground, projecting from the wall of a building, and connected by structural supports at grade or by the building structure.

Dormer – A window vertical in a roof or the roofed structure containing such a window.

Drive-In Theater - an open air theater where the performance is viewed by all, or part, of the audience from motor vehicles.

Drive-Through Establishment - A business establishment so developed that its retail or service character is dependent on providing a driveway approach or parking spaces for motor vehicles so as to serve patrons while in the motor vehicle rather than within a building or structure. (For restaurants, see Restaurant, Fast Food.)

Driveway – A private roadway providing access for vehicles to a parking space, garage, dwelling, or other structure.

Dump – (See Landfill)

Dwelling - A building or portion thereof designed or used primarily as living quarters for one or more families, but not including fraternity and sorority houses, nursing homes, hotels, motor lodges, or other accommodations for the transient public.

Dwelling, Single-Family - a detached building designed exclusively for occupancy by or occupied by one (1) family for residential purposes.

Dwelling, Duplex – A building designed as a single structure, containing two separate living units, each of which is designed to be occupied as a separate permanent residence for one family.

Dwelling, Triplex – A building designed as a single structure, containing three separate living and housekeeping units, each of which is designed to be occupied as a separate permanent residence for one family.

Dwelling, Quadplex - A building designed as a single structure, containing four separate living and housekeeping units, each of which is designed to be occupied as a separate permanent residence for one family.

Dwelling, Live/Work - a dwelling unit combining residential use types with limited nonresidential-use types.

Dwelling (Home), Manufactured – A factory-built, single-family structure that is manufactured under the authority of the National Manufactured Home Construction and Safety Standards Act, is transportable in one or more sections, is built on a permanent chassis, and is used as a place of human habitation; but which is not constructed with a permanent hitch or other device allowing transport of the unit other than for the purpose of delivery to a permanent site, and which does not have wheels or axles permanently attached to its body or frame.

Dwelling, Modular - a dwelling unit or habitable room thereof which is either wholly or insubstantial part manufactured at an off-site location to be assembled on site, except that it does not include a mobile home as defined in this article.

Dwelling, Multi-Family - a building designed exclusively for occupancy by or occupied by five (5) or more families living independently of each other (i.e., five plex or apartment).

Dwelling Unit – A portion of a building designated as the residence of a one family or individual with suitable approved provisions for eating, sleeping, cooking, and sanitation.

Easement – Shall mean any recorded interest in land owned by another for a specific (limited) use (i.e., access)

Eave – The projecting lower edges of a roof overhanging the wall of a building.

Electric Transmission Line - An electric line used for the bulk transmission of electricity between generating or receiving points and major substations or delivery points and having a rating of over twelve thousand (12,000) volts.

Eminent Domain – The authority of a government to take, or to authorize the taking of, private property for public use.

Erect – The acts of building, constructing, altering, reconstructing, moving a structure upon, or any physical operations on the premises which are for construction. Excavation, fill, drainage, material storage, hauling, and the like shall be considered a part of erection.

Essential Services -Services provided by public and private utilities, necessary for the exercise of the principal use or service of the principal structure. These services include underground, surface, or overhead gas, electrical, steam, water, sanitary sewerage, stormwater drainage, and communication systems and accessories thereto, such as poles, towers, wires, mains, drains, vaults, culverts, laterals, sewers, pipes, catch basins, water storage tanks, conduits, cables, fire alarm boxes, police call boxes, traffic signals, pumps, lift stations, and hydrants, but not including buildings used or intended to be used for human habitation.

Façade – The exterior side of a building which faces, and is most nearly parallel to, a public or private street. The façade shall include the entire building walls, including wall faces, parapets, fascia, windows, doors, canopies, and visible roof structures of one complete elevation.

Factory-Built Building – A residential or nonresidential building, including a dwelling unit or habitable room thereof, which is either wholly or in substantial part manufactured at an off-site location to be assembled on-site, except that it does not include a manufactured home, recreational vehicle, or mobile home.

Family - an individual, or two (2) or more persons related by blood or marriage, or a group of persons not related by blood or marriage, living together as a single housekeeping group in a dwelling unit.

Farm – Any land or buildings or structures on or in which agriculture and farming operations are carried on and shall include the residence or residences of owners, occupants, or employees located on such land.

Farming - land used or cultivated which is intended only as a supplementary source of income or livelihood.

Fence – An artificially constructed barrier of wood, masonry, stone, wire, metal, or other manufactured material or combination of materials erected to enclose, screen, or separate areas.

Final Plat - the final drawing of a property being subdivided as prepared by a land surveyor or engineer for recording and approval by the Planning and Zoning Commission and the Town Council.

Floodplain - the areas adjoining the channel of a watercourse, or areas where drainage is or may be restricted by man-made structures which have been or may be covered partially or wholly by floodwater, but shall compose an area not less than that area confined by the fifty-year flood and shall not exceed that area confined by the one hundred-year flood.

Floor Area Ratio (FAR) – The ratio of gross building floor area to the net lot area of the building site.

Frontage - the linear distance of property along a public right of way.

Garage, Private - an accessory building or a main building or portion thereof, used for the shelter or storage of self-propelled vehicles, owned or operated by the occupants of a main building wherein there is no service or storage for compensation.

Garage, Public - any building, except one herein defined as a private or storage garage used for the storage, care or repair or self-propelled vehicles or where any such vehicles are equipped for operation or kept for hire.

Garage, Repair - (see Automobile Repair Service Establishment).

General Plan - a plan developed and adopted by the planning and zoning commission and town council as a guide for future growth and development within the Town of Jerome, including any other plan adopted as a part or any amendments to such plan or parts thereof.

Governmental Agency - includes any agency of the federal, state, county or municipal governments.

Greenhouse - a building or structure constructed chiefly of glass, glass like translucent material, cloth or lath, which is devoted to the protection or cultivation of flowers or other tender plants.

Greenhouse, Industrial – Wholesale business whose principal activity is the growing and selling of plants within an enclosed building.

Guest House – (See Accessory Dwelling Unit)

Guest Room – One or more rooms intended as one occupancy overnight (or longer) by other than a member of the family. If such contains cooking facilities, it is deemed a dwelling unit. Does not include dormitories for sleeping purposes.

Half Street - A street having on a portion, usually one half (1/2), of its required right-of-way width dedicated for public use.

Hardship – A restriction on property so unreasonable that it results in an arbitrary and capricious interference with basic property rights. Hardship relates to the physical characteristics of the property, not the personal circumstances of the owner or user, and the property is rendered unusable without the granting of a variance.

Hedge – A row of closely planted shrubs, bushes, or any kind of plant forming a boundary or fence.

Height, Building or Structure - (see Building, Height of, and Accessory Building, Height of).

Hives – the domicile of bees, including any receptacles or containers inhabited by bees.

Hillside – Land that has an average percent of slope equal to or exceeding 15 percent.

Historic District – A district or zone designated by a local authority or state or federal government within which buildings, structures, appurtenances, and places are of basic and vital importance because of their association with history; or because of their unique architectural style and scale, including color, proportion, form, and architectural detail; or because of their being a part of or related to a square, park, or area the design or general arrangement of which should be preserved or developed according to a fixed plan based on cultural, historical, or architectural motives or purposes.

Historic Preservation – The preservation of historically significant structures and neighborhoods until such time as, and in order to facilitate, restoration and rehabilitation of the building(s) to a former condition.

Historic Preservation/Design Review Board – (see Sections 107 and 304)

Historic Resource, Contributing – A resource in a registered historic district or historic complex supporting the district's or complex's historical significance through location, design, setting, materials, workmanship, feeling, and association.

Historic Resource, Noncontributing – A building, site, structure, or object that does not add to the historic architectural qualities, historic association, or cultural values of the area because it was not present during the period of significance or does not relate to the documented significance of the property due to alterations, disturbances, additions, or other changes, or because it no longer possesses historic integrity nor is capable of yielding important information about the period.

Historic Resources Survey – A comprehensive survey involving the identification, research, and documentation of buildings, sites, and structures of any historical, cultural, archaeological, or architectural importance.

Historic Structure – Any structure that is: (a) listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register; (b) certified or preliminarily determined by the Secretary of the Interior as contributing to the

historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district; (c) individually listed on the Arizona Register of Historic Places; or (d) individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified by the Arizona State Historic Preservation Office (SHPO).

Home Occupation - an occupation, profession, activity or use that is clearly a customary, incidental and secondary use of a residential dwelling unit and which does not alter the exterior of the property or affect the residential character of the neighborhood.

Horticulture – The use of land for the growing or production for income of fruits, vegetables, flowers, nursery stock, including ornamental plants and trees, and cultured sod.

Hospital – An institution, licensed by the state department of health, providing primary health services and medical or surgical care to persons, primarily inpatients, suffering from illness, disease, injury, deformity, and other abnormal physical or mental conditions, and including as an integral part of the institution, related facilities such as laboratories, outpatient facilities, or training facilities. The term shall include sanitariums, preventoriums, and maternity homes.

Hotel – An establishment providing, for a fee, sleeping accommodations and customary lodging services, including maid service, the furnishing and upkeep of furniture and bed linens, and telephone and desk service. Related ancillary uses may include, but shall not be limited to, conference and meeting rooms, restaurants, bars, and recreational facilities.

Impervious surface – Any hard-surfaced, man-made area that does not readily absorb or retain water, including but not limited to building roofs, parking and driveway areas, graveled areas, sidewalks, and paved recreation areas.

Industry, Heavy – Manufacturing or other enterprises with significant external effects, or which pose significant risks due to the involvement of explosives, radioactive materials, poisons, pesticides, herbicides, or other hazardous materials in the manufacturing or other process.

Industry, Light – Manufacturing or other enterprise which assembles, improves, treats, compounds, or packages goods or materials in a manner which does not create a noticeable amount of noise, dust, odor, smoke, glare or vibration outside of the building in which the activity takes place, which does not require extensive outside storage of goods or materials, and which does not generate objectionable amounts of truck traffic.

Infill Development - Development or redevelopment of land that has been bypassed, remained vacant, and/or is underused as a result of the continuing urban development process. Generally, the areas and/or sites are not particularly of prime quality; however, they are usually served by or are readily accessible to existing infrastructure (services and facilities). Use of such lands for new housing and/or other urban development is considered a more desirable alternative than to continue to extend the outer development pattern laterally and horizontally, thus necessitating a higher expenditure for capital improvements than would be required for infill development.

Ingress – Access or entry point or entrance.

Intensification of Use – To alter the character of a use to the extent that the use generates new or different impacts on the health, safety, or welfare of the surrounding neighborhood, including but not limited to the level or amount of traffic, noise, light, smoke, odor, vibration, outside storage, or other similar conditions associated with the use.

Intensity – A relative measure of development impact as defined by characteristics such as the number of dwelling units per acre, the amount of traffic generated, and the amount of site coverage.

Irrigated – Watered by an artificial or controlled means, including but not limited to sprinklers, furrows, ditches, or spreader dikes.

Junk Yard - the use of two hundred (200) or more square feet of any lot or parcel of land for outside storage of any used or secondhand materials, including but not limited to lumber, auto parts, household appliances, pipe, drums, machinery or furniture. The outside storage of used or secondhand materials in an area less than two hundred (200) square feet is permitted only on the rear half of a lot or parcel.

Kitchen - any room in a building containing facilities which are used or intended to be used for storage, cooking, and preparation of food, specifically a sink, refrigerator, stove, and oven.

Kindergarten - same as nursery school, except when operated in conjunction with a school of general instruction and having accredited instruction.

Laundry, Self Help - a building in which domestic type washing machines and/or dryers are provided on a rental basis for use by individuals doing their laundry.

Land - any lot or parcel, developed or undeveloped, and capable of being located, surveyed, staked and described by a legal description

Land split - A division of land whose area is two and one-half acres or less into two or three tracts or parcels of land or lots for the purpose of sale or lease.

Land Surveyor – A person registered in the state in the field of land surveying.

Land Trust – A private, nonprofit conservation organization formed to protect natural resources such as productive farm and forest land, natural areas, historic structures, and recreational areas. Land trusts purchase and accept donations of conservation easements. They educate the public about the need to conserve land, and some provide land-use and estate planning services to local governments and individual citizens.

Landscape Plan – A plan associated with a subdivision or development plan that indicates the placement of landscape materials, including specifications, species, quantities, and method of installation.

Light Pollution – Any adverse effect of man-made light.

Light Trespass – Light spill falling over property lines that illuminates adjacent grounds or buildings in an objectionable manner.

Live Entertainment – Any musical act (not including karaoke), theatrical act (including stand-up comedy), play, revue, scene, dance act, or song and dance act, or any combination thereof, performed by one or more persons, whether or not they are compensated for the performance, in a privately owned premises that is open to the public, whether or not admission is charged. Activities, such as but not limited to, billiards tables, dart boards, shuffleboards, tabletop games, card games, arcade-style games, and similar patron amenities, are not considered live entertainment provided they are not conducted as organized tournaments or other activities intended to attract patrons primarily for entertainment purposes. The presence of such incidental recreational amenities shall not, by itself, constitute entertainment requiring a Conditional Use Permit.

Live/Work Space – Areas within buildings that are jointly used for commercial/industrial and residential purposes where the residential use of the space is clearly secondary or accessory to the primary use as a place of work.

Loading, Off-Street – An unobstructed area provided and maintained for the temporary parking of trucks and other motor vehicles for the purpose of loading and unloading goods, wares, materials, and merchandise.

Lot – A parcel of land occupied or intended for occupancy by a use permitted in this chapter, including one main building, together with any accessory buildings, open spaces, and parking spaces required by this chapter and having its principal frontage upon a street, officially approved place, or legally recorded easement.

Lot Area - the total horizontal area within the lot lines of a lot.

Lot, Corner – A lot located at the intersection of two or more streets.

Lot Coverage – A measure of intensity of land use that represents the portion of a site that is impervious, This portion includes but is not limited to all areas covered by buildings, parked structures, driveways, roads, sidewalks, and any area of concrete asphalt.

Lot Depth – The horizontal distance from the midpoint of the front-lot line to the midpoint of the rear-lot line, or to the rear most point of the lot where there is no rear-lot line.

Lot, Double Frontage – A lot having frontage on two parallel or approximately parallel streets. For the purposes of this definition, a lot which has been denied access to one of the parallel or approximately parallel streets shall not be deemed a double frontage lot.

Lot Line – A line dividing one lot from another or from a street or any public place.

Lot Line, Rear - a lot line which is opposite and most distant from the front lot line.

Lot Line, Side – Any lot line not considered a front or rear lot line.

Lot of Record - a lot which is part of a subdivision, the map of which has been recorded in the Yavapai county recorder's office; or parcel of land, the deed of which is recorded in the office of the county recorder.

Lot Split – The division or redivision of a tract or parcel of land into two lots, building sites, or other divisions for the purpose, whether immediate or future, of sale, legacy, or building development.

Manufacturing – The mechanical or chemical transformation of materials or substances into new products, including the assembling of component parts, the creation of products, and the blending of materials including but not limited to oils, plastics, resins, etc. Includes light or heavy industry.

Marijuana Dispensary – A marijuana dispensary refers to the following: (a) "Nonprofit Medical Marijuana Dispensary" as set forth in The Arizona Medical Marijuana Act, A.R.S. § 36-2801.12; (b) "Dual Licensee" as set forth in The Arizona Smart and Safe Act, A.R.S. § 36-2850.9; (c) "Marijuana Establishment," as set forth in the Arizona Smart and Safe Act, A.R.S. § 36—2850.21(a).

Membership Organization – A group that holds regular meetings and that may, subject to other regulations controlling such uses, maintain dining facilities, serve alcohol, or engage professional entertainment for the enjoyment of dues-paying members and their guests. There are no sleeping facilities.

Mine – An area of land upon which operations to extract valuable mineral deposits or other materials have been conducted, are being conducted, or are planned to be conducted.

Minor Street Plan - A part of the street and traffic circulation plan that is complementary to and interrelated with the General Plan.

Mixed-Use Development – A tract of land or building or structure developed for two or more different uses such as, but not limited to, residential, office, manufacturing, retail, public, or entertainment.

Mixed-Use, Horizontal – A development pattern in which two or more different land uses, such as residential, commercial, office, civic, or recreational, are located on the same site or within the same development area but are arranged side-by-side on separate lots or in separate buildings, rather than vertically within a single structure. The uses function as a cohesive development through shared access, interconnected circulation, coordinated site design, or complementary amenities.

Mixed-Use, Vertical – A development pattern in which two or more different land uses, such as residential, commercial, office, civic, or recreational, are located within a single building.

Mobile Food Unit - A temporary food service establishment that is a vehicle-mounted food service establishment designed to be readily movable.

Mobile Home or Mobile Housing - a movable or portable dwelling over thirty-two (32) feet in length or over eight (8) feet wide, constructed to be towed on its own chassis and designed so as to be installed with or without a permanent foundation for human occupancy as a residence which may include one (1) or more components that can be retracted for towing purposed and subsequently expanded for additional capacity, or two (2) or more units separately towable but dwelling composed of a single unit. Does not include recreational vehicle as defined in this Appendix. The removal of the wheels and running gear shall ***not*** change the meaning of this term. Mobile homes are only those units produced prior to June 15, 1976. Units produced after June 15, 1976, are considered manufactured homes as defined in this Appendix.

National Register of Historic Places – A list maintained by the Secretary of the Interior composed of buildings, sites. Structures, objects, and districts of national, state, or local significance in American history, architecture, archaeology, engineering, and culture.

Natural - the condition of the land, vegetation, rocks, and other surface features which have not been physically disturbed, changed or added to by any action of man or machine.

Natural Resource – Existing natural elements relation to land, water, air, plant, and animal life, including but not limited to soils, geology, topography, surface and subsurface waters. Wetlands, vegetation, and animal habitats.

Newspaper of general circulation – A newspaper that is published or circulated within the Town that is regularly issued for the dissemination of news of a general and public character at stated short intervals of time.

Nonconforming building - (see Section 501).

Nonconforming use - (see Section 501).

Non-Residential Subdivision - The division of a tract of land into parcels for occupancy by non-residential uses and/or structures whether for sale or for building development for leasing and/or renting.

Nuisance – Any thing, condition, or conduct that endangers health and safety, or unreasonably offends the senses, or obstructs the free use and comfortable enjoyment of property, or essentially interferes with the comfortable enjoyment of life.

Nursery – An establishment for the growth, storage, display, and/or sale of plants, shrubs, trees, and materials used in indoor or outdoor planting, conducted within or without an enclosed building.

Nursing Home – A use providing bed care and inpatient services for persons requiring regular medical attention but excluding a facility providing surgical or emergency medical services and excluding a facility providing care for alcoholism, drug addiction, mental disease, or communicable disease.

Office – A room or group of rooms used for conducting the affairs of a business, profession, service industry, or government.

Off-Street Loading Facilities - a site or a portion of a site devoted to the loading or unloading of motor vehicles or trailers, including loading berths, aisles, and access drives. (see Section 510).

Off-Street Parking Facilities - a site or a portion of a site devoted to the off-street parking of motor vehicles including parking spaces, aisles, and access drives. (see Section 510).

Open Area - any area used or intended to be used for parking, recreation, open space, agriculture, landing fields and other similar uses.

Open Space – An area or portion of land, either landscaped or essentially unimproved and which is used to meet human recreational or spatial needs, or to protect water, air, or plant areas.

Open Space, Natural – An area or portion of land maintained in its native condition, often characterized by intact natural landscapes, native vegetation, wildlife habitat, and natural landforms. Allowable activities are limited to passive or low-impact uses such as natural earth walking trails, scientific research, and environmental education.

Original Grade - the condition of the surface of the property at the time of submittal of preliminary site plan with no grading changes made.

Overlay Zoning District – A zoning district to be mapped as an overlay to a use district and which modifies or supplements the regulations of the general district in recognition of distinguishing circumstances such as historic preservation, wellhead protection, floodplain or unit development while maintaining the character and purposes of the general use district area over which it is superimposed.

Parapet – That part of any wall entirely above the roof line.

Park – A public or private area of land, with or without buildings, intended for outdoor active or passive recreational uses.

Parking Area – Any public or private land area designed and used for parking motor vehicles including parking lots, garages, private driveways, and legally designated areas of public streets.

Parking District - a public parking district maintained by the federal, state, county or town government, to special district

Path, Multi-Use – A pathway, which may be paved or unpaved, and is physically separated from motorized vehicular traffic by an open space or barrier and is either within the highway right-of-way or within an independent tract, or easement. Multi-use path activities may include walking, hiking, jogging, horseback riding, bicycling, and roller skating.

Patio - an area, usually paved, that is used for outdoor lounging, dining, and/or recreating that is less than 12 inches above the ground surface. When a structure has a roof or wall enclosure that keeps out the elements, it is not a patio and shall be deemed part of the primary structure for purposes of this Ordinance.

Performance Standard – Zoning regulations that permit uses based on a particular set of standards of operation rather than on particular type of use. Performance standards provide specific criteria limiting noise, air pollution, emissions, odors, vibration, dust, dirt, glare, heat, fire hazards, wastes, traffic impacts, and visual impact of a use.

Permit - A document issued by Jerome, Arizona, granting permission to perform an act or service which is regulated by the Town.

Person – A corporation, company, association, firm, partnership, as well as any individual, state, or political subdivision of a state or agency thereof.

Planning and Zoning Commission - The Planning and Zoning Commission and the Planning Commission of Jerome, Arizona are synonymous.

Plat – A document, prepared by a registered surveyor or engineer, that delineates property lines and shows monuments and other landmarks for the purpose of identifying property.

Playground – A land use designed principally to offer recreation, passive or active, to the public. Also may include a “tot-lot”.

Property Lines - Those lines outlining the boundaries of properties on lots for the purpose of description in sale, lease, building development, or other separate use of property.

Public Building - facilities for conducting public business constructed for various public agencies, including federal, state, county, and town offices and buildings.

Public Hearing - hearings held as required by law.

Public Utility - private or public facilities for distribution of various services, such as water, power, gas, communication, etc., to the public.

Preservation – Means the act or process of applying measures necessary to sustain the existing form, integrity and materials of an historic property. Work, including preliminary measures to protect and stabilize the property, generally focuses upon the ongoing maintenance and repair of historic materials and features rather than extensive replacement and new construction. New exterior additions are not within the scope of this treatment; however, the limited and sensitive upgrading of mechanical, electrical and plumbing systems and other code-required work to make properties functional is appropriate within a preservation project.

Quorum – A majority of the authorized members of a board or commission.

Radial - A line forming right angles with the tangent of any given arc.

Reconstruction - means the act or process of depicting, by means of new construction, the form, features, and detailing of a non-surviving site, landscape, building, structure, or object for the purpose of replicating its appearance at a specific period of time and in its historic location.

Record of Survey – A map prepared by a professional land surveyor that re-establishes survey controls, boundaries, locations of improvements, or the alignment of right-of-ways for recording.

Recreation, Active – Those recreational pursuits which require physical alteration to the area in which they are performed. Such areas are intensively used and include, but are not limited to, playgrounds, ball courts, golf courses, and swimming pools.

Recreational Facilities - include buildings, structures or areas built or developed for purposes of entertaining, exercising or observing various activities participated in either actively or passively by individuals or organized groups.

Recreational Facility, Commercial – Recreational facilities operated as a business and open to the general public for a fee.

Recreational Facility, Private – Clubs or recreation facilities for which a membership charge may be made and which are open only to bona fide members and their guests, such as a gaming, shooting, golf, or tennis club, or other similar activities. A private recreational facility may not be open or available to members of the general public.

Recreation, Passive – Those recreational pursuits which can be carried out with little alteration or disruption to the area in which they are performed. Such uses include but are not limited to hiking and picnicking.

Recreational Vehicle - a vehicular type unit primarily designed as temporary living quarters for recreational, camping or travel use, which either has its own motor power or is mounted on or drawn by another vehicle.

Recreational vehicle park - facilities for the temporary storage, parking and maneuvering of recreational vehicles (motor homes, travel trailers, campers etc.) with adequate roads and stall sites, including sanitary and water facilities. Site locations are provided on a day to day basis. Does not constitute a mobile home or trailer park.

Rehabilitation - means the act or process of making possible an efficient compatible use for a property through repair, alterations and additions while preserving those portions or features that convey its historical, cultural or architectural values.

Replat – The act of platting the lots, parcels, and easements in a recorded subdivision or partition plat to achieve a reconfiguration of the existing subdivision or partition plat or to increase or decrease the number of lots in the subdivision.

Restoration - means the act or process of accurately depicting the form, features and character of a property as it appeared at a particular period of time by means of the removal of features from other periods in its history and reconstruction of missing features from the restoration period. The limited and sensitive upgrading of mechanical, electrical and plumbing systems and other code-required work to make properties functional is appropriate within a restoration project.

Residence - a structure containing a dwelling unit designed for occupancy or occupied by one (1) family living as a single non-profit family housekeeping unit.

Restaurant – Any establishment, however designated, at which food and/or beverage is sold for consumption on the premises to patrons seated within an enclosed building, or elsewhere on the premises.

Restaurant, Drive-In - any establishment where food or beverages are dispensed and may be consumed on the premises, but not within a closed building.

Restaurant, Fast Food – An establishment engaged primarily in the business of preparing food and purveying it on a self-serve or semi-self-serve basis. Customer orders and/or service may be by means of walk-up counter or window designed to accommodate automobile traffic. Consumption may be either on or off the premises.

Retail Sales Establishment – A commercial enterprise that provides goods and/or services directly to the consumer, where such goods are available for immediate purchase and removal from the premises by the purchaser.

Right-of-Way – A strip of land acquired by reservation, dedication, prescription, or condemnation and intended to be occupied by a street, trail, water line, sanitary sewer, and/or other public utilities or facilities.

Roof, Gabled – A roof which slopes from both sides of a ridge.

Roof, Gambrel – A gabled roof with two slopes on each side, the lower steeper than the upper.

Roof, Hipped – A roof with slopes on all four sides, continuous from peak to eaves.

Roof, Mansard – A roof with two slopes on each of four sides, the lower steeper than the upper.

School, Charter – A public school established by a contract with the state board of education, the state board for charter schools, a university under the jurisdiction of the Arizona board of regents, a community college district or a group of community college districts, pursuant to Title 15, Chapter 1, Article 8 of the Arizona Revised Statutes, to provide learning that will improve pupil achievement.

School, **Elementary, Junior High, High** - public and other non-profit institutions conducting regular academic instruction at kindergarten, elementary and secondary levels and offering general academic instruction equivalent to the standards prescribed by the state board of education.

School, Nursery - (See Child Care Center)

School, Trade - schools offering preponderant instruction in the technical, commercial or trade skills, such as real estate schools, business colleges, electronic schools, automotive and aircraft technicians schools and similar commercial establishments operated by a non-governmental organization.

Screen – A structure providing enclosure and a visual barrier between the area enclosed and the adjacent property. A screen may also be nonstructured, consisting of shrubs or other growing materials.

School, Private or Parochial - an institution conducting regular academic instruction at kindergarten, elementary, and secondary levels operated by a non-governmental organization.

Service Establishment – Any establishment whose primary activity is the provision of assistance, as opposed to products, to individuals, business, industry, government, and other enterprises.

Setbacks - (see Yard).

Sewage System, Private – A sewage disposal system that collects, treats, and disposes of sewage independent of any public sewage facilities.

Sewage System, Public – An off-site system for the treatment and disposal of sewage in which sewage is conveyed by interceptor to a publicly operated treatment plant and disposed of through means approved by the State of Arizona.

Shed – A relatively small structure often purchased pre-built or as a kit in pre-fabricated sections. It is not designed to be served by heat, electricity, or plumbing, and does not need to be placed on a permanent foundation. The structure is intended to be used as a storage space or a workshop.

Short-Term Rental – Any individually or collectively owned single-family or one-to-four-family house or dwelling unit or any unit or group of units in a condominium or cooperative that is also a transient public lodging establishment or owner-occupied residential home offered for transient use if the accommodations are not classified for property taxation under A.R.S § 42-12001. Does not include a unit that is used for any nonresidential use, including retail, restaurant, banquet space, event center or another similar use.

Sidewalk - That paved portion of the right-of-way between the curb lines or lateral lines of the roadbed and the boundary line of said right-of-way designed and intended for the movement of and use of pedestrian traffic

Sign - (see Section 509).

Site - a parcel of land, subdivided or unsubdivided, occupied or to be occupied by a use or structure.

Site Plan – A plan, to scale, showing uses and structures proposed for a parcel of land as required by the regulations. May include, but is not limited to, lot lines, streets, building sites, reserved open space, buildings, and major landscape features, both natural and manmade.

Spirituous Liquor Tasting Facility - An establishment promoting the retail sales of vinous, spirituous or malt liquor to consumers, and allowing tasting of those vinous, spirituous or malt liquors on the premises of the tasting facility. A vinous, spirituous or malt liquor tasting facility may include snacks, not meals, to consume with vinous, spirituous or malt liquor as a complement to but not as the primary function of the tasting facility. Vinous, spirituous or malt liquor tasting facilities may not include dining room seating. Vinous, spirituous or malt liquor tasting facilities may have an “Other Food” License for ware washing and appetizer preparation only, not for meal preparation. A

Spirituous Liquor Tasting Facility shall not include establishments with a Series 12 restaurant liquor license.

Stable - a detached accessory structure including, but not limited to, a corral or paddock for the keeping of one or more horses owned by the occupants of the premises and which are not kept for remuneration, hire or sale.

Stable, Commercial - a structure including, but not limited to, a corral or paddock for the keeping of horses for remuneration, hire or sale.

Storm Sewer - A constructed conduit necessary, useful, or convenient for the collection and carrying of surface waters to a drainage course.

Story - that portion of a building included between the surface of any floor and the finished ceiling next above it or the finished under surface of the roof directly over that particular floor.

Street - Any existing or proposed street, avenue, boulevard, road, lane, parkway, place, bridge, viaduct or easement for public or private vehicular access or a street in a plat duly filed and recorded in the County Recorder's office. A street includes all land within the street right-of-way, whether improved or unimproved, and includes such improvements as pavement, shoulders, curbs, gutters, sidewalks, parking spaces, bridges and viaducts.

Street, Arterial - A street or road with the principal function to serve as a part of a major network for the through traffic flow, separate from local traffic, to and from areas of principal tragic generation, of adequate design, capacity and construction to provide for the safe and rapid distribution and collection of through traffic and to provide limited ingress and egress to and from collector and local streets.

Street, Collector - A street or road that serves local traffic movement within an area, and traffic between major arterials and local streets and provides a means of ingress and egress to local streets and abutting property; also serves to connect adjacent neighborhoods and includes the principal entrance streets into residential neighborhoods. There may also be provisions for parking and loading or unloading on collector streets.

Street, Cul-de-sac - A local street of relatively short length with one end open to traffic and the other end permanently terminating in a vehicular turnaround.

Street, Minor - A street or road used primarily for direct access and egress to residential, commercial, and industrial areas and having major service functions of loading, unloading, and direct access and egress to abutting property, and being controlled in such fashion as to discourage through traffic and maintain relatively slow speed. There may also be provisions for parking on minor streets.

Street, Frontage Road - A minor street, parallel to and adjacent to an arterial street, whose primary purpose is providing access to abutting properties.

Street, Stub - A short dead-end street or road, no more than one lot deep in length, formed at the boundaries of a subdivision to provide access to abutting property.

Street Line - the boundary line between street right-of-way and abutting property.

Structure - anything constructed or erected which requires a fixed location on the ground, including a building but not including a fence or wall, unless the wall is part of the building.

Structure, Main - a structure housing the principal use of a site or functioning as the principle use.

Structure Alteration - any change in the supporting members of a building, such as foundations, bearing walls, columns, beams, floor or roof joints, or any change in the exterior dimensions of a building, excepting those changes which may result from providing minor repairs and building maintenance.

Subdivision of Land - (see Arizona Revised Statutes, Section 9-463).

Subdivider - Any individual, firm, association, syndicate, co-partnership, corporation, trust or any other legal entity commencing proceedings under the regulations of Article VII Subdivision Standards, to effect a subdivision of land hereunder for himself or for another.

Subdivision - Improved or unimproved land or lands divided for the purpose of financing sale or lease, whether immediate or future, into four (4) or more lots, tracts, or parcels of land, or, if a new street is involved, any such property which is divided into two (2) or more lots, tracts, or parcels of land, or any such property, the boundaries of which have been fixed by a recorded plat, which is divided into more than two (2) parts. This definition includes land splits. Also includes any condominium, cooperative, community apartment, townhouse or similar project containing four (4) or more parcels, in which an undivided interest in the land is coupled with the right of exclusive occupancy of any unit located thereon, but plats of such projects need not show the buildings or the manner in which the buildings or airspace above the property shown on the plat are to be divided.

Swarming – Swarming is a natural process in the life of a honeybee colony. Swarming occurs when a large group of honeybees leaves an established colony and flies off to establish a new colony. Swarming is a natural method of propagation that occurs in response to crowding within the colony.

Swimming Pool - any above or below-ground structure containing or intended to contain water for recreational uses, including wading pools.

Tentative Plat or Preliminary Plat - That portion of a preliminary plan or any separate drawing of a parcel of land that conforms with the requirements of the subdivision regulations intended for subdivision and approval of the Planning and Zoning Commission.

Town - the Town of Jerome, Yavapai County, Arizona.

Travel Trailer - a vehicle without motive power, portable structure with wheels built on a chassis, designed as a temporary dwelling for travel recreation and vacation purposes, having a body width not exceeding eight (8) feet and its body length does not exceed thirty-two (32) feet.

Trailer Park or Court - facilities for the storage, parking, and maneuvering of mobile homes or trailers with adequate road and stall sites, and providing adequate sanitation and water facilities required to meet the needs of the residents. Site location is provided on a rent or lease basis. Includes mobile home parks.

Tree, Heritage – A designated tree that is unique and important to the cultural landscape of Jerome because of its species, age, size, location, and/or historical significance.

Unapproved Lot or Parcel - A lot or parcel of land that may be legally described on a deed, appear on a recorded or unrecorded map or been assigned a parcel number by the County Recorder but has never been officially approved by any past or present Jerome Town Council.

Use – Any purpose for which a lot, building, or other structure or a tract of land may be designated, arranged, intended, maintained, or occupied; or any activity, occupation, business, or operation carried on or intended to be carried on in a building or other structure or on a tract of land.

Use, Conditional – A use of property that may be permitted only by conditional use permit and which use must comply with all terms and conditions of the permit.

Use, Permitted – A use permitted in a district without the need for special administrative review and approval, upon satisfaction of the standards and requirements of this ordinance.

Variance - (see Arizona Revised Statutes, Section 9-462, and Section 305 of this Ordinance).

Vineyard - is an area of land planted with cultivated grapevines.

Viniculture - is the science, cultivation and study of grapes which deals with the series of events that occur in a vineyard, which vineyard produces grapes specifically for winemaking, whether for commercial, non-commercial or domestic use. The term “viniculture” shall not apply to plantings of one hundred (100) vines or less.

Wall - any structure or device forming a physical barrier which is so constructed that fifty (50) percent or more of the vertical surface is closed preventing the passage of light, air and vision through said surface.

Warehouse - a building or buildings used for the commercial storage of goods, where no retail or wholesale operations are conducted at the site.

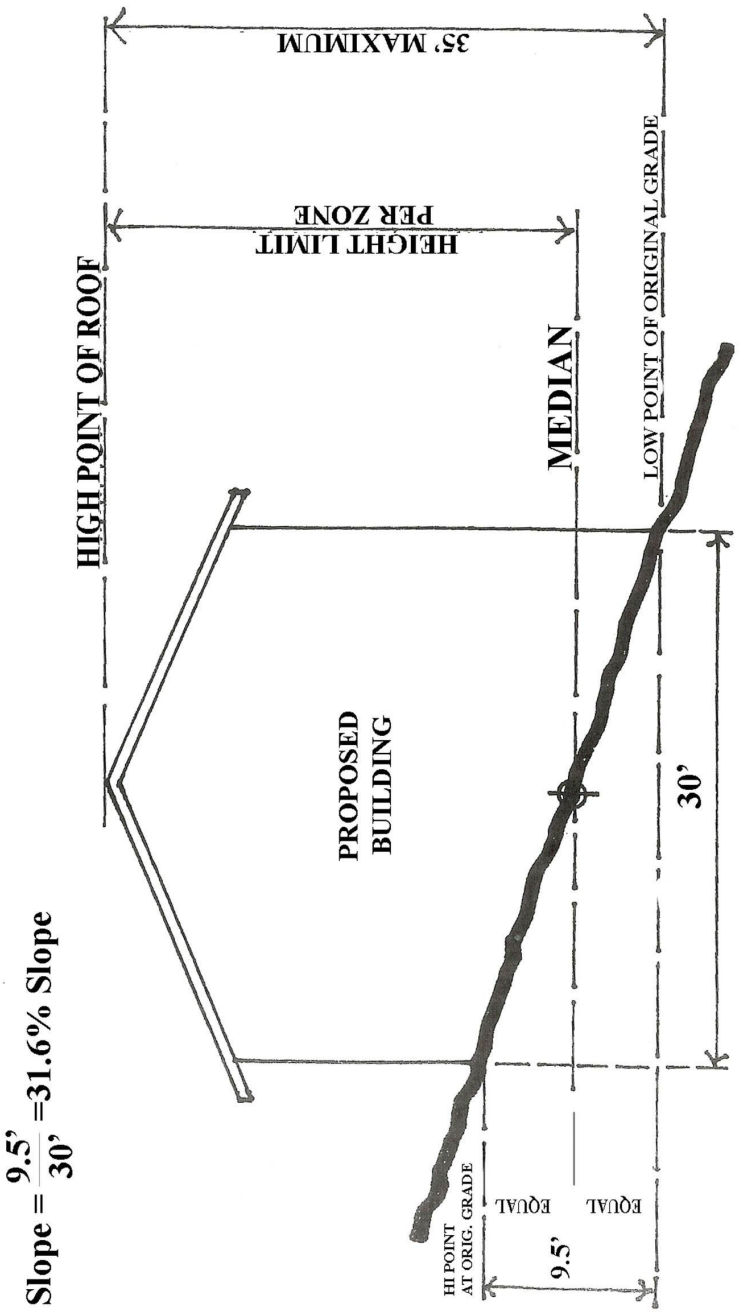
Wholesale - the sale of goods or materials for the purposes of resale.

Water System, Community - a water supply system publicly or privately owned having an authorized permit, which serves the needs of the residents.

Yard – An open space at grade between a building and the adjoining lot line, unoccupied or unobstructed by any portion of a structure from the ground upward, except as otherwise provided in this ordinance.

Yard, Front - a yard, the depth of which is the minimum required horizontal distance between the front line and a line parallel thereto on the lot, which yard extends across the full width of the lot.

Yard, Rear - a yard, the depth of which is the minimum required horizontal distance between the rear lot line and a line parallel thereto on the lot, which yard extends across the full width of the lot.



Yard, Side - a yard, the width of which is the minimum required horizontal distance between the side lot line and a line parallel thereto on the lot, not including any portion of required front yard or required rear yard.

Zone - a district classification established by this ordinance which limits or permits various and specific uses.

Zone District - a zone area in which the same zoning regulations apply throughout the district.

Zoning Area – The area within one hundred fifty feet, including all rights-of-way, of the affected property subject to the proposed amendment or change and the area of the proposed amendment or change.

Brett Klein
Town Manager / Clerk
Town of Jerome
600 Clark Street
P.O. Box 335
Jerome, AZ 86331

RE Town of Jerome, Mid Park Handicap Parking Design

Dear Brett,

SEC is pleased to provide a proposal from review and design on design handicap ramp at the middle park. SEC propose to provide the following services,

- Gather topography at the upper section of the park.
- Review the drainage patterns
- review and develop concepts for possible locations for handicap ramps.
- Develop final plans
- Develop specifications
- Develop opinion of cost
- Assist the Town with design approvals

The proposal excludes geotechnical, structural or Traffic engineering. Construction staking, post design services or certification are not part of this proposal. Based on our understanding, we propose providing the above services for an estimated cost of $29.690.00. All work will be billed at current Time & Material rates.

If this meets your approval, please sign the attached Work Order and return it to our records. Schedule A & B is for your records. We look forward to working with the Town on this project. Pease feel free to contact me at kginige@sec-landmgt.com or 928-634-5889 if I can be of assistance.

Sincerely,

Krishan Ginige, P.E., MS, CFM
President

PROJECT LOCATION Yavapai County Town of Jerome

PROJECT DESCRIPTION TOJ Engineering and Surveying – Mid Park Handicap design

1) Per attached SEC Proposal Letter, dated 10/27/2026, attached hereto and made a part of this Work Order.
2) Any additional requests will be billed as "extra" items at current Time & Materials rates. Prior approval will be obtained before proceeding.

SEC, Inc. agrees to perform the work outlined herein under the terms and conditions set forth in Schedules A and B, attached hereto and made a part hereof. Client agrees to pay an estimated fee of **$ 29.690.00** plus any direct expenses. This is an estimated fee only, based upon information provided to SEC, Inc. by client, and in the event the information is inaccurate, or in the event of unforeseen circumstances, this estimate may change. Estimate may become void if Work Order is not received by **01/27/2027 .**

If additional work is requested during the project agreed to be performed under this agreement, fees will be based on the current SEC, Inc., hourly rate schedule. A retainer is to be remitted with this Work Order in the amount of **$**__. The balance due SEC, Inc., shall be paid upon completion, or in payments during the course of the project. All past due accounts after deducting current payments and credits, shall bear interest at the rate of 1¾ percent per month, compounded, which is an annual percentage rate of 21 percent. Client agrees to pay all costs of collection, including reasonable attorney fees. Liability for errors and omissions in the work is limited to the amount of the fee.

RATE SCHEDULE - SCHEDULE A

Professional Services
(effective October 15, 2025)

The cost of services, provided by SEC, Inc., are determined as basic direct wages times a cost multiplier for overhead expenses. Hourly charges for different disciplines are as follows:

Functions	Hourly Rate ($)
Principal Engineer / Company Officer	225.00
Project Engineer Level II	175.00
Project Engineer Level I / Planner Level VI	145.00
Senior Civil Engineer / Planner Level V	135.00
CE Level IV / Registered Land Surveyor Level II	125.00
CE Level III / Registered Land Survey Level I or / Technician Level V / Planner Level IV	115.00
CE Level II / Survey Chief III / Technician Level IV / Planner Level III	105.00
CE Level I / Survey Chief II / Technician Level III / Planner Level II	95.00
Survey Chief Level I / Technician Level II / Planner Level I	85.00
Technician Level I	75.00
Laborer	65.00
CADD Designer Level II	95.00
CADD Designer Level I	85.00
GIS – Level II	85.00
GIS - Level I	75.00
CADD Drafter	75.00
Secretary / Non-professional Research (min 1 hour)	65.00

See Natural Resource Rate SCHEDULE A, if applicable

Overtime/Expert Witness

Overtime for all disciplines will be charged at the rate of 1.5 times the hourly rate and 2.0 times the hourly rate for Sundays and holidays. Expert Witness will be charged at 2.0 times the hourly rate for that professional.

Equipment and Materials

Vehicles		0.70/mile
Field Materials		Cost plus 20%
Robotic Total Station		$30/hr
GPS Receiver		$35/hr
Special Service(s) & Equipment Rental		Cost plus 20%
Blackline Prints:		0.25/sf (Public 1.00/sf)
Color Prints:	11" x 17"	3.50 each
Mylar:	18” x 24”	7.50 each
	24” x 36”	12.50 each
Xerox Copies, Letter & Legal: single/double sided		0.15/0.20 each
Xerox Copies: 11” x 17” or Color 8½” x 11”		0.75 each
Color Prints/Plots (24” x 36”)		15.00 each
Check Plots		.20¢/sf
CD copy		$20.00 each
Miscellaneous		Cost plus 20%

Note: Above fee schedule rates are subject to change without notice. Equipment and material costs are subject to change without prior notice, to reflect supplier price changes.

On projects that require a field crew(s) to stay out of town, *per diem* expenses (meals, lodging) will be billed on basis of “costs” plus 20%. On all survey jobs, a **minimum** charge of 2 hours at the current rates will be applied to each job for field work.

TERMS AND CONDITIONS OF AGREEMENT
BETWEEN CLIENT AND SEC, INC.

(SCHEDULE B)

1. **AUTHORIZATION TO PROCEED**. Client's signing of this Work Order constitutes authorization for SEC to proceed with the described services and also constitutes acknowledgment and ratification of services previously rendered at Client's request to the extent they fall within the scope of services described on the Work Order.

2. **RETAINER**. Before SEC begins rendering services, Client shall pay a retainer in the amount set forth on the Work Order. As the retainer is depleted, additional funds will be requested to replenish the retainer balance. Any credit balance in retainer will be adjusted in the final invoice and any amounts due to the Client will be refunded at that time.

3. **INVOICES**. SEC will submit invoices to Client from time to time as services are provided. Invoices are due and payable upon receipt. Client shall promptly review invoices and notify SEC of any objection thereto; absent such objection in writing within ten (10) days of the date of the invoice, the invoice shall be deemed proper and acceptable.

4. **FEES**. Fees are based either on an estimate, quote, or on a time and material (T&M) basis as so stated on the Work Order. Rates are based on the current SEC Rate Schedule (Schedule A). Client shall pay the costs of all materials and direct expenses such as fees, permits, bond premiums, title company charges, delivery charges, travel, lodging, subsistence, blueprints and reproductions, and all other charges and expenses related to completion of the project not specifically covered by the terms of this agreement. In the event such reimbursable items are paid directly by SEC, then such charges and expenses will be invoiced to the Client at direct cost plus twenty (20) percent for handling. A minimum charge of two hours at current rates will be assessed to each survey job.

5. **LIMITATION OF FEES**. SEC's fees shall be limited to the amount set forth in the Work Order. SEC's estimate of the total fees is not a guarantee that all the described services can be performed for that amount but represents its good faith estimation of the approximate total fees that will be earned, based on the information available at the time. However, should the estimated fee amount be reached prior to the limit of services under this Agreement, SEC can limit its services to that amount. If all the services described are not completed, SEC shall provide Client with a revised estimate and proceed to completion only upon Client's authorization (either written or verbal).

6. **EXTRAS**. Client shall pay for any additional work agreed to be performed by SEC at the request of Client, in addition to those set forth herein. The additional work will be charged as extras based on the current SEC hourly rate schedule.

7. **PAYMENT**. Payment for invoices tendered by SEC, are net due upon receipt of the invoice. In the event any invoice is not paid within thirty (30) days, it shall commence bearing compound interest. Beginning on the date the invoice was rendered, compound interest will be calculated at the rate 1.75% per month, (twenty-one (21) percent per annum -- or such rates as may be maximum interest permissible under applicable law, -- whichever is lower). Client agrees to pay all accrued interest together with the charges for services rendered. SEC reserves the right to terminate work on the project until any amounts outstanding are paid in full.

8. **TERMINATION**. Either party may terminate this Agreement with or without cause, upon ten (10) working days written notice to the other. In the event any invoice submitted under this Agreement or under any other agreement between Client and SEC, is not paid in full within forty-five (45) days after rendering, Client agrees that SEC shall have the right to consider said default a material breach of this Agreement. Client shall have ten (10) days thereafter in which to cure said default. If said default is not cured by Client, SEC shall have the right, in addition to all other available rights and remedies, to terminate this Agreement even if the default is in payment of an invoice submitted under another agreement, and to terminate all other agreements between Client and SEC. Upon early termination, Client shall then promptly pay SEC for all of the fees and charges for all services rendered and costs incurred by SEC to the effective date of termination.

9. **CLIENT RESPONSIBILITIES**. Client shall cooperate with SEC by providing everything reasonably necessary for SEC to be able to provide its services., including but not limited to, all necessary information concerning the project and Clients requirements including design criteria, necessary access to public and private lands, legal accounting, insurance services required for the project, necessary permits, and approval of governmental authorities and other individuals.

10. **OWNERSHIP OF DOCUMENTS**. All documents prepared by SEC pursuant to this Agreement are prepared specifically for use in connection with this project. Originals of all such documents are and remain the property of SEC. SEC shall furnish Client with sufficient copies of such documents for its purposes at associated costs. All such documents are not intended or represented to be suitable for reuse by the Client or others on extensions of this project or on any other work. The Client may use such documents for other purposes without further compensation to SEC; however, any reuse without written verification or adaptation by SEC for the specific purpose intended will be at the Client's sole risk and without liability or legal exposure to SEC. Client agrees to indemnify and hold harmless SEC from all claims, damage, losses, and expenses, including attorney's fees, arising out of or resulting from the Client's use of the documents for any purpose other than in connection with this project. Any verification or adaptation of the documents by SEC for other purposes will entitle SEC to further compensation as agreed upon between the parties.

11. **CONSTRUCTION COST ESTIMATES**. SEC has no control over actual project construction costs and estimates of such probable costs represent SEC's good faith estimation only of the approximate, probable cost to construct the project, based on the information available at the time. SEC cannot and does not represent or guarantee that actual project construction costs will not vary substantially from its estimate of probable costs.

12. **ARBITRATION AND LEGAL EXPENSES**. Any controversy of claim relating to this Agreement will be settled by arbitration upon the mutual agreement of the parties. Such arbitration shall be conducted in accordance with the rules of the American Arbitration Association in effect at the time of the arbitration, unless the parties mutually agree to conduct such arbitration by a different procedure. Judgment on the award or decision rendered may be entered in any court having jurisdiction over the matter. In the event of any legal action between the parties to enforce any of the terms of this Agreement, the party in whose favor judgment is rendered, shall be paid by the non-successful party, all costs and expenses incurred, including a reasonable attorney's fee.

13. **LIMITATION OF LIABILITY**. SEC's liability to the Client for any cause or combination of causes is, in the aggregate, limited to an amount no greater than the fee earned under this Agreement.

14. **BINDING EFFECT**. The terms and conditions of this Agreement shall inure to the benefit of and be binding upon the parties and their respective heirs, successors, and assigns. This Agreement shall be governed by and construed in accordance with the laws of the State of Arizona. If any of the provisions of this Agreement are declared invalid, such declarations shall not affect the validity of the remainder of this Agreement.

15. **CAPTIONS**. The paragraph captions used in this Agreement are for convenience only; they are not construed as part of this Agreement; and they in no way define, limit or amplify the provision of this Agreement.

STAFF SUMMARY REPORT

FROM: Brett Klein, Town Manager/Clerk

ITEM: **Item: Consideration of Opting In to the Most Recent Opioid Settlements**

MEETING DATE: November 10, 2026

Summary:

The payouts are based on population, and the Town gets a very small amount <$700 / year. However, the more communities that opt-in, the more the State receives, so 100% cooperation is sought. The settlement funds do go to a good cause as the funds must be earmarked for narcotics prevention and education.

Fiscal Impact:

N/A.

Recommendation:

Staff recommend approval.

EXHIBIT K

Subdivision Participation and Release Form

Governmental Entity:	State:
Authorized Official:	
Address 1:	
Address 2:	
City, State, Zip:	
Phone:	
Email:	

The governmental entity identified above ("*Governmental Entity*"), in order to obtain and in consideration for the benefits provided to the Governmental Entity pursuant to the Settlement Agreement dated August 20, 2026 ("*Albertsons Settlement*"), and acting through the undersigned authorized official, hereby elects to participate in the Albertsons Settlement, release all Released Claims against all Released Entities, and agrees as follows.

1. The Governmental Entity is aware of and has reviewed the Albertsons Settlement, understands that all terms in this Participation and Release Form have the meanings defined therein, and agrees that by executing this Participation and Release Form, the Governmental Entity elects to participate in the Albertsons Settlement and become a Participating Subdivision as provided therein.

2. The Governmental Entity shall promptly, and in any event no later than 14 days after the Reference Date and prior to the filing of the Consent Judgment, dismiss with prejudice any Released Claims that it has filed. With respect to any Released Claims pending in *In re National Prescription Opiate Litigation*, MDL No. 2804, the Governmental Entity authorizes the Plaintiffs' Executive Committee to execute and file on behalf of the Governmental Entity a Stipulation of Dismissal with Prejudice substantially in the form found at [website link to national settlement website to be provided].

3. The Governmental Entity agrees to the terms of the Albertsons Settlement pertaining to Participating Subdivisions as defined therein.

4. By agreeing to the terms of the Albertsons Settlement and becoming a Releasor, the Governmental Entity is entitled to the benefits provided therein, including, if applicable, monetary payments beginning after the Effective Date.

5. The Governmental Entity agrees to use any monies it receives through the Albertsons Settlement solely for the purposes provided therein.

6. The Governmental Entity submits to the jurisdiction of the court in the Governmental Entity's state where the Consent Judgment is filed for purposes limited to that court's role as provided in, and for resolving disputes to the extent provided in, the Albertsons Settlement. The Governmental Entity likewise agrees to arbitrate before the National

Arbitration Panel as provided in, and for resolving disputes to the extent otherwise provided in, the Albertsons Settlement.

7. The Governmental Entity has the right to enforce the Albertsons Settlement as provided therein.

8. The Governmental Entity, as a Participating Subdivision, hereby becomes a Releasor for all purposes in the Albertsons Settlement, including without limitation all provisions of Section X (Release), and along with all departments, agencies, divisions, boards, commissions, districts, instrumentalities of any kind and attorneys, and any person in their official capacity elected or appointed to serve any of the foregoing and any agency, person, or other entity claiming by or through any of the foregoing, and any other entity identified in the definition of Releasor, provides for a release to the fullest extent of its authority. As a Releasor, the Governmental Entity hereby absolutely, unconditionally, and irrevocably covenants not to bring, file, or claim, or to cause, assist or permit to be brought, filed, or claimed, or to otherwise seek to establish liability for any Released Claims against any Released Entity in any forum whatsoever. The releases provided for in the Albertsons Settlement are intended by the Parties to be broad and shall be interpreted so as to give the Released Entities the broadest possible bar against any liability relating in any way to Released Claims and extend to the full extent of the power of the Governmental Entity to release claims. The Albertsons Settlement shall be a complete bar to any Released Claim.

9. The Governmental Entity hereby takes on all rights and obligations of a Participating Subdivision as set forth in the Albertsons Settlement.

10. In connection with the releases provided for in the Albertsons Settlement, each Governmental Entity expressly waives, releases, and forever discharges any and all provisions, rights, and benefits conferred by any law of any state or territory of the United States or other jurisdiction, or principle of common law, which is similar, comparable, or equivalent to § 1542 of the California Civil Code, which reads:

> **General Release; extent.** A general release does not extend to claims that the creditor or releasing party does not know or suspect to exist in his or her favor at the time of executing the release that, if known by him or her would have materially affected his or her settlement with the debtor or released party.

A Releasor may hereafter discover facts other than or different from those which it knows, believes, or assumes to be true with respect to the Released Claims, but each Governmental Entity hereby expressly waives and fully, finally, and forever settles, releases and discharges, upon the Effective Date, any and all Released Claims that may exist as of such date but which Releasors do not know or suspect to exist, whether through ignorance, oversight, error, negligence or through no fault whatsoever, and which, if known, would materially affect the Governmental Entities' decision to participate in the Albertsons Settlement.

11. Nothing herein is intended to modify in any way the terms of the Albertsons Settlement, to which Governmental Entity hereby agrees. To the extent this Participation and Release Form is interpreted differently from the Albertsons Settlement in any respect, the Albertsons Settlement controls.

I have all necessary power and authorization to execute this Participation and Release Form on behalf of the Governmental Entity.

C. Consider Removing from the Table and Further Discussion Regarding the Installation of Security Cameras on Public Safety Facilities

Council will remove the item from the table, and may discuss staff's proposal regarding the installation of security cameras and Councilmember Sheffield's proposed ordinance language.

CREATED BY COUNCILMEMBER SHEFFIELD FOR DISCUSSION / REVIEW

TOWN OF JEROME, ARIZONA PROPOSED ORDINANCE — SUBSTANTIVE LIMITS — CLEAN TEXT

ORDINANCE NO. _____

AN ORDINANCE OF THE MAYOR AND COMMON COUNCIL OF THE TOWN OF JEROME, ARIZONA, AMENDING ARTICLE 4-4 OF THE TOWN CODE BY ADDING SECTIONS 4-4-12 THROUGH 4-4-19, ESTABLISHING LIMITS ON THE RETENTION OF, EXTERNAL ACCESS TO, AND CAPABILITIES OF SURVEILLANCE EQUIPMENT; AND ESTABLISHING AN EFFECTIVE DATE.

WHEREAS, the Council has previously adopted Article 4-4 of the Town Code, requiring Council approval before Surveillance Equipment is acquired, installed, or operated; and

WHEREAS, the Council finds that a requirement of prior approval governs who decides and how visibly, but does not by itself govern how long data is kept, who may obtain access to it, or what capabilities the equipment may have; and

WHEREAS, the Council finds that limits on retention, external access, and equipment capability are appropriately established in advance, by ordinance, rather than case by case; and

WHEREAS, the Council intends that nothing in this Ordinance restrict compliance with Arizona's Public Records Law, with any lawful court process, or with any other obligation imposed by state or federal law;

NOW, THEREFORE, BE IT ORDAINED by the Mayor and Common Council of the Town of Jerome, Arizona:

SECTION 1. Article 4-4 of the Town Code is amended by adding Sections 4-4-12 through 4-4-19 to read as follows:

Section 4-4-12 Application

A. Sections 4-4-12 through 4-4-19 apply to all Surveillance Equipment operated by or on behalf of the Town of Jerome, and to all data collected by that equipment, regardless of when the equipment was installed or approved. This includes equipment continuing in operation under Section 4-4-7 without approval under this Article.

B. Sections 4-4-12 through 4-4-19 apply to Surveillance Equipment installed on Town property by another person or governmental entity under Section 4-4-3, and compliance with these Sections shall be a condition of any approval granted under Section 4-4-3.

C. These Sections do not apply to, and cannot apply to, equipment installed by the Arizona Department of Transportation within the right-of-way of a state highway, including State Route 89A.

D. The Town Manager shall designate a custodian responsible for compliance with Sections 4-4-13 and 4-4-14 and for maintaining the log required by Section 4-4-14(D).

Section 4-4-13 Data Retention

A. Data collected by Surveillance Equipment shall be retained for no longer than thirty (30) days from the date of collection and shall be deleted thereafter, subject to and consistent with records retention schedules approved under A.R.S. Title 41, Chapter 1, Article 2. Where an approved retention schedule requires a longer retention period for a category of record, that schedule controls.

B. Subsection (A) does not require deletion of data that is: 1. part of an active law enforcement investigation; 2. subject to a pending criminal or civil proceeding, a pending claim, or litigation that the Town reasonably anticipates; 3. responsive to a pending request under A.R.S. Title 39, Chapter 1; or 4. subject to a preservation obligation imposed by law or by court order.

C. Data retained under Subsection (B) may be retained for as long as necessary for that purpose and shall be deleted when the purpose has concluded, subject to applicable retention schedules.

D. Deletion under this Section shall occur automatically where the equipment or service is capable of automatic deletion. Where it is not, the custodian designated under Section 4-4-12(D) shall cause deletion to occur on a documented schedule.

Section 4-4-14 Limits on External Access and Disclosure

A. No standing, continuous, automated, bulk, or programmatic access to data collected by Surveillance Equipment shall be provided to any person or agency other than the Town of Jerome. This includes any live feed, application programming interface, shared search platform, regional or national data-sharing network, or arrangement permitting an outside party to query Town data without an individual request.

B. Access described in Subsection (A) may be established only by prior approval of the Town Council by majority vote, as a distinct agenda item, and only for a stated term.

C. Disclosure of individual records to an outside agency shall be made upon a written request identifying the requesting agency, the records sought, and the purpose of the request. The request and the Town's response shall be retained by the custodian designated under Section 4-4-12(D).

D. The custodian shall maintain a log of all disclosures made under Subsection (C) and all access arrangements approved under Subsection (B), and shall report that log to the Council no less than annually as a public agenda item. The log shall identify the requesting agency, the date, and the stated purpose, and shall not include the content of any record.

E. Nothing in this Section limits, restricts, or delays: 1. disclosure required by Arizona's Public Records Law, A.R.S. Title 39, Chapter 1; 2. disclosure pursuant to a valid warrant, subpoena, court order, or other lawful process; 3. disclosure in response to a mutual aid request concerning a specific, ongoing emergency; 4. disclosure to or communication with any federal, state, or local agency where such disclosure or communication is required or

protected by state or federal law, including A.R.S. § 11-1051 and 8 U.S.C. § 1373; or 5. the exercise of law-enforcement authority by any agency with jurisdiction within the Town.

F. Where Surveillance Equipment is owned, hosted, or serviced by a third party, the data terms required by Section 4-4-4(D) apply in addition to this Section.

Section 4-4-15 Facial Recognition, Biometric Identification, and Automated Tracking

A. Surveillance Equipment shall not be equipped with, connected to, or used in conjunction with any system or service providing facial recognition, gait recognition, voice identification, or any other automated biometric identification of an individual.

B. Surveillance Equipment shall not be used to conduct automated tracking of an identified individual's movements over time, and shall not be connected to any system or service that performs such tracking.

C. Data collected by Surveillance Equipment shall not be submitted to any third party for facial recognition or biometric identification analysis.

D. For purposes of this Section only, "Surveillance Equipment" includes body-worn cameras, dash-mounted cameras, and equipment excluded from the definition of Surveillance Equipment under Section 4-4-1(B), notwithstanding that exclusion. Nothing in this Subsection subjects equipment excluded under Section 4-4-1(B) to Sections 4-4-13, 4-4-14, 4-4-16, 4-4-17, or 4-4-18.

Section 4-4-16 Automated License Plate Readers — [ALTERNATIVES; SELECT ONE]

[Option A — Prohibition] The Town shall not fund, acquire, lease, install, or operate an automated license plate reader, and shall not approve the installation or operation of an automated license plate reader on Town property under Section 4-4-3. This Section does not prohibit the manual review of recorded images by a person in connection with a specific reported incident.

[Option B — Conditional] An automated license plate reader may be approved under Section 4-4-2 or Section 4-4-3 only as a distinct agenda item stating that the equipment is an automated license plate reader, and only subject to the following conditions: (1) plate data that does not match an active, lawful alert at the time of capture shall be deleted within seventy-two (72) hours; (2) the equipment shall not be connected to any regional, statewide, or national plate-data sharing network; (3) plate data shall not be shared except as permitted by Section 4-4-14; and (4) the operator shall report the number of captures, matches, and disclosures to the Council annually.

Section 4-4-17 Audio

Surveillance Equipment shall not record, transmit, or store audio, and any audio capability present in such equipment shall be disabled. This Section does not apply to body-worn or dash-mounted cameras, which are excluded from the definition of Surveillance Equipment under Section 4-4-1(B).

Section 4-4-18 Notice at Installation Sites

Signage reasonably visible to a person entering the area covered by Surveillance Equipment shall be posted at or near each installation site, stating that the area is monitored or recorded and identifying the Town or other operating entity. Signage shall be reviewed under Section 4-4-6 where the installation is within the Historic Overlay District.

Section 4-4-19 Approval Threshold — [OPTIONAL; SEE COMPANION NOTES]

[Notwithstanding Sections 4-4-2 and 4-4-3, approval of Surveillance Equipment under this Article shall require the affirmative vote of at least four (4) members of the Town Council. If fewer than five seats are filled, or fewer than five members are eligible to vote on the matter, approval shall require the affirmative vote of all members eligible to vote, but in no case fewer than three (3).]

SECTION 2. Severability. The severability provision at Section 4-4-10 of the Town Code applies to the Sections added by this Ordinance.

SECTION 3. Effective Date. This Ordinance shall take effect thirty (30) days after its passage and adoption.

PASSED AND ADOPTED by the Mayor and Common Council of the Town of Jerome, Arizona, this ____ day of _____, 20____.

Mayor Town Clerk

APPROVED AS TO FORM:

Town Attorney

TOWN OF JEROME, ARIZONA

PROPOSED ORDINANCE — CLEAN TEXT

Discussion Draft — Revision 3 — September 14, 2026

Not introduced. Not scheduled. For Town Manager and Town Attorney review only.

Drafting note on numbering (delete before filing). The article number shown as 4-4 throughout this document is provisional. Article 4-3 of the Town Code is already assigned to the Uniform Fire Prevention Code and is not available. Article 4-4 has not been confirmed as unassigned. Verify against the current Town Code before filing; if 4-4 is occupied, renumber this Article and all internal cross-references globally.

Companion document. All explanatory commentary, legal background, scope limitations, and questions for counsel have been moved out of this document and into the accompanying transmittal memorandum, so that the text below can be reviewed and marked up as legislative language without commentary embedded in it.

ORDINANCE NO. _____

AN ORDINANCE OF THE MAYOR AND COMMON COUNCIL OF THE TOWN OF JEROME, ARIZONA, AMENDING CHAPTER 4 OF THE TOWN CODE BY ADDING A NEW ARTICLE 4-4, SURVEILLANCE EQUIPMENT; REQUIRING TOWN COUNCIL APPROVAL PRIOR TO THE ACQUISITION, INSTALLATION, OR OPERATION OF SURVEILLANCE EQUIPMENT; REQUIRING TOWN COUNCIL APPROVAL FOR THE INSTALLATION OF SURVEILLANCE EQUIPMENT ON TOWN-OWNED PROPERTY OR TOWN RIGHTS-OF-WAY BY OTHER PERSONS OR GOVERNMENTAL ENTITIES; PROVIDING FOR SEVERABILITY; AND ESTABLISHING AN EFFECTIVE DATE.

WHEREAS, Town Code Section 4-2-7 permits apparatus and equipment for the Fire Department to be approved by the Town Manager or the Council, and therefore permits acquisition without any Council vote; and

WHEREAS, Article 4-1 of the Town Code, governing the Police Department, contains no equipment-approval provision of any kind; and

WHEREAS, the Council finds that equipment used to record or monitor activity in public places warrants a public agenda item and a Council vote before acquisition or installation, separate from the approval process applicable to routine departmental equipment; and

WHEREAS, the Town owns and controls real property and rights-of-way within its corporate limits and has authority to determine the terms on which fixed equipment is installed on that property; and

WHEREAS, the Council finds that this Ordinance is in the interest of the public health, safety, and welfare of the Town of Jerome;

NOW, THEREFORE, BE IT ORDAINED by the Mayor and Common Council of the Town of Jerome, Arizona, that Chapter 4 of the Town Code is amended by adding a new Article 4-4 to read as follows:

ARTICLE 4-4 SURVEILLANCE EQUIPMENT

Section 4-4-1 Definitions

For purposes of this Article, the following definitions apply:

A. "Surveillance Equipment" means any camera, video recording device, license plate reader, or similar equipment used for the purpose of recording, monitoring, or capturing images or activity in a public place, right-of-way, or on Town-owned property on an ongoing basis, regardless of whether the equipment is purchased and owned by the Town, leased, provided under a subscription or service agreement, or owned and operated by a third party under contract with or authorization from the Town, and regardless of whether the cost is a one-time purchase price or a recurring fee for access, monitoring, alerts, analytics, or data storage.

B. "Surveillance Equipment" does not include:

1. body-worn cameras used by law enforcement personnel in the course of an individual response or investigation;

2. dash-mounted cameras in Town vehicles; or

3. equipment used solely for internal building security within a Town facility that does not capture images of public areas outside that facility.

C. "Approval by majority vote" means the affirmative vote of a majority of the full membership of the Town Council at a regular or special meeting.

D. "Town property" means real property owned or controlled by the Town of Jerome, and any public right-of-way owned by, dedicated to, or maintained by the Town of Jerome.

Section 4-4-2 Council Approval Required — Town Departments

A. No department, officer, or employee of the Town of Jerome shall fund, acquire, lease, install, operate, or enter into any contract, subscription, or service agreement for Surveillance Equipment without the prior approval of the Town Council by majority vote.

B. This Section applies regardless of whether the equipment is owned by the Town or by a third party, and regardless of whether the Town's obligation is a one-time expenditure or a recurring fee.

C. This Section applies notwithstanding any other provision of this Code, including Section 4-2-7, to the extent that provision would otherwise permit approval of such equipment by the Town Manager alone.

Section 4-4-3 Approval Required — Installation by Other Persons or Governmental Entities on Town Property

A. No person, and no local, county, state, or federal governmental entity or agency other than the Town of Jerome, shall install, place, fund, or operate any Surveillance Equipment on Town property

without the prior approval of the Town Council by majority vote, obtained under the notice procedure required by Section 4-4-5.

B. This Section is an exercise of the Town's authority over its own real property and rights-of-way. It does not apply to, and does not purport to regulate, any governmental entity's own property, equipment, or personnel located outside Town property.

C. Nothing in this Section restricts, conditions, or otherwise affects the law-enforcement authority of any agency with jurisdiction within the Town, including the countywide authority of the Yavapai County Sheriff under A.R.S. § 11-441. This Section applies only to the physical installation and operation of equipment on Town property.

D. This Section does not apply to the right-of-way of any state highway, including State Route 89A, which is under the jurisdiction of the Arizona Department of Transportation pursuant to A.R.S. § 28-332(A).

E. Approval under this Section is in addition to, and not in lieu of, any permit or authorization otherwise required for use of or encroachment upon a Town right-of-way, including any permit required under Town Code Section 14-4-1.

Section 4-4-4 Conditions of Approval; Term; Removal

A. In granting approval under Section 4-4-2 or Section 4-4-3, the Council may impose conditions, including conditions governing location, mounting, field of view, hours of operation, data retention, data access, insurance, and indemnification.

B. Approval granted under Section 4-4-3 shall state a term not to exceed five (5) years and may be renewed by the Council upon application. The Council may revoke an approval granted under Section 4-4-3 for failure to comply with a condition of that approval, after written notice and a reasonable opportunity to cure.

C. Upon expiration or revocation of an approval granted under Section 4-4-3, the approved entity shall remove the equipment and restore the affected Town property at its own expense.

D. Where Surveillance Equipment is owned, hosted, or serviced by a third party, the governing contract, subscription, or service agreement shall provide that the third party may not use data collected by the equipment for any purpose other than delivering the contracted service to the Town, may not sell or share that data with any other party, and shall delete that data upon termination of the agreement.

E. An approval granted under Section 4-4-3 to another governmental entity may be memorialized in an intergovernmental agreement under A.R.S. § 11-952, or in a license or lease of Town property, as the Council determines appropriate.

Section 4-4-5 Public Notice

Any request for Council approval under Section 4-4-2 or Section 4-4-3 shall be identified as a distinct agenda item, described in ordinary language sufficient to inform the public of the type of equipment proposed and its intended location or coverage area, and posted in accordance with the Town's standard public meeting notice requirements under A.R.S. Title 38, Chapter 3, Article 3.1. No additional notice procedure beyond the Town's existing agenda-posting practice is required by this Article.

Section 4-4-6 Historic Overlay District Coordination

A. Surveillance Equipment proposed for installation within the boundaries of the Historic Overlay District shall, in addition to the approval required under Section 4-4-2 or Section 4-4-3, be reviewed by the Design Review Board, or by its successor body with jurisdiction over design review within the Historic Overlay District.

B. Review under this Section is limited solely to the visual placement, mounting, and appearance of the equipment for consistency with the streetscape and visual-quality standards applicable to signs, lighting, and street furniture under the Jerome Zoning Ordinance and the Historic Preservation Element of the General Plan.

C. Review under this Section is advisory only and does not extend to, and shall not be construed as authority over, whether the Surveillance Equipment is approved. That determination rests solely with the Town Council under Section 4-4-2 or Section 4-4-3.

D. Review under this Section shall occur before, or concurrently with, the Council's consideration of the request.

Section 4-4-7 Existing Equipment

A. Surveillance Equipment lawfully installed and in operation prior to the effective date of this Article may continue to be operated without approval under this Article.

B. Any material expansion, relocation, or replacement of such equipment, and any change in the capability of such equipment — including the addition of automated license plate reading, facial recognition or other biometric identification, automated analytics, remote access, or third-party access — shall require approval under Section 4-4-2 or Section 4-4-3, as applicable.

Section 4-4-8 Emergency Exception

Nothing in this Article prevents the temporary deployment of Surveillance Equipment by law enforcement or fire personnel in direct, immediate response to an active emergency. Any such temporary deployment intended to continue beyond the adjournment of the next regular meeting of the Town Council, or beyond thirty (30) days from deployment, whichever occurs first, shall require approval under Section 4-4-2 or Section 4-4-3, as applicable, to continue.

Section 4-4-9 Enforcement

A. Compliance with this Article is a condition of any Town department's authority to expend Town funds for Surveillance Equipment in any form, and a condition of any other person's or entity's use of Town property for that purpose.

B. No purchase order, contract, subscription agreement, or invoice for Surveillance Equipment, including a recurring payment under a service agreement, shall be processed or approved by the Town's finance function without documentation of Council approval obtained under Section 4-4-2.

C. The remedies in this Section are in addition to, and not in place of, any general penalty otherwise applicable under Article 1-8 of this Code.

Section 4-4-10 Severability

If any section, subsection, sentence, clause, phrase, or portion of this Article is for any reason held to be invalid or unconstitutional by a court of competent jurisdiction, or is held to violate state law by the Attorney General under A.R.S. § 41-194.01, that portion shall be deemed a separate, distinct, and independent provision, and such holding shall not affect the validity of the remaining portions of this Article.

Section 4-4-11 Effective Date

This Article shall take effect thirty (30) days after its passage and adoption.

PASSED AND ADOPTED by the Mayor and Common Council of the Town of Jerome, Arizona, this ____ day of _____, 20____.

STAFF SUMMARY REPORT

FROM: Carl Whiting, Fire Chief

ITEM: Jerome Fire Department Bylaws Update

MEETING DATE: October 13, 2026

Summary: The Jerome Fire Department Bylaws are required to be reviewed annually to ensure they remain current and consistent with applicable law and are reflective of the Department's current organizational structure and operations. The current bylaws were last revised three years ago in January 2023.

The proposed revisions update and clarify provisions throughout the bylaws, including department organization, membership, officer responsibilities, governance, conduct, participation and administrative procedures. The proposed updates also incorporate and align applicable provisions with the Personnel Policy recently adopted at September's Council meeting, ensuring that the Department's bylaws are consistent with the newly adopted policies and do not conflict with current Town-wide employment requirements.

Fiscal Impact: $0.00

Recommendation: Approval of Revised JFD Bylaws

TOWN OF JEROME
FIRE DEPARTMENT BYLAWS

ARTICLE I - DEFINITIONS

Active Member – A member who has completed probationary requirements and maintains the participation, training, certification, and other requirements established by the Department for active membership.

Career Member - An individual employed by the Town of Jerome in an authorized Fire Department position and whose duties include fire, emergency medical, rescue, prevention, administrative, or other Department responsibilities as established by the Town. Career members are Town employees and are subject to applicable Town personnel policies, employment requirements, compensation provisions, and other conditions of employment, in addition to these Bylaws and Department requirements applicable to their position.

Chain of Command - The Chain of Command is the established line of authority through which direction, supervision, accountability, operational orders, communications, and reporting are exercised within the Department. Members shall generally communicate concerns, requests, reports, and operational matters through their immediate supervisor or designated officer and proceed through successive levels of authority as necessary. The Chain of Command shall not prevent a member from directly reporting outside the chain of command an emergency, safety concern, unlawful conduct, harassment, retaliation, or other matter when immediate reporting is necessary or when otherwise authorized or required by Town policy or law.

Combination Department – an agency in which at least one active firefighter receives financial compensations such as a salary or hourly wage, and at least one does not, other than limited benefits such as token pay, insurance or awards. This hybrid model blends paid and volunteer personnel, often to meet community needs.

Due Process - means the fair and reasonable procedures afforded to a member before disciplinary action is imposed, consistent with applicable law, Town policy, employment status, and these Bylaws. At a minimum, where applicable, due process shall include notice of the alleged violation or basis for action, a reasonable opportunity to respond, impartial consideration of the matter, and the opportunity for review or appeal as provided by Town policy, these Bylaws, or applicable law. The specific procedures and rights applicable to a member may vary based upon the member's employment or membership status and the nature of the action being considered.

EMT – An Emergency Medical Technician (EMT) is a member who holds a current and valid National and Arizona Emergency Medical Technician certification or other legally recognized credential authorizing the member to provide emergency medical care at the EMT level. An EMT shall provide patient care only within the member's authorized scope of practice, training, certification and Department assignment.

Executive Board -The Department's designated advisory and review body consisting of the Fire Chief, Assistant Fire Chief, and Company Officers, as applicable and as established by these Bylaws or Town policy. The Executive Board shall advise the Fire Chief on Department operations, policy, membership, and other matters referred to it and shall perform the review and other responsibilities assigned to it by these Bylaws. The Executive Board shall not exercise authority reserved by law, Town Code, Town

Council action, or Town policy to the Town Council, Town Manager, Fire Chief, or other authorized Town official.

Firefighter – A Department member who has completed the training and certification requirements established by the Department and applicable Arizona requirements to perform fire suppression, rescue, hazardous material response, emergency response, and related duties within the scope of the member's training, certification, assignment, and authority.

In Good Standing - a member who maintains the qualifications, training, certifications, participation requirements, conduct standards, and other requirements applicable to the member's classification and assignment and who is not currently suspended, separated, or otherwise restricted from Department membership or duties by authorized Department or Town action.
A member may be considered in good standing only when the member:

1. Maintains all required licenses, certifications, training, medical or fitness-for-duty requirements, and other qualifications applicable to the member's position or assignment;

2. Meets the applicable Department participation and attendance requirements, subject to approved absences, medical restrictions, assigned duties, training, or other exceptions authorized under these Bylaws or Department policy;

3. Complies with these Bylaws, Department SOPs and SOGs, Town policies, lawful orders, applicable laws, and other requirements applicable to the member;

4. Has not been suspended or otherwise placed in a status that temporarily restricts the member from exercising the rights or responsibilities associated with good standing; and

5. Remains eligible to participate in Department activities consistent with the member's membership classification and operational status.

A member who temporarily cannot perform operational duties due to an approved medical restriction, leave, training assignment, or other circumstance authorized by the Fire Chief or Town policy shall not automatically be considered out of good standing solely because the member is temporarily unable to respond to emergency calls, provided the member continues to satisfy all requirements applicable to the member's temporary status.

A determination that a member is not in good standing shall be based on the applicable requirements of these Bylaws, Town policy, or other formally adopted Department requirements and shall be subject to the applicable due process and appeal provisions.

Off Duty - Off Duty means a period during which a member is not officially assigned, scheduled, directed, or authorized to perform Department duties or activities. An off-duty member remains subject to applicable laws, Town policies, Department rules, and the standards of conduct established by these Bylaws when acting in an official capacity, representing the Department, using Department property or credentials, or otherwise engaging in conduct that has a clear and material connection to the Department or Town.

Officer – A member of the Department who has been duly appointed, promoted or otherwise designated to a recognized supervisory or command position within the Department, and who has authority to and responsibilities established by these bylaws, Town policy, the Fire Chief, or applicable law. Officers may include the Fire Chief, Assistant Fire Chief, Captains, Engineers, or other positions formally designated

DRAFT

as an officer position by the Town or Fire Chief. An officer shall exercise only the authority granted to the position and shall remain subject to the Department's established chain of command.

On Duty – Means a period during which a member is officially engaged in assigned Department duties, authorized emergency response, Department-required training, meetings, standby or station coverage, administrative duties, or other activities authorized or directed by the Department or Town. A member may be considered on duty regardless of whether the member is compensated for the activity.

Operational Member – An active member who is currently authorized, trained, certified, medically cleared, and otherwise qualified to participate in emergency response and operational activities within the scope of the member's training and assignment.

Paramedic – A Paramedic is a member who holds a current and valid National and/or Arizona paramedic certification or other legally recognized credential authorizing the member to provide advanced emergency medical care at the paramedic level. A paramedic shall provide patient care only within the member's authorized scope of practice, training, certification, medical direction and Department assignment.

Participation Requirements - the minimum attendance, response, training, and other Department participation standards that a member must satisfy to maintain the applicable membership or operational status established by these Bylaws. Participation may include attendance at regular Department meetings, drills, training activities, dispatched emergency calls, authorized station coverage, standby assignments, and other Department activities recognized by the Fire Chief. Participation Requirements shall be measured and evaluated in accordance with Article VII and applicable Department policies and may be adjusted for approved absences, medical restrictions, assigned duties, training, or other circumstances authorized under these Bylaws.

Recruit – also known as a Probationary Member, is a person who has been accepted into the Jerome Fire Department and is undergoing the required orientation, training, evaluation, and consistently meets participation requirements before becoming eligible for Active Membership. A Recruit may participate in Department activities and training only to the extent authorized by the Department and shall perform duties within the limits of their training, certification, supervision, and assignment. A Recruit does not have voting privileges unless otherwise expressly authorized by these Bylaws.

Response - a documented participation by a member in a dispatched emergency incident or an authorized station staffing assignment for the purpose of providing or supporting emergency response capability. A response must involve an authorized emergency response, incident assignment, or station staffing assignment and must be documented in accordance with department procedures.

For purposes of Department participation requirements, a qualifying Response includes:

1. **Apparatus Response:** Responding on a Department apparatus to a dispatched incident and participating in the incident in an authorized operational, support, or command capacity;

2. **Individual Response:** Responding directly to a dispatched incident and arriving at the scene to perform an authorized operational, support, or command assignment within the member's training, certification, and authority;

3. **Station Staffing Response:** A member who is available for response and reports to a designated Jerome Fire Department station for the purpose of providing station coverage, staffing a reserve apparatus, or remaining available for an incident-related assignment may receive credit for a

Response. Members must appropriately notify Dispatch by radio upon arrivals and identify that the member has arrived at the station and is available for Department response. Such station staffing shall be documented in accordance with Department procedures.

4. **POV Response:** A member responding in a personally owned vehicle (POV) to a dispatched incident, station, staging area, or other authorized location shall do so only in accordance with Department SOPs/SOGs, applicable law, and any written authorization issued by the Department or Town. Members shall operate personally owned vehicles with due regard for public safety and shall comply with all traffic laws.
   Members who have been authorized to display or use emergency warning lights on a POV must have a current written agreement, affidavit, or other required acknowledgment on file with the Department. Such lights may be used only during an authorized emergency response and only within the geographic boundaries or circumstances specified in the member's authorization. Use of emergency warning lights outside the authorized boundaries or outside an authorized emergency response is prohibited, including travel before entering the authorized response area. Authorization to use emergency warning lights does not grant the member any right-of-way beyond that permitted by law and may be suspended or revoked for misuse, safety concerns, violation of Department policy, or violation of applicable law.

For purposes of station staffing, radio notification to Dispatch confirming the members' arrival at the station and availability for response shall constitute the required documentation of the station staffing Response. A member shall not receive Response credit merely for making a telephone call or sending a text message to Department personnel regarding their availability.

All Responses shall be documented through the Department's designated reporting, dispatch, attendance, or other official recordkeeping system. The Fire Chief or designee shall have authority to verify whether a claimed Response meets the requirements of this definition.

Standard Operating Guidelines (SOG) - formally adopted written guidelines intended to provide direction and a framework for Department operations, incident response, training, safety, and other activities while allowing reasonable professional judgment based upon the circumstances presented. SOGs shall be consistent with applicable federal and Arizona law, Town policies and ordinances, applicable regulatory requirements, and these Bylaws. Members are expected to follow applicable SOGs unless circumstances reasonably require deviation to protect life, safety, or property, or unless otherwise directed by an authorized officer.

Standard Operating Procedures (SOP) – formally adopted written procedures that establish specific, mandatory processes, responsibilities, and requirements for the consistent administration and operation of the Department. SOPs shall be consistent with applicable federal and Arizona law, Town policies and ordinances, applicable regulatory requirements, and these Bylaws. Members shall comply with applicable SOPs unless doing so would require an unlawful action or would create an immediate and unreasonable threat to life or safety.

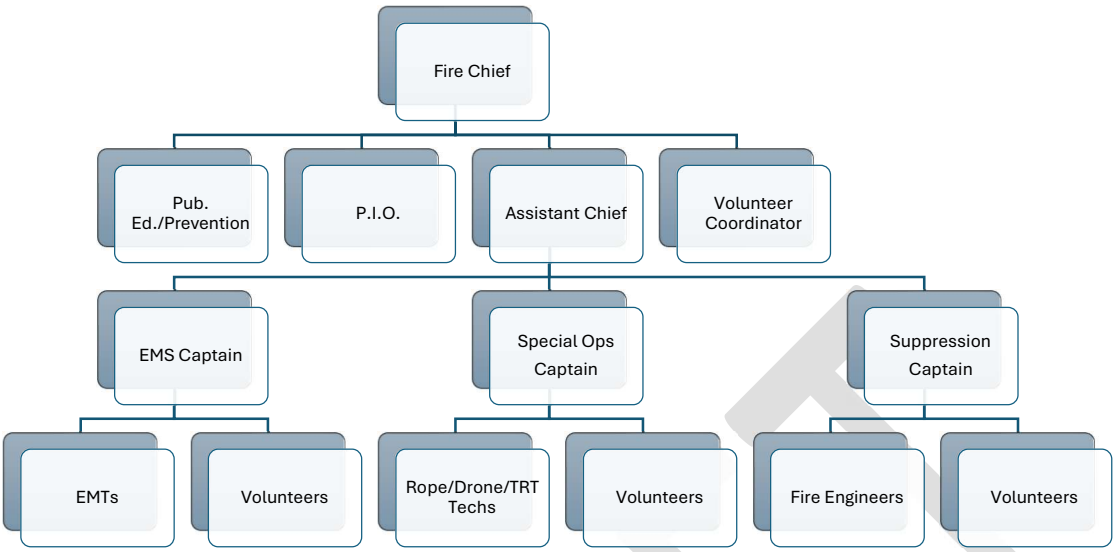
Volunteer Coordinator - A Department officer appointed or designated in accordance with these Bylaws and Town policy to support the recruitment, orientation, communication, participation, training coordination, and administrative needs of Volunteer Members. The Volunteer Coordinator shall serve as a liaison between Volunteer Members and Department leadership, assist with maintaining accurate membership and participation information, and perform other duties assigned by the Fire Chief. The

Volunteer Coordinator shall not exercise command authority over other members solely by virtue of the position unless such authority is separately granted by rank, assignment, or direction of the Fire Chief.

Volunteer Member - An individual who has been duly accepted and appointed as a member of the Jerome Fire Department to provide fire, emergency medical, rescue, prevention, support, or other authorized Department services in a volunteer capacity and who is not employed by the Town of Jerome in the position for which the volunteer service is being performed. Volunteer members may receive reimbursement, stipends, benefits, pension or retirement credit, or other compensation or benefits when authorized by the Town and permitted by applicable law. Volunteer status does not, by itself, establish an employment relationship with the Town, nor does length of volunteer service, by itself, grant authority to direct, supervise or dictate the duties of a career staff member unless expressly authorized by the Fire Chief or their designee.

ARTICLE II – NAME, AUTHORITY, AND LEGAL STATUS

This organization shall be known as the Jerome Fire Department ("Department"), a department of the Town of Jerome, an incorporated municipality within the State of Arizona. The Department is a combination fire department, consisting of career and volunteer personnel who serve the Town of Jerome and its residents in accordance with applicable laws, ordinances, policies, rules and Department regulations.



The Department operates under the authority of the Jerome Town Council and applicable Arizona Revised Statutes (A.R.S.), and is subject to all municipal policies, state laws, and applicable federal regulations.

Career and volunteer members may have different employment, compensation, scheduling, benefits, and administrative statuses, as established by the Town of Jerome and applicable law; however, all members are subject to the standards, qualifications, training requirements, operational procedures, and codes of conduct applicable to their respective positions and duties.

All members serve as representatives of the Town of Jerome and shall conduct themselves in a manner that upholds the integrity, professionalism, and public trust associated with the Department. The standards of conduct expected of a firefighter apply at all times, whether a member is on duty, off duty, acting in an official capacity, or otherwise identifiable as a member of the Department.

DRAFT

ARTICLE III – ORGANIZATION

Section 1 – Department Structure

The Department shall consist of the following operational divisions:

Suppression Division – made up of firefighters and whose purpose will be to suppress fires, handle hazardous materials incidents and supports the EMS and Rescue divisions at rescue and medical incidents.

Emergency Medical Services (EMS) Division – made up of EMTs, paramedics and will provide emergency medical services to the Town of Jerome and surrounding areas under the direction of the Verde Valley Medical Center Emergency Department.

Special Operations Division – made up of Drone pilots, TRT team, Swiftwater team and other technical rescue personnel, and will provide technical rescue services to the Town of Jerome and the surrounding areas.

Fire Prevention Division – made up of the Fire Chief, Assistant Fire Chief, fire investigators and fire inspectors, and will conduct fire inspections and enforce life safety codes adopted by the Town of Jerome. The prevention division will also include public education efforts.

Active members may be assigned to one or more of these divisions, upon completion of applicable licensure or certification, where necessary.

Operational activities, specialized operations, equipment use, training, safety, and response protocols shall be governed by Department SOPs/SOGs consistent with applicable NFPA, Arizona regulatory requirements, and other applicable law. Personally owned vehicles may be used for emergency response or Department assignments only as authorized by the Fire Chief, Department SOPs/SOGs and applicable law. The Department may utilize unmanned aircraft

systems (UAS), including drones as a Special Operations resource. Drone operations, including pilot qualifications, authorization, training, flight operations, equipment use, airspace compliance, data and imagery managements and related safety shall be governed by applicable law and departmental SOPs/SOGs.

Section 2 – Chain of Command

The department may operate under a structured chain of command consisting of:

- Fire Chief
- Assistant Fire Chief
- Company Officers (Captain, Engineer or Senior Firefighter)
- Firefighters/EMTs

In the absence of the Fire Chief and Assistant Fire Chief, paid or career Department staff shall have authority over Department operations consistent with their position, assignment, training, and applicable Town policy. A volunteer member, or staff member from another Town department, shall not assume authority over the Department, Department operations, or career staff unless such authority has been expressly granted or directly authorized by the Fire Chief.

ARTICLE IV – CODE OF CONDUCT

Section 1 – Purpose and Applicability

This Article establishes the standards of conduct expected of every Department member. It applies equally to paid employees, volunteer members, probationary members, officers, special members, and any other person serving under the authority of the Department, regardless of compensation, rank, assignment, or membership classification. For purposes of this Article, each such person is referred to as a "member."

Section 2 – Public Trust and Professional Conduct

Members serve the public and represent the Town of Jerome and the Department. Each member shall act with integrity, honesty, professionalism, courtesy, accountability, and respect; perform assigned duties diligently and within the member's training and authority; comply with lawful orders and the established chain of command; and avoid conduct that materially undermines public trust, Department operations, or the safety of others.

Section 3 – On-Duty and Off-Duty Conduct

The standards of conduct expected of a firefighter and public servant apply at all times. Members shall conduct themselves, both on duty and off duty, in a manner consistent with the integrity and public trust of the fire service when acting in an official capacity, wearing or displaying Department identification, using Department property, representing themselves as affiliated with the Department, or when their conduct has a clear and material connection to the Department or Town. Nothing in this section is intended to regulate lawful private activity that has no such connection.

Section 4 – Safety, Readiness, and Lawful Orders

Members shall place life safety and incident integrity above personal convenience; follow Department bylaws, Town policies, SOPs, SOGs, safety rules, and applicable laws; use required protective equipment; promptly report hazards, injuries, damaged equipment, and unsafe practices; and refrain from reckless, insubordinate, or unauthorized acts. A member who reasonably believes an order is unsafe, unlawful, or beyond the member's training shall immediately communicate the concern through the chain of command, except when urgent action is necessary to prevent imminent harm.

Members responding in a personally owned vehicle shall operate the vehicle in a safe and responsible manner and shall comply with all applicable traffic laws and Department requirements governing emergency response.

Section 5 – Respectful and Inclusive Workplace

Members shall treat coworkers, patients, residents, visitors, partner agencies, and members of the public with dignity and fairness. Discrimination, harassment, retaliation, bullying, threats, hazing, abusive language, and conduct that interferes with a safe and effective workplace are prohibited. Employment status, volunteer status, rank, tenure, or assignment shall not be used to demean, exclude, intimidate, or unfairly favor another member.

Section 6 – Patient Care, Privacy, and Confidential Information

Members shall protect patient information, personal information, investigative information, security-sensitive information, and other confidential or legally protected records. Such information shall be accessed, used, discussed, photographed, recorded, retained, or disclosed only for authorized Department purposes and in accordance with law and Town policy. Members shall provide services impartially, preserve patient dignity, and remain within the scope of their certification, licensure, training, and assigned authority.

Section 7 – Conflicts of Interest, Gifts, and Use of Position

Members shall avoid actual or apparent conflicts between personal interests and Department responsibilities. Members shall not use rank, position, confidential information, uniforms, credentials, or Department affiliation for personal gain or preferential treatment, and shall disclose potential conflicts through the chain of command.

Gifts and Benefits. Members shall not solicit or accept any gift, gratuity, favor, compensation, service, discount, entertainment, loan or other benefit from any person or entity when the offer is intended or could reasonably appear intended to influence the member's official duties, judgement, or actions. Except as otherwise expressly authorized by Town policy or applicable law, a member shall not accept a gift valued at more than $20 from a single source, per single instance. Cash and cash-equivalent gifts, including gift cards, shall not be accepted. Members shall disclose any offered gift that may violate this Section to their supervisor and shall decline or return the gift as appropriate.

Gifts exchanged among Department members, including gifts between supervisors and subordinate personnel, shall not be used to influence assignments, evaluations, discipline, promotions, scheduling or Department decisions. Department-wide or group gifts and voluntary exchanges between members shall not create an expectation of preferential treatment or place undue pressure on any member to participate. Any gift involving a Department member's official authority, a pending Department decision, or a potential conflict of interest shall be disclosed through the appropriate chain of command.

Members shall comply with applicable Town ethics policies, conflict-of-interest requirements, and other governing laws. When the application of this Section is uncertain, the member shall seek guidance from the Fire Chief or Town Manager before accepting the gift or benefit.

Emergency Response and Incident Support Exception. The restrictions on gifts and benefits in this Section shall not apply to reasonable and customary meals, lodging, transportation, supplies, or other necessary services provided to Department members in connection with an authorized emergency response, mutual-aid assignment, wildland fire deployment, or other incident-related duty. This exception includes support provided through an incident management team, sponsoring or assisting agency, cooperating department, or established incident-support arrangement, when such support is provided for operational, logistical, or personnel welfare purposes and not for the member's personal benefit or to influence an official decision or action. Any compensation, reimbursement, or other benefit outside the scope of routine incident support shall remain subject to applicable Town policies and law(s).

Section 8 – Town and Department Property

Members shall safeguard and use Town and Department funds, facilities, vehicles, equipment, information systems, uniforms, insignia, credentials, and supplies only for authorized purposes. Members shall not misuse, remove, damage, alter, lend, or permit unauthorized access to such property and shall promptly report loss, theft, damage, or suspected misuse. Any Department-issued equipment or emergency warning equipment authorized for use on a personally owned vehicle remains subject to Department control and shall be used only for authorized Department purposes. Department equipment shall be used only for authorized Department purposes and in accordance with applicable laws, Town policies, these Bylaws, and Department SOPs/SOGs. The Fire Chief or designee may establish procedures governing the assignment, issuance, access, inspection, maintenance, security, transportation, and storage of Department equipment and may establish designated storage locations for Department equipment and specialized resources.

Section 9 – Fitness for Duty and Impairment

Members shall report for duty, training, response, standby, and Department activities fit to safely perform assigned responsibilities. A member shall not operate Department vehicles or equipment, provide emergency services, or participate in operational activities while impaired by alcohol, cannabis, controlled substances, medication, fatigue, illness, or any other condition that creates a safety risk. Members shall follow applicable Town testing, reporting, and fitness-for-duty policies.

Section 10 – Communications, Social Media, and Public Statements

Only authorized members may speak on behalf of the Town or Department. Members shall not knowingly publish false, confidential, operationally sensitive, discriminatory, threatening, or harassing content in connection with Department activities. Personal opinions shall not be presented as official Department positions. Photographs, recordings, incident information, patient information, or images of Department facilities, operations, or equipment shall be shared only when authorized and lawful.

The Department shall maintain a designated communication system for distributing important Department information to all career and volunteer members. Department-designated email and text-message notifications shall be used for significant announcements, policy and bylaw updates, training information, special projects, requests for assistance, schedule changes, and other information requiring Department-wide awareness or member participation, as appropriate to the subject.

Information communicated at a meeting that requires action, follow-up, or awareness by members who were not present shall be distributed through the designated communication system when appropriate. Members shall maintain current contact information, participate in the Department's designated communications system, and review Department communications in a timely manner.

The Fire Chief or their designee shall establish procedures for distributing communications, maintaining current contact information, and identifying when acknowledgement or a response is required. Emergency notifications and time-sensitive operational communications shall follow applicable Department procedures.

Section 11 – Cell Phone Use at Incident Scenes

Members shall use personal or Department-issued cell phones and electronic devices at incident scenes only in a manner that supports operational needs, patient care, safety, documentation, or other authorized Department purposes. Device use shall not interfere with assigned duties, incident command, patient care, scene security, responder safety, or the privacy and dignity of patients, victims, witnesses, or members of the public.

Department Documentation Equipment. The Department may provide a Department-owned digital camera or other approved photographic documentation equipment for use at incident scenes, training activities, property damage incidents, and other authorized Department operations. The equipment shall be maintained and stored at a location designated by the Fire Chief, which may include the primary rescue vehicle. Members shall use Department-provided equipment when available and practicable for authorized documentation purposes. Equipment use, storage, maintenance, and transfer of images or recordings shall comply with Department procedures and applicable Town policies.

Personal Device Restrictions. The use of personal cell phones or personal devices to photograph, video record, audio record, transmit, store, or share images, audio, patient information, incident information, or other scene-related material is discouraged and may be

prohibited unless expressly authorized by the Incident Commander, Fire Chief, Town policy, or applicable law. When Department documentation equipment is unavailable or impracticable to use, members shall follow instructions from the Incident Commander or authorized officer regarding an appropriate alternative. Any authorized use of a personal device shall comply with applicable patient privacy requirements, confidentiality obligations, evidence preservation requirements, Arizona public records law, Arizona Open Meeting Law where applicable, and all Town and Department policies.

Handling of Incident Records. Photographs, recordings, messages, and other incident-related information created, stored, sent, or received in connection with Department duties shall be handled, transferred, preserved, and retained in accordance with applicable law and Town and Department policies. Members shall not retain, distribute, publish, or share incident-related material through personal accounts, applications, or devices except as expressly authorized by applicable law or Town policy.

Members shall understand that incident-related information on a personal device may be subject to preservation, review, disclosure, subpoena, public records requests, or other lawful process. Any request to secure or examine a personal device in connection with an authorized investigation, evidence preservation, legal compliance, or protection of patient privacy shall be handled in accordance with applicable law and Town policy.

Section 12 – Reporting, Cooperation, and Non-Retaliation

Members shall promptly report suspected violations of law, Town policy, Department rules, safety requirements, or this Code through the chain of command or another reporting channel authorized by Town policy. Members shall be truthful and cooperate with authorized administrative, safety, or legal reviews. Retaliation against a person who makes a good-faith report, participates in a review, or raises a safety concern is prohibited. Knowingly false or malicious reports may be subject to discipline.

Section 13 – Accountability and Enforcement

Each member is responsible for understanding and complying with this Code. Supervisors and officers shall model these standards and address concerns consistently, regardless of whether a member is paid or volunteer. Alleged violations shall be reviewed fairly and may result in corrective or disciplinary action consistent with Town policy, these bylaws, and the due-process provisions of Article V. Nothing in this Article creates a contract of employment, alters volunteer status, or limits rights and protections provided by law or Town policy.

Section 14 – Code of Ethics Acknowledgment

Each member shall review and comply with the Jerome Fire Department Code of Ethics included in the Appendices (Appendix A) to these bylaws. Upon appointment or acceptance into the Department, and again whenever the Code of Ethics is materially revised or when otherwise directed by the Fire Chief, each paid or volunteer member shall sign and date the acknowledgment and return it to the Fire Chief within the timeframe established by the Department. The signed acknowledgment shall be retained as a Department personnel or

membership record. Failure or refusal to sign and return the acknowledgment does not relieve a member of the obligation to comply with the Code of Ethics and may result in corrective or disciplinary action consistent with Town policy, these bylaws, and applicable due-process requirements.

ARTICLE V – GOVERNANCE AND AUTHORITIES

Section 1 – Fire Chief Authority

The Fire Chief shall perform the duties of and act in accordance with Town policies as set forth in section 4-2-4 of the Jerome Town Code. The Fire Chief is accountable to the Jerome Town Council, through administrative oversight by the Town Manager, and serves as the administrative and operational head of the Department. The Fire Chief is responsible for:

- Direct Enforcement of all applicable laws, codes and policies
- Appoint Officers (subject to Town policy and the Town Manager) and maintain oversight of personnel, training and operations
- Implement and enforce Bylaws, SOPs and Policies and Safety Programs

Personnel actions including suspension, or termination shall follow due process and are subject to review.

Section 2 – Department Officers

The officers of the Department may include:

- Fire Chief – one (1)
- Assistant Fire Chief – one (1)
- Captain(s) – no more than three (3)
- Engineer(s) – no more than three (3)
- Volunteer Coordinator – one (1)

The Chief, appointed by Town Council, will perform the duties of the Fire Chief as set forth in section 4-2-4 of the Jerome Town Code. He/she has the authority and responsibility to see that all aspects of the department are run in an efficient and effective manner.

The Assistant Chief is appointed by the Fire Chief with concurrence by the Town Manager. The Assistant Fire Chief will perform the duties assigned by the Fire Chief and shall act as the Department's second-in-command. In the absence of the Chief, the Assistant Fire Chief assumes the Fire Chief's administrative and operational duties, and exercises the authority of that office until the Fire Chief returns or the Town Council / Town Manager provides otherwise.

Secretary and all other departmental officers may be appointed or promoted by the Fire Chief, in accordance with the hiring process for the Town of Jerome.

Section 3 – Election, Appointment and Qualifications of Officers

All officers will serve until their successors are duly appointed.

An Auxiliary Liaison may be elected every 2 years, and is appointed by the Fire Chief.

In the event of a vacancy occurring in any office of the department, except the Fire Chief, the Fire Chief shall appoint a new officer for the remaining term. In the event that the Fire Chief's position becomes vacant, the Assistant Chief will fill the position until the Jerome Town Council has appointed another Fire Chief.
The Fire Chief overseas all divisions.

In the Fire Prevention division, he/she will direct a program of regular inspections of commercial occupancies in the Town of Jerome. Assistance Chief and Fire Marshall will act as the agent of the Fire Chief in abating fire and life safety hazards in accordance with the codes adopted by the Town. They may assist the Fire Chief in investigation of the cause of fires.

Captains must be active members of the Department in good standing, must have completed all training, certifications, and qualifications required for the Captain position, and must demonstrate the knowledge, judgment, leadership ability, and competence necessary to serve in an assigned supervisory or command role. A candidate for Captain must maintain minimum participation requirements and active membership status to remain eligible to serve as Captain. A Captain's supervisory authority is limited to the authority granted by these Bylaws, Town policy, Department SOPs/SOGs, the Fire Chief, or applicable law, and does not by itself create paid employment status or authority over Town employment matters.

> **Career Captains.** A Career Captain is a paid or career Department staff member appointed or assigned to the Captain position by the Fire Chief in accordance with Town policy. A Career Captain may exercise supervisory, operational, administrative, and chain-of-command authority over Department operations and personnel consistent with the Captain's position, assignment, training, applicable Town policy, Department SOPs/SOGs, and direction of the Fire Chief. In the absence of the Fire Chief and Assistant Fire Chief, a Career Captain may assume assigned Department authority consistent with the Department's chain of command.
>
> **Volunteer Captains.** A Volunteer Captain is a volunteer member appointed or designated by the Fire Chief to perform assigned operational, training, coordination, or incident-related responsibilities within the member's training, certification, assignment, and authority. A Volunteer Captain's rank or length of volunteer service does not, by itself, create employment status or grant authority to direct, supervise, or dictate the duties of a career staff member, assume Department-wide authority, or exercise authority over Town employment matters unless such authority has been expressly granted or directly authorized by the Fire Chief or Town Manager.

Captains may direct company operations at incidents, direct training drills, and perform other duties assigned by the Fire Chief, consistent with these Bylaws, Town policy, Department SOPs/SOGs, applicable law, and the Department's chain of command. A Captain shall exercise only the authority applicable to the Captain's career or volunteer status and assignment. Unless

expressly granted or directly authorized by the Fire Chief, a Volunteer Captain shall not assume authority over the Department, Department operations, or career staff in the absence of the Fire Chief and Assistant Fire Chief.

The EMS Captain shall direct the operations of the EMS Division only within the scope of the Captain's assigned authority unless command is assumed by a higher-ranking officer or by a member with greater relevant training, certification, or experience for the incident.

The suppression division Captains shall be Arizona EMT, Firefighter I & 2, and NWCG Firefighter 1 certified or higher.

The EMS division Captain must be Arizona EMT certified or higher.

The Fire Marshal must have completed fire inspection and fire code enforcement training.

The Engineer must be an active member of the fire department, in good standing, with two years of service and be Arizona EMT, Firefighter 1 & 2, and NWCG Firefighter 2 certified or higher. The Engineer or superior officer may direct company operations at incidents, assist with training drills and perform duties as assigned by the Fire Chief or other senior line officer, in the absence of a higher-ranking officer.

The Fire Chief and Assistant Chief need to have a combination of formal education and experience that provides the knowledge, skills and abilities necessary for satisfactory job performance.

Section 4 – Executive Board
The Executive Board shall consist of the Fire Chief, Assistant Chief, Fire Marshal, and Department Officers.

The Executive Board shall:

- Review disciplinary matters
- Provide recommendations on policy and membership
- Serve as an advisory body to the Fire Chief

Section 5 – Pension Board
The Pension Board members will attend meetings of the Jerome Volunteer Pension Board of Trustees and conduct the business of the board along with the other members of the board as set out in the Jerome Volunteer Pension Board Plan and Bylaws.

Four (4) Fire Department Members, of active status and in good standing, shall be elected to sit on the Pension Board of Trustees as stipulated in the Plan. The other members of the Pension Board of Trustees are the Town of Jerome Mayor, the Fire Chief and one layperson.

The four elected Members shall serve four-year terms as members of the Board of Trustees. The terms shall be staggered, with two Members being elected every two years as per the Plan Article 9.2. This election shall take place during the May business meeting.

ARTICLE VI – DISCIPLINE AND DUE PROCESS

No member shall be suspended, demoted, or terminated without due process.

Section 1 – Due Process

Minimum due process for disciplinary action in excess of a letter of reprimand shall include:

- Written notice of alleged violations
- Opportunity to respond
- Review by the Executive Board
- Right to appeal to the Town Council

Section 2 – Disciplinary Action

Grounds for discipline shall include, but are not limited to:

- Failure to meet participation requirements
- Violation of SOPs, safety policies, or Town policies
- Conduct detrimental to the Department

Disciplinary actions should include a verbal or written warning, written letter of reprimand, suspension, termination and all actions shall follow due process procedures, as outlined by the Town of Jerome Personnel Policy Handbook.

The Fire Chief may recommend to the Executive Board to expel, dismiss, demote or remove from the department any member or officer due to refusal to perform their duties or other behavior deemed detrimental to or unbecoming of the department.

The Fire Chief may be removed from office by the Jerome Town Council.

Section 3 – Appeals

Officers and members have the right to appeal disciplinary action through the established chain of command starting with the Executive Board up to Town Council, where applicable and/or necessary.

ARTICLE VII – MEMBERSHIP

Section 1 – Classes of Membership

- Probationary Member (also known as Recruit)
- Active Member
- Honorary Member
- Special Member

Probationary Member is granted after submittal and approval of a written application. Probationary members are also known as “recruits” and must be at least 18 years of age. During

DRAFT

the probationary period, a minimum of 6 months, they will receive training specific to the community and department, and become eligible to attend classes and trainings that allow recruits to test for basic Arizona Firefighter I & II certification, and/or Arizona Emergency Medical Technician certification, certified wildland firefighter or other specialized technical position, such as TRT, Swiftwater or Drone pilot. These members will not have voting ability during department meetings where votes may be required.

Active membership is granted after the probationary period. Active membership may be achieved after a 6-month probationary period, and after having met the minimum participation requirements for active membership. Active members have voting capacity at department meetings where voting is required and will earn credit toward their individual retirement account if active membership requirements are met.

Honorary membership is available to retired fire department members. Honorary members will be given access to department facilities but will not have voting privileges in meetings where voting may be necessary. Honorary members will not serve as officers.

Special Membership is appointed by the Fire Chief. The Chief may appoint a person to be the Fire Department Photographer, Public Information Officer and/or other pertinent special role, which may be designated as a special member. Special members will be given access to the department facilities but will not have active voting privileges.

Section 2 – Qualifications

All members must:

- Be at least 18 years of age
- Pass a background check
- Complete Fit for Duty medical exam, as applicable under NFPA standards; and
- Meet all applicable training, certification and fit for duty requirements.

The Fire Chief, in coordination with the Town Manager or designee, shall ensure that required background checks and Fit for Duty examinations are completed by appropriately authorized individuals or providers. The timing, frequency, scope, and documentation of such checks and examinations shall be established by applicable law and Town policy or by an approved Department policy. Medical and background information shall be maintained and disclosed in accordance with applicable confidentiality requirements and law.

A member whose tuition or training costs are paid or reimbursed by the Town of Jerome, the Department, or the Jerome Volunteer Fire Department Auxiliary shall comply with Article VIII, Section 2, and any separate written reimbursement agreement executed in connection with that payment or reimbursement.

Members with 50% or greater attendance at regular meetings and drills and who respond to 20% or greater of the alarm calls during the fiscal year (July 1–June 30) will earn credit with the Jerome Volunteer Pension & Benefit Plan for the year.

Members, with the Chief's approval, may participate in special work sessions to maintain good standing in their membership. The Chief shall provide a list of projects or tasks that need attention. Members who are in another authorized training class or activity shall be given credit for attendance at missed drills or meetings, subject to the Chief's approval.

Members shall maintain current contact information with the Department and participate in the Department-designated communication system as a condition of active membership. Members shall review Department communications and respond to requests requiring acknowledgement or action within the stated timeframe, when practicable. Members who experience technical difficulties or lack reliable access to a designated communication method shall notify the Fire Chief or designee so that an alternative means of communication may be arranged.

Members who fail to maintain membership qualifications may be removed from active membership status until the applicable requirements are met, subject to any applicable transition plan or approved remediation process. The Fire Chief may recommend to the Executive Board that a member or officer be expelled, dismissed, demoted, or removed from the Department due to refusal to perform their duties or other behavior deemed detrimental to or unbecoming of the Department. Officers and members shall have the right to appeal such disciplinary action to the Executive Board.

Section 3 – Fitness for Duty

"Operational Member" shall mean any member who is authorized to participate in emergency response activities and is capable of performing the essential job tasks associated with fire suppression, emergency medical services, and other assigned incident operations.

Operational Members shall meet and maintain medical and physical fitness standards consistent with NFPA 1582, Standard on Comprehensive Occupational Medical Program for Fire Departments, or equivalent standards adopted by the Town. Members must demonstrate the ability to safely and effectively perform essential job functions as a condition of operational status.

Consistent with A.R.S. § 41-1463 and applicable nondiscrimination requirements, operational status shall be determined through objective, job-related criteria, including the member's ability to safely and effectively perform essential functions. Members may be subject to additional or more frequent medical or physical evaluations only when supported by identified risk factors, safety considerations, applicable standards, or other legitimate operational requirements.

Members authorized to respond in a personally owned vehicle shall also be physically and mentally capable of safely operating the vehicle under the conditions reasonably associated with an emergency response.

Members who are determined, through appropriate evaluation, to be unable to safely perform essential functions or meet fitness-for-duty requirements shall not serve in an operational capacity and may be reassigned to non-operational roles or placed in honorary status, as appropriate.

Section 4 – Participation Requirements

Active operational members shall maintain minimum participation levels to ensure operational readiness and organizational effectiveness.

1. Measurement Period
Participation shall be evaluated over a rolling twelve (12) month period unless otherwise specified by the Fire Chief.

2. Meeting Attendance

Operational members shall attend a minimum of thirty-three percent (33%) of all regular meetings and drills.

Officers shall attend a minimum of sixty percent (60%) of all regular meetings and drills.

3. Alarm Response Participation

Operational members shall respond to a minimum of twenty percent (20%) of all dispatched alarm calls for which they are available.

Officers shall respond to a minimum of thirty percent (30%) of all dispatched alarm calls for which they are available.

4. Definition of "Response"
For the purposes of participation requirements and attendance purposes, a response is defined as – a documented participation in a dispatched alarm or an incident-related station assignment.

A qualifying response includes any of the following:

- A documented turnout on Department apparatus;
- Arrival on scene and assignment to an operational, support, or command role; or
- Acknowledgment of the alarm by radio and arrival at a Jerome Fire Department Station 11 to provide station coverage, staff reserve apparatus, or remain available for an incident-related assignment while other personnel are committed to the call.

A telephone call, text message, radio inquiry, or other communication made solely to ask the Fire Chief or other Department personnel whether assistance is needed does not, by itself, constitute a response. Such communication qualifies only if the member is given or assumes an authorized assignment and reports to the incident, a Department station, or another designated location.

A member's use of a POV is a means of transportation and does not by itself establish a qualifying response. A POV response shall receive response credit only when the member meets the requirements for a qualifying POV response as established in Article I and applicable Department SOPs/SOGs.

All qualifying responses must be recorded in the Department's official reporting or attendance system.

5. Availability Adjustment
The total number of alarm calls used to calculate participation may be adjusted by the Fire Chief or designee to account for:

- Acknowledged and approved notification of an extended absence by the Fire Chief.
- Injury or medical restriction
- Duty assignment (e.g. admin, training, or command not requiring response)
- Other extenuating circumstances

6. Compliance and Review
Members who fail to meet participation requirements may be subject to review and reclassification of membership status, consistent with department policy.

Section 5 – Separation from the Department and Return of Property
Upon separation, resignation, retirement, termination, expiration of membership, or other cessation of service with the Jerome Fire Department, all Town and Department property issued, assigned, or entrusted to the member shall be returned promptly and in accordance with Department procedures. This includes, but is not limited to, identification cards and credentials, keys, access devices, radios and communications equipment, uniforms, personal protective equipment (PPE), tools, equipment, records, documents, electronic devices, and any other Town or Department property.

Returned property shall be in reasonable condition, ordinary wear and tear excepted. The Department shall document the return and disposition of issued property and may require inspection, inventory, or other reasonable measures to establish accountability for Town and Department property.

A member who fails to return, loses, damages, destroys, or otherwise improperly retains Town, Department, or Auxiliary property may be subject to appropriate administrative, disciplinary, or other lawful action, including recovery of the property or, where legally authorized, recovery of the Town's actual loss or reasonable replacement cost. Any such action shall be taken in accordance with applicable federal and Arizona law, Town policies and procedures, Department bylaws, applicable agreements, and any signed equipment or property acknowledgment.

Nothing in this provision authorizes an unauthorized deduction from the wages or other compensation of a Town employee. Any deduction, withholding, or other recovery from employee compensation shall comply with applicable Arizona wage laws, including A.R.S. §§ 23-352 and 23-353, and any other applicable law or written authorization. The Town, Department or Auxiliary may pursue other lawful remedies for the recovery of Town, Department or Auxiliary owned property or amounts properly owed, as applicable.

Members shall not retain Town, Department or Auxiliary property after separation as security for, or in anticipation of, any claim for wages, compensation, reimbursement, pension benefits, or other amounts allegedly owed to the member.

For purposes of this provision, volunteers and other non-employee members remain responsible for the return and proper care of property entrusted to them. The absence of an employment relationship does not create a right to retain Town, Department or Auxiliary property. Where property is not returned, the Town or Auxiliary may pursue any remedy available under applicable Arizona law, including recovery of the property and, where appropriate, recovery of damages or replacement costs.

The Department shall make reasonable efforts to obtain the return or accounting of all issued property before a separation is considered administratively complete. Failure to complete the property-return process may be documented as an unresolved separation matter and referred to the Fire Chief, Town Manager, or other appropriate Town authority for further action.

ARTICLE VIII – TRAINING, EDUCATION AND SAFETY COMPLIANCE

Section 1 – Training and Safety Compliance.
All members shall meet minimum training standards consistent with NFPA 1010 (firefighter), NFPA 472-1072 (Hazardous Materials), and applicable EMS certification requirements.

All active members, in good standing, shall meet minimum training standards consistent with NWCG (National Wildfire Coordinating Group) and FEMA qualifications. At a minimum, personnel shall complete:

- NWCG S-130 Firefighter Training
- NWCG S-190 Introduction to Wildland Behavior
- NWCG L-180 Human Factors in the Wildland Fire Service, where applicable.
- FEMA ICS 100
- FEMA ICS 200
- FEMA ICS 700

All members shall comply with:

- OSHA/ADOSH standards
- NFPA standards as adopted by the Department
- Department SOPs and safety policies

The Department shall maintain a safety and risk management program consistent with NFPA 1500. Members shall participate in ongoing training as defined in Department SOPs.

Section 2 – Tuition Reimbursement and Training Payments
The Town of Jerome, the Department, or the Jerome Volunteer Fire Department Auxiliary may, when authorized and subject to available funding, pay or reimburse tuition, registration fees, required course materials, certification costs, examination fees, travel expenses, or other

approved costs associated with education or training that supports Department service. Approval shall be obtained before the expense is incurred and shall identify the paying party, approved costs, payment terms, and any service commitment.

When payment or reimbursement is conditioned upon a two-year service commitment following completion of the education or training, the member shall sign a separate written reimbursement agreement before payment is made. The agreement shall identify the Town, Department, or Auxiliary, as applicable, as the party entitled to reimbursement and shall state the reimbursable costs, the date the service commitment begins, the circumstances under which repayment is required, any authorized prorating or waiver, and the repayment terms.

If the member cannot or does not honor the two-year service commitment, the member shall reimburse the party identified in the separate written agreement in accordance with that agreement and applicable law and Town policy. Nothing in this section independently creates a debt or repayment obligation beyond the terms of the separate written agreement.

ARTICLE IX – COMPENSATION AND VOLUNTEER STATUS

Section 1 – Volunteer Status

Members of the Department are considered volunteers and not employees for purposes of the Fair Labor Standards Act (FLSA), except where explicitly hired as Town employees.

Volunteer members shall not receive wages but may receive stipends as set by Town Council and permitted by local, state and/or federal law.

Section 2 – Compensation

The officers and members of the fire department may be compensated by the Town Council in accordance with section 4-2-3 of the Jerome Town Code.

Compensation for qualifying responses to active calls or incidents shall be established by the Town Council. The standard per-call compensation rate shall be the rate approved by the Town Council. For qualifying responses occurring between the hours of 10:00 p.m. and 6:00 a.m., members shall receive compensation at twice the standard per-call rate, per qualifying response. This overnight rate shall apply to each qualifying response during those hours and shall not be construed as an hourly wage or as compensation for time spent on duty, unless otherwise required by applicable law or separately authorized by the Town Council. All responses must meet the qualifying response requirements established in Article I and applicable Department policy.

Compensation, if provided, shall:

- Be a flat rate amount based on response to active calls/incidents
- Be paid out quarterly
- Be approved by the Town Council

Stipends may be structured as annual or periodic payments based on membership status and participation. Stipend amounts, eligibility criteria, payment structure, and any changes to stipends shall be determined and set by the Town Council, and may be amended, adjusted, suspended, or discontinued at the Town Council's discretion.

For purposes of any compensation based upon response to an active call or incident, a POV response shall qualify only when it meets the definition of a qualifying response under Article I and applicable Department policy.

Section 3 – Dual Role Personnel

Individuals employed by the Town of Jerome shall not serve as volunteer members of the Department in the same or substantially similar capacity in which they are employed, where such service would create a conflict of interest, supervisory conflict, or violation of wage and hour laws.

For the purposes of this section, "same or substantially similar capacity" includes assignments where the member:

Performs duties that are materially equivalent to their paid position, or

Operates within the same chain of command, supervision structure, or functional role as their employment.

Exceptions may be granted only when:

A documented legal review confirms compliance with applicable federal and state labor laws (including FLSA), and

The dual-role assignment does not create conflicts related to supervision, compensation, or liability exposure.

All exceptions must be:

Approved in writing by the Fire Chief and Town Administration, and

Clearly define the member's roles, limitations, and reporting structure

Under no circumstances shall a member:

Volunteer in a capacity where they are directly or indirectly supervised by themselves or a subordinate in their paid role, or

Receive compensation or benefits in a manner that conflicts with applicable wage and hour regulations.

The Fire Chief retains the authority to restrict, modify, or revoke dual-role assignments at any time to maintain compliance and operational integrity.

DRAFT

Section 4 – Pension/Retirement

Eligible members may participate in a Town-approved volunteer pension program in accordance with applicable laws.

Section 5 – Wildland and Emergency Assistance Assignments

Members of the Department may be requested, selected, or authorized to participate in wildland fire assignments, emergency assistance assignments, mutual-aid deployments, or other extended-duration emergency assignments outside the Town of Jerome.

1. Career Employees

A salaried or exempt Town employee who is assigned by the Town or Department to a wildland fire assignment or other emergency assistance assignment may be compensated for the assignment in accordance with applicable federal and state wage and hour laws and Town policy.

When authorized and legally permissible, the employee may be treated as non-exempt for purposes of the specific assignment and compensated at the employee's regular hourly equivalent rate, calculated from the employee's annual salary. The employee shall be eligible for overtime compensation at one and one-half (1.5) times the applicable hourly rate for hours worked in excess of forty (40) hours during the applicable seven-day workweek, subject to applicable law and Town payroll procedures.

The employee's regular salaried employment status shall not otherwise be changed solely by virtue of participation in the temporary assignment.

2. Volunteer Members

A Volunteer Member who is selected, requested, or authorized to participate in a wildland fire assignment, emergency assistance assignment, mutual-aid deployment, or other extended-duration emergency assignment outside the Town of Jerome may receive compensation for the assignment separate from any stipend or other compensation associated with the member's ordinary volunteer service with the Department.

Compensation for such assignments shall be established by the applicable assignment, sponsoring agency, contract, agreement, or other authorized arrangement and shall be paid in accordance with applicable federal and state law. Such compensation shall be separate from the member's ordinary volunteer service with the Jerome Fire Department and shall not, by itself, alter the member's volunteer status with the Department.

The member shall be responsible for complying with all applicable requirements associated with the assignment, including those related to compensation, taxation, reporting, credentialing, incident command, safety, and agency requirements.

3. Assignment Authorization and Documentation

DRAFT

All wildland and emergency assistance assignments shall be authorized or approved through the Fire Chief, Town Manager or the appropriate Town authority before deployment when practicable. The Department shall maintain appropriate records identifying the member, assignment, dates of deployment, employing or sponsoring agency, applicable compensation arrangement, and other documentation required by Town policy or applicable law.

Nothing in this section shall be interpreted to create an employment relationship between the Town of Jerome and a Volunteer Member solely because the member participates in a compensated wildland or emergency assistance assignment. Conversely, no compensation arrangement shall be used to avoid an employment relationship or applicable wage, tax, workers' compensation, or benefits requirement established by law.

ARTICLE X – BENEFITS AND INSURANCE

All members shall be covered by:

- Workers' Compensation as provided by the Town (A.R.S. § 23-901)
- Applicable liability protections while acting within scope of duty

The Town shall provide indemnification to members to the extent allowed by law.

ARTICLE XI – MEETINGS AND GOVERNANCE

Section 1 – Open Meeting Law

Meetings shall be conducted in accordance with Arizona Open Meeting Law where applicable.

Section 2 – Business Meetings

The regular business meeting will be held on the first Thursday of the Month at 5pm at Station 11.

Special meetings may be called for the Fire Chief or during his or her absence by the Assistant Chief, or two thirds of the active members of the department.

Weekly drills will be held every Thursday at 5p.m., except the first Thursday of the month.

Section 3 – Executive Board Meeting

The Executive Board may meet on the Thursday before each regular business meeting at 4 p.m. at Station 11.

Section 4 – Quorum and Meeting Structure

A quorum shall consist of 50% of active members with voting privileges.

Meetings will be conducted under Roberts Rules of Order. Any member may request and secure secret balloting on any motion he or she may desire. The meetings will be conducted in the following order:

1. Call to Order

2. Reading and approval of previous minutes
3. Auxiliary financial report
4. Division reports
5. Training reports
6. Equipment reports
7. Fire Chief's report
8. Old business
9. New business
10. Adjournment

ARTICLE XII – AMENDMENTS

These bylaws may be amended by:

- Two-thirds vote of a quorum of active members, in good standing
- Approval by the Town Council

Proposed amendments shall be provided to all Department members, including career and volunteer personnel, by Department-designated email notification at least fourteen (14) calendar days before the meeting or other authorized proceeding at which the amendments will be considered. Notice shall include the proposed amendment text or a summary of the proposed changes and information regarding how members may submit comments or recommendations.

Notice of proposed amendments shall not be satisfied solely by announcement at a Department meeting. Members shall be given a reasonable opportunity to review and provide input before consideration of the proposed amendments. Member comments and recommendations shall be provided to the appropriate reviewing or approving authority for consideration.

Fifty percent of all active members present shall constitute a quorum for such voting purposes. All members shall review the Bylaws and Personnel Policies each election year during the May business meeting. Amendments to these Bylaws, once approved by department vote, will be submitted to the Town Council for approval.

Nothing in this Article shall supersede Town policy, Town Code, applicable law or any required Town Council notice, hearing or approval procedure.

ARTICLE XIII – LEGAL COMPLIANCE

If any provision of these bylaws conflicts with federal law, Arizona law, or Town policy, such law or policy shall prevail.

ARTICLE XIV – ADOPTION

These bylaws become effective upon approval by the Jerome Town Council based upon recommendation and a majority vote of all active members of the Jerome Fire Department.

Appendix A – Firefighter Code of Ethics/Conduct

This form to be signed and returned

I understand that I have the responsibility to conduct myself in a manner that reflects proper ethical behavior and integrity. In so doing, I will help foster a continuing positive public perception of the fire service. Therefore, I pledge the following:

- Always conduct myself, on and off duty, in a manner that reflects positively on myself, my department and the fire service in general.
- Accept responsibility for my actions and for the consequence of my actions.
- Support the concept of fairness and the value of diverse thoughts and opinions.
- Avoid situations that would adversely affect the credibility or public perception of the fire service profession.
- Be truthful and honest at all times and report instances of cheating or other dishonest acts that compromise the integrity of the fire service.
- Conduct my personal affairs in a manner that does not improperly influence the performance of my duties, or bring discredit to my organization.
- Be respectful and conscious of each member's safety and welfare.
- Recognize that I serve in a position of public trust that requires stewardship in the honest and efficient use of publicly owned resources, including uniforms, facilities, vehicles and equipment and that these are protected from misuse and theft.
- Exercise professionalism, competence, respect and loyalty in the performance of my duties and use information, confidential or otherwise, gained by virtue of my position, only to benefit those I am entrusted to serve.
- Avoid financial investments, outside employment, outside business interests or activities that conflict with or are enhanced by my official position or have the potential to create the perception of impropriety.
- Never propose or accept personal rewards, special privileges, benefits, advancement, honors or gifts that may create a conflict of interest, or the appearance thereof.
- Never engage in activities involving alcohol or other substance use or abuse that can impair my mental state or the performance of my duties and compromise safety.
- Never discriminate on the basis of race, religion, color, creed, age, marital status, nationality, ancestry, gender, sexual preference, medical condition or handicap.
- Never harass, intimidate or threaten fellow members of the service or the public and stop or report the actions of other firefighters who engage in such behaviors.
- Responsibly, use social networking, electronic communications, or other media technology opportunities in a manner that does not discredit, dishonor, or embarrass my organization, the fire service and the public. I also understand that failure to resolve or report inappropriate use of this media equates to condoning this behavior.

E. Consider Proposal Agreement from Willdan for a Complete Water and Wastewater Rate Analysis and Authorizing the Town Manager to Take the Necessary Steps to Execute the Agreement

Council will consider and may approve the agreement and authorize the Town Manager to execute said agreement.

TOWN OF JEROME

POST OFFICE BOX 335, JEROME, ARIZONA 86331
(928) 634-7943 FAX (928) 634-0715

Founded 1876
Incorporated 1899

STAFF SUMMARY REPORT

FROM:	Brett Klein, Town Manager/Clerk
ITEM:	**Item: Consider Proposal Agreement with Willdan to Provide a Water and Wastewater Rate Analysis and Update**
MEETING DATE:	November 10, 2026

Summary:

As a result of the WWTP bids coming in twice what the original estimates indicated, and the subsequent need for the Town to incur additional borrowing to complete the WWTP improvements, it is necessary to conduct an update to our water and wastewater rate analyses. This is both a requirement of the grant / loan from USDA and to conduct capital improvement and budget planning.

Dan Jackson of Willdan has completed the past several studies for the Town, and both the Council and staff have been pleased with the services rendered. Mr. Jackson is quite familiar with our system and fee structure, as well as having a strong familiarity with our local neighboring communities and municipalities throughout the State. Just a few years ago we solicited proposals for our initial rate analysis utilizing the engineer's opinion of probable cost. There were only two received as there are very few vendors in the entire southwest region of the United States that provide this service. Due to these facts, staff recommend a sole source procurement and engaging with Mr. Jackson of Willdan.

Fiscal Impact:

$18,000, all of which is eligible for reimbursement through USDA.

Recommendation:

Staff recommend approval and to start the analysis at Mr. Jackson's earliest convenience for planning purposes.

WILLDAN

October 1 2026

Mr. Brett Klein
Town Manager
Town of Jerome
600 Clark Street
Jerome AZ 86331

Re: Scope of Services and Letter Agreement to Provide Water and Wastewater Rate Analysis and Update

Dear Mr. Klein:

Willdan Financial Services ("Willdan") is pleased to present the following scope of services and budget to assist the Town of Jerome ("The Town") in providing a comprehensive water and wastewater rate study and long-term financial plan update. We are an economic and financial consulting firm, with offices in Plano, Texas and throughout the United States. Our principal clients are national, state and local governments. Our firm contains professionals with decades of experience in water and wastewater utility operations and economic/financial management.

As you are aware, our experience includes preparing over 300 similar studies for cities throughout Texas, Oklahoma, Arizona, the Southwest, the USA and the Pacific region. We have had the privilege of serving as the Town's rate consultant for the past five years.

Scope of Services

We want to ensure that our scope of services is responsive to the Town's needs. We will work with the Town to tailor our proposed scope based on input prior to approval of this letter agreement, and as needed during the course of the project. In the course of this engagement, we will perform the following specific tasks:

- A comparison of the Town's current rates to those of surrounding providers.
- A determination of the revenues required for the Town to meet its operating and capital obligations in the current year and future years.
- We will update our previously-prepared internationally-recognized water and wastewater cost of service and rate model to develop a customized ten-year utility cost of service for the Town's water and wastewater utilities using current budget, volume, debt service and capital improvement plan ("CIP") data. The model will identify current and forecast operating expenses, capital outlays and debt service for the period FY

2027 – 2036. The model will adhere to each respective utilities' industry ratemaking standards to ensure that the cost of service for each customer class is just, reasonable and accurate.

- The project team will prepare an updated proposed water and wastewater rate plan for the Town to consider. The proposal will enable the Town to recover sufficient revenues to fund operating and capital costs and to meet key financial objectives.

- The project team will summarize its initial findings and recommendations into a PowerPoint summary presentation for review with staff and the Town Council.

As part of this engagement, the project team will conduct the following meetings with Town staff:

- an initial meeting with staff to go over information required for the study
- a status/ preliminary recommendations meeting with staff to outline initial findings and answer questions raised during the course of the analysis;
- a workshop with Council to go over findings, recommendations and rate alternatives; and
- a final Council meeting at which the recommendations are voted upon by the Council.

As Principal in Charge for this engagement, I will have sole responsibility for its successful outcome. I will be assisted by Mr. John Moseley, Project Analyst.

Proposed Timing

The project team intends to have preliminary recommendations for staff within 90 days of receipt of all required data from Town staff.

Proposed Pricing

We propose to complete this study for a fixed fee of **$18,000**, to be invoiced monthly on a percentage of completion basis. Tasks or meetings considered to be outside the scope of this engagement will be discussed with Town Staff and additional work completed would be subject to staff approval and would be billed at our hourly rates.

Additional Services

Additional services may be authorized by the Town and will be billed at our then-current hourly overhead consulting rates. Our current hourly rates are:

RATE SCHEDULE | WFS 2025	
Vice President/Director	$ 310.00
Managing Principal	$ 300.00
Principal Consultant	$ 270.00
Senior Project Manager	$ 250.00
Project Manager	$ 210.00
Senior Project Analyst	$ 150.00
Senior Analyst	$ 135.00
Analyst II	$ 120.00
Analyst I	$ 110.00

Authorization

If the terms of this engagement are acceptable, please sign where indicated and email this letter back to our contracts supervisor:

Ms. Karen Checkon
Willdan Financial Services
5500 Democracy Drive, Ste. 130
Plano TX 75024
Ph. (972) 378-6588
E-mail: kcheckon@willdan.com

We appreciate this opportunity to serve the Town. If you have any questions regarding the proposed services, please contact me directly at (972) 378-6588 or via email at djackson@willdan.com.

Sincerely,

Willdan Financial Services

Dan V. Jackson, Vice President

ATTACHMENT 1 TO LETTER AGREEMENT

TERMS AND CONDITIONS

The Letter Agreement between Jerome ("Client") and Willdan Financial Services ("WFS") is subject to these Terms and Conditions (collectively, this "Agreement").

1. Additional Services. Additional services shall be performed by WFS only upon Client's request evidenced by a written addendum executed by both parties.

2. Compensation. WFS shall submit monthly statements for services. Payments shall be due and payable within 30 days of invoice and if not timely paid shall bear interest at the rate of 1.5% per month.

3. Termination. Either party may terminate this Agreement at any time upon 30 days' written notice. In the event of early termination, WFS shall be paid for services performed prior to the effective date of termination.

4. Data Provided by Client. WFS shall rely upon data provided by Client without independent verification of accuracy. WFS shall not be responsible for any errors resulting from its use of inaccurate data provided by Client.

5. Indemnification. Each Party shall indemnify the other from claims resulting from their respective negligence or other wrongful conduct or the negligence or other wrongful conduct of their respective officers, agents or employees.

6. Insurance. WFS shall maintain the following insurance:

a. Workers' Compensation and Employer's Liability Insurance as prescribed by applicable law.

b. Commercial General Liability Insurance, with limits not be less than $1,000,000 per occurrence and general aggregate.

c. Commercial Automobile Liability with limits not less than $1,000,000 per occurrence.

d. Professional Liability with limits not be less than $1,000,000 per claim and annual aggregate.

e. All policies except Professional Liability and Workers Compensation shall include Client as an additional insured and be primary with respect to any insurance carried by WFS. All policies shall include a waiver of subrogation in favor of Client.

f. WFS shall provide Client with certificates of insurance evidencing compliance with the above insurance requirements prior to commencing it services.

7. **Miscellaneous.**

a. Titles used in this Agreement are for general reference and are not a part of the Agreement.

b. This Agreement shall be interpreted as though prepared by both parties.

c. Any provision of this Agreement held to violate any law shall be deemed void, and all remaining provisions shall continue in full force and effect.

d. This Agreement shall be interpreted under the laws of the State of Texas.

e. This Agreement comprises a final and complete repository of the understandings between the parties and supersedes all prior or contemporary communications, representations or agreements, whether oral or written, relating to the subject matter of this Agreement.

f. Any notices given pursuant to this agreement shall be effective on the third business day after posting by first class mail, postage prepaid, to the address appearing immediately after the signatures below.

g. WFS shall not be liable for damages resulting from the actions or inactions of governmental agencies including, but not limited to, permit processing or environmental impact reports.

h. WFS's waiver of any term, condition, or covenant, or breach of any term, condition, or covenant, shall not constitute the waiver of any subsequent breach of any other term, condition or covenant.

i. WFS shall not responsible for the performance of services by third parties not retained by WFS.

j. Consultant shall receive reasonable adjustment for delays and costs incurred due to tariffs, or other similar acts of government.

8. Project Disclaimer

Client represents, acknowledges, and agrees that:

(i) Client uses the services of one or more municipal advisors registered with the U.S. Securities and Exchange Commission ("SEC") to advise it in connection with municipal financial products and the issuance of municipal securities;

(ii) Client is not looking to Willdan to provide, and client shall not otherwise request or require Willdan to provide, any advice or recommendations with respect to municipal financial products or the issuance of municipal securities (including any advice or recommendations with respect to the structure, timing, terms, and other similar matters concerning such financial products or issues);

(iii) The provisions of this proposal and the services to be provided hereunder as outlined in the scope of services are not intended (and shall not be construed) to constitute or include any municipal advisory services within the meaning of Section 15B of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act"), and the rules and regulations adopted thereunder;

(iv) For the avoidance of doubt and without limiting the foregoing, in connection with any revenue projections, cash-flow analyses, feasibility studies and/or other analyses Willdan may provide client with respect to financial, economic or other matters relating to a prospective, new or existing issuance of municipal securities of client, (A) any such projections, studies and analyses shall be based upon assumptions, opinions or views (including, without limitation, any assumptions related to revenue growth) established by client, in conjunction with such of its municipal, financial, legal and other advisers as it deems appropriate; and (B) under no circumstances shall Willdan be asked to provide, nor shall it provide, any advice or recommendations or subjective assumptions, opinions or views with respect to the actual or proposed structure, terms, timing, pricing or other similar matters with respect to any municipal financial products or municipal securities issuances, including any revisions or amendments thereto; and

(v) Notwithstanding all of the foregoing, client recognizes that interpretive guidance regarding municipal advisory activities is currently quite limited and is likely to evolve and develop during the term of the potential engagement and, to that end, client will work with Willdan throughout the term of the potential Agreement to ensure that the Agreement and the services to be provided by Willdan hereunder, is interpreted by the parties, and if necessary amended, in a manner intended to ensure that client is not asking Willdan to provide, and Willdan is not in fact providing or required to provide, any municipal advisory services. Rate and Financial Planning Model.

RE: Formal Bid Protest and Objection to Intent to Award

Project: Town of Jerome Wastewater Treatment Plant Improvements

Bidder: Technology Construction, Inc. (Low Bidder)

Dear Mayor and Members of the Jerome Town Council,

This letter serves as the formal Bid Protest of Technology Construction, Inc. (TCI) regarding the Town of Jerome's apparent intent to bypass TCI—the apparent low bidder—and award the contract for the Wastewater Treatment Plant Improvements project to Fann Contracting.

TCI is the lowest responsive and responsible bidder for this public project. Bypassing TCI on the claimed grounds that TCI's work experience with public and tribal entities was "unverifiable" is factually inaccurate, procedurally flawed, and contrary to Arizona public competitive bidding law.

I. STATEMENT OF FACTS

1. **Submission of Low Bid:** On June 1, 2026, TCI submitted a complete bid package for the Town of Jerome WWTP Improvements project, establishing TCI as the apparent low bidder.
2. **Bid Security & Validity Window:** In accordance with EJCDC C-410 Bid Form, Paragraph 7.01, bids remain subject to acceptance for **60 days** after the bid opening. TCI provided a valid Bid Bond (Penal Sum Form EJCDC C-430) executed by Everest National Insurance Company.
3. **Qualification Documentation & Resume Submission:** TCI submitted a comprehensive Statement of Qualifications with an audited financial report and a detailed corporate project history demonstrating over $100 million in completed civil, municipal, wastewater, and utility infrastructure projects across Arizona and the Southwest.
4. **Supplemental Reference Request:** Following initial review, PACE Water requested supplemental reference contacts on June 17th, 2026 for key trades, including concrete and piping

TECHNOLOGY CONSTRUCTION INC.
5430 Side Road, Prescott AZ 86301
928-777-0099 Office
928-777-8833 Fax

(Exhibit B-1). TCI promptly provided the requested supplemental contacts and reference details to PACE Water.

5. **Arbitrary Intent to Award:** On September 23, 2026—115 days after bid opening and well beyond the 60-day bid acceptance period—PACE Water notified TCI via email that the Town and USDA-RD were progressing toward an award to Fann Contracting (Exhibit B-2). When asked for justification, PACE Water stated on September 24, 2026, that it was *"unable to verify similar work experience"*.

II. GROUNDS FOR PROTEST

1. TCI is a Fully Qualified and Responsible Contractor

TCI possesses extensive, verified experience constructing and upgrading complex municipal wastewater treatment facilities and water infrastructure in Arizona and the Southwest. TCI's submitted project history includes, among others:

- **Lake Havasu City Island WWTP Flow Equalization Basin ($5,199,297):** Wastewater treatment plant construction.
- **Sells Lagoon & Sewer Main Improvement Project ($3,712,160):** Sewer lagoon and main upgrades.
- **Wickenburg Wastewater Treatment Plant ($404,737):** Belt press, building, and WWTP upgrades.
- **Chemehuevi HLR Lift Station #3 Renovation ($1,555,643):** New lift station, pumps, and electrical supply.

TCI has performed these and other public works projects for Arizona municipalities, tribal authorities, and ADOT. Declaring TCI's background "unverifiable" ignores public record documentation and TCI's direct performance history. The attached project reference table (Enclosure A) shows selected wastewater and utility projects and references.

2. Failure to Conduct Proper Due Diligence on Provided References

Following bid opening, PACE Water requested supplemental reference contacts for specific key project scopes, including concrete and piping. TCI promptly provided the requested supplemental contacts and reference details. Once supplemental reference data was requested and provided, the Town and PACE Water were obligated under public procurement standards to conduct reasonable, good-faith due diligence. Passing over the low bidder on the premise that experience was "unverifiable" without contacting the supplemental references provided—or without issuing a formal inquiry or cure notice—is arbitrary and procedurally invalid.

3. Violation of Arizona Competitive Bidding Statutes & Public Funds Protection

Under Arizona public contracting principles, public agencies must award contracts to the lowest responsive and responsible bidder to ensure the prudent expenditure of taxpayer and federal grant funds.

TECHNOLOGY CONSTRUCTION INC.

5430 Side Road, Prescott AZ 86301
928-777-0099 Office
928-777-8833 Fax

Bypassing the low bidder in favor of a higher bidder by over **$1,000,000** without issuing a formal, written finding of non-responsibility backed by verifiable evidence is arbitrary, capricious, and legally improper.

4. Expiration of Bid Acceptance Period & Improper Retention of Security

Under Paragraph 7.01 of the Bid Form, the Town's option window for bid acceptance is 60 days. The Town held TCI's bid security for over 115 days without declaring TCI non-responsive or returning its bond. Retaining a low bidder's bond while simultaneously bypassing them without formal cause violates both EJCDC terms and tenets of Arizona Fair Bidding practices.

III. REQUESTED RELIEF

Technology Construction, Inc. respectfully requests that the Town Council of Jerome and PACE Water take the following action:

1. **Stay Contract Award:** Immediately stay any formal contract execution or Notice to Proceed with Fann Contracting pending the formal resolution of this protest.
2. **Re-evaluate Low Bidder / Formal Findings:** Conduct a complete, good-faith review of TCI's submitted references and qualifications. In the event the Town maintains its position, TCI demands formal, written findings detailing the exact basis upon which TCI's references were determined to be "unverifiable."
3. **Award to Low Bidder:** Award the contract for the Jerome Wastewater Treatment Plant Improvements to Technology Construction, Inc. as the lowest responsive and responsible bidder.

Thank you for your prompt attention to this matter. We look forward to your written response.

Sincerely,

Michael H. Ottmann
President

LEGAL DESCRIPTION
PUBLIC UTILITIES EASEMENT

A parcel of land located in Section 27, Township 16 North, Range 2 East of the Gila and Salt River Meridian, Yavapai County, Arizona, being a strip of land 20 feet wide lying 10 feet on each side of the following described centerline:

Beginning at a point that lies South 66°14'55" West a distance of 5.75 feet from the northwest corner of an existing water box, with said northwest corner having a Grid North value of 1361284.1410 and a Grid East value of 638478.9510 (Arizona State Plane Coordinate System, Central Zone, International Feet, NAD 83),

Thence, South 82°17'27" East, used as the **Basis of Bearings** for this description, a distance of 26.45 feet to a point;

Thence, South 63°55'05" East a distance of 29.71 feet to a point;

Thence, South 78°50'07" East a distance of 34.58 feet to a point;

Thence, South 33°50'07" East a distance of 76.07 feet to a point;

Thence, South 22°35'07" East a distance of 56.70 feet to a point;

PRELIMINARY

Thence, South 33°50'07" East a distance of 315.50 feet to a point;

Thence, South 11°28'45" West a distance of 7.07 feet to a point;

Thence, South 15°23'51" West a distance of 13.35 feet to a point;

Thence, South 21°19'29" West a distance of 29.05 feet and the **Terminus** of said centerline, with sidelines extended or trimmed on the southeasterly line of State Route 89A Right of Way.

The description hereon was prepared by SEC Inc. on October 30, 2026.

SEC Inc. and the registrant cited below will not be responsible for errors committed by others if this description is not reproduced in its entirety exactly as written above including this disclaimer. No liability is accepted for misuse or assumptions made by unauthorized users.

WATER INFRASTRUCTURE EASEMENT AGREEMENT

THIS WATER INFRASTRUCTURE EASEMENT AGREEMENT ("**Agreement**") is made this ___ day of _____, 2026 (the "**Effective Date**"), by and between **Freeport Minerals Corporation,** a Delaware corporation ("**Grantor**"), and **Town of Jerome,** a municipal corporation of the State of Arizona ("**Grantee**").

AGREEMENT

Subject to the terms and conditions set forth herein and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties hereto state, confirm and agree as follows:

1. Grant of Easement.

Grantor hereby grants to Grantee a non-exclusive easement, solely for the purpose of constructing, operating, maintaining, repairing, replacing and removing a municipal water line and related facilities necessary to operate and maintain said water line (the "**Improvements**") under and on the surface of the real property described on Exhibit "A" attached hereto and made a part hereof (the "**Easement Property**"), together with the right of reasonable ingress and egress to, from and over the Easement Property, in each case utilizing existing roads. Notwithstanding anything to the contrary in this Agreement, the non-exclusive easement granted hereby is strictly limited to an existing potable water line located within the area described and depicted in Exhibit "A", attached hereto and incorporated herein by this reference, and such easement shall not be used for redundant water lines, sewer infrastructure, third-party utilities, or any other use whatsoever. Grantee's employees and contractors (each a "**Grantee Party**" or, collectively with Grantee, the "**Grantee Parties**") shall have access to the Easement Property for the purpose of constructing, operating, maintaining, repairing, replacing and removing the Improvements. Grantee may trim, prune, or remove any trees or shrubs located over, upon or under the Easement Property that, in the judgment of Grantee, may interfere with the construction or endanger the operation of the Improvements.

2. Grantor's Reservation.

Grantor reserves for its benefit and the benefit of its successors and assigns, to run with and bind the Easement Property, the perpetual privilege and right to:

a) use and occupy the Easement Property for any and all purposes, including, without limitation, ingress and egress, the operation, maintenance, construction, relocation, or repair of any other utilities on the Easement Property, and the placement of any structures upon and within the Easement Property, including but not limited to groundwater extraction and monitor wells;

b) all mineral and water rights, including the right to access and extract these, upon reasonable notice to Grantee; and

c) release and discharge dust, sand, tailings, dirt, noises and vibrations from mines, dumps, and other facilities located on lands now or hereafter owned by Grantor, its successors and assigns, adjacent to or in the vicinity of the Easement Property, and to allow and permit such dust, sand, tailings, dirt, noises, vibrations to be carried over, through and across the Easement Property, either by wind, water, air currents or otherwise.

If Grantor's exercise of its reserved rights impairs or interferes with Grantee's operation of the Improvements or otherwise unreasonably interferes with Grantee's use of the Easement Property, or creates a safety hazard, Grantor's exercise of its reserved rights shall be handled as a request for the Improvements to be relocated pursuant to Section 3, below. In order to avoid interruption in Grantee's service to its residents, Grantor will notify Grantee in writing in advance of any actions which it reasonably anticipates will affect, impair, or interfere with Grantee's Improvements and/or use of the Easement Property and, if appropriate, will include in such notice a request to Grantee to relocate the Improvements pursuant to Section 3.

3. Relocation of Easement.

Grantor reserves the right to reasonably require Grantee to relocate the Improvements to another area of Grantor's property (for which a new easement shall be granted), selected by the mutual agreement of Grantor and Grantee. Grantor shall provide Grantee with six (6) months prior written notice of Grantor's desire to exercise this right. If Grantor requires Grantee to relocate the Improvements at any time within ten (10) years after the Effective Date, Grantor shall be responsible for all reasonable costs incurred by Grantee in connection with such relocation. If Grantor requires Grantee to relocate the Improvements at any time between ten (10) and twenty (20) years after the Effective Date, Grantor and Grantee shall share equally all reasonable costs incurred by Grantee in connection with such relocation. If Grantor requires Grantee to relocate the Improvements at any time twenty (20) years or more after the Effective Date, Grantee shall be responsible for all costs incurred by Grantee in connection with such relocation.

4. No Implied Rights; No Representations or Warranties.

Notwithstanding anything herein to the contrary with respect to the Easement Property, Grantor makes no representations or warranties, express or implied, including representations as to the accuracy or completeness of the information shown on the Exhibits attached hereto (other than information related to the location of the Easement Property), and Grantee agrees to accept and use the Easement Property in **"AS IS" "WHERE IS"** and **"WITH ALL FAULTS"** condition and to bear all risks associated with the Improvements and the condition of the Easement Property. Grantee is entering into this Agreement and shall use the Easement Property based on Grantee's inspection and investigation of all matters pertaining thereto and not in reliance on any representation, warranty (including, without limitation, warranties of title or fitness for a particular purpose) or agreement of Grantor. Grantee agrees that the Improvements and the Easement Property are subject to all existing easements, rights-of-way and other rights, including, without limitation, all matters of record and all matters that can be disclosed by a physical inspection and survey of the Easement Property.

5. Duties and Obligations of Grantee.

Grantee shall exercise, and assure Grantee Parties exercise, reasonable care in its use of the Easement Property and shall, at the expense of Grantee, regularly inspect, maintain, repair and keep the Easement Property and the Improvements, in a good, safe, secure, clean and workmanlike condition. Grantee shall comply, and assure Grantee Parties comply, with all applicable laws, rules and regulations, now in force and hereafter enacted, including, without limitation, all environmental, safety and health related laws and regulations, in connection with its use of the Improvements and Easement Property. Grantee shall repair or restore, at its expense, any damage or disturbance to the Easement Property or any of Grantor's surface aesthetics, drainage facilities, and other fixtures or improvements thereon resulting from Grantee's construction, maintenance, repair, replacement or removal of the Improvements on

the Easement Property. Grantee agrees to provide Grantor with a copy of all plans and specifications for any Improvements constructed within the Easement Property, for Grantor's review and approval, which approval shall not be unreasonably withheld, as well as an "as built" map or survey of the Improvements following the completion thereof. In addition, Grantee shall obtain all necessary government approvals and permits required for the installation and use of the Improvements, at Grantee's sole cost and expense. To the extent necessary, Grantor shall reasonably cooperate with Grantee, at Grantee's sole cost and expense, in obtaining the necessary approvals and permits. As an additional condition of installing any new subsurface Improvements, Grantee shall install tracer wire for future locating/blue stake purposes.

6. No Liens.

Grantee shall at all times keep and maintain the Easement Property free and clear of any and all liens, claims, demands, obligations, liabilities and causes of action (each a "**Claim**") arising out of or in any manner relating to any work, including construction and installation of the Improvements and maintenance and repair work, performed on the Easement Property for or on behalf of Grantee or arising out of the use of the Easement Property by any Grantee Parties. If any Claim is filed, asserted or made on, against or with respect to the Easement Property as a result of any of such work or use, Grantee shall cause such Claim to be dismissed, released, and discharged therefrom no later than ten (10) days thereafter or commence proceedings to dismiss, release and discharge within ten (10) days thereafter and diligently pursue such proceedings until completed. If Grantee does not dismiss, release or discharge (by bonding or otherwise) the Claim within thirty (30) days thereafter, Grantor may pay, discharge or compromise the Claim in its reasonable discretion and regardless of Grantee's defenses or counterclaims provided that no admissions, representations or promises that Grantee shall pay money are made on behalf of Grantee in settlement of such Claim without Grantee's express prior written consent. Grantee will indemnify Grantor for its costs and expenses incurred related to the Claim including reasonable attorneys' fees.

7. Indemnification and Release.

To the extent allowed by law, Grantee agrees to indemnify, defend, protect and hold harmless Grantor, including its officers, directors, employees, shareholders, partners, representatives, agents, parents, affiliates, and each of their successors and assigns (collectively, the "**Indemnified Parties**"), from and against any and all liabilities, claims, damages, demands, obligations, expenses, costs, including attorneys' fees and court costs, and causes of action (collectively, "**Liabilities**") resulting from, arising out of or relating to the construction, maintenance, repair, use and operation of the Improvements by Grantee Parties, or any other activities on or use of the Easement Property by Grantee Parties, except to the extent caused by the negligence or intentional misconduct of the Indemnified Parties.

Grantee hereby releases and forever discharges the Indemnified Parties from all Liabilities arising out of or relating to or in any manner based upon or related to Grantee Parties' use of the Easement Property, except to the extent caused by the negligence or intentional misconduct of any of the Indemnified Parties. The obligations under this Section 7 survive the termination or assignment of this Agreement.

8. Environmental Issues.

Grantee shall comply, and shall cause Grantee Parties to comply, with all applicable federal, state and local laws, statutes, rules, ordinances, codes and regulations relating to environmental protection, public health and safety, nuisance or menace, presently in effect or amended or promulgated in the future (collectively, "**Environmental Laws**"). Grantee expressly warrants, represents, and agrees that no pollutant, contaminant, or waste, whether solid, gaseous or liquid, that is infectious, toxic, hazardous, explosive, corrosive, flammable or radioactive, or otherwise regulated, defined, listed or included in any Environmental Law (collectively, "**Hazardous Substances**") will be released or disposed of on, under, or about the Easement Property by Grantee Parties. Grantee shall not, and shall cause Grantee Parties not to, generate, handle, use, store or treat any Hazardous Substances on the Easement Property without the prior written consent of Grantor.

Grantee shall indemnify, defend, protect and hold harmless the Indemnified Parties from and against any and all Liabilities, including any claims asserted under the Environmental Laws, asserted by any entity or individual, arising out of or in connection with the use of the Easement Property or the Improvements by Grantee or the Grantee Parties, or for the breach of any covenant contained in Section 8 of this Agreement, except to the extent caused by the negligence or intentional misconduct of any of the Indemnified Parties. The agreements contained in this Section 8 shall survive the expiration of this Agreement.

9. Environmental Notification.

Grantee shall promptly notify Grantor upon Grantee Parties becoming aware of (i) any release or threatened release of a Hazardous Substance under, on, from, or about the Easement Property, (ii) any proceeding, inquiry, or notice from any federal, state, or local body, commission, council, board, or authority, or others with respect to the use or presence of any Hazardous Substances on the Easement Property or the migration thereof to or from other Property, and (iii) all claims made or threatened by any third party against the Easement Property relating to loss or injury from any Hazardous Substance.

10. Insurance.

Grantee shall obtain and maintain, or shall cause the applicable Grantee Party to obtain and maintain, during the term of this Agreement the insurance coverage described on Exhibit "B" attached hereto and made a part hereof (the "**Insurance Requirements**"), which shall name the Indemnified Parties as an additional insured by endorsement, which Grantee or the applicable Grantee Party shall pay for at its sole cost and expense.

11. Assignment.

Grantee shall have no right to make any assignment of its rights, benefits, or obligations hereunder and any such assignment shall be null and void and shall result in the immediate termination of this Agreement, unless such assignment is previously approved in writing by Grantor. Any such assignment shall require the assignee to be obligated by the terms and conditions of this Agreement and shall not release Grantee of its liabilities and obligations under this Agreement.

12. Fees and Costs.

If either party to this Agreement shall institute suit against the other to enforce its rights under this Agreement or to seek damages by reason of a breach of this Agreement and obtain a valid judgment against the other, the prevailing party shall be entitled to receive all attorneys' fees, witness fess (including expert witness fees) and other litigation-related expenses incurred, with the attorneys' fees to be fixed by the judge of the court of the applicable jurisdiction, sitting without a jury.

13. Time of Essence.

Time is of the essence of this Agreement.

14. Governing Law; Venue.

This Agreement shall be governed by the laws of the State of Arizona. Although the Easement Property is located in Yavapai County, Arizona, the Parties expressly acknowledge and agree that any dispute arising out of or relating to this Agreement (or its breach, termination, or validity) is to be resolved by referral to state or federal courts sitting in Maricopa County, Arizona, which shall have sole and exclusive jurisdiction over all litigation arising hereunder. Each party hereto consents to and attorns to the jurisdiction of such courts and waives any objection to venue in such courts based on improper venue or the alleged inconvenience of such a court as a forum in which to litigate or arbitrate the action.

15. Notices.

Any notice, demand, request, consent, approval, or other communication which any party is required to or desires to give or make to the other party shall be in writing and shall be given by delivery in person or by postage prepaid, registered or certified mail, return receipt requested, addressed as follows:

If to Grantor: Freeport Minerals Corporation
Attn: Land Department
4340 E. Cotton Center Blvd. #110
Phoenix, AZ 85040

If to Grantee: Town of Jerome
600 Clark St.
Jerome, AZ 86331

16. Termination of Grantor's Liability.

If Grantor sells, transfers, assigns, conveys, or otherwise disposes of all its right, title, and interest in and to the Easement Property (a "Disposition") at any point in the future, which Grantor shall have the full right to do without Grantee's consent, Grantor shall not be liable for any matter occurring or obligation arising hereunder after any such Disposition.

17. Termination of Easement.

Grantee may terminate this Agreement at any time by providing at least thirty (30) days prior written notice to Grantor. If Grantee ceases to use the Easement Property or the Improvements for a period of one (1) year, all rights granted to Grantee hereunder shall automatically terminate after thirty (30) days written notice to Grantee providing Grantee with an opportunity to confirm use thereof. Upon termination of this Agreement, Grantee shall, at Grantor's option, remove any Improvements, at Grantee's sole cost and expense, without damage or destruction to the Easement Property, and shall return the Easement Property to substantially the same condition as existed prior to Grantee's entry upon and use of the Easement Property, including construction of the Improvements. Upon termination, Grantee shall execute a deed for recording by Grantor releasing Grantee's rights under the Agreement.

18. No Dedication.

Nothing in this Agreement shall be construed to create a public dedication or conveyance to the public or to any third party or to give any party other than Grantee and its successors and assigns any rights hereunder.

19. Counterparts.

This Agreement may be executed in any number of counterparts, each of which shall be deemed an original and all of which when taken together shall constitute one instrument.

IN WITNESS WHEREOF, the parties hereto have executed this Water Infrastructure Easement Agreement the day and year first herein above written.

Exhibit "A"

(Legal Description of Easement)

[to be inserted on following page]

Exhibit "B"

(Insurance Requirements)

a. For the entire duration that Grantee Parties enter, or perform activities on, the Easement Property, Grantee or the applicable Grantee Party shall carry and continuously maintain the insurance coverages described below with reputable insurance companies, and which shall include coverage for claims occurring during the duration of this Agreement but not reported until a later date:

   i. Commercial general liability insurance with a combined single limit not less than $2,000,000 for bodily injury (including illness and death at any time resulting therefrom) and property damage. Such insurance shall provide contractual liability, products and completed operations, and sudden and accidental pollution coverage for Grantee Parties' undertakings under the Agreement.

   ii. Automobile and liability insurance covering all owned, non-owned, leased and hired vehicles with a combined single limit of not less than $1,000,000.00 per occurrence for injuries or death of one or more persons or loss or damage to property.

   iii. Worker's compensation insurance including, without limitation, occupational disease, in accordance with the Laws in effect in Arizona and all jurisdictions of hire or origin of the primary insured's employees. Worker's compensation insurance shall be required only when Grantee has employees.

   iv. Employer's liability insurance coverage with a limit of not less than $1,000,000.

b. Each of the commercial general liability and automobile liability policies shall be endorsed to include the Indemnified Parties as additional insureds and to apply on a primary basis as to other insurance available to the Indemnified Parties. All policies required to be maintained by Grantee or the applicable Grantee Party shall include a waiver of subrogation provision in favor of the Indemnified Parties; however, the waiver of subrogation on the worker's compensation policy shall not be required if prohibited by the applicable regulatory authority. Upon request by Grantor, Grantee shall provide to Grantor a certificate(s) of insurance and/or copies of policies evidencing compliance with the provisions of this Exhibit "B". Grantee or the applicable Grantee Party shall be liable for any retentions or deductibles under the required insurance coverages.

Grantor in no way represents or warrants that the minimum coverage limits specified in this Exhibit "B" are sufficient to protect Grantee from liabilities that may arise out of Grantee Parties' use of, entry upon, or performance of activities on the Easement Property, and it is Grantee's responsibility to procure any such additional insurance that Grantee may determine to be necessary or advisable.

Please briefly describe the event:

Steve Hopkins celebration of life

Event Details

Special Events which occur on a Town right-of-way or on property owned or leased by the Town require an "Application for Facility Use." Please complete and submit along with the Special Event Permit Application.

Will the Special Event take place on property owned or leased by the Town of Jerome?

☐ YES ☒ NO

If yes, which property? _____

If no, what is the **physical address** for the event? _____

Please note that Separate permits or approvals may be required by County or State agencies, depending on the type of event or where there may be the presence of alcohol or food for sale, or by donation. Documentation of all applicable approvals must be provided **30 days prior** *to the event.*

Will the Special Event require the use of temporary signage?

☐ YES ☒ NO

**All signage must comply with Section 509 of the Jerome Zoning Ordinance. A separate sign permit for special events is not required. To hang signs from Town owned property will require prior approval.*

Event Details Continued

Will Alcohol be Sold?

☐ YES ☒ NO ☐ By Donation * Alcohol will be present but not sold or given by donation

If yes, you must submit approval documents from the Arizona Department of Liquor Licenses and Control, at least 30 days prior to the event.

Will Food be Sold?

☐ YES ☒ NO ☐ By Donation

If yes, you must submit approval documents from the Yavapai County Health Services Department, or proof of a prior event approval or Special Event Variance granted by Yavapai County Health Services in the same calendar year.

Will there be outdoor, amplified sound at the event?

☐ YES ☒ NO

Please provide a brief description of outdoor/amplified sound to be used:

_____

_____

_____

Jerome Town Code section 10-1-13 restricts the volume and hours of outdoor sound and amplification devices. Loud noise that is a public nuisance, is prohibited. The Town reserves the right to limit the hours of the Special Event to avoid unreasonable interference with adjacent properties.

Will there be outdoor lighting, or other electrical needs?

☐ YES ☒ NO

Please provide a brief description of the electrical requirements for the event:

_____

_____

_____

Will the event include other vendors/businesses in addition to the business/entity applying for this permit?

☐ YES ☒ NO

If yes, please provide a list of all participating vendors to the Town of Jerome Manager prior to the event. Including the business name(s), dba, owner(s) name(s), physical business location, contact telephone number(s) and vendors' TPT license number.

Will the event require the use of tents or canopies or other temporary structures? *

☐ YES ☒ NO

**Please include the placements of tents or canopies on the site plan, with points of entry or exit clearly marked, including the exact type of structure – Please note set-up and tear-down time(s) must be indicated on Page 4.*

Special Event Access

Will the event require the use of fencing, ropes, barricades, or other types of barriers? *

☐ YES ☒ NO

**Please note barriers and any points of entry or exit through barriers should be clearly marked on your site plan, including exact type of fencing or barriers to be used.*

Will the event require the closure and/or detour of any roadway, sidewalk, or other public access route?

☐ YES ☒ NO

Please include a description of the primary access routes to the event/property and available parking for the crowds anticipated. (Special traffic control may be required for larger events)

Will the use of portable restrooms be necessary during the event?

☐ YES ☒ NO

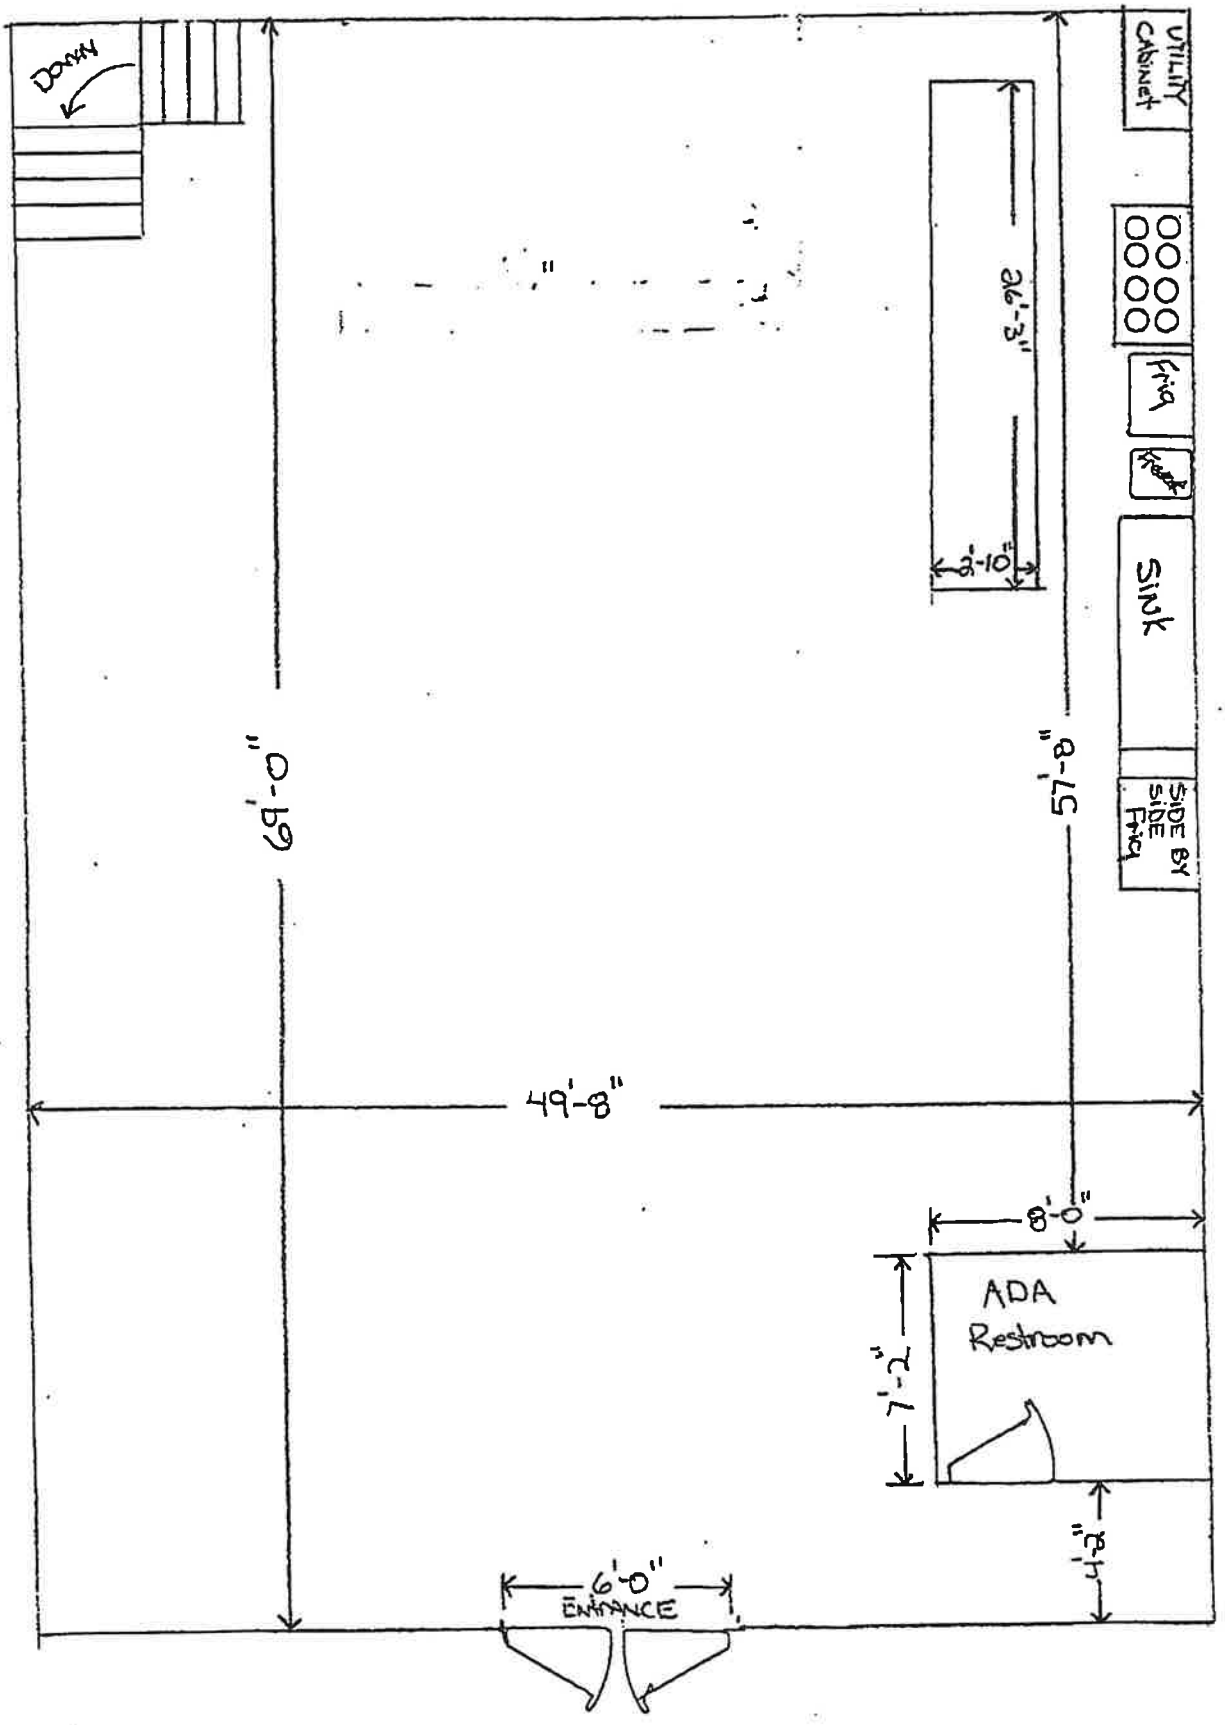
Please note the use of portable restrooms may be required on a case-by-case basis.

Will trash be created during the special event?

☒ YES ☐ NO

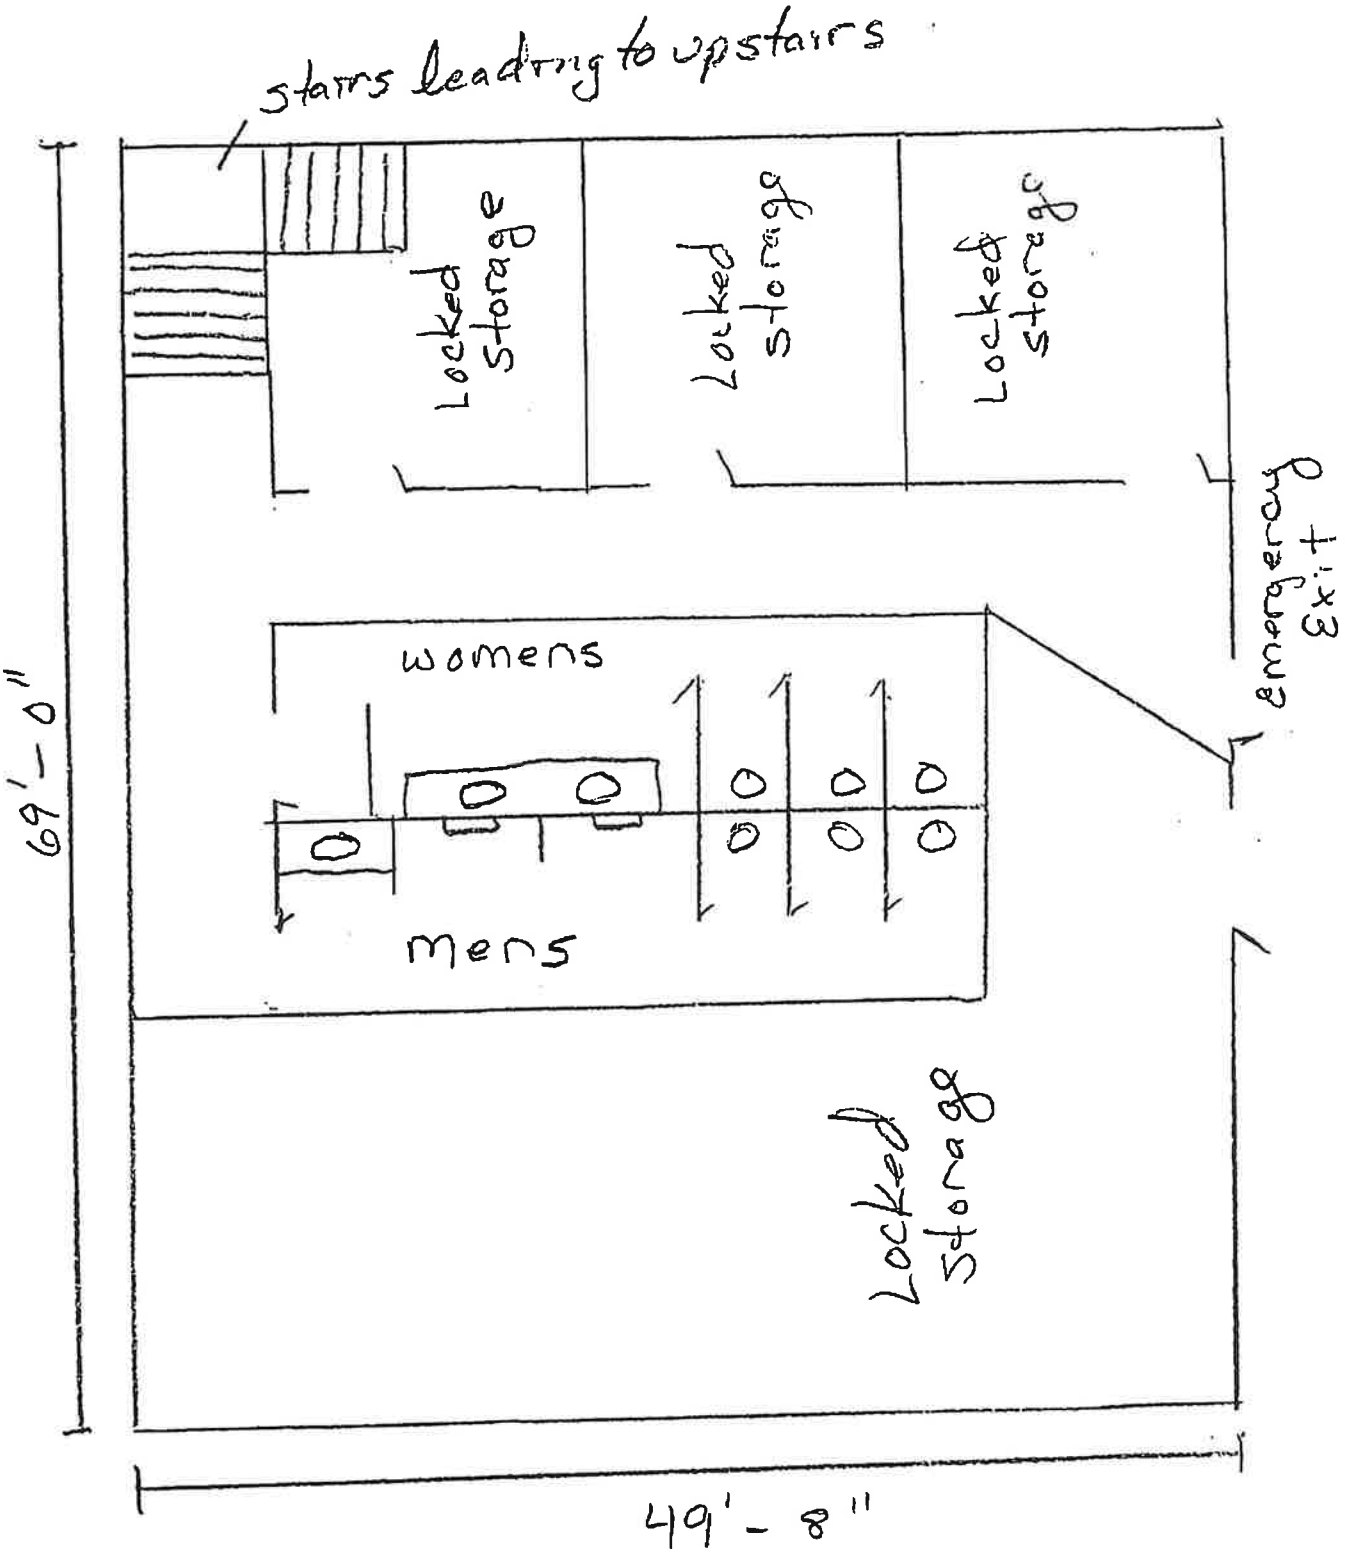
Briefly description of the receptacles to be used and/or efforts to minimize litter around Town during the event:

Trash will be taken to the dump.



Cleanup of the site(s), including removal of all waste and temporary structures, must be completed by 10:00 a.m. of the morning following the end of the Special Event. Please refer to and comply with Jerome Town Code, section 9-1, Garbage and Trash Collection.

Has any community outreach been completed in regard to this special event?



☐ YES ☒ NO

Please give a brief description of any outreach to neighboring residents and/or businesses regarding the special event, including any feedback received from that outreach.

NOTICE OF AWARD

Date of Issuance:	October 22, 2026		
Owner:	Town of Jerome	Owner's Project No.:	N/A
Engineer:	PACE	Engineer's Project No.:	B614
Project:	Jerome Wastewater Treatment Plant Improvements		
Contract Name:	Jerome Wastewater Treatment Plant Improvements		
Bidder:	Fann Environmental, LLC		
Bidder's Address:	6708 Corsair Ave Ste A Prescott, AZ 86301		

You are notified that Owner has accepted your Bid dated **June 3, 2026** for the above Contract, and that you are the Successful Bidder and are awarded a Contract for:

The Town of Jerome Wastewater Treatment Plant Improvements.

The Contract Price of $10,699,947.60 and Contract are contingent upon USDA-RD concurrence. The Contract Price is subject to adjustment based on the provisions of the Contract, including but not limited to those governing changes, Unit Price Work, and Work performed on a cost-plus-fee basis, as applicable.

One (1) electronic, unexecuted counterparts of the Agreement accompany this Notice of Award, and one copy of the Contract Documents accompanies this Notice of Award, or has been transmitted or made available to Bidder electronically.

☒ Drawings will be delivered separately from the other Contract Documents.

You must comply with the following conditions precedent within 15 days of the date of receipt of this Notice of Award:

1. Deliver to Owner **One (1) hard copy and one (1) electronic,** counterparts of the Agreement, signed by Bidder (as Contractor).
2. Deliver with the signed Agreement(s) the Contract security (such as required performance and payment bonds) and insurance documentation, as specified in the Instructions to Bidders and in the General Conditions, Articles 2 and 6.
3. Other conditions precedent (if any): **None**

Failure to comply with these conditions within the time specified will entitle Owner to consider you in default, annul this Notice of Award, and declare your Bid security forfeited.

Within **30** days after you comply with the above conditions, Owner will return to you one fully signed counterpart of the Agreement, together with any additional copies of the Contract Documents as indicated in Paragraph 2.02 of the General Conditions.

Owner: **Town of Jerome**

AGREEMENT BETWEEN OWNER AND CONTRACTOR

This Agreement is by and between **Town of Jerome** ("Owner") and **Fann Environmental, LLC** ("Contractor").

Terms used in this Agreement have the meanings stated in the General Conditions and the Supplementary Conditions.

Owner and Contractor hereby agree as follows:

ARTICLE 1—WORK

1.01 Contractor shall complete all Work as specified or indicated in the Contract Documents. The Work is generally described as follows: Improvements include conversion of this existing trickling filter facility to a 90,000 GPD Sequencing Batch Reactors (SBR) with removal and demolition of existing wastewater equipment; construction of two new 54,000-gallon SBR basins, aerobic digester basin, equalization basin, sludge dewatering, chlorine contact chamber, drying beds, etc.; installation of new 12-inch PVC gravity sewer main, complete with piping and piping appurtenances; construction of a new access roadway, including all grading and drainage work.

ARTICLE 2—THE PROJECT

2.01 The Project, of which the Work under the Contract Documents is a part, is generally described as follows: **Jerome Wastewater Treatment Plant Improvements.**

ARTICLE 3—ENGINEER

3.01 The Owner has retained **Pacific Advanced Civil Engineering, Inc. (PACE)** ("Engineer") to act as Owner's representative, assume all duties and responsibilities of Engineer, and have the rights and authority assigned to Engineer in the Contract.

3.02 The part of the Project that pertains to the Work has been designed by **the Engineer.**

ARTICLE 4—CONTRACT TIMES

4.01 *Time is of the Essence*

A. All time limits for Milestones, if any, Substantial Completion, and completion and readiness for final payment as stated in the Contract Documents are of the essence of the Contract.

4.02 **[Deleted]**

4.03 *Contract Times: Days*

A. The Work will be substantially complete within **300** days after the date when the Contract Times commence to run as provided in Paragraph 4.01 of the General Conditions, and completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions within **330** days after the date when the Contract Times commence to run.

4.04 **[Deleted]**

4.05 *Liquidated Damages*

A. Contractor and Owner recognize that time is of the essence as stated in Paragraph 4.01 above and that Owner will suffer financial and other losses if the Work is not completed and Milestones not achieved within the Contract Times, as duly modified. The parties also recognize the delays, expense, and difficulties involved in proving, in a legal or arbitration proceeding, the actual loss suffered by Owner if the Work is not completed on time. Accordingly, instead of requiring any such proof, Owner and Contractor agree that as liquidated damages for delay (but not as a penalty):

1. *Substantial Completion:* Contractor shall pay Owner $**1,600.00** for each day that expires after the time (as duly adjusted pursuant to the Contract) specified above for Substantial Completion, until the Work is substantially complete. **Calculations assume continued RPR field services and associated expenses. It also includes Owner and Engineer project management and office engineering efforts to address unresolved construction issues resulting in extended services beyond the date of substantial completion as stipulated in the contract documents.**

2. *Completion of Remaining Work:* After Substantial Completion, if Contractor shall neglect, refuse, or fail to complete the remaining Work within the Contract Times (as duly adjusted pursuant to the Contract) for completion and readiness for final payment, Contractor shall pay Owner $**533.00** for each day that expires after such time until the Work is completed and ready for final payment. **Liquidated damages beyond the date of project Final Completion are calculated at approximately one-third of the amount for Substantial Completion.**

3. **[Deleted]**

4. Liquidated damages for failing to timely attain ~~Milestones,~~ Substantial Completion, and final completion are not additive, and will not be imposed concurrently.

B. If Owner recovers liquidated damages for a delay in completion by Contractor, then such liquidated damages are Owner's sole and exclusive remedy for such delay, and Owner is precluded from recovering any other damages, whether actual, direct, excess, or consequential, for such delay, except for special damages (if any) specified in this Agreement.

C. **[Deleted]**

4.06 ***[Deleted]***

ARTICLE 5—CONTRACT PRICE

5.01 Owner shall pay Contractor for completion of the Work in accordance with the Contract Documents, the amounts that follow, subject to adjustment under the Contract:

A. For all Work other than Unit Price Work, a lump sum of $10,699,947.60.

EJCDC® C-520, Agreement between Owner and Contractor for Construction Contract (Stipulated Price).
Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 6—PAYMENT PROCEDURES

6.01 *Submittal and Processing of Payments*

A. Contractor shall submit Applications for Payment in accordance with Article 15 of the General Conditions. Applications for Payment will be processed by Engineer as provided in the General Conditions.

6.02 *Progress Payments; Retainage*

A. Owner shall make progress payments on the basis of Contractor's Applications for Payment on or about the **5th** day of each month during performance of the Work as provided in Paragraph 6.02.A.1 below, provided that such Applications for Payment have been submitted in a timely manner and otherwise meet the requirements of the Contract. All such payments will be measured by the Schedule of Values established as provided in the General Conditions (and in the case of Unit Price Work based on the number of units completed) or, in the event there is no Schedule of Values, as provided elsewhere in the Contract.

1. Prior to Substantial Completion, progress payments will be made in an amount equal to the percentage indicated below but, in each case, less the aggregate of payments previously made and less such amounts as Owner may withhold, including but not limited to liquidated damages, in accordance with the Contract.

a. **95** percent of the value of the Work completed (with the balance being retainage).

1) **[Deleted]**

b. **95** percent of cost of materials and equipment not incorporated in the Work (with the balance being retainage).

B. Upon Substantial Completion **of the entire construction to be provided under the construction Contract Documents**, Owner shall pay an amount sufficient to increase total payments to Contractor to **100** percent of the Work completed, less such amounts set off by Owner pursuant to Paragraph 15.01.E of the General Conditions, and less **200** percent of Engineer's estimate of the value of Work to be completed or corrected as shown on the punch list of items to be completed or corrected prior to final payment.

6.03 *Final Payment*

A. Upon final completion and acceptance of the Work, Owner shall pay the remainder of the Contract Price in accordance with Paragraph 15.06 of the General Conditions.

6.04 *Consent of Surety*

A. Owner will not make final payment, or return or release retainage at Substantial Completion or any other time, unless Contractor submits written consent of the surety to such payment, return, or release.

6.05 *Interest*

A. All amounts not paid when due will bear interest at the rate of **1.5** percent per annum.

ARTICLE 7—CONTRACT DOCUMENTS

7.01 *Contents*

A. The Contract Documents consist of all of the following:

1. This Agreement.
2. Bonds:
    a. Performance bond (together with power of attorney).
    b. Payment bond (together with power of attorney).
3. General Conditions.
4. Supplementary Conditions.
5. **Technical** Specifications.
6. Drawings (not attached but incorporated by reference) consisting of **83** sheets with each sheet bearing the following general title: **Jerome Wastewater Treatment Plant.**
8. Addenda (numbers **1** to **5**, inclusive).
9. Exhibits to this Agreement (enumerated as follows):
    a. Contractor's Bid
    b. Certification of Owner's Attorney and Agency Concurrence
    c. Application for Payment
    d. Notice to Proceed.
    e. Work Change Directives.
    f. Change Orders.
    g. Field Orders.
    h. General (Prime) Contractor's Certification for AIS.
    i. Manufacturer's Certification for AIS.
    j. Certificate of Substantial Completion.
    k. Notice of Acceptability of Work.
10. The following which may be delivered or issued on or after the Effective Date of the Contract and are not attached hereto:
    a. Warranty Bond, if any.

B. The Contract Documents listed in Paragraph 7.01.A are attached to this Agreement (except as expressly noted otherwise above).

C. There are no Contract Documents other than those listed above in this Article 7.

D. The Contract Documents may only be amended, modified, or supplemented as provided in the Contract.

EJCDC® C-520, Agreement between Owner and Contractor for Construction Contract (Stipulated Price).
Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 8—REPRESENTATIONS, CERTIFICATIONS, AND STIPULATIONS

8.01 *Contractor's Representations*

A. In order to induce Owner to enter into this Contract, Contractor makes the following representations:

1. Contractor has examined and carefully studied the Contract Documents, including Addenda.

2. Contractor has visited the Site **(if required)**, conducted a thorough visual examination of the Site and adjacent areas, and become familiar with the general, local, and Site conditions that may affect cost, progress, and performance of the Work.

3. Contractor is familiar with all Laws and Regulations that may affect cost, progress, and performance of the Work.

4. Contractor has carefully studied the reports of explorations and tests of subsurface conditions at or adjacent to the Site and the drawings of physical conditions relating to existing surface or subsurface structures at the Site that have been identified in the Supplementary Conditions, with respect to the Technical Data in such reports and drawings.

5. Contractor has carefully studied the reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that have been identified in the Supplementary Conditions, with respect to Technical Data in such reports and drawings.

6. Contractor has considered the information known to Contractor itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Contract Documents; and the Technical Data identified in the Supplementary Conditions or by definition, with respect to the effect of such information, observations, and Technical Data on (a) the cost, progress, and performance of the Work; (b) the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor; and (c) Contractor's safety precautions and programs.

7. Based on the information and observations referred to in the preceding paragraph, Contractor agrees that no further examinations, investigations, explorations, tests, studies, or data are necessary for the performance of the Work at the Contract Price, within the Contract Times, and in accordance with the other terms and conditions of the Contract.

8. Contractor is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Contract Documents.

9. Contractor has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Contractor has discovered in the Contract Documents, and of discrepancies between Site conditions and the Contract Documents, and the written resolution thereof by Engineer is acceptable to Contractor.

10. The Contract Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performance and furnishing of the Work.

EJCDC® C-520, Agreement between Owner and Contractor for Construction Contract (Stipulated Price).
Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

11. Contractor's entry into this Contract constitutes an incontrovertible representation by Contractor that without exception all prices in the Agreement are premised upon performing and furnishing the Work required by the Contract Documents.

8.02 *Contractor's Certifications*

A. Contractor certifies that it has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for or in executing the Contract. For the purposes of this Paragraph 8.02:

1. "corrupt practice" means the offering, giving, receiving, or soliciting of anything of value likely to influence the action of a public official in the bidding process or in the Contract execution;

2. "fraudulent practice" means an intentional misrepresentation of facts made (a) to influence the bidding process or the execution of the Contract to the detriment of Owner, (b) to establish Bid or Contract prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition;

3. "collusive practice" means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish Bid prices at artificial, non-competitive levels; and

4. "coercive practice" means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the execution of the Contract.

8.03 *Standard General Conditions*

A. Owner stipulates that if the General Conditions that are made a part of this Contract are EJCDC® C-700, Standard General Conditions for the Construction Contract (2018), published by the Engineers Joint Contract Documents Committee, and if Owner is the party that has furnished said General Conditions, then Owner has plainly shown all modifications to the standard wording of such published document to the Contractor, through a process such as highlighting or "track changes" (redline/strikeout), or in the Supplementary Conditions.

EJCDC® C-610, Performance Bond.
Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. The Contractor and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to the Owner for the performance of the Construction Contract, which is incorporated herein by reference.
2. If the Contractor performs the Construction Contract, the Surety and the Contractor shall have no obligation under this Bond, except when applicable to participate in a conference as provided in Paragraph 3.
3. If there is no Owner Default under the Construction Contract, the Surety's obligation under this Bond will arise after:
    3.1. The Owner first provides notice to the Contractor and the Surety that the Owner is considering declaring a Contractor Default. Such notice may indicate whether the Owner is requesting a conference among the Owner, Contractor, and Surety to discuss the Contractor's performance. If the Owner does not request a conference, the Surety may, within five (5) business days after receipt of the Owner's notice, request such a conference. If the Surety timely requests a conference, the Owner shall attend. Unless the Owner agrees otherwise, any conference requested under this Paragraph 3.1 will be held within ten (10) business days of the Surety's receipt of the Owner's notice. If the Owner, the Contractor, and the Surety agree, the Contractor shall be allowed a reasonable time to perform the Construction Contract, but such an agreement does not waive the Owner's right, if any, subsequently to declare a Contractor Default;
    3.2. The Owner declares a Contractor Default, terminates the Construction Contract and notifies the Surety; and
    3.3. The Owner has agreed to pay the Balance of the Contract Price in accordance with the terms of the Construction Contract to the Surety or to a contractor selected to perform the Construction Contract.
4. Failure on the part of the Owner to comply with the notice requirement in Paragraph 3.1 does not constitute a failure to comply with a condition precedent to the Surety's obligations, or release the Surety from its obligations, except to the extent the Surety demonstrates actual prejudice.
5. When the Owner has satisfied the conditions of Paragraph 3, the Surety shall promptly and at the Surety's expense take one of the following actions:
    5.1. Arrange for the Contractor, with the consent of the Owner, to perform and complete the Construction Contract;
    5.2. Undertake to perform and complete the Construction Contract itself, through its agents or independent contractors;
    5.3. Obtain bids or negotiated proposals from qualified contractors acceptable to the Owner for a contract for performance and completion of the Construction Contract, arrange for a contract to be prepared for execution by the Owner and a contractor selected with the Owners concurrence, to be secured with performance and payment bonds executed by a qualified surety equivalent to the bonds issued on the Construction Contract, and pay to the Owner the amount of damages as described in Paragraph 7 in excess of the Balance of the Contract Price incurred by the Owner as a result of the Contractor Default; or
    5.4. Waive its right to perform and complete, arrange for completion, or obtain a new contractor, and with reasonable promptness under the circumstances:

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

5.4.1 After investigation, determine the amount for which it may be liable to the Owner and, as soon as practicable after the amount is determined, make payment to the Owner; or

5.4.2 Deny liability in whole or in part and notify the Owner, citing the reasons for denial.

6. If the Surety does not proceed as provided in Paragraph 5 with reasonable promptness, the Surety shall be deemed to be in default on this Bond seven days after receipt of an additional written notice from the Owner to the Surety demanding that the Surety perform its obligations under this Bond, and the Owner shall be entitled to enforce any remedy available to the Owner. If the Surety proceeds as provided in Paragraph 5.4, and the Owner refuses the payment, or the Surety has denied liability, in whole or in part, without further notice, the Owner shall be entitled to enforce any remedy available to the Owner.

7. If the Surety elects to act under Paragraph 5.1, 5.2, or 5.3, then the responsibilities of the Surety to the Owner will not be greater than those of the Contractor under the Construction Contract, and the responsibilities of the Owner to the Surety will not be greater than those of the Owner under the Construction Contract. Subject to the commitment by the Owner to pay the Balance of the Contract Price, the Surety is obligated, without duplication for:

   7.1. the responsibilities of the Contractor for correction of defective work and completion of the Construction Contract;

   7.2. additional legal, design professional, and delay costs resulting from the Contractor's Default, and resulting from the actions or failure to act of the Surety under Paragraph 5; and

   7.3. liquidated damages, or if no liquidated damages are specified in the Construction Contract, actual damages caused by delayed performance or non-performance of the Contractor.

8. If the Surety elects to act under Paragraph 5.1, 5.3, or 5.4, the Surety's liability is limited to the amount of this Bond.

9. The Surety shall not be liable to the Owner or others for obligations of the Contractor that are unrelated to the Construction Contract, and the Balance of the Contract Price will not be reduced or set off on account of any such unrelated obligations. No right of action will accrue on this Bond to any person or entity other than the Owner or its heirs, executors, administrators, successors, and assigns.

10. The Surety hereby waives notice of any change, including changes of time, to the Construction Contract or to related subcontracts, purchase orders, and other obligations.

11. Any proceeding, legal or equitable, under this Bond must be instituted in any court of competent jurisdiction in the location in which the work or part of the work is located and must be instituted within two years after a declaration of Contractor Default or within two years after the Contractor ceased working or within two years after the Surety refuses or fails to perform its obligations under this Bond, whichever occurs first. If the provisions of this paragraph are void or prohibited by law, the minimum periods of limitations available to sureties as a defense in the jurisdiction of the suit will be applicable.

12. Notice to the Surety, the Owner, or the Contractor must be mailed or delivered to the address shown on the page on which their signature appears.

13. When this Bond has been furnished to comply with a statutory or other legal requirement in the location where the construction was to be performed, any provision in this Bond conflicting with said statutory or legal requirement will be deemed deleted therefrom and provisions conforming to such

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

statutory or other legal requirement will be deemed incorporated herein. When so furnished, the intent is that this Bond will be construed as a statutory bond and not as a common law bond.

14. Definitions

    14.1. *Balance of the Contract Price*—The total amount payable by the Owner to the Contractor under the Construction Contract after all proper adjustments have been made including allowance for the Contractor for any amounts received or to be received by the Owner in settlement of insurance or other claims for damages to which the Contractor is entitled, reduced by all valid and proper payments made to or on behalf of the Contractor under the Construction Contract.

    14.2. *Construction Contract*—The agreement between the Owner and Contractor identified on the cover page, including all Contract Documents and changes made to the agreement and the Contract Documents.

    14.3. *Contractor Default*—Failure of the Contractor, which has not been remedied or waived, to perform or otherwise to comply with a material term of the Construction Contract.

    14.4. *Owner Default*—Failure of the Owner, which has not been remedied or waived, to pay the Contractor as required under the Construction Contract or to perform and complete or comply with the other material terms of the Construction Contract.

    14.5. *Contract Documents*—All the documents that comprise the agreement between the Owner and Contractor.

15. If this Bond is issued for an agreement between a contractor and subcontractor, the term Contractor in this Bond will be deemed to be Subcontractor and the term Owner will be deemed to be Contractor.

16. Modifications to this Bond are as follows:

    16.1. Pursuant to ARS Section 34-222.G:

    The conditions and provisions in the performance bond regarding the surety's obligations shall follow the following form:

    Now, therefore, the condition of this obligation is such, that if the principal faithfully performs and fulfills all of the undertakings, covenants, terms, conditions and agreements of the contract during the original term of the contract and any extension of the contract, with or without notice to the surety, and during the life of any guaranty required under the contract, and also performs and fulfills all of the undertakings, covenants, terms, conditions and agreements of all duly authorized modifications of the contract that may hereafter be made, notice of which modifications to the surety being hereby waived, the above obligation is void. Otherwise it remains in full force and effect.

    Provided, however, that this bond is executed pursuant to the provisions of title 34, chapter 2, article 2, Arizona Revised Statutes, and all liabilities on this bond shall be determined in accordance with the provisions of title 34, chapter 2, article 2, Arizona Revised Statutes, to the extent as if it were copied at length in this agreement.

    The prevailing party in a suit on this bond shall recover as part of the judgment reasonable attorney fees that may be fixed by a judge of the court.

EJCDC® C-615, Payment Bond.
Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. The Contractor and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to the Owner to pay for labor, materials, and equipment furnished for use in the performance of the Construction Contract, which is incorporated herein by reference, subject to the following terms.
2. If the Contractor promptly makes payment of all sums due to Claimants, and defends, indemnifies, and holds harmless the Owner from claims, demands, liens, or suits by any person or entity seeking payment for labor, materials, or equipment furnished for use in the performance of the Construction Contract, then the Surety and the Contractor shall have no obligation under this Bond.
3. If there is no Owner Default under the Construction Contract, the Surety's obligation to the Owner under this Bond will arise after the Owner has promptly notified the Contractor and the Surety (at the address described in Paragraph 13) of claims, demands, liens, or suits against the Owner or the Owner's property by any person or entity seeking payment for labor, materials, or equipment furnished for use in the performance of the Construction Contract, and tendered defense of such claims, demands, liens, or suits to the Contractor and the Surety.
4. When the Owner has satisfied the conditions in Paragraph 3, the Surety shall promptly and at the Surety's expense defend, indemnify, and hold harmless the Owner against a duly tendered claim, demand, lien, or suit.
5. The Surety's obligations to a Claimant under this Bond will arise after the following:
    5.1. Claimants who do not have a direct contract with the Contractor
        5.1.1. have furnished a written notice of non-payment to the Contractor, stating with substantial accuracy the amount claimed and the name of the party to whom the materials were, or equipment was, furnished or supplied or for whom the labor was done or performed, within ninety (90) days after having last performed labor or last furnished materials or equipment included in the Claim; and
        5.1.2. have sent a Claim to the Surety (at the address described in Paragraph 13).
    5.2. Claimants who are employed by or have a direct contract with the Contractor have sent a Claim to the Surety (at the address described in Paragraph 13).
6. If a notice of non-payment required by Paragraph 5.1.1 is given by the Owner to the Contractor, that is sufficient to satisfy a Claimant's obligation to furnish a written notice of non-payment under Paragraph 5.1.1.
7. When a Claimant has satisfied the conditions of Paragraph 5.1 or 5.2, whichever is applicable, the Surety shall promptly and at the Surety's expense take the following actions:
    7.1. Send an answer to the Claimant, with a copy to the Owner, within sixty (60) days after receipt of the Claim, stating the amounts that are undisputed and the basis for challenging any amounts that are disputed; and
    7.2. Pay or arrange for payment of any undisputed amounts.
    7.3. The Surety's failure to discharge its obligations under Paragraph 7.1 or 7.2 will not be deemed to constitute a waiver of defenses the Surety or Contractor may have or acquire as to a Claim, except as to undisputed amounts for which the Surety and Claimant have reached agreement. If, however, the Surety fails to discharge its obligations under Paragraph 7.1 or 7.2, the Surety shall indemnify the Claimant for the reasonable attorney's fees the Claimant incurs thereafter to recover any sums found to be due and owing to the Claimant.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

8. The Surety's total obligation will not exceed the amount of this Bond, plus the amount of reasonable attorney's fees provided under Paragraph 7.3, and the amount of this Bond will be credited for any payments made in good faith by the Surety.
9. Amounts owed by the Owner to the Contractor under the Construction Contract will be used for the performance of the Construction Contract and to satisfy claims, if any, under any construction performance bond. By the Contractor furnishing and the Owner accepting this Bond, they agree that all funds earned by the Contractor in the performance of the Construction Contract are dedicated to satisfying obligations of the Contractor and Surety under this Bond, subject to the Owner's priority to use the funds for the completion of the work.
10. The Surety shall not be liable to the Owner, Claimants, or others for obligations of the Contractor that are unrelated to the Construction Contract. The Owner shall not be liable for the payment of any costs or expenses of any Claimant under this Bond, and shall have under this Bond no obligation to make payments to or give notice on behalf of Claimants, or otherwise have any obligations to Claimants under this Bond.
11. The Surety hereby waives notice of any change, including changes of time, to the Construction Contract or to related subcontracts, purchase orders, and other obligations.
12. No suit or action will be commenced by a Claimant under this Bond other than in a court of competent jurisdiction in the state in which the project that is the subject of the Construction Contract is located or after the expiration of one year from the date (1) on which the Claimant sent a Claim to the Surety pursuant to Paragraph 5.1.2 or 5.2, or (2) on which the last labor or service was performed by anyone or the last materials or equipment were furnished by anyone under the Construction Contract, whichever of (1) or (2) first occurs. If the provisions of this paragraph are void or prohibited by law, the minimum period of limitation available to sureties as a defense in the jurisdiction of the suit will be applicable.
13. Notice and Claims to the Surety, the Owner, or the Contractor must be mailed or delivered to the address shown on the page on which their signature appears. Actual receipt of notice or Claims, however accomplished, will be sufficient compliance as of the date received.
14. When this Bond has been furnished to comply with a statutory or other legal requirement in the location where the construction was to be performed, any provision in this Bond conflicting with said statutory or legal requirement will be deemed deleted here from and provisions conforming to such statutory or other legal requirement will be deemed incorporated herein. When so furnished, the intent is that this Bond will be construed as a statutory bond and not as a common law bond.
15. Upon requests by any person or entity appearing to be a potential beneficiary of this Bond, the Contractor and Owner shall promptly furnish a copy of this Bond or shall permit a copy to be made.
16. Definitions

    16.1. *Claim*—A written statement by the Claimant including at a minimum:

        16.1.1. The name of the Claimant;

        16.1.2. The name of the person for whom the labor was done, or materials or equipment furnished;

        16.1.3. A copy of the agreement or purchase order pursuant to which labor, materials, or equipment was furnished for use in the performance of the Construction Contract;

        16.1.4. A brief description of the labor, materials, or equipment furnished;

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

16.1.5. The date on which the Claimant last performed labor or last furnished materials or equipment for use in the performance of the Construction Contract;

16.1.6. The total amount earned by the Claimant for labor, materials, or equipment furnished as of the date of the Claim;

16.1.7. The total amount of previous payments received by the Claimant; and

16.1.8. The total amount due and unpaid to the Claimant for labor, materials, or equipment furnished as of the date of the Claim.

16.2. *Claimant*—An individual or entity having a direct contract with the Contractor or with a subcontractor of the Contractor to furnish labor, materials, or equipment for use in the performance of the Construction Contract. The term Claimant also includes any individual or entity that has rightfully asserted a claim under an applicable mechanic's lien or similar statute against the real property upon which the Project is located. The intent of this Bond is to include without limitation in the terms of "labor, materials, or equipment" that part of the water, gas, power, light, heat, oil, gasoline, telephone service, or rental equipment used in the Construction Contract, architectural and engineering services required for performance of the work of the Contractor and the Contractor's subcontractors, and all other items for which a mechanic's lien may be asserted in the jurisdiction where the labor, materials, or equipment were furnished.

16.3. *Construction Contract*—The agreement between the Owner and Contractor identified on the cover page, including all Contract Documents and all changes made to the agreement and the Contract Documents.

16.4. *Owner Default*—Failure of the Owner, which has not been remedied or waived, to pay the Contractor as required under the Construction Contract or to perform and complete or comply with the other material terms of the Construction Contract.

16.5. *Contract Documents*—All the documents that comprise the agreement between the Owner and Contractor.

17. If this Bond is issued for an agreement between a contractor and subcontractor, the term Contractor in this Bond will be deemed to be Subcontractor and the term Owner will be deemed to be Contractor.

18. Modifications to this Bond are as follows:

18.1. Pursuant to ARS Section 34-222.G:

Now, therefore, the condition of this obligation is such, that if the principal promptly pays all monies due to all persons supplying labor or materials to the principal or the principal's subcontractors in the prosecution of the work provided for in the contract, this obligation is void. Otherwise it remains in full force and effect.

Provided, however, that this bond is executed pursuant to the provisions of title 34, chapter 2, article 2, Arizona Revised Statutes, and all liabilities on this bond shall be determined in accordance with the provisions, conditions and limitations of title 34, chapter 2, article 2, Arizona Revised Statutes, to the same extent as if they were copied at length in this agreement.

The prevailing party in a suit on this bond shall recover as a part of the judgment reasonable attorney fees that may be fixed by a judge of the court.

CERTIFICATE OF OWNER'S ATTORNEY AND AGENCY CONCURRENCE

Notes to User: This exhibit consists of two certificates, on a single page, to be attached to the Contract and signed upon execution. The first is a certificate to be signed by the Owner's attorney and the second is the concurrence to be signed by the State Engineer. This page is to be inserted after the Agreement between Owner and Contractor for Construction Contract (Stipulated Price) (EJCDC C-520, 2018) in the Construction Contract Documents.

CERTFICATE OF OWNER'S ATTORNEY PROJECT NAME:
Jerome Wastewater Treatment Plant Improvements
CONTRACTOR NAME AND CONTRACT NUMBER: **Fann Environmental, LLC**

I, the undersigned, **John Austin Gaylord**, the duly authorized and acting legal representative of **Town of Jerome (the "Town")**, do hereby certify as follows: I have examined the attached Contract(s) **(the "Contract"),** and performance and payment bond(s) **(the "Bonds")** and **have reviewed the actions of** ~~the manner of execution thereof~~ **the Town Council (the "Council") as certified by the Town Clerk**, and **assuming the genuineness of signatures not familiar to me, the legal capacity of all persons executing the Contract, and that the execution and delivery of such instruments and the transactions contemplated thereby are within the authority of the Town and have been duly authorized by proper proceedings;** I am of the opinion that ~~each of the aforesaid agreements is adequate and has been duly executed by the proper parties thereto acting through their duly authorized representatives; that said representatives have~~ **the Council has** full power and authority to execute ~~said agreements~~ **the Contract** on behalf of the ~~respective parties named thereon~~ **Town**; and that the foregoing agreements constitute valid and legally binding obligations upon the parties executing the same in accordance with the terms, conditions, and provisions thereof~~.~~**, subject to: (a) the effect of any applicable bankruptcy, insolvency, moratorium, reorganization or other similar laws affecting creditors' rights generally; and (b) general principals of equity, including, without limitation, the discretionary nature of specific performance and other equitable remedies.**

Name Date

AGENCY CONCURRENCE

As lender or insurer of funds to defray the costs of this Contract, and without liability for any payments thereunder, the Agency hereby concurs in the form, content, and execution of this Agreement.

STANDARD GENERAL CONDITIONS OF THE CONSTRUCTION CONTRACT

ARTICLE 1—DEFINITIONS AND TERMINOLOGY

1.01 *Defined Terms*

A. Wherever used in the Bidding Requirements or Contract Documents, a term printed with initial capital letters, including the term's singular and plural forms, will have the meaning indicated in the definitions below. In addition to terms specifically defined, terms with initial capital letters in the Contract Documents include references to identified articles and paragraphs, and the titles of other documents or forms.

1. *Addenda*—Written or graphic instruments issued prior to the opening of Bids which clarify, correct, or change the Bidding Requirements or the proposed Contract Documents.

2. *Agreement*—The written instrument, executed by Owner and Contractor, that sets forth the Contract Price and Contract Times, identifies the parties and the Engineer, and designates the specific items that are Contract Documents.

3. *Application for Payment*—The document prepared by Contractor, in a form acceptable to Engineer, to request progress or final payments, and which is to be accompanied by such supporting documentation as is required by the Contract Documents.

4. *Bid*—The offer of a Bidder submitted on the prescribed form setting forth the prices for the Work to be performed.

5. *Bidder*—An individual or entity that submits a Bid to Owner.

6. *Bidding Documents*—The Bidding Requirements, the proposed Contract Documents, and all Addenda.

7. *Bidding Requirements*—The Advertisement or invitation to bid, Instructions to Bidders, Bid Bond or other Bid security, if any, the Bid Form, and the Bid with any attachments.

8. *Change Order*—A document which is signed by Contractor and Owner and authorizes an addition, deletion, or revision in the Work or an adjustment in the Contract Price or the Contract Times, or other revision to the Contract, issued on or after the Effective Date of the Contract.

9. *Change Proposal*—A written request by Contractor, duly submitted in compliance with the procedural requirements set forth herein, seeking an adjustment in Contract Price or Contract Times; contesting an initial decision by Engineer concerning the requirements of the Contract Documents or the acceptability of Work under the Contract Documents; challenging a set-off against payments due; or seeking other relief with respect to the terms of the Contract.

10. *Claim*

a. A demand or assertion by Owner directly to Contractor, duly submitted in compliance with the procedural requirements set forth herein, seeking an adjustment of Contract Price or Contract Times; contesting an initial decision by Engineer concerning the

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

requirements of the Contract Documents or the acceptability of Work under the Contract Documents; contesting Engineer's decision regarding a Change Proposal; seeking resolution of a contractual issue that Engineer has declined to address; or seeking other relief with respect to the terms of the Contract.

b. A demand or assertion by Contractor directly to Owner, duly submitted in compliance with the procedural requirements set forth herein, contesting Engineer's decision regarding a Change Proposal, or seeking resolution of a contractual issue that Engineer has declined to address.

c. A demand or assertion by Owner or Contractor, duly submitted in compliance with the procedural requirements set forth herein, made pursuant to Paragraph 12.01.A.4, concerning disputes arising after Engineer has issued a recommendation of final payment.

d. A demand for money or services by a third party is not a Claim.

11. *Constituent of Concern*—Asbestos, petroleum, radioactive materials, polychlorinated biphenyls (PCBs), lead-based paint (as defined by the HUD/EPA standard), hazardous waste, and any substance, product, waste, or other material of any nature whatsoever that is or becomes listed, regulated, or addressed pursuant to Laws and Regulations regulating, relating to, or imposing liability or standards of conduct concerning, any hazardous, toxic, or dangerous waste, substance, or material.

12. *Contract*—The entire and integrated written contract between Owner and Contractor concerning the Work.

13. *Contract Documents*—Those items so designated in the Agreement, and which together comprise the Contract.

14. *Contract Price*—The money that Owner has agreed to pay Contractor for completion of the Work in accordance with the Contract Documents.

15. *Contract Times*—The number of days or the dates by which Contractor shall: (a) achieve Milestones, if any; (b) achieve Substantial Completion; and (c) complete the Work.

16. *Contractor*—The individual or entity with which Owner has contracted for performance of the Work.

17. *Cost of the Work*—See Paragraph 13.01 for definition.

18. *Drawings*—The part of the Contract that graphically shows the scope, extent, and character of the Work to be performed by Contractor.

19. *Effective Date of the Contract*—The date, indicated in the Agreement, on which the Contract becomes effective.

20. *Electronic Document*—Any Project-related correspondence, attachments to correspondence, data, documents, drawings, information, or graphics, including but not limited to Shop Drawings and other Submittals, that are in an electronic or digital format.

21. *Electronic Means*—Electronic mail (email), upload/download from a secure Project website, or other communications methods that allow: (a) the transmission or communication of Electronic Documents; (b) the documentation of transmissions, including sending and receipt; (c) printing of the transmitted Electronic Document by the

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

recipient; (d) the storage and archiving of the Electronic Document by sender and recipient; and (e) the use by recipient of the Electronic Document for purposes permitted by this Contract. Electronic Means does not include the use of text messaging, or of Facebook, Twitter, Instagram, or similar social media services for transmission of Electronic Documents.

22. *Engineer*—The individual or entity named as such in the Agreement.

23. *Field Order*—A written order issued by Engineer which requires minor changes in the Work but does not change the Contract Price or the Contract Times.

24. *Hazardous Environmental Condition*—The presence at the Site of Constituents of Concern in such quantities or circumstances that may present a danger to persons or property exposed thereto.

    a. The presence at the Site of materials that are necessary for the execution of the Work, or that are to be incorporated into the Work, and that are controlled and contained pursuant to industry practices, Laws and Regulations, and the requirements of the Contract, is not a Hazardous Environmental Condition.

    b. The presence of Constituents of Concern that are to be removed or remediated as part of the Work is not a Hazardous Environmental Condition.

    c. The presence of Constituents of Concern as part of the routine, anticipated, and obvious working conditions at the Site, is not a Hazardous Environmental Condition.

25. *Laws and Regulations; Laws or Regulations*—Any and all applicable laws, statutes, rules, regulations, ordinances, codes, and binding decrees, resolutions, and orders of any and all governmental bodies, agencies, authorities, and courts having jurisdiction.

26. *Liens*—Charges, security interests, or encumbrances upon Contract-related funds, real property, or personal property.

27. *Milestone*—A principal event in the performance of the Work that the Contract requires Contractor to achieve by an intermediate completion date, or by a time prior to Substantial Completion of all the Work.

28. *Notice of Award*—The written notice by Owner to a Bidder of Owner's acceptance of the Bid.

29. *Notice to Proceed*—A written notice by Owner to Contractor fixing the date on which the Contract Times will commence to run and on which Contractor shall start to perform the Work.

30. *Owner*—The individual or entity with which Contractor has contracted regarding the Work, and which has agreed to pay Contractor for the performance of the Work, pursuant to the terms of the Contract.

31. *Progress Schedule*—A schedule, prepared and maintained by Contractor, describing the sequence and duration of the activities comprising Contractor's plan to accomplish the Work within the Contract Times.

32. *Project*—The total undertaking to be accomplished for Owner by engineers, contractors, and others, including planning, study, design, construction, testing, commissioning, and start-up, and of which the Work to be performed under the Contract Documents is a part.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

33. *Resident Project Representative*—The authorized representative of Engineer assigned to assist Engineer at the Site. As used herein, the term Resident Project Representative (RPR) includes any assistants or field staff of Resident Project Representative.

34. *Samples*—Physical examples of materials, equipment, or workmanship that are representative of some portion of the Work and that establish the standards by which such portion of the Work will be judged.

35. *Schedule of Submittals*—A schedule, prepared and maintained by Contractor, of required submittals and the time requirements for Engineer's review of the submittals.

36. *Schedule of Values*—A schedule, prepared and maintained by Contractor, allocating portions of the Contract Price to various portions of the Work and used as the basis for reviewing Contractor's Applications for Payment.

37. *Shop Drawings*—All drawings, diagrams, illustrations, schedules, and other data or information that are specifically prepared or assembled by or for Contractor and submitted by Contractor to illustrate some portion of the Work. Shop Drawings, whether approved or not, are not Drawings and are not Contract Documents.

38. *Site*—Lands or areas indicated in the Contract Documents as being furnished by Owner upon which the Work is to be performed, including rights-of-way and easements, and such other lands or areas furnished by Owner which are designated for the use of Contractor.

39. *Specifications*—The part of the Contract that consists of written requirements for materials, equipment, systems, standards, and workmanship as applied to the Work, and certain administrative requirements and procedural matters applicable to the Work.

40. *Subcontractor*—An individual or entity having a direct contract with Contractor or with any other Subcontractor for the performance of a part of the Work.

41. *Submittal*—A written or graphic document, prepared by or for Contractor, which the Contract Documents require Contractor to submit to Engineer, or that is indicated as a Submittal in the Schedule of Submittals accepted by Engineer. Submittals may include Shop Drawings and Samples; schedules; product data; Owner-delegated designs; sustainable design information; information on special procedures; testing plans; results of tests and evaluations, source quality-control testing and inspections, and field or Site quality-control testing and inspections; warranties and certifications; Suppliers' instructions and reports; records of delivery of spare parts and tools; operations and maintenance data; Project photographic documentation; record documents; and other such documents required by the Contract Documents. Submittals, whether or not approved or accepted by Engineer, are not Contract Documents. Change Proposals, Change Orders, Claims, notices, Applications for Payment, and requests for interpretation or clarification are not Submittals.

42. *Substantial Completion*—The time at which the Work (or a specified part thereof) has progressed to the point where, in the opinion of Engineer, the Work (or a specified part thereof) is sufficiently complete, in accordance with the Contract Documents, so that the Work (or a specified part thereof) can be utilized for the purposes for which it is intended. The terms "substantially complete" and "substantially completed" as applied to all or part of the Work refer to Substantial Completion of such Work.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

43. *Successful Bidder*—The Bidder to which the Owner makes an award of contract.

44. *Supplementary Conditions*—The part of the Contract that amends or supplements these General Conditions.

45. *Supplier*—A manufacturer, fabricator, supplier, distributor, or vendor having a direct contract with Contractor or with any Subcontractor to furnish materials or equipment to be incorporated in the Work by Contractor or a Subcontractor.

46. *Technical Data*

    a. Those items expressly identified as Technical Data in the Supplementary Conditions, with respect to either (1) existing subsurface conditions at or adjacent to the Site, or existing physical conditions at or adjacent to the Site including existing surface or subsurface structures (except Underground Facilities) or (2) Hazardous Environmental Conditions at the Site.

    b. If no such express identifications of Technical Data have been made with respect to conditions at the Site, then Technical Data is defined, with respect to conditions at the Site under Paragraphs 5.03, 5.04, and 5.06, as the data contained in boring logs, recorded measurements of subsurface water levels, assessments of the condition of subsurface facilities, laboratory test results, and other factual, objective information regarding conditions at the Site that are set forth in any geotechnical, environmental, or other Site or facilities conditions report prepared for the Project and made available to Contractor.

    c. Information and data regarding the presence or location of Underground Facilities are not intended to be categorized, identified, or defined as Technical Data, and instead Underground Facilities are shown or indicated on the Drawings.

47. *Underground Facilities*—All active or not-in-service underground lines, pipelines, conduits, ducts, encasements, cables, wires, manholes, vaults, tanks, tunnels, or other such facilities or systems at the Site, including but not limited to those facilities or systems that produce, transmit, distribute, or convey telephone or other communications, cable television, fiber optic transmissions, power, electricity, light, heat, gases, oil, crude oil products, liquid petroleum products, water, steam, waste, wastewater, storm water, other liquids or chemicals, or traffic or other control systems. An abandoned facility or system is not an Underground Facility.

48. *Unit Price Work*—Work to be paid for on the basis of unit prices.

49. *Work*—The entire construction or the various separately identifiable parts thereof required to be provided under the Contract Documents. Work includes and is the result of performing or providing all labor, services, and documentation necessary to produce such construction; furnishing, installing, and incorporating all materials and equipment into such construction; and may include related services such as testing, start-up, and commissioning, all as required by the Contract Documents.

50. *Work Change Directive*—A written directive to Contractor issued on or after the Effective Date of the Contract, signed by Owner and recommended by Engineer, ordering an addition, deletion, or revision in the Work.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1.02 *Terminology*

A. The words and terms discussed in Paragraphs 1.02.B, C, D, and E are not defined terms that require initial capital letters, but, when used in the Bidding Requirements or Contract Documents, have the indicated meaning.

B. *Intent of Certain Terms or Adjectives*: The Contract Documents include the terms "as allowed," "as approved," "as ordered," "as directed" or terms of like effect or import to authorize an exercise of professional judgment by Engineer. In addition, the adjectives "reasonable," "suitable," "acceptable," "proper," "satisfactory," or adjectives of like effect or import are used to describe an action or determination of Engineer as to the Work. It is intended that such exercise of professional judgment, action, or determination will be solely to evaluate, in general, the Work for compliance with the information in the Contract Documents and with the design concept of the Project as a functioning whole as shown or indicated in the Contract Documents (unless there is a specific statement indicating otherwise). The use of any such term or adjective is not intended to and shall not be effective to assign to Engineer any duty or authority to supervise or direct the performance of the Work, or any duty or authority to undertake responsibility contrary to the provisions of Article 10 or any other provision of the Contract Documents.

C. *Day*: The word "day" means a calendar day of 24 hours measured from midnight to the next midnight.

D. *Defective*: The word "defective," when modifying the word "Work," refers to Work that is unsatisfactory, faulty, or deficient in that it:

1. does not conform to the Contract Documents;

2. does not meet the requirements of any applicable inspection, reference standard, test, or approval referred to in the Contract Documents; or

3. has been damaged prior to Engineer's recommendation of final payment (unless responsibility for the protection thereof has been assumed by Owner at Substantial Completion in accordance with Paragraph 15.03 or Paragraph 15.04).

E. *Furnish, Install, Perform, Provide*

1. The word "furnish," when used in connection with services, materials, or equipment, means to supply and deliver said services, materials, or equipment to the Site (or some other specified location) ready for use or installation and in usable or operable condition.

2. The word "install," when used in connection with services, materials, or equipment, means to put into use or place in final position said services, materials, or equipment complete and ready for intended use.

3. The words "perform" or "provide," when used in connection with services, materials, or equipment, means to furnish and install said services, materials, or equipment complete and ready for intended use.

4. If the Contract Documents establish an obligation of Contractor with respect to specific services, materials, or equipment, but do not expressly use any of the four words "furnish," "install," "perform," or "provide," then Contractor shall furnish and install said services, materials, or equipment complete and ready for intended use.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

F. *Contract Price or Contract Times*: References to a change in "Contract Price or Contract Times" or "Contract Times or Contract Price" or similar, indicate that such change applies to (1) Contract Price, (2) Contract Times, or (3) both Contract Price and Contract Times, as warranted, even if the term "or both" is not expressed.

G. Unless stated otherwise in the Contract Documents, words or phrases that have a well-known technical or construction industry or trade meaning are used in the Contract Documents in accordance with such recognized meaning.

ARTICLE 2—PRELIMINARY MATTERS

2.01 *Delivery of Performance and Payment Bonds; Evidence of Insurance*

A. *Performance and Payment Bonds*: When Contractor delivers the signed counterparts of the Agreement to Owner, Contractor shall also deliver to Owner the performance bond and payment bond (if the Contract requires Contractor to furnish such bonds).

B. *Evidence of Contractor's Insurance*: When Contractor delivers the signed counterparts of the Agreement to Owner, Contractor shall also deliver to Owner, with copies to each additional insured (as identified in the Contract), the certificates, endorsements, and other evidence of insurance required to be provided by Contractor in accordance with Article 6, except to the extent the Supplementary Conditions expressly establish other dates for delivery of specific insurance policies.

C. *Evidence of Owner's Insurance*: After receipt of the signed counterparts of the Agreement and all required bonds and insurance documentation, Owner shall promptly deliver to Contractor, with copies to each additional insured (as identified in the Contract), the certificates and other evidence of insurance required to be provided by Owner under Article 6.

2.02 *Copies of Documents*

A. Owner shall furnish to Contractor four printed copies of the Contract (including one fully signed counterpart of the Agreement), and one copy in electronic portable document format (PDF). Additional printed copies will be furnished upon request at the cost of reproduction.

B. Owner shall maintain and safeguard at least one original printed record version of the Contract, including Drawings and Specifications signed and sealed by Engineer and other design professionals. Owner shall make such original printed record version of the Contract available to Contractor for review. Owner may delegate the responsibilities under this provision to Engineer.

2.03 *Before Starting Construction*

A. *Preliminary Schedules*: Within 10 days after the Effective Date of the Contract (or as otherwise required by the Contract Documents), Contractor shall submit to Engineer for timely review:

1. a preliminary Progress Schedule indicating the times (numbers of days or dates) for starting and completing the various stages of the Work, including any Milestones specified in the Contract;

2. a preliminary Schedule of Submittals; and

3. a preliminary Schedule of Values for all of the Work which includes quantities and prices of items which when added together equal the Contract Price and subdivides the Work

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

into component parts in sufficient detail to serve as the basis for progress payments during performance of the Work. Such prices will include an appropriate amount of overhead and profit applicable to each item of Work.

2.04 *Preconstruction Conference; Designation of Authorized Representatives*

A. Before any Work at the Site is started, a conference attended by Owner, Contractor, Engineer, and others as appropriate will be held to establish a working understanding among the parties as to the Work, and to discuss the schedules referred to in Paragraph 2.03.A, procedures for handling Shop Drawings, Samples, and other Submittals, processing Applications for Payment, electronic or digital transmittals, and maintaining required records.

B. At this conference Owner and Contractor each shall designate, in writing, a specific individual to act as its authorized representative with respect to the services and responsibilities under the Contract. Such individuals shall have the authority to transmit and receive information, render decisions relative to the Contract, and otherwise act on behalf of each respective party.

2.05 *Acceptance of Schedules*

A. At least 10 days before submission of the first Application for Payment a conference, attended by Contractor, Engineer, and others as appropriate, will be held to review the schedules submitted in accordance with Paragraph 2.03.A. No progress payment will be made to Contractor until acceptable schedules are submitted to Engineer.

1. The Progress Schedule will be acceptable to Engineer if it provides an orderly progression of the Work to completion within the Contract Times. Such acceptance will not impose on Engineer responsibility for the Progress Schedule, for sequencing, scheduling, or progress of the Work, nor interfere with or relieve Contractor from Contractor's full responsibility therefor.

2. Contractor's Schedule of Submittals will be acceptable to Engineer if it provides a workable arrangement for reviewing and processing the required submittals.

3. Contractor's Schedule of Values will be acceptable to Engineer as to form and substance if it provides a reasonable allocation of the Contract Price to the component parts of the Work.

4. If a schedule is not acceptable, Contractor will have an additional 10 days to revise and resubmit the schedule.

2.06 *Electronic Transmittals*

A. Except as otherwise stated elsewhere in the Contract, the Owner, Engineer, and Contractor may send, and shall accept, Electronic Documents transmitted by Electronic Means.

B. If the Contract does not establish protocols for Electronic Means, then Owner, Engineer, and Contractor shall jointly develop such protocols.

C. Subject to any governing protocols for Electronic Means, when transmitting Electronic Documents by Electronic Means, the transmitting party makes no representations as to long-term compatibility, usability, or readability of the Electronic Documents resulting from the recipient's use of software application packages, operating systems, or computer hardware differing from those used in the drafting or transmittal of the Electronic Documents.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 3—CONTRACT DOCUMENTS: INTENT, REQUIREMENTS, REUSE

3.01 *Intent*

A. The Contract Documents are complementary; what is required by one Contract Document is as binding as if required by all.

B. It is the intent of the Contract Documents to describe a functionally complete Project (or part thereof) to be constructed in accordance with the Contract Documents.

C. Unless otherwise stated in the Contract Documents, if there is a discrepancy between the electronic versions of the Contract Documents (including any printed copies derived from such electronic versions) and the printed record version, the printed record version will govern.

D. The Contract supersedes prior negotiations, representations, and agreements, whether written or oral.

E. Engineer will issue clarifications and interpretations of the Contract Documents as provided herein.

F. Any provision or part of the Contract Documents held to be void or unenforceable under any Law or Regulation will be deemed stricken, and all remaining provisions will continue to be valid and binding upon Owner and Contractor, which agree that the Contract Documents will be reformed to replace such stricken provision or part thereof with a valid and enforceable provision that comes as close as possible to expressing the intention of the stricken provision.

G. Nothing in the Contract Documents creates:

1. any contractual relationship between Owner or Engineer and any Subcontractor, Supplier, or other individual or entity performing or furnishing any of the Work, for the benefit of such Subcontractor, Supplier, or other individual or entity; or

2. any obligation on the part of Owner or Engineer to pay or to see to the payment of any money due any such Subcontractor, Supplier, or other individual or entity, except as may otherwise be required by Laws and Regulations.

3.02 *Reference Standards*

A. *Standards Specifications, Codes, Laws and Regulations*

1. Reference in the Contract Documents to standard specifications, manuals, reference standards, or codes of any technical society, organization, or association, or to Laws or Regulations, whether such reference be specific or by implication, means the standard specification, manual, reference standard, code, or Laws or Regulations in effect at the time of opening of Bids (or on the Effective Date of the Contract if there were no Bids), except as may be otherwise specifically stated in the Contract Documents.

2. No provision of any such standard specification, manual, reference standard, or code, and no instruction of a Supplier, will be effective to change the duties or responsibilities of Owner, Contractor, or Engineer from those set forth in the part of the Contract Documents prepared by or for Engineer. No such provision or instruction shall be effective to assign to Owner or Engineer any duty or authority to supervise or direct the performance of the Work, or any duty or authority to undertake responsibility

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

inconsistent with the provisions of the part of the Contract Documents prepared by or for Engineer.

3.03 *Reporting and Resolving Discrepancies*

A. *Reporting Discrepancies*

1. *Contractor's Verification of Figures and Field Measurements*: Before undertaking each part of the Work, Contractor shall carefully study the Contract Documents, and check and verify pertinent figures and dimensions therein, particularly with respect to applicable field measurements. Contractor shall promptly report in writing to Engineer any conflict, error, ambiguity, or discrepancy that Contractor discovers, or has actual knowledge of, and shall not proceed with any Work affected thereby until the conflict, error, ambiguity, or discrepancy is resolved by a clarification or interpretation by Engineer, or by an amendment or supplement to the Contract issued pursuant to Paragraph 11.01.

2. *Contractor's Review of Contract Documents*: If, before or during the performance of the Work, Contractor discovers any conflict, error, ambiguity, or discrepancy within the Contract Documents, or between the Contract Documents and (a) any applicable Law or Regulation, (b) actual field conditions, (c) any standard specification, manual, reference standard, or code, or (d) any instruction of any Supplier, then Contractor shall promptly report it to Engineer in writing. Contractor shall not proceed with the Work affected thereby (except in an emergency as required by Paragraph 7.15) until the conflict, error, ambiguity, or discrepancy is resolved, by a clarification or interpretation by Engineer, or by an amendment or supplement to the Contract issued pursuant to Paragraph 11.01.

3. Contractor shall not be liable to Owner or Engineer for failure to report any conflict, error, ambiguity, or discrepancy in the Contract Documents unless Contractor had actual knowledge thereof.

B. *Resolving Discrepancies*

1. Except as may be otherwise specifically stated in the Contract Documents, the provisions of the part of the Contract Documents prepared by or for Engineer take precedence in resolving any conflict, error, ambiguity, or discrepancy between such provisions of the Contract Documents and:

a. the provisions of any standard specification, manual, reference standard, or code, or the instruction of any Supplier (whether or not specifically incorporated by reference as a Contract Document); or

b. the provisions of any Laws or Regulations applicable to the performance of the Work (unless such an interpretation of the provisions of the Contract Documents would result in violation of such Law or Regulation).

3.04 *Requirements of the Contract Documents*

A. During the performance of the Work and until final payment, Contractor and Owner shall submit to the Engineer in writing all matters in question concerning the requirements of the Contract Documents (sometimes referred to as requests for information or interpretation—RFIs), or relating to the acceptability of the Work under the Contract Documents, as soon as possible after such matters arise. Engineer will be the initial interpreter of the requirements of the Contract Documents, and judge of the acceptability of the Work.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. Engineer will, with reasonable promptness, render a written clarification, interpretation, or decision on the issue submitted, or initiate an amendment or supplement to the Contract Documents. Engineer's written clarification, interpretation, or decision will be final and binding on Contractor, unless it appeals by submitting a Change Proposal, and on Owner, unless it appeals by filing a Claim.

C. If a submitted matter in question concerns terms and conditions of the Contract Documents that do not involve (1) the performance or acceptability of the Work under the Contract Documents, (2) the design (as set forth in the Drawings, Specifications, or otherwise), or (3) other engineering or technical matters, then Engineer will promptly notify Owner and Contractor in writing that Engineer is unable to provide a decision or interpretation. If Owner and Contractor are unable to agree on resolution of such a matter in question, either party may pursue resolution as provided in Article 12.

3.05 *Reuse of Documents*

A. Contractor and its Subcontractors and Suppliers shall not:

1. have or acquire any title to or ownership rights in any of the Drawings, Specifications, or other documents (or copies of any thereof) prepared by or bearing the seal of Engineer or its consultants, including electronic media versions, or reuse any such Drawings, Specifications, other documents, or copies thereof on extensions of the Project or any other project without written consent of Owner and Engineer and specific written verification or adaptation by Engineer; or

2. have or acquire any title or ownership rights in any other Contract Documents, reuse any such Contract Documents for any purpose without Owner's express written consent, or violate any copyrights pertaining to such Contract Documents.

B. The prohibitions of this Paragraph 3.05 will survive final payment, or termination of the Contract. Nothing herein precludes Contractor from retaining copies of the Contract Documents for record purposes.

ARTICLE 4—COMMENCEMENT AND PROGRESS OF THE WORK

4.01 *Commencement of Contract Times; Notice to Proceed*

A. The Contract Times will commence to run on the 30th day after the Effective Date of the Contract or, if a Notice to Proceed is given, on the day indicated in the Notice to Proceed. A Notice to Proceed may be given at any time within 30 days after the Effective Date of the Contract. In no event will the Contract Times commence to run later than the 60th day after the day of Bid opening or the 30th day after the Effective Date of the Contract, whichever date is earlier.

4.02 *Starting the Work*

A. Contractor shall start to perform the Work on the date when the Contract Times commence to run. No Work may be done at the Site prior to such date.

4.03 *Reference Points*

A. Owner shall provide engineering surveys to establish reference points for construction which in Engineer's judgment are necessary to enable Contractor to proceed with the Work. Contractor shall be responsible for laying out the Work, shall protect and preserve the

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

established reference points and property monuments, and shall make no changes or relocations without the prior written approval of Owner. Contractor shall report to Engineer whenever any reference point or property monument is lost or destroyed or requires relocation because of necessary changes in grades or locations, and shall be responsible for the accurate replacement or relocation of such reference points or property monuments by professionally qualified personnel.

4.04 *Progress Schedule*

A. Contractor shall adhere to the Progress Schedule established in accordance with Paragraph 2.05 as it may be adjusted from time to time as provided below.

1. Contractor shall submit to Engineer for acceptance (to the extent indicated in Paragraph 2.05) proposed adjustments in the Progress Schedule that will not result in changing the Contract Times.

2. Proposed adjustments in the Progress Schedule that will change the Contract Times must be submitted in accordance with the requirements of Article 11.

B. Contractor shall carry on the Work and adhere to the Progress Schedule during all disputes or disagreements with Owner. No Work will be delayed or postponed pending resolution of any disputes or disagreements, or during any appeal process, except as permitted by Paragraph 16.04, or as Owner and Contractor may otherwise agree in writing.

4.05 *Delays in Contractor's Progress*

A. If Owner, Engineer, or anyone for whom Owner is responsible, delays, disrupts, or interferes with the performance or progress of the Work, then Contractor shall be entitled to an equitable adjustment in Contract Price or Contract Times.

B. Contractor shall not be entitled to an adjustment in Contract Price or Contract Times for delay, disruption, or interference caused by or within the control of Contractor. Delay, disruption, and interference attributable to and within the control of a Subcontractor or Supplier shall be deemed to be within the control of Contractor.

C. If Contractor's performance or progress is delayed, disrupted, or interfered with by unanticipated causes not the fault of and beyond the control of Owner, Contractor, and those for which they are responsible, then Contractor shall be entitled to an equitable adjustment in Contract Times. Such an adjustment will be Contractor's sole and exclusive remedy for the delays, disruption, and interference described in this paragraph. Causes of delay, disruption, or interference that may give rise to an adjustment in Contract Times under this paragraph include but are not limited to the following:

1. Severe and unavoidable natural catastrophes such as fires, floods, epidemics, and earthquakes;

2. Abnormal weather conditions;

3. Acts or failures to act of third-party utility owners or other third-party entities (other than those third-party utility owners or other third-party entities performing other work at or adjacent to the Site as arranged by or under contract with Owner, as contemplated in Article 8); and

4. Acts of war or terrorism.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

D. Contractor's entitlement to an adjustment of Contract Times or Contract Price is limited as follows:

1. Contractor's entitlement to an adjustment of the Contract Times is conditioned on the delay, disruption, or interference adversely affecting an activity on the critical path to completion of the Work, as of the time of the delay, disruption, or interference.

2. Contractor shall not be entitled to an adjustment in Contract Price for any delay, disruption, or interference if such delay is concurrent with a delay, disruption, or interference caused by or within the control of Contractor. Such a concurrent delay by Contractor shall not preclude an adjustment of Contract Times to which Contractor is otherwise entitled.

3. Adjustments of Contract Times or Contract Price are subject to the provisions of Article 11.

E. Each Contractor request or Change Proposal seeking an increase in Contract Times or Contract Price must be supplemented by supporting data that sets forth in detail the following:

1. The circumstances that form the basis for the requested adjustment;

2. The date upon which each cause of delay, disruption, or interference began to affect the progress of the Work;

3. The date upon which each cause of delay, disruption, or interference ceased to affect the progress of the Work;

4. The number of days' increase in Contract Times claimed as a consequence of each such cause of delay, disruption, or interference; and

5. The impact on Contract Price, in accordance with the provisions of Paragraph 11.07.

Contractor shall also furnish such additional supporting documentation as Owner or Engineer may require including, where appropriate, a revised progress schedule indicating all the activities affected by the delay, disruption, or interference, and an explanation of the effect of the delay, disruption, or interference on the critical path to completion of the Work.

F. Delays, disruption, and interference to the performance or progress of the Work resulting from the existence of a differing subsurface or physical condition, an Underground Facility that was not shown or indicated by the Contract Documents, or not shown or indicated with reasonable accuracy, and those resulting from Hazardous Environmental Conditions, are governed by Article 5, together with the provisions of Paragraphs 4.05.D and 4.05.E.

G. Paragraph 8.03 addresses delays, disruption, and interference to the performance or progress of the Work resulting from the performance of certain other work at or adjacent to the Site.

ARTICLE 5—SITE; SUBSURFACE AND PHYSICAL CONDITIONS; HAZARDOUS ENVIRONMENTAL CONDITIONS

5.01 *Availability of Lands*

A. Owner shall furnish the Site. Owner shall notify Contractor in writing of any encumbrances or restrictions not of general application but specifically related to use of the Site with which Contractor must comply in performing the Work.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. Upon reasonable written request, Owner shall furnish Contractor with a current statement of record legal title and legal description of the lands upon which permanent improvements are to be made and Owner's interest therein as necessary for giving notice of or filing a mechanic's or construction lien against such lands in accordance with applicable Laws and Regulations.

C. Contractor shall provide for all additional lands and access thereto that may be required for temporary construction facilities or storage of materials and equipment.

5.02 *Use of Site and Other Areas*

A. *Limitation on Use of Site and Other Areas*

1. Contractor shall confine construction equipment, temporary construction facilities, the storage of materials and equipment, and the operations of workers to the Site, adjacent areas that Contractor has arranged to use through construction easements or otherwise, and other adjacent areas permitted by Laws and Regulations, and shall not unreasonably encumber the Site and such other adjacent areas with construction equipment or other materials or equipment. Contractor shall assume full responsibility for (a) damage to the Site; (b) damage to any such other adjacent areas used for Contractor's operations; (c) damage to any other adjacent land or areas, or to improvements, structures, utilities, or similar facilities located at such adjacent lands or areas; and (d) for injuries and losses sustained by the owners or occupants of any such land or areas; provided that such damage or injuries result from the performance of the Work or from other actions or conduct of the Contractor or those for which Contractor is responsible.

2. If a damage or injury claim is made by the owner or occupant of any such land or area because of the performance of the Work, or because of other actions or conduct of the Contractor or those for which Contractor is responsible, Contractor shall (a) take immediate corrective or remedial action as required by Paragraph 7.13, or otherwise; (b) promptly attempt to settle the claim as to all parties through negotiations with such owner or occupant, or otherwise resolve the claim by arbitration or other dispute resolution proceeding, or in a court of competent jurisdiction; and (c) to the fullest extent permitted by Laws and Regulations, indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them, from and against any such claim, and against all costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to any claim or action, legal or equitable, brought by any such owner or occupant against Owner, Engineer, or any other party indemnified hereunder to the extent caused directly or indirectly, in whole or in part by, or based upon, Contractor's performance of the Work, or because of other actions or conduct of the Contractor or those for which Contractor is responsible.

B. *Removal of Debris During Performance of the Work*: During the progress of the Work the Contractor shall keep the Site and other adjacent areas free from accumulations of waste materials, rubbish, and other debris. Removal and disposal of such waste materials, rubbish, and other debris will conform to applicable Laws and Regulations.

C. *Cleaning*: Prior to Substantial Completion of the Work Contractor shall clean the Site and the Work and make it ready for utilization by Owner. At the completion of the Work Contractor shall remove from the Site and adjacent areas all tools, appliances, construction equipment

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

and machinery, and surplus materials and shall restore to original condition all property not designated for alteration by the Contract Documents.

D. *Loading of Structures*: Contractor shall not load nor permit any part of any structure to be loaded in any manner that will endanger the structure, nor shall Contractor subject any part of the Work or adjacent structures or land to stresses or pressures that will endanger them.

5.03 *Subsurface and Physical Conditions*

A. *Reports and Drawings*: The Supplementary Conditions identify:

1. Those reports of explorations and tests of subsurface conditions at or adjacent to the Site that contain Technical Data;

2. Those drawings of existing physical conditions at or adjacent to the Site, including those drawings depicting existing surface or subsurface structures at or adjacent to the Site (except Underground Facilities), that contain Technical Data; and

3. Technical Data contained in such reports and drawings.

B. *Underground Facilities*: Underground Facilities are shown or indicated on the Drawings, pursuant to Paragraph 5.05, and not in the drawings referred to in Paragraph 5.03.A. Information and data regarding the presence or location of Underground Facilities are not intended to be categorized, identified, or defined as Technical Data.

C. *Reliance by Contractor on Technical Data*: Contractor may rely upon the accuracy of the Technical Data expressly identified in the Supplementary Conditions with respect to such reports and drawings, but such reports and drawings are not Contract Documents. If no such express identification has been made, then Contractor may rely upon the accuracy of the Technical Data as defined in Paragraph 1.01.A.46.b.

D. *Limitations of Other Data and Documents*: Except for such reliance on Technical Data, Contractor may not rely upon or make any claim against Owner or Engineer, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, with respect to:

1. the completeness of such reports and drawings for Contractor's purposes, including, but not limited to, any aspects of the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor, and safety precautions and programs incident thereto;

2. other data, interpretations, opinions, and information contained in such reports or shown or indicated in such drawings;

3. the contents of other Site-related documents made available to Contractor, such as record drawings from other projects at or adjacent to the Site, or Owner's archival documents concerning the Site; or

4. any Contractor interpretation of or conclusion drawn from any Technical Data or any such other data, interpretations, opinions, or information.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

5.04 *Differing Subsurface or Physical Conditions*

A. *Notice by Contractor*: If Contractor believes that any subsurface or physical condition that is uncovered or revealed at the Site:

1. is of such a nature as to establish that any Technical Data on which Contractor is entitled to rely as provided in Paragraph 5.03 is materially inaccurate;

2. is of such a nature as to require a change in the Drawings or Specifications;

3. differs materially from that shown or indicated in the Contract Documents; or

4. is of an unusual nature, and differs materially from conditions ordinarily encountered and generally recognized as inherent in work of the character provided for in the Contract Documents;

then Contractor shall, promptly after becoming aware thereof and before further disturbing the subsurface or physical conditions or performing any Work in connection therewith (except in an emergency as required by Paragraph 7.15), notify Owner and Engineer in writing about such condition. Contractor shall not further disturb such condition or perform any Work in connection therewith (except with respect to an emergency) until receipt of a written statement permitting Contractor to do so.

B. *Engineer's Review*: After receipt of written notice as required by the preceding paragraph, Engineer will promptly review the subsurface or physical condition in question; determine whether it is necessary for Owner to obtain additional exploration or tests with respect to the condition; conclude whether the condition falls within any one or more of the differing site condition categories in Paragraph 5.04.A; obtain any pertinent cost or schedule information from Contractor; prepare recommendations to Owner regarding the Contractor's resumption of Work in connection with the subsurface or physical condition in question and the need for any change in the Drawings or Specifications; and advise Owner in writing of Engineer's findings, conclusions, and recommendations.

C. *Owner's Statement to Contractor Regarding Site Condition*: After receipt of Engineer's written findings, conclusions, and recommendations, Owner shall issue a written statement to Contractor (with a copy to Engineer) regarding the subsurface or physical condition in question, addressing the resumption of Work in connection with such condition, indicating whether any change in the Drawings or Specifications will be made, and adopting or rejecting Engineer's written findings, conclusions, and recommendations, in whole or in part.

D. *Early Resumption of Work*: If at any time Engineer determines that Work in connection with the subsurface or physical condition in question may resume prior to completion of Engineer's review or Owner's issuance of its statement to Contractor, because the condition in question has been adequately documented, and analyzed on a preliminary basis, then the Engineer may at its discretion instruct Contractor to resume such Work.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

E. *Possible Price and Times Adjustments*

1. Contractor shall be entitled to an equitable adjustment in Contract Price or Contract Times, to the extent that the existence of a differing subsurface or physical condition, or any related delay, disruption, or interference, causes an increase or decrease in Contractor's cost of, or time required for, performance of the Work; subject, however, to the following:

   a. Such condition must fall within any one or more of the categories described in Paragraph 5.04.A;

   b. With respect to Work that is paid for on a unit price basis, any adjustment in Contract Price will be subject to the provisions of Paragraph 13.03; and,

   c. Contractor's entitlement to an adjustment of the Contract Times is subject to the provisions of Paragraphs 4.05.D and 4.05.E.

2. Contractor shall not be entitled to any adjustment in the Contract Price or Contract Times with respect to a subsurface or physical condition if:

   a. Contractor knew of the existence of such condition at the time Contractor made a commitment to Owner with respect to Contract Price and Contract Times by the submission of a Bid or becoming bound under a negotiated contract, or otherwise;

   b. The existence of such condition reasonably could have been discovered or revealed as a result of any examination, investigation, exploration, test, or study of the Site and contiguous areas expressly required by the Bidding Requirements or Contract Documents to be conducted by or for Contractor prior to Contractor's making such commitment; or

   c. Contractor failed to give the written notice required by Paragraph 5.04.A.

3. If Owner and Contractor agree regarding Contractor's entitlement to and the amount or extent of any adjustment in the Contract Price or Contract Times, then any such adjustment will be set forth in a Change Order.

4. Contractor may submit a Change Proposal regarding its entitlement to or the amount or extent of any adjustment in the Contract Price or Contract Times, no later than 30 days after Owner's issuance of the Owner's written statement to Contractor regarding the subsurface or physical condition in question.

F. *Underground Facilities; Hazardous Environmental Conditions*: Paragraph 5.05 governs rights and responsibilities regarding the presence or location of Underground Facilities. Paragraph 5.06 governs rights and responsibilities regarding Hazardous Environmental Conditions. The provisions of Paragraphs 5.03 and 5.04 are not applicable to the presence or location of Underground Facilities, or to Hazardous Environmental Conditions.

5.05 *Underground Facilities*

A. *Contractor's Responsibilities*: Unless it is otherwise expressly provided in the Supplementary Conditions, the cost of all of the following are included in the Contract Price, and Contractor shall have full responsibility for:

1. reviewing and checking all information and data regarding existing Underground Facilities at the Site;

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2. complying with applicable state and local utility damage prevention Laws and Regulations;

3. verifying the actual location of those Underground Facilities shown or indicated in the Contract Documents as being within the area affected by the Work, by exposing such Underground Facilities during the course of construction;

4. coordination of the Work with the owners (including Owner) of such Underground Facilities, during construction; and

5. the safety and protection of all existing Underground Facilities at the Site, and repairing any damage thereto resulting from the Work.

B. *Notice by Contractor*: If Contractor believes that an Underground Facility that is uncovered or revealed at the Site was not shown or indicated on the Drawings, or was not shown or indicated on the Drawings with reasonable accuracy, then Contractor shall, promptly after becoming aware thereof and before further disturbing conditions affected thereby or performing any Work in connection therewith (except in an emergency as required by Paragraph 7.15), notify Owner and Engineer in writing regarding such Underground Facility.

C. *Engineer's Review*: Engineer will:

1. promptly review the Underground Facility and conclude whether such Underground Facility was not shown or indicated on the Drawings, or was not shown or indicated with reasonable accuracy;

2. identify and communicate with the owner of the Underground Facility; prepare recommendations to Owner (and if necessary issue any preliminary instructions to Contractor) regarding the Contractor's resumption of Work in connection with the Underground Facility in question;

3. obtain any pertinent cost or schedule information from Contractor; determine the extent, if any, to which a change is required in the Drawings or Specifications to reflect and document the consequences of the existence or location of the Underground Facility; and

4. advise Owner in writing of Engineer's findings, conclusions, and recommendations.

During such time, Contractor shall be responsible for the safety and protection of such Underground Facility.

D. *Owner's Statement to Contractor Regarding Underground Facility*: After receipt of Engineer's written findings, conclusions, and recommendations, Owner shall issue a written statement to Contractor (with a copy to Engineer) regarding the Underground Facility in question addressing the resumption of Work in connection with such Underground Facility, indicating whether any change in the Drawings or Specifications will be made, and adopting or rejecting Engineer's written findings, conclusions, and recommendations in whole or in part.

E. *Early Resumption of Work*: If at any time Engineer determines that Work in connection with the Underground Facility may resume prior to completion of Engineer's review or Owner's issuance of its statement to Contractor, because the Underground Facility in question and conditions affected by its presence have been adequately documented, and analyzed on a preliminary basis, then the Engineer may at its discretion instruct Contractor to resume such Work.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

F. *Possible Price and Times Adjustments*

1. Contractor shall be entitled to an equitable adjustment in the Contract Price or Contract Times, to the extent that any existing Underground Facility at the Site that was not shown or indicated on the Drawings, or was not shown or indicated with reasonable accuracy, or any related delay, disruption, or interference, causes an increase or decrease in Contractor's cost of, or time required for, performance of the Work; subject, however, to the following:

    a. With respect to Work that is paid for on a unit price basis, any adjustment in Contract Price will be subject to the provisions of Paragraph 13.03;

    b. Contractor's entitlement to an adjustment of the Contract Times is subject to the provisions of Paragraphs 4.05.D and 4.05.E; and

    c. Contractor gave the notice required in Paragraph 5.05.B.

2. If Owner and Contractor agree regarding Contractor's entitlement to and the amount or extent of any adjustment in the Contract Price or Contract Times, then any such adjustment will be set forth in a Change Order.

3. Contractor may submit a Change Proposal regarding its entitlement to or the amount or extent of any adjustment in the Contract Price or Contract Times, no later than 30 days after Owner's issuance of the Owner's written statement to Contractor regarding the Underground Facility in question.

4. The information and data shown or indicated on the Drawings with respect to existing Underground Facilities at the Site is based on information and data (a) furnished by the owners of such Underground Facilities, or by others, (b) obtained from available records, or (c) gathered in an investigation conducted in accordance with the current edition of ASCE 38, Standard Guideline for the Collection and Depiction of Existing Subsurface Utility Data, by the American Society of Civil Engineers. If such information or data is incorrect or incomplete, Contractor's remedies are limited to those set forth in this Paragraph 5.05.F.

5.06 *Hazardous Environmental Conditions at Site*

A. *Reports and Drawings*: The Supplementary Conditions identify:

1. those reports known to Owner relating to Hazardous Environmental Conditions that have been identified at or adjacent to the Site;

2. drawings known to Owner relating to Hazardous Environmental Conditions that have been identified at or adjacent to the Site; and

3. Technical Data contained in such reports and drawings.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. *Reliance by Contractor on Technical Data Authorized*: Contractor may rely upon the accuracy of the Technical Data expressly identified in the Supplementary Conditions with respect to such reports and drawings, but such reports and drawings are not Contract Documents. If no such express identification has been made, then Contractor may rely on the accuracy of the Technical Data as defined in Paragraph 1.01.A.46.b. Except for such reliance on Technical Data, Contractor may not rely upon or make any claim against Owner or Engineer, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, with respect to:

1. the completeness of such reports and drawings for Contractor's purposes, including, but not limited to, any aspects of the means, methods, techniques, sequences and procedures of construction to be employed by Contractor, and safety precautions and programs incident thereto;

2. other data, interpretations, opinions, and information contained in such reports or shown or indicated in such drawings; or

3. any Contractor interpretation of or conclusion drawn from any Technical Data or any such other data, interpretations, opinions or information.

C. Contractor shall not be responsible for removing or remediating any Hazardous Environmental Condition encountered, uncovered, or revealed at the Site unless such removal or remediation is expressly identified in the Contract Documents to be within the scope of the Work.

D. Contractor shall be responsible for controlling, containing, and duly removing all Constituents of Concern brought to the Site by Contractor, Subcontractors, Suppliers, or anyone else for whom Contractor is responsible, and for any associated costs; and for the costs of removing and remediating any Hazardous Environmental Condition created by the presence of any such Constituents of Concern.

E. If Contractor encounters, uncovers, or reveals a Hazardous Environmental Condition whose removal or remediation is not expressly identified in the Contract Documents as being within the scope of the Work, or if Contractor or anyone for whom Contractor is responsible creates a Hazardous Environmental Condition, then Contractor shall immediately: (1) secure or otherwise isolate such condition; (2) stop all Work in connection with such condition and in any area affected thereby (except in an emergency as required by Paragraph 7.15); and (3) notify Owner and Engineer (and promptly thereafter confirm such notice in writing). Owner shall promptly consult with Engineer concerning the necessity for Owner to retain a qualified expert to evaluate such condition or take corrective action, if any. Promptly after consulting with Engineer, Owner shall take such actions as are necessary to permit Owner to timely obtain required permits and provide Contractor the written notice required by Paragraph 5.06.F. If Contractor or anyone for whom Contractor is responsible created the Hazardous Environmental Condition in question, then Owner may remove and remediate the Hazardous Environmental Condition, and impose a set-off against payments to account for the associated costs.

F. Contractor shall not resume Work in connection with such Hazardous Environmental Condition or in any affected area until after Owner has obtained any required permits related thereto, and delivered written notice to Contractor either (1) specifying that such condition

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

and any affected area is or has been rendered safe for the resumption of Work, or (2) specifying any special conditions under which such Work may be resumed safely.

G. If Owner and Contractor cannot agree as to entitlement to or on the amount or extent, if any, of any adjustment in Contract Price or Contract Times, as a result of such Work stoppage, such special conditions under which Work is agreed to be resumed by Contractor, or any costs or expenses incurred in response to the Hazardous Environmental Condition, then within 30 days of Owner's written notice regarding the resumption of Work, Contractor may submit a Change Proposal, or Owner may impose a set-off. Entitlement to any such adjustment is subject to the provisions of Paragraphs 4.05.D, 4.05.E, 11.07, and 11.08.

H. If, after receipt of such written notice, Contractor does not agree to resume such Work based on a reasonable belief it is unsafe, or does not agree to resume such Work under such special conditions, then Owner may order the portion of the Work that is in the area affected by such condition to be deleted from the Work, following the contractual change procedures in Article 11. Owner may have such deleted portion of the Work performed by Owner's own forces or others in accordance with Article 8.

I. To the fullest extent permitted by Laws and Regulations, Owner shall indemnify and hold harmless Contractor, Subcontractors, and Engineer, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals, and all court, arbitration, or other dispute resolution costs) arising out of or relating to a Hazardous Environmental Condition, provided that such Hazardous Environmental Condition (1) was not shown or indicated in the Drawings, Specifications, or other Contract Documents, identified as Technical Data entitled to limited reliance pursuant to Paragraph 5.06.B, or identified in the Contract Documents to be included within the scope of the Work, and (2) was not created by Contractor or by anyone for whom Contractor is responsible. Nothing in this Paragraph 5.06.I obligates Owner to indemnify any individual or entity from and against the consequences of that individual's or entity's own negligence.

J. To the fullest extent permitted by Laws and Regulations, Contractor shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to the failure to control, contain, or remove a Constituent of Concern brought to the Site by Contractor or by anyone for whom Contractor is responsible, or to a Hazardous Environmental Condition created by Contractor or by anyone for whom Contractor is responsible. Nothing in this Paragraph 5.06.J obligates Contractor to indemnify any individual or entity from and against the consequences of that individual's or entity's own negligence.

K. The provisions of Paragraphs 5.03, 5.04, and 5.05 do not apply to the presence of Constituents of Concern or to a Hazardous Environmental Condition uncovered or revealed at the Site.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 6—BONDS AND INSURANCE

6.01 *Performance, Payment, and Other Bonds*

A. Contractor shall furnish a performance bond and a payment bond, each in an amount at least equal to the Contract Price, as security for the faithful performance and payment of Contractor's obligations under the Contract. These bonds must remain in effect until one year after the date when final payment becomes due or until completion of the correction period specified in Paragraph 15.08, whichever is later, except as provided otherwise by Laws or Regulations, the terms of a prescribed bond form, the Supplementary Conditions, or other provisions of the Contract.

B. Contractor shall also furnish such other bonds (if any) as are required by the Supplementary Conditions or other provisions of the Contract.

C. All bonds must be in the form included in the Bidding Documents or otherwise specified by Owner prior to execution of the Contract, except as provided otherwise by Laws or Regulations, and must be issued and signed by a surety named in "Companies Holding Certificates of Authority as Acceptable Sureties on Federal Bonds and as Acceptable Reinsuring Companies" as published in Department Circular 570 (as amended and supplemented) by the Bureau of the Fiscal Service, U.S. Department of the Treasury. A bond signed by an agent or attorney-in-fact must be accompanied by a certified copy of that individual's authority to bind the surety. The evidence of authority must show that it is effective on the date the agent or attorney-in-fact signed the accompanying bond.

D. Contractor shall obtain the required bonds from surety companies that are duly licensed or authorized, in the state or jurisdiction in which the Project is located, to issue bonds in the required amounts.

E. If the surety on a bond furnished by Contractor is declared bankrupt or becomes insolvent, or the surety ceases to meet the requirements above, then Contractor shall promptly notify Owner and Engineer in writing and shall, within 20 days after the event giving rise to such notification, provide another bond and surety, both of which must comply with the bond and surety requirements above.

F. If Contractor has failed to obtain a required bond, Owner may exclude the Contractor from the Site and exercise Owner's termination rights under Article 16.

G. Upon request to Owner from any Subcontractor, Supplier, or other person or entity claiming to have furnished labor, services, materials, or equipment used in the performance of the Work, Owner shall provide a copy of the payment bond to such person or entity.

H. Upon request to Contractor from any Subcontractor, Supplier, or other person or entity claiming to have furnished labor, services, materials, or equipment used in the performance of the Work, Contractor shall provide a copy of the payment bond to such person or entity.

6.02 *Insurance—General Provisions*

A. Owner and Contractor shall obtain and maintain insurance as required in this article and in the Supplementary Conditions.

B. All insurance required by the Contract to be purchased and maintained by Owner or Contractor shall be obtained from insurance companies that are duly licensed or authorized in the state or jurisdiction in which the Project is located to issue insurance policies for the

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

required limits and coverages. Unless a different standard is indicated in the Supplementary Conditions, all companies that provide insurance policies required under this Contract shall have an A.M. Best rating of A-VII or better.

C. Alternative forms of insurance coverage, including but not limited to self-insurance and "Occupational Accident and Excess Employer's Indemnity Policies," are not sufficient to meet the insurance requirements of this Contract, unless expressly allowed in the Supplementary Conditions.

D. Contractor shall deliver to Owner, with copies to each additional insured identified in the Contract, certificates of insurance and endorsements establishing that Contractor has obtained and is maintaining the policies and coverages required by the Contract. Upon request by Owner or any other insured, Contractor shall also furnish other evidence of such required insurance, including but not limited to copies of policies, documentation of applicable self-insured retentions (if allowed) and deductibles, full disclosure of all relevant exclusions, and evidence of insurance required to be purchased and maintained by Subcontractors or Suppliers. In any documentation furnished under this provision, Contractor, Subcontractors, and Suppliers may block out (redact) (1) any confidential premium or pricing information and (2) any wording specific to a project or jurisdiction other than those applicable to this Contract.

E. Owner shall deliver to Contractor, with copies to each additional insured identified in the Contract, certificates of insurance and endorsements establishing that Owner has obtained and is maintaining the policies and coverages required of Owner by the Contract (if any). Upon request by Contractor or any other insured, Owner shall also provide other evidence of such required insurance (if any), including but not limited to copies of policies, documentation of applicable self-insured retentions (if allowed) and deductibles, and full disclosure of all relevant exclusions. In any documentation furnished under this provision, Owner may block out (redact) (1) any confidential premium or pricing information and (2) any wording specific to a project or jurisdiction other than those relevant to this Contract.

F. Failure of Owner or Contractor to demand such certificates or other evidence of the other party's full compliance with these insurance requirements, or failure of Owner or Contractor to identify a deficiency in compliance from the evidence provided, will not be construed as a waiver of the other party's obligation to obtain and maintain such insurance.

G. In addition to the liability insurance required to be provided by Contractor, the Owner, at Owner's option, may purchase and maintain Owner's own liability insurance. Owner's liability policies, if any, operate separately and independently from policies required to be provided by Contractor, and Contractor cannot rely upon Owner's liability policies for any of Contractor's obligations to the Owner, Engineer, or third parties.

H. Contractor shall require:

1. Subcontractors to purchase and maintain worker's compensation, commercial general liability, and other insurance that is appropriate for their participation in the Project, and to name as additional insureds Owner and Engineer (and any other individuals or entities identified in the Supplementary Conditions as additional insureds on Contractor's liability policies) on each Subcontractor's commercial general liability insurance policy; and

2. Suppliers to purchase and maintain insurance that is appropriate for their participation in the Project.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

I. If either party does not purchase or maintain the insurance required of such party by the Contract, such party shall notify the other party in writing of such failure to purchase prior to the start of the Work, or of such failure to maintain prior to any change in the required coverage.

J. If Contractor has failed to obtain and maintain required insurance, Contractor's entitlement to enter or remain at the Site will end immediately, and Owner may impose an appropriate set-off against payment for any associated costs (including but not limited to the cost of purchasing necessary insurance coverage), and exercise Owner's termination rights under Article 16.

K. Without prejudice to any other right or remedy, if a party has failed to obtain required insurance, the other party may elect (but is in no way obligated) to obtain equivalent insurance to protect such other party's interests at the expense of the party who was required to provide such coverage, and the Contract Price will be adjusted accordingly.

L. Owner does not represent that insurance coverage and limits established in this Contract necessarily will be adequate to protect Contractor or Contractor's interests. Contractor is responsible for determining whether such coverage and limits are adequate to protect its interests, and for obtaining and maintaining any additional insurance that Contractor deems necessary.

M. The insurance and insurance limits required herein will not be deemed as a limitation on Contractor's liability, or that of its Subcontractors or Suppliers, under the indemnities granted to Owner and other individuals and entities in the Contract or otherwise.

N. All the policies of insurance required to be purchased and maintained under this Contract will contain a provision or endorsement that the coverage afforded will not be canceled, or renewal refused, until at least 10 days prior written notice has been given to the purchasing policyholder. Within three days of receipt of any such written notice, the purchasing policyholder shall provide a copy of the notice to each other insured and Engineer.

6.03 *Contractor's Insurance*

A. *Required Insurance*: Contractor shall purchase and maintain Worker's Compensation, Commercial General Liability, and other insurance pursuant to the specific requirements of the Supplementary Conditions.

B. *General Provisions*: The policies of insurance required by this Paragraph 6.03 as supplemented must:

1. include at least the specific coverages required;

2. be written for not less than the limits provided, or those required by Laws or Regulations, whichever is greater;

3. remain in effect at least until the Work is complete (as set forth in Paragraph 15.06.D), and longer if expressly required elsewhere in this Contract, and at all times thereafter when Contractor may be correcting, removing, or replacing defective Work as a warranty or correction obligation, or otherwise, or returning to the Site to conduct other tasks arising from the Contract;

4. apply with respect to the performance of the Work, whether such performance is by Contractor, any Subcontractor or Supplier, or by anyone directly or indirectly employed

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

by any of them to perform any of the Work, or by anyone for whose acts any of them may be liable; and

5. include all necessary endorsements to support the stated requirements.

C. *Additional Insureds*: The Contractor's commercial general liability, automobile liability, employer's liability, umbrella or excess, pollution liability, and unmanned aerial vehicle liability policies, if required by this Contract, must:

1. include and list as additional insureds Owner and Engineer, and any individuals or entities identified as additional insureds in the Supplementary Conditions;

2. include coverage for the respective officers, directors, members, partners, employees, and consultants of all such additional insureds;

3. afford primary coverage to these additional insureds for all claims covered thereby (including as applicable those arising from both ongoing and completed operations);

4. not seek contribution from insurance maintained by the additional insured; and

5. as to commercial general liability insurance, apply to additional insureds with respect to liability caused in whole or in part by Contractor's acts or omissions, or the acts and omissions of those working on Contractor's behalf, in the performance of Contractor's operations.

6.04 *Builder's Risk and Other Property Insurance*

A. *Builder's Risk*: Unless otherwise provided in the Supplementary Conditions, Contractor shall purchase and maintain builder's risk insurance upon the Work on a completed value basis, in the amount of the Work's full insurable replacement cost (subject to such deductible amounts as may be provided in the Supplementary Conditions or required by Laws and Regulations). The specific requirements applicable to the builder's risk insurance are set forth in the Supplementary Conditions.

B. *Property Insurance for Facilities of Owner Where Work Will Occur*: Owner is responsible for obtaining and maintaining property insurance covering each existing structure, building, or facility in which any part of the Work will occur, or to which any part of the Work will attach or be adjoined. Such property insurance will be written on a special perils (all-risk) form, on a replacement cost basis, providing coverage consistent with that required for the builder's risk insurance, and will be maintained until the Work is complete, as set forth in Paragraph 15.06.D.

C. *Property Insurance for Substantially Complete Facilities*: Promptly after Substantial Completion, and before actual occupancy or use of the substantially completed Work, Owner will obtain property insurance for such substantially completed Work, and maintain such property insurance at least until the Work is complete, as set forth in Paragraph 15.06.D. Such property insurance will be written on a special perils (all-risk) form, on a replacement cost basis, and provide coverage consistent with that required for the builder's risk insurance. The builder's risk insurance may terminate upon written confirmation of Owner's procurement of such property insurance.

D. *Partial Occupancy or Use by Owner*: If Owner will occupy or use a portion or portions of the Work prior to Substantial Completion of all the Work, as provided in Paragraph 15.04, then Owner (directly, if it is the purchaser of the builder's risk policy, or through Contractor) will

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

provide advance notice of such occupancy or use to the builder's risk insurer, and obtain an endorsement consenting to the continuation of coverage prior to commencing such partial occupancy or use.

E. *Insurance of Other Property; Additional Insurance*: If the express insurance provisions of the Contract do not require or address the insurance of a property item or interest, then the entity or individual owning such property item will be responsible for insuring it. If Contractor elects to obtain other special insurance to be included in or supplement the builder's risk or property insurance policies provided under this Paragraph 6.04, it may do so at Contractor's expense.

6.05 *Property Losses; Subrogation*

A. The builder's risk insurance policy purchased and maintained in accordance with Paragraph 6.04 (or an installation floater policy if authorized by the Supplementary Conditions), will contain provisions to the effect that in the event of payment of any loss or damage the insurer will have no rights of recovery against any insureds thereunder, or against Engineer or its consultants, or their officers, directors, members, partners, employees, agents, consultants, or subcontractors.

1. Owner and Contractor waive all rights against each other and the respective officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, for all losses and damages caused by, arising out of, or resulting from any of the perils, risks, or causes of loss covered by such policies and any other property insurance applicable to the Work; and, in addition, waive all such rights against Engineer, its consultants, all individuals or entities identified in the Supplementary Conditions as builder's risk or installation floater insureds, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, under such policies for losses and damages so caused.

2. None of the above waivers extends to the rights that any party making such waiver may have to the proceeds of insurance held by Owner or Contractor as trustee or fiduciary, or otherwise payable under any policy so issued.

B. Any property insurance policy maintained by Owner covering any loss, damage, or consequential loss to Owner's existing structures, buildings, or facilities in which any part of the Work will occur, or to which any part of the Work will attach or adjoin; to adjacent structures, buildings, or facilities of Owner; or to part or all of the completed or substantially completed Work, during partial occupancy or use pursuant to Paragraph 15.04, after Substantial Completion pursuant to Paragraph 15.03, or after final payment pursuant to Paragraph 15.06, will contain provisions to the effect that in the event of payment of any loss or damage the insurer will have no rights of recovery against any insureds thereunder, or against Contractor, Subcontractors, or Engineer, or the officers, directors, members, partners, employees, agents, consultants, or subcontractors of each and any of them, and that the insured is allowed to waive the insurer's rights of subrogation in a written contract executed prior to the loss, damage, or consequential loss.

1. Owner waives all rights against Contractor, Subcontractors, and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them, for all losses and damages caused by, arising out of, or resulting from fire or any of the perils, risks, or causes of loss covered by such policies.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

C. The waivers in this Paragraph 6.05 include the waiver of rights due to business interruption, loss of use, or other consequential loss extending beyond direct physical loss or damage to Owner's property or the Work caused by, arising out of, or resulting from fire or other insured peril, risk, or cause of loss.

D. Contractor shall be responsible for assuring that each Subcontract contains provisions whereby the Subcontractor waives all rights against Owner, Contractor, all individuals or entities identified in the Supplementary Conditions as insureds, the Engineer and its consultants, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, for all losses and damages caused by, arising out of, relating to, or resulting from fire or other peril, risk, or cause of loss covered by builder's risk insurance, installation floater, and any other property insurance applicable to the Work.

6.06 *Receipt and Application of Property Insurance Proceeds*

A. Any insured loss under the builder's risk and other policies of property insurance required by Paragraph 6.04 will be adjusted and settled with the named insured that purchased the policy. Such named insured shall act as fiduciary for the other insureds, and give notice to such other insureds that adjustment and settlement of a claim is in progress. Any other insured may state its position regarding a claim for insured loss in writing within 15 days after notice of such claim.

B. Proceeds for such insured losses may be made payable by the insurer either jointly to multiple insureds, or to the named insured that purchased the policy in its own right and as fiduciary for other insureds, subject to the requirements of any applicable mortgage clause. A named insured receiving insurance proceeds under the builder's risk and other policies of insurance required by Paragraph 6.04 shall maintain such proceeds in a segregated account, and distribute such proceeds in accordance with such agreement as the parties in interest may reach, or as otherwise required under the dispute resolution provisions of this Contract or applicable Laws and Regulations.

C. If no other special agreement is reached, Contractor shall repair or replace the damaged Work, using allocated insurance proceeds.

ARTICLE 7—CONTRACTOR'S RESPONSIBILITIES

7.01 *Contractor's Means and Methods of Construction*

A. Contractor shall be solely responsible for the means, methods, techniques, sequences, and procedures of construction.

B. If the Contract Documents note, or Contractor determines, that professional engineering or other design services are needed to carry out Contractor's responsibilities for construction means, methods, techniques, sequences, and procedures, or for Site safety, then Contractor shall cause such services to be provided by a properly licensed design professional, at Contractor's expense. Such services are not Owner-delegated professional design services under this Contract, and neither Owner nor Engineer has any responsibility with respect to (1) Contractor's determination of the need for such services, (2) the qualifications or licensing of the design professionals retained or employed by Contractor, (3) the performance of such services, or (4) any errors, omissions, or defects in such services.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

7.02 *Supervision and Superintendence*

A. Contractor shall supervise, inspect, and direct the Work competently and efficiently, devoting such attention thereto and applying such skills and expertise as may be necessary to perform the Work in accordance with the Contract Documents.

B. At all times during the progress of the Work, Contractor shall assign a competent resident superintendent who will not be replaced without written notice to Owner and Engineer except under extraordinary circumstances.

7.03 *Labor; Working Hours*

A. Contractor shall provide competent, suitably qualified personnel to survey and lay out the Work and perform construction as required by the Contract Documents. Contractor shall maintain good discipline and order at the Site.

B. Contractor shall be fully responsible to Owner and Engineer for all acts and omissions of Contractor's employees; of Suppliers and Subcontractors, and their employees; and of any other individuals or entities performing or furnishing any of the Work, just as Contractor is responsible for Contractor's own acts and omissions.

C. Except as otherwise required for the safety or protection of persons or the Work or property at the Site or adjacent thereto, and except as otherwise stated in the Contract Documents, all Work at the Site will be performed during regular working hours, Monday through Friday. Contractor will not perform Work on a Saturday, Sunday, or any legal holiday. Contractor may perform Work outside regular working hours or on Saturdays, Sundays, or legal holidays only with Owner's written consent, which will not be unreasonably withheld.

7.04 *Services, Materials, and Equipment*

A. Unless otherwise specified in the Contract Documents, Contractor shall provide and assume full responsibility for all services, materials, equipment, labor, transportation, construction equipment and machinery, tools, appliances, fuel, power, light, heat, telephone, water, sanitary facilities, temporary facilities, and all other facilities and incidentals necessary for the performance, testing, start up, and completion of the Work, whether or not such items are specifically called for in the Contract Documents.

B. All materials and equipment incorporated into the Work must be new and of good quality, except as otherwise provided in the Contract Documents. All special warranties and guarantees required by the Specifications will expressly run to the benefit of Owner. If required by Engineer, Contractor shall furnish satisfactory evidence (including reports of required tests) as to the source, kind, and quality of materials and equipment.

C. All materials and equipment must be stored, applied, installed, connected, erected, protected, used, cleaned, and conditioned in accordance with instructions of the applicable Supplier, except as otherwise may be provided in the Contract Documents.

7.05 *"Or Equals"*

A. *Contractor's Request; Governing Criteria*: Whenever an item of equipment or material is specified or described in the Contract Documents by using the names of one or more proprietary items or specific Suppliers, the Contract Price has been based upon Contractor furnishing such item as specified. The specification or description of such an item is intended to establish the type, function, appearance, and quality required. Unless the specification or

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

description contains or is followed by words reading that no like, equivalent, or "or equal" item is permitted, Contractor may request that Engineer authorize the use of other items of equipment or material, or items from other proposed Suppliers, under the circumstances described below.

1. If Engineer in its sole discretion determines that an item of equipment or material proposed by Contractor is functionally equal to that named and sufficiently similar so that no change in related Work will be required, Engineer will deem it an "or equal" item. For the purposes of this paragraph, a proposed item of equipment or material will be considered functionally equal to an item so named if:
    a. in the exercise of reasonable judgment Engineer determines that the proposed item:
        1) is at least equal in materials of construction, quality, durability, appearance, strength, and design characteristics;
        2) will reliably perform at least equally well the function and achieve the results imposed by the design concept of the completed Project as a functioning whole;
        3) has a proven record of performance and availability of responsive service; and
        4) is not objectionable to Owner.
    b. Contractor certifies that, if the proposed item is approved and incorporated into the Work:
        1) there will be no increase in cost to the Owner or increase in Contract Times; and
        2) the item will conform substantially to the detailed requirements of the item named in the Contract Documents.

B. *Contractor's Expense*: Contractor shall provide all data in support of any proposed "or equal" item at Contractor's expense.

C. *Engineer's Evaluation and Determination*: Engineer will be allowed a reasonable time to evaluate each "or-equal" request. Engineer may require Contractor to furnish additional data about the proposed "or-equal" item. Engineer will be the sole judge of acceptability. No "or-equal" item will be ordered, furnished, installed, or utilized until Engineer's review is complete and Engineer determines that the proposed item is an "or-equal," which will be evidenced by an approved Shop Drawing or other written communication. Engineer will advise Contractor in writing of any negative determination.

D. *Effect of Engineer's Determination*: Neither approval nor denial of an "or-equal" request will result in any change in Contract Price. The Engineer's denial of an "or-equal" request will be final and binding, and may not be reversed through an appeal under any provision of the Contract.

E. *Treatment as a Substitution Request*: If Engineer determines that an item of equipment or material proposed by Contractor does not qualify as an "or-equal" item, Contractor may request that Engineer consider the item a proposed substitute pursuant to Paragraph 7.06.

7.06 *Substitutes*

A. *Contractor's Request; Governing Criteria*: Unless the specification or description of an item of equipment or material required to be furnished under the Contract Documents contains or is followed by words reading that no substitution is permitted, Contractor may request that

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Engineer authorize the use of other items of equipment or material under the circumstances described below. To the extent possible such requests must be made before commencement of related construction at the Site.

1. Contractor shall submit sufficient information as provided below to allow Engineer to determine if the item of material or equipment proposed is functionally equivalent to that named and an acceptable substitute therefor. Engineer will not accept requests for review of proposed substitute items of equipment or material from anyone other than Contractor.
2. The requirements for review by Engineer will be as set forth in Paragraph 7.06.B, as supplemented by the Specifications, and as Engineer may decide is appropriate under the circumstances.
3. Contractor shall make written application to Engineer for review of a proposed substitute item of equipment or material that Contractor seeks to furnish or use. The application:
    a. will certify that the proposed substitute item will:
        1) perform adequately the functions and achieve the results called for by the general design;
        2) be similar in substance to the item specified; and
        3) be suited to the same use as the item specified.
    b. will state:
        1) the extent, if any, to which the use of the proposed substitute item will necessitate a change in Contract Times;
        2) whether use of the proposed substitute item in the Work will require a change in any of the Contract Documents (or in the provisions of any other direct contract with Owner for other work on the Project) to adapt the design to the proposed substitute item; and
        3) whether incorporation or use of the proposed substitute item in connection with the Work is subject to payment of any license fee or royalty.
    c. will identify:
        1) all variations of the proposed substitute item from the item specified; and
        2) available engineering, sales, maintenance, repair, and replacement services.
    d. will contain an itemized estimate of all costs or credits that will result directly or indirectly from use of such substitute item, including but not limited to changes in Contract Price, shared savings, costs of redesign, and claims of other contractors affected by any resulting change.

B. *Engineer's Evaluation and Determination*: Engineer will be allowed a reasonable time to evaluate each substitute request, and to obtain comments and direction from Owner. Engineer may require Contractor to furnish additional data about the proposed substitute item. Engineer will be the sole judge of acceptability. No substitute will be ordered, furnished, installed, or utilized until Engineer's review is complete and Engineer determines that the proposed item is an acceptable substitute. Engineer's determination will be evidenced by a

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Field Order or a proposed Change Order accounting for the substitution itself and all related impacts, including changes in Contract Price or Contract Times. Engineer will advise Contractor in writing of any negative determination.

C. *Special Guarantee*: Owner may require Contractor to furnish at Contractor's expense a special performance guarantee or other surety with respect to any substitute.

D. *Reimbursement of Engineer's Cost*: Engineer will record Engineer's costs in evaluating a substitute proposed or submitted by Contractor. Whether or not Engineer approves a substitute so proposed or submitted by Contractor, Contractor shall reimburse Owner for the reasonable charges of Engineer for evaluating each such proposed substitute. Contractor shall also reimburse Owner for the reasonable charges of Engineer for making changes in the Contract Documents (or in the provisions of any other direct contract with Owner) resulting from the acceptance of each proposed substitute.

E. *Contractor's Expense*: Contractor shall provide all data in support of any proposed substitute at Contractor's expense.

F. *Effect of Engineer's Determination*: If Engineer approves the substitution request, Contractor shall execute the proposed Change Order and proceed with the substitution. The Engineer's denial of a substitution request will be final and binding, and may not be reversed through an appeal under any provision of the Contract. Contractor may challenge the scope of reimbursement costs imposed under Paragraph 7.06.D, by timely submittal of a Change Proposal.

7.07 *Concerning Subcontractors and Suppliers*

A. Contractor may retain Subcontractors and Suppliers for the performance of parts of the Work. Such Subcontractors and Suppliers must be acceptable to Owner. The Contractor's retention of a Subcontractor or Supplier for the performance of parts of the Work will not relieve Contractor's obligation to Owner to perform and complete the Work in accordance with the Contract Documents.

B. Contractor shall retain specific Subcontractors and Suppliers for the performance of designated parts of the Work if required by the Contract to do so.

C. Subsequent to the submittal of Contractor's Bid or final negotiation of the terms of the Contract, Owner may not require Contractor to retain any Subcontractor or Supplier to furnish or perform any of the Work against which Contractor has reasonable objection.

D. Prior to entry into any binding subcontract or purchase order, Contractor shall submit to Owner the identity of the proposed Subcontractor or Supplier (unless Owner has already deemed such proposed Subcontractor or Supplier acceptable during the bidding process or otherwise). Such proposed Subcontractor or Supplier shall be deemed acceptable to Owner unless Owner raises a substantive, reasonable objection within 5 days.

E. Owner may require the replacement of any Subcontractor or Supplier. Owner also may require Contractor to retain specific replacements; provided, however, that Owner may not require a replacement to which Contractor has a reasonable objection. If Contractor has submitted the identity of certain Subcontractors or Suppliers for acceptance by Owner, and Owner has accepted it (either in writing or by failing to make written objection thereto), then Owner may subsequently revoke the acceptance of any such Subcontractor or Supplier so identified solely on the basis of substantive, reasonable objection after due investigation.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Contractor shall submit an acceptable replacement for the rejected Subcontractor or Supplier.

F. If Owner requires the replacement of any Subcontractor or Supplier retained by Contractor to perform any part of the Work, then Contractor shall be entitled to an adjustment in Contract Price or Contract Times, with respect to the replacement; and Contractor shall initiate a Change Proposal for such adjustment within 30 days of Owner's requirement of replacement.

G. No acceptance by Owner of any such Subcontractor or Supplier, whether initially or as a replacement, will constitute a waiver of the right of Owner to the completion of the Work in accordance with the Contract Documents.

H. On a monthly basis, Contractor shall submit to Engineer a complete list of all Subcontractors and Suppliers having a direct contract with Contractor, and of all other Subcontractors and Suppliers known to Contractor at the time of submittal.

I. Contractor shall be solely responsible for scheduling and coordinating the work of Subcontractors and Suppliers.

J. The divisions and sections of the Specifications and the identifications of any Drawings do not control Contractor in dividing the Work among Subcontractors or Suppliers, or in delineating the Work to be performed by any specific trade.

K. All Work performed for Contractor by a Subcontractor or Supplier must be pursuant to an appropriate contractual agreement that specifically binds the Subcontractor or Supplier to the applicable terms and conditions of the Contract for the benefit of Owner and Engineer.

L. Owner may furnish to any Subcontractor or Supplier, to the extent practicable, information about amounts paid to Contractor for Work performed for Contractor by the Subcontractor or Supplier.

M. Contractor shall restrict all Subcontractors and Suppliers from communicating with Engineer or Owner, except through Contractor or in case of an emergency, or as otherwise expressly allowed in this Contract.

7.08 *Patent Fees and Royalties*

A. Contractor shall pay all license fees and royalties and assume all costs incident to the use in the performance of the Work or the incorporation in the Work of any invention, design, process, product, or device which is the subject of patent rights or copyrights held by others. If an invention, design, process, product, or device is specified in the Contract Documents for use in the performance of the Work and if, to the actual knowledge of Owner or Engineer, its use is subject to patent rights or copyrights calling for the payment of any license fee or royalty to others, the existence of such rights will be disclosed in the Contract Documents.

B. To the fullest extent permitted by Laws and Regulations, Owner shall indemnify and hold harmless Contractor, and its officers, directors, members, partners, employees, agents, consultants, and subcontractors, from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals, and all court or arbitration or other dispute resolution costs) arising out of or relating to any infringement of patent rights or copyrights incident to the use in the performance of the Work or resulting from the incorporation in the Work of any invention, design, process, product, or device specified in the Contract Documents, but not identified as

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

being subject to payment of any license fee or royalty to others required by patent rights or copyrights.

C. To the fullest extent permitted by Laws and Regulations, Contractor shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them, from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to any infringement of patent rights or copyrights incident to the use in the performance of the Work or resulting from the incorporation in the Work of any invention, design, process, product, or device not specified in the Contract Documents.

7.09 *Permits*

A. Unless otherwise provided in the Contract Documents, Contractor shall obtain and pay for all construction permits, licenses, and certificates of occupancy. Owner shall assist Contractor, when necessary, in obtaining such permits and licenses. Contractor shall pay all governmental charges and inspection fees necessary for the prosecution of the Work which are applicable at the time of the submission of Contractor's Bid (or when Contractor became bound under a negotiated contract). Owner shall pay all charges of utility owners for connections for providing permanent service to the Work.

7.10 *Taxes*

A. Contractor shall pay all sales, consumer, use, and other similar taxes required to be paid by Contractor in accordance with the Laws and Regulations of the place of the Project which are applicable during the performance of the Work.

7.11 *Laws and Regulations*

A. Contractor shall give all notices required by and shall comply with all Laws and Regulations applicable to the performance of the Work. Neither Owner nor Engineer shall be responsible for monitoring Contractor's compliance with any Laws or Regulations.

B. If Contractor performs any Work or takes any other action knowing or having reason to know that it is contrary to Laws or Regulations, Contractor shall bear all resulting costs and losses, and shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such Work or other action. It is not Contractor's responsibility to make certain that the Work described in the Contract Documents is in accordance with Laws and Regulations, but this does not relieve Contractor of its obligations under Paragraph 3.03.

C. Owner or Contractor may give written notice to the other party of any changes after the submission of Contractor's Bid (or after the date when Contractor became bound under a negotiated contract) in Laws or Regulations having an effect on the cost or time of performance of the Work, including but not limited to changes in Laws or Regulations having an effect on procuring permits and on sales, use, value-added, consumption, and other similar taxes. If Owner and Contractor are unable to agree on entitlement to or on the amount or extent, if any, of any adjustment in Contract Price or Contract Times resulting from such

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

changes, then within 30 days of such written notice Contractor may submit a Change Proposal, or Owner may initiate a Claim.

7.12 *Record Documents*

A. Contractor shall maintain in a safe place at the Site one printed record copy of all Drawings, Specifications, Addenda, Change Orders, Work Change Directives, Field Orders, written interpretations and clarifications, and approved Shop Drawings. Contractor shall keep such record documents in good order and annotate them to show changes made during construction. These record documents, together with all approved Samples, will be available to Engineer for reference. Upon completion of the Work, Contractor shall deliver these record documents to Engineer.

7.13 *Safety and Protection*

A. Contractor shall be solely responsible for initiating, maintaining, and supervising all safety precautions and programs in connection with the Work. Such responsibility does not relieve Subcontractors of their responsibility for the safety of persons or property in the performance of their work, nor for compliance with applicable safety Laws and Regulations.

B. Contractor shall designate a qualified and experienced safety representative whose duties and responsibilities are the prevention of Work-related accidents and the maintenance and supervision of safety precautions and programs.

C. Contractor shall take all necessary precautions for the safety of, and shall provide the necessary protection to prevent damage, injury, or loss to:

1. all persons on the Site or who may be affected by the Work;

2. all the Work and materials and equipment to be incorporated therein, whether in storage on or off the Site; and

3. other property at the Site or adjacent thereto, including trees, shrubs, lawns, walks, pavements, roadways, structures, other work in progress, utilities, and Underground Facilities not designated for removal, relocation, or replacement in the course of construction.

D. All damage, injury, or loss to any property referred to in Paragraph 7.13.C.2 or 7.13.C.3 caused, directly or indirectly, in whole or in part, by Contractor, any Subcontractor, Supplier, or any other individual or entity directly or indirectly employed by any of them to perform any of the Work, or anyone for whose acts any of them may be liable, shall be remedied by Contractor at its expense (except damage or loss attributable to the fault of Drawings or Specifications or to the acts or omissions of Owner or Engineer or anyone employed by any of them, or anyone for whose acts any of them may be liable, and not attributable, directly or indirectly, in whole or in part, to the fault or negligence of Contractor or any Subcontractor, Supplier, or other individual or entity directly or indirectly employed by any of them).

E. Contractor shall comply with all applicable Laws and Regulations relating to the safety of persons or property, or to the protection of persons or property from damage, injury, or loss; and shall erect and maintain all necessary safeguards for such safety and protection.

F. Contractor shall notify Owner; the owners of adjacent property; the owners of Underground Facilities and other utilities (if the identity of such owners is known to Contractor); and other contractors and utility owners performing work at or adjacent to the Site, in writing, when

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Contractor knows that prosecution of the Work may affect them, and shall cooperate with them in the protection, removal, relocation, and replacement of their property or work in progress.

G. Contractor shall comply with the applicable requirements of Owner's safety programs, if any. Any Owner's safety programs that are applicable to the Work are identified or included in the Supplementary Conditions or Specifications.

H. Contractor shall inform Owner and Engineer of the specific requirements of Contractor's safety program with which Owner's and Engineer's employees and representatives must comply while at the Site.

I. Contractor's duties and responsibilities for safety and protection will continue until all the Work is completed, Engineer has issued a written notice to Owner and Contractor in accordance with Paragraph 15.06.C that the Work is acceptable, and Contractor has left the Site (except as otherwise expressly provided in connection with Substantial Completion).

J. Contractor's duties and responsibilities for safety and protection will resume whenever Contractor or any Subcontractor or Supplier returns to the Site to fulfill warranty or correction obligations, or to conduct other tasks arising from the Contract Documents.

7.14 *Hazard Communication Programs*

A. Contractor shall be responsible for coordinating any exchange of safety data sheets (formerly known as material safety data sheets) or other hazard communication information required to be made available to or exchanged between or among employers at the Site in accordance with Laws or Regulations.

7.15 *Emergencies*

A. In emergencies affecting the safety or protection of persons or the Work or property at the Site or adjacent thereto, Contractor is obligated to act to prevent damage, injury, or loss. Contractor shall give Engineer prompt written notice if Contractor believes that any significant changes in the Work or variations from the Contract Documents have been caused by an emergency, or are required as a result of Contractor's response to an emergency. If Engineer determines that a change in the Contract Documents is required because of an emergency or Contractor's response, a Work Change Directive or Change Order will be issued.

7.16 *Submittals*

A. *Shop Drawing and Sample Requirements*

1. Before submitting a Shop Drawing or Sample, Contractor shall:

a. review and coordinate the Shop Drawing or Sample with other Shop Drawings and Samples and with the requirements of the Work and the Contract Documents;

b. determine and verify:

1) all field measurements, quantities, dimensions, specified performance and design criteria, installation requirements, materials, catalog numbers, and similar information with respect to the Submittal;

2) the suitability of all materials and equipment offered with respect to the indicated application, fabrication, shipping, handling, storage, assembly, and installation pertaining to the performance of the Work; and

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

3) all information relative to Contractor's responsibilities for means, methods, techniques, sequences, and procedures of construction, and safety precautions and programs incident thereto;

c. confirm that the Submittal is complete with respect to all related data included in the Submittal.

2. Each Shop Drawing or Sample must bear a stamp or specific written certification that Contractor has satisfied Contractor's obligations under the Contract Documents with respect to Contractor's review of that Submittal, and that Contractor approves the Submittal.

3. With each Shop Drawing or Sample, Contractor shall give Engineer specific written notice of any variations that the Submittal may have from the requirements of the Contract Documents. This notice must be set forth in a written communication separate from the Submittal; and, in addition, in the case of a Shop Drawing by a specific notation made on the Shop Drawing itself.

B. *Submittal Procedures for Shop Drawings and Samples*: Contractor shall label and submit Shop Drawings and Samples to Engineer for review and approval in accordance with the accepted Schedule of Submittals.

1. *Shop Drawings*

a. Contractor shall submit the number of copies required in the Specifications.

b. Data shown on the Shop Drawings must be complete with respect to quantities, dimensions, specified performance and design criteria, materials, and similar data to show Engineer the services, materials, and equipment Contractor proposes to provide, and to enable Engineer to review the information for the limited purposes required by Paragraph 7.16.C.

2. *Samples*

a. Contractor shall submit the number of Samples required in the Specifications.

b. Contractor shall clearly identify each Sample as to material, Supplier, pertinent data such as catalog numbers, the use for which intended and other data as Engineer may require to enable Engineer to review the Submittal for the limited purposes required by Paragraph 7.16.C.

3. Where a Shop Drawing or Sample is required by the Contract Documents or the Schedule of Submittals, any related Work performed prior to Engineer's review and approval of the pertinent submittal will be at the sole expense and responsibility of Contractor.

C. *Engineer's Review of Shop Drawings and Samples*

1. Engineer will provide timely review of Shop Drawings and Samples in accordance with the accepted Schedule of Submittals. Engineer's review and approval will be only to determine if the items covered by the Submittals will, after installation or incorporation in the Work, comply with the requirements of the Contract Documents, and be compatible with the design concept of the completed Project as a functioning whole as indicated by the Contract Documents.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2. Engineer's review and approval will not extend to means, methods, techniques, sequences, or procedures of construction, or to safety precautions or programs incident thereto.

3. Engineer's review and approval of a separate item as such will not indicate approval of the assembly in which the item functions.

4. Engineer's review and approval of a Shop Drawing or Sample will not relieve Contractor from responsibility for any variation from the requirements of the Contract Documents unless Contractor has complied with the requirements of Paragraph 7.16.A.3 and Engineer has given written approval of each such variation by specific written notation thereof incorporated in or accompanying the Shop Drawing or Sample. Engineer will document any such approved variation from the requirements of the Contract Documents in a Field Order or other appropriate Contract modification.

5. Engineer's review and approval of a Shop Drawing or Sample will not relieve Contractor from responsibility for complying with the requirements of Paragraphs 7.16.A and B.

6. Engineer's review and approval of a Shop Drawing or Sample, or of a variation from the requirements of the Contract Documents, will not, under any circumstances, change the Contract Times or Contract Price, unless such changes are included in a Change Order.

7. Neither Engineer's receipt, review, acceptance, or approval of a Shop Drawing or Sample will result in such item becoming a Contract Document.

8. Contractor shall perform the Work in compliance with the requirements and commitments set forth in approved Shop Drawings and Samples, subject to the provisions of Paragraph 7.16.C.4.

D. *Resubmittal Procedures for Shop Drawings and Samples*

1. Contractor shall make corrections required by Engineer and shall return the required number of corrected copies of Shop Drawings and submit, as required, new Samples for review and approval. Contractor shall direct specific attention in writing to revisions other than the corrections called for by Engineer on previous Submittals.

2. Contractor shall furnish required Shop Drawing and Sample submittals with sufficient information and accuracy to obtain required approval of an item with no more than two resubmittals. Engineer will record Engineer's time for reviewing a third or subsequent resubmittal of a Shop Drawing or Sample, and Contractor shall be responsible for Engineer's charges to Owner for such time. Owner may impose a set-off against payments due Contractor to secure reimbursement for such charges.

3. If Contractor requests a change of a previously approved Shop Drawing or Sample, Contractor shall be responsible for Engineer's charges to Owner for its review time, and Owner may impose a set-off against payments due Contractor to secure reimbursement for such charges, unless the need for such change is beyond the control of Contractor.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

E. *Submittals Other than Shop Drawings, Samples, and Owner-Delegated Designs*

1. The following provisions apply to all Submittals other than Shop Drawings, Samples, and Owner-delegated designs:

a. Contractor shall submit all such Submittals to the Engineer in accordance with the Schedule of Submittals and pursuant to the applicable terms of the Contract Documents.

b. Engineer will provide timely review of all such Submittals in accordance with the Schedule of Submittals and return such Submittals with a notation of either Accepted or Not Accepted. Any such Submittal that is not returned within the time established in the Schedule of Submittals will be deemed accepted.

c. Engineer's review will be only to determine if the Submittal is acceptable under the requirements of the Contract Documents as to general form and content of the Submittal.

d. If any such Submittal is not accepted, Contractor shall confer with Engineer regarding the reason for the non-acceptance, and resubmit an acceptable document.

2. Procedures for the submittal and acceptance of the Progress Schedule, the Schedule of Submittals, and the Schedule of Values are set forth in Paragraphs 2.03. 2.04, and 2.05.

F. Owner-delegated Designs: Submittals pursuant to Owner-delegated designs are governed by the provisions of Paragraph 7.19.

7.17 *Contractor's General Warranty and Guarantee*

A. Contractor warrants and guarantees to Owner that all Work will be in accordance with the Contract Documents and will not be defective. Engineer is entitled to rely on Contractor's warranty and guarantee.

B. Owner's rights under this warranty and guarantee are in addition to, and are not limited by, Owner's rights under the correction period provisions of Paragraph 15.08. The time in which Owner may enforce its warranty and guarantee rights under this Paragraph 7.17 is limited only by applicable Laws and Regulations restricting actions to enforce such rights; provided, however, that after the end of the correction period under Paragraph 15.08:

1. Owner shall give Contractor written notice of any defective Work within 60 days of the discovery that such Work is defective; and

2. Such notice will be deemed the start of an event giving rise to a Claim under Paragraph 12.01.B, such that any related Claim must be brought within 30 days of the notice.

C. Contractor's warranty and guarantee hereunder excludes defects or damage caused by:

1. abuse, or improper modification, maintenance, or operation, by persons other than Contractor, Subcontractors, Suppliers, or any other individual or entity for whom Contractor is responsible; or

2. normal wear and tear under normal usage.

D. Contractor's obligation to perform and complete the Work in accordance with the Contract Documents is absolute. None of the following will constitute an acceptance of Work that is

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

not in accordance with the Contract Documents, a release of Contractor's obligation to perform the Work in accordance with the Contract Documents, or a release of Owner's warranty and guarantee rights under this Paragraph 7.17:

1. Observations by Engineer;
2. Recommendation by Engineer or payment by Owner of any progress or final payment;
3. The issuance of a certificate of Substantial Completion by Engineer or any payment related thereto by Owner;
4. Use or occupancy of the Work or any part thereof by Owner;
5. Any review and approval of a Shop Drawing or Sample submittal;
6. The issuance of a notice of acceptability by Engineer;
7. The end of the correction period established in Paragraph 15.08;
8. Any inspection, test, or approval by others; or
9. Any correction of defective Work by Owner.

E. If the Contract requires the Contractor to accept the assignment of a contract entered into by Owner, then the specific warranties, guarantees, and correction obligations contained in the assigned contract will govern with respect to Contractor's performance obligations to Owner for the Work described in the assigned contract.

7.18 *Indemnification*

A. To the fullest extent permitted by Laws and Regulations, and in addition to any other obligations of Contractor under the Contract or otherwise, Contractor shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them, from losses, damages, costs, and judgments (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals, and all court or arbitration or other dispute resolution costs) arising from third-party claims or actions relating to or resulting from the performance or furnishing of the Work, provided that any such claim, action, loss, cost, judgment or damage is attributable to bodily injury, sickness, disease, or death, or to damage to or destruction of tangible property (other than the Work itself), including the loss of use resulting therefrom, but only to the extent caused by any negligent act or omission of Contractor, any Subcontractor, any Supplier, or any individual or entity directly or indirectly employed by any of them to perform any of the Work, or anyone for whose acts any of them may be liable.

B. In any and all claims against Owner or Engineer, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, by any employee (or the survivor or personal representative of such employee) of Contractor, any Subcontractor, any Supplier, or any individual or entity directly or indirectly employed by any of them to perform any of the Work, or anyone for whose acts any of them may be liable, the indemnification obligation under Paragraph 7.18.A will not be limited in any way by any limitation on the amount or type of damages, compensation, or benefits payable by or for Contractor or any such Subcontractor, Supplier, or other individual or entity under workers' compensation acts, disability benefit acts, or other employee benefit acts.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

7.19 *Delegation of Professional Design Services*

A. Owner may require Contractor to provide professional design services for a portion of the Work by express delegation in the Contract Documents. Such delegation will specify the performance and design criteria that such services must satisfy, and the Submittals that Contractor must furnish to Engineer with respect to the Owner-delegated design.

B. Contractor shall cause such Owner-delegated professional design services to be provided pursuant to the professional standard of care by a properly licensed design professional, whose signature and seal must appear on all drawings, calculations, specifications, certifications, and Submittals prepared by such design professional. Such design professional must issue all certifications of design required by Laws and Regulations.

C. If a Shop Drawing or other Submittal related to the Owner-delegated design is prepared by Contractor, a Subcontractor, or others for submittal to Engineer, then such Shop Drawing or other Submittal must bear the written approval of Contractor's design professional when submitted by Contractor to Engineer.

D. Owner and Engineer shall be entitled to rely upon the adequacy, accuracy, and completeness of the services, certifications, and approvals performed or provided by the design professionals retained or employed by Contractor under an Owner-delegated design, subject to the professional standard of care and the performance and design criteria stated in the Contract Documents.

E. Pursuant to this Paragraph 7.19, Engineer's review, approval, and other determinations regarding design drawings, calculations, specifications, certifications, and other Submittals furnished by Contractor pursuant to an Owner-delegated design will be only for the following limited purposes:

1. Checking for conformance with the requirements of this Paragraph 7.19;

2. Confirming that Contractor (through its design professionals) has used the performance and design criteria specified in the Contract Documents; and

3. Establishing that the design furnished by Contractor is consistent with the design concept expressed in the Contract Documents.

F. Contractor shall not be responsible for the adequacy of performance or design criteria specified by Owner or Engineer.

G. Contractor is not required to provide professional services in violation of applicable Laws and Regulations.

ARTICLE 8—OTHER WORK AT THE SITE

8.01 *Other Work*

A. In addition to and apart from the Work under the Contract Documents, the Owner may perform other work at or adjacent to the Site. Such other work may be performed by Owner's employees, or through contracts between the Owner and third parties. Owner may also arrange to have third-party utility owners perform work on their utilities and facilities at or adjacent to the Site.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. If Owner performs other work at or adjacent to the Site with Owner's employees, or through contracts for such other work, then Owner shall give Contractor written notice thereof prior to starting any such other work. If Owner has advance information regarding the start of any third-party utility work that Owner has arranged to take place at or adjacent to the Site, Owner shall provide such information to Contractor.

C. Contractor shall afford proper and safe access to the Site to each contractor that performs such other work, each utility owner performing other work, and Owner, if Owner is performing other work with Owner's employees, and provide a reasonable opportunity for the introduction and storage of materials and equipment and the execution of such other work.

D. Contractor shall do all cutting, fitting, and patching of the Work that may be required to properly connect or otherwise make its several parts come together and properly integrate with such other work. Contractor shall not endanger any work of others by cutting, excavating, or otherwise altering such work; provided, however, that Contractor may cut or alter others' work with the written consent of Engineer and the others whose work will be affected.

E. If the proper execution or results of any part of Contractor's Work depends upon work performed by others, Contractor shall inspect such other work and promptly report to Engineer in writing any delays, defects, or deficiencies in such other work that render it unavailable or unsuitable for the proper execution and results of Contractor's Work. Contractor's failure to so report will constitute an acceptance of such other work as fit and proper for integration with Contractor's Work except for latent defects and deficiencies in such other work.

F. The provisions of this article are not applicable to work that is performed by third-party utilities or other third-party entities without a contract with Owner, or that is performed without having been arranged by Owner. If such work occurs, then any related delay, disruption, or interference incurred by Contractor is governed by the provisions of Paragraph 4.05.C.3.

8.02 *Coordination*

A. If Owner intends to contract with others for the performance of other work at or adjacent to the Site, to perform other work at or adjacent to the Site with Owner's employees, or to arrange to have utility owners perform work at or adjacent to the Site, the following will be set forth in the Supplementary Conditions or provided to Contractor prior to the start of any such other work:

1. The identity of the individual or entity that will have authority and responsibility for coordination of the activities among the various contractors;

2. An itemization of the specific matters to be covered by such authority and responsibility; and

3. The extent of such authority and responsibilities.

B. Unless otherwise provided in the Supplementary Conditions, Owner shall have sole authority and responsibility for such coordination.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

8.03 *Legal Relationships*

A. If, in the course of performing other work for Owner at or adjacent to the Site, the Owner's employees, any other contractor working for Owner, or any utility owner that Owner has arranged to perform work, causes damage to the Work or to the property of Contractor or its Subcontractors, or delays, disrupts, interferes with, or increases the scope or cost of the performance of the Work, through actions or inaction, then Contractor shall be entitled to an equitable adjustment in the Contract Price or the Contract Times. Contractor must submit any Change Proposal seeking an equitable adjustment in the Contract Price or the Contract Times under this paragraph within 30 days of the damaging, delaying, disrupting, or interfering event. The entitlement to, and extent of, any such equitable adjustment will take into account information (if any) regarding such other work that was provided to Contractor in the Contract Documents prior to the submittal of the Bid or the final negotiation of the terms of the Contract, and any remedies available to Contractor under Laws or Regulations concerning utility action or inaction. When applicable, any such equitable adjustment in Contract Price will be conditioned on Contractor assigning to Owner all Contractor's rights against such other contractor or utility owner with respect to the damage, delay, disruption, or interference that is the subject of the adjustment. Contractor's entitlement to an adjustment of the Contract Times or Contract Price is subject to the provisions of Paragraphs 4.05.D and 4.05.E.

B. Contractor shall take reasonable and customary measures to avoid damaging, delaying, disrupting, or interfering with the work of Owner, any other contractor, or any utility owner performing other work at or adjacent to the Site.

1. If Contractor fails to take such measures and as a result damages, delays, disrupts, or interferes with the work of any such other contractor or utility owner, then Owner may impose a set-off against payments due Contractor, and assign to such other contractor or utility owner the Owner's contractual rights against Contractor with respect to the breach of the obligations set forth in this Paragraph 8.03.B.

2. When Owner is performing other work at or adjacent to the Site with Owner's employees, Contractor shall be liable to Owner for damage to such other work, and for the reasonable direct delay, disruption, and interference costs incurred by Owner as a result of Contractor's failure to take reasonable and customary measures with respect to Owner's other work. In response to such damage, delay, disruption, or interference, Owner may impose a set-off against payments due Contractor.

C. If Contractor damages, delays, disrupts, or interferes with the work of any other contractor, or any utility owner performing other work at or adjacent to the Site, through Contractor's failure to take reasonable and customary measures to avoid such impacts, or if any claim arising out of Contractor's actions, inactions, or negligence in performance of the Work at or adjacent to the Site is made by any such other contractor or utility owner against Contractor, Owner, or Engineer, then Contractor shall (1) promptly attempt to settle the claim as to all parties through negotiations with such other contractor or utility owner, or otherwise resolve the claim by arbitration or other dispute resolution proceeding or at law, and (2) indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them from and against any such claims, and against all costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

arbitration or other dispute resolution costs) arising out of or relating to such damage, delay, disruption, or interference.

ARTICLE 9—OWNER'S RESPONSIBILITIES

9.01 *Communications to Contractor*

A. Except as otherwise provided in these General Conditions, Owner shall issue all communications to Contractor through Engineer.

9.02 *Replacement of Engineer*

A. Owner may at its discretion appoint an engineer to replace Engineer, provided Contractor makes no reasonable objection to the replacement engineer. The replacement engineer's status under the Contract Documents will be that of the former Engineer.

9.03 *Furnish Data*

A. Owner shall promptly furnish the data required of Owner under the Contract Documents.

9.04 *Pay When Due*

A. Owner shall make payments to Contractor when they are due as provided in the Agreement.

9.05 *Lands and Easements; Reports, Tests, and Drawings*

A. Owner's duties with respect to providing lands and easements are set forth in Paragraph 5.01.

B. Owner's duties with respect to providing engineering surveys to establish reference points are set forth in Paragraph 4.03.

C. Article 5 refers to Owner's identifying and making available to Contractor copies of reports of explorations and tests of conditions at the Site, and drawings of physical conditions relating to existing surface or subsurface structures at the Site.

9.06 *Insurance*

A. Owner's responsibilities, if any, with respect to purchasing and maintaining liability and property insurance are set forth in Article 6.

9.07 *Change Orders*

A. Owner's responsibilities with respect to Change Orders are set forth in Article 11.

9.08 *Inspections, Tests, and Approvals*

A. Owner's responsibility with respect to certain inspections, tests, and approvals is set forth in Paragraph 14.02.B.

9.09 *Limitations on Owner's Responsibilities*

A. The Owner shall not supervise, direct, or have control or authority over, nor be responsible for, Contractor's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of Contractor to comply with Laws and Regulations applicable to the performance of the Work. Owner will not be responsible for Contractor's failure to perform the Work in accordance with the Contract Documents.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

9.10 *Undisclosed Hazardous Environmental Condition*

A. Owner's responsibility in respect to an undisclosed Hazardous Environmental Condition is set forth in Paragraph 5.06.

9.11 *Evidence of Financial Arrangements*

A. Upon request of Contractor, Owner shall furnish Contractor reasonable evidence that financial arrangements have been made to satisfy Owner's obligations under the Contract (including obligations under proposed changes in the Work).

9.12 *Safety Programs*

A. While at the Site, Owner's employees and representatives shall comply with the specific applicable requirements of Contractor's safety programs of which Owner has been informed.

B. Owner shall furnish copies of any applicable Owner safety programs to Contractor.

ARTICLE 10—ENGINEER'S STATUS DURING CONSTRUCTION

10.01 *Owner's Representative*

A. Engineer will be Owner's representative during the construction period. The duties and responsibilities and the limitations of authority of Engineer as Owner's representative during construction are set forth in the Contract.

10.02 *Visits to Site*

A. Engineer will make visits to the Site at intervals appropriate to the various stages of construction as Engineer deems necessary in order to observe, as an experienced and qualified design professional, the progress that has been made and the quality of the various aspects of Contractor's executed Work. Based on information obtained during such visits and observations, Engineer, for the benefit of Owner, will determine, in general, if the Work is proceeding in accordance with the Contract Documents. Engineer will not be required to make exhaustive or continuous inspections on the Site to check the quality or quantity of the Work. Engineer's efforts will be directed toward providing for Owner a greater degree of confidence that the completed Work will conform generally to the Contract Documents. On the basis of such visits and observations, Engineer will keep Owner informed of the progress of the Work and will endeavor to guard Owner against defective Work.

B. Engineer's visits and observations are subject to all the limitations on Engineer's authority and responsibility set forth in Paragraph 10.07. Particularly, but without limitation, during or as a result of Engineer's visits or observations of Contractor's Work, Engineer will not supervise, direct, control, or have authority over or be responsible for Contractor's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of Contractor to comply with Laws and Regulations applicable to the performance of the Work.

10.03 *Resident Project Representative*

A. If Owner and Engineer have agreed that Engineer will furnish a Resident Project Representative to represent Engineer at the Site and assist Engineer in observing the progress and quality of the Work, then the authority and responsibilities of any such Resident Project Representative will be as provided in the Supplementary Conditions, and limitations on the

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

responsibilities thereof will be as provided in the Supplementary Conditions and in Paragraph 10.07.

B. If Owner designates an individual or entity who is not Engineer's consultant, agent, or employee to represent Owner at the Site, then the responsibilities and authority of such individual or entity will be as provided in the Supplementary Conditions.

10.04 *Engineer's Authority*

A. Engineer has the authority to reject Work in accordance with Article 14.

B. Engineer's authority as to Submittals is set forth in Paragraph 7.16.

C. Engineer's authority as to design drawings, calculations, specifications, certifications and other Submittals from Contractor in response to Owner's delegation (if any) to Contractor of professional design services, is set forth in Paragraph 7.19.

D. Engineer's authority as to changes in the Work is set forth in Article 11.

E. Engineer's authority as to Applications for Payment is set forth in Article 15.

10.05 *Determinations for Unit Price Work*

A. Engineer will determine the actual quantities and classifications of Unit Price Work performed by Contractor as set forth in Paragraph 13.03.

10.06 *Decisions on Requirements of Contract Documents and Acceptability of Work*

A. Engineer will render decisions regarding the requirements of the Contract Documents, and judge the acceptability of the Work, pursuant to the specific procedures set forth herein for initial interpretations, Change Proposals, and acceptance of the Work. In rendering such decisions and judgments, Engineer will not show partiality to Owner or Contractor, and will not be liable to Owner, Contractor, or others in connection with any proceedings, interpretations, decisions, or judgments conducted or rendered in good faith.

10.07 *Limitations on Engineer's Authority and Responsibilities*

A. Neither Engineer's authority or responsibility under this Article 10 or under any other provision of the Contract, nor any decision made by Engineer in good faith either to exercise or not exercise such authority or responsibility or the undertaking, exercise, or performance of any authority or responsibility by Engineer, will create, impose, or give rise to any duty in contract, tort, or otherwise owed by Engineer to Contractor, any Subcontractor, any Supplier, any other individual or entity, or to any surety for or employee or agent of any of them.

B. Engineer will not supervise, direct, control, or have authority over or be responsible for Contractor's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of Contractor to comply with Laws and Regulations applicable to the performance of the Work. Engineer will not be responsible for Contractor's failure to perform the Work in accordance with the Contract Documents.

C. Engineer will not be responsible for the acts or omissions of Contractor or of any Subcontractor, any Supplier, or of any other individual or entity performing any of the Work.

D. Engineer's review of the final Application for Payment and accompanying documentation, and all maintenance and operating instructions, schedules, guarantees, bonds, certificates of

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

inspection, tests and approvals, and other documentation required to be delivered by Contractor under Paragraph 15.06.A, will only be to determine generally that their content complies with the requirements of, and in the case of certificates of inspections, tests, and approvals, that the results certified indicate compliance with the Contract Documents.

E. The limitations upon authority and responsibility set forth in this Paragraph 10.07 also apply to the Resident Project Representative, if any.

10.08 *Compliance with Safety Program*

A. While at the Site, Engineer's employees and representatives will comply with the specific applicable requirements of Owner's and Contractor's safety programs of which Engineer has been informed.

ARTICLE 11—CHANGES TO THE CONTRACT

11.01 *Amending and Supplementing the Contract*

A. The Contract may be amended or supplemented by a Change Order, a Work Change Directive, or a Field Order.

B. If an amendment or supplement to the Contract includes a change in the Contract Price or the Contract Times, such amendment or supplement must be set forth in a Change Order.

C. All changes to the Contract that involve (1) the performance or acceptability of the Work, (2) the design (as set forth in the Drawings, Specifications, or otherwise), or (3) other engineering or technical matters, must be supported by Engineer's recommendation. Owner and Contractor may amend other terms and conditions of the Contract without the recommendation of the Engineer.

11.02 *Change Orders*

A. Owner and Contractor shall execute appropriate Change Orders covering:

1. Changes in Contract Price or Contract Times which are agreed to by the parties, including any undisputed sum or amount of time for Work actually performed in accordance with a Work Change Directive;

2. Changes in Contract Price resulting from an Owner set-off, unless Contractor has duly contested such set-off;

3. Changes in the Work which are: (a) ordered by Owner pursuant to Paragraph 11.05, (b) required because of Owner's acceptance of defective Work under Paragraph 14.04 or Owner's correction of defective Work under Paragraph 14.07, or (c) agreed to by the parties, subject to the need for Engineer's recommendation if the change in the Work involves the design (as set forth in the Drawings, Specifications, or otherwise) or other engineering or technical matters; and

4. Changes that embody the substance of any final and binding results under: Paragraph 11.03.B, resolving the impact of a Work Change Directive; Paragraph 11.09, concerning Change Proposals; Article 12, Claims; Paragraph 13.02.D, final adjustments resulting from allowances; Paragraph 13.03.D, final adjustments relating to determination of quantities for Unit Price Work; and similar provisions.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. If Owner or Contractor refuses to execute a Change Order that is required to be executed under the terms of Paragraph 11.02.A, it will be deemed to be of full force and effect, as if fully executed.

11.03 *Work Change Directives*

A. A Work Change Directive will not change the Contract Price or the Contract Times but is evidence that the parties expect that the modification ordered or documented by a Work Change Directive will be incorporated in a subsequently issued Change Order, following negotiations by the parties as to the Work Change Directive's effect, if any, on the Contract Price and Contract Times; or, if negotiations are unsuccessful, by a determination under the terms of the Contract Documents governing adjustments, expressly including Paragraph 11.07 regarding change of Contract Price.

B. If Owner has issued a Work Change Directive and:

1. Contractor believes that an adjustment in Contract Times or Contract Price is necessary, then Contractor shall submit any Change Proposal seeking such an adjustment no later than 30 days after the completion of the Work set out in the Work Change Directive.

2. Owner believes that an adjustment in Contract Times or Contract Price is necessary, then Owner shall submit any Claim seeking such an adjustment no later than 60 days after issuance of the Work Change Directive.

11.04 *Field Orders*

A. Engineer may authorize minor changes in the Work if the changes do not involve an adjustment in the Contract Price or the Contract Times and are compatible with the design concept of the completed Project as a functioning whole as indicated by the Contract Documents. Such changes will be accomplished by a Field Order and will be binding on Owner and also on Contractor, which shall perform the Work involved promptly.

B. If Contractor believes that a Field Order justifies an adjustment in the Contract Price or Contract Times, then before proceeding with the Work at issue, Contractor shall submit a Change Proposal as provided herein.

11.05 *Owner-Authorized Changes in the Work*

A. Without invalidating the Contract and without notice to any surety, Owner may, at any time or from time to time, order additions, deletions, or revisions in the Work. Changes involving the design (as set forth in the Drawings, Specifications, or otherwise) or other engineering or technical matters will be supported by Engineer's recommendation.

B. Such changes in the Work may be accomplished by a Change Order, if Owner and Contractor have agreed as to the effect, if any, of the changes on Contract Times or Contract Price; or by a Work Change Directive. Upon receipt of any such document, Contractor shall promptly proceed with the Work involved; or, in the case of a deletion in the Work, promptly cease construction activities with respect to such deleted Work. Added or revised Work must be performed under the applicable conditions of the Contract Documents.

C. Nothing in this Paragraph 11.05 obligates Contractor to undertake work that Contractor reasonably concludes cannot be performed in a manner consistent with Contractor's safety obligations under the Contract Documents or Laws and Regulations.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

11.06 *Unauthorized Changes in the Work*

A. Contractor shall not be entitled to an increase in the Contract Price or an extension of the Contract Times with respect to any work performed that is not required by the Contract Documents, as amended, modified, or supplemented, except in the case of an emergency as provided in Paragraph 7.15 or in the case of uncovering Work as provided in Paragraph 14.05.C.2.

11.07 *Change of Contract Price*

A. The Contract Price may only be changed by a Change Order. Any Change Proposal for an adjustment in the Contract Price must comply with the provisions of Paragraph 11.09. Any Claim for an adjustment of Contract Price must comply with the provisions of Article 12.

B. An adjustment in the Contract Price will be determined as follows:

1. Where the Work involved is covered by unit prices contained in the Contract Documents, then by application of such unit prices to the quantities of the items involved (subject to the provisions of Paragraph 13.03);

2. Where the Work involved is not covered by unit prices contained in the Contract Documents, then by a mutually agreed lump sum (which may include an allowance for overhead and profit not necessarily in accordance with Paragraph 11.07.C.2); or

3. Where the Work involved is not covered by unit prices contained in the Contract Documents and the parties do not reach mutual agreement to a lump sum, then on the basis of the Cost of the Work (determined as provided in Paragraph 13.01) plus a Contractor's fee for overhead and profit (determined as provided in Paragraph 11.07.C).

C. *Contractor's Fee*: When applicable, the Contractor's fee for overhead and profit will be determined as follows:

1. A mutually acceptable fixed fee; or

2. If a fixed fee is not agreed upon, then a fee based on the following percentages of the various portions of the Cost of the Work:

a. For costs incurred under Paragraphs 13.01.B.1 and 13.01.B.2, the Contractor's fee will be 15 percent;

b. For costs incurred under Paragraph 13.01.B.3, the Contractor's fee will be 5 percent;

c. Where one or more tiers of subcontracts are on the basis of Cost of the Work plus a fee and no fixed fee is agreed upon, the intent of Paragraphs 11.07.C.2.a and 11.07.C.2.b is that the Contractor's fee will be based on: (1) a fee of 15 percent of the costs incurred under Paragraphs 13.01.B.1 and 13.01.B.2 by the Subcontractor that actually performs the Work, at whatever tier, and (2) with respect to Contractor itself and to any Subcontractors of a tier higher than that of the Subcontractor that actually performs the Work, a fee of 5 percent of the amount (fee plus underlying costs incurred) attributable to the next lower tier Subcontractor; provided, however, that for any such subcontracted Work the maximum total fee to be paid by Owner will be no greater than 27 percent of the costs incurred by the Subcontractor that actually performs the Work;

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

d. No fee will be payable on the basis of costs itemized under Paragraphs 13.01.B.4, 13.01.B.5, and 13.01.C;

e. The amount of credit to be allowed by Contractor to Owner for any change which results in a net decrease in Cost of the Work will be the amount of the actual net decrease in Cost of the Work and a deduction of an additional amount equal to 5 percent of such actual net decrease in Cost of the Work; and

f. When both additions and credits are involved in any one change or Change Proposal, the adjustment in Contractor's fee will be computed by determining the sum of the costs in each of the cost categories in Paragraph 13.01.B (specifically, payroll costs, Paragraph 13.01.B.1; incorporated materials and equipment costs, Paragraph 13.01.B.2; Subcontract costs, Paragraph 13.01.B.3; special consultants costs, Paragraph 13.01.B.4; and other costs, Paragraph 13.01.B.5) and applying to each such cost category sum the appropriate fee from Paragraphs 11.07.C.2.a through 11.07.C.2.e, inclusive.

11.08 *Change of Contract Times*

A. The Contract Times may only be changed by a Change Order. Any Change Proposal for an adjustment in the Contract Times must comply with the provisions of Paragraph 11.09. Any Claim for an adjustment in the Contract Times must comply with the provisions of Article 12.

B. Delay, disruption, and interference in the Work, and any related changes in Contract Times, are addressed in and governed by Paragraph 4.05.

11.09 *Change Proposals*

A. *Purpose and Content*: Contractor shall submit a Change Proposal to Engineer to request an adjustment in the Contract Times or Contract Price; contest an initial decision by Engineer concerning the requirements of the Contract Documents or relating to the acceptability of the Work under the Contract Documents; challenge a set-off against payment due; or seek other relief under the Contract. The Change Proposal will specify any proposed change in Contract Times or Contract Price, or other proposed relief, and explain the reason for the proposed change, with citations to any governing or applicable provisions of the Contract Documents. Each Change Proposal will address only one issue, or a set of closely related issues.

B. *Change Proposal Procedures*

1. *Submittal*: Contractor shall submit each Change Proposal to Engineer within 30 days after the start of the event giving rise thereto, or after such initial decision.

2. *Supporting Data*: The Contractor shall submit supporting data, including the proposed change in Contract Price or Contract Time (if any), to the Engineer and Owner within 15 days after the submittal of the Change Proposal.

a. Change Proposals based on or related to delay, interruption, or interference must comply with the provisions of Paragraphs 4.05.D and 4.05.E.

b. Change proposals related to a change of Contract Price must include full and detailed accounts of materials incorporated into the Work and labor and equipment used for the subject Work.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

The supporting data must be accompanied by a written statement that the supporting data are accurate and complete, and that any requested time or price adjustment is the entire adjustment to which Contractor believes it is entitled as a result of said event.

3. *Engineer's Initial Review*: Engineer will advise Owner regarding the Change Proposal, and consider any comments or response from Owner regarding the Change Proposal. If in its discretion Engineer concludes that additional supporting data is needed before conducting a full review and making a decision regarding the Change Proposal, then Engineer may request that Contractor submit such additional supporting data by a date specified by Engineer, prior to Engineer beginning its full review of the Change Proposal.

4. *Engineer's Full Review and Action on the Change Proposal*: Upon receipt of Contractor's supporting data (including any additional data requested by Engineer), Engineer will conduct a full review of each Change Proposal and, within 30 days after such receipt of the Contractor's supporting data, either approve the Change Proposal in whole, deny it in whole, or approve it in part and deny it in part. Such actions must be in writing, with a copy provided to Owner and Contractor. If Engineer does not take action on the Change Proposal within 30 days, then either Owner or Contractor may at any time thereafter submit a letter to the other party indicating that as a result of Engineer's inaction the Change Proposal is deemed denied, thereby commencing the time for appeal of the denial under Article 12.

5. *Binding Decision*: Engineer's decision is final and binding upon Owner and Contractor, unless Owner or Contractor appeals the decision by filing a Claim under Article 12.

C. *Resolution of Certain Change Proposals*: If the Change Proposal does not involve the design (as set forth in the Drawings, Specifications, or otherwise), the acceptability of the Work, or other engineering or technical matters, then Engineer will notify the parties in writing that the Engineer is unable to resolve the Change Proposal. For purposes of further resolution of such a Change Proposal, such notice will be deemed a denial, and Contractor may choose to seek resolution under the terms of Article 12.

D. *Post-Completion*: Contractor shall not submit any Change Proposals after Engineer issues a written recommendation of final payment pursuant to Paragraph 15.06.B.

11.10 *Notification to Surety*

A. If the provisions of any bond require notice to be given to a surety of any change affecting the general scope of the Work or the provisions of the Contract Documents (including, but not limited to, Contract Price or Contract Times), the giving of any such notice will be Contractor's responsibility. The amount of each applicable bond will be adjusted to reflect the effect of any such change.

ARTICLE 12—CLAIMS

12.01 *Claims*

A. *Claims Process*: The following disputes between Owner and Contractor are subject to the Claims process set forth in this article:

1. Appeals by Owner or Contractor of Engineer's decisions regarding Change Proposals;

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2. Owner demands for adjustments in the Contract Price or Contract Times, or other relief under the Contract Documents;

3. Disputes that Engineer has been unable to address because they do not involve the design (as set forth in the Drawings, Specifications, or otherwise), the acceptability of the Work, or other engineering or technical matters; and

4. Subject to the waiver provisions of Paragraph 15.07, any dispute arising after Engineer has issued a written recommendation of final payment pursuant to Paragraph 15.06.B.

B. *Submittal of Claim*: The party submitting a Claim shall deliver it directly to the other party to the Contract promptly (but in no event later than 30 days) after the start of the event giving rise thereto; in the case of appeals regarding Change Proposals within 30 days of the decision under appeal. The party submitting the Claim shall also furnish a copy to the Engineer, for its information only. The responsibility to substantiate a Claim rests with the party making the Claim. In the case of a Claim by Contractor seeking an increase in the Contract Times or Contract Price, Contractor shall certify that the Claim is made in good faith, that the supporting data are accurate and complete, and that to the best of Contractor's knowledge and belief the amount of time or money requested accurately reflects the full amount to which Contractor is entitled.

C. *Review and Resolution*: The party receiving a Claim shall review it thoroughly, giving full consideration to its merits. The two parties shall seek to resolve the Claim through the exchange of information and direct negotiations. The parties may extend the time for resolving the Claim by mutual agreement. All actions taken on a Claim will be stated in writing and submitted to the other party, with a copy to Engineer.

D. *Mediation*

1. At any time after initiation of a Claim, Owner and Contractor may mutually agree to mediation of the underlying dispute. The agreement to mediate will stay the Claim submittal and response process.

2. If Owner and Contractor agree to mediation, then after 60 days from such agreement, either Owner or Contractor may unilaterally terminate the mediation process, and the Claim submittal and decision process will resume as of the date of the termination. If the mediation proceeds but is unsuccessful in resolving the dispute, the Claim submittal and decision process will resume as of the date of the conclusion of the mediation, as determined by the mediator.

3. Owner and Contractor shall each pay one-half of the mediator's fees and costs.

E. *Partial Approval*: If the party receiving a Claim approves the Claim in part and denies it in part, such action will be final and binding unless within 30 days of such action the other party invokes the procedure set forth in Article 17 for final resolution of disputes.

F. *Denial of Claim*: If efforts to resolve a Claim are not successful, the party receiving the Claim may deny it by giving written notice of denial to the other party. If the receiving party does not take action on the Claim within 90 days, then either Owner or Contractor may at any time thereafter submit a letter to the other party indicating that as a result of the inaction, the Claim is deemed denied, thereby commencing the time for appeal of the denial. A denial of the Claim will be final and binding unless within 30 days of the denial the other party invokes the procedure set forth in Article 17 for the final resolution of disputes.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

G. *Final and Binding Results*: If the parties reach a mutual agreement regarding a Claim, whether through approval of the Claim, direct negotiations, mediation, or otherwise; or if a Claim is approved in part and denied in part, or denied in full, and such actions become final and binding; then the results of the agreement or action on the Claim will be incorporated in a Change Order or other written document to the extent they affect the Contract, including the Work, the Contract Times, or the Contract Price.

ARTICLE 13—COST OF THE WORK; ALLOWANCES; UNIT PRICE WORK

13.01 *Cost of the Work*

A. *Purposes for Determination of Cost of the Work*: The term Cost of the Work means the sum of all costs necessary for the proper performance of the Work at issue, as further defined below. The provisions of this Paragraph 13.01 are used for two distinct purposes:

1. To determine Cost of the Work when Cost of the Work is a component of the Contract Price, under cost-plus-fee, time-and-materials, or other cost-based terms; or

2. When needed to determine the value of a Change Order, Change Proposal, Claim, set-off, or other adjustment in Contract Price. When the value of any such adjustment is determined on the basis of Cost of the Work, Contractor is entitled only to those additional or incremental costs required because of the change in the Work or because of the event giving rise to the adjustment.

B. *Costs Included*: Except as otherwise may be agreed to in writing by Owner, costs included in the Cost of the Work will be in amounts no higher than those commonly incurred in the locality of the Project, will not include any of the costs itemized in Paragraph 13.01.C, and will include only the following items:

1. Payroll costs for employees in the direct employ of Contractor in the performance of the Work under schedules of job classifications agreed upon by Owner and Contractor in advance of the subject Work. Such employees include, without limitation, superintendents, foremen, safety managers, safety representatives, and other personnel employed full time on the Work. Payroll costs for employees not employed full time on the Work will be apportioned on the basis of their time spent on the Work. Payroll costs include, but are not limited to, salaries and wages plus the cost of fringe benefits, which include social security contributions, unemployment, excise, and payroll taxes, workers' compensation, health and retirement benefits, sick leave, and vacation and holiday pay applicable thereto. The expenses of performing Work outside of regular working hours, on Saturday, Sunday, or legal holidays, will be included in the above to the extent authorized by Owner.

2. Cost of all materials and equipment furnished and incorporated in the Work, including costs of transportation and storage thereof, and Suppliers' field services required in connection therewith. All cash discounts accrue to Contractor unless Owner deposits funds with Contractor with which to make payments, in which case the cash discounts will accrue to Owner. All trade discounts, rebates, and refunds and returns from sale of surplus materials and equipment will accrue to Owner, and Contractor shall make provisions so that they may be obtained.

3. Payments made by Contractor to Subcontractors for Work performed by Subcontractors. If required by Owner, Contractor shall obtain competitive bids from subcontractors

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

acceptable to Owner and Contractor and shall deliver such bids to Owner, which will then determine, with the advice of Engineer, which bids, if any, will be acceptable. If any subcontract provides that the Subcontractor is to be paid on the basis of Cost of the Work plus a fee, the Subcontractor's Cost of the Work and fee will be determined in the same manner as Contractor's Cost of the Work and fee as provided in this Paragraph 13.01.

4. Costs of special consultants (including but not limited to engineers, architects, testing laboratories, surveyors, attorneys, and accountants) employed or retained for services specifically related to the Work.

5. Other costs consisting of the following:

    a. The proportion of necessary transportation, travel, and subsistence expenses of Contractor's employees incurred in discharge of duties connected with the Work.

    b. Cost, including transportation and maintenance, of all materials, supplies, equipment, machinery, appliances, office, and temporary facilities at the Site, which are consumed in the performance of the Work, and cost, less market value, of such items used but not consumed which remain the property of Contractor.

        1) In establishing included costs for materials such as scaffolding, plating, or sheeting, consideration will be given to the actual or the estimated life of the material for use on other projects; or rental rates may be established on the basis of purchase or salvage value of such items, whichever is less. Contractor will not be eligible for compensation for such items in an amount that exceeds the purchase cost of such item.

    c. *Construction Equipment Rental*

        1) Rentals of all construction equipment and machinery, and the parts thereof, in accordance with rental agreements approved by Owner as to price (including any surcharge or special rates applicable to overtime use of the construction equipment or machinery), and the costs of transportation, loading, unloading, assembly, dismantling, and removal thereof. All such costs will be in accordance with the terms of said rental agreements. The rental of any such equipment, machinery, or parts must cease when the use thereof is no longer necessary for the Work.

        2) Costs for equipment and machinery owned by Contractor or a Contractor-related entity will be paid at a rate shown for such equipment in the equipment rental rate book specified in the Supplementary Conditions. An hourly rate will be computed by dividing the monthly rates by 176. These computed rates will include all operating costs.

        3) With respect to Work that is the result of a Change Order, Change Proposal, Claim, set-off, or other adjustment in Contract Price ("changed Work"), included costs will be based on the time the equipment or machinery is in use on the changed Work and the costs of transportation, loading, unloading, assembly, dismantling, and removal when directly attributable to the changed Work. The cost of any such equipment or machinery, or parts thereof, must cease to accrue when the use thereof is no longer necessary for the changed Work.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

d. Sales, consumer, use, and other similar taxes related to the Work, and for which Contractor is liable, as imposed by Laws and Regulations.

e. Deposits lost for causes other than negligence of Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable, and royalty payments and fees for permits and licenses.

f. Losses and damages (and related expenses) caused by damage to the Work, not compensated by insurance or otherwise, sustained by Contractor in connection with the performance of the Work (except losses and damages within the deductible amounts of builder's risk or other property insurance established in accordance with Paragraph 6.04), provided such losses and damages have resulted from causes other than the negligence of Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable. Such losses include settlements made with the written consent and approval of Owner. No such losses, damages, and expenses will be included in the Cost of the Work for the purpose of determining Contractor's fee.

g. The cost of utilities, fuel, and sanitary facilities at the Site.

h. Minor expenses such as communication service at the Site, express and courier services, and similar petty cash items in connection with the Work.

i. The costs of premiums for all bonds and insurance that Contractor is required by the Contract Documents to purchase and maintain.

C. *Costs Excluded*: The term Cost of the Work does not include any of the following items:

1. Payroll costs and other compensation of Contractor's officers, executives, principals, general managers, engineers, architects, estimators, attorneys, auditors, accountants, purchasing and contracting agents, expediters, timekeepers, clerks, and other personnel employed by Contractor, whether at the Site or in Contractor's principal or branch office for general administration of the Work and not specifically included in the agreed upon schedule of job classifications referred to in Paragraph 13.01.B.1 or specifically covered by Paragraph 13.01.B.4. The payroll costs and other compensation excluded here are to be considered administrative costs covered by the Contractor's fee.

2. The cost of purchasing, renting, or furnishing small tools and hand tools.

3. Expenses of Contractor's principal and branch offices other than Contractor's office at the Site.

4. Any part of Contractor's capital expenses, including interest on Contractor's capital employed for the Work and charges against Contractor for delinquent payments.

5. Costs due to the negligence of Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable, including but not limited to, the correction of defective Work, disposal of materials or equipment wrongly supplied, and making good any damage to property.

6. Expenses incurred in preparing and advancing Claims.

7. Other overhead or general expense costs of any kind and the costs of any item not specifically and expressly included in Paragraph 13.01.B.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

D. *Contractor's Fee*

1. When the Work as a whole is performed on the basis of cost-plus-a-fee, then:

a. Contractor's fee for the Work set forth in the Contract Documents as of the Effective Date of the Contract will be determined as set forth in the Agreement.

b. for any Work covered by a Change Order, Change Proposal, Claim, set-off, or other adjustment in Contract Price on the basis of Cost of the Work, Contractor's fee will be determined as follows:

1) When the fee for the Work as a whole is a percentage of the Cost of the Work, the fee will automatically adjust as the Cost of the Work changes.

2) When the fee for the Work as a whole is a fixed fee, the fee for any additions or deletions will be determined in accordance with Paragraph 11.07.C.2.

2. When the Work as a whole is performed on the basis of a stipulated sum, or any other basis other than cost-plus-a-fee, then Contractor's fee for any Work covered by a Change Order, Change Proposal, Claim, set-off, or other adjustment in Contract Price on the basis of Cost of the Work will be determined in accordance with Paragraph 11.07.C.2.

E. *Documentation and Audit*: Whenever the Cost of the Work for any purpose is to be determined pursuant to this Article 13, Contractor and pertinent Subcontractors will establish and maintain records of the costs in accordance with generally accepted accounting practices. Subject to prior written notice, Owner will be afforded reasonable access, during normal business hours, to all Contractor's accounts, records, books, correspondence, instructions, drawings, receipts, vouchers, memoranda, and similar data relating to the Cost of the Work and Contractor's fee. Contractor shall preserve all such documents for a period of three years after the final payment by Owner. Pertinent Subcontractors will afford such access to Owner, and preserve such documents, to the same extent required of Contractor.

13.02 *Allowances*

A. It is understood that Contractor has included in the Contract Price all allowances so named in the Contract Documents and shall cause the Work so covered to be performed for such sums and by such persons or entities as may be acceptable to Owner and Engineer.

B. *Cash Allowances*: Contractor agrees that:

1. the cash allowances include the cost to Contractor (less any applicable trade discounts) of materials and equipment required by the allowances to be delivered at the Site, and all applicable taxes; and

2. Contractor's costs for unloading and handling on the Site, labor, installation, overhead, profit, and other expenses contemplated for the cash allowances have been included in the Contract Price and not in the allowances, and no demand for additional payment for any of the foregoing will be valid.

C. *Owner's Contingency Allowance*: Contractor agrees that an Owner's contingency allowance, if any, is for the sole use of Owner to cover unanticipated costs.

D. Prior to final payment, an appropriate Change Order will be issued as recommended by Engineer to reflect actual amounts due Contractor for Work covered by allowances, and the Contract Price will be correspondingly adjusted.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

13.03 *Unit Price Work*

A. Where the Contract Documents provide that all or part of the Work is to be Unit Price Work, initially the Contract Price will be deemed to include for all Unit Price Work an amount equal to the sum of the unit price for each separately identified item of Unit Price Work times the estimated quantity of each item as indicated in the Agreement.

B. The estimated quantities of items of Unit Price Work are not guaranteed and are solely for the purpose of comparison of Bids and determining an initial Contract Price. Payments to Contractor for Unit Price Work will be based on actual quantities.

C. Each unit price will be deemed to include an amount considered by Contractor to be adequate to cover Contractor's overhead and profit for each separately identified item.

D. Engineer will determine the actual quantities and classifications of Unit Price Work performed by Contractor. Engineer will review with Contractor the Engineer's preliminary determinations on such matters before rendering a written decision thereon (by recommendation of an Application for Payment or otherwise). Engineer's written decision thereon will be final and binding (except as modified by Engineer to reflect changed factual conditions or more accurate data) upon Owner and Contractor, and the final adjustment of Contract Price will be set forth in a Change Order, subject to the provisions of the following paragraph.

E. *Adjustments in Unit Price*

1. Contractor or Owner shall be entitled to an adjustment in the unit price with respect to an item of Unit Price Work if:

a. the quantity of the item of Unit Price Work performed by Contractor differs materially and significantly from the estimated quantity of such item indicated in the Agreement; and

b. Contractor's unit costs to perform the item of Unit Price Work have changed materially and significantly as a result of the quantity change.

2. The adjustment in unit price will account for and be coordinated with any related changes in quantities of other items of Work, and in Contractor's costs to perform such other Work, such that the resulting overall change in Contract Price is equitable to Owner and Contractor.

3. Adjusted unit prices will apply to all units of that item.

ARTICLE 14—TESTS AND INSPECTIONS; CORRECTION, REMOVAL, OR ACCEPTANCE OF DEFECTIVE WORK

14.01 *Access to Work*

A. Owner, Engineer, their consultants and other representatives and personnel of Owner, independent testing laboratories, and authorities having jurisdiction have access to the Site and the Work at reasonable times for their observation, inspection, and testing. Contractor shall provide them proper and safe conditions for such access and advise them of Contractor's safety procedures and programs so that they may comply with such procedures and programs as applicable.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

14.02 *Tests, Inspections, and Approvals*

A. Contractor shall give Engineer timely notice of readiness of the Work (or specific parts thereof) for all required inspections and tests, and shall cooperate with inspection and testing personnel to facilitate required inspections and tests.

B. Owner shall retain and pay for the services of an independent inspector, testing laboratory, or other qualified individual or entity to perform all inspections and tests expressly required by the Contract Documents to be furnished and paid for by Owner, except that costs incurred in connection with tests or inspections of covered Work will be governed by the provisions of Paragraph 14.05.

C. If Laws or Regulations of any public body having jurisdiction require any Work (or part thereof) specifically to be inspected, tested, or approved by an employee or other representative of such public body, Contractor shall assume full responsibility for arranging and obtaining such inspections, tests, or approvals, pay all costs in connection therewith, and furnish Engineer the required certificates of inspection or approval.

D. Contractor shall be responsible for arranging, obtaining, and paying for all inspections and tests required:

1. by the Contract Documents, unless the Contract Documents expressly allocate responsibility for a specific inspection or test to Owner;

2. to attain Owner's and Engineer's acceptance of materials or equipment to be incorporated in the Work;

3. by manufacturers of equipment furnished under the Contract Documents;

4. for testing, adjusting, and balancing of mechanical, electrical, and other equipment to be incorporated into the Work; and

5. for acceptance of materials, mix designs, or equipment submitted for approval prior to Contractor's purchase thereof for incorporation in the Work.

Such inspections and tests will be performed by independent inspectors, testing laboratories, or other qualified individuals or entities acceptable to Owner and Engineer.

E. If the Contract Documents require the Work (or part thereof) to be approved by Owner, Engineer, or another designated individual or entity, then Contractor shall assume full responsibility for arranging and obtaining such approvals.

F. If any Work (or the work of others) that is to be inspected, tested, or approved is covered by Contractor without written concurrence of Engineer, Contractor shall, if requested by Engineer, uncover such Work for observation. Such uncovering will be at Contractor's expense unless Contractor had given Engineer timely notice of Contractor's intention to cover the same and Engineer had not acted with reasonable promptness in response to such notice.

14.03 *Defective Work*

A. *Contractor's Obligation*: It is Contractor's obligation to assure that the Work is not defective.

B. *Engineer's Authority*: Engineer has the authority to determine whether Work is defective, and to reject defective Work.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

C. *Notice of Defects*: Prompt written notice of all defective Work of which Owner or Engineer has actual knowledge will be given to Contractor.

D. *Correction, or Removal and Replacement*: Promptly after receipt of written notice of defective Work, Contractor shall correct all such defective Work, whether or not fabricated, installed, or completed, or, if Engineer has rejected the defective Work, remove it from the Project and replace it with Work that is not defective.

E. *Preservation of Warranties*: When correcting defective Work, Contractor shall take no action that would void or otherwise impair Owner's special warranty and guarantee, if any, on said Work.

F. *Costs and Damages*: In addition to its correction, removal, and replacement obligations with respect to defective Work, Contractor shall pay all claims, costs, losses, and damages arising out of or relating to defective Work, including but not limited to the cost of the inspection, testing, correction, removal, replacement, or reconstruction of such defective Work, fines levied against Owner by governmental authorities because the Work is defective, and the costs of repair or replacement of work of others resulting from defective Work. Prior to final payment, if Owner and Contractor are unable to agree as to the measure of such claims, costs, losses, and damages resulting from defective Work, then Owner may impose a reasonable set-off against payments due under Article 15.

14.04 *Acceptance of Defective Work*

A. If, instead of requiring correction or removal and replacement of defective Work, Owner prefers to accept it, Owner may do so (subject, if such acceptance occurs prior to final payment, to Engineer's confirmation that such acceptance is in general accord with the design intent and applicable engineering principles, and will not endanger public safety). Contractor shall pay all claims, costs, losses, and damages attributable to Owner's evaluation of and determination to accept such defective Work (such costs to be approved by Engineer as to reasonableness), and for the diminished value of the Work to the extent not otherwise paid by Contractor. If any such acceptance occurs prior to final payment, the necessary revisions in the Contract Documents with respect to the Work will be incorporated in a Change Order. If the parties are unable to agree as to the decrease in the Contract Price, reflecting the diminished value of Work so accepted, then Owner may impose a reasonable set-off against payments due under Article 15. If the acceptance of defective Work occurs after final payment, Contractor shall pay an appropriate amount to Owner.

14.05 *Uncovering Work*

A. Engineer has the authority to require additional inspection or testing of the Work, whether or not the Work is fabricated, installed, or completed.

B. If any Work is covered contrary to the written request of Engineer, then Contractor shall, if requested by Engineer, uncover such Work for Engineer's observation, and then replace the covering, all at Contractor's expense.

C. If Engineer considers it necessary or advisable that covered Work be observed by Engineer or inspected or tested by others, then Contractor, at Engineer's request, shall uncover, expose, or otherwise make available for observation, inspection, or testing as Engineer may require, that portion of the Work in question, and provide all necessary labor, material, and equipment.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. If it is found that the uncovered Work is defective, Contractor shall be responsible for all claims, costs, losses, and damages arising out of or relating to such uncovering, exposure, observation, inspection, and testing, and of satisfactory replacement or reconstruction (including but not limited to all costs of repair or replacement of work of others); and pending Contractor's full discharge of this responsibility the Owner shall be entitled to impose a reasonable set-off against payments due under Article 15.
2. If the uncovered Work is not found to be defective, Contractor shall be allowed an increase in the Contract Price or an extension of the Contract Times, directly attributable to such uncovering, exposure, observation, inspection, testing, replacement, and reconstruction. If the parties are unable to agree as to the amount or extent thereof, then Contractor may submit a Change Proposal within 30 days of the determination that the Work is not defective.

14.06 *Owner May Stop the Work*

A. If the Work is defective, or Contractor fails to supply sufficient skilled workers or suitable materials or equipment, or fails to perform the Work in such a way that the completed Work will conform to the Contract Documents, then Owner may order Contractor to stop the Work, or any portion thereof, until the cause for such order has been eliminated; however, this right of Owner to stop the Work will not give rise to any duty on the part of Owner to exercise this right for the benefit of Contractor, any Subcontractor, any Supplier, any other individual or entity, or any surety for, or employee or agent of any of them.

14.07 *Owner May Correct Defective Work*

A. If Contractor fails within a reasonable time after written notice from Engineer to correct defective Work, or to remove and replace defective Work as required by Engineer, then Owner may, after 7 days' written notice to Contractor, correct or remedy any such deficiency.

B. In exercising the rights and remedies under this Paragraph 14.07, Owner shall proceed expeditiously. In connection with such corrective or remedial action, Owner may exclude Contractor from all or part of the Site, take possession of all or part of the Work and suspend Contractor's services related thereto, and incorporate in the Work all materials and equipment stored at the Site or for which Owner has paid Contractor but which are stored elsewhere. Contractor shall allow Owner, Owner's representatives, agents and employees, Owner's other contractors, and Engineer and Engineer's consultants access to the Site to enable Owner to exercise the rights and remedies under this paragraph.

C. All claims, costs, losses, and damages incurred or sustained by Owner in exercising the rights and remedies under this Paragraph 14.07 will be charged against Contractor as set-offs against payments due under Article 15. Such claims, costs, losses and damages will include but not be limited to all costs of repair, or replacement of work of others destroyed or damaged by correction, removal, or replacement of Contractor's defective Work.

D. Contractor shall not be allowed an extension of the Contract Times because of any delay in the performance of the Work attributable to the exercise by Owner of Owner's rights and remedies under this Paragraph 14.07.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 15—PAYMENTS TO CONTRACTOR; SET-OFFS; COMPLETION; CORRECTION PERIOD

15.01 *Progress Payments*

A. *Basis for Progress Payments*: The Schedule of Values established as provided in Article 2 will serve as the basis for progress payments and will be incorporated into a form of Application for Payment acceptable to Engineer. Progress payments for Unit Price Work will be based on the number of units completed during the pay period, as determined under the provisions of Paragraph 13.03. Progress payments for cost-based Work will be based on Cost of the Work completed by Contractor during the pay period.

B. *Applications for Payments*

1. At least 20 days before the date established in the Agreement for each progress payment (but not more often than once a month), Contractor shall submit to Engineer for review an Application for Payment filled out and signed by Contractor covering the Work completed as of the date of the Application and accompanied by such supporting documentation as is required by the Contract Documents.

2. If payment is requested on the basis of materials and equipment not incorporated in the Work but delivered and suitably stored at the Site or at another location agreed to in writing, the Application for Payment must also be accompanied by: (a) a bill of sale, invoice, copies of subcontract or purchase order payments, or other documentation establishing full payment by Contractor for the materials and equipment; (b) at Owner's request, documentation warranting that Owner has received the materials and equipment free and clear of all Liens; and (c) evidence that the materials and equipment are covered by appropriate property insurance, a warehouse bond, or other arrangements to protect Owner's interest therein, all of which must be satisfactory to Owner.

3. Beginning with the second Application for Payment, each Application must include an affidavit of Contractor stating that all previous progress payments received by Contractor have been applied to discharge Contractor's legitimate obligations associated with prior Applications for Payment.

4. The amount of retainage with respect to progress payments will be as stipulated in the Agreement.

C. *Review of Applications*

1. Engineer will, within 10 days after receipt of each Application for Payment, including each resubmittal, either indicate in writing a recommendation of payment and present the Application to Owner, or return the Application to Contractor indicating in writing Engineer's reasons for refusing to recommend payment. In the latter case, Contractor may make the necessary corrections and resubmit the Application.

2. Engineer's recommendation of any payment requested in an Application for Payment will constitute a representation by Engineer to Owner, based on Engineer's observations of the executed Work as an experienced and qualified design professional, and on Engineer's review of the Application for Payment and the accompanying data and schedules, that to the best of Engineer's knowledge, information and belief:

a. the Work has progressed to the point indicated;

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

b. the quality of the Work is generally in accordance with the Contract Documents (subject to an evaluation of the Work as a functioning whole prior to or upon Substantial Completion, the results of any subsequent tests called for in the Contract Documents, a final determination of quantities and classifications for Unit Price Work under Paragraph 13.03, and any other qualifications stated in the recommendation); and

c. the conditions precedent to Contractor's being entitled to such payment appear to have been fulfilled in so far as it is Engineer's responsibility to observe the Work.

3. By recommending any such payment Engineer will not thereby be deemed to have represented that:

a. inspections made to check the quality or the quantity of the Work as it has been performed have been exhaustive, extended to every aspect of the Work in progress, or involved detailed inspections of the Work beyond the responsibilities specifically assigned to Engineer in the Contract; or

b. there may not be other matters or issues between the parties that might entitle Contractor to be paid additionally by Owner or entitle Owner to withhold payment to Contractor.

4. Neither Engineer's review of Contractor's Work for the purposes of recommending payments nor Engineer's recommendation of any payment, including final payment, will impose responsibility on Engineer:

a. to supervise, direct, or control the Work;

b. for the means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto;

c. for Contractor's failure to comply with Laws and Regulations applicable to Contractor's performance of the Work;

d. to make any examination to ascertain how or for what purposes Contractor has used the money paid by Owner; or

e. to determine that title to any of the Work, materials, or equipment has passed to Owner free and clear of any Liens.

5. Engineer may refuse to recommend the whole or any part of any payment if, in Engineer's opinion, it would be incorrect to make the representations to Owner stated in Paragraph 15.01.C.2.

6. Engineer will recommend reductions in payment (set-offs) necessary in Engineer's opinion to protect Owner from loss because:

a. the Work is defective, requiring correction or replacement;

b. the Contract Price has been reduced by Change Orders;

c. Owner has been required to correct defective Work in accordance with Paragraph 14.07, or has accepted defective Work pursuant to Paragraph 14.04;

d. Owner has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible; or

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

e. Engineer has actual knowledge of the occurrence of any of the events that would constitute a default by Contractor and therefore justify termination for cause under the Contract Documents.

D. *Payment Becomes Due*

1. Ten days after presentation of the Application for Payment to Owner with Engineer's recommendation, the amount recommended (subject to any Owner set-offs) will become due, and when due will be paid by Owner to Contractor.

E. *Reductions in Payment by Owner*

1. In addition to any reductions in payment (set-offs) recommended by Engineer, Owner is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against Owner based on Contractor's conduct in the performance or furnishing of the Work, or Owner has incurred costs, losses, or damages resulting from Contractor's conduct in the performance or furnishing of the Work, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, non-compliance with Laws and Regulations, and patent infringement;

b. Contractor has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with other work at or adjacent to the Site;

c. Contractor has failed to provide and maintain required bonds or insurance;

d. Owner has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. Owner has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. The Work is defective, requiring correction or replacement;

g. Owner has been required to correct defective Work in accordance with Paragraph 14.07, or has accepted defective Work pursuant to Paragraph 14.04;

h. The Contract Price has been reduced by Change Orders;

i. An event has occurred that would constitute a default by Contractor and therefore justify a termination for cause;

j. Liquidated or other damages have accrued as a result of Contractor's failure to achieve Milestones, Substantial Completion, or final completion of the Work;

k. Liens have been filed in connection with the Work, except where Contractor has delivered a specific bond satisfactory to Owner to secure the satisfaction and discharge of such Liens; or

l. Other items entitle Owner to a set-off against the amount recommended.

2. If Owner imposes any set-off against payment, whether based on its own knowledge or on the written recommendations of Engineer, Owner will give Contractor immediate written notice (with a copy to Engineer) stating the reasons for such action and the specific amount of the reduction, and promptly pay Contractor any amount remaining

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

after deduction of the amount so withheld. Owner shall promptly pay Contractor the amount so withheld, or any adjustment thereto agreed to by Owner and Contractor, if Contractor remedies the reasons for such action. The reduction imposed will be binding on Contractor unless it duly submits a Change Proposal contesting the reduction.

3. Upon a subsequent determination that Owner's refusal of payment was not justified, the amount wrongfully withheld will be treated as an amount due as determined by Paragraph 15.01.D.1 and subject to interest as provided in the Agreement.

15.02 *Contractor's Warranty of Title*

A. Contractor warrants and guarantees that title to all Work, materials, and equipment furnished under the Contract will pass to Owner free and clear of (1) all Liens and other title defects, and (2) all patent, licensing, copyright, or royalty obligations, no later than 7 days after the time of payment by Owner.

15.03 *Substantial Completion*

A. When Contractor considers the entire Work ready for its intended use Contractor shall notify Owner and Engineer in writing that the entire Work is substantially complete and request that Engineer issue a certificate of Substantial Completion. Contractor shall at the same time submit to Owner and Engineer an initial draft of punch list items to be completed or corrected before final payment.

B. Promptly after Contractor's notification, Owner, Contractor, and Engineer shall make an inspection of the Work to determine the status of completion. If Engineer does not consider the Work substantially complete, Engineer will notify Contractor in writing giving the reasons therefor.

C. If Engineer considers the Work substantially complete, Engineer will deliver to Owner a preliminary certificate of Substantial Completion which will fix the date of Substantial Completion. Engineer shall attach to the certificate a punch list of items to be completed or corrected before final payment. Owner shall have 7 days after receipt of the preliminary certificate during which to make written objection to Engineer as to any provisions of the certificate or attached punch list. If, after considering the objections to the provisions of the preliminary certificate, Engineer concludes that the Work is not substantially complete, Engineer will, within 14 days after submission of the preliminary certificate to Owner, notify Contractor in writing that the Work is not substantially complete, stating the reasons therefor. If Owner does not object to the provisions of the certificate, or if despite consideration of Owner's objections Engineer concludes that the Work is substantially complete, then Engineer will, within said 14 days, execute and deliver to Owner and Contractor a final certificate of Substantial Completion (with a revised punch list of items to be completed or corrected) reflecting such changes from the preliminary certificate as Engineer believes justified after consideration of any objections from Owner.

D. At the time of receipt of the preliminary certificate of Substantial Completion, Owner and Contractor will confer regarding Owner's use or occupancy of the Work following Substantial Completion, review the builder's risk insurance policy with respect to the end of the builder's risk coverage, and confirm the transition to coverage of the Work under a permanent property insurance policy held by Owner. Unless Owner and Contractor agree otherwise in writing, Owner shall bear responsibility for security, operation, protection of the Work,

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

property insurance, maintenance, heat, and utilities upon Owner's use or occupancy of the Work.

E. After Substantial Completion the Contractor shall promptly begin work on the punch list of items to be completed or corrected prior to final payment. In appropriate cases Contractor may submit monthly Applications for Payment for completed punch list items, following the progress payment procedures set forth above.

F. Owner shall have the right to exclude Contractor from the Site after the date of Substantial Completion subject to allowing Contractor reasonable access to remove its property and complete or correct items on the punch list.

15.04 *Partial Use or Occupancy*

A. Prior to Substantial Completion of all the Work, Owner may use or occupy any substantially completed part of the Work which has specifically been identified in the Contract Documents, or which Owner, Engineer, and Contractor agree constitutes a separately functioning and usable part of the Work that can be used by Owner for its intended purpose without significant interference with Contractor's performance of the remainder of the Work, subject to the following conditions:

1. At any time, Owner may request in writing that Contractor permit Owner to use or occupy any such part of the Work that Owner believes to be substantially complete. If and when Contractor agrees that such part of the Work is substantially complete, Contractor, Owner, and Engineer will follow the procedures of Paragraph 15.03.A through 15.03.E for that part of the Work.

2. At any time, Contractor may notify Owner and Engineer in writing that Contractor considers any such part of the Work substantially complete and request Engineer to issue a certificate of Substantial Completion for that part of the Work.

3. Within a reasonable time after either such request, Owner, Contractor, and Engineer shall make an inspection of that part of the Work to determine its status of completion. If Engineer does not consider that part of the Work to be substantially complete, Engineer will notify Owner and Contractor in writing giving the reasons therefor. If Engineer considers that part of the Work to be substantially complete, the provisions of Paragraph 15.03 will apply with respect to certification of Substantial Completion of that part of the Work and the division of responsibility in respect thereof and access thereto.

4. No use or occupancy or separate operation of part of the Work may occur prior to compliance with the requirements of Paragraph 6.04 regarding builder's risk or other property insurance.

15.05 *Final Inspection*

A. Upon written notice from Contractor that the entire Work or an agreed portion thereof is complete, Engineer will promptly make a final inspection with Owner and Contractor and will notify Contractor in writing of all particulars in which this inspection reveals that the Work, or agreed portion thereof, is incomplete or defective. Contractor shall immediately take such measures as are necessary to complete such Work or remedy such deficiencies.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

15.06 *Final Payment*

A. *Application for Payment*

1. After Contractor has, in the opinion of Engineer, satisfactorily completed all corrections identified during the final inspection and has delivered, in accordance with the Contract Documents, all maintenance and operating instructions, schedules, guarantees, bonds, certificates or other evidence of insurance, certificates of inspection, annotated record documents (as provided in Paragraph 7.12), and other documents, Contractor may make application for final payment.

2. The final Application for Payment must be accompanied (except as previously delivered) by:

   a. all documentation called for in the Contract Documents;

   b. consent of the surety, if any, to final payment;

   c. satisfactory evidence that all title issues have been resolved such that title to all Work, materials, and equipment has passed to Owner free and clear of any Liens or other title defects, or will so pass upon final payment.

   d. a list of all duly pending Change Proposals and Claims; and

   e. complete and legally effective releases or waivers (satisfactory to Owner) of all Lien rights arising out of the Work, and of Liens filed in connection with the Work.

3. In lieu of the releases or waivers of Liens specified in Paragraph 15.06.A.2 and as approved by Owner, Contractor may furnish receipts or releases in full and an affidavit of Contractor that: (a) the releases and receipts include all labor, services, material, and equipment for which a Lien could be filed; and (b) all payrolls, material and equipment bills, and other indebtedness connected with the Work for which Owner might in any way be responsible, or which might in any way result in liens or other burdens on Owner's property, have been paid or otherwise satisfied. If any Subcontractor or Supplier fails to furnish such a release or receipt in full, Contractor may furnish a bond or other collateral satisfactory to Owner to indemnify Owner against any Lien, or Owner at its option may issue joint checks payable to Contractor and specified Subcontractors and Suppliers.

B. *Engineer's Review of Final Application and Recommendation of Payment*: If, on the basis of Engineer's observation of the Work during construction and final inspection, and Engineer's review of the final Application for Payment and accompanying documentation as required by the Contract Documents, Engineer is satisfied that the Work has been completed and Contractor's other obligations under the Contract have been fulfilled, Engineer will, within 10 days after receipt of the final Application for Payment, indicate in writing Engineer's recommendation of final payment and present the final Application for Payment to Owner for payment. Such recommendation will account for any set-offs against payment that are necessary in Engineer's opinion to protect Owner from loss for the reasons stated above with respect to progress payments. Otherwise, Engineer will return the Application for Payment to Contractor, indicating in writing the reasons for refusing to recommend final payment, in which case Contractor shall make the necessary corrections and resubmit the Application for Payment.

C. *Notice of Acceptability*: In support of its recommendation of payment of the final Application for Payment, Engineer will also give written notice to Owner and Contractor that the Work is

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

acceptable, subject to stated limitations in the notice and to the provisions of Paragraph 15.07.

D. *Completion of Work*: The Work is complete (subject to surviving obligations) when it is ready for final payment as established by the Engineer's written recommendation of final payment and issuance of notice of the acceptability of the Work.

E. *Final Payment Becomes Due*: Upon receipt from Engineer of the final Application for Payment and accompanying documentation, Owner shall set off against the amount recommended by Engineer for final payment any further sum to which Owner is entitled, including but not limited to set-offs for liquidated damages and set-offs allowed under the provisions of this Contract with respect to progress payments. Owner shall pay the resulting balance due to Contractor within 30 days of Owner's receipt of the final Application for Payment from Engineer.

15.07 *Waiver of Claims*

A. By making final payment, Owner waives its claim or right to liquidated damages or other damages for late completion by Contractor, except as set forth in an outstanding Claim, appeal under the provisions of Article 17, set-off, or express reservation of rights by Owner. Owner reserves all other claims or rights after final payment.

B. The acceptance of final payment by Contractor will constitute a waiver by Contractor of all claims and rights against Owner other than those pending matters that have been duly submitted as a Claim, or appealed under the provisions of Article 17.

15.08 *Correction Period*

A. If within one year after the date of Substantial Completion (or such longer period of time as may be prescribed by the Supplementary Conditions or the terms of any applicable special guarantee required by the Contract Documents), Owner gives Contractor written notice that any Work has been found to be defective, or that Contractor's repair of any damages to the Site or adjacent areas has been found to be defective, then after receipt of such notice of defect Contractor shall promptly, without cost to Owner and in accordance with Owner's written instructions:

1. correct the defective repairs to the Site or such adjacent areas;

2. correct such defective Work;

3. remove the defective Work from the Project and replace it with Work that is not defective, if the defective Work has been rejected by Owner, and

4. satisfactorily correct or repair or remove and replace any damage to other Work, to the work of others, or to other land or areas resulting from the corrective measures.

B. Owner shall give any such notice of defect within 60 days of the discovery that such Work or repairs is defective. If such notice is given within such 60 days but after the end of the correction period, the notice will be deemed a notice of defective Work under Paragraph 7.17.B.

C. If, after receipt of a notice of defect within 60 days and within the correction period, Contractor does not promptly comply with the terms of Owner's written instructions, or in an emergency where delay would cause serious risk of loss or damage, Owner may have the defective Work corrected or repaired or may have the rejected Work removed and replaced.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Contractor shall pay all costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such correction or repair or such removal and replacement (including but not limited to all costs of repair or replacement of work of others). Contractor's failure to pay such costs, losses, and damages within 10 days of invoice from Owner will be deemed the start of an event giving rise to a Claim under Paragraph 12.01.B, such that any related Claim must be brought within 30 days of the failure to pay.

D. In special circumstances where a particular item of equipment is placed in continuous service before Substantial Completion of all the Work, the correction period for that item may start to run from an earlier date if so provided in the Specifications.

E. Where defective Work (and damage to other Work resulting therefrom) has been corrected or removed and replaced under this paragraph, the correction period hereunder with respect to such Work will be extended for an additional period of one year after such correction or removal and replacement has been satisfactorily completed.

F. Contractor's obligations under this paragraph are in addition to all other obligations and warranties. The provisions of this paragraph are not to be construed as a substitute for, or a waiver of, the provisions of any applicable statute of limitation or repose.

ARTICLE 16—SUSPENSION OF WORK AND TERMINATION

16.01 *Owner May Suspend Work*

A. At any time and without cause, Owner may suspend the Work or any portion thereof for a period of not more than 90 consecutive days by written notice to Contractor and Engineer. Such notice will fix the date on which Work will be resumed. Contractor shall resume the Work on the date so fixed. Contractor shall be entitled to an adjustment in the Contract Price or an extension of the Contract Times directly attributable to any such suspension. Any Change Proposal seeking such adjustments must be submitted no later than 30 days after the date fixed for resumption of Work.

16.02 *Owner May Terminate for Cause*

A. The occurrence of any one or more of the following events will constitute a default by Contractor and justify termination for cause:

1. Contractor's persistent failure to perform the Work in accordance with the Contract Documents (including, but not limited to, failure to supply sufficient skilled workers or suitable materials or equipment, or failure to adhere to the Progress Schedule);

2. Failure of Contractor to perform or otherwise to comply with a material term of the Contract Documents;

3. Contractor's disregard of Laws or Regulations of any public body having jurisdiction; or

4. Contractor's repeated disregard of the authority of Owner or Engineer.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. If one or more of the events identified in Paragraph 16.02.A occurs, then after giving Contractor (and any surety) 10 days' written notice that Owner is considering a declaration that Contractor is in default and termination of the Contract, Owner may proceed to:

1. declare Contractor to be in default, and give Contractor (and any surety) written notice that the Contract is terminated; and

2. enforce the rights available to Owner under any applicable performance bond.

C. Subject to the terms and operation of any applicable performance bond, if Owner has terminated the Contract for cause, Owner may exclude Contractor from the Site, take possession of the Work, incorporate in the Work all materials and equipment stored at the Site or for which Owner has paid Contractor but which are stored elsewhere, and complete the Work as Owner may deem expedient.

D. Owner may not proceed with termination of the Contract under Paragraph 16.02.B if Contractor within 7 days of receipt of notice of intent to terminate begins to correct its failure to perform and proceeds diligently to cure such failure.

E. If Owner proceeds as provided in Paragraph 16.02.B, Contractor shall not be entitled to receive any further payment until the Work is completed. If the unpaid balance of the Contract Price exceeds the cost to complete the Work, including all related claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals) sustained by Owner, such excess will be paid to Contractor. If the cost to complete the Work including such related claims, costs, losses, and damages exceeds such unpaid balance, Contractor shall pay the difference to Owner. Such claims, costs, losses, and damages incurred by Owner will be reviewed by Engineer as to their reasonableness and, when so approved by Engineer, incorporated in a Change Order. When exercising any rights or remedies under this paragraph, Owner shall not be required to obtain the lowest price for the Work performed.

F. Where Contractor's services have been so terminated by Owner, the termination will not affect any rights or remedies of Owner against Contractor then existing or which may thereafter accrue, or any rights or remedies of Owner against Contractor or any surety under any payment bond or performance bond. Any retention or payment of money due Contractor by Owner will not release Contractor from liability.

G. If and to the extent that Contractor has provided a performance bond under the provisions of Paragraph 6.01.A, the provisions of that bond will govern over any inconsistent provisions of Paragraphs 16.02.B and 16.02.D.

16.03 *Owner May Terminate for Convenience*

A. Upon 7 days' written notice to Contractor and Engineer, Owner may, without cause and without prejudice to any other right or remedy of Owner, terminate the Contract. In such case, Contractor shall be paid for (without duplication of any items):

1. completed and acceptable Work executed in accordance with the Contract Documents prior to the effective date of termination, including fair and reasonable sums for overhead and profit on such Work;

2. expenses sustained prior to the effective date of termination in performing services and furnishing labor, materials, or equipment as required by the Contract Documents in

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

connection with uncompleted Work, plus fair and reasonable sums for overhead and profit on such expenses; and

3. other reasonable expenses directly attributable to termination, including costs incurred to prepare a termination for convenience cost proposal.

B. Contractor shall not be paid for any loss of anticipated profits or revenue, post-termination overhead costs, or other economic loss arising out of or resulting from such termination.

16.04 *Contractor May Stop Work or Terminate*

A. If, through no act or fault of Contractor, (1) the Work is suspended for more than 90 consecutive days by Owner or under an order of court or other public authority, or (2) Engineer fails to act on any Application for Payment within 30 days after it is submitted, or (3) Owner fails for 30 days to pay Contractor any sum finally determined to be due, then Contractor may, upon 7 days' written notice to Owner and Engineer, and provided Owner or Engineer do not remedy such suspension or failure within that time, terminate the contract and recover from Owner payment on the same terms as provided in Paragraph 16.03.

B. In lieu of terminating the Contract and without prejudice to any other right or remedy, if Engineer has failed to act on an Application for Payment within 30 days after it is submitted, or Owner has failed for 30 days to pay Contractor any sum finally determined to be due, Contractor may, 7 days after written notice to Owner and Engineer, stop the Work until payment is made of all such amounts due Contractor, including interest thereon. The provisions of this paragraph are not intended to preclude Contractor from submitting a Change Proposal for an adjustment in Contract Price or Contract Times or otherwise for expenses or damage directly attributable to Contractor's stopping the Work as permitted by this paragraph.

ARTICLE 17—FINAL RESOLUTION OF DISPUTES

17.01 *Methods and Procedures*

A. *Disputes Subject to Final Resolution*: The following disputed matters are subject to final resolution under the provisions of this article:

1. A timely appeal of an approval in part and denial in part of a Claim, or of a denial in full, pursuant to Article 12; and

2. Disputes between Owner and Contractor concerning the Work, or obligations under the Contract Documents, that arise after final payment has been made.

B. *Final Resolution of Disputes*: For any dispute subject to resolution under this article, Owner or Contractor may:

1. elect in writing to invoke the dispute resolution process provided for in the Supplementary Conditions;

2. agree with the other party to submit the dispute to another dispute resolution process; or

3. if no dispute resolution process is provided for in the Supplementary Conditions or mutually agreed to, give written notice to the other party of the intent to submit the dispute to a court of competent jurisdiction.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 18—MISCELLANEOUS

18.01 *Giving Notice*

A. Whenever any provision of the Contract requires the giving of written notice to Owner, Engineer, or Contractor, it will be deemed to have been validly given only if delivered:

1. in person, by a commercial courier service or otherwise, to the recipient's place of business;

2. by registered or certified mail, postage prepaid, to the recipient's place of business; or

3. by e-mail to the recipient, with the words "Formal Notice" or similar in the e-mail's subject line.

18.02 *Computation of Times*

A. When any period of time is referred to in the Contract by days, it will be computed to exclude the first and include the last day of such period. If the last day of any such period falls on a Saturday or Sunday or on a day made a legal holiday by the law of the applicable jurisdiction, such day will be omitted from the computation.

18.03 *Cumulative Remedies*

A. The duties and obligations imposed by these General Conditions and the rights and remedies available hereunder to the parties hereto are in addition to, and are not to be construed in any way as a limitation of, any rights and remedies available to any or all of them which are otherwise imposed or available by Laws or Regulations, by special warranty or guarantee, or by other provisions of the Contract. The provisions of this paragraph will be as effective as if repeated specifically in the Contract Documents in connection with each particular duty, obligation, right, and remedy to which they apply.

18.04 *Limitation of Damages*

A. With respect to any and all Change Proposals, Claims, disputes subject to final resolution, and other matters at issue, neither Owner nor Engineer, nor any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, shall be liable to Contractor for any claims, costs, losses, or damages sustained by Contractor on or in connection with any other project or anticipated project.

18.05 *No Waiver*

A. A party's non-enforcement of any provision will not constitute a waiver of that provision, nor will it affect the enforceability of that provision or of the remainder of this Contract.

18.06 *Survival of Obligations*

A. All representations, indemnifications, warranties, and guarantees made in, required by, or given in accordance with the Contract, as well as all continuing obligations indicated in the Contract, will survive final payment, completion, and acceptance of the Work or termination of the Contract or of the services of Contractor.

18.07 *Controlling Law*

A. This Contract is to be governed by the law of the state in which the Project is located.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

18.08 *Assignment of Contract*

A. Unless expressly agreed to elsewhere in the Contract, no assignment by a party to this Contract of any rights under or interests in the Contract will be binding on the other party without the written consent of the party sought to be bound; and, specifically but without limitation, money that may become due and money that is due may not be assigned without such consent (except to the extent that the effect of this restriction may be limited by law), and unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under the Contract.

18.09 *Successors and Assigns*

A. Owner and Contractor each binds itself, its successors, assigns, and legal representatives to the other party hereto, its successors, assigns, and legal representatives in respect to all covenants, agreements, and obligations contained in the Contract Documents.

18.10 *Headings*

A. Article and paragraph headings are inserted for convenience only and do not constitute parts of these General Conditions.

SUPPLEMENTARY CONDITIONS OF THE CONSTRUCTION CONTRACT

These Supplementary Conditions amend or supplement EJCDC® C-700, Standard General Conditions of the Construction Contract (2018). The General Conditions remain in full force and effect except as amended.

The terms used in these Supplementary Conditions have the meanings stated in the General Conditions. Additional terms used in these Supplementary Conditions have the meanings stated below, which are applicable to both the singular and plural thereof.

The address system used in these Supplementary Conditions is the same as the address system used in the General Conditions, with the prefix "SC" added—for example, "Paragraph SC-4.05."

ARTICLE 1— DEFINITIONS AND TERMINOLOGY

1.01 *Defined Terms*

SC-1.01.A.8 Add the following at the end of the Paragraph:

The Change Order form to be used on this Project is EJCDC C-941 (2018). Agency approval is required before Change Orders are effective.

SC-1.01.A.30 Add the following at the end of the Paragraph:

For the purposes of Rural Development, this term is synonymous with the term "applicant" as defined in 7 CFR 1780.7 (a) (1), (2) and (3) and is an entity receiving financial assistance from the federal programs. Refers to Owner's officials, officers, agents and employees.

SC-1.01.A.50 Add the following at the end of the Paragraph:

The Work Change Directive form to be used on this Project is EJCDC C-940 (2018). Agency approval is required before a Work Change Directive is issued.

SC-1.01.A.51 Add the following new paragraph immediately after Paragraph 1.01.A.50:

51. Agency - The Project is financed in whole or in part by USDA Rural Utilities Service pursuant to the Consolidated Farm and Rural Development Act (7 USC Section 1921 et seq.). The Rural Utilities Service programs are administered through the USDA Rural Development offices; therefore, the Agency for these documents is USDA Rural Development.

SC-1.01.A.52 Add the following new paragraph with the title "American Iron and Steel Definitions" immediately after Paragraph 1.01.A.51:

52. *American Iron and Steel Definitions*

a. *American Iron and Steel (AIS)* - Requirements mandated by Section 746 of Title VII of the Consolidated Appropriations Act of 2017 (Division A - Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2017) and subsequent statutes mandating domestic preference for "iron and steel products," meaning the following products, if made primarily of iron or steel: lined or unlined pipes and fittings, manhole covers and other municipal castings, hydrants, tanks, flanges, pipe clamps and

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

restraints, valves, structural steel, reinforced precast concrete, and Construction Materials. AIS requirements apply in each of the several states, the District of Columbia, and each federally recognized Tribe, but not the U.S. Territories.

b. *Coating* - A covering that is applied to the surface of an object. If a Coating is applied to the external surface of a domestic iron or Steel component, and the application takes place outside of the United States, said product would be considered a compliant product under the AIS requirements. Any Coating processes that are applied to the external surface of Iron and Steel components that would otherwise be AIS compliant would not disqualify the product from meeting the AIS requirements regardless of where the Coating processes occur, provided that final assembly of the product occurs in the United States. This exemption only applies to Coatings on the external surface of Iron and Steel components. It does not apply to Coatings or linings on internal surfaces of Iron and Steel products, such as the lining of lined pipes. All Manufacturing Processes for lined pipes, including the application of pipe lining, must occur in the United States for the product to be compliant with AIS requirements.

c. *Construction Materials* - Those articles, materials, or supplies made primarily of iron and/or steel, that are permanently incorporated into the project, not including mechanical and/or electrical components, equipment and systems. Some of these products may overlap with what is also considered "structural steel". Note: Mechanical and electrical components, equipment and systems are not considered Construction Materials. See definitions of Mechanical Equipment and Electrical Equipment.

d. *Contractor's Certification* - Documentation submitted by the Contractor upon Substantial Completion of the Contract that all Iron and Steel products installed were Produced in the United States.

e. *De Minimis* - Various miscellaneous, incidental low-cost components that are essential for, but incidental to, the construction and are incorporated into the physical structure of the project. Examples of De Minimis components could include small washers, screws, fasteners (such as "off the shelf" nuts and bolts), miscellaneous wire, corner bead, ancillary tube, signage, trash bins, door hardware etc. Costs for such De Minimis components cumulatively may comprise no more than a total of five percent of the total cost of the materials used in and incorporated into a project; the cost of an individual item may not exceed one percent of the total cost of the materials used in and incorporated into a project.

f. *Electrical Equipment* - Typically any machine powered by electricity and includes components that are part of the electrical distribution system. AIS does not apply to Electrical Equipment.

g. *Engineer's Certification* - Documentation submitted by the Engineer that Drawings, Specifications, and Bidding Documents comply with AIS.

h. *Iron and Steel products* - The following products made primarily of iron or steel: lined or unlined pipes and fittings, manhole covers and other municipal castings, hydrants, tanks, flanges, pipe clamps and restraints, valves, structural steel, reinforced precast concrete, and Construction Materials. Only items on the above

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

list made primarily of iron or steel, permanently incorporated into the project must be Produced in the United States. For example, trench boxes, scaffolding or equipment, which are removed from the project site upon completion of the project, are not required to be made of U.S. iron or steel.

i. ***Manufacturer*** **- A Supplier, fabricator, distributor, materialman, or vendor is an entity with which the Owner, Contractor or any subcontractor has contracted to furnish materials or equipment to be incorporated in the project by the Owner, Contractor or a subcontractor.**

j. ***Manufacturer's Certification*** **- Documentation provided by the Manufacturer stating that the Iron and Steel products to be used in the project are produced in the United States in accordance with American Iron and Steel (AIS) Requirements. If items are purchased via a Supplier, distributor, vendor, etc. from the Manufacturer directly, then the Supplier, distributor, vendor, etc. will be responsible for obtaining and providing these certifications to the parties purchasing the products.**

k. ***Manufacturing Processes*** **- Processes such as melting, refining, pouring, forming, rolling, drawing, finishing, and fabricating. Further, if a domestic Iron and Steel product is taken out of the United States for any part of the manufacturing process, it becomes foreign source material. However, raw materials such as iron ore, limestone and iron and steel scrap are not covered by the AIS requirement, and the material(s), if any, being applied as a Coating are similarly not covered. Non-iron or Steel components of an Iron and Steel product may come from non-US sources. For example, for products such as valves and hydrants, the individual non-Iron and Steel components do not have to be of domestic origin. Raw materials, such as iron ore, limestone, scrap iron, and scrap steel, can come from non-U.S. sources.**

l. ***Mechanical Equipment*** **- Typically equipment which has motorized parts and/or is powered by a motor. AIS does not apply to Mechanical Equipment.**

m. ***Minor Components*** **- Components within an iron and/or Steel product otherwise compliant with the American Iron and Steel requirements; this waiver is typically used by Manufacturers. It differs from the De Minimis definition in that De Minimis pertains to the entire project and the minor component definition pertains to a single product. This waiver allows use of non-domestically produced miscellaneous Minor Components comprising up to five percent of the total material cost of an otherwise domestically produced Iron and Steel product. However, unless a separate waiver for a product has been approved, all other Iron and Steel components in said product must still meet the AIS requirements. This waiver does not exempt the whole product from the AIS requirements only Minor Components within said product and the iron or Steel components of the product must be produced domestically. Valves and hydrants are also subject to the cost ceiling requirements described here. Examples of Minor Components could include items such as pins and springs in valves/hydrants, bands/straps in couplings, and other low-cost items such as small fasteners etc.**

n. ***Municipal Castings*** **- Cast iron or Steel infrastructure products that are melted and cast. They typically provide access, protection, or housing for components**

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

incorporated into utility owned drinking water, storm water, wastewater, and solid waste infrastructure.

o. ***Primarily Iron or Steel*** **- A product is made of greater than 50 percent iron or Steel on a materials cost basis. An exception to this definition is reinforced precast concrete (see Definitions). All technical specifications and applicable industry standards (e.g. NIST, NSF, AWWA) must be met. If a product is determined to be less than 50 percent iron and/or steel, the AIS requirements do not apply. For example, the cost of a fire hydrant includes:**

- **The cost of materials used for the iron portion of a fire hydrant (e.g. bonnet, body and shoe); and**
- **The cost to pour and cast to create those components (e.g. labor and energy).**

Not included in the cost are:

- **The additional material costs for the non-iron or Steel internal workings of the hydrant (e.g. stem, coupling, valve, seals, etc.); and**
- **The cost to assemble the internal workings into the hydrant body.**

p. ***Produced in the United States*** **- The production in the United States of the iron or Steel products used in the project requires that all Manufacturing Processes must take place in the United States, with the exception of metallurgical processes involving refinement of steel additives.**

q. ***Reinforced Precast Concrete*** **– Reinforced Precast Concrete structures must comply with AIS, regardless of whether it consists of at least 50 percent iron or steel. The reinforcing bar and wire must be Produced in the United States and meet the same standards as for any other iron or Steel product. Additionally, the casting of the concrete product must take place in the United States. The cement and other raw materials used in concrete production are not required to be of domestic origin. If the reinforced concrete is cast at the construction site, the reinforcing bar and wire are considered Construction Materials and must be Produced in the United States.**

r. ***Steel*** **- An alloy that includes at least 50 percent iron, between 0.02 and 2 percent carbon, and may include other elements. Metallic elements such as chromium, nickel, molybdenum, manganese, and silicon may be added during the melting of Steel for the purpose of enhancing properties such as corrosion resistance, hardness, or strength. The definition of Steel covers carbon steel, alloy steel, stainless steel, tool steel, and other specialty steels.**

s. ***Structural Steel*** **- Rolled flanged shapes, having at least one dimension of their cross-section three inches or greater, which are used in the construction of bridges, buildings, ships, railroad rolling stock, and for numerous other constructional purposes. Such shapes are designated as wide-flange shapes, standard I-beams, channels, angles, tees, and zees. Other shapes include but are not limited to, H-piles, sheet piling, tie plates, cross ties, and those for other special purposes.**

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 2— PRELIMINARY MATTERS

2.02 *Copies of Documents*

SC-2.02 Amend the first sentence of Paragraph 2.02.A. to read as follows:

Owner shall furnish to Contractor **five (5)** printed copies of the Contract Documents (including one fully signed counterpart of the Agreement), and **one (1) copy** in electronic portable document format (PDF).

2.06 *Electronic Transmittals*

SC-2.06 Delete Paragraphs 2.06.B and 2.06.C in their entirety and insert the following in their place:

B. *Electronic Documents Protocol:* The parties shall conform to the following provisions in Paragraphs 2.06.B and 2.06.C, together referred to as the Electronic Documents Protocol ("EDP" or "Protocol") for exchange of electronic transmittals.

1. *Basic Requirements*

a. To the fullest extent practical, the parties agree to and will transmit and accept Electronic Documents in an electronic or digital format using the procedures described in this Protocol. Use of the Electronic Documents and any information contained therein is subject to the requirements of this Protocol and other provisions of the Contract.

b. The contents of the information in any Electronic Document will be the responsibility of the transmitting party.

c. Electronic Documents as exchanged by this Protocol may be used in the same manner as the printed versions of the same documents that are exchanged using non-electronic format and methods, subject to the same governing requirements, limitations, and restrictions, set forth in the Contract Documents.

d. Except as otherwise explicitly stated herein, the terms of this Protocol will be incorporated into any other agreement or subcontract between a party and any third party for any portion of the Work on the Project, or any Project-related services, where that third party is, either directly or indirectly, required to exchange Electronic Documents with a party or with Engineer. Nothing herein will modify the requirements of the Contract regarding communications between and among the parties and their subcontractors and consultants.

e. When transmitting Electronic Documents, the transmitting party makes no representations as to long term compatibility, usability, or readability of the items resulting from the receiving party's use of software application packages, operating systems, or computer hardware differing from those established in this Protocol.

f. Nothing herein negates any obligation 1) in the Contract to create, provide, or maintain an original printed record version of Drawings and Specifications, signed and sealed according to applicable Laws and Regulations; 2) to comply with any applicable Law or Regulation governing the signing and sealing of design documents or the signing and electronic transmission of any other documents; or 3) to comply with the notice requirements of Paragraph 18.01 of the General Conditions.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2. *System Infrastructure for Electronic Document Exchange*

   a. Each party will provide hardware, operating system(s) software, internet, e-mail, and large file transfer functions ("System Infrastructure") at its own cost and sufficient for complying with the EDP requirements. With the exception of minimum standards set forth in this EDP, and any explicit system requirements specified by attachment to this EDP, it is the obligation of each party to determine, for itself, its own System Infrastructure.

      1) The maximum size of an email attachment for exchange of Electronic Documents under this EDP is **10** MB. Attachments larger than that may be exchanged using large file transfer functions or physical media.

      2) Each Party assumes full and complete responsibility for any and all of its own costs, delays, deficiencies, and errors associated with converting, translating, updating, verifying, licensing, or otherwise enabling its System Infrastructure, including operating systems and software, for use with respect to this EDP.

   b. Each party is responsible for its own system operations, security, back-up, archiving, audits, printing resources, and other Information Technology ("IT") for maintaining operations of its System Infrastructure during the Project, including coordination with the party's individual(s) or entity responsible for managing its System Infrastructure and capable of addressing routine communications and other IT issues affecting the exchange of Electronic Documents.

   c. Each party will operate and maintain industry-standard, industry-accepted, ISO-standard, commercial-grade security software and systems that are intended to protect the other party from: software viruses and other malicious software like worms, trojans, adware; data breaches; loss of confidentiality; and other threats in the transmission to or storage of information from the other parties, including transmission of Electronic Documents by physical media such as CD/DVD/flash drive/hard drive. To the extent that a party maintains and operates such security software and systems, it shall not be liable to the other party for any breach of system security.

   d. In the case of disputes, conflicts, or modifications to the EDP required to address issues affecting System Infrastructure, the parties shall cooperatively resolve the issues; but, failing resolution, the Owner is authorized to make and require reasonable and necessary changes to the EDP to effectuate its original intent. If the changes cause additional cost or time to Contractor, not reasonably anticipated under the original EDP, Contractor may seek an adjustment in price or time under the appropriate process in the Contract.

   e. Each party is responsible for its own back-up and archive of documents sent and received during the term of the contract under this EDP, unless this EDP establishes a Project document archive, either as part of a mandatory Project website or other communications protocol, upon which the parties may rely for document archiving during the specified term of operation of such Project document archive. Further, each party remains solely responsible for its own post-Project back-up and archive of Project documents after the term of the Contract, or after termination of the

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Project document archive, if one is established, for as long as required by the Contract and as each party deems necessary for its own purposes.

f. If a receiving party receives an obviously corrupted, damaged, or unreadable Electronic Document, the receiving party will advise the sending party of the incomplete transmission.

g. The parties will bring any non-conforming Electronic Documents into compliance with the EDP. The parties will attempt to complete a successful transmission of the Electronic Document or use an alternative delivery method to complete the communication.

h. The Owner will operate a Project information management system (also referred to in this EDP as "Project Website") for use of Owner, Engineer and Contractor during the Project for exchange and storage of Project-related communications and information. Except as otherwise provided in this EDP or the General Conditions, use of the Project Website by the parties as described in this Paragraph will be mandatory for exchange of Project documents, communications, submittals, and other Project-related information. The following conditions and standards will govern use of the Project Website:

1) Describe the period of time during which the Project Website will be operated and be available for reliance by the parties;

2) Provide any minimum system infrastructure, software licensing and security standards for access to and use of the Project Website;

3) Describe the types and extent of services to be provided at the Project Website (such as large file transfer, email, communication and document archives, etc.); and

4) Include any other Project Website attributes that may be pertinent to Contractor's use of the facility and pricing of such use.

C. *Software Requirements for Electronic Document Exchange; Limitations*

1. Each party will acquire the software and software licenses necessary to create and transmit Electronic Documents and to read and to use any Electronic Documents received from the other party (and if relevant from third parties), using the software formats required in this section of the EDP.

a. Prior to using any updated version of the software required in this section for sending Electronic Documents to the other party, the originating party will first notify and receive concurrence from the other party for use of the updated version or adjust its transmission to comply with this EDP.

2. The parties agree not to intentionally edit, reverse engineer, decrypt, remove security or encryption features, or convert to another format for modification purposes any Electronic Document or information contained therein that was transmitted in a software data format, including Portable Document Format (PDF), intended by sender not to be modified, unless the receiving party obtains the permission of the sending party or is citing or quoting excerpts of the Electronic Document for Project purposes.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

3. Software and data formats for exchange of Electronic Documents will conform to the requirements set forth in Exhibit A to this EDP, including software versions, if listed.

SC-2.06 Supplement Paragraph 2.06 of the General Conditions by adding the following paragraph:

D. *Requests by Contractor for Electronic Documents in Other Formats*

1. Release of any Electronic Document versions of the Project documents in formats other than those identified in the Electronic Documents Protocol (if any) or elsewhere in the Contract will be at the sole discretion of the Owner.

2. To extent determined by Owner, in its sole discretion, to be prudent and necessary, release of Electronic Documents versions of Project documents and other Project information requested by Contractor ("Request") in formats other than those identified in the Electronic Documents Protocol (if any) or elsewhere in the Contract will be subject to the provisions of the Owner's response to the Request, and to the following conditions to which Contractor agrees:

a. The content included in the Electronic Documents created by Engineer and covered by the Request was prepared by Engineer as an internal working document for Engineer's purposes solely, and is being provided to Contractor on an "AS IS" basis without any warranties of any kind, including, but not limited to any implied warranties of fitness for any purpose. As such, Contractor is advised and acknowledges that the content may not be suitable for Contractor's application, or may require substantial modification and independent verification by Contractor. The content may include limited resolution of models, not-to-scale schematic representations and symbols, use of notes to convey design concepts in lieu of accurate graphics, approximations, graphical simplifications, undocumented intermediate revisions, and other devices that may affect subsequent reuse.

b. Electronic Documents containing text, graphics, metadata, or other types of data that are provided by Engineer to Contractor under the request are only for convenience of Contractor. Any conclusion or information obtained or derived from such data will be at the Contractor's sole risk and the Contractor waives any claims against Engineer or Owner arising from use of data in Electronic Documents covered by the Request.

c. Contractor shall indemnify and hold harmless Owner and Engineer and their subconsultants from all claims, damages, losses, and expenses, including attorneys' fees and defense costs arising out of or resulting from Contractor's use, adaptation, or distribution of any Electronic Documents provided under the Request.

d. Contractor agrees not to sell, copy, transfer, forward, give away or otherwise distribute this information (in source or modified file format) to any third party without the direct written authorization of Engineer, unless such distribution is specifically identified in the Request and is limited to Contractor's subcontractors. Contractor warrants that subsequent use by Contractor's subcontractors complies with all terms of the Contract Documents and Owner's response to Request.

3. In the event that Owner elects to provide or directs the Engineer to provide to Contractor any Contractor-requested Electronic Document versions of Project information that is not explicitly identified in the Contract Documents as being available to Contractor, the Owner shall be reimbursed by Contractor on an hourly basis (at $**120**

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

per hour) for any engineering costs necessary to create or otherwise prepare the data in a manner deemed appropriate by Engineer.

ARTICLE 3— CONTRACT DOCUMENTS: INTENT, REQUIREMENTS, REUSE

No suggested Supplementary Conditions in this Article.

ARTICLE 4— COMMENCEMENT AND PROGRESS OF THE WORK

4.01 *Commencement of Contract Times; Notice to Proceed*

SC-4.01.A Delete the last sentence of paragraph.

4.05 *Delays in Contractor's Progress*

SC-4.05 Amend Paragraph 4.05.C by adding the following subparagraphs:

5. *Weather-Related Delays*

a. If "abnormal weather conditions" as set forth in Paragraph 4.05.C.2 of the General Conditions are the basis for a request for an equitable adjustment in the Contract Times, such request must be documented by data substantiating each of the following: 1) that weather conditions were abnormal for the period of time in which the delay occurred, 2) that such weather conditions could not have been reasonably anticipated, and 3) that such weather conditions had an adverse effect on the Work as scheduled. **Extreme or unusual weather that is typical for a given region, elevation, or season should not be considered abnormal weather conditions. Requests for time extensions due to abnormal weather conditions will be submitted to the Engineer within five days of the end of the abnormal weather condition event. It is the responsibility of the Contractor to provide the information listed in SC 4.05.C.5.b.**

b. The existence of abnormal weather conditions will be determined on a month-by-month basis in accordance with the following:

1) Every workday on which one or more of the following conditions exist will be considered a "bad weather day":

i) Total precipitation (as rain equivalent) occurring between 7:00 p.m. on the preceding day (regardless of whether such preceding day is a workday) through 7:00 p.m. on the workday in question equals or exceeds **1"** of precipitation (as rain equivalent, based on the snow/rain conversion indicated in the table entitled Foreseeable Bad Weather Days; such table is hereby incorporated in this SC-4.05.C by reference.

ii) Ambient outdoor air temperature at 11:00 a.m. is equal to or less than the following low temperature threshold: **35** degrees Fahrenheit; or, at 3:00 p.m. the ambient outdoor temperature is equal to or greater than the following high temperature threshold: **115** degrees Fahrenheit.

2) Determination of actual bad weather days during performance of the Work will be based on the weather records measured and recorded **at or near Yavapai County.**

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

3) Contractor shall anticipate the number of foreseeable bad weather days per month indicated in the table in Exhibit **B**—Foreseeable Bad Weather Days.

4) In each month, every bad weather day exceeding the number of foreseeable bad weather days established in the table in Exhibit **B**—Foreseeable Bad Weather Days will be considered as "abnormal weather conditions." The existence of abnormal weather conditions will not relieve Contractor of the obligation to demonstrate and document that delays caused by abnormal weather are specific to the planned work activities or that such activities thus delayed were on Contractor's then-current Progress Schedule's critical path for the Project.

ARTICLE 5— SITE, SUBSURFACE AND PHYSICAL CONDITIONS, HAZARDOUS ENVIRONMENTAL CONDITIONS

5.03 *Subsurface and Physical Conditions*

SC-5.03 Add the following new paragraphs immediately after Paragraph 5.03.D:

E. The following table lists the reports of explorations and tests of subsurface conditions at or adjacent to the Site that contain Technical Data, and specifically identifies the Technical Data in the report upon which Contractor may rely:

Report Title	Date of Report	Technical Data
Geotechnical Evaluation Report Jerome WWTP Upgrades	October 25, 2022	Geotechnical

F. The following table lists the drawings of existing physical conditions at or adjacent to the Site, including those drawings depicting existing surface or subsurface structures at or adjacent to the Site (except Underground Facilities), that contain Technical Data, and specifically identifies the Technical Data upon which Contractor may rely:

Drawings Title	Date of Drawings	Technical Data
None.		

G. Contractor may **request to** ~~examine~~ **receive** copies of reports and drawings identified in SC-5.03.E and SC-5.03.F that were not included with the Bidding Documents ~~at~~ **[location]** ~~during regular business hours, or may request copies~~ from Engineer.

ARTICLE 6— BONDS AND INSURANCE

6.01 *Performance, Payment, and Other Bonds*

SC-6.01 Add the following paragraphs immediately after Paragraph 6.01.A:

1. *Required Performance Bond Form:* The performance bond that Contractor furnishes will be in the form of EJCDC® C-610, Performance Bond (~~2010, 2013, or~~ 2018 edition).

2. *Required Payment Bond Form:* The payment bond that Contractor furnishes will be in the form of EJCDC® C-615, Payment Bond (~~2010, 2013, or~~ 2018 edition).

3. All performance and payment bonds shall comply with A.R.S. Section 34-222.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

6.02 *Insurance—General Provisions*

SC-6.02 Add the following paragraph immediately after Paragraph 6.02.B:

1. Contractor may obtain worker's compensation insurance from an insurance company that has not been rated by A.M. Best, provided that such company (a) is domiciled in the state in which the Project is located, (b) is certified or authorized as a worker's compensation insurance provider by the appropriate state agency, and (c) has been accepted to provide worker's compensation insurance for similar projects by the state within the last 12 months.

SC-6.02 Add the following paragraph immediately after Paragraph 6.02.H.2 of the General Conditions:

2. For **any** ~~the following~~ Subcontractors~~,~~ **or** Suppliers~~, or categories of Subcontractor or Supplier,~~ Contractor shall require the following specified insurance, with policy limits as stated:

Commercial General Liability	**Policy limits of not less than:**
General Aggregate	**$2,000,000**
Products—Completed Operations Aggregate	**$2,000,000**
Products—Completed Operations—Each Occurrence	**$1,000,000**
Personal and Advertising Injury	**$1,000,000**
Bodily Injury and Property Damage—Each Occurrence	**$1,000,000**
Automobile Liability	**Policy limits of not less than:**
Combined Single Limit	
Combined Single Limit (Bodily Injury and Property Damage)	**$1,000,000**
Contractor's Professional Liability	**Policy limits of not less than:**
Each Claim	**$1,000,000**
Annual Aggregate	**$1,000,000**

6.03 *Contractor's Insurance*

SC-6.03 Supplement Paragraph 6.03 with the following provisions after Paragraph 6.03.C:

D. *Other Additional Insureds:* As a supplement to the provisions of Paragraph 6.03.C of the General Conditions, the commercial general liability, automobile liability, umbrella or excess, pollution liability, and unmanned aerial vehicle liability policies must include as additional insureds (in addition to Owner and Engineer) the following: **Town of Jerome, Pacific Advanced Civil Engineering, Inc.**

E. *Workers' Compensation and Employer's Liability:* Contractor shall purchase and maintain workers' compensation and employer's liability insurance, including, as applicable, United States Longshoreman and Harbor Workers' Compensation Act, Jones Act, stop-gap employer's liability coverage for monopolistic states, and foreign voluntary workers' compensation (from available sources, notwithstanding the jurisdictional requirement of Paragraph 6.02.B of the General Conditions).

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Workers' Compensation and Related Policies	Policy limits of not less than:
Workers' Compensation	
State	**Statutory**
Applicable Federal (e.g., Longshoreman's)	**Statutory**
Foreign voluntary workers' compensation (employer's responsibility coverage), if applicable	**Statutory**

F. *Commercial General Liability—Claims Covered:* Contractor shall purchase and maintain commercial general liability insurance, covering all operations by or on behalf of Contractor, on an occurrence basis, against claims for:

1. damages because of bodily injury, sickness or disease, or death of any person other than Contractor's employees,
2. damages insured by reasonably available personal injury liability coverage, and
3. damages because of injury to or destruction of tangible property wherever located, including loss of use resulting therefrom.

G. *Commercial General Liability—Form and Content:* Contractor's commercial liability policy must be written on a 1996 (or later) Insurance Services Organization, Inc. (ISO) commercial general liability form (occurrence form) and include the following coverages and endorsements:

1. Products and completed operations coverage.
    a. Such insurance must be maintained for three years after final payment.
    b. Contractor shall furnish Owner and each other additional insured (as identified in the Supplementary Conditions or elsewhere in the Contract) evidence of continuation of such insurance at final payment and three years thereafter.
2. Blanket contractual liability coverage, including but not limited to coverage of Contractor's contractual indemnity obligations in Paragraph 7.18.
3. Severability of interests and no insured-versus-insured or cross-liability exclusions.
4. Underground, explosion, and collapse coverage.
5. Personal injury coverage.
6. Additional insured endorsements that include both ongoing operations and products and completed operations coverage through ISO Endorsements CG 20 10 10 01 and CG 20 37 10 01 (together). If Contractor demonstrates to Owner that the specified ISO endorsements are not commercially available, then Contractor may satisfy this requirement by providing equivalent endorsements.
7. For design professional additional insureds, ISO Endorsement CG 20 32 07 04 "Additional Insured—Engineers, Architects or Surveyors Not Engaged by the Named Insured" or its equivalent.

H. *Commercial General Liability—Excluded Content:* The commercial general liability insurance policy, including its coverages, endorsements, and incorporated provisions, must not include any of the following:

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. Any modification of the standard definition of "insured contract" (except to delete the railroad protective liability exclusion if Contractor is required to indemnify a railroad or others with respect to Work within 50 feet of railroad property).
2. Any exclusion for water intrusion or water damage.
3. Any provisions resulting in the erosion of insurance limits by defense costs other than those already incorporated in ISO form CG 00 01.
4. Any exclusion of coverage relating to earth subsidence or movement.
5. Any exclusion for the insured's vicarious liability, strict liability, or statutory liability (other than worker's compensation).
6. Any limitation or exclusion based on the nature of Contractor's work.
7. Any professional liability exclusion broader in effect than the most recent edition of ISO form CG 22 79.

I. *Commercial General Liability—Minimum Policy Limits*

Commercial General Liability	Policy limits of not less than:
General Aggregate	**$2,000,000**
Products—Completed Operations Aggregate	**$2,000,000**
Products—Completed Operations—Each Occurrence	**$1,000,000**
Personal and Advertising Injury	**$1,000,000**
Bodily Injury and Property Damage—Each Occurrence	**$1,000,000**

J. *Automobile Liability:* Contractor shall purchase and maintain automobile liability insurance for damages because of bodily injury or death of any person or property damage arising out of the ownership, maintenance, or use of any motor vehicle. The automobile liability policy must be written on an occurrence basis.

Automobile Liability	Policy limits of not less than:
Combined Single Limit	
Combined Single Limit (Bodily Injury and Property Damage)	**$1,000,000**

K. *Umbrella or Excess Liability:* Contractor shall purchase and maintain umbrella or excess liability insurance written over the underlying employer's liability, commercial general liability, and automobile liability insurance described in the Paragraphs above. The coverage afforded must be at least as broad as that of each and every one of the underlying policies.

Excess or Umbrella Liability	Policy limits of not less than:
Each Occurrence	**$4,000,000**
General Aggregate	**$4,000,000**
Products—Completed Operations Aggregate	**$4,000,000**

L. *Using Umbrella or Excess Liability Insurance to Meet CGL and Other Policy Limit Requirements:* Contractor may meet the policy limits specified for employer's liability,

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

commercial general liability, and automobile liability through the primary policies alone, or through combinations of the primary insurance policy's policy limits and partial attribution of the policy limits of an umbrella or excess liability policy that is at least as broad in coverage as that of the underlying policy, as specified herein. If such umbrella or excess liability policy was required under this Contract, at a specified minimum policy limit, such umbrella or excess policy must retain a minimum limit of $**4,000,000** after accounting for partial attribution of its limits to underlying policies, as allowed above.

M. *Contractor's Pollution Liability Insurance:* Contractor shall purchase and maintain a policy covering third-party injury and property damage, including cleanup costs, as a result of pollution conditions arising from Contractor's operations and completed operations. This insurance must be maintained for no less than three years after final completion.

Contractor's Pollution Liability	**Policy limits of not less than:**
Each Occurrence/Claim	**$1,000,000**
General Aggregate	**$1,000,000**

N. *Contractor's Professional Liability Insurance:* If Contractor will provide or furnish professional services under this *Contract*, through a delegation of professional design services or otherwise, then Contractor shall be responsible for purchasing and maintaining applicable professional liability insurance. This insurance must cover negligent acts, errors, or omissions in the performance of professional design or related services by the insured or others for whom the insured is legally liable. The insurance must be maintained throughout the duration of the Contract and for a minimum of two years after Substantial Completion. The retroactive date on the policy must pre-date the commencement of furnishing services on the Project.

Contractor's Professional Liability	**Policy limits of not less than:**
Each Claim	**$1,000,000**
Annual Aggregate	**$1,000,000**

O. ***Deleted***

P. ***Deleted***

Q. ***Deleted***

6.04 ***Deleted***

ARTICLE 7— CONTRACTOR'S RESPONSIBILITIES

7.03 *Labor; Working Hours*

SC-7.03 Add the following new subparagraphs immediately after Paragraph 7.03.C:

1. Regular working hours will be **7:00 AM to 5:00 PM. Hours and days could be extended upon prior Owner approval.**

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2. Owner's legal holidays are:

New Year's Day
Thanksgiving Day
Day after Thanksgiving
Day before Christmas
Christmas Day
New Year's Eve

No work is allowed on the Owner Observed Holidays without prior approval.

7.04 *Services, Materials, and Equipment*

SC-7.04.D Add the following new paragraph immediately after Paragraph 7.04.C:

D. All Iron and Steel products must meet American Iron and Steel requirements.

SC-7.04.E Add the following new paragraph immediately after Paragraph 7.04.D:

D. For projects utilizing a De Minimis waiver, Contractor shall maintain an itemized list of non-domestically produced iron or steel incidental components and ensure that the cost is less than 5% of total materials cost for project.

7.05 *"Or Equals"*

SC-7.05.A Amend the third sentence of paragraph by striking out the following words:

Unless the specification or description contains or is followed by words reading that no like, equivalent, or "or-equal" item is permitted,

SC-7.05.A.1.a.3 Amend the last sentence of Paragraph a.3 by striking out "and;" and adding a period at the end of Paragraph a.3.

SC-7.05.A.1.a.4 Delete paragraph in its entirety and insert "Deleted."

SC-7.05.B Add the following at the end of paragraph:

Contractor shall include a Manufacturer's Certification letter for compliance with American Iron and Steel requirements in support data, if applicable. Refer to Manufacturer's Certification Letter provided in these Contract Documents.

7.06 *Substitutes*

SC-7.06.A.3.a.2 Remove "and" from the end of paragraph.

SC-7.06.A.3.a.3 Add "; and" to the end of paragraph.

SC-7.06.A.3.a.4 Add the following new paragraph immediately after Paragraph 7.06.A.3.a.3:

4) Comply with American Iron and Steel by providing Manufacturer's Certification letter of American Iron and Steel compliance, if applicable. Refer to Manufacturer's Certification Letter provided in these Contract Documents.

7.07 *Concerning Subcontractors and Suppliers*

SC-7.07.A Amend by adding the following to the end of the paragraph:

The total amount of work subcontracted by the Contractor shall not exceed fifty percent of the Contract price without prior approval from the Owner, Engineer and Agency.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

SC-7.07.B – Delete paragraph in its entirety and insert ”Deleted”.

SC-7.07.E Delete the second sentence of paragraph and insert the following in its place:

Owner may not require that Contractor use a specific replacement.

7.12 *Record Documents*

SC-7.12.A Delete the second sentence of paragraph and insert the following in its place:

Owner may not require that Contractor use a specific replacement.

SC-7.12.A Amend paragraph by adding the following after ”written interpretations and clarifications,”

Manufacturers’ Certifications,

7.16 *Submittals*

SC-7.16.A.1.c Amend paragraph by deleting the last period and adding:

, including Manufacturer’s Certification letter for any item in the submittal subject to American Iron and Steel requirements and include the Certificate in the submittal. Refer to Manufacturer’s Certification Letter provided in these Contract Documents.

SC-7.16.C.9 Add new paragraph immediately after Paragraph 7.16.C.8:

1. Engineer’s review and approval of a Shop Drawing or Sample shall include review of Manufacturers’ Certifications in order to document compliance with American Iron and Steel requirements, as applicable.

7.17 *Contractor’s General Warranty and Guarantee*

SC-7.17.F Add new paragraph immediately after Paragraph 7.17.E:

F. Contractor shall certify upon Substantial Completion that all Work and Materials have complied with American Iron and Steel requirements as mandated by Section 746 of Title VII of the Consolidated Appropriations Act of 2017 (Division A - Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2017) and subsequent statutes mandating domestic preference. Contractor shall provide said Certification to Owner. Refer to General Contractor’s Certification Letter provided in these Contract Documents.

ARTICLE 8— OTHER WORK AT THE SITE

8.02 *Coordination*

SC-8.02 Add the following new Paragraph 8.02.C immediately after Paragraph 8.02.B:

C. The Jerome Wastewater Treatment Plant will remain operational during construction of the upgrades and the Contractor shall coordinate closely with the Resident Project Representative to ensure operational activities are not inhibited.

ARTICLE 9— OWNER’S RESPONSIBILITIES

No suggested Supplementary Conditions in this Article.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 10— ENGINEER'S STATUS DURING CONSTRUCTION

10.03 *Resident Project Representative*

SC-10.03 Add the following new paragraphs immediately after Paragraph 10.03.B:

C. The Resident Project Representative (RPR) will be Engineer's representative at the Site. RPR's dealings in matters pertaining to the Work in general will be with Engineer and Contractor. RPR's dealings with Subcontractors will only be through or with the full knowledge or approval of Contractor. The RPR will:

1. *Conferences and Meetings:* Attend meetings with Contractor, such as preconstruction conferences, progress meetings, job conferences, and other Project-related meetings (but not including Contractor's safety meetings), and as appropriate prepare and circulate copies of minutes thereof.

2. *Safety Compliance:* Comply with Site safety programs, as they apply to RPR, and if required to do so by such safety programs, receive safety training specifically related to RPR's own personal safety while at the Site.

3. *Liaison*

   a. Serve as Engineer's liaison with Contractor. Working principally through Contractor's authorized representative or designee, assist in providing information regarding the provisions and intent of the Contract Documents.

   b. Assist Engineer in serving as Owner's liaison with Contractor when Contractor's operations affect Owner's on-Site operations.

   c. Assist in obtaining from Owner additional details or information, when required for Contractor's proper execution of the Work.

4. *Review of Work; Defective Work*

   a. Conduct on-Site observations of the Work to assist Engineer in determining, to the extent set forth in Paragraph 10.02, if the Work is in general proceeding in accordance with the Contract Documents.

   b. Observe whether any Work in place appears to be defective.

   c. Observe whether any Work in place should be uncovered for observation, or requires special testing, inspection or approval.

5. *Inspections and Tests*

   a. Observe Contractor-arranged inspections required by Laws and Regulations, including but not limited to those performed by public or other agencies having jurisdiction over the Work.

   b. Accompany visiting inspectors representing public or other agencies having jurisdiction over the Work.

6. *Payment Requests:* Review Applications for Payment with Contractor.

7. *Completion*

   a. Participate in Engineer's visits regarding Substantial Completion.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

b. Assist in the preparation of a punch list of items to be completed or corrected.

c. Participate in Engineer's visit to the Site in the company of Owner and Contractor regarding completion of the Work, and prepare a final punch list of items to be completed or corrected by Contractor.

d. Observe whether items on the final punch list have been completed or corrected.

D. The RPR will not:

1. Authorize any deviation from the Contract Documents or substitution of materials or equipment (including "or-equal" items).

2. Exceed limitations of Engineer's authority as set forth in the Contract Documents.

3. Undertake any of the responsibilities of Contractor, Subcontractors, or Suppliers.

4. Advise on, issue directions relative to, or assume control over any aspect of the means, methods, techniques, sequences or procedures of construction.

5 Advise on, issue directions regarding, or assume control over security or safety practices, precautions, and programs in connection with the activities or operations of Owner or Contractor.

6. Participate in specialized field or laboratory tests or inspections conducted off-site by others except as specifically authorized by Engineer.

7. Authorize Owner to occupy the Project in whole or in part.

ARTICLE 11— CHANGES TO THE CONTRACT

11.02 *Change Orders*

SC-11.02.C Add new paragraph immediately after Paragraph 11.02.B:

C. The Engineer or Owner shall contact the Agency for concurrence on each Change Order prior to issuance. All Contract Change Orders must be concurred on (signed) by Agency before they are effective.

11.03 *Work Change Directives*

SC-11.03.A.2 Add new Paragraph 11.03.A.2 immediately after Paragraph 11.03.A, which shall be renamed Paragraph 11.03.A.1:

2. The Engineer or Owner shall contact the Agency for concurrence on each Work Change Directive prior to issuance. Once authorized by Owner, a copy of each Work Change Directive shall be provided by Engineer to the Agency.

11.05 *Owner-Authorized Changes in the Work*

SC-11.05.B Add the following at the end of this paragraph:

For Owner-authorized changes in the Work, the Contractor will provide the Manufacturer's Certification(s) for materials subject to American Iron and Steel requirements except when sole-source is specified, in which case the Engineer will provide the Manufacturer's Certification(s).

11.09 *Change Proposals*

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

SC-11.09.B.2.C Add new paragraph immediately after Paragraph 11.09.B.2.b:

C. **Change orders involving materials subject to American Iron and Steel requirements shall include supporting data (name of Manufacturer, city and state where the product was manufactured, description of product, signature of authorized Manufacturer's representative) in the Manufacturer's Certification Letter, as applicable**.

ARTICLE 12— CLAIMS

No suggested Supplementary Conditions in this Article.

ARTICLE 13— COST OF WORK; ALLOWANCES, UNIT PRICE WORK

13.01 *Cost of the Work*

SC-13.01 Supplement Paragraph 13.01.B.5.c.(2) by adding the following sentence:

The equipment rental rate book that governs the included costs for the rental of machinery and equipment owned by Contractor (or a related entity) under the Cost of the Work provisions of this Contract is the most current edition of **Rental Rate Blue Book For Construction Equipment.**

SC-13.01 Supplement Paragraph 13.01.C.2 by adding the following definition of small tools and hand tools:

a. For purposes of this paragraph, "small tools and hand tools" means any tool or equipment whose current price if it were purchased new at retail would be less than $500.

13.02 *Allowances*

SC-13.02.C Delete paragraph in its entirety and insert "Deleted".

ARTICLE 14— TESTS AND INSPECTIONS; CORRECTION, REMOVAL, OR ACCCEPTANCE OF DEFECTIVE WORK

14.03 *Defective Work*

SC-14.03.G Add new paragraph immediately after Paragraph 14.03.F:

G. Installation of materials that are non-compliant with American Iron and Steel requirements shall be considered defective work.

ARTICLE 15— PAYMENTS TO CONTRACTOR, SET OFFS; COMPLETIONS; CORRECTION PERIOD

15.01 *Progress Payments*

SC-15.01.B.4 Add the following language at the end of paragraph:

No payments will be made that would deplete the retainage, place in escrow any funds that are required for retainage or invest the retainage for the benefit of the Contractor.

SC-15.01.B.5 Add new paragraph immediately after Paragraph 15.01.B.4:

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

5. The Application for Payment form to be used on this Project is EJCDC® C-620. The Agency must approve all Applications for Payment before payment is made.

SC-15.01.B.6 Add new paragraph immediately after Paragraph 15.01.B.5:

6. By submitting an Application for Payment based in whole or in part on furnishing equipment or materials, Contractor certifies that such equipment and materials are compliant with American Iron and Steel requirements. Manufacturer's Certification letter for materials satisfy this requirement. Refer to Manufacturer's Certification Letter provided in these Contract Documents.

SC-15.01.C.2.d Add the following new paragraph immediately after Paragraph 15.01.C.2.c:

a. The materials presented for payment in an Application for Payment comply with American Iron and Steel requirements.

SC-15.01.D.1 Delete paragraph in its entirety and insert the following in its place:

1. The Application for Payment with Engineer's recommendations will be presented to the Owner and Agency for consideration. If both the Owner and Agency find the Application for Payment acceptable, the recommended amount less any reduction under the provisions of Paragraph 15.01.E will become due twenty (20) days after the Application for Payment is presented to the Owner, and the Owner will make payment to the Contractor.

15.02 *Contractor's Warranty of Title*

SC-15.02.A Amend paragraph by striking out the following text: "7 days after".

15.03 *Substantial Completion*

SC-15.03.A Modify by adding the following after the last sentence:

Contractor shall also submit the General (Prime) Contractor's Certification of Compliance certifying that to the best of the Contractor's knowledge and belief all substitutes, equals, and all Iron and Steel products proposed in the Shop Drawings, Change Orders, and Partial Payment Estimates, and those installed for the Project, are either Produced in the United States or are the subject of an approved waiver under Section 746 of Title VII of the Consolidated Appropriations Act of 2017 (Division A - Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2017) and subsequent statutes mandating domestic preference.

SC-15.03.B Add the following new subparagraph to Paragraph 15.03.B:

1. If some or all of the Work has been determined not to be at a point of Substantial Completion and will require re-inspection or re-testing by Engineer, the cost of such re-inspection or re-testing, including the cost of time, travel and living expenses, will be paid by Contractor to Owner. If Contractor does not pay, or the parties are unable to agree as to the amount owed, then Owner may impose a reasonable set-off against payments due under this Article 15.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

15.08 *Correction Period*

SC-15.08 Add the following new Paragraph 15.08.G:

G. The correction period specified as one year after the date of Substantial Completion in Paragraph 15.08.A of the General Conditions is hereby revised to be the number of years set forth in SC-6.01.B.1; or if no such revision has been made in SC-6.01.B, then the correction period is hereby specified to be **two (2)** years after Substantial Completion.

ARTICLE 16— SUSPENSION OF WORK AND TERMINATION

No suggested Supplementary Conditions in this Article.

ARTICLE 17— FINAL RESOLUTIONS OF DISPUTES

17.02 *Arbitration*

SC-17.02 Add the following new paragraph immediately after Paragraph 17.01.

17.02 *Arbitration*

A. All matters subject to final resolution under this Article will be settled by arbitration administered by the American Arbitration Association in accordance with its Construction Industry Arbitration Rules (subject to the conditions and limitations of this Paragraph SC-17.02). Any controversy or claim in the amount of $100,000 or less will be settled in accordance with the American Arbitration Association's supplemental rules for Fixed Time and Cost Construction Arbitration. This agreement to arbitrate will be specifically enforceable under the prevailing law of any court having jurisdiction.

B. The demand for arbitration will be filed in writing with the other party to the Contract and with the selected arbitration administrator, and a copy will be sent to Engineer for information. The demand for arbitration will be made within the specific time required in Article 17, or if no specified time is applicable within a reasonable time after the matter in question has arisen, and in no event will any such demand be made after the date when institution of legal or equitable proceedings based on such matter in question would be barred by the applicable statute of limitations.

C. The arbitrator(s) must be licensed engineers, contractors, attorneys, or construction managers. Hearings will take place pursuant to the standard procedures of the Construction Arbitration Rules that contemplate in-person hearings. The arbitrators will have no authority to award punitive or other damages not measured by the prevailing party's actual damages, except as may be required by statute or the Contract. Any award in an arbitration initiated under this clause will be limited to monetary damages and include no injunction or direction to any party other than the direction to pay a monetary amount.

D. The Arbitrators will have the authority to allocate the costs of the arbitration process among the parties, but will only have the authority to allocate attorneys' fees if a specific Law or Regulation or this Contract permits them to do so.

E. The award of the arbitrators must be accompanied by a reasoned written opinion and a concise breakdown of the award. The written opinion will cite the Contract provisions deemed applicable and relied on in making the award.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

F. The parties agree that failure or refusal of a party to pay its required share of the deposits for arbitrator compensation or administrative charges will constitute a waiver by that party to present evidence or cross-examine witness. In such event, the other party shall be required to present evidence and legal argument as the arbitrator(s) may require for the making of an award. Such waiver will not allow for a default judgment against the non-paying party in the absence of evidence presented as provided for above.

G. No arbitration arising out of or relating to the Contract will include by consolidation, joinder, or in any other manner any other individual or entity (including Engineer, and Engineer's consultants and the officers, directors, partners, agents, employees or consultants of any of them) who is not a party to this Contract unless:

1. the inclusion of such other individual or entity will allow complete relief to be afforded among those who are already parties to the arbitration;

2. such other individual or entity is substantially involved in a question of law or fact which is common to those who are already parties to the arbitration, and which will arise in such proceedings;

3. such other individual or entity is subject to arbitration under a contract with either Owner or Contractor, or consents to being joined in the arbitration; and

4. the consolidation or joinder is in compliance with the arbitration administrator's procedural rules.

H. The award will be final. Judgment may be entered upon it in any court having jurisdiction thereof, and it will not be subject to modification or appeal, subject to provisions of the Laws and Regulations relating to vacating or modifying an arbitral award.

I. Except as may be required by Laws or Regulations, neither party nor an arbitrator may disclose the existence, content, or results of any arbitration hereunder without the prior written consent of both parties, with the exception of any disclosure required by Laws and Regulations or the Contract. To the extent any disclosure is allowed pursuant to the exception, the disclosure must be strictly and narrowly limited to maintain confidentiality to the extent possible.

17.03 *Attorneys' Fees*

SC-17.03 Add the following new paragraph immediately after Paragraph 17.02.

17.03 *Attorneys' Fees*

A. For any matter subject to final resolution under this Article, the prevailing party shall be entitled to an award of its attorneys' fees incurred in the final resolution proceedings, in an equitable amount to be determined in the discretion of the court, arbitrator, arbitration panel, or other arbiter of the matter subject to final resolution, taking into account the parties' initial demand or defense positions in comparison with the final result.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 18— MISCELLANEOUS

SC-18.11 Add new paragraph immediately after Paragraph 18.10:

18.11 ***Tribal Sovereignty***

A. No provision of this Agreement will be construed by any of the signatories as abridging or debilitating any sovereign powers of the [insert name of Tribe] Tribe; affecting the trust-beneficiary relationship between the Secretary of the Interior, Tribe, and Indian landowner(s); or interfering with the government-to-government relationship between the United States and the Tribe.

SC-19 – Add the following new Article 19 immediately after Article 18:

ARTICLE 19— FEDERAL REQUIREMENTS

19.01 ***Agency Not a Party***

A. This Contract is expected to be funded in part with funds provided by Agency. Neither Agency, nor any of its departments, entities, or employees, is a party to this Contract.

19.02 ***Contract Approval***

A. Owner and Contractor will furnish Owner's attorney such evidence as required so that Owner's attorney can complete and execute the "Certificate of Owner's Attorney" (Exhibit G of this Bulletin) before Owner submits the executed Contract Documents to Agency for approval.

B. Agency concurrence is required on both the Bid and the Contract before the Contract is effective.

19.03 ***Conflict of Interest***

A. Contractor may not knowingly contract with a Supplier or Manufacturer if the individual or entity who prepared the Drawings and Specifications has a corporate or financial affiliation with the Supplier or Manufacturer. Owner's officers, employees, or agents shall not engage in the award or administration of this Contract if a conflict of interest, real or apparent, would be involved. Such a conflict would arise when: (i) the employee, officer or agent; (ii) any member of their immediate family; (iii) their partner or (iv) an organization that employs, or is about to employ, any of the above, has a financial interest or other interest in or a tangible personal benefit from the Contractor. Owner's officers, employees, or agents shall neither solicit nor accept gratuities, favors or anything of monetary value from Contractor or subcontractors.

19.04 ***Gratuities***

A. If Owner finds after a notice and hearing that Contractor, or any of Contractor's agents or representatives, offered or gave gratuities (in the form of entertainment, gifts, or otherwise) to any official, employee, or agent of Owner or Agency in an attempt to secure this Contract or favorable treatment in awarding, amending, or making any determinations related to the performance of this Contract, Owner may, by written notice to Contractor, terminate this Contract. Owner may also pursue other rights and remedies that the law or this Contract provides. However, the existence of the facts on which Owner bases such

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

findings shall be an issue and may be reviewed in proceedings under the dispute resolution provisions of this Contract.

B. In the event this Contract is terminated as provided in paragraph 19.04.A, Owner may pursue the same remedies against Contractor as it could pursue in the event of a breach of this Contract by Contractor. As a penalty, in addition to any other damages to which it may be entitled by law, Owner may pursue exemplary damages in an amount (as determined by Owner) which shall not be less than three nor more than ten times the costs Contractor incurs in providing any such gratuities to any such officer or employee.

19.05 ***Small, Minority and Women's Businesses***

A. If Contractor intends to let any subcontracts for a portion of the work, Contractor will take all necessary affirmative steps to assure that minority businesses, women's business enterprises, and labor surplus area firms are used when possible. Affirmative steps will include:

1. Placing qualified small and minority businesses and women's business enterprises on solicitation lists;

2. Assuring that small and minority businesses, and women's business enterprises are solicited whenever they are potential sources;

3. Dividing total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority businesses, and women's business enterprises;

4. Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority businesses, and women's business enterprises;

5. Using the services and assistance, as appropriate, of such organizations as the Small Business Administration and the Minority Business Development Agency of the Department of Commerce.

19.06 ***Anti-Kickback***

A. Contractor shall comply with the Copeland Anti-Kickback Act (40 USC 3145) as supplemented by Department of Labor regulations (29 CFR Part 3, "Contractors and Subcontractors on Public Buildings or Public Works Financed in Whole or in Part by Loans or Grants of the United States"). The Act provides that Contractor or subcontractor shall be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public facilities, to give up any part of the compensation to which they are otherwise entitled. Owner shall report all suspected or reported violations to Agency.

19.07 ***Clean Air Act (42 U.S.C. 7401-7671q.) and the Federal Water Pollution Control Act (33 U.S.C. 1251-1387), as amended***

A. Contractor to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387). Violations must be reported to the federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).

19.08 ***Equal Employment Opportunity***

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

A. The Contract is considered a federally assisted construction contract. Except as otherwise provided under 41 CFR Part 60, all contracts that meet the definition of "federally assisted construction contract" in 41 CFR Part 60-1.3 must include the equal opportunity clause provided under 41 CFR 60-1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30 FR 12319, 12935, 3 CFR Part, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41 CFR part 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."

19.09 ***Byrd Anti-Lobbying Amendment (31 U.S.C. 1352)***

A. Contractors that apply or bid for an award exceeding $100,000 must file the required certification (RD Instruction 1940-Q Exhibit A-1). The Contractor certifies to the Owner and every subcontractor certifies to the Contractor that it will not and has not used federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining the Contract if it is covered by 31 U.S.C. 1352. The Contractor and every subcontractor must also disclose any lobbying with non-federal funds that takes place in connection with obtaining any federal award. Such disclosures are forwarded from tier to tier up to the Owner. Necessary certification and disclosure forms shall be provided by Owner.

19.10 Environmental Requirements

A. When constructing a Project involving trenching and/or other related earth excavations, Contractor shall comply with the following environmental conditions:

1. Wetlands – When disposing of excess, spoil, or other Construction Materials on public or private property, Contractor shall not fill in or otherwise convert wetlands. Floodplains – When disposing of excess, spoil, or other Construction Materials on public or private property, Contractor shall not fill in or otherwise convert 100-year floodplain areas (Standard Flood Hazard Area) delineated on the latest Federal Emergency Management Agency Floodplain Maps, or other appropriate maps, e.g., alluvial soils on

2. NRCS Soil Survey Maps.

3. Historic Preservation - Applicants shall ensure that Contractors maintain a copy of the following inadvertent discovery plan onsite for review:

a. If during the course of any ground disturbance related to any Project, any post review discovery, including but not limited to, any artifacts, foundations, or other indications of past human occupation of the area are uncovered, shall be protected by complying with 36 CFR § 800.13(b)(3) and (c) and shall include the following:

1) All Work, including vehicular traffic, shall immediately stop within a 50 ft. radius around the area of discovery. The Contractor shall ensure barriers are established to protect the area of discovery and notify the Engineer to contact the appropriate RD personnel. The Engineer shall engage a Secretary of the Interior (SOI) qualified professional archeologist to quickly assess the nature and scope of the discovery; implement interim measures to protect

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

the discovery from looting and vandalism; and establish broader barriers if further historic and/or precontact properties, can reasonably be expected to occur.

2) The RD personnel shall notify the appropriate RD environmental staff member, the Federal Preservation Officer (FPO), and State Historic Preservation Office (SHPO) immediately. Indian tribe(s) or Native Hawaiian Organization (NHOs) that have an interest in the area of discovery shall be contacted immediately. The SHPO may require additional tribes or NHOs who may have an interest in the area of discovery also be contacted. The notification shall include an assessment of the discovery provided by the SOI qualified professional archeologist.

3) When the discovery contains burial sites or human remains, the Contractor shall immediately notify the appropriate RD personnel who will contact the RD environmental staff member, FPO, and the SHPO. The relevant law enforcement authorities shall be immediately contacted by onsite personnel to reduce delay times, in accordance with tribal, state, or local laws including 36 CFR Part 800.13; 43 CFR Part 10, Subpart B; and the Advisory Council on Historic Preservation's Policy Statement Regarding treatment of Burial Sites, Human Remains, or Funerary Objects (February 23, 2007).

4) When the discovery contains burial sites or human remains, all construction activities, including vehicular traffic shall stop within a 100 ft. radius of the discovery and barriers shall be established. The evaluation of human remains shall be conducted at the site of discovery by a SOI qualified professional. Remains that have been removed from their primary context and where that context may be in question may be retained in a secure location, pending further decisions on treatment and disposition. RD may expand this radius based on the SOI professional's assessment of the discovery and establish broader barriers if further subsurface burial sites, or human remains can reasonably be expected to occur. RD, in consultation with the SHPO and interested tribes or NHOs, shall develop a plan for the treatment of native human remains.

5) Work may continue in other areas of the undertaking where no historic properties, burial sites, or human remains are present. If the inadvertent discovery appears to be a consequence of illegal activity such as looting, the onsite personnel shall contact the appropriate legal authorities immediately if the landowner has not already done so.

6) Work may not resume in the area of the discovery until a notice to proceed has been issued by RD. RD shall not issue the notice to proceed until it has determined that the appropriate local protocols and consulting parties have been consulted.

7) Inadvertent discoveries on federal and tribal land shall follow the processes required by the federal or tribal entity.

4. Endangered Species – Contractor shall comply with the Endangered Species Act, which provides for the protection of endangered and/or threatened species and critical

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

habitat. Should any evidence of the presence of endangered and/or threatened species or their critical habitat be brought to the attention of Contractor, Contractor will immediately report this evidence to Owner and a representative of Agency. Construction shall be temporarily halted pending the notification process and further directions issued by Agency after consultation with the U.S. Fish and Wildlife Service.

5. Mitigation Measures – The following environmental mitigation measures are required on this Project: [Insert mitigation measures from the Letter of Conditions here].

19.11 ***Contract Work Hours and Safety Standards Act (40 U.S.C. 3701-3708)***

A. Where applicable, for contracts awarded by the Owner in excess of $100,000 that involve the employment of mechanics or laborers, the Contractor will comply with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, the Contractor will compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic will be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

19.12 ***Debarment and Suspension (Executive Orders 12549 and 12689)***

A. A contract award (see 2 CFR 180.220) must not be made to parties listed on the governmentwide exclusions in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 CFR 180 that implement Executive Orders 12549 (3 CFR part 1986 Comp., p. 189) and 12689 (3 CFR part 1989 Comp., p. 235), "Debarment and Suspension." SAM Exclusions contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549.

19.13 ***Procurement of recovered materials***

A. The Contractor will comply with 2 CFR Part 200.322, "Procurement of recovered materials."

19.14 ***American Iron and Steel***

A. Section 746 of Title VII of the Consolidated Appropriations Act of 2017 (Division A - Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2017) and subsequent statutes mandating domestic preference applies an American Iron and Steel requirement to this project. All iron and steel products used in this project must be produced in the United States. The term "iron and steel products" means the following products made primarily of iron or steel: lined or unlined pipes and fittings, manhole covers and other municipal castings, hydrants, tanks, flanges, pipe clamps and restraints, valves, structural steel, reinforced precast concrete, and Construction Materials.

B. The following waivers apply to this Contract:

1. De Minimis,

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2. Minor Components,

3. Pig iron and direct reduced iron.

ARTICLE 20— STATE REQUIREMENTS

20.01 ***Statutory Required Provisions and Requirements***

A. **This Contract is subject to termination pursuant to A.R.S. § 38-511, as may be amended. Pursuant to A.R.S. § 35-394, as may be amended, unless exempt, the Contractor hereby certifies that it is does not use, and agrees not to use during the term of the Contract, any of the following: forced labor of ethnic Uyghurs in the People's Republic of China; any goods or services produced by the forced labor of ethnic Uyghurs in the People's Republic of China; or any contractors, subcontractors, or suppliers that use the forced labor or any goods or services produced by the forced labor of ethnic Uyghurs in the People's Republic of China.**

NOTICE TO PROCEED

Owner:	Town of Jerome	Owner's Project No.:	N/A
Engineer:	PACE	Engineer's Project No.:	B614
Contractor:	Fann Environmental, LLC	Contractor's Project No.:	
Project:	Jerome Wastewater Treatment Plant Improvements		
Contract Name:	Jerome Wastewater Treatment Plant Improvements		
Effective Date of Contract:			

Owner hereby notifies Contractor that the Contract Times under the above Contract will commence to run on **[date Contract Times are to start]** pursuant to Paragraph 4.01 of the General Conditions.

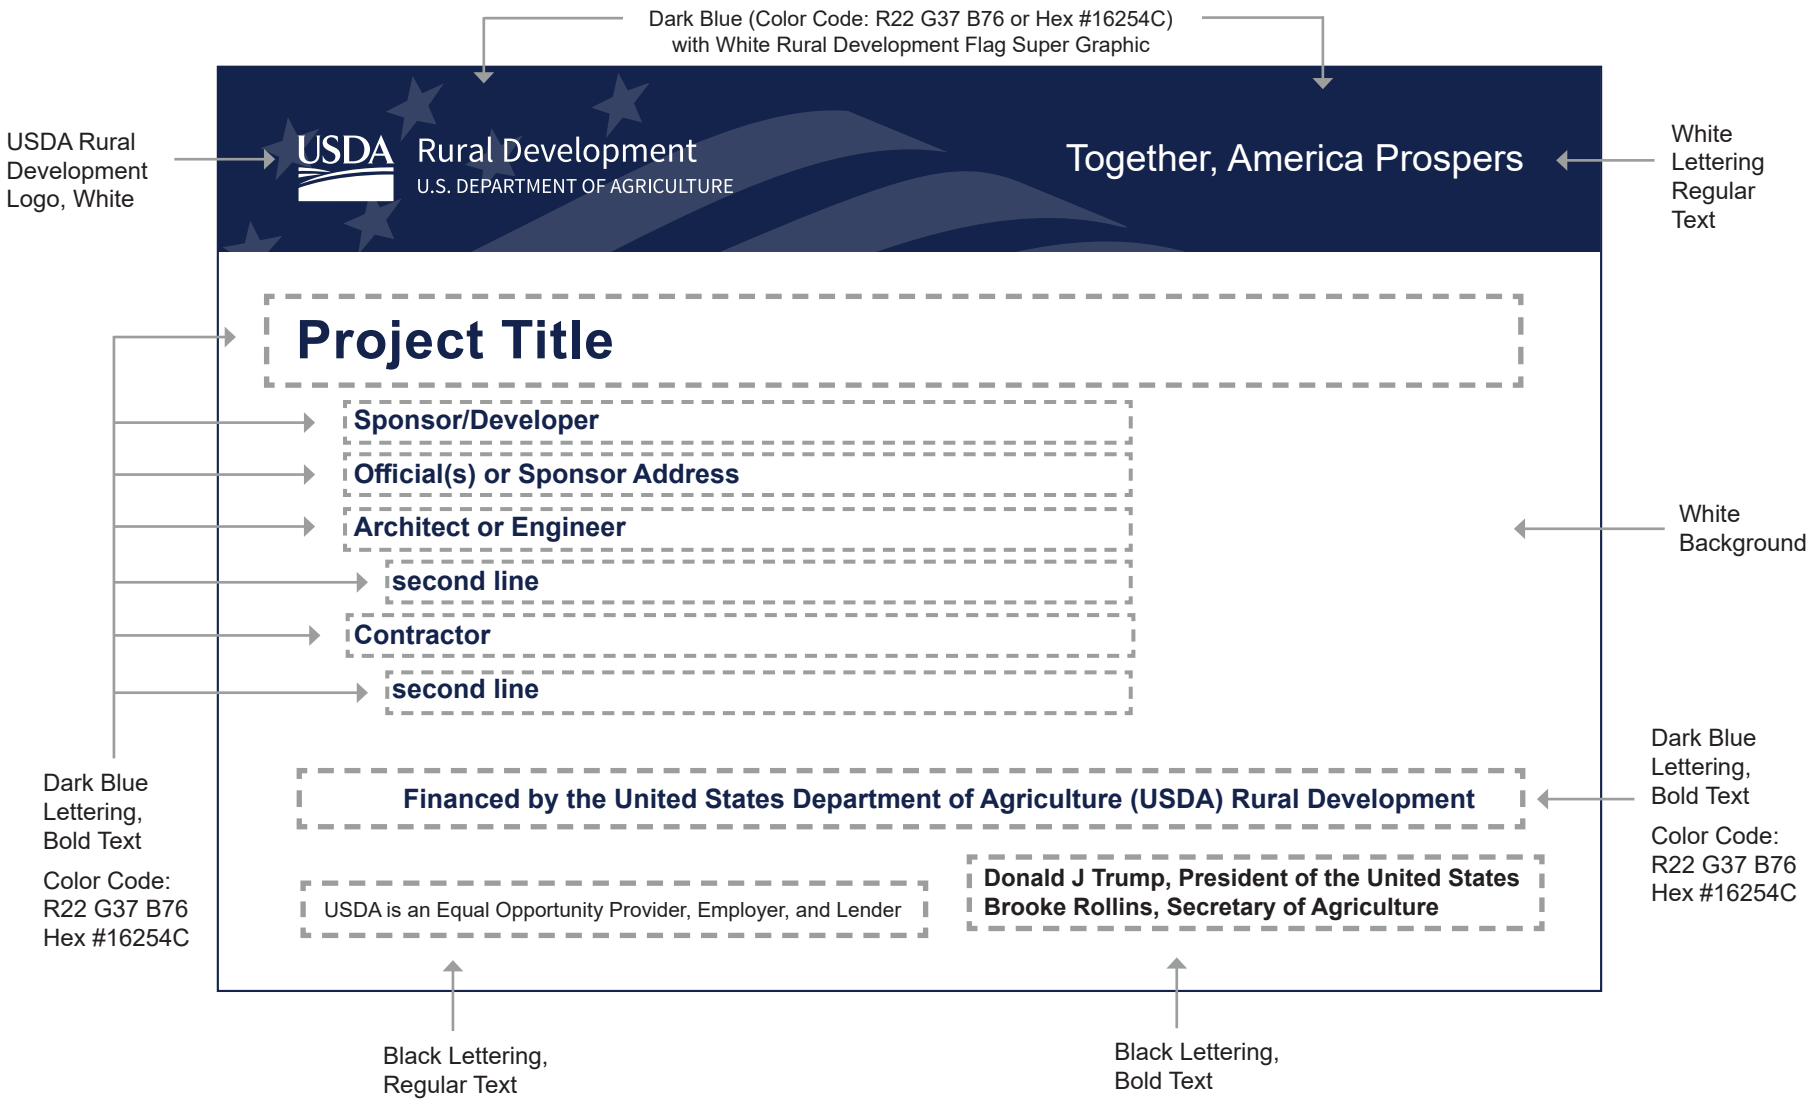
On that date, Contractor shall start performing its obligations under the Contract Documents. No Work will be done at the Site prior to such date.

In accordance with the Agreement: **[Select one of the following two alternatives, insert dates or number of days, and delete the other alternative.]**

The number of days to achieve Substantial Completion is **300** from the date stated above for the commencement of the Contract Times, resulting in a date for Substantial Completion of **[date, calculated from commencement date above]**; and the number of days to achieve readiness for final payment is **330** from the commencement date of the Contract Times, resulting in a date for readiness for final payment of **[date, calculated from commencement date above]**.

Before starting any Work at the Site, Contractor must comply with the following:

- **Provide preliminary schedule**
- **Provide proposed pay application schedule of values for Engineer review**



Owner:	Town of Jerome

GENERAL (PRIME) CONTRACTOR'S CERTIFICATION OF COMPLIANCE

Notes to User: This exhibit is the sample General (Prime) Contractor's Certification of Compliance with the American Iron and Steel requirements to be provided by all General (Prime) Contractors to Engineer for delivery to the Owner at Substantial Completion.

GENERAL (PRIME) CONTRACTOR'S CERTIFICATION OF COMPLIANCE WITH PROVISIONS OF THE AMERICAN IRON AND STEEL REQUIREMENTS OF SECTION 746 OF TITLE VII OF THE CONSOLIDATED APPROPRIATIONS ACT OF 2017 (DIVISION A - AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2017) AND SUBSEQUENT STATUTES MANDATING DOMESTIC PREFERENCE

DATE:

RE: PROJECT NAME
APPLICANT
CONTRACT NUMBER

I hereby certify that to the best of my knowledge and belief all Iron and Steel products installed for this project by my company and by any and all subcontractors and Manufacturers my company has contracted with for this project comply with Section 746 of Title VII of the Consolidated Appropriations Act of 2017 (Division A - Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2017) and subsequent statutes mandating domestic preference or are the subject of a waiver approved by the Secretary of Agriculture or designee.

_____
Name of Construction Company (PRINT)

_____
By Authorized Representative (SIGNATURE)

_____
Title

MANUFACTURER'S CERTIFICATION OF COMPLIANCE

Notes to User: This exhibit is the sample Manufacturer's Certification of Compliance with the American Iron and Steel requirements to be provided by all Manufacturers of American Iron and Steel covered items, to be submitted by Contractor to the Engineer with the corresponding Shop Drawing submittal for delivery to the Owner at Substantial Completion.

EXAMPLE OF A MANUFACTURER'S CERTIFICATION OF COMPLIANCE WITH PROVISIONS OF THE AMERICAN IRON AND STEEL (AIS) REQUIREMENTS OF SECTION 746 OF TITLE VII OF THE CONSOLIDATED APPROPRIATIONS ACT OF 2017 (DIVISION A - AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2017) AND SUBSEQUENT STATUTES MANDATING DOMESTIC PREFERENCE

Date:

Company Name:

Company Address:

Subject: American Iron and Steel (AIS) Certification for Project (X), Owner's Name, and Contract Number

I, (company representative), certify that the (melting, bending, galvanizing, cutting, etc.) processes for (manufacturing or fabricating) the following products and/or material shipped or provided for the subject project is in full compliance with the AIS requirement as mandated by Section 746 of Title VII of the Consolidated Appropriations Act of 2017 (Division A - Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2017) and subsequent statutes mandating domestic preference.
Item, Products and/or Materials, and location of delivery (City, State):

1.

2.
Such processes for AIS took place at the following location:

_____
(City, State)

_____
Authorized Company Representative Signature

Notes: Authorized signature will be Manufacturer's representative, not the material distributor or Supplier. If any of the above compliance statements change while providing materials to this project, please immediately notify the person(s) who is requesting to use your product(s).

CERTIFICATE OF SUBSTANTIAL COMPLETION

Owner:	Town of Jerome	Owner's Project No.:	N/A
Engineer:	PACE	Engineer's Project No.:	B614
Contractor:	Fann Environmental, LLC	Contractor's Project No.:	
Project:	Jerome Wastewater Treatment Plant Improvements		
Contract Name:	Jerome Wastewater Treatment Plant Improvements		

This ☐ Preliminary ☐ Final Certificate of Substantial Completion applies to:

☐ All Work ☐ The following specified portions of the Work:

[Describe the portion of the work for which Certificate of Substantial Completion is issued]

Date of Substantial Completion: **[Enter date, as determined by Engineer]**

The Work to which this Certificate applies has been inspected by authorized representatives of Owner, Contractor, and Engineer, and found to be substantially complete. The Date of Substantial Completion of the Work or portion thereof designated above is hereby established, subject to the provisions of the Contract pertaining to Substantial Completion. The date of Substantial Completion in the final Certificate of Substantial Completion marks the commencement of the contractual correction period and applicable warranties required by the Contract.

A punch list of items to be completed or corrected is attached to this Certificate. This list may not be all-inclusive, and the failure to include any items on such list does not alter the responsibility of the Contractor to complete all Work in accordance with the Contract Documents.

Amendments of contractual responsibilities recorded in this Certificate should be the product of mutual agreement of Owner and Contractor; see Paragraph 15.03.D of the General Conditions.

The responsibilities between Owner and Contractor for security, operation, safety, maintenance, heat, utilities, insurance, and warranties upon Owner's use or occupancy of the Work must be as provided in the Contract, except as amended as follows:

Amendments to Owner's Responsibilities: ☐ None ☐ As follows:

[List amendments to Owner's Responsibilities]

Amendments to Contractor's Responsibilities: ☐ None ☐ As follows:

[List amendments to Contractor's Responsibilities]

The following documents are attached to and made a part of this Certificate:

[List attachments such as punch list; other documents]

This Certificate does not constitute an acceptance of Work not in accordance with the Contract Documents, nor is it a release of Contractor's obligation to complete the Work in accordance with the Contract Documents.

NOTICE OF ACCEPTABILITY OF WORK

Owner:	Town of Jerome	Owner's Project No.:	N/A
Engineer:	PACE	Engineer's Project No.:	B614
Contractor:	Fann Environmental, LLC	Contractor's Project No.:	
Project:	Jerome Wastewater Treatment Plant Improvements		
Contract Name:	Jerome Wastewater Treatment Plant Improvements		
Notice Date:	Effective Date of the Construction Contract:		

The Engineer hereby gives notice to the Owner and Contractor that Engineer recommends final payment to Contractor, and that the Work furnished and performed by Contractor under the Construction Contract is acceptable, expressly subject to the provisions of the Construction Contract's Contract Documents ("Contract Documents") and of the Agreement between Owner and Engineer for Professional Services dated **July 28, 2022** ("Owner-Engineer Agreement"). This Notice of Acceptability of Work (Notice) is made expressly subject to the following terms and conditions to which all who receive and rely on said Notice agree:

1. This Notice has been prepared with the skill and care ordinarily used by members of the engineering profession practicing under similar conditions at the same time and in the same locality.
2. This Notice reflects and is an expression of the Engineer's professional opinion.
3. This Notice has been prepared to the best of Engineer's knowledge, information, and belief as of the Notice Date.
4. This Notice is based entirely on and expressly limited by the scope of services Engineer has been employed by Owner to perform or furnish during construction of the Project (including observation of the Contractor's Work) under the Owner-Engineer Agreement, and applies only to facts that are within Engineer's knowledge or could reasonably have been ascertained by Engineer as a result of carrying out the responsibilities specifically assigned to Engineer under such Owner-Engineer Agreement.
5. This Notice is not a guarantee or warranty of Contractor's performance under the Construction Contract, an acceptance of Work that is not in accordance with the Contract Documents, including but not limited to defective Work discovered after final inspection, nor an assumption of responsibility for any failure of Contractor to furnish and perform the Work thereunder in accordance with the Contract Documents, or to otherwise comply with the Contract Documents or the terms of any special guarantees specified therein.
6. This Notice does not relieve Contractor of any surviving obligations under the Construction Contract, and is subject to Owner's reservations of rights with respect to completion and final payment.

END OF SECTION

SECTION 00 7000 – CONDITIONS OF THE CONTRACT

PART 1 – GENERAL

1.01 CONTRACT DOCUMENTS

The Contract Documents which constitute the contract between the OWNER and the CONTRACTOR with regard to the subject matter as set forth in Section I of such contract ("Contract Agreement") and include the Contract Agreement, plans, drawings, and the technical specifications.

All terms and conditions established in the Contract Agreement shall supersede all general conditions of these specifications to be followed in the event of any conflict or discrepancies.

1.02 DEFINITIONS AND MEANINGS OF TERMS

Whenever in the Contract Documents the following terms or pronouns referring to them are used, the intent and meaning shall be interpreted as follows which shall be applicable to both the singular and plural thereof:

A. The Contract shall mean the Contract executed by the OWNER and the CONTRACTOR, of which these General Conditions form a part; the terms Contract and Agreement are synonymous.

B. The term OWNER shall mean the respective party to the Contract; the OWNER being the Town of Jerome. The term OWNER may also mean consultants, engineers, or other professionals contracted by the OWNER to review, supervise, or consult on the project.

C. The term County shall mean Yavapai County, AZ.

D. The term CONTRACTOR shall mean the respective party to the contract.

E. The term SUBCONTRACTOR shall mean any individual, partnership or corporation having a direct contract with the CONTRACTOR to perform any part of the work.

F. The term ENGINEER shall mean Pacific Advanced Civil Engineering, Inc. (PACE).

G. Addenda shall mean written or graphic instruments issued prior to the execution of the Agreement which modify or interpret the Contract Documents, Final Design Plans, by additions, deletions, clarifications, or corrections.

H. Bonds shall mean Performance and Payment Bonds and other instruments of security, furnished by the CONTRACTOR and its surety in accordance with the Contract Documents.

I. Change Order shall mean a written order to the CONTRACTOR authorizing an addition, deletion, or revision in the WORK within the general scope of the Contract Documents, or authorizing an adjustment in the Contract price or Contract time.

J. Contractual Agreement shall mean the signed agreement between the OWNER and the CONTRACTOR for the work intended.

K. Contract Documents shall have the meaning described in Section 1.01 herein.

L. Contract price shall mean the total monies payable to the CONTRACTOR under the terms and conditions of the Contract Documents.

M. Contract time in days shall mean the number of consecutive calendar days stated in the Contract Documents for the completion of the Work.

N. Drawings shall mean the part of the Contract Documents, which show the characteristics and scope of the Work to be performed and which have been prepared or approved by the ENGINEER.

O. Notice to proceed shall mean written communication issued by the OWNER to the CONTRACTOR authorizing him to proceed with the Work and establishing the date of commencement of the Work.

P. Project shall mean the undertaking to be performed as provided in the Contract Documents.

Q. Submittals shall mean all drawings, diagrams, illustrations, brochures, schedules, and other data which are prepared by the CONTRACTOR, a subcontractor, manufacturer, supplier, or distributor, which illustrate how specific portions of the Work shall be fabricated or installed; the terms shop drawings and submittals are synonymous.

R. Specifications shall mean a part of the Contract Documents consisting of written descriptions of a technical nature of materials, equipment, construction systems, standards, and workmanship.

S. Substantial completion shall have the meaning defined in the Contract Agreement.

T. Suppliers shall mean any person, supplier or organization who supplies materials or equipment for the Work, including that fabricated to a special design, but who does not perform labor at the site.

U. Work shall mean all (i) obligations, responsibilities and duties undertaken by the CONTRACTOR in order to successfully construct, complete and operate (for Startup Completion) the Project, including all labor, materials, equipment and other incidentals, and the furnishing thereof, (ii) Design and Engineering Services, (iii) Training Services, and (iv) Initial Operations, pursuant to the Contract Documents.

V. Written notice shall mean any notice to any party of the Agreement relative to any part of this Agreement in writing and considered delivered and the service thereof completed, when posted by certified or registered mail to the said party at his last given address, or delivered in person to said party of his authorized representative on the Work.

W. Engineering Supplemental Information (ESI) shall mean written communications issued by the ENGINEER to the CONTRACTOR providing the CONTRACTOR with additional clarifications of the Contract Documents that the ENGINEER deems necessary to ensure the design intent.

X. Request for Information (RFI) shall mean written communications issued by the CONTRACTOR to the ENGINEER requesting additional information or clarification regarding a specific item in the Contract Documents.

1.03 CONTRACTOR'S RESPONSIBILITY

A. General: It is the responsibility of the CONTRACTOR and each subcontractor to visit the site and satisfy himself as to the various existing conditions affecting the work as required.

B. Underground Utilities: The information shown on the drawings was obtained from drawings furnished by the OWNER, and surveys furnished to the OWNER. The CONTRACTOR shall make such investigation as deemed necessary to be satisfied as to the actual location, size, type of material, buried depth, and other factors relating to these services.

1.04 PERMITS, FEES, AND SALES TAX

A. The CONTRACTOR shall submit the required fees, drawings, and application for the applicable permits prior to commencement of work.

B. A summary of local permits are as follows:
   1. Yavapai County
      i. Building Permit
      ii. Grading Permit

2. SWPPP – NOI, BMP Plan & Monitoring Plan in accordance with these Specifications.
3. Dust Control – in accordance with these Specifications.
4. This Permit summary is provided for convenience to the CONTRACTOR and does not relieve the CONTRACTOR from the responsibility of obtaining any additional required Permits not listed for the construction of this facility.

C. CONTRACTOR shall pay all sales tax applicable to the work.

1.05 PRE-CONSTRUCTION MEETING

A. General: Before issuance of Notice to Proceed, a pre-construction meeting shall be held at the location, date and time designated by ENGINEER and OWNER. Attendees shall include the ENGINEER, OWNER's representatives, General CONTRACTOR's project manager and field superintendent, and representatives from each subcontractor for the project as appropriate.

1.06 CONSTRUCTION PROGRESS MEETINGS

A. Progress meetings shall be held according to the agreed upon schedule. All matters bearing on progress and performance of the work since preceding progress meeting shall be discussed and resolved including, without limitation, any previously unresolved matters, deficiencies in the work or methods being employed for the work, and problems, difficulties, or delays which may be encountered.

1.07 PROTECTION OF WORK

A. CONTRACTOR shall provide all protection required to ensure that all work completed will not be harmed.

B. The CONTRACTOR may at his option and expense install any lawful security measures he deems necessary to protect his materials, equipment, or finished work. Type of security devices or quantity shall be the sole responsibility of the CONTRACTOR. The CONTRACTOR is to provide security and protect the project until the OWNER has occupied the space or OWNER has accepted the space.

C. Protection:
1. The CONTRACTOR shall be solely responsibility for the protection of all materials and work.
2. The CONTRACTOR shall include in his proposal the cost of any temporary partitions, sheathing, plastic covering, etc., as may be required to maintain affected areas. Remove all such temporary work at the proper time during the construction period and repair all damage related to same.
3. The CONTRACTOR is solely responsible for the protection of the area in which work is being performed.
4. Provide construction fencing as required to secure the site in accordance with these Specifications.

1.08 ACCESS TO SITE

A. All access to the site by the General CONTRACTOR, Subcontractors, workmen, material/equipment suppliers, etc., shall be via approved access locations as designated by the OWNER. All vehicular or equipment activity shall be strictly confined to the construction limits as indicated by OWNER.

B. Remove all temporary construction and temporary facilities at close of the job or when no longer needed.

1.09 MATERIALS TESTING

A. All materials to be incorporated into the work shall be subject to sampling, testing, and approval as required by specifications. OWNER shall be responsible for retaining the services of an independent testing agency for special inspections.

B. All materials and/or equipment shall be handled in such a manner as to preserve their quality and fitness for the work.

C. Unless otherwise specified, samples and tests shall be made in accordance with either: The Standard Methods of AASHTO, ASTM, ASME, or ADOT which were in effect and published at the time of advertising for bids. The laboratory responsible for the test(s) shall furnish at least one copy of the test results to the CONTRACTOR, the ENGINEER, and to the appropriate material supplier.

D. All materials and/or equipment not conforming to the requirements of the Specifications, whether in place or not, will be rejected. Rejected materials and/or equipment shall be removed immediately from the site of work unless otherwise permitted by the ENGINEER. No rejected material and/or equipment, the defects of which have been subsequently corrected, shall be used until approved in writing by the ENGINEER. CONTRACTOR shall be responsible for re-testing of all rejected materials.

1.10 SPECIAL INSPECTIONS

A. Various categories for inspection/observation of work progress during the course of construction are listed, but not limited to specifications and notes in the drawings. The OWNER requires on-site observation of the work at these various stages prior to covering the work. A list of such inspections will be reviewed at the Pre-Construction Conference and subsequent job meetings, and it is understood that the CONTRACTOR will not cover work until such observation has been completed. The OWNER and OWNER representatives will be responsible for reasonable cooperation with CONTRACTOR requests for observation of the work. The CONTRACTOR shall include anticipated observation requests at weekly update of scheduled activities.

1.11 PRIOR APPROVALS

A. If the General or Prime CONTRACTOR wishes to use items of equipment and/or materials other than those identified in the drawings or specifications, a written request for approval shall be submitted to the ENGINEER prior to the confirmation of contract price. Any request submitted after this time are not under obligation to be accepted. Request from subcontractors will not be considered.

B. Proposed substitutions that have not received prior approval are undertaken at the CONTRACTOR’s risk to be deemed equivalent during the construction submittal process.

C. Each request shall include all basic data and characteristics clearly legible. The specified item as well as the proposed item shall be formatted in such manner that a direct comparison can be readily made. ENGINEER shall not be required to perform research to accomplish the comparison. It is the bidder’s responsibility to submit complete descriptive and technical information for the ENGINEER and OWNER to perform a complete and proper appraisal.

D. If alternate manufacturers are accepted, the CONTRACTOR shall be responsible for any and all re-design or re-engineering required to accommodate alternate products. Change order proposals that add cost to the project as the result of redesign requirements for alternate manufacturers, or as the result of alternate manufacturers that do not meet the requirements of the construction documents, will not be accepted.

1.12 FINAL DESIGN PLANS

A. The intent of the Final Design Plans is that the CONTRACTOR shall furnish all labor, materials, tools, equipment, and transportation necessary for the proper execution of the Work in accordance with the Contract Documents and all incidental work necessary to complete the project in an acceptable manner, ready for use, occupancy, or operation by the OWNER.

B. The CONTRACTOR shall keep one set of the Final Design Plans on the site of the work. This set shall be kept current by the addition of all reviewed changes, addenda, and amendments thereto.

C. The Final Design Plans are intended to be explanatory to each other, but should any discrepancy appear or any misunderstanding arise as to the importance of anything contained in either, the CONTRACTOR shall obtain the necessary interpretation from the ENGINEER. Corrections of errors or omissions in the Final Design Plans may be made by the CONTRACTOR; when such corrections are necessary for the proper fulfillment of their intention. However, any changes or corrections to be performed after Notice to Proceed shall require the approval of both the ENGINEER and the CONTRACTOR.

D. All work or materials shown on the Plans and not mentioned in the Specifications, or any work specified and not shown on the Plans, shall be furnished, performed, and done by the CONTRACTOR as if same were both mentioned in the Specifications and shown on the Drawings. Conflicts or discrepancies within the plans and/or specifications and between the plans and specifications, the stricter interpretation shall apply unless approved by the Engineer of Record.

1.13 SUBMITTAL/SHOP DRAWINGS

A. The CONTRACTOR shall submit shop and working drawings of concrete reinforcement, structural details, piping layout, wiring, materials, and equipment fabricated especially for the Contract, and materials and equipment for which such drawings are specifically requested within these Contract Documents.

B. Such drawings shall show the principal dimensions, weight, structural and operating features, space required, clearances, type and/or brand of finish or shop coat, grease fittings, etc. depending on the subject of the drawing. When it is customary to do so, when the dimensions are of particular importance, or when so specified, the drawings shall be certified by the manufacturer or fabricator as correct for the Contract.

C. When so specified or if considered by the ENGINEER to be acceptable, manufacturer's specifications, catalog data, descriptive matter, illustrations, etc., may be submitted in place of shop and working drawings. In such case, the requirements shall be as specified for shop and working drawings, insofar as possible, except that the submission shall be per Section 01 3300 – Submittal Procedures of these Specifications.

D. No material or equipment shall be purchased or fabricated especially for the Contract until the required shop and working drawings have been submitted as herein above provided and reviewed for conformance to the Contract requirements by the ENGINEER. All such materials and equipment and the work involved in their installation or incorporation into the Work shall then be as shown in and represented by said drawings.

E. Until the necessary review has been made, the CONTRACTOR shall not proceed with any construction portion of the Work, the design or details of work, materials, equipment, or other features for which review is required.

F. All shop and working drawings shall be prepared on standard size, 11-inch by 17-inch sheets except those, which are made by changing existing standard shop or working drawings. All drawings shall be clearly marked with the names of the Project Name,

CONTRACTOR, and building, equipment, or structure to which the drawing applies, and shall be suitably numbered.

G. The review of shop and working drawings hereunder will be general only, and nothing contained in these general conditions shall relieve, diminish, or alter in any respect the responsibilities of the CONTRACTOR under the Contract Documents and in particular, the specific responsibility of the CONTRACTOR for details and dimensions necessary for proper fitting and construction of the work as required by the Contract and for achieving the result and performance specified there under.

1.14 STANDARD SPECIFICATIONS

A. Where standard specifications, such as those of the American Society for Testing and Materials, the American National Standards Institute, the American Water Works Association, the American Association of State Highway and Transportation Officials, the Federal Aviation Agency, the Federal Specifications, etc. are referred to in the Specifications and Contract Documents and on the Drawings, said references shall be construed to mean the latest amended and/or revised versions of the said standard or tentative specification.

1.15 SPECIFIC BRANDS, MAKERS OR MANUFACTURERS

A. Wherever in the Specifications one or more specific brands, makers or manufacturers are set out and qualified by the "or equal" clause, it is intended to denote the quality standard of the article desired, but unless otherwise noted does not restrict the CONTRACTOR to the specific brand, make or manufacturer.

1.16 "OR EQUAL" CLAUSE

A. Whenever the words "or approved equal," or "or equal," or "similar to," etc., appear in the Specifications, they shall be interpreted to mean an item of material or equipment that, in the opinion of the ENGINEER is similar to that named, suited to the same use, capable of performing the same function as that named, has a record of service equal to that named, and is equal in quality, capacity and/or efficiency to that named.

B. For an “approved equal” equipment, the CONTRACTOR shall submit a Submittal Review Deposit, in the form of a certified bank check in the amount of $2,000 made payable to the OWNER. This deposit will be used for Engineer’s review of substitute equipment. The Engineer’s review time will be deducted at a rate of $l50.00 per hour for reviewing substitution requests, regardless of whether the substitution is approved or rejected. The OWNER will return any unused funds to the petitioner within 30 days of the bid date.

1.17 SAFETY

A. The CONTRACTOR shall take all necessary precautions and provide all necessary safeguards to prevent personal injury and property damage. The CONTRACTOR shall provide protection for all persons including but not limited to his employees and employees of other contractors or subcontractors; members of the public; and employees, agents, and representatives of the OWNER, and regulatory agencies that may be on or about the Work. The CONTRACTOR shall provide protection for all public and private property including but not limited to structures, pipes, and utilities, above and below the ground.

B. The CONTRACTOR shall provide and maintain all necessary safety equipment such as fences, barriers, signs, lights, walkways, guards and fire prevention and fire-fighting equipment and shall take such other action as is required to fulfill his obligations under this subsection.

C. The CONTRACTOR shall comply with all federal, state, and local laws, ordinances, rules and regulations and lawful orders of authorities having jurisdiction for the safety of persons and protection of property.

D. The CONTRACTOR shall designate a responsible member of his organization at the site whose duty shall be the prevention of accidents. This responsible person shall have the authority to take immediate action to correct unsafe or hazardous conditions and to enforce safety precautions and programs.

1.18 MATERIALS – SAMPLES – REVIEW

A. Unless otherwise expressly provided on the Drawings or in any of the other Contract Documents, only new materials and equipment shall be incorporated in the Work. All materials and equipment furnished by the CONTRACTOR to be incorporated in the Work shall be subject to the review of the ENGINEER. No material shall be processed or fabricated for the Work or delivered to the Work site without prior concurrence of the ENGINEER.

B. Facilities and labor for the storage, handling, and inspection of all materials and equipment shall be the responsibility of the CONTRACTOR. Defective materials and equipment shall be identified to the ENGINEER and removed immediately from the site of the Work.

C. If the ENGINEER so requires, either prior to or after commencement of the Work, the CONTRACTOR shall submit samples of materials for such special tests, as the ENGINEER deems necessary to demonstrate that they conform to the Specifications.

1.19 SANITARY FACILITIES

A. The CONTRACTOR shall provide adequate sanitary facilities for the use of those employed on the Work. Such facilities shall be made available when the first employees arrive on the site of the Work, shall be properly secluded from public observation, and shall be constructed and maintained during the progress of the Work in suitable numbers and at such points and in such manner as may be required.

B. The CONTRACTOR shall maintain the sanitary facilities in a satisfactory and sanitary condition at all times and shall enforce their use. He shall rigorously prohibit the committing of nuisances on the site of the Work, on the lands of the OWNER, or on adjacent property.

1.20 EMPLOYMENT QUALIFICATIONS

A. No person under the age of eighteen (18) years and no convict labor shall be employed to perform any work under this Contract. No person whose age or physical condition is such as to make his employment dangerous to his health or safety or to the health or safety of others shall be employed to perform any work under this Contract, provided that this shall not operate against the employment of physically handicapped persons, otherwise employable, where such persons may be safely assigned to work which they can ably perform. There shall be no discrimination because of race, creed, color, sex, or political affiliation in the employment of persons for work under this Contract.

1.21 WORK ON "PRIVATE PROPERTY"

A. Private property is defined as property other than that belonging to the OWNER. Highway and railroad rights-of-way, public parks, school yards and other such properties shall be considered "private properties" for the purpose of this Paragraph.

B. In connection with water line, sewer line, gas line or similar work performed on "private property," the CONTRACTOR shall confine his equipment, the storage of materials and the operations of his workman to the limits indicated on the Drawings, or to lands and rights-of-way provided for the Project by the OWNER, and shall take every precaution to avoid damage to the buildings, grounds and facilities of the OWNER or private property.

C. Fences, walls, hedges, shrubs, etc., shall be carefully removed, preserved, and replaced when the construction is completed. Grassed areas, other than lawns, shall be graded, fertilized, and seeded when construction is completed and in accordance with the requirements of the technical Specifications. Where ditches or excavations cross lawns, the sod shall be removed carefully and replaced when the backfilling has been completed. If sod is damaged or not handled properly, it shall be replaced with new sod equal to existing sod at the CONTRACTOR's expense. When construction is completed, the facilities and grounds of the OWNER's property shall be restored to as good or better condition than found as quickly as possible at the CONTRACTOR's expense.

D. When directed by the OWNER, large trees or other facilities that cannot be preserved and replaced shall be removed by the CONTRACTOR. The OWNER will assume the responsibility for settling with the property OWNER for the loss of said trees or facilities. The CONTRACTOR shall be solely and entirely responsible for any damage to all other trees or facilities.

E. Foundations, adjacent to where an excavation is to be made below the bottom of the foundation, shall be supported by shoring, bracing, or underpinning as long as the excavation shall remain open, or thereafter if required to insure the stability of the foundation and the CONTRACTOR shall be held strictly responsible for any damage to said foundations.

1.22 LANDS FOR WORK

A. The OWNER will provide the lands upon which the work under this Contract is to be done or the necessary easements over said lands to include sufficient space for the proper execution of the work, together with right of access to same. The OWNER will provide the CONTRACTOR with information, which delineates and describes the lands owned and rights-of-way acquired. The OWNER shall provide land required for storage of construction materials and for any temporary construction facilities for the storage of equipment. The CONTRACTOR will furnish his own power and water supply unless otherwise specifically set out herein or in the contract documents.

1.23 INTERFERENCE WITH AND PROTECTION OF STREETS

A. The CONTRACTOR shall not close or obstruct any portion of a street, road, or private way without obtaining permits therefore from the proper authorities. If any street, road, or private way shall be rendered unsafe by the CONTRACTOR's operations, he shall make such repairs or provide such temporary ways or guards as shall be acceptable to the proper authorities.

B. Streets, roads, private ways, and walks not closed shall be maintained passable and safe by the CONTRACTOR, who shall assume and have full responsibility for the adequacy and safety of provisions made therefore.

C. The CONTRACTOR shall, at least twenty-four (24) hours in advance, notify the Police and Fire Departments in writing, if the closure of a street or road is necessary. He shall cooperate with the Police Department in the establishment of alternate routes and shall provide adequate detour signs, plainly marked and well lighted, in order to minimize confusion.

D. All excavated materials and equipment to be incorporated in the Work shall be placed so as not to injure any part of the Work or existing facilities and so that free access can be had at all times to all parts of the Work and to all public utility installations in the vicinity of the Work. Materials and equipment shall be kept neatly piled and compactly stored in such locations as will cause a minimum of inconvenience to public travel and adjoining OWNERs, tenants, and occupants.

1.24 EXISTING UTILITIES

A. Special precautions shall be taken by the CONTRACTOR to avoid damage to existing overhead and underground utilities owned and operated by the OWNER or by public or private utility companies.

B. Before proceeding with the Work, the CONTRACTOR shall confer with all public or private companies, agencies or departments that own and operate utilities in the vicinity of the Construction Work. The purpose of the conference, or conferences, shall be to notify said companies, agencies, or departments of the proposed construction schedule, verify the location of, and possible interference with, the existing utilities that are shown on the Drawings, arrange for necessary suspension of service, and arrange to locate and avoid interference with all utilities (including house and any building connections) that are not shown on the Drawings.

C. The CONTRACTOR shall locate all unknown metallic hazards, namely buried pipe, metals, etc., by using a pipe locator. The pipe locator shall immediately precede the trench ditching and all hazards located shall be marked in such a manner as to notify the machine operator of such hazard.

D. Where existing utilities or appurtenant structures, either underground or above-ground, are encountered, they shall not be displaced or molested unless necessary, and in such case shall be replaced in as good or better condition than found as quickly as possible. Relocation and/or replacement of all utilities and appurtenant structures to accommodate the construction work shall be at cost to the OWNER, unless such relocation and/or replacement is by statute or agreement the responsibility of the CONTRACTOR.

1.25 FINAL CLEAN-UP

A. The Work will not be considered as completed until all final clean up has been done by the CONTRACTOR.

PART 2 – PRODUCTS (NOT USED)

PART 3 – EXECUTION (NOT USED)

END OF SECTION

SECTION 01 1100 – SUMMARY OF WORK

PART 1 – GENERAL

1.01 THE REQUIREMENT

A. The WORK to be performed under this Contract shall consist of furnishing parts, tools, equipment, materials, supplies and manufactured articles, and furnishing all labor, transportation, and services, including fuel, power, water, and essential communications, and performing all work or other operations required for the fulfillment of the Contract in strict accordance with the Contract Documents. The WORK shall require that all work, materials, and services not expressly indicated or called for in the Contract Documents, which may be necessary for the complete and proper construction of the WORK in good faith shall be provided.

B. The WORK will conform to the Maricopa Association of Governments (MAG) Uniform Standard Details and Specifications, as well as Yavapai County Standards. The most stringent will govern.

1.02 WORK COVERED BY CONTRACT DOCUMENTS

A. The WORK of this Contract comprises construction, installation, and/or modification of the Jerome Wastewater Treatment Plant and Sewer Main. The modifications and improvements shall include, but are not limited to the following:

1. The work shall include civil, architectural, mechanical, structural, and electrical and control work shown in the construction documents.
2. All work on this project will be coordinated with the Town's Engineering, Public Works, and the WWTP Operational staff;
3. Site grading and drainage improvements;
4. Installation of new 12-inch FPVC gravity sewer main,
5. Installation of 11 new 48-inch sewer manholes where indicated on the plans;
6. Construction of a new access roadway, including all grading and drainage work;
7. Installation of new package headworks screening equipment;
8. Installation of (2) Sequencing Batch Reactors (SBR):
    a. Construction of two new 54,000-gallon SBR basins, complete with all piping and piping appurtenances, valving, safety guard rail system, pumps and submersible mixers, and floating decanter valve;
    b. Construction of one new aerobic digester basin, complete will all equipment, pumps, piping and piping appurtenances, valving, and safety guardrail system;
    c. Construction of one new 9,075-gallon post-SBR equalization basin, complete will all equipment, flow meters, valving, piping and piping appurtenances;
    d. Installation of SBR aeration equipment, complete with all blowers, piping and piping appurtenances, valving, and instrumentation;
    e. Installation of new local SBR control panel;
9. Removal and demolition of existing wastewater equipment and components where indicated on the plans. Existing equipment shall be removed with the utmost care and returned to the Town;
10. Installation of new Sludge Dewatering Equipment, complete with piping and piping appurtenances, chemical/polymer supply equipment, air compressor, valving, controls, and instrumentation;
11. Construction of new 5,000-gallon Chlorine Contact Chamber, complete with piping and piping appurtenances, valving, gates, and instrumentation;
12. Installation of chlorination and dechlorination chemical dosing equipment, complete with piping and piping appurtenances, and instrumentation;

13. Construction of two new sludge drying beds, complete with piping and appurtenances, valving, and liner;
14. Construction of a new emergency overflow equalization basin, complete with piping and piping appurtenances, valving, and liner;
15. Installation of one new packaged overflow lift station;
16. Installation of one new drying bed and drain lift stations, complete with all mechanical, electrical, and controls and instrumentation equipment;
17. Upgrade the existing WWTP Electrical Service, and install a new power distribution panel, ATS, and Emergency Diesel Generator;
18. Construction of new WWTP Blower Building structural, mechanical, and electrical elements. Installation of new building, with architectural and mechanical/ventilation and building plumbing components;
19. Installation per Geotechnical Evaluation and Report in Appendix A of these Specifications;
20. Testing, commissioning, and startup of the new equipment and improved process areas within the plant.
21. Process Control programming and integration, shall be performed by a qualified Instrumentation and Control INTEGRATOR (I&C INTEGRATOR). The I&C INTEGRATOR shall furnish field instrumentation and controls as identified and listed in the applicable Sections of Division 40 – Process Integration. The I&C INTEGRATOR shall also be responsible for landing the wiring of these instruments at the PLC's and calibration and programming of the instrumentation. The CONTRACTOR shall be responsible for the installation of conduits, wires, and all required tags. The CONTRACTOR shall also be responsible for the installation of the instruments and landing all field wiring to the instruments.

B. The WORK includes obtaining any permits related or required by the Contract.

1.03 WORK BY OTHERS

A. Where two (2) or more Contracts are being performed at one time on the same Site or adjacent land in such manner that work under one (1) Contract may interfere with work under another, the sequence and order of the WORK in either or both Contracts to the agreement of both contracting entities shall be determined. When the Site of one (1) Contract is the necessary or convenient means of access for performance of work under another, the privilege of access or other reasonable privilege to the CONTRACTOR so desiring may be granted, to the extent, amount, and in manner and at a time that shall be determined. Conduct its operations to cause a minimum of interference with the work of such other contractors, and shall cooperate fully with such contractors to allow continued safe access to their respective portions of the Site, as required to perform work under their respective contracts.

B. Interference with Work on Utilities: Cooperate fully with all utility forces or forces of other public or private agencies engaged in the relocation, altering, or otherwise rearranging of any facilities, which interfere with the progress of the WORK, and shall schedule the WORK to minimize interference with said relocation, altering or other rearranging of facilities. Any delays, reduction in work efficiency or hardships incurred shall be identified and resolved to the satisfaction of both parties.

PART 2 – PRODUCTS (NOT USED)

PART 3 – EXECUTION (NOT USED)

END OF SECTION

SECTION 01 1400 – WORK RESTRICTIONS

PART 1 - GENERAL

1.01 LAND FOR WORK AND STORAGE

A. The OWNER will provide the lands upon which the work under this Contract is to be done or the necessary easements over said lands to include sufficient space for the proper execution of the work, together with right of access to same. The OWNER will provide the CONTRACTOR with information, which delineates and describes the lands owned and rights-of-way acquired. The OWNER shall provide land required for storage of construction materials and for any temporary construction facilities for the storage of equipment. The CONTRACTOR will furnish his own power and water supply unless otherwise specifically set out herein or in the contract documents.

B. CONTRACTOR shall designate and arrange for the use, a portion of the property adjacent to the WORK for its exclusive use during the term of the Contract as storage and shop area for its construction operations relative to this Contract.

C. Use of the Site shall be limited to its construction operations, including on-site storage of materials, on-site fabrication facilities and field offices.

D. All or part of the existing Site may be utilized during the entire period of construction for the conduct of normal operations. Cooperate and coordinate to facilitate operations and to minimize interference with the operations at the same time. In any event, access to the site during the period of construction shall be allowed.

E. All access to the site by the CONTRACTOR, Subcontractors, workmen, material/equipment suppliers, etc., shall be via approved access locations as designated by the OWNER. All vehicular or equipment activity shall be strictly confined to the construction limits as indicated by OWNER.

F. Remove all temporary construction and temporary facilities at close of the job or when no longer needed.

1.02 WORK ON "PRIVATE PROPERTY"

A. Private property is defined as property other than that belonging to the OWNER. Highway and railroad rights-of-way, public parks, school yards and other such properties shall be considered "private properties" for the purpose of this Paragraph.

B. In connection with water line, sewer line, gas line or similar work performed on "private property," the CONTRACTOR shall confine his equipment, the storage of materials and the operations of his workman to the limits indicated on the Drawings, or to lands and rights-of-way provided for the Project by the OWNER, and shall take every precaution to avoid damage to the buildings, grounds and facilities of the OWNER or private property.

C. Fences, walls, hedges, shrubs, etc., shall be carefully removed, preserved, and replaced when the construction is completed. Grassed areas, other than lawns, shall be graded, fertilized, and seeded when construction is completed and in accordance with the requirements of the Technical Specifications. Where ditches or excavations cross lawns, the sod shall be removed carefully and replaced when the backfilling has been completed. If sod is damaged or not handled properly, it shall be replaced with new sod equal to existing sod at the CONTRACTOR’s expense. When construction is completed, the facilities and grounds of the OWNER’s property shall be restored to as good or better condition than found as quickly as possible at the CONTRACTOR’s expense.

D. When directed by the OWNER, large trees or other facilities that cannot be preserved and replaced shall be removed by the CONTRACTOR. The OWNER will assume the responsibility for settling with the property OWNER for the loss of said trees or facilities. The CONTRACTOR shall be solely and entirely responsible for any damage to all other trees or facilities.

E. Foundations, adjacent to where an excavation is to be made below the bottom of the foundation, shall be supported by shoring, bracing or underpinning as long as the excavation shall remain open, or thereafter if required to insure the stability of the foundation and the CONTRACTOR shall be held strictly responsible for any damage to said foundations.

F. All excavated materials and equipment to be incorporated in the Work shall be placed so as not to injure any part of the Work or existing facilities and so that free access can be had at all times to all parts of the Work and to all public utility installations in the vicinity of the Work. Materials and equipment shall be kept neatly piled and compactly stored in such locations as will cause a minimum of inconvenience to public travel and adjoining OWNERs, tenants, and occupants.

1.03 EXISTING UTILITIES

A. Special precautions shall be taken by the CONTRACTOR to avoid damage to existing overhead and underground utilities owned and operated by the OWNER or by other public or private utility companies.

B. Before proceeding with the Work, the CONTRACTOR shall confer with all public or private companies, agencies or departments that own and operate utilities in the vicinity of the Construction Work. The purpose of the conference, or conferences, shall be to notify said companies, agencies, or departments of the proposed construction schedule, verify the location of, and possible interference with, the existing utilities that are shown on the Drawings, arrange for necessary suspension of service, and arrange to locate and avoid interference with all utilities (including house and any building connections) that are not shown on the Drawings.

C. The CONTRACTOR shall locate all unknown metallic hazards, namely buried pipe, metals, etc., by using a pipe locator. The pipe locator shall immediately precede the trench ditching and all hazards located shall be marked in such a manner as to notify the machine operator of such hazard.

D. Where existing utilities or appurtenant structures, either underground or above-ground, are encountered, they shall not be displaced or molested unless necessary, and in such case shall be replaced in as good or better condition than found as quickly as possible. Relocation and/or replacement of all utilities and appurtenant structures to accommodate the construction work shall be at cost to the OWNER, unless such relocation and/or replacement is by statute or agreement the responsibility of the CONTRACTOR.

1.04 TRAFFIC CONTROL

A. Traffic Control Plan: CONTRACTOR shall develop and a submit a Traffic Control Plan for the protection of traffic in public or private streets and ways, provide, place, and maintain all necessary barricades, traffic cones, warning signs, lights and other safety devices.

1. Traffic Control Plan shall conform to Yavapai County and ADOT requirements. Traffic control plans shall be approved by the OWNER and the governing agencies prior to construction commencement.

2. Take all necessary precautions for the protection of the WORK and the safety of the public. Barricades and obstructions shall be illuminated at night and all lights shall be kept burning from sunset until sunrise. Station guards or flaggers may be required by the public authorities within their respective jurisdictions in order to conform to such special safety regulations relating to traffic control Signs, signals and barricades shall conform to the requirements Subpart G, Part 1926, of the OSHA Safety and Health Standards for Construction.

B. HIGHWAY LIMITATIONS

Make investigation of the condition of available public and private roads and of clearances, restrictions, bridge load limits, and other limitations affecting transportation and ingress and egress to the site of the WORK.

C. TEMPORARY CROSSINGS

General: Continuous, unobstructed, safe, and adequate pedestrian and vehicular access shall be provided. Vehicular access to residential driveways shall be maintained to the property line.

D. STREET USE

Nothing herein shall be construed to entitle any entity to the exclusive use of any public street, alleyway, or parking area during the performance of the WORK hereunder, and it shall so conduct its operations as not to interfere unnecessarily with the authorized work of utility companies or other agencies in such streets, alleyways, or parking areas. No streets shall be closed to the public without first obtaining permission from the proper governmental authority. Where excavation is being performed in primary streets or highways, one lane in each direction shall be kept open to traffic at all times unless otherwise indicated. Toe boards shall be provided to retain excavated material if required by the ENGINEER or the agency having jurisdiction over the street or highway. Fire hydrants on or adjacent to the WORK shall be kept accessible to fire-fighting equipment at all times. Temporary provisions shall be made to assure the use of sidewalks and the proper functioning of all gutters, storm drain inlets and other drainage facilities. Any open trenches shall be covered with H20 traffic-rated steel trench plates during non-supervised hours.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01 2000 – PRICE AND PAYMENT PROCEDURES

PART 1 - GENERAL

1.01 SECTION INCLUDES

A. Requirements for preparation, format, and submittal of Schedule of Values.

B. Procedures for preparation and submittal of applications for progress payments.

C. Documentation of changes in Contract Price and Contract Time.

D. Change procedures.

E. Correlation of CONTRACTOR submittals based on changes.

F. Procedures for preparation and submittal of application for final payment.

1.02 SCHEDULE OF VALUES

A. Prepare Schedule of Values identifying costs of Major Items of Work and other costs shown in sample included at end of this Section.

B. Divide the Work into following Major Items of Work and subdivide the Major Items that will complement not only the scope of the work, but the progress of work as well.

C. Assign prices and unit price to Items of Work which aggregate the Contract Price. Separate all major items with unit prices.

D. Submit preliminary schedule of values for ENGINEER's approval.

E. Submit corrected schedule of values within 10 days upon receipt of reviewed Schedule of Values, but no later than 10 days prior to anticipated submittal of first Application for Payment.

1.03 APPLICATIONS FOR PROGRESS PAYMENTS

A. Payment Period: Submit at intervals stipulated in the Agreement.

B. Electronic media printout including equivalent information will be considered in lieu of standard form specified; submit sample to ENGINEER for approval.

C. Forms filled out by hand will not be accepted.

D. For each item, provide a column for listing each of the following:
   1. Item Number
   2. Description of work
   3. Scheduled Values
   4. Previous Applications
   5. Work in Place and Stored Materials under this Application
   6. Authorized Change Orders
   7. Total Completed and Stored to Date of Application
   8. Percentage of Completion
   9. Balance to Finish
   10. Retainage

E. Execute certification by signature of authorized officer.

F. Use data from approved Schedule of Values. Provide dollar value in each column for each line item for portion of work performed and for stored products.

G. List each authorized Change Order as a separate line item, listing Change Order number and dollar amount as for an original item of Work.

H. Submit three copies of each Application for Payment.

I. Include the following with the application:
   1. Transmittal letter as specified for Submittals in Section 01 3300 – Submittal Procedures.
   2. Construction progress schedule, revised and current as specified in these Specifications.
   3. Current construction photographs as specified in these Specifications.
   4. Partial release of liens from major Subcontractors and vendors.
   5. Sustainable design documentation applicable to work for which application is being made.
   6. Project record documents as specified in these Specifications, for review by OWNER which will be returned to the CONTRACTOR.
   7. Affidavits attesting to off-site stored products.

J. When ENGINEER requires substantiating information, submit data justifying dollar amounts in question. Provide one copy of data with cover letter for each copy of submittal. Show application number and date, and line item by number and description.

1.04 MODIFICATION PROCEDURES

A. Submit name of the individual authorized to receive change documents and who will be responsible for informing others in CONTRACTOR's employ or subcontractors of changes to the Contract Documents.

B. For minor changes not involving an adjustment to the Contract Price or Contract Time, ENGINEER will issue instructions directly to CONTRACTOR.

C. For other required changes, ENGINEER will issue a document signed by OWNER instructing CONTRACTOR to proceed with the change, for subsequent inclusion in a Change Order.
   1. The document will describe the required changes and will designate method of determining any change in Contract Price or Contract Time.
   2. Promptly execute the change.

D. For changes for which advance pricing is desired, ENGINEER will issue a document that includes a detailed description of a proposed change with supplementary or revised drawings and specifications, a change in Contract Time for executing the change with a stipulation of any overtime work required and the period of time during which the requested price will be considered valid. CONTRACTOR shall prepare and submit a fixed price quotation within 14 days of request.

E. CONTRACTOR may propose a change by submitting a request for change to ENGINEER, describing the proposed change and its full effect on the Work, with a statement describing the reason for the change, and the effect on the Contract Price and Contract Time with full documentation and a statement describing the effect on Work by separate or other contractors. Document any requested substitutions.

F. Computation of Change in Contract Amount: As specified in the Agreement and Conditions of the Contract.
   1. For change requested by ENGINEER for work falling under a fixed price contract, the amount will be based on CONTRACTOR's price quotation.
   2. For change requested by CONTRACTOR, the amount will be based on the CONTRACTOR's request for a Change Order as approved by ENGINEER.
   3. For pre-determined unit prices and quantities, the amount will be based on the fixed unit prices.

4. For change ordered by ENGINEER without a quotation from CONTRACTOR, the amount will be determined by ENGINEER based on the CONTRACTOR's substantiation of costs as specified for Time and Material work.

G. Substantiation of Costs: Provide full information required for evaluation.
   1. On request, provide following data:
      a. Quantities of products, labor, and equipment
      b. Taxes, insurance, and bonds
      c. Overhead and profit
      d. Justification for any change in Contract Time
      e. Credit for deletions from Contract, similarly documented
   2. Support each claim for additional costs with additional information:
      a. Origin and date of claim
      b. Dates and times that work was performed, and by whom
      c. Time records and wage rates paid
      d. Invoices and receipts for products, equipment, and subcontracts, similarly documented
   3. For Time and Material work, submit itemized account and supporting data after completion of change, within time limits indicated in the Conditions of the Contract.

H. Execution of Change Orders: ENGINEER will issue Change Orders for signatures of parties as provided in the Conditions of the Contract.

I. After execution of Change Order, promptly revise Schedule of Values and Application for Payment forms to record each authorized Change Order as a separate line item and adjust the Contract Price.

J. Promptly revise progress schedules to reflect any change in Contract Time, revise sub-schedules to adjust times for other items of work affected by the change, and resubmit.

K. Promptly enter changes in Project Record Documents.

1.05 APPLICATION FOR FINAL PAYMENT

A. Prepare Application for Final Payment as specified for progress payments, identifying total adjusted Contract Price, previous payments, and sum remaining due.

B. Application for Final Payment will not be considered until the following have been accomplished:
   1. All closeout procedures specified in in applicable Sections of Division 01 – General Requirements.

SCHEDULE OF VALUES (Sample Only – Modify per project needs)							
No.	**Item**	**Payment**	**Measurement**	Est. Qty	Unit	Unit $	Value
1	Mobilization/ Demobilization/Bond/ Insurance	Payment shall be made for mobilization and demobilization to and from the site, for bonds and insurance. CONTRACTOR shall provide all the necessary mobilization requirements for the proper construction activities, include providing all the necessary accommodations for personnel and equipment as describe in these Specification. Bonds and insurance requirements shall meet the requirements of the Contract Documents.	Based on Representative Opinion that the item is complete.	#	LS	$_____	$_____
2	Earthwork for Grading, cut, fill, and export	Payment shall be made for the work associated with earthworks grading, cut, fill, and export of any excess material. Fill shall include screening, placement, and compaction of native material to meet the requirements of the Contract Documents. Excess material shall be screened and exported to a dedicated site per the contract. Excess material shall be spread evenly within the dedicated site by the CONTRACTOR. Screened material greater than 4” shall be disposed by the CONTRACTOR offsite.	Measurement shall be based on a cubic yard basis of material placed or excavated as shown on the drawings, specified in the contract documents. Original delivery tickets shall be delivered to the Representative at the end of each day. The Representative will create a chronological spreadsheet of the quantities and reconcile them with the CONTRACTOR after each weekly progress meeting. Requests for payment shall only include quantities that have been reconciled.	#	CY	$_____	$_____

3	Yard Piping	Payment shall be made for site work associated with the installation of the yard piping as described in the Contract Documents. The work shall include all pipes, fitting, and associated labor and materials required for the proper trenching, installation, and backfill of the pipes. This shall also include any potholing, pavement restoration, wire tracing and surveying of the required work.	Measurement shall be made based on linear feet of pipe installed and the breakdown shown on the CONTRACTOR's schedule of values as the items are completed and accepted by the Representative.	#	LF	$_____	$_____
4	Asphalt Pavement	Payment shall be made for asphalt road pavement as described in the Contract Documents. This includes the preparation and place of the hot-mix asphalt, binder, and base course where required.	Measurement shall be based on a cubic yard basis of material placed or excavated as shown on the drawings, specified in the contract documents. Original delivery tickets shall be delivered to the Representative at the end of each day. The Representative will create a chronological spreadsheet of the quantities and reconcile them with the CONTRACTOR after each weekly progress meeting. Requests for payment shall only include quantities that have been reconciled.	#	CY	$_____	$_____
5	Package WRF	Payment shall be made for the work associated with the installation of the package WRF, and associated tank appurtenances as shown on the drawings, specified in the contract documents. This bid item is only to include items, components and equipment as supplied by the Package WRF manufacturer. All items associated with the Package WRF but not supplied by WRF	Measurement shall be made based on the breakdown shown on the CONTRACTOR's schedule of values as the items are completed and accepted by the Representative.	#	EA	$_____	$_____

		manufacturer shall be included in the Base Lump Sum Bid.					
6	Electrical and Controls	Payment shall be made for the work associated with the furnish, installation and wiring of the electrical and controls component of the project as shown on the drawings, specified in the contract documents. This includes all electrical and controls equipment and components, as well as all field instrumentation with the exception of the electrical and instrumentation to be provided by the tank manufacturer. Programming of the PLC and system controls integration shall be a separate bid item if required by the contract documents.	Measurement shall be made based on the breakdown shown on the CONTRACTOR's schedule of values as the items are completed and accepted by the Representative.	#	LS	$_____	$_____
7	Base Lump Sum	Payment shall be made for the work associated with the portion of the project not specifically included in the above bid schedule but required to be completed as part of the project as shown on the drawings, specified in the contract documents, and as required by the District. This includes all general conditions, civil, mechanical, structural, architectural, and electrical & controls work.	Measurement shall be made based on the breakdown shown on the CONTRACTOR's schedule of values as the items are completed and accepted by the Representative.	#	LS	$_____	$_____

8	**Total Lump Sum**						**$_____**
9	Alternate Bid Item 1 - Name	Payment for alternate bid items shall be based on payments for similar items listed above.	Measurement for alternate bid items shall be based on measurements for similar items listed above.				

PART 2 PRODUCTS - NOT USED

PART 3 EXECUTION - NOT USED

END OF SECTION

SECTION 01 3216 – CONSTRUCTION PROGRESS SCHEDULES

PART 1 - GENERAL

1.01 SUMMARY

A. **Section Includes**: Preparation, submittal and maintenance of computerized progress schedule and reports, contract time adjustments and payment requests, including the following:

1. Preliminary Schedule
2. Baseline Schedule
3. Schedule Updates
4. Schedule Revisions

1.02 PRECONSTRUCTION SCHEDULING MEETING

A. General: Before issuance of Notice to Proceed, a pre-construction meeting shall be held at the location, date and time designated by ENGINEER and OWNER. This meeting shall be conducted by the ENGINEER and OWNER. Attendees shall include the ENGINEER, OWNER's representatives, General CONTRACTOR's project manager and field superintendent, and representatives from each subcontractor for the project as appropriate.

B. At the meeting, scheduling requirements shall be reviewed with CONTRACTOR. These include schedule preparation, reporting requirements, updates, revisions, and schedule delay analysis. CONTRACTOR shall present their schedule methodology, planned sequence of operations, and present their proposed activity coding structure.

1.03 CONSTRUCTION PROGRESS MEETINGS AND SCHEDULES

A. Weekly Progress meetings shall be held by the CONTRACTOR. All matters bearing on progress and performance of the work since preceding progress meeting shall be discussed and resolved including, without limitation, any previously unresolved matters, deficiencies in the work or methods being employed for the work, and problems, difficulties, or delays which may be encountered. CONTRACTOR shall keep records of the meetings and distribute to all party.

B. CONTRACTOR shall submit a Baseline Construction Schedule for ENGINEER and OWNER approval 14 days after Notice to Proceed. CONTRACTOR shall maintain a progress schedule based on the approved Baseline Construction Schedule that is updated weekly and shows progress and execution of work.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01 3300 – SUBMITTAL PROCEDURES

PART 1 - GENERAL

1.01 WORK INCLUDED

A. Shop Drawing, Descriptive Literature, Project Data and Samples (specifically, when Samples are requested) for all manufactured or fabricated items shall be Submitted by the CONTRACTOR. CONTRACTOR shall examine and review the Submittal to ensure that the information is in the form and in the manner required by the ENGINEER. The review of the Submittal by the ENGINEER shall not be construed as a complete check or approval, but will only indicate that the general method of construction and detailing is satisfactory. Review of such Submittal will not relieve the CONTRACTOR of the responsibility for any errors, which may exist. The CONTRACTOR shall be responsible for the dimensions and design of adequate connections, details and satisfactory of all WORK.

1.02 DEFINITIONS

A. The term "Submittals" shall mean shop drawings, manufacturer's drawings, catalog sheets, brochures, descriptive literature, diagrams, schedules, calculations, material lists, performance charts, test reports, office and field samples and items of similar nature, which are normally Submitted for the ENGINEER’s review for conformance with the Design Concept and compliance with the Contract Documents.

1.03 GENERAL CONDITIONS

A. Review by the ENGINEER of shop drawings or submittals of material and equipment shall not relieve the CONTRACTOR from the responsibilities of furnishing proper dimension, size, quantity, materials, and all performance characteristics to, efficiently perform the Requirements and intent of the Contract Documents. Review shall not relieve the CONTRACTOR responsibility for errors of any kind on the shop drawings. Review is intended only to assure conformance with the design concept of the Project and compliance with the information given in the Contract Documents. Review of shop drawings shall not be construed as releasing the CONTRACTOR from the responsibility of complying with the Contract Documents.

B. Do not consider Submittals as Contract Documents. Purpose of Submittals is to demonstrate how CONTRACTOR, to conform to the design concepts.

1.04 GENERAL REQUIREMENTS FOR SUBMITTALS

A. Shop drawings shall be prepared by a qualified detailer. Details shall be identified by reference to sheet and detail numbers shown on Contract Documents. Where applicable, show fabrication, layout, setting and erection details. Shop drawings are defined as original drawings prepared by the CONTRACTOR, subcontractor, vendor, suppliers, or distributors performing WORK under this Contract. Shop drawings illustrate some portion of the WORK and show fabrication, layout, setting or erection details of equipment, materials, and components. Shop drawings shall be folded to an approximate size of 8½-inch x 11-inch and in such manner that the title block will be located in the lower right-hand corner of the exposed surface.

B. Project data shall include manufacturer's standard schematic drawings modified to delete information, which is not applicable to the Project and shall be supplemented to provide additional information applicable to the Project. Each copy of descriptive literature shall be clearly marked to identify pertinent information as it applies to the Project.

C. Where samples are required, they shall be adequate to illustrate materials, equipment, or workmanship and to establish Standards by which completed WORK is judged. Provide sufficient size and quantity to clearly illustrate functional characteristics of product and material, with integrally related parts and attachment devices, along with a full range of color samples.

D. The CONTRACTOR shall review and check Submittals, indicating his review by initials and date.

E. If the Submittals deviate from the Contract Drawings and/or Specifications, the CONTRACTOR shall clearly identify the deviation and state any reasons for the deviation. The ENGINEER may approve a change. Any costs resulting from a change will be the responsibility of the CONTRACTOR.

F. Additional information on particular items, such as special drawings, schedules, calculations, performance curves and material details, shall be provided when specifically requested by the Technical Specifications.

G. Submittals for all electrically operated items (including instrumentation and controls) shall include complete wiring diagrams showing lead, runs, number of wires, wire size, color coding, all terminations and connections and coordination with related equipment.

H. Equipment shop drawings shall indicate all factory or shop paint coatings applied by suppliers, manufacturers, and fabricators; the CONTRACTOR shall be responsible for insuring the compatibility of such coatings with the field applied paint products and systems.

I. Fastener Specifications of manufacturer shall be indicated on equipment shop drawings.

J. No material shall be fabricated or shipped unless the applicable drawings or Submittals have been reviewed and approved by the CONTRACTOR and ENGINEER.

K. All bulletins, brochures, instructions, parts lists, and warranties packaged with and accompanying materials and products delivered to and installed in the Project shall be saved and transmitted to the ENGINEER for safe keeping and preparations of the Operation &Maintenance Manuals.

L. Quantity of the Vendor's Submittals shall be as required by the CONTRACTOR. At a minimum, a Vendor shall provide one (1) electronic PDF copy to the CONTRACTOR.

1.05 SUBCONTRACTOR or VENDOR RESPONSIBILITIES

A. Verify field measurements, field construction criteria, catalog numbers and similar data.

B. Coordinate each Submittal with requirements of Work and Contract Documents.

C. Quantity of the Subcontractor or Vendor's Submittals shall be as required by the CONTRACTOR. At a minimum, one (1) electronic PDF copy shall be provided to the CONTRACTOR.

1.06 CONTRACTOR RESPONSIBILITIES

A. Submit complete listing of all required shop drawing submittals by Specification Section to the ENGINEER.

B. Submit shop drawings, product data, samples, and other pertinent information in sufficient detail to show compliance with specified requirements.

C. Check, verify, and revise Submittals as necessary to bring them into conformance with Contract Documents and actual field conditions.

1. Determine and verify quantities, dimensions, specified design and performance criteria, materials, catalog numbers and similar data.

2. Determine and verify that the equipment or product meets all aspect of the contract documents.
3. Coordinate Submittal with other Submittals and with the requirements of the Contract Documents.

D. After completion of checking, verification and revising, stamp, sign and date Submittals indicating review and approval and submit to ENGINEER.
1. Attach a copy of the corresponding specifications for the equipment or product and identify all deviations from the specifications, along with proposed corrective actions, clarifications, exemptions, etc. Submittals without accompanying specifications shall be rejected.
2. Stamp and signature indicate CONTRACTOR has satisfied shop drawing review responsibilities and constitutes written review of shop drawing with general conformance with the Contract Documents.
3. Shop drawings without CONTRACTOR written reviewed stamp and signature will be returned for resubmission.

E. **Shop Drawings:** Submit one electronic copy in PDF format. A PDF copy of the submittal will be returned with reviewer's comments.

F. **Product Data and Manufacturer's Instructions:** Submit on electronic copy in PDF format. Excise or cross out non-applicable information and clearly mark applicable information with citations to and terminology consistent with Contract Documents.
1. A PDF copy will be returned with reviewer's comments.

G. **Samples:** Submit two (2) samples labeled with reference to applicable Contract Documents. Label will be returned with reviewer's selection when appropriate, comments and stamp. Samples will not be returned unless return is requested in writing and additional samples are submitted.

H. **Special Samples:** Submit one (1) sample labeled with reference to applicable Contract Documents. Sample and one (1) label will be returned for installation in the WORK.

I. Assume risk expense and delays when proceeding with work related to required Submittals without review and acceptance.

J. **Deferred Submittals:** Submit any and all requested deferred submittals as required by the Building Permit or local governing agency. The deferred submittals may include but not be limited to trusses, bar joists, or above ground tanks.

1.07 ENGINEER'S RESPONSIBILITY

A. ENGINEER's review of shop drawings, samples or test procedures will be only for conformance with design concepts and for compliance with information given in Contract Documents.
1. ENGINEER's review does not extend to:
a. Accuracy of dimensions, quantities or performance of equipment and systems designed by CONTRACTOR, subcontractor, or Vendor.
b. CONTRACTOR or subcontractor means, methods, techniques, sequences, or procedures, except when specified, indicated on the Drawings, or required by Contract Documents.
c. Safety precautions or programs related to safety, which shall remain the sole responsibility of the CONTRACTOR and the subcontractor.

B. Except as may be provided in subsequent Specifications, a submittal will be returned within 30 days. When a Submittal cannot be returned within that period, ENGINEER will, within a reasonable time after receipt of the Submittals, give notice of the date by which that submittal will be returned.

C. For Submittals returned No Exceptions Taken – Submittal is considered in conformance with the design concept.

D. For Submittals returned Accepted with Correction Noted – Make Correction Noted/See all Comments, CONTRACTOR shall incorporate all review comments into the work, but resubmittal of an amended Submittal is not required.

E. For Submittals returned Submit Specific Item – CONTRACTOR shall develop a new Submittal package with materials, equipment, methods, etc. that meet the requirements of the Contract Documents for that specific item.

F. For Submittals returned Revised and Resubmit – Make Corrections Note/See All Comments, CONTRACTOR shall incorporate the review comments into a complete revised package and resubmit it for review.

G. For Submittals returned Rejected – See All Comments, CONTRACTOR shall develop a new Submittal package with materials, equipment, methods, etc. that meet the requirements of the Contract Documents.

H. For Submittals returned Submittal Not Reviewed, Filed for Record, no further action is required by the CONTRACTOR for this Submittal.

I. ENGINEER will be entitled to rely upon the accuracy or completeness of designs, calculations or certification made by licensed professionals accompanying a particular Submittal whether or not a stamp or seal is required by Contract Documents or Laws and Regulations.

J. Costs incurred by the ENGINEER, as a result, of additional reviews of a particular Submittal after the second time it has been reviewed shall be borne by CONTRACTOR. Reimbursement to ENGINEER will be made by issuance of a Change Order.

1.08 MINOR OR INCIDENTAL PRODUCTS AND EQUIPMENT SCHEDULES

A. Shop Drawings of minor or incidental fabricated products will not be required, unless requested.

B. Submit tabulated lists of minor or incidental products showing the names of the manufactures and catalog numbers, with Product Data and Samples, as required to, determine acceptability.

1.09 SUBMITTALS FOR INFORMATION OR RECORD ONLY

A. Submit three (3) copies of each. None will be returned.

B. **Mill Test Reports**:
   1. Submit three (3) certified copies of factory and mill test reports for record only. No copies will be returned.
   2. Do not incorporate Products in the work, which have not passed testing and inspection satisfactorily.
   3. Pay for mill and factory tests.

C. **Reinforcing Steel**:
   1. Submit reinforcing steel fabrication and setting drawings for information or record only. No copies will be returned.
   2. Note deviations and variations as specified for shop drawings.

PART 2 – PRODUCTS (Not Used)

PART 3 – EXECUTION (Not Used)

END OF SECTION

SECTION 01 3529 – HEALTH, SAFETY, AND EMERGENCY RESPONSE PROCEDURES

PART 1 - GENERAL

1.01 SUMMARY

A. Section Includes: Development and maintenance of a Construction Safety Plan.

1.02 REFERENCES

A. OSHA.

1.03 CONSTRUCTION SAFETY PLAN

A. Detail the Methods and Procedures to comply with Federal, State, and Local Health and Safety Laws, Rules and Requirements for the duration of the Contract Times. Include the following:
   1. Identification of the Certified or Licensed Safety Consultant who will prepare, initiate, maintain and supervise safety programs, and procedures.
   2. Procedures for providing workers with an awareness of safety and health hazards expected to be encountered in the course of construction.
   3. Safety equipment appropriate to the safety and health hazards expected to be encountered during construction. Include warning devices, barricades, safety equipment in public right-of-way and protected areas, and safety equipment used in multi-level structures.
   4. Methods for minimizing employees' exposure to safety and health hazards expected during construction.
   5. Procedures for reporting safety or health hazards.
   6. Procedures to follow to correct a recognized safety and health hazard.
   7. Procedures for investigation of accidents, injuries, illnesses, and unusual events that have occurred at the construction site.
   8. Periodic and scheduled inspections of general work areas and specific work stations.
   9. Training for employees and workers at the jobsite.
   10. Methods of communication of safe working conditions, work practices and required personal protection equipment.

B. Assume responsibility for every aspect of Health and Safety on the jobsite, including the health and safety of Subcontractors, suppliers, and other persons on the jobsite.
   1. Forward available information and reports to the Safety Consultant who shall make the necessary recommendations concerning worker health and safety at the jobsite.
   2. Employ additional health and safety measures specified by the Safety Consultant, as necessary, for workers in accordance with OSHA guidelines.

C. Transmit to OWNER and ENGINEER copies of reports and other documents related to accidents or injuries encountered during construction.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01 4219 – REFERENCE STANDARDS

PART 1 - GENERAL

1.01 GENERAL

A. Titles of Sections and Paragraphs: Titles and Subtitles accompanying Specification Sections and paragraphs are for convenience and Reference only and do not form a part of the Specifications.

B. Applicable Publications: Whenever in these Specifications References are made to Published Specifications, Codes, Standards or other Requirements, it shall be understood that wherever no date is specified, only the latest Specifications, Standards or Requirements of the respective issuing agencies, which have been published as of the date that the Contract shall apply; except to the extent that said Standards or Requirements may be in conflict with applicable Laws, Ordinances or Governing Codes. No Requirements set forth in the Specifications or shown on the Drawings will be waived because of any provision of, or omission from, said Standards or Requirements.

C. Specialists, Assignments: In certain instances, Specification text requires (or implies) that specific WORK is to be assigned to specialists or expert entities, who must be engaged for the performance of that WORK. Such assignments shall be recognized as Special Requirements. These Requirements shall not be interpreted so as to conflict with the enforcement of Building Codes and similar Regulations Governing the WORK; also, they are not intended to interfere with Local Union Jurisdiction Settlements and similar conventions. Such assignments are intended to establish which party or entity involved in a specific unit of work is recognized as "Expert" for the indicated construction processes or operations. Nevertheless, the final responsibility for fulfillment of the entire set of Contract Requirements remains.

1.02 REFERENCE SPECIFICATIONS, CODES AND STANDARDS

A. Construct the WORK in accordance with the Contract Documents and the referenced portions of those Referenced Codes, Standards and Specifications.

B. Verify the following references agree with the plans and local requirements. All references listed are to the most recently approved and published edition.

References herein to "Building Code" shall mean International Building Code (IBC). Similarly, references to "Mechanical Code" or "International Mechanical Code," "Plumbing Code" or "Uniform Plumbing Code," "Fire Code" or "International Fire Code," shall mean International Mechanical Code (IMC), Uniform Plumbing Code (UPC) and International Fire Code (IFC). "Electric Code" or "National Electric Code (NEC)" shall mean the National Electric Code of the National Fire Protection Association (NFPA). The latest edition of the codes as approved by the Municipal Code and used by the local agency as of the date that the WORK is advertised for bids, as adopted by the agency having jurisdiction, shall apply to the WORK herein, including all Addenda, Modifications, Amendments, or other Lawful changes thereto.

C. In case of conflict between Codes, Reference Standards, Drawings, and the other Contract Documents, the most stringent Requirements shall govern. All conflicts shall be brought to the attention of the ENGINEER for clarification and directions prior to ordering or providing any materials or furnishing labor through the RFI process. The most stringent Requirements may be bid on.

D. All equipment and materials used on this project shall comply with the standards set forth in the American Iron and Steel Institute (AISI).

E. References herein to "OSHA Regulations for Construction" shall mean Title 29, Part 1926, Construction Safety and Health Regulations, Code of Federal Regulations (OSHA), including all changes and amendments thereto.

F. References herein to "OSHA Standards" shall mean Title 29, Part 1910, Occupational Safety and Health Standards (OSHA), Code of Federal Regulations, including all changes and Amendments thereto.

G. Applicable Standard Specifications: References in the Contract Documents to "Standard Specifications" or SSPWC shall mean the Standard Specifications for Public Works Construction.

1.03 REGULATIONS RELATED TO HAZARDOUS MATERIALS

A. Responsibility for all work included in the Contract Documents, regardless if shown or not, shall comply with all EPA, OSHA, RCRA, NFPA, and any other Federal, State, and Local Regulations governing the storage and conveyance of hazardous materials, including petroleum products.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01 4333 – MANUFACTURER'S FIELD SERVICES

PART 1 - GENERAL

1.01 THE REQUIREMENT

A. General: Provide a qualified service representative from each equipment company manufacturing or supplying equipment to perform the duties herein described and as required by the various Sections of the Specifications. All costs to perform these services shall be included in the supplier's proposal in accordance with the scope of work.

B. Supervision of Installation: The supplier shall provide direct and/or indirect supervision of the workers and ENGINEER, in accordance with the scope of work, to ensure that proper procedures are followed during equipment installation.

1.01 EQUIPMENT CHECK OUT:

A. After installation of the equipment has been completed and the equipment is presumably ready for operation but before it is operated by others, the representative shall inspect, operate, test, and adjust the equipment. The inspection shall include but shall not be limited to, the following points as applicable:

1. Soundness (without cracked or otherwise damaged parts)
2. Completeness in all details as specified
3. Correctness of setting, alignment, and relative arrangement of various parts
4. Adequacy and correctness of packing, sealing and lubricants
5. Completeness in electrical and controls
6. The operation, testing and adjustment shall be as required to prove that the equipment has been installed properly and is capable of satisfactory operation under the conditions specified. On completion of his WORK, the CONTRACTOR, manufacturer, or supplier's representatives shall submit a complete signed report of the result of his inspection, operation, adjustments, and tests. The report shall include descriptions of the points inspected, tests and adjustments made, quantitative results obtained if such are specified and suggestions for precautions to be taken to ensure proper maintenance. The report also shall include a certificate that the equipment conforms to the requirements of the Contract Documents and is ready for permanent operation and that nothing in the installation will render the manufacturer's warranty null and void.

B. Field Tests: As required by the individual Specification Sections, the manufacturer's representative shall be present when the field tests are made.

C. Operator Training: As required by the individual Specification Sections, the manufacturer's representative shall provide hands-on training to maintenance personnel in the proper operation and maintenance of the equipment prior to placing the equipment in full operation.

D. Post-startup Services: As required by the individual Specification Sections, the manufacturer's representative shall provide services beyond the startup of the equipment. Services may include assistance in the calibration, tuning and troubleshooting, plus any additional training, which may be required during the agreed time after the equipment, is accepted.

E. The CONTRACTOR shall be the supplier for items not specifically included in the supplier's scope of work.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION

3.01 EXECUTION

A. The CONTRACTOR shall submit one (1) electronic copy and two (2) hard copies of all equipment field service certification documents and certificates of warranty to the ENGINEER in accordance with applicable Sections of these Specifications and Contract Documents.

END OF SECTION

SECTION 01 4500 – QUALITY CONTROL

PART 1 - GENERAL

1.01 THE REQUIREMENT

A. The Specific Quality Control Requirements for the WORK are indicated throughout the Contract Documents. The Requirements of this Section are primarily related to performance of the WORK beyond furnishing of manufactured products. The term "Quality Control" includes pre-activity inspection, follow up meetings, sampling and testing, and associated requirements.

B. All materials to be incorporated into the work shall be subject to sampling, testing, and approval as required by specifications.

1.02 INSPECTION AT PLACE OF MANUFACTURE

A. Unless otherwise indicated, all products, materials, and equipment shall be subject to inspection by the ENGINEER at the place of manufacture.

B. Unless noted otherwise, the presence of the ENGINEER at the place of manufacturer is not required; however, this shall not relieve responsibility for providing products, materials and equipment that comply with all requirements of the Contract Documents.

1.03 SAMPLING AND TESTING

A. Unless otherwise specified, samples and tests shall be made in accordance with either: the Standard Methods of AASHTO, ASTM, and/or ASME, which were in effect and published at the time of advertising for bids. The laboratory responsible for the test(s) shall furnish at least one copy of the test results to the CONTRACTOR, the ENGINEER, and to the appropriate material supplier.

1.04 INSPECTION AND TESTING SERVICE

A. Independent inspection and testing laboratory service shall comply with the following:
   1. Unless noted otherwise by the Specifications, an independent firm shall be appointed and employed by the CONTRACTOR to perform inspection and testing, including soils and concrete testing.
   2. Perform inspections, testing, and other services as required.
   3. Submit Reports of Testing to the ENGINEER, CONTRACTOR and OWNER if required in duplicate, indicating observations and results of tests, and indicating compliance or non-compliance with Contract Documents.
   4. CONTRACTOR to notify 48 hours prior to the expected time for operations requiring inspection and laboratory testing services is required.
   5. The same independent firm on instructions shall perform retesting required because of non-conformance to requirements.
   6. For tests and samples required, arrangements shall be made with an independent firm for payment and scheduling of testing. Responsibility shall be taken for the cost of sampling and testing.
   7. Provide an overall report on inspection and test results for project closeout.
   8. All materials and/or equipment not conforming to the requirements of the Specifications, whether in place or not, will be rejected. Rejected materials and/or equipment shall be removed immediately from the site of work unless otherwise permitted by the ENGINEER. No rejected material and/or equipment, the defects of which have been subsequently corrected, shall be used until approved in writing by the ENGINEER. CONTRACTOR shall be responsible for re-testing of all rejected materials.

1.05 SPECIAL INSPECTION

A. Various categories for special inspection/ observation of work progress during the course of construction are listed, but not limited to specifications and notes in the drawings. The OWNER requires on-site observation of the work at these various stages prior to covering the work. A list of such special inspections will be reviewed at the Pre-Construction Conference and subsequent job meetings, and it is understood that the CONTRACTOR will not cover work until such observation has been completed. The OWNER and OWNER representatives will be responsible for reasonable cooperation with CONTRACTOR requests for observation of the work. The CONTRACTOR shall include anticipated observation requests at weekly update of scheduled activities.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION

3.01 INSTALLATION

A. Inspection: Inspect materials or equipment upon arrival on the job site, prior to installation and reject damaged and defective items.

B. Measurements: Verify measurements and dimensions of the WORK, as an integral step of starting each installation.

C. Manufacturer's Instructions: Where installations include manufactured products, compliance with manufacturer's applicable instructions and recommendations for installation, to whatever extent these are more explicit or more stringent than applicable requirements indicated in Contract Documents is required.

END OF SECTION

SECTION 01 5626 – TEMPORARY FENCING

PART 1 - GENERAL

1.01 SUMMARY

A. Contractor shall determine temporary fence type, layout, and location of gates. Construction and maintenance of temporary fencing shall be provided by the contractor.

B. In general, the overall site of the existing Wastewater Facility is already fenced. Sections of which will have to be removed and replaced as dictated by the sequence of construction. It will be the Contractor's responsibility to determine their needs to secure the yard/staging areas as well as any and all construction sites or activities within the project. It is the OWNER'S opinion that the plastic mesh fence will be sufficient to provide safety and security surrounding the work activities; however, it is the contractor's responsibility to make the final determination. The OWNER will not be responsible in any manner for any missing, stolen, or damaged to any and all contractor property, yard, equipment, or construction activity, this is the contractor's responsibility.

1.02 SUBMITTALS

A. Submit in accordance with Section 01 3300 – Submittal Procedures.
   1. Shop drawing indicating layout of temporary fencing, location and size of gates, existing pavement and roads, access to fire hydrants and hose connections, and other site-specific conditions. Prepare drawing after site observation and verification of existing conditions.

PART 2 - PRODUCTS

2.01 TEMPORARY CHAIN LINK FENCING

A. Unless otherwise indicated, type of temporary chain link fencing shall be Contractor's option. Following types are acceptable:
   1. New Materials or previously used salvage chain link fencing in good condition.
   2. Posts: Galvanized steel pipe of diameter to provide rigidity. Post shall be suitable for setting in concrete footings, driving into ground, anchoring with base plates, or inserting in precast concrete blocks.
   3. Fabric: Woven galvanized steel wire mesh. Provide in continuous lengths to be wire tied to fence posts or prefabricated into modular pipe-framed fence panels.

B. Gates: Provide personnel and vehicle gates of the quantity and size required for functional access to site.
   1. Fabricate of same material as used for fencing
   2. Vehicle gates:
      a. Minimum width: 20 feet to allow access for emergency vehicles
      b. Capable of manual operation by one person.

2.02 PLASTIC MESH FENCING

A. Where required to provide visual warning and control, provide plastic mesh fencing supported by steel posts driven into ground or set in precast concrete blocks

B. Height: 36 inches minimum

C. Color: Safety orange

PART 3 - EXECUTION

3.01 LAYOUT

A. Access: Provide gates for personnel, delivery of materials, and access by emergency vehicles.

3.02 INSTALLATION

A. Plastic mesh fencing: Space steel support posts to ensure mesh remains vertical and at proper height. Securely tie mesh to posts.

3.03 MAINTENANCE AND REMOVAL

A. Maintain fencing in good condition. If damaged, immediately repair.

B. Remove temporary fencing upon completion of Work or when no longer required for security or control. Backfill holes and compact. Holes in pavement shall be surfaced to match existing paving. Repair damage caused by installation of temporary fencing.

END OF SECTION

SECTION 01 5713 – TEMPORARY EROSION AND SEDIMENT CONTROL

PART 1 - GENERAL

1.01 SECTION INCLUDES

A. Prevention of erosion due to construction activities.

B. Prevention of sedimentation of waterways, open drainage ways, and storm and sanitary sewers due to construction activities.

C. Restoration of areas eroded due to insufficient preventive measures.

1.02 REFERENCE STANDARDS: Most recently approved and published editions of:

A. ASTM D4355 - Deterioration of Geotextiles by Exposure to Light, Moisture, and Heat in a Xenon Arc Type Apparatus.

B. ASTM D4491 - Water Permeability of Geotextiles by Permittivity.

C. ASTM D4533 - Trapezoid Tearing Strength of Geotextiles

D. ASTM D4632 - Grab Breaking Load and Elongation of Geotextiles.

E. ASTM D4751 - Determining Apparent Opening Size of a Geotextile.

F. ASTM D4873 - Identification, Storage, and Handling of Geosynthetic Rolls and Samples.

G. EPA (NPDES) - National Pollutant Discharge Elimination System (NPDES), Construction General Permit.

H. FHWA FLP-94-005 - Best Management Practices for Erosion and Sediment Control; Federal Highway Administration.

I. USDA TR-55 - Urban Hydrology for Small Watersheds; USDA Natural Resources Conservation Service.

1.03 PERFORMANCE REQUIREMENTS

1.04 Perform all work and take all measures necessary to control soil erosion resulting from construction operations to prevent the flow of sediment from the site, to contain construction materials (including excavation and backfill), and to stabilize soil banks from erosion caused by stormwater flood zones so as to prevent damage to the adjacent water courses and to the project site.

A. Do not employ any construction method that violates a rule, regulation, guideline, or procedure established by Federal, State, or local agencies having jurisdiction over the environmental effects of construction.

B. Pollutants such as chemicals, fuels, lubricants, bitumen, raw sewage, and other harmful waste shall not be discharged into or alongside of any body of water or into natural or man-made channels leading thereto.

C. Prepare and submit a Stormwater Pollution Prevention Plan (SWPPP) to the ENGINEER for his records in accordance with ADEQ and with the plans as provided with in the Construction Documents. The CONTRACTOR is responsible for all aspects of this plan, its monitoring, maintaining of the reports and keeping a copy of documents on site as required by ADEQ.

D. Prepare and submit a monitoring program and reporting plan to the ENGINEER for his records in accordance with ADEQ. Submit to the ENGINEER for his records on a monthly basis copies of the monitoring reports taken throughout the month.

E. Prepare and submit the Notice of Intent (NOI) as required by ADEQ. Submit Copy of NOI to the ENGINEER for his records.

F. Comply with all requirements of U.S. Environmental Protection Agency for erosion and sedimentation control, as specified for the National Pollutant Discharge Elimination System (NPDES), Phases I and II, under requirements for the Construction General Permit (CGP), whether the project is required by law to comply or not.

G. Timing: Put preventive measures in place as soon as possible after disturbance of surface cover and before precipitation occurs.

H. Storm Water Runoff: Control increased storm water runoff due to disturbance of surface cover due to construction activities for this project.
   1. Prevent runoff into storm and sanitary sewer systems, including open drainage channels, in excess of actual capacity or amount allowed by authorities having jurisdiction, whichever is less.
   2. Anticipate runoff volume due to the most extreme short term and 24-hour rainfall events that might occur in 25 years.

I. Erosion on Site: Minimize wind, water, and vehicular erosion of soil on project site due to construction activities for this project.
   1. Control movement of sediment and soil from temporary stockpiles of soil.
   2. Prevent development of ruts due to equipment and vehicular traffic.
   3. If erosion occurs due to non-compliance with these requirements, restore eroded areas at no cost to Owner.

J. Erosion Off Site: Prevent erosion of soil and deposition of sediment on other properties caused by water leaving the project site due to construction activities for this project.
   1. Prevent windblown soil from leaving the project site.
   2. Prevent tracking of mud onto public roads outside site.
   3. Prevent mud and sediment from flowing onto sidewalks and pavements.
   4. If erosion occurs due to non-compliance with these requirements, restore eroded areas at no cost to Owner.

K. Sedimentation of Waterways On Site: Prevent sedimentation of waterways on the project site, including rivers, streams, lakes, ponds, open drainage ways, storm sewers, and sanitary sewers.
   1. If sedimentation occurs, install or correct preventive measures immediately at no cost to Owner; remove deposited sediments; comply with requirements of authorities having jurisdiction.
   2. If sediment basins are used as temporary preventive measures, pump dry and remove deposited sediment after each storm.

L. Sedimentation of Waterways Off Site: Prevent sedimentation of waterways off the project site, including rivers, streams, lakes, ponds, open drainage ways, storm sewers, and sanitary sewers.
   1. If sedimentation occurs, install or correct preventive measures immediately at no cost to Owner; remove deposited sediments; comply with requirements of authorities having jurisdiction.

M. Open Water: Prevent standing water that could become stagnant.

N. Maintenance: Maintain temporary preventive measures until permanent measures have been established.

1.05 SUBMITTALS

A. See Section 01 3300 – Submittal Procedures.

B. Stormwater Prevention Plan:
   1. Submit not less than 30 days prior to anticipated start of clearing, grading, or other work involving disturbance of ground surface cover.
   2. Include:
      a. Site plan identifying soils and vegetation, existing erosion problems, and areas vulnerable to erosion due to topography, soils, vegetation, or drainage.
      b. Site plan identifying soils and vegetation, existing erosion problems, and areas vulnerable to erosion due to topography, soils, vegetation, or drainage.
      c. Site plan showing grading; new improvements; temporary roads, traffic accesses, and other temporary construction; and proposed preventive measures.
      d. Where extensive areas of soil will be disturbed, include storm water flow and volume calculations, soil loss predictions, and proposed preventive measures.
      e. Schedule of temporary preventive measures, in relation to ground disturbing activities.
      f. Other information required by law.
      g. Format required by law is acceptable, provided any additional information specified is also included.
      h. Obtain the approval of the Plan by authorities having jurisdiction.
      i. Obtain the approval of the Plan by Owner.

C. Certificate: Mill certificate for silt fence fabric attesting that fabric and factory seams comply with specified requirements, signed by legally authorized official of manufacturer; indicate actual minimum average roll values; identify fabric by roll identification numbers.

D. Inspection Reports: Submit report of each inspection; identify each preventive measure, indicate condition, and specify maintenance or repair required and accomplished.

E. Maintenance Instructions: Provide instructions covering inspection and maintenance for temporary measures that must remain after Substantial Completion.

PART 2 - PRODUCTS

2.01 MATERIALS

A. Mulch: Use one of the following:
   1. Straw or hay
   2. Wood waste, chips, or bark
   3. Erosion control matting or netting
   4. Cutback asphalt
   5. Polyethylene film, where specifically indicated only

B. Grass Seed for Temporary Cover: Select a species appropriate to climate, planting season, and intended purpose. If same area will later be planted with permanent vegetation, do not use species known to be excessively competitive or prone to volunteer in subsequent seasons.

C. Bales: Air dry, rectangular straw bales.
   1. Cross Section: 14 by 18 inches, minimum.
   2. Bindings: Wire or string, around long dimension.

D. Bale Stakes: One of the following, minimum 3 feet long:
   1. Steel U- or T-section, with minimum mass of 1.33 lb. per linear foot.
   2. Wood, 2 by 2 inches in cross section.

E. Silt Fence Fabric: Polypropylene geotextile resistant to common soil chemicals, mildew, and insects; non-biodegradable; in longest lengths possible; fabric including seams with the following minimum average roll lengths:
   1. Average Opening Size: 30 U.S. Std. Sieve, maximum, when tested in accordance with ASTM D4751.
   2. Permittivity: 0.05 sec^-1, minimum, when tested in accordance with ASTM D4491.
   3. Ultraviolet Resistance: Retaining at least 70 percent of tensile strength, when tested in accordance with ASTM D4355 after 500 hours exposure.
   4. Tensile Strength: 100 lb-f, minimum, in cross-machine direction; 124 lb-f, minimum, in machine direction; when tested in accordance with ASTM D4632.
   5. Elongation: 15 to 30 percent, when tested in accordance with ASTM D4632.
   6. Tear Strength: 55 lb-f, minimum, when tested in accordance with ASTM D4533.
   7. Color: Manufacturer's standard, with embedment and fastener lines preprinted.
   8. Manufacturers:
      a. TenCate: www.tencate.com.
      b. North American Green: www.nagreen.com.
      c. Propex Geosynthetics: www.geotextile.com

F. Silt Fence Posts: One of the following, minimum 5 feet long:
   1. Steel U- or T-section, with minimum mass of 1.33 lb per linear foot.
   2. Softwood, 4 by 4 inches in cross section.
   3. Hardwood, 2 by 2 inches in cross section.
   4. Bank stabilization shall be durable UV resistant high performance turf reinforcement mats (HP TRMs). Tensile strength of 4000 lb/ft meets US EPA definition of a high performance TRM. Acceptable products are Pyramat or ENGINEER-approved equal.

PART 3 - EXECUTION

3.01 EXAMINATION

A. Examine site and identify existing features that contribute to erosion resistance; maintain such existing features to greatest extent possible.

3.02 PREPARATION

A. Schedule work so that soil surfaces are left exposed for the minimum amount of time.

3.03 SCOPE OF PREVENTIVE MEASURES

A. In all cases, if permanent erosion resistant measures have been installed temporary preventive measures are not required.

B. Construction Entrances: Traffic-bearing aggregate surface.
   1. Width: As required; 20 feet, minimum.
   2. Length: 50 feet, minimum.
   3. Provide at each construction entrance from public right-of-way.
   4. Where necessary to prevent tracking of mud onto right-of-way, provide wheel washing area out of direct traffic lane, with drain into sediment trap or basin.

C. Linear Sediment Barriers: Made of silt fences.
   1. Provide linear sediment barriers:
      a. Along downhill perimeter edge of disturbed areas, including soil stockpiles.
      b. Along the top of the slope or top bank of drainage channels and swales that traverse disturbed areas.
      c. Along the toe of cut slopes and fill slopes.

d. Perpendicular to flow across the bottom of existing and new drainage channels and swales that traverse disturbed areas or carry runoff from disturbed areas; space at maximum of 200 feet apart.
e. Across the entrances to culverts that receive runoff from disturbed areas.
f. Space sediment barriers with the following maximum slope length upslope from barrier:
   1) Slope of Less Than 2 Percent: 100 feet.
   2) Slope Between 2 and 5 Percent: 75 feet.
   3) Slope Between 5 and 10 Percent: 50 feet.
   4) Slope Between 10 and 20 Percent: 25 feet.
   5) Slope Over 20 Percent: 15 feet.

D. Storm Drain Curb Inlet Sediment Trap: Protect each curb inlet using one of the following measures:
1. Filter fabric wrapped around hollow concrete blocks blocking entire inlet face area; use one piece of fabric wrapped at least 1-1/2 times around concrete blocks and secured to prevent dislodging; orient cores of blocks so runoff passes into inlet.
2. Straw bale row blocking entire inlet face area; anchor into pavement.

E. Storm Drain Drop Inlet Sediment Traps: As detailed on drawings.

F. Temporary Splash Pads: Stone aggregate over filter fabric; size to suit application; provide at downspout outlets and storm water outlets.

G. Soil Stockpiles: Protect using one of the following measures:
1. Cover with polyethylene film, secured by placing soil on outer edges.
2. Cover with mulch at least 4 inches thickness of pine needles, sawdust, bark, wood chips, or shredded leaves, or 6 inches of straw or hay.

H. Mulching: Use only for areas that may be subjected to erosion for less than 6 months.
1. Wood Waste: Use only on slopes 3:1 or flatter; no anchoring required.
2. Asphalt: Use only where no traffic, either vehicular or pedestrian, is anticipated.

I. Temporary Seeding: Use where temporary vegetated cover is required.

3.04 INSTALLATION

A. Traffic-Bearing Aggregate Surface:
1. Excavate minimum of 6 inches.
2. Place geotextile fabric full width and length, with minimum 12 inch overlap at joints.
3. Place and compact at least 6 inches of 1.5 to 3.5 inch diameter stone.

B. Silt Fences:
1. Store and handle fabric in accordance with ASTM D4873.
2. Where slope gradient is less than 3:1 or barriers will be in place less than 6 months, use nominal 16 inch high barriers with minimum 36 inch long posts spaced at 6 feet maximum, with fabric embedded at least 4 inches in ground.
3. Where slope gradient is steeper than 3:1 or barriers will be in place over 6 months, use nominal 28 inch high barriers, minimum 48 inch long posts spaced at 6 feet maximum, with fabric embedded at least 6 inches in ground.
4. Where slope gradient is steeper than 3:1 and vertical height of slope between barriers is more than 20 feet, use nominal 32 inch high barriers with woven wire reinforcement and steel posts spaced at 4 feet maximum, with fabric embedded at least 6 inches in ground.
5. Install with top of fabric at nominal height and embedment as specified.
6. Embed bottom of fabric in a trench on the upslope side of fence, with 2 inches of fabric laid flat on bottom of trench facing upslope; backfill trench and compact.

7. Do not splice fabric width; minimize splices in fabric length; splice at post only, overlapping at least 18 inches, with extra post.
8. Fasten fabric to wood posts using one of the following:
   a. Four ¾-inch diameter, 1 inch long, 14-gauge nails.
   b. Five 17-gauge staples with 3/4 inch wide crown and ½-inch legs.
   c. Fasten fabric to steel posts using wire, nylon cord, or integral pockets.
   d. Wherever runoff will flow around end of barrier or over the top, provide temporary splash pad or other outlet protection; at such outlets in the run of the barrier, make barrier not more than 12 inches high with post spacing not more than 4 feet.

C. Straw Bale Rows:
1. Install bales in continuous rows with ends butting tightly, with one bale at each end of row turned uphill.
2. Install bales so that bindings are not in contact with the ground.
3. Embed bales at least 4 inches in the ground.
4. Anchor bales with at least two stakes per bale, driven at least 18 inches into the ground; drive first stake in each bale toward the previously placed bale to force bales together.
5. Fill gaps between ends of bales with loose straw wedged tightly.
6. Place soil excavated for trench against bales on the upslope side of the row, compacted.

D. Mulching Over Large Areas:
1. Dry Straw and Hay: Apply 2-1/2 tons per acre; anchor using dull disc harrow or emulsified asphalt applied using same spraying machine at 100 gallons of water per ton of mulch.
2. Wood Waste: Apply 6 to 9 tons per acre.
3. Asphalt: Apply at 1,200 gallons per acre.
4. Erosion Control Matting: Comply with manufacturer's instructions.

E. Mulching Over Small and Medium Areas:
1. Dry Straw and Hay: Apply 4 to 6 inches depth.
2. Wood Waste: Apply 2 to 3inches depth.
3. Pine Needles: Apply 2 to 3 inches depth.
4. Asphalt: Apply 1/4 gallon per square yard.
5. Erosion Control Matting: Comply with manufacturer's instructions.

F. Temporary Seeding:
1. When hydraulic seeder is used, seedbed preparation is not required.
2. When surface soil has been sealed by rainfall or consists of smooth undisturbed cut slopes, and conventional or manual seeding is to be used, prepare seedbed by scarifying sufficiently to allow seed to lodge and germinate.
3. If temporary mulching was used on planting area but not removed, apply nitrogen fertilizer at 1 pound per 1,000 sq. ft.
4. On soils of very low fertility, apply 10-10-10 fertilizer at rate of 12 to 16 pounds per 1,000 sq. ft.
5. Incorporate fertilizer into soil before seeding.
6. Apply seed uniformly; if using drill or cultipacker seeders place seed ½- to 1 inch deep.
7. Irrigate as required to thoroughly wet soil to depth that will ensure germination, without causing runoff or erosion.
8. Repeat irrigation as required until grass is established.

3.05 MAINTENANCE

A. Inspect preventive measures weekly, within 24 hours after the end of any storm that produces 0.5 inches or more rainfall at the project site, and daily during prolonged rainfall.

B. Repair deficiencies immediately.

C. Silt Fences:
   1. Promptly replace fabric that deteriorates unless need for fence has passed.
   2. Remove silt deposits that exceed one-third of the height of the fence.
   3. Repair fences that are undercut by runoff or otherwise damaged, whether by runoff or other causes.

D. Straw Bale Rows:
   1. Promptly replace bales that fall apart or otherwise deteriorate unless need has passed.
   2. Remove silt deposits that exceed one-half of the height of the bales.
   3. Repair bale rows that are undercut by runoff or otherwise damaged, whether by runoff or other causes.

E. Clean out temporary sediment control structures weekly and relocate soil on site.

F. Place sediment in appropriate locations on site; do not remove from site.

3.06 CLEAN UP

A. Remove temporary measures after permanent measures have been installed, unless permitted to remain by Engineer.

B. Clean out temporary sediment control structures that are to remain as permanent measures.

C. Where removal of temporary measures would leave exposed soil, shape surface to an acceptable grade and finish to match adjacent ground surfaces.

END OF SECTION

SECTION 01 5719 –TEMPORARY ENVIRONMENTAL CONTROLS

PART 1 - GENERAL

1.01 EXPLOSIVES AND BLASTING

A. The use of explosives on the WORK will not be permitted.

1.02 RUBBISH CONTROL

A. During the progress of the WORK, the CONTRACTOR shall keep the Site and other areas used by it in a neat and clean condition, and free from any accumulation of rubbish. Dispose of all rubbish and waste materials of any nature occurring at the Site, and shall establish regular intervals of collection and disposal of such materials and waste. Keep its haul roads free from dirt, rubbish and unnecessary obstructions resulting from its operations. Disposal of all rubbish and surplus materials shall be off the Site in accordance with local codes and ordinances governing locations and methods of disposal, and in conformance with all applicable safety laws, and to the particular requirements of Part 1926 of the OSHA Safety and Health Standards for Construction.

1.03 SANITATION

A. The CONTRACTOR shall provide adequate sanitary facilities for the use of those employed on the WORK. Such facilities shall be made available when the first employees arrive on the site of the WORK, shall be properly secluded from public observation, and shall be constructed and maintained during the progress of the Work in suitable numbers and at such points and in such manner as may be required.

B. The CONTRACTOR shall maintain the sanitary facilities in a satisfactory and sanitary condition at all times and shall enforce their use. He shall rigorously prohibit the committing of nuisances on the site of the WORK, on the lands of the OWNER, or on adjacent property.

C. Toilet Facilities: The CONTRACTOR shall provide fixed or portable chemical toilets wherever needed for the use of employees. Toilets at construction job sites shall conform to the requirements of Part 1926 of the OSHA Standards for Construction.

D. Sanitary and Other Organic Wastes: The CONTRACTOR shall establish a regular daily collection of all sanitary and organic wastes. All wastes and refuse from sanitary facilities provided or organic material wastes from any other source related to operations shall be disposed of away from the Site in accordance with all laws and regulations pertaining thereto.

1.04 CHEMICALS

A. All chemicals used or furnished by the CONTRACTOR for or during project construction, whether defoliant, soil sterilant, herbicide, pesticide, disinfectant, polymer, reactant or of other classification, shall show approval of either the U.S. Environmental Protection Agency or the U.S. Department of Agriculture. Use of all such chemicals and disposal of residues shall be in strict accordance with the printed instructions of the manufacturer.

1.05 CULTURAL RESOURCES

A. Attention is directed to the National Historic Preservation Act of 1966 (16 U.S.C. 470) and 36 CFR 800, which provides for the preservation of potential historical architectural, archaeological, or cultural resources (hereinafter called "cultural resources").

B. Conform to the applicable requirements of the National Historic Preservation Act of 1966 as it relates to the preservation of cultural resources.

C. In the event potential cultural resources are discovered during subsurface excavations at the site of construction, the following procedures shall be instituted:
   1. The CONTRACTOR shall issue a Field Order directive to cease all construction operations at the location of such potential cultural resources find.
   2. Such Field Order shall be effective until such time as a qualified archaeologist can be called to assess the value of these potential cultural resources and make recommendations to the State Historic Preservation Office.

D. If the archaeologist determines that the potential find is a bona fide cultural resource, at the direction of the State Historic Preservation Office, WORK shall be suspended at the location of the find under the provisions for changes contained in the Contractual Agreement.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01 5726 – SITE WATERING FOR DUST CONTROL

PART 1– GENERAL

1.01 DUST ABATEMENT

A. Preventative measures to limit the production of dust in amounts damaging to property, cultivated vegetation or domestic animals, or causing a nuisance to persons living in or occupying buildings in the vicinity shall be taken in to account. Responsibility for any damage resulting from dust originating from its operations shall be the CONTRACTOR's. The dust abatement measures shall be maintained at all times during construction of the project, in accordance with the requirements of jurisdictional agency.

PART 2 – PRODUCTS (NOT USED)

PART 3 – EXECUTION

3.01 GENERAL

A. The CONTRACTOR shall take necessary measures to control any and all dust related to or as a result of construction activities under this Contract. The CONTRACTOR shall be responsible for obtaining a Dust Control Permit as required by the jurisdictional agency.

B. The water necessary for the dust control operation will be Owner-furnished; beyond that, the CONTRACTOR shall be responsible for providing whatever means necessary to accomplish the task of Dust Control. The CONTRACTOR shall be responsible for any damage resulting from dust originating from construction activities under this Contract.

END OF SECTION

SECTION 01 7113 – MOBILIZATION

PART 1 - GENERAL

1.01 THE REQUIREMENT

A. Mobilization shall include verification by the CONTRACTOR that all permits have been obtained; moving onto the site of all plant and equipment; furnishing and erecting plants, temporary buildings, and other construction facilities; and implementing security requirements; all as required for the proper performance and completion of the WORK. Mobilization shall include the following principal items:

1. Moving onto the site all materials and equipment required for first month operations
2. Installing temporary construction power, wiring and lighting facilities if applicable
3. Establishing a fire protection system as required.
4. Developing a construction water supply as required.
5. Providing field office trailers, complete with all specified furnishings and utility services (if available) including telephones, telephone appurtenances and copying machine
6. Providing all on-site communication facilities including telephones
7. Providing on-site sanitary facilities and potable water facilities
8. Arranging for and erection of work and storage yard
9. Obtaining all required permits for the project.
10. Comply with all OSHA required notices and establish a safety program
11. Having the superintendent or authorized representatives at the job site as required for execution of the work
12. Provide and implement an on-site Dust Control Plan.
13. Upon start of construction, the CONTRACTOR shall furnish and install a Project Identification Sign. The sign shall be painted by a professional experienced in sign painting. The paint used shall resist weathering and fading for the scheduled construction project duration. Two 4”X4”X8’ supports shall be supplied by the CONTRACTOR. The project identification sign shall be securely bolted to the supports and shall be installed and located as directed by the OWNER. The CONTRACTOR shall repair the sign structure and supports as necessary for the duration of the project. The sign and supports shall be maintained in a neat and clean condition. The CONTRACTOR shall remove and properly dispose of the sign upon completion of the project. Costs associated with supplying, erecting, and maintaining the project identification sign shall be considered incidental to the contract and no separate payment will be allowed.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01 7123 – FIELD ENGINEERING

PART 1 - GENERAL

1.01 SUMMARY

A. Section Includes: Field engineering to establish lines and grades for the WORK.

1.02 THE REQUIREMENT

A. The CONTRACTOR shall provide the surveying and staking control for the project. In addition, the CONTRACTOR shall provide the staking of the property and easement limits, clearing limits, influent and effluent lines, utilities, and excavation limits staking of structure corners with offsets as necessary for construction.

B. The CONTRACTOR shall provide all necessary staking following the OWNER initial staking as completed during the design of this project, as required to construct all items included in the plans and Scope of Work.

C. The CONTRACTOR shall survey the location of any underground utility line that the CONTRACTOR installs prior to backfilling. This shall include all joints, valves, structure, hydrants and services.

1.03 QUALITY ASSURANCE

A. Qualifications of Surveyor or Engineer: Registered civil engineer or land surveyor in state where Project is located.

B. Accuracy of stakes, alignments, and grades may be checked randomly by ENGINEER.
   1. Notice of when checking will be conducted will be given.
   2. When notice of checking is given, postpone parts of the Work affected by stakes, alignments or grades to be checked until checked.
   3. Do not assume that ENGINEER's check substitutes or complements required field quality control procedures.

1.04 CONSTRUCTION STAKES, LINES, AND GRADES

A. Execute the Work in accordance with the lines and grades indicated.

B. Make distances and measurements on horizontal planes, except elevations and structural dimensions.

1.05 SURVEY REFERENCE POINTS

A. Basic reference line, a beginning point on basic reference line, and a bench mark will be provided, by OWNER as defined in the Contract.

B. From these reference points, establish other control and reference points as required to properly lay out the Work.

C. Locate and protect control points prior to starting sitework, and preserve permanent reference points during construction.
   1. Make no changes or relocations without prior written notice.
   2. Replace Project control point, when lost or destroyed, in accordance with original survey control.

D. Set monuments for principal control points and protect them from being disturbed and displaced.
   1. Re-establish disturbed monuments.
   2. When disturbed, postpone parts of the Work that are governed by disturbed monuments until such monuments are re-established.

1.06 PROJECT SURVEY REQUIREMENTS

A. Establish minimum of 2 permanent bench marks on site referenced to data established by survey control points.

B. Record permanent bench mark locations with horizontal and vertical data on Project Record Documents.

C. Assume responsibility for accuracy of stakes, alignments, and grades by performing verifications and checking in accordance with standard surveying practice.

D. Locate all utilities installed within the project prior to backfilling. Make a complete survey at the line, hub, or joint locations.

1.07 RECORD DOCUMENTS

A. Once the CONTRACTOR has reached substantial completion the CONTRACTOR will survey the site in preparation of Record Documents in conjunction with the CONTRACTORS supplied as-built as specified in the applicable Sections of Division 01 – General Requirements.

B. Carefully note all deviations or changes from the original drawings and maintain complete, accurate log of control points and survey.

C. Submit all utility locate information and surveyed information in hard copy and AutoCAD format.

D. Affix civil engineer's or land surveyor's signature and registration number to Record Drawing to certify accuracy of information shown.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION

3.01 GENERAL

A. The CONTRACTOR shall provide the initial surveying and staking control for the project. In addition, the CONTRACTOR shall provide the initial staking of the property and easement limits, clearing limits, influent and effluent lines, utilities, and excavation limits staking of structure corners with offsets as necessary for construction.

B. The CONTRACTOR shall provide all required field survey as necessary to complete the work as defined in the contract.

END OF SECTION

SECTION 01 7700 – CLOSEOUT PROCEDURES

PART 1 - GENERAL

1.01 SUBSTANTIAL COMPLETION

A. Substantial completion is based on the guideline established in the Contract Documents.

B. CONTRACTOR shall submit written certification that the project construction phase is entering the substantial completion phase.

C. CONTRACTOR to submit all applicable certification and test results, including but not limited to:
   1. Hydrostatic Test for Concrete Structures
   2. Pipe line pressure tests
   3. Geotechnical test
   4. Concrete Tests
   5. Equipment Field Service Installation, Certification, Certificate of Warranty, and Evidence of Training per applicable sections of Division 01 – General Requirements
   6. Certifications of all special inspections
   7. Clean water testing
   8. Electrical testing and inspection certification
   9. Equipment and process instrumentation program testing and certification
   10. And any applicable test required by the contract documents

D. Submit list of items to be completed or corrected but will not impact substantial completion.

E. Engineer will inspect within seven days after receipt of certification, together with a representative.

F. Should ENGINEER consider that work is substantially complete:
   1. Prepare and submit to ENGINEER a list of the items to be completed or corrected, as determined by on-site observation.
   2. Engineer will prepare and issue a Certificate of Substantial Completion, containing:
      a. Date of Substantial Completion.
      b. List of items to be completed or corrected, verified, and amended.
      c. The time required to complete or correct work of listed items.
      d. Responsibilities for:
         1) Insurance
         2) Utilities
         3) Operation of mechanical, electrical, and other systems
         4) Maintenance and cleaning
         5) Security
      e. Signatures of: ENGINEER
   3. Complete work listed for completion or correction, within designated time.

E. Should ENGINEER consider that work is not substantially complete:
   1. He shall immediately notify, in writing, stating reasons.
   2. Complete work, and send second written notice to ENGINEER, certifying that Project, or designated portion of project of substantially complete.
   3. ENGINEER will re-review work.

1.02 FINAL INSPECTION

A. Submit written certification that:
   1. Contract Documents have been reviewed.

2. Project has been inspected for compliance with Contract Documents.
3. Work has been completed in accordance with Contract Documents.
4. Equipment and systems have been tested in presence of ENGINEER and are operational.
5. Project is completed and ready for final inspection from jurisdictional agency(ies).

B. ENGINEER will make final on-site observation/review within seven (7) days after receipt of certification.

C. Should ENGINEER consider that work is finally complete in accordance with requirements of Contract Documents, he shall prepare and issue the following:
1. Certificate of Completion;
2. A Request to make Project Closeout submittals.

D. Should ENGINEER consider that work is not finally complete:
1. He shall notify, in writing, stating reasons.
2. Take immediate steps to remedy the stated deficiencies, and send second written notice to ENGINEER certifying that work is complete.
3. ENGINEER will re-review the work.

1.03 CLOSEOUT SUBMITTALS

A. Submit the following Closeout Submittals upon completion of the Work and at least 7 days prior to submitting Application for Final Payment:
1. Evidence of Compliance and Closeout from Jurisdictional Agency(ies)
2. Project Record Documents (As-built Drawings and Documentation)
3. Operation and Maintenance Manuals
4. Warranties and Bonds
5. Keys and Keying Schedule
6. Evidence of Payment and Release of Liens as outlined in Conditions of the Contract
7. Release of claims as outlined in the Conditions of the Contract
8. Certificate of Final Completion

1.04 EVIDENCE OF COMPLIANCE WITH REQUIREMENTS OF GOVERNING AUTHORITIES

A. Submit the following:
1. Authorization of Construction (by OWNER)
2. APP Permit (by OWNER)
3. 4.01 Permit (by OWNER)
4. Certificate of Occupancy:
    1) Yavapai County
5. Certificate of Inspection:
    a. Mechanical:
        1) Town of Jerome.
    b. Electrical:
        1) Town of Jerome.

1.05 PROJECT RECORD DOCUMENTS

A. Deliver record documents with the transmittal letter containing date, Project title, list of documents, and signature of the CONTRACTOR.

1.06 WARRANTIES AND BONDS

A. Provide executed Warranty or Guaranty Form if required by Contract Documents.

B. Provide specified additional warranties, guarantees, and bonds form manufacturers and suppliers.

1.07 FINAL CLEANING UP

A. The work will not be considered as completed and final payment made until all final cleanup has been done in a satisfactory manner. Contractor shall obtain clean up verification from Owner. Reference applicable sections of Division 01 – General Requirements.

1.08 CERTIFICATE OF FINAL COMPLETION

A. When operational test has been successfully completed, ENGINEER will certify that new facilities are operationally complete. ENGINEER will submit a list of known items (punch list) still to be completed or corrected prior to contract completion.

B. List of items to be completed or corrected will be amended as items are resolved by Contractor.

C. When all items have been completed or corrected, submit written certification that the entire work is complete in accordance with the Contract Documents and request final inspection.

D. Final Clean up verification letter from Owner.

E. Upon completion of final inspection, ENGINEER will either prepare a written acceptance of the entire work or advise the Contractor of work not complete. If necessary, inspection procedures will be repeated.

1.09 FINAL APPLICATION FOR PAYMENT

A. Submit final applications in accordance with the requirements of the Contractual Agreement.

1.10 FINAL CERTIFICATE FOR PAYMENT

A. ENGINEER will issue final certificate in accordance with provisions of Contractual Agreement.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01 7823 – OPERATION AND MAINTENANCE DATA

PART 1 - GENERAL

1.01 THE REQUIREMENT

A. Compile product data and related information appropriate for maintenance and operation of equipment furnished under the Contract. Prepare Operating and Maintenance Manual as specified.

B. Instruct OWNER's personnel in the maintenance and operation of equipment and systems as outlined herein.

C. In addition to Operating and Maintenance Data, the Manufacturer's printed recommended Installation Practice shall be included. If not part of the Operating and Maintenance Manual, separate written installation instructions shall be provided, serving to assist the CONTRACTOR in equipment installation.

1.02 OPERATING AND MAINTENANCE MANUAL

A. Every piece of equipment furnished and installed shall be provided with complete maintenance and operations manuals, unless noted otherwise. These shall be detailed in instructions to the OWNER's personnel. After approval, the CONTRACTOR shall store all manuals until the completion of the project or until requested by the ENGINEER. The manuals will be stored and delivered to the OWNER in an organized format.

B. Provide two hard copies and one (1) electronic version in PDF format. The hard copy shall be delivered to the jobsite shipped with the equipment and one (1) copies shall be delivered to the CONTRACTOR's main office. The PDF copy shall be electronically delivered to the OWNER, the ENGINEER, and the CONTRACTOR.

1.03 SUBMITTALS

A. Submittals shall be made in accordance with Section 01 3300 – Submittal Procedures.

1.04 CONTENT OF MANUAL

A. Neatly typewritten table of contents for each volume, arranged in systematic order.
   1. CONTRACTOR, name of responsible principal, address and telephone number.
   2. A list of each product required to be included, indexed to the content of the volume.
   3. List, with each product, the name, address and telephone number of:
      a. Subcontractor or installer.
      b. Maintenance contractor, as appropriate.
      c. Identify the area of responsibility of each.
      d. Local source of supply for parts and replacement.
   4. Identify each product, by product name and other identifying symbols as set forth in Contract Documents.

B. Product Data:
   1. Include only those sheets, which are pertinent to the specific product. References to other sizes and types or models of similar equipment shall be deleted or lined out.
   2. Annotate each sheet to:
      a. Clearly identify the specific product or part installed.
      b. Clearly identify the data applicable to the installation.
      c. Provide a parts list for all new equipment items, with catalog numbers and other data necessary for ordering replacement parts.
      d. Delete references to inapplicable information.

3. Clear and concise instructions for the operation, adjustment, lubrication, and other maintenance of the equipment including a lubrication chart and maintenance schedule or frequency.

C. Drawings:
   1. Supplement product data with drawings as necessary to clearly illustrate:
      a. Relations of component parts of equipment and systems.
      b. Control and flow diagrams.
   2. Coordinate drawings with information in Project Record Documents to assure correct illustration of complete installation.

D. Written text, as required to supplement product data for the particular installation:
   1. Organize in a consistent format under separate headings for different procedures.
   2. Provide a logical sequence of instructions for each procedure.

E. Copy of each warranty, bond and service contract issued: Provide information sheet for OWNER's personnel.
   1. Proper procedures in the event of failure.
   2. Instances which might affect the validity of warranties or bonds.

F. The manuals must be approved by the OWNER before final payment on the equipment is made.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01 7839 – PROJECT RECORD DOCUMENTS

PART 1 - GENERAL

1.01 RECORD DRAWINGS

A. The CONTRACTOR and its Subcontractors at the start of the project shall provide a clean set of Drawings and mark on them, in large writing “As Built.” This set of drawings will be kept at the job site trailer and used to indicate with a red pencil, pen or marker the “As Built” conditions of the project. These drawings will be updated as the work progresses to reflect the “As Built” conditions.

B. The CONTRACTOR shall be responsible to ensure that the “As Built” drawings are being kept up to date.

C. Upon substantial completion the CONTRACTOR shall obtain all “As Built” drawings and review them for accuracy and completeness, this includes surveying of utilities as required by these Specifications and Contract Documents. After the CONTRACTOR has reviewed and confirmed accuracy and completeness of the “As Built” drawings the CONTRACTOR shall submit the drawings and survey information to the ENGINEER of record.

1. All survey as-built information shall be submitted to the ENGINEER in AutoCAD format.

D. Upon receipt of the “As Built” drawings the ENGINEER shall make all necessary changes to the documents and provide a Record Drawing set to the CONTRACTOR for their use and distribution as required for project closeout, as required by these Specifications and Contract Documents.

1.02 PHOTO DOCUMENTATION

A. Images must be created using only digital photographic equipment. Camera should be capable of utilizing a moderate wide-angle lens system and have electronic flash capable of properly illuminating a large interior space. Digital images shall be saved in JPEG format and properly labeled.

B. Digital copies shall be provided for OWNER and ENGINEER by CONTRACTOR at each weekly progress meeting.

C. Saved images shall include detailed photograph description along with month, day, and year and separated by treatment process.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

END OF SECTION

SECTION 01 7900 – DEMONSTRATION AND TRAINING

PART 1 - GENERAL

1.01 THE REQUIREMENT

A. Description of Work:

1. The SBR SYSTEM EQUIPMENT VENDOR shall provide formal training of OWNER's personnel. Training shall commence after the successful completion of the Seeding Process
   a. Training of OWNER's personnel shall commence within a period of 14 days after the equipment installation and startup as mutually agreed to by OWNER, ENGINEER, and CONTRACTOR.
   b. Training shall be conducted for first shift during normal working hours.
   c. Training shall be completed within the time allocated in the Agreement.
   d. The Engineer shall document the time when the facilities are substantially unavailable for use by the SBR SYSTEM VENDOR to perform training due to circumstances beyond the control of the SBR SYSTEM VENDOR including but not limited to power outages, lack of feed water, inability to transfer product water or feed water due to factors beyond the control of the SBR SYSTEM VENDOR, not having adequate staff from the CONTRACTOR or the OWNER. If in the sole opinion of the ENGINEER the facilities are substantially unavailable to the SBR SYSTEM VENDOR, equivalent additional time for training will be granted.
   e. Failure of the SBR SYSTEM VENDOR to complete the Training as required by this Section within the allocated time, shall constitute a failure of the SBR SYSTEM VENDOR to provide Special Services in accordance with the requirements of the Contract.
   f. Upon successful completion of the Training required by this Section, the OWNER will issue a "Notice of Completed Training".
   g. The SBR SYSTEM VENDOR shall maintain record of the individuals that have completed training and provide information required for the documentation of Professional Development Hours required for the OWNER's personnel.
2. The SBR SYSTEM VENDOR shall provide the services of factory-trained specialists to train the OWNER's personnel in the recommended operation and the preventive maintenance procedures for all equipment provided by the Contract Documents.
3. The SBR SYSTEM VENDOR shall provide a combination of classroom and hands-on training.
4. The following Levels of Training shall be provided.

Level of Training	Number of Shifts	Maximum Number of Participants	Classroom Training (Hours)	Hands-on Training (Hours)
SBR System	1	4	8	16
Mechanical Equipment	1	4	8	16
Instrumentation and Control Equipment	1	4	8	16
PLC / HMI	1	4	16	16

5. Hands-On Training shall be limited to groups of 4. In the event that more than 4 personnel are to be trained, multiple hands-on training sessions shall be conducted.
6. The SBR SYSTEM VENDOR shall be responsible for all costs associated with training and shall provide required materials, texts, and supplies.
7. Training shall be conducted in normal eight (8) hour working days until conclusion of the training course.
8. Training sessions may be videotaped by the OWNER at the OWNER's expense.
9. Training material shall be provided to the OWNER in written and electronic format.
10. Training shall be performed by the SBR SYSTEM VENDOR and component equipment suppliers. The SBR SYSTEM VENDOR shall be responsible for the training on the design and operation of the equipment and systems provided. This includes, but not limited to:
11. Sequencing Batch Reactor System:
    a. SBR Theory
    b. SBR System
    c. SBR Processes:
        1) Start Up, Shut Down
        2) SBR Treatment Cycle (fill, aerate, anoxic mix, settle, decant)
    d. Routine and Non-Routine Maintenance
12. Component Equipment Training:
    a. Equipment: Equipment (including pumps, compressors, crane)
    b. Mechanical: Equipment (valves, actuators, blowers, and positioners)
13. Instrumentation and Control Programmable Logic Control/HMI Training:
    a. Programmable Logic Control Equipment
    b. HMI System Training

B. Coordination:
1. The SBR SYSTEM VENDOR shall coordinate these services at times acceptable to the OWNER, with a minimum of 5 days' prior notice.

1.02 QUALITY ASSURANCE/QUALITY CONTROL (QA/QC)

A. The qualifications of specialists shall meet the requirements of this Section and are subject to approval by the ENGINEER.

1.03 SUBMITTALS

A. Training Manuals shall be provided with the PRELIMINARY O&M Manuals. Refer to SBR System RFP for Installation, Operation and Maintenance Manuals requirements.

B. The SBR SYSTEM VENDOR shall develop a Training Manual and submit it to the ENGINEER and the OWNER. The Training Manual shall include the elements presented in this Section or as required by the SBR SYSTEM VENDOR or component equipment supplier.

C. The SBR SYSTEM VENDOR shall prepare a Training Lesson Plan, provide qualified instructors, and schedule the training in an organized manner.
1. Proposed lesson plans for scheduled instruction shall be submitted 15 days prior to the commencement of training. Lesson plans shall be approved by the ENGINEER a minimum of 5 days prior to scheduled instruction. All training material shall be provided to the OWNER in electronic format.

2. Credentials for the SBR SYSTEM VENDOR'S designated instructor(s) shall be submitted thirty (30) days prior to the commencement of training. Credentials shall include a brief resume and specific details of the instructor(s) pertaining both to personal experience operating and maintaining the specified equipment and conducting operation and maintenance for the same equipment.
3. The SBR SYSTEM VENDOR'S proposed lesson plans shall detail specific instruction topics. Training aids to be utilized in the instruction shall be referenced and attached where applicable to the proposed lesson plan. "Hands-on" demonstrations planned for the instruction shall be described in the lesson plan.
4. The SBR SYSTEM VENDOR shall indicate the estimated duration of each segment of the training in the lesson plan.
5. Submit information as required by the local primacy agency in support of Professional Development Hours

1.04 SPECIAL PROJECT CONSIDERATIONS

A. Training Aids:
   1. The SBR SYSTEM VENDOR's instructor shall incorporate training aids as appropriate to assist in the instruction. As a minimum, the training aids shall include text and figure handouts. Texts shall be bound within three-ring binders. Other appropriate training aids are:
      a. Audio-visual aids (e.g., films, slides, videotapes, overhead transparencies, posters, blueprints, diagrams, catalogue sheets).
      b. Equipment cutaways and samples (e.g., spare parts and damaged equipment).
      c. Tools (e.g., repair tools, customized tools, measuring and calibrating instruments).

B. The SBR SYSTEM VENDOR's instructor shall utilize descriptive class handouts during the instruction. Photocopied class handouts shall be good quality reproductions. Class handouts should accompany the instruction with frequent reference made to them. Customized handouts developed especially for the instruction are required. Handouts planned for the instruction shall be attached with the manufacturer's proposed lesson plan.

C. Hands-on Demonstration:
   2. The SBR SYSTEM VENDOR's instructor shall present Hands-on demonstrations of operations and maintenance of the SBR SYSTEM VENDOR supplied and component equipment. The proposed Hands-on demonstrations should be described in the SBR SYSTEM VENDOR's proposed lesson plan.

PART 2 – PRODUCTS (NOT USED)

PART 3 – EXECUTION

3.01 OPERATOR TRAINING

A. Training: The instruction lesson plan shall include the following as a minimum:
   1. Equipment Operation:
      a. Describe equipment's operating (process) function. Describe equipment's fundamental operating principals and dynamics.
      b. Identify equipment's mechanical, electrical, and electronic components and features.
      c. Identify all support equipment associated with the operation of subject equipment (e.g., valve actuators, motors).
      d. Recommend standard operating procedures to address start-up, routine monitoring, and shutdown of the equipment.

SECTION 02 0100 – MAINTENANCE OF EXISTING CONDITIONS

PART 1 - GENERAL

1.01 THE REQUIREMENT

A. The WORK of this Section, as defined in the Contract, includes all work necessary to satisfactorily prepare the site as shown on the accepted drawings and as specified herein. Following this preparation, the site shall be in such a condition as to easily continue with the next operation whether it be excavating, backfilling, or any other operations that are a part of the project. Site preparation includes clearing, grubbing, grading, tree and shrub removal, native grass stripping and removing and disposing of all debris within the limits of the project and such other areas as may be indicated on the plans or required work, except such objects as are designated to remain or are to be removed in accordance with the plans. This work shall also include the preservation from injury or defacement of all vegetation and objects designated to remain.

B. Related Sections: The work shall conform to these Specifications and the Contract Documents.

C. Soils Report: This work shall conform to the requirements of the latest Geotechnical Evaluation.

1.02 SUBMITTALS

A. Submittals shall be made in accordance with Section 01 3300 – Submittal Procedures.

B. Shop Drawings: Submit clearing limits, staging, and site access plans and limits.

1.03 SITE SURVEY AND LAYOUT

A. The CONTRACTOR shall establish construction, and clearing limits by providing the initial site survey and field staking. The initial staking will include property line limits, casements and access points and structure locations with 100-ft. offsets. The OWNER shall provide the contractor the survey data for the project to include the survey control points, hubs, etc., and benchmarks for the site. The contractor shall layout required construction staking as defined in these Specifications and the Contract Documents.

1.04 PERMITS

A. Verify all required permits have been secured for this work. Comply with applicable local Air Pollution Control requirements. In the absence of specific ordinances, periodic watering shall be done to control dust throughout the work. Make all necessary arrangements for water required for this work.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION

3.01 PRIMARY SITE ACCESS

A. The CONTRACTOR shall provide clearing, grubbing, and stripping as defined in the contract.

B. The CONTRACTOR shall develop any necessary access to the Site, including access entrance barriers to prohibit entry of unauthorized persons as defined in the Contract. The contractor shall provide at the project site access barriers to prohibit entry of unauthorized persons as defined in the Contract.

C. Adequately support existing structures, sidewalks, slabs, pavements, utilities, and other facilities that may be affected by the proposed construction as defined in the Contract.

D. Utility Interference: Where existing utilities interfere with the WORK, notify the utility owner before proceeding in accordance with the General Conditions.

3.02 CLEARING, GRUBBING AND STRIPPING

A. The CONTRACTOR shall perform this work as defined in the Geotechnical Evaluation and or Soils Report.

B. Construction areas shall be cleared of grass and weeds to at least a depth of 1 inch and cleared of structures, pavement, sidewalks, concrete or masonry debris, trees, logs, upturned stumps, loose boulders, and any other objectionable material of any kind which would interfere with the performance or completion of the WORK, create a hazard to safety, or impair the subsequent usefulness of the WORK, or obstruct its operation. Trees and other natural vegetation outside the actual lines of construction shall be protected from damage during construction.

C. Within the limits of clearing, the areas below the natural ground surface shall be grubbed to a depth necessary to remove all stumps, roots, buried logs and all other objectionable material. Septic tanks, drain fields, and connection lines and any other underground structures, debris or waste shall be removed if found on the Site. All objectionable material from the clearing and grubbing process shall be removed from the Site and wasted in approved safe locations.

3.03 OVEREXCAVATION, REGRADING AND BACKFILL UNDER FILL AREAS

A. All grading and excavation shall conform to the requirements of the Geotechnical Evaluation and or Soils Report.

3.04 EXISTING UTILITY SERVICES

A. At start of work, CONTRACTOR shall locate and identify all utility services within the construction limits (both underground and overhead). Utilize Blue Stake services and private location underground utilities locating services as required, including potholing if necessary.

B. CONTRACTOR shall disconnect or reroute all existing services, where such services will be affected by construction operations. Comply with all instructions issued during the pre-construction conference regarding coordination, advance notice, emergency repairs, etc.

C. All DISCONNECTIONS OR TERMINATIONS SHALL BE PERFORMED IN SAFE MANNER, IN ACCORDANCE WITH APPLICABLE CODES AND REGULATIONS. PROVIDE ANY DISCONNECTS SWITCHES, VALVES, PLUGS, TEES, ETC., AS REQUIRED FOR THE VARIOUS LOCATIONS.

END OF SECTION

SECTION 02 4000 – DEMOLITION AND STRUCTURE MOVING

PART 1 - GENERAL

1.01 REQUIREMENT

A. Items required to be removed:
   1. Reference plans for existing items to be removed. Removable items may include, but are not limited to concrete paving, asphaltic concrete pavement, base courses, manholes, and pipes.

1.02 REGULATORY REQUIREMENTS

A. Conform to applicable codes for disposal of debris.

B. Coordinate removal work with utility companies or appropriate party.

PART 2 – PRODUCTS – NOT USED

PART 3 – EXECUTION

3.01 PREPARATION

A. Obtain advance approval from ENGINEER for dimensions and limits of removal work.

B. Identify known utilities below grade. Stake and flag locations.

3.02 PROTECTION

A. Protect following from damage or displacement:
   1. Adjacent public and private property.
   2. Trees, plants, and other landscape features designated to remain.
   3. Utilities designated to remain.
   4. Pavement and utility structures designated to remain.
   5. Bench marks, monuments, and existing structures designated to remain.

3.03 REMOVALS

A. Remove pavements and structures by methods that will not damage underground utilities. Do not use drop hammer near existing underground utilities.

B. Minimize amount of earth loaded during removal operations.

C. Where existing pavement is to remain, make straight saw cuts in existing pavement to provide clean breaks prior to removal. Do not break concrete pavement or base with drop hammer unless concrete or base has been saw cut to minimum depth of 2 inches.

D. When street and driveway saw cut location is greater than one-half of pavement lane width, remove pavement for full lane width or to nearest longitudinal joint as directed by ENGINEER.

E. Remove sidewalks and curbs to nearest existing dummy, expansion, or construction joint.

F. Unless noted otherwise or indicated in the Contract Documents, existing ends of pipe culverts or end of sewers which are to remain, shall have an 8-inch-thick masonry plug in pipe installed in the end of the pipe prior to backfill, with the backfill constructed in accordance with requirements of these Specifications.

3.04 BACKFILL

A. Backfill of removal areas shall be in accordance with requirements of these Specifications.

3.05 DISPOSAL

A. Inlet frames, grates, and plates; and manhole frames and covers, may remain City property. Disposal shall be in accordance with requirements these Specifications.

B. Remove from site, debris resulting from work under this section in accordance with requirements of these Specifications.

END OF SECTION

SECTION 02 9600 – TEMPORARY BYPASS PIPING SYSTEMS

PART 1 – GENERAL

1.01 THE REQUIREMENT

A. Section includes requirements for implementing a temporary bypass piping for the purpose of diverting existing sewage flow around the Work area during construction.

1.02 QUALITY ASSURANCE

A. Follow national standards and as specified herein.

B. Perform leakage and pressure tests on piping using clean water before operation. Notify Project Manager 24 hours prior to testing.

C. Keep and maintain spare parts for piping on site, as required.

1.03 SUBMITTALS

A. Submittals shall be made in accordance with Section 01 33 00 – Submittal Procedures.

1. Detailed plan and description of proposed temporary bypass piping system. Bypass piping plan shall be stamped and certified by an Arizona registered civil engineer. Plans shall indicate the following:

a. Size, material, location, and method of installation of bypass piping;

b. Size and location of manhole for discharge piping;

c. Temporary pipe supports and anchoring required;

d. Thrust and restraint block sizes and locations, if required;

e. Sewer plugging method and type of plugs;

f. Calculations of friction losses, and flow velocity;

g. Schedule of installation and maintenance of bypass piping lines;

h. Procedures to monitor upstream mains for backup impacts;

i. Procedures for installation and removal of piping system;

j. Emergency plan detailing procedures in the event of sewer overflows, service backups, and sewage spillage. A copy of the emergency plan shall be maintained on site for the duration of construction.

1.04 CONTRACTOR'S RESPONSIBILITY FOR OVERFLOWS AND SPILLS

A. It is the responsibility of the Contractor to schedule and perform work in a manner that does not cause overflows, releases, or spills of sewage from sanitary sewers or bypass piping system.

PART 2 – PRODUCTS

2.01 MATERIALS

A. High-Density Polyethylene Pipe (HDPE):

1. All piping shall be homogenous throughout, free of visible cracks, discoloration, pitting, varying wall thickness, holes, foreign material, blisters, or other deleterious faults.

2. Piping shall be assembled and joined at site using couplings, flanges, or butt-fusion method to provide leak proof joints. Follow manufacturer's instructions and ASTM D-2657. Threaded joints or connections are not permitted.

3. Fusing shall be performed by personnel certified as fusion technicians by the manufacturer.
4. Butt-fused joints shall be of true alignment and uniform roll-back beads resulting from use of proper temperature and pressure.
    a. Adequate cooling time shall be allowed before removal of pressure.
    b. Joint shall be watertight and have tensile strength equal to that of the pipe after fusion.
    c. Joint shall be accepted by Project Manager prior to installation.

B. Coupling and connectors shall be:
1. Abrasion resistant;
2. Suitable for intended service;
3. Rated for external and internal loads anticipated.

C. Valves and Fittings shall be selected and sized according to flow calculations and operating pressures.

D. Plugs shall be selected and installed according to size of the service line to be plugged, pipe and manhole configuration, and site-specific requirements. Additional plugs shall be retained on site in the event of plug failure. Plugs shall be inspected for defects before use.

E. Discharge hose shall not be permitted, except in short sections where approved in writing by the Engineer.

F. Anchoring systems shall be provided to ensure pipeline does not sag or deflect.

2.02 DESIGN REQUIREMENT

A. The bypass piping system shall be designed with sufficient capacity to convey the peak flow of 0.27 MGD.

B. The system shall be designed to operate for 24 hours a day.

C. Pipeline valves, fittings, and connections shall be of adequate size to accommodate peak flow and shall ensure total flow can be safely diverted around construction areas.

PART 3– EXECUTION

3.01 PREPARATION

A. Bypass pipelines shall be located such that there is minimal disturbance to existing utilities. Existing utilities shall be field located by the Contractor in accordance with the contract documents. Bypass pipeline locations shall be approved by the Engineer upon submittal of the temporary bypass system design plans as specified above in Part 1.

3.02 INSTALLATION AND REMOVAL

A. Bypass piping system shall be connected to the existing sewer system(s) where indicated on the Drawings.

B. Plugging or blocking of sewage flows shall incorporate a primary and secondary plugging device. When plugging or blocking is no longer required for performance and acceptance of work, remove in such a manner that permits sewage flow to slowly return to normal without surge. Surcharging or other major downstream disturbances shall be avoided.

END OF SECTION

2. Detailed Component Description:
   a. Identify and describe in detail each component's function.
   b. Group related components into subsystems, where applicable. Describe subsystem functions and their interaction with other subsystems.
   c. Identify and describe in detail equipment safeties and control interlocks.
3. Equipment Preventative Maintenance (PM):
   a. Describe PM inspection procedures required to:
      1) Perform an inspection of the equipment in operation.
      2) Spot potential trouble symptoms and anticipate breakdowns.
      3) Forecast maintenance requirements (predictive maintenance).
   b. Define the recommended PM intervals for each component.
   c. Provide lubricant and replacement part recommendations and limitations.
   d. Describe appropriate cleaning practices and recommend intervals.
   e. Identify and describe the use of special tools required for maintenance of the equipment.
   f. Describe component removal/installation and disassembly/assembly procedures.
   g. Perform "hands-on" demonstrations of preventive maintenance procedures.
   h. Describe recommended measuring instruments and procedures, and provide instruction on interpreting alignment measurements, as appropriate. Define recommended torque, mounting, calibration, and/or alignment procedures and settings, as appropriate.
   i. Describe recommended procedures to check/test equipment following a corrective repair.
4. Equipment Troubleshooting:
   a. Define recommended systematic troubleshooting procedures.
   b. Provide component specific troubleshooting checklists.
   c. Describe applicable equipment testing and diagnostic procedures to facilitate troubleshooting.

END OF SECTION

SECTION 03 15 00 - CONCRETE ACCESSORIES

PART 1 - GENERAL

1.01 SECTION INCLUDES

A. Provision of waterstops embedded in concrete and spanning control, expansion, and/or construction joints to create a continuous diaphragm to prevent fluid migration.

B. Provision of strip applied expanding waterstop, embedded in concrete and spanning pipe penetrations, to create a continuous diaphragm for prevention of fluid migration.

1.02 REFERENCES

A. PVC Waterstop:
   1. Corps of Engineers: CRD-C 572-74
   2. American Society for Testing Materials (ASTM)
   3. Bureau of Reclamation: C-902

B. Hydrophilic Waterstop: American Society for Testing Materials (ASTM)

C. Related Sections: Work shall conform to the applicable Sections of Division 03 – Concrete.

1.03 SUBMITTALS

A. Submittals shall be furnished in accordance with Section 01 33 00 – Submittal Procedures.

B. Product Data:
   1. Polyvinyl chloride waterstop: data of complete physical properties.
   2. Stripped applied waterstop: data of complete physical properties.

C. Samples:
   1. Polyvinyl chloride waterstop.
   2. Strip applied waterstop.

1.04 DELIVERY, STORAGE, AND HANDLING

A. PVC waterstops, Store waterstops under tarps to protect from oil, dirt, sunlight, and premature exposure to water.

B. Strip applied waterstop:
   1. Protect waterstops from exposure to moisture that may cause premature waterstop expansion.
   2. Store waterstops under cover to protect from oil, dirt, and sunlight.

PART 2 - PRODUCTS

2.01 PVC WATERSTOPS FOR JOINTS

A. Provide flexible PVC (polyvinyl chloride) waterstop as manufactured by Greenstreak, profile style number. Ribbed with Centerbulb. Model No 735,718,696 or ENGINEER-approved equal.

B. The PVC waterstop shall be extruded from an elastomeric plastic material of which the basic resin is prime virgin polyvinyl chloride. The PVC compound shall not contain any scrapped or reclaimed material or pigment whatsoever.

C. Performance Requirements as Follows:

Property	Test Method	Required Limits
Water Absorption	ASTM D570	0.15% max
Tear Resistance	ASTM D624	200 lb/in (35kN/m) min
Ultimate Elongation	ASTM D638	350% min
Tensile Strength	ASTM D638	200 psi (13.78 Mpa) min
Low Temperature Brittleness	ASTM D746	No Failure @ -35o F (-37o C)
Stiffness in Flexure	ASTM D747	600 psi (4.13 Mpa) min
Specific Gravity	ASTM D792	1.45 max
Hardness, Shore A	ASTM D2240	79 +/- 3
Tensile Strenth After Accelerated Extraction	CRD-C 572	1850 psi (11.03 Mpa) min
Elongation After Accelerated Extraction	CRD-C 572	300% min
Effect of Alkalies after 7 days: Weight Change	CRD-C 572	b/t -0.10% and +0.25%
Hardness Change		+/- 5 points

2.02 STRIP APPLIED WATERSTOP FOR CONCRETE CAST AGAINST EXISTING CONCRETE STRUCTURES

A. Provide strip applied expanding waterstop comprised of modified chloroprene rubber. Product shall be “HYDROTITE”, as supplied by Greenstreak, Inc. 3400 Tree Court Industrial Blvd., St. Louis, MO 63122, Phone: 800-325-9400, Fax: 800-551-5145. Or ENGINEER-approved equal.

B. The waterstop shall be a combination of chloroprene rubber and chloroprene rubber modified to impart hydrophilic properties.

C. The waterstop shall have a delay coating to inhibit initial expansion due to moisture present in fresh concrete.

D. Performance Requirements as follows:

1. Chloroprene Rubber:

Property	Test Method	Required Limits
Tensile Strength	ASTM D412	1300 PSI min
Ultimate Elongation	ASTM D412	400% min
Hardness (Shore A)	ASTM D2240	50 +/- 5
Tear Resistance	ASTM D624	100 lb/in min

2. Modified Chloroprene (Hydrophilic) Rubber:

Property	Test Method	Required Limits
Tensile Strength	ASTM D412	350 PSI min
Ultimate Elongation	ASTM D412	600% min
Hardness (Shore A)	ASTM D2240	52 +/- 5
Tear Resistance	ASTM D624	50 lb/in
Expansion Ration	Volumetric Change-Distilled Water @ 70°F	3 to 1 min

2.03 ACCESSORIES

A. PVC Waterstops:

1. Provide factory made waterstop fabrications for all changes of direction, intersections, and transitions leaving only straight butt joint splices for the field.
2. Provide hog rings or grommets spaced at 12 inches on center along length of waterstop.

3. Provide Teflon coated thermostatically controlled waterstop splicing irons for field butt splices.

B. Strip Applied Waterstops:
   1. Provide SWELLSTOP Primer Adhesive to continuously secure SWELLSTOP to concrete or ENGINEER-approved equal.
   2. Provide concrete nails as required to secure SWELLSTOP and HYDROTITE in vertical or overhead applications or ENGINEER-approved equal.
   3. On rough concrete surfaces apply LEAKMASTER to smooth surfaces and adhere to HYDROTITE.

PART 3 - EXECUTION

3.01 INSTALLATION

A. PVC Waterstop:
   1. Refer to manufacturer installation recommendations.
   2. Field butt splices shall be heat fused welded using a Teflon-covered thermostatically-controlled waterstop splicing iron at approximately 380°F. Follow approved manufacturer recommendations.
   3. Lapping of waterstop, use of adhesives, or solvents shall not be allowed.
   4. Center waterstop in joint and secure waterstop in correct position using hog rings or grommets spaced at 12” on centers along the length of the waterstop and wire tie to adjacent reinforcing steel.

B. Strip Applied Waterstop:
   1. Refer to manufacturer installation recommendations.
   2. Apply primer/adhesive to dry pipe or pipe sleeve surface, 2 inches wide continuously along the joint, maintaining a minimum of 2 inches clear cover to concrete face.
   3. Primer adhesive shall be allowed to “dry to the touch” (typically 30 minutes to several hours; dependent on-site conditions) prior to application of waterstop.
   4. Continuously adhere waterstop to pipe or pipe sleeve utilizing primer adhesive and maintaining a minimum of 2 inches clear cover to concrete face.
   5. Apply waterstop the same day as primer adhesive.
   6. Waterstop shall be butt spliced pressing ends together ensuring no separation or air pockets
   7. Protect waterstop from moisture, dirt, oil, and sunlight during the progress of the work
   8. Remove release paper from waterstop immediately prior to concrete placement.
   9. Inspect waterstop for premature swelling, discontinuity, and debris contamination prior to concrete pour. Replace unacceptable waterstop.
   10. Place and thoroughly vibrate concrete, taking care not to disturb or displace the waterstop. Do not allow vibrator to contact the waterstop.

END OF SECTION

SECTION 03 1516 – CONCRETE CONSTRUCTION JOINTS

PART 1 - GENERAL

1.01 THE REQUIREMENT

A. Construct all joints in concrete at the locations shown. Joints required in concrete structures are of various types and will be permitted only where shown, unless specifically accepted by the ENGINEER.

A. Commercial Standards (ASTM):

C920	Elastomeric Joint Sealants
D412	Rubber Properties in Tension
D624	Rubber Property - Tear Resistance
D638	Tensile Properties of Plastics
D746	Brittleness Temperature of Plastics and Elastomers by Impact
D747	Apparent Bending Modulus of Plastics by Means of a Cantilever Beam
D1056	Flexible Cellular Materials - Sponge or Expanded Rubber
D1752	Preformed Sponge Rubber and Cork Expansion Joint Fillers for Concrete Paving and Structural Construction
D2240	Rubber Property - Durometer Hardness
D2241	Poly (Vinyl Chloride) (PVC) Pressure-Rated Pipe (SDR-Series)

1.02 TYPES OF JOINTS

A. Construction Joints: Provide where shown on the plans. When fresh concrete is placed against a hardened concrete surface, the joint between the two (2) pours is called a construction joint. Unless otherwise specified, all joints in water bearing members shall be provided with a waterstop and sealant groove of the shape specified and shown. The space so formed shall be filled with a joint sealant material as specified in these Specifications.

B. Contraction Joints: Provide where shown on the plans. Contraction joints are similar to construction joints except that the fresh concrete shall not bond to the hardened surface of the first pour, which shall be coated with a bond breaker. The slab reinforcement shall be stopped 4½ inches from the joint; which is provided with a sleeve-type dowel, to allow shrinkage of the concrete of the second pour. Waterstop and/or sealant groove shall also be provided when specified or shown.

C. Expansion Joints: Provide where shown on the plans. To allow the concrete to expand freely, a space is provided between the two pours, the joint shall be formed as shown. This space is obtained by placing a filler joint material against the first pour, which acts as a form for the second pour. Unless otherwise specified, all expansion joints in water bearing members shall be provided with a waterstop as shown.

D. The space so formed shall be filled with a joint sealant material as specified in these Specifications. In order to keep the two (2) walls or slab elements in line the joint shall also be provided with a sleeve-type dowel as shown.

E. Control Joints: The function of the control joint is to provide a weaker plane in the concrete, where shrinkage cracks will probably occur. A groove, of the shape and dimensions shown, is formed or saw-cut in the concrete. This groove is afterward filled with a joint sealant material as specified in these Specifications.

1.03 SUBMITTALS

A. Submittals shall be furnished in accordance with Section 01 3300 – Submittal Procedures.

B. Waterstops: Prior to production of the material required under this contract, qualification samples shall be submitted. Such samples shall consist of extruded or molded sections of each size or shape to be used, and shall be accomplished so that the material and workmanship represents in all respects the material to be furnished under this contract. The balance of the material to be used under this contract shall not be produced until after the ENGINEER has reviewed the qualification samples as defined in these Specifications.

C. Joint Location: Submit placement shop drawings showing the location and type of all joints for each structure, along with the associated pour sequence.

1.04 QUALITY ASSURANCE

A. Waterstop Inspection: It is required that all waterstop field joints shall be subject to rigid inspection, and no such work shall be scheduled or started without having made prior arrangements with the ENGINEER to provide for the required inspections. Not less than 24-hour notice shall be provided to the ENGINEER for scheduling such inspections.

B. All field joints in waterstops shall be subject to rigid inspection for misalignment, bubbles, inadequate bond, porosity, cracks, offsets, and other defects, which would reduce the potential resistance of the material to water pressure at any point. All defective joints shall be replaced with material, which shall pass said inspection, and all faulty material shall be removed from the site and disposed of at no additional cost.

C. The following waterstop defects represent a partial list of defects, which shall be grounds for rejection:
   1. Offsets at joints greater than 1/16-inch or 15% of material thickness, at any point, whichever is less.
   2. Exterior crack at joint, due to incomplete bond, which is deeper than 1/16-inch or 15% of material thickness, at any point, whichever is less.
   3. Any combination of offset or exterior crack which will result in a net reduction in the cross section of the waterstop in excess of 1/16-inch or 15% of material thickness at any point, whichever is less.
   4. Misalignment of joint, which result in misalignment of the waterstop in excess of ½-inch in 10 feet.
   5. Porosity in the welded joint as evidenced by visual inspection.
   6. Bubbles or inadequate bonding which can be detected with a penknife test. (If, while prodding the entire joint with the point of a pen knife, the knife breaks through the outer portion of the weld into a bubble, the joint shall be considered defective.)

D. Waterstop Samples: Prior to use of the waterstop material in the field, a sample of each size or shape of material to be used shall be submitted to the ENGINEER for review. These samples shall be fabricated so that the material and workmanship represent in all respects the fittings to be furnished under this contract. Field samples of fabricated fittings (crosses, tees, etc.) may be selected at random by the ENGINEER for testing by a laboratory at no additional expense to the ENGINEER. When tested, they shall have a tensile strength across the joints equal to at least 600 psi.

E. Construction Joint Sealant: As per these Specifications.

PART 2 - PRODUCTS

2.01 PVC AND HYDROPHILIC WATERSTOP

A. General: As defined in these Specifications.

2.02 BACKING ROD

A. Backing rod shall be an extruded closed-cell, polyethylene foam rod. The material shall be compatible with the joint sealant material used and shall have a tensile strength of not

less than 40 psi and a compression deflection of approximately 25% at 8 psi. The rod shall be 1/8-inch larger in diameter than the joint width except that a 1-inch diameter rod shall be used for a ¾-inch wide joint.

2.03 BOND BREAKER

A. Bond breaker shall be Super Bond Breaker as manufactured by Burke Company, San Mateo, California; Select Cure CRB as manufactured by Select Products Co., Upland, California; or ENGINEER-approved equal. It shall contain a fugitive dye so that areas of application will be readily distinguishable. Provide where shown on the plans.

2.04 SLIP DOWELS

A. Slip dowels in joints shall be A36 smooth epoxy-coated bars, conforming to ASTM A775. Provide where shown on the plans.

PART 3 - EXECUTION

3.01 GENERAL

A. Waterstops of the type specified herein shall be embedded in the concrete across joints as shown. All waterstops shall be fully continuous for the extent of the joint. Splices necessary to provide such continuity shall be accomplished in conformance to printed instructions of manufacturer of the waterstops. Suitable precautions and means to support and protect the waterstops during the progress of the work and shall repair or replace at its own expense any waterstops damaged during the progress of the work shall be taken. All waterstops shall be stored so as to permit free circulation of air around the waterstop material.

B. When any waterstop is installed in the concrete on one side of a joint, while the other half or portion of the waterstop remains exposed to the atmosphere for more than 2 days, suitable precautions shall be taken to shade and protect the exposed waterstop from direct rays of the sun during the entire exposure and until the exposed portion of the waterstop is embedded in concrete.

3.02 SPLICES IN WATERSTOPS

A. When applicable, splices in waterstops shall be performed by heat-sealing the adjacent waterstop sections in accordance with the manufacturer's printed recommendations. It is essential that:
   1. The material not be damaged by heat sealing.
   2. The splices have a tensile strength of not less than 60 percent of the unspliced materials tensile strength.
   3. The continuity of the waterstop ribs and of its tubular center axis be maintained.

B. Butt joints of the ends of two (2) identical waterstop sections may be made while the material is in the forms.

C. All joints with waterstops involving more than two (2) ends to be jointed together, and all joints which involve an angle cut, alignment change, or the joining of two (2) dissimilar waterstop strips of waterstop material beyond the joint. Upon being inspected and approved, such prefabricated waterstop joint assemblies shall installed in the forms and the ends of the 24-inch sections shall be prefabricated prior to placement in the forms, allowing not less than 24-inch-long strips shall be butt welded to the straight run portions of waterstop in place in the forms.

D. Where a centerbulb waterstop intersects and is jointed with a non-centerbulb waterstop, care shall be taken to seal the end of the centerbulb, using additional PVC material if needed.

3.03 JOINT CONSTRUCTION

A. Setting Waterstops: In order to eliminate faulty installation that may result in joint leakage, particular care shall be taken of the correct positioning of the waterstops during installation. Adequate provisions must be made to support and anchor the waterstops during progress and to insure the proper placement and or embedment in the concrete. The symmetrical halves of the waterstops shall be equally divided between the concrete pours at the joints. The center axis of the waterstops shall be coincident with the joint openings. Maximum density and imperviousness of the concrete shall be insured by thoroughly working it near all joints.

B. In placing flat-strip hydrotite waterstops in the forms, means shall be provided to prevent them from being folded over by the concrete as it is placed. Unless otherwise shown, all hydrotite waterstops shall be held in place with light wire ties on 12-inch centers, which shall be passed through the edge of the hydrotite waterstop and tied to the curtain of reinforcing steel. Horizontal hydrotite waterstops, with their flat face in a vertical plane, shall be held in place with continuous supports to which the top edge of the hydrotite waterstop shall be tacked. In placing concrete around horizontal hydrotite waterstops, with their flat face in a horizontal plane, concrete shall be worked under the hydrotite waterstops by hand so, as to avoid the formation of air and rock pockets.

C. In placing centerbulb waterstops in expansion joints, the centerbulb shall be centered on the joint filler material.

D. Waterstop in vertical wall joints shall stop 6 inches from the top of the wall where such waterstop does not connect with any other waterstop and is not to be connected to for a future concrete placement.

E. Joint Location: Construction joints, and other types of joints, shall be provided where shown. When not shown, construction joints shall be provided at 25-foot maximum spacing for all concrete construction, unless noted otherwise. Where joints are shown spaced greater than 40-feet apart, additional joints shall be provided to maintain the 25-foot maximum spacing. The location of all joints, of any type, shall be submitted for acceptance by the ENGINEER.

F. Joint Preparation: Special care shall be used in preparing concrete surfaces at joints where bonding between two (2) sections of concrete is required. Unless otherwise shown, such bonding will be required at all horizontal joints in walls. Surfaces shall be prepared in accordance with the requirements of the applicable Sections of Division 03 – Concrete. Except on horizontal wall construction joints, wall to slab joints or where otherwise shown or specified, at all joints where waterstops are required, the joint face of the first pour shall be coated with a bond breaker as shown on the plans.

G. Construction Joint Sealant: Construction joints in water-bearing floor slabs, and elsewhere as shown, shall be provided with tapered grooves, which shall be filled with a construction joint sealant. The material used for forming the tapered grooves shall be left in the grooves until just before the grooves are cleaned and filled with joint sealant. After removing the forms from the grooves, all laitance and fins shall be removed, and the grooves shall be sandblasted. The grooves shall be allowed to become thoroughly dry, after which they shall be blown out; immediately thereafter, install the joint sealant per these Specifications, they shall be primed, bond breaker tape placed in the bottom of the groove, and filled with the construction joint sealant. The primer used shall be supplied by the same manufacturer supplying the sealant. No sealant will be permitted to be used without a primer. Care shall be used to completely fill the sealant grooves. Areas designated to receive a sealant fillet shall be thoroughly cleaned, as outlined for the tapered grooves, prior to application of the sealant.

END OF SECTION

SECTION 03 2000 – CONCRETE REINFORCING

PART 1 - GENERAL

1.01 THE REQUIREMENT

A. Furnish, fabricate, and place all concrete reinforcement steel, welded wire fabric, couplers, and concrete inserts for use in reinforced concrete construction and perform all appurtenant work, including installation of all the wires, clips, supports, chairs, spacers, and other accessories, all in accordance with the Contract Documents.

B. American Iron and Steel (AIS) requirement applies to this section. All iron and steel products used in this project must be produced in the United States.

1.02 REFERENCE SPECIFICATIONS, CODES AND STANDARDS

A. Codes: Codes: All codes, as referenced herein are specified in applicable Sections of Division 01 – General Requirements.

B. Commercial Standards:

ACI 315	Details and Detailing of Concrete Reinforcement
ACI 318	Building Code Requirements for Reinforced Concrete
CRSI MSP-1	Concrete Reinforcing Steel Institute Manual of Standard Practice
AWS D1.4	Structural Welding Code - Reinforcing Steel
ASTM A82	Steel Wire, Plain, for Concrete Reinforcement
ASTM A615	Deformed and Plain Billet-Steel Bars for Concrete Reinforcement
ASTM A775	Epoxy-Coated Reinforcing Steel Bars

1.03 SUBMITTALS

A. Submittals shall be furnished in accordance with Section 01 3300 – Submittal Procedures.

B. Submittals shall include shop bending diagrams, placing lists, drawings of all reinforcement steel prior to fabrication and mill test reports.

C. Details of the concrete reinforcement steel and concrete inserts shall be submitted at the earliest possible date after receipt by the CONTRACTOR of the Notice to Proceed. Said details of reinforcement steel for fabrication and erection shall conform to ACI 315 and the requirements specified and shown. The shop bending diagrams shall show the actual lengths of bars, to the nearest inch measured to the intersection of the extensions (tangents for bars of circular cross-section) of the outside surface. The shop drawings shall include bar placement diagrams, which clearly indicate the dimensions of each bar splice.

D. Where mechanical couplers are required or permitted to be used to splice reinforcement steel, submit manufacturer's literature which contains instructions and recommendations for installation for each type of coupler used; certified test reports which verify the load capacity of each type and size of coupler used; and shop drawings which show the location of each coupler with details of how they are to be installed in the formwork.

E. If reinforcement steel is spliced by welding at any location, submit mill test reports, which shall contain the information necessary for the determination of the carbon equivalent as specified in AWS D1.4. Submit a written welding procedure for each type of weld for each size of bar which is to be spliced by welding; merely a statement that AWS procedures will be followed is not acceptable.

F. Submit all reinforcing product mill certificates.

1.04 QUALITY ASSURANCE

A. If requested by the ENGINEER, the CONTRACTOR shall provide samples from each heat of reinforcement steel delivered in a quantity adequate for testing. Costs of all tests will be paid by the CONTRACTOR.

B. If reinforcement steel is spliced by welding at any location, the CONTRACTOR shall submit certifications of procedure qualifications for each welding procedure used and certification of welder qualifications, for each welding procedure, and for each welder performing the work. Such qualifications shall be as specified in AWS D1.4.

C. If requested by the ENGINEER, the CONTRACTOR shall provide samples of each type of welded splice used in the WORK in a quantity and of dimensions adequate for testing. At the discretion of the ENGINEER, radiographic testing of direct butt-welded splices will be performed. The CONTRACTOR shall assist as necessary to facilitate testing. The CONTRACTOR shall repair any weld, which fails to meet the requirements of AWS D1.4. The costs of testing will be paid by the CONTRACTOR.

PART 2 - PRODUCTS

2.01 REINFORCEMENT STEEL

A. Reinforcement Steel for all cast-in-place reinforced concrete construction shall conform to the following requirements:
   1. Bar reinforcement shall conform to the requirements of ASTM A615 for Grade 60 Billet Steel Reinforcement or as otherwise shown.
   2. Welded wire fabric reinforcement shall conform to the requirements of ASTM A185 and the details shown; provided, that welded wire fabric with longitudinal wire of W4 size wire and smaller shall be either furnished in flat sheets or in rolls with a core diameter of not less than 10 inches; and provided further, that welded wire fabric with longitudinal wires larger than W4 size shall be furnished in flat sheets only.
   3. Spiral reinforcement shall be cold-drawn steel wire conforming to the requirements of ASTM A82.

B. Accessories:
   1. Accessories shall include all necessary chairs, slab bolsters, concrete blocks, tie wires, dips, supports, spacers, and other devices to position reinforcement during concrete placement. All bar supports shall meet the requirements of the CRSI Manual of Standard Practice including special requirements for supporting epoxy coated reinforcing bars. Wire bar supports shall be CRSI Class 1 for maximum protection with a 1/8-inch minimum thickness of plastic coating, which extends at least ½-inch from the concrete surface. Plastic shall be gray in color.
   2. Concrete blocks (dobies), used to support and position reinforcement steel, shall have the same or higher compressive strength as specified for the concrete in which it is located. Wire ties shall be embedded in concrete block bar supports.

C. Epoxy coating for reinforcing and accessories, where specified or shown, shall conform to ASTM A775.

2.02 MECHANICAL COUPLERS

A. Mechanical couplers shall be provided where shown and where approved by the ENGINEER. The couplers shall develop a tensile strength, which exceeds 125% of the yield strength of the reinforcement bars being spliced at each splice.

B. Where the type of coupler used is composed of more than one component, all components required for a complete splice shall be supplied. This shall apply to all mechanical splices, including those splices intended for future connections.

C. The reinforcement steel and coupler used shall be compatible for obtaining the required strength of the connection. Straight threaded type couplers shall require the use of the next larger size reinforcing bar or shall be used with reinforcing bars with specially forged ends which provide upset threads which do not decrease the basic cross section of the bar.

D. Couplers shall be Lenton Form Saver as manufactured by Erico Products; Dowel Bar Splicer System as manufactured by Richmond Screw Anchor Company; or ENGINEER-approved equal.

2.03 WELDED SPLICES

A. Welded splices shall be provided where shown and where approved by the ENGINEER. All welded splices of reinforcement steel shall develop a tensile strength, which exceeds 125% of the yield strength of the reinforcement bars, which are connected.

B. All materials required to conform the welded splices to the requirements of AWS D1.4 shall be provided.

2.04 EPOXY GROUT

A. Epoxy for grouting reinforcing bars shall be specifically formulated for such application, for the moisture condition, application temperature and orientation of the hole to be filled. Epoxy grout shall meet the requirements of these Specifications.

PART 3 - EXECUTION

3.01 GENERAL

A. All reinforcement steel, welded wire fabric, couplers and other appurtenances shall be fabricated, and placed in accordance with the requirements of the Building Code and the Supplementary Requirements specified herein.

3.02 FABRICATION

A. General:
   1. Reinforcement steel shall be accurately formed to the dimensions and shapes shown, and the fabricating details shall be prepared in accordance with ACI 315 and ACI 318, except as modified by the Contract Drawings. Stirrups and tie bars shall be bent around a pin having a diameter not less than 1½-inch for No. 3 bars, 2-inch for No. 4 bars, and 2½-inch for No. 5 bars. Bends for other bars shall be made around a pin having a diameter not less than 6 times the bar diameter, except for bars larger than 1-inch, in which case the bends shall be made around a pin of 8 bar diameters. Bars shall be bent cold.
   2. The CONTRACTOR shall fabricate reinforcement bars for structures in accordance with bending diagrams, placing lists, and placing drawings. Said drawings, diagrams and lists shall be prepared by the CONTRACTOR as specified under Section 01 3300 – Submittal Procedures.

B. Fabricating Tolerances: Bars used for concrete reinforcement shall meet the following requirements for fabricating tolerances:
   1. Sheared length: +/- 1-inch
   2. Depth of truss bars: + 0, - ½-inch
   3. Stirrups, ties, and spirals: +/- ½-inch
   4. All other bends: +/- 1-inch

3.03 PLACING

A. Reinforcement steel shall be accurately positioned as shown, and shall be supported and wired together to prevent displacement, using annealed iron wire ties or suitable clips at intersections. All reinforcement steel shall be supported by concrete, plastic or metal supports, spacers or metal hangers, which are strong and rigid enough to prevent any displacement of the reinforcement steel. Where concrete is to be placed on the ground, supporting concrete blocks (or dobies) shall be used, in sufficient numbers to support the bars without settlement, but in no case shall such support be continuous. All concrete blocks used to support, reinforcement steel shall be tied to the steel with wire ties, which are embedded in the blocks. For concrete over formwork, the CONTRACTOR shall furnish concrete, metal, plastic or other acceptable bar chairs and spacers.

B. Limitations on the use of bar support materials shall be as follows:
   1. Concrete Dobies: Permitted at all locations except where architectural finish is required.
   2. Wire Bar Supports: Permitted only at slabs over dry areas, interior dry wall surfaces and exterior wall surfaces.
   3. Plastic Bar Supports: Permitted at all locations except on grade.

C. Tie wires shall be bent away from the forms in order to provide the specified concrete coverage.

D. Bars additional to those shown which may be found necessary or desirable by the ENGINEER for the purpose of securing reinforcement in position shall be provided by the CONTRACTOR at its own expense.

E. Unless otherwise specified, reinforcement placing tolerances shall be within the limits specified in Section 7.5 of ACI 318 except where in conflict with the requirements of the Building Code.

F. Bars may be moved as necessary to avoid interference with other reinforcement steel, conduits, or embedded items. If bars are moved more than one bar diameter, or enough to exceed the above tolerances, the resulting arrangement of bars shall be as acceptable to the ENGINEER.

G. Accessories supporting reinforcing bars shall be spaced such that there is no deflection of the accessory from the weight of the supported bars. When used to space the reinforcing bars from wall forms, the forms and bars shall be located so that there is no deflection of the accessory when the forms are tightened into position.

3.04 SPACING OF BARS

A. The clear distance between parallel bars (except in columns and between multiple layers of bars in beams) shall be not less than the nominal diameter of the bars nor less than 1-1/3 times the maximum size of the coarse aggregate, nor less than 1-inch.

B. Where reinforcement in beams or girders is placed in two (2) or more layers, the clear distance between layers shall be not less than one inch.

C. In columns, the clear distance between longitudinal bars shall be not less than 1½ times the bar diameter, nor less than 1½ times the maximum size of the coarse aggregate, nor less than 1½ inches.

D. The clear distance between bars shall also apply to the distance between a contact splice and adjacent splices or bars.

3.05 SPLICING

A. General:
   1. Reinforcement bar splices shall only be used at locations shown. When it is necessary to splice reinforcement at points other than where shown, the character of the splice shall be as acceptable to the ENGINEER.
   2. Unless, otherwise indicated, dowels shall match the size and spacing of the spliced bar.

B. Splices of Reinforcement:
   1. The length of lap for reinforcement bars, unless otherwise shown shall be in accordance with ACI 318-89, Section 12.15.1 for a Class B splice.
   2. Splices in column spiral reinforcement, when necessary, shall be made by welding or by a lap of 1½ turns.

C. Bending or Straightening: Reinforcement shall not be straightened or re-bent in a manner, which will injure the material. Bars with kinks or bends not shown shall not be used. All bars shall be bent cold, unless otherwise permitted by the ENGINEER. No bars partially embedded in concrete shall be field-bent except as shown or specifically permitted by the ENGINEER.

D. Couplers, which are located at a joint face, shall be a type, which can be set either flush or recessed from the face. The couplers shall be sealed during concrete placement to completely eliminate concrete or cement paste from entering. Couplers intended for future connections shall be recessed a minimum of ½-inch from the concrete surface. After the concrete is placed, the coupler shall be plugged with plastic plugs, which have an O-ring seal and the recess filled with sealant to prevent any contact with water or other corrosive materials. Threaded couplers shall be plugged.

E. Unless noted otherwise, mechanical coupler spacing and capacity shall match the spacing and capacity of the reinforcing shown for the adjacent section.

3.06 CLEANING AND PROTECTION

A. Reinforcement steel shall at all times be protected from conditions conducive to corrosion until concrete is placed around it.

B. The surfaces of all reinforcement steel and other metalwork to be in contact with concrete shall be thoroughly cleaned of all dirt, grease, loose scale and rust, grout, mortar, and other foreign substances immediately before the concrete is placed. Where there is delay in depositing concrete, reinforcement shall be reinserted and, if necessary recleaned.

3.07 EMBEDMENT OF DRILLED REINFORCING STEEL DOWELS

A. Hole Preparation:
   1. The hole diameter shall be as recommended by the epoxy manufacturer but shall be no larger than 0.25-inch greater than the diameter of the outer surface of the reinforcing bar deformations.
   2. The depth of the hole shall be as recommended by the epoxy manufacturer to fully develop the bar but shall not be less than 12 bar diameters, unless noted otherwise.
   3. The hole shall be drilled by methods, which do not interfere with the proper bonding of epoxy.
   4. Existing reinforcing steel in the vicinity, of proposed holes shall be located prior to drilling. The location of holes to be drilled shall be adjusted to avoid drilling through or nicking any existing reinforcing bars.
   5. The hole shall be blown clean with clean, dry compressed air to remove all dust and loose particles.

6. Epoxy shall be injected into the hole through a tube placed to the bottom of the hole. The tube shall be withdrawn as epoxy is placed but kept immersed to prevent formation of air pockets. The hole shall be filled to a depth that insures that excess material will be expelled from the hole during dowel placement.
7. Dowels shall be twisted during insertion into the partially filled hole so as to guarantee full wetting of the bar surface with epoxy. The bar shall be inserted slowly enough to avoid developing air pockets.

END OF SECTION

SECTION 03 30 00 – CAST-IN-PLACE CONCRETE

PART 1 - GENERAL

1.01 THE REQUIREMENT

A. Furnish all materials for concrete in accordance with the provisions of this Section and form, mix, place, cure, repair, finish, and do all other work as required to produce finished concrete, in accordance with the requirements of the Contract Documents.

B. Soils Report: This work shall conform to the requirements of the latest Geotechnical Evaluation and or Soils Report.

C. The following types of concrete are covered in this Section:
   1. Structural Concrete: Concrete to be used in all cases except where indicated otherwise in the Contract Documents.
   2. Sitework Concrete: Concrete to be used for curbs, gutters, catch basins, sidewalks, pavements, fence and guard post embedment, underground duct bank encasement and all other concrete appurtenant to electrical facilities unless otherwise indicated.
   3. Lean Concrete: Concrete to be used for thrust blocks, pipe trench cut-off blocks and cradles that are detailed on the Drawings as un-reinforced. Lean concrete shall be used as protective cover for dowels intended for future connection.

D. The term "hydraulic structure" used in these specifications means environmental engineering concrete structures for the containment, treatment or transmission of water, wastewater, or other fluids.

E. American Iron and Steel (AIS) requirement applies to this section. All iron and steel products used in this project must be produced in the United States.

1.02 REFERENCE SPECIFICATIONS, CODES AND STANDARDS

A. The work shall conform to the requirements of the applicable Sections of these Specifications Divisions:
   1. 01 – General Requirements
   2. 03 – Concrete

B. Commercial Standards:
   ACI 117 - Concrete Construction and Materials
   ACI 214 - Evaluation of Strength Test Results of Concrete
   ACI 301 - Structural Concrete for Buildings
   ACI 306.1 - Cold Weather Concreting
   ACI 309 - Consolidation of Concrete
   ACI 315 - Details and Detailing of Concrete Reinforcement
   ACI 318 - Building Code Requirements for Reinforced Concrete
   ACI 350R - Environmental Engineering Concrete Structures
   ASTM C31 - Making and Curing Concrete Test Specimens in the Field
   ASTM C33 - Concrete Aggregates
   ASTM C39 - Compressive Strength of Cylindrical Concrete Specimens
   ASTM C94 - Ready-Mixed Concrete
   ASTM C136 - Sieve Analysis of Fine and Coarse Aggregates
   ASTM C143 - for Slump of Hydraulic Cement Concrete
   ASTM C150 - Portland Cement
   ASTM C156 - Water Retention by Concrete Curing Materials
   ASTM C157 - Length Change of Hardened Hydraulic Cement Mortar and Concrete

ASTM C192 - Making and Curing Concrete Test Specimens in the Laboratory
ASTM C260 - Air-Entraining Admixtures for Concrete
ASTM C309 - Liquid Membrane-Forming Compounds for Curing Concrete
ASTM C494 - Chemical Admixtures for Concrete
ASTM C1077 - Laboratories Testing Concrete and Concrete Aggregates for use in Construction & Criteria for Laboratory Evaluation
ASTM D175 - Preformed Expansion Joint Fillers for Concrete Paving and Structural Construction (Non-extruding and Resilient Bituminous Types)
ASTM D448 - Sizes of Aggregate for Road and Bridge Construction
ASTM D2419 - Sand Equivalent Value of Soils and Fine Aggregate
ASTM E119 - Fire Tests of Building Construction and Materials

1.03 SYSTEM DESCRIPTIONS

A. Performance Requirements:
1. General:
a. Except as otherwise specified, provide concrete composed of Portland cement, aggregate, and water so proportioned and mixed as to produce plastic, cohesive workable mixture in accordance with requirements as specified in this Section and suitable to specific conditions of placement.
b. Due to the corrosivity of the soil and recommendations from the Geotechnical Evaluation, concrete shall be made with cement that provides sulfate resistance and that has a maximum water-cementitious materials ratio and minimum compressive strength set forth in 2006 IBC and ACI 318. See also the Geotechnical Evaluation.
c. Proportion fine and coarse aggregates in a manner such as not to produce harshness in placing nor honeycombing in structures.
2. Water tightness of Concrete Work: It is intent of this Section to secure for every part of the Work concrete and grout of homogeneous structure, which when hardened will have required strength, water tightness, and durability. As provided in ACI 350.1/350.1R Concrete for Environmental Structures.
a. It is recognized that some surface hairline cracks and crazing will develop in concrete surfaces.
b. Construction, contraction, and expansion joints have been positioned in structures as indicated on the Drawings, and curing methods specified, for purpose of reducing number and size of these expected from specified concrete mixes.
c. Watertight: Repair cracks as described in this Section which develop in walls or slabs and repair cracks which show any signs of leakage until all leakage is stopped.
d. If patching does not stop the leakage and at the engineer's discretion the installing CONTRACTOR shall pressure inject visible cracks, other than hairline cracks and crazing, in following areas with epoxy as specified in applicable Sections of Division 03 – Concrete.
1) Floors and walls of water bearing structures.
2) Walls and overhead slabs of passageways or occupied spaces, outsides of which are exposed to weather or may be washed down and are not specified to receive separate waterproof membrane.
3) Other Items Not Specified to Receive Separate Waterproof Membrane: Slabs over water channels, wet walls, reservoirs, and other similar surfaces.

3. Workmanship and Methods: Provide concrete work, including detailing of reinforcing, conforming with best standard practices, and as set forth in ACI 318, Manuals, and Recommended Practices.

1.04 SUBMITTALS

A. Submittals shall be furnished in accordance with Section 01 3300 – Submittal Procedures.

B. Product Data: Submit data completely describing products.

C. Information on Heating Equipment to Be Used for Cold Weather Concreting: Submit information on type of equipment to be used for heating materials and/or new concrete in process of curing during excessively cold weather.

D. For conditions that promote rapid drying of freshly placed concrete such as low humidity, high temperature, and wind: Submit corrective measures proposed for use prior to placing concrete.

E. Copies of Tests of Concrete Aggregates: Submit certified copies in triplicate of commercial laboratory tests not more than 90 days old of all samples of concrete aggregates.
   1. Fine Aggregate:
      a. Clay lumps
      b. Reactivity
      c. Shale and chert
      d. Soundness
      e. Color
      f. Decantation
   2. Coarse Aggregate:
      a. Clay lumps and friable particles
      b. Reactivity
      c. Shale and chert
      d. Soundness.
      e. Abrasion loss
      f. Coal and lignite
      g. Materials finer than 200 sieve

F. Sieve Analysis: Submit sieve analysis of fine and coarse aggregates being used in triplicate at least every 3 weeks and at any time there is significant change in grading of materials.

G. Concrete Mixes: Submit full details, including mix design calculations for concrete mixes proposed for use for each class of concrete.
   1. Include information on correction of batching for varying moisture contents of fine aggregate.
   2. Submit source quality test records with mix design submittal.

H. If There is Change in Aggregate Source, Aggregate Quality from Same Source: Submit new set of design mixes covering each class of concrete.

I. If Either Fine or Coarse Aggregate Is Batched from More than One Bin: Submit analyses for each bin, and composite analysis made up from these, using proportions of materials to be used in mix.

J. Cement Mill Tests: Include alkali content, representative of each shipment of cement for verification of compliance with specified requirements.

K. Pozzolan Certificate of Compliance: Identify source of pozzolan and certify compliance with requirements of ASTM C618.

L. Information on mixing equipment.

M. Drying shrinkage test data.

N. Packing and Shipping:
   1. Deliver, store, and handle concrete materials in manner as to prevent damage and inclusion of foreign substances.
   2. Deliver and store packaged materials in original containers until ready for use.
   3. Deliver aggregate to mixing site and handle in such a manner that variations in moisture content will not interfere with steady production of concrete of specified degree of uniformity and slump.

O. Acceptance at Site: Reject material containers or materials showing evidence of water or other damage.

P. Test Batch Test Data:
   1. Submit data for each test cylinder.
   2. Submit data that identifies mix and slump for each test cylinder.

Q. Sequence of Concrete Placing: Submit proposed sequence of placing concrete showing proposed beginning and ending of individual placements.

R. Ties to be used and the tie hole patching procedure and methods and materials.

S. Curing Compound Other than Specified Compound: Submit complete data on proposed compound.

T. Repair of Defective Concrete: Submit mix design for grout or product data if mixed onsite.

U. Acceptance of Method of Concrete Repair: Make no repair until the ENGINEER has accepted method.

1.05 QUALITY ASSURANCE

A. General
   1. Manufacturer Qualifications: A firm experienced in manufacturing ready-mixed concrete products and that complies with ASTM C94/C 94M requirements for production facilities and equipment.
   2. Tests for compressive strength and shrinkage of concrete shall be performed as indicated herein. Test for determining slump will be in accordance with the requirements of ASTM C143.
   3. The cost of all laboratory tests on concrete will be borne by the CONTRACTOR. The laboratory will meet or exceed the requirements of ASTM C1077.
   4. Concrete for testing shall be supplied by the CONTRACTOR at no additional cost to the OWNER, and the CONTRACTOR shall assist the ENGINEER in obtaining samples, and disposal and cleanup of excess material.

B. Field Testing of Concrete:
   1. During progress of construction, the CONTRACTOR will have tests made to determine whether the concrete, as being produced, complies with requirements specified.
   2. Tests will be performed in accordance with ASTM C31, ASTM C39, and ASTM C172.
   3. The testing company will make and deliver test cylinders to the laboratory and testing expense will be borne by the CONTRACTOR.
   4. Required Number Cylinders:

a. Not less than 3 cylinder specimens, 6 inch diameter by 12 inch long, will be tested for each 150 cubic yards of each class of concrete placed and not less than 3 specimens for each half day's placement.
b. One cylinder will be broken at 7 days and 2 at 28 days.

5. The Testing Agency shall:
   a. Test slump of concrete using slump cone in accordance with the requirements of ASTM C143.
   b. Furnish test equipment.
   c. Do not use the concrete that does not meet specification requirements in regards to slump, but remove such concrete from project site.
   d. Test slump at the beginning of each placement, as often as necessary to keep slump within the specified range, and when requested to do so by the ENGINEER.
   e. Make provisions for and furnish concrete for test specimens, and provide manual assistance to the ENGINEER in preparing said specimens.
   f. Assume responsibility for care of and providing of curing conditions for test specimens in accordance with ASTM C31.

C. Enforcement of Strength Requirement:
   1. Concrete is expected to reach higher compressive strength than that which is indicated on the drawings and herein as specified compressive strength f'c.
   2. Strength Level of Concrete: Will be considered acceptable if the following conditions are satisfied.
      a. Average of all sets of 3 consecutive test results is greater or equal to specified compressive strength f'c.
      b. No individual strength test (average of 2 cylinders) falls below specified compressive strength f'c by more than 500 pounds per square inch.
      c. Whenever one, or both, of 2 conditions stated above is not satisfied, provide additional curing of affected portion followed by cores taken in accordance with ASTM C42 and ACI 318 and comply with the following requirements.
         1) If additional curing does not bring average of 3 cores taken in affected area to at least specified compressive strength f'c, designate such concrete in affected area as defective.
         2) The ENGINEER may require the CONTRACTOR to strengthen defective concrete by means of additional concrete, all at the CONTRACTOR's expense.

D. Construction Tolerances: The CONTRACTOR shall set and maintain concrete forms and perform finishing operations to ensure that the completed WORK is within tolerances. Surface defects and irregularities are defined as finishes and are to be distinguished from tolerances. Tolerance is the permissible variation from lines, grades, or dimensions indicated on the Drawings. Where tolerances are not stated in the specifications, permissible deviations will be in accordance with ACI 117.
   1. The following construction tolerances apply to finished walls and slab unless otherwise indicated:

Item	**Tolerance**
Variation of the Constructed Linear Outline from the Established Position in Plan	In 10 feet: 1/4-in In 20 feet or more: 1/2-in
Variation from the Level or from the Grades Shown	In 10 feet: 1/4-in In 20 feet or more: 1/2-in
Variation from the Plumb	In 10 feet: 1/4-in In 20 feet or more: 1/2-in

Variation in the Thickness of Slabs and Walls	Minus 1/4-in Plus 1/2-in
Variation in the Locations and Sizes of Slabs and Wall Openings	Plus or minus 1/4-in
Variation in Weirs Hydraulic Control Structures	Max deviation in elevation 1/4 in (total)

1.06 PROJECT CONDITIONS

A. Environmental Requirements:
   1. Hot weather concreting:
      a. When Ambient Air Temperature Is Above 90°F: Prior to placing concrete, cool forms and reinforcing steel by water cooling to below 90°F.
      b. Temperature of Concrete Mix at Time of Placement: Keep temperature below 90°F by methods which do not impair quality of concrete.
   2. Cold Weather Concreting:
      a. Concrete placed below ambient air temperature of 45°F and falling or below 40°F: Make provision for heating water.
      b. If materials have been exposed to freezing temperatures to degree that any material is below 35°F: Heat such materials.
      c. Heating Water, Cement, or Aggregate Materials:
         1) Do not heat in excess of 160°F.
      d. Protection of Concrete in Forms:
         1) Protect by means of covering with tarpaulins, or other acceptable covering.
         2) Provide means for circulating warm moist air around forms in manner to maintain temperature of 50°F for at least 5 days.
   3. For conditions that promote rapid drying of freshly placed concrete such as low humidity, high temperature, and wind: Take corrective measures to minimize rapid water loss from concrete.
      a. Furnish and use sufficient number of maximum and minimum self-recording thermometers to adequately measure temperature around concrete.

1.07 SEQUENCING AND SCHEDULING

A. Schedule placing of concrete in such a manner as to complete any single placing operation to construction, contraction, or expansion joint.

PART 2 - PRODUCTS

2.01 CONCRETE MATERIALS

A. Aggregate
   1. General:
      a. Provide concrete aggregates that are sound, uniformly graded, and free of deleterious material in excess of allowable amounts specified.
      a. Grade aggregate in accordance with ASTM D75 and C136.
      b. Provide unit weight of fine and coarse aggregate which produces in place concrete with weight of not less than 140 pounds per cubic foot.

B. Fine Aggregate:
   1. Provide fine aggregate for concrete or mortar consisting of clean, natural sand or of sand prepared from crushed stone or crushed gravel.

2. Do not provide aggregate having deleterious substances in excess of the following percentages by weight of contaminating substances. In no case shall total exceed percent listed.

Item	Test Method	Percent
Removed by Decantation (dirt, silt, etc.)	ASTM C117	3
Shale or Chert	ASTM C295	1
Clay Lumps	ASTM C142	1

3. Except as otherwise specified, grade fine aggregate from coarse to fine in accordance with requirements of ASTM C33.

C. Coarse Aggregate:
1. General: Provide coarse aggregate consisting of gravel or crushed stone made up of clean, hard, durable particles free from calcareous coatings, organic matter, or other foreign substances.
2. Weight: Not exceeding 15 percent, for thin or elongated pieces having length greater than 5 times average thickness.
3. Deleterious Materials: Not in excess of following percentages by weight, and in no case having total of all deleterious substances exceeding 2 percent.

Item	Test Method	Percent
Shale or Chert	ASTM C295	1
Coal and Lignite	ASTM C123	1/4
Clay Lumps and Friable Particles	ASTM C142	1/4
Materials Finer than Number 200 Sieve	ASTM C117	1/2*

NOTE: (*) Except when material finer than Number 200 sieve consists of crusher dust, maximum amount shall be 1 percent>

4. Grading:
   a. Aggregate: As specified in ASTM C33, Size Number 57, except as otherwise specified or authorized in writing by the ENGINEER.
   b. Aggregate for Concrete for Encasement of Electrical Conduits:
      1) Graded as specified in ASTM C33, Size Number 8.
      2) Provide concrete utilizing this aggregate equal to 2500 psi concrete in all other respects, and is designated as Class CE.

D. Portland Cement:
1. General: Conform to specifications and tests for ASTM C150, except as specified otherwise.
2. Low Alkali Portland: Have total alkali containing not more than 0.60 percent, unless specified otherwise, and or where soil conditions permit such use.
3. Exposed Concrete in Any Individual Structure: Use only one brand of Portland cement.
4. Cement for Finishes: Provide cement from the same source and of same type as concrete to be finished.

E. Admixtures:
1. General:
   a. Do not use admixtures of any type, except as specified, unless written authorization has been obtained from the ENGINEER.
   b. Compatible with concrete and other admixtures.

c. Do not use admixtures containing chlorides calculated as chloride ion in excess of 0.5 percent by weight.
d. Use in accordance with manufacturer's recommendations and add each admixture to concrete mix separately.

2. Water Reducing Admixture:
   a. May be used at the CONTRACTOR's option.
   b. Conform to ASTM C494, Type A or Type D.
   c. Not contain air entraining agents.
   d. Liquid form before adding to the concrete mix.
   e. No decrease in cement is permitted as result of use of water reducing admixture.
3. Superplasticizers or Flyash: Are not to be used without acceptance by ENGINEER.

F. Water:
1. Water for Concrete, Washing Aggregate, and Curing Concrete: Clean and free from oil and deleterious amounts of alkali, acid, organic matter, or other substances.
2. Chlorides and Sulfate Ions:
   a. Water for Conventional Reinforced Concrete: Use water not containing more than 1,000 (mg/L) of chlorides calculated as chloride ion, no more than 1,000 (mg/L) of sulfates calculated as sulfate ion.
   b. Water for Pre-stressed or Post-tensioned Concrete: Use water not containing more than 650 (mg/L) milligrams per liter of chlorides calculated as chloride ion, nor more than 800 (mg/l) of sulfates calculated as sulfate ion.

G. Conduit Encasement Coloring Agent:
1. Color: Red color concrete used for encasement of electrical ducts, conduits, and similar type items.
2. Manufacturers: One of the following or ENGINEER-approved equal.
   a. Frank D, Davis Company, Red Oxide Number 117.
   b. I. Reiss Company, Inc., equivalent product.
3. Conduit Encasement Concrete: Mix into each cubic yard of concrete 10 pounds of coloring agent.

H. Keyway Material: Lumber.

I. All curing compounds shall be white pigmented and resin based conforming to ASTM C309, Type D. Sodium silicate compounds shall not be allowed. Concrete curing compound shall be Kurez by Euclid Chemical Company; MB-429 as manufactured by Mater Builders; L&M Cure R; or ENGINEER-approved equal. Water based resin curing compounds shall be used only where local air quality regulations prohibit the use of a solvent based compound. Water based curing compounds shall be Aqua-Cure by Euclid Chemical Company; Masterkure-W by Master Builders; L&M Cure R-2; or ENGINEER-approved equal.

J. Manufacturers: One of the following or ENGINEER-approved equal.
1. WR Meadows
2. CGM Incorporated

K. Plastic Membrane Curing: Use polyethylene film.
1. Color: White
2. Thickness: Minimum 6 mils.
3. Loss of Moisture: Not to exceed 0.055 grams per square centimeter of surface when tested in accordance with ASTM C156.

2.02 CONCRETE DESIGN REQUIREMENTS

A. General: Concrete shall be composed of cement, admixtures, aggregates, and water of the qualities indicated. The exact proportions in which these materials are to be used for different parts of the work will be determined during the trial batch. In general, the mix shall be designed to produce a concrete capable of being deposited so as to obtain maximum density and minimum shrinkage, and, where deposited in forms, to have good consolidation properties and maximum smoothness of surface. The aggregate gradations shall be formulated to provide fresh concrete that will not promote rock pockets around reinforcing steel or embedded items. The proportions shall be changed whenever necessary or desirable to meet the required results at no additional cost to the OWNER. All changes shall be subject to review by the ENGINEER.

B. Fine Aggregate Composition: In mix designs for structural concrete, the percentage of fine aggregate in total aggregate by weight, shall be as indicated in the following table.

Fineness Modulus	**Maximum Percent**
2.7 or less	41
2.7 to 2.8	42
2.8 to 2.9	43
2.9 to 3.0	44

For other concrete, the maximum percentage of fine aggregate of total aggregate, by weight, shall not exceed 50.

C. Water-Cement Ratio and Compressive Strength: Concrete shall have the following minimum properties unless noted otherwise on the plans:

Type of Work	**Min 28-Day Compr. Strength (psi)**	**Max Size Aggregate (in)**	**Minimum Cement per cubic yard (lbs)**	**Non Air Max W/C Ratio (by weight)**
Structural	5,000	1	564	*
Concrete	4,500	1	564	0.38
	4,000	1	564	0.45
Pea Gravel Mix	4,000	3/8	752	0.40
Sitework Concrete	3,000	1	470	0.50
Lean Concrete	2,000	1	376	0.60

NOTES: W/C ration shall be based upon the Geotechnical Evaluation and or Soils Report - Refer to the Evaluation for W/C, and other site dependent concrete recommendations. See the Structural Plan notes for strength application and location.

The CONTRACTOR is cautioned that the limiting parameters above are not a mix design. Additional cement or water reducing agent may be required to achieve workability required by the CONTRACTOR's construction methods and aggregates. The CONTRACTOR is responsible for providing concrete with the required workability.

For strengths above 4500 psi (non-air) concrete proportions shall be established from either existing field data or trial mixes. This information shall be submitted by the ready mix company through the CONTRACTOR for review by the ENGINEER before it will be

approved. The average compressive strength from the test record must equal or exceed the ACI 318 requirements for average compressive strength.

D. Adjustments to Mix Design: The mixes shall be changed whenever such change is necessary or desirable to secure the required strength, density, workability, and surface finish, and the CONTRACTOR shall be entitled to no additional compensation because of such changes.

2.03 CONSISTENCY

A. The quantity of water in a batch of concrete shall be just sufficient, with a normal mixing period, to produce a concrete which can be worked properly into place without segregation and which can be compacted by vibratory methods to give the desired density, impermeability, and smoothness of surface. The quantity of water shall be changed as necessary, with variations in the nature or moisture content of the aggregates, to maintain uniform production of a desired consistency. The consistency of the concrete in successive batches shall be determined by slump tests in accordance with ASTM C143. The slumps shall be as follows:

Part of Work	**Slump (in)**
All concrete, unless indicated otherwise	3 inches plus or minus 1-inch
With high range water reducer added	7 inches plus or minus 2 inches
Pea gravel mix	7 inches plus or minus 2 inches
Ductbanks	5 inches plus or minus 1-inch

2.04 MIXES

A. Measurements of Materials:
1. Measure materials by weighing, except as otherwise specified or where other methods are specifically authorized in writing by the ENGINEER.
2. Furnish apparatus for weighing aggregates and cement that is suitably designed and constructed for this purpose.
3. Accuracy of Weighing Devices: Furnish devices that have capability of providing successive quantities of individual material that can be measured to within one percent of desired amount of that material.
4. Measuring or Weighing Devices: Subject to review by the ENGINEER, and bear valid seal of the Sealer of Weights and Measures having jurisdiction.
5. Weighing Cement:
   a. Weigh cement separately.
   b. Cement in Unbroken Standard Packages (Sacks): Need not be weighed.
   c. Bulk Cement and Fractional Packages: Weigh such cement.
6. Mixing Water: Measured by volume or by weight.

B. Concrete Proportions and Consistency:
1. Concrete Consistency and Composition:
   a. Provide concrete that can be worked readily into corners and angles of forms and around reinforcement without excessive vibration and without permitting materials to segregate or free water to collect on surface.
   b. Prevent unnecessary or haphazard changes in consistency of concrete.
2. Ratio of Coarse Aggregate to Fine Aggregate: Not less than 1.0 nor more than 2.0 for all concrete Classes, with exception of Class CE.
3. Aggregate:

a. Obtain aggregate from source which is capable of providing uniform quality, moisture content, and grading during any single day's operation.

4. Concrete Mix Water to Cement Ratio, Cement Content, and Slump Range: Conform to values specified in Section 2.02.C and per the Geotechnical Evaluation.
5. Concrete Batch Weighs: Control and adjust so as to secure maximum yield, and at all times maintain proportions of concrete mix within specified limits.
6. Mixture Modification: If required, by the ENGINEER, modify mixture within limits set forth in this Section.

C. Concrete Mixes:
1. Proportioning of Concrete Mix: Proportion mixes on required average on compressive strength f'c as defined in the contract documents.
2. Mixes:
a. Adjusting of Water: After acceptance, do not change mixes without acceptance by ENGINEER, except that at all times adjust batching of water to compensate for free moisture content of fine aggregate.
b. Total Water Content of Each Concrete Class: Not exceed those specified in Section 2.02.C, unless noted otherwise or specified in the Geotechnical Evaluation and or Soils Report.
c. Checking Moisture Content of Fine Aggregate: Furnish satisfactory means at batching plant for checking moisture content of fine aggregate.
3. Change in Mixes: Undertake new trial batch and test program as specified in this Section.

D. Hand Mixed Concrete:
1. Hand mix concrete only when acceptable to the ENGINEER.
2. Prepare hand mixed concrete on watertight, level platform in batches not to exceed 1/3 cubic yard each.
3. Aggregate:
a. First spread required amount of coarse aggregate on platform in an even and uniform layer, and then over such aggregate spread proper proportion of fine aggregate.
b. Combined Depth of Both Such Layers: Not be greater than one foot.
4. Cement:
a. First evenly spread required quantity of cement over fine aggregate.
b. Then turn entire batch with shovels at least twice before adding water.
5. Water:
a. Then uniformly sprinkle or spray proper amount of water over batched materials.
b. Then turn with shovels not less than three times before being removing from platform.

2.05 SOURCE QUALITY CONTROL

A. Tests:
1. Concrete Mixes:
a. After concrete mixes have been accepted by ENGINEER, have trial batches of the accepted mix designs prepared by testing laboratory acceptable to the ENGINEER.
b. Prepare trial batches by using specified cement and aggregates proposed to be use for the work.

c. Trial Batches: Provide batches of sufficient quantity to determine slump, workability, consistency, and finishing characteristics, and to provide sufficient test cylinders.

d. Test Cylinders: Provide cylinders having six inch diameter by 12 inch length and that are prepared in accordance with ASTM C31 for tests specified in this Section.

e. Determine slump in accordance with ASTM C143.

f. Test Cylinders from Trial Batch:
   1) Test 8 cylinders for compressive strength in accordance with ASTM C39.
      a) Test 4 cylinders at 7 days and 4 at 28 days.
      b) Establish ratio between 7 day and 28 day strength for mix. Seven day strength may be taken as satisfactory indication of 28 day strength provided effects on concrete of temperature and humidity between 7 day and 28 day are taken into account.
   2) Average Compressive Strength of 4 Test Cylinders Tested at 28 Days: Equal to or greater than required average compressive strength f'c on which concrete mix design is based.

g. Drying Shrinkage:
   1) Prepare 5 drying shrinkage specimens in accordance with ASTM C157, except as modified herein.
   2) Remove drying shrinkage specimens from molds at age of 23 hours plus or minus 1 hour after trial batching, then immediately place them in water at 73°F plus or minus 3 degrees for at least 30 minutes and then measure specimens within 30 minutes thereafter to determine original length. Then submerge specimens in saturated lime water at 73°F plus or minus three degrees for moist curing.
   3) Make measurements to determine expansion expressed as percentage of original length at age 7 days. Use length at age 7 days as base length for drying shrinking calculations.
   4) Immediately store specimens in humidity controlled room maintained at 73°F plus or minus 3 degrees and 50 percent plus or minus 4 relative humidity for remainder of the test.
   5) Make and report measurements to determine shrinkage expressed as percentage of base length separately for 7, 14, 21, and 28 days of drying after 7 days of moist curing.
   6) Drying Shrinkage Deformation:
      a) Measure drying shrinkage deformation of each specimen as difference between base length and length after drying at each test age.
      b) Measure average drying shrinkage deformation of specimens to nearest 0.0001 inch at each test age.
      c) If drying shrinkage of any specimen departs from average of test age by more than 0.0004 inch, disregard results obtained from that specimen and test another specimen.
      d) Shrinkage of trial batch concrete at 28 days drying age shall not exceed 0.045 percent maximum.

h. If trial batch tests do not meet specified requirements for slump, strength, workability, consistency, drying shrinkage, and finishing, change concrete mix design proportions and, if necessary, source of aggregate. Make additional trial batches and tests until an acceptable trial batch is produced that meets requirements of this Section.

i. Perform test batches and tests required to establish trial batches and acceptability of materials without change in Contract Price.

j. Do not place concrete until the concrete mix design and trial batch have been accepted by ENGINEER.

2. Required Average Compressive Strength:

a. Determine required average compressive strength (f'c) for selection of concrete proportions for mix design, for each class of concrete, using calculated standard deviation and its corresponding specified compressive strength f'c, in accordance with ACI 318, Part 3, Chapter 5.

b. When test records of at least 30 consecutive tests that span period of not less that 45 calendar days are available, establish standard deviation as described in ACI 318, Part 3, Chapter 5 and as modified as follows herein.

c. Provide test records from which to calculate standard deviation that represent materials, quality control procedures, and conditions similar to materials, quality control procedures, and conditions expected to apply in preparation of concrete for the Work.

d. Provide changes in materials and proportions within test records that are more restricted than those for the Work.

e. Specified Compressive Strength (f'c) of Concrete Used in Test Records: Within 1,000 pounds per square inch of that specified for the Work.

f. When lacking adequate test records for calculation of standard deviation meeting requirements, determine required average compressive strength f'c from the following table.

Specified Compressive Strength f'c (pounds per square inch)	**Required Average Compressive Strength f'c (pounds per square inch)**
Less than 3,000	f'c + 1,000
3,000 to 5,000	f'c + 1,200
Over 5,000	f'c + 1,400

3. Pozzolan:

a. Sampling and Testing:

1) Sample and test pozzolan in accordance with ASTM C311.

2) In Computing Water to Cement Ratio and Cement Content per Cubic Yard of Concrete: Consider cement weight to be weight of Portland cement plus 100 percent of weight of fly ash.

4. Aggregate:

a. Testing of concrete aggregate is at CONTRACTOR's expense.

b. Sieves:

1) Use sieves with square openings for testing grading or aggregates.

2) Sieve Analysis: If sieve analysis indicates significant change in materials, the ENGINEER may require that new mix design be submitted and accepted before further placing of concrete.

c. Sample aggregate in accordance with ASTM D75 and C136.

d. Fine Aggregate:

1) Provide fine aggregate not containing strong alkali nor organic matter which gives color darker than standard color when tested in accordance with ASTM C40.

2) Provide aggregate having soundness complying with requirements of ASTM C33 when tested in accordance with ASTM C88.

3) Provide aggregate complying with reactivity requirements of ASTM C33 when tested in accordance with ASTM C289.

e. Coarse Aggregate:
   1) Soundness when tested in accordance with ASTM C88: Have loss not greater than 10 percent when tested with sodium sulfate.
   2) Abrasion Loss: Not exceed 45 percent after 500 revolutions when tested in accordance with ASTM C131.
   3) Reactivity: Not exceed limits specified in Appendix of ASTM C33 when tested in accordance with ASTM C289.

f. Portland Cement:
   1) Determination Alkali Content: Determine by method set forth in ASTM C114.

PART 3 - EXECUTION

3.01 PROPORTIONING AND MIXING

A. Proportioning: Proportioning of the mix shall conform to the requirements of Chapter 3 "Proportioning" of ACI 301.

B. Mixing: Mixing shall conform to the requirements of Chapter 7 of said ACI 301 Specifications.

C. Slump: Slumps shall be as indicated herein.

D. Retempering: Retempering of concrete or mortar which has partially hardened shall not be permitted.

3.02 PREPARATION OF SURFACES FOR CONCRETING

A. General: Earth surfaces shall be thoroughly wetted by sprinkling prior to the placing of any concrete, and these surfaces shall be kept moist by frequent sprinkling up to the time of placing concrete thereon. The surface shall be free from standing water, mud and debris at the time of placing concrete.

B. Joints in Concrete: Concrete surfaces upon or against which concrete is to be placed, where the placement of the concrete has been stopped or interrupted so that, as determined by the ENGINEER, the new concrete cannot be incorporated integrally with that previously placed, are defined as construction joints. The surfaces of horizontal joints shall be given a compacted, roughened surface for good bonding. Except where the Drawings call for joint surfaces to be coated, the joint surfaces shall be cleaned of all laitance, loose or defective concrete, foreign material, and be roughened to a minimum ¼-inch amplitude. Such cleaning and roughening shall be accomplished by hydroblasting or sandblasting (exposing aggregate) followed by thorough washing. All pools of water shall be removed from the surface of construction joints before the new concrete is placed.

C. After the surfaces have been prepared, all approximately horizontal construction joints shall be covered with a 6-inch lift of a pea gravel mix. The mix shall be placed and spread uniformly. Wall concrete shall follow immediately and shall be placed upon the fresh pea gravel mix.

D. Placing Interruptions: When placing of concrete is to be interrupted long enough for the concrete to take a set, the working face shall be given a shape by the use of forms or other means, that will secure proper union with subsequent work; provided that construction joints shall be made only where acceptable to the ENGINEER.

E. Embedded Items: No concrete shall be placed until all formwork, installation of parts to be embedded, reinforcement steel, and preparation of surfaces involved in the placing

have been completed and accepted by the ENGINEER at least 4 hours before placement of concrete. All surfaces of forms and embedded items that have become encrusted with dried grout from previous work shall be cleaned before the surrounding or adjacent concrete is placed.

F. All inserts or other embedded items shall conform to the requirements herein.

G. All reinforcement, anchor bolts, sleeves, inserts, and similar items shall be set and secured in the forms at locations indicated on the Drawings or shown by shop drawings and shall be acceptable to the ENGINEER before any concrete is placed. Accuracy of placement is the responsibility of the CONTRACTOR.

H. Casting New Concrete Against Old: Where concrete is to be cast against old concrete (any concrete which is greater than 180 days of age), the surface of the old concrete shall be thoroughly cleaned and roughened by hydro-blasting or sandblasting (exposing aggregate). The joint surface shall be coated with an epoxy bonding agent unless indicated otherwise by the ENGINEER.

I. No concrete shall be placed in any structure until all water entering the space to be filled with concrete has been properly cut off or has been diverted by pipes, or other means, and carried out of the forms, clear of the WORK. No concrete shall be deposited underwater nor shall the CONTRACTOR allow still water to rise on any concrete until the concrete has attained its initial set. Water shall not be permitted to flow over the surface of any concrete in such manner and at such velocity as will injure the surface finish of the concrete. Pumping or other necessary dewatering operations for removing ground water, if required, shall be subject to the review of the ENGINEER.

J. Corrosion Protection: Pipe, conduit, dowels, and other ferrous items required to be embedded in concrete construction shall be so positioned and supported prior to placement of concrete that there will be a minimum of 2 inches clearance between said items and any part of the concrete reinforcement. Securing such items in position by wiring or welding them to the reinforcement will not be permitted.

K. Openings for pipes, inserts for pipe hangers and brackets, and anchors shall, where practicable, be provided during the placing of concrete.

L. Anchor bolts shall be accurately set and shall be maintained in position by templates while being embedded in concrete.

M. Cleaning: The surfaces of all metalwork to be in contact with concrete shall be thoroughly cleaned of all dirt, grease, loose scale and rust, grout, mortar, and other foreign substances immediately before the concrete is placed.

3.03 HANDLING, TRANSPORTING, AND PLACING

A. General: Placing of concrete shall conform to the applicable requirements of Chapter 8 of ACI 301 and the requirements of this Section. No aluminum materials shall be used in conveying any concrete.

B. Non-Conforming Work or Materials: Concrete which during or before placing is found not to conform to the requirements indicated herein shall be rejected and immediately removed from the work. Concrete which is not placed in accordance with these Specifications, or which is of inferior quality, shall be removed and replaced by the CONTRACTOR at no additional cost to the OWNER.

C. Unauthorized Placement: No concrete shall be placed except in the presence of a duly authorized representative of the ENGINEER. The CONTRACTOR shall notify the ENGINEER in writing at least 24 hours in advance of placement of any concrete.

D. Placement in Wall and Column Forms: Concrete shall not be dropped through reinforcement steel or into any deep form, nor shall concrete be placed in any form in

such a manner as to leave accumulation of mortar on the form surfaces above the placed concrete. In such cases, means such as hoppers and, if necessary, vertical ducts of canvas, rubber, or metal shall be used for placing concrete in the forms in a manner that it may reach the place of final deposit without separation. In no case shall the free fall of concrete exceed 4-feet in walls and 8-feet in columns below the ends of ducts, chutes, or buggies. Concrete shall be uniformly distributed during the process of depositing and in no case after depositing shall any portion be displaced in the forms more than 6-feet in horizontal direction. Concrete in wall forms shall be deposited in uniform horizontal layers not deeper than 2-feet; and care shall be taken to avoid inclined layers or inclined construction joints except where such are required for sloping members. Each layer shall be placed while the previous layer is still soft. The rate of placing concrete in wall forms shall not exceed 5-feet of vertical rise per hour. Sufficient illumination shall be provided in the interior of all forms so that the concrete at the places of deposit is visible from the deck or runway.

E. Casting New Concrete Against Old: Epoxy adhesive bonding agent shall be applied to the old surfaces according to the manufacturer's written recommendations. This provision shall not apply to joints where hydrotite waterstop is provided.

F. Conveyor Belts and Chutes: All ends of chutes, hopper gates, and all other points of concrete discharge throughout the CONTRACTOR'S conveying, hoisting, and placing system shall be designed and arranged so that concrete passing from them will not fall separated into whatever receptacle immediately receives it. Conveyor belts, if used, shall be of a type acceptable to the ENGINEER. Chutes longer than 50-feet will not be permitted. Minimum slopes of chutes shall be such that concrete of the indicated consistency will readily flow in them. If a conveyor belt is used, it shall be wiped clean by a device operated in such a manner that none of the mortar adhering to the belt will be wasted. All conveyor belts and chutes shall be covered.

G. Placement in Slabs: Concrete placed in sloping slabs shall proceed uniformly from the bottom of the slab to the top, for the full width of the placement. As the work progresses, the concrete shall be vibrated and carefully worked around the slab reinforcement, and the surface of the slab shall be screeded in an up-slope direction.

H. Temperature of Concrete: The temperature of concrete when it is being placed shall be not more than 90°F nor less than 55°F for s less than 12 inches thick nor less than 50°For all other sections. Concrete ingredients shall not be heated to a temperature higher than that necessary to keep the temperature of the mixed concrete, as placed, from falling below the minimum temperature. When the temperature of the concrete is 85°F or above, the time between the introduction of the cement to the aggregates and discharge shall not exceed 45 minutes. If concrete is placed when the weather is such that the temperature of the concrete would exceed 90°F, the CONTRACTOR shall employ effective means, such as pre-cooling of aggregates and mixing water using ice or placing at night, as necessary to maintain the temperature of the concrete, as it is placed, below 90°F. The CONTRACTOR shall not be entitled to any additional compensation on account of the foregoing requirements.

I. Cold Weather Placement:
   1. Placement of concrete shall conform to ACI 306.1 - Cold Weather Concreting, and the following.
   2. Remove all snow, ice, and frost from the surfaces, including reinforcement, against which concrete is to be placed. Before beginning concrete placement, thaw the subgrade to a minimum depth of 6 inches. All reinforcement and embedded items shall be warmed to above 32°F prior to concrete placement.
   3. Maintain the concrete temperature above 50°F for at least 5 days after placement.

3.04 PUMPING OF CONCRETE

A. General: If the pumped concrete does not produce satisfactory end results, the CONTRACTOR shall discontinue the pumping operation and proceed with the placing of concrete using conventional methods.

B. Pumping Equipment: The pumping equipment shall have two (2) cylinders and be designed to operate with one cylinder in case the other one is not functioning. In lieu of this requirement, the CONTRACTOR may have a standby pump on the site during pumping.

C. The minimum diameter of the hose conduits shall be in accordance with ACI 304.2R.

D. Pumping equipment and hose conduits that are not functioning properly shall be replaced.

E. Aluminum conduits for conveying the concrete shall not be permitted.

F. Field Control: Concrete samples for slump and test cylinders will be taken at the placement end of the hose.

3.05 ORDER OF PLACING CONCRETE

A. The order of placing concrete in all parts of the WORK shall be acceptable to the ENGINEER. In order to minimize the effects of shrinkage, the concrete shall be placed in units as bounded by construction joints at the indicated locations. The placing of units shall be done by placing alternate units in a manner such that each unit placed shall have cured at least 5-days for hydraulic structures and 2-days for all other structures before the contiguous unit or units are placed, except that the corner sections of vertical walls shall not be placed until the two (2) adjacent wall panels have cured at least 10 days for hydraulic structures and 4-days for all other structures.

B. The surface of the concrete shall be level whenever a run of concrete is stopped. To insure a level, straight joint on the exposed surface of walls, a wood strip at least ¾-inch thick shall be tacked to the forms on these surfaces. The concrete shall be carried about ½-inch above the underside of the strip. About one hour after the concrete is placed, the strip shall be removed and any irregularities in the edge formed by the strip shall be leveled with a trowel and all laitance shall be removed.

3.06 TAMPING AND VIBRATING

A. As concrete is placed in the forms or in excavations, it shall be thoroughly settled and compacted, throughout the entire depth of the layer which is being consolidated, into a dense, homogeneous mass, filling all corners and angles, thoroughly embedding the reinforcement, eliminating rock pockets, and bringing only a slight excess of water to the exposed surface of concrete. Vibrators shall be Group 3 per ACI 309, high speed power vibrators (8,000 to 12,000 rpm) of an immersion type in sufficient number and with at least one standby unit as required. Group 2 vibrators may be used only at specific locations when accepted by the ENGINEER.

B. Care shall be used in placing concrete around hydrotite waterstops. The concrete shall be carefully worked by rodding and vibrating to make sure that all air and rock pockets have been eliminated. Where flat-strip type hydrotite waterstops are placed horizontally, the concrete shall be worked under the hydrotite waterstops by hand, making sure that all air and rock pockets have been eliminated. Concrete surrounding the hydrotite waterstops shall be given additional vibration over and above that used for adjacent concrete placement to assure complete embedment of the hydrotite waterstops in the concrete.

C. Concrete in walls shall be internally vibrated and at the same time rammed, stirred or worked with suitable appliances, tamping bars, shovels or forked tools until it completely

fills the forms or excavations and closes snugly against all surfaces. Subsequent layers of concrete shall not be placed until the layers previously placed have been worked thoroughly. Vibrators shall be provided in sufficient numbers, with standby units as required, to accomplish the required results within 15 minutes after concrete of the prescribed consistency is placed in the forms. The vibrating head shall not contact the surfaces of the forms. Care shall be taken not to vibrate concrete excessively or to work it in any manner that causes segregation of its constituents.

3.07 FINISHING CONCRETE SURFACES

A. General: Surfaces shall be free from fins, bulges, ridges, offsets, honeycombing or roughness of any kind, and shall present a finished, smooth, continuous hard surface. Allowable deviations from plumb or level and from the alignment, profiles and dimensions shown are defined as tolerances and are indicated in Part 1, above. These tolerances are to be distinguished from irregularities in finish as described herein. Aluminum finishing tools shall not be used.

B. Formed Surfaces: No treatment is required after form removal except for curing, repair of defective concrete, and treatment of surface defects. Where architectural finish is required, it shall be as indicated. Surface holes larger than ½-inch in diameter or deeper than ¼-inch are defined as surface defects in basins and exposed walls and shall be patched per Section 3.11 Treatment of Surface Defects.

C. Unformed Surfaces: After proper and adequate vibration and tamping, all unformed top surfaces of slabs, floors, walls, and curbs shall be brought to a uniform surface with suitable tools. Immediately after the concrete has been screeded, it shall be treated with a liquid evaporation retardant. The retardant shall be used again after each work operation as necessary to prevent drying shrinkage cracks. The classes of finish specified for unformed concrete surfaces are designated and defined as follows:

1. Finish U1 - Sufficient leveling and screeding to produce an even, uniform surface with surface irregularities not to exceed 3/8-inch. No further special finish is required.
2. Finish U2 - After sufficient stiffening of the screeded concrete, surfaces shall be float finished with wood or metal floats or with a finishing machine using float blades. Excessive floating of surfaces while the concrete is plastic and dusting of dry cement and sand on the concrete surface to absorb excess moisture will not be permitted. Floating shall be the minimum necessary to produce a surface that is free from screed marks and is uniform in texture. Surface irregularities shall not exceed 1/4-inch. Joints and edges shall be tooled where indicated or as determined by the ENGINEER.
3. Finish U3 - After the finish U2 surface has hardened sufficiently to prevent excess of fine material from being drawn to the surface, steel troweling shall be performed with firm pressure such as will flatten the sandy texture of the floated surface and produce a dense, uniform surface free from blemishes, ripples, and trowel marks. The finish shall be smooth and free of all irregularities.
4. Finish U4 - Trowel the Finish U3 surface to remove local depressions or high points. In addition, the surface shall be given a light hairbroom finish with brooming perpendicular to drainage unless otherwise indicated. The resulting surface shall be rough enough to provide a nonskid finish.

D. Unformed surfaces shall be finished according to the following schedule:

UNFORMED SURFACE FINISH SCHEDULE

Area	**Finish**
Grade slabs and foundations to be covered with concrete or fill material	U1
Water bearing slabs with slopes 10 percent and less	U3
Water bearing slabs with slopes greater than 10 percent	U4

Slabs not water bearing	U4
Top surface of walls	U3

3.08 CURING

A. General: All concrete shall be cured for not less than 7 days after placing, in accordance with the methods indicated below for the different parts of the WORK.

Surface to be Cured or Damp proofed	**Method**
Wall sections with forms removed	1
Construction joints between footings and walls, and between floor slab and columns	2
Encasement concrete and thrust blocks	1 or 2
All concrete surfaces not specifically indicated in this paragraph	1
Floor slabs on grade in hydraulic structures	1 or 2
Slabs not on grade	1 or 2

B. Method 1: The surface shall be sprayed with a liquid white pigmented curing compound.
   1. It shall be applied in accordance with the manufacturer's printed instructions at a maximum coverage rate of 200 square feet per gallon and in such a manner as to cover the surface with a uniform film which will seal thoroughly.
   2. Where the curing compound method is used, care shall be exercised to avoid damage to the seal during the 7-day curing period. If the seal is damaged or broken before the expiration of the curing period, the break shall be repaired immediately by the application of additional curing compound over the damaged portion.
   3. Wherever curing compound has been applied by mistake to surfaces against which concrete subsequently is to be placed and to which it is to adhere, compound shall be entirely removed by wet sandblasting just prior to the placing of new concrete.
   4. Curing compound shall be applied as soon as the concrete has hardened enough to prevent marring on unformed surfaces and within 2 hours after removal of forms. Repairs to formed surfaces shall be made within the 2-hour period; provided, however, that any such repairs which cannot be made within the said 2-hour period shall be delayed until after the curing compound has been applied. When repairs are to be made to an area on which curing compound has been applied, the area involved shall first be wet-sandblasted to remove the curing compound.
   5. At all locations where concrete is placed adjacent to a panel which has been coated with curing compound, the panel shall have curing compound.

C. Method 2: This method applies to both walls and slabs.
   1. The concrete shall be kept continuously wet by the application of water for a minimum period of at least seven (7) consecutive days beginning immediately after the concrete has reached final set or forms have been removed.
   2. Until the concrete surface is covered with the curing medium, the entire surface shall be kept damp by applying water using nozzles that atomize the flow so that the surface is not marred or washed.
   3. Curing blankets shall be used as a curing medium to retain the moisture during the curing period. The curing medium shall be weighted or otherwise held substantially in contact with the concrete surface to prevent being dislodged by wind or any other causes. All edges shall be continuously held in place.
   4. The curing blankets and concrete shall be kept continuously wet by the use of sprinklers or other means both during and after normal working hours.

5. Immediately after the application of water has terminated at the end of the curing period, the curing medium shall be removed, any dry spots shall be rewetted and curing compound shall be immediately applied in accordance with Method 4 above.
6. The CONTRACTOR shall dispose of excess water from the curing operation to avoid damage to the work.

3.09 PROTECTION

A. The CONTRACTOR shall protect all concrete against injury until final acceptance at the CONTRACTOR's own expense and at no additional cost to the OWNER

B. Fresh concrete shall be protected from damage due to rain, hail, sleet, or snow. The CONTRACTOR shall provide such protection while the concrete is still plastic and whenever precipitation is imminent or occurring.

3.10 CURING IN COLD WEATHER

A. The CONTRACTOR shall protect all concrete against injury from cold weather until final acceptance at the CONTRACTOR's own expense and at no additional cost to the OWNER.

B. Concrete cured by an application of curing compound will require no additional protection from freezing if the protection at 50°F for 72 hours is obtained by means of approved insulation in contact with the forms or concrete surfaces; otherwise the concrete shall be protected against freezing temperatures for 72 hours immediately following 5 days protection at 50°F. Concrete cured by water shall be protected against freezing temperatures for 3 days immediately following the 72 hours of protection at 50°F.

C. Discontinuance of protection against freezing temperatures shall be such that the drop in temperature of any portion of the concrete will be gradual and will not exceed 40°F in 24 hours. In the spring, when the mean daily temperature rises above 40°F for more than three (3) successive days, the specified 72-hour protection at a temperature not lower than 50°F may be discontinued for as long as the mean daily temperature remains above 40°F; provided, that the concrete shall be protected against freezing temperatures for not less than 48 hours after placement.

D. Where artificial heat is employed, special care shall be taken to prevent the concrete from drying. Use of un-vented heaters will be permitted only when unformed surfaces of concrete adjacent to the heaters are protected for the first 24 hours from an excessive carbon dioxide atmosphere by application of curing compound; provided, that the use of curing compound for such surfaces is otherwise permitted by these Specifications.

3.11 TREATMENT OF SURFACE DEFECTS

A. As soon as forms are removed, all exposed surfaces shall be carefully examined and any irregularities shall be immediately patched or ground in a satisfactory manner in order to secure a smooth, uniform, and continuous surface. Plastering or coating of surfaces to be smoothed will not be permitted. No repairs shall be made until after inspection by the ENGINEER. In no case will extensive patching of honeycombed concrete be permitted. Concrete containing minor voids, holes, honeycombing, or similar depression defects shall be repaired as indicated below. Concrete containing extensive voids, holes, honeycombing, or similar depression defects shall be completely removed and replaced. All repairs and replacements herein required shall be promptly executed at no increased cost to the OWNER.

B. Defective surfaces to be repaired shall be cut back from true line a minimum depth of ½-inch over the entire area. Feathered edges will not be permitted. Where chipping or cutting tools are not required in order to deepen the area properly, the surface shall be

prepared for bonding by the removal of all laitance or soft material, plus not less than 1/32-inch depth of the surface film from all hard portions by means of an efficient sandblast. After cutting and sandblasting, the surface shall be wetted sufficiently in advance of shooting with shotcrete or with cement mortar so that while the repair material is being applied, the surfaces underneath will remain moist but not so wet as to overcome the suction upon which a good bond depends. The material used for repair proposed shall consist of a mixture of one sack of cement to 3-cubic feet of sand. For exposed walls, the cement shall contain such a proportion of Atlas white Portland cement as is required to make the color of the patch match the color of the surrounding concrete. In hydraulic structures the material used for repair shall be hydraulic cement as defined in this Section under Products.

C. Holes left by tie-rod cones shall be rubber stopped and grouted. Holes then shall be repaired in an approved manner with dry-packed cement grout. Holes left by form-tying devices having a rectangular cross-section and other imperfections having a depth greater than their least surface dimension shall not be reamed but shall be repaired in an approved manner with dry-packed cement grout.

D. All repairs shall be built up and shaped in such a manner that the completed work will conform to the requirements of this Section, as applicable, using approved methods which will not disturb the bond, cause sagging, or cause horizontal fractures. Surfaces of repairs shall receive the same kind and amount of curing treatment as required for the concrete in the repaired section.

E. Prior to filling any structure with water, all cracks that may have developed shall be "vee'd" as indicated in specs or in the field and filled with sealant conforming to the requirements of the applicable Sections of Division 03 – Concrete. This repair method shall be done on the water bearing face of members. Prior to backfilling, faces of members in contact with fill, which are not covered with a waterproofing membrane shall also have cracks repaired as indicated herein.

3.12 PATCHING HOLES IN CONCRETE

A. Patching Small Holes:
   1. Holes which are less than 12 inches in the least dimension and extend completely through concrete members shall be filled.
   2. Small holes in members which are water-bearing or in contact with soil or other fill material shall be filled with non-shrink grout or hydraulic cement in wet tanks. Where a face of the member is exposed to view, the non-shrink grout shall be held back 2 inches from the finished surface. The remaining 2 inches shall then be patched according to the Paragraph entitled "Treatment of Surface Defects."
   3. Small holes through all other concrete members shall be filled with non-shrink grout or hydraulic cement, with exposed faces treated as above.

B. Patching Large Holes:
   1. Holes which are larger than 12 inches in the least dimension shall have a keyway chipped into the edge of the opening all around, unless a formed keyway exists. The holes shall then be filled with concrete as indicated herein.
   2. Holes which are larger than 24 inches in the least dimension and which do not have reinforcing steel extending from the existing concrete, shall have reinforcing steel set in grout in drilled holes. The reinforcing added shall match the reinforcing in the existing wall unless indicated otherwise.
   3. Large holes in members which are water bearing or in contact with soil or other fill shall have a bentonite type hydrotite waterstop material placed around the perimeter of the hole in accordance with the applicable Sections of Division 03 – Concrete, unless there is an existing hydrotite waterstop in place.

3.13 CARE AND REPAIR OF CONCRETE

A. The CONTRACTOR shall protect all concrete against injury or damage from excessive heat, lack of moisture, over-stress, or any other cause until final acceptance. Particular care shall be taken to prevent the drying of concrete and to avoid roughening or otherwise damaging the surface. Any concrete found to be damaged, or which may have been originally defective, or which becomes defective at any time prior to the final acceptance of the completed WORK, or which departs from the established line or grade, or which, for any other reason, does not conform to the requirements of the Contract Documents, shall be satisfactorily repaired or removed and replaced with acceptable concrete at no additional cost to the OWNER.

END OF SECTION

SECTION 03 4100 – PRECAST CONCRETE UTILITY STRUCTURES

PART 1 – GENERAL

1.01 THE REQUIREMENT

A. The CONTRACTOR shall furnish and install structural pre-cast concrete work in accordance with the Contract Documents.

B. This Section covers the design, fabrication, delivery, and installation of all pre-cast concrete units, including connections, complete, in place, as shown and specified.

C. American Iron and Steel (AIS) requirement applies to this section. All iron and steel products used in this project must be produced in the United States.

D. Soils Report: This work shall conform to the requirements of the latest Geotechnical Evaluation and / or Soils Report.

1.02 CODES AND STANDARDS

A. Referenced Documents:

1. ASTM Standards:

A82	Steel Wire, Plain, for Concrete Reinforcement
A184	Fabricated Deformed Steel Bar Mats for Concrete Reinforcement
A185	Steel Welded Wire, Fabric, Plain, for Concrete Reinforcement
A496	Steel Wire, Deformed, for Concrete Reinforcement
A497	Welded Deformed Steel Wire Fabric for Concrete Reinforcement
A615	Deformed and Plain Billet-Steel Bars for Concrete Reinforcement
A616	Rail-Steel Deformed and Plain Bars for Concrete Reinforcement
A617	Axle-Steel Deformed and Plain Bars for Concrete Reinforcement
A706	Low-Alloy Steel Deformed Bars for Concrete Reinforcement
C31	Making and Curing Concrete Test Specimens in the Field
C33	Concrete Aggregates
C39	Compressive Strength of Cylindrical Concrete Specimens
C42	Obtaining and Testing Drilled Cores and Sawed Beams of Concrete
C94	Ready-Mixed Concrete
C150	Portland Cement
C192	Making and Curing Concrete Test Specimens in the Laboratory
C231	Air Content of Freshly Mixed Concrete by the Pressure Method
C260	Air-Entraining Admixtures for Concrete
C330	Lightweight Aggregates for Structural Concrete
C478	Precast Reinforcement Concrete Manhole Sections
C494	Shear Fatigue of Sandwich Core Materials
C595	Blended Hydraulic Cements
C618	Coal Fly Ash and Raw or Calcined Natural Pozzolan for Use as a Mineral Admixture in Concrete
C857	Minimum Structural Design Loading for Underground Precast Concrete Utility Structures

2. American Concrete Institute Standards:
   a. ACI 318 Building Code Requirements for Reinforced Concrete
3. American Welding Society Standards:
   a. AWS-D1.4 Structural Welding Code Reinforcing Steel

1.03 SUBMITTALS

A. Submittals shall be made in accordance with Section 01 3300 – Submittal Procedures.

B. Shop Drawings:
   1. Shop drawings shall show structure dimensions and orientation and location of all applicable inflow and outflow penetrations, access hatches, and conduit sleeves.
   2. Shop drawings shall include design structural calculations, assuming the applicable seismic zone and project groundwater conditions, that are stamped and signed by a Professional Engineer registered in Arizona and shall be approved by the ENGINEER.
   3. Shop drawings shall indicate pre-cast unit identification marks, location of units in the WORK, elevations, fabrication details, joint details, reinforcement, connections, dimensions, interface with adjacent members, and special handling instructions in sufficient detail to cover manufacture, handling and erection. Shop drawings shall include erection drawings.

C. Test Reports: Tests for compressive strength of concrete shall be performed by the factory. Copies of test reports including all test data and all test results shall be submitted.

D. Certificates of Compliance: Certificates of compliance shall be submitted attesting that materials and products meet or exceed specified requirements.

1.04 QUALITY ASSURANCE

A. General Requirements: Design members under direct supervision of a Professional Engineer experienced in design of pre-cast concrete units, registered in the State of Arizona, and conforming to requirements of this specification.
   1. Manufacture, Transportation, and Installation: The Manufacturer shall specialize in providing pre-cast products and services normally associated with pre-cast concrete construction with high quality finishes similar to that indicated on drawings.

1.05 DELIVERY, STORAGE, AND HANDLING

A. General: Pre-cast members shall be handled to position consistent with their shape and design; they shall be lifted and supported from design incorporated support points and provided with strong backs and other devices as required. Lifting or handling equipment shall be capable of maintaining units during manufacture, storage, transportation, erection, and in position for fastening.

B. Blocking and supports, lateral restraints and protective materials during transport and storage shall be clean, non-staining, without causing harm to exposed surfaces, including temporary support to prevent bowing and warping. Lateral restraints shall be provided to prevent undesirable horizontal movement. Edges and exposed faces of members shall be protected to prevent straining, chipping, or spalling of concrete.

C. Units shall be marked with date of production and final position in structure in location not visible after erection.

D. Pre-cast units shall be stored off the ground in a manner to prevent warpage and they shall be protected from weather, marring, and overload.

E. Stainless Steel Hardware: Stainless steel hardware shall be transported, handled, stored, and protected in wood crates.

PART 2 – PRODUCTS

2.01 MATERIALS

A. Cement: ASTM C150 or ASTM C595.

B. Aggregates: ASTM C33 and ASTM C330, except that the requirements for grading shall not apply.

C. Admixtures: May be used provided such admixtures are not injurious to other products used in the concrete.

D. Chemical Admixtures: ASTM C494

E. Fly Ash and Pozzolanic Admixture: ASTM C618
   1. Water: Used for curing, washing, aggregate, or mixing concrete shall be clean and free of injurious amounts of oil, acids, alkalis, salts, organic materials, or other substances that may be incompatible with concrete or steel.

F. Steel Reinforcement:
   1. Wire ASTM A82 or ASTM A496
   2. Wire Fabric ASTM A185 or ASTM A497
   3. Bars ASTM A184, ASTM A615, ASTM A616, ASTM A617 or ASTM A706

2.02 DESIGN REQUIREMENTS

A. Design Method: The elastic method of structural design or the ultimate strength method of reinforced concrete design as outlined in ACI 318 shall be used to design the concrete sections, including the reinforcement required, when the structure is subjected to the loading conditions covered in Practice C857.

B. Access Openings: The structural design shall take into consideration the number, placement, and size of access openings.

C. Floors: The minimum floor thickness resulting from slope shall be considered as nominal floor thickness in the structure.

D. Terminators, Knockouts and Sumps: Duct terminators, knockouts and sumps shall be designed to carry the loads imposed upon them. The basic structure shall be designed to carry all imposed loads with knockouts removed.

E. Placement of Reinforcement: The design concrete cover for reinforcing bars, mats or fabric shall not be less than ¾-inch (19 mm) subject to the requirements of Section 2.2.

F. Concrete Strength: The minimum specified compressive strength for design shall be 4,000 psi (21 MPa) at 28 days of age. Compressive-strength tests should be made in accordance with Practices C31 and C192 and Test Methods C39 and C42.

G. Joints: Joints in sectional precast concrete structure shall be designed so as to be self-aligning when assembling sections of the structure.
   1. The manufacture shall provide a single joint design on all units of the same size and type to ensure interchangeability.

H. Lifting Devices: Design of embedded lifting devices shall conform to requirements as specified in 8.4 under Special Loading Considerations of Practice ASTM C890.

I. Pickup Points and Boxouts: Pickup points, boxouts and inserts on panel faces and surfaces to be exposed are prohibited except as approved.

J. Traffic Loads: Structure and access hatches shall be designed for HS-20-44 traffic wheel loads per AASHTO as last revised, including a 30% impact factor.

2.03 MANUFACTURE

A. Forms: Forms shall be accurately constructed and strong enough to maintain the structure's dimensions within the tolerances given in Section 2.4. Forms should be constructed in such a manner as to minimize the seepage of water. All casting surfaces shall be smooth nonporous material.

B. Cleaning and Oiling: Forms shall be cleaned before each use. New forms shall be free of paint or other protective coatings that might cling to the surface of the structure. Releasing agents applied to the form to aid in breaking the bond between the form and the concrete shall not be injurious to the concrete.

C. Reinforcement: Steel reinforcement shall conform to the requirements of this specification and shall be securely positioned in the form to maintain design concrete cover given in Section 2.2 during concrete placement. All chairs, bolsters, braces and spacers in contact with form and reinforcing rod shall be of material that will not deteriorate.

D. Mixture: The aggregates shall be sized, graded, proportioned, and thoroughly mixed in a batch mixer with proportions of cement and water as will produce a homogeneous concrete having the required specified compressive strength. If Ready-Mix concrete is used, it shall be in accordance with Specification C 94.

E. Concrete Placement: Concrete shall be deposited as nearly as practicable in its final position. Concrete shall be placed in the form at a rate such that the concrete is plastic at all times and flows readily into all parts of the form and around all reinforcement steel and embedded fixtures without segregation of materials. Concrete that has partially hardened or has been contaminated by foreign material shall not be deposited in the form.

F. Curing: Structures shall be cured by an accepted industry method that will develop the required 28-day compressive strength without affecting the long-term durability of the concrete.

2.04 PERMISSIBILE VARIATIONS

A. Dimensional Tolerances: The length, width, height, or diameter measurements of the structure when measured on the inside surface shall not deviate from the design dimensions more than the following:

Dimension	**Tolerance**
0 to 5-feet (0 to 1.5 m)	+/- 1/4 inch (+/- 6 mm)
5 to 10-feet (1.5 to 3.0 m)	+/- 3/8 inch (+/- 10 mm)
10 to 20 feet (3.0 to 6.1 m)	+/- 1/2 inch (+/- 13 mm)
20 feet (6.1 m) and over	as agreed upon between manufacturer and purchaser

B. Squareness Tolerance: The inside of the precast concrete component shall be square as determined by diagonal measurements. The difference between such measurements shall not exceed the following:

Measured Length	**Allowable Difference**
0 to 10 feet (0 to 0.3 m)	+/- 1/2 inch (+/- 13 mm)
10 to 20 feet (3.0 to 6.1 m)	+/- 3/4 inch (+/- 19 mm)
20 feet (6.1 m) and over	as agreed upon between manufacturer and purchaser

C. Joint Surfaces: The inside joint seam gap between two sections placed together without a joint sealant shall not exceed 3/8-inch (9.5 mm).

D. Insert Location: Insert locations for attachments in each component shall not deviate individually or cumulatively more than ± 1/8-inch (3.18 mm) from dimensions on specification drawings.

E. Reinforcement Location: With reference to thickness of wall or slab, reinforcement shall be within ± ¼-inch (6.3 mm) of the design location, but in no case shall the cover be less than ¾-inch (19 mm). The reinforcement spacing shall not vary more than one tenth of the designed bar spacing nor exceed 1½-inch (38 mm) in variation, except for welded wire mesh which shall conform to Specifications A185 or A497.

F. Slab and Wall Thickness: The slab and wall thickness shall not be less than that shown in the design by more than 5% or 3/16-inch (4.8 mm), whichever is greater. A thickness greater than that required in the design shall not be a cause for rejection.

2.05 REPAIRS

A. Precast concrete structures may be repaired. Repairs shall be performed by the manufacturer, in such a manner as to ensure that the repaired structure conforms to the requirements of this specification.

2.06 INSPECTION

A. The quality of material, process of manufacture, and the finished structure shall be subject to inspection at any time by the purchaser or his representative.

2.07 REJECTION

A. Precast concrete structures or sections of structures shall be subject to rejection upon failure to conform to any specified requirements contained herein, or if any of the following imperfections occur:
   1. Defects that indicate any imperfect concrete mixing and molding, or
   2. Surface defects indicated by honeycombed or open-texture and damaged areas where such defects would affect the structural adequacy.

2.08 CERTIFICATION

A. At the request of the purchaser, the manufacturer shall, prior to the actual delivery of a structure, furnish a statement giving the source and type of cement, the source and specific gravities of the aggregates, the concrete mix proportions, strength, type, amount, and name of admixtures and mill certificates for the reinforcement steel used in manufacture.

2.09 MARKING

A. The weight shall be marked on the outside of each component section.

B. The purchaser may request additional information to be marked on the component section when ordering.

C. The method of marking shall be agreed upon between the purchaser and the supplier prior to ordering.

PART 3 – EXECUTION

3.01 INSTALLATION

A. Erection:
   1. The units shall be erected in accordance with approved shop/erection drawings without damage to shape or finish or adjacent work. Unless otherwise shown, members shall be erected level and plumb within allowable tolerances.
   2. The CONTRACTOR shall align and maintain uniform horizontal joints as erection progresses, provide approved shims and wedges as required, and when members required adjustment beyond design or tolerance criteria, discontinue affected work. Units shall be secured in place and field welds; scratches and otherwise damaged steel surfaces shall be touched up.
   3. Pickup points, boxouts, inserts and bearing surfaces shown shall be grouted with non-shrink grout in accordance with these Specifications. The color and texture of concrete surfaces of adjacent areas shall be finished to match in the same plane.

3.02 PROTECTION

A. Adjacent surfaces shall be protected from damage during sealing and cleaning operations and against damage, disfiguration, or discoloration from subsequent operations. Noncombustible shielding shall be used during welding operations.

END OF SECTION

SECTION 03 6000 – GROUTING

PART 1 - GENERAL

1.01 THE REQUIREMENT

A. Provide and place grout in accordance with the Contract Documents.

B. Section Includes:
   1. Concrete Mortar
   2. Grout
   3. Dry-pack Mortar
   4. Non-shrink Grout
   5. Epoxy grout
   6. Non-shrink epoxy grout

C. Refer to the applicable Sections of Division 03 – Concrete.

C1181	Compressive Creep of Chemical-Resistant Polymer Machinery Grouts

1.03 SUBMITTALS

A. Furnish submittals in accordance with Section 01 3300 – Submittal Procedures.

B. Grout: Submit manufacturer's Literature and certified test data prior to installation of any grout mixes.

1.04 DELIVERY, STORAGE, AND HANDLING

A. All materials shall be delivered to the jobsite in their original, unopened packages or containers, clearly labeled with the manufacturer's product identification and printed instructions.

B. All materials shall be stored in a cool dry place and in accordance with the manufacturer's recommendations.

C. All materials shall be handled in accordance with the manufacturer's instructions.

1.05 PROJECT/SITE CONDITIONS

A. Refer to manufacturer's literature or contact the manufacturer for any special physical or environmental limitations that may be required for use of products.

1.06 WARRANTIES

A. Non-shrink Grout: The manufacturer shall warranty that the non-shrink grout will never go below its initial placement volume when tested in accordance with ASTM C1107.

B. Non-shrink Epoxy Grout: The manufacturer shall warranty that the non-shrink epoxy grout will show negligible shrinkage or expansion when tested in accordance with ASTM C531.

PART 2 - PRODUCTS

2.01 MATERIALS

A. Concrete Mortar:
   1. General: Consist of concrete mixture with coarse aggregate removed and water quantity adjusted as required.
   2. At Exposed Concrete Surfaces Not to Be Painted or Submerged in Water: White Cement.

B. Grout: Consist of mixture of Portland cement and sand.

C. Dry-pack:
   1. Mortar consists of mixture of Portland cement and sand.
   2. Hydraulic Cement Manufacturers
      a. Aqua Plug
      b. Unitex Hydraulic Cement
      c. Thoro Water Plug

D. Non-shrink Grout:
   1. Manufacturers: One of the following or ENGINEER-approved equal:
      a. Five Star Products, Inc., Fairfield, CT, Five Star Grout.
      b. Master Builders, Inc., Cleveland, OH, Masterflow 928.
      c. L&M Construction Chemicals, Inc., Omaha, NE, CRYSTEX
   2. Non-shrink grout shall be a proportioned and prepackaged cement-based mixture. It shall contain no metallic particles such as aluminum powder and no metallic aggregate such as iron filings. It shall require only the addition of potable water.
   3. Potable water for pre-soaking, mixing, and curing shall be clean and free of oils, acids, alkalis, organics, and any other deleterious matter.
   4. Bleeding: Non-shrink grout shall be free from the emergence of mixing water from within or the presence of water on its surface.
   5. Non-shrink grout shall be in accordance with ASTM C1107.
   6. Consistency: Non-shrink grout shall remain at a minimum flowable consistency for at least 45 minutes after mixing at 45°F to 90°F when tested in accordance with ASTM C230. If at a fluid consistency, it shall be verified in accordance with ASTM C939.
   7. Dimensional Stability (height change): Non-shrink grout shall be in accordance with ASTM C1107, volume-adjusting Grade B or C at 45°F to 90°F. It shall show 90 percent or greater bearing area under bases or baseplates.
   8. Compressive Strength: Non-shrink grout shall show minimum compressive strengths at 45°F to 90°F in accordance with ASTM C1107 for various periods from the time of placement, including 5,000 pounds per square inch at 28 days when tested in accordance with ASTM C109 as modified by C1107.

E. Epoxy Grout:
   1. Consist of mixture of epoxy and sand.
   2. Sand: Clean, bagged, graded, and kiln dried silica sand.

F. Non-shrink Epoxy Grout:
   1. Manufacturers: One of the following or equal:
      a. Five Star Products, Inc., Fairfield, CT, Five Star Epoxy Grout.
      b. Master Builders, Inc., Cleveland, OH, Masterflow 648 CP Plus.
      c. L&M Construction Chemicals, Inc., Omaha, NE, EPOGROUT.

2. Non-shrink epoxy grout shall be a 100-percent-solids, pre-measured, prepackaged system containing a two-component thermosetting epoxy resin and inert aggregate
3. Consistency: Non-shrink epoxy grout shall maintain a flowable consistency for at least 45 minutes at 70°F.
4. Dimensional Stability (height change):
   a. Non-shrink epoxy grout shall have negligible shrinkage or expansion (less than 0.0006 in/in) when tested in accordance with ASTM C531.
5. Compressive Strength: Non-shrink epoxy grout shall show a minimum compressive strength of 10,000 pounds per square inch at 24 hours and 14,000 pounds per square inch at 7 days when tested in accordance with ASTM C579, Method B.
6. Compressive Creep: The compressive creep for non-shrink epoxy grout shall not exceed 0.0027 in/in when tested under a 400 pounds per square inch constant load at 140 degrees Fahrenheit in accordance with ASTM C1181.
7. Thermal Capability: The coefficient of thermal expansion for non-shrink epoxy grout shall not exceed 0.000018 inches per inch per degree Fahrenheit when tested under ASTM C531, Method B.

2.02 MIXES

A. Concrete Mortar Mix:
   1. Use water-cement ratio that is no more than that specified for concrete being repaired.
   2. At Exposed Concrete Surfaces Not to Be Painted or Submerged in Water: Use sufficient white cement to make color of finished patch match that of surrounding concrete.

B. Grout Mix:
   1. For Concrete Repair: Mix in same proportions used for concrete being repaired, with only sufficient water to give required consistency for spreading.
   2. For Spreading over the Surfaces of Construction or Cold Joints: Mix with no more water used than allowed by water-cement ratio specified for concrete.
   3. For Other Applications: Mix in proportions by weight of one part cement to four parts of concrete sand.

C. Dry-pack Mortar and Hydraulic Cement Mix: Use only enough water so that resulting mortar will crumble to touch after being formed into a ball by hand.

D. Non-shrink Grout: Mix in accordance with manufacturer's installation instructions such that resulting mix has fluid or flowable consistency and is suitable for placing by pouring.

E. Epoxy grout: Mix in accordance with manufacturer's installation instructions for mixing.

F. Non-shrink Epoxy Grout: Mix in accordance with manufacturer's installation instructions.

PART 3 - EXECUTION

3.01 EXAMINATION

A. Inspect concrete surfaces to receive grout or mortar and verify that they are free of ice, frost, dirt, grease, oil, curing compounds, paints, impregnations and all loose material or foreign matter likely to affect the bond or performance of grout or mortar.

B. Inspect baseplate and anchor systems for rust, oil, and other deleterious substances that may affect the bond or performance of grout.

C. Confirm that newly placed concrete has been cured sufficiently to attain its design strength and limit further shrinkage.

D. Verify that temperature of cementitious or epoxy grout does not exceed manufacturer's recommendations.

3.02 PREPARATION

A. Surface Preparation:
   1. Roughen all concrete surfaces by heavy sandblasting, chipping, or other mechanical means to assure bond. Loose or broken concrete shall be removed.
   2. All grease, oil, dirt, curing compounds, laitance, and other deleterious materials that may affect bond that were identified in the inspection process shall be completely removed from concrete and bottoms of baseplates. All metal surfaces should have a 2- to 3-mil peak-to-valley profile for epoxy grouts.
   3. For cementitious mortars and grouts, concrete surfaces shall be saturated surface dry. Any standing water shall be removed prior to placing grouts.
   4. For epoxy grouts, do not wet concrete surfaces with water. Instead, where required, wet surfaces with epoxy for horizontal work or epoxy gel for vertical or overhead work prior to placing epoxy grouts.

B. Forms and Headboxes for Grouts (Cementitious or Epoxy):
   1. Forms for grouts shall be built of material with adequate strength to withstand the placement of grouts.
   2. Forms must be rigid and liquid tight. All cracks and joints shall be caulked with an elastomeric sealant. All forms shall be lined with polyethylene for easy grout release. Forms carefully waxed with two coats of heavy-duty paste wax shall also be acceptable.
   3. Forms shall be 4 to 6 inches higher than the baseplate on one side of the baseplate configuration when using head pressure for placement.
   4. A sufficient number of headboxes shall be built to facilitate placement of grouts.
   5. Air relief holes a minimum 1/8 inch in diameter shall be provided when required by a baseplate configuration to avoid entrapping air underneath.

3.03 APPLICATION

A. Cement Mortar and Grout:
   1. For Defective Concrete Repair:
      a. Filling: Filling of voids around items through the concrete.
      b. Grout Spreading: Spread over construction joints, cold joints, and similar type items.
   2. Concrete Surfaces: Apply epoxy bonding agent to clean, roughened, and dry surfaces before placing mortar or grout.
   3. Placing:
      a. Exercise particular care in placing Portland cement mortar or grout since they are both required to furnish structural strength or impermeable water seal or both.
      b. Do not use cement mortar or grout that has not been placed within 30 minutes after mixing.

B. Epoxy Grout:
   1. Apply in accordance with manufacturer's installation instructions.
   2. Use where specified herein or where indicated on the Drawings.

3.04 PLACEMENT

A. The CONTRACTOR shall arrange to have a grout manufacturer's representative present for a preconstruction meeting and during the initial grout placement. Grout shall only be installed after the final equipment alignment is correct and accepted by the ENGINEER.
   1. Grouts shall be mixed in accordance with the manufacturer's recommendations.

2. A mortar mixer with moving paddles shall be used for mixing grouts. For cementitious grouts, pre-wet the mixer and empty out excess water before beginning mixing.
3. Cementitious Grouts:
   a. Non-shrink cementitious grout shall be added to a pre-measured amount of water that does not exceed the manufacturer's maximum recommended water content.
   b. Mix cementitious grouts per manufacturer's instructions for uniform consistency.
   c. Grouts may be dry packed, flowed, or pumped into place. All baseplate grouting shall take place from one side of a baseplate to the other to avoid trapping air. Do not overwork grouts.
   d. Do not retemper grout by adding more water after stiffening.
   e. Hydrostatic head pressure shall be maintained by keeping the level of the grout in the headbox above the bottom of the baseplate. The headbox should be filled to maximum level and the grout worked down to top of baseplate.
4. Epoxy Grouts:
   a. Epoxy grouts shall be mixed in complete units. Do not vary the ratio if components or add solvent to change the consistency of the mix.
   b. Pour the hardener into the resin and mix for at least one minute and until each mixture is uniform in color. Pour the chemical components into the mortar mixer wheelbarrow and add the aggregate. Mix until aggregate is uniformly wetted. Overmixing will cause air entrapment in the mix.
   c. All epoxy grout shall be flowed into place using a headbox. All grouting shall take place from one side of a baseplate to the other in a continuous flow to avoid trapping air.
   d. Hydrostatic head pressure shall be maintained by keeping the level of grout in headboxes above the bottom of baseplates. Headboxes shall be filled to the maximum level and grout worked down to the bottom of the baseplates.
   e. Epoxy grouts shall not be cut back after setting. The final level of grout will be as installed with all chamfer edges built into the formwork.

3.05 CURING

A. Cementitious Grouts:
   1. Grouts must be cut back to the lower edge of baseplates after reaching initial set. Provide a 45 degree angle cut back.
   2. Clean equipment and tools as recommended by the grout manufacturer.
   3. Cure Grouts in accordance with the manufacturer's specifications and recommendations. Keep grout moist for a minimum of 3 days. The method needed to protect grouts will depend on temperature, humidity, and wind. Wet burlap, a soaker hose, sun shading, ponding and in extreme conditions, a combination of methods shall be employed.
   4. Grouts shall be maintained above 40°F until they have attained a compressive strength of 3,000 pounds per square inch or above 70°F for a minimum of 24 hours to avoid damage from subsequent freezing.

B. Epoxy Grouts:
   1. Cure grouts in accordance with manufacturer's specifications and recommendations. Do not wet cure epoxy grouts.
   2. Consult the manufacturer for appropriate cure schedule. In no case should any surface in contact with grout be allowed to fall below 50°F for a minimum of 48 hours after placement.
   3. Equipment and tools shall be cleaned immediately with a strong liquid detergent and water solution before grout hardens.

3.06 FIELD QUALITY CONTROL

A. Non-shrink grouts shall be tested for 84 hour compressive strength in accordance with ASTM C109.

B. Non-shrink grouts shall be tested for 24 hour compressive strength in accordance with ASTM C579 (Method B).

END OF SECTION

SECTION 03 6423
EPOXY INJECTION GROUTING

PART 1 – GENERAL

1.01 SUMMARY

A. Section Includes: Epoxy injection system.

1.02 REFERENCES

A. American Society for Testing and Materials (ASTM):
   - D638 Tensile Properties of Plastics.
   - D695 Compressive Properties of Rigid Plastics.
   - D790 Flexural Properties of Unreinforced and Reinforced Plastics and Electrical Insulating Materials

1.03 SUBMITTALS

A. Furnish submittals in accordance with Section 01 3300 – Submittal Procedures.

B. Product Data: Submit manufacturer's data completely describing epoxy injection system materials.

C. Quality Control Submittals:
   1. Certificates of Compliance
   2. Manufacturer's Instructions

PART 2 – PRODUCTS

2.01 MATERIALS

A. Manufacturers: One of the following or ENGINEER-approved equal:
   1. Master Builders, Inc., Concressive Standard LVI
   2. Sika Chemical Corp.'s, Sikadur 35, Hi-Mod LV

B. Epoxy: Provide epoxy materials that are new and use them within shelf life limitations set forth by manufacturer. Water-insensitive, 2-part type, low viscosity epoxy adhesive material containing 100 percent solids and meeting or exceeding following characteristics when tested in accordance with standards specified:

Physical Characteristic	**Test Method**	**Required Results**
Tensile Strength	ASTM D638	8,000 pounds per square inch at 14 days and 77°F cure
Flexure Strength	ASTM D790	11,000 pounds per square inch at 14 days and 77°F cure
Compressive Strength	ASTM D695	16,000 pounds per square inch at 24 hours and 77°F cure
Physical Characteristic	Test Method	Required Results
Bond Strength	--	Concrete shall fail before failure of epoxy
Gel Time in 5-Mil Film	--	Four hours maximum at 77°F
Elongation	ASTM D638	1 percent at 14 days and 77°F

2.02 EQUIPMENT

A. Pump Unit:
   1. Furnish unit to be used for injection that is positive displacement type with interlock to provide in-line mixing and metering system for 2-component epoxy.
   2. Furnish pressure hoses and injection nozzle of such design as to allow proper mixing of 2 components of epoxy.
   3. Presence of standby injection unit may be required.

2.03 MIXES

A. Epoxy Injection System Materials:
   1. Mix epoxy in accordance with manufacturer's installation instructions.
   2. Do not use solvents to thin epoxy system materials introduced into cracks or joints.

PART 3 – EXECUTION

3.01 PREPARATION

A. Surface Preparation:
   1. Epoxy Injection System:
      a. General: Before processing, sweep or clean area in vicinity of crack location to receive epoxy and leave in generally clean condition.
      b. Joints to Receive Epoxy: Clean in manner such that joints are free from dirt, laitance, and other loose matter.

3.02 INSTALLATION

A. Install and cure epoxy materials in accordance with manufacturer's installation instructions.

B. Perform and conduct work of this Section in neat orderly manner.

C. Epoxy Injection System:
   1. Apply adequate surface seal to crack or joint to prevent escape of epoxy.
   2. Establish entry points at distance along seal not less than thickness of cracked member.
   3. Force epoxy into crack at first port with sufficient pressure to advance epoxy to adjacent port.
   4. Seal original port and shift entry to port at which epoxy appears.
   5. Continue this manner of port-to-port injection until each joint has been injected for its entire length.
   6. For small amounts, or where excessive grout pressure developed by pump unit might further damage structure, premixed material and hand caulking gun may be used if acceptable to the ENGINEER.
   7. Seal ports, including adjacent locations where epoxy seepage occurs, as necessary to prevent drips or run out

END OF SECTION

SECTION 04 2200 – CONCRETE UNIT MASONRY

PART 1 – GENERAL

1.01 THE REQUIREMENT

A. Provide concrete masonry and other appurtenant work, complete and in place, in accordance with the Contract Documents.

1.02 REFERENCE SPECIFICATIONS, CODES AND STANDARDS

A. Commercial Standards:

ANSI/ASTM	C5 Quicklime for Structural Purposes
ASTM A615	Deformed and Plain Billet-Steel Bars for Concrete Reinforcement
ASTM C90	Load-Bearing Concrete Masonry Units
ASTM C129	Non load bearing Concrete Masonry Units
ASTM C140	Test Methods of Sampling and Testing Concrete Masonry Units
ASTM C144	Aggregate for Masonry Mortar
ASTM C150	Portland Cement
ASTM C207	Hydrated Lime for Masonry Purposes
ASTM C404	Aggregates for Masonry Grout
ASTM E447	Test Methods for Compressive Strength of Masonry Prisms
UBC 21-16	Field Test Specimens for Mortar

1.03 SUBMITTALS

A. Submittals shall be furnished in accordance with Section 01 3300 – Submittal Procedures.

B. Samples:
1. Samples of concrete masonry unit colors with texture ranges indicated for selection of color. Full size samples of the blocks selected shall be submitted for final approval by the ENGINEER after color selection, if requested. If the specified product is a colored and textured unit, the samples shall be colored and textured units.
2. Samples of mortar colors for color selection
3. A 4-foot minimum square free standing sample panel shall be prepared for approval before starting masonry work if required. The panel shall remain at the Site for reference until all masonry work is completed.

C. Documentation:
1. Reports from testing Masonry units. Letter of certification that units meet ASTM standards. Recent test reports on units from independent testing company.
2. Reports from Mortar and Grout testing will be obtained from on-site testing company.

D. Grout and Mortar Mix Design:
1. Proportions for all components
2. Mill Tests for Cement
3. Admixture Certification, include chloride ion content
4. Aggregate Graduation and Certification
5. Lime Certification

1.04 QUALITY ASSURANCE

A. Applicable Standards: Concrete masonry shall conform to the local Building Code, and other applicable codes and standards of governing authorities.

B. All work shall conform to the standard of quality established by the approved free-standing sample panel.

C. Concrete block masonry units and ready mix grout from the job site shall be sampled and tested in accordance with applicable ASTM standards by onsite testing company.

D. Inspection: Whenever required under the provisions of the Building Code, work hereunder will be subject to continuous inspection by a Special Inspector selected by the ENGINEER and approved by the local Building Official having jurisdiction. The Special Inspector will work under the supervision of the ENGINEER.

E. Weather Conditions: Concrete masonry units shall not be placed when air temperature is below 40°F (4°C) and shall be protected against direct exposure to the wind and sun when erected when the ambient air temperature exceeds 100°F (37°C) in the shade with relative humidity less than 50%. Cold weather installation shall be per code and Reference Standards and as approved by the ENGINEER.

F. Product Storage: Cement, lime and other cementitious materials shall be delivered and stored in dry, weather-tight sheds or enclosures, in unbroken bags, barrels, or other approved containers, plainly marked and labeled with the manufacturers' names and brands. Mortar and grout shall be stored and handled in a manner, which will prevent the inclusion of foreign materials and damage, by water or dampness. Masonry units shall be handled with care to avoid chipping and breakage, and shall be stored on wooden pallets. Materials stored on newly constructed floors shall be stacked in such manner that the uniformly-distributed loading does not exceed 50 psf. Masonry materials shall be protected from contact with the earth and exposure to the weather and shall be kept dry and clean until used.

PART 2 – PRODUCTS

2.01 CONCRETE MASONRY UNITS

A. Concrete masonry units shall conform to ASTM C90, Type I, with maximum linear shrinkage of 0.6% from standard to oven-dried condition. Units shall be medium weight units unless indicated otherwise.

B. Concrete masonry units shall be modular size as shown or indicated on the drawings, with split-faces or smooth finish as indicated on the plans. Units shall be integrally-colored or standard unit color with painted exterior as indicated on the drawings with color selections from light and medium color range (white, black, and dark green not included in color range).

C. All bond beam, corner, lintel, sill, and other specially shaped blocks shall be provided where required or necessary. Specially shaped non-structural blocks may be constructed by saw cutting. Color and texture shall match that of adjacent units. No exposed grouted block cells will be allowed. All exposed masonry surfaces of openings and window and door openings such as sills, heads and jambs shall be finish block surfaces, not formed surfaces, unless indicated otherwise. Closed bottom bond beam blocks shall be used at heads and sills.

D. Concrete masonry units hidden from view entirely may be natural color units the same size as other adjacent masonry units.

2.02 MATERIALS

A. Portland Cement shall be Type I or II, low alkali, conforming to ASTM C150. No masonry cement will be allowed.

B. Hydrated lime shall be Type S, conforming to ASTM C207. Pulverized quicklime shall conform to ANSI/ASTM C5, shall pass a No. 20 sieve, and 90% shall pass a No. 50 sieve.

C. Sand shall conform to ASTM C144. Coarse aggregate shall conform to ASTM C404.

D. Water for mixing shall be clear potable water.

E. Reinforcing steel shall be deformed bars conforming to ASTM A615, Grade 60.

F. Any admixtures must be pre-approved prior to usage. See Section 2.04 B.

G. Veneer ties shall be per local governing code and shall be Hot Dip Galvanized per ASTM 153-B2.

H. Horizontal Joint Reinforcement shall be Hot Dip Galvanized ladder-type per ASTM 153-B2

2.03 MORTAR

A. Mortar for concrete block masonry shall be Type S, with a minimum 28-day compressive strength of 1800 psi.

B. Mortar for use with colored masonry units shall have integral color as approved by the ENGINEER.

2.04 GROUT

A. Grout shall have a minimum 28-day compressive strength of 2,000 psi. Where the grout space is less than 4 inches, pea gravel shall be omitted.

B. Admixtures may only be used when approved by the ENGINEER. When it has been approved for use, it shall be used in accordance with the manufacturer's published recommendations for the grout.

PART 3 – EXECUTION

3.01 GENERAL

A. Measurements for mortar and grout shall be accurately made. Mortar proportions shall be accurately controlled and maintained.

B. Work shall be performed in accordance with the provisions of the applicable code for reinforced concrete hollow-unit masonry.

C. Set or embed all anchors, bolts, reglets, sleeves, conduits, and other items as required.

D. All block cutting shall be by machine.

E. Reinforcing steel shall be cleaned of all loose rust and scale, and all oil, dirt, paint, laitance, or other substances, which may be detrimental to or reduce bonding of the steel and concrete.

F. Immediately before starting work, the concrete upon which the masonry will be laid shall be cleaned with water under pressure.

G. Full mortar bed for first course shall be provided.

H. Units shall be shoved tightly against adjacent units to assure good mortar bond.

I. All equipment for mixing and transporting the mortar and grout shall be clean and free from set mortar, dirt, or other foreign matter.

3.02 MIXING

A. Mortar shall be mixed according to ASTM C270. After all ingredients are in the mixer, they shall be mechanically mixed for not less than 5 minutes. Re-tempering shall be done on the mortar board by adding water within a basin formed within the mortar, and the mortar reworked into the water. Mortar, which is not used within 2-1/2 hours, shall be discarded per ASTM requirements.

3.03 ERECTION OF CONCRETE BLOCK MASONRY

A. Masonry work shall be erected in-plane, plumb, level, straight, and true to dimensions and executed in accordance with acceptable practices of the trade.

B. Unless indicated otherwise, masonry shall be laid up in straight uniform courses with running bond.

C. All masonry shall be erected to preserve the unobstructed vertical continuity of the cells measuring not less than 3-inch x 3-inch inch cross-section. Cross webs shall be full bedded in mortar, to prevent grout leakage. All head (or end) joints shall be solidly filled with mortar for a distance in from the face of the wall or unit not less than the thickness of the longitudinal face shells.

3.04 JOINTS

A. Vertical and horizontal joints shall be uniform and approximately 3/8-inch wide. Exterior joints and interior exposed block joints shall be concave-tooled to form dense surface. Special care shall be used in tooling joints so as to match existing construction. Interior or exterior non-exposed masonry and masonry behind plaster shall have flush joints.

3.05 CLEANOUTS

A. Cleanout openings shall be provided at the bottoms of all cells to be filled at each lift or pour of grout, where such lift or pour is over 4-feet in height. Any overhanging mortar larger than ½-inch or other obstructions or debris shall be removed from the insides of such cells. The cleanouts shall be sealed before grouting and after inspection. Cleanout openings shall match the finished wall in exposed masonry.

3.06 REINFORCEMENT

A. Bond beam blocks shall be used where horizontal reinforcing steel is embedded.

B. Knock-out openings shall have no steel or joint reinforcing running through the opening. Head, jambs, and sill blocks shall be used to provide an even finish surface to install window when blocks are removed. Joints at head, jambs and sills shall be stacked and continuous.

C. Vertical reinforcement shall be held in position at top and bottom and at intervals as defined on the drawings.

D. Horizontal joint reinforcing to 16” o.c. in all masonry walls.

E. Veneer ties shall be provided per Building Code and trade standards where veneered surfaces are indicated and shall be spaced no less than 16” o.c. each way.

3.07 GROUTING

A. All cells and bond beam containing reinforcement shall be filled solidly with grout. Grouting shall not be started until the wall has cured for 24 hours.

B. All grout shall be consolidated at time of pouring by vibrating. Where the grouting operation has been stopped for one hour or longer, horizontal construction joints shall be formed by stopping the grout pour 1½ inches below the top of the uppermost unit.

3.08 PROTECTION

A. Wall surfaces shall be protected from droppings of mortar or grout during construction.

3.09 FINISHING AND CLEANING

A. Masonry shall not be wet-finished unless exposed to extreme hot weather or hot wind and then only by using a nozzle-regulated fog spray sufficient only to dampen the face but not of such quantity to cause water to flow down over the masonry.

B. Finish masonry shall be cleaned and pointed in a manner satisfactory to the ENGINEER, based upon the approved sample panel.

C. All interior and exterior colored masonry work exposed to view shall be cleaned to remove all stains and other imperfections.

END OF SECTION

SECTION 05 1213 – STRUCTURAL STEEL

PART 1 – GENERAL

1.01 THE REQUIREMENT

A. Provide structural steel for building construction including sub-framing units, which are part of the general framing system. Include anchors, bases, bearing plates, bracing, lintels when part of structural framing and detail fittings.

B. Modify existing structural steel systems and components to accommodate remodeling and new work.

1.02 SUBMITTALS

A. Submittals shall be furnished in accordance with Section 01 3300 – Submittal Procedures.

1.03 QUALITY ASSURANCE

A. Comply with Governing Codes and Regulations. Provide products of acceptable manufacturers. Use experienced installers. Deliver, handle and store materials in accordance with manufacturer's instructions.

PART 2 – PRODUCTS

2.01 MATERIALS

A. Steel shapes plates and bars: ASTM A36 or ASTM A572, Grade 50

B. Steel pipe: ASTM A53

C. Anchor bolts: ASTM A307

D. High strength threaded fasteners: ASTM A325

E. Non-metallic shrinkage resistant grout; Euclid Euco NS, L&M Crystex, Sonneborn Sonnegrout or ENGINEER-approved equal. Compressive strength suited for Project Requirements.

F. Shop finish for structural steel in accordance to these Specifications.

G. Galvanized lintels: Hot dip galvanized ASTM A123

H. Welding: AWS D1.1

PART 3 – EXECUTION

3.01 INSTALLATION

A. Comply with AISC Codes and Specifications and with AWS "Structural Welding Code."

B. Employ a registered engineer to check elevations and plumb and level tolerances; certify that installed work is within AISC Standards. Testing/inspection agency may be employed to inspect welded and bolted connections.

C. Architecturally Exposed Steel: Fabricate with special care using materials carefully selected for best appearance. Store materials off ground and keep clean. Cut, fit, and assemble work with surfaces smooth, square, and with complete contact at joints. Set all cambers up. Weld all work continuously; grind smooth and flush to make seams invisible after priming. Prepare surfaces to comply with SSPC-SP6; apply prime coat within 24 hours after cleaning.

D. Touch-up field welds and abraded areas in accordance with these Specifications.

E. Provide all necessary bolt, fasteners, anchors, etc. to install or construct this scope of the WORK.

END OF SECTION

SECTION 05 3123 – METAL ROOF DECKING

PART 1 – GENERAL

1.01 DESCRIPTION

A. This section describes materials and installation of metal roof decking.

1.02 SUBMITTALS

A. Submit shop drawings in accordance with Section 01 3300 – Submittal Procedures.

B. Submit complete manufacturer's specifications and installation instructions in advance of fabrication. Include manufacturer's certification showing compliance with these specifications. Indicate on transmittal form to OWNER's Representative that a copy of each instruction has been distributed to the installer.

C. Submit detailed shop drawings showing layout of roof deck panels, anchorage details, and every condition requiring closure panels, supplementary framing, special jointing, or other accessories.

D. Submit current International Conference of Building Officials (ICBO) approval for deck diaphragm shear values for deck welds.

E. Fabrication: Prior to erection of metal decking, deliver to the OWNER's Representative a letter signed by an official of the manufacturer's firm certifying that the metal decking delivered for this WORK was fabricated in accordance with these specifications.

F. Erection: Upon completion of erection, deliver of the OWNER's Representative a letter signed by an official of the erector's firm certifying that metal decking installed in this WORK was installed in accordance with these specifications.

1.03 SUBMITTALS

A. Comply with the current editions of codes and regulations including current editions or revisions and supplements of the following reference standards: ICBO – Latest Edition.

AISI "Specification for the Design of Cold – Formed Steel Structural Members."

AWS "Code for the Welding in Building Construction." SDI "Steel Roof Deck Design Manual."

B. Performance Requirements:

1. Compute the properties of metal floor deck sections on the basis of the effective design width as limited by the provisions of the AISI specifications. Provide not less than the specified deck section properties shown including section modules and moment of inertia per foot of width.
2. Allowable Deflection: Design and fabricate deck for a maximum deflection of 1/360 of the clear span under the total uniform dead and live load.
3. Uplift Loading: Install and anchor roof deck units to resist a gross uplift loading of 30 psf (less dead load for roof areas).

C. Qualifications of Suppliers and Personnel: The erector shall have at least five years' continuous experience in the erection of metal decking.

D. Qualifications of Welding:

1. Quality welding processes and welding operators in accordance with AWS B3.0 "Welding Procedure and Performance Qualification."

2. Decking welded in place is subject to inspection and testing. Expense of removing and replacing any portion of decking for testing purposes will be borne by the Owner if welds are found to be satisfactory. If any welds are found defective, the Contractor shall be responsible for the expense of testing and removal and replacing that portion of decking to the satisfaction of the Owner's Representative.

PART 2 - PRODUCTS

2.01 MATERIALS

A. Form metal roof decking from steel conforming to ASTM A653 SS, Grade 50 min with G90.

B. Decking shall be galvanized.

C. Metal roof decking shall conform to the following properties:

Gauge:	As Shown (20 Min.)
Moment of Inertia:	0.219 in^4
Section Modulus:	+ 0.23 in^3 - 0.237 in^3
Weight per Square Foot:	2.3 (lbs.)
Depth of Corrugations:	1-1/2 inches

2.02 FABRICATION

A. Form deck units in lengths to span three or more support spacing with flush, telescoped, or nested 2-inch end laps and nesting side laps, unless otherwise shown or specified. Provide deck configurations complying with SDI "Basic Design Specifications."

B. Fabricate metal closure strips of painted sheet steel of the same quality as the deck units: not less than nominal 0.0359 inch (20-gauge) thick before coating. Form to the configuration required to provide tight-fitting closures at open ends and sides of decking.

C. Provide decking accessories, including welding washers, anchor washes with ear clips, closures, and filler strips. Provide closure plates and other attachments at openings through decking for ducts, shafts, and other penetrations. Where decking changes directions, and at perimeter, closures shall be of 18-gauge steel unless otherwise indicated.

D. Reinforce decking at openings per manufacturer's requirements.

PART 3 – EXECUTION

3.01 PRODUCT DELIVERY STORAGE AND HANDLING

A. When delivered to the jobsite, store the metal decking off the ground and cover to protect material from the elements. Slope to permit drainage.

B. In the event of damage, immediately make repairs and replacements. Replacements and repairs shall be at CONTRACTOR's expense.

3.02 INSTALLATION OF METAL ROOF DECKING

A. Place metal roof decking with edges up and flutes at right angles to supports. End laps shall always occur over supports, with a minimum end lap of 2 inches for welded attachment. Begin at corner of buildings to maintain alignment. Lap sheets one-half flute at side laps. Attach sheets to top chord of supports by plug welding through special welding washers. Fasten each end lap in the trough of the flutes at each corner (through four thickness of metal) and at center of end lap. Limit the spacing between adjacent points of attachment to 18 inches maximum over all supports. Attach placed sheets at the end of the workday. Metal connections shall be as indicated on plans.

3.03 PAINTING

A. For touch-up on decking, wire brush, clean, and paint scarred areas, welds, and rust spots on top and bottom surfaces of decking units and supporting steel members.

3.04 PROTECTION

A. Do not use deck units for storage or working platforms until permanently secured in position.

B. Assure that construction loads do not exceed carrying capacity of deck.

END OF SECTION

SECTION 05 5000 – METAL FABRICATIONS

PART 1 - GENERAL

1.01 THE REQUIREMENT

A. Provide all labor, materials, bolts, fasteners, equipment, and service necessary for fabrication and erection of structural steel and aluminum and for fabrication and installation of miscellaneous non-ferrous metals in accordance with the Contract Documents and not specifically included under other Sections of these Specifications.
   1. Erection
   2. Shop and Erection Drawings
   3. Shop Painting
   4. Galvanizing
   5. Aluminum Work Protection
   6. Cleaning Aluminum Work
   7. Miscellaneous Items
   8. Loose Lintels
   9. Sleeves and Inserts
   10. Aluminum Pipe Railing
   11. Plate Covers and Frames
   12. Guard Chains
   13. Lifting Hooks
   14. Cast Iron Wheel Guard
   15. Cast Aluminum Nosings
   16. Floor Hatches and Frames
   17. Access Doors

B. American Iron and Steel (AIS) requirement applies to this section. All iron and steel products used in this project must be produced in the United States.

1.02 REFERENCES

A. All work under this Section shall be governed by:
   1. Specifications for the design, fabrication, and erection of structural steel for buildings – American Institute of Steel Construction, current edition.
   2. Aluminum Construction Manual, Section 1, Specifications for Aluminum Structures – The Aluminum Association.
   3. All welding shall conform to the latest code of the American Welding Society.
   4. ANSI B94.12
   5. ASTM A12, A153, A384, A593 and A780
   6. ASTM A48
   7. ASTM A276
   8. ASTM A325
   9. ASTM F593, 294
   10. Federal Specification FF-S-325
   11. Federal Specification TT-V-51F
   12. SSPC SP-1, SP-2, SP3, SP-7

1.03 SUBMITTALS

A. Submittals shall be furnished in accordance with Section 01 3300 – Submittal Procedures.

B. As required by the Specifications, submit for review completely detailed and certified shop and erection drawings of the miscellaneous metal work. All Coatings or other protection

against corrosion to be applied at the shop or in the field shall be indicated on these drawings. The shop drawings for aluminum work shall show the alloys and tempers to be used, and the finish, if any to be applied.

C. Shop drawings, giving complete information necessary for fabrication, layout and installation of metal work shall be submitted to the ENGINEER for review prior to fabrication.

D. Preparation of shop drawings for fabricated metal items shall be coordinated with the manufacturers, of various equipment in order to comply with details, locations, openings, and arrangements required by the manufacturers, of various equipment in order to comply with details, locations, openings, and arrangements, required by the manufacturers.

E. Field measurements shall be made to verify all dimensions in the field, which may affect installation of work before shop drawings are made and/or fabrication is performed.

1.04 QUALITY ASSURANCE

A. The design, detail and workmanship of steel plates and structural steel shall conform to the AISC Specification for the Design, Fabrication and Erection of Structural Steel for Buildings.

B. Where welding is permitted or required, it shall conform to the current requirements of the American Welding Society for the type of work in question.

C. Aluminum work shall be fabricated in a shop where the quality of work is in accordance with the highest standards for work of this type. All work shall be executed by mechanics skilled in the fabrication of aluminum, and shall be true to detail with sharp, clean profiles, fitted with proper joints and intersections and with finishes as specified.

D. All miscellaneous metal work shall be formed to shape and size with sharp lines and angles. Shearing and punching shall leave clean true lines and surfaces.

1.05 RESPONSIBILITY FOR DIMENSIONS

A. The general design and dimensions of the miscellaneous metal work are indicated on the Drawings, correctness of the details and dimensions of the finished articles is required. Verification of conditions at the job before fabrication and coordination of the work with that of all other trades to prevent interference.

PART 2 - PRODUCTS

2.01 MATERIALS

A. Steel plated and structural steel shapes shall conform to ASTM Standard Specification for Structural Steel, Designation A36.

B. Sheet steel shall be cold rolled or hot rolled carbon sheet steel conforming to ASTM Standard Specification for Steel, Carbon, Cold Rolled Sheet, Commercial Quality, Designation A36 or AST ASTM Standard Specification for Steel, Carbon (0.15 maximum, percent), Hot Rolled Sheet and Strip, Commercial Quality, Designation A569, as appropriate.

C. Steel pipe shall conform to ASTM Standard Specifications for Pipe, Steel, Black and Hot Dipped, Zinc Coated, Welded and Seamless, Designation A53.

D. Stainless steel shall be Type 304 unless otherwise indicated or specified in the Contract Documents.

E. Aluminum work shall be fabricated of plates, rolled, or extruded shapes, sheets or casting conforming (unless otherwise permitted or indicated) to the following alloy and temper designations of the Aluminum Association:

1. Structural rolled or extruded shapes 6061-T6.
2. Extruded shapes 6063-T5.
3. Plates 6061-T6.
4. Gratings (bearing bars) 6061-T6 (crimp bars) 6063-T6.
5. Castings 214.
6. Sheets 3003-F.
7. Bolts and nuts 2024-T4.
8. Pipe Railing 6063-T6.

2.02 STEEL

A. Structural steel shall conform to the requirements of ASTM A36. Structural tubing, where used, shall conform to the requirements of ASTM A500, Grade B, and the ends of the tubing shall be properly sealed to protect the internal surfaces. Steel anchor bolts shall be ASTM A36 hot rolled threaded rod or bar stock, except where stainless steel is indicated on the Drawings.

B. Structural steel members as required shall conform to ASTM Standard shapes.

C. Base and bearing plates shall be provided where necessary to provide maximum bearing value of not more than 200 psi on solid concrete masonry units not more than 750 psi on concrete and shall be grouted in place.

D. Steel lintels shall be provided for all square head openings in masonry where shown and where other lintels are not indicated on the Drawings. Lengths of bearing at each end of lintels shall be not less than 1 inch per foot of span, but in no case less than 8 inches shall be increased or the lintels shall be fitted with bearing plates as required to provide unit pressures in pounds per square inch of not more than 200 on solid concrete masonry units and 625 on concrete. All new steel lintels shall be shop primed and ready to receive coatings as specified under Section 09 9100 – Painting. Finish coats are specified in Section 09 9700 – Special Coatings.

2.03 GALVANIZING

A. Items of miscellaneous iron work and steel work indicated on the Drawings or specified to be galvanized shall be zinc coated by the hot dip process in conformity with ASTM Standard Specification for Zinc (hot galvanized) Coatings on Products Fabricated from Rolled, Pressed, and Forged Steel Shapes, Plates, Bars, and Strip, Designation A123-78; or ASTM Standard Specifications for Zinc Coating (hot-dip) on Iron and Steel Hardware, Designation A153-78, as appropriate. Galvanizing is specified under Article 3.04, "Hot-Dip Galvanizing."

2.04 ALUMINUM

A. All structural and miscellaneous aluminum shall be Alloy 6061 (Alloy 6063 for extrusions), Temper T6, unless otherwise noted, indicated, or accepted by the OWNER. Where welding is necessary in fabrication, is shall be done in conformance with Section 7 "Welded Construction" of Specification for Aluminum Structures, referenced hereinbefore.

2.05 ALUMINUM WORK PROTECTION

A. Aluminum surfaces which after erection would otherwise be in contact with concrete or brick masonry or with mortar, shall be protected from contact therewith by a coat of bitumastic super service black manufactured by the Koppers Company, Inc. Pittsburgh, PA; Tarmastic 100 manufactured by Porter Coating Division, Porter Paint Company, North Kansas City, MO; or ENGINEER-approved equal. Areas where the paint has been damaged by abrasion or other cause shall be cleaned and repainted as directed so that the aluminum will have a complete protective paint film when brought into contact with the material against which it is being protected. Before application of coating, the surface shall

be cleaned of all dirt, heavy deposits of grease or oil and other foreign substances and shall be immersed in or swabbed with an acceptable solvent. Next the surfaces shall be rinsed with clear water and thoroughly dried.

B. Attention of the Specifications in regard to protection against electrolysis where aluminum is to be used in conjunction with dissimilar metals is required.

C. Where a shop coating of methacrylate lacquer has been specified on aluminum work to protect the surface from stain, the protective coating of lacquer worn off during handling or erection shall be replaced in the field by a new coating of lacquer of the same type.

D. During construction, care shall be taken to prevent damage to the aluminum work from splashing or the accumulation of paint, concrete, mortar, or other similar materials.

2.06 STAINLESS STEEL

A. Stainless steel shapes shall be ANSI Type 304 or 316 in accordance with ASTM A276. Miscellaneous bar stock products such as pipe straps shall be 300 Series stainless steel. Anchor bolts, nuts and washers shall be ANSI Series 300 stainless steel.

2.07 FASTENERS

A. Bolts, Nuts and Washers:
   1. Structural bolts shall be ANSI Type 300 Series stainless steel in accordance with ASTM F593, with ASTM F594 nuts. All bolts shall have hexagonal heads.
   2. Anchors and bolts including nuts and washers shall be provided where necessary for securing the work in place. Sizes, types and spacings of anchors and bolts not indicated or specified otherwise shall be as necessary for their purposes. Anchor bolts and anchors for the erection of structural steel shall be shall be stainless steel Type 316.
   3. Bolts and nuts shall be installed with anti-seize per Loctite, or ENGINEER-approved equal (or thread locker to be confirmed with WWTP Operations).

B. Expansion Anchors (In Concrete):
   1. Expansion anchors shall be of three (3) types:
      a. Stainless steel wedge type.
      b. Self-drilling plated type with stainless steel bolt and stainless-steel washer.
      c. Type of expansion anchor desired shall be noted on Drawings.
   2. Stainless steel wedge type anchors shall be ITW Ramset/Red Head or ENGINEER-approved equal of Type 316 stainless steel. Anchors shall meet or exceed latest Government GSA Federal Specifications FF-S-325, Group II, Type 4, Class 1. Anchor shall be used with 300 series stainless steel bolt and washer.
   3. Self-drilling plated anchors shall be ITW Ramset/Red Head of ENGINEER-approved equal. Anchors shall meet or exceed latest Government GSA Federal Specification FF-S-325, Group III, Type 1. Self-drilling anchors shall be electro-deposited zinc plated and chromate dipped, to meet or exceed the requirements of the latest Federal Specification QQ-Z-325, Type II, Class 3. Cutting teeth shall have minimum hardness of 82 Rockwell A scale.
   4. Steel expansion anchors shall be installed in accordance with manufacturer's recommendations.
   5. Self-drilling expansion anchors shall be installed in accordance with manufacturer's recommendations. To insure full development strength, all self-drilling expansion anchors shall be expanded over the plug in the final set, by using a bolt screwed into the female threads and impacted by hand with a suitable hammer. The final set shall not be accomplished by using the drilling tool.

6. After installation, pull-out tests by the anchor manufacturer's representative may be requested by the ENGINEER. If so, the ENGINEER will specify the number and location of the tests.

2.08 MISCELLANEOUS ITEMS

A. Items of miscellaneous metal work not particularly specified hereinafter shall be of the shape, size, materials, and details indicated on the Drawings or suitable for the purpose intended.

2.09 LOOSE LINTELS

A. Furnish all loose lintels as indicated on the Drawings or required by the Work. The loose lintels shall be fabricated from structural steel shapes and plates. All loose lintels shall be shop primed and ready to receive coatings as specified in the applicable Sections of Division 09 – Finishes.

2.10 SLEEVES AND INSERTS

A. Attention is directed to the requirements of the Specifications regarding sleeves and inserts.

2.11 ALUMINUM PIPE RAILING

A. The aluminum pipe railing shall be the product of company normally engaged in the manufacture of pipe railing. Railing shall be shop assembled in lengths not to exceed 24 feet for field erection.

B. Handrails and stair rails shall be designed to withstand a 200-pound concentrated load applied in any direction at any point on the top rail. Handrails and stair rails shall also be designed to withstand a load of 50 pounds per foot applied horizontally to the top rail. The 200-pound load will not be applied simultaneously with the 50-pounds-per-foot load. In addition, the handrails shall be designed to withstand a load of 100 pounds per foot horizontal load. The 100-pounds-per-foot vertical load does not apply to stair rails.

C. The manufacturer shall submit calculations to the ENGINEER for approval. Testing of base castings or base extrusions by an independent lab or manufacturer’s lab (if manufacturer’s lab meets the requirements of the Aluminum Association) will be an acceptable substitute for calculations. Calculations will be required for approval of all other design aspects.

D. Post spacing shall be a maximum of 8 feet 0 inches, unless noted otherwise. Posts and railings shall be a minimum of 1½ inches Schedule 40 aluminum pipe alloy 6063-T6, ASTM B429 or ASTM B221. The handrail manufacturer shall show that their posts are of adequate strength, the manufacturer may reduce the post spacing or add reinforcing dowels or may do both in order to meeting loading requirements.

E. The handrail shall be made of pipes joined together with component fittings. Samples of all components, bases, toe plate and pipe must be submitted for approval. Components that are glued at the joints will not be acceptable. Handrail and components shall be Kee Clamp, Inc., Golden Railings, Speed-Rail, or ENGINEER-approved equal.

F. Posts shall not interrupt the continuation of the top rail at any point along the railing, including corners and end terminators.

G. The midrail at a corner return shall be able to withstand a 200-pound load without loosening.

H. Expansion bolts shall be spaced 10 diameters apart and 5-diameter edge distance for not reduction in pullout strength. A safety factor of four shall be used on expansion bolt pullout values published by the manufacturer.

I. Toe plate shall conform to OSHA Standards. Toe plate shall be a minimum of 4 inches high and shall be an extrusion that attaches to the posts with clamps, which allow for expansions and contraction between posts. Toe plates shall be set ¼-inch above the walking surface. Toe plates shall be provided on handrails as required by OSHA and/or as shown on Drawings. Toe plates shall be shipped loose in stock lengths with pre-manufactured corners for field installation.

J. Openings in the railing shall be guarded by a self-closing gate. Safety chains shall not be used unless specifically shown on the Drawings.

K. Finish shall be Aluminum Association M10-C22-A41 (215-R1). The pipe shall be plastic wrapped. The plastic wrap is to be removed after erection.

L. Aluminum surfaces in contact with concrete, grout or dissimilar metals will be protected with a coat of bituminous paint, (two (2) coats of Federal Specification TT-V51F Asphalt Varnish), mylar isolators, or other approved material.

2.12 PLATE COVERS AND FRAMES

A. The plate covers and frames shall be the sizes indicated on the Drawings. The frames shall be aluminum angles of the sizes indicated with welded strap anchors for securing the frames in the concrete. The frames shall have mitered corners with welded joints ground smooth where exposed.

B. The covers shall be ¼-inch thick aluminum tread plate having an acceptable nonskid surface and reinforced with aluminum bars welded to the underside of the cover in accordance with the details. Plate covers shall be capable of supporting a uniform superimposed load of 100 psf for the span with a deflection of less than ¼-inch based on allowable fiber stress of 16,000 psi. The covers shall be made to fit neatly and accurately in the frames.

C. Hinged covers shall be furnished with heavy-duty stainless steel, plain bearing hinges with stainless steel pins. The hinges shall be fastened to the covers and frames with stainless steel machine screws. The hinged covers shall be provided with flush lift handles fabricated from ½-inch diameter aluminum rod, alloy 6061-T6511.

D. A single leaf of hinged plate covers shall be no greater than 3 feet x 5 feet in size.

E. Removable plate covers shall have 1-inch diameters finger holes to facilitate removal. All edges of holes cut in the plate covers shall be ground smooth.

F. Removable plate covers shall be no greater than 14 square feet in size with the longer dimension no greater than 7 feet.

G. Gasket plate covers shall have continuous compressible neoprene seals between the cover and the frame at the perimeter. The covers shall be secured to the frames with countersunk, flathead, stainless steel machine screws spaced approximately 6 inches on centers.

2.13 GUARD CHAINS

A. Removable guard chains at openings in aluminum pipe railings shall be fabricated from wrought, non-welded aluminum chain having 12 links per foot. The chains shall be secured to aluminum eyes bolted or welded to pipe stanchion at one end of the opening. The free ends of the chains shall be provided with hooks formed from ¼-inch diameter solid aluminum rod for attaching to similar eyes in the pipe stanchion at the opposite end of the opening.

2.14 CAST IRON WHEEL GUARDS

A. Wheel guards where indicated on the Drawings shall be cast iron guards of the sizes and types indicated on the Drawings as herein specified and shall be manufactured by Neenah Foundry Company, Neenah, WI; Flockhart Foundry Company, Neward, NJ; McKinley Iron Work, Fort Worth, TX or ENGINEER-approved equal. Wheel guards shall be given one shop coat of rust inhibitive paint before shipment.

B. Wheel guards shall be heavy-duty concrete fill type, cast iron wheel guards, No., R-4983-C manufactured by Neenah Foundry Company Type 706A manufactured by Flockhart Foundry Company or ENGINEER-approved equal. The guards shall be set 2 inches into the pavement and shall be bolted to the masonry walls. The guards shall be filled with Class A concrete and the top of the fill sloped at a 15-degree angle from the building.

2.15 CAST ALUMINUM NOSINGS

A. The cast aluminum nosing shall be abrasive cast aluminum nosing securely fastened with stainless steel, flat head bolts and wing anchors set into the fresh concrete. The nosings shall be the products of Wooster Products, Inc., Wooster, OH; American Abrasive Metals Company, Irvington, NJ; Andco Building Specialties or ENGINEER-approved equal.

2.16 ACCESS DOORS

A. Doors shall be flush panel access doors as manufactured Inryco, Inc., Milwaukee, WI; Karp Associates, Inc., Maspeth, NY; BOICO, Birmingham, AL or ENGINEER-approved equal. Doors and frames to be steel with concealed hinge and flush screwdriver operated locks.

2.17 CASTINGS

A. All miscellaneous iron castings shall be of best quality materials free from flaws and unsightly defects. Gray cast iron shall be ASTM A48 Class 35 (35,000 psi tensile strength). Furnish and install in the locations indicated casting of the type and size shown on the Drawings.

2.18 CARPENTERS IRON WORK

A. Furnish bent or otherwise custom fabricated bolts, plates, anchors, hangers, dowels and other miscellaneous steel and iron shapes as required for framing and supporting woodwork and for anchoring or securing woodwork to concrete or other structures. Manufacture or fabricate items of sizes, shapes and dimensions required. Furnish malleable iron washers for head and nuts which bear on wood structural connections, elsewhere, furnish steel washers.

2.19 MISCELLANEOUS FRAMING AND SUPPORTS

A. Provide miscellaneous steel framing and supports as required to complete the work. Fabricate miscellaneous units to the sizes, shapes and profiles shown or if not shown, of the required dimensions to receive adjacent grating plates, louvers, vents, grilles, screens, or other work to be retained by the framing. Except as otherwise shown, fabricate from structural steel shapes and plates and steel bars of all welded construction using mitered corners, welded brackets and splice plates and a minimum number of joints for filed connection. Cut, drill, and tap units to receive hardware and similar items to be anchored to the work.

2.20 SHOP PAINTING

A. Painting of miscellaneous ferrous metal work is specified in the applicable Sections of Division 09 – Finishes.

PART 3 - EXECUTION

3.01 ANCHORAGE ITEMS

A. Furnish all bolts, nuts, shims, pins, screws, nails, and other anchors, which, may be required by the Drawings or job conditions to secure all items permanently in place whether or not specifically called for or shown on the Drawings.

3.02 FABRICATION AND INSTALLATION OF METAL WORK

A. General: All metal items shall be accurately fabricated and erected with exposed joints close fitting. All joints shall be such of character and so assemble that they will be as strong and rigid as adjoining sections. Joints shall be located where least conspicuous. Items shall have smooth finished surfaces except where otherwise shown or specified.

B. Built-In Items: Members or parts to be built-in with masonry or concrete shall be in a form affording a suitable anchorage or shall be provided with approved anchors, expansion shields or other approved means of securing members.

C. Dissimilar Metals: Ferrous and non-ferrous metals shall be insulated at all contacts with felt washer, mylar strips or sheets, bitumastic paints, or other acceptable means. All aluminum surfaces in contact with concrete shall be coated with two (2) coats of Federal Specification TT-V51F Asphalt Varnish or ENGINEER-approved equal.

D. Connections:
   1. All required anchors, couplings, bolts, and nuts required to support miscellaneous metalwork should be furnished and installed as required.
   2. Weights of connections and accessories shall be adequate to safely sustain and withstand stresses and strains to which they will be normally subjected.
   3. Connections shall be bolted except where welding is called for in the Drawings. Bolts shall be ¾-inch diameter unless noted or required otherwise.

E. Expansions Anchors:
   1. Expansions anchors shall be installed in holes drilled into concrete with carbide tipped drill bits conforming to ANSI B94.12-1977, using a rotary impact hammer for ½-inch and 3/8-inch anchors. Hole depth shall equal or exceed the anchor manufacturer's minimum recommended embedment. Should hole depth equal anchor manufacturer's minimum recommended embedment, hole shall be cleaned out by air pressure. The minimum hole depth shall be per anchor manufacturer's recommendations. Assure hole is perpendicular and conforms in size to anchor manufacturer's recommendation.
   2. Washer and nut shall be assembled on anchor so that the top of the nut is flush with the top of the anchor. Then the anchor shall be driven into the hole through the work until the washer bears against the work. The anchor shall be expanded in accordance with the manufacturer's recommendations.
   3. General: Provide stainless steel fasteners for exterior use or where built into exterior walls. Select fasteners for the type, grade and class required.
   4. Bolts and Buts: Regular hexagon head type, stainless steel, Grade A (within tankage)
   5. Lag Bolts: Stainless steel (within tankage)
   6. Machine Screws: Stainless steel
   7. Wood Screws: Stainless steel
   8. Plain Washers: Stainless steel
   9. Masonry Anchorage Devices: Stainless steel
   10. Toggle Bolts: Stainless steel (within tankage)
   11. Lock Washers: Stainless steel

12. Bolts, buts, lags, toggle bolts and lock washers above and exterior to tankage shall be stainless steel

3.03 WELDING

A. Welding procedures, welders, and welding operators, both for shop and field welding, shall be qualified and certified in accordance with the requirements of AWS D1.1 “Welding in Building Construction” of the American Welding Society. Manufacturer’s and fabricator’s shop drawings shall clearly show complete information and all field welding shall be performed in conformance with this information regarding location, type, size, and length of all welds, all in accordance with AWS A2.0 “Standard Welding Symbols” of the American Welding Society. Special conditions shall be fully explained by notes and details.

3.04 HOT-DIP GALVANIZING

A. All fabrication, galvanizing and repair shall comply with ASTM Standards as they apply in accordance with the publication “ASTM Standard for Materials Hot-Dip Galvanized after Fabrication” issued by American Hot-Dip Galvanizers Association, Inc. In particular, the following specific standards shall apply to work under this contract: ASTM A123, A153, A384, A385, A563 and A780.

B. Items to be galvanized shall be fabricated in accordance with ASTM A385.

C. Galvanizing for fabricated steel items, shall conform to ASTM A123 and shall be done after fabrication. Steel assemblies shall be subject to safeguarding from warpage and distortion during galvanizing per ASTM A384.

D. Upon field erection, any damage measuring more than 1/10-inch wide shall be repaired with a zinc-based solder or zinc-rich paint in accordance with ASTM A780. Marred, damaged, or uncoated areas 4 square inches and less shall be patched with a zinc-based solder to a thickness of 5 milligrams; areas greater than 4 square inches shall be patched with an organic zinc-rich paint to a dry film, Devcon Z, LPS Instant Cold Galvanized or ENGINEER-approved equal. The resident project representative shall determine the extent of damage, which would require recoating.

E. Items subject to distortion during transit, such as thin, curved members, etc., shall be stacked on edge and/or blocked to prevent radius change or other distortion while in transit to and from the galvanizing plant.

3.05 PAINTING

A. Painting of miscellaneous ferrous metal work shall be in accordance with these Specifications.

3.06 MISCELLANEOUS METAL FABRICATIONS

A. Rough Hardware:
   1. Furnish bent or otherwise custom fabricated bolts, plates, anchors, hangers, dowels, and other miscellaneous steel and iron shapes as required for framing and supporting woodwork, and for anchoring or securing woodwork to concrete or other structure. Straight bolts and other stock rough hardware items shall be in accordance with these Specifications.

B. Fabricate items to sizes, shapes and dimensions required. Furnish malleable iron washers for heads and nuts, which bear on wood structural connections; elsewhere, furnish steel washers.

C. Miscellaneous Steel Trim:
   1. Provide shapes and sizes for profiles shown. Except as otherwise indicated, fabricate units from structural steel shapes and plates and steel bars, with continuously welded joints and smooth exposed edges. Use concealed field splices wherever possible. Provide cutouts, fittings and anchorages as required for coordination of assembly and installation with other work.
   2. Galvanize miscellaneous steel trim where indicated.

END OF SECTION

SECTION 05 5100 – METAL STAIRS

PART 1 – GENERAL

1.01 THE REQUIREMENT

A. Furnish and install metal stairs in accordance with the Contract Documents.
   1. Concrete Pan-filled Stairs
   2. Industrial Type Stairs
   3. Safety Tread Stairs
   4. Railing System

1.03 SUBMITTAL

A. General: Refer to Section 01 3300 – Submittal Procedures for submittal requirements and procedures.

B. Stair Design: Stairs shall be designed and engineered by the manufacturer, incorporating specified criteria, and employing a professional civil or structural engineer currently registered in the State of Arizona to perform the design engineering. Include design data along with Shop Drawings. Drawings and design data shall be stamped and signed by the manufacturer's professional engineer.

C. Shop Drawings: Submit fully detailed Shop Drawings of metal stairs and railings, showing sizes, details of fabrication and construction, methods of assembly, handrail brackets, locations of hardware, anchors, and accessories, and installation details.

D. Product Data: Submit manufacturer's product data of stair type and corrosion-inhibitive finish system. Include patterned or embossed treads, safety coated treads, railing system, handrails, and handrail brackets.

PART 2 – PRODUCTS

2.01 MANUFACTURERS

A. Type and Manufacture: Provide steel stairs of the following types as indicated:

1. Concrete Pan-Filled Stairs: Steel pan-type stairs with concrete-filled treads and landings, and with treads, risers, and platforms constructed of structural steel sheet. Treads shall have nosings.
2. Industrial Type Stairs: Steel stairs with tread fabricated from checkered or diamond-pattern steel plate or sheet, or with treads fabricated from button-embossed structural steel sheet. Risers shall be closed, fabricated from steel sheet.
3. Safety Tread Stairs: Steel stairs with formed steel treads and platforms, coated with anti-skid safety surface, and closed steel sheet risers.
4. Railing System: All stairs shall be provided with a complete stair railing system, including handrails and handrail brackets at walls, fabricated from steel pipe.

B. Stringers and Supporting Steel:

1. Structural Shapes: Standard structural sections, as indicated, conforming to ASTM A36/A36M.
2. Structural Tubing: Welded or seamless steel tubing, conforming to ASTM A500 or ASTM A501 (minimum yield point of 33,000 psi), of size and shape indicated.

C. Treads and Risers, Platforms and Landings:

1. Steel Sheet: Treads, risers, and platforms shall be fabricated from structural steel sheet, of gauge or thickness indicated, conforming with ASTM A570/A570M or ASTM A611, with minimum yield point of 33,000 psi, faulted as indicated. When gauge is not indicated, provide 14-gauge steel sheet.
2. Patterned Steel Plate: Treads and platforms for industrial-type closed-riser stairs shall be commercial quality checkered or diamond-pattern steel plate or structural steel sheet of thickness indicated, formed to shape and configuration indicated. Risers shall be steel sheet as specified above. Treads and platforms shall be hot-dip galvanized after fabrication in accordance with ASTM Al23.
    a. Button-Embossed Steel Sheet: Treads and platforms may be fabricated from button-embossed structural steel sheet of minimum 12-gauge thickness, with punched circular holes at apex of buttons for nonslip effect, and punched circular holes between buttons for drainage. Buttons shall be spaced 5/8 inch on centers. Drainage holes shall be spaced 1-1/4 inches on centers, eliminating the buttons at these locations. Hole size for button holes shall be 118-inch diameter, plus or minus 1/32 inch. Hole size for drainage holes shall be 1/4-inch diameter, plus or minus 1/16 inch. Treads and platforms shall be hot-dip galvanized after fabrication in accordance with ASTM Al23.
3. Safety Coated Treads: Formed steel sheet coated with anti-skid or nonslip encapsulated aluminum oxide material bonded or fused to the steel surface. Submit product data and sample for approval.

D. Railings and Handrails:

1. Pipe: Pipe for railings, pipe supports, and handrails shall be seamless steel pipe conforming to ASTM A53, Type S, Grade A, with special instructions to the manufacturer to provide Architectural Handrail Grade, of diameters and sizes indicated.

2. Handrail Brackets: Provide handrail brackets for handrails at walls, manufactured specifically for the purpose of cast, forged, or wrought steel, of configuration indicated or required to suit conditions, galvanized after fabrication.

E. Anchors, Fasteners, and Accessories: Provide all required anchors, fasteners, miscellaneous components, and accessories as required for a complete and finished stair installation. Bolts, nuts, and washers shall conform with ASTM A307, galvanized in accordance with ASTM A153.

1. Expansion Bolts: Where anchors are not cast into the concrete construction, provide galvanized expansion type anchors with matching galvanized steel bolts or studs with nuts, of sizes as indicated or required. Provide washers under all bolt heads and nuts. Expansion bolts require approval of the Engineer before they may be installed in post-tensioned slabs. Expansion bolts will not be permitted for use on concrete curbs or along the edge of concrete or a concrete joint.

F. Paint: Corrosion-inhibitive protective primer as specified in Article 2.04 herein.

G. Grout: As per these Specifications.

2.02 FABRICATION

A. Metal stairs and railings shall be fabricated by firms or shops experienced and skilled in the construction of metal stairs and architectural railings. There shall be no exposed screws, bolts, and fasteners in the finished work.

B. For items bearing on concrete, provide steel bearing plates and anchors as indicated or required. Base or bearing plates shall be leveled by means of adjustment nuts. The space below plates shall be packed solid with full bed of non-shrink grout. Templates shall be furnished, together with instructions for setting of anchors, anchor bolts, and bearing plates. The Contractor shall supervise and ensure that anchors and related items are properly set in concrete during the progress of the work.
