16.6 RIPRAP MATERIAL SHALL BE AS SPECIFIED TO A DEPTH OF TWICE THE SIZE OF Dso UNDER LAYING A FILLER LAYER OF Dso =3/4" TO A DEPTH OF 10" OR GEOTEXTILES. THE GRADATION OF RIPRAP SHOULD FOLLOW A SMOOTH CURVE. THE RATIO TO THE LARGEST SIZE ROCK TO Dso SHOULD BE EQUAL TO OR LESS THAN 2 (Dso/Dso ~0.5). THE RIPRAP SHOULD BE HARD, DENSE, DURABLE AND RESISTANT TO WEATHER AND FRACTURE. ALL RIPRAP TO BE HAND PLACED IN AN INTERLOCKING POSITION. FILLER MATERIAL TO BE WELL GRADED GRAVEL AS SPECIFIED. MATERIAL FURNISHED FOR RIPRAP SHALL CONFORM TO MAG SPEC 220.2.

16.7 ALL CONCRETE AND REBAR PLACEMENT PER MAG SPEC 505.

16.8 CONCRETE TESTING PER MAG SPEC 725.

16.9 ALL CONCRETE TO BE CLASS B (2500PSI) IF NOT SPECIFIED.

16.10 MINIMUM COVER ON ALL REBAR TO BE MIN 1" UNLESS OTHERWISE SPECIFIED.

16.11 MINIMUM LAP AT REBAR SPLICES TO BE 1' UNLESS OTHERWISE SPECIFIED.

16.12 ALL MANHOLE FRAMES TO HAVE 12" ANCHORS SPACED A MINIMUM OF 12" RADIALLY AROUND FRAME.

16.13 CONCRETE FOR FOOTINGS AND PADS AHALL BE CLASS A (3000 PSI)

SURVEY

1. TOPOGRAPHIC SURVEY BY KENNEY AERIAL MAPPING, INC., PHOENIX, AZ, DATED NOVEMBER 2022 AND SUPPLEMENTED IN FEBRUARY 2023. ADDITIONAL TOPOGRAPHIC SURVEY DATA PERFORMED BY SEC, INC. COORDINATES ARE RELATIVE TO NAD 83, AZ STATE PLANE CENTRAL ZONE, INTERNATIONAL FEET. ELEVATIONS RELATIVE TO NAVD 83. SURVEY CONTROL ON SHEET C2.0.

TREE NOTES

1. ALL EXISTING TREES AND SHRUBS NOT AFFECTED BY BUILDING CONSTRUCTION OR ROAD DEVELOPMENT MUST BE FENCED WITH A CONSTRUCTION ENVELOPE FENCE TO PROTECT THEM DURING CONSTRUCTION

2. NO TREES TO BE PLACED OVER/ON SEWER LINE

ADEQ WATER AND SEWER SYSTEM NOTES

MANHOLES

ALL MANHOLES SHALL BE 4-FT. ID PRECAST CONCRETE WITH POURED-IN-PLACE CONCRETE BASE AND TRAFFIC BEARING RING AND COVER. ALL COVERS SHALL BE 2-FT. IN DIAMETER AND SHALL BE MARKED "SEWER". TEST MANHOLES FOR WATER TIGHTNESS (INFILTRATION) PER R 18-9-E301.4.01.D.3.F. WATER TIGHTNESS SHALL BE TESTED BY EITHER 1) FILLING THE MANHOLE WITH WATER AND ENSURING THAT THE DROP IN WATER LEVEL DOES NOT EXCEED 0.0034 OF THE TOTAL MANHOLE VOLUME PER HOUR, OR 2) AIR PRESSURE TESTING USING THE "STANDARD TEST METHOD FOR CONCRETE SEWER MANHOLES BY NEGATIVE AIR PRESSURE (VACUUM) TEST", ASTM C1244-02a1 (2002). TEST 100% OF ALL MANHOLES. MANHOLES SHALL CONFORM TO A.D.E.Q. AND M.A.G. SPECIFICATIONS. CONSTRUCTION SHALL CONFORM TO M.A.G. STD. DTLS. 420-1 AND 420-2.'

CONCRETE

CLASS A CONCRETE SHALL HAVE A MINIMUM 28 DAY COMPRESSIVE STRENGTH OF 2000 PSI.

PIPE

GRAVITY SEWER PIPE SHALL BE PVC, SDR-26 AND CONFORM TO ASTM D-1784 AND ASTM D-3034. SEALS SHALL CONFORM TO ASTM F-477. PIPE SHALL BE JOINED BY BELL AND SPIGOT TYPE JOINTS. FITTINGS SHALL CONFORM TO ASTM D-3212. GRAVITY SEWER PIPE SHALL BE TESTED FOR DEFLECTION AND LEAKAGE. SHORT TERM DEFLECTION TESTING SHALL BE PERFORMED AFTER COMPLETE BACKFILL BUT PRIOR TO INSTALLATION OF FINISH SURFACE MATERIAL. A SHORT TERM DEFLECTION IN EXCESS OF 5% SHALL BE CONSIDERED UNACCEPTABLE AND PIPE SHALL BE REPAIRED, OR REPLACED AND RETESTED. A MINIMUM OF 100% OF GRAVITY SEWER SHALL BE DEFLECTION TESTED. SEWER PIPE SHALL BE TESTED FOR LEAKAGE USING LOW PRESSURE AIR TESTING PER "STANDARD TEST METHOD FOR INSTALLATION ACCEPTANCE OF PLASTIC GRAVITY SEWER LINES USING LOW PRESSURE AIR", ASTM F 1417-92, REAPPROVED 1998. TEST 100% OF ALL SEWER LINES. TEST THE TOTAL LENGTH OF THE SEWER LINE FOR UNIFORM SLOPE BY LAMP LIGHTING, REMOTE CAMERA OR SIMILAR METHOD APPROVED BY ADEQ AND RECORD THE RESULTS.

DUCTILE IRON PIPE SHALL BE AWWA C-150, CLASS 350 AND SHALL BE TESTED FOR LEAKAGE PER AWWA STANDARD C-600.

A MINIMUM HORIZONTAL DISTANCE OF 6-FT SHALL BE MAINTAINED BETWEEN MAINS AND GRAVITY SEWERS.

MATERIAL

ALL MATERIALS & PRODUCTS THAT COME INTO CONTACT WITH DRINKING WATER OR DRINKING WATER TREATMENT CHEMICALS MUST COMPLY WITH AWWA STANDARDS & NSF STANDARD 61. ANY "OR EQUAL' SUBSTITUTION SHALL ALSO MEET NSF STANDARD 61.

ALL MATERIALS USED IN THE INSTALLATION OF WATER MAINS SHALL BE PURSUANT TO AAC R-18-4-119, & SHALL BE NSF APPROVED FOR POTABLE WATER.

DISINFECTION

WATER MAINS. SHALL BE DISINFECTED IN ACCORDANCE WITH ADEQ ENGINEERING BULLETIN NO.8 "DISINFECTION OF WATER SYSTEMS".

TESTING

ONE HUNDRED PERCENT (100%) OF PIPE LINES SHALL BE PRESSURE AND LEAK TESTED IN ACCORDANCE WITH AWWA C-600, SECTION 4 AND MAG SECTION 611. MINIMUM TEST PRESSURES SHALL BE 200 PSI PLUS ALLOWANCE FOR WATER HAMMER.

AFTER PRESSURE AND LEAK TESTING IS SHOWN TO BE SATISFACTORY, WATER LINES SHALL BE DISINFECTED BY CHLORINATION IN ACCORDANCE WITH AWWA C-601, MAG SECTION 610.15, AND ADEQ BULLETIN 8. ALL VALVES SHALL BE WORKED INTERMITTENTLY FOR A PERIOD OF 24 HOURS FOLLOWING CHLORINATION.

WATER SYSTEM THRUST BLOCKING AND/OR JOINT RESTRAINT

PIPE LINES SHALL BE PROVIDED WITH CONCRETE THRUST BLOCKS AT ALL CHANGES IN DIRECTION AND SIZE AND AT ALL TEES, VALVES, PLUGS, AND DEAD ENDS, PER MAG STANDARD DETAILS 301 AND 380 AND YAG STANDARD DETAIL 3-03. PIPE LINES MAY ALSO BE PROVIDED WITH RESTRAINED JOINTS AT ALL CHANGES IN DIRECTION AND SIZE AND AT ALL TEES, VALVES, PLUGS, AND DEAD ENDS, PER MAG STANDARD DETAILS 302 AND 303.

ADEQ WATER & SEWER NOTES (CONT.)

TRENCHING AND BACKFILLING

ROUGH GRADING SHALL BE COMPLETED PRIOR TO INSTALLATION OF UNDERGROUND UTILITIES.

TRENCH BOTTOM SHALL BE COMPACTED BY SUITABLE MEANS APPROVED BY THE ENGINEER PRIOR TO PLACEMENT OF BEDDING MATERIAL. BEDDING MATERIAL SHALL BE PLACED TO PROVIDE UNIFORM AND ADEQUATE LONGITUDINAL SUPPORT UNDER THE PIPE. THE CONTRACTOR SHALL ENSURE THAT A MINIMUM COMPACTED DEPTH OF 6" IS MAINTAINED UNDERNEATH THE PIPE. BELL HOLES SHOULD BE PROVIDED AT EACH JOINT TO PERMIT PROPER ASSEMBLY WHILE MAINTAINING UNIFORM SUPPORT.

BEDDING MATERIAL SHALL BE ROUNDED GRAVEL WITH A MAXIMUM PARTICLE SIZE OF 1 1/2" AND SHALL BE NON-PLASTIC. WHERE DEPTH OF COVER IS 2-FT. OR LESS, BACKFILL MATERIAL SHALL BE ROUNDED GRAVEL WITH A MAXIMUM PARTICLE SIZE OF 4" AND WITH NO MORE THAN 20% PASSING THE #200 SIEVE.

BACKFILL SHALL BE PLACED IN LAYERS OF NOT MORE THAN 8" LOOSE DEPTH AND COMPACTED TO ACHIEVE COMPACTION OF 95% OF THE MAXIMUM DENSITY AS DETERMINED BY AASHTO T-99 AND T-191 OR ASTM D-2922 AND D-3017. THE CONTRACTOR SHALL CONTRACT WITH AN INDEPENDENT TESTING LABORATORY TO PROVIDED COMPACTION TESTING. TESTS SHALL BE PROVIDED AT MINIMUM INTERVALS OF ONE TEST PER 50 CUBIC YARDS OF TRENCH BACKFILL. TEST RESULTS SHALL BE SUBMITTED DAILY TO THE ENGINEER.

TRENCHING, PIPELAYING, BACKFILLING, AND ALL OTHER CONSTRUCTION SHALL BE PERFORMED UNDER THE INSPECTION, COORDINATION, AND SUPERVISION OF A REGISTERED PROFESSIONAL CIVIL ENGINEER.

NO TRENCH SHALL BE FILLED WITH BEDDING MATERIAL OR BACKFILL UNTIL THE EXCAVATION AND PIPE LAYING, RESPECTIVELY, HAVE BEEN APPROVED BY THE OWNER OR HIS AUTHORIZED REPRESENTATIVE.

THE EXCAVATION METHOD EMPLOYED SHALL BE THE CONTRACTOR'S OPTION. MATERIAL SHALL NOT BE STOCKPILED TO A DEPTH OF MORE THAN 5 FEET ABOVE FINISHED GRADE WITHIN 25 FEET OF ANY EXCAVATION OR STRUCTURE. EXCAVATION SHALL EXTEND SUFFICIENT DISTANCE FROM WALLS AND FOOTINGS TO ALLOW PLACING AND REMOVAL OF FORMS, INSTALLATION OF SERVICES AND INSPECTION BY THE ENGINEER. WITHIN 12" OF FINISHED GRADE SHOWN ON THE DRAWINGS, AND FOR THE MANHOLES, FILL AND BACKFILL SHALL BE NATIVE MATERIAL, FEE FROM BROKEN CONCRETE, ORGANIC MATERIAL, OR OTHER DEBRIS WITH SUFFICIENT FINES TO FILL ALL VOIDS AND TO INSURE A UNIFORMLY COMPACTED MASS OF THE REQUIRED DENSITY AND HAVING A MAXIMUM SIZE OF 2 - ½ INCHES WITH 0 TO 20% MINUS #200. ALL FILL AND BACKFILL SHALL BE PLACED IN LAYERS OF NOT MORE THAN 8" LOOSE AND COMPACTED TO 95% OF MAXIMUM DENSITY, DETERMINED BY AASHTO TEST METHOD T-99, PRIOR TO PLACEMENT OF THE NEXT LAYER.

WATER AND SEWER SYSTEM DESIGN: MINIMUM DESIGN CRITERIA

WATER AND SEWER MAINS SHALL BE SEPARATED IN ORDER TO PROTECT PUBLIC WATER SYSTEMS FROM POSSIBLE CONTAMINATION. ALL DISTANCES ARE MEASURED PERPENDICULARLY FROM THE OUTSIDE OF THE SEWER MAIN TO THE OUTSIDE OF THE WATER MAIN. SEPARATION REQUIREMENTS ARE AS FOLLOWS:
1. A WATER MAIN SHALL NOT BE PLACED:
A. WITHIN SIX FEET, HORIZONTAL DISTANCE, AND BELOW TWO FEET, VERTICAL DISTANCE, ABOVE THE TOP OF A SEWER MAIN UNLESS EXTRA PROTECTION IS PROVIDED. EXTRA PROTECTION SHALL CONSIST OF CONSTRUCTING THE SEWER MAIN WITH MECHANICAL JOINT DUCTILE IRON PIPE OR WITH SLIP-JOINT DUCTILE IRON PIPE IF JOINT RESTRAINT IS PROVIDED. ALTERNATE EXTRA PROTECTION SHALL CONSIST OF ENCASING BOTH THE WATER AND SEWER MAINS IN AT LEAST SIX INCHES OF CONCRETE FOR AT LEAST TEN FEET BEYOND THE AREA COVERED BY THIS SUBPARAGRAPH.
B. WITHIN TWO FEET HORIZONTALLY AND TWO FEET BELOW THE SEWER MAIN.
2. NO WATER PIPE SHALL PASS THROUGH OR COME INTO CONTACT WITH ANY PART OF A SEWER MANHOLE. THE MINIMUM HORIZONTAL SEPARATION BETWEEN WATER MAINS AND MANHOLES SHALL BE SIX FEET, MEASURED FROM THE CENTER OF THE MANHOLE.
3. THE MINIMUM SEPARATION BETWEEN FORCE MAINS OR PRESSURE SEWERS AND WATER MAINS SHALL BE TWO FEET VERTICALLY AND SIX FEET HORIZONTALLY UNDER ALL CONDITIONS. WHERE A SEWER FORCE MAIN CROSSES ABOVE OR LESS THAN SIX FEET BELOW A WATER LINE, THE SEWER MAIN SHALL BE ENCASED IN AT LEAST SIX INCHES OF CONCRETE OR CONSTRUCTED USING MECHANICAL JOINT DUCTILE IRON PIPE FOR TEN FEET ON EITHER SIDE OF THE WATER MAIN.

32 OF 99 SHEETS

JOB NO. B614

W:\B614\Engineering\B614-3\sheet\B614 - M2.1 YARD PIPING - OLD VERSION RESTORED.dwg - Tab: M2.3 - by reddington on 03/10/26 at 2:03:53 PM

YARD PIPING PLAN
SCALE: 1" = 10'

CONSTRUCTION NOTES:

1. INSTALL 2" POTABLE WATER LINE SCH. 80 PVC PIPE.
2. INSTALL 2" - 22.5° SCH. 80 PVC BEND.
3. INSTALL 2" - 45° SCH. 80 PVC BEND.
4. INSTALL 2" - 90° SCH. 80 PVC BEND.
5. INSTALL 2" SCH. 80 PVC TEE.
6. INSTALL 3" LIFT STATION RETURN LINE SCH. 80 PVC PIPE .
7. INSTALL 3" - 45° SCH. 80 PVC .
8. INSTALL 3" - 90° SCH. 80 PVC BEND.
9. INSTALL 4" DEWATERING PAD DRAIN LINE SDR35 PVC PIPE.
10. INSTALL 4" DEWATERING PAD FEED LINE C900 PVC PIPE.
11. INSTALL 4" LIFT STATION OVERFLOW LINE D.I. PIPE.
12. INSTALL 4" - 45° SDR35 PVC BEND W/ THRUST BLOCKS PER DETAIL C SHEET M8.0.
13. INSTALL 4" - 45° D.I. BEND W/ MJ CONNECTIONS W/ THRUST BLOCKS PER DETAIL C SHEET M8.0.
14. INSTALL 4" - 90° D.I. BEND W/ MJ CONNECTIONS W/ THRUST BLOCKS PER DETAIL C SHEET M8.0.
15. INSTALL 4"x4" SDR35 PVC WYE.
16. INSTALL 4"x6" SDR35 PVC WYE.
17. INSTALL 6" SBR OVERFLOW LINE SDR35 PIPE.
18. INSTALL 6" CHLORINE CONTACT CHANNEL EFFLUENT/ SBR WAS DRAIN LINE C900 PVC PIPE.
19. INSTALL 6" - 45° SDR35 PVC BEND W/ THRUST BLOCKS PER DETAIL C SHEET M8.0.
20. INSTALL 6" - 90° SDR35 PVC BEND W/ THRUST BLOCKS PER DETAIL C SHEET M8.0.
21. INSTALL 6" - 45° D.I. BEND W/ MJ CONNECTIONS W/ THRUST BLOCKS PER DETAIL C SHEET M8.0.
22. INSTALL 6" - 90° D.I. BEND W/ MJ CONNECTIONS W/ THRUST BLOCKS PER DETAIL C SHEET M8.0.
23. INSTALL 6" SDR35 PVC TEE W/ THRUST BLOCKS PER DETAIL C SHEET M8.0.
24. INSTALL 6" D.I. TEE W/ MJ CONNECTIONS W/ THRUST BLOCKS PER DETAIL C SHEET M8.0.
25. INSTALL 6" D.I. CROSS W/ MJ CONNECTIONS.
26. INSTALL 4"x6" ECCENTRIC C900 REDUCER.
27. INSTALL CLEANOUT PER DETAIL I SHEET M8.3.
28. INSTALL BACKFLOW PREVENTER PER DETAIL A SHEET M8.1.
29. INSTALL HOSE BIBB PER DETAIL D SHEET M8.4.
30. INSTALL PVC TO DIP TRANSITION COUPLING, ROMAC OR EQUAL.
31. INSTALL 6" SCH. 40 PVC PIPE.
32. INSTALL 6" - 45° SCH. 40 PVC BEND.
33. INSTALL PLUG VALVEW/ STEM RISER TO VALVE BOX
34. POTABLE WATER & SEWER SEPERATION PER DETAIL F SHEET M8.3
35. TRENCH AND BACKFILL PER DETAIL D, SHEET M8.1.

GENERAL NOTES:

1. WHERE NO REFERENCE TO PIPE HANGERS OR SUPPORTS IS GIVEN ON THE DRAWINGS, THE CONTRACTOR SHALL USE THE APPROPRIATE HANGER OR SUPPORT SHOWN ON THIS DRAWING. MAXIMUM HANGER AND SUPPORT SPACING SHALL BE AS SHOWN IN SCHEDULE "A" ON THIS DRAWING. FIGURE NUMBERS ARE B-LINE, UNISTRUT OR GRINNELL.
2. ALL CONCRETE INSERTS, BRACKETS, CHANNELS, BOLTS, RODS, AND MISCELLANEOUS HARDWARE USED FOR PIPE HANGERS OR SUPPORTS SHALL BE 316 S.S., U.N.O.
3. CONCRETE CONTINUOUS INSERTS, B-LINE SERIES B52i, OR EQUAL, SHALL BE PROVIDED IN THE WALLS AND CEILINGS AS REQ'D OR AS NOTED ON THE DRAWINGS. INSERTS IN THE WALLS SHALL BE VERTICAL, UNLESS OTHERWISE NOTED AND SHALL BEGIN 6 INCHES ABOVE THE FLOOR AND END 6 INCHES BELOW THE CEILING. INSERTS IN THE CEILING SHALL BEGIN AND END 3 INCHES FROM WALLS AND BEAMS, WHERE PRACTICABLE. THE CENTERLINES OF WALL AND CEILING INSERTS SHALL ALIGN. MAXIMUM CENTER TO ENTER SPACING OF INSERTS SHALL BE 5'-0".
4. IN AREAS NOT COVERED UNDER NOTE 3, CONCRETE INSERTS SHALL BE B-LINE SERIES B3014N WITH APPROPRIATE NUT, B-LINE SERIES B521i CHANNEL EMBEDDED ANCHOR BOLTS, OR EQUAL. IN WITHOUT THE PRIOR WRITTEN APPROVAL OF THE ENGINEER (FOR EQUIPMENT LIFTING DEVICES, (SEE STRUCTURAL DRAWINGS).
5. SUPPORTS SHALL MEET MANUFACTURERS STANDARDIZATION SOCIETY OF THE VALVE AND FITTINGS INDUSTRY STANDARD PRACTICE SP58, LATEST EDITION.
6. HANGER BRACKET AND SUPPORT COMPONENTS MAY BE INTERCHANGED AS APPROVED BY THE ENGINEER.
7. TRAPEZE AND PIPE RACK COMPONENTS SHALL HAVE A MINIMUM STEEL THICKNESS OF 12 GAUGE. MAXIMUM DEFLECTION SHALL BE LIMITED TO 1/240 OF THE SPAN. CHANNEL COMPONENTS SHALL BE B-LINE SERIES B22 OR B22A, OR EQUAL.
8. CONCRETE INSERTS IN AREAS BELOW WATER SURFACE OR NORMALLY SUBJECT TO SUBMERGING SHALL BE EMBEDDED ANCHOR BOLTS, OR APPROVED EQUAL. IN NO CASE SHALL CONCRETE CONTINUOUS INSERTS BE USED IN THESE AREAS.
9. ALL PIPING, DUCTWORK, ACCESSORIES, APPURTENANCES, ETC. SHALL BE ANCHORED TO RESIST 200% OF THE APPLIED LOAD & A LATERAL SEISMIC FORCE OF 40 PERCENT OF ITS WEIGHT WITHOUT EXCESSIVE DEFLECTION.
10. CONTRACTOR SHALL VERIFY ALL SUPPORT DIMENSIONS AND LOCATIONS WITH APPROVED SHOP DRAWINGS FOR ITEMS BEING SUPPORTED BEFORE FABRICATION OR INSTALLATION OF SUPPORTS.

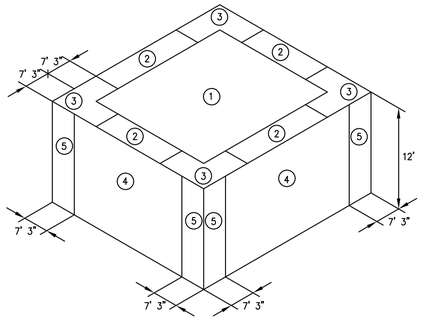
BUILDING CODE:

2012 EDITION OF THE INTERNATIONAL BUILDING CODE WITH TOWN OF JEROME AMENDMENTS.



LOADS:

ROOF LIVE LOAD = 20 PSF (REDUCIBLE).
TOTAL ROOF DEAD LOAD = 20 PSF.
GROUND SNOWLOAD = 20 PSF.
ROOF SNOW = 18.5 PSF.

WIND:

THE STRUCTURE AND ITS COMPONENTS ARE DESIGNED FOR WIND LOADS AS DEFINED BY THE BUILDING CODE, WHERE:

BASIC WIND SPEED 120 MPH.
RISK CATEGORY: III.
WIND EXPOSURE: C.
VELOCITY PRESSURE, qz = 23.7 PSF AT h = 12' FT. (MEAN ROOF HEIGHT). DESIGN WIND PRESSURES COMPONENTS AND CLADDING:

*PRESSURES SHOWN ARE ULTIMATE. MULTIPLY BY 0.6 FOR SERVICE LEVEL PRESSURES.

LOCATION	ZONE	EFFECTIVE WIND AREA (SF)	DESIGN WIND PRESSURE (PSF)*	
ROOF	1	10	+16.0	−54.9
		20	+16.0	−50.9
		50	+16.0	−45.6
		100	+16.0	−41.6
	2	10	+16.0	−74.2
		20	+16.0	−69.1
		50	+16.0	−62.3
		100	+16.0	−57.1
	3	10	+16.0	−103.3
		20	+16.0	−93.0
		50	+16.0	−79.4
		100	+16.0	−69.1
WALLS	4	10	+31.1	−30.4
		20	+29.1	−29.1
		50	+26.3	−27.2
		100	+24.2	−25.8

	EXTERIOR	10	+132.4	−87.2
		50	+105.7	−77.0
		100	+93.3	−69.4

ZONE1: INTERIOR AREA OF ROOF AWAY FROM BUILDING EXTERIOR WALLS.
ZONE2: ROOF AREAS WITHIN 7'−3" OF EXTERIOR WALLS.
ZONE3: ROOF AREAS WITHIN 7'−3" OF BUILDING CORNERS.
ZONE4: EXTERIOR WALLS AWAY FROM BUILDING CORNERS.
ZONE5: EXTERIOR WALLS WITHIN 7'−3" OF BUILDING CORNERS.
−DESIGN WIND PRESSURES − PLUS AND MINUS SIGNS SIGNIFY PRESSURE ACTING TOWARD AND AWAY FROM EXTERIOR SURFACE.
−LINEAR INTERPOLATION BETWEEN VALUES OF TRIBUTARY AREA IS PERMISSIBLE.

SEISMIC:

RISK CATEGORY = III.
SEISMIC IMPORTANCE FACTOR: Ie = 1.25.
DESIGN CATEGORY = B.
SITE CLASS C.
SS = 0.31, S1 = 0.097, R = 3.5.
Sds = 0.269, Sd1 = 0.097.
BASIC SEISMIC−FORCE−RESISTING SYSTEM (INTERMEDIATE REINFORCED MASONRY SHEAR WALLS).
ANALYSIS PROCEDURE USED (EQUIVALENT LATERAL FORCE PROCEDURE).
CS = 0.096 (FACTORED).

FOUNDATIONS:

SOIL REPORT BY WESTERN TECHNOLOGIES INC; JOB NO.2522JW197; DATED OCTOBER 25, 2022; SPREAD FOOTINGS SHALL BEAR ON FIRM, UNDISTURBED SOIL AT BELOW GRADE TANKS AND 1' OF 2 SACK SLURRY AT GRADE. IN ACCORDANCE WITH THE ABOVE REPORT, BOTTOM OF FOOTING TO BE 2'0" MINIMUM BELOW FINISHED GRADE. (THESE FOOTING DEPTHS ARE MINIMUMS AND THE CONTRACTOR SHALL COORDINATE WITH SOILS REPORT AND OTHER TRADES TO ENSURE THESE MINIMUMS ARE SUFFICIENT FOR THE WORK.) FINISHED GRADE IS DEFINED AS TOP OF SLAB FOR INTERIOR FOOTINGS AND LOWEST ADJACENT GRADE WITHIN 5 FEET FOR PERIMETER FOOTINGS. DESIGN SOIL BEARING VALUE = 2500 PSF. FOUNDATION EXCAVATIONS SHALL BE INSPECTED BY SOILS ENGINEER PRIOR TO PLACEMENT OF CONCRETE.

CONCRETE:

MINIMUM 28 DAY STRENGTH 5,000 PSI EXCEPT AS FOLLOWS: (TYPE II, U.N.O.)

WALLS ---------- 5,000 PSI
MILD REINFORCED SLAB ---------- 5,000 PSI
FOUNDATIONS ---------- 5,000 PSI

MECHANICALLY VIBRATE ALL CONCRETE WHEN PLACED, EXCEPT THAT SLABS ON GRADE NEED BE VIBRATED ONLY AROUND UNDER−FLOOR DUCTS, ETC. MAXIMUM SLUMP 4 1/2" FOR CONCRETE WITHOUT PLASTICIZER. IF PLASTICIZER IS USED, A HIGHER FINAL SLUMP MAY BE ALLOWED UPON STRUCTURAL ENGINEER'S APPROVAL. CAST CLOSURE POUR AROUND COLUMNS AFTER COLUMN DEAD LOAD IS APPLIED. UNLESS APPROVED OTHERWISE IN WRITING BY THE ARCHITECT, ALL CONCRETE SLABS ON GRADE SHALL BE BOUND BY CONTROL JOINTS (KEYED OR SAW CUT), SUCH THAT THE ENCLOSED AREA DOES NOT EXCEED 225 SQUARE FEET. KEYED CONTROL JOINTS NEED ONLY OCCUR AT EXPOSED EDGES DURING POURING, ALL OTHER JOINTS MAY BE SAW CUT. CONTRACTOR SHALL SUBMIT PROPOSED LOCATIONS FOR APPROVAL PRIOR TO CONSTRUCTION.

REINFORCING:

ASTM A615 (FY = 60 KSI) DEFORMED BARS FOR ALL BARS. ALL GRADE 60 REINFORCING TO BE WELDED SHALL BE ASTM A706. WELDED WIRE FABRIC PER ASTM A185, WIRE PER ASTM A82. NO TACK WELDING OF REINFORCING BARS ALLOWED WITHOUT PRIOR REVIEW OF PROCEDURE WITH THE STRUCTURAL ENGINEER. LATEST ACI CODE AND DETAILING MANUAL APPLY. CLEAR CONCRETE COVERAGES AS FOLLOWS UNLESS NOTED OTHERWISE IN THE CONCRETE FIRE RATING TABLE:

CAST AGAINST AND PERMANENTLY EXPOSED TO EARTH ---------- 3"
EXPOSED TO EARTH OR WEATHER
#6 OR LARGER ---------- 2"
#5 AND SMALLER ---------- 1 1/2"
FLAT SLAB ---------- 3/4"
ALL OTHER PER LATEST EDITION OF ACI 318.

LAP SPLICES IN CONCRETE:

LAP SPLICES, UNLESS NOTED OTHERWISE, SHALL BE CLASS "B" TENSION LAP SPLICES PER LATEST EDITION OF ACI 318. LAP SPLICES IN CONCRETE COLUMNS SHALL BE TENSION LAP SPLICES. STAGGER SPLICES A MINIMUM OF ONE LAP LENGTH. LAPS IN WELDED WIRE FABRIC SHALL BE MADE SO THAT THE OVERLAP, MEASURED BETWEEN OUTERMOST CROSS WIRES OF EACH FABRIC SHEET, IS NOT LESS THAN THE SPACING OF CROSS WIRES PLUS 2 INCHES. ALL WELDED WIRE FABRIC SHALL BE CHAIRED TO ENSURE PROPER CLEARANCES.

ALL SPLICE LOCATIONS SUBJECT TO APPROVAL BY THE STRUCTURAL ENGINEER. PROVIDE BENT CORNER BARS TO MATCH AND LAP WITH HORIZONTAL BARS AT ALL CORNERS AND INTERSECTIONS PER TYPICAL DETAILS. REINFORCING BAR SPACING GIVEN ARE MAXIMUM ON CENTERS. ALL BARS PER CRSI SPECIFICATIONS AND HANDBOOK. DOWEL ALL VERTICAL REINFORCING TO FOUNDATION WITH STANDARD 90−DEGREE HOOKS UNLESS NOTED OTHERWISE. SECURELY TIE ALL BARS IN LOCATION BEFORE PLACING CONCRETE.

MASONRY:

MECHANICALLY VIBRATE GROUT IN VERTICAL SPACES IMMEDIATELY AFTER POURING AND AGAIN ABOUT 5 MINUTES LATER. PROVIDE CLEANOUTS IF GROUT LIFT EXCEEDS 4'−0" IN BLOCK WALLS. MAXIMUM GROUT LIFT SHALL BE 8'−0". UNLESS NOTED OTHERWISE ON THE PLANS, PLACE CONTROL JOINTS IN MASONRY WALLS SUCH THAT NO STRAIGHT RUN OF WALL EXCEEDS 24'−0". CONTROL JOINTS SHALL NOT OCCUR WITHIN 8'−0" OF WALL CORNERS, INTERSECTIONS, ENDS, WITHIN 24" OF CONCENTRATED POINTS OF BEARING OR JAMBS, OR OVER OPENINGS UNLESS SPECIFICALLY SHOWN ON THE STRUCTURAL DRAWINGS. ALL MASONRY BELOW FINISHED FLOOR OR GRADE SHALL BE GROUTED SOLID. LAP SPLICES SHALL BE AS FOLLOWS:

BAR SIZE	#3	#4	#5	#6	#7	#8	#9
BAR LAPS (INCHES)	27	36	45	54	63	72	81

HOLLOW CONCRETE MASONRY UNITS SHALL CONFORM TO ASTM C90, NORMAL WEIGHT, RUNNING BOND, MORTAR TYPE S (1800 PSI), COMPRESSIVE STRENGTHS AS FOLLOWS:

F'M(PSI)	UNIT STRENGTH, NET (PSI)	GROUT (PSI)	LOCATION
2000	2000	2000	TYPICAL U.N.O.

VERTICAL REINFORCING:

1 #5 IN CENTER OF GROUT AT CENTER OF WALL, CONTINUOUS FULL HEIGHT OF WALL AT ALL CORNERS, INTERSECTIONS, WALL ENDS, BEAM BEARINGS, JAMBS, EACH SIDE OF CONTROL JOINTS AND AT INTERVALS NOT TO EXCEED 48" O.C. UNLESS NOTED OTHERWISE. TIE AT 8'−0" VERTICALLY, WITH SINGLE WIRE LOOP TIE BY A.A. WIRE PRODUCTS COMPANY. LAP SPLICES SHALL BE AS PER SCHEDULE UNDER "MASONRY" SECTION. DOWEL ALL VERTICAL REINFORCING TO FOUNDATION WITH DOWELS TO MATCH VERTICAL REINFORCING.

HORIZONTAL REINFORCING:

2 #5 IN MINIMUM 8" DEEP GROUTED CONTINUOUS BOND BEAM AT (ELEVATED FLOORS AND) ROOFLINE. 1 #5 IN MINIMUM 8" DEEP GROUTED CONTINUOUS BOND BEAM AT TOP OF PARAPET OR TOP OF A FREESTANDING WALL AND AT BOTTOM OF WALL. USE 1 #4 HORIZONTAL BOND BEAM AT 48" O.C. VERTICALLY SPACED FOR ALL WALLS WITHOUT RUNNING BOND (STACKED BOND). PLACE THESE BARS CONTINUOUS THRU CONTROL JOINTS PER TYPICAL DETAIL. PROVIDE BENT BARS PER TYPICAL DETAILS, TO MATCH HORIZONTAL BOND BEAM REINFORCING, AT CORNERS AND WALL INTERSECTION TO MAINTAIN BOND BEAM CONTINUITY. LAP SPLICES SHALL BE AS PER SCHEDULE UNDER "MASONRY" SECTION. DO NOT SPLICE WITHIN 8'−0" OF CONTROL JOINTS. USE STANDARD WEIGHT (NO. 9 GAGE WIRE) DUR−O−WAL OR DUR−O−WIRE (OR EQUIVALENT) LADDER TYPE JOINT REINFORCEMENT AT 16" O.C. IN MASONRY WALLS.

ANCHOR BOLTS:

ALL ANCHOR BOLTS SHALL BE ASTM F1554 GRADE 36 (WELDABLE), U.N.O., WHEN SPECIFIED ON PLAN, ALL ASTM F1554 GRADE ANCHOR BOLTS SHALL BE 511 (WELDABLE) ANCHOR BOLTS.

MAY BE BENT IN FIELD PER AISC REQUIREMENTS TO FIX DAMAGED ANCHOR BOLTS; FIELD BENT IS LIMITED TO 45° OR LESS. ANCHOR BOLTS CAN HAVE HEADED OR HOOKED BOLTS SHAPES. USE HEADED ANCHOR BOLTS WHERE ANCHOR BOLT SHAPE IS NOT SPECIFIED. ANCHOR BOLTS SHALL BE INSPECTED PER SPECIAL INSPECTION TABLE REQUIREMENTS.

STRUCTURAL STEEL:

STEEL SETIONS − MINIMUM GRADE AND STRENGTH

STEEL WIDE FLANGES	= ASTM A992 (50KSI)
STEEL CHANNELS	= ASTM A36 (36KSI)
STEEL ANGLES	= ASTM A36 (36KSI)
STEEL COLUMN BASE PLATES	= ASTM A992 (50KSI)
STEEL PLATES AT MOMENT FRAME AND BRACED FRAME CONNECTIONS	= ASTM A992 (50KSI)
STEEL PLATES (MISCELLLANEOUS)	= ASTM A36 (36KSI)
STEEL HSS (RECTANGLE)	= ASTM A500 (46KSI)
STEEL HSS (ROUND)	= ASTM A500 (42KSI)
STEEL PIPES	= ASTM A501 (36KSI) − OR − ASTM A53 (35KSI), TYPE E OR S

NOTE: ALL 36KSI STEEL MAY BE SUBSTITUTED WITH 50KSI STEEL UNLESS NOTED OTHERWISE.

ALL CONSTRUCTION PER LATEST AISC HANDBOOK. ALL REFERENCE TO HEADED STUDS SHALL BE HIGH STRENGTH HEADED STUDS. ATTACHMENT OF HEADED STUDS SHALL CONFORM TO ALL REQUIREMENTS OF THE LATEST EDITION OF THE "RECOMMENDED PRACTICES FOR STUD WELDING" AND THE "STRUCTURAL WELDING CODE" PUBLISHED BY AWS. ALL BOLTS, ANCHOR BOLTS, EXPANSION BOLTS, ETC. SHALL BE INSTALLED WITH STEEL WASHERS AT SLOTTED HOLES IN STEEL SECTIONS. ALL WELDING SHALL BE PERFORMED BY WELDERS HOLDING VALID CERTIFICATES AND HAVING CURRENT EXPERIENCE IN THE TYPE OF WELD SHOWN ON THE DRAWINGS OR NOTES. CERTIFICATES SHALL BE THOSE ISSUED BY AN ACCEPTED TESTING AGENCY. ALL WELDING DONE BY E70 SERIES LOW HYDROGEN RODS UNLESS NOTED OTHERWISE. FOR GRADE 60 REINFORCING BARS, USE E90 SERIES. ALL WELDING PER LATEST AMERICAN WELDING SOCIETY STANDARDS, (EXCEPT STEEL JOISTS AND JOIST GIRDERS SHALL COMPLY WITH SJI STANDARDS). THESE DRAWINGS DO NOT DISTINGUISH BETWEEN SHOP AND FIELD WELDS; THE CONTRACTOR MAY SHOP WELD OR FIELD WELD AT HIS DISCRETION. SHOP WELDS AND FIELD WELDS SHALL BE SHOWN ON THE SHOP DRAWINGS SUBMITTED FOR REVIEW. ALL FULL (COMPLETE) PENETRATION WELDS SHALL BE TESTED AND CERTIFIED BY AN INDEPENDENT TESTING LABORATORY. WHEN STRUCTURAL STEEL IS FURNISHED TO A SPECIFIED MINIMUM YIELD POINT GREATER THAN 36 KSI, THE ASTM OR OTHER SPECIFICATION DESIGNATION SHALL BE INCLUDED NEAR THE ERECTION MARK ON EACH SHIPPING ASSEMBLY OR IMPORTANT CONSTRUCTION COMPONENT, OVER ANY SHOP COAT OF PAINT, PRIOR TO SHIPMENT FROM THE FABRICATOR'S PLANT. STRUCTURAL STEEL COMPONENTS, AND FASTENERS AT ALL EXTERIOR CONDITIONS SHALL BE GALVANIZED OR PROTECTED AGAINST CORROSION USING APPROVED METHOD PUBLISHED BY AISC OR ANSI. WELDS ON GALVANIZED STEEL SHALL FOLLOW AWS D−19.0 SPECIFICATIONS.

STRUCTURAL BOLTS:

ALL STRUCTURAL BOLTS SHALL BE ASTM F3125 GRADE A325 TYPE 1 AND SHALL BE INSTALLED AS BEARING−TYPE CONNECTIONS WITH THREADS INCLUDED IN SHEAR PLANE (I.E. A TYPE "N" CONNECTION) UNLESS NOTED OTHERWISE. USE A325 TYPE 3 BOLTS AT ALL CONNECTIONS EXPOSED TO WEATHERING. USE SC (SLIP CRITICAL) AT ALL MOMENT FRAMES AND BRACED FRAMES. USE ASTM A354 BOLTS WHERE THE BOLT LENGTH REQUIRED FOR THE CONNECTION EXCEEDS THE MINIMUM LENGTH OF AN A325 BOLT. BOLTS MAY BE TIGHTENED USING ANY AISC APPROVED METHOD. ALL STRUCTURAL BOLTING SHALL BE INSPECTED BY AN INDEPENDENT TESTING LABORATORY TO ENSURE BOLT TENSION.

STEEL GRATING:

UNLESS NOTED OTHERWISE IN ARCHITECTURAL SPECIFICATIONS, USE PAINTED (GALVANIZED) STEEL GRATING WITH 2 1/2" X 3/16" BEARING BARS AT 1 3/16" O.C. AND CROSSBARS AT 4" O.C. GRATING SHALL BE ERECTED AND ATTACHED PER MANUFACTURER'S RECOMMENDATIONS.

ROOF DECK:

DECK SHALL BE 1 1/2" DEEP, 36" WIDE, 20 GAGE GALVANIZED STEEL, WITH MINIMUM YIELD STRESS OF 50 KSI, WITH MINIMUM S = 0.237 IN3 AND I = 0.231 IN4 PER FOOT OF WIDTH. DECK SHALL BE ERECTED IN ACCORDANCE WITH MANUFACTURER'S RECOMMENDATIONS AS 1 SPAN MINIMUM AND SHALL BE ATTACHED FOR A MINIMUM DIAPHRAGM SHEAR CAPACITY OF 650 PLF USING THE FOLLOWING MINIMUM ATTACHMENTS:

WELD DECK TO SUPPORTING MEMBERS WITH 4 − 5/8" DIAMETER OR 3/8" X 1" PUDDLE WELDS PER SHEET AT ENDS, END LAPS AND AT INTERMEDIATE SUPPORTS, AND AT 24" O.C. AT PERIMETER BEAMS AND OPENING EDGES RUNNING PARALLEL TO THE DECK. SIDE SEAM ATTACHMENT SHALL BE VSC2 AT 24" O.C.

CONSTRUCTION JOINTS:

ALL CONSTRUCTION JOINTS IN WALLS SHALL BE KEYED IN ACCORDANCE WITH THE TYPICAL CONSTRUCTION JOINT DETAILS SHOWN ON THE STRUCTURAL DRAWINGS OR, AT THE CONTRACTOR'S OPTION, SHALL BE INTENTIONALLY ROUGHENED IN ACCORDANCE WITH THE FOLLOWING: THE SURFACE OF ROUGHENED JOINTS SHALL BE SAND BLASTED OR ROUGHENED WITH A CHIPPING HAMMER TO EXPOSE THE AGGREGATE EMBEDDED IN THE PREVIOUS POUR. THE EXPOSED AGGREGATE SHALL PROTRUDE A MINIMUM OF 1/4 INCH. ALL SURFACES OF CONSTRUCTION JOINTS SHALL BE CLEANED AND LAITANCE REMOVED. IMMEDIATELY BEFORE NEW CONCRETE IS PLACED, ALL CONSTRUCTION JOINTS SHALL BE WETTED AND STANDING WATER REMOVED. VERTICAL CONSTRUCTION JOINTS IN WALLS SHALL BE HELD TO A MAXIMUM SPACING OF 60'−0". ALL CONSTRUCTION JOINTS IN SLABS, JOISTS, BEAMS, AND GIRDERS SHALL BE OFFSET A DISTANCE EQUAL TO TWICE THE WIDTH OF THE BEAM.

ACCORDANCE WITH THE TYPICAL SLAB ON DECK CONSTRUCTION JOINT DETAIL SHOWN ON THE STRUCTURAL DRAWINGS. BEAMS AND GIRDERS HAVE BEEN DESIGNED ASSUMING THE CONSTRUCTION JOINTS TO BE LOCATED IN THE MIDDLE THIRD OF THE BEAM, GIRDER, OR SLAB SPAN. ALL CONSTRUCTION, CONTROL, AND ISOLATION JOINTS FOR SLABS ON GRADE SHALL BE IN ACCORDANCE WITH THE TYPICAL SLAB ON GRADE DETAILS. THE CONTRACTOR SHALL SUBMIT THE PROPOSED LOCATIONS OF CONSTRUCTION JOINTS TO THE ENGINEER FOR ACCEPTANCE BEFORE STARTING CONSTRUCTION.

ELECTRICAL CONDUIT IN CONCRETE SLABS:

ELECTRICAL CONDUIT SHALL BE RIGID STEEL CONDUIT OR FLEXIBLE PLASTIC CONDUIT. ALUMINUM CONDUIT IS PROHIBITED. CONDUIT WITH A MAXIMUM OUTSIDE DIAMETER OF 1/6 TIMES THE SLAB THICKNESS MAY BE EMBEDDED IN ONE LAYER AT THE MID−DEPTH OF SLABS. MINIMUM CLEAR DISTANCE BETWEEN CONDUITS SHALL BE 3 TIMES CONDUIT DIAMETER. CONDUIT SHALL BE FIRMLY CHAIRED AND TIED TO PREVENT DISPLACEMENT DURING POURING. PLACE #3 AT 12 INCHES O.C. ADDITIONAL REINFORCING ABOVE AND BELOW, PERPENDICULAR TO THE CONDUIT. THE ADDED REINFORCING SHALL EXTEND 1'−0" PAST THE CONDUIT ON BOTH SIDES. FOR CONDUIT PLACED IN SLABS ON METAL DECKING, CONDUIT SHALL RUN IN THE METAL DECK FLUTES PER THE TYPICAL CONDUIT IN SLAB ON METAL DECK DETAIL.

CONCRETE INSERTS:

THIN SLAB TYPE INSERTS SHALL BE GALVANIZED AND HAVE THE FOLLOWING MINIMUM WORKING LOADS(A 4:1 RATIO OF ULTIMATE TO WORKING VALUES IS ASSUMED):

BOLT DIAMETER	WORKING LOAD SHEAR	TENSION
1/2"	1,000 LBS.	650 LBS.
5/8"	1,250 LBS.	700 LBS.
3/4"	1,600 LBS.	850 LBS.

COIL LOOP INSERTS SHALL BE GALVANIZED AND HAVE THE FOLLOWING MINIMUM WORKING LOADS(A 3:1 RATIO OF ULTIMATE TO WORKING VALUES IS ASSUMED):

BOLT DIAMETER	WORKING LOAD SHEAR	TENSION
1/2"	2,200 LBS.	2,820 LBS.
5/8"	3,000 LBS.	3,620 LBS.
3/4"	3,100 LBS.	3,660 LBS.

THREADED COIL RODS, COIL NUTS, ETC., USED IN CONJUNCTION WITH CONCRETE INSERTS, SHALL HAVE A WORKING LOAD EQUAL TO OR GREATER THAN THE CORRESPONDING CONCRETE INSERT. CONTRACTOR SHALL SUBMIT MANUFACTURER'S SIZE AND STRENGTH DATA PRIOR TO CONSTRUCTION TO THE STRUCTURAL ENGINEER THRU THE ARCHITECT. VALUES LISTED ABOVE ARE FOR RICHMOND STRUCTURAL CONNECTION INSERTS.

EXPANSION AND SCREW ANCHORS:

USE STUD TYPE EXPANSION ANCHOR WITH A SINGLE PIECE WEDGE ONLY WHERE NOTED ON PLANS. IF USE IS REQUESTED FOR OTHER THAN WHERE NOTED CONTACT STRUCTURAL ENGINEER THROUGH ARCHITECT FOR APPROVAL.

CONTRACTOR SHALL SUBMIT MANUFACTURER'S SIZE AND STRENGTH DATA TO ENGINEER THROUGH ARCHITECT PRIOR TO CONSTRUCTION. INSTALL ALL BOLTS AS OUTLINED IN MANUFACTURER'S SPECIFICATIONS, UTILIZING PROPER SIZE AND TYPE OF DRILL, CLEANING HOLE, DRIVING AND TIGHTENING BOLT.

IN CONCRETE:

ANCHORS USED MUST HAVE ICC APPROVAL AND INCLUDE HILTI KWIK BOLT TZ2 (ESR−4266), AND SIMPSON STRONG BOLT−2 (ESR−3037), AND DEWALT POWER−STUD+SD2 (ESR−2502), AND SIMPSON TITEN HD (ESR−2713), HILTI KWIK HUS−EZ (ESR−3027), AND DEWALT SCREW−BOLT+ (ESR−3889) OR APPROVED EQUAL.

IN MASONRY:

ANCHORS USED MUST HAVE ICC APPROVAL AND INCLUDE HILTI KWIK BOLT 3 (ESR−1385), AND SIMPSON STRONG BOLT−2 (ES−240), DEWALT POWER−STUD+SD1 (ESR−2966), HILTI KWIK HUS−EZ (ESR−3056) AND SIMPSON TITEN HD (ESR−1056), AND DEWALT SCREW−BOLT+ (ESR−4042) OR APPROVED EQUAL.

EPOXY ANCHORS IN CONCRETE AND MASONRY:

INJECTABLE ADHESIVE SHALL BE USED FOR INSTALLATION OF REINFORCING STEEL DOWELS OR THREADED ANCHOR RODS AND INSERTS INTO NEW OR EXISTING CONCRETE OR SOLID GROUTED CONCRETE MASONRY UNITS ONLY WHERE SPECIFIED ON PLANS. IF USE IS REQUESTED FOR OTHER THAN WHERE NOTED CONTACT STRUCTURAL ENGINEER THROUGH ARCHITECT FOR APPROVAL. ADHESIVE SHALL BE FURNISHED IN SIDE BY SIDE PACKS WHICH KEEP COMPONENT A AND COMPONENT B SEPARATE. USE ONLY INJECTION TOOLS AND STATIC MIXING NOZZLES RECOMMENDED BY MANUFACTURER. MANUFACTURER'S INSTRUCTIONS SHALL BE FOLLOWED.

IN CONCRETE:

ANCHORS USED MUST HAVE I.C.C. APPROVAL IN CRACKED CONCRETE AND INCLUDE SIMPSON SET−XP (ESR−2508), HILTI HIT−RE500−V3 (ESR−3814), DEWALT PURE110+ (ESR−3298) OR APPROVED EQUIVALENT. THE USE OF ANY EPOXY ANCHOR MUST BE APPROVED BY THE ENGINEER OF RECORD PRIOR TO INSTALLATION.

IN MASONRY:

ANCHORS USED MUST HAVE ICC APPROVAL AND INCLUDE SIMPSON SET (ESR−1772) AND HILTI HIT−HY 270 MAX (ESR−4143) AND DEWALT AC100+GOLD (ESR−3200) OR APPROVED EQUIVALENT. THE USE OF ANY EPOXY ANCHOR MUST BE APPROVED BY THE ENGINEER OR RECORD PRIOR TO INSTALLATION.

1. ADHESIVE ANCHORS INSTALLED IN HORIZONTAL TO VERTICALLY OVERHEAD ORIENTATION TO SUPPORT SUSTAINED TENSION LOADS SHALL BE DONE BY A CERTIFIED ADHESIVE ANCHOR INSTALLER (AAI) AS CERTIFIED THROUGH ACI (ACI 318−11 D.9.2.2) / (ACI 318−14 17.8.2.2) / (ACI 318−19 17.2.3) PROOF OF CURRENT CERTIFICATION SHALL BE SUBMITTED TO THE ENGINEER FOR APPROVAL PRIOR TO COMMENCEMENT OF INSTALLATION.
2. ADHESIVE ANCHORS MUST BE INSTALLED IN CONCRETE AGED A MINIMUM OF 21 DAYS (ACI 318−11 D.2.2) / (ACI 318−14 17.1.2) / (ACI 318−19 17.2.2).
3. THE REMOVAL AND RESETTING OF POST INSTALLED ANCHORS IS PROHIBITED (ACI 318−19 17.3.1).
4. PROVIDE SPECIAL INSPECTION FOR ALL MECHANICAL AND ADHESIVE ANCHORS PER THE APPLICABLE BUILDING CODE AND PER THE CURRENT ICC−ES REPORT (IBC 2012, 2015, 2018 TABLE 1705.3 TYPE 4, NOTE B).

STRUCTURAL FILL:

ALL FILL PLACED TO SUPPORT SLABS ON GRADE, BEHIND PERMANENT WALLS, AND AROUND ALL DRAINS SHALL CONSIST OF WELL GRADED, GRANULAR MATERIAL PER THE SPECIFICATIONS. SOILS FOR STRUCTURAL FILL SHALL BE APPROVED BY THE GEOTECHNICAL ENGINEER. STRUCTURAL FILL SHALL BE PLACED ON SOUND NATIVE MATERIAL. PROOF−ROLL CUT AREAS WHICH PROVIDE SUPPORT FOR PERMANENT STRUCTURES. AREAS WHICH ARE EXCESSIVELY YIELDING, AS DETERMINED BY THE CONTINUOUS OBSERVATION OF THE GEOTECHNICAL ENGINEER, SHALL BE OVEREXCAVATED AND REPLACED WITH STRUCTURAL FILL. STRUCTURAL FILL SHALL BE PLACED PER THE SPECIFICATION. USE LEAN CONCRETE FILL BELOW ALL PIPES EXISTING OUT OF BASEMENT WALL, FULL HEIGHT OF WALL. CONCRETE SHALL CONTAIN 2 SACKS OF CEMENT PER YARD.

LATERAL PRESSURE ON SUBGRADE WALLS:

THE DESIGN PRESSURES FOR SUBGRADE WALLS ARE BASED ON A "DRAINED" CONDITION. SEE CIVIL AND MECHANICAL DRAWINGS FOR SUBGRADE DRAINAGE SYSTEM. SEE GEOTECHNICAL REPORT FOR COMPACTION REQUIREMENTS AT SUBGRADE WALLS. SUBGRADE WALLS AND SUPPORTING SLABS SHALL HAVE ATTAINED THEIR FULL CONCRETE STRENGTH BEFORE PLACING ANY BACKFILL U.N.O. THE CONTRACTOR SHALL PROVIDE TEMPORARY BRACES FOR WALLS IF BACKFILL IS PLACED BEFORE WALLS AND SLABS ACHIEVE FULL CONCRETE STRENGTH.

NOTES ON CRACKING OF CONCRETE STRUCTURES:

CRACKING IS INHERENT TO THE MATERIAL PROPERTIES OF CONCRETE CONSTRUCTION (INCLUDING POST−TENSIONED CONCRETE STRUCTURES). WHILE EVERY EFFORT HAS BEEN MADE TO MINIMIZE THE EFFECTS OF UNSIGHTLY CRACKING, THE PRESENCE OF CRACKS ARE NORMAL AND UNAVOIDABLE. THE DESIGN OF THE CONCRETE STRUCTURAL ITEMS HAVE BEEN ANALYZED USING A "CRACKING SECTION." THE PRESENCE OF THE CRACKING SHOULD NOT BE CONSIDERED DETRIMENTAL TO THE STRUCTURE. CRACKS LARGER THAN 10 MILS SHALL BE FILLED AND SEALED WITH AN APPROVED CRACK FILLER TO PREVENT FUTURE DETERIORATION. ALLOWANCE SHALL BE MADE IN THE CONSTRUCTION BUDGET FOR SEALING OF SUCH CRACKS. IN SOME CASE, CRACKS DO NOT APPEAR UNTIL WELL AFTER CONSTRUCTION HAS BEEN COMPLETED. IT IS THE RESPONSIBILITY OF THE OWNER TO MAINTAIN THE STRUCTURE PROPERLY OVER THE LIFE OF THE STRUCTURE. CONCRETE CRACKS, SHOULD THEY OCCUR, SHALL BE FILLED AND SEALED TO PREVENT PREMATURE DETERIORATION OF THE STRUCTURE.

Greenwood Village, Colorado 80111
Phone: (720) 799-1058
Email: cadd@pkastructural.com
Website: www.pkastructural.com

SHOP DRAWINGS:

SHOP DRAWINGS SHALL BE SUBMITTED FOR ALL STRUCTURAL ITEMS IN ADDITION TO ITEMS REQUIRED BY ARCHITECTURAL SPECIFICATIONS.

THE CONTRACTOR SHALL REVIEW ALL SHOP DRAWINGS PRIOR TO SUBMITTAL. ITEMS NOT IN ACCORDANCE WITH CONTRACT DOCUMENTS SHALL BE FLAGGED UPON HIS REVIEW.

VERIFY ALL DIMENSIONS WITH ARCHITECTURAL DRAWINGS AND ALL FINISHED GRADE WITH CIVIL DRAWINGS.

ANY CHANGES, SUBSTITUTIONS, OR DEVIATIONS FROM CONTRACT DOCUMENTS SHALL BE CLOUDED BY MANUFACTURER OR FABRICATOR. ANY OF THE AFOREMENTIONED WHICH ARE NOT CLOUDED OR FLAGGED BY SUBMITTING PARTIES, SHALL NOT BE CONSIDERED APPROVED AFTER ENGINEER'S REVIEW, UNLESS NOTED ACCORDINGLY.

THE ENGINEER HAS THE RIGHT TO APPROVE OR DISAPPROVE ANY CHANGES TO CONTRACT DOCUMENTS AT ANYTIME BEFORE OR AFTER SHOP DRAWING REVIEW.

THE SHOP DRAWINGS DO NOT REPLACE THE CONTRACT DOCUMENTS. ITEMS OMITTED OR SHOWN INCORRECTLY AND ARE NOT FLAGGED BY THE STRUCTURAL ENGINEER OR ARCHITECT ARE NOT TO BE CONSIDERED CHANGES TO CONTRACT DOCUMENTS. IT IS THE CONTRACTOR'S RESPONSIBILITY TO MAKE SURE ITEMS ARE CONSTRUCTED PER THE CONTRACT DOCUMENTS.

THE ADEQUACY OF ENGINEERING DESIGNS AND LAYOUT PERFORMED BY OTHERS RESTS WITH THE DESIGNING OR SUBMITTING AUTHORITY.

REVIEWING IS INTENDED ONLY AS AN AID TO THE CONTRACTOR IN OBTAINING CORRECT SHOP DRAWINGS. RESPONSIBILITY FOR CORRECTNESS SHALL REST WITH THE CONTRACTOR.

GENERAL:

ENTIRE CONTRACT DOCUMENTS SHALL BE USED TO CONSTRUCT BUILDING. SOME CRITICAL ITEMS REQUIRED BY OTHER DISCIPLINES MAY NOT BE SHOWN ON STRUCTURAL DRAWING (I.E. WALL, FLOOR AND ROOF OPENINGS, ARCHITECTURAL, MECHANICAL AND PLUMBING LOADS, SUPPORT PLATES ETC.)

ITEMS SHOWN BY OTHER DISCIPLINES WITH REFERENCE TO STRUCTURAL DRAWING BUT NOT SHOWN ON THESE STRUCTURAL DOCUMENTS SHALL BE CONSIDERED DESIGN BUILD ITEMS. CONTRACTOR SHALL SUBMIT DESIGN BY OTHERS FOR REVIEW.

THE STRUCTURAL CONSTRUCTION DOCUMENTS REPRESENT THE FINISHED STRUCTURE. THEY DO NOT INDICATE THE METHOD OF CONSTRUCTION. THE CONTRACTOR SHALL PROVIDE ALL MEASURES NECESSARY TO PROTECT THE STRUCTURE DURING CONSTRUCTION. SUCH MEASURES SHALL INCLUDE, BUT NOT BE LIMITED TO, BRACING, SHORING FOR LOADS DUE TO CONSTRUCTION EQUIPMENT, ETC. THE STRUCTURAL ENGINEER SHALL NOT BE RESPONSIBLE FOR THE CONTRACTOR'S MEANS, METHODS, TECHNIQUES, SEQUENCES FOR PROCEDURE OF CONSTRUCTION, OR THE SAFETY PRECAUTIONS AND THE PROGRAMS INCIDENT THERETO (NOR SHALL OBSERVATION VISITS TO THE SITE INCLUDE INSPECTION OF THESE ITEMS).

CONSTRUCTION MATERIALS SHALL BE SPREAD OUT IF PLACED ON FRAMED CONSTRUCTION. LOAD SHALL NOT EXCEED THE DESIGN LIVE LOAD PER SQUARE FOOT.

WHERE REFERENCE IS MADE TO VARIOUS TEST STANDARDS FOR MATERIALS, SUCH STANDARDS SHALL BE THE LATEST EDITION AND/OR ADDENDA.

ESTABLISH AND VERIFY ALL OPENINGS AND INSERTS FOR ARCHITECTURAL, MECHANICAL, PLUMBING AND ELECTRICAL WITH APPROPRIATE TRADES, DRAWINGS AND SUBCONTRACTORS PRIOR TO CONSTRUCTION.

OPTIONS ARE FOR CONTRACTOR'S CONVENIENCE. IF THE CONTRACTOR CHOOSES AN OPTION, THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL NECESSARY CHANGES AND SHALL COORDINATE ALL DETAILS.

NOTES AND DETAILS ON DRAWINGS SHALL TAKE PRECEDENCE OVER GENERAL STRUCTURAL NOTES AND TYPICAL DETAILS. WHERE NO DETAILS ARE SHOWN, CONSTRUCTION SHALL CONFORM TO SIMILAR WORK ON THE PROJECT.

ALL DIMENSIONS SHOWN (INCLUDING ELEVATIONS) ON STRUCTURAL DRAWINGS ARE TO ASSIST CONTRACTOR IN VERIFICATION. SCALING DIMENSIONS FROM DRAWINGS IS NOT PERMITTED. LOCATION OF ALL ITEMS SHALL BE DETERMINED BY DIMENSIONS OR NOTES ONLY; DO NOT USE GRAPHIC APPEARANCE TO ASSUME SPECIFIC LOCATIONS.

CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFICATION OF ALL DIMENSIONS WITH ARCHITECTURAL AND FINISHED GRADE WITH CIVIL DRAWINGS PRIOR TO START OF CONSTRUCTION. RESOLVE ANY DISCREPANCY WITH THE ARCHITECT.

TYPICAL DETAILS MAY NOT NECESSARILY BE CUT ON PLANS, BUT APPLY UNLESS NOTED OTHERWISE.

WHERE DISCREPANCIES OCCUR BETWEEN PLANS, DETAILS, GENERAL STRUCTURAL NOTES AND SPECIFICATIONS, THE GREATER REQUIREMENTS SHALL GOVERN.

ANY ENGINEERING DESIGN, PROVIDED BY OTHERS AND SUBMITTED FOR REVIEW, SHALL BEAR THE SEAL OF AN ENGINEER REGISTERED IN THE STATE OF JURISDICTION.

SUPPLIER OF ENGINEERED STRUCTURAL COMPONENTS (I.E. STEEL JOISTS, STAIRS, PRECAST ITEMS) SHALL BE RESPONSIBLE FOR COMPLETE DESIGN AND SHALL USE ENTIRE CONTRACT DOCUMENTS TO INCLUDE ALL LOADS AND DETAIL REQUIREMENTS FROM ALL DISCIPLINES. SUPPLIER SHALL PROVIDE ADDITIONAL MATERIAL REQUIRED TO MEET ALL THEIR REQUIREMENTS FOR INSTALLATION (I.E. WIDER BEARING PLATES, SHIMS, ERECTION BOLTS ETC.).

STRUCTURAL STEEL SUPPLIER SHALL FURNISH BOLTS FOR OSHA CONNECTIONS (SEE DRAWINGS FOR DETAILS).

WALL SHORING SHALL BE INSTALLED PRIOR TO BACKFILLING BEHIND ALL BUILDING RETAINING WALLS, UNLESS ALL RESTRAINING SLABS ARE INSTALLED. USE HANDTAPPING ONLY WHEN WITHIN 8'-0", OR WITHIN HALF THE WALL HEIGHT OF BACKFILLED WALL.

CONTINUOUS FOUNDATION DRAIN PIPES (FRENCH DRAINS) OR WEEP HOLES SHALL BE PROVIDED BEHIND ALL BASEMENT WALLS AND ALL EXTERIOR RETAINING WALLS THAT RETAIN MORE THAN 3'-0" OF SOIL. WEEP HOLES WHERE USED SHALL BE 2" IN DIAMETER AT 6'-0" O.C. MAXIMUM.

BUILDING TOLERANCES:

STANDARD TOLERANCES SHALL BE BASED ON THE REQUIREMENTS OF THE AISC CODE OF STANDARD PRACTICE AND ACI 117, STANDARD SPECIFICATIONS FOR TOLERANCES FOR CONCRETE CONSTRUCTION AND MATERIALS.

SEQUENCING CONSTRUCTION AND LATERAL STABILITY:

THE STRUCTURAL COMPONENTS BY THEMSELVES ARE A NON-SELF-SUPPORTING STRUCTURE. LATERAL FORCES DUE TO WIND, EARTHQUAKE, OR SOIL ARE CARRIED BY THE ROOF AND FLOOR DIAPHRAGMS TO THE LATERAL SYSTEM. CERTAIN ELEMENTS SHOWN ON OR LOCAL STABILITY OF OTHER ELEMENTS (SUCH AS BEAMS, COLUMNS, AND WALLS). IF, DUE TO SEQUENCING OF CONSTRUCTION, THESE STABILITY ELEMENTS ARE NOT IN PLACE, THE CONTRACTOR SHALL RETAIN A LICENSED STRUCTURAL ENGINEER WHO SHALL INVESTIGATE WHERE TEMPORARY SHORING/BRACING IS REQUIRED, AND SHALL DESIGN THIS TEMPORARY SHORING/BRACING. THE CONTRACTOR SHALL PROVIDE THIS SHORING/BRACING UNTIL THE REQUIRED STRUCTURAL ELEMENTS AND THEIR CONNECTIONS HAVE BEEN INSTALLED AND REACH THEIR FINAL DESIGN STRENGTHS.

MISCELLANEOUS:

REFER TO ARCHITECTURAL, MECHANICAL, ELECTRICAL, CIVIL, ELEVATOR, OR OTHER SPECIALTY ENGINEERING DRAWINGS FOR DIMENSIONS NOT SHOWN, INCLUDING BUT NOT LIMITED TO: SIZE AND LOCATION OF CURBS, EQUIPMENT HOUSEKEEPING PADS, WALL AND FLOOR OPENINGS, BLOCKOUTS, FLOOR DEPRESSIONS, SUMPS, DRAINS, ANCHOR BOLTS, EMBEDDED ITEMS, ARCHITECTURAL TREATMENT, ETC. CONTRACTOR SHALL VERIFY DIMENSIONS AND RESOLVE DISCREPANCIES OR CONFLICTS PRIOR TO CONSTRUCTION. WHERE SECTIONS ARE INDICATED ON THE PLAN BY A NUMBER AND A DRAWNG NUMBER THUS, 1/S5.01, THE INDICATED SECTION (1) IS SHOWN ON STRUCTURAL DRAWING S5.01.

ALL WINDOW SYSTEMS SHALL BE DESIGNED TO ACCOMMODATE VERTICAL DEFLECTION OF THE STRUCTURE OF 1/2" MINIMUM LIVE LOAD DEFLECTION, UNLESS GREATER VALUE IS NOTED ON PLANS OR DETAILS.

FLOOR FLATNESS/LEVELNESS SHALL MEET ARCHITECTURAL SPECIFICATIONS (1/4" IN 10 FOOT MINIMUM LEVELNESS UNLESS TIGHTER REQUIREMENT IN SPECIFICATIONS) IN HEIGHT FOR ALL STRUCTURAL SYSTEMS. CONTRACTOR SHALL INCLUDE COST FOR LEVELING ALL FLOORS. FOR ESTIMATING PURPOSES ONLY, ASSUME 1/2" THICK LEVELING AGENT OVER 15% OF FLOOR AREA.

FABRICATOR APPROVAL:

SPECIAL INSPECTIONS NOTED ABOVE APPLY TO SHOP FABRICATED ASSEMBLIES IN ADDITION TO ON-SITE WORK UNLESS THE FABRICATOR IS AN "APPROVED FABRICATOR" AS DEFINED IN 2022 CBC.

STRUCTURAL OBSERVATION:

ENGINEER OF RECORD SHALL PROVIDE VISUAL OBSERVATION OF THE STRUCTURAL SYSTEM, FOR GENERAL CONFORMANCE TO THE APPROVED PLANS AND SPECIFICATIONS, AT SIGNIFICANT CONSTRUCTION STAGES AND AT THE COMPLETION OF THE STRUCTURAL SYSTEM. CONTRACTOR IS REQUIRED FOR COORDINATING THE TIMING OF SITE VISITS AND SHALL INCLUDE A MINIMUM OF 3 VISITS. THESE VISITS ARE TO BE PAID BY THE CONTRACTOR. STRUCTURAL OBSERVATION DOES NOT INCLUDE OR WAIVE THE RESPONSIBILITY FOR THE INSPECTIONS REQUIRED BY THE BUILDING CODE (NOTED ABOVE).

INSTRUCTIONS TO BIDDERS CONTINGENCIES:

1. UNDER NO CIRCUMSTANCES SHALL THESE DRAWINGS BE "FINAL BID" UNTIL THE PROJECT IS FULLY PERMITTED.
2. ALL PRELIMINARY PRICING EFFORTS SHALL BE CONSIDERED TO BE ESTIMATES ONLY AND SHALL INCLUDE THE NECESSARY CONTINGENCIES, ALLOWANCES, ALTERNATES, ETC. AS APPROPRIATE TO ACCOUNT FOR MODIFICATIONS AND ADDITIONS THAT WILL OCCUR TO THE DRAWINGS DURING THE FINALIZATION OF THE DESIGN AND PERMITTING.
3. THE OWNER OR CONTRACTOR SHALL UTILIZE THE FOLLOWING MINIMUM CONTINGENCIES FOR EACH OF THE STRUCTURAL ELEMENT COSTS TO BE USED AT THE SOLE DISCRETION OF THE STRUCTURAL ENGINEER:

CONSTRUCTION DOCUMENTS/FINAL BID 3% MINIMUM

ALL OF THE "FINAL BID" CONTINGENCIES NOT USED BY THE STRUCTURAL ENGINEER SHALL BE REFUNDED TO THE OWNER PRIOR TO THE CLOSEOUT OF THE PROJECT.
4. ANY MODIFICATIONS, DELETIONS OR ELIMINATIONS TO THE STRUCTURAL BIDDING AND CONTINGENCY REQUIREMENTS, WITHOUT THE CONSENT OF THE STRUCTURAL ENGINEER, SHALL AUTOMATICALLY INDEMNIFY THE STRUCTURAL ENGINEER OF ANY COSTS THAT MAY ARISE DURING THE DESIGN AND CONSTRUCTION OF THE PROJECT.
5. WHERE DISCREPANCIES OCCUR WITHIN THE DRAWINGS THE CONTRACTOR WILL EITHER RESOLVE THE DISCREPANCIES WITH THE ARCHITECT BEFORE BIDDING OR INCLUDE THE GREATER COST ITEM IN THE BID AND RESOLVE THE DISCREPANCY PRIOR TO CONSTRUCTION.

NOTE TO CONTRACTOR REGARDING PRICING/BIDDING OF CITY SUBMITTAL DRAWINGS:

THESE DRAWINGS HAVE BEEN PREPARED FOR CITY SUBMITTAL, AND ARE NOT TO BE CONSIDERED 100% CONSTRUCTION DOCUMENTS UNTIL CITY PLAN REVIEW HAS BEEN COMPLETED AND FINAL BUILDING PERMIT HAS BEEN ISSUED. IF THESE DOCUMENTS ARE TO BE USED FOR PRICING, BID, OR STEEL MILL ORDER, THE CONTRACTOR SHALL PROVIDE IN THE PROJECT BUDGET AN ALLOWANCE FOR POTENTIAL CHANGES BETWEEN THE CITY SUBMITTAL DRAWINGS AND THE FINAL APPROVED SUBMITTAL AND CONSTRUCTION DOCUMENTS. ADDITIONALLY, MISCELLANEOUS ITEMS MAY NOT BE SHOWN ON THESE DRAWINGS. THESE ITEMS INCLUDE, BUT ARE NOT LIMITED TO, ELEVATOR AND EQUIPMENT SUPPORTS, BLOCKOUTS, ETC. REFER TO ARCHITECTURAL, MECHANICAL, ELECTRICAL, AND OTHER SPECIALTY DRAWINGS FOR ADDITIONAL INFORMATION. THE CONSTRUCTION BUDGET SHALL INCLUDE THESE ITEMS. THE STRUCTURAL ENGINEER WILL NOT BE RESPONSIBLE FOR CHANGE ORDER COSTS INCURRED (INCLUDING DISCARDED MATERIAL COSTS) DUE TO BIDDING OR STEEL MILL ORDER FROM THESE DRAWINGS. CONTACT STRUCTURAL ENGINEER FOR CLARIFICATION IF THE SCOPE AND QUANTITY OF ALLOWANCE TO BE CARRIED IS NOT CLEAR.

CONTRACTOR RESPONSIBILITY:

EACH CONTRACTOR OR SUB-CONTRACTOR RESPONSIBLE FOR THE CONSTRUCTION OF THE WIND AND/OR SEISMIC RESISTING SYSTEM THAT IS LISTED IN THE STATEMENT OF SPECIAL INSPECTIONS SHALL SUBMIT A WRITTEN STATEMENT OF RESPONSIBILITY TO THE BUILDING OFFICIAL AND THE OWNER PRIOR TO THE COMMENCEMENT OF WORK REQUIRING SPECIAL INSPECTION. THE CONTRACTOR'S STATEMENT OF RESPONSIBILITY SHALL CONTAIN ACKNOWLEDGMENT OF AWARENESS OF THE SPECIAL REQUIREMENTS CONTAINED IN THE STATEMENT OF SPECIAL INSPECTIONS.

DEFERRED SUBMITTALS: (PER 2012 IBC 107.3.4.1)

FOR THE PURPOSES OF THIS SECTION, DEFERRED SUBMITTALS ARE DEFINED AS THOSE PORTIONS OF THE DESIGN WHICH ARE NOT SUBMITTED AT THE TIME OF THE APPLICATION AND THAT ARE TO BE SUBMITTED TO THE BUILDING OFFICIAL WITHIN A SPECIFIED PERIOD.

DOCUMENTS FOR DEFERRED SUBMITTAL ITEMS SHALL BE SUBMITTED TO THE PROFESSIONAL IN RESPONSIBLE CHARGE FOR REVIEW. THE CONTRACTOR SHALL FORWARD THE REVIEWED DOCUMENTS TO BUILDING OFFICAL WITH A NOTATION INDICATING THAT THE DEFERRED SUBMITTAL DOCUMENTS HAVE BEEN REVIEWED AND BEEN FOUND TO BE IN GENERAL CONFORMANCE TO THE DESIGN OF THE BUILDING. THE DEFERRED SUBMITTAL ITEMS SHALL NOT BE INSTALLED UNTIL THE DESIGN AND SUBMITTAL DOCUMENTS HAVE BEEN APPROVED BY THE BUILDING OFFICIAL.

DEFERRED SUBMITTAL ITEMS:

ALUMINUM WALKWAY
GRATING
HANDRAILS/STAIRS
SHORING EXCAVATIONS
EQUIPMENT ATTACHMENTS, INCLUDING ADD'L FRAMING REQ'D

SPECIAL INSPECTION:

PER IBC CHAPTER 17, SPECIAL INSPECTION IS REQUIRED FOR THE FOLLOWING ITEMS:

CONCRETE: VERIFICATION AND INSPECTION	CONTINUOUS	PERIODIC	REFERENCED STANDARD (NOTE 1)	IBC REFERENCE
1. Inspection of reinforcing steel, including prestressing tendons, and placement.	–	X	ACI 318: Ch. 20, 25.2 25.3, 26.6.1–26.6.3	1908.4
2. Reinforcing bar welding: a. Verify weldability of reinforcing bars other than ASTM A706; b. Inspect single-pass fillet welds, maximum 5/16"; and c. Inspect all other welds.	– – X	X X –	AWS D1.4 ACI 318: 26.6.4	---
3. Inspect anchors to be installed in concrete prior to and during placement of concrete where allowable loads have been increased or where strength design is used.	–	X	ACI 318: 17.8.2	---
4. Inspection of anchors post-installed in hardened concrete members. a. Adhesive anchors installed in horizontally or upwardly inclined orientations to resist sustained tension loads. b. Mechanical anchors and adhesive anchors not defined in 4.a.	X –	– X	ACI 318: 17.8.2.4 ACI 318: 17.8.2	---
5. Verifying use of required design mix.	–	X	ACI318: Ch. 19, 26.4.3, 26.4.4	1904.1, 1904.2 1908.2, 1908.3
6. Prior to concrete placement, fabricate specimens for strength tests, per form slump and air content tests, and determine the temperature of the concrete.	X	–	ASTM C172 ASTM C31 ACI 318: 26.4, 26.12	1908.10
7. Inspection of concrete and shotcrete placement for proper application techniques.	X	–	ACI 318: 26.5	1908.6, 1908.7, 1908.8
8. Verify maintenance of specified curing temperature and techniques.	–	X	ACI 318: 26.5.3–26.5.5	1908.9
9. Inspect prestressed concrete for: a. Application of prestressing forces; and b. Grouting of bonded prestressing tendons	X X	– –	ACI 318: 26.10	--- ---
10. Inspect erection of precast concrete members.	–	X	ACI 318: Ch. 26.8	---
11. Verification of in-situ concrete strength, prior to stressing of tendons in post-tensioned concrete and prior to removal of shores and forms from beams and structural slab.	–	X	ACI 318: 26.11.2	---
12. Inspect formwork for shape, location and dimensions of the concrete member being formed.	–	X	ACI 318: 26.11.1.2(b)	---

NOTES:
1. WHERE APPLICABLE, SEE ALSO SECTION 1707.1, SPECIAL INSPECTION FOR SEISMIC RESISTANCE.
2. TABLES TAKEN DIRECTLY FROM IBC FOR REFERENCE.

MASONRY INSPECTION TASK	FREQUENCY (a) LEVEL 3	REFERENCE FOR CRITERIA TMS 402	TMS 602	IBC REFERENCE
1. As masonry construction begins, verify that the following are in compliance: a. Proportions of site-prepared mortar. b. Grade, type and size of reinforcement connectors and anchor bolts. c. Sample panel construction.	P P C		ART. 2.1, 2.6A, & 2.6C ART. 3.4 ART. 1.6D	
2. Prior to grouting, verify that the following are in compliance: a. Grout space. b. Placement of reinforcement, connectors, & anchor bolts. c. Proportions of site-prepared grout.	C C P	SEC. 6.1, 6.3.1, 6.3.6, & 6.3.7	ART. 3.2D & 3.2F ART. 3.2E & 3.4 ART. 2.6B & 2.4 G.1.b	
3. Verify compliance of the following during construction: a. Materials and procedures with the approved submittals. b. Placement of masonry units and mortar joint construction. c. Size and location of structural members. d. Type, size, and location of anchors, including other details of anchorage of masonry to structural members, frames, or other construction. e. Welding of reinforcement. f. Preparation, construction, and protection of masonry during cold weather (temperature below 40°F (4.4°C) or hot weather (temperature above 90°F (32.2°C). g. Placement of grout is in compliance.	P P P C C P C	SEC. 1.2.1(e), 6.2.1, & 6.3.1 SEC. 6.1.6.1.2	ART. 1.5 ART. 3.3B ART. 3.3F ART. 1.8C & 1.8D ART. 3.5	1705.04, 2104 & 2105
4. Observe preparation of grout specimens, mortar specimens, and/or prisms.	C		ART. 1.4 B.2.a.3, 1.4 B.2.b.3, 1.4 B.2.c.3, 1.4 b.3, & 1.4 B.4	

NOTES:
(a) Frequency refers to the frequency of inspection, which may be continuous during the listed task or periodically during the listed task, as defined in the table.
NR=Not Required, P=Periodic, C=Continuous
(b) Required for the first 5000 sq. ft. (465 sq. m.) of AAC masonry.
(c) Required after the first 5000 sq. ft. (465 sq. m.) of AAC masonry.

STEEL: VERIFICATION AND INSPECTION	CONTINUOUS	PERIODIC	REFERENCED STANDARD (NOTE1)	IBC REFERENCE
1. Material verification of high-strength bolts, nuts and washers: a. Identification markings to conform to ASTM standards specified in the approved construction documents. b. Manufacturer's certificate of compliance required.	– –	X X	APPLICABLE ASTM MATERIAL SPECS AISC 360, SEC. A3.3	
2. Inspection of high-strength bolting: a. Bearing-type connections. AISC 360, Section M2.5 1704.3.3	–	X		
3. Material verification of structural steel: a. Identification markings to conform to ASTM standards specified in the approved construction documents. b. Manufacturers' certified mill test reports.	–	–	AISC 360, SEC. M2.5 ASTM A 6 OR ASTM A 568	
4. Material verification of weld filler materials: a. Identification markings to conform to AWS specification in the approved construction documents. b. Manufacturer's certificate of compliance required.	– –	– –	AISC 360, SEC. A3.5	
5. Inspection of welding: a. Structural steel: 1) Complete and partial penetration groove welds. 2) Multipass fillet welds. 3) Single-pass fillet welds > 5/16" 4) Single-pass fillet welds = 5/16" 5) Floor and roof deck welds. b. Reinforcing steel: 1) Verification of weld ability of reinforcing steel other than ASTM A 706. 2) Reinforcing steel-resisting flexural and Axial forces in intermediate and special Moment frames, and boundary elements of Special reinforced concrete shear walls and shear reinforcement. 3) Shear reinforcement. 4) Other reinforcing steel.	– X X – – – – X X –	– – – X X – – X – X	AWS D1.1 AWS D1.1 AWS D1.1 AWS D1.1 AWS D1.3 AWS D1.4 ACI 318: 3.5.2	
6. Inspection of steel frame joint details for compliance with approved construction documents: a. Details such as bracing and stiffening. b. Member locations. c. Application of joint details at each connection.	– – – –	X – – –		

NOTES:
1. WHERE APPLICABLE SEE ALSO SECTION 1701.1, SPECIAL INSPECTION FOR SEISMIC RESISTANCE.
2. TABLES TAKEN DIRECTLY FROM IBC FOR REFERENCE.

STEEL: CONSTRUCTION OTHER THAN STRUCTURAL STEEL: VERIFICATION AND INSPECTION	CONTINUOUS	PERIODIC	REFERENCED STANDARD (NOTE1)	IBC REFERENCE
1. Material verification of cold-formed steel deck: a. Identification markings to conform to ASTM standards specified in the approved construction documents. b. Manufacturer's certified test reports.	– –	X	APPLICABLE ASTM MATERIAL STANDARDS	
2. Inspection of welding: a. Cold formed steel deck: 1) Floor and roof deck welds. b. Reinforcing steel: 1) Verification of weldability of reinforcing steel other than ASTM A 706. 2) Reinforcing steel resisting flexural and axial forces in intermediate and special moment frames, and boundary elements of special structural walls of concrete and shear reinforcement. 3) Shear reinforcement. 4) Other reinforcing steel.	– – X – X	X X – X –	AWS D1.3 ACI 318: 3.5.2 AWS D1.4	
SOILS: 1. Verify materials below shallow foundations are adequate to achieve the design bearing apacity. 2. Verify excavations are extended to proper depth and have reached proper material. 3. Perform classification and testing of compacted fill materials. 4. Verify use of proper materials, densities and lift thicknesses during placement and compaction of compacted fill. 5. Prior to placement of compacted fill, inspect subgrade and verify that site has been properly prepared. Not the responsibility of the structural engineer. Special inspection certificate to be completed by geotechnical engineer.	– – – X –	X X X – X		
EXPANSION, SCREW, AND EPOXY BOLTS: 1. During placement of all expansion, screw, & epoxy bolts, for visual verification of hole diameter and depth and placement of bolt and/or epoxy.	–	X		

DUTIES AND RESPONSIBILITIES OF THE SPECIAL INSPECTOR:

A) THE SPECIAL INSPECTOR SHALL OBSERVE THE WORK ASSIGNED TO BE CERTAIN IT CONFORMS WITH THE APPROVED DESIGN DRAWINGS AND SPECIFICATION.

B) THE SPECIAL INSPECTOR SHALL FURNISH INSPECTION REPORTS TO THE BUILDING OFFICIAL, AND TO THE ENGINEER.

C) UPON COMPLETION OF THE ASSIGNED WORK THE ENGINEER OR ARCHITECT SHALL COMPLETE AND SIGN THE APPROPRIATE FORMS CERTIFYING THAT TO THE BEST OF HIS KNOWLEDGE THE WORK IS IN CONFORMANCE WITH THE APPROVED PLANS AND SPECIFICATIONS AND THE APPLICABLE WORKMANSHIP PROVISIONS OF THE CODE.

9. 6"x16 GAGE (600 S200).
10. CONT. 1 #5 AT H.S.

CF3 TYPICAL STEEL STUD ATTACHMENT

NO SCALE

NOTES:
1. CONT. 16 GAGE "UNPUNCHED" STEEL TRACK. FOR ATTACHMENT SEE DETAIL 40.
2. STEEL STUD WALL.
3. USE 1/2"ø PUDDLE WELD AT 16" O.C. WHERE TRACK IS INSTALLED ON STEEL DECK (ROOF CONDITIONS).
4. STEEL CLIP ANGLE 4"x4"x12 GA. x 4" LONG AT EACH STUD.
5. PROVIDE 1" VERT. SLOTTED HOLE WHERE STUDS ARE FULL FLOOR HEIGHT.
6. HILTI SHOT PIN TO BOTTOM OF CONCRETE SLAB.
7. STEEL MEMBER (BENT PLATE AND BEAM FLANGE SHOWN OR CONTINUOUS EDGE ANGLE AT CONCRETE SLAB).
8. ALTERNATE TO WELD AT STUD TO CLIP ANGLE CONNECTION – 4 – #10 x 3/4" LONG SELF– TAPPING TEK SCREWS.
9. DEFLECTION TRACK TO ALLOW VERTICAL MOVEMENT – USE (2)– 16 GA. TRACKS BOTTOM TRACKS TO HAVE 2" LEGS. (ALLOW 3/4" DEFLECTION).
10. #10 x 3/4" LONG SELF–TAPPING SCREW EACH SIDE.

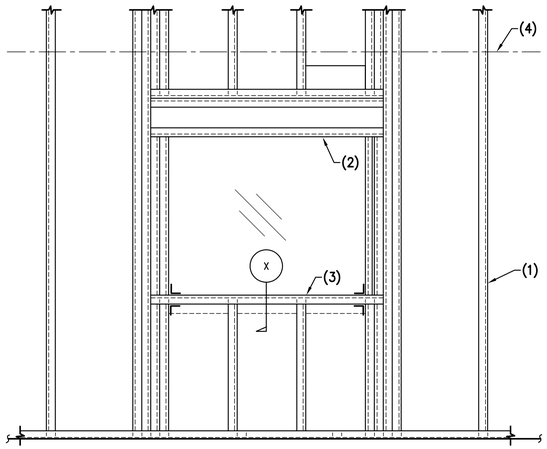
COLD FORMED STRUCTURAL STEEL FRAMING:

ALL COLD–FORMED STEEL FRAMING SHALL BE DESIGNED, FABRICATED AND ERECTED IN ACCORDANCE WITH MANUFACTURER'S RECOMMENDATIONS AND IN ACCORDANCE WITH THE LATEST EDITION OF "SPECIFICATIONS FOR THE DESIGN OF COLD–FORMED STEEL STRUCTURAL MEMBERS" BY THE AMERICAN IRON AND STEEL INSTITUTE.

STEEL FOR 14 AND 16 GAGE STUDS AND JOISTS, AND FOR ALL DIAGONAL TENSION STRAPS SHALL HAVE A MINIMUM YIELD STRENGTH OF 50 KSI. STEEL FOR ALL 18 AND 20 GAGE STUDS AND JOISTS, AND FOR ALL GAGES OF TRACK, ACCESSORIES AND BRIDGING SHALL HAVE A MINIMUM YIELD STRENGTH OF 33 KSI. STEEL SHALL BE GALVANIZED AT LOCATIONS EXPOSED TO WEATHER AND WHEREVER NOTED.

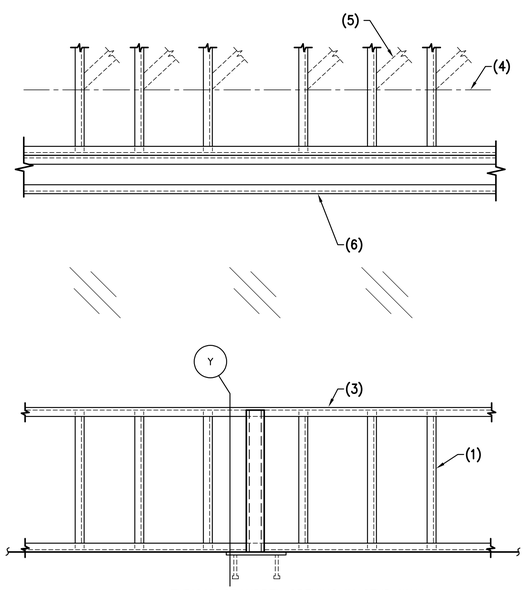
ALL STUD FRAMING (BOTH INTERIOR AND EXTERIOR) SHALL BE DESIGNED AND CONSTRUCTED TO ACCOMMODATE VERTICAL DEFLECTION OF THE STRUCTURE OF UP TO 1/2" LIVE LOAD DEFLECTION, UNLESS GREATER VALUE IS NOTED ON PLANS OR DETAILS. UTILIZE SLIP TRACK OR OTHER SIMILAR MEANS.

ALL STUDS SHALL BE SECURELY SEATED FOR FULL END BEARING ON TOP AND BOTTOM TRACK. UNLESS NOTED OTHERWISE, PROVIDE DOUBLE STUDS AT ALL JAMBS, CORNERS, INTERSECTIONS, BEAM BEARINGS AND JOIST BEARINGS. BRIDGING SHALL BE INSTALLED PER MANUFACTURER'S RECOMMENDATION WITH THE FOLLOWING MINIMUM REQUIREMENTS.



FOR WALLS WITH NO AXIAL LOAD, PROVIDE BRIDGING AT MID–HEIGHT FOR WALLS LESS THAN OR EQUAL TO 10'–0" HIGH, AND 5'–0" O.C. MAXIMUM FOR WALLS GREATER THAN 10'–0" HIGH. FOR AXIAL LOAD BEARING WALLS, PROVIDE BRIDGING EQUALLY SPACED AT 4'–0" MAXIMUM. IN ADDITION, BRIDGING SHALL BE PROVIDED AT ROOF LINES AND ELSEWHERE AS NOTED ON THE DRAWINGS. SOLID BLOCKING SHALL BE INSTALLED IN LIEU OF BRIDGING WHERE NOTED ON THE DRAWINGS.

STEEL STUD DETAILS AND GAGES DEPICATED ON STRUCTURAL DRAWINGS SHOW GENERAL STRUCTURAL REQUIREMENTS AND ARE FOR SCHEMATICS PURPOSE ONLY. THE CONTRACTOR SHALL BE REQUIRED TO SUBMIT SHOP DRAWINGS WITH DESIGN CALCULATIONS SEALED BY A REGISTERED ENGINEER FOR ALL STEEL STUD FRAMING AND ANY ADDITIONAL FRAMING MATERIALS REQUIRED FOR COMPLETE DESIGN SHALL BE INCORPORATED. CALCULATIONS SHALL INCLUDE DERIVATION OF WND LOADS PER SPECIFIED BUILDING CODE.



ALL WELDING SHALL BE PERFORMED BY WELDERS EXPERIENCED IN LIGHT GAGE STRUCTURAL STEEL FRAMING WORK. DO NOT NOTCH FLANGES OF JOISTS OR STUDS. DOUBLE UP FLOOR JOISTS AND BLOCKING UNDER PARTITIONS. PROVIDE BLOCKING AT SUPPORTS OF ALL JOISTS. DOUBLE UP STUDS AT JAMBS AND AS REQUIRED UNDER BEAMS IN BEARING WALLS.

TYPICAL STUDS SHALL BE DESIGNED FOR L/360 EXCEPT STUDS SUPPORTING VENEER SHALL BE DESIGN FOR MAXIMUM DEFLECTION OF L/600.

STEEL STUD SUPPLIER SHALL DESIGN AND SUPPLY STRUCTURAL STEEL AS REQUIRED FOR COMPLETE CONSTRUCTION OF VERTICAL WALL AWNINGS, SOFFITS, WING PLATES, FASCIA EXTENSIONS, ETC. ANY "RED METAL" OF FABRICATED STRUCTURAL STEEL REQUIRED TO COMPLETE WALL SYSTEMS SHALL BE DESIGNED AND INSTALLED BY STEEL STUD SUPPLIER.

GENERAL NOTES

1. ALL INTERIOR WALLS, EXTERIOR WALLS, AND CEILINGS SHALL BE INSULATED PER SPECIFICATION SECTION 07 2100 OF THE CONTRACT DOCUMENTS.

DOOR & WINDOW NOTES:

1. ALL EXITS SHALL OPEN FROM THE INSIDE WITHOUT THE USE OF A KEY AND/OR SPECIAL KNOWLEDGE (U.N.O.). MANUALLY OPERATED EDGE OR SURFACE MOUNTED FLUSH BOLTS AND SURFACE BOLTS ARE PROHIBITED.
2. PAINT STEEL DOORS AND FRAMES WITH ONE (1) COAT OF RUST INHIBITING PRIMER AND ONE (1) COAT OF SEMI-GLOSS ALKYD ENAMEL.
3. ALL INTERIOR DOORS TO BE SOLID CORE MASONITE DOOS IN "TIMELY" FRAMES (U.N.O.).
4. ALL DOOR HARDWARE TO BE AL SERIES "SCHLAGE" LEVER TYPE WITH FINISH PER OWNER'S DIRECTION. VERIFY KEYING WITH OWNER.
5. PROVIDE DOOR STOPS AS REQUIRED AT FLOOR AND/OR WALL.
6. ALL DOORS TO BE MASTER KEYED. VERIFY KEYING WITH OWNER.
7. ALL THRESHOLDS TO BE MAXIMUM HEIGHT OF 1/2".
8. DOOR LOCK AND LATCHES SHALL COMPLY WITH UBC SECTION 1004.3 AND ADA.
9. THE AUTHORITY HAVING JURISDICTION MAY INCREASE THE MAXIMUM EFFORT TO OPERATE FIRE DOORS IN ORDER TO ACHIEVE POSITIVE LATCHING, BUT NOT EXCEEDING THE 15 LP MAX.
10. MAXIMUM EFFORT TO OPERATE EXTERIOR DOORS IS 5 LBS.
11. HAND-ACTIVATED DOOR OPENING HARDWARE SHALL BE CENTERED BETWEEN 30" AND 44" A.F.F.
12. PROVIDE 1/4" TEMPERED GLASS AT ALL INTERIOR WINDOW LOCATIONS.
13. MAIN EXTERIOR DOORS: PROVIDE VISIBLE DURABLE SIGN ON THE EGRESS SIDE, ON OR ADJACENT TO THE DOOR, STATING: "THIS DOOR TO REMAIN UNLOCKED WHEN THE BUILDING IS OCCUPIED." THE SIGN SHALL BE IN LETTERS 1" HIGH ON A CONTRASTING BACKGROUND.

FLOOR PLAN NOTES:

1. ALL INSULATION SHALL HAVE FLAME SPREAD RATE NOT TO EXCEED 25 AND A SMOKE DENSITY NOT TO EXCEED 450 WHEN TESTED IN ACCORDANCE WITH STANDARD NO. 42-1.
2. PROVIDE 4'-0" HIGH ANGLE IRON DOOR GUARDS AT FLOOR OF EACH JAMB OF EACH OVERHEAD DOOR OPENING.
3. ALL NEW DRYWALL SHALL BE TAPED, TEXTURED, AND PAINTED WITH ONE (1) COAT VINYL ACRYLIC WALL SEALER AND TWO (2) COATS LO-GLO ACRYLIC SEMI-GLOSS ENAMEL. PROVIDE SAMPLE FOR OWNER'S APPROVAL. PROVIDE LIGHT KNOCKDOWN TEXTURE.
4. RESTROOM DRYWALL SHALL BE WATER RESISTANT TYPE X. RESTROOMS TO HAVE +4' HIGH 12"x12" GLAZED CERAMIC TILE BY "DAL TALE" OR EQUAL, FROM STANDARD COLOR SELECTION WAINSCOT. PAINT DRYWALL ABOVE WITH ONE (1) COAT PRIMER AND TWO (2) COATS SEMI-GLOSS ENAMEL PAINT. USE DUNN-EDWARDS OR FRAZEE.
5. BLOWER ROOM: PROVIDE SAWCUT CONTROL JOINTS AT 5'x5' MINIMUM FOR AREAS WITH SEALED CONCRETE FINISHED FLOOR. RESTROOM AND OPERATIONS ROOM TO RECEIVE 12"x12" VINYL COMPOSITE TILES. PROVIDE VCT AND CERAMIC TILE SAMPLES FOR OWNER'S SELECTION.
6. PROVIDE 4" CERAMIC TILE BASE TO MATCH FLOOR TILE. AT RESTROOM, PROVIDE 6" COVERED CERAMIC TILE BASE.
7. SEE PLUMBING DRAWING FOR FLOOR AREA DRAINAGE AND RESTROOM. PLUMBING DRAWINGS SHALL APPLY FOR APPLICABLE FIXTURES.

WALL FINISH LEGEND

P1 DUNN EDWARDS - FOSSIL

CMU CLEAR SEALER

INSTAL 4" HIGH RESILIENT BASE FOR ALL ROOMS.

FLOOR FINISH LEGEND

SEALED CONCRETE

12"X12" VINYL COMPOSITE TILES

TOWN OF JEROME WWTP
ELECTRICAL
JEROME, ARIZONA

GENERAL ELECTRICAL NOTES

1. ELECTRICAL WORK SHALL COMPLY WITH THE NATIONAL ELECTRIC CODE (2011), FEDERAL, STATE AND LOCAL JURISDICTION CODES.
2. ALL WORK SHALL BE DONE IN A NEAT, WORKMANLIKE, FINISHED AND SAFE MANNER, ACCORDING TO THE LATEST PUBLISHED NATIONAL ELECTRICAL CONTRACTORS ASSOCIATION STANDARDS OF INSTALLATION, UNDER COMPETENT SUPERVISION.
3. VISIT THE SITE PRIOR TO BIDDING TO BECOME FAMILIAR WITH EXISTING CONDITIONS AND ALL OTHER FACTORS WHICH MAY AFFECT THE EXECUTION OF THIS WORK. INCLUDE ALL RELATED COSTS IN THE INITIAL BID PROPOSAL.
4. CONTRACTOR IS RESPONSIBLE FOR VERIFYING LOCATIONS OF ALL EXISTING UTILITIES AND AVOIDING DAMAGE TO SAME. CONTRACTOR SHALL BE RESPONSIBLE FOR DAMAGE TO UTILITIES CAUSED AS A RESULT OF HIS WORK. CALL (602) 263-1100 FOR BLUE STAKES. IRRIGATION LINES LESS THAN 2" WILL NOT BE MARKED AND SHALL BE REPAIRED IN KIND BY THE CONTRACTOR.
5. PROPER PROTECTION OF THE CONSTRUCTION AREA FOR SAFETY SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR. COVER ALL TRENCHES AT THE END OF EACH WORK DAY. BARRICADES SHALL BE INSTALLED AS DIRECTED BY THE EPCOR OR THE PROJECT INSPECTOR. THE SITE AND ALL WORK SHALL CONFORM TO OSHA REQUIREMENTS.
6. CONTRACTOR SHALL PAY FOR PERMITS AND INSPECTIONS AS MAY BE REQUIRED AND PROVIDE A CERTIFICATE OF INSPECTION TO THE EPCOR.
7. PROTECT ALL MATERIAL AND EQUIPMENT INSTALLED AGAINST DAMAGE BY OTHER TRADES, WEATHER CONDITIONS OR ANY OTHER CAUSES. EQUIPMENT FOUND DAMAGED OR IN OTHER THAN NEW CONDITION WILL BE REJECTED AS DEFECTIVE. ALL COMPONENTS SHALL BE FREE OF DUST, GRIT AND FOREIGN MATERIALS, AND LEFT AS NEW BEFORE FINAL ACCEPTANCE OF WORK.
8. LEAVE THE SITE CLEAN, REMOVE ALL DEBRIS, EMPTY CARTONS, TOOLS, CONDUIT, WIRE SCRAPS AND ALL MISCELLANEOUS SPARE EQUIPMENT AND MATERIALS USED IN THE WORK DURING CONSTRUCTION.
9. IT IS THE OBLIGATION OF THE CONTRACTOR TO ORGANIZE HIS WORK SO THAT A COMPLETE ELECTRICAL, INSTRUMENTATION, AND/OR CONTROL SYSTEM FOR THE FACILITY WILL BE PROVIDED AND SUPPORTED BY ACCURATE SHOP AND RECORD DRAWINGS, AND ALL O & M MANUALS.
10. ALL UNDERGROUND CONDUIT SHALL BE SCHEDULE 40 PVC, BURIED 24" MINIMUM BELOW FINISHED GRADE, UNLESS SPECIFICALLY NOTED OTHERWISE ON PLANS OR IN DETAILS.
11. PROVIDE EMT INDOOR AND GRS OUTDOOR FOR ABOVE GROUND CONDUIT. WHERE METALLIC CONDUITS COME IN CONTACT WITH DIRT, THEY SHALL BE HALF LAP WRAPPED WITH SCOTCH 50 TAPE TO 12" AFG. FITTINGS SHALL BE STEEL, THREADED TYPE WITH INSULATED THROATS. SECURELY ATTACH ALL SURFACE MOUNTED CONDUIT EVERY 10 FEET AND WITHIN 3 FEET OF EACH JUNCTION BOX, PER NEC ARTICLE 344.30. OUTDOOR FLEX CONDUIT SHALL BE LIQUID TITE UV RESISTANT (BLACK) FLEX CONDUIT.
12. UNDERGROUND VERTICAL AND HORIZONTAL 90 DEGREE BEND CONDUIT SHALL BE GRS HALF LAPPED WRAPPED WITH SCOTCHRAP 50 10-MIL TAPE TO 18" MIN ABOVE GRADE WITH A RADIUS OF NOT LESS THAN 18" (FACTORY BENDS ONLY SHALL BE USED)
13. UNDERGROUND CONDUITS SHALL BE A MINIMUM 1".
14. ALL FEEDERS AND BRANCH CIRCUIT WIRE SHALL BE COPPER TYPE XHHW (75 DEGREE C) FOR BELOW GRADE INSTALLATIONS (AND CONDUIT RISERS) AND THHN/THWN (75 DEGREE C) FOR ABOVE GRADE INSTALLATIONS. MINIMUM SIZE SHALL BE #12 AWG, UNLESS SPECIFICALLY NOTED OTHERWISE ON PLANS OR IN DETAILS. ALL WIRING SHALL BE IN CONDUIT.
15. A SEPARATE GREEN INSULATED EQUIPMENT GROUNDING CONDUCTOR (BOND) SHALL BE INSTALLED WITHIN EACH RACEWAY PER NEC CODE.
16. WHEN A PANEL IS SUPPLIED BY A FEEDER OR BRANCH CIRCUIT, ANY INSTALLED GROUNDED CONDUCTOR SHALL NOT BE CONNECTED TO THE EQUIPMENT GROUNDING CONDUCTOR (GEC) OR TO THE GROUNDING ELECTRODE(S) PER NEC ARTICLE 250.32(B).
17. BOND ALL ENCLOSURES PER NEC ARTICLE 250.96.
18. CONTRACTOR SHALL PLAN AND INSTALL WORK IN SUCH A MANNER AS TO CONFORM TO THE STRUCTURE, AVOID OBSTRUCTIONS, PRESERVE HEADROOM AND KEEP OPENINGS AND PASSAGEWAYS CLEAR.
19. CONTRACTOR SHALL PROVIDE ALL LABOR, MATERIAL, ETC. NECESSARY FOR A COMPLETE AND WORKABLE ELECTRICAL SYSTEM WHETHER OR NOT THESE ITEMS ARE SPECIFICALLY NOTED ON THESE DRAWINGS. INCIDENTAL ITEMS NOT INDICATED ON THE DRAWINGS, NOR MENTIONED IN SPECIFICATIONS THAT CAN BE LEGITIMATELY AND REASONABLY INFERRED TO BELONG TO THE WORK DESCRIBED OR BE NECESSARY IN GOOD PRACTICE TO PROVIDE A COMPLETE SYSTEM, SHALL BE FURNISHED AND INSTALLED AS THOUGH ITEMIZED HERE IN EVERY DETAIL.
20. CONTRACTOR IS RESPONSIBLE FOR AND SHALL PROVIDE ALL LABOR, MATERIAL, TRENCHING, CONDUIT, TRANSFORMER PAD AND OTHER REQUIRED EQUIPMENT PER UTILITY COMPANY PLANS AND SPECIFICATIONS NECESSARY FOR A COMPLETE UNDERGROUND CONDUIT SYSTEM FROM THE UTILITY POINT OF SERVICE TO THE UTILITY CO. TRANSFORMER AND FROM THE UTILITY CO. TRANSFORMER TO THE ELECTRICAL SERVICE ENTRANCE SECTION.
21. ALL TRENCHING, CONDUITS, ETC. SHALL BE ROUTED AND INSTALLED IN SUCH A MANNER THAT WILL NOT DAMAGE EXISTING FACILITIES. SHOULD DAMAGE OCCUR, IT WILL BE THE CONTRACTORS RESPONSIBILITY TO REPAIR DAMAGE TO THE SATISFACTION OF THE EPCOR OR INSPECTOR.
22. ALL CONDUIT RUNS SHOWN ON THIS PLAN ARE SCHEMATIC IN NATURE. THE CONTRACTOR SHALL MAKE SURE THAT ALL CONDUIT, ETC. FALLS WITHIN THE CONSTRUCTION AREA/RIGHT OF WAY. (THIS INCLUDES MAINTAINING ALL REQUIRED CLEARANCES.)
23. WHEN CROSSING PATHWAYS OR SIDEWALKS, CONTRACTOR SHALL BORE UNDER EXISTING CONCRETE WALKS AND SAWCUT ASPHALT WALKS. ASPHALT WALKS SHALL BE REPLACED IN KIND.
24. CONTRACTOR SHALL GUARANTEE WORK INSTALLED UNDER THE CONTRACT TO BE FREE FROM DEFECTIVE WORKMANSHIP AND MATERIALS, USUAL WEAR EXPECTED, AND SHOULD ANY SUCH DEFECTS DEVELOP WITHIN A PERIOD OF ONE YEAR ACCEPTANCE OF THE PROJECT BY THE EPCOR, THE CONTRACTOR SHALL REPAIR AND/OR REPLACE ANY DEFECTIVE ITEMS AND DAMAGE RESULTING FROM FAILURE OF THESE ITEMS, AT NO EXPENSE WHATSOEVER TO THE EPCOR.
25. CONTRACTOR SHALL IDENTIFY EQUIPMENT PANELS, DISCONNECTS, PANELS, INSTRUMENTS ETC. USING P&ID NOMENCLATURE WITH 3/32-INCH THICK LAMINATED PHENOLIC TYPE NAMEPLATES WITH 1/4-INCH MINIMUM HEIGHT LETTERS. NAMEPLATE TO BE BLACK MATTE FINISH SURFACE WITH WHITE LETTER ENGRAVING AND BE UV RESISTANT. ATTACH NAMEPLATE TO THE OUTSIDE PANEL FACE WITH TWO STAINLESS STEEL SELF-TAPPING SCREWS. NAMEPLATE SHALL READ THE EQUIPMENT NAME AND P&ID NOMENCLATURE. SEE NEC ARTICLE 230.70(B) FOR SERVICE EQUIPMENT.
26. ALL CIRCUITS SHALL BE LEGIBLY IDENTIFIED AT THE PANEL, JUNCTION BOXES AND AT ALL EQUIPMENT IN A PERMANENT MANNER (I.E. ETCHED PLATES, CONDUCTOR TAG, PERMANENT MARKER, ETC.). THE LABELING SHALL INCLUDE PANEL CIRCUIT NUMBER, "TO" AND "FROM" IDENTIFICATION, AND MARKED "SPARE" WHERE APPLICABLE.
27. CONTRACTOR SHALL TEST ELECTRICAL SYSTEM FOR SHORT CIRCUITS AND MEGGER TEST FEEDERS AND BRANCH CIRCUIT WIRING. CONTRACTOR SHALL INSURE LOW IMPEDANCE GROUND PATH SYSTEM. PROVIDE CERTIFIED TEST RESULTS FOR MEGGER TEST TO EPCOR UPON COMPLETION OF PROJECT.
28. CONTRACTOR SHALL PERFORM HIGH POTENTIAL (HIPOT) TESTING WHEN REQUIRED BY LOCAL JURISDICTION OR EPCOR.
29. CONTRACTOR SHALL PROVIDE A GROUND-FAULT COORDINATION STUDY AND PERFORM RECOMMENDED SETTINGS ON NEW OVERCURRENT PROTECTION DEVICES, PROVIDE LABELS ON EQUIPMENT INDICATING SETTINGS.
30. CONTRACTOR SHALL PROVIDE AN ARC-FLASH STUDY, PROVIDE ALL APPLICABLE LABELS ON NEW EQUIPMENT AFTER STUDY IS COMPLETED.
31. ALL CONDUIT AND J-BOXES SHOWN SHALL BE CONCEALED WHEN POSSIBLE. WHEN NOT POSSIBLE, CONDUIT AND J-BOXES MAY BE SURFACE MOUNTED WITH PERMISSION OF THE EPCOR OR EPCOR'S REPRESENTATIVE.
32. CONTRACTOR SHALL COORDINATE ALL EQUIPMENT CONNECTIONS WITH EQUIPMENT SUPPLIER PRIOR TO ROUGH-IN. PROVIDE ADDITIONAL FUSED DISCONNECT SWITCHES AND CONTROLS IF OVERCURRENT PROTECTION OR CONTROLS IS NOT INTEGRAL WITH UNITS.
33. ALL EQUIPMENT SHALL BE FUSE SIZED PER MANUFACTURES RECOMMENDATIONS AND U.L. APPROVAL.
34. ELECTRICAL DEVICES, DISCONNECT SWITCHES, ETC., SHALL BE SUPPORTED INDEPENDENT OF AND ISOLATED FROM EQUIPMENT VIBRATIONS.
35. FULL LOAD AMPS (FLA) SIZES, AS NOTED IN THESE DRAWINGS, ARE BASED ON SPECIFIED EQUIPMENT DATA. CONTRACTOR SHALL VERIFY NAMEPLATE FLA OF EQUIPMENT SUPPLIED AND COORDINATE ACCORDINGLY PER EQUIPMENT SUPPLIERS RECOMMENDATIONS.
36. ALL OUTDOOR ELECTRICAL EQUIPMENT SHALL BE NEMA-3R OR NEMA-4 ENCLOSURES.
37. CONDUITS OR RACEWAYS ROUTED FROM INDOORS TO OUTDOORS OR AS DESCRIBED IN NEC 300.7(A), SHALL BE SEALED WITH A PLIABLE SEALING COMPOUND AT A CONDUIT BODY OR AT A JUNCTION BOX BEFORE THE CONDUIT ENTERS THE COLDER ENVIRONMENT.
38. CONDUITS OR RACEWAYS INSTALLED IN AREAS WHERE ELEVATION CHANGES MAY CAUSE WATER OR MOISTURE TO ENTER THE ELECTRICAL EQUIPMENT THROUGH THE CONDUIT SHALL BE SEALED WITH A HERMETIC CONDUIT SEAL AT BOTH ENDS OF THE CONDUIT OR RACEWAY.
39. MATERIALS SHALL BE NEW AND OF THE BEST QUALITY WITH MANUFACTURER'S NAME PRINTED THEREON. MATERIALS SHALL BE MANUFACTURED IN ACCORDANCE WITH NEMA, ANSI, UNDERWRITER'S LABORATORY OR OTHER APPLICABLE STANDARDS AND RATED FOR HEAVY DUTY SERVICE.
40. ALL WIRING DEVICES SHALL BE SPECIFICATION GRADE. ALL 15 AND 20 AMP, 125 AND 250 VOLT, NONLOCKING RECEPTACLES INSTALLED OUTDOORS SHALL BE LISTED WEATHER-RESISTANT TYPE. ALL WEATHERPROOF WHILE IN-USE RECEPTACLE COVERS SHALL BE METAL.
41. SELECTION OF MATERIALS SHALL BE IN STRICT ACCORDANCE WITH THE DRAWINGS AND/OR SPECIFICATIONS. THE USE OF MANUFACTURER'S NAME, MODEL, AND NUMBER IS INTENDED TO ESTABLISH STYLE, QUALITY, APPEARANCE, USEFULNESS AND BID PRICE. CONTRACTOR SHALL SUBMIT TO THE EPCOR OR EPCOR'S REPRESENTATIVE FOR REVIEW AND APPROVAL (PRIOR TO ORDERING MATERIALS) COPIES OF EQUIPMENT SHOP DRAWINGS AS FOLLOWS: 1) LIGHT FIXTURES, 2) PUMP CONTROL PANEL 3) RTU/PLC 4) SERVICE ENTRANCE SECTION, 5) ELECTRICAL EQUIPMENT, 6) DISCONNECT SWITCHES, 7) TIME CLOCKS AND OTHER CONTROLS, 8) LIGHTING CONTACTORS AND 9) PULL BOXES. AT THE TIME OF EACH SUBMITTAL, THE CONTRACTOR SHALL DEFINE AND DELINEATE IN WRITING ANY DEVIATIONS FROM THE CONTRACT DOCUMENTS. THE REVIEW WILL BE ONLY FOR CONFORMANCE WITH THE DESIGN CONCEPT OF THE WORK AND FOR COMPLIANCE WITH THE INFORMATION CONTAINED IN THE CONTRACT DOCUMENTS. THE REVIEW OF A SPECIFIED ITEM, AS SUCH, WILL NOT INDICATE REVIEW OF THE ASSEMBLY IN WHICH THE ITEM FUNCTIONS. REVIEW BY THE EPCOR OR EPCOR'S REPRESENTATIVE WILL NOT RELIEVE THE CONTRACTOR FROM RESPONSIBILITY FOR ANY ERRORS OR OMISSIONS IN THE SUBMITTALS NOR FROM HIS RESPONSIBILITY FOR COMPLYING WITH THE CONTRACT DOCUMENTS.
42. THE SUBMITTALS SHALL BE NEATLY GROUPED AND ORGANIZED. PERTINENT INFORMATION SHALL BE HIGHLIGHTED, AND THE SPECIFIC PRODUCT SHALL BE IDENTIFIED. ALL SUBMITTALS SHALL BE COMPLETE, AND PRESENTED IN ONE PACKAGE. THE SUBMITTAL SHALL INCLUDE A COMPLETE LIST OF THE EQUIPMENT AND MATERIALS, INCLUDING THE MANUFACTURER'S NAME, PRODUCT SPECIFICATION, DESCRIPTIVE DATA, TECHNICAL LITERATURE, PERFORMANCE CHARTS, CATALOG CUTS, INSTALLATION INSTRUCTIONS, AND SPARE PART RECOMMENDATIONS FOR EACH DIFFERENT ITEM OF THE EQUIPMENT SPECIFIED.
43. ELECTRICAL CONTRACTOR SHALL HAVE A MINIMUM OF 5 YEARS EXPERIENCE WORKING IN THE WATER/WASTEWATER INDUSTRY AND PROVIDE REFERENCES.

JOB NO. B614

ELECTRICAL SYMBOLS

SINGLE LINE DIAGRAMS

- (A) AMMETER
- (V) VOLTMETER
- (M) METER
- (KWH) KILOWATT HOUR METER
- (AS) AMMETER SWITCH
- (VS) VOLTMETER SWITCH
- GFP — GROUND FAULT PROTECTION
- POWER TRANSFORMER SEE NOTE 1.
- A-24 — CIRCUIT BREAKER, 3 POLE UNLESS OTHERWISE INDICATED
- DISCONNECT SWITCH, 3 POLE UNLESS OTHERWISE INDICATED
- OIL FUSE CUTOUTS
- FUSE SEE NOTE 3.
- TRANSFER SWITCH, AUTOMATIC
- RV SIZE 1 — MAGNETIC MOTOR STARTER."1" INDICATES SIZE 1. RV INDICATES REDUCED VOLTAGE. 2S INDICATES 2 SPEED. R INDICATES REVERSING.
- MAGNETIC CONTACTOR
- (12) — CONDUIT NUMBER 12. SEE CONDUIT AND WIRING SCHEDULE FOR SIZES AND QUANTITIES OF CONDUIT AND WIRES.
- GND — GROUND
- (K) — KIRK KEY INTERLOCKING OF EQUIPMENT
- 2 HP — EQUIPMENT FURNISHED, INSTALLED AND CONNECTED UNDER ANOTHER SECTION OF THE CONTRACT.
- PFR — PHASE FAILURE RELAY
- SA — SURGE ARRESTER
- (#) — EXISTING MOTOR (HP SHOWN)
- (#) — NEW MOTOR (ESTIMATED HP SHOWN)
- (#) — FUTURE MOTOR (ESTIMATED HP SHOWN)
- (1) — MANHOLE
- EYS SEAL

CONTROL WIRING DIAGRAMS

NORMALLY OPEN	NORMALLY CLOSED	DEVICE
		CONTACT
		LIMIT SWITCH
		LIMIT SWITCH HELD CLOSED
		LIMIT SWITCH HELD OPEN
		PRESSURE OR VACUUM SWITCH
		LIQUID LEVEL SWITCH
		TEMPERATURE ACTUATED SWITCH
		FLOW SWITCH (AIR, WATER, ETC.)
		PUSH BUTTON SINGLE CIRCUIT MOMENTARY CONTACT. SEE NOTE 3.
		PUSH BUTTON SINGLE CIRCUIT LOCK-OUT(LOCATED AT MOTOR UNLESS OTHERWISE NOTED)
		TIMED CONTACT- CONTACT ACTION RELAY ON ENERGIZATION.
		TIMED CONTACT- CONTACT ACTION RELAY ON DE-ENERGIZATION.
		ON-OFF SWITCH. SEE NOTE 3.
ESB		EMERGENCY STOP PUSH BUTTON (MAINTAINED CONTACT)
STOP	START	STOP -START PUSH-BUTTON STATION (MAINTAINED CONTACTS). SEE NOTE 3.
I O H		HAND-OFF-AUTO SELECTOR SWITCH SEE NOTE 3. (THREE POSITION).
A		TWO POSITION SELECTOR SWITCH SEE NOTE 3.
(R)		PILOT LIGHT, Y=YELLOW, R=RED, A=AMBER, SEE NOTE 3. B=BLUE, W=WHITE, G=GREEN.
		BELL
		HORN OR SIREN
(CR)		CONTROL RELAY SEE NOTE 3.
(M)		STARTER COIL. SEE NOTE 3.
(TDR)		TIME DELAY RELAY. (0-30 SECONDS UNLESS OTHERWISE NOTED). SEE NOTE 3.
OL'S		MOTOR STARTER OVERLOAD RELAY CONTACTS
		CONTROL TRANSFORMER. SEE NOTES 2
		MANUAL MOTOR STARTER
		SOLENOID OPERATED CONTROL VALVE
(1)		120 VOLT, 1 PHASE, MOTOR (UNLESS OTHERWISE NOTED)
RTM		RUNNING TIME METER. SEE NOTE 3. (ELAPSED TIME METER)
		SPACE HEATERS. (LOCATED AT MOTOR UNLESS OTHERWISE NOTED).

		TERMINALS IN MOTOR CONTROL CENTER/MCP CONTACT IN MOTOR CONTROL CENTER FOR CONNECTION TO REMOTE DEVICE/MCP
		DEVICE SIGNAL OUTPUT
		DEVICE SIGNAL INPUT

PLANS

- CONDUIT RUN CONCEALED UNDER SLAB OR BELOW GRADE. (CONCEALED IN SLAB WHERE SO NOTED OR WHERE ALLOWED PER SPECIFICATIONS).
- CONDUIT RUN EXPOSED UNLESS OTHERWISE NOTED
- EXISTING CONDUIT RUN
- HASH MARKS INDICATE QUANTITY OF #12 WIRES IN CONDUIT (PLUS 1#12 GROUND WIRE) EXCEPT NO HASH MARKS=3/4", 2#12 (PLUS 1#12 GROUND WIRE) UNLESS OTHERWISE NOTED.
  - 3/4", 3#12 — 1", 6#12
  - 3/4", 4#12 — 1", 7#12
  - 3/4", 5#12 — 1", 8#12
- L(1,3) — HOMERUN TO PANEL L, CIRCUITS 1 AND 3
- GROUND WIRE
- CONDUIT UP (OUT TOP OF EQUIPMENT)
- CONDUIT DOWN (OUT BOTTOM OF EQUIPMENT)
- CONDUIT STUBBED OUT AND CAPPED
- LIGHTING FIXTURE MOUNTED ON POLE OR POST OR ABOVE PLATFORM
- CEILING MOUNTED LIGHTING FIXTURE
- BRACKET MOUNTED LIGHTING FIXTURE
- FLOODLIGHT
- FLUORESCENT LIGHTING FIXTURE
- POLE MOUNTED LIGHT FIXTURE
- EXIT LIGHT
- RECESSED LIGHTING FIXTURE
- LIGHTING FIXTURES CONNECTED TO EMERGENCY CIRCUITS
- A 1/100 — LIGHTING FIXTURE TYPE A, 100 WATTS, WITH 1 LAMP. SEE LIGHTING FIXTURE SCHEDULE
- $ — SINGLE POLE, SINGLE THROW TOGGLE SWITCH
- $2 — DOUBLE POLE, SINGLE THROW TOGGLE SWITCH
- $3 — THREE-WAY TOGGLE SWITCH
- $4 — FOUR-WAY TOGGLE SWITCH
- $M — MANUAL MOTOR STARTER

  (AT +48" OR AS NOTED)
- $a — OUTLETS SHOWN WITH SUBSCRIPT "a" ADJACENT TO THEM SHALL BE CONTROLLED BY S a
- DUPLEX CONVENIENCE RECEPTACLE AT +12" OR AS NOTED
- SINGLE CONVENIENCE RECEPTACLE AT +12" OR AS NOTED
- SPECIAL PURPOSE RECEPTACLE AT +12" OR AS NOTED, RATING AS INDICATED
- JUNCTION BOX, SIZE AS REQUIRED BY CODE
- THERMOSTAT OUTLET AT +54"
- CLOCK OUTLET AT +7'-6" OR AS NOTED
- TELEPHONE OUTLET AT +12" OR AS NOTED
- TELEPHONE FLOOR OUTLET
- HORN
- P — CONTROL DEVICE
  - P = PRESSURE SWITCH
  - ZS = LIMIT SWITCH
  - L = LEVEL SWITCH
  - V = CONTROL VALVE
- CONTROL STATION: PUSH-BUTTON STATION OR SELECTOR SWITCH. SEE CONTROL WIRING DIAGRAMS FOR REQUIREMENTS.
- (M) — EXISTING MOTOR
- (M) — NEW MOTOR
- (M) — FUTURE MOTOR
- GROUND WELL
- GROUND ROD
- DISCONNECT SWITCH. SEE SINGLE LINE DIAGRAM FOR SIZE.
- LIGHTING PANEL. SURFACE MOUNTED.
- SWITCHBOARD, DISTRIBUTION PANEL OR MOTOR CONTROL CENTER
- (12) — CONDUIT NUMBER 12. SEE CONDUIT AND WIRING SCHEDULE FOR SIZES AND QUANTITIES OF CONDUIT AND WIRES.
- +12" — INDICATES HEIGHT FROM FINISHED FLOOR OR GRADE TO CENTERLINE OF DEVICE.
- (1) — INDICATES TO REFER TO NOTE (1) ON DRAWING
- W.P. — WEATHERPROOF. PROVIDE GASKETS AS REQUIRED
- C.O. — CONDUIT ONLY
- FE-184 — INSTRUMENTATION DEVICE. SEE PROCESS AND INSTRUMENTATION DRAWINGS FOR DESCRIPTIONS.
- PULL BOX (SIZE AS REQUIRED)
- OUTPUT TERMINAL
- INPUT TERMINAL

NOTES: (ELECTRICAL SYMBOLS)

1. POWER TRANSFORMERS SHALL BE DRY TYPE 480-208Y/120 VOLTS, 3 PHASE 4 WIRE UNLESS OTHERWISE INDICATED.
2. CONTROL TRANSFORMER SHALL BE DRY TYPE 480-120 VOLTS 1 PHASE UNLESS OTHERWISE INDICATED. SEE CONTROL WIRING DIAGRAMS FOR USE OF 120 VOLT CONTROL CIRCUITS CONTROL TRANSFORMERS SHALL BE SIZED TO HANDLE THE LOADS OF ALL RELAYS, PILOT LIGHTS, ETC. CONNECTED THERE TO PLUS 50 VA EXTRA CAPAOWNER.
3. LOCATED IN OR ON MOTOR CONTROL CENTER UNLESS OTHERWISE INDICATED.

CONSTRUCTION NOTES

1. REMOVE ALL EXISTING CUSTOMER OWNED OVERHEAD ELECTRICAL AND POWER POLE AND DISPOSE OF PROPERLY. COORDINATE WITH OWNER FOR SCHEDULING.
2. REMOVE EXISTING SES AND PANEL AND DISPOSE OF PROPERLY. COORDINATE DISCONNECTION OF THE METER AND SECONDARY CONDUCTORS WITH APS
3. DE-ENERGIZE EXISTING LAB BUILDING UPON COMPLETION OF CONSTRUCTION OF THE NEW LAB. REMOVE ALL EXISTING CONDUCTORS AND ELECTRICAL EQUIPMENT AND DISPOSE OF PROPERLY. COORDINATE ALL WORK WITH OWNER AND POWER COMPANY PRIOR TO DE-ENERGIZATION.
4. COORDINATE WITH APS TO REPLACE THE EXISTING POLE MOUNTED SINGLE PHASE TRANSFORMER. APS TO INSTALL THREE PHASE TRANSFORMERS. CONTRACTOR SHALL VERIFY LOCATION OF NEW TRANSFORMER WITH APS. APS PLANS WILL DETERMINE EXACT LOCATION AND TAKE PRECEDENCE OVER THESE DRAWINGS. COORDINATE ALL WORK WITH APS.
5. APS SERVICE LINE. TRENCH AND INSTALL CONDUIT PER APS SPECIFICATIONS. POWER COMPANY PLANS WILL DETERMINE EXACT LOCATION OF CONDUIT AND TAKE PRECEDENCE OVER THESE DRAWINGS.
6. SES, 400 AMP, 277/480V, 3ø, 4W, SEE DETAIL 1 ON E4.1.
7. MINI-POWER ZONE AND PANELBOARD. SEE DETAIL 1 ON E4.1.
8. ATS 400A 277/480V, 3ø, 4W, SEE DETAIL 2 ON SHEET E4.1.
9. GENERATOR 125KW, 277/480V, 3ø, 4W, SEE DETAIL 1 ON E4.3.
10. TRANSFORMER 50KVA 480V – 120/240V 1ø, SEE DETAIL 2 ON SHEET E4.1.
11. PANELBOARD, 120/240V, 1ø, 3W, SEE DETAIL 2 ON E4.1.
12. DISTRIBUTION PANEL DSP-1 400A 277/480V, 3ø, 4W, SEE DETAIL 2 ON SHEET E4.1.
13. ELECTRICAL CONTRACTOR SHALL INSTALL POWER FEED TO MINI SPLIT AIR CONDITIONER AND HEAT PUMP & MAKE ALL 240V CONNECTIONS.
14. TANKLESS WATER HEATER & DISCONENCT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
15. GROUNDING ELECTRODE CONDUCTORS, GROUND ROD, AND INSPECTION WELL FOR ONLY THE FIRST GROUND ROD, PER SINGLE LINE DIAGRAMS AND DETAILS ON SHEET E4.6.
16. LIGHTNING PROTECTION SYSTEM, PER NFPA AND DETAIL 6 ON SHEET E4.6
17. CLASSIFIED SEAL OFF LISTED FOR CLASS 1 DIV 1. LOCATE WITHIN 10 FEET OF CLASSIFIED AREA BOUNDARY. PVC COATED RMS EYS TYPE OR EQUIVALENT. SEAL SHALL HAVE SEALING COMPOUND CHICO, OR EQUAL.
20. 20A HEADWORKS CONTROL PANEL, BY VENDOR CLASS 1 DIVISION 2 LISTED. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.
21. INFLUENT COARSE SCREEN MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
22. INFLUENT CONVEYOR MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
23. POTABLE SOLENOID VALVE AT HEADWORKS. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
24. ULTRASONIC LEVEL TRANSDUCER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
30. SBR PANEL BY VENDOR, ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
31. SBR INFLUENT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
32. SBR SUBMERSIBLE MIXER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
33. WAS TRANSFER PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
34. DECANT MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
35. SBR DECANT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
36. DO TRANSMITTER AND ANALYZER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
37. SUBMERSIBLE PRESSURE TRANSDUCER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
38. LEVEL FLOAT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
39. SBR MOTOR CONTROL PANEL, PROVIDE AND INSTALL. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
40. SBR EFFLUENT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
41. FLOW METER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
42. SBR AIR VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
50. VARIABLE FREQUENCY DRIVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
51. SBR AERATION BLOWER WITH INTEGRAL DISCONNECT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
52. DIGESTER AERATION BLOWER WITH INTEGRAL DISCONNECT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
53. PRESSURE TRANSDUCER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
54. TEMPERATURE TRANSDUCER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
60. 20A SLUDGE BAGGING SYSTEM CONTROL PANEL, BY VENDOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
61. POTABLE WATER VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
62. POLYMER METERING PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
63. DRY POLYMER MIXER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
64. DEWATERING FEED PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
70. 30A DRYING BED LIFT PUMP CONTROL PANEL, 480V, 3ø, 4W. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.
71. DRYING BED LIFT PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.
72. LEVEL FLOAT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.
80. OVERFLOW LIFT PUMP CONTROL PANEL, BY VENDOR. 240V, 1ø, 3W. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.
81. OVERFLOW LIFT PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.
82. LEVEL FLOAT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.
90. JOINT TRENCH WITH WATER LINES. MAINTAIN 24-INCH SEPARATION. SEE DETAIL 3 ON SHEET E4.3.
91. STACKED #7 CONCRETE PULL BOX. INSTALL AS SHOWN OR AS NEEDED IF CONDUIT RUNS WILL EXCEED 360 DEGREE OF BENDS OR THE LENGTH EXCEEDS 400 FEET. INSTALL 1 FOR POWER AND 1 FOR CONTROL. SEE DETAIL 5 ON SHEET E4.3.
92. STANCHION MOUNTED NEMA 4X SST JUNCTION BOXES. MAINTAIN 3' CLEARANCE IN FRONT OF EQUIPMENT. EXTRA SLACK SHALL REMAIN IN THE J-BOX FOR FUTURE LEVEL ADJUSTMENT. SEE DETAIL 2 ON SHEET E4.2 AND DETAIL 1 ON SHEET E4.4.
93. TRAFFIC BOLLARD TO BE INSTALLED PER CIVIL PLANS. LOCATE OUT OF 4 FOOT WORKING SPACE ENVELOPE PER NEC.
94. NON-FUSED DISCONNECT, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2 & SEE DETAIL 1 ON SHEET E4.4.
95. ROTARY TYPE DISCONNECT, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2 & SEE DETAIL 1 ON SHEET E4.4.
96. E-STOP, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2.
97. 20A 120V GFCI DUPLEX RECEPTACLE WITH METAL WEATHERPROOF WHILE-IN-USE AND LOCKABLE COVER INSTALLED PER DETAIL 1 ON SHEET E4.2.
98. 20A 120V GFCI DUPLEX RECEPTACLE WITH METAL WEATHERPROOF WHILE-IN-USE AND LOCKABLE COVER INSTALLED ONTO LIGHT POLE. SEE DETAIL 2 ON SHEET E4.5.
99. CLASSIFIED AREA VERIFY BOUNDARY WITH THE NFPA. INSTALL ANY PANELS, DISCONNECTS, SPLICES, ARC MAKING EQUIPMENT OUT OF THE BOUNDARY, WHERE NOT POSSIBLE THEN INSTALL CLASS 1 DIV 1 LISTED EQUIPMENT. ALL CONDUIT WITHIN BOUNDARY SHALL BE CLASS 1 DIV 1 OR 2 RATED AS REQUIRED BY THE BOUNDARY. USE PVC COATED THREADED RMC CONDUIT, INSTALL STAINLESS STEEL 316 ENCLOSURES, HARDWARE AND EQUIPMENT WITHIN 10 FEET OF THE BOUNDARY. INSTALL CLASSIFIED SEAL OFFS WITHIN 10 FEET OF THE BOUNDARY, AT A PANEL OR JUNCTION BOX IS PREFERRED.

CONSTRUCTION NOTES

(12) DISTRIBUTION PANEL DSP-1 400A 277/480V, 3ø, 4W, SEE DETAIL 2 ON SHEET E4.1.

(17) CLASSIFIED SEAL OFF LISTED FOR CLASS 1 DIV 1. LOCATE WITHIN 10 FEET OF CLASSIFIED AREA BOUNDARY. PVC COATED RMS EYS TYPE OR EQUIVALENT. SEAL SHALL HAVE SEALING COMPOUND CHICO, OR EQUAL.

(20) 20A HEADWORKS CONTROL PANEL, BY VENDOR CLASS 1 DIVISION 2 LISTED. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.

(21) INFLUENT COARSE SCREEN MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(22) INFLUENT CONVEYOR MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(30) SBR PANEL BY VENDOR, ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(31) SBR INFLUENT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(32) SBR SUBMERSIBLE MIXER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(33) WAS TRANSFER PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(34) DECANT MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(35) SBR DECANT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(39) SBR MOTOR CONTROL PANEL, PROVIDE AND INSTALL. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(40) SBR EFFLUENT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(42) SBR AIR VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(50) VARIABLE FREQUENCY DRIVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(51) SBR AERATION BLOWER WITH INTEGRAL DISCONNECT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(52) DIGESTER AERATION BLOWER WITH INTEGRAL DISCONNECT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(60) 20A SLUDGE BAGGING SYSTEM CONTROL PANEL, BY VENDOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(61) POTABLE WATER VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(62) POLYMER METERING PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(63) DRY POLYMER MIXER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(64) DEWATERING FEED PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(70) 30A DRYING BED LIFT PUMP CONTROL PANEL, 480V, 3ø, 4W. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.

(71) DRYING BED LIFT PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.

(94) NON-FUSED DISCONNECT, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2 & SEE DETAIL 1 ON SHEET E4.4.

(95) ROTARY TYPE DISCONNECT, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2 & SEE DETAIL 1 ON SHEET E4.4.

(99) CLASSIFIED AREA VERIFY BOUNDARY WITH THE NFPA. INSTALL ANY PANELS, DISCONNECTS, SPLICES, ARC MAKING EQUIPMENT OUT OF THE BOUNDARY, WHERE NOT POSSIBLE THEN INSTALL CLASS 1 DIV 1 LISTED EQUIPMENT. ALL CONDUIT WITHIN BOUNDARY SHALL BE CLASS 1 DIV 1 OR 2 RATED AS REQUIRED BY THE BOUNDARY. USE PVC COATED THREADED RMC CONDUIT, INSTALL STAINLESS STEEL 316 ENCLOSURES, HARDWARE AND EQUIPMENT WITHIN 10 FEET OF THE BOUNDARY. INSTALL CLASSIFIED SEAL OFFS WITHIN 10 FEET OF THE BOUNDARY, AT A PANEL OR JUNCTION BOX IS PREFERRED.

CONSTRUCTION NOTES

1. REMOVE ALL EXISTING CUSTOMER OWNED OVERHEAD ELECTRICAL AND POWER POLE AND DISPOSE OF PROPERLY. COORDINATE WITH OWNER FOR SCHEDULING.
2. REMOVE EXISTING SES AND PANEL AND DISPOSE OF PROPERLY. COORDINATE DISCONNECTION OF THE METER AND SECONDARY CONDUCTORS WITH APS
3. DE-ENERGIZE EXISTING LAB BUILDING UPON COMPLETION OF CONSTRUCTION OF THE NEW LAB. REMOVE ALL EXISTING CONDUCTORS AND ELECTRICAL EQUIPMENT AND DISPOSE OF PROPERLY. COORDINATE ALL WORK WITH OWNER AND POWER COMPANY PRIOR TO DE-ENERGIZATION.
4. COORDINATE WITH APS TO REPLACE THE EXISTING POLE MOUNTED SINGLE PHASE TRANSFORMER. APS TO INSTALL THREE PHASE TRANSFORMERS. CONTRACTOR SHALL VERIFY LOCATION OF NEW TRANSFORMER WITH APS. APS PLANS WILL DETERMINE EXACT LOCATION AND TAKE PRECEDENCE OVER THESE DRAWINGS. COORDINATE ALL WORK WITH APS.
5. APS SERVICE LINE. TRENCH AND INSTALL CONDUIT PER APS SPECIFICATIONS. POWER COMPANY PLANS WILL DETERMINE EXACT LOCATION OF CONDUIT AND TAKE PRECEDENCE OVER THESE DRAWINGS.
6. SES, 400 AMP, 277/480V, 3ø, 4W, SEE DETAIL 1 ON E4.1.
7. MINI-POWER ZONE AND PANELBOARD. SEE DETAIL 1 ON E4.1.
8. ATS 400A 277/480V, 3ø, 4W, SEE DETAIL 2 ON SHEET E4.1.
9. GENERATOR 125KW, 277/480V, 3ø, 4W, SEE DETAIL 1 ON E4.3.
70. 30A DRYING BED LIFT PUMP CONTROL PANEL, 480V, 3ø, 4W. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.
80. OVERFLOW LIFT PUMP CONTROL PANEL, BY VENDOR. 240V, 1ø, 3W. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.
90. JOINT TRENCH WITH WATER LINES. MAINTAIN 24-INCH SEPARATION. SEE DETAIL 3 ON SHEET E4.3.
91. STACKED #7 CONCRETE PULL BOX. INSTALL AS SHOWN OR AS NEEDED IF CONDUIT RUNS WILL EXCEED 360 DEGREE OF BENDS OR THE LENGTH EXCEEDS 400 FEET. INSTALL 1 FOR POWER AND 1 FOR CONTROL. SEE DETAIL 5 ON SHEET E4.3.

SHEET
E3.1
78 OF 99 SHEETS
JOB NO. B614

ELECTRICAL CONTRACTOR SHALL ENSURE ALL METAL ON CATWALK IS CONNECTED EITHER BOLTED OR WELDED TOGETHER FOR A CONTINUOUS (BONDED) SYSTEM. ADD BONDING STRAPS AS NEEDED. COORDINATE WITH GENERAL CONTRACTOR.

CONSTRUCTION NOTES

9. GENERATOR 125KW, 277/480V, 3ø, 4W, SEE DETAIL 1 ON E4.3.
16. LIGHTNING PROTECTION SYSTEM, PER NFPA AND DETAIL 6 ON SHEET E4.6
17. CLASSIFIED SEAL OFF LISTED FOR CLASS 1 DIV 1. LOCATE WITHIN 10 FEET OF CLASSIFIED AREA BOUNDARY. PVC COATED RMS EYS TYPE OR EQUIVALENT. SEAL SHALL HAVE SEALING COMPOUND CHICO, OR EQUAL.
20. 20A HEADWORKS CONTROL PANEL, BY VENDOR CLASS 1 DIVISION 2 LISTED. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.
21. INFLUENT COARSE SCREEN MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
22. INFLUENT CONVEYOR MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
23. POTABLE SOLENOID VALVE AT HEADWORKS. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
24. ULTRASONIC LEVEL TRANSDUCER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
30. SBR PANEL BY VENDOR, ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
31. SBR INFLUENT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
32. SBR SUBMERSIBLE MIXER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
33. WAS TRANSFER PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
34. DECANT MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
35. SBR DECANT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
36. DO TRANSMITTER AND ANALYZER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
37. SUBMERSIBLE PRESSURE TRANSDUCER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
38. LEVEL FLOAT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
39. SBR MOTOR CONTROL PANEL, PROVIDE AND INSTALL. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
40. SBR EFFLUENT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
41. FLOW METER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
42. SBR AIR VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
92. STANCHION MOUNTED NEMA 4X SST JUNCTION BOXES. MAINTAIN 3' CLEARANCE IN FRONT OF EQUIPMENT. EXTRA SLACK SHALL REMAIN IN THE J-BOX FOR FUTURE LEVEL ADJUSTMENT. SEE DETAIL 2 ON SHEET E4.2 AND DETAIL 1 ON SHEET E4.4.
93. TRAFFIC BOLLARD TO BE INSTALLED PER CIVIL PLANS. LOCATE OUT OF 4 FOOT WORKING SPACE ENVELOPE PER NEC.
94. NON-FUSED DISCONNECT, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2 & SEE DETAIL 1 ON SHEET E4.4.
95. ROTARY TYPE DISCONNECT, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2 & SEE DETAIL 1 ON SHEET E4.4.
96. E-STOP, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2.

CLASS 1 DIV 2
PER NFPA 820
TABLE 5.2.2 SECTION 2C
COARSE FINE SCREEN FACILITIES NOT ENCLOSED, OPEN TO ATMOSPHERE/IF ENCLOSED, THEN THE CLASSIFICATION IS ONLY WITHIN THE TANK.

ENVELOPE: WITHIN A 10 FT AROUND EQUIPMENT AND OPEN CHANNEL

CLASS 1 DIV 2
PER NFPA 820
TABLE 5.2.2 SECTION 7C
PRIMARY SEDIMENTATION TANKS (SBR)
NOT ENCLOSED, OPEN TO ATMOSPHERE.

ENVELOPE: INTERIOR OF THE TANK FROM THE MINIMUM OPERATING WATER SURFACE TO THE TOP OF THE TANK WALL;

ENVELOPE 18 INCHES ABOVE THE TOP OF THE TANK AND EXTENDING 18 INCHES BEYOND THE EXTERIOR WALL;

ENVELOPE 18 INCHES ABOVE GRADE EXTENDING 10 FT HORIZONTALLY FROM THE EXTERIOR TANK WALLS

SBR PLAN ELECTRICAL

99. CLASSIFIED AREA VERIFY BOUNDARY WITH THE NFPA. INSTALL ANY PANELS, DISCONNECTS, SPLICES, ARC MAKING EQUIPMENT OUT OF THE BOUNDARY, WHERE NOT POSSIBLE THEN INSTALL CLASS 1 DIV 1 LISTED EQUIPMENT. ALL CONDUIT WITHIN BOUNDARY SHALL BE CLASS 1 DIV 1 OR 2 RATED AS REQUIRED BY THE BOUNDARY. USE PVC COATED THREADED RMC CONDUIT, INSTALL STAINLESS STEEL 316 ENCLOSURES, HARDWARE AND EQUIPMENT WITHIN 10 FEET OF THE BOUNDARY. INSTALL CLASSIFIED SEAL OFFS WITHIN 10 FEET OF THE BOUNDARY, AT A PANEL OR JUNCTION BOX IS PREFERRED.

CONSTRUCTION NOTES

8. ATS 400A 277/480V, 3ø, 4W, SEE DETAIL 2 ON SHEET E4.1.
10. TRANSFORMER 50KVA 480V – 120/240V 1ø, SEE DETAIL 2 ON SHEET E4.1.
11. PANELBOARD, 120/240V, 1ø, 3W, SEE DETAIL 2 ON E4.1.
12. DISTRIBUTION PANEL DSP-1 400A 277/480V, 3ø, 4W, SEE DETAIL 2 ON SHEET E4.1.
13. ELECTRICAL CONTRACTOR SHALL INSTALL POWER FEED TO MINI SPLIT AIR CONDITIONER AND HEAT PUMP & MAKE ALL 240V CONNECTIONS.
14. TANKLESS WATER HEATER & DISCONENCT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
15. GROUNDING ELECTRODE CONDUCTORS, GROUND ROD, AND INSPECTION WELL FOR ONLY THE FIRST GROUND ROD, PER SINGLE LINE DIAGRAMS AND DETAILS ON SHEET E4.6.
16. LIGHTNING PROTECTION SYSTEM, PER NFPA AND DETAIL 6 ON SHEET E4.6
30. SBR PANEL BY VENDOR, ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
50. VARIABLE FREQUENCY DRIVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
51. SBR AERATION BLOWER WITH INTEGRAL DISCONNECT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
52. DIGESTER AERATION BLOWER WITH INTEGRAL DISCONNECT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
53. PRESSURE TRANSDUCER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
54. TEMPERATURE TRANSDUCER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

DRYING BED LIFT STATION ELECTRICAL

CONSTRUCTION NOTES

(15) GROUNDING ELECTRODE CONDUCTORS, GROUND ROD, AND INSPECTION WELL FOR ONLY THE FIRST GROUND ROD. PER SINGLE LINE DIAGRAMS AND DETAILS ON SHEET E4.6.

(70) 30A DRYING BED LIFT PUMP CONTROL PANEL, 480V, 3ø, 4W. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.

(71) DRYING BED LIFT PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.

(72) LEVEL FLOAT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.

(90) JOINT TRENCH WITH WATER LINES. MAINTAIN 24-INCH SEPARATION. SEE DETAIL 3 ON SHEET E4.3.

(98) 20A 120V GFCI DUPLEX RECEPTACLE WITH METAL WEATHERPROOF WHILE-IN-USE AND LOCKABLE COVER INSTALLED ONTO LIGHT POLE. SEE DETAIL 2 ON SHEET E4.5.

(99) CLASSIFIED AREA VERIFY BOUNDARY WITH THE NFPA. INSTALL ANY PANELS, DISCONNECTS, SPLICES, ARC MAKING EQUIPMENT OUT OF THE BOUNDARY, WHERE NOT POSSIBLE THEN INSTALL CLASS 1 DIV 1 LISTED EQUIPMENT. ALL CONDUIT WITHIN BOUNDARY SHALL BE CLASS 1 DIV 1 OR 2 RATED AS REQUIRED BY THE BOUNDARY. USE PVC COATED THREADED RMC CONDUIT, INSTALL STAINLESS STEEL 316 ENCLOSURES, HARDWARE AND EQUIPMENT WITHIN 10 FEET OF THE BOUNDARY. INSTALL CLASSIFIED SEAL OFFS WITHIN 10 FEET OF THE BOUNDARY, AT A PANEL OR JUNCTION BOX IS PREFERRED.

JOB NO. B614

CONSTRUCTION NOTES

(2) REMOVE EXISTING SES AND PANEL AND DISPOSE OF PROPERLY. COORDINATE DISCONNECTION OF THE METER AND SECONDARY CONDUCTORS WITH APS

(3) DE-ENERGIZE EXISTING LAB BUILDING UPON COMPLETION OF CONSTRUCTION OF THE NEW LAB. REMOVE ALL EXISTING CONDUCTORS AND ELECTRICAL EQUIPMENT AND DISPOSE OF PROPERLY. COORDINATE ALL WORK WITH OWNER AND POWER COMPANY PRIOR TO DE-ENERGIZATION.

(4) COORDINATE WITH APS TO REPLACE THE EXISTING POLE MOUNTED SINGLE PHASE TRANSFORMER. APS TO INSTALL THREE PHASE TRANSFORMERS. CONTRACTOR SHALL VERIFY LOCATION OF NEW TRANSFORMER WITH APS. APS PLANS WILL DETERMINE EXACT LOCATION AND TAKE PRECEDENCE OVER THESE DRAWINGS. COORDINATE ALL WORK WITH APS.

(5) APS SERVICE LINE. TRENCH AND INSTALL CONDUIT PER APS SPECIFICATIONS. POWER COMPANY PLANS WILL DETERMINE EXACT LOCATION OF CONDUIT AND TAKE PRECEDENCE OVER THESE DRAWINGS.

(6) SES, 400 AMP, 277/480V, 3ø, 4W, SEE DETAIL 1 ON E4.1.

(80) OVERFLOW LIFT PUMP CONTROL PANEL, BY VENDOR. 240V, 1ø, 3W. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.

(81) OVERFLOW LIFT PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.

(82) LEVEL FLOAT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.

(90) JOINT TRENCH WITH WATER LINES. MAINTAIN 24-INCH SEPARATION. SEE DETAIL 3 ON SHEET E4.3.

(98) 20A 120V GFCI DUPLEX RECEPTACLE WITH METAL WEATHERPROOF WHILE-IN-USE AND LOCKABLE COVER INSTALLED ONTO LIGHT POLE. SEE DETAIL 2 ON SHEET E4.5.

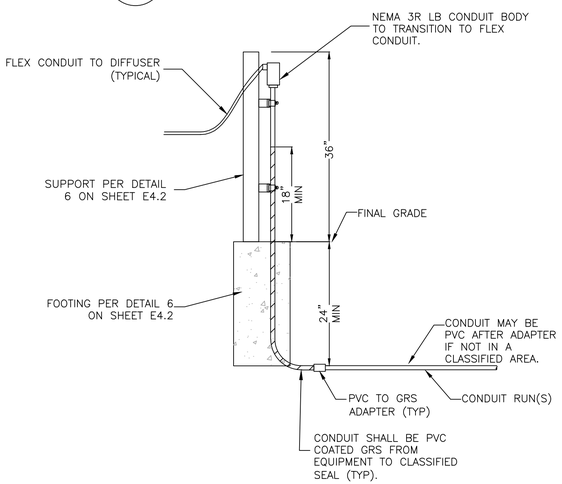
SHEET E4.1
84 OF 99 SHEETS

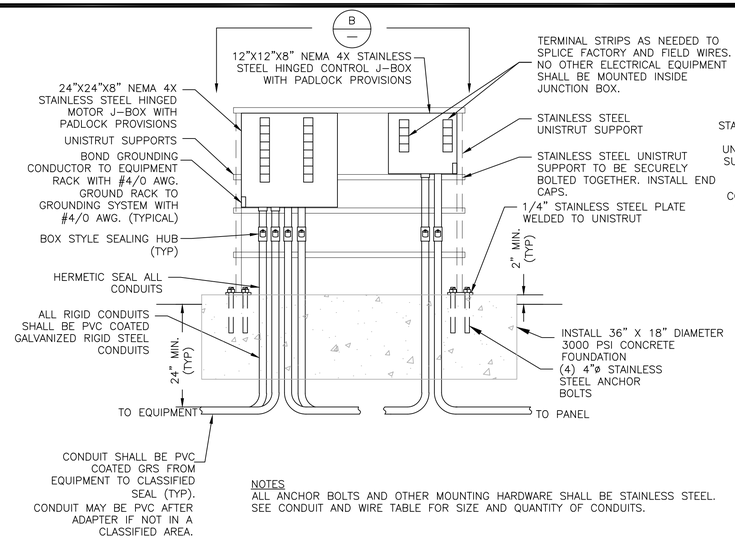
JOB NO. B614

1 RECEPTACLE PEDESTAL DETAIL



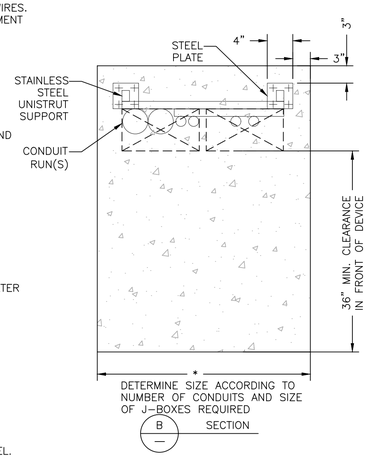
NO SCALE

NOTES:
1. ALL DIMENSIONS SHOWN ARE MINIMUM.
2. PROVIDE 6 INCH COVER OF CONCRETE WITHIN 2 FEET OF ALL DRIVABLE AREAS PER DETAILS AND PLAN.
3. CONDUITS THROUGH CLASSIFIED AREA SHALL BE PVC COATED RGS UNDERGROUND



2 TYPICAL CONDUIT STUB UP DETAIL

NO SCALE



3 CONDUIT TO EQUIPMENT SUPPORT DETAIL

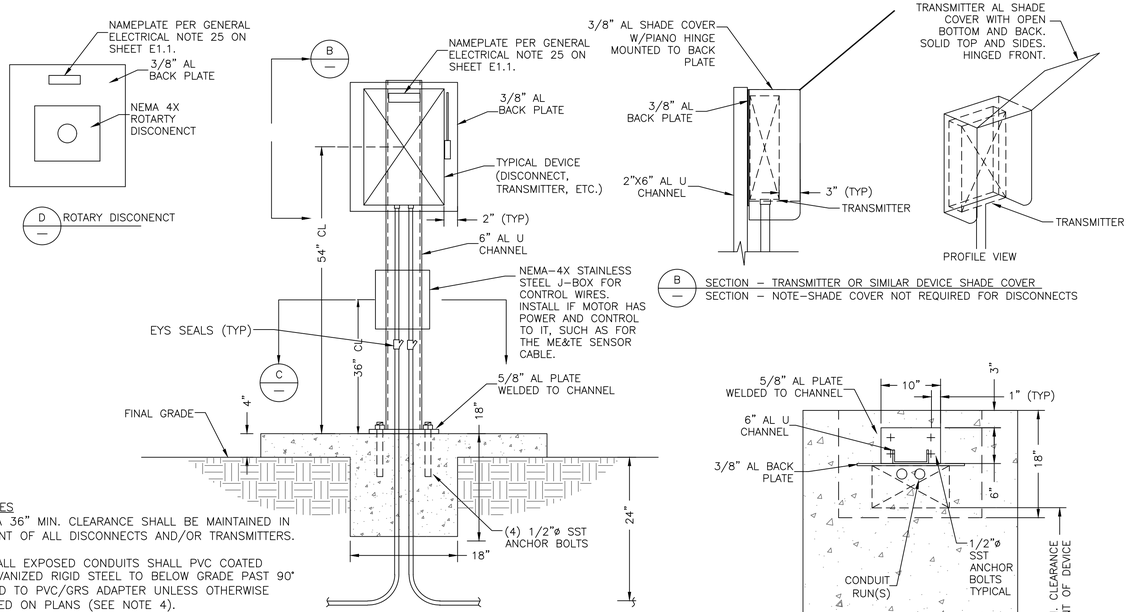
NO SCALE

NOTES
ALL ANCHOR BOLTS AND OTHER MOUNTING HARDWARE SHALL BE STAINLESS STEEL.
SEE CONDUIT AND WIRE TABLE FOR SIZE AND QUANTITY OF CONDUITS.

NOTES:
1) A 36" MIN. CLEARANCE SHALL BE MAINTAINED IN FRONT OF ALL ELECTRICAL DEVICES.

2) ALL EXPOSED CONDUITS SHALL BE GALVANIZED RIGID STEEL TO BELOW GRADE PAST 90° BEND TO PVC/GRS ADAPTER UNLESS OTHERWISE NOTED ON PLANS. WRAP PER GENERAL NOTE 11 ON SHEET E1.1.

3) ALL JUNCTION BOXES SHALL BE NEMA-4X STAINLESS STEEL UNLESS OTHERWISE NOTED ON PLANS.



4) ALL BARE STEEL COMPONENTS SHALL BE PRIMED AND PAINTED TAN TO MATCH SURROUNDING EQUIPMENT.

5) SEE RESPECTIVE SITE PLAN FOR CONDUIT SIZE AND QUANTITY DESIGNATIONS.

6)CONTRACTOR SHALL MAINTAIN AN 18" AIR GAP FOR CONDUIT RUN COMING FROM WET WELL. AIR GAP SHALL BE LOCATED AT THE JUNCTION BOX. CONTRACTOR SHALL INSTALL HERMETIC SEALS AT THE END OF THE THE CONDUIT RUNS INTO VAULT WALL TO PREVENT MOISTURE FROM ENTERING CONDUIT. CONDUIT SHALL BE CONTINUOUS GRS FROM WET WELL TO AIR GAP.

4 STANCHION MOUNTED JUNCTION BOX

NO SCALE

NOTES
1) A 36" MIN. CLEARANCE SHALL BE MAINTAINED IN FRONT OF ALL DISCONNECTS AND/OR TRANSMITTERS.

2) ALL EXPOSED CONDUITS SHALL PVC COATED GALVANIZED RIGID STEEL TO BELOW GRADE PAST 90° BEND TO PVC/GRS ADAPTER UNLESS OTHERWISE NOTED ON PLANS (SEE NOTE 4).

3) ALL DISCONNECTS SHALL BE NEMA-4X STAINLESS STEEL UNLESS OTHERWISE NOTED ON PLANS.

4)CONTRACTOR SHALL MAINTAIN 18" AIR GAP ON CONDUIT RUN COMING FROM WET WELL. AIR GAP SHALL BE LOCATED AT THE JUNCTION BOX. AIR GAP SHALL CONFORM TO THE NATIONAL ELECTRICAL CODE FOR CLASS 1, DIVISION 1 HAZARDOUS AREA. CONTRACTOR SHALL INSTALL HERMETIC SEALS AT THE END OF THE THE CONDUIT RUNS INTO VAULT WALL TO PREVENT MOISTURE FROM ENTERING CONDUIT. CONDUIT SHALL BE CONTINUOUS GRS FROM WET WELL TO 18" AIR GAP.

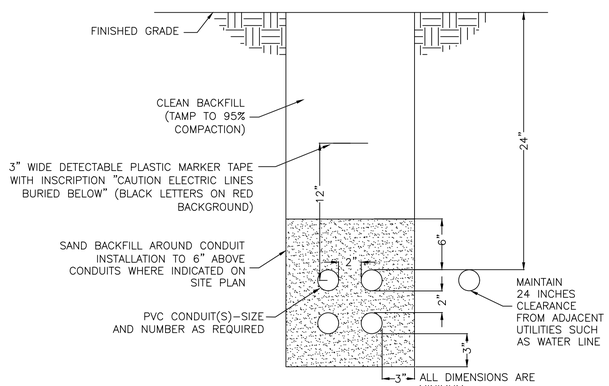
NOTE:

1. STAINLESS STEEL SUPPORT WITH TWO HOLE BASE ON EACH SIDE AND HEIGHT OF HORIZONTAL UNISTRUT SUPPORT SHALL BE 12" MINIMUM.

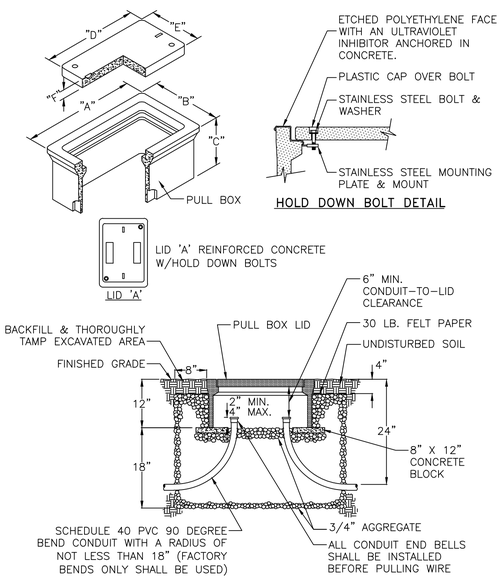


4 FLOWMETER DETAIL

NO SCALE

2 CONDUIT TAG DETAIL

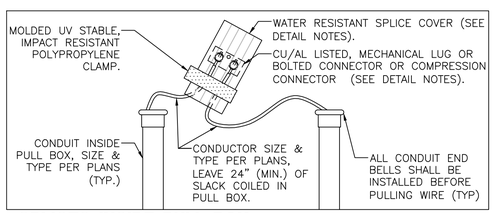
NO SCALE



NOTE:

1) THIS CONDUIT DUCT BANK DETAIL SHALL BE REFERENCED FOR ALL UNDER GROUND CONDUIT INSTALLATIONS.

2) INSTALL CONDUIT SPACERS EVERY 6 FT. MAX., CARLON OR EQUAL.



3 CONDUIT DUCT BANK INSTALLATION DETAIL

NO SCALE

5 PULL BOX INSTALLATION DETAIL

NO SCALE

SPLICES INSIDE PULL BOX

DETAIL NOTES:

1. THE PULL BOX SHALL BE MADE OF A HIGH DENSITY REINFORCED CONCRETE MATERIAL WITH END & SIDE KNOCKOUTS, & NON-SETTLING SHOULDERS TO MAINTAIN GRADE, MANUFACTURED WITH APPROXIMATE DIMENSIONS AS SHOWN.
2. STEEL REINFORCEMENT SHALL BE AS REGULARLY USED IN STANDARD PRODUCTS OF THE RESPECTIVE MANUFACTURER.
3. COVER LETTERING SHALL BE 1" LETTERS CAST IN STANDARD MARKINGS: "ELECTRIC" OR "HIGH VOLTAGE" OR "COMMUNICATIONS". AS REQUIRED.
4. THE PULL BOX SHALL HAVE AN ETCHED POLYETHYLENE FACE WITH AN ULTRAVIOLET INHIBITOR ANCHORED IN CONCRETE.
5. ALL CABLE & CONDUCTOR SPLICES MADE USING CU/AL LISTED, MECHANICAL LUG OR BOLTED CONNECTOR OR COMPRESSION CONNECTOR, (TYCO ELECTRONICS, NSI INDUSTRIES, ILSCO OR APPROVED EQUAL). CONNECTION TO BE INSULATED & MADE WATER RESISTANT WITH TYCO ELECTRONICS GELCAP-SL, NSI INDUSTRIES ESSLK-2/0 OR 3M SCOTCHCAST SPLICE KIT 85 SERIES.

NOTES:
1. THE LIGHTNING ROD IS CONNECTED TO GROUND WITH AT LEAST TWO DOWN CONDUCTORS LOCATED ON OPPOSITE FACADES WHEREVER POSSIBLE.
2. THE DOWN CONDUCTORS MUST BE INSTALLED OUTSIDE THE BUILDING, AVOIDING THE PROXIMITY OF ELECTRICAL CABLES AND GAS. ITS PATH MUST BE AS STRAIGHT AS POSSIBLE, USING THE SHORTEST PATH TO EARTH, AVOIDING ANY SHARP BEND OR LIFT.
3. INSTALL IN ACCORDANCE WITH NFPA 780, NEC 250.60 AND NEC 250.106.
4. DETAIL SHOWN FOR REFERENCE ONLY.

BID FORM FOR CONSTRUCTION CONTRACT
ADDENDUM 2 VERSION

Contractor Name: _____

The terms used in this Bid with initial capital letters have the meanings stated in the Instructions to Bidders, the General Conditions, and the Supplementary Conditions.

ARTICLE 1—OWNER AND BIDDER

1.01 This Bid is submitted to:

Town of Jerome
Submitted electronically via email to tpierce@pacewater.com. Alternatively, Bidder may submit a hard copy the Town of Jerome, 600 Clark Street, Jerome, AZ 86331.

The undersigned Bidder proposes and agrees, if this Bid is accepted, to enter into an Agreement with Owner in the form included in the Bidding Documents to perform all Work as specified or indicated in the Bidding Documents for the prices and within the times indicated in this Bid and in accordance with the other terms and conditions of the Bidding Documents.

ARTICLE 2—ATTACHMENTS TO THIS BID

2.01 The following documents are submitted with and made a condition of this Bid:

A. Required Bid security;

B. List of Proposed Subcontractors;

~~C. List of Proposed Suppliers;~~

D. Evidence of authority to do business in the state of the Project; or a written covenant to obtain such authority within the time for acceptance of Bids;

E. Contractor's license number as evidence of Bidder's State Contractor's License or a covenant by Bidder to obtain said license within the time for acceptance of Bids;

F. Required Bidder Qualification Statement with supporting data; ~~and~~

G. If Bid amount exceeds $10,000, signed Compliance Statement (RD 400-6). Refer to specific equal opportunity requirements set forth in the Supplementary Conditions of the Construction Contract (EJCDC C-800);

H. If Bid amount exceeds $25,000, signed Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions (AD-1048);

I. If Bid amount exceeds $100,000, signed RD Instruction 1940-Q Exhibit A-1, Certification for Contracts, Grants, and Loans.

ARTICLE 3—BASIS OF BID—LUMP SUM BID AND UNIT PRICES

3.01 *Lump Sum Bids*

A. Bidder will complete the Work in accordance with the Contract Documents for the following lump sum (stipulated) price(s), together with any Unit Prices indicated in Paragraph 3.02:

	Item Description	**Total Bid Price**
1	Materials Testing	$
	TOTAL ALLOWANCE PRICE	$

ARTICLE 4—DELETED

ARTICLE 5—DELETED

ARTICLE 6—TIME OF COMPLETION

6.01 Bidder agrees that the Work will be substantially complete and will be completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions on or before the dates or within the number of calendar days indicated in the Agreement.

6.02 **[Deleted]**

6.03 **[Deleted]**

6.04 Bidder accepts the provisions of the Agreement as to liquidated damages.

ARTICLE 7—BIDDER'S ACKNOWLEDGEMENTS: ACCEPTANCE PERIOD, INSTRUCTIONS, AND RECEIPT OF ADDENDA

7.01 *Bid Acceptance Period*

A. This Bid will remain subject to acceptance for 60 days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Owner.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

7.02 *Instructions to Bidders*

A. Bidder accepts all of the terms and conditions of the Instructions to Bidders, including without limitation those dealing with the disposition of Bid security.

7.03 *Receipt of Addenda*

A. Bidder hereby acknowledges receipt of the following Addenda:

Addendum Number	Addendum Date

7.04 **[Deleted]**

ARTICLE 8—BIDDER'S REPRESENTATIONS AND CERTIFICATIONS

8.01 *Bidder's Representations*

A. In submitting this Bid, Bidder represents the following:

1. Bidder has examined and carefully studied the Bidding Documents, including Addenda.

2. **[Deleted]**

3. Bidder is familiar with all Laws and Regulations that may affect cost, progress, and performance of the Work**, including all American Iron and Steel requirements.**

4. Bidder has carefully studied the reports of explorations and tests of subsurface conditions at or adjacent to the Site and the drawings of physical conditions relating to existing surface or subsurface structures at the Site that have been identified in the Supplementary Conditions, with respect to the Technical Data in such reports and drawings.

5. Bidder has carefully studied the reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that have been identified in the Supplementary Conditions, with respect to Technical Data in such reports and drawings.

6. Bidder has considered the information known to Bidder itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Bidding Documents; and the Technical Data identified in the Supplementary Conditions or by definition, with respect to the effect of such information, observations, and Technical Data on (a) the cost, progress, and performance of the Work; (b) the means, methods, techniques, sequences, and procedures of construction to be employed by Bidder, if selected as Contractor; and (c) Bidder's (Contractor's) safety precautions and programs.

7. Based on the information and observations referred to in the preceding paragraph, Bidder agrees that no further examinations, investigations, explorations, tests, studies,

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

or data are necessary for the performance of the Work at the Contract Price, within the Contract Times, and in accordance with the other terms and conditions of the Contract.

8. Bidder is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Bidding Documents.

9. Bidder has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Bidder has discovered in the Bidding Documents, and of discrepancies between Site conditions and the Contract Documents, and the written resolution thereof by Engineer is acceptable to Contractor.

10. The Bidding Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performance and furnishing of the Work.

11. The submission of this Bid constitutes an incontrovertible representation by Bidder that without exception the Bid and all prices in the Bid are premised upon performing and furnishing the Work required by the Bidding Documents.

8.02 *Bidder's Certifications*

A. The Bidder certifies the following:

1. This Bid is genuine and not made in the interest of or on behalf of any undisclosed individual or entity and is not submitted in conformity with any collusive agreement or rules of any group, association, organization, or corporation.

2. Bidder has not directly or indirectly induced or solicited any other Bidder to submit a false or sham Bid.

3. Bidder has not solicited or induced any individual or entity to refrain from bidding.

4. Bidder has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for the Contract. For the purposes of this Paragraph 8.02.A:

a. Corrupt practice means the offering, giving, receiving, or soliciting of anything of value likely to influence the action of a public official in the bidding process.

b. Fraudulent practice means an intentional misrepresentation of facts made (a) to influence the bidding process to the detriment of Owner, (b) to establish bid prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition.

c. Collusive practice means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish bid prices at artificial, non-competitive levels.

d. Coercive practice means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the execution of the Contract.

GENERAL NOTES:

1. ALL PAVING, GRADING, PIPING, AND UTILITY LINE CONSTRUCTION WORK WITHIN THE PUBLIC RIGHT OF WAY, ON PRIVATE STREETS, ACCESS WAYS, LOT GRADING, MATERIALS, AND WORKMANSHIP SHALL COMPLY WITH TOWN OF JEROME ENGINEERING STANDARDS AND SPECIFICATIONS, AND SHALL CONFORM TO THE LATEST MARICOPA ASSOCIATION OF GOVERNMENTS (MAG) AND A.D.O.T. STANDARD DETAILS AND SPECIFICATIONS. GRADING WORK SHALL CONFORM TO MAG SPECIFICATIONS, THE SOILS REPORT, AND CHAPTER 70 ENTITLED "EXCAVATION AND GRADING" OF THE UNIFORM BUILDING CODE (UBC) LATEST EDITION, SUBSECTIONS 7001 TO 7005, 7009 TO 7013, FIGURES 70-1 AND 70-2 AND AS STATED THEREIN. LOCAL MUNICIPAL STANDARD DETAILS WILL CONTINUE TO APPLY WHERE NOT ADOPTED OR INCLUDED BY MAG. THE FOLLOWING NOTES AND SPECIFICATIONS ARE HEREBY MADE A PART OF THE CONTRACT DOCUMENTS AND PROJECT SPECIFICATIONS. WHERE THERE EXISTS A CONFLICT BETWEEN THESE NOTES, MAG SPECS, UBC, THE SOILS REPORT, OR THE PROJECT SPECIFICATIONS, THE MORE STRINGENT OF THE REQUIREMENTS SHALL GOVERN UNLESS PRIOR CLARIFICATION FROM THE ENGINEER HAS BEEN GIVEN IN WRITING TO THE CONTRACTOR. THE CONTRACTOR AS STATED HEREIN SHALL MEAN THE GENERAL CONTRACTOR AND HIS ASSOCIATED SUBCONTRACTORS. THE GENERAL CONTRACTOR IS RESPONSIBLE FOR THE COORDINATION AND PERFORMANCE OF THE WORK OF ALL HIS SUBCONTRACTORS AND SUPPLIERS.
2. ALL WORK SHALL BE BID AND INSTALLED BY THE CONTRACTOR COMPLETE AND OPERATIONAL TO LINES, GRADES, AND FUNCTIONS INDICATED ON ALL PLANS AND SPECIFICATIONS. THE CONTRACTOR SHALL PROVIDE ALL LABOR, MATERIALS, EQUIPMENT, AND SERVICES NECESSARY TO COMPLETE ALL PROJECT EARTHWORK AND SITE WORK INCLUDING BUT NOT LIMITED TO: SITE CLEARING, GRUBBING, DEMOLITION, DEBRIS REMOVALS FROM THE SITE, IMPORT AND/OR EXPORT OF SOILS AND OTHER MATERIALS TO AND FROM THE SITE, BORROW MATERIALS, TEMPORARY SOILS MATERIAL STOCKPILING, BACKFILL OF ONSITE BORROW PITS, MOVING OF MATERIALS, CUT AND FILL, SLOPES, SOILS AND BANK STABILIZATION AND PROTECTION, BERMING, ROADWAY EXCAVATIONS, RELOCATIONS, STRUCTURE EXCAVATIONS, TRENCHING, ALL BACKFILLING, SITE GRADING, PAVING, PIPING, UTILITY LINE AND STORM DRAINAGE CONSTRUCTION, CURBS, SITE CONCRETE WORK AND OTHER MISCELLANEOUS SITE WORK STRUCTURES AND ITEMS INDICATED ON THE PLANS AND IN THE CONTRACT DOCUMENTS.
3. ANY QUANTITIES SHOWN ON PLANS ARE NOT VERIFIED BY THE ENGINEER. QUANTITIES ARE APPROXIMATE ONLY AND INTENDED AS A GUIDE FOR ESTIMATING PURPOSES. THE CONTRACTOR IS RESPONSIBLE FOR PROVIDING HIS OWN QUANTITY TAKE OFFS. THE CONTRACTOR SHALL VISIT THE SITE AND REVIEW THE SOILS CONDITIONS AND THE SOILS REPORT WITH THE PROJECT SOILS ENGINEER PRIOR TO BIDDING THIS PROJECT. ANY DISCREPANCIES IN SITE MATERIALS SHALL BE BROUGHT TO THE ATTENTION OF THE DESIGN ENGINEER 7 DAYS MINIMUM PRIOR TO BIDDING FOR REVIEW. ALL SHRINK OF EARTH MATERIAL OR EXCESS MATERIAL FROM UTILITY TRENCHES AND FOUNDATIONS SHALL BE INCLUDED IN THE CONTRACTOR'S BID.
4. THE ENGINEER WILL NOT BE RESPONSIBLE FOR CONSTRUCTION MEANS, METHODS, TECHNIQUES, SEQUENCES, OR PROCEDURES OR FOR SAFETY PRECAUTIONS OR PROGRAMS UTILIZED IN CONNECTION WITH THE WORK, AND HE WILL NOT BE RESPONSIBLE FOR THE CONTRACTOR'S FAILURE TO CARRY OUT THE WORK IN ACCORDANCE WITH THE CONTRACT DOCUMENTS.
5. THE CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING THE LIMITS OF THE WORK AREA FOR ALL PHASES OF THE WORK PRIOR TO BEGINNING CONSTRUCTION OF THOSE PHASES. ALL CONSTRUCTION LIMITS, AREAS OF WORK, SETBACKS, PERIMETERS, ADJACENT PROPERTY LINES, BOUNDARIES, AND OTHER CRITERIA DEFINING THE LIMITS OF THE CONTRACTOR'S WORK AREA AND LIMITS SHALL BE STAKED BY THE CONTRACTOR'S SURVEYOR PRIOR TO CONSTRUCTION OF CLEARING OF THE SITE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR FAMILIARIZING HIMSELF WITH THE EXTENT OF WORK TO BE DONE IN EACH SEPARATE PHASE OF THE PROJECT, AND ANY WORK NECESSARY IN INACTIVE PHASES REQUIRED TO DEEM THE ACTIVE PHASES FINISHED, SAFE, AND SERVICEABLE.
6. THE DESIGN ENGINEER RESERVES THE RIGHT TO MAKE MINOR FIELD MODIFICATIONS TO GRADES AND STRUCTURE DESIGNS TO ACCOMMODATE FIELD CONDITIONS FOUND ON THE SITE. THIS INCLUDES BUT IS NOT LIMITED TO MINOR MODIFICATIONS TO GRADE, ALIGNMENT, SLOPE, OR STRUCTURE LOCATIONS. THE ENGINEER SHALL HAVE THE RIGHT TO MAKE SUCH CHANGES IN WRITING IN THE LOCATION AND QUANTITIES OF WORK AS MAY BE DEEMED ADVISABLE.
7. NO JOB WILL BE CONSIDERED COMPLETE UNTIL FINAL GRADING IS COMPLETE AND ALL CURBS, PAVEMENT, AND SIDEWALKS HAVE BEEN SWEPT CLEAN OF ALL DIRT AND DEBRIS, ALL SURVEY MONUMENTS ARE INSTALLED AND ALL VALVES, MANHOLES, AND BOXES HAVE BEN ADJUSTED ACCORDING TO THE PLANS AND STANDARD DETAILS.
8. SEE SPECIFICATION SECTION 01 11 00 SUMMARY OF WORK FOR DIVISION OF RESPONSIBILITY. SEE SPECIFICATION SECTION 00 70 00 CONDITIONS OF THE CONTRACT FOR DEFINITIONS.
9. ALL CONSTRUCTION SHALL BE IN ACCORDANCE WITH UNITED STATES ENVIRONMENTAL PROTECTION AGENCY STANDARDS AND POLICIES AND CURRENT SUPPLEMENTS THERETO.
10. ANY WORK PERFORMED WITHOUT THE APPROVAL OF THE ENGINEER AND/OR ALL WORK AND MATERIAL NOT IN CONFORMANCE WITH THE SPECIFICATIONS IS SUBJECT TO REMOVAL AND REPLACEMENT AT THE CONTRACTOR'S EXPENSE.
11. DEBRIS SHALL BE DISPOSED OF WITHIN APPROVED DISPOSAL FACILITIES.
12. THE CONTRACTOR SHALL PROVIDE ADEQUATE MEANS FOR CLEANING TRUCKS AND/OR OTHER EQUIPMENT OF MUD PRIOR TO ENTERING PUBLIC STREETS. IT IS THE CONTRACTOR'S RESPONSIBILITY TO CLEAN STREETS, ALLEY DUST, AND TAKE WHATEVER MEASURES ARE NECESSARY TO ENSURE THAT ALL ADJACENT ROADS ARE MAINTAINED IN A CLEAN, MUD AND DUST FREE CONDITION AT ALL TIMES.
13. CONTRACTOR SHALL TAKE MEASURES TO CONTROL DUST AND FUGITIVE EMISSIONS, INCLUDING BUT NOT LIMITED TO WATERING THE SITE TWICE DAILY DURING GRADING TO CONTROL DUST.
14. AN APPROVED SET OF PLANS SHALL BE ON THE JOB SITE AT ALL TIMES WORK IS IN PROGRESS. DEVIATION FROM THE PLANS WILL NOT BE ALLOWED WITHOUT AN APPROVED PLAN REVISION OR AUTHORIZATION FROM THE ENGINEER.
15. THESE DRAWINGS INDICATE THE GENERAL EXTENT OF THE REQUIRED WORK AND ARE NOT INTENDED TO INDICATE EVERY ELEMENT REQUIRED. THE CONTRACTOR SHALL FURNISH ALL ELEMENTS TO COMPLETE THE SCOPE OF WORK IN ACCORDANCE WITH THE CONTRACT DOCUMENTS. ALL ITEMS REQUIRING CLARIFICATIONS SHALL BE SUBMITTED AS A "REQUEST FOR INFORMATION" (RFI) TO THE ENGINEER PER SECTION 01 31 00 OF THE SPECIFICATIONS.
16. ALL CONSTRUCTION VEHICLES OR EQUIPMENT, MOBILE OR FIXED OPERATED, SHALL BE EQUIPPED WITH PROPERLY OPERATING AND MAINTAINED MUFFLERS IN ACCORDANCE WITH THE LOCAL NOISE ORDINANCES.
17. THE CONTRACTOR SHALL PROVIDE SHOP DRAWINGS FOR THE ENGINEER'S REVIEW, AS MAY BE NECESSARY FOR THE EXECUTION OF THE WORK AND AS REQUIRED BY THE DRAWINGS AND SPECIFICATIONS.
18. DUE TO THE ONGOING OPERATION OF THE FACILITY, CONTRACTOR SHALL PROVIDE A SEQUENCE OF CONSTRUCTION FOR TOWN AND ENGINEER'S APPROVAL. TWO WEEKS PRIOR TO THE START OF CONSTRUCTION THE SEQUENCE SHALL INCLUDE A DETAILED SCHEDULE OF EVENTS AND TIMEFRAME. ALL EQUIPMENT, PIPING, LABOR, ETC. FOR THE SEQUENCE SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR. ALL TEMPORARY SHUTDOWNS AND CHANGES IN FACILITY OPERATION SHALL BE DISCLOSED TO OWNER AT LEAST 7 DAYS PRIOR.
19. PAVEMENT REPAIR, AS REQUIRED, MAY BE WITH COLD-MIX ASPHALT CONCRETE, WITH A MINIMUM THICKNESS OF 2 INCHES, USING AGGREGATE GRADING IN ACCORDANCE WITH MARSHALL MIX DESIGN OF SECTION 710 OF MAG UNIFORM STANDARD SPECIFICATIONS AND DETAILS FOR PUBLIC WORK CONSTRUCTION.
20. ALL CONSTRUCTION WORK SHALL BE PERFORMED IN ACCORDANCE WITH THE SOILS AND/OR GEOTECHNICAL REPORT PREPARED BY WESTERN TECHNOLOGIES, INC. DATED 10/25/2022. THIS REPORT IS SUPPLEMENTED BY 1) THESE PLANS AND SPECIFICATIONS, 2) YAVAPAI COUNTY PUBLIC WORKS STANDARDS AND SPECIFICATIONS, 3) STATE OF ARIZONA STANDARD DETAILS. IN THE EVENT OF CONFLICT, THE FORMER SHALL TAKE PRECEDENCE OVER THE LATTER. THE PERFORMANCE AND COMPLETION OF ALL WORK MUST BE TO THE SATISFACTION OF THE ENGINEER OF RECORD.

GENERAL CONSTRUCTION NOTES

ENGINEER'S NOTES

1. THE ENGINEER AND APPLICABLE AGENCY MUST APPROVE, PRIOR TO CONSTRUCTION, ANY ALTERATION TO OR VARIANCE FROM THESE PLANS. ANY VARIATION FROM THESE PLANS SHALL BE PROPOSED ON CONSTRUCTION FIELD PRINTS AND TRANSMITTED TO THE ENGINEER.
2. THE CONTRACTOR SHALL PROTECT AND MAINTAIN ALL EXISTING UTILITIES ON THE SITE. ANY DAMAGE TO EXISTING UTILITIES, WHETHER SHOWN OR NOT ON THE DRAWING SHALL BE REPAIRED/REPLACED AT THE CONTRACTOR'S EXPENSE. EXISTING SURFACE FEATURES AND FENCING SHALL BE REPLACED IN KIND.
3. ANY INSPECTION BY THE TOWN, COUNTY OR THE ENGINEER, SHALL NOT IN ANY WAY RELIEVE THE CONTRACTOR FROM ANY OBLIGATION TO PERFORM THE WORK IN STRICT COMPLIANCE WITH THE APPLICABLE CODES AND AGENCY REQUIREMENTS.
4. CONTRACTOR IS TO LOCATE ALL EXISTING PROPERTY MONUMENTS PRIOR TO CONSTRUCTION. NO EXISTING SURVEY MONUMENTATION SHALL BE REMOVED OR DISTURBED BY THE CONTRACTOR WITHOUT NOTIFICATION AND APPROVAL OF THE PROJECT SURVEYOR. THE CONTRACTOR SHALL CONTACT THE PROJECT SURVEYOR FOR THE SETTING OF REFERENCE POINTS 48 HOURS PRIOR TO DISTURBING OR REMOVING ANY MONUMENTS. A REGISTERED LAND SURVEYOR AT THE CONTRACTOR'S EXPENSE SHALL REPLACE ANY MONUMENTS DISTURBED DURING THE CONSTRUCTION OF THIS PROJECT.
5. NOTHING CONTAINED IN THE CONTRACT DOCUMENTS SHALL CREATE, NOR SHALL BE CONSTRUED TO CREATE, ANY CONTRACTUAL RELATIONSHIP BETWEEN THE ENGINEER AND THE CONTRACTOR OR ANY SUBCONTRACTOR.
6. ANY CONSTRUCTION WATER OBTAINED FROM THE TOWN WATER SOURCE WILL REQUIRE METER AND A BULK WATER PERMIT TO TRACK USAGE. THE TOWN WILL WAIVE FEES FOR PERMITTING AND USAGE IF USAGE IS LESS THEN 20,000 GALLONS. CONTACT THE TOWN OF JEROME AT (928) 634-7943 TO REQUEST A METER.
7. THE CONTRACTOR SHALL MAKE NO CLAIM AGAINST THE OWNER OR THE ENGINEER REGARDING ALLEGED INACCURACY OF CONSTRUCTION STAKES SET BY THE ENGINEER UNLESS ALL SURVEY STAKES SET BY THE ENGINEER ARE MAINTAINED INTACT AND CAN BE VERIFIED AS TO THEIR ORIGIN. IF, IN THE OPINION OF THE ENGINEER, THE STAKES ARE NOT MAINTAINED INTACT AND CANNOT BE VERIFIED AS TO THEIR ORIGIN, ANY REMEDIAL WORK REQUIRED TO CORRECT ANY ITEM OR IMPROPER CONSTRUCTION WORK IN THIS DEVELOPMENT SHALL BE PERFORMED AT THE SOLE EXPENSE OF THE RESPONSIBLE CONTRACTOR OR SUBCONTRACTOR.
8. TRAFFIC CONTROL SHALL BE MAINTAINED IN ACCORDANCE WITH THE TOWN OF JEROME MUNICIPAL CODES.
9. A PORTION OF THIS PROJECT SITE IS LOCATED WITHIN A DOCUMENTED 100-YR FEMA FLOODLAIN AS DESIGNATED ON THE PLANS.
10. IN CASES WHEN UNSTAKED EXISTING UTILITIES ARE ENCOUNTERED, SOME MINOR DEVIATION TO THE PROPOSED SEWER ALIGNMENT MAY BE ALLOWED TO MAINTAIN MINIMUM SEPARATION DISTANCES BETWEEN UTILITIES. ANY PROPOSED CHANGES TO THE ALIGNMENT MUST BE SUBMITTED TO THE TOWN'S REPRESENTATIVE FOR REVIEW. NO CHANGES WILL BE ALLOWED WITHOUT PROPER APPROVAL.
11. PRIOR TO BIDDING THE WORK, THE CONTRACTOR SHALL THOROUGHLY SATISFY HIMSELF AS TO THE ACTUAL CONDITIONS AND EARTHWORK QUANTITIES, IF ANY. NO CLAIM SHALL BE MADE AGAINST THE OWNER OR ENGINEER FOR ANY EXCESS OR DEFICIENCY THEREIN, ACTUAL OR RELATIVE.
12. THE ENGINEERS SHALL BE NOTIFIED BEFORE ANY ONSITE CONSTRUCTION BEGINS.
13. A SEPARATE PERMIT IS NECESSARY FOR ANY OFFSITE CONSTRUCTION.
14. APPROVAL OF THESE PLANS SHALL NOT PREVENT THE TOWN FROM REQUIRING CORRECTION OF ERRORS IN THE PLANS WHERE SUCH ERRORS ARE SUBSEQUENTLY FOUND TO BE IN VIOLATION OF ANY LAW OR ORDINANCE.

MECHANICAL CONSTRUCTION NOTES:

1. CONTRACTOR TO INSTALL PIPE SUPPORTS PER MANUFACTURER'S REQUIREMENTS AND SPECIFICATIONS. ALL DRY AREA PIPE SUPPORTS SHALL BE GALVANIZED STEEL U.N.O. ALL SUBMERGED PIPE SUPPORTS SHALL BE S.S. 316.
2. CONTRACTOR TO INSTALL PUMP BASE, GUIDE RAILS, AND BRACKETS PER MANUFACTURER'S REQUIREMENTS. CONTRACTOR SHALL CONFIRM SUPPLY OF PUMP MOUNTING EQUIPMENT WITH PUMP SUPPLIER.
3. ALL PROCESS PIPES SHALL BE COLOR COATED PER THE SPECIFICATIONS WITH THE EXCEPTION OF STAINLESS STEEL PIPES. ALL ABOVE GROUND PIPES SHALL ALSO BE OUTFITTED WITH A FLOW DIRECTION ARROW.
4. ALL ANCHORING/FASTENING SYSTEMS SHALL BE 316 S.S. REGARDLESS OF LOCATION, U.N.O.
5. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS FOR REVIEW AND APPROVAL FOR EACH EQUIPMENT ITEM PRIOR TO INSTALLATION. INSTALLATION DETAILS FOR ALL EQUIPMENT ITEMS SHALL BE PER RESPECTIVE EQUIPMENT MANUFACTURER'S SHOP DRAWINGS AND RECOMMENDED INSTALLATION REQUIREMENTS.
6. ALL D.I.P. SHALL BE CLASS 350, UNLESS NOTED OTHERWISE.
7. ELEVATION OF EXISTING STRUCTURES, PIPING, AND COMPONENTS ARE APPROXIMATE. CONTRACTOR TO FIELD VERIFY PRIOR TO CONSTRUCTION.
8. PRECAST SUPPLIER TO PROVIDE STRUCTURAL CALCULATIONS STAMPED BY REGISTERED ENGINEER IN AZ TO DOCUMENT DESIGN OF PRECAST STRUCTURE.
9. GROOVE FITTINGS MAY BE USED IN LIEU OF FLANGE FITTINGS FOR ALL ABOVE GROUND D.I. PIPING.
10. CONTRACTOR SHALL BE RESPONSIBLE FOR ALL TEMPORARY PIPING AND EQUIPMENT NEEDED FOR PROCESS ISOLATION, BYPASS, AND TRANSITION.
11. ALL YARD PIPING SHALL BE SURVEYED FOR VERTICAL AND HORIZONTAL ALIGNMENT PRIOR TO BACKFILL.
12. ALL PIPE SUPPORTS SPACING SHALL MEET PIPING MANUFACTURER'S REQUIREMENTS.
13. STRUCTURAL DIMENSIONS CONTROLLED BY OR RELATED TO MECHANICAL OR ELECTRICAL EQUIPMENT SHALL BE VERIFIED BY THE CONTRACTOR AND REFLECTED ON SHOP DRAWING PRIOR TO CONSTRUCTION.
14. ALL PVC PIPE GREATER THAN 3" IN DIAMETER SHALL BE DIPS.
15. ALL EXPOSED PIPE SHALL INCLUDE HEAT TRACING AND INSULATION.
16. ALL NEW BURIED GRAVITY SEWER LINES AND FORCE MAINS SHALL BE INSTALLED WITH A MINIMUM 3' DEPTH OF EARTH COVER.

PERMITS

1. CONTRACTOR SHALL OBTAIN ALL PERMITS AT HIS OWN EXPENSE FROM LOCAL MUNICIPAL AND AIR POLLUTION CONTROL AUTHORITIES PRIOR TO BEGINNING CONSTRUCTION.
2. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO ARRANGE FOR THE RELOCATION AND RELOCATION COSTS, IF ANY, OF ALL UTILITIES, AND SUBMIT A UTILITY RELOCATION SCHEDULE TO THE MUNICIPALITY AND DESIGN ENGINEER PRIOR TO CONSTRUCTION. ALL PUBLIC UTILITY EQUIPMENT POLES, BOXES, STRUCTURES, AND MUNICIPAL UTILITY COMPANY EQUIPMENT SHALL BE RELOCATED BY THE APPROPRIATE UTILITY COMPANY OR MUNICIPALITY BEFORE ANY WORK IS STARTED.

RECORD DRAWINGS

1. ACCEPTANCE OF THE COMPLETED PAVING, GRADING, OR UTILITY INSTALLATION WILL NOT BE GIVEN UNTIL REPRODUCIBLE AS-BUILT PLANS HAVE BEEN SUBMITTED BY THE ENGINEER AND APPROVED BY THE LOCAL GOVERNING AGENCY.

OBSERVATION

1. THE CONTRACTOR SHALL CONTACT THE APPROPRIATE PUBLIC UTILITY COMPANIES FOR INSPECTION OF TRENCHING, BEDDING, AND BACKFILLING DONE IN CONJUNCTION WITH INSTALLATION OF THOSE UTILITIES ON THIS PROJECT.
2. SOILS COMPACTION TEST RESULTS MUST BE SUBMITTED TO THE ENGINEER'S OFFICE FOR ALL FILL MATERIAL FOR ROADS, TRENCH BACKFILL, AND SITE FILL MATERIALS UNDER SLABS AND STRUCTURES. NO FILL MATERIALS SHALL BE PLACED WITHOUT TESTING DURING PLACEMENT. CONTRACTOR SHALL SUBMIT ALL TEST RESULTS TO THE DESIGN ENGINEER AND GOVERNMENTAL AGENCIES.
3. CONTRACTOR SHALL SUBMIT A SCHEDULE, APPROVED IN WRITING BY A QUALIFIED CONSULTING TESTING AGENCY, FOR FREQUENCY, LOCATION, AND TYPE OF ALL PROJECT TESTING. THE CONTRACTOR WILL BE RESPONSIBLE FOR SCHEDULING AND COORDINATION OF ALL TESTING INCLUDING THE FOLLOWING TERMS WHICH SHALL BE TESTED IN ACCORDANCE WITH MAG SPECIFICATIONS:
   - 3.1. SUBGRADE COMPACTION
   - 3.2. BASE COURSE COMPACTION
   - 3.3. ASPHALT PAVEMENT MIX DESIGN QUALITY
   - 3.4. CONCRETE STRENGTH
   - 3.5. TRENCH BEDDING AND BACKFILL
   - 3.6. TESTING FOR UTILITIES, PIPING, AND DRAINAGE SYSTEMS

UTILITIES

1. A UTILITY COORDINATION MEETING SHALL BE COORDINATED BY THE CONTRACTOR PRIOR TO THE START OF ANY WORK. ALL UTILITY ISSUES SHALL BE ADDRESSED IN ACCODANCE WITH MAG 105.6.
2. LOCATION OF UNDERGROUND UTILITIES SHALL BE ACCOMPLISHED IN ACCORDANCE WITH ARS 40-360.22 PRIOR TO ANY EXCAVATION. BLUE STAKE SHALL BE CALLED AT 1-800-STAKE-IT FOR ACCURATE LOCATION OF UTILITIES AS NECESSARY AND PRIOR TO AN EXCAVATION. UTILITIES IF INDICATED ON PLANS ARE APPROXIMATE LOCATIONS ONLY, TAKEN FROM THE UTILITY COMPANY MAPS. IF THE CONTRACTOR ENCOUNTERS ANY LINES NOT INDICATED ON THE DRAWINGS OR MARKED IN THE FIELD BY THE UTILITY COMPANY THAT MAY INTERFERE WITH HIS WORK, HE SHALL NOTIFY THE APPROPRIATE UTILITY COMPANY IMMEDIATELY FOR DISPOSITION OF THOSE FACILITIES.
3. UTILITIES MUST BE LOCATED TO MINIMIZE INTERFERENCE WITH ONE ANOTHER, TO PROVIDE REQUIRED HORIZONTAL AND VERTICAL SEPARATIONS, AND TO PROVIDE MAINTENANCE ACCESS WITHOUT VIOLATING EASEMENT BOUNDARIES. SEPARATION BETWEEN UTILITIES PER MAG STANDARD.
4. ALL WATER MAINS, APPURTENANCES, AND INSTALLATIONS SHALL CONFORM TO A.W.W.A. STANDARDS AND ARIZONA DEPARTMENT OF ENVIRONMENTAL QUALITY AND TOWN OF JEROME REQUIREMENTS. WATER SYSTEMS SHALL BE TESTED PER A.D.E.Q. BULLETIN NO. 10 TO THE APPROPRIATE A.W.W.A. STANDARDS.

CONSTRUCTION STAKING

1. THE ACCURACY OF ALL CONSTRUCTION WORK SHALL BE MAINTAINED AND VERIFIED BY THE OWNER'S SURVEYOR AT THE OWNER'S EXPENSE BY PROVIDING CONSTRUCTION STAKING SUITABLE TO THE TOWN ENGINEER. STAKES WILL BE SET ESTABLISHING LINES AND GRADES (FINISH OR FLOWLINE) FOR ALL CONSTRUCTION INCLUDING ROADS, CURB AND GUTTER, SIDEWALKS, UTILITIES, STRUCTURES, AND OTHER WORK AS CONSIDERED NECESSARY BY THE ENGINEER. ALL SURVEY CONTROL SHALL BE SET BY THE OWNER'S SURVEYOR FROM MONUMENTS ACCEPTABLE TO THE ENGINEER.

GRADING AND EARTHWORK

1. NO GRADING OR TRENCHING WORK SHALL BEGIN PRIOR TO SUPPORTING AND PROTECTING EXISTING ONSITE AND ADJACENT PROPERTY FROM SETTLING, CRACKING, OR OTHER DAMAGE WHICH MIGHT RESULT. CONTRACTOR SHALL VERIFY FROM SOILS REPORT RECOMMENDATIONS THE DEGREE OF DIFFICULTY REQUIRED FOR TRENCHING AND EXCAVATION WORK BASED ON DEPTH AND TYPE OF MATERIALS TO BE ENCOUNTERED.
2. CLEARING AND GRUBBING: EXAMINE SITE AND PROVIDE NECESSARY EQUIPMENT AND LABOR TO REMOVE FROM THE SITE AND DISPOSE OF STUMPS, ROOTS, ROCKS, LOOSE FILL, VEGETATION DEBRIS, AND ANY OTHER OBJECTIONABLE MATERIALS FROM THE BUILDING AND MATERIAL. CLEAN. UNCLASSIFIED ONSITE SOILS MAY BE USED IN GENERAL AS FILL MATERIAL. SEE MAG SPECIFICATIONS 201 AND 215.
3. SUBGRADE PREPARATION: IF THE NATURAL SUBGRADE IS LESS THAN THE REQUIRED DENSITY, IT SHALL BE SCARIFIED AND COMPACTED TO A MINIMUM DEPTH OF TWELVE INCHES OR AS NOTED IN THE SOILS REPORT IMMEDIATELY PRIOR TO PLACING SUBSEQUENT FILL MATERIAL THEREON. THE CONTRACTOR IS RESPONSIBLE FOR MAINTENANCE AND REPAIR OF DAMAGE TO PREPARED SUBGRADE CAUSED BY CONTRACTOR'S OPERATIONS OR PUBLIC TRAFFIC UNTIL ACCEPTANCE OF PROJECT. NO MATERIALS SHALL BE PLACED UPON THE PREPARED SUBGRADE UNTIL IT MEETS THE SPECIFIED REQUIREMENTS. ROADWAY SUBGRADE COMPACTION INCLUDES SUBGRADE UNDER ALL PAVEMENT, CURB, SIDEWALKS, SHOULDERS, AND FILL SLOPES. SUBGRADE TOLERANCES SHALL BE AS SPECIFIED IN MAG SECTION 301. OPEN LANDSCAPED AREAS SHALL BE GRADED TO ±0.2 FEET.
4. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO CONTACT THE TESTING COMPANY FOR SCHEDULING OF COMPACTION TESTING. THE FREQUENCY OF DENSITY AND MOISTURE TESTS REQUIRED FOR ADEQUATE CONTROL SHALL BE THE RESPONSIBILITY OF THE SOILS ENGINEER WHO SHALL CERTIFY TO THE ENGINEER AND CONTRACTOR AT PROJECT END THAT THE ROADBED FILL IS COMPACTED AS OUTLINED HEREIN. COMPACTION SHALL BE ACHIEVED BY MECHANICAL MEANS. IN NO CASE SHALL STRUCTURE BACKFILLING BE FLOOD WATER SETTLED.
5. ALL SLOPE CONSTRUCTION AND ROADWAY EXCAVATION SHALL CONFORM TO THE REQUIREMENTS OF MAG SPECIFICATIONS SECTIONS 20, 205, 211, 301, AND UBC SECTIONS 7009 AND 8010. CUT AND FILL SLOPES SHALL BE AS INDICATED ON THE DETAILS AND PLANS. CUT AND FILL SLOPE GRADIENTS SHALL NOT EXCEED 2:1 IN STEEPNESS WITHOUT WRITTEN AUTHORIZATION FROM THE SOILS ENGINEER AND EXAMINATION BY THE DESIGN ENGINEER. ALL SLOPE CONDITIONS SHALL BE PROVIDED WITH THE APPROPRIATE BENCHES AS SPECIFIED IN THE REFERENCE DOCUMENTS AND INDICATED ON THE PLANS. IF SOILS CONDITIONS ARE ENCOUNTERED WHICH DO NOT ALLOW THE ESTABLISHMENT OF THE INDICATED CUT OR FILL SLOPES, THE DESIGN ENGINEER AND SOILS ENGINEER SHALL BE CONTACTED IMMEDIATELY TO DETERMINE AN ADJUSTMENT TO THE SLOPE GRADIENT OR TO ESTABLISH A METHOD OF STABILIZATION. ALL FILL SLOPES SHALL BE COMPACTED AS EACH LIFT OF FILL MATERIAL IS PLACED. ALL CUT AND FILL SLOPES SHALL BE UNIFORMLY GRADED TO LINES AND GRADES INDICATED. TOPS OF ALL CUT SLOPES SHALL BE ROUNDED AND ALL UNSTABLE AND LOOSE MATERIAL AT TOP OF SLOPE SHALL BE REMOVED. TOP OF CUT SLOPES OVER 10' HIGH SHALL BE PROVIDED WITH BRO DITCHES FOR DRAINAGE. ALL CUT AND FILL SLOPES SHALL BE REVEGETATED WITH A MIXTURE OF NATIVE GRASSES AND WILD FLOWER SEED OR AS SPECIFIED WITHIN THE LANDSCAPE PLANS. COMPACT ALL SHOULDERS AND BACKFILLS BEHIND ALL STRUCTURES AND WALLS.
6. COMPACT TO THE FOLLOWING SPECIFIED PERCENT OF MAXIMUM DENSITY AS DETERMINED IN ACCORDANCE WITH ASTM D698 AND MAG SECTION 211 OR AS DIRECTED IN THE SOILS REPORT.

MINIMUM PERCENT COMPACTION

SUBGRADE SOIL:
- ROADWAY AND STRUCTURE AREAS - - - - - - - - - - - - - 95
- PAVED AREAS (PAVEMENTS, SIDEWALKS, & PADS) - - 95

EARTH FILL:
- ROADWAY AND STRUCTURE AREAS - - - - - - - - - - - - - 95
- PAVED ARES (PAVEMENTS, SIDEWALKS, & PADS) - - - 95
- GRASSED AND PLANTING AREAS - - - - - - - - - - - - - - 85
- AGGREGATE BASE COURSE - - - - - - - - - - - - - - - - - - 100
- BACKFILL AROUND STRUCTURES - - - - - - - - - - - - - - 95

BACKFILL FOR UTILITY TRENCHES (PER MAG SECTION 601). PROVIDE TYPE 1 BACKFILL OR AS DIRECTED BY APPROPRIATE UTILITY REQUIREMENTS. BACKFILL FOR TRENCHES WITHIN 10' OF STRUCTURES AND WALLS SHALL BE COMPACTED TO 95% UNLESS DIRECTED OTHERWISE BY ENGINEER.

EQUIPMENT LIST

ITEM	ID #	DESCRIPTION	MANUFACTURER	MODEL #	HP	SPECIFICATIONS / DESCRIPTION	QTY
1	03010A 03010B	INFLUENT COARSE SCREEN	OR-TEC OR EQUAL	MB480T2 W/ RT	0.16	TANK MOUNTED MECHANICALLY CLEANED BAR SCREEN WITH TWO INDEPENDENT 6MM SCREENING CHANNELS W/ ISOLATING SLIDE GATE & SST ENCLOSURE, PROVIDED WITH SEPERATE ROCK TRAP W/ BAFFLE AND OUTLET WEIR. 480V, 3 PHASE, 60HZ. 0.27 MGD PEAK FLOW	1
2	05120 05121	SBR INFLUENT PLUG VALVES	BY SBR VENDOR		0.5	ELECTRICALLY ACTUATED 10" PLUG VALVE W/ OPEN/CLOSE SERVICE. 120V, 1 PHASE, 60 HZ	2
3	05110 05112	SBR SUBMERSIBLE MIXERS	BY SBR VENDOR		3.6	PREMIUM EFFICIENCY CONSTANT SPEED DIRECT DRIVE MOTOR MIXER W/ MAST MOUNT AND MOORING, 480V, 3 PHASE, 60HZ.	2
4	04310 04311 04312	SBR AERATION BLOWERS	BY SBR VENDOR		20	VFD CONTROLLED PD BLOWER UNIT W/ SOUND ATTENUATED ENCLOSURE, 361 SCFM @ 6.63 PSI, 480V, 3 PHASE, 60HZ.	3
5	04313	DIGESTER AERATION BLOWER	BY SBR VENDOR		7.5	VFD CONTROLLED PD BLOWER UNIT W/ SOUND ATTENUATED ENCLOSURE, 110 SCFM @ 6.63 PSI, 480V, 3 PHASE, 60HZ. CONTROLLED	1
6	04180 04181	RETREIVABLE FINE BUBBLE DIFFUSER SYSTEM	BY SBR VENDOR		N/A	RETRIEVABLE DIFFUSER RACK ASSEMBLY WITH MIN 30" EPDM TUBE DIFFUSERS, RANGE 1.0 CFM - 10.0 CFM (1 - 5 SCFM DESIGN) 2/ W EPDM FLEXIBLE DROP LINE AND QUICK DISCONNECT FITTINGS	60
7	04280	COARSE BUBBLE DIFFUSER SYSTEM	BY SBR VENDOR		N/A	3" EPDM DISK COARSE BUBBLE DIFFUSERS, RANGE 0.5 CFM - 5.0 CFM (0.5 - 2 SCFM DESIGN) 3/8" CXN	12
8	05100 05101	WAS TRANSFER PUMPS	BY SBR VENDOR		1.8	20 GPM @ 15' TDH SUBMERSIBLE NON-CLOG SLUDGE PUMP, 1.8 HP 480V, 3 PHASE, 60HZ W/ BASE AND SS GUIDE RAIL	2
9	05111 05113	SOLIDS EXCLUDING FLOATING DECANTER	BY SBR VENDOR		0.5	211 GPM FLOATING DECANTER W/ 120V, 1 PHASE, 60 HZ ACTUATED SUBMERGED WEIR, MOORING AND 6" DISCHARGE HOSE ASSEMBLY	2
10	05121 05123	SBR DECANT VALVE	BY SBR VENDOR		0.33	ELECTRICALLY ACTUATED 6" BUTTERFLY VALVE W/ MODULATING SERVICE, 480V, 3 PHASE, 60HZ	2
11	06221	TRANSFER/EFFLUENT VALVE	BY SBR VENDOR		0.33	ELECTRICALLY ACTUATED 6" BUTTERFLY VALVE W/ MODULATING SERVICE, 480V, 3 PHASE, 60HZ	1
12	06290	CHLORINATION EROSION TABLET FEEDER	NORWECO OR EQUAL	SERIES 4000	N/A	6" SCH 80 PVC HUB TABLET FEEDER W/ ADJUSTABLE INLET BAFFLE AND OUTLET WEIR AND 24" RISER ASSEMBLIES	1
13	05291	DECHLORINATION EROSION TABLET FEEDER	NORWECO OR EQUAL	SERIES 4000	N/A	6" SCH 80 PVC HUB TABLET FEEDER W/ ADJUSTABLE INLET BAFFLE AND OUTLET WEIR AND 24" RISER ASSEMBLIES	1
14	08400	DEWATERING FEED PUMP	BOERGER OR EQUAL	AN 40	3.0	20 GPM ROTARY LOBE SLUDGE PUMP, 3 HP 480V, 3 PHASE, 60HZ	1
15	08410	DRY POLYMER MAKE-DOWN AND FEED UNIT	PROMINENT OR EQUAL	ULTROMAT MT 140	0.25	POLYPROPOLENE PREP TANK W/ ELECTRIC STIRRER, WETTING CONE AND INJECTOR 480V, 3 PHASE, 60 HZ	1
16	08401	POLYMER METERING PUMP	PROMINENT OR EQUAL	DULCOFLEX - DFXa 0530	0.16	0.08 - 7.93 GPH SHELF-MOUNTED PERISTALTIC METERING PUMP, 73 PSI MAX BACK PRESSURE, 1/2" x 3/8" POLYURETHANE CONNECTOR TUBING, 115V, 1-PH SERVICE	1
17	08490	SLUDGE BAGGER SYSTEM	ENVIRODYNE, OR EQUAL	585-8i	N/A	20 GPM 8-BAG SLUDGE DEWATERING SYSTEM MAX LOADING RATE OF 20 GPM OR 100 #/HR - 25# ACTIVE POLYMER / TON DS	1
18	07400	DRYING BED DRAIN RETURN PUMPS	GRUNDFOS OR EQUAL	SEG.A15.40.EX.2.60H	4.16	70 GPM @ 90' TDH SUBMERSIBLE GRINDER PUMP, 5 HP 480V, 3 PHASE, 60HZ W/ BASE AND SS GUIDE RAIL	2
19	07401	PACKAGED OVERFLOW LIFT STATION	E ONE OR EQUAL	SP84S	2	31 GPM @ 82' TDH SDUPLEX GRINDER PRE-PACKAGED PUMP STATION, 2 HP 240V, 1 PHASE, 60 HZ W/ INTEGRAL FLOAT CONTROLS, PANEL AND SINGLE WARNING BEACON	1
20	SEE PID	PRESSURE TRANSDUCER	BY SBR VENDOR		N/A	304 SS SUBMERSIBLE PRESSURE TRANSDUCER WITH 4-20 mA SIGNAL OUTPUT	4
21	SEE PID	LEVEL SENSOR	BY SBR VENDOR		N/A	316 SS FLOAT SWITCH WITH THREE-CONDUCTOR ELECTRICAL CABLE	4
22	05160A 05161A	DISSOLVED OXYGEN CONTROLLER	BY SBR VENDOR		N/A	NEMA 4X ENCLOSURE WITH AC 100-230 VAC POWER SUPPLY, 4-20 mA SIGNAL OUTPUT	2
23	05160B 05161B	DISSOLVED OXYGEN PROBE	BY SBR VENDOR		N/A	304 SS PROBE	2
24	06240	EFFLUENT FLOW METER	BY SBR VENDOR		N/A	6" ELECTROMAGNETIC FLOW METER W/ TRAMSMITTER, ±1%ACCURACY 5D/3D, WITH 4-20 mA SIGNAL OUTPUT	1
25	01003	STANDBY GENERATOR			N/A	600 KW STANDBY GENERATOR W/ SOUND ATTENUATED OUTDOOR ENCLOSURE AND SUB BASE FUEL TANK	1

DESIGN FLOWS:

MAX MONTH AVE DAY FLOW:	90,000 GPD
MAX PEAK DAY FLOW:	135,000 GPD
PEAK HOUR FLOW:	270,000 GPD

INFLUENT PARAMETERS:

BOD:	360 MG/L
TSS:	250 MG/L
TKN:	40 MG/L

EFFLUENT PARAMETERS:

BOD:	<30 MG/L
TSS:	<30 MG/L
TN:	<10 MG/L
FECAL COLIFORM:	200 CFU/100 ML (4/7 SAMPLES); 800 CFU/100 ML (SINGLE SAMPLE MAX)

JOB NO. B614

W:\B614\Engineering\B614-30\sheets\B614-G3.0 HYDRAULIC PROFILE.dwg - Tab: G3.2 - by reddington on 03/02/26 at 9:32:17 AM

1682

1 GENERAL

1.1 ALL PAVING, GRADING PIPING AND UTILITY LINE CONSTRUCTION WORK WITHIN THE PUBLIC RIGHT-OF-WAY, ON PRIVATE STREETS, ACCESS WAYS, LOT GRADING, MATERIALS, AND WORKMANSHIP SHALL COMPLY WITH TOWN OF JEROME ENGINEERING STANDARDS AND SPECIFICATIONS, AND SHALL CONFORM TO THE LATEST MARICOPA ASSOCIATION OF GOVERNMENTS (MAG) AND A.D.O.T. STANDARD DETAILS AND SPECIFICATIONS. GRADING WORK SHALL CONFORM TO MAG SPECS, THE SOILS REPORT* AND CHAPTER 70 ENTITLED "EXCAVATION AND GRADING" OF THE UNIFORM BUILDING CODE (UBC) LATEST EDITION, SUBSECTIONS 7001 TO 7005, 7009 TO 7013, FIGURES 70-1 AND 70-2 AND AS STATED THEREIN. LOCAL MUNICIPAL STANDARD DETAILS WILL CONTINUE TO APPLY WHERE NOT ADOPTED OR INCLUDED BY MAG. THE FOLLOWING NOTES AND SPECIFICATIONS ARE HEREBY MADE A PART OF THE CONTRACT DOCUMENTS AND PROJECT SPECIFICATIONS. WHERE THERE EXISTS A CONFLICT BETWEEN THESE NOTES, MAG SPECS, UBC, THE SOILS REPORT* OR THE PROJECT SPECIFICATIONS, THE MORE STRINGENT OF THE REQUIREMENTS SHALL GOVERN UNLESS PRIOR CLARIFICATION FROM THE ENGINEER HAS BEEN GIVEN IN WRITING TO THE CONTRACTOR. THE CONTRACTOR AS STATED HEREIN SHALL MEAN THE GENERAL CONTRACTOR AND HIS ASSOCIATED SUBCONTRACTORS. THE GENERAL CONTRACTOR IS RESPONSIBLE FOR THE COORDINATION AND PERFORMANCE OF THE WORK OF ALL OF HIS SUBCONTRACTORS AND SUPPLIERS.

1.2 ALL WORK SHALL BE BID AND INSTALLED BY THE CONTRACTOR COMPLETE AND OPERATIONAL TO LINES, GRADES AND FUNCTIONS INDICATED ON ALL PLANS AND SPECIFICATIONS. PROVIDE ALL LABOR, MATERIALS, EQUIPMENT AND SERVICES NECESSARY TO COMPLETE ALL PROJECT EARTHWORK AND SITE WORK INCLUDING BUT NOT LIMITED TO: SITE CLEARING, GRUBBING, DEMOLITION'S, DEBRIS REMOVALS FROM THE SITE, IMPORT AND/OR EXPORT OF SOILS AND OTHER MATERIALS TO AND FROM THE SITE, BORROW MATERIALS, TEMPORARY SOILS MATERIAL STOCKPILING, BACKFILL OF ONSITE BORROW PITS, MOVING OF MATERIALS, CUT AND FILL, SLOPES, SOILS AND BANK STABILIZATION AND PROTECTION, BERMING, ROADWAY EXCAVATIONS, RELOCATION'S, STRUCTURE EXCAVATIONS, TRENCHING, ALL BACKFILLING, SITE GRADING, PAVING, PIPING, UTILITY LINE AND STORM DRAINAGE CONSTRUCTION, CURBS, SITE CONCRETE WORK AND OTHER MISCELLANEOUS SITE WORK STRUCTURES AND ITEMS INDICATED ON THE PLANS AND IN THE CONTRACT DOCUMENTS.

1.4 ANY QUANTITIES SHOWN ON PLANS ARE NOT VERIFIED BY THE ENGINEER. QUANTITIES ARE APPROXIMATE ONLY AND INTENDED AS A GUIDE FOR ESTIMATING PURPOSES. THE CONTRACTOR IS RESPONSIBLE FOR PROVIDING HIS OWN QUANTITY TAKE OFFS. THE CONTRACTOR SHALL VISIT THE SITE AND REVIEW THE SOILS CONDITIONS AND THE SOILS REPORT* WITH THE PROJECT SOILS ENGINEER PRIOR TO BIDDING THIS PROJECT. ANY DISCREPANCIES IN SITE MATERIALS SHALL BE BROUGHT TO THE ATTENTION OF THE DESIGN ENGINEER 7 DAYS MINIMUM PRIOR TO BIDDING FOR REVIEW. ALL SHRINK OF EARTH MATERIAL OR EXCESS MATERIAL FROM UTILITY TRENCHES AND FOUNDATIONS SHALL BE INCLUDED IN THE CONTRACTOR'S BID.

1.5 THE ENGINEER MAY REQUIRE THE SUBMITTAL OF A "CERTIFICATE OF COMPLIANCE" AND/OR "MANUFACTURER'S GUIDELINES" FOR ANY MATERIALS USED IN THE WORK. MANUFACTURER'S GUIDELINES SHALL CONSISTS OF WRITTEN INSTRUCTIONS FOR SHIPPING, HANDLING, UNLOADING, CUTTING, JOINING, INSTALLATION, STORAGE, AND/OR ANY OTHER FACETS OF CONSTRUCTION

1.6 THE ENGINEER MAY REQUIRE ANY MATERIALS USED IN THE WORK TO BE TESTED ACCORDING TO AASHTO AND ASTM STANDARDS. THE CONTRACTOR SHALL, AT HIS EXPENSE, SUPPLY CERTIFICATES OR RESULTS OF TESTING.

1.7 ALL WORK AND MATERIALS NOT CONFORMING TO SPECIFICATIONS OR PERFORMED WITHOUT THE CONSENT OF THE OWNER OR HIS REPRESENTATIVE WILL BE SUBJECT TO REJECTION BY THE OWNER AND/OR ENGINEER AND REPLACED AT THE CONTRACTOR'S EXPENSE.

1.8 THE CONTRACTOR SHALL GUARD AGAINST DAMAGE DURING CONSTRUCTION TO ADJACENT PROPERTIES, FENCES, WALLS AND UTILITY EQUIPMENT. ANY ITEMS DAMAGED BY CONSTRUCTION SHALL BE REPLACED WITH SAME KIND OR BETTER AT CONTRACTOR'S EXPENSE.

1.9 NO CONSTRUCTION SHALL BEGIN UNTIL CONFLICTING UNDERGROUND UTILITY MITIGATING CONSTRUCTION IS COMPLETED, IF ANY, AND UNTIL PIPE SLEEVES AND SERVICE STUBS TO ALL BUILDINGS OR LOTS HAVE BEEN EXTENDED.

1.10 NO EXISTING SURVEY MONUMENTATION SHALL BE REMOVED OR DISTURBED BY THE CONTRACTOR WITHOUT NOTIFICATION AND APPROVAL OF THE PROJECT SURVEYOR. THE CONTRACTOR SHALL CONTACT THE PROJECT SURVEYOR FOR THE SETTING OF REFERENCE POINTS 48 HOURS PRIOR TO DISTURBING OR REMOVING ANY MONUMENTS. THE CONTRACTOR SHALL BE FINANCIALLY RESPONSIBLE FOR COSTS TO REESTABLISH MONUMENTATION OR CONTROLS REMOVED WITHOUT PRIOR NOTICE AND APPROVAL.

1.11 TRAFFIC CONTROL SHALL CONFORM TO THE LOCAL MUNICIPAL ADOPTED STANDARDS.

1.12 THESE PLANS ARE SUBJECT TO THE INTERPRETATION OF THE INTENT BY THE ENGINEER. ANY QUESTIONS REGARDING THESE PLANS MUST BE GIVEN TO THE ENGINEER AND YOU MUST HAVE RECEIVED A RESPONSE TO THE QUESTION. ANYONE WHO TAKES IT UPON THEMSELVES TO MAKE AN INTERPRETATION OF THE DRAWINGS OR MAKES REVISIONS TO THE SAME WITHOUT CONFERRING WITH THE DESIGN ENGINEER SHALL BE RESPONSIBLE FOR THE CONSEQUENCES THEREOF.

1.13 CONTRACTOR SHALL COORDINATE HIS WORK WITH THE DESIGN ENGINEER, OWNER, PUBLIC UTILITY COMPANIES AND OTHER ASSOCIATED TRADES ON AND ADJACENT TO THE PROJECT SITE. COORDINATE INSTALLATION OF ALL PUBLIC AND PRIVATE UNDERGROUND UTILITIES, PIPES, CONDUITS AND PIPE SLEEVE SIZES AND LOCATIONS PRIOR TO THEIR PLACEMENT. INSTALLATION: THE CONTRACTOR IS RESPONSIBLE FOR SETTING CAPPED SLEEVES AND PROVIDING TYPE 1 COMPACTION IN ALL BACKFILLED TRENCHES IN PAVED AREAS AND EASEMENTS. PROVIDE TRACER WIRE AND MARKER AT GRADE LEVEL FOR FUTURE LOCATING.

1.14 CONTRACTOR SHALL BE RESPONSIBLE FOR FINANCIAL REIMBURSEMENT TO THE OWNER AND ENGINEER FOR THE FOLLOWING ADDITIONAL ENGINEERING SERVICES SHOULD THEY OCCUR, AND SUCH A/E DESIGN SERVICES WILL BE DEDUCTED FROM CONTRACTOR'S FINAL PAYMENTS BY THE OWNER.

A. REINSPECTION, COORDINATION AND EXTRA TESTING OR RETESTING COSTS INCURRED BECAUSE OF IMPROPER OR FAULTY CONSTRUCTION. ONE TIME TESTING AND INSPECTION IS PROVIDED FOR BY THE OWNER. ALL OTHER TESTING IS THE CONTRACTOR'S RESPONSIBILITY.

B. ADDITIONAL STAKING NOT INCLUDED IN CONTRACT OR RESTAKING AS REQUESTED BY CONTRACTOR.

C. CHANGES AND SUBSTITUTIONS IN MATERIALS CONSTRUCTION METHODS, REQUESTED BY THE CONTRACTOR, THAT MUST BE REVIEWED, RECALCULATED OR APPROVED BY ENGINEER.

D. ENGINEERING DESIGN SERVICES REQUESTED BY THE CONTRACTOR OR CAUSED BY ERRORS OR OMISSIONS BY THE CONTRACTOR.

E. ANY ENGINEERING DESIGN APPROVED BY OTHERS AND SUBMITTED FOR REVIEW. THESE SHALL BEAR THE SEAL OF AN ENGINEER REGISTERED IN ARIZONA.

ANY DIFFERENCE BETWEEN PLANS AND SPECIFICATIONS AND QUESTIONS AS TO THEIR MEANING SHALL BE DETERMINED PRIOR TO AWARD OF THE CONTRACT AND SHALL BE INTERPRETED BY THE ENGINEER. THE GENERAL INTENT AND MEANING OF THE PLANS AND SPECIFICATIONS WILL GOVERN AND SHALL NOT WARRANT ANY ADDITIONAL COMPENSATION TO THE CONTRACTOR. THE ENGINEER WILL PROVIDE FULL INSTRUCTIONS WHEN DISCREPANCIES ARE DISCOVERED IN THE DOCUMENTS.

1.16 THE CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING THE LIMITS OF THE WORK AREA FOR ALL PHASES OF THE WORK PRIOR TO BEGINNING CONSTRUCTION OF THOSE PHASES. ALL CONSTRUCTION LIMITS, AREAS OF WORK, SETBACKS, PERIMETERS, ADJACENT PROPERTY LINES, BOUNDARIES, AND OTHER CRITERIA DEFINING THE LIMITS OF THE CONTRACTOR'S WORK AREA AND LIMITS, SHALL BE STAKED BY THE CONTRACTOR'S SURVEYOR PRIOR TO CONSTRUCTION OR CLEARING OF THE SITE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR FAMILIARIZING HIMSELF WITH THE EXTENT OF WORK TO BE DONE IN EACH SEPARATE PHASE OF THE PROJECT, AND ANY WORK NECESSARY IN INACTIVE PHASES REQUIRED TO DEEM THE ACTIVE PHASES FINISHED, SAFE, AND SERVICEABLE.

1.17 THE CONTRACTOR OR SUBCONTRACTORS SHALL NOT DEVIATE FROM THESE PLANS OR MAKE FIELD CHANGES WITHOUT REQUESTING THE ENGINEER TO PROVIDE, IN WRITING, THE APPROVAL OF THESE MODIFICATIONS. ANY CHANGES MADE WITHOUT APPROVAL OF THE DESIGN ENGINEER ARE SUBJECT TO REMOVAL AT THE EXPENSE OF THE CONTRACTOR.

1.18 THE DESIGN ENGINEER RESERVES THE RIGHT TO MAKE MINOR FIELD MODIFICATIONS TO GRADES AND STRUCTURE DESIGNS TO ACCOMMODATE FIELD CONDITIONS FOUND ON SITE. THIS INCLUDES BUT IS NOT LIMITED TO MINOR MODIFICATIONS TO GRADE, ALIGNMENT, SLOPE OR STRUCTURE LOCATIONS. THE ENGINEER SHALL HAVE THE RIGHT TO MAKE SUCH CHANGES IN WRITING IN THE LOCATION AND QUANTITIES OF WORK AS MAY BE DEEMED ADVISABLE.

1.19 NO JOB WILL BE CONSIDERED COMPLETE UNTIL FINE GRADING IS COMPLETE AND ALL CURBS, PAVEMENT AND SIDEWALKS HAVE BEEN SWEPT CLEAN OF ALL DIRT AND DEBRIS, ALL SURVEY MONUMENTS ARE INSTALLED AND ALL VALVES, MANHOLES AND BOXES HAVE BEEN ADJUSTED ACCORDING TO THE PLANS AND STANDARD DETAILS.

1.20 EXISTING GRADES INDICATED ON PLANS ARE BASED ON PREGRADING CONDITIONS. LOSSES IN MATERIAL DUE TO SHRINKAGE OF MATERIAL, DEMOLITION OF EXISTING SITE FEATURES, CLEARING AND GRUBBING OF THE SITE SHALL BE INCLUDED IN CONTRACTOR'S BID.

1.21 SHOP DRAWINGS SHALL BE PROVIDED BY THE CONTRACTOR PER MAG SECTION 105.2.

2 PERMITS

2.1 CONTRACTOR SHALL OBTAIN ALL PERMITS AT HIS OWN EXPENSE FROM LOCAL MUNICIPAL AND AIR POLLUTION CONTROL AUTHORITIES PRIOR TO BEGINNING CONSTRUCTION.

2.2 REQUIRED PERMITS SHALL BE SECURED BY THE CONTRACTOR FROM THE APPROPRIATE AGENCIES. A.D.O.T. REQUIRES THAT A PERMIT BE ISSUED FROM THEIR OFFICE FOR ANY WORK WITHIN STATE RIGHT-OF-WAY. FEDERAL PERMITS, UTILITY CO. AND OTHER PERMITS MAY BE REQUIRED. A.D.E.Q. REQUIRES PERMITS BE ISSUED PRIOR TO NEW CONSTRUCTION, EXTENSION TO, OR MODIFICATION OF WATER DISTRIBUTION SYSTEM, SEWAGE COLLECTION OR INDIVIDUAL SEWAGE TREATMENT SYSTEM. A RIGHT-OF-WAY PERMIT, ISSUED BY THE TOWN, IS REQUIRED FOR ANY EXCAVATION OR GRADING (INCLUDING PLACEMENT OF FILL). PRIOR TO CONSTRUCTION THE APPROPRIATE AGENCIES SHALL BE NOTIFIED BY THE CONTRACTOR AS REQUIRED BY THE PERMITS.

2.3 THE CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING AT HIS OWN EXPENSE ALL APPROPRIATE INSURANCE FORMS FOR PERMIT REQUIREMENTS.

2.4 IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO ARRANGE FOR THE RELOCATION AND RELOCATION COSTS, IF ANY, OF ALL UTILITIES, AND SUBMIT A UTILITY RELOCATION SCHEDULE TO THE MUNICIPALITY AND DESIGN ENGINEER PRIOR TO CONSTRUCTION. ALL PUBLIC UTILITY EQUIPMENT POLES, BOXES, STRUCTURES AND MUNICIPAL UTILITY COMPANY EQUIPMENT SHALL BE RELOCATED BY THE APPROPRIATE UTILITY COMPANY OR MUNICIPALITY BEFORE ANY WORK IS STARTED.

3 APPROVALS

3.1 THE CONTRACTOR IS TO USE ONLY THAT OFFICIAL CONSTRUCTION SET OF DRAWINGS WHICH CONTAINS THE APPROVAL OF THE GOVERNMENT AGENCY/UTILITY SIGNED ON THE COVER SHEET OF THE PLANS. THE CONTRACTOR SHALL NOT PLACE BIDS OR START CONSTRUCTION ON A SET OF DRAWINGS UNSIGNED BY THE GOVERNMENT AGENCY AND/OR MARKED "NOT FOR CONSTRUCTION".

4 RECORD DRAWINGS

4.1 IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO PROVIDE AND KEEP AN UPDATED RECORD SET OF AS-BUILT INFORMATION DRAWINGS IN GOOD CONDITION ON THE JOB SITE AND PROVIDE THE DESIGN ENGINEER AT COMPLETION OF THE WORK, WITH THE RECORD SET SHOWING FIELD VERIFIED LOCATIONS OF ALL VALVES, BOXES, MANHOLES, UTILITY POLES, PIPE SLEEVES, UTILITY ENCASEMENT AND OTHER UTILITY LINES AND EQUIPMENT ABOVE AND BELOW GROUND WHICH THE CONTRACTOR ENCOUNTERS AND INSTALLS IN HIS AREA OF WORK.

4.2 ACCEPTANCE OF THE COMPLETED PAVING, GRADING OR UTILITY INSTALLATION WILL NOT BE GIVEN UNTIL REPRODUCIBLE AS-BUILT PLANS HAVE BEEN SUBMITTED BY THE ENGINEER AND APPROVED BY THE LOCAL GOVERNING AGENCY.

5 OBSERVATION

5.1 ALL MATERIALS USED AND ALL WORK DONE BY THE CONTRACTOR SHALL BE SUBJECT AT ALL TIMES TO THE INSPECTION, TESTING AND APPROVAL OF THE ENGINEER AND GOVERNING AGENCY. SPECIAL INSPECTION AND TESTING SERVICES SHALL BE PROVIDED AT THE OWNER'S EXPENSE, AS REQUIRED BY THE TOWN ENGINEER.

5.2 THE CONTRACTOR SHALL CONTACT THE APPROPRIATE PUBLIC UTILITY COMPANIES FOR INSPECTION OF TRENCHING, BEDDING AND BACKFILLING DONE IN CONJUNCTION WITH INSTALLATION OF THOSE UTILITIES ON THIS PROJECT.

5.3 SUBMITTAL OF AN ENGINEER'S CERTIFICATE OF COMPLETION IS REQUIRED BY A.D.E.Q. FOR ALL WATER AND SEWER SYSTEM CONSTRUCTION. RELATED INSPECTION AND TESTING SHALL BE PROVIDED BY THE OWNER'S ENGINEER AT THE OWNER'S EXPENSE.

5.4 SOILS COMPACTION TEST RESULTS MUST BE SUBMITTED TO THE ENGINEER'S OFFICE FOR ALL FILL MATERIAL FOR ROADS, TRENCH BACKFILL AND SITE FILL MATERIALS UNDER SLABS AND STRUCTURES. NO FILL MATERIALS SHALL BE PLACED WITHOUT TESTING DURING PLACEMENT. NO EARTH MATERIAL SHALL BE PLACED WITHOUT APPROVAL OF THE PREVIOUS LIFTS. THE CONTRACTOR SHALL SUBMIT ALL TEST RESULTS TO THE DESIGN ENGINEER AND GOVERNMENTAL AGENCIES.

5.5 CONTRACTOR SHALL SUBMIT A SCHEDULE, APPROVED IN WRITING BY A QUALIFIED CONSULTING TESTING AGENCY, FOR FREQUENCY, LOCATION AND TYPE OF ALL PROJECT TESTING. THE CONTRACTOR WILL BE RESPONSIBLE FOR SCHEDULING AND COORDINATION OF ALL TESTING INCLUDING THE FOLLOWING ITEMS WHICH SHALL BE TESTED IN ACCORDANCE WITH MAG SPECIFICATIONS...

1. SUBGRADE COMPACTION
2. BASE COURSE COMPACTION
3. ASPHALT PAVEMENT MIX DESIGN QUALITY
4. CONCRETE STRENGTH
5. TRENCH BEDDING AND BACKFILL
6. TESTING FOR UTILITIES, PIPING AND DRAINAGE SYSTEMS

5.6 THE TOWN SHALL BE NOTIFIED BY THE CONTRACTOR 24 HOURS PRIOR TO BEGINNING DIFFERENT PHASES OF CONSTRUCTION SO THAT CITY INSPECTIONS MAY BE SCHEDULED.

6 FINAL ACCEPTANCE

6.1 FINAL ACCEPTANCE OF THE CONSTRUCTION, BY THE TOWN ENGINEER, IS REQUIRED BEFORE RELEASING OF A PERMIT AND OR TRANSFERRING OWNERSHIP OF THE IMPROVEMENTS TO THE CITY.

6.2 APPROVAL OF A PORTION OF THE WORK IN PROGRESS DOES NOT GUARANTEE ITS FINAL ACCEPTANCE. TESTING AND EVALUATION MAY CONTINUE UNTIL WRITTEN FINAL ACCEPTANCE OF A COMPLETE WORKABLE UNIT. ACCEPTANCE OF COMPLETED IMPROVEMENTS WILL NOT BE GIVEN UNTIL DEFECTIVE OR UNAUTHORIZED WORK IS REMOVED, AND FINAL CLEANUP IS COMPLETE.

7 UTILITIES

7.1 A UTILITY COORDINATION MEETING SHALL BE COORDINATED BY THE CONTRACTOR PRIOR TO THE START OF ANY WORK. ALL UTILITY ISSUES SHALL BE ADDRESSED IN ACCORDANCE WITH MAG SECTION 105.6.

7.2 LOCATION OF UNDERGROUND UTILITIES SHALL BE ACCOMPLISHED IN ACCORDANCE WITH ARS 40-360.22 PRIOR TO ANY EXCAVATION. BLUE STAKE SHALL BE CALLED AT 1-800-STAKE-IT FOR ACCURATE LOCATION OF UTILITIES AS NECESSARY AND PRIOR TO ANY EXCAVATION. UTILITIES IF INDICATED ON PLANS ARE APPROXIMATE LOCATIONS ONLY, TAKEN FROM THE UTILITY COMPANY MAPS. IF THE CONTRACTOR ENCOUNTERS ANY LINES NOT INDICATED ON THE DRAWINGS OR MARKED IN THE FIELD BY THE UTILITY COMPANY THAT MAY INTERFERE WITH HIS WORK, HE SHALL NOTIFY THE APPROPRIATE UTILITY COMPANY IMMEDIATELY FOR DISPOSITION OF THOSE FACILITIES.

7.3 THE CONTRACTOR IS RESPONSIBLE FOR PREPARATION OF GRADE, TRENCHING, BACKFILLING, PAD CONSTRUCTION AND CONCRETE PADS FOR UTILITY EQUIPMENT INSTALLED ON THIS PROJECT. CONTRACTOR SHALL CONTACT LOCAL UTILITY COMPANIES FOR DETAILS AND REQUIREMENTS.

7.4 UTILITIES MUST BE LOCATED TO MINIMIZE INTERFERENCE WITH ONE ANOTHER, TO PROVIDE REQUIRED HORIZONTAL AND VERTICAL SEPARATIONS, AND TO PROVIDE MAINTENANCE ACCESS WITHOUT VIOLATING EASEMENT BOUNDARIES. SEPARATION BETWEEN UTILITIES PER MAG STANDARD

7.5 ALL UTILITY SLEEVES SHALL BE PLACED PRIOR TO SUBBASE CONSTRUCTION AND PAVING. CONTACT APPROPRIATE UTILITY COMPANIES FOR REQUIREMENTS IN ALL AREAS.

7.6 ALL WATER MAINS, APPURTENANCES, AND INSTALLATION SHALL CONFORM TO A.W.W.A. STANDARDS AND ARIZONA DEPARTMENT OF ENVIRONMENTAL QUALITY, AND TOWN OF JEROME REQUIREMENTS. WATER SYSTEM SHALL BE TESTED PER A.D.E.Q. BULLETIN NO. 10 TO THE APPROPRIATE A.W.W.A. STANDARDS.

7.7 ALL FIRE HYDRANTS SHALL MEET ALL REQUIREMENTS OF A.W.W.A. C-509-80 AND TOWN OF JEROME REQUIREMENTS.

8 CONSTRUCTION STAKING

8.1 THE ACCURACY OF ALL CONSTRUCTION WORK SHALL BE MAINTAINED AND VERIFIED BY THE OWNER'S SURVEYOR AT THE OWNER'S EXPENSE BY PROVIDING CONSTRUCTION STAKING SUITABLE TO THE TOWN ENGINEER. STAKES WILL BE SET ESTABLISHING LINES AND GRADES (FINISH OR FLOWLINE) FOR ALL CONSTRUCTION INCLUDING ROADS, CURB AND GUTTER, SIDEWALKS, UTILITIES, STRUCTURES, AND OTHER WORK AS CONSIDERED NECESSARY BY THE ENGINEER. ALL SURVEY CONTROL SHALL BE SET BY THE OWNER'S SURVEYOR FROM MONUMENTS ACCEPTABLE TO THE ENGINEER.

9 GRADING AND EARTHWORK

9.1 PERFORM ALL EARTHWORK GRADING, CUTTING AND FILLING AS PER THE PROJECT SOILS REPORT* AND ALL ADDENDA. ALL WORK TO BE COORDINATED AS PER THE SWPPP.

9.2 NO GRADING OR TRENCHING WORK SHALL BEGIN PRIOR TO SUPPORTING AND PROTECTING EXISTING ONSITE AND ADJACENT PROPERTY FROM SETTLING, CRACKING, OR OTHER DAMAGE WHICH MIGHT RESULT. CONTRACTOR SHALL VERIFY FROM SOILS REPORT RECOMMENDATIONS THE DEGREE OF DIFFICULTY REQUIRED FOR TRENCHING AND EXCAVATION WORK BASED ON DEPTH AND TYPES OF MATERIALS TO BE ENCOUNTERED.

9.3 WATER SOURCE: THE CONTRACTOR SHALL MAKE THE NECESSARY ARRANGEMENTS FOR OBTAINING ALL WATER REQUIRED FOR SOIL COMPACTION, DRINKING PURPOSES AND DUST CONTROL. (MAG SPEC 225)

9.4 CLEARING AND GRUBBING: EXAMINE SITE AND PROVIDE NECESSARY EQUIPMENT AND LABOR TO REMOVE FROM THE SITE AND DISPOSE OF STUMPS, ROOTS, ROCKS, LOOSE FILL, VEGETATION, DEBRIS, AND ANY OTHER OBJECTIONABLE MATERIALS FROM THE BUILDING AND FILL AREAS. CLEAN, UNCLASSIFIED ONSITE SOILS MAY BE USED IN GENERAL AS FILL MATERIAL. SEE MAG SPECIFICATION SECTIONS 201 AND 215.

9.5 TOPSOIL THAT WILL BE AFFECTED BY ROUGH GRADING OR EXCAVATION SHALL BE STOCKPILED ON THE SITE SEPARATELY AND SHALL NOT BE USED FOR FILL, BUT SHALL BE CONSERVED AND USED FOR FINE AND FINISH GRADING.

9.6 SITE DRAINAGE: CONSTRUCTION OF ALL SWALES, CHANNELS, DRAINAGE PIPES, DRAINAGE STRUCTURES AND BANK PROTECTION SHALL BE CONSTRUCTED DURING THE FIRST PHASES OF SITE CONSTRUCTION TO PROTECT ALL OTHER CONSTRUCTION FROM SURFACE WATERS. DIVERT RUN OFF WATER AROUND CONSTRUCTION OPERATIONS. CARE SHALL BE TAKEN BY THE CONTRACTOR NOT TO ADVERSELY AFFECT ADJACENT PROPERTIES. DRAIN EXCAVATIONS BY PUMPING OR OTHER SATISFACTORY METHOD TO PREVENT SOFTENING OF THE FOUNDATION SOILS, UNDERCUTTING OF FOOTINGS, OR OTHER ACTIONS DETRIMENTAL TO PROPER CONSTRUCTION PROCEDURES. ALL WORK TO BE COORDINATED AS PER THE SWPPP.

9.7 THE CONTRACTOR SHALL PROVIDE POSITIVE DRAINAGE AWAY FROM ALL WALLS AND FOUNDATIONS. ALL STORM DRAINS, DRAIN LINES, OVERFLOWS, OUTLETS, AND/OR OTHER DRAINAGE TYPE OUTLETS WHICH CONDUCT MOISTURE NEAR THE STRUCTURES SHALL BE POSITIVELY DRAINED AWAY FORM THE STRUCTURE. NO WATER SHALL BE PERMITTED TO POND NEAR STRUCTURES OR FOUNDATIONS. ALL DRAINAGE SHALL BE CHANNELED AND TAKEN A MINIMUM OF 10 FEET AWAY FROM ALL STRUCTURES.

9.8 SUBGRADE PREPARATION: IF THE NATURAL SUBGRADE IS LESS THAN THE REQUIRED DENSITY, IT SHALL BE SCARIFIED AND COMPACTED TO A MINIMUM DEPTH OF TWELVE INCHES OR AS NOTED IN THE SOILS REPORT IMMEDIATELY PRIOR TO PLACING SUBSEQUENT FILL MATERIAL THEREON. THE CONTRACTOR IS RESPONSIBLE FOR MAINTENANCE AND REPAIR OF DAMAGE TO PREPARED SUBGRADE CAUSED BY CONTRACTORS OPERATIONS OR PUBLIC TRAFFIC UNTIL ACCEPTANCE OF PROJECT. NO MATERIALS SHALL BE PLACED UPON THE PREPARED SUBGRADE UNTIL IT MEETS THE SPECIFIED REQUIREMENTS. ROADWAY SUBGRADE COMPACTION INCLUDES SUBGRADE UNDER ALL PAVEMENT, CURB, SIDEWALKS, SHOULDERS AND FILL SLOPES. SUBGRADE TOLERANCES SHALL BE AS SPECIFIED IN MAG SECTION 301. OPEN LANDSCAPED AREAS SHALL BE GRADED TO +/- 0.20 FEET.

9.9 EARTH FILL: AREAS TO BE FILLED SHALL BE LEVELED TO PROVIDE A LEVEL BASE TO SUPPORT FILL MATERIALS. SUBGRADE AND SUBBASE AREAS REQUIRING FILL MATERIAL SHALL BE SCARIFIED MOISTENED AND COMPACTED PRIOR TO PLACING FILL. ALL FILL, SUBGRADE AND SUBBASE MATERIALS SHALL BE COMPACTED TO SPECIFIED DENSITIES AT OR NEAR OPTIMUM MOISTURE CONTENTS AS VERIFIED AND RECOMMENDED BY THE SOILS ENGINEER. PLACE FILL IN HORIZONTAL LIFTS NOT EXCEEDING EIGHT INCHES IN LOOSE THICKNESS BEFORE COMPACTION. SLOPED SURFACES SHALL BE PLOWED, STEPPED, AND BENCHED SO THAT THE FILL MATERIAL WILL BOND WITH THE EXISTING MATERIAL. BENCH AT THE TOE OF FILL SLOPES AND PERIODIC INTERVALS UP THE FILL SLOPES BENCHES.

9.10 IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO CONTACT THE TESTING COMPANY FOR SCHEDULING OF COMPACTION TESTING. THE FREQUENCY OF DENSITY AND MOISTURE TESTS REQUIRED FOR ADEQUATE CONTROL SHALL BE THE RESPONSIBILITY OF THE SOILS ENGINEER WHO SHALL CERTIFY TO THE ENGINEER AND CONTRACTOR AT PROJECT END THAT THE ROADBED FILL IS COMPACTED AS OUTLINED HEREIN. COMPACTION SHALL BE ACHIEVED BY MECHANICAL MEANS. IN NO CASE SHALL STRUCTURE BACKFILLING BE FLOOD WATER SETTLED.

9.11 ALL SLOPE CONSTRUCTION AND ROADWAY EXCAVATION SHALL CONFORM TO THE REQUIREMENTS OF MAG SPECIFICATIONS SECTIONS 201, 205, 211, 301, AND UBC SECTIONS 7009 AND 8010. CUT AND FILL SLOPES SHALL BE AS INDICATED ON THE DETAILS AND PLANS. CUT AND FILL SLOPE GRADIENTS SHALL NOT EXCEED 2:1 IN STEEPNESS WITHOUT WRITTEN AUTHORIZATION FROM THE SOILS ENGINEER AND EXAMINATION BY THE DESIGN ENGINEER. ALL SLOPE CONDITIONS SHALL BE PROVIDED WITH THE APPROPRIATE BENCHES AS SPECIFIED IN THE REFERENCE DOCUMENTS AND INDICATED ON THE PLANS. IF SOILS CONDITIONS ARE ENCOUNTERED WHICH DO NOT ALLOW THE ESTABLISHMENT OF THE INDICATED CUT OR FILL SLOPES, THE DESIGN ENGINEER AND SOILS ENGINEER SHALL BE CONTACTED IMMEDIATELY TO DETERMINE AN ADJUSTMENT TO THE SLOPE GRADIENT OR TO ESTABLISH A METHOD OF STABILIZATION ALL FILL SLOPES SHALL BE COMPACTED AS EACH LIFT OF FILL MATERIAL IS PLACED. ALL CUT AND FILL SLOPES SHALL BE UNIFORMLY GRADED TO LINES AND GRADES INDICATED. TOPS OF ALL CUT SLOPES SHALL BE ROUNDED AND ALL UNSTABLE AND LOOSE MATERIAL AT TOP OF SLOPE SHALL BE REMOVED. TOP OF CUT SLOPES OVER 10' HIGH SHALL BE PROVIDED WITH BROW DITCHES FOR DRAINAGE. ALL CUT AND FILL SLOPES SHALL BE REVEGETATED WITH A MIXTURE OF NATIVE GRASSES AND WILD FLOWER SEED OR AS SPECIFIED WITHIN THE LANDSCAPE PLANS. COMPACT ALL SHOULDERS AND BACKFILLS BEHIND ALL STRUCTURE AND WALLS.

9.12 COMPACT TO THE FOLLOWING SPECIFIED PERCENT OF MAXIMUM DENSITY AS DETERMINED IN ACCORDANCE WITH ASTM D698 AND MAG SECTION 211 OR AS DIRECTED IN THE SOILS REPORT.

MINIMUM PERCENT COMPACTION
SUBGRADE SOIL:
ROADWAY AND STRUCTURE AREAS----------95
PAVED AREAS (PAVEMENTS, SIDEWALKS, & PADS)---------95
EARTH FILL:
ROADWAY AND STRUCTURE AREAS----------95
PAVED AREAS (PAVEMENTS, SIDEWALKS, & PADS)---------95
GRASSED AND PLANTING AREAS----------85
AGGREGATE BASE COURSE----------100
BACKFILL AROUND STRUCTURES----------95
BACKFILL FOR UTILITY TRENCHES (PER MAG SECTION 601). PROVIDE TYPE 1 BACKFILL OR AS DIRECTED BY APPROPRIATE UTILITY REQUIREMENTS. BACKFILL FOR TRENCHES WITHIN 10' OF STRUCTURES AND WALLS SHALL BE COMPACTED TO 95% UNLESS DIRECTED OTHERWISE BY ENGINEER.

9.13 EXCAVATION: EXCAVATE TO THE DIMENSIONS AND DEPTHS INDICATED ON THE DRAWINGS. FOUNDATIONS SHALL REST ON ENGINEERED COMPACTED FILL OR UNDISTURBED NATURAL SOILS AT GRADE ELEVATIONS INDICATED. IF SUITABLE SOIL IS NOT REACHED AT THE DEPTHS INDICATED, THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE SOILS ENGINEER AND ENGINEER. THE CONTRACTOR WILL BE DIRECTED, IN WRITING, TO EXCAVATE TO THE DEPTH OF SUITABLE SOIL. EXCAVATION FOR FOUNDATIONS WHICH ARE CARRIED BELOW THE DEPTHS INDICATED SHALL HAVE THE CONCRETE EXTENDED TO THE BOTTOM OF THE EXCAVATION AT THE CONTRACTOR'S EXPENSE. SEE MAG SPECIFICATION SECTION 206.

9.14 WATERING: CAREFULLY WATER EARTH FILL DURING PLACING BY MEANS OF A FINE SPRAY OR OTHER APPROVED METHOD, SO THAT EACH LAYER IS THOROUGHLY AND UNIFORMLY WETTED. MOISTURE CONTENT OF THE MATERIAL SHALL BE CAREFULLY CONTROLLED AT ALL TIMES AND CHECKED AT PROPER INTERVALS TO INSURE CORRECT MOISTURE FOR COMPACTION SPECIFIED. SEE MAG SECTION 225 AND SOILS REPORT.

10 PAVING

10.1 COMPLETE ASPHALTIC CONCRETE PAVEMENT INSTALLATION SHALL INCLUDE BUT NOT BE LIMITED TO THE FOLLOWING:
A. TACK COATING OF ALL SURFACES, UNDILUTED .02 TO .10 GAL/SY, DILUTED 1:1 MIXTURE, .05 TO .15 GAL/SY, OR AS DIRECTED.
B. SEAL COATING: SEAL COATING WITHIN THE RIGHT-OF-WAY SHALL BE A FOG SEAL COAT.
C. PAINT FOR PAVEMENT STRIPING AND MARKING SHALL CONFORM TO FEDERAL SPEC. NO. TTP-155E, "PAINT, TRAFFIC, HIGHWAY, WHITE AND YELLOW". COLORS FOR PAVEMENT MARKING AND STRIPING SHALL BE AS SPECIFIED BY THE TOWN ENGINEER.
D. TRAFFIC CONTROL DEVICES: SIGNS AND PAVEMENT

11 FIELD INSPECTION

11.1 THE CONTRACTOR SHALL CAREFULLY PRESERVE ALL STAKES, REFERENCE AND CONTROL POINTS, ETC. AGAINST DESTRUCTION AND SHALL PROMPTLY NOTIFY THE ENGINEER OF ANY STAKES WHICH HAVE BEEN DISTURBED.

11.2 OWNER'S REGISTERED SURVEYOR SHALL BE NOTIFIED TWO WORKING DAYS (48 HOURS) MINIMUM PRIOR TO FIELD STAKING SCHEDULING.

11.3 ANY QUESTIONS RAISED RELATIVE TO ACCURACY OF IMPROVEMENT INSTALLATION SHALL NOT BE RAISED SUBSEQUENT TO COMPLETION OF THE WORK UNLESS ALL SURVEY STAKES ARE MAINTAINED INTACT. SHOULD SUCH STAKES NOT BE PRESENT AND VERIFIED AS TO THEIR ORIGIN, NO CLAIM FOR ADDITIONAL COMPENSATION FOR CORRECTION SHALL BE PRESENTED TO ANY PARTY AND SUCH WORK SHALL BE CORRECTED BY THE CONTRACTOR AT HIS EXPENSE.

12 SUSPENSION OF WORK

12.1 THE ENGINEER OR HIS AUTHORIZED REPRESENTATIVE MAY SUSPEND THE WORK BY WRITTEN NOTICE WHEN, IN HIS JUDGMENT, PROGRESS IS UNSATISFACTORY, WORK BEING DONE IS UNAUTHORIZED OR DEFECTIVE, WEATHER CONDITIONS ARE UNSUITABLE, OR THERE IS DANGER TO THE PUBLIC HEALTH OR SAFETY.

13 WARRANTY

13.1 ANY DEFECTS WHICH APPEAR IN THE WORK WITHIN TWO YEARS FROM THE DATE OF ACCEPTANCE AND WHICH ARE DUE TO IMPROPER WORKMANSHIP OR INFERIOR MATERIALS SUPPLIED SHALL BE CORRECTED BY OR AT THE EXPENSE OF THE CONTRACTOR.

14 EROSION CONTROL NOTES

(SPECIFICATIONS FOR PERMANENT SEEDING)

14.1 SITE PREPARATION
- A. INSTALL NECESSARY SURFACE WATER CONTROL MEASURES PRIOR TO PLANTING PERMANENT SEEDING.
- B. GRADE TO PERMIT USE OF CONVENTIONAL EQUIPMENT FOR SEEDBED PREPARATION.
- C. PROVIDE ADEQUATE DRAINAGE WHERE INTERNAL WATER MOVEMENT, ESPECIALLY AT TOES OF SLOPES, MAY CAUSE SEEPS OR SLIPPAGE BEFORE SEEDING IS WELL ESTABLISHED.

14.2 SEEDBED PREPARATION A. AS PRACTICAL, PERFORM ALL CULTURAL OPERATIONS AT RIGHT ANGLES TO THE SLOPE. B. IMMEDIATELY BEFORE SEEDING, RAKE OR OTHERWISE LOOSEN PLANTING SURFACE TO PROVIDE A SMOOTH, FRIABLE SURFACE FREE OF EARTH CLODS, HUMPS AND DEPRESSIONS, AND DISPOSE OF LOOSE STONES HAVING A DIMENSION GREATER THAN ONE INCH AND DEBRIS BROUGHT TO THE SURFACE DURING CULTIVATION.

14.3 PLANTING A. APPLY SEED MIX AT THE RATE OF 11 POUNDS PER ACRE. SHALL CONTAIN THE FOLLOWING PROPORTION OF PURE LIVE SEED: SAND DROPSEED (SPOROBOLUS CRYPTANDRUS) 1 LB SIDEOATS GRAMA (BOUTELOUS CURTIPENDULA)5 LB CRESTED WHEATGRASS (AGROPYRON CRISTATUM) 5 LB B. APPLY SEED IN TWO DIRECTIONS AT RIGHT ANGLES TO EACH OTHER WITH HALF THE SPECIFIED APPLICATION RATE APPLIED IN EACH DIRECTION. C. IMMEDIATELY AFTER SEEDING, UNIFORMLY SPREAD SCREENED MANURE AT THE RATE OF ONE CUBIC YARD PER 1000 SQUARE FEET AND WATER UNTIL THE GROUND IS WET TO A MINIMUM DEPTH OF TWO INCHES. D. HYDRAULIC SEEDING USING 1500 POUNDS OF WOOD CELLULOSE FIBER PER ACRE MAY BE UTILIZED IN LIEU OF PLANTING.

14.4 MAINTENANCE A. PROTECT PLANTED AREAS FROM GRAZING, FIRE, TRAFFIC, AND WEED GROWTH. B. MAINTAIN PLANTED AREAS UNTIL A GOOD STAND OF GRASS IS ESTABLISHED. AREAS AS REQUIRED IF NO GROWTH IS PRESENT WITHIN 15 DAYS OF PLANTING.

15 TEMPORARY EROSION CONTROL

15.1 EROSION CONTROL BERMS AND ROCK CHECK DAMS
- A. PROVIDE EARTHEN BERMS AT TOES OF SLOPES REMAINING BARE BETWEEN CONSTRUCTION PHASES.
- B. PLACE TEMPORARY ROCK CHECK DAMS IN ROAD DITCHES AND CHANNELS IF RIP-RAP PROTECTION WILL NOT BE PROVIDED WITHIN 60 DAYS.

15.2 CONTRACTOR SHALL BE RESPONSIBLE FOR PROVIDING EROSION CONTROL MEASURES SUCH AS SAND BAGGING, TEMPORARY DE-SILTING BASIN CONSTRUCTION BERMS, VISQUEEN, ETC. TO PROTECT ADJOINING PROPERTIES FROM EROSION.

16 GENERAL CONSTRUCTION NOTES

16.1 ALL CORRUGATED METAL PIPE TO BE 14 GAUGE, UNLESS OTHERWISE APPROVED BY THE DESIGN ENGINEER.

16.2 ALL CORRIGATED METAL PIPE SHALL HAVE FLARED END SECTIONS, EXCEPT WHERE HEADWALLS ARE USED.

16.3 ALL DRAINAGE CULVERTS AND PIPES SHALL HAVE A MINIMUM COVER OF 24" OR AS SPECIFIED.

16.4 ADDITIONAL CARE SHALL BE TAKEN TO PROTECT ALL CMP DURING CONSTRUCTION.

16.5 RETAINING WALLS SHALL BEAR ONTO NATURAL BEDROCK, OR COMPACTED SOIL WHICH HAS A BEARING VALUE OF 3,000 P.S.F. VERIFICATION OF SAID BEARING VALUE TO BE PROVIDED BY THE SOILS ENGINEER.

16.6 RIPRAP MATERIAL SHALL BE AS SPECIFIED TO A DEPTH OF TWICE THE SIZE OF Dso UNDER LAYING A FILLER LAYER OF Dso =3/4" TO A DEPTH OF 10" OR GEOTEXTILES. THE GRADATION OF RIPRAP SHOULD FOLLOW A SMOOTH CURVE. THE RATIO TO THE LARGEST SIZE ROCK TO Dso SHOULD BE EQUAL TO OR LESS THAN 2 (Dso/Dso ~0.5). THE RIPRAP SHOULD BE HARD, DENSE, DURABLE AND RESISTANT TO WEATHER AND FRACTURE. ALL RIPRAP TO BE HAND PLACED IN AN INTERLOCKING POSITION. FILLER MATERIAL TO BE WELL GRADED GRAVEL AS SPECIFIED. MATERIAL FURNISHED FOR RIPRAP SHALL CONFORM TO MAG SPEC 220.2.

16.7 ALL CONCRETE AND REBAR PLACEMENT PER MAG SPEC 505.

16.8 CONCRETE TESTING PER MAG SPEC 725.

16.9 ALL CONCRETE TO BE CLASS B (2500PSI) IF NOT SPECIFIED.

16.10 MINIMUM COVER ON ALL REBAR TO BE MIN 1" UNLESS OTHERWISE SPECIFIED.

16.11 MINIMUM LAP AT REBAR SPLICES TO BE 1' UNLESS OTHERWISE SPECIFIED.

16.12 ALL MANHOLE FRAMES TO HAVE 12" ANCHORS SPACED A MINIMUM OF 12" RADIALLY AROUND FRAME.

16.13 CONCRETE FOR FOOTINGS AND PADS AHALL BE CLASS A (3000 PSI)

SURVEY

1. TOPOGRAPHIC SURVEY BY KENNEY AERIAL MAPPING, INC., PHOENIX, AZ, DATED NOVEMBER 2022 AND SUPPLEMENTED IN FEBRUARY 2023. ADDITIONAL TOPOGRAPHIC SURVEY DATA PERFORMED BY SEC, INC. COORDINATES ARE RELATIVE TO NAD 83, AZ STATE PLANE CENTRAL ZONE, INTERNATIONAL FEET. ELEVATIONS RELATIVE TO NAVD 83. SURVEY CONTROL ON SHEET C2.0.

TREE NOTES

1. ALL EXISTING TREES AND SHRUBS NOT AFFECTED BY BUILDING CONSTRUCTION OR ROAD DEVELOPMENT MUST BE FENCED WITH A CONSTRUCTION ENVELOPE FENCE TO PROTECT THEM DURING CONSTRUCTION

2. NO TREES TO BE PLACED OVER/ON SEWER LINE

ADEQ WATER AND SEWER SYSTEM NOTES

MANHOLES

ALL MANHOLES SHALL BE 4-FT. ID PRECAST CONCRETE WITH POURED-IN-PLACE CONCRETE BASE AND TRAFFIC BEARING RING AND COVER. ALL COVERS SHALL BE 2-FT. IN DIAMETER AND SHALL BE MARKED "SEWER". TEST MANHOLES FOR WATER TIGHTNESS (INFILTRATION) PER R 18-9-E301.4.01.D.3.F. WATER TIGHTNESS SHALL BE TESTED BY EITHER 1) FILLING THE MANHOLE WITH WATER AND ENSURING THAT THE DROP IN WATER LEVEL DOES NOT EXCEED 0.0034 OF THE TOTAL MANHOLE VOLUME PER HOUR, OR 2) AIR PRESSURE TESTING USING THE "STANDARD TEST METHOD FOR CONCRETE SEWER MANHOLES BY NEGATIVE AIR PRESSURE (VACUUM) TEST", ASTM C1244-02a1 (2002). TEST 100% OF ALL MANHOLES. MANHOLES SHALL CONFORM TO A.D.E.Q. AND M.A.G. SPECIFICATIONS. CONSTRUCTION SHALL CONFORM TO M.A.G. STD. DTLS. 420-1 AND 420-2.'

CONCRETE

CLASS A CONCRETE SHALL HAVE A MINIMUM 28 DAY COMPRESSIVE STRENGTH OF 2000 PSI.

PIPE

GRAVITY SEWER PIPE SHALL BE PVC, SDR-26 AND CONFORM TO ASTM D-1784 AND ASTM D-3034. SEALS SHALL CONFORM TO ASTM F-477. PIPE SHALL BE JOINED BY BELL AND SPIGOT TYPE JOINTS. FITTINGS SHALL CONFORM TO ASTM D-3212. GRAVITY SEWER PIPE SHALL BE TESTED FOR DEFLECTION AND LEAKAGE. SHORT TERM DEFLECTION TESTING SHALL BE PERFORMED AFTER COMPLETE BACKFILL BUT PRIOR TO INSTALLATION OF FINISH SURFACE MATERIAL. A SHORT TERM DEFLECTION IN EXCESS OF 5% SHALL BE CONSIDERED UNACCEPTABLE AND PIPE SHALL BE REPAIRED, OR REPLACED AND RETESTED. A MINIMUM OF 100% OF GRAVITY SEWER SHALL BE DEFLECTION TESTED. SEWER PIPE SHALL BE TESTED FOR LEAKAGE USING LOW PRESSURE AIR TESTING PER "STANDARD TEST METHOD FOR INSTALLATION ACCEPTANCE OF PLASTIC GRAVITY SEWER LINES USING LOW PRESSURE AIR", ASTM F 1417-92, REAPPROVED 1998. TEST 100% OF ALL SEWER LINES. TEST THE TOTAL LENGTH OF THE SEWER LINE FOR UNIFORM SLOPE BY LAMP LIGHTING, REMOTE CAMERA OR SIMILAR METHOD APPROVED BY ADEQ AND RECORD THE RESULTS.

DUCTILE IRON PIPE SHALL BE AWWA C-150, CLASS 350 AND SHALL BE TESTED FOR LEAKAGE PER AWWA STANDARD C-600.

A MINIMUM HORIZONTAL DISTANCE OF 6-FT SHALL BE MAINTAINED BETWEEN MAINS AND GRAVITY SEWERS.

MATERIAL

ALL MATERIALS & PRODUCTS THAT COME INTO CONTACT WITH DRINKING WATER OR DRINKING WATER TREATMENT CHEMICALS MUST COMPLY WITH AWWA STANDARDS & NSF STANDARD 61. ANY "OR EQUAL' SUBSTITUTION SHALL ALSO MEET NSF STANDARD 61.

ALL MATERIALS USED IN THE INSTALLATION OF WATER MAINS SHALL BE PURSUANT TO AAC R-18-4-119, & SHALL BE NSF APPROVED FOR POTABLE WATER.

DISINFECTION

WATER MAINS. SHALL BE DISINFECTED IN ACCORDANCE WITH ADEQ ENGINEERING BULLETIN NO.8 "DISINFECTION OF WATER SYSTEMS".

TESTING

ONE HUNDRED PERCENT (100%) OF PIPE LINES SHALL BE PRESSURE AND LEAK TESTED IN ACCORDANCE WITH AWWA C-600, SECTION 4 AND MAG SECTION 611. MINIMUM TEST PRESSURES SHALL BE 200 PSI PLUS ALLOWANCE FOR WATER HAMMER.

AFTER PRESSURE AND LEAK TESTING IS SHOWN TO BE SATISFACTORY, WATER LINES SHALL BE DISINFECTED BY CHLORINATION IN ACCORDANCE WITH AWWA C-601, MAG SECTION 610.15, AND ADEQ BULLETIN 8. ALL VALVES SHALL BE WORKED INTERMITTENTLY FOR A PERIOD OF 24 HOURS FOLLOWING CHLORINATION.

WATER SYSTEM THRUST BLOCKING AND/OR JOINT RESTRAINT

PIPE LINES SHALL BE PROVIDED WITH CONCRETE THRUST BLOCKS AT ALL CHANGES IN DIRECTION AND SIZE AND AT ALL TEES, VALVES, PLUGS, AND DEAD ENDS, PER MAG STANDARD DETAILS 301 AND 380 AND YAG STANDARD DETAIL 3-03. PIPE LINES MAY ALSO BE PROVIDED WITH RESTRAINED JOINTS AT ALL CHANGES IN DIRECTION AND SIZE AND AT ALL TEES, VALVES, PLUGS, AND DEAD ENDS, PER MAG STANDARD DETAILS 302 AND 303.

ADEQ WATER & SEWER NOTES (CONT.)

TRENCHING AND BACKFILLING

ROUGH GRADING SHALL BE COMPLETED PRIOR TO INSTALLATION OF UNDERGROUND UTILITIES.

TRENCH BOTTOM SHALL BE COMPACTED BY SUITABLE MEANS APPROVED BY THE ENGINEER PRIOR TO PLACEMENT OF BEDDING MATERIAL. BEDDING MATERIAL SHALL BE PLACED TO PROVIDE UNIFORM AND ADEQUATE LONGITUDINAL SUPPORT UNDER THE PIPE. THE CONTRACTOR SHALL ENSURE THAT A MINIMUM COMPACTED DEPTH OF 6" IS MAINTAINED UNDERNEATH THE PIPE. BELL HOLES SHOULD BE PROVIDED AT EACH JOINT TO PERMIT PROPER ASSEMBLY WHILE MAINTAINING UNIFORM SUPPORT.

BEDDING MATERIAL SHALL BE ROUNDED GRAVEL WITH A MAXIMUM PARTICLE SIZE OF 1 1/2" AND SHALL BE NON-PLASTIC. WHERE DEPTH OF COVER IS 2-FT. OR LESS, BACKFILL MATERIAL SHALL BE ROUNDED GRAVEL WITH A MAXIMUM PARTICLE SIZE OF 4" AND WITH NO MORE THAN 20% PASSING THE #200 SIEVE.

BACKFILL SHALL BE PLACED IN LAYERS OF NOT MORE THAN 8" LOOSE DEPTH AND COMPACTED TO ACHIEVE COMPACTION OF 95% OF THE MAXIMUM DENSITY AS DETERMINED BY AASHTO T-99 AND T-191 OR ASTM D-2922 AND D-3017. THE CONTRACTOR SHALL CONTRACT WITH AN INDEPENDENT TESTING LABORATORY TO PROVIDED COMPACTION TESTING. TESTS SHALL BE PROVIDED AT MINIMUM INTERVALS OF ONE TEST PER 50 CUBIC YARDS OF TRENCH BACKFILL. TEST RESULTS SHALL BE SUBMITTED DAILY TO THE ENGINEER.

TRENCHING, PIPELAYING, BACKFILLING, AND ALL OTHER CONSTRUCTION SHALL BE PERFORMED UNDER THE INSPECTION, COORDINATION, AND SUPERVISION OF A REGISTERED PROFESSIONAL CIVIL ENGINEER.

NO TRENCH SHALL BE FILLED WITH BEDDING MATERIAL OR BACKFILL UNTIL THE EXCAVATION AND PIPE LAYING, RESPECTIVELY, HAVE BEEN APPROVED BY THE OWNER OR HIS AUTHORIZED REPRESENTATIVE.

THE EXCAVATION METHOD EMPLOYED SHALL BE THE CONTRACTOR'S OPTION. MATERIAL SHALL NOT BE STOCKPILED TO A DEPTH OF MORE THAN 5 FEET ABOVE FINISHED GRADE WITHIN 25 FEET OF ANY EXCAVATION OR STRUCTURE. EXCAVATION SHALL EXTEND SUFFICIENT DISTANCE FROM WALLS AND FOOTINGS TO ALLOW PLACING AND REMOVAL OF FORMS, INSTALLATION OF SERVICES AND INSPECTION BY THE ENGINEER. WITHIN 12" OF FINISHED GRADE SHOWN ON THE DRAWINGS, AND FOR THE MANHOLES, FILL AND BACKFILL SHALL BE NATIVE MATERIAL, FEE FROM BROKEN CONCRETE, ORGANIC MATERIAL, OR OTHER DEBRIS WITH SUFFICIENT FINES TO FILL ALL VOIDS AND TO INSURE A UNIFORMLY COMPACTED MASS OF THE REQUIRED DENSITY AND HAVING A MAXIMUM SIZE OF 2 - ½ INCHES WITH 0 TO 20% MINUS #200. ALL FILL AND BACKFILL SHALL BE PLACED IN LAYERS OF NOT MORE THAN 8" LOOSE AND COMPACTED TO 95% OF MAXIMUM DENSITY, DETERMINED BY AASHTO TEST METHOD T-99, PRIOR TO PLACEMENT OF THE NEXT LAYER.

WATER AND SEWER SYSTEM DESIGN: MINIMUM DESIGN CRITERIA

WATER AND SEWER MAINS SHALL BE SEPARATED IN ORDER TO PROTECT PUBLIC WATER SYSTEMS FROM POSSIBLE CONTAMINATION. ALL DISTANCES ARE MEASURED PERPENDICULARLY FROM THE OUTSIDE OF THE SEWER MAIN TO THE OUTSIDE OF THE WATER MAIN. SEPARATION REQUIREMENTS ARE AS FOLLOWS:

1. A WATER MAIN SHALL NOT BE PLACED:
A. WITHIN SIX FEET, HORIZONTAL DISTANCE, AND BELOW TWO FEET, VERTICAL DISTANCE, ABOVE THE TOP OF A SEWER MAIN UNLESS EXTRA PROTECTION IS PROVIDED. EXTRA PROTECTION SHALL CONSIST OF CONSTRUCTING THE SEWER MAIN WITH MECHANICAL JOINT DUCTILE IRON PIPE OR WITH SLIP-JOINT DUCTILE IRON PIPE IF JOINT RESTRAINT IS PROVIDED. ALTERNATE EXTRA PROTECTION SHALL CONSIST OF ENCASING BOTH THE WATER AND SEWER MAINS IN AT LEAST SIX INCHES OF CONCRETE FOR AT LEAST TEN FEET BEYOND THE AREA COVERED BY THIS SUBPARAGRAPH.
B. WITHIN TWO FEET HORIZONTALLY AND TWO FEET BELOW THE SEWER MAIN.
2. NO WATER PIPE SHALL PASS THROUGH OR COME INTO CONTACT WITH ANY PART OF A SEWER MANHOLE. THE MINIMUM HORIZONTAL SEPARATION BETWEEN WATER MAINS AND MANHOLES SHALL BE SIX FEET, MEASURED FROM THE CENTER OF THE MANHOLE.
3. THE MINIMUM SEPARATION BETWEEN FORCE MAINS OR PRESSURE SEWERS AND WATER MAINS SHALL BE TWO FEET VERTICALLY AND SIX FEET HORIZONTALLY UNDER ALL CONDITIONS. WHERE A SEWER FORCE MAIN CROSSES ABOVE OR LESS THAN SIX FEET BELOW A WATER LINE, THE SEWER MAIN SHALL BE ENCASED IN AT LEAST SIX INCHES OF CONCRETE OR CONSTRUCTED USING MECHANICAL JOINT DUCTILE IRON PIPE FOR TEN FEET ON EITHER SIDE OF THE WATER MAIN.

CONSTRUCTION NOTES
1. THE EXISTING SEWER IS VERY SHALLOW. EXTREME CAUTION IS REQUIRED TO ENSURE THE PIPE IS PROTECTED DURING CONSTRUCTION. EXISTING SEWER TO REMAIN OPERATIONAL AT ALL TIMES UNTIL THE NEW SEWER IS ACTIVATED.
2. THE EXISTING LATERAL SEWERS SHALL BE TEMPORARILY RE-ROUTED AS NEEDED DURING CONSTRUCTION. TO REMAIN OPERATIONAL UNTIL THE NEW SEWER IS ACTIVATED
3. WASTE MATERIAL FROM THE SEWER AND ROAD CONSTRUCTION SHALL BE REMOVED FROM PRIVATELY OWNED PROPERTIES.
4. CUT SLOPES STEEPER THAN 2:1 SHOULD BE EVALUATED AND APPROVED BY GEOTECHNICAL ENGINEER.
5. ALL TEMPORARY AND NEW SEWER PIPES AND STRUCTURES SHALL BE INSTALLED PER THE SPECIFICATIONS PROVIDED BY THE SEWER PLANT ENGINEER.
6. NEW EASEMENTS ARE NEEDED FOR BOTH EXISTING AND PROPOSED SEWER ACROSS PRIVATE PROPERTIES. TO BE COORDINATED BY THE TOWN.

1702

CONSTRUCTION NOTES:

1. INSTALL TEMPORARY 12" BYPASS FOR THE EXISTING SEWER INFLUENT LINE.
2. REMOVE EXISTING BAR SCREEN AND RELOCATE UPSTREAM OF THE EXISTING PRIMARY SETTLING TANK.
3. INSTALL TEMPORARY BAR SCREEN AND 12" SEWER BYPASS LINE TO THE PRIMARY SETTLING TANK.
4. DEMOLISH AND REMOVE THE EXISTING TANK SAND FILTER, TANK CLARIFIER, STORAGE BUILDING, AND STATIC SCREEN.
5. CUT AND CAP EXISTING 2" WATER SERVICE TO THE WWTP.
6. DEMOLISH AND REMOVE THE EXISTING STORAGE SHED.
7. CUT AND CAP PIPE FROM THE PRIMARY SETTLING TANK TO THE EAST REED BED.
8. CUT AND CAP LINE FROM DOSING TANK A TO EAST TRICKLING FILTER.
9. LOCATE, CUT AND CAP LINE FROM SAND FILTER TANK.
10. CUT, CAP AND PROTECT IN PLACE EAST TRICKLING FILTER.
11. CUT AND CAP DRAIN LINE FROM EAST TRICKLING FILTER UPSTREAM OF WEST TRICKLING FILTER LINE TIE-IN LOCATION.
12. REMOVE ALL EXISTING PIPING WITHIN THE EAST REED BED.
13. CUT AND CAP EAST REED BED DRAIN LINE AT THE EXISTING MANHOLE.
14. PROTECT IN PLACE.
15. REMOVE APPROX. 140 LF OF EXISTING FENCE.

NOTES:
1. CONTRACTOR TO PROVIDE A SEQUENCE OF CONSTRUCTION TO ENGINEER FOR REVIEW PRIOR TO CONSTRUCTION. CONTRACTOR SHALL BE RESPONSIBLE FOR ALL MEANS AND METHODS.

CONSTRUCTION NOTES:

1. REMOVE TEMPORARY BYPASS PIPING FROM THE INFLUENT LINE ONCE FLOW HAS BEEN DIVERTED THROUGH NEW WWTP.
2. DEMOLISH AND REMOVE EXISTING PRIMARY SETTLING TANK. REMOVE ALL ABOVE GRADE PIPING & CAP AND ABANDON IN PLACE ALL BELOW GRADE PIPING.
3. DEMOLISH AND REMOVE EXISTING DOSING TANK A. REMOVE ALL ABOVE GRADE PIPING & CAP AND ABANDON IN PLACE ALL BELOW GRADE PIPING.
4. REMOVE ALL ABOVE GRADE PIPING & CAP AND ABANDON IN PLACE ALL BELOW GRADE PIPING. ABANDON IN PLACE WEST TRICKLING FILTER.
5. CAP AND ABANDON IN PLACE EXISTING SEPTIC TANK. REMOVE ALL ABOVE GRADE PIPING & CAP AND ABANDON IN PLACE ALL BELOW GRADE PIPING.
6. ABANDON IN PLACE EXISTING WEST REED BED. REMOVE ALL ABOVE GRADE PIPING & CAP AND ABANDON IN PLACE ALL BELOW GRADE PIPING.
7. CAP AND ABANDON IN PLACE EXISTING MANHOLE. CUT AND CAP ALL PIPING BELOW GRADE AND ABANDON IN PLACE.
8. CAP AND ABANDON IN PLACE EXISTING DOSING TANK B. REMOVE ALL ABOVE GRADE PIPING & CAP AND ABANDON IN PLACE ALL BELOW GRADE PIPING.
9. ABANDON IN PLACE EXISTING WEST WETLAND CELL. REMOVE ALL ABOVE GRADE PIPING & CAP AND ABANDON IN PLACE ALL BELOW GRADE PIPING. REUSE TRAFFIC BARRIER FOR NEW OVERFLOW BASIN.
10. REMOVE ALL PIPING WITHIN THE THREE EAST WETLAND BASINS & CUT, CAP, AND ABANDON IN PLACE ALL PIPING OUTSIDE THE BASINS.
11. CAP AND ABANDON IN PLACE EAST LEVEL ADJUST SUMPS. CUT, CAP AND ABANDON IN PLACE ALL BELOW GRADE PIPING.
12. CAP AND ABANDON IN PLACE WEST LEVEL ADJUST SUMP. CUT, CAP AND ABANDON IN PLACE ALL BELOW GRADE PIPING.
13. CAP AND ABANDON IN PLACE EXISTING CHLORINE CONTACT CHAMBER. CUT, CAP AND ABANDON IN PLACE ALL BELOW GRADE PIPING.

W:\B614\Engineering\B614-30\sheets\B614 - MA 0 CCC MECH PLAN AND SECTIONS.dwg - Tab: SECTION 1 - by reddington on 03/02/26 at 9:58:43 AM

CONSTRUCTION NOTES:

1. INSTALL CONCRETE CHLORINE CONTACT CHANNEL PER STRUCTURAL SHT S1.5.
2. INSTALL SOLID METAL GRATING WALKWAY PER SPECIFICATION 05 53 00.
3. INSTALL 6" D.I. PIPE.
4. INSTALL SLUDGE BAGGER SYSTEM.
5. INSTALL SHADE STRUCTURE (PER STRUCTURAL SHT S2.10).
6. INSTALL 14 LF TRENCH DRAIN, NEI MODEL R4996-A8. OR ENGINEER APPROVED EQUAL.
7. INSTALL METAL GRATING WALKWAY PER SPECIFICATION 05 53 00.
8. INSTALL 1" PVC CHECK VALVE.
9. INSTALL 1" BALL VALVE.
10. INSTALL 1" - 90° SCH. 80 PVC BEND.
11. INSTALL 2" SCH. 80 PVC PIPE.
12. INSTALL BAGGER SYSTEM CONTROL PANEL.
13. INSTALL POLYMER METERING PUMP.
14. INSTALL DRY POLYMER MAKE-DOWN AND FEED UNIT.
15. INSTALL DEWATERING FEED PUMP.
16. INSTALL 3" - 90° SCH. 80 PVC BEND.
17. INSTALL 3" SCH. 80 PVC PIPE.
18. INSTALL 3" SCH.80 PVC TEE.
19. INSTALL PVC CAP.
20. RETAINING WALL, PER STRUCTURAL PLANS
21. INSTALL 30" ALUMINUM STEP-UP STAIRCASE.
22. INSTALL 2" - 90° SCH. 80 PVC BEND.
23. PIPE PENETRATION PER G SHEET M8.4.

GENERAL NOTES:

1. WHERE NO REFERENCE TO PIPE HANGERS OR SUPPORTS IS GIVEN ON THE DRAWINGS, THE CONTRACTOR SHALL USE THE APPROPRIATE HANGER OR SUPPORT SHOWN ON THIS DRAWING. MAXIMUM HANGER AND SUPPORT SPACING SHALL BE AS SHOWN IN SCHEDULE "A" ON THIS DRAWING. FIGURE NUMBERS ARE B-LINE, UNISTRUT OR GRINNELL.
2. ALL CONCRETE INSERTS, BRACKETS, CHANNELS, BOLTS, RODS, AND MISCELLANEOUS HARDWARE USED FOR PIPE HANGERS OR SUPPORTS SHALL BE 316 S.S., U.N.O.
3. CONCRETE CONTINUOUS INSERTS, B-LINE SERIES B52i, OR EQUAL, SHALL BE PROVIDED IN THE WALLS AND CEILINGS AS REQ'D OR AS NOTED ON THE DRAWINGS. INSERTS IN THE WALLS SHALL BE VERTICAL, UNLESS OTHERWISE NOTED AND SHALL BEGIN 6 INCHES ABOVE THE FLOOR AND END 6 INCHES BELOW THE CEILING. INSERTS IN THE CEILING SHALL BEGIN AND END 3 INCHES FROM WALLS AND BEAMS, WHERE PRACTICABLE. THE CENTERLINES OF WALL AND CEILING INSERTS SHALL ALIGN. MAXIMUM CENTER TO ENTER SPACING OF INSERTS SHALL BE 5'-0".
4. IN AREAS NOT COVERED UNDER NOTE 3, CONCRETE INSERTS SHALL BE B-LINE SERIES B3014N WITH APPROPRIATE NUT, B-LINE SERIES B521i CHANNEL EMBEDDED ANCHOR BOLTS, OR EQUAL. IN WITHOUT THE PRIOR WRITTEN APPROVAL OF THE ENGINEER (FOR EQUIPMENT LIFTING DEVICES, (SEE STRUCTURAL DRAWINGS).
5. SUPPORTS SHALL MEET MANUFACTURERS STANDARDIZATION SOCIETY OF THE VALVE AND FITTINGS INDUSTRY STANDARD PRACTICE SP58, LATEST EDITION.
6. HANGER BRACKET AND SUPPORT COMPONENTS MAY BE INTERCHANGED AS APPROVED BY THE ENGINEER.
7. TRAPEZE AND PIPE RACK COMPONENTS SHALL HAVE A MINIMUM STEEL THICKNESS OF 12 GAUGE. MAXIMUM DEFLECTION SHALL BE LIMITED TO 1/240 OF THE SPAN. CHANNEL COMPONENTS SHALL BE B-LINE SERIES B22 OR B22A, OR EQUAL.
8. CONCRETE INSERTS IN AREAS BELOW WATER SURFACE OR NORMALLY SUBJECT TO SUBMERGING SHALL BE EMBEDDED ANCHOR BOLTS, OR APPROVED EQUAL. IN NO CASE SHALL CONCRETE CONTINUOUS INSERTS BE USED IN THESE AREAS.
9. ALL PIPING, DUCTWORK, ACCESSORIES, APPURTENANCES, ETC. SHALL BE ANCHORED TO RESIST 200% OF THE APPLIED LOAD & A LATERAL SEISMIC FORCE OF 40 PERCENT OF ITS WEIGHT WITHOUT EXCESSIVE DEFLECTION.
10. CONTRACTOR SHALL VERIFY ALL SUPPORT DIMENSIONS AND LOCATIONS WITH APPROVED SHOP DRAWINGS FOR ITEMS BEING SUPPORTED BEFORE FABRICATION OR INSTALLATION OF SUPPORTS.

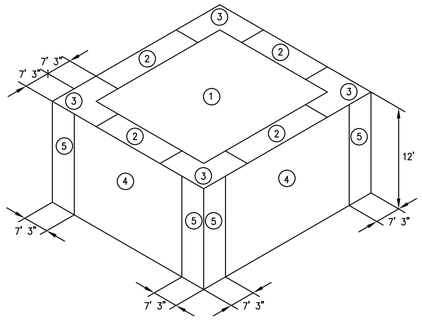
BUILDING CODE:

2012 EDITION OF THE INTERNATIONAL BUILDING CODE WITH TOWN OF JEROME AMENDMENTS.



LOADS:

ROOF LIVE LOAD = 20 PSF (REDUCIBLE).
TOTAL ROOF DEAD LOAD = 20 PSF.
GROUND SNOWLOAD = 20 PSF.
ROOF SNOW = 18.5 PSF.

WIND:

THE STRUCTURE AND ITS COMPONENTS ARE DESIGNED FOR WIND LOADS AS DEFINED BY THE BUILDING CODE, WHERE:

BASIC WIND SPEED 120 MPH.
RISK CATEGORY: III.
WIND EXPOSURE: C.
VELOCITY PRESSURE, qz = 23.7 PSF AT h = 12' FT. (MEAN ROOF HEIGHT). DESIGN WIND PRESSURES COMPONENTS AND CLADDING:

*PRESSURES SHOWN ARE ULTIMATE. MULTIPLY BY 0.6 FOR SERVICE LEVEL PRESSURES.

LOCATION	ZONE	EFFECTIVE WIND AREA (SF)	DESIGN WIND PRESSURE (PSF)*	
ROOF	1	10	+16.0	−54.9
		20	+16.0	−50.9
		50	+16.0	−45.6
		100	+16.0	−41.6

		50	+105.7	−77.0
		100	+93.3	−69.4

ZONE1: INTERIOR AREA OF ROOF AWAY FROM BUILDING EXTERIOR WALLS.
ZONE2: ROOF AREAS WITHIN 7'−3" OF EXTERIOR WALLS.
ZONE3: ROOF AREAS WITHIN 7'−3" OF BUILDING CORNERS.
ZONE4: EXTERIOR WALLS AWAY FROM BUILDING CORNERS.
ZONE5: EXTERIOR WALLS WITHIN 7'−3" OF BUILDING CORNERS.
−DESIGN WIND PRESSURES − PLUS AND MINUS SIGNS SIGNIFY PRESSURE ACTING TOWARD AND AWAY FROM EXTERIOR SURFACE.
−LINEAR INTERPOLATION BETWEEN VALUES OF TRIBUTARY AREA IS PERMISSIBLE.

SEISMIC:

RISK CATEGORY = III.
SEISMIC IMPORTANCE FACTOR: Ie = 1.25.
DESIGN CATEGORY = B.
SITE CLASS C.
SS = 0.31, S1 = 0.097, R = 3.5.
Sds = 0.269, Sd1 = 0.097.
BASIC SEISMIC−FORCE−RESISTING SYSTEM (INTERMEDIATE REINFORCED MASONRY SHEAR WALLS).
ANALYSIS PROCEDURE USED (EQUIVALENT LATERAL FORCE PROCEDURE).
CS = 0.096 (FACTORED).

FOUNDATIONS:

SOIL REPORT BY WESTERN TECHNOLOGIES INC; JOB NO.2522JW197; DATED OCTOBER 25, 2022; SPREAD FOOTINGS SHALL BEAR ON FIRM, UNDISTURBED SOIL AT BELOW GRADE TANKS AND 1' OF 2 SACK SLURRY AT GRADE. IN ACCORDANCE WITH THE ABOVE REPORT, BOTTOM OF FOOTING TO BE 2'0" MINIMUM BELOW FINISHED GRADE. (THESE FOOTING DEPTHS ARE MINIMUMS AND THE CONTRACTOR SHALL COORDINATE WITH SOILS REPORT AND OTHER TRADES TO ENSURE THESE MINIMUMS ARE SUFFICIENT FOR THE WORK.) FINISHED GRADE IS DEFINED AS TOP OF SLAB FOR INTERIOR FOOTINGS AND LOWEST ADJACENT GRADE WITHIN 5 FEET FOR PERIMETER FOOTINGS. DESIGN SOIL BEARING VALUE = 2500 PSF. FOUNDATION EXCAVATIONS SHALL BE INSPECTED BY SOILS ENGINEER PRIOR TO PLACEMENT OF CONCRETE.

CONCRETE:

MINIMUM 28 DAY STRENGTH 5,000 PSI EXCEPT AS FOLLOWS: (TYPE II, U.N.O.)

WALLS ---------- 5,000 PSI
MILD REINFORCED SLAB ---------- 5,000 PSI
FOUNDATIONS ---------- 5,000 PSI

MECHANICALLY VIBRATE ALL CONCRETE WHEN PLACED, EXCEPT THAT SLABS ON GRADE NEED BE VIBRATED ONLY AROUND UNDER−FLOOR DUCTS, ETC. MAXIMUM SLUMP 4 1/2" FOR CONCRETE WITHOUT PLASTICIZER. IF PLASTICIZER IS USED, A HIGHER FINAL SLUMP MAY BE ALLOWED UPON STRUCTURAL ENGINEER'S APPROVAL. CAST CLOSURE POUR AROUND COLUMNS AFTER COLUMN DEAD LOAD IS APPLIED. UNLESS APPROVED OTHERWISE IN WRITING BY THE ARCHITECT, ALL CONCRETE SLABS ON GRADE SHALL BE BOUND BY CONTROL JOINTS (KEYED OR SAW CUT), SUCH THAT THE ENCLOSED AREA DOES NOT EXCEED 225 SQUARE FEET. KEYED CONTROL JOINTS NEED ONLY OCCUR AT EXPOSED EDGES DURING POURING, ALL OTHER JOINTS MAY BE SAW CUT. CONTRACTOR SHALL SUBMIT PROPOSED LOCATIONS FOR APPROVAL PRIOR TO CONSTRUCTION.

REINFORCING:

ASTM A615 (FY = 60 KSI) DEFORMED BARS FOR ALL BARS. ALL GRADE 60 REINFORCING TO BE WELDED SHALL BE ASTM A706. WELDED WIRE FABRIC PER ASTM A185, WIRE PER ASTM A82. NO TACK WELDING OF REINFORCING BARS ALLOWED WITHOUT PRIOR REVIEW OF PROCEDURE WITH THE STRUCTURAL ENGINEER. LATEST ACI CODE AND DETAILING MANUAL APPLY. CLEAR CONCRETE COVERAGES AS FOLLOWS UNLESS NOTED OTHERWISE IN THE CONCRETE FIRE RATING TABLE:

CAST AGAINST AND PERMANENTLY EXPOSED TO EARTH ---------- 3"
EXPOSED TO EARTH OR WEATHER
#6 OR LARGER ---------- 2"
#5 AND SMALLER ---------- 1 1/2"
FLAT SLAB ---------- 3/4"
ALL OTHER PER LATEST EDITION OF ACI 318.

LAP SPLICES IN CONCRETE:

LAP SPLICES, UNLESS NOTED OTHERWISE, SHALL BE CLASS "B" TENSION LAP SPLICES PER LATEST EDITION OF ACI 318. LAP SPLICES IN CONCRETE COLUMNS SHALL BE TENSION LAP SPLICES. STAGGER SPLICES A MINIMUM OF ONE LAP LENGTH. LAPS IN WELDED WIRE FABRIC SHALL BE MADE SO THAT THE OVERLAP, MEASURED BETWEEN OUTERMOST CROSS WIRES OF EACH FABRIC SHEET, IS NOT LESS THAN THE SPACING OF CROSS WIRES PLUS 2 INCHES. ALL WELDED WIRE FABRIC SHALL BE CHAIRED TO ENSURE PROPER CLEARANCES.

ALL SPLICE LOCATIONS SUBJECT TO APPROVAL BY THE STRUCTURAL ENGINEER. PROVIDE BENT CORNER BARS TO MATCH AND LAP WITH HORIZONTAL BARS AT ALL CORNERS AND INTERSECTIONS PER TYPICAL DETAILS. REINFORCING BAR SPACING GIVEN ARE MAXIMUM ON CENTERS. ALL BARS PER CRSI SPECIFICATIONS AND HANDBOOK. DOWEL ALL VERTICAL REINFORCING TO FOUNDATION WITH STANDARD 90−DEGREE HOOKS UNLESS NOTED OTHERWISE. SECURELY TIE ALL BARS IN LOCATION BEFORE PLACING CONCRETE.

MASONRY:

MECHANICALLY VIBRATE GROUT IN VERTICAL SPACES IMMEDIATELY AFTER POURING AND AGAIN ABOUT 5 MINUTES LATER. PROVIDE CLEANOUTS IF GROUT LIFT EXCEEDS 4'−0" IN BLOCK WALLS. MAXIMUM GROUT LIFT SHALL BE 8'−0". UNLESS NOTED OTHERWISE ON THE PLANS, PLACE CONTROL JOINTS IN MASONRY WALLS SUCH THAT NO STRAIGHT RUN OF WALL EXCEEDS 24'−0". CONTROL JOINTS SHALL NOT OCCUR WITHIN 8'−0" OF WALL CORNERS, INTERSECTIONS, ENDS, WITHIN 24" OF CONCENTRATED POINTS OF BEARING OR JAMBS, OR OVER OPENINGS UNLESS SPECIFICALLY SHOWN ON THE STRUCTURAL DRAWINGS. ALL MASONRY BELOW FINISHED FLOOR OR GRADE SHALL BE GROUTED SOLID. LAP SPLICES SHALL BE AS FOLLOWS:

BAR SIZE	#3	#4	#5	#6	#7	#8	#9
BAR LAPS (INCHES)	27	36	45	54	63	72	81

HOLLOW CONCRETE MASONRY UNITS SHALL CONFORM TO ASTM C90, NORMAL WEIGHT, RUNNING BOND, MORTAR TYPE S (1800 PSI), COMPRESSIVE STRENGTHS AS FOLLOWS:

F'M(PSI)	UNIT STRENGTH, NET (PSI)	GROUT (PSI)	LOCATION
2000	2000	2000	TYPICAL U.N.O.

VERTICAL REINFORCING:

1 #5 IN CENTER OF GROUT AT CENTER OF WALL, CONTINUOUS FULL HEIGHT OF WALL AT ALL CORNERS, INTERSECTIONS, WALL ENDS, BEAM BEARINGS, JAMBS, EACH SIDE OF CONTROL JOINTS AND AT INTERVALS NOT TO EXCEED 48" O.C. UNLESS NOTED OTHERWISE. TIE AT 8'−0" VERTICALLY, WITH SINGLE WIRE LOOP TIE BY A.A. WIRE PRODUCTS COMPANY. LAP SPLICES SHALL BE AS PER SCHEDULE UNDER "MASONRY" SECTION. DOWEL ALL VERTICAL REINFORCING TO FOUNDATION WITH DOWELS TO MATCH VERTICAL REINFORCING.

HORIZONTAL REINFORCING:

2 #5 IN MINIMUM 8" DEEP GROUTED CONTINUOUS BOND BEAM AT (ELEVATED FLOORS AND) ROOFLINE. 1 #5 IN MINIMUM 8" DEEP GROUTED CONTINUOUS BOND BEAM AT TOP OF PARAPET OR TOP OF A FREESTANDING WALL AND AT BOTTOM OF WALL. USE 1 #4 HORIZONTAL BOND BEAM AT 48" O.C. VERTICALLY SPACED FOR ALL WALLS WITHOUT RUNNING BOND (STACKED BOND). PLACE THESE BARS CONTINUOUS THRU CONTROL JOINTS PER TYPICAL DETAIL. PROVIDE BENT BARS PER TYPICAL DETAILS, TO MATCH HORIZONTAL BOND BEAM REINFORCING, AT CORNERS AND WALL INTERSECTION TO MAINTAIN BOND BEAM CONTINUITY. LAP SPLICES SHALL BE AS PER SCHEDULE UNDER "MASONRY" SECTION. DO NOT SPLICE WITHIN 8'−0" OF CONTROL JOINTS. USE STANDARD WEIGHT (NO. 9 GAGE WIRE) DUR−O−WAL OR DUR−O−WIRE (OR EQUIVALENT) LADDER TYPE JOINT REINFORCEMENT AT 16" O.C. IN MASONRY WALLS.

ANCHOR BOLTS:

ALL ANCHOR BOLTS SHALL BE ASTM F1554 GRADE 36 (WELDABLE), U.N.O., WHEN SPECIFIED ON PLAN, ALL ASTM F1554 GRADE ANCHOR BOLTS SHALL BE 511 (WELDABLE) ANCHOR BOLTS.

MAY BE BENT IN FIELD PER AISC REQUIREMENTS TO FIX DAMAGED ANCHOR BOLTS; FIELD BENT IS LIMITED TO 45° OR LESS. ANCHOR BOLTS CAN HAVE HEADED OR HOOKED BOLTS SHAPES. USE HEADED ANCHOR BOLTS WHERE ANCHOR BOLT SHAPE IS NOT SPECIFIED. ANCHOR BOLTS SHALL BE INSPECTED PER SPECIAL INSPECTION TABLE REQUIREMENTS.

STRUCTURAL STEEL:

STEEL SETIONS − MINIMUM GRADE AND STRENGTH

STEEL WIDE FLANGES = ASTM A992 (50KSI)
STEEL CHANNELS = ASTM A36 (36KSI)
STEEL ANGLES = ASTM A36 (36KSI)
STEEL COLUMN BASE PLATES = ASTM A992 (50KSI)
STEEL PLATES AT MOMENT FRAME AND BRACED FRAME CONNECTIONS = ASTM A992 (50KSI)
STEEL PLATES (MISCELLLANEOUS) = ASTM A36 (36KSI)
STEEL HSS (RECTANGLE) = ASTM A500 (46KSI)
STEEL HSS (ROUND) = ASTM A500 (42KSI)
STEEL PIPES = ASTM A501 (36KSI) − OR −
ASTM A53 (35KSI), TYPE E OR S

NOTE: ALL 36KSI STEEL MAY BE SUBSTITUTED WITH 50KSI STEEL UNLESS NOTED OTHERWISE.

ALL CONSTRUCTION PER LATEST AISC HANDBOOK. ALL REFERENCE TO HEADED STUDS SHALL BE HIGH STRENGTH HEADED STUDS. ATTACHMENT OF HEADED STUDS SHALL CONFORM TO ALL REQUIREMENTS OF THE LATEST EDITION OF THE "RECOMMENDED PRACTICES FOR STUD WELDING" AND THE "STRUCTURAL WELDING CODE" PUBLISHED BY AWS. ALL BOLTS, ANCHOR BOLTS, EXPANSION BOLTS, ETC. SHALL BE INSTALLED WITH STEEL WASHERS AT SLOTTED HOLES IN STEEL SECTIONS. ALL WELDING SHALL BE PERFORMED BY WELDERS HOLDING VALID CERTIFICATES AND HAVING CURRENT EXPERIENCE IN THE TYPE OF WELD SHOWN ON THE DRAWINGS OR NOTES. CERTIFICATES SHALL BE THOSE ISSUED BY AN ACCEPTED TESTING AGENCY. ALL WELDING DONE BY E70 SERIES LOW HYDROGEN RODS UNLESS NOTED OTHERWISE. FOR GRADE 60 REINFORCING BARS, USE E90 SERIES. ALL WELDING PER LATEST AMERICAN WELDING SOCIETY STANDARDS, (EXCEPT STEEL JOISTS AND JOIST GIRDERS SHALL COMPLY WITH SJI STANDARDS). THESE DRAWINGS DO NOT DISTINGUISH BETWEEN SHOP AND FIELD WELDS; THE CONTRACTOR MAY SHOP WELD OR FIELD WELD AT HIS DISCRETION. SHOP WELDS AND FIELD WELDS SHALL BE SHOWN ON THE SHOP DRAWINGS SUBMITTED FOR REVIEW. ALL FULL (COMPLETE) PENETRATION WELDS SHALL BE TESTED AND CERTIFIED BY AN INDEPENDENT TESTING LABORATORY. WHEN STRUCTURAL STEEL IS FURNISHED TO A SPECIFIED MINIMUM YIELD POINT GREATER THAN 36 KSI, THE ASTM OR OTHER SPECIFICATION DESIGNATION SHALL BE INCLUDED NEAR THE ERECTION MARK ON EACH SHIPPING ASSEMBLY OR IMPORTANT CONSTRUCTION COMPONENT, OVER ANY SHOP COAT OF PAINT, PRIOR TO SHIPMENT FROM THE FABRICATOR'S PLANT. STRUCTURAL STEEL COMPONENTS, AND FASTENERS AT ALL EXTERIOR CONDITIONS SHALL BE GALVANIZED OR PROTECTED AGAINST CORROSION USING APPROVED METHOD PUBLISHED BY AISC OR ANSI. WELDS ON GALVANIZED STEEL SHALL FOLLOW AWS D−19.0 SPECIFICATIONS.

STRUCTURAL BOLTS:

ALL STRUCTURAL BOLTS SHALL BE ASTM F3125 GRADE A325 TYPE 1 AND SHALL BE INSTALLED AS BEARING−TYPE CONNECTIONS WITH THREADS INCLUDED IN SHEAR PLANE (I.E. A TYPE "N" CONNECTION) UNLESS NOTED OTHERWISE. USE A325 TYPE 3 BOLTS AT ALL CONNECTIONS EXPOSED TO WEATHERING. USE SC (SLIP CRITICAL) AT ALL MOMENT FRAMES AND BRACED FRAMES. USE ASTM A354 BOLTS WHERE THE BOLT LENGTH REQUIRED FOR THE CONNECTION EXCEEDS THE MINIMUM LENGTH OF AN A325 BOLT. BOLTS MAY BE TIGHTENED USING ANY AISC APPROVED METHOD. ALL STRUCTURAL BOLTING SHALL BE INSPECTED BY AN INDEPENDENT TESTING LABORATORY TO ENSURE BOLT TENSION.

STEEL GRATING:

UNLESS NOTED OTHERWISE IN ARCHITECTURAL SPECIFICATIONS, USE PAINTED (GALVANIZED) STEEL GRATING WITH 2 1/2" X 3/16" BEARING BARS AT 1 3/16" O.C. AND CROSSBARS AT 4" O.C. GRATING SHALL BE ERECTED AND ATTACHED PER MANUFACTURER'S RECOMMENDATIONS.

ROOF DECK:

DECK SHALL BE 1 1/2" DEEP, 36" WIDE, 20 GAGE GALVANIZED STEEL, WITH MINIMUM YIELD STRESS OF 50 KSI, WITH MINIMUM S = 0.237 IN3 AND I = 0.231 IN4 PER FOOT OF WIDTH. DECK SHALL BE ERECTED IN ACCORDANCE WITH MANUFACTURER'S RECOMMENDATIONS AS 1 SPAN MINIMUM AND SHALL BE ATTACHED FOR A MINIMUM DIAPHRAGM SHEAR CAPACITY OF 650 PLF USING THE FOLLOWING MINIMUM ATTACHMENTS:

WELD DECK TO SUPPORTING MEMBERS WITH 4 − 5/8" DIAMETER OR 3/8" X 1" PUDDLE WELDS PER SHEET AT ENDS, END LAPS AND AT INTERMEDIATE SUPPORTS, AND AT 24" O.C. AT PERIMETER BEAMS AND OPENING EDGES RUNNING PARALLEL TO THE DECK. SIDE SEAM ATTACHMENT SHALL BE VSC2 AT 24" O.C.

CONSTRUCTION JOINTS:

ALL CONSTRUCTION JOINTS IN WALLS SHALL BE KEYED IN ACCORDANCE WITH THE TYPICAL CONSTRUCTION JOINT DETAILS SHOWN ON THE STRUCTURAL DRAWINGS OR, AT THE CONTRACTOR'S OPTION, SHALL BE INTENTIONALLY ROUGHENED IN ACCORDANCE WITH THE FOLLOWING: THE SURFACE OF ROUGHENED JOINTS SHALL BE SAND BLASTED OR ROUGHENED WITH A CHIPPING HAMMER TO EXPOSE THE AGGREGATE EMBEDDED IN THE PREVIOUS POUR. THE EXPOSED AGGREGATE SHALL PROTRUDE A MINIMUM OF 1/4 INCH. ALL SURFACES OF CONSTRUCTION JOINTS SHALL BE CLEANED AND LAITANCE REMOVED. IMMEDIATELY BEFORE NEW CONCRETE IS PLACED, ALL CONSTRUCTION JOINTS SHALL BE WETTED AND STANDING WATER REMOVED. VERTICAL CONSTRUCTION JOINTS IN WALLS SHALL BE HELD TO A MAXIMUM SPACING OF 60'−0". ALL CONSTRUCTION JOINTS IN SLABS, JOISTS, BEAMS, AND GIRDERS SHALL BE OFFSET A DISTANCE EQUAL TO TWICE THE WIDTH OF THE BEAM.

ACCORDANCE WITH THE TYPICAL SLAB ON DECK CONSTRUCTION JOINT DETAIL SHOWN ON THE STRUCTURAL DRAWINGS. BEAMS AND GIRDERS HAVE BEEN DESIGNED ASSUMING THE CONSTRUCTION JOINTS TO BE LOCATED IN THE MIDDLE THIRD OF THE BEAM, GIRDER, OR SLAB SPAN. ALL CONSTRUCTION, CONTROL, AND ISOLATION JOINTS FOR SLABS ON GRADE SHALL BE IN ACCORDANCE WITH THE TYPICAL SLAB ON GRADE DETAILS. THE CONTRACTOR SHALL SUBMIT THE PROPOSED LOCATIONS OF CONSTRUCTION JOINTS TO THE ENGINEER FOR ACCEPTANCE BEFORE STARTING CONSTRUCTION.

ELECTRICAL CONDUIT IN CONCRETE SLABS:

ELECTRICAL CONDUIT SHALL BE RIGID STEEL CONDUIT OR FLEXIBLE PLASTIC CONDUIT. ALUMINUM CONDUIT IS PROHIBITED. CONDUIT WITH A MAXIMUM OUTSIDE DIAMETER OF 1/6 TIMES THE SLAB THICKNESS MAY BE EMBEDDED IN ONE LAYER AT THE MID−DEPTH OF SLABS. MINIMUM CLEAR DISTANCE BETWEEN CONDUITS SHALL BE 3 TIMES CONDUIT DIAMETER. CONDUIT SHALL BE FIRMLY CHAIRED AND TIED TO PREVENT DISPLACEMENT DURING POURING. PLACE #3 AT 12 INCHES O.C. ADDITIONAL REINFORCING ABOVE AND BELOW, PERPENDICULAR TO THE CONDUIT. THE ADDED REINFORCING SHALL EXTEND 1'−0" PAST THE CONDUIT ON BOTH SIDES. FOR CONDUIT PLACED IN SLABS ON METAL DECKING, CONDUIT SHALL RUN IN THE METAL DECK FLUTES PER THE TYPICAL CONDUIT IN SLAB ON METAL DECK DETAIL.

CONCRETE INSERTS:

THIN SLAB TYPE INSERTS SHALL BE GALVANIZED AND HAVE THE FOLLOWING MINIMUM WORKING LOADS(A 4:1 RATIO OF ULTIMATE TO WORKING VALUES IS ASSUMED):

BOLT DIAMETER	WORKING LOAD SHEAR	WORKING LOAD TENSION
1/2"	1,000 LBS.	650 LBS.
5/8"	1,250 LBS.	700 LBS.
3/4"	1,600 LBS.	850 LBS.

COIL LOOP INSERTS SHALL BE GALVANIZED AND HAVE THE FOLLOWING MINIMUM WORKING LOADS(A 3:1 RATIO OF ULTIMATE TO WORKING VALUES IS ASSUMED):

BOLT DIAMETER	WORKING LOAD SHEAR	WORKING LOAD TENSION
1/2"	2,200 LBS.	2,820 LBS.
5/8"	3,000 LBS.	3,620 LBS.
3/4"	3,100 LBS.	3,660 LBS.

THREADED COIL RODS, COIL NUTS, ETC., USED IN CONJUNCTION WITH CONCRETE INSERTS, SHALL HAVE A WORKING LOAD EQUAL TO OR GREATER THAN THE CORRESPONDING CONCRETE INSERT. CONTRACTOR SHALL SUBMIT MANUFACTURER'S SIZE AND STRENGTH DATA PRIOR TO CONSTRUCTION TO THE STRUCTURAL ENGINEER THRU THE ARCHITECT. VALUES LISTED ABOVE ARE FOR RICHMOND STRUCTURAL CONNECTION INSERTS.

EXPANSION AND SCREW ANCHORS:

USE STUD TYPE EXPANSION ANCHOR WITH A SINGLE PIECE WEDGE ONLY WHERE NOTED ON PLANS. IF USE IS REQUESTED FOR OTHER THAN WHERE NOTED CONTACT STRUCTURAL ENGINEER THROUGH ARCHITECT FOR APPROVAL.

CONTRACTOR SHALL SUBMIT MANUFACTURER'S SIZE AND STRENGTH DATA TO ENGINEER THROUGH ARCHITECT PRIOR TO CONSTRUCTION. INSTALL ALL BOLTS AS OUTLINED IN MANUFACTURER'S SPECIFICATIONS, UTILIZING PROPER SIZE AND TYPE OF DRILL, CLEANING HOLE, DRIVING AND TIGHTENING BOLT.

IN CONCRETE:

ANCHORS USED MUST HAVE ICC APPROVAL AND INCLUDE HILTI KWIK BOLT TZ2 (ESR−4266), AND SIMPSON STRONG BOLT−2 (ESR−3037), AND DEWALT POWER−STUD+SD2 (ESR−2502), AND SIMPSON TITEN HD (ESR−2713), HILTI KWIK HUS−EZ (ESR−3027), AND DEWALT SCREW−BOLT+ (ESR−3889) OR APPROVED EQUAL.

IN MASONRY:

ANCHORS USED MUST HAVE ICC APPROVAL AND INCLUDE HILTI KWIK BOLT 3 (ESR−1385), AND SIMPSON STRONG BOLT−2 (ES−240), DEWALT POWER−STUD+SD1 (ESR−2966), HILTI KWIK HUS−EZ (ESR−3056) AND SIMPSON TITEN HD (ESR−1056), AND DEWALT SCREW−BOLT+ (ESR−4042) OR APPROVED EQUAL.

EPOXY ANCHORS IN CONCRETE AND MASONRY:

INJECTABLE ADHESIVE SHALL BE USED FOR INSTALLATION OF REINFORCING STEEL DOWELS OR THREADED ANCHOR RODS AND INSERTS INTO NEW OR EXISTING CONCRETE OR SOLID GROUTED CONCRETE MASONRY UNITS ONLY WHERE SPECIFIED ON PLANS. IF USE IS REQUESTED FOR OTHER THAN WHERE NOTED CONTACT STRUCTURAL ENGINEER THROUGH ARCHITECT FOR APPROVAL. ADHESIVE SHALL BE FURNISHED IN SIDE BY SIDE PACKS WHICH KEEP COMPONENT A AND COMPONENT B SEPARATE. USE ONLY INJECTION TOOLS AND STATIC MIXING NOZZLES RECOMMENDED BY MANUFACTURER. MANUFACTURER'S INSTRUCTIONS SHALL BE FOLLOWED.

IN CONCRETE:

ANCHORS USED MUST HAVE I.C.C. APPROVAL IN CRACKED CONCRETE AND INCLUDE SIMPSON SET−XP (ESR−2508), HILTI HIT−RE500−V3 (ESR−3814), DEWALT PURE110+ (ESR−3298) OR APPROVED EQUIVALENT. THE USE OF ANY EPOXY ANCHOR MUST BE APPROVED BY THE ENGINEER OF RECORD PRIOR TO INSTALLATION.

IN MASONRY:

ANCHORS USED MUST HAVE ICC APPROVAL AND INCLUDE SIMPSON SET (ESR−1772) AND HILTI HIT−HY 270 MAX (ESR−4143) AND DEWALT AC100+GOLD (ESR−3200) OR APPROVED EQUIVALENT. THE USE OF ANY EPOXY ANCHOR MUST BE APPROVED BY THE ENGINEER OR RECORD PRIOR TO INSTALLATION.

1. ADHESIVE ANCHORS INSTALLED IN HORIZONTAL TO VERTICALLY OVERHEAD ORIENTATION TO SUPPORT SUSTAINED TENSION LOADS SHALL BE DONE BY A CERTIFIED ADHESIVE ANCHOR INSTALLER (AAI) AS CERTIFIED THROUGH ACI (ACI 318−11 D.9.2.2) / (ACI 318−14 17.8.2.2) / (ACI 318−19 17.2.3) PROOF OF CURRENT CERTIFICATION SHALL BE SUBMITTED TO THE ENGINEER FOR APPROVAL PRIOR TO COMMENCEMENT OF INSTALLATION.
2. ADHESIVE ANCHORS MUST BE INSTALLED IN CONCRETE AGED A MINIMUM OF 21 DAYS (ACI 318−11 D.2.2) / (ACI 318−14 17.1.2) / (ACI 318−19 17.2.2).
3. THE REMOVAL AND RESETTING OF POST INSTALLED ANCHORS IS PROHIBITED (ACI 318−19 17.3.1).
4. PROVIDE SPECIAL INSPECTION FOR ALL MECHANICAL AND ADHESIVE ANCHORS PER THE APPLICABLE BUILDING CODE AND PER THE CURRENT ICC−ES REPORT (IBC 2012, 2015, 2018 TABLE 1705.3 TYPE 4, NOTE B).

STRUCTURAL FILL:

ALL FILL PLACED TO SUPPORT SLABS ON GRADE, BEHIND PERMANENT WALLS, AND AROUND ALL DRAINS SHALL CONSIST OF WELL GRADED, GRANULAR MATERIAL PER THE SPECIFICATIONS. SOILS FOR STRUCTURAL FILL SHALL BE APPROVED BY THE GEOTECHNICAL ENGINEER. STRUCTURAL FILL SHALL BE PLACED ON SOUND NATIVE MATERIAL. PROOF−ROLL CUT AREAS WHICH PROVIDE SUPPORT FOR PERMANENT STRUCTURES. AREAS WHICH ARE EXCESSIVELY YIELDING, AS DETERMINED BY THE CONTINUOUS OBSERVATION OF THE GEOTECHNICAL ENGINEER, SHALL BE OVEREXCAVATED AND REPLACED WITH STRUCTURAL FILL. STRUCTURAL FILL SHALL BE PLACED PER THE SPECIFICATION. USE LEAN CONCRETE FILL BELOW ALL PIPES EXISTING OUT OF BASEMENT WALL, FULL HEIGHT OF WALL. CONCRETE SHALL CONTAIN 2 SACKS OF CEMENT PER YARD.

LATERAL PRESSURE ON SUBGRADE WALLS:

THE DESIGN PRESSURES FOR SUBGRADE WALLS ARE BASED ON A "DRAINED" CONDITION. SEE CIVIL AND MECHANICAL DRAWINGS FOR SUBGRADE DRAINAGE SYSTEM. SEE GEOTECHNICAL REPORT FOR COMPACTION REQUIREMENTS AT SUBGRADE WALLS. SUBGRADE WALLS AND SUPPORTING SLABS SHALL HAVE ATTAINED THEIR FULL CONCRETE STRENGTH BEFORE PLACING ANY BACKFILL U.N.O. THE CONTRACTOR SHALL PROVIDE TEMPORARY BRACES FOR WALLS IF BACKFILL IS PLACED BEFORE WALLS AND SLABS ACHIEVE FULL CONCRETE STRENGTH.

NOTES ON CRACKING OF CONCRETE STRUCTURES:

CRACKING IS INHERENT TO THE MATERIAL PROPERTIES OF CONCRETE CONSTRUCTION (INCLUDING POST−TENSIONED CONCRETE STRUCTURES). WHILE EVERY EFFORT HAS BEEN MADE TO MINIMIZE THE EFFECTS OF UNSIGHTLY CRACKING, THE PRESENCE OF CRACKS ARE NORMAL AND UNAVOIDABLE. THE DESIGN OF THE CONCRETE STRUCTURAL ITEMS HAVE BEEN ANALYZED USING A "CRACKING SECTION." THE PRESENCE OF THE CRACKING SHOULD NOT BE CONSIDERED DETRIMENTAL TO THE STRUCTURE. CRACKS LARGER THAN 10 MILS SHALL BE FILLED AND SEALED WITH AN APPROVED CRACK FILLER TO PREVENT FUTURE DETERIORATION. ALLOWANCE SHALL BE MADE IN THE CONSTRUCTION BUDGET FOR SEALING OF SUCH CRACKS. IN SOME CASE, CRACKS DO NOT APPEAR UNTIL WELL AFTER CONSTRUCTION HAS BEEN COMPLETED. IT IS THE RESPONSIBILITY OF THE OWNER TO MAINTAIN THE STRUCTURE PROPERLY OVER THE LIFE OF THE STRUCTURE. CONCRETE CRACKS, SHOULD THEY OCCUR, SHALL BE FILLED AND SEALED TO PREVENT PREMATURE DETERIORATION OF THE STRUCTURE.

SHOP DRAWINGS:

SHOP DRAWINGS SHALL BE SUBMITTED FOR ALL STRUCTURAL ITEMS IN ADDITION TO ITEMS REQUIRED BY ARCHITECTURAL SPECIFICATIONS.

THE CONTRACTOR SHALL REVIEW ALL SHOP DRAWINGS PRIOR TO SUBMITTAL. ITEMS NOT IN ACCORDANCE WITH CONTRACT DOCUMENTS SHALL BE FLAGGED UPON HIS REVIEW.

VERIFY ALL DIMENSIONS WITH ARCHITECTURAL DRAWINGS AND ALL FINISHED GRADE WITH CIVIL DRAWINGS.

ANY CHANGES, SUBSTITUTIONS, OR DEVIATIONS FROM CONTRACT DOCUMENTS SHALL BE CLOUDED BY MANUFACTURER OR FABRICATOR. ANY OF THE AFOREMENTIONED WHICH ARE NOT CLOUDED OR FLAGGED BY SUBMITTING PARTIES, SHALL NOT BE CONSIDERED APPROVED AFTER ENGINEER'S REVIEW, UNLESS NOTED ACCORDINGLY.

THE ENGINEER HAS THE RIGHT TO APPROVE OR DISAPPROVE ANY CHANGES TO CONTRACT DOCUMENTS AT ANYTIME BEFORE OR AFTER SHOP DRAWING REVIEW.

THE SHOP DRAWINGS DO NOT REPLACE THE CONTRACT DOCUMENTS. ITEMS OMITTED OR SHOWN INCORRECTLY AND ARE NOT FLAGGED BY THE STRUCTURAL ENGINEER OR ARCHITECT ARE NOT TO BE CONSIDERED CHANGES TO CONTRACT DOCUMENTS. IT IS THE CONTRACTOR'S RESPONSIBILITY TO MAKE SURE ITEMS ARE CONSTRUCTED PER THE CONTRACT DOCUMENTS.

THE ADEQUACY OF ENGINEERING DESIGNS AND LAYOUT PERFORMED BY OTHERS RESTS WITH THE DESIGNING OR SUBMITTING AUTHORITY.

REVIEWING IS INTENDED ONLY AS AN AID TO THE CONTRACTOR IN OBTAINING CORRECT SHOP DRAWINGS. RESPONSIBILITY FOR CORRECTNESS SHALL REST WITH THE CONTRACTOR.

GENERAL:

ENTIRE CONTRACT DOCUMENTS SHALL BE USED TO CONSTRUCT BUILDING. SOME CRITICAL ITEMS REQUIRED BY OTHER DISCIPLINES MAY NOT BE SHOWN ON STRUCTURAL DRAWING (I.E. WALL, FLOOR AND ROOF OPENINGS, ARCHITECTURAL, MECHANICAL AND PLUMBING LOADS, SUPPORT PLATES ETC.)

ITEMS SHOWN BY OTHER DISCIPLINES WITH REFERENCE TO STRUCTURAL DRAWING BUT NOT SHOWN ON THESE STRUCTURAL DOCUMENTS SHALL BE CONSIDERED DESIGN BUILD ITEMS. CONTRACTOR SHALL SUBMIT DESIGN BY OTHERS FOR REVIEW.

THE STRUCTURAL CONSTRUCTION DOCUMENTS REPRESENT THE FINISHED STRUCTURE. THEY DO NOT INDICATE THE METHOD OF CONSTRUCTION. THE CONTRACTOR SHALL PROVIDE ALL MEASURES NECESSARY TO PROTECT THE STRUCTURE DURING CONSTRUCTION. SUCH MEASURES SHALL INCLUDE, BUT NOT BE LIMITED TO, BRACING, SHORING FOR LOADS DUE TO CONSTRUCTION EQUIPMENT, ETC. THE STRUCTURAL ENGINEER SHALL NOT BE RESPONSIBLE FOR THE CONTRACTOR'S MEANS, METHODS, TECHNIQUES, SEQUENCES FOR PROCEDURE OF CONSTRUCTION, OR THE SAFETY PRECAUTIONS AND THE PROGRAMS INCIDENT THERETO (NOR SHALL OBSERVATION VISITS TO THE SITE INCLUDE INSPECTION OF THESE ITEMS).

CONSTRUCTION MATERIALS SHALL BE SPREAD OUT IF PLACED ON FRAMED CONSTRUCTION. LOAD SHALL NOT EXCEED THE DESIGN LIVE LOAD PER SQUARE FOOT.

WHERE REFERENCE IS MADE TO VARIOUS TEST STANDARDS FOR MATERIALS, SUCH STANDARDS SHALL BE THE LATEST EDITION AND/OR ADDENDA.

ESTABLISH AND VERIFY ALL OPENINGS AND INSERTS FOR ARCHITECTURAL, MECHANICAL, PLUMBING AND ELECTRICAL WITH APPROPRIATE TRADES, DRAWINGS AND SUBCONTRACTORS PRIOR TO CONSTRUCTION.

OPTIONS ARE FOR CONTRACTOR'S CONVENIENCE. IF THE CONTRACTOR CHOOSES AN OPTION, THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL NECESSARY CHANGES AND SHALL COORDINATE ALL DETAILS.

NOTES AND DETAILS ON DRAWINGS SHALL TAKE PRECEDENCE OVER GENERAL STRUCTURAL NOTES AND TYPICAL DETAILS. WHERE NO DETAILS ARE SHOWN, CONSTRUCTION SHALL CONFORM TO SIMILAR WORK ON THE PROJECT.

ALL DIMENSIONS SHOWN (INCLUDING ELEVATIONS) ON STRUCTURAL DRAWINGS ARE TO ASSIST CONTRACTOR IN VERIFICATION. SCALING DIMENSIONS FROM DRAWINGS IS NOT PERMITTED. LOCATION OF ALL ITEMS SHALL BE DETERMINED BY DIMENSIONS OR NOTES ONLY; DO NOT USE GRAPHIC APPEARANCE TO ASSUME SPECIFIC LOCATIONS.

CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFICATION OF ALL DIMENSIONS WITH ARCHITECTURAL AND FINISHED GRADE WITH CIVIL DRAWINGS PRIOR TO START OF CONSTRUCTION. RESOLVE ANY DISCREPANCY WITH THE ARCHITECT.

TYPICAL DETAILS MAY NOT NECESSARILY BE CUT ON PLANS, BUT APPLY UNLESS NOTED OTHERWISE.

WHERE DISCREPANCIES OCCUR BETWEEN PLANS, DETAILS, GENERAL STRUCTURAL NOTES AND SPECIFICATIONS, THE GREATER REQUIREMENTS SHALL GOVERN.

ANY ENGINEERING DESIGN, PROVIDED BY OTHERS AND SUBMITTED FOR REVIEW, SHALL BEAR THE SEAL OF AN ENGINEER REGISTERED IN THE STATE OF JURISDICTION.

SUPPLIER OF ENGINEERED STRUCTURAL COMPONENTS (I.E. STEEL JOISTS, STAIRS, PRECAST ITEMS) SHALL BE RESPONSIBLE FOR COMPLETE DESIGN AND SHALL USE ENTIRE CONTRACT DOCUMENTS TO INCLUDE ALL LOADS AND DETAIL REQUIREMENTS FROM ALL DISCIPLINES. SUPPLIER SHALL PROVIDE ADDITIONAL MATERIAL REQUIRED TO MEET ALL THEIR REQUIREMENTS FOR INSTALLATION (I.E. WIDER BEARING PLATES, SHIMS, ERECTION BOLTS ETC.).

STRUCTURAL STEEL SUPPLIER SHALL FURNISH BOLTS FOR OSHA CONNECTIONS (SEE DRAWINGS FOR DETAILS).

WALL SHORING SHALL BE INSTALLED PRIOR TO BACKFILLING BEHIND ALL BUILDING RETAINING WALLS, UNLESS ALL RESTRAINING SLABS ARE INSTALLED. USE HANDTAPPING ONLY WHEN WITHIN 8'-0", OR WITHIN HALF THE WALL HEIGHT OF BACKFILLED WALL.

CONTINUOUS FOUNDATION DRAIN PIPES (FRENCH DRAINS) OR WEEP HOLES SHALL BE PROVIDED BEHIND ALL BASEMENT WALLS AND ALL EXTERIOR RETAINING WALLS THAT RETAIN MORE THAN 3'-0" OF SOIL. WEEP HOLES WHERE USED SHALL BE 2" IN DIAMETER AT 6'-0" O.C. MAXIMUM.

BUILDING TOLERANCES:

STANDARD TOLERANCES SHALL BE BASED ON THE REQUIREMENTS OF THE AISC CODE OF STANDARD PRACTICE AND ACI 117, STANDARD SPECIFICATIONS FOR TOLERANCES FOR CONCRETE CONSTRUCTION AND MATERIALS.

SEQUENCING CONSTRUCTION AND LATERAL STABILITY:

THE STRUCTURAL COMPONENTS BY THEMSELVES ARE A NON-SELF-SUPPORTING STRUCTURE. LATERAL FORCES DUE TO WIND, EARTHQUAKE, OR SOIL ARE CARRIED BY THE ROOF AND FLOOR DIAPHRAGMS TO THE LATERAL SYSTEM. CERTAIN ELEMENTS SHOWN ON OR LOCAL STABILITY OF OTHER ELEMENTS (SUCH AS BEAMS, COLUMNS, AND WALLS). IF, DUE TO SEQUENCING OF CONSTRUCTION, THESE STABILITY ELEMENTS ARE NOT IN PLACE, THE CONTRACTOR SHALL RETAIN A LICENSED STRUCTURAL ENGINEER WHO SHALL INVESTIGATE WHERE TEMPORARY SHORING/BRACING IS REQUIRED, AND SHALL DESIGN THIS TEMPORARY SHORING/BRACING. THE CONTRACTOR SHALL PROVIDE THIS SHORING/BRACING UNTIL THE REQUIRED STRUCTURAL ELEMENTS AND THEIR CONNECTIONS HAVE BEEN INSTALLED AND REACH THEIR FINAL DESIGN STRENGTHS.

MISCELLANEOUS:

REFER TO ARCHITECTURAL, MECHANICAL, ELECTRICAL, CIVIL, ELEVATOR, OR OTHER SPECIALTY ENGINEERING DRAWINGS FOR DIMENSIONS NOT SHOWN, INCLUDING BUT NOT LIMITED TO: SIZE AND LOCATION OF CURBS, EQUIPMENT HOUSEKEEPING PADS, WALL AND FLOOR OPENINGS, BLOCKOUTS, FLOOR DEPRESSIONS, SUMPS, DRAINS, ANCHOR BOLTS, EMBEDDED ITEMS, ARCHITECTURAL TREATMENT, ETC. CONTRACTOR SHALL VERIFY DIMENSIONS AND RESOLVE DISCREPANCIES OR CONFLICTS PRIOR TO CONSTRUCTION. WHERE SECTIONS ARE INDICATED ON THE PLAN BY A NUMBER AND A DRAWNG NUMBER THUS, 1/S5.01, THE INDICATED SECTION (1) IS SHOWN ON STRUCTURAL DRAWING S5.01.

ALL WINDOW SYSTEMS SHALL BE DESIGNED TO ACCOMMODATE VERTICAL DEFLECTION OF THE STRUCTURE OF 1/2" MINIMUM LIVE LOAD DEFLECTION, UNLESS GREATER VALUE IS NOTED ON PLANS OR DETAILS.

FLOOR FLATNESS/LEVELNESS SHALL MEET ARCHITECTURAL SPECIFICATIONS (1/4" IN 10 FOOT MINIMUM LEVELNESS UNLESS TIGHTER REQUIREMENT IN SPECIFICATIONS) IN HEIGHT FOR ALL STRUCTURAL SYSTEMS. CONTRACTOR SHALL INCLUDE COST FOR LEVELING ALL FLOORS. FOR ESTIMATING PURPOSES ONLY, ASSUME 1/2" THICK LEVELING AGENT OVER 15% OF FLOOR AREA.

FABRICATOR APPROVAL:

SPECIAL INSPECTIONS NOTED ABOVE APPLY TO SHOP FABRICATED ASSEMBLIES IN ADDITION TO ON-SITE WORK UNLESS THE FABRICATOR IS AN "APPROVED FABRICATOR" AS DEFINED IN 2022 CBC.

STRUCTURAL OBSERVATION:

ENGINEER OF RECORD SHALL PROVIDE VISUAL OBSERVATION OF THE STRUCTURAL SYSTEM, FOR GENERAL CONFORMANCE TO THE APPROVED PLANS AND SPECIFICATIONS, AT SIGNIFICANT CONSTRUCTION STAGES AND AT THE COMPLETION OF THE STRUCTURAL SYSTEM. CONTRACTOR IS REQUIRED FOR COORDINATING THE TIMING OF SITE VISITS AND SHALL INCLUDE A MINIMUM OF 3 VISITS. THESE VISITS ARE TO BE PAID BY THE CONTRACTOR. STRUCTURAL OBSERVATION DOES NOT INCLUDE OR WAIVE THE RESPONSIBILITY FOR THE INSPECTIONS REQUIRED BY THE BUILDING CODE (NOTED ABOVE).

INSTRUCTIONS TO BIDDERS CONTINGENCIES:

1. UNDER NO CIRCUMSTANCES SHALL THESE DRAWINGS BE "FINAL BID" UNTIL THE PROJECT IS FULLY PERMITTED.
2. ALL PRELIMINARY PRICING EFFORTS SHALL BE CONSIDERED TO BE ESTIMATES ONLY AND SHALL INCLUDE THE NECESSARY CONTINGENCIES, ALLOWANCES, ALTERNATES, ETC. AS APPROPRIATE TO ACCOUNT FOR MODIFICATIONS AND ADDITIONS THAT WILL OCCUR TO THE DRAWINGS DURING THE FINALIZATION OF THE DESIGN AND PERMITTING.
3. THE OWNER OR CONTRACTOR SHALL UTILIZE THE FOLLOWING MINIMUM CONTINGENCIES FOR EACH OF THE STRUCTURAL ELEMENT COSTS TO BE USED AT THE SOLE DISCRETION OF THE STRUCTURAL ENGINEER:

CONSTRUCTION DOCUMENTS/FINAL BID 3% MINIMUM

ALL OF THE "FINAL BID" CONTINGENCIES NOT USED BY THE STRUCTURAL ENGINEER SHALL BE REFUNDED TO THE OWNER PRIOR TO THE CLOSEOUT OF THE PROJECT.
4. ANY MODIFICATIONS, DELETIONS OR ELIMINATIONS TO THE STRUCTURAL BIDDING AND CONTINGENCY REQUIREMENTS, WITHOUT THE CONSENT OF THE STRUCTURAL ENGINEER, SHALL AUTOMATICALLY INDEMNIFY THE STRUCTURAL ENGINEER OF ANY COSTS THAT MAY ARISE DURING THE DESIGN AND CONSTRUCTION OF THE PROJECT.
5. WHERE DISCREPANCIES OCCUR WITHIN THE DRAWINGS THE CONTRACTOR WILL EITHER RESOLVE THE DISCREPANCIES WITH THE ARCHITECT BEFORE BIDDING OR INCLUDE THE GREATER COST ITEM IN THE BID AND RESOLVE THE DISCREPANCY PRIOR TO CONSTRUCTION.

NOTE TO CONTRACTOR REGARDING PRICING/BIDDING OF CITY SUBMITTAL DRAWINGS:

THESE DRAWINGS HAVE BEEN PREPARED FOR CITY SUBMITTAL, AND ARE NOT TO BE CONSIDERED 100% CONSTRUCTION DOCUMENTS UNTIL CITY PLAN REVIEW HAS BEEN COMPLETED AND FINAL BUILDING PERMIT HAS BEEN ISSUED. IF THESE DOCUMENTS ARE TO BE USED FOR PRICING, BID, OR STEEL MILL ORDER, THE CONTRACTOR SHALL PROVIDE IN THE PROJECT BUDGET AN ALLOWANCE FOR POTENTIAL CHANGES BETWEEN THE CITY SUBMITTAL DRAWINGS AND THE FINAL APPROVED SUBMITTAL AND CONSTRUCTION DOCUMENTS. ADDITIONALLY, MISCELLANEOUS ITEMS MAY NOT BE SHOWN ON THESE DRAWINGS. THESE ITEMS INCLUDE, BUT ARE NOT LIMITED TO, ELEVATOR AND EQUIPMENT SUPPORTS, BLOCKOUTS, ETC. REFER TO ARCHITECTURAL, MECHANICAL, ELECTRICAL, AND OTHER SPECIALTY DRAWINGS FOR ADDITIONAL INFORMATION. THE CONSTRUCTION BUDGET SHALL INCLUDE THESE ITEMS. THE STRUCTURAL ENGINEER WILL NOT BE RESPONSIBLE FOR CHANGE ORDER COSTS INCURRED (INCLUDING DISCARDED MATERIAL COSTS) DUE TO BIDDING OR STEEL MILL ORDER FROM THESE DRAWINGS. CONTACT STRUCTURAL ENGINEER FOR CLARIFICATION IF THE SCOPE AND QUANTITY OF ALLOWANCE TO BE CARRIED IS NOT CLEAR.

CONTRACTOR RESPONSIBILITY:

EACH CONTRACTOR OR SUB-CONTRACTOR RESPONSIBLE FOR THE CONSTRUCTION OF THE WIND AND/OR SEISMIC RESISTING SYSTEM THAT IS LISTED IN THE STATEMENT OF SPECIAL INSPECTIONS SHALL SUBMIT A WRITTEN STATEMENT OF RESPONSIBILITY TO THE BUILDING OFFICIAL AND THE OWNER PRIOR TO THE COMMENCEMENT OF WORK REQUIRING SPECIAL INSPECTION. THE CONTRACTOR'S STATEMENT OF RESPONSIBILITY SHALL CONTAIN ACKNOWLEDGMENT OF AWARENESS OF THE SPECIAL REQUIREMENTS CONTAINED IN THE STATEMENT OF SPECIAL INSPECTIONS.

DEFERRED SUBMITTALS: (PER 2012 IBC 107.3.4.1)

FOR THE PURPOSES OF THIS SECTION, DEFERRED SUBMITTALS ARE DEFINED AS THOSE PORTIONS OF THE DESIGN WHICH ARE NOT SUBMITTED AT THE TIME OF THE APPLICATION AND THAT ARE TO BE SUBMITTED TO THE BUILDING OFFICIAL WITHIN A SPECIFIED PERIOD.

DOCUMENTS FOR DEFERRED SUBMITTAL ITEMS SHALL BE SUBMITTED TO THE PROFESSIONAL IN RESPONSIBLE CHARGE FOR REVIEW. THE CONTRACTOR SHALL FORWARD THE REVIEWED DOCUMENTS TO BUILDING OFFICAL WITH A NOTATION INDICATING THAT THE DEFERRED SUBMITTAL DOCUMENTS HAVE BEEN REVIEWED AND BEEN FOUND TO BE IN GENERAL CONFORMANCE TO THE DESIGN OF THE BUILDING. THE DEFERRED SUBMITTAL ITEMS SHALL NOT BE INSTALLED UNTIL THE DESIGN AND SUBMITTAL DOCUMENTS HAVE BEEN APPROVED BY THE BUILDING OFFICIAL.

DEFERRED SUBMITTAL ITEMS:

ALUMINUM WALKWAY
GRATING
HANDRAILS/STAIRS
SHORING EXCAVATIONS
EQUIPMENT ATTACHMENTS, INCLUDING ADD'L FRAMING REQ'D

SPECIAL INSPECTION:

PER IBC CHAPTER 17, SPECIAL INSPECTION IS REQUIRED FOR THE FOLLOWING ITEMS:

CONCRETE: VERIFICATION AND INSPECTION	CONTINUOUS	PERIODIC	REFERENCED STANDARD (NOTE 1)	IBC REFERENCE
1. Inspection of reinforcing steel, including prestressing tendons, and placement.	–	X	ACI 318: Ch. 20, 25.2 25.3, 26.6.1–26.6.3	1908.4
2. Reinforcing bar welding: a. Verify weldability of reinforcing bars other than ASTM A706; b. Inspect single-pass fillet welds, maximum 5/16"; and c. Inspect all other welds.	– – X	X X –	AWS D1.4 ACI 318: 26.6.4	---
3. Inspect anchors to be installed in concrete prior to and during placement of concrete where allowable loads have been increased or where strength design is used.	–	X	ACI 318: 17.8.2	---
4. Inspection of anchors post-installed in hardened concrete members. a. Adhesive anchors installed in horizontally or upwardly inclined orientations to resist sustained tension loads. b. Mechanical anchors and adhesive anchors not defined in 4.a.	X –	– X	ACI 318: 17.8.2.4 ACI 318: 17.8.2	---
5. Verifying use of required design mix.	–	X	ACI318: Ch. 19, 26.4.3, 26.4.4	1904.1, 1904.2 1908.2, 1908.3
6. Prior to concrete placement, fabricate specimens for strength tests, per form slump and air content tests, and determine the temperature of the concrete.	X	–	ASTM C172 ASTM C31 ACI 318: 26.4, 26.12	1908.10
7. Inspection of concrete and shotcrete placement for proper application techniques.	X	–	ACI 318: 26.5	1908.6, 1908.7, 1908.8
8. Verify maintenance of specified curing temperature and techniques.	–	X	ACI 318: 26.5.3–26.5.5	1908.9
9. Inspect prestressed concrete for: a. Application of prestressing forces; and b. Grouting of bonded prestressing tendons	X X	– –	ACI 318: 26.10	--- ---
10. Inspect erection of precast concrete members.	–	X	ACI 318: Ch. 26.8	---
11. Verification of in-situ concrete strength, prior to stressing of tendons in post-tensioned concrete and prior to removal of shores and forms from beams and structural slab.	–	X	ACI 318: 26.11.2	---
12. Inspect formwork for shape, location and dimensions of the concrete member being formed.	–	X	ACI 318: 26.11.1.2(b)	---

NOTES:
1. WHERE APPLICABLE, SEE ALSO SECTION 1707.1, SPECIAL INSPECTION FOR SEISMIC RESISTANCE.
2. TABLES TAKEN DIRECTLY FROM IBC FOR REFERENCE.

MASONRY INSPECTION TASK	FREQUENCY (a) LEVEL 3	REFERENCE FOR CRITERIA TMS 402	REFERENCE FOR CRITERIA TMS 602	IBC REFERENCE
1. As masonry construction begins, verify that the following are in compliance: a. Proportions of site-prepared mortar. b. Grade, type and size of reinforcement connectors and anchor bolts. c. Sample panel construction.	P P C		ART. 2.1, 2.6A, & 2.6C ART. 3.4 ART. 1.6D	
2. Prior to grouting, verify that the following are in compliance: a. Grout space. b. Placement of reinforcement, connectors, & anchor bolts. c. Proportions of site-prepared grout.	C C P	SEC. 6.1, 6.3.1, 6.3.6, & 6.3.7	ART. 3.2D & 3.2F ART. 3.2E & 3.4 ART. 2.6B & 2.4 G.1.b	
3. Verify compliance of the following during construction: a. Materials and procedures with the approved submittals. b. Placement of masonry units and mortar joint construction. c. Size and location of structural members. d. Type, size, and location of anchors, including other details of anchorage of masonry to structural members, frames, or other construction. e. Welding of reinforcement. f. Preparation, construction, and protection of masonry during cold weather (temperature below 40°F (4.4°C) or hot weather (temperature above 90°F (32.2°C). g. Placement of grout is in compliance.	P P P C C P C	SEC. 1.2.1(e), 6.2.1, & 6.3.1 SEC. 6.1.6.1.2	ART. 1.5 ART. 3.3B ART. 3.3F ART. 1.8C & 1.8D ART. 3.5	1705.04, 2104 & 2105
4. Observe preparation of grout specimens, mortar specimens, and/or prisms.	C		ART. 1.4 B.2.a.3, 1.4 B.2.b.3, 1.4 B.2.c.3, 1.4 b.3, & 1.4 B.4	

NOTES:
(a) Frequency refers to the frequency of inspection, which may be continuous during the listed task or periodically during the listed task, as defined in the table.
NR=Not Required, P=Periodic, C=Continuous
(b) Required for the first 5000 sq. ft. (465 sq. m.) of AAC masonry.
(c) Required after the first 5000 sq. ft. (465 sq. m.) of AAC masonry.

STEEL: VERIFICATION AND INSPECTION	CONTINUOUS	PERIODIC	REFERENCED STANDARD (NOTE1)	IBC REFERENCE
1. Material verification of high-strength bolts, nuts and washers: a. Identification markings to conform to ASTM standards specified in the approved construction documents. b. Manufacturer's certificate of compliance required.	– –	X X	APPLICABLE ASTM MATERIAL SPECS AISC 360, SEC. A3.3	
2. Inspection of high-strength bolting: a. Bearing-type connections. AISC 360, Section M2.5 1704.3.3	–	X		
3. Material verification of structural steel: a. Identification markings to conform to ASTM standards specified in the approved construction documents. b. Manufacturers' certified mill test reports.	–	–	AISC 360, SEC. M2.5 ASTM A 6 OR ASTM A 568	
4. Material verification of weld filler materials: a. Identification markings to conform to AWS specification in the approved construction documents. b. Manufacturer's certificate of compliance required.	– –	– –	AISC 360, SEC. A3.5	
5. Inspection of welding: a. Structural steel: 1) Complete and partial penetration groove welds. 2) Multipass fillet welds. 3) Single-pass fillet welds > 5/16" 4) Single-pass fillet welds = 5/16" 5) Floor and roof deck welds. b. Reinforcing steel: 1) Verification of weld ability of reinforcing steel other than ASTM A 706. 2) Reinforcing steel-resisting flexural and Axial forces in intermediate and special Moment frames, and boundary elements of Special reinforced concrete shear walls and shear reinforcement. 3) Shear reinforcement. 4) Other reinforcing steel.	– X X – – – – X X –	– – – X X – – X – X	AWS D1.1 AWS D1.1 AWS D1.1 AWS D1.1 AWS D1.3 AWS D1.4 ACI 318: 3.5.2	
6. Inspection of steel frame joint details for compliance with approved construction documents: a. Details such as bracing and stiffening. b. Member locations. c. Application of joint details at each connection.	– – – –	X – – –		

NOTES:
1. WHERE APPLICABLE SEE ALSO SECTION 1701.1, SPECIAL INSPECTION FOR SEISMIC RESISTANCE.
2. TABLES TAKEN DIRECTLY FROM IBC FOR REFERENCE.

STEEL: CONSTRUCTION OTHER THAN STRUCTURAL STEEL: VERIFICATION AND INSPECTION	CONTINUOUS	PERIODIC	REFERENCED STANDARD (NOTE1)	IBC REFERENCE
1. Material verification of cold-formed steel deck: a. Identification markings to conform to ASTM standards specified in the approved construction documents. b. Manufacturer's certified test reports.	– –	X	APPLICABLE ASTM MATERIAL STANDARDS	
2. Inspection of welding: a. Cold formed steel deck: 1) Floor and roof deck welds. b. Reinforcing steel: 1) Verification of weldability of reinforcing steel other than ASTM A 706. 2) Reinforcing steel resisting flexural and axial forces in intermediate and special moment frames, and boundary elements of special structural walls of concrete and shear reinforcement. 3) Shear reinforcement. 4) Other reinforcing steel.	– – X – X	X X – X –	AWS D1.3 ACI 318: 3.5.2 AWS D1.4	
SOILS: 1. Verify materials below shallow foundations are adequate to achieve the design bearing apacity. 2. Verify excavations are extended to proper depth and have reached proper material. 3. Perform classification and testing of compacted fill materials. 4. Verify use of proper materials, densities and lift thicknesses during placement and compaction of compacted fill. 5. Prior to placement of compacted fill, inspect subgrade and verify that site has been properly prepared. Not the responsibility of the structural engineer. Special inspection certificate to be completed by geotechnical engineer.	– – – X –	X X X – X		
EXPANSION, SCREW, AND EPOXY BOLTS: 1. During placement of all expansion, screw, & epoxy bolts, for visual verification of hole diameter and depth and placement of bolt and/or epoxy.	–	X		

DUTIES AND RESPONSIBILITIES OF THE SPECIAL INSPECTOR:

A) THE SPECIAL INSPECTOR SHALL OBSERVE THE WORK ASSIGNED TO BE CERTAIN IT CONFORMS WITH THE APPROVED DESIGN DRAWINGS AND SPECIFICATION.

B) THE SPECIAL INSPECTOR SHALL FURNISH INSPECTION REPORTS TO THE BUILDING OFFICIAL, AND TO THE ENGINEER.

C) UPON COMPLETION OF THE ASSIGNED WORK THE ENGINEER OR ARCHITECT SHALL COMPLETE AND SIGN THE APPROPRIATE FORMS CERTIFYING THAT TO THE BEST OF HIS KNOWLEDGE THE WORK IS IN CONFORMANCE WITH THE APPROVED PLANS AND SPECIFICATIONS AND THE APPLICABLE WORKMANSHIP PROVISIONS OF THE CODE.

NOTES:
1. STEEL STUD.
2. STEEL HEADER PER SCHEDULE.
3. 12 GAGE STEEL STUD TRACK FOR SPANS LESS THAN 16'-1".
4. CEILING LINE.
5. BRACES PER DETAIL.
6. CONT. SPANDREL OPENING HEADER.
7. 3"ø. STEEL PIPE AT 6'-0" O.C.
8. STEEL PLATE 1/2"x5"x10" WITH 2- 1/2"ø HEADED STUDS x4" LONG AT 8" O.C.
9. 6"x16 GAGE (600 S200).
10. CONT. 1 #5 AT H.S.

CF3 TYPICAL STEEL STUD ATTACHMENT

NO SCALE

NOTES:
1. CONT. 16 GAGE "UNPUNCHED" STEEL TRACK. FOR ATTACHMENT SEE DETAIL 40.
2. STEEL STUD WALL.
3. USE 1/2"ø PUDDLE WELD AT 16" O.C. WHERE TRACK IS INSTALLED ON STEEL DECK (ROOF CONDITIONS).
4. STEEL CLIP ANGLE 4"x4"x12 GA. x 4" LONG AT EACH STUD.
5. PROVIDE 1" VERT. SLOTTED HOLE WHERE STUDS ARE FULL FLOOR HEIGHT.
6. HILTI SHOT PIN TO BOTTOM OF CONCRETE SLAB.
7. STEEL MEMBER (BENT PLATE AND BEAM FLANGE SHOWN OR CONTINUOUS EDGE ANGLE AT CONCRETE SLAB).
8. ALTERNATE TO WELD AT STUD TO CLIP ANGLE CONNECTION – 4 – #10 x 3/4" LONG SELF– TAPPING TEK SCREWS.
9. DEFLECTION TRACK TO ALLOW VERTICAL MOVEMENT – USE (2)– 16 GA. TRACKS BOTTOM TRACKS TO HAVE 2" LEGS. (ALLOW 3/4" DEFLECTION).
10. #10 x 3/4" LONG SELF–TAPPING SCREW EACH SIDE.

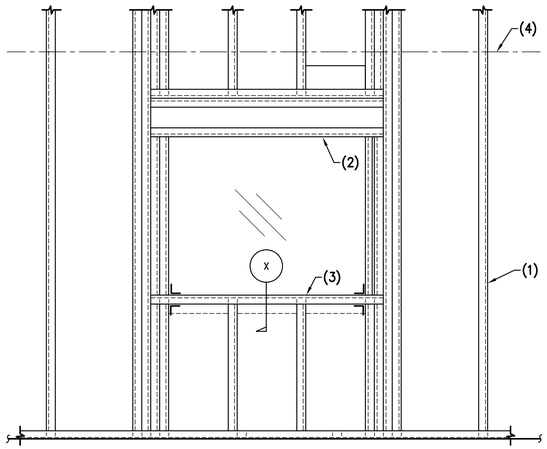
COLD FORMED STRUCTURAL STEEL FRAMING:

ALL COLD–FORMED STEEL FRAMING SHALL BE DESIGNED, FABRICATED AND ERECTED IN ACCORDANCE WITH MANUFACTURER'S RECOMMENDATIONS AND IN ACCORDANCE WITH THE LATEST EDITION OF "SPECIFICATIONS FOR THE DESIGN OF COLD–FORMED STEEL STRUCTURAL MEMBERS" BY THE AMERICAN IRON AND STEEL INSTITUTE.

STEEL FOR 14 AND 16 GAGE STUDS AND JOISTS, AND FOR ALL DIAGONAL TENSION STRAPS SHALL HAVE A MINIMUM YIELD STRENGTH OF 50 KSI. STEEL FOR ALL 18 AND 20 GAGE STUDS AND JOISTS, AND FOR ALL GAGES OF TRACK, ACCESSORIES AND BRIDGING SHALL HAVE A MINIMUM YIELD STRENGTH OF 33 KSI. STEEL SHALL BE GALVANIZED AT LOCATIONS EXPOSED TO WEATHER AND WHEREVER NOTED.

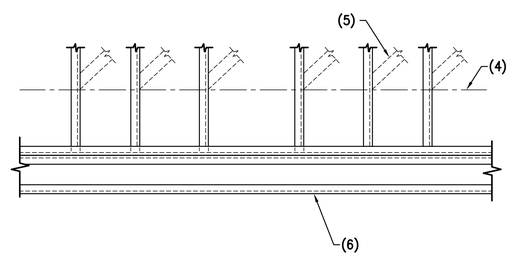
ALL STUD FRAMING (BOTH INTERIOR AND EXTERIOR) SHALL BE DESIGNED AND CONSTRUCTED TO ACCOMMODATE VERTICAL DEFLECTION OF THE STRUCTURE OF UP TO 1/2" LIVE LOAD DEFLECTION, UNLESS GREATER VALUE IS NOTED ON PLANS OR DETAILS. UTILIZE SLIP TRACK OR OTHER SIMILAR MEANS.

ALL STUDS SHALL BE SECURELY SEATED FOR FULL END BEARING ON TOP AND BOTTOM TRACK. UNLESS NOTED OTHERWISE, PROVIDE DOUBLE STUDS AT ALL JAMBS, CORNERS, INTERSECTIONS, BEAM BEARINGS AND JOIST BEARINGS. BRIDGING SHALL BE INSTALLED PER MANUFACTURER'S RECOMMENDATION WITH THE FOLLOWING MINIMUM REQUIREMENTS.

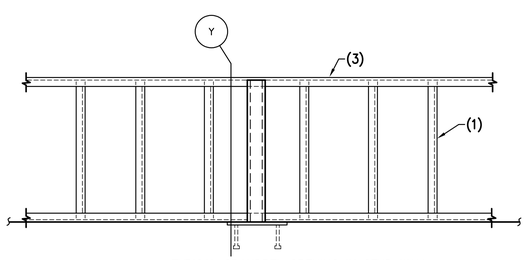


FOR WALLS WITH NO AXIAL LOAD, PROVIDE BRIDGING AT MID–HEIGHT FOR WALLS LESS THAN OR EQUAL TO 10'–0" HIGH, AND 5'–0" O.C. MAXIMUM FOR WALLS GREATER THAN 10'–0" HIGH. FOR AXIAL LOAD BEARING WALLS, PROVIDE BRIDGING EQUALLY SPACED AT 4'–0" MAXIMUM. IN ADDITION, BRIDGING SHALL BE PROVIDED AT ROOF LINES AND ELSEWHERE AS NOTED ON THE DRAWINGS. SOLID BLOCKING SHALL BE INSTALLED IN LIEU OF BRIDGING WHERE NOTED ON THE DRAWINGS.

STEEL STUD DETAILS AND GAGES DEPICATED ON STRUCTURAL DRAWINGS SHOW GENERAL STRUCTURAL REQUIREMENTS AND ARE FOR SCHEMATICS PURPOSE ONLY. THE CONTRACTOR SHALL BE REQUIRED TO SUBMIT SHOP DRAWINGS WITH DESIGN CALCULATIONS SEALED BY A REGISTERED ENGINEER FOR ALL STEEL STUD FRAMING AND ANY ADDITIONAL FRAMING MATERIALS REQUIRED FOR COMPLETE DESIGN SHALL BE INCORPORATED. CALCULATIONS SHALL INCLUDE DERIVATION OF WND LOADS PER SPECIFIED BUILDING CODE.



ALL WELDING SHALL BE PERFORMED BY WELDERS EXPERIENCED IN LIGHT GAGE STRUCTURAL STEEL FRAMING WORK. DO NOT NOTCH FLANGES OF JOISTS OR STUDS. DOUBLE UP FLOOR JOISTS AND BLOCKING UNDER PARTITIONS. PROVIDE BLOCKING AT SUPPORTS OF ALL JOISTS. DOUBLE UP STUDS AT JAMBS AND AS REQUIRED UNDER BEAMS IN BEARING WALLS.



TYPICAL STUDS SHALL BE DESIGNED FOR L/360 EXCEPT STUDS SUPPORTING VENEER SHALL BE DESIGN FOR MAXIMUM DEFLECTION OF L/600.

STEEL STUD SUPPLIER SHALL DESIGN AND SUPPLY STRUCTURAL STEEL AS REQUIRED FOR COMPLETE CONSTRUCTION OF VERTICAL WALL AWNINGS, SOFFITS, WING PLATES, FASCIA EXTENSIONS, ETC. ANY "RED METAL" OF FABRICATED STRUCTURAL STEEL REQUIRED TO COMPLETE WALL SYSTEMS SHALL BE DESIGNED AND INSTALLED BY STEEL STUD SUPPLIER.

ARCH. PLAN
SCALE: 1/2" = 1'-0"

NORTH

GENERAL NOTES

1. ALL INTERIOR WALLS, EXTERIOR WALLS, AND CEILINGS SHALL BE INSULATED PER SPECIFICATION SECTION 07 2100 OF THE CONTRACT DOCUMENTS.

DOOR & WINDOW NOTES:

1. ALL EXITS SHALL OPEN FROM THE INSIDE WITHOUT THE USE OF A KEY AND/OR SPECIAL KNOWLEDGE (U.N.O.). MANUALLY OPERATED EDGE OR SURFACE MOUNTED FLUSH BOLTS AND SURFACE BOLTS ARE PROHIBITED.
2. PAINT STEEL DOORS AND FRAMES WITH ONE (1) COAT OF RUST INHIBITING PRIMER AND ONE (1) COAT OF SEMI-GLOSS ALKYD ENAMEL.
3. ALL INTERIOR DOORS TO BE SOLID CORE MASONITE DOOS IN "TIMELY" FRAMES (U.N.O.).
4. ALL DOOR HARDWARE TO BE AL SERIES "SCHLAGE" LEVER TYPE WITH FINISH PER OWNER'S DIRECTION. VERIFY KEYING WITH OWNER.
5. PROVIDE DOOR STOPS AS REQUIRED AT FLOOR AND/OR WALL.
6. ALL DOORS TO BE MASTER KEYED. VERIFY KEYING WITH OWNER.
7. ALL THRESHOLDS TO BE MAXIMUM HEIGHT OF 1/2".
8. DOOR LOCK AND LATCHES SHALL COMPLY WITH UBC SECTION 1004.3 AND ADA.
9. THE AUTHORITY HAVING JURISDICTION MAY INCREASE THE MAXIMUM EFFORT TO OPERATE FIRE DOORS IN ORDER TO ACHIEVE POSITIVE LATCHING, BUT NOT EXCEEDING THE 15 LP MAX.
10. MAXIMUM EFFORT TO OPERATE EXTERIOR DOORS IS 5 LBS.
11. HAND-ACTIVATED DOOR OPENING HARDWARE SHALL BE CENTERED BETWEEN 30" AND 44" A.F.F.
12. PROVIDE 1/4" TEMPERED GLASS AT ALL INTERIOR WINDOW LOCATIONS.
13. MAIN EXTERIOR DOORS: PROVIDE VISIBLE DURABLE SIGN ON THE EGRESS SIDE, ON OR ADJACENT TO THE DOOR, STATING: "THIS DOOR TO REMAIN UNLOCKED WHEN THE BUILDING IS OCCUPIED." THE SIGN SHALL BE IN LETTERS 1" HIGH ON A CONTRASTING BACKGROUND.

FLOOR PLAN NOTES:

1. ALL INSULATION SHALL HAVE FLAME SPREAD RATE NOT TO EXCEED 25 AND A SMOKE DENSITY NOT TO EXCEED 450 WHEN TESTED IN ACCORDANCE WITH STANDARD NO. 42-1.
2. PROVIDE 4'-0" HIGH ANGLE IRON DOOR GUARDS AT FLOOR OF EACH JAMB OF EACH OVERHEAD DOOR OPENING.
3. ALL NEW DRYWALL SHALL BE TAPED, TEXTURED, AND PAINTED WITH ONE (1) COAT VINYL ACRYLIC WALL SEALER AND TWO (2) COATS LO-GLO ACRYLIC SEMI-GLOSS ENAMEL. PROVIDE SAMPLE FOR OWNER'S APPROVAL. PROVIDE LIGHT KNOCKDOWN TEXTURE.
4. RESTROOM DRYWALL SHALL BE WATER RESISTANT TYPE X. RESTROOMS TO HAVE +4' HIGH 12"x12" GLAZED CERAMIC TILE BY "DAL TALE" OR EQUAL, FROM STANDARD COLOR SELECTION WAINSCOT. PAINT DRYWALL ABOVE WITH ONE (1) COAT PRIMER AND TWO (2) COATS SEMI-GLOSS ENAMEL PAINT. USE DUNN-EDWARDS OR FRAZEE.
5. BLOWER ROOM: PROVIDE SAWCUT CONTROL JOINTS AT 5'x5' MINIMUM FOR AREAS WITH SEALED CONCRETE FINISHED FLOOR. RESTROOM AND OPERATIONS ROOM TO RECEIVE 12"x12" VINYL COMPOSITE TILES. PROVIDE VCT AND CERAMIC TILE SAMPLES FOR OWNER'S SELECTION.
6. PROVIDE 4" CERAMIC TILE BASE TO MATCH FLOOR TILE. AT RESTROOM, PROVIDE 6" COVERED CERAMIC TILE BASE.
7. SEE PLUMBING DRAWING FOR FLOOR AREA DRAINAGE AND RESTROOM. PLUMBING DRAWINGS SHALL APPLY FOR APPLICABLE FIXTURES.

TOWN OF JEROME WWTP
ELECTRICAL
JEROME, ARIZONA

GENERAL ELECTRICAL NOTES

1. ELECTRICAL WORK SHALL COMPLY WITH THE NATIONAL ELECTRIC CODE (2011), FEDERAL, STATE AND LOCAL JURISDICTION CODES.
2. ALL WORK SHALL BE DONE IN A NEAT, WORKMANLIKE, FINISHED AND SAFE MANNER, ACCORDING TO THE LATEST PUBLISHED NATIONAL ELECTRICAL CONTRACTORS ASSOCIATION STANDARDS OF INSTALLATION, UNDER COMPETENT SUPERVISION.
3. VISIT THE SITE PRIOR TO BIDDING TO BECOME FAMILIAR WITH EXISTING CONDITIONS AND ALL OTHER FACTORS WHICH MAY AFFECT THE EXECUTION OF THIS WORK. INCLUDE ALL RELATED COSTS IN THE INITIAL BID PROPOSAL.
4. CONTRACTOR IS RESPONSIBLE FOR VERIFYING LOCATIONS OF ALL EXISTING UTILITIES AND AVOIDING DAMAGE TO SAME. CONTRACTOR SHALL BE RESPONSIBLE FOR DAMAGE TO UTILITIES CAUSED AS A RESULT OF HIS WORK. CALL (602) 263-1100 FOR BLUE STAKES. IRRIGATION LINES LESS THAN 2" WILL NOT BE MARKED AND SHALL BE REPAIRED IN KIND BY THE CONTRACTOR.
5. PROPER PROTECTION OF THE CONSTRUCTION AREA FOR SAFETY SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR. COVER ALL TRENCHES AT THE END OF EACH WORK DAY. BARRICADES SHALL BE INSTALLED AS DIRECTED BY THE EPCOR OR THE PROJECT INSPECTOR. THE SITE AND ALL WORK SHALL CONFORM TO OSHA REQUIREMENTS.
6. CONTRACTOR SHALL PAY FOR PERMITS AND INSPECTIONS AS MAY BE REQUIRED AND PROVIDE A CERTIFICATE OF INSPECTION TO THE EPCOR.
7. PROTECT ALL MATERIAL AND EQUIPMENT INSTALLED AGAINST DAMAGE BY OTHER TRADES, WEATHER CONDITIONS OR ANY OTHER CAUSES. EQUIPMENT FOUND DAMAGED OR IN OTHER THAN NEW CONDITION WILL BE REJECTED AS DEFECTIVE. ALL COMPONENTS SHALL BE FREE OF DUST, GRIT AND FOREIGN MATERIALS, AND LEFT AS NEW BEFORE FINAL ACCEPTANCE OF WORK.
8. LEAVE THE SITE CLEAN, REMOVE ALL DEBRIS, EMPTY CARTONS, TOOLS, CONDUIT, WIRE SCRAPS AND ALL MISCELLANEOUS SPARE EQUIPMENT AND MATERIALS USED IN THE WORK DURING CONSTRUCTION.
9. IT IS THE OBLIGATION OF THE CONTRACTOR TO ORGANIZE HIS WORK SO THAT A COMPLETE ELECTRICAL, INSTRUMENTATION, AND/OR CONTROL SYSTEM FOR THE FACILITY WILL BE PROVIDED AND SUPPORTED BY ACCURATE SHOP AND RECORD DRAWINGS, AND ALL O & M MANUALS.
10. ALL UNDERGROUND CONDUIT SHALL BE SCHEDULE 40 PVC, BURIED 24" MINIMUM BELOW FINISHED GRADE, UNLESS SPECIFICALLY NOTED OTHERWISE ON PLANS OR IN DETAILS.
11. PROVIDE EMT INDOOR AND GRS OUTDOOR FOR ABOVE GROUND CONDUIT. WHERE METALLIC CONDUITS COME IN CONTACT WITH DIRT, THEY SHALL BE HALF LAP WRAPPED WITH SCOTCH 50 TAPE TO 12" AFG. FITTINGS SHALL BE STEEL, THREADED TYPE WITH INSULATED THROATS. SECURELY ATTACH ALL SURFACE MOUNTED CONDUIT EVERY 10 FEET AND WITHIN 3 FEET OF EACH JUNCTION BOX, PER NEC ARTICLE 344.30. OUTDOOR FLEX CONDUIT SHALL BE LIQUID TITE UV RESISTANT (BLACK) FLEX CONDUIT.
12. UNDERGROUND VERTICAL AND HORIZONTAL 90 DEGREE BEND CONDUIT SHALL BE GRS HALF LAPPED WRAPPED WITH SCOTCHRAP 50 10-MIL TAPE TO 18" MIN ABOVE GRADE WITH A RADIUS OF NOT LESS THAN 18" (FACTORY BENDS ONLY SHALL BE USED)
13. UNDERGROUND CONDUITS SHALL BE A MINIMUM 1".
14. ALL FEEDERS AND BRANCH CIRCUIT WIRE SHALL BE COPPER TYPE XHHW (75 DEGREE C) FOR BELOW GRADE INSTALLATIONS (AND CONDUIT RISERS) AND THHN/THWN (75 DEGREE C) FOR ABOVE GRADE INSTALLATIONS. MINIMUM SIZE SHALL BE #12 AWG, UNLESS SPECIFICALLY NOTED OTHERWISE ON PLANS OR IN DETAILS. ALL WIRING SHALL BE IN CONDUIT.
15. A SEPARATE GREEN INSULATED EQUIPMENT GROUNDING CONDUCTOR (BOND) SHALL BE INSTALLED WITHIN EACH RACEWAY PER NEC CODE.
16. WHEN A PANEL IS SUPPLIED BY A FEEDER OR BRANCH CIRCUIT, ANY INSTALLED GROUNDED CONDUCTOR SHALL NOT BE CONNECTED TO THE EQUIPMENT GROUNDING CONDUCTOR (GEC) OR TO THE GROUNDING ELECTRODE(S) PER NEC ARTICLE 250.32(B).
17. BOND ALL ENCLOSURES PER NEC ARTICLE 250.96.
18. CONTRACTOR SHALL PLAN AND INSTALL WORK IN SUCH A MANNER AS TO CONFORM TO THE STRUCTURE, AVOID OBSTRUCTIONS, PRESERVE HEADROOM AND KEEP OPENINGS AND PASSAGEWAYS CLEAR.
19. CONTRACTOR SHALL PROVIDE ALL LABOR, MATERIAL, ETC. NECESSARY FOR A COMPLETE AND WORKABLE ELECTRICAL SYSTEM WHETHER OR NOT THESE ITEMS ARE SPECIFICALLY NOTED ON THESE DRAWINGS. INCIDENTAL ITEMS NOT INDICATED ON THE DRAWINGS, NOR MENTIONED IN SPECIFICATIONS THAT CAN BE LEGITIMATELY AND REASONABLY INFERRED TO BELONG TO THE WORK DESCRIBED OR BE NECESSARY IN GOOD PRACTICE TO PROVIDE A COMPLETE SYSTEM, SHALL BE FURNISHED AND INSTALLED AS THOUGH ITEMIZED HERE IN EVERY DETAIL.
20. CONTRACTOR IS RESPONSIBLE FOR AND SHALL PROVIDE ALL LABOR, MATERIAL, TRENCHING, CONDUIT, TRANSFORMER PAD AND OTHER REQUIRED EQUIPMENT PER UTILITY COMPANY PLANS AND SPECIFICATIONS NECESSARY FOR A COMPLETE UNDERGROUND CONDUIT SYSTEM FROM THE UTILITY POINT OF SERVICE TO THE UTILITY CO. TRANSFORMER AND FROM THE UTILITY CO. TRANSFORMER TO THE ELECTRICAL SERVICE ENTRANCE SECTION.
21. ALL TRENCHING, CONDUITS, ETC. SHALL BE ROUTED AND INSTALLED IN SUCH A MANNER THAT WILL NOT DAMAGE EXISTING FACILITIES. SHOULD DAMAGE OCCUR, IT WILL BE THE CONTRACTORS RESPONSIBILITY TO REPAIR DAMAGE TO THE SATISFACTION OF THE EPCOR OR INSPECTOR.
22. ALL CONDUIT RUNS SHOWN ON THIS PLAN ARE SCHEMATIC IN NATURE. THE CONTRACTOR SHALL MAKE SURE THAT ALL CONDUIT, ETC. FALLS WITHIN THE CONSTRUCTION AREA/RIGHT OF WAY. (THIS INCLUDES MAINTAINING ALL REQUIRED CLEARANCES.)
23. WHEN CROSSING PATHWAYS OR SIDEWALKS, CONTRACTOR SHALL BORE UNDER EXISTING CONCRETE WALKS AND SAWCUT ASPHALT WALKS. ASPHALT WALKS SHALL BE REPLACED IN KIND.
24. CONTRACTOR SHALL GUARANTEE WORK INSTALLED UNDER THE CONTRACT TO BE FREE FROM DEFECTIVE WORKMANSHIP AND MATERIALS, USUAL WEAR EXPECTED, AND SHOULD ANY SUCH DEFECTS DEVELOP WITHIN A PERIOD OF ONE YEAR ACCEPTANCE OF THE PROJECT BY THE EPCOR, THE CONTRACTOR SHALL REPAIR AND/OR REPLACE ANY DEFECTIVE ITEMS AND DAMAGE RESULTING FROM FAILURE OF THESE ITEMS, AT NO EXPENSE WHATSOEVER TO THE EPCOR.
25. CONTRACTOR SHALL IDENTIFY EQUIPMENT PANELS, DISCONNECTS, PANELS, INSTRUMENTS ETC. USING P&ID NOMENCLATURE WITH 3/32-INCH THICK LAMINATED PHENOLIC TYPE NAMEPLATES WITH 1/4-INCH MINIMUM HEIGHT LETTERS. NAMEPLATE TO BE BLACK MATTE FINISH SURFACE WITH WHITE LETTER ENGRAVING AND BE UV RESISTANT. ATTACH NAMEPLATE TO THE OUTSIDE PANEL FACE WITH TWO STAINLESS STEEL SELF-TAPPING SCREWS. NAMEPLATE SHALL READ THE EQUIPMENT NAME AND P&ID NOMENCLATURE. SEE NEC ARTICLE 230.70(B) FOR SERVICE EQUIPMENT.
26. ALL CIRCUITS SHALL BE LEGIBLY IDENTIFIED AT THE PANEL, JUNCTION BOXES AND AT ALL EQUIPMENT IN A PERMANENT MANNER (I.E. ETCHED PLATES, CONDUCTOR TAG, PERMANENT MARKER, ETC.). THE LABELING SHALL INCLUDE PANEL CIRCUIT NUMBER, "TO" AND "FROM" IDENTIFICATION, AND MARKED "SPARE" WHERE APPLICABLE.
27. CONTRACTOR SHALL TEST ELECTRICAL SYSTEM FOR SHORT CIRCUITS AND MEGGER TEST FEEDERS AND BRANCH CIRCUIT WIRING. CONTRACTOR SHALL INSURE LOW IMPEDANCE GROUND PATH SYSTEM. PROVIDE CERTIFIED TEST RESULTS FOR MEGGER TEST TO EPCOR UPON COMPLETION OF PROJECT.
28. CONTRACTOR SHALL PERFORM HIGH POTENTIAL (HIPOT) TESTING WHEN REQUIRED BY LOCAL JURISDICTION OR EPCOR.
29. CONTRACTOR SHALL PROVIDE A GROUND-FAULT COORDINATION STUDY AND PERFORM RECOMMENDED SETTINGS ON NEW OVERCURRENT PROTECTION DEVICES, PROVIDE LABELS ON EQUIPMENT INDICATING SETTINGS.
30. CONTRACTOR SHALL PROVIDE AN ARC-FLASH STUDY, PROVIDE ALL APPLICABLE LABELS ON NEW EQUIPMENT AFTER STUDY IS COMPLETED.
31. ALL CONDUIT AND J-BOXES SHOWN SHALL BE CONCEALED WHEN POSSIBLE. WHEN NOT POSSIBLE, CONDUIT AND J-BOXES MAY BE SURFACE MOUNTED WITH PERMISSION OF THE EPCOR OR EPCOR'S REPRESENTATIVE.
32. CONTRACTOR SHALL COORDINATE ALL EQUIPMENT CONNECTIONS WITH EQUIPMENT SUPPLIER PRIOR TO ROUGH-IN. PROVIDE ADDITIONAL FUSED DISCONNECT SWITCHES AND CONTROLS IF OVERCURRENT PROTECTION OR CONTROLS IS NOT INTEGRAL WITH UNITS.
33. ALL EQUIPMENT SHALL BE FUSE SIZED PER MANUFACTURES RECOMMENDATIONS AND U.L. APPROVAL.
34. ELECTRICAL DEVICES, DISCONNECT SWITCHES, ETC., SHALL BE SUPPORTED INDEPENDENT OF AND ISOLATED FROM EQUIPMENT VIBRATIONS.
35. FULL LOAD AMPS (FLA) SIZES, AS NOTED IN THESE DRAWINGS, ARE BASED ON SPECIFIED EQUIPMENT DATA. CONTRACTOR SHALL VERIFY NAMEPLATE FLA OF EQUIPMENT SUPPLIED AND COORDINATE ACCORDINGLY PER EQUIPMENT SUPPLIERS RECOMMENDATIONS.
36. ALL OUTDOOR ELECTRICAL EQUIPMENT SHALL BE NEMA-3R OR NEMA-4 ENCLOSURES.
37. CONDUITS OR RACEWAYS ROUTED FROM INDOORS TO OUTDOORS OR AS DESCRIBED IN NEC 300.7(A), SHALL BE SEALED WITH A PLIABLE SEALING COMPOUND AT A CONDUIT BODY OR AT A JUNCTION BOX BEFORE THE CONDUIT ENTERS THE COLDER ENVIRONMENT.
38. CONDUITS OR RACEWAYS INSTALLED IN AREAS WHERE ELEVATION CHANGES MAY CAUSE WATER OR MOISTURE TO ENTER THE ELECTRICAL EQUIPMENT THROUGH THE CONDUIT SHALL BE SEALED WITH A HERMETIC CONDUIT SEAL AT BOTH ENDS OF THE CONDUIT OR RACEWAY.
39. MATERIALS SHALL BE NEW AND OF THE BEST QUALITY WITH MANUFACTURER'S NAME PRINTED THEREON. MATERIALS SHALL BE MANUFACTURED IN ACCORDANCE WITH NEMA, ANSI, UNDERWRITER'S LABORATORY OR OTHER APPLICABLE STANDARDS AND RATED FOR HEAVY DUTY SERVICE.
40. ALL WIRING DEVICES SHALL BE SPECIFICATION GRADE. ALL 15 AND 20 AMP, 125 AND 250 VOLT, NONLOCKING RECEPTACLES INSTALLED OUTDOORS SHALL BE LISTED WEATHER-RESISTANT TYPE. ALL WEATHERPROOF WHILE IN-USE RECEPTACLE COVERS SHALL BE METAL.
41. SELECTION OF MATERIALS SHALL BE IN STRICT ACCORDANCE WITH THE DRAWINGS AND/OR SPECIFICATIONS. THE USE OF MANUFACTURER'S NAME, MODEL, AND NUMBER IS INTENDED TO ESTABLISH STYLE, QUALITY, APPEARANCE, USEFULNESS AND BID PRICE. CONTRACTOR SHALL SUBMIT TO THE EPCOR OR EPCOR'S REPRESENTATIVE FOR REVIEW AND APPROVAL (PRIOR TO ORDERING MATERIALS) COPIES OF EQUIPMENT SHOP DRAWINGS AS FOLLOWS: 1) LIGHT FIXTURES, 2) PUMP CONTROL PANEL 3) RTU/PLC 4) SERVICE ENTRANCE SECTION, 5) ELECTRICAL EQUIPMENT, 6) DISCONNECT SWITCHES, 7) TIME CLOCKS AND OTHER CONTROLS, 8) LIGHTING CONTACTORS AND 9) PULL BOXES. AT THE TIME OF EACH SUBMITTAL, THE CONTRACTOR SHALL DEFINE AND DELINEATE IN WRITING ANY DEVIATIONS FROM THE CONTRACT DOCUMENTS. THE REVIEW WILL BE ONLY FOR CONFORMANCE WITH THE DESIGN CONCEPT OF THE WORK AND FOR COMPLIANCE WITH THE INFORMATION CONTAINED IN THE CONTRACT DOCUMENTS. THE REVIEW OF A SPECIFIED ITEM, AS SUCH, WILL NOT INDICATE REVIEW OF THE ASSEMBLY IN WHICH THE ITEM FUNCTIONS. REVIEW BY THE EPCOR OR EPCOR'S REPRESENTATIVE WILL NOT RELIEVE THE CONTRACTOR FROM RESPONSIBILITY FOR ANY ERRORS OR OMISSIONS IN THE SUBMITTALS NOR FROM HIS RESPONSIBILITY FOR COMPLYING WITH THE CONTRACT DOCUMENTS.
42. THE SUBMITTALS SHALL BE NEATLY GROUPED AND ORGANIZED. PERTINENT INFORMATION SHALL BE HIGHLIGHTED, AND THE SPECIFIC PRODUCT SHALL BE IDENTIFIED. ALL SUBMITTALS SHALL BE COMPLETE, AND PRESENTED IN ONE PACKAGE. THE SUBMITTAL SHALL INCLUDE A COMPLETE LIST OF THE EQUIPMENT AND MATERIALS, INCLUDING THE MANUFACTURER'S NAME, PRODUCT SPECIFICATION, DESCRIPTIVE DATA, TECHNICAL LITERATURE, PERFORMANCE CHARTS, CATALOG CUTS, INSTALLATION INSTRUCTIONS, AND SPARE PART RECOMMENDATIONS FOR EACH DIFFERENT ITEM OF THE EQUIPMENT SPECIFIED.
43. ELECTRICAL CONTRACTOR SHALL HAVE A MINIMUM OF 5 YEARS EXPERIENCE WORKING IN THE WATER/WASTEWATER INDUSTRY AND PROVIDE REFERENCES.

- (M) FUTURE MOTOR
- GROUND WELL
- GROUND ROD
- DISCONNECT SWITCH. SEE SINGLE LINE DIAGRAM FOR SIZE.
- LIGHTING PANEL. SURFACE MOUNTED.
- SWITCHBOARD, DISTRIBUTION PANEL OR MOTOR CONTROL CENTER
- (12) CONDUIT NUMBER 12. SEE CONDUIT AND WIRING SCHEDULE FOR SIZES AND QUANTITIES OF CONDUIT AND WIRES.
- +12" — INDICATES HEIGHT FROM FINISHED FLOOR OR GRADE TO CENTERLINE OF DEVICE.
- (1) — INDICATES TO REFER TO NOTE (1) ON DRAWING
- W.P. — WEATHERPROOF. PROVIDE GASKETS AS REQUIRED
- C.O. — CONDUIT ONLY
- FE-184 — INSTRUMENTATION DEVICE. SEE PROCESS AND INSTRUMENTATION DRAWINGS FOR DESCRIPTIONS.
- PULL BOX (SIZE AS REQUIRED)
- OUTPUT TERMINAL
- INPUT TERMINAL

NOTES: (ELECTRICAL SYMBOLS)

1. POWER TRANSFORMERS SHALL BE DRY TYPE 480-208Y/120 VOLTS, 3 PHASE 4 WIRE UNLESS OTHERWISE INDICATED.
2. CONTROL TRANSFORMER SHALL BE DRY TYPE 480-120 VOLTS 1 PHASE UNLESS OTHERWISE INDICATED. SEE CONTROL WIRING DIAGRAMS FOR USE OF 120 VOLT CONTROL CIRCUITS CONTROL TRANSFORMERS SHALL BE SIZED TO HANDLE THE LOADS OF ALL RELAYS, PILOT LIGHTS, ETC. CONNECTED THERE TO PLUS 50 VA EXTRA CAPAOWNER.
3. LOCATED IN OR ON MOTOR CONTROL CENTER UNLESS OTHERWISE INDICATED.

CONSTRUCTION NOTES

1. REMOVE ALL EXISTING CUSTOMER OWNED OVERHEAD ELECTRICAL AND POWER POLE AND DISPOSE OF PROPERLY. COORDINATE WITH OWNER FOR SCHEDULING.
2. REMOVE EXISTING SES AND PANEL AND DISPOSE OF PROPERLY. COORDINATE DISCONNECTION OF THE METER AND SECONDARY CONDUCTORS WITH APS
3. DE-ENERGIZE EXISTING LAB BUILDING UPON COMPLETION OF CONSTRUCTION OF THE NEW LAB. REMOVE ALL EXISTING CONDUCTORS AND ELECTRICAL EQUIPMENT AND DISPOSE OF PROPERLY. COORDINATE ALL WORK WITH OWNER AND POWER COMPANY PRIOR TO DE-ENERGIZATION.
4. COORDINATE WITH APS TO REPLACE THE EXISTING POLE MOUNTED SINGLE PHASE TRANSFORMER. APS TO INSTALL THREE PHASE TRANSFORMERS. CONTRACTOR SHALL VERIFY LOCATION OF NEW TRANSFORMER WITH APS. APS PLANS WILL DETERMINE EXACT LOCATION AND TAKE PRECEDENCE OVER THESE DRAWINGS. COORDINATE ALL WORK WITH APS.
5. APS SERVICE LINE. TRENCH AND INSTALL CONDUIT PER APS SPECIFICATIONS. POWER COMPANY PLANS WILL DETERMINE EXACT LOCATION OF CONDUIT AND TAKE PRECEDENCE OVER THESE DRAWINGS.
6. SES, 400 AMP, 277/480V, 3ø, 4W, SEE DETAIL 1 ON E4.1.
7. MINI-POWER ZONE AND PANELBOARD. SEE DETAIL 1 ON E4.1.
8. ATS 400A 277/480V, 3ø, 4W, SEE DETAIL 2 ON SHEET E4.1.
9. GENERATOR 125KW, 277/480V, 3ø, 4W, SEE DETAIL 1 ON E4.3.

11. PANELBOARD, 120/240V, 1ø, 3W, SEE DETAIL 2 ON E4.1.
12. DISTRIBUTION PANEL DSP-1 400A 277/480V, 3ø, 4W, SEE DETAIL 2 ON SHEET E4.1.
13. ELECTRICAL CONTRACTOR SHALL INSTALL POWER FEED TO MINI SPLIT AIR CONDITIONER AND HEAT PUMP & MAKE ALL 240V CONNECTIONS.
14. TANKLESS WATER HEATER & DISCONENCT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
15. GROUNDING ELECTRODE CONDUCTORS, GROUND ROD, AND INSPECTION WELL FOR ONLY THE FIRST GROUND ROD, PER SINGLE LINE DIAGRAMS AND DETAILS ON SHEET E4.6.
16. LIGHTNING PROTECTION SYSTEM, PER NFPA AND DETAIL 6 ON SHEET E4.6
17. CLASSIFIED SEAL OFF LISTED FOR CLASS 1 DIV 1. LOCATE WITHIN 10 FEET OF CLASSIFIED AREA BOUNDARY. PVC COATED RMS EYS TYPE OR EQUIVALENT. SEAL SHALL HAVE SEALING COMPOUND CHICO, OR EQUAL.
20. 20A HEADWORKS CONTROL PANEL, BY VENDOR CLASS 1 DIVISION 2 LISTED. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.
21. INFLUENT COARSE SCREEN MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
22. INFLUENT CONVEYOR MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
23. POTABLE SOLENOID VALVE AT HEADWORKS. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
24. ULTRASONIC LEVEL TRANSDUCER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
30. SBR PANEL BY VENDOR, ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
31. SBR INFLUENT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
32. SBR SUBMERSIBLE MIXER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
33. WAS TRANSFER PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
34. DECANT MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
35. SBR DECANT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
36. DO TRANSMITTER AND ANALYZER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
37. SUBMERSIBLE PRESSURE TRANSDUCER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
38. LEVEL FLOAT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
39. SBR MOTOR CONTROL PANEL, PROVIDE AND INSTALL. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
40. SBR EFFLUENT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
41. FLOW METER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
42. SBR AIR VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
50. VARIABLE FREQUENCY DRIVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
51. SBR AERATION BLOWER WITH INTEGRAL DISCONNECT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
52. DIGESTER AERATION BLOWER WITH INTEGRAL DISCONNECT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
53. PRESSURE TRANSDUCER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
54. TEMPERATURE TRANSDUCER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
60. 20A SLUDGE BAGGING SYSTEM CONTROL PANEL, BY VENDOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
61. POTABLE WATER VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
62. POLYMER METERING PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
63. DRY POLYMER MIXER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
64. DEWATERING FEED PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.
70. 30A DRYING BED LIFT PUMP CONTROL PANEL, 480V, 3ø, 4W. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.
71. DRYING BED LIFT PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.
72. LEVEL FLOAT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.
80. OVERFLOW LIFT PUMP CONTROL PANEL, BY VENDOR. 240V, 1ø, 3W. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.
81. OVERFLOW LIFT PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.
82. LEVEL FLOAT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.
90. JOINT TRENCH WITH WATER LINES. MAINTAIN 24-INCH SEPARATION. SEE DETAIL 3 ON SHEET E4.3.
91. STACKED #7 CONCRETE PULL BOX. INSTALL AS SHOWN OR AS NEEDED IF CONDUIT RUNS WILL EXCEED 360 DEGREE OF BENDS OR THE LENGTH EXCEEDS 400 FEET. INSTALL 1 FOR POWER AND 1 FOR CONTROL. SEE DETAIL 5 ON SHEET E4.3.
92. STANCHION MOUNTED NEMA 4X SST JUNCTION BOXES. MAINTAIN 3' CLEARANCE IN FRONT OF EQUIPMENT. EXTRA SLACK SHALL REMAIN IN THE J-BOX FOR FUTURE LEVEL ADJUSTMENT. SEE DETAIL 2 ON SHEET E4.2 AND DETAIL 1 ON SHEET E4.4.
93. TRAFFIC BOLLARD TO BE INSTALLED PER CIVIL PLANS. LOCATE OUT OF 4 FOOT WORKING SPACE ENVELOPE PER NEC.
94. NON-FUSED DISCONNECT, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2 & SEE DETAIL 1 ON SHEET E4.4.
95. ROTARY TYPE DISCONNECT, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2 & SEE DETAIL 1 ON SHEET E4.4.
96. E-STOP, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2.
97. 20A 120V GFCI DUPLEX RECEPTACLE WITH METAL WEATHERPROOF WHILE-IN-USE AND LOCKABLE COVER INSTALLED PER DETAIL 1 ON SHEET E4.2.
98. 20A 120V GFCI DUPLEX RECEPTACLE WITH METAL WEATHERPROOF WHILE-IN-USE AND LOCKABLE COVER INSTALLED ONTO LIGHT POLE. SEE DETAIL 2 ON SHEET E4.5.
99. CLASSIFIED AREA VERIFY BOUNDARY WITH THE NFPA. INSTALL ANY PANELS, DISCONNECTS, SPLICES, ARC MAKING EQUIPMENT OUT OF THE BOUNDARY, WHERE NOT POSSIBLE THEN INSTALL CLASS 1 DIV 1 LISTED EQUIPMENT. ALL CONDUIT WITHIN BOUNDARY SHALL BE CLASS 1 DIV 1 OR 2 RATED AS REQUIRED BY THE BOUNDARY. USE PVC COATED THREADED RMC CONDUIT, INSTALL STAINLESS STEEL 316 ENCLOSURES, HARDWARE AND EQUIPMENT WITHIN 10 FEET OF THE BOUNDARY. INSTALL CLASSIFIED SEAL OFFS WITHIN 10 FEET OF THE BOUNDARY, AT A PANEL OR JUNCTION BOX IS PREFERRED.

CONSTRUCTION NOTES

(12) DISTRIBUTION PANEL DSP-1 400A 277/480V, 3ø, 4W, SEE DETAIL 2 ON SHEET E4.1.

(17) CLASSIFIED SEAL OFF LISTED FOR CLASS 1 DIV 1. LOCATE WITHIN 10 FEET OF CLASSIFIED AREA BOUNDARY. PVC COATED RMS EYS TYPE OR EQUIVALENT. SEAL SHALL HAVE SEALING COMPOUND CHICO, OR EQUAL.

(20) 20A HEADWORKS CONTROL PANEL, BY VENDOR CLASS 1 DIVISION 2 LISTED. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.

(21) INFLUENT COARSE SCREEN MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(22) INFLUENT CONVEYOR MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(30) SBR PANEL BY VENDOR, ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(31) SBR INFLUENT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(32) SBR SUBMERSIBLE MIXER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(33) WAS TRANSFER PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(34) DECANT MOTOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(35) SBR DECANT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(39) SBR MOTOR CONTROL PANEL, PROVIDE AND INSTALL. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(40) SBR EFFLUENT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(42) SBR AIR VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(50) VARIABLE FREQUENCY DRIVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(51) SBR AERATION BLOWER WITH INTEGRAL DISCONNECT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(52) DIGESTER AERATION BLOWER WITH INTEGRAL DISCONNECT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(60) 20A SLUDGE BAGGING SYSTEM CONTROL PANEL, BY VENDOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(61) POTABLE WATER VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(62) POLYMER METERING PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(63) DRY POLYMER MIXER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(64) DEWATERING FEED PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.

(70) 30A DRYING BED LIFT PUMP CONTROL PANEL, 480V, 3ø, 4W. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.

(71) DRYING BED LIFT PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.

(94) NON-FUSED DISCONNECT, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2 & SEE DETAIL 1 ON SHEET E4.4.

(95) ROTARY TYPE DISCONNECT, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2 & SEE DETAIL 1 ON SHEET E4.4.

(99) CLASSIFIED AREA VERIFY BOUNDARY WITH THE NFPA. INSTALL ANY PANELS, DISCONNECTS, SPLICES, ARC MAKING EQUIPMENT OUT OF THE BOUNDARY, WHERE NOT POSSIBLE THEN INSTALL CLASS 1 DIV 1 LISTED EQUIPMENT. ALL CONDUIT WITHIN BOUNDARY SHALL BE CLASS 1 DIV 1 OR 2 RATED AS REQUIRED BY THE BOUNDARY. USE PVC COATED THREADED RMC CONDUIT, INSTALL STAINLESS STEEL 316 ENCLOSURES, HARDWARE AND EQUIPMENT WITHIN 10 FEET OF THE BOUNDARY. INSTALL CLASSIFIED SEAL OFFS WITHIN 10 FEET OF THE BOUNDARY, AT A PANEL OR JUNCTION BOX IS PREFERRED.

CONSTRUCTION NOTES

1. REMOVE ALL EXISTING CUSTOMER OWNED OVERHEAD ELECTRICAL AND POWER POLE AND DISPOSE OF PROPERLY. COORDINATE WITH OWNER FOR SCHEDULING.
2. REMOVE EXISTING SES AND PANEL AND DISPOSE OF PROPERLY. COORDINATE DISCONNECTION OF THE METER AND SECONDARY CONDUCTORS WITH APS
3. DE-ENERGIZE EXISTING LAB BUILDING UPON COMPLETION OF CONSTRUCTION OF THE NEW LAB. REMOVE ALL EXISTING CONDUCTORS AND ELECTRICAL EQUIPMENT AND DISPOSE OF PROPERLY. COORDINATE ALL WORK WITH OWNER AND POWER COMPANY PRIOR TO DE-ENERGIZATION.
4. COORDINATE WITH APS TO REPLACE THE EXISTING POLE MOUNTED SINGLE PHASE TRANSFORMER. APS TO INSTALL THREE PHASE TRANSFORMERS. CONTRACTOR SHALL VERIFY LOCATION OF NEW TRANSFORMER WITH APS. APS PLANS WILL DETERMINE EXACT LOCATION AND TAKE PRECEDENCE OVER THESE DRAWINGS. COORDINATE ALL WORK WITH APS.
5. APS SERVICE LINE. TRENCH AND INSTALL CONDUIT PER APS SPECIFICATIONS. POWER COMPANY PLANS WILL DETERMINE EXACT LOCATION OF CONDUIT AND TAKE PRECEDENCE OVER THESE DRAWINGS.
6. SES, 400 AMP, 277/480V, 3ø, 4W, SEE DETAIL 1 ON E4.1.
7. MINI-POWER ZONE AND PANELBOARD. SEE DETAIL 1 ON E4.1.
8. ATS 400A 277/480V, 3ø, 4W, SEE DETAIL 2 ON SHEET E4.1.
9. GENERATOR 125KW, 277/480V, 3ø, 4W, SEE DETAIL 1 ON E4.3.
70. 30A DRYING BED LIFT PUMP CONTROL PANEL, 480V, 3ø, 4W. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.
80. OVERFLOW LIFT PUMP CONTROL PANEL, BY VENDOR. 240V, 1ø, 3W. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.
90. JOINT TRENCH WITH WATER LINES. MAINTAIN 24-INCH SEPARATION. SEE DETAIL 3 ON SHEET E4.3.
91. STACKED #7 CONCRETE PULL BOX. INSTALL AS SHOWN OR AS NEEDED IF CONDUIT RUNS WILL EXCEED 360 DEGREE OF BENDS OR THE LENGTH EXCEEDS 400 FEET. INSTALL 1 FOR POWER AND 1 FOR CONTROL. SEE DETAIL 5 ON SHEET E4.3.

ELECTRICAL SITE - DEWATERING & CHLORINE CONTACT

CONSTRUCTION NOTES

(15) GROUNDING ELECTRODE CONDUCTORS, GROUND ROD, AND INSPECTION WELL FOR ONLY THE FIRST GROUND ROD, PER SINGLE LINE DIAGRAMS AND DETAILS ON SHEET E4.6.

(16) LIGHTNING PROTECTION SYSTEM, PER NFPA AND DETAIL 6 ON SHEET E4.6

(40) SBR EFFLUENT VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(41) FLOW METER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(60) 20A SLUDGE BAGGING SYSTEM CONTROL PANEL, BY VENDOR. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(61) POTABLE WATER VALVE. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(62) POLYMER METERING PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(63) DRY POLYMER MIXER. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(64) DEWATERING FEED PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS.

(91) STACKED #7 CONCRETE PULL BOX. INSTALL AS SHOWN OR AS NEEDED IF CONDUIT RUNS WILL EXCEED 360 DEGREE OF BENDS OR THE LENGTH EXCEEDS 400 FEET. INSTALL 1 FOR POWER AND 1 FOR CONTROL. SEE DETAIL 5 ON SHEET E4.3.

(95) ROTARY TYPE DISCONNECT, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2 & SEE DETAIL 1 ON SHEET E4.4.

(96) E-STOP, NEMA 4X FOR OUTDOOR AND CLASS 1 DIV 1 WITHIN CLASSIFIED BOUNDARY. IF LOCATION IS ABOVE BOUNDARY, NEMA 4X WITH CLASSIFIED SEAL OFFS IS ACCEPTABLE. PROVIDE PERMANENT LABEL SUITABLE FOR CORROSIVE ENVIRONMENTS AND UV RESISTANT. MATCH LABEL NAMING CONVENTION WITH P&ID. SEE DETAIL 5 ON SHEET E4.2.

DRYING BED LIFT STATION ELECTRICAL

CONSTRUCTION NOTES

(15) GROUNDING ELECTRODE CONDUCTORS, GROUND ROD, AND INSPECTION WELL FOR ONLY THE FIRST GROUND ROD. PER SINGLE LINE DIAGRAMS AND DETAILS ON SHEET E4.6.

(70) 30A DRYING BED LIFT PUMP CONTROL PANEL, 480V, 3ø, 4W. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 1 ON SHEET E4.4.

(71) DRYING BED LIFT PUMP. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.

(72) LEVEL FLOAT. ELECTRICAL CONTRACTOR SHALL MAKE ALL POWER AND CONTROL CONNECTIONS PER THESE PLANS AND SPECIFICATIONS AND THE MANUFACTURERS REQUIREMENTS. SEE DETAIL 4 ON SHEET E4.5.

(90) JOINT TRENCH WITH WATER LINES. MAINTAIN 24-INCH SEPARATION. SEE DETAIL 3 ON SHEET E4.3.

(98) 20A 120V GFCI DUPLEX RECEPTACLE WITH METAL WEATHERPROOF WHILE-IN-USE AND LOCKABLE COVER INSTALLED ONTO LIGHT POLE. SEE DETAIL 2 ON SHEET E4.5.

(99) CLASSIFIED AREA VERIFY BOUNDARY WITH THE NFPA. INSTALL ANY PANELS, DISCONNECTS, SPLICES, ARC MAKING EQUIPMENT OUT OF THE BOUNDARY, WHERE NOT POSSIBLE THEN INSTALL CLASS 1 DIV 1 LISTED EQUIPMENT. ALL CONDUIT WITHIN BOUNDARY SHALL BE CLASS 1 DIV 1 OR 2 RATED AS REQUIRED BY THE BOUNDARY. USE PVC COATED THREADED RMC CONDUIT, INSTALL STAINLESS STEEL 316 ENCLOSURES, HARDWARE AND EQUIPMENT WITHIN 10 FEET OF THE BOUNDARY. INSTALL CLASSIFIED SEAL OFFS WITHIN 10 FEET OF THE BOUNDARY, AT A PANEL OR JUNCTION BOX IS PREFERRED.

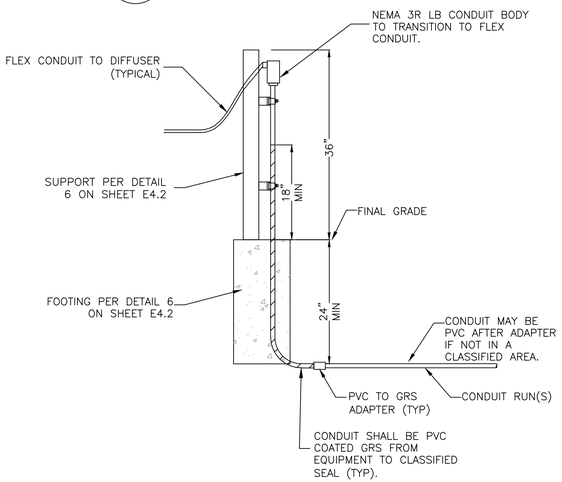
SHEET E4.1
84 OF 99 SHEETS

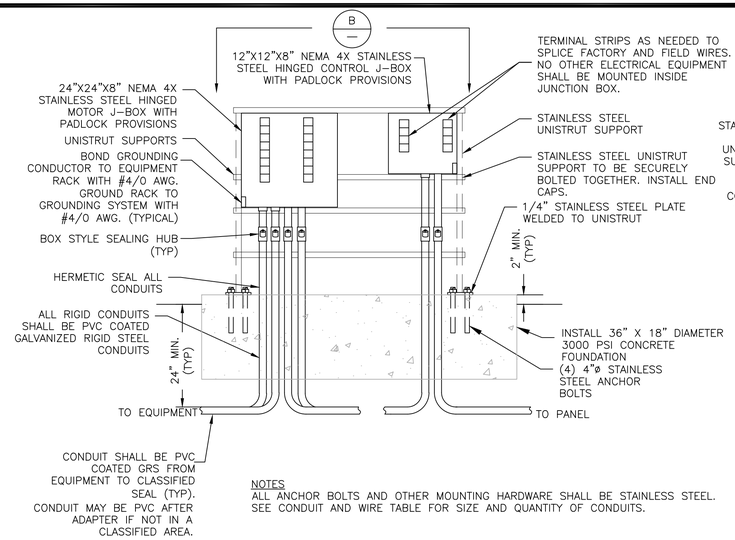
JOB NO. B614

1 RECEPTACLE PEDESTAL DETAIL



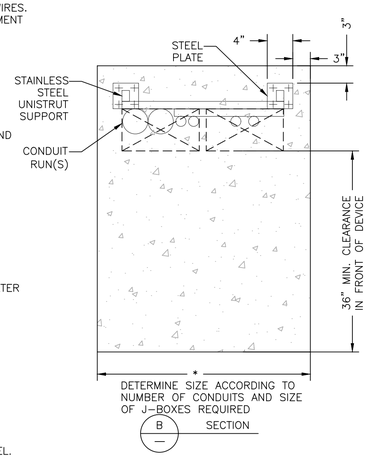
NO SCALE

NOTES:
1. ALL DIMENSIONS SHOWN ARE MINIMUM.
2. PROVIDE 6 INCH COVER OF CONCRETE WITHIN 2 FEET OF ALL DRIVABLE AREAS PER DETAILS AND PLAN.
3. CONDUITS THROUGH CLASSIFIED AREA SHALL BE PVC COATED RGS UNDERGROUND



2 TYPICAL CONDUIT STUB UP DETAIL

NO SCALE



3 CONDUIT TO EQUIPMENT SUPPORT DETAIL

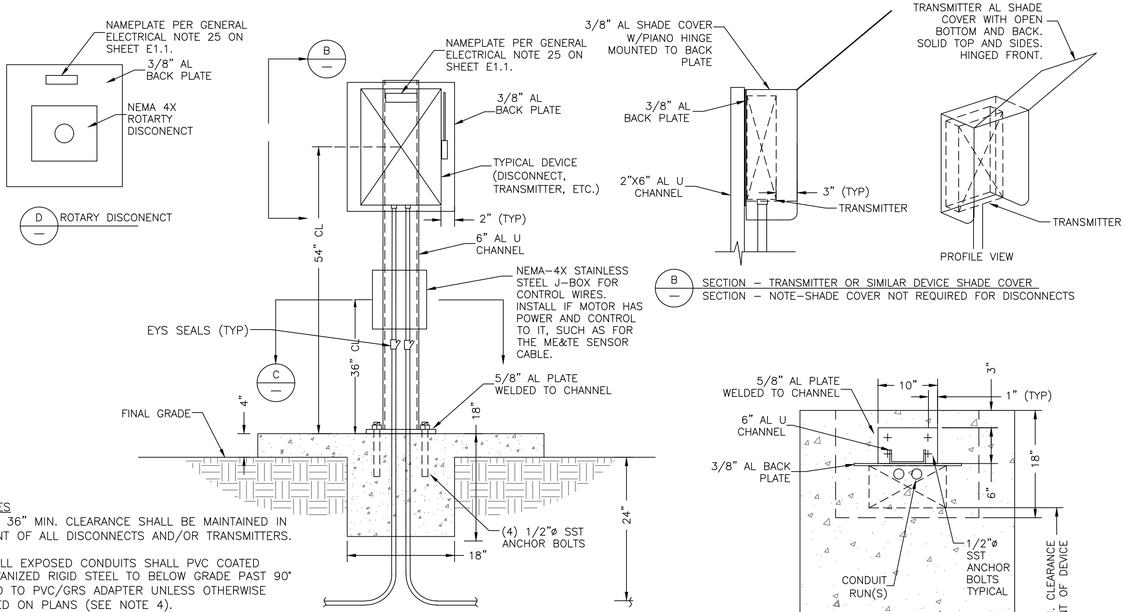
NO SCALE

NOTES
ALL ANCHOR BOLTS AND OTHER MOUNTING HARDWARE SHALL BE STAINLESS STEEL.
SEE CONDUIT AND WIRE TABLE FOR SIZE AND QUANTITY OF CONDUITS.

NOTES:
1) A 36" MIN. CLEARANCE SHALL BE MAINTAINED IN FRONT OF ALL ELECTRICAL DEVICES.

2) ALL EXPOSED CONDUITS SHALL BE GALVANIZED RIGID STEEL TO BELOW GRADE PAST 90° BEND TO PVC/GRS ADAPTER UNLESS OTHERWISE NOTED ON PLANS. WRAP PER GENERAL NOTE 11 ON SHEET E1.1.

3) ALL JUNCTION BOXES SHALL BE NEMA-4X STAINLESS STEEL UNLESS OTHERWISE NOTED ON PLANS.



4) ALL BARE STEEL COMPONENTS SHALL BE PRIMED AND PAINTED TAN TO MATCH SURROUNDING EQUIPMENT.

5) SEE RESPECTIVE SITE PLAN FOR CONDUIT SIZE AND QUANTITY DESIGNATIONS.

6)CONTRACTOR SHALL MAINTAIN AN 18" AIR GAP FOR CONDUIT RUN COMING FROM WET WELL. AIR GAP SHALL BE LOCATED AT THE JUNCTION BOX. CONTRACTOR SHALL INSTALL HERMETIC SEALS AT THE END OF THE THE CONDUIT RUNS INTO VAULT WALL TO PREVENT MOISTURE FROM ENTERING CONDUIT. CONDUIT SHALL BE CONTINUOUS GRS FROM WET WELL TO AIR GAP.

4 STANCHION MOUNTED JUNCTION BOX

NO SCALE

NOTES
1) A 36" MIN. CLEARANCE SHALL BE MAINTAINED IN FRONT OF ALL DISCONNECTS AND/OR TRANSMITTERS.

2) ALL EXPOSED CONDUITS SHALL PVC COATED GALVANIZED RIGID STEEL TO BELOW GRADE PAST 90° BEND TO PVC/GRS ADAPTER UNLESS OTHERWISE NOTED ON PLANS (SEE NOTE 4).

3) ALL DISCONNECTS SHALL BE NEMA-4X STAINLESS STEEL UNLESS OTHERWISE NOTED ON PLANS.

4)CONTRACTOR SHALL MAINTAIN 18" AIR GAP ON CONDUIT RUN COMING FROM WET WELL. AIR GAP SHALL BE LOCATED AT THE JUNCTION BOX. AIR GAP SHALL CONFORM TO THE NATIONAL ELECTRICAL CODE FOR CLASS 1, DIVISION 1 HAZARDOUS AREA. CONTRACTOR SHALL INSTALL HERMETIC SEALS AT THE END OF THE THE CONDUIT RUNS INTO VAULT WALL TO PREVENT MOISTURE FROM ENTERING CONDUIT. CONDUIT SHALL BE CONTINUOUS GRS FROM WET WELL TO 18" AIR GAP.

SPLICES INSIDE PULL BOX

DETAIL NOTES:

1. THE PULL BOX SHALL BE MADE OF A HIGH DENSITY REINFORCED CONCRETE MATERIAL WITH END & SIDE KNOCKOUTS, & NON-SETTLING SHOULDERS TO MAINTAIN GRADE, MANUFACTURED WITH APPROXIMATE DIMENSIONS AS SHOWN.
2. STEEL REINFORCEMENT SHALL BE AS REGULARLY USED IN STANDARD PRODUCTS OF THE RESPECTIVE MANUFACTURER.
3. COVER LETTERING SHALL BE 1" LETTERS CAST IN STANDARD MARKINGS: "ELECTRIC" OR "HIGH VOLTAGE" OR "COMMUNICATIONS". AS REQUIRED.
4. THE PULL BOX SHALL HAVE AN ETCHED POLYETHYLENE FACE WITH AN ULTRAVIOLET INHIBITOR ANCHORED IN CONCRETE.
5. ALL CABLE & CONDUCTOR SPLICES MADE USING CU/AL LISTED, MECHANICAL LUG OR BOLTED CONNECTOR OR COMPRESSION CONNECTOR, (TYCO ELECTRONICS, NSI INDUSTRIES, ILSCO OR APPROVED EQUAL). CONNECTION TO BE INSULATED & MADE WATER RESISTANT WITH TYCO ELECTRONICS GELCAP-SL, NSI INDUSTRIES ESSLK-2/0 OR 3M SCOTCHCAST SPLICE KIT 85 SERIES.

JOB NO. B614

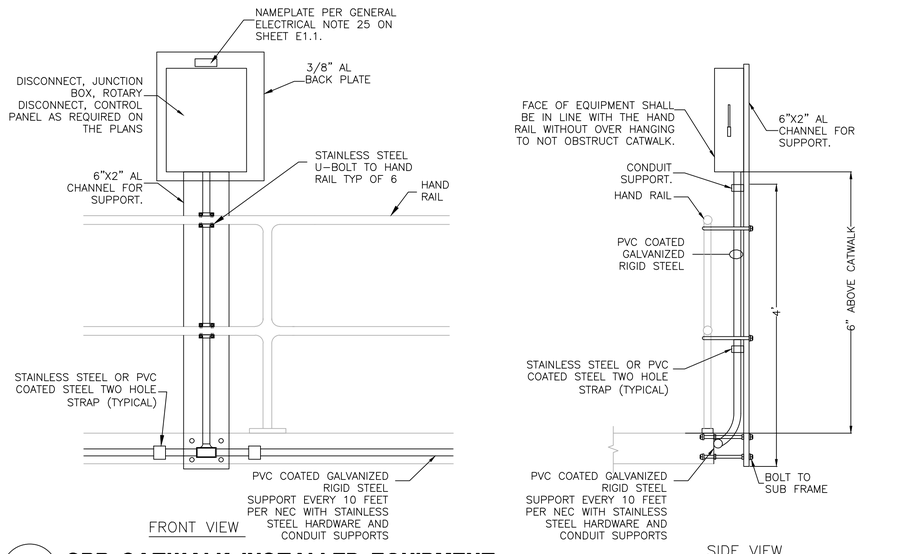
NOTES:

1) PROVIDE 18" AIR GAP WHEN CONDUITS ENTER CLASSIFIED AREAS.



2) SEE SITE PLAN FOR QUANTITY OF CONDUITS.

3) PROVIDE (2) 1.5" SPARE CONDUITS, EXTEND 5' AND CAP, WITH DETECTABLE PULL ROPE.

4) 18" AIR GAP SHALL CONFORM TO THE NATIONAL ELECTRICAL CODE FOR CLASS 1, DIVISION 1 HAZARDOUS AREA. CONTRACTOR SHALL INSTALL HERMETIC SEALS AT THE END OF THE THE CONDUIT RUNS INTO VAULT WALL TO PREVENT MOISTURE FROM ENTERING CONDUIT. CONDUIT SHALL BE CONTINUOUS GRS WRAPPED OR PVC COATED FROM WET WELL TO AIR GAP.

NOTES:
(1) CLASSIFIED AREAS DEFINED BY 2012 NFPA 820 TABLE 4.2 ROW 11. ALSO REFER TO ANNEX A FIGURE A-4-2(C)

(2) EXPOSED CONDUITS WITHIN CLASSIFIED BOUNDARY AS DEFINED HERE IN SHALL BE PVC COATED GRS.

(3) WET WELL AREA SHALL BE LISTED AS CLASS 1 DIVISION 1, UNLESS IT IS CONTINUOUSLY VENTILATED AT 12 AIR CHANGES PER HOUR AS DEFINED BY 2012 NFPA 820 TABLE 4.2 ROW 11.

(4)CONTRACTOR SHALL INSTALL EYS SEAL ON CONDUIT RUN COMING FROM WET WELL. SEAL SHALL BE LOCATED AT THE LIFT STATION CONTROL PANEL. SEAL OFF SHALL CONFORM TO THE NATIONAL ELECTRICAL CODE FOR CLASS 1, DIVISION 1 HAZARDOUS AREA. CONTRACTOR SHALL INSTALL HERMETIC SEALS AT THE END OF THE THE CONDUIT RUNS INTO VAULT WALL TO PREVENT MOISTURE FROM ENTERING CONDUIT. CONDUIT SHALL BE CONTINUOUS GRS FROM WET WELL TO EYS SEAL OFF.

BID FORM FOR CONSTRUCTION CONTRACT
ADDENDUM 2 VERSION

Contractor Name: _____

The terms used in this Bid with initial capital letters have the meanings stated in the Instructions to Bidders, the General Conditions, and the Supplementary Conditions.

ARTICLE 1—OWNER AND BIDDER

1.01 This Bid is submitted to:

Town of Jerome
Submitted electronically via email to tpierce@pacewater.com. Alternatively, Bidder may submit a hard copy the Town of Jerome, 600 Clark Street, Jerome, AZ 86331.

The undersigned Bidder proposes and agrees, if this Bid is accepted, to enter into an Agreement with Owner in the form included in the Bidding Documents to perform all Work as specified or indicated in the Bidding Documents for the prices and within the times indicated in this Bid and in accordance with the other terms and conditions of the Bidding Documents.

ARTICLE 2—ATTACHMENTS TO THIS BID

2.01 The following documents are submitted with and made a condition of this Bid:

A. Required Bid security;

B. List of Proposed Subcontractors;

~~C. List of Proposed Suppliers;~~

D. Evidence of authority to do business in the state of the Project; or a written covenant to obtain such authority within the time for acceptance of Bids;

E. Contractor's license number as evidence of Bidder's State Contractor's License or a covenant by Bidder to obtain said license within the time for acceptance of Bids;

F. Required Bidder Qualification Statement with supporting data; ~~and~~

G. If Bid amount exceeds $10,000, signed Compliance Statement (RD 400-6). Refer to specific equal opportunity requirements set forth in the Supplementary Conditions of the Construction Contract (EJCDC C-800);

H. If Bid amount exceeds $25,000, signed Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions (AD-1048);

I. If Bid amount exceeds $100,000, signed RD Instruction 1940-Q Exhibit A-1, Certification for Contracts, Grants, and Loans.

ARTICLE 3—BASIS OF BID—LUMP SUM BID AND UNIT PRICES

3.01 *Lump Sum Bids*

A. Bidder will complete the Work in accordance with the Contract Documents for the following lump sum (stipulated) price(s), together with any Unit Prices indicated in Paragraph 3.02:

	TOTAL ALLOWANCE PRICE	$

ARTICLE 4—DELETED

ARTICLE 5—DELETED

ARTICLE 6—TIME OF COMPLETION

6.01 Bidder agrees that the Work will be substantially complete and will be completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions on or before the dates or within the number of calendar days indicated in the Agreement.

6.02 **[Deleted]**

6.03 **[Deleted]**

6.04 Bidder accepts the provisions of the Agreement as to liquidated damages.

ARTICLE 7—BIDDER'S ACKNOWLEDGEMENTS: ACCEPTANCE PERIOD, INSTRUCTIONS, AND RECEIPT OF ADDENDA

7.01 *Bid Acceptance Period*

A. This Bid will remain subject to acceptance for 60 days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Owner.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

7.02 *Instructions to Bidders*

A. Bidder accepts all of the terms and conditions of the Instructions to Bidders, including without limitation those dealing with the disposition of Bid security.

7.03 *Receipt of Addenda*

A. Bidder hereby acknowledges receipt of the following Addenda:

Addendum Number	Addendum Date

7.04 **[Deleted]**

ARTICLE 8—BIDDER'S REPRESENTATIONS AND CERTIFICATIONS

8.01 *Bidder's Representations*

A. In submitting this Bid, Bidder represents the following:

1. Bidder has examined and carefully studied the Bidding Documents, including Addenda.

2. **[Deleted]**

3. Bidder is familiar with all Laws and Regulations that may affect cost, progress, and performance of the Work**, including all American Iron and Steel requirements.**

4. Bidder has carefully studied the reports of explorations and tests of subsurface conditions at or adjacent to the Site and the drawings of physical conditions relating to existing surface or subsurface structures at the Site that have been identified in the Supplementary Conditions, with respect to the Technical Data in such reports and drawings.

5. Bidder has carefully studied the reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that have been identified in the Supplementary Conditions, with respect to Technical Data in such reports and drawings.

6. Bidder has considered the information known to Bidder itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Bidding Documents; and the Technical Data identified in the Supplementary Conditions or by definition, with respect to the effect of such information, observations, and Technical Data on (a) the cost, progress, and performance of the Work; (b) the means, methods, techniques, sequences, and procedures of construction to be employed by Bidder, if selected as Contractor; and (c) Bidder's (Contractor's) safety precautions and programs.

7. Based on the information and observations referred to in the preceding paragraph, Bidder agrees that no further examinations, investigations, explorations, tests, studies,

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

or data are necessary for the performance of the Work at the Contract Price, within the Contract Times, and in accordance with the other terms and conditions of the Contract.

8. Bidder is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Bidding Documents.

9. Bidder has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Bidder has discovered in the Bidding Documents, and of discrepancies between Site conditions and the Contract Documents, and the written resolution thereof by Engineer is acceptable to Contractor.

10. The Bidding Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performance and furnishing of the Work.

11. The submission of this Bid constitutes an incontrovertible representation by Bidder that without exception the Bid and all prices in the Bid are premised upon performing and furnishing the Work required by the Bidding Documents.

8.02 *Bidder's Certifications*

A. The Bidder certifies the following:

1. This Bid is genuine and not made in the interest of or on behalf of any undisclosed individual or entity and is not submitted in conformity with any collusive agreement or rules of any group, association, organization, or corporation.

2. Bidder has not directly or indirectly induced or solicited any other Bidder to submit a false or sham Bid.

3. Bidder has not solicited or induced any individual or entity to refrain from bidding.

4. Bidder has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for the Contract. For the purposes of this Paragraph 8.02.A:

a. Corrupt practice means the offering, giving, receiving, or soliciting of anything of value likely to influence the action of a public official in the bidding process.

b. Fraudulent practice means an intentional misrepresentation of facts made (a) to influence the bidding process to the detriment of Owner, (b) to establish bid prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition.

c. Collusive practice means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish bid prices at artificial, non-competitive levels.

d. Coercive practice means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the execution of the Contract.

Jerome Wastewater Treatment Plant Improvements

ADDENDUM #3

Date: May 20, 2026

Quest CDN #9117808

This addendum is to formally issue responses to bidder questions and minor modifications. Reminder: Acknowledge receipt of this addendum on the Bid Form.

Attachments:

1. Attachment 1 – Pre-Bid Meeting Sign-In Sheet
2. Attachment 2 – Property Boundary Survey Map
3. Attachment 3 – USDA-RD Letter of Conditions
4. Attachment 4 – Douglas Rd Easement Exhibit

Questions

1. Do prevailing wages apply to this project?

   Response: *Prevailing wages do not apply to this project.*

2. Will there be any coatings on the concrete basins?

   Response: *Coatings are not required in the proposed treatment basins.*

3. Will the Town pay for stored material?

   Response: *Yes, the pay application form that will be used accounts for and allows payment/tracking of stored materials.*

4. What is the engineer's cost estimate?

   Response: *The engineer's cost estimate, which was compiled in 2019, is approximately $6M. The USDA-RD Letter of Conditions is **attached** and includes the total funding amount the Town was awarded by USDA-RD.*

5. When is the anticipated notice to proceed?

   Response: *The NTP is expected within 30 days of Town Council's contract award decision, contingent on USDA-RD concurrence.*

6. The Geotech Report mentions a slurry fill is required in certain backfilled areas, is that included in the project scope? Similarly, is compacted AB required under the slabs as noted in the Geotech Report?

   Response: *Subgrade prep for slabs-on-grade will conform to the requirements of the Geotech Report, which specifies 1ft compacted engineered fill beneath slabs on grade. Slurry fill is not required by the Geotech Report but is called for in the structural sheets and shall be placed where shown.*

7. Is HDPE an acceptable alternative to FPVC for the proposed sewer? If acceptable, please specify a DR rating for the alternate material.

   Response: *DR21 HDPE may be considered as an equal to FPVC provided the Contractor submits an alternative design in accordance with MAG Section 738 demonstrating equivalent hydraulic capacity and proper structural/installation design. Pipe shall be fusion-welded only, with appropriate restraint at manholes and transitions. Design shall account for thermal expansion and contraction as well. FPVC remains the basis of design until HDPE substitution is formally reviewed and accepted.*

8. Are there any other areas designated for fill material?

   Response: *Proposed disposal location for excess material is as shown on the construction plans. The contractor may coordinate with the Town to locate additional disposal areas on the WWTP site or within Town. Neighboring property owner, Verde Ex has previously expressed an interest in excess material; the contractor may also negotiate the disposal of said material directly with Verde Ex, the Jerome State Historic Park or any other nearby landowners.*

9. Is it possible to perform a site walk at a later date?

   Response: *Additional site walks may be performed at a later time. Please coordinate with the Town Public Works Director, Marty Boland at (520) 904-5272.*

10. Can the gravity sewer main be accessed from any location other than the WWTP, as shown on the plans?

    Response: *Yes, the gravity sewer main can also be accessed from Douglas Road. The Town has acquired an easement for this area, which may be used by the Contractor as needed. The limits of the easement are shown in Attachment 5. Work shall terminate at the wash crossing. The Contractor may not cross beyond the easement boundary, modify the existing crossing in any way, nor impact the existing drainage pattern without prior review and approval from Yavapai County.*

11. Please relocate the junction boxes to be near their individual pieces of equipment. Each piece of equipment has a limited length of cable. The arrangement shown will require specialized cable lengths, which would change depending on how conduit is run, not allowing us to be able to estimate the length needed. As well, we have found that operators prefer to have the disconnect near the piece of equipment.

    Response: *The junction boxes can be field re-located during construction to be placed near their respective pieces of equipment. Please use standard cable lengths for estimating purposes.*

April 8, 2022

Town of Jerome, Arizona
600 Clark Street (PO Box 335)
Jerome, AZ 86331

SUBJECT: Letter of Conditions
Recipient Name: Town of Jerome, Arizona

Project Name: Sewer Rehab SEARCH 2020
CFDA NUMBER – 10.760

RUS Loan (SECD):	$1,819,000.00
RUS Grant (SECD)	$4,830,000.00
SEARCH Grant:	$30,000.00 (previously funded)

Dear Ms. Gallagher:

This letter establishes conditions which must be understood and agreed to by you before further consideration may be given to your application. The loan and/or grant will be administered on behalf of the Rural Utilities Service (RUS) by the State and Area staff of USDA Rural Development (RD), both of which are referred to throughout this letter as the Agency. Any changes in project cost, source of funds, scope of project, or any other significant changes in the project or applicant must be reported to and concurred with by the Agency by written amendment to this letter. This includes any significant changes in the Applicant's financial condition, operation, organizational structure or executive leadership. Any changes made without Agency concurrence shall be cause for discontinuing processing of the application.

This letter does not constitute loan and/or grant approval, nor does it ensure that funds are or will be available for the project. The funding is being processed on the basis of a loan not to exceed $1,819,000.00 and/or a grant not to exceed $4,830,000.00. The loan and/or grant will be considered approved on the date Form RD 1940-1, "Request for Obligation of Funds" is signed by the Agency approval official.

The applicant will ensure projects are completed in a timely, efficient, and economical manner. You must meet all conditions set forth under Section III – Requirements Prior to Advertising for Bids within 1 year of this letter.

If you do not meet the conditions of this letter, the Agency reserves the right to withdraw Agency funding.

If you agree to meet the conditions set forth in this letter and desire further consideration be given to your application, please complete and return the following forms within 14 days:

Form RD 1942-46, "Letter of Intent to Meet Conditions"

USDA is an equal opportunity provider, employer and lender.

Form RD 1940-1, "Request for Obligation of Funds"

All parties may access information and regulations referenced in this letter at our website located at https://www.rd.usda.gov/programs-services/water-environmental-programs/water-waste-disposal-loan-grant-program.

The conditions are as follows:

SECTION I - PROJECT SCOPE

1. Project Description – Funds will be used to design, purchase, and install necessary equipment and components to address high ammonia and copper levels in the area along with line improvements to the aging wastewater system. This project is addressing the Arizona Department of Environmental Quality (ADEQ) consent order to meet compliance.

Facilities will be designed and constructed in accordance with sound engineering practices and must meet the requirements of Federal, State, and local agencies. The proposed facility design must be based on the Preliminary Engineering Report (PER), prepared by PACE dated/amended December 2021, as concurred with by the Agency.

2. Project Funding – The Agency is offering the following funding for your project:

RUS Loan (SECD)-	$ 1,819,000.00
RUS Grant -	$ 4,830,000.00
SEARCH Grant -	$30,000.00 (previously funded)
Other Funding -	$ -0-

TOTAL PROJECT COST - $ 6,679,000.00

Any changes in funding sources following obligation of Agency funds must be reported to the processing official. Prior to loan closing, any increase in non-Agency funding will be applied first as a reduction to Agency grant funds, up to the total amount of the grant, and then as a reduction to Agency loan funds.

The applicant must certify that they have exhausted all other funding avenues and have no pending funding considerations from any other sources. Further, the applicant must certify that they do not intend to apply anywhere else for funding for this project. If, after obligation of Agency funds, other funding becomes available, the Agency reserves the right to deobligate any and all funding for this project and to re-underwrite. This may result in the offering of a different funding package to for this project.

Prior to advertisement for construction bids, you must provide evidence of applicant contributions and other funding sources. This evidence should include a copy of the commitment letter. Agency funds will not be used to pre-finance funds committed to the project from other sources.

3. Project Budget – Funding from all sources has been budgeted for the estimated expenditures as follows:

Project Costs:	**Total Budgeted:**
Development/Construction	
Access Road	$778,553
10" Sewer Line Improv.	$925,000
Treatment Plant Site	$558,500
Concrete Tanks	$142,500
General Conditions	$806,306
Equipment	$1,435,000
Contingency	$383,893
Engineering Fees	
Includes:	
Pre-Development (PER/ER)	$30,000
Study & Report Phase	$69,020
Design Phase	$646,500
Permitting & Fees	$89,000
Bid Services	$45,000
Engineering Const. Services	$501,000
Post Construction Services	$5,000
Contingency (Non-Construction)	$67,776
Interest/Fees – Const. Loan	$167,452
Interest/Fees – Bridge Loan	$28,500
TOTAL	$6,679,000

Project feasibility and funding will be reassessed if there is a significant change in project costs after bids are received. Obligated loan and/or grant funds not needed to complete the proposed project will be deobligated. Any reduction will be applied to Agency grant funds first. If actual project costs exceed the project cost estimates, an additional contribution by the Owner may be necessary. An "Amended Letter of Conditions" will be issued for any changes to the total project budget.

4. Project Timeline – To ensure that the project proceeds in a timely manner, key processing milestones have been established in accordance with the PER or other Agency approved documentation. **Projects should be completed and Agency funds fully disbursed within three years of obligation.** By agreeing to the terms herein, you agree to comply with the milestones identified below. If, for any reason, one or more of the milestones cannot be met, you must notify the Agency in writing at least 30 days prior to the referenced date. Should your final completion date become more than three years after obligation the written request will follow the procedures outlined in Section VI of this letter, including the submission of not less than 90 days prior to the benchmark. The correspondence must contain a valid explanation as to why the milestone cannot be met and include a proposed revised project completion schedule. If the Agency agrees to the modification, a written confirmation will be issued. The Agency reserves the right to de-obligate loan and/or grant funds, or take other appropriate action, if the established or amended deadlines are not met.

Milestone	Date
Design Phase	09/07/2022
Bid Process and Permitting	12/30/2022
Start Construction Period	01/16/2023
Substantial Completion	12/29/2023
Final Completion	06/12/2024

SECTION II – RATES & TERMS

5. Interest Rates and Loan Terms – The interest rate will be the lower of the rate in effect at the time of loan approval or the time of loan closing, unless you request otherwise. Should the interest rate be reduced, the payment will be recalculated to the lower amount. The payment due date will be established as the day that the loan closes.

Your loan will be scheduled for repayment over a period of 40 years. Payments will be equal monthly amortized installments, beginning one month after closing. For planning purposes, use a 1.25% interest which provides for a monthly payment of $4,821.00. The precise payment amount will be based on the interest rate at which the loan is closed and may be different than the one above.

6. Security – The loan will be secured by a General Obligation, Revenue, or Other bond with first, or parity lien position in the amount of $1,819,000.00. The bond will be fully registered as to both principal and interest in the name of the "United States of America, Acting through the United States Department of Agriculture." Bond Counsel will be utilized in preparation of these documents.

The bond/security instruments and any ordinance or resolution relating thereto must not contain any provision in conflict with the Agency Loan Resolution, applicable regulations, or associated laws. There must be no defeasance or refinancing clause in conflict with the graduation requirements of 7 U.S.C. 1983.

If the loan will be on parity with another lender/s, the bond/security instrument must specify that, in the event of default, each lender will be affected on a proportionate basis.

Additional security requirements are contained in RUS Bulletin 1780-27, "Loan Resolution (Public Bodies) and/or RUS Bulletin 1780-12, "Water and Waste System Grant Agreement". A draft of all security instruments, including draft bond resolution, must be reviewed and concurred in by the Agency prior to advertising for bids. Bond/loan resolutions must be duly adopted and executed prior to loan closing.

The Grant Agreement will be executed prior to the first disbursement of grant funds. The grantee understands that any property acquired or improved with Federal grant funds may have use and disposition conditions which apply to the property as provided by 2 CFR part 200 in effect at this time and as may be subsequently modified. The grantee understands that any sale or transfer of property is subject to the interest of the United States Government in the market value in proportion to its participation the project.

7. Reserves – Reserves must be properly budgeted and set aside to maintain the financial viability and sustainability of any operation. Reserves are important to fund unanticipated emergency repairs, to assist with debt service should the need arise, and for the replacement of assets which have a useful life less

than the repayment period of the loan. The following reserves are required to be established as a condition of this loan:

a. **Debt Service Reserve** – Unless a General Obligation Bond secures the lien, as a part of this Agency loan proposal, you must establish a debt service reserve fund equal to at least one annual loan installment that accumulates at the rate of 10% of one annual payment per year for ten years or until the balance is equal to one annual loan payment. For planning purposes, 10% of the proposed loan installment would equal $482.10 per month; this amount should be deposited monthly until a total of $57,852 has accumulated. Prior written concurrence from the Agency must be obtained before funds may be withdrawn from this account during the life of the loan. When funds are withdrawn during the life of the loan, deposits will continue as designated above until the fully funded amount is reached.

b. **Short-Lived Asset Reserve** – You must establish a short-lived asset reserve fund. Based on the PER, you must deposit at least $3,333 into the short-lived asset reserve fund annually for the life of the loan to pay for repairs and/or replacement of major system assets. It is your responsibility to assess your facility's short-lived asset needs on a regular basis and adjust the amount deposited to meet those needs.

SECTION III –REQUIREMENTS PRIOR TO ADVERTISING FOR BIDS

8. Organization – The Bond Counsel transcripts of proceedings must show that your organization is a duly incorporated public body and has continued legal existence. Your organization must have the authority to own, construct, operate, and maintain the proposed facility, as well as for borrowing money, pledging security and raising revenues.

9. Suspension and Debarment Screening – You will be asked to provide information on the principals of your organization. Agency staff must conduct screening for suspension and debarment of the entity, as well as its principals through the Do Not Pay Portal.

a. Principal –
    i. An officer, director, owner, partner, principal investigator, or other person within a participant with management or supervisory responsibilities related to a covered transaction; or
    ii. A consultant or other person, whether or not employed by the participant or paid with federal funds, who –
        1. Is in a position to handle federal funds;
        2. Is in a position to influence or control the use of those funds; or,
        3. Occupies a technical or professional position capable of substantially influencing the development or outcome of an activity required to perform the covered transaction. (2 CFR §180.995)

10. Environmental Requirements – The project, as proposed, has been evaluated to be consistent with the National Environmental Policy Act. Other Federal, State, tribal, and local laws, regulations and/or permits may apply or be required. If the project or any project element deviates from or is modified from the originally approved project, additional environmental review may be required.

This project has applied the Nationwide Programmatic Agreement Among the U.S. Department of Agriculture Rural Development Programs, National Conference of State Historic Preservation Officers,

and the Advisory Council on Historic Preservation for Sequencing Section 106 (NPA). This agreement allows the Agency to obligate funds prior to the completion of Section 106 of the National Historic Preservation Act. The Agreement stipulates, among other things, that the Section 106 process must be complete prior to the awarding of funds and prior to construction. Rural Development is in receipt of your signed NPA Awareness Certification form. In the Awareness Certification, you have acknowledged your awareness of these and other requirements and have agreed that you must complete the Section 106 process before the environmental review component of your application can be finalized and before construction. These historic preservation requirements must be met prior to final approval and prior to taking any action that would have an adverse effect on historic properties or hinder completion of the consultation process required under Section 106 of the National Historic Preservation Act (NHPA). Do not initiate any type of ground disturbing activity, enter into construction contracts, initiate construction, rehabilitation, or purchase land or equipment prior to receiving notification from the Agency that these requirements have been met. Taking any of these actions prior to completion of the required reviews could result in loss of program funds.

11. Engineering Services – You have been required to complete an Agreement for Engineering Services, which should consist of the Engineers Joint Contract Documents Committee (EJCDC) documents as indicated in RUS Bulletin 1780-26, "Guidance for the Use of EJCDC Documents on Water and Waste Projects with RUS Financial Assistance," or other approved form of agreement. The Agency will provide concurrence prior to advertising for bids and must approve any modifications to this agreement.

12. Contract Documents, Final Plans, and Specifications- All development will be completed by contract in accordance with applicable provisions of RUS Instruction 1780, Subpart C – Planning, Designing, Bidding, Contracting, Constructing and Inspections, (copy available upon request), and in compliance with all statutory requirements. You are responsible to share this with your engineer before pre-design.

a. The plans and specifications and all proposals required by law must be approved by Arizona Department of Environmental Quality.

b. In preparing final design and providing service to the planned project area, you and your engineer will comply with all zoning and planning requirements of the appropriate governing bodies where service is to be provided.

c. The Agency will need to concur in the plans and specifications prior to advertising for bids. The Agency may require an updated cost estimate if a significant amount of time has elapsed between the original project cost estimate and advertising for bids.

d. The use of any procurement method other than competitive sealed bids must be requested in writing and approved by the Agency.

e. The contract documents must consist of the EJCDC construction contract documents as indicated in RUS Bulletin 1780-26 or other Agency-approved forms of agreement.

f. **American Iron and Steel Requirements.** Section 746 of Title VII of the Consolidated Appropriations Act of 2017 (Division A - Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2017) and subsequent statutes

mandating domestic preference applies the American Iron and Steel (AIS) requirement to obligations made after May 5, 2017:

(1) No Federal funds made available for this fiscal year for the rural water, wastewater, waste disposal, and solid waste management programs authorized by the Consolidated Farm and Rural Development Act (7 U.S.C. 1926 et seq.) shall be used for a project for the construction, alteration, maintenance, or repair of a public water or wastewater system unless all of the iron and steel products used in the project are produced in the United States.
(2) The term "iron and steel products" means the following products made primarily of iron or steel: lined or unlined pipes and fittings, manhole covers and other municipal castings, hydrants, tanks, flanges, pipe clamps and restraints, valves, structural steel, reinforced precast concrete, and construction materials.
(3) The requirement shall not apply in any case or category of cases in which the Secretary of Agriculture (in this section referred to as the "Secretary") or the designee of the Secretary finds that—
   (a) applying the requirement would be inconsistent with the public interest;
   (b) iron and steel products are not produced in the United States in sufficient and reasonably available quantities or of a satisfactory quality; or
   (c) inclusion of iron and steel products produced in the United States will increase the cost of the overall project by more than 25 percent.
(4) Owners are ultimately responsible for compliance with AIS requirements (as defined in RUS Bulletin 1780-35).
   (a) ***Sign*** loan resolutions, grant agreements and letters of intent to meet conditions which include AIS language, accepting AIS requirements in those documents and in the letter of conditions.
   (b) ***Sign*** agreements for engineering services, executed construction contracts and all other appropriate and necessary documents which include AIS language.
   Change Orders and Partial Payment Estimates: ***Acknowledge*** responsibility for compliance with AIS requirements by signing change orders (EJCDC C-941) and partial payment estimates (EJCDC C-620).
   (c) Substantial completion of project: ***Obtain*** the certification letters from the consulting engineer and ***maintain*** this documentation for the life of the loan.
   (d) *Special Cases*
   i. Where Owner provides their own engineering, the Owner's responsibilities will include items listed in Section 5 of RUS Bulletin 1780-35.
   ii. Where Owner performs their own construction, the Owner's responsibilities will include items listed in Section 6 of RUS Bulletin 1780-35.
   iii. Where Owner directly procures AIS products, Owner must ***utilize*** EJCDC Procurement Series standard contract documents following RUS Bulletin 1780-26 Exhibit D and ***obtain*** manufacturers' certifications and provide copies to Engineer and Contractor.

13. Legal Services –A legal services agreement is required with your attorney and bond counsel, if applicable, for any legal work needed in connection with this project. The agreement should stipulate an hourly rate for the work, with a "not to exceed" amount for the services, including reimbursable expenses. RUS Bulletin 1780-7, "Legal Services Agreement," or similar format may be used. The Agency will provide concurrence prior to advertising for bids. Any changes to the fees or services spelled out in the original agreement must be reflected in an amendment to the agreement and have prior Agency concurrence.

14. **<u>Property Rights</u>** - Prior to advertising for bids, you and your legal counsel must furnish satisfactory evidence that you have adequate continuous and valid control over the lands and rights-of-way needed for the project. Acquisitions of necessary land and rights must be accomplished in accordance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act. Such control over the lands and rights will be evidenced by the following:

a. **Right-of-Way Map** – Your engineer will provide a map clearly showing the location of all lands and rights-of-way needed for the project. The map must designate public and private lands and rights and the appropriate legal ownership thereof.
b. **Form RD 442-20, "Right-of-Way Easement"** – This form, or similar format, may be used to obtain any necessary easements for the proposed project.
c. **Form RD 442-21, "Right-of-Way Certificate"** – You will provide a certification on this form that all right-of-way requirements have been obtained for the proposed project.
d. **Form RD 442-22, "Opinion of Counsel Relative to Rights-of-Way"** – Your attorney will provide a certification and legal opinion on this form addressing rights-of-way, easements, and title.
e. Preliminary Title Work (Title Opinion) – When applicable, your attorney or title company will provide a preliminary title opinion for any property related to the facility, currently owned and to be acquired, along with copies of deeds, contracts or options for purchasing said property. Form RD 1927-9, "Preliminary Title Opinion," may be used.
e. Title Work (Title Insurance when a security interest is not taken in the real estate) – When applicable, your attorney or title company will secure an Owners' Title Insurance policy on all real estate to be acquired in connection with this project. This policy should be in an amount equal to the market value of the property as improved.

The approving official may waive title defects or restrictions, such as utility easements, that do not adversely affect the suitability, successful operation, security value, or transferability of the facility. Any such waivers must be provided by the approving official in writing prior to closing or the start of construction, whichever occurs first.

You are responsible for the acquisition of all property rights necessary for the project and for determining that prices paid are reasonable and fair. The Agency may require an appraisal by an independent appraiser or Agency employee in order to validate the price to be paid.

15. **<u>System Policies, Procedures, Contracts, and Agreements</u>** – The facility must be operated on a sound business plan which involves adopting policies, procedures, and/or ordinances outlining the conditions of service and use of the proposed system. Mandatory connection policies should be used where enforceable. The policies, procedures, and/or ordinances must contain an effective collection policy for accounts not paid in full within a specified number of days after the date of billing. They should include appropriate late fees, specified timeframes for disconnection of service, and reconnection fees. A draft of these policies, procedures, and/or ordinances must be submitted for Agency review and concurrence, along with the documents below, before closing instructions may be issued unless otherwise stated.

a. **Conflict of Interest Policy** – Prior to obligation of funds, you must certify in writing that your organization has in place up-to-date written standards of conduct covering conflict of interest. The standards of conduct must include disciplinary actions in the event of a violation by officers,

employees, or agents of the borrower. The standards identified herein apply to any parent, affiliate or subsidiary organization of the borrower that is not a state or local government, or Indian Tribe. Policies and accompanying documents shall be furnished to Rural Development upon request.

You must also submit a disclosure of planned or potential transactions related to the use of Federal funds that may constitute or present the appearance of personal or organizational conflict of interest. Disclosure must be in the form of a written letter signed and dated by the applicant's official. A negative disclosure in the same format is required if no conflicts are anticipated.

Sample conflict of interest policies may be found at the National Council of Nonprofits website, https://www.councilofnonprofits.org/tools-resources/conflict-of-interest, or in Internal Revenue Service Form 1023, Appendix A, "Sample Conflict of Interest Policy," at http://www.irs.gov/pub/irs-pdf/i1023.pdf. Though these examples reference non-profit corporations, the requirement applies to all types of Agency borrowers.

Assistance in developing a conflict of interest policy is available through Agency-contracted technical assistance providers if desired.

b. **Sewer User Agreement** – Projects not involving mandatory connection require users to execute a Water/Sewer Users Agreement. The draft agreement must receive Agency concurrence prior to advertising for bids. RUS Bulletin 1780-9, "Water Users Agreement," or similar format may be used.

c. **Contracts for Other Services/Lease Agreement** – Drafts of any contracts or other forms of agreements for other services, including audit, management, operation, and maintenance, or lease agreements covering real property essential to the successful operation of the facility, must be submitted to the Agency for review and concurrence prior to advertising for bids.

d. **Parity/Intercreditor Agreement** – Projects with parity liens must have in place a written agreement between the parity lenders. The draft agreement must receive Agency concurrence prior to advertising for bids.

Fully executed copies of any policies, procedures, ordinances, contracts, or agreements above must be submitted prior to loan closing, with the exception of the conflict of interest policy, which must be in place prior to obligation of funds.

16. Closing Instructions – The Agency will prepare closing instructions as soon as the requirements of the previous paragraphs are complete, as well as a draft of the security instrument(s). Both your bond and legal counsel must comply with these instructions when closing the Agency loan/grant. will change over each successive year and user rates will need to be adjusted on a regular basis.

17. System Users – This letter of conditions is based upon your indication at application that there will be at least 173 residential users, 73 non-residential users, and no bulk / wholesale users on the existing and/or proposed system when construction is completed.

Before the Agency can agree to the project being advertised for construction bids, you must certify that the number of users indicated at application are currently using the system or signed up to use the system once it is operational.

If the actual number of existing and/or proposed users that have signed up for service is less than the number indicated at the time of application, you must provide the Agency with a written plan on how you will obtain the necessary revenue to adequately cash flow the expected operation, maintenance, debt service, and reserve requirements of the proposed project (e.g., increase user rates, sign up an adequate number of other users, reduce project scope, etc.). Similar action is required if there is cause to modify the anticipated flows or volumes presented following approval.

If you are relying on mandatory connection requirements, you must provide evidence of the authorizing ordinance or statute along with your user certification.

If project does not involve mandatory connections, you must provide the following:

a. **Positive Program to Encourage Connections** – You must provide a positive program to encourage connection by all users as soon as service is available. The program will be reviewed by the Agency prior to advertising for bids. A guide for developing your positive program is available from the Agency.
b. **Sewer User Agreements** – Users will be required to execute a Sewer Users Agreement prior to advertising for construction bids. The amount of cash contributions required will be set by you and concurred with by the Agency. Contributions should be an amount high enough to indicate sincere interest on the part of the potential user, but not so high as to preclude service to low-income families, and must have a deadline for the contribution to be used or forfeited. RUS Bulletin 1780-9, "Water Users Agreement," or similar agreement may be used.
c. **Service Declination Statement** – Each potential user who is located along planned lines and declines the offered service will be provided an opportunity to sign a "Service Declination Statement."

18. Construction Account – A separate construction account, subject to Agency audit, will be established for deposit of all project funds. These funds must be deposited in a bank with Federal Deposit Insurance Corporation (FDIC) insurance coverage. **If the balance in the account containing these funds exceeds the FDIC insurance coverage, the excess amount must be collaterally secured.** A separate account will not be required for Federal funds and other funds; however, the recipient must be able to separately identify, report and account for all Federal funds, including the receipt, obligation and expenditure of funds. Financial institutions or depositaries accepting deposits of public funds and providing other financial agency services to the Federal Government are required to pledge adequate, acceptable securities as collateral, in accordance with 202.6, 31 CFR Part 202. All funds in the account will be secured by a collateral pledge equaling at least 100 percent of the highest amount of funds expected to be deposited in the construction account at any one time.

19. Interim Financing – The Agency's policy is to utilize interim financing for all loans exceeding $500,000. Prepayment penalties on interim financing are not allowed. Borrowers are required to seek interim financing initially from private or cooperative lenders if funds can be borrowed at reasonable interest rates on an interim basis from those sources for the construction period. The fact that a commercial lender's rates are higher than current Agency interest rates does not necessarily mean that the commercial rate is not reasonable.

20. Proposed Operating Budget – You must establish and/or maintain a rate schedule that provides adequate income to meet the minimum requirements for operation and maintenance (O and M), debt service, and reserves. Prior to advertising for bids, you must submit a proposed annual operating budget to the Agency, as well as your proposed rate schedule. The operating budget should be based on a typical

year cash flow after completion of the construction phase and should be signed by the appropriate official of your organization. Form RD 442-7, "Operating Budget," or similar format may be utilized for this purpose. It is expected that O and M expenses will change over each successive year and user rates will need to be adjusted on a regular basis.

Technical assistance is available at no cost to help you evaluate and complete a rate analysis on your system. This assistance is available free to your organization. If you are interested, please contact our office for information.

21. Permits –The owner or responsible party will be required to obtain all applicable permits for the project, prior to advertising for bids. The consulting engineer must submit written evidence that all applicable permits required prior to construction have been obtained with submission to the Agency of the final plans, specifications, and bid documents.

22. Risk and Resilience Assessment/Emergency Response Plan (RRA/ERP) – The Agency requires all financed water and wastewater systems to have a RRA/ERP in place. New water or wastewater systems must provide a certification that an ERP is complete prior to the start of operation, and a certification that an RRA is complete must be submitted within one year of the start of operation. Borrowers with existing systems must provide a certification that an RRA/ERP has been completed prior to advertising for bids. Technical assistance is available in preparing these documents at no cost to you.

The RRA/ERP documents themselves are not submitted to the Agency. The RRA/ERP must address potential impacts from natural disasters and other emergency events. It should include plans to address impacts of flash flooding in areas where severe drought or wildfires occur. The documents should be reviewed and updated every five years at a minimum.

23. Bid Authorization - Once all the conditions outlined in Section III of this letter have been met, the Agency will authorize you to advertise the project for construction bids. Such advertisement must be in accordance with applicable State statutes.

SECTION IV - REQUIREMENTS PRIOR TO START OF CONSTRUCTION

24. Disbursement of Agency Funds - Agency funds will be disbursed electronically into the construction account as they are needed. SF 3881, "ACH Vendor/Miscellaneous Payment Enrollment Form," must be completed and submitted to the Agency prior to commencement of construction.

The order of disbursement is as follows: 1) Applicant contribution, 2) other funding sources, 3) interim financing or Agency loan funds, and 4) Agency grant funds. Interim financing or Agency loan funds will be expended after all other funding sources unless a written agreement is reached with all other funding sources on how funds are to be disbursed prior the first disbursement. Interim financing funds or Agency loan funds must be used prior to the use of Agency grant funds. Agency Grant funds must not be disbursed prior to loan funds except as authorized in 7 CFR 1780.45(d).

Grant funds are to be deposited in an interest-bearing account (exception provided below) in accordance with 2 CFR Part 200 and interest in excess of $500 per year remitted to the Agency. The funds should be disbursed by the recipient immediately upon receipt, and there should be little interest accrual on the Federal funds. Recipients shall maintain advances of Federal funds in interest-bearing accounts, unless:

- The recipient receives less than $120,000 in Federal awards per year.
- The best reasonably available interest-bearing account would not be expected to earn interest in excess of $500 per year on Federal cash balances.
- The depository would require an average or minimum balance so high that it would not be feasible within the expected Federal and non-Federal cash resources.
- A foreign government or banking system prohibits or precludes interest-bearing accounts.

25. Bid Tabulation – Immediately after bid opening, you must provide the Agency with the bid tabulation and your engineer's evaluation of bids and recommendations for contract awards. If the Agency agrees that the construction bids received are acceptable, adequate funds are available to cover the total project costs, and all the requirements of Section III of this letter have been satisfied, the Agency will authorize you to issue the Notice of Award.

a. **Cost Overruns –** If bids are higher than expected, or if unexpected construction problems are encountered, you must utilize all options to reduce cost overruns. Negotiations, redesign, use of bidding alternatives, rebidding or other means will be considered prior to commitment of subsequent funding by the Agency. Any requests for subsequent funding to cover cost overruns will be contingent on the availability of funds. Cost overruns exceeding 20 percent of the development cost at time of loan or grant approval or where the scope of the original purpose has changed will compete for funds with all other applications on hand as of that date.
b. **Excess Funds** - If bids are lower than anticipated at time of obligation, excess funds must be deobligated prior to start of construction except in the cases addressed in this paragraph. In cases where the original PER for the project included items that were not bid, or were bid as an alternate, the State Office official may modify the project to fully utilize obligated funds for those items. Amendments to the PER, ER, and Letter of Conditions may be needed for any work not included in the original project scope. In all cases, prior to start of construction, excess funds will be deobligated, with grant funds being deobligated first. Excess funds do not include contingency funds as described in this letter.

26. Suspension and Debarment Screening – In accordance with 2 CFR Part 180, Subpart C, as a condition of the transaction and the responsibilities to persons at the next lower tier with whom you enter into transactions, you must conduct screening for suspension and debarment of lower tier recipients (e.g., vendors, contractors, etc.).

27. Contract Review – Your attorney will certify that the executed contract documents, including performance and payment bonds, if required, are adequate and that the persons executing these documents have been properly authorized to do so in accordance with 7 CFR 1780.61(b).

Once your attorney has certified that they are acceptable, the contract documents will be submitted to the Agency for concurrence. Construction cannot commence until the Agency has concurred in the construction contracts.

28. Final Rights of Way – Your attorney or title company must furnish a separate final title opinion or Title Insurance Policy on all real property related to the facility, now owned and to be acquired for this project, as of the day of loan closing or start of construction, whichever occurs first. Form RD 1927-10, "Final Title Opinion" may be used.

If any of the right-of-way forms listed previously in this letter contain exceptions that do not adversely affect the suitability, successful operation, security value, or transferability of the facility, the approving official must provide a written waiver prior to the issuance of the Notice to Proceed.

29. Insurance and Bonding Requirements - Prior to the start of construction or loan closing, whichever occurs first, you must acquire and submit to the Agency proof of the types of insurance and bond coverage for the borrower shown below. The use of deductibles may be allowed, providing you have the financial resources to cover potential claims requiring payment of the deductible. The Agency strongly recommends that you have your engineer, attorney, and insurance provider(s) review proposed types and amounts of coverage, including any exclusions and deductible provisions. It is your responsibility and not that of the Agency to assure that adequate insurance and fidelity bond coverage is maintained.

a. **General Liability Insurance** – Include vehicular coverage.
b. **Workers' Compensation** – In accordance with appropriate State laws.
c. **Guaranty or Fidelity Insurance**–Coverage for all persons who have access to funds, including persons working under a contract or management agreement. Coverage may be provided either for all individual positions or persons, or through "blanket" coverage providing protection for all appropriate employees. Each position is to be insured in an amount equal to the maximum amount of funds expected to be under the control of that position at any one time. The minimum coverage allowed will be an amount equal to the total annual debt service payment on the Agency loans. The coverage may be increased during construction based on the anticipated monthly advances.
d. **National Flood Insurance** - If the project involves acquisition or construction in a designated special flood area, the community in which the acquisition or construction is situated must be currently participating in the national flood insurance program. Additionally, if the project involves acquisition or constriction in designated special flood or mudslide prone areas, a flood insurance policy must be in place at the time of loan closing.
e. **Real Property Insurance** – Fire and extended coverage will normally be maintained on all structures except reservoirs, pipelines and other structures if such structures are not normally insured, and subsurface lift stations except for the value of electrical and pumping equipment. The Agency will be listed as mortgagee on the policy when the Agency has a lien on the property. Prior to the acceptance of the facility from the contractor(s), you must obtain real property insurance (fire and extended coverage) on all facilities identified above.

The Agency is to be listed as "Other Insured" so as to receive notifications on all insurance, regardless of security. Insurance types described above are required to be continued throughout the life of the loan. See Section VII.

30. Initial Civil Rights Compliance Review – The Agency will conduct an initial civil rights compliance review of the borrower prior to loan closing or start of construction, whichever occurs first, in accordance with 7 CFR 1901, Subpart E. You are expected to comply with the completion of the review, including the furnishing of any documents, records, or other applicable material.

SECTION V – REQUIREMENTS PRIOR TO CLOSING

31. Interim Financing. Interim financing is being used. Generally, loan closing will occur near the end of construction when interim funds are fully disbursed. Documents detailed above from Sections II and III regarding security, electronic payments (Form 3550-28), and system policies, procedures, contracts, and agreements must be adopted and/or executed and submitted to the Agency prior to loan closing.

32. Electronic Payments – Payments will be made through an electronic preauthorized debit system. You will be required to complete Form RD 3550-28, "Authorization Agreement for Preauthorized Payments," for all new and existing indebtedness to the Agency prior to loan closing.

33. Other Requirements – All requirements contained in the Agency's closing instructions, as well as any requirements of your bond counsel and/or attorney, must be met prior to loan closing.

a. System for Award Management. You will be required to maintain a Dun and Bradstreet Data Universal Numbering System (DUNS) number and maintain an active registration in the System for Award Management (SAM) database. Renewal can be completed online at: http://sam.gov. This registration must be renewed and revalidated every 12 months for as long as there is an active loan, grant, or guaranteed loan with the Agency.

To ensure the information is current, accurate and complete, and to prevent the SAM account expiration, the review and updates must be performed within 365 days of the activation date, commonly referred to as the expiration date. The registration process may take up to 10 business days. (See 2 CFR Part 25 and the "Help" section at http://sam.gov).

b. Litigation. You are required to notify the Agency within 30 days of receiving notification of being involved in any type of litigation prior to loan closing or start of construction, whichever occurs first. Additional documentation regarding the situation and litigation may be requested by the Agency.

c. Certified Operator. Evidence must be provided that your system has or will have a certified operator, as defined by applicable State or Federal requirements, available prior to the system becoming operational, or that a suitable supervisory agreement with a certified operator is in effect.

SECTION VI – REQUIREMENTS DURING CONSTRUCTION AND POST CONSTRUCTION

34. Construction Completion Timeframe – Following the benchmarks established in Section I, Item 4, Project Timeline, all projects should be completed and Agency funds fully disbursed within three years of the date of obligation. If funds are not disbursed within three years of obligation and you have not already done so per Section I, Item 4, you must submit a written request for extension of time to the Agency with adequate justification of the circumstances, including any beyond your control. The request must be submitted at least 90 days prior to the end of the three-year timeframe and include a revised estimated date of completion. The Agency will typically only allow one extension. Subsequent requests for waivers beyond the initial extension or requests that exceed five years from the initial date of obligation will be submitted to the RUS, Water and Environmental Programs for consideration. The Agency retains the right to de-obligate any loan and/or grant monies, or take other appropriate action, related to unliquidated funds that exceed the timeframes above and are not under an active extension.

35. Resident Inspector(s) – Full-time inspection is required unless you request an exception. Such requests must be made in writing and the Agency must provide written concurrence. Inspection services are to be provided by the consulting engineer unless other arrangements are requested in writing and concurred with by the Agency. A resume of qualifications of any resident inspector(s) will be submitted

to the owner and Agency for review and concurrence prior to the pre-construction conference. The resident inspector(s) must attend the preconstruction conference.

36. Preconstruction Conference – A preconstruction conference will be held prior to the issuance of the Notice to Proceed. The consulting engineer will review the planned development with the Agency, owner, resident inspector, attorney, contractor, other funders, and other interested parties, and will provide minutes of this meeting to the owner and Agency.

37. Inspections - The Agency requires a preconstruction conference, pre-final, final, and warranty inspections. Your engineer will schedule a warranty inspection with the contractor and the Agency before the end of the [one-year] warranty period to address and/or resolve any outstanding warranty issues. The Agency will conduct an inspection with you of your records management system at the same time and will continue to inspect the facility and your records system every three years for the life of the loan. See Section VII of this letter.

38. Change Orders – A Change Order must be submitted for all modifications to the approved scope of work, including existing contracts. This includes non-physical modifications such as any time extension requests. Prior written Agency concurrence is required for all Change Orders.

39. Payments – Prior Agency concurrence is required for all invoices and requests for payment before Agency funds will be released. Requests for payment related to a contract or service agreement will be signed by the owner, project engineer, and contractor or service provider prior to Agency concurrence. Invoices not related to a construction contract or service agreement will include the owner's written concurrence.

40. Use of Remaining Funds – As stated above, applicant contribution and connection or tap fees will be the first funds expended in the project. Funds remaining after all costs incident to the basic project have been paid or provided will be handled as follows:

a. Funds remaining after the applicant contribution and connection fees may be considered in direct proportion to the amounts of funding obtained from each source. The use of Agency funding will be limited to eligible loan and grant purposes, provided the use will not result in major changes to the original scope of work and the purpose of the loan and grant remains the same.
b. Any reductions in the Agency funding will be first applied to the grant funds.
c. Grant funds not expended for authorized purposes will be cancelled (de-obligated) within 90 days of final completion of project. Prior to actual cancellation, you, your attorney and engineer will be notified of the Agency's intent to cancel the remaining funds and given appropriate appeal rights.
d. Under no circumstances is it appropriate to use remaining funds as contributions to a new project outside the scope of the funded project.
e. Loan funds that are not needed will be cancelled (de-obligated) prior to loan closing.

41. Technical, Managerial and Financial Capacity - It is required that members of the Board of Directors, City Council members, trustees, commissioners and other governing members possess the necessary technical, managerial, and financial capacity skills to consistently comply with pertinent Federal and State laws and requirements. It is recommended members receive training within one year of appointment or election to the governing board, and a refresher training for all governing members on a routine basis. The content and amount of training should be tailored to the needs of the individual and the

utility system. Technical assistance providers are available to provide this training for your organization, often at no cost. Contact the Agency for additional information.

42. Reporting Requirements Related to Expenditure of Funds -- An annual audit under 2 CFR 200 is required if you expend $750,000 or more in Federal financial assistance per fiscal year. The total Federal funds expended from all sources shall be used to determine Federal financial assistance expended. Expenditures of interim financing are considered Federal expenditures.

All audits are to be performed in accordance with 2 CFR Part 200, as adopted by USDA through 2 CFR Part 400. Further guidance on preparing an acceptable audit can be obtained from the Agency. The audit must be prepared by an independent licensed Certified Public Accountant, or a State or Federal auditor if allowed by State law and must be submitted within 9 months of your fiscal year end. Both the audit and accompanying management report must be submitted for review.

If an audit is required, you must enter into a written agreement with the auditor and submit a copy of that agreement to the Agency prior to the advertisement of construction bids. The audit agreement may include terms and conditions that the borrower and auditor deem appropriate; however, the agreement should include the type of audit to be completed, the time frame in which the audit will be completed, and how irregularities will be reported.

SECTION VII – SERVICING REQUIREMENTS DURING THE TERM OF THE LOAN

43. Prepayment and Extra Payments - Prepayments of scheduled installments, or any portion thereof, may be made at any time at the option of borrower, with no penalty.

Security instruments, including bonding documents, must contain the following language regarding extra payments, unless prohibited by State statute:

> *Prepayments of scheduled installments, or any portion thereof, may be made at any time at the option of borrower. Refunds, extra payments and loan proceeds obtained from outside sources for the purpose of paying down the Agency debt, shall, after payment of interest, be applied to the installments last to become due under this note and shall not affect the obligation of borrower to pay the remaining installments as scheduled in your security instruments.*

44. Annual Financial Reporting/Audit Requirements – You are required to submit an annual financial report at the end of each fiscal year. The annual report will be certified by the appropriate organization official, and will consist of financial information, a current rate schedule, and listing of board members with their terms. Financial statements must be prepared on an accrual basis of accounting in accordance with generally accepted accounting principles (GAAP). The annual report will include separate reporting for each water and waste disposal facility, and itemized cash accounts by type (debt service, short-lived assets, etc.) under each facility. All records, books and supporting material are to be retained for three years after the issuance of the annual report. Technical assistance is available, at no cost, with preparing financial reports.

The type of financial information that must be submitted is specified below:

a. **Audits** – An audit under the Single Audit Act is required if you expend $750,000 or more in Federal financial assistance per fiscal year. The total Federal funds expended from all sources

shall be used to determine Federal financial assistance expended. Expenditures of interim financing are considered Federal expenditures.

See Section VI for additional information regarding audits.

b. **Financial Statements** – If you expend less than $750,000 in Federal financial assistance per fiscal year, you may submit financial statements in lieu of an audit which include, at a minimum, a balance sheet and an income and expense statement. You may use Form RD 442-2, "Statement of Budget, Income and Equity," and 442-3, "Balance Sheet," or similar format to provide the financial information. The financial statements must be signed by the appropriate borrower official and submitted within 60 days of your fiscal year end.

c. **(if applicable) Quarterly Reports** – Quarterly Income and Expense Statements will be required until the processing office waives this requirement. You may use Form RD 442-2, "Statement of Budget, Income and Equity," or similar format to provide this information. The reports are to be signed by the appropriate borrower official and submitted within 30 days of each quarter's end. The Agency will notify you in writing when quarterly reports are no longer required.

45. Annual Budget and Projected Cash Flow - Thirty days prior to the beginning of each fiscal year, you will be required to submit an annual budget and projected cash flow to this office. The budget must be signed by the appropriate borrower official. Form RD 442-2, "Statement of Budget, Income and Equity," or similar format may be used.

Technical assistance is available at no cost to help you evaluate and complete a rate analysis on your system, as well as completing the annual budget.

46. Graduation - By accepting this loan, you are also agreeing to refinance (graduate) the unpaid loan balance in whole, or in part, upon request of the Government. If at any time the Agency determines you can obtain a loan for such purposes from responsible cooperative or private sources at reasonable rates and terms, you will be requested to refinance. Your ability to refinance will be assessed every other year for those loans that are five years old or older.

47. Security/Operational Inspections – The Agency will inspect the facility and conduct a review of your operations and records management system and conflict of interest policy every three years for the life of the loan. You must participate in these inspections and provide the required information.

48. System for Award Management. You will be required to maintain a Dun and Bradstreet Data Universal Numbering System (DUNS) number and maintain an active registration in the System for Award Management (SAM) database. Further information can be found at paragraph 34 of this letter.

49. Risk and Resiliency Assessment/Emergency Response Plan (RRA/ERP) – The RRA/ERP is further outlined under Section III of this letter. You will be required to submit a certification to the servicing office every five years that the RRA/ERP is current and covers all sites related to the facility. The RRA/ERP documents themselves are not submitted to the Agency. The RRA/ERP must address potential impacts from natural disasters and other emergency events. It should include plans to address impacts of flash flooding in areas where severe drought or wildfires occur. Technical assistance is available in preparing these documents at no cost to you.

50. Insurance. – Insurance requirements are further outlined in Section IV of this letter. You will be required to maintain insurance on the facility and employees as previously described in this letter for the life of the loan.

51. Statutory and National Policy Requirements – As a recipient of Federal funding, you are required to comply with U.S. statutory and public policy requirements, including but not limited to:

a. **Section 504 of the Rehabilitation Act of 1973** – Under Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794), no handicapped individual in the United States shall, solely by reason of their handicap, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Agency financial assistance.

b. **Civil Rights Act of 1964** – All borrowers are subject to, and facilities must be operated in accordance with, Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.) and 7 CFR 1901, Subpart E, particularly as it relates to conducting and reporting of compliance reviews. Instruments of conveyance for loans and/or grants subject to the Act must contain the covenant required by Paragraph 1901.202(e) of this Title.

c. **The Americans with Disabilities Act (ADA) of 1990** – This Act (42 U.S.C. 12101 et seq.) prohibits discrimination on the basis of disability in employment, State and local government services, public transportation, public accommodations, facilities, and telecommunications.

d. **Age Discrimination Act of 1975** – This Act (42 U.S.C. 6101 et seq.) provides that no person in the United States shall on the basis of age, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.

e. **Limited English Proficiency (LEP) under Executive Order 13166** - LEP statutes and authorities prohibit exclusion from participation in, denial of benefits of, and discrimination under Federally-assisted and/or conducted programs on the ground of race, color, or national origin. Title VI of the Civil Rights Act of 1964 covers program access for LEP persons. LEP persons are individuals who do not speak English as their primary language and who have a limited ability to read, speak, write, or understand English. These individuals may be entitled to language assistance, free of charge. You must take reasonable steps to ensure that LEP persons receive the language assistance necessary to have meaningful access to USDA programs, services, and information your organization provides. These protections are pursuant to Executive Order 13166 entitled, “Improving Access to Services by Persons with Limited English Proficiency” and further affirmed in the USDA Departmental Regulation 4330-005, “Prohibition Against National Origin Discrimination Affecting Persons with Limited English Proficiency in Programs and Activities Conducted by USDA.”

f. **Controlled Substances Act** - Even though state law may allow some activities, as a recipient of Federal funding, you are subject to the Controlled Substances Act. Specific questions about the Controlled Substances Act should be directed to the Servicing Official who will contact the Office of General Counsel, as appropriate.

52. <u>Compliance Reviews and Data Collection</u> – Agency financial programs must be extended without regard to race, color, religion, sex, national origin, marital status, age, or physical or mental handicap. You must display posters (provided by the Agency) informing users of these requirements, and the Agency will monitor your compliance with these requirements during regular compliance reviews.

The Agency will conduct regular compliance reviews of the borrower and its operation in accordance with 7 CFR Part 1901, Subpart E, and 36 CFR 1191, Americans with Disabilities Act (ADA) Accessibility Guidelines for Buildings and Facilities; Architectural Barriers Act (ABA) Accessibility Guidelines. Compliance reviews will typically be conducted in conjunction with the security inspections described in this letter.

If beneficiaries (users) are required to complete an application or screening for the use of the facility or service that you provide, you must request and collect data by race (American Indian or Alaska Native, Asian, Black or African American, White); ethnicity (Hispanic or Latino, Not Hispanic or Latino); and by sex. The Agency will utilize this data as part of the required compliance review.

<u>SECTION VIII – REMEDIES FOR NON-COMPLIANCE</u>

Non-compliance with the conditions in this letter or requirements of your security documents will be addressed under the provisions of Agency regulations, statutes, and other applicable policies.

We look forward to working with you to complete this project. If you have any questions, please contact Michael Dean at 928-910-4471 or by e-mail at Michael.dean2@usda.gov.

Sincerely,

JEFFREY HAYS

Appendix A

A. Reporting Total Compensation of Recipient Executives

In the rare instance in which all of the following apply, please contact your POB Specialist for language to include in the LOC:

1. The total Federal funding authorized to date under this award is $30,000 or more;

2. In the preceding fiscal year, the applicant received—

   (A) 80 percent or more of their annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act, as defined at 2 CFR 170.320 (and subawards); and

   (B) $25,000,000 or more in annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act, as defined at 2 CFR 170.320 (and subawards); and

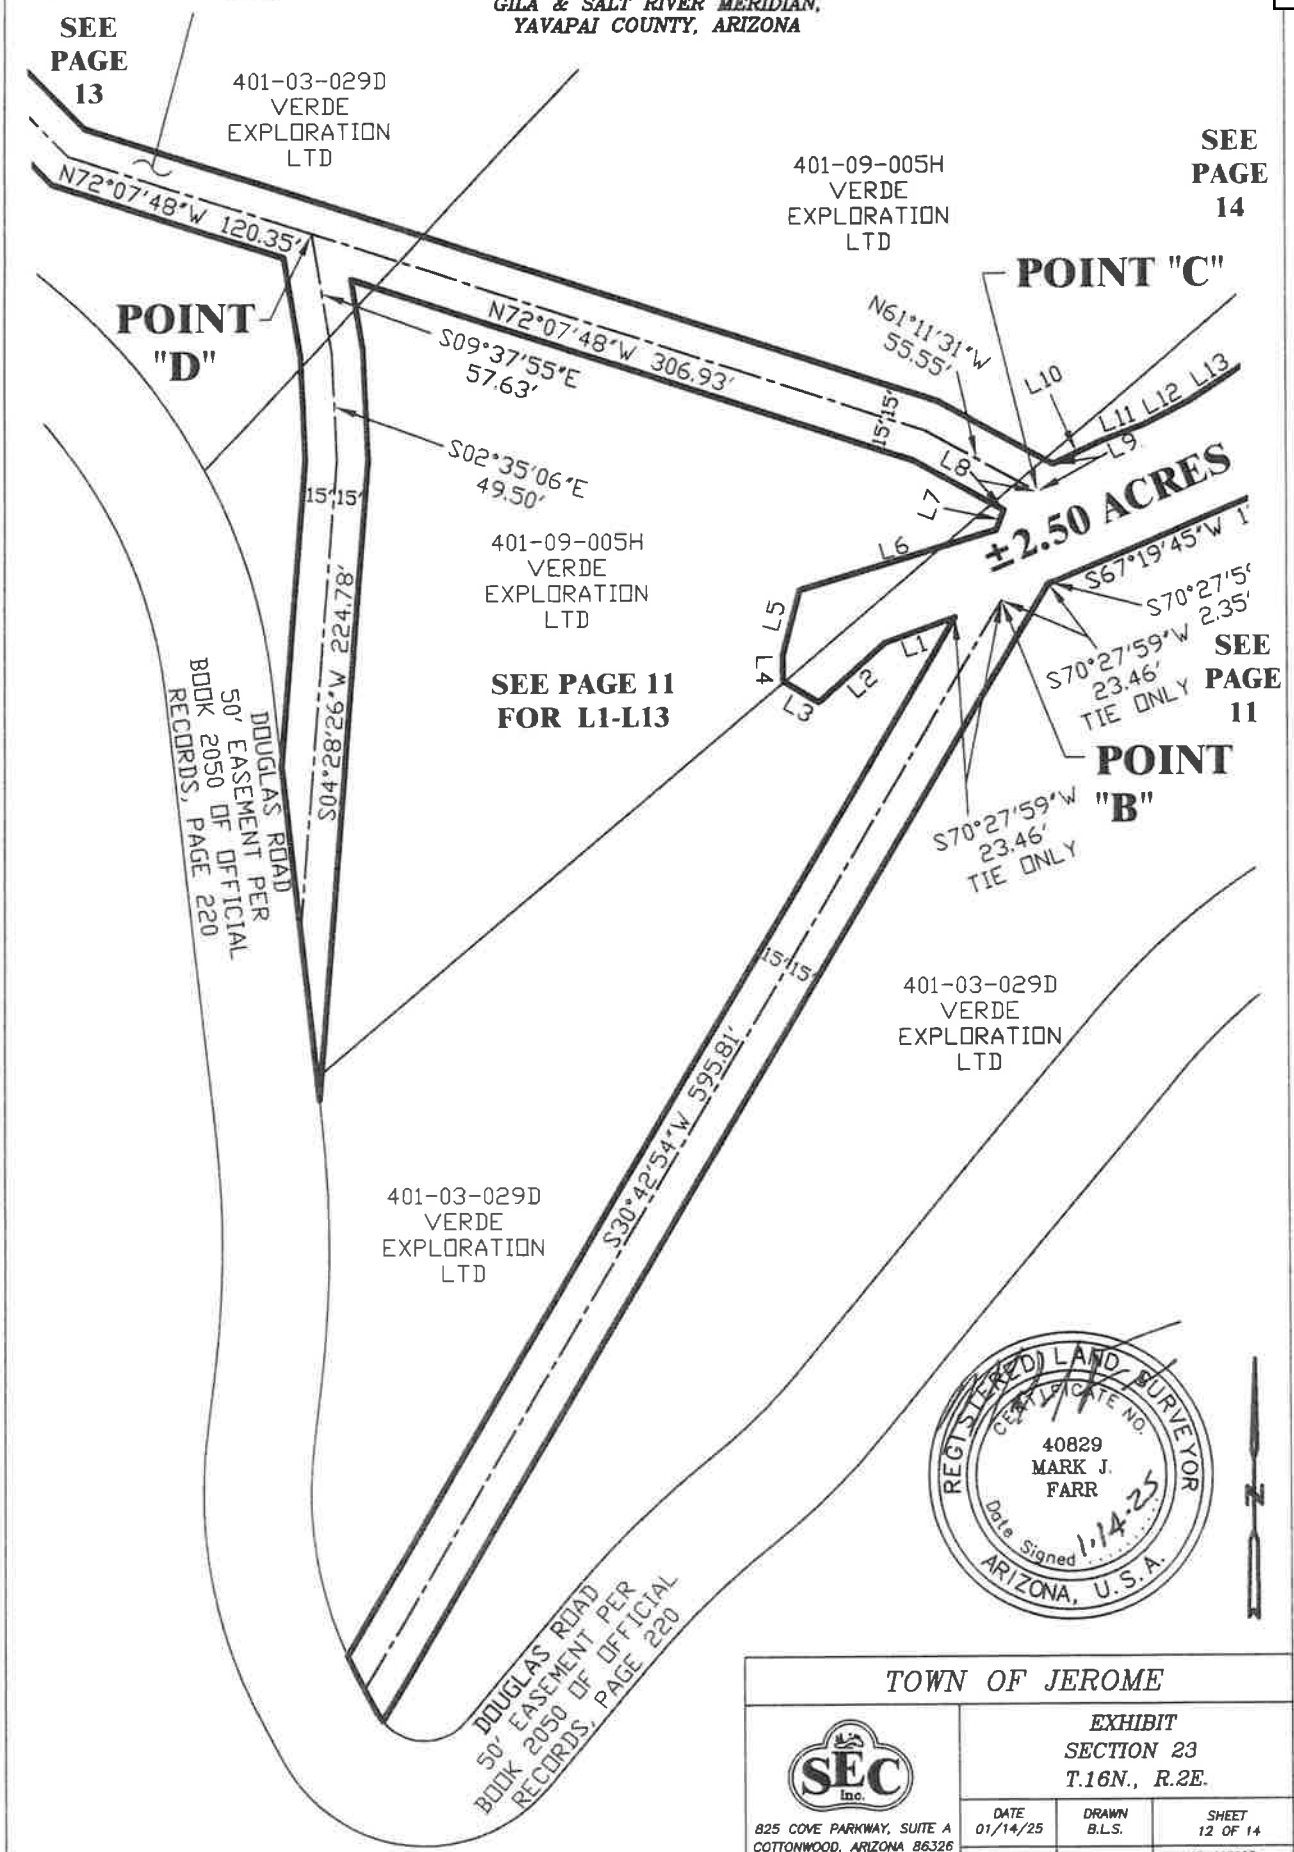
3. The public does not have access to information about the compensation of the executives through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986. (To determine if the public has access to the compensation information, see the U.S. Security and Exchange Commission total compensation filings at http://www.sec.gov/answers/execomp.htm.)

B. Subaward and Subrecipients

In the rare instance in which there is a subrecipient in the project, please contact your POB Specialist for language to include in the LOC:

Subrecipient means an entity that:

i. Receives a subaward from the recipient under this award; and



ii. Is accountable to the recipient for the use of the Federal funds provided by the subaward.

a. Subaward means an award provided by a pass-through entity to a subrecipient for the subrecipient to carry out part of a Federal award received by the pass-through entity. It does not include payments to a contractor or payments to an individual that is a beneficiary of a Federal program.

Town of Jerome, Arizona
600 Clark Street (PO Box 335)
Jerome, AZ 86331

SUBJECT: Letter of Conditions
Recipient Name: Town of Jerome, Arizona

Project Name: Sewer Rehab SEARCH 2020
CFDA NUMBER – 10.760

RUS Loan (SECD):	$1,819,000.00
RUS Grant (SECD)	$4,830,000.00
SEARCH Grant:	$30,000.00 (previously funded)

Dear Ms. Gallagher:

This letter establishes conditions which must be understood and agreed to by you before further consideration may be given to your application. The loan and/or grant will be administered on behalf of the Rural Utilities Service (RUS) by the State and Area staff of USDA Rural Development (RD), both of which are referred to throughout this letter as the Agency. Any changes in project cost, source of funds, scope of project, or any other significant changes in the project or applicant must be reported to and concurred with by the Agency by written amendment to this letter. This includes any significant changes in the Applicant's financial condition, operation, organizational structure or executive leadership. Any changes made without Agency concurrence shall be cause for discontinuing processing of the application.

This letter does not constitute loan and/or grant approval, nor does it ensure that funds are or will be available for the project. The funding is being processed on the basis of a loan not to exceed $1,819,000.00 and/or a grant not to exceed $4,830,000.00. The loan and/or grant will be considered approved on the date Form RD 1940-1, "Request for Obligation of Funds" is signed by the Agency approval official.

The applicant will ensure projects are completed in a timely, efficient, and economical manner. You must meet all conditions set forth under Section III – Requirements Prior to Advertising for Bids within 1 year of this letter.

If you do not meet the conditions of this letter, the Agency reserves the right to withdraw Agency funding.

If you agree to meet the conditions set forth in this letter and desire further consideration be given to your application, please complete and return the following forms within 14 days:

Form RD 1942-46, "Letter of Intent to Meet Conditions"

USDA is an equal opportunity provider, employer and lender.

Form RD 1940-1, "Request for Obligation of Funds"

All parties may access information and regulations referenced in this letter at our website located at https://www.rd.usda.gov/programs-services/water-environmental-programs/water-waste-disposal-loan-grant-program.

The conditions are as follows:

SECTION I - PROJECT SCOPE

1. Project Description – Funds will be used to design, purchase, and install necessary equipment and components to address high ammonia and copper levels in the area along with line improvements to the aging wastewater system. This project is addressing the Arizona Department of Environmental Quality (ADEQ) consent order to meet compliance.

Facilities will be designed and constructed in accordance with sound engineering practices and must meet the requirements of Federal, State, and local agencies. The proposed facility design must be based on the Preliminary Engineering Report (PER), prepared by PACE dated/amended December 2021, as concurred with by the Agency.

2. Project Funding – The Agency is offering the following funding for your project:

RUS Loan (SECD)-	$ 1,819,000.00
RUS Grant -	$ 4,830,000.00
SEARCH Grant -	$30,000.00 (previously funded)
Other Funding -	$ -0-

TOTAL PROJECT COST - $ 6,679,000.00

Any changes in funding sources following obligation of Agency funds must be reported to the processing official. Prior to loan closing, any increase in non-Agency funding will be applied first as a reduction to Agency grant funds, up to the total amount of the grant, and then as a reduction to Agency loan funds.

The applicant must certify that they have exhausted all other funding avenues and have no pending funding considerations from any other sources. Further, the applicant must certify that they do not intend to apply anywhere else for funding for this project. If, after obligation of Agency funds, other funding becomes available, the Agency reserves the right to deobligate any and all funding for this project and to re-underwrite. This may result in the offering of a different funding package to for this project.

Prior to advertisement for construction bids, you must provide evidence of applicant contributions and other funding sources. This evidence should include a copy of the commitment letter. Agency funds will not be used to pre-finance funds committed to the project from other sources.

3. Project Budget – Funding from all sources has been budgeted for the estimated expenditures as follows:

Project Costs:	**Total Budgeted:**
Development/Construction	
Access Road	$778,553
10" Sewer Line Improv.	$925,000
Treatment Plant Site	$558,500
Concrete Tanks	$142,500
General Conditions	$806,306
Equipment	$1,435,000
Contingency	$383,893
Engineering Fees	
Includes:	
Pre-Development (PER/ER)	$30,000
Study & Report Phase	$69,020
Design Phase	$646,500
Permitting & Fees	$89,000
Bid Services	$45,000
Engineering Const. Services	$501,000
Post Construction Services	$5,000
Contingency (Non-Construction)	$67,776
Interest/Fees – Const. Loan	$167,452
Interest/Fees – Bridge Loan	$28,500
TOTAL	$6,679,000

Project feasibility and funding will be reassessed if there is a significant change in project costs after bids are received. Obligated loan and/or grant funds not needed to complete the proposed project will be deobligated. Any reduction will be applied to Agency grant funds first. If actual project costs exceed the project cost estimates, an additional contribution by the Owner may be necessary. An "Amended Letter of Conditions" will be issued for any changes to the total project budget.

4. Project Timeline – To ensure that the project proceeds in a timely manner, key processing milestones have been established in accordance with the PER or other Agency approved documentation. **Projects should be completed and Agency funds fully disbursed within three years of obligation.** By agreeing to the terms herein, you agree to comply with the milestones identified below. If, for any reason, one or more of the milestones cannot be met, you must notify the Agency in writing at least 30 days prior to the referenced date. Should your final completion date become more than three years after obligation the written request will follow the procedures outlined in Section VI of this letter, including the submission of not less than 90 days prior to the benchmark. The correspondence must contain a valid explanation as to why the milestone cannot be met and include a proposed revised project completion schedule. If the Agency agrees to the modification, a written confirmation will be issued. The Agency reserves the right to de-obligate loan and/or grant funds, or take other appropriate action, if the established or amended deadlines are not met.

Milestone	Date
Design Phase	09/07/2022
Bid Process and Permitting	12/30/2022
Start Construction Period	01/16/2023
Substantial Completion	12/29/2023
Final Completion	06/12/2024

SECTION II – RATES & TERMS

5. Interest Rates and Loan Terms – The interest rate will be the lower of the rate in effect at the time of loan approval or the time of loan closing, unless you request otherwise. Should the interest rate be reduced, the payment will be recalculated to the lower amount. The payment due date will be established as the day that the loan closes.

Your loan will be scheduled for repayment over a period of 40 years. Payments will be equal monthly amortized installments, beginning one month after closing. For planning purposes, use a 1.25% interest which provides for a monthly payment of $4,821.00. The precise payment amount will be based on the interest rate at which the loan is closed and may be different than the one above.

6. Security – The loan will be secured by a General Obligation, Revenue, or Other bond with first, or parity lien position in the amount of $1,819,000.00. The bond will be fully registered as to both principal and interest in the name of the "United States of America, Acting through the United States Department of Agriculture." Bond Counsel will be utilized in preparation of these documents.

The bond/security instruments and any ordinance or resolution relating thereto must not contain any provision in conflict with the Agency Loan Resolution, applicable regulations, or associated laws. There must be no defeasance or refinancing clause in conflict with the graduation requirements of 7 U.S.C. 1983.

If the loan will be on parity with another lender/s, the bond/security instrument must specify that, in the event of default, each lender will be affected on a proportionate basis.

Additional security requirements are contained in RUS Bulletin 1780-27, "Loan Resolution (Public Bodies) and/or RUS Bulletin 1780-12, "Water and Waste System Grant Agreement". A draft of all security instruments, including draft bond resolution, must be reviewed and concurred in by the Agency prior to advertising for bids. Bond/loan resolutions must be duly adopted and executed prior to loan closing.

The Grant Agreement will be executed prior to the first disbursement of grant funds. The grantee understands that any property acquired or improved with Federal grant funds may have use and disposition conditions which apply to the property as provided by 2 CFR part 200 in effect at this time and as may be subsequently modified. The grantee understands that any sale or transfer of property is subject to the interest of the United States Government in the market value in proportion to its participation the project.

7. Reserves – Reserves must be properly budgeted and set aside to maintain the financial viability and sustainability of any operation. Reserves are important to fund unanticipated emergency repairs, to assist with debt service should the need arise, and for the replacement of assets which have a useful life less

than the repayment period of the loan. The following reserves are required to be established as a condition of this loan:

a. **Debt Service Reserve** – Unless a General Obligation Bond secures the lien, as a part of this Agency loan proposal, you must establish a debt service reserve fund equal to at least one annual loan installment that accumulates at the rate of 10% of one annual payment per year for ten years or until the balance is equal to one annual loan payment. For planning purposes, 10% of the proposed loan installment would equal $482.10 per month; this amount should be deposited monthly until a total of $57,852 has accumulated. Prior written concurrence from the Agency must be obtained before funds may be withdrawn from this account during the life of the loan. When funds are withdrawn during the life of the loan, deposits will continue as designated above until the fully funded amount is reached.

b. **Short-Lived Asset Reserve** – You must establish a short-lived asset reserve fund. Based on the PER, you must deposit at least $3,333 into the short-lived asset reserve fund annually for the life of the loan to pay for repairs and/or replacement of major system assets. It is your responsibility to assess your facility's short-lived asset needs on a regular basis and adjust the amount deposited to meet those needs.

SECTION III –REQUIREMENTS PRIOR TO ADVERTISING FOR BIDS

8. Organization – The Bond Counsel transcripts of proceedings must show that your organization is a duly incorporated public body and has continued legal existence. Your organization must have the authority to own, construct, operate, and maintain the proposed facility, as well as for borrowing money, pledging security and raising revenues.

9. Suspension and Debarment Screening – You will be asked to provide information on the principals of your organization. Agency staff must conduct screening for suspension and debarment of the entity, as well as its principals through the Do Not Pay Portal.

a. Principal –
    i. An officer, director, owner, partner, principal investigator, or other person within a participant with management or supervisory responsibilities related to a covered transaction; or
    ii. A consultant or other person, whether or not employed by the participant or paid with federal funds, who –
        1. Is in a position to handle federal funds;
        2. Is in a position to influence or control the use of those funds; or,
        3. Occupies a technical or professional position capable of substantially influencing the development or outcome of an activity required to perform the covered transaction. (2 CFR §180.995)

10. Environmental Requirements – The project, as proposed, has been evaluated to be consistent with the National Environmental Policy Act. Other Federal, State, tribal, and local laws, regulations and/or permits may apply or be required. If the project or any project element deviates from or is modified from the originally approved project, additional environmental review may be required.

This project has applied the Nationwide Programmatic Agreement Among the U.S. Department of Agriculture Rural Development Programs, National Conference of State Historic Preservation Officers,

and the Advisory Council on Historic Preservation for Sequencing Section 106 (NPA). This agreement allows the Agency to obligate funds prior to the completion of Section 106 of the National Historic Preservation Act. The Agreement stipulates, among other things, that the Section 106 process must be complete prior to the awarding of funds and prior to construction. Rural Development is in receipt of your signed NPA Awareness Certification form. In the Awareness Certification, you have acknowledged your awareness of these and other requirements and have agreed that you must complete the Section 106 process before the environmental review component of your application can be finalized and before construction. These historic preservation requirements must be met prior to final approval and prior to taking any action that would have an adverse effect on historic properties or hinder completion of the consultation process required under Section 106 of the National Historic Preservation Act (NHPA). Do not initiate any type of ground disturbing activity, enter into construction contracts, initiate construction, rehabilitation, or purchase land or equipment prior to receiving notification from the Agency that these requirements have been met. Taking any of these actions prior to completion of the required reviews could result in loss of program funds.

11. Engineering Services – You have been required to complete an Agreement for Engineering Services, which should consist of the Engineers Joint Contract Documents Committee (EJCDC) documents as indicated in RUS Bulletin 1780-26, "Guidance for the Use of EJCDC Documents on Water and Waste Projects with RUS Financial Assistance," or other approved form of agreement. The Agency will provide concurrence prior to advertising for bids and must approve any modifications to this agreement.

12. Contract Documents, Final Plans, and Specifications- All development will be completed by contract in accordance with applicable provisions of RUS Instruction 1780, Subpart C – Planning, Designing, Bidding, Contracting, Constructing and Inspections, (copy available upon request), and in compliance with all statutory requirements. You are responsible to share this with your engineer before pre-design.

a. The plans and specifications and all proposals required by law must be approved by Arizona Department of Environmental Quality.

b. In preparing final design and providing service to the planned project area, you and your engineer will comply with all zoning and planning requirements of the appropriate governing bodies where service is to be provided.

c. The Agency will need to concur in the plans and specifications prior to advertising for bids. The Agency may require an updated cost estimate if a significant amount of time has elapsed between the original project cost estimate and advertising for bids.

d. The use of any procurement method other than competitive sealed bids must be requested in writing and approved by the Agency.

e. The contract documents must consist of the EJCDC construction contract documents as indicated in RUS Bulletin 1780-26 or other Agency-approved forms of agreement.

f. **American Iron and Steel Requirements.** Section 746 of Title VII of the Consolidated Appropriations Act of 2017 (Division A - Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2017) and subsequent statutes

mandating domestic preference applies the American Iron and Steel (AIS) requirement to obligations made after May 5, 2017:

(1) No Federal funds made available for this fiscal year for the rural water, wastewater, waste disposal, and solid waste management programs authorized by the Consolidated Farm and Rural Development Act (7 U.S.C. 1926 et seq.) shall be used for a project for the construction, alteration, maintenance, or repair of a public water or wastewater system unless all of the iron and steel products used in the project are produced in the United States.
(2) The term "iron and steel products" means the following products made primarily of iron or steel: lined or unlined pipes and fittings, manhole covers and other municipal castings, hydrants, tanks, flanges, pipe clamps and restraints, valves, structural steel, reinforced precast concrete, and construction materials.
(3) The requirement shall not apply in any case or category of cases in which the Secretary of Agriculture (in this section referred to as the "Secretary") or the designee of the Secretary finds that—
   (a) applying the requirement would be inconsistent with the public interest;
   (b) iron and steel products are not produced in the United States in sufficient and reasonably available quantities or of a satisfactory quality; or
   (c) inclusion of iron and steel products produced in the United States will increase the cost of the overall project by more than 25 percent.
(4) Owners are ultimately responsible for compliance with AIS requirements (as defined in RUS Bulletin 1780-35).
   (a) ***Sign*** loan resolutions, grant agreements and letters of intent to meet conditions which include AIS language, accepting AIS requirements in those documents and in the letter of conditions.
   (b) ***Sign*** agreements for engineering services, executed construction contracts and all other appropriate and necessary documents which include AIS language.
   Change Orders and Partial Payment Estimates: ***Acknowledge*** responsibility for compliance with AIS requirements by signing change orders (EJCDC C-941) and partial payment estimates (EJCDC C-620).
   (c) Substantial completion of project: ***Obtain*** the certification letters from the consulting engineer and ***maintain*** this documentation for the life of the loan.
   (d) *Special Cases*
   i. Where Owner provides their own engineering, the Owner's responsibilities will include items listed in Section 5 of RUS Bulletin 1780-35.
   ii. Where Owner performs their own construction, the Owner's responsibilities will include items listed in Section 6 of RUS Bulletin 1780-35.
   iii. Where Owner directly procures AIS products, Owner must ***utilize*** EJCDC Procurement Series standard contract documents following RUS Bulletin 1780-26 Exhibit D and ***obtain*** manufacturers' certifications and provide copies to Engineer and Contractor.

13. Legal Services –A legal services agreement is required with your attorney and bond counsel, if applicable, for any legal work needed in connection with this project. The agreement should stipulate an hourly rate for the work, with a "not to exceed" amount for the services, including reimbursable expenses. RUS Bulletin 1780-7, "Legal Services Agreement," or similar format may be used. The Agency will provide concurrence prior to advertising for bids. Any changes to the fees or services spelled out in the original agreement must be reflected in an amendment to the agreement and have prior Agency concurrence.

14. **<u>Property Rights</u>** - Prior to advertising for bids, you and your legal counsel must furnish satisfactory evidence that you have adequate continuous and valid control over the lands and rights-of-way needed for the project. Acquisitions of necessary land and rights must be accomplished in accordance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act. Such control over the lands and rights will be evidenced by the following:

a. **Right-of-Way Map** – Your engineer will provide a map clearly showing the location of all lands and rights-of-way needed for the project. The map must designate public and private lands and rights and the appropriate legal ownership thereof.
b. **Form RD 442-20, "Right-of-Way Easement"** – This form, or similar format, may be used to obtain any necessary easements for the proposed project.
c. **Form RD 442-21, "Right-of-Way Certificate"** – You will provide a certification on this form that all right-of-way requirements have been obtained for the proposed project.
d. **Form RD 442-22, "Opinion of Counsel Relative to Rights-of-Way"** – Your attorney will provide a certification and legal opinion on this form addressing rights-of-way, easements, and title.
e. Preliminary Title Work (Title Opinion) – When applicable, your attorney or title company will provide a preliminary title opinion for any property related to the facility, currently owned and to be acquired, along with copies of deeds, contracts or options for purchasing said property. Form RD 1927-9, "Preliminary Title Opinion," may be used.
e. Title Work (Title Insurance when a security interest is not taken in the real estate) – When applicable, your attorney or title company will secure an Owners' Title Insurance policy on all real estate to be acquired in connection with this project. This policy should be in an amount equal to the market value of the property as improved.

The approving official may waive title defects or restrictions, such as utility easements, that do not adversely affect the suitability, successful operation, security value, or transferability of the facility. Any such waivers must be provided by the approving official in writing prior to closing or the start of construction, whichever occurs first.

You are responsible for the acquisition of all property rights necessary for the project and for determining that prices paid are reasonable and fair. The Agency may require an appraisal by an independent appraiser or Agency employee in order to validate the price to be paid.

15. **<u>System Policies, Procedures, Contracts, and Agreements</u>** – The facility must be operated on a sound business plan which involves adopting policies, procedures, and/or ordinances outlining the conditions of service and use of the proposed system. Mandatory connection policies should be used where enforceable. The policies, procedures, and/or ordinances must contain an effective collection policy for accounts not paid in full within a specified number of days after the date of billing. They should include appropriate late fees, specified timeframes for disconnection of service, and reconnection fees. A draft of these policies, procedures, and/or ordinances must be submitted for Agency review and concurrence, along with the documents below, before closing instructions may be issued unless otherwise stated.

a. **Conflict of Interest Policy** – Prior to obligation of funds, you must certify in writing that your organization has in place up-to-date written standards of conduct covering conflict of interest. The standards of conduct must include disciplinary actions in the event of a violation by officers,

employees, or agents of the borrower. The standards identified herein apply to any parent, affiliate or subsidiary organization of the borrower that is not a state or local government, or Indian Tribe. Policies and accompanying documents shall be furnished to Rural Development upon request.

You must also submit a disclosure of planned or potential transactions related to the use of Federal funds that may constitute or present the appearance of personal or organizational conflict of interest. Disclosure must be in the form of a written letter signed and dated by the applicant's official. A negative disclosure in the same format is required if no conflicts are anticipated.

Sample conflict of interest policies may be found at the National Council of Nonprofits website, https://www.councilofnonprofits.org/tools-resources/conflict-of-interest, or in Internal Revenue Service Form 1023, Appendix A, "Sample Conflict of Interest Policy," at http://www.irs.gov/pub/irs-pdf/i1023.pdf. Though these examples reference non-profit corporations, the requirement applies to all types of Agency borrowers.

Assistance in developing a conflict of interest policy is available through Agency-contracted technical assistance providers if desired.

b. **Sewer User Agreement** – Projects not involving mandatory connection require users to execute a Water/Sewer Users Agreement. The draft agreement must receive Agency concurrence prior to advertising for bids. RUS Bulletin 1780-9, "Water Users Agreement," or similar format may be used.

c. **Contracts for Other Services/Lease Agreement** – Drafts of any contracts or other forms of agreements for other services, including audit, management, operation, and maintenance, or lease agreements covering real property essential to the successful operation of the facility, must be submitted to the Agency for review and concurrence prior to advertising for bids.

d. **Parity/Intercreditor Agreement** – Projects with parity liens must have in place a written agreement between the parity lenders. The draft agreement must receive Agency concurrence prior to advertising for bids.

Fully executed copies of any policies, procedures, ordinances, contracts, or agreements above must be submitted prior to loan closing, with the exception of the conflict of interest policy, which must be in place prior to obligation of funds.

16. Closing Instructions – The Agency will prepare closing instructions as soon as the requirements of the previous paragraphs are complete, as well as a draft of the security instrument(s). Both your bond and legal counsel must comply with these instructions when closing the Agency loan/grant. will change over each successive year and user rates will need to be adjusted on a regular basis.

17. System Users – This letter of conditions is based upon your indication at application that there will be at least 173 residential users, 73 non-residential users, and no bulk / wholesale users on the existing and/or proposed system when construction is completed.

Before the Agency can agree to the project being advertised for construction bids, you must certify that the number of users indicated at application are currently using the system or signed up to use the system once it is operational.

If the actual number of existing and/or proposed users that have signed up for service is less than the number indicated at the time of application, you must provide the Agency with a written plan on how you will obtain the necessary revenue to adequately cash flow the expected operation, maintenance, debt service, and reserve requirements of the proposed project (e.g., increase user rates, sign up an adequate number of other users, reduce project scope, etc.). Similar action is required if there is cause to modify the anticipated flows or volumes presented following approval.

If you are relying on mandatory connection requirements, you must provide evidence of the authorizing ordinance or statute along with your user certification.

If project does not involve mandatory connections, you must provide the following:

a. **Positive Program to Encourage Connections** – You must provide a positive program to encourage connection by all users as soon as service is available. The program will be reviewed by the Agency prior to advertising for bids. A guide for developing your positive program is available from the Agency.
b. **Sewer User Agreements** – Users will be required to execute a Sewer Users Agreement prior to advertising for construction bids. The amount of cash contributions required will be set by you and concurred with by the Agency. Contributions should be an amount high enough to indicate sincere interest on the part of the potential user, but not so high as to preclude service to low-income families, and must have a deadline for the contribution to be used or forfeited. RUS Bulletin 1780-9, "Water Users Agreement," or similar agreement may be used.
c. **Service Declination Statement** – Each potential user who is located along planned lines and declines the offered service will be provided an opportunity to sign a "Service Declination Statement."

18. Construction Account – A separate construction account, subject to Agency audit, will be established for deposit of all project funds. These funds must be deposited in a bank with Federal Deposit Insurance Corporation (FDIC) insurance coverage. **If the balance in the account containing these funds exceeds the FDIC insurance coverage, the excess amount must be collaterally secured.** A separate account will not be required for Federal funds and other funds; however, the recipient must be able to separately identify, report and account for all Federal funds, including the receipt, obligation and expenditure of funds. Financial institutions or depositaries accepting deposits of public funds and providing other financial agency services to the Federal Government are required to pledge adequate, acceptable securities as collateral, in accordance with 202.6, 31 CFR Part 202. All funds in the account will be secured by a collateral pledge equaling at least 100 percent of the highest amount of funds expected to be deposited in the construction account at any one time.

19. Interim Financing – The Agency's policy is to utilize interim financing for all loans exceeding $500,000. Prepayment penalties on interim financing are not allowed. Borrowers are required to seek interim financing initially from private or cooperative lenders if funds can be borrowed at reasonable interest rates on an interim basis from those sources for the construction period. The fact that a commercial lender's rates are higher than current Agency interest rates does not necessarily mean that the commercial rate is not reasonable.

20. Proposed Operating Budget – You must establish and/or maintain a rate schedule that provides adequate income to meet the minimum requirements for operation and maintenance (O and M), debt service, and reserves. Prior to advertising for bids, you must submit a proposed annual operating budget to the Agency, as well as your proposed rate schedule. The operating budget should be based on a typical

year cash flow after completion of the construction phase and should be signed by the appropriate official of your organization. Form RD 442-7, "Operating Budget," or similar format may be utilized for this purpose. It is expected that O and M expenses will change over each successive year and user rates will need to be adjusted on a regular basis.

Technical assistance is available at no cost to help you evaluate and complete a rate analysis on your system. This assistance is available free to your organization. If you are interested, please contact our office for information.

21. Permits –The owner or responsible party will be required to obtain all applicable permits for the project, prior to advertising for bids. The consulting engineer must submit written evidence that all applicable permits required prior to construction have been obtained with submission to the Agency of the final plans, specifications, and bid documents.

22. Risk and Resilience Assessment/Emergency Response Plan (RRA/ERP) – The Agency requires all financed water and wastewater systems to have a RRA/ERP in place. New water or wastewater systems must provide a certification that an ERP is complete prior to the start of operation, and a certification that an RRA is complete must be submitted within one year of the start of operation. Borrowers with existing systems must provide a certification that an RRA/ERP has been completed prior to advertising for bids. Technical assistance is available in preparing these documents at no cost to you.

The RRA/ERP documents themselves are not submitted to the Agency. The RRA/ERP must address potential impacts from natural disasters and other emergency events. It should include plans to address impacts of flash flooding in areas where severe drought or wildfires occur. The documents should be reviewed and updated every five years at a minimum.

23. Bid Authorization - Once all the conditions outlined in Section III of this letter have been met, the Agency will authorize you to advertise the project for construction bids. Such advertisement must be in accordance with applicable State statutes.

SECTION IV - REQUIREMENTS PRIOR TO START OF CONSTRUCTION

24. Disbursement of Agency Funds - Agency funds will be disbursed electronically into the construction account as they are needed. SF 3881, "ACH Vendor/Miscellaneous Payment Enrollment Form," must be completed and submitted to the Agency prior to commencement of construction.

The order of disbursement is as follows: 1) Applicant contribution, 2) other funding sources, 3) interim financing or Agency loan funds, and 4) Agency grant funds. Interim financing or Agency loan funds will be expended after all other funding sources unless a written agreement is reached with all other funding sources on how funds are to be disbursed prior the first disbursement. Interim financing funds or Agency loan funds must be used prior to the use of Agency grant funds. Agency Grant funds must not be disbursed prior to loan funds except as authorized in 7 CFR 1780.45(d).

Grant funds are to be deposited in an interest-bearing account (exception provided below) in accordance with 2 CFR Part 200 and interest in excess of $500 per year remitted to the Agency. The funds should be disbursed by the recipient immediately upon receipt, and there should be little interest accrual on the Federal funds. Recipients shall maintain advances of Federal funds in interest-bearing accounts, unless:

- The recipient receives less than $120,000 in Federal awards per year.
- The best reasonably available interest-bearing account would not be expected to earn interest in excess of $500 per year on Federal cash balances.
- The depository would require an average or minimum balance so high that it would not be feasible within the expected Federal and non-Federal cash resources.
- A foreign government or banking system prohibits or precludes interest-bearing accounts.

25. Bid Tabulation – Immediately after bid opening, you must provide the Agency with the bid tabulation and your engineer's evaluation of bids and recommendations for contract awards. If the Agency agrees that the construction bids received are acceptable, adequate funds are available to cover the total project costs, and all the requirements of Section III of this letter have been satisfied, the Agency will authorize you to issue the Notice of Award.

a. **Cost Overruns –** If bids are higher than expected, or if unexpected construction problems are encountered, you must utilize all options to reduce cost overruns. Negotiations, redesign, use of bidding alternatives, rebidding or other means will be considered prior to commitment of subsequent funding by the Agency. Any requests for subsequent funding to cover cost overruns will be contingent on the availability of funds. Cost overruns exceeding 20 percent of the development cost at time of loan or grant approval or where the scope of the original purpose has changed will compete for funds with all other applications on hand as of that date.
b. **Excess Funds** - If bids are lower than anticipated at time of obligation, excess funds must be deobligated prior to start of construction except in the cases addressed in this paragraph. In cases where the original PER for the project included items that were not bid, or were bid as an alternate, the State Office official may modify the project to fully utilize obligated funds for those items. Amendments to the PER, ER, and Letter of Conditions may be needed for any work not included in the original project scope. In all cases, prior to start of construction, excess funds will be deobligated, with grant funds being deobligated first. Excess funds do not include contingency funds as described in this letter.

26. Suspension and Debarment Screening – In accordance with 2 CFR Part 180, Subpart C, as a condition of the transaction and the responsibilities to persons at the next lower tier with whom you enter into transactions, you must conduct screening for suspension and debarment of lower tier recipients (e.g., vendors, contractors, etc.).

27. Contract Review – Your attorney will certify that the executed contract documents, including performance and payment bonds, if required, are adequate and that the persons executing these documents have been properly authorized to do so in accordance with 7 CFR 1780.61(b).

Once your attorney has certified that they are acceptable, the contract documents will be submitted to the Agency for concurrence. Construction cannot commence until the Agency has concurred in the construction contracts.

28. Final Rights of Way – Your attorney or title company must furnish a separate final title opinion or Title Insurance Policy on all real property related to the facility, now owned and to be acquired for this project, as of the day of loan closing or start of construction, whichever occurs first. Form RD 1927-10, "Final Title Opinion" may be used.

If any of the right-of-way forms listed previously in this letter contain exceptions that do not adversely affect the suitability, successful operation, security value, or transferability of the facility, the approving official must provide a written waiver prior to the issuance of the Notice to Proceed.

29. Insurance and Bonding Requirements - Prior to the start of construction or loan closing, whichever occurs first, you must acquire and submit to the Agency proof of the types of insurance and bond coverage for the borrower shown below. The use of deductibles may be allowed, providing you have the financial resources to cover potential claims requiring payment of the deductible. The Agency strongly recommends that you have your engineer, attorney, and insurance provider(s) review proposed types and amounts of coverage, including any exclusions and deductible provisions. It is your responsibility and not that of the Agency to assure that adequate insurance and fidelity bond coverage is maintained.

a. **General Liability Insurance** – Include vehicular coverage.
b. **Workers' Compensation** – In accordance with appropriate State laws.
c. **Guaranty or Fidelity Insurance**–Coverage for all persons who have access to funds, including persons working under a contract or management agreement. Coverage may be provided either for all individual positions or persons, or through "blanket" coverage providing protection for all appropriate employees. Each position is to be insured in an amount equal to the maximum amount of funds expected to be under the control of that position at any one time. The minimum coverage allowed will be an amount equal to the total annual debt service payment on the Agency loans. The coverage may be increased during construction based on the anticipated monthly advances.
d. **National Flood Insurance** - If the project involves acquisition or construction in a designated special flood area, the community in which the acquisition or construction is situated must be currently participating in the national flood insurance program. Additionally, if the project involves acquisition or constriction in designated special flood or mudslide prone areas, a flood insurance policy must be in place at the time of loan closing.
e. **Real Property Insurance** – Fire and extended coverage will normally be maintained on all structures except reservoirs, pipelines and other structures if such structures are not normally insured, and subsurface lift stations except for the value of electrical and pumping equipment. The Agency will be listed as mortgagee on the policy when the Agency has a lien on the property. Prior to the acceptance of the facility from the contractor(s), you must obtain real property insurance (fire and extended coverage) on all facilities identified above.

The Agency is to be listed as "Other Insured" so as to receive notifications on all insurance, regardless of security. Insurance types described above are required to be continued throughout the life of the loan. See Section VII.

30. Initial Civil Rights Compliance Review – The Agency will conduct an initial civil rights compliance review of the borrower prior to loan closing or start of construction, whichever occurs first, in accordance with 7 CFR 1901, Subpart E. You are expected to comply with the completion of the review, including the furnishing of any documents, records, or other applicable material.

SECTION V – REQUIREMENTS PRIOR TO CLOSING

31. Interim Financing. Interim financing is being used. Generally, loan closing will occur near the end of construction when interim funds are fully disbursed. Documents detailed above from Sections II and III regarding security, electronic payments (Form 3550-28), and system policies, procedures, contracts, and agreements must be adopted and/or executed and submitted to the Agency prior to loan closing.

32. Electronic Payments – Payments will be made through an electronic preauthorized debit system. You will be required to complete Form RD 3550-28, "Authorization Agreement for Preauthorized Payments," for all new and existing indebtedness to the Agency prior to loan closing.

33. Other Requirements – All requirements contained in the Agency's closing instructions, as well as any requirements of your bond counsel and/or attorney, must be met prior to loan closing.

a. System for Award Management. You will be required to maintain a Dun and Bradstreet Data Universal Numbering System (DUNS) number and maintain an active registration in the System for Award Management (SAM) database. Renewal can be completed online at: http://sam.gov. This registration must be renewed and revalidated every 12 months for as long as there is an active loan, grant, or guaranteed loan with the Agency.

To ensure the information is current, accurate and complete, and to prevent the SAM account expiration, the review and updates must be performed within 365 days of the activation date, commonly referred to as the expiration date. The registration process may take up to 10 business days. (See 2 CFR Part 25 and the "Help" section at http://sam.gov).

b. Litigation. You are required to notify the Agency within 30 days of receiving notification of being involved in any type of litigation prior to loan closing or start of construction, whichever occurs first. Additional documentation regarding the situation and litigation may be requested by the Agency.

c. Certified Operator. Evidence must be provided that your system has or will have a certified operator, as defined by applicable State or Federal requirements, available prior to the system becoming operational, or that a suitable supervisory agreement with a certified operator is in effect.

SECTION VI – REQUIREMENTS DURING CONSTRUCTION AND POST CONSTRUCTION

34. Construction Completion Timeframe – Following the benchmarks established in Section I, Item 4, Project Timeline, all projects should be completed and Agency funds fully disbursed within three years of the date of obligation. If funds are not disbursed within three years of obligation and you have not already done so per Section I, Item 4, you must submit a written request for extension of time to the Agency with adequate justification of the circumstances, including any beyond your control. The request must be submitted at least 90 days prior to the end of the three-year timeframe and include a revised estimated date of completion. The Agency will typically only allow one extension. Subsequent requests for waivers beyond the initial extension or requests that exceed five years from the initial date of obligation will be submitted to the RUS, Water and Environmental Programs for consideration. The Agency retains the right to de-obligate any loan and/or grant monies, or take other appropriate action, related to unliquidated funds that exceed the timeframes above and are not under an active extension.

35. Resident Inspector(s) – Full-time inspection is required unless you request an exception. Such requests must be made in writing and the Agency must provide written concurrence. Inspection services are to be provided by the consulting engineer unless other arrangements are requested in writing and concurred with by the Agency. A resume of qualifications of any resident inspector(s) will be submitted

to the owner and Agency for review and concurrence prior to the pre-construction conference. The resident inspector(s) must attend the preconstruction conference.

36. Preconstruction Conference – A preconstruction conference will be held prior to the issuance of the Notice to Proceed. The consulting engineer will review the planned development with the Agency, owner, resident inspector, attorney, contractor, other funders, and other interested parties, and will provide minutes of this meeting to the owner and Agency.

37. Inspections - The Agency requires a preconstruction conference, pre-final, final, and warranty inspections. Your engineer will schedule a warranty inspection with the contractor and the Agency before the end of the [one-year] warranty period to address and/or resolve any outstanding warranty issues. The Agency will conduct an inspection with you of your records management system at the same time and will continue to inspect the facility and your records system every three years for the life of the loan. See Section VII of this letter.

38. Change Orders – A Change Order must be submitted for all modifications to the approved scope of work, including existing contracts. This includes non-physical modifications such as any time extension requests. Prior written Agency concurrence is required for all Change Orders.

39. Payments – Prior Agency concurrence is required for all invoices and requests for payment before Agency funds will be released. Requests for payment related to a contract or service agreement will be signed by the owner, project engineer, and contractor or service provider prior to Agency concurrence. Invoices not related to a construction contract or service agreement will include the owner's written concurrence.

40. Use of Remaining Funds – As stated above, applicant contribution and connection or tap fees will be the first funds expended in the project. Funds remaining after all costs incident to the basic project have been paid or provided will be handled as follows:

a. Funds remaining after the applicant contribution and connection fees may be considered in direct proportion to the amounts of funding obtained from each source. The use of Agency funding will be limited to eligible loan and grant purposes, provided the use will not result in major changes to the original scope of work and the purpose of the loan and grant remains the same.
b. Any reductions in the Agency funding will be first applied to the grant funds.
c. Grant funds not expended for authorized purposes will be cancelled (de-obligated) within 90 days of final completion of project. Prior to actual cancellation, you, your attorney and engineer will be notified of the Agency's intent to cancel the remaining funds and given appropriate appeal rights.
d. Under no circumstances is it appropriate to use remaining funds as contributions to a new project outside the scope of the funded project.
e. Loan funds that are not needed will be cancelled (de-obligated) prior to loan closing.

41. Technical, Managerial and Financial Capacity - It is required that members of the Board of Directors, City Council members, trustees, commissioners and other governing members possess the necessary technical, managerial, and financial capacity skills to consistently comply with pertinent Federal and State laws and requirements. It is recommended members receive training within one year of appointment or election to the governing board, and a refresher training for all governing members on a routine basis. The content and amount of training should be tailored to the needs of the individual and the

utility system. Technical assistance providers are available to provide this training for your organization, often at no cost. Contact the Agency for additional information.

42. Reporting Requirements Related to Expenditure of Funds -- An annual audit under 2 CFR 200 is required if you expend $750,000 or more in Federal financial assistance per fiscal year. The total Federal funds expended from all sources shall be used to determine Federal financial assistance expended. Expenditures of interim financing are considered Federal expenditures.

All audits are to be performed in accordance with 2 CFR Part 200, as adopted by USDA through 2 CFR Part 400. Further guidance on preparing an acceptable audit can be obtained from the Agency. The audit must be prepared by an independent licensed Certified Public Accountant, or a State or Federal auditor if allowed by State law and must be submitted within 9 months of your fiscal year end. Both the audit and accompanying management report must be submitted for review.

If an audit is required, you must enter into a written agreement with the auditor and submit a copy of that agreement to the Agency prior to the advertisement of construction bids. The audit agreement may include terms and conditions that the borrower and auditor deem appropriate; however, the agreement should include the type of audit to be completed, the time frame in which the audit will be completed, and how irregularities will be reported.

SECTION VII – SERVICING REQUIREMENTS DURING THE TERM OF THE LOAN

43. Prepayment and Extra Payments - Prepayments of scheduled installments, or any portion thereof, may be made at any time at the option of borrower, with no penalty.

Security instruments, including bonding documents, must contain the following language regarding extra payments, unless prohibited by State statute:

> *Prepayments of scheduled installments, or any portion thereof, may be made at any time at the option of borrower. Refunds, extra payments and loan proceeds obtained from outside sources for the purpose of paying down the Agency debt, shall, after payment of interest, be applied to the installments last to become due under this note and shall not affect the obligation of borrower to pay the remaining installments as scheduled in your security instruments.*

44. Annual Financial Reporting/Audit Requirements – You are required to submit an annual financial report at the end of each fiscal year. The annual report will be certified by the appropriate organization official, and will consist of financial information, a current rate schedule, and listing of board members with their terms. Financial statements must be prepared on an accrual basis of accounting in accordance with generally accepted accounting principles (GAAP). The annual report will include separate reporting for each water and waste disposal facility, and itemized cash accounts by type (debt service, short-lived assets, etc.) under each facility. All records, books and supporting material are to be retained for three years after the issuance of the annual report. Technical assistance is available, at no cost, with preparing financial reports.

The type of financial information that must be submitted is specified below:

a. **Audits** – An audit under the Single Audit Act is required if you expend $750,000 or more in Federal financial assistance per fiscal year. The total Federal funds expended from all sources

shall be used to determine Federal financial assistance expended. Expenditures of interim financing are considered Federal expenditures.

See Section VI for additional information regarding audits.

b. **Financial Statements** – If you expend less than $750,000 in Federal financial assistance per fiscal year, you may submit financial statements in lieu of an audit which include, at a minimum, a balance sheet and an income and expense statement. You may use Form RD 442-2, "Statement of Budget, Income and Equity," and 442-3, "Balance Sheet," or similar format to provide the financial information. The financial statements must be signed by the appropriate borrower official and submitted within 60 days of your fiscal year end.

c. **(if applicable) Quarterly Reports** – Quarterly Income and Expense Statements will be required until the processing office waives this requirement. You may use Form RD 442-2, "Statement of Budget, Income and Equity," or similar format to provide this information. The reports are to be signed by the appropriate borrower official and submitted within 30 days of each quarter's end. The Agency will notify you in writing when quarterly reports are no longer required.

45. Annual Budget and Projected Cash Flow - Thirty days prior to the beginning of each fiscal year, you will be required to submit an annual budget and projected cash flow to this office. The budget must be signed by the appropriate borrower official. Form RD 442-2, "Statement of Budget, Income and Equity," or similar format may be used.

Technical assistance is available at no cost to help you evaluate and complete a rate analysis on your system, as well as completing the annual budget.

46. Graduation - By accepting this loan, you are also agreeing to refinance (graduate) the unpaid loan balance in whole, or in part, upon request of the Government. If at any time the Agency determines you can obtain a loan for such purposes from responsible cooperative or private sources at reasonable rates and terms, you will be requested to refinance. Your ability to refinance will be assessed every other year for those loans that are five years old or older.

47. Security/Operational Inspections – The Agency will inspect the facility and conduct a review of your operations and records management system and conflict of interest policy every three years for the life of the loan. You must participate in these inspections and provide the required information.

48. System for Award Management. You will be required to maintain a Dun and Bradstreet Data Universal Numbering System (DUNS) number and maintain an active registration in the System for Award Management (SAM) database. Further information can be found at paragraph 34 of this letter.

49. Risk and Resiliency Assessment/Emergency Response Plan (RRA/ERP) – The RRA/ERP is further outlined under Section III of this letter. You will be required to submit a certification to the servicing office every five years that the RRA/ERP is current and covers all sites related to the facility. The RRA/ERP documents themselves are not submitted to the Agency. The RRA/ERP must address potential impacts from natural disasters and other emergency events. It should include plans to address impacts of flash flooding in areas where severe drought or wildfires occur. Technical assistance is available in preparing these documents at no cost to you.

50. Insurance. – Insurance requirements are further outlined in Section IV of this letter. You will be required to maintain insurance on the facility and employees as previously described in this letter for the life of the loan.

51. Statutory and National Policy Requirements – As a recipient of Federal funding, you are required to comply with U.S. statutory and public policy requirements, including but not limited to:

a. **Section 504 of the Rehabilitation Act of 1973** – Under Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794), no handicapped individual in the United States shall, solely by reason of their handicap, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Agency financial assistance.

b. **Civil Rights Act of 1964** – All borrowers are subject to, and facilities must be operated in accordance with, Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.) and 7 CFR 1901, Subpart E, particularly as it relates to conducting and reporting of compliance reviews. Instruments of conveyance for loans and/or grants subject to the Act must contain the covenant required by Paragraph 1901.202(e) of this Title.

c. **The Americans with Disabilities Act (ADA) of 1990** – This Act (42 U.S.C. 12101 et seq.) prohibits discrimination on the basis of disability in employment, State and local government services, public transportation, public accommodations, facilities, and telecommunications.

d. **Age Discrimination Act of 1975** – This Act (42 U.S.C. 6101 et seq.) provides that no person in the United States shall on the basis of age, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.

e. **Limited English Proficiency (LEP) under Executive Order 13166** - LEP statutes and authorities prohibit exclusion from participation in, denial of benefits of, and discrimination under Federally-assisted and/or conducted programs on the ground of race, color, or national origin. Title VI of the Civil Rights Act of 1964 covers program access for LEP persons. LEP persons are individuals who do not speak English as their primary language and who have a limited ability to read, speak, write, or understand English. These individuals may be entitled to language assistance, free of charge. You must take reasonable steps to ensure that LEP persons receive the language assistance necessary to have meaningful access to USDA programs, services, and information your organization provides. These protections are pursuant to Executive Order 13166 entitled, “Improving Access to Services by Persons with Limited English Proficiency” and further affirmed in the USDA Departmental Regulation 4330-005, “Prohibition Against National Origin Discrimination Affecting Persons with Limited English Proficiency in Programs and Activities Conducted by USDA.”

f. **Controlled Substances Act** - Even though state law may allow some activities, as a recipient of Federal funding, you are subject to the Controlled Substances Act. Specific questions about the Controlled Substances Act should be directed to the Servicing Official who will contact the Office of General Counsel, as appropriate.

52. <u>Compliance Reviews and Data Collection</u> – Agency financial programs must be extended without regard to race, color, religion, sex, national origin, marital status, age, or physical or mental handicap. You must display posters (provided by the Agency) informing users of these requirements, and the Agency will monitor your compliance with these requirements during regular compliance reviews.

The Agency will conduct regular compliance reviews of the borrower and its operation in accordance with 7 CFR Part 1901, Subpart E, and 36 CFR 1191, Americans with Disabilities Act (ADA) Accessibility Guidelines for Buildings and Facilities; Architectural Barriers Act (ABA) Accessibility Guidelines. Compliance reviews will typically be conducted in conjunction with the security inspections described in this letter.

If beneficiaries (users) are required to complete an application or screening for the use of the facility or service that you provide, you must request and collect data by race (American Indian or Alaska Native, Asian, Black or African American, White); ethnicity (Hispanic or Latino, Not Hispanic or Latino); and by sex. The Agency will utilize this data as part of the required compliance review.

<u>SECTION VIII – REMEDIES FOR NON-COMPLIANCE</u>

Non-compliance with the conditions in this letter or requirements of your security documents will be addressed under the provisions of Agency regulations, statutes, and other applicable policies.

We look forward to working with you to complete this project. If you have any questions, please contact Michael Dean at 928-910-4471 or by e-mail at Michael.dean2@usda.gov.

Sincerely,

JEFFREY A. HAYS

Appendix A

A. Reporting Total Compensation of Recipient Executives

In the rare instance in which all of the following apply, please contact your POB Specialist for language to include in the LOC:

1. The total Federal funding authorized to date under this award is $30,000 or more;

2. In the preceding fiscal year, the applicant received—

   (A) 80 percent or more of their annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act, as defined at 2 CFR 170.320 (and subawards); and

   (B) $25,000,000 or more in annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act, as defined at 2 CFR 170.320 (and subawards); and

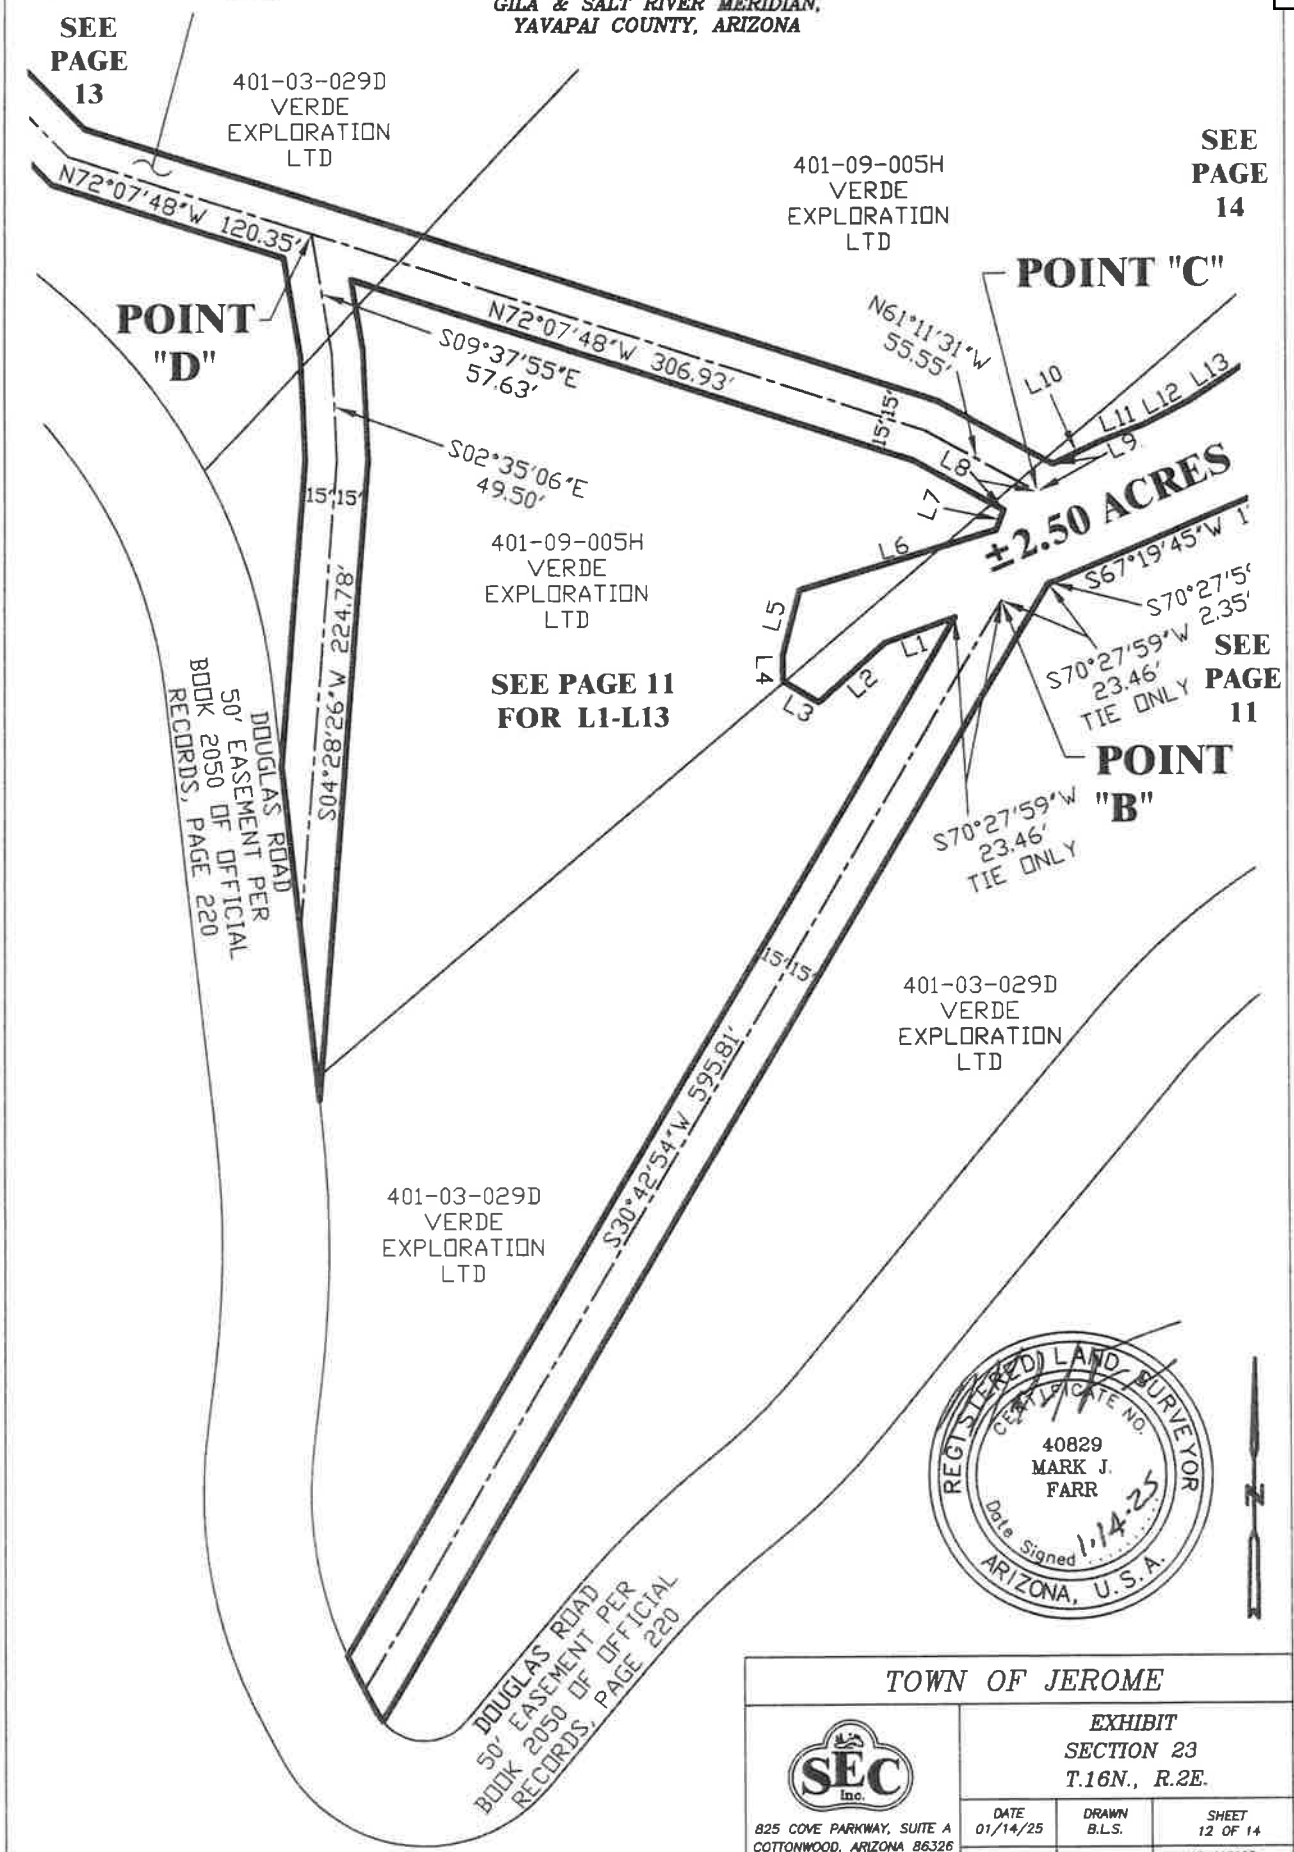
3. The public does not have access to information about the compensation of the executives through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986. (To determine if the public has access to the compensation information, see the U.S. Security and Exchange Commission total compensation filings at http://www.sec.gov/answers/execomp.htm.)

B. Subaward and Subrecipients

In the rare instance in which there is a subrecipient in the project, please contact your POB Specialist for language to include in the LOC:

Subrecipient means an entity that:

i. Receives a subaward from the recipient under this award; and



ii. Is accountable to the recipient for the use of the Federal funds provided by the subaward.

a. Subaward means an award provided by a pass-through entity to a subrecipient for the subrecipient to carry out part of a Federal award received by the pass-through entity. It does not include payments to a contractor or payments to an individual that is a beneficiary of a Federal program.

The bid date is being extended to **Wednesday, June 3rd at 2:30pm.**

Attachments:

1. None.

Clarifications

Re: Generator

1. The AIC rating for the automatic transfer switch shall be 42kAIC min.
2. The SPD for the generator and ATS shall be 200kA, in accordance with specification section 26 4313 – 2.02.

Questions

1. The plan has two pages of standard steel stud details; however, we can only identify the bathroom wall as the lone steel stud framed item in the plan set. Are there other areas where steel stud framing is intended?

   Response: *The bathroom wall and center dividing wall between the blower room and admin room are to be steel stud framed walls.*

2. Sunshade – It appears the roof of the sunshade is B deck over steel beams. We assume there is a roofing system intended for this structure, please provide details on how this roof is to be finished.

   Response: *The sunshade is 1.5" x 20 GA steel (B deck) over steel beams. No additional roofing system is required.*

3. Roof over blower room and admin room. S2.01 framing plan indicates this roof structure is a flat roof per detail 202 and 204 on S4.1. M7.0 shows some standing seam roof in the detail, the extent of which is unclear, along with the East elevation on sheet A4.0 may show standing seam roofing on the fascia. Please provide a roof plan with details on the intended roof structure and finishes and details of overhand framing if required as indicated on sheet A1.0.

   Response: *To achieve the overhang to the east side of the blower/admin building the structural roofing plan will be modified to show the deck on top of the wall and rotate the framing 90 degrees and extend over the CMU wall. The roofing system shall be provided above the structural deck and consists of a minimum R-38 roof panel insulation, per*

Yavapai County, and a standing seam metal roof system. Fascia, trim, attachments, and roofing support components shall be provided in accordance with the roofing manufacturer's recommendations and best practices. The roof shall have a minimum slope of 0.25:12 away from the SBR basins. Structural markups to be provided in subsequent addenda.

4. There are stoops drawn on the plan set outside of the double doors at the blower room and man door at the admin area. We do not find that they are called out anywhere to be included in the work. Are these part of the base bid or future amenities?

   Response: *The stoops are to be included in the work. Stoops and housekeeping pads shall be constructed per the 12" Concrete Equipment Pad Detail located on Sheet S1.3. Final dimensions shall be determined after equipment and building layout and sizing has been finalized.*

5. Electrical – P130 on sheet E3.1 is not on the conduit and wire schedule, please provide information for this run.

   Response: *P130 is a spare conduit. The conduit labeled P130 on the electrical site plan should be P132.*

6. We would like to ask for an extension on the bid due date.

   Response: *The bid due date has been extended to Wednesday, June 3rd at 2:30pm. The location will remain the same.*

7. Is the center wall in the blower/admin masonry?

   Response: *The center wall shall be metal studded wall, see typical steel stud wall per structural sheets.*

8. What type of framing is required for the bathroom walls?

   Response: *The bathroom walls shall be metal studded walls, see typical steel stud wall per structural sheets.*

9. What roof system is required? Sheet M7.0 states standing seam metal sloped roof but what support system?

   Response: *See response to question 3.*

10. Is the roof insulated? If so, what is required?

    Response: *Minimum R-38 roof panel insulation shall be supplied as required by Yavapai County.*

BID FORM FOR CONSTRUCTION CONTRACT
ADDENDUM 2 VERSION

Contractor Name: Fann Environmental, LLC

The terms used in this Bid with initial capital letters have the meanings stated in the Instructions to Bidders, the General Conditions, and the Supplementary Conditions.

ARTICLE 1—OWNER AND BIDDER

1.01 This Bid is submitted to:

Town of Jerome
Submitted electronically via email to tpierce@pacewater.com. Alternatively, Bidder may submit a hard copy the Town of Jerome, 600 Clark Street, Jerome, AZ 86331.

The undersigned Bidder proposes and agrees, if this Bid is accepted, to enter into an Agreement with Owner in the form included in the Bidding Documents to perform all Work as specified or indicated in the Bidding Documents for the prices and within the times indicated in this Bid and in accordance with the other terms and conditions of the Bidding Documents.

ARTICLE 2—ATTACHMENTS TO THIS BID

2.01 The following documents are submitted with and made a condition of this Bid:

A. Required Bid security;

B. List of Proposed Subcontractors;

~~C. List of Proposed Suppliers;~~

D. Evidence of authority to do business in the state of the Project; or a written covenant to obtain such authority within the time for acceptance of Bids;

E. Contractor's license number as evidence of Bidder's State Contractor's License or a covenant by Bidder to obtain said license within the time for acceptance of Bids;

F. Required Bidder Qualification Statement with supporting data; ~~and~~

G. If Bid amount exceeds $10,000, signed Compliance Statement (RD 400-6). Refer to specific equal opportunity requirements set forth in the Supplementary Conditions of the Construction Contract (EJCDC C-800);

H. If Bid amount exceeds $25,000, signed Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions (AD-1048);

I. If Bid amount exceeds $100,000, signed RD Instruction 1940-Q Exhibit A-1, Certification for Contracts, Grants, and Loans.

ARTICLE 3—BASIS OF BID—LUMP SUM BID AND UNIT PRICES

3.01 *Lump Sum Bids*

A. Bidder will complete the Work in accordance with the Contract Documents for the following lump sum (stipulated) price(s), together with any Unit Prices indicated in Paragraph 3.02:

ARTICLE 5—DELETED

ARTICLE 6—TIME OF COMPLETION

6.01 Bidder agrees that the Work will be substantially complete and will be completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions on or before the dates or within the number of calendar days indicated in the Agreement.

6.02 **[Deleted]**

6.03 **[Deleted]**

6.04 Bidder accepts the provisions of the Agreement as to liquidated damages.

ARTICLE 7—BIDDER'S ACKNOWLEDGEMENTS: ACCEPTANCE PERIOD, INSTRUCTIONS, AND RECEIPT OF ADDENDA

7.01 *Bid Acceptance Period*

A. This Bid will remain subject to acceptance for 60 days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Owner.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

7.02 *Instructions to Bidders*

A. Bidder accepts all of the terms and conditions of the Instructions to Bidders, including without limitation those dealing with the disposition of Bid security.

7.03 *Receipt of Addenda*

A. Bidder hereby acknowledges receipt of the following Addenda:

Addendum Number	Addendum Date
1	5/7/2026
2	5/11/2026
3	5/20/2026
4	5/27/2026
5	5/28/2026

7.04 **[Deleted]**

ARTICLE 8—BIDDER'S REPRESENTATIONS AND CERTIFICATIONS

8.01 *Bidder's Representations*

A. In submitting this Bid, Bidder represents the following:

1. Bidder has examined and carefully studied the Bidding Documents, including Addenda.
2. **[Deleted]**
3. Bidder is familiar with all Laws and Regulations that may affect cost, progress, and performance of the Work**, including all American Iron and Steel requirements.**
4. Bidder has carefully studied the reports of explorations and tests of subsurface conditions at or adjacent to the Site and the drawings of physical conditions relating to existing surface or subsurface structures at the Site that have been identified in the Supplementary Conditions, with respect to the Technical Data in such reports and drawings.
5. Bidder has carefully studied the reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that have been identified in the Supplementary Conditions, with respect to Technical Data in such reports and drawings.
6. Bidder has considered the information known to Bidder itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Bidding Documents; and the Technical Data identified in the Supplementary Conditions or by definition, with respect to the effect of such information, observations, and Technical Data on (a) the cost, progress, and performance of the Work; (b) the means, methods, techniques, sequences, and procedures of construction to be employed by Bidder, if selected as Contractor; and (c) Bidder's (Contractor's) safety precautions and programs.
7. Based on the information and observations referred to in the preceding paragraph, Bidder agrees that no further examinations, investigations, explorations, tests, studies,

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

or data are necessary for the performance of the Work at the Contract Price, within the Contract Times, and in accordance with the other terms and conditions of the Contract.

8. Bidder is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Bidding Documents.

9. Bidder has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Bidder has discovered in the Bidding Documents, and of discrepancies between Site conditions and the Contract Documents, and the written resolution thereof by Engineer is acceptable to Contractor.

10. The Bidding Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performance and furnishing of the Work.

11. The submission of this Bid constitutes an incontrovertible representation by Bidder that without exception the Bid and all prices in the Bid are premised upon performing and furnishing the Work required by the Bidding Documents.

8.02 *Bidder's Certifications*

A. The Bidder certifies the following:

1. This Bid is genuine and not made in the interest of or on behalf of any undisclosed individual or entity and is not submitted in conformity with any collusive agreement or rules of any group, association, organization, or corporation.

2. Bidder has not directly or indirectly induced or solicited any other Bidder to submit a false or sham Bid.

3. Bidder has not solicited or induced any individual or entity to refrain from bidding.

4. Bidder has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for the Contract. For the purposes of this Paragraph 8.02.A:

a. Corrupt practice means the offering, giving, receiving, or soliciting of anything of value likely to influence the action of a public official in the bidding process.

b. Fraudulent practice means an intentional misrepresentation of facts made (a) to influence the bidding process to the detriment of Owner, (b) to establish bid prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition.

c. Collusive practice means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish bid prices at artificial, non-competitive levels.

d. Coercive practice means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the execution of the Contract.

EJCDC® C-430, Bid Bond (Penal Sum Form).
Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. Bidder and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to pay to Owner upon default of Bidder the penal sum set forth on the face of this Bond. Payment of the penal sum is the extent of Bidder's and Surety's liability. Recovery of such penal sum under the terms of this Bond will be Owner's sole and exclusive remedy upon default of Bidder.
2. Default of Bidder occurs upon the failure of Bidder to deliver within the time required by the Bidding Documents (or any extension thereof agreed to in writing by Owner) the executed Agreement required by the Bidding Documents and any performance and payment bonds required by the Bidding Documents.
3. This obligation will be null and void if:
   3.1. Owner accepts Bidder's Bid and Bidder delivers within the time required by the Bidding Documents (or any extension thereof agreed to in writing by Owner) the executed Agreement required by the Bidding Documents and any performance and payment bonds required by the Bidding Documents, or
   3.2. All Bids are rejected by Owner, or
   3.3. Owner fails to issue a Notice of Award to Bidder within the time specified in the Bidding Documents (or any extension thereof agreed to in writing by Bidder and, if applicable, consented to by Surety when required by Paragraph 5 hereof).
4. Payment under this Bond will be due and payable upon default of Bidder and within 30 calendar days after receipt by Bidder and Surety of written notice of default from Owner, which notice will be given with reasonable promptness, identifying this Bond and the Project and including a statement of the amount due.
5. Surety waives notice of any and all defenses based on or arising out of any time extension to issue Notice of Award agreed to in writing by Owner and Bidder, provided that the total time for issuing Notice of Award including extensions does not in the aggregate exceed 120 days from the Bid due date without Surety's written consent.
6. No suit or action will be commenced under this Bond prior to 30 calendar days after the notice of default required in Paragraph 4 above is received by Bidder and Surety, and in no case later than one year after the Bid due date.
7. Any suit or action under this Bond will be commenced only in a court of competent jurisdiction located in the state in which the Project is located.
8. Notices required hereunder must be in writing and sent to Bidder and Surety at their respective addresses shown on the face of this Bond. Such notices may be sent by personal delivery, commercial courier, or by United States Postal Service registered or certified mail, return receipt requested, postage pre-paid, and will be deemed to be effective upon receipt by the party concerned.
9. Surety shall cause to be attached to this Bond a current and effective Power of Attorney evidencing the authority of the officer, agent, or representative who executed this Bond on behalf of Surety to execute, seal, and deliver such Bond and bind the Surety thereby.
10. This Bond is intended to conform to all applicable statutory requirements. Any applicable requirement of any applicable statute that has been omitted from this Bond will be deemed to be included herein as if set forth at length. If any provision of this Bond conflicts with any applicable statute, then the provision of said statute governs and the remainder of this Bond that is not in conflict therewith continues in full force and effect.
11. The term "Bid" as used herein includes a Bid, offer, or proposal as applicable.

Nathan J. Zangerle, Assistant Secretary

State of PENNSYLVANIA
County of MONTGOMERY ss

On this 14th day of February, 2025 before me personally appeared Nathan J. Zangerle, who acknowledged himself to be the Assistant Secretary of Liberty Mutual Insurance Company, The Ohio Casualty Company, and West American Insurance Company, and that he, as such, being authorized so to do, execute the foregoing instrument for the purposes therein contained by signing on behalf of the corporations by himself as a duly authorized officer.

IN WITNESS WHEREOF, I have hereunto subscribed my name and affixed my notarial seal at Plymouth Meeting, Pennsylvania, on the day and year first above written.

TERESA PASTELLA COMMONWEALTH OF PENNSYLVANIA NOTARY PUBLIC

Commonwealth of Pennsylvania - Notary Seal
Teresa Pastella, Notary Public
Montgomery County
My commission expires March 28, 2029
Commission number 1126044
Member, Pennsylvania Association of Notaries

By: _____
Teresa Pastella, Notary Public

This Power of Attorney is made and executed pursuant to and by authority of the following By-laws and Authorizations of The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company which resolutions are now in full force and effect reading as follows:

ARTICLE IV – OFFICERS: Section 12. Power of Attorney.
Any officer or other official of the Corporation authorized for that purpose in writing by the Chairman or the President, and subject to such limitation as the Chairman or the President may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Corporation to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact, subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Corporation by their signature and execution of any such instruments and to attach thereto the seal of the Corporation. When so executed, such instruments shall be as binding as if signed by the President and attested to by the Secretary. Any power or authority granted to any representative or attorney-in-fact under the provisions of this article may be revoked at any time by the Board, the Chairman, the President or by the officer or officers granting such power or authority.

ARTICLE XIII – Execution of Contracts: Section 5. Surety Bonds and Undertakings.
Any officer of the Company authorized for that purpose in writing by the chairman or the president, and subject to such limitations as the chairman or the president may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Company by their signature and execution of any such instruments and to attach thereto the seal of the Company. When so executed such instruments shall be as binding as if signed by the president and attested by the secretary.

Certificate of Designation – The President of the Company, acting pursuant to the Bylaws of the Company, authorizes Nathan J. Zangerle, Assistant Secretary to appoint such attorneys-in-fact as may be necessary to act on behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations.

Authorization – By unanimous consent of the Company's Board of Directors, the Company consents that facsimile or mechanically reproduced signature of any assistant secretary of the Company, wherever appearing upon a certified copy of any power of attorney issued by the Company in connection with surety bonds, shall be valid and binding upon the Company with the same force and effect as though manually affixed.

I, Renee C. Llewellyn, the undersigned, Assistant Secretary, The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company do hereby certify that the original power of attorney of which the foregoing is a full, true and correct copy of the Power of Attorney executed by said Companies, is in full force and effect and has not been revoked.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the seals of said Companies this 1st day of June, 2026.

LIBERTY MUTUAL INSURANCE COMPANY INCORPORATED 1912 MASSACHUSETTS

Michael S. Young
President

Summary of Experience

Mr. Young has 50 years of professional experience specializing in various aspects of water treatment and distribution, wastewater treatment and collection, effluent reuse and delivery methods hazardous materials and landfills. Mr. Young has extensive knowledge in the design, construction, operation and management of both water and wastewater facilities, development of capital improvement projects, and management of municipal utilities.

As the president of Fann Environmental, Mike is responsible for day-to-day business management, financial oversight, public relations and marketing. He provides hands-on project management, consulting, system troubleshooting, operator training, and new system start-up and commissioning.

Certifications

- Grade Four Water Distribution Operator Certification
- Grade Four Water Treatment Operator Certification
- Grade One Wastewater Treatment Operator Certification
- Grade Two Wastewater Collection Operator Certification

Education and Training

- Pump and Well Design Studies, University of California at Davis
- Water and Wastewater Utilities Management, Michigan State University
- Numerous community college courses in water and wastewater
- Ongoing continuing education and professional development training for Operator Certification
- Numerous seminars in supervisory, management, and computer skills

Professional Experience

2003 - Present · Fann Environmental, LLC

President, Project Manager

Relevant Projects

- CMAR City of Prescott Water Production and Intermediate Pump Stations
- Design-Build City of Prescott Chino Production Well Rehabilitation Program
- City of Page Job Order Contract Projects
- Various Navajo Tribal Utility Authority Projects
- Arizona Water Company Water Treatment Systems throughout Arizona

Consultant

- Municipal projects
- Water and wastewater system troubleshooting
- Overall utilities management
- ADEQ systems evaluations and technical assistance

Michael S. Young Professional Experience continued

1986 - 2003 · City of Prescott, Prescott AZ

Water Plant Operator

Water Production Foreman

Utilities Superintendent - Water and Wastewater Collections

Water Production Superintendent

As the Utilities and Water Superintendent, Mike was responsible for the entire water system that included 5 water production wells, one effluent recovery well, eight monitoring wells, 35 booster stations, 30 storage reservoirs and tanks, pumping facilities from fractional to 1000 horsepower, Chino Valley Well Field and high pressure booster station, over 80 pressure reducing stations, hundreds of miles of distribution and transmission mains from 2-inch to 36-inch. He was also involved in all water-related capital improvement projects, from the construction of storage reservoirs to design, build and operation of booster facilities.

1985 – 1988 · Hydro-Technology, Prescott AZ

Owner/Consultant

Water Production Foreman

As a water consulting business owner, Mike performed consulting services for numerous engineering firms and various private and public community water systems throughout Arizona. He participated in the design of a new production well facility for the City of Flagstaff and also provided over eight years of service to the City of Williams for troubleshooting their surface water treatment plant. He also provided consulting services for the Town of Show Low.

1978 - 1982 · Montecito Water District, Montecito CA

Water Treatment Supervisor

Water Operations and Maintenance Superintendent

As the water operations and maintenance superintendent, Mike was responsible for the operation and maintenance of the water system and was directly involved in a very extensive ground water basin study. During this time, pump testing was performed on over 25 wells with the drawdown and revolver being monitored closely on observation wells within the surrounding areas. During his tenure he attended the University of California at Davis where he studied well and pump design and completed a course through Michigan State University on supervision and management in the water/wastewater industry.

1975 – 1978 · Cachuma Operations and Maintenance Board, Santa Barbara CA

System Operator

As the system operator, Mike was responsible for controlling water flows up to 75 cos through the Tecolate Tunnel to maintain reservoir levels along the south coast from Goleta to Carpinteria, California. His responsibilities included coordinating with each water district and community starting with Goleta, Santa Barbara, Montecito, Summerland and Carpenter to meet their anticipated water demands. Other responsibilities included water quality sampling and field analysis to determine the level of the highest quality lake water and adjust the intake accordingly.

Paul Johnson

Operations Direct/Project Manager/Safety Manager

Summary of Experience

Mr. Johnson has over 30 years of professional experience in construction management and field operations. Paul is responsible for sourcing, hiring and scheduling of personnel. He collaborates with the superintendents, owners, subcontractors and suppliers to ensure that projects are being completed on time and within budget. Mr. Johnson maintains the company safety program working closely with employees and subcontractors to keep job sites in compliance and promoting a healthy safety culture. He is involved in estimating and bidding on negotiated and hard bid projects as well. Paul also manages the documentation of all of our current projects' progress on Procore construction software.

Certifications and Accreditations

- ASHE Health Care Construction Certificate
- OSHA 30
- University of Minnesota Storm Water Pollution Prevention Program (SWPPP)
- Procore Administration
- Dale Carnegie's Manager's Guide to Sustainable Employee Engagement completed

Professional Experience

2019 - Present · Fann Environmental, LLC

Project Manager and Operations Director

Relevant Projects

- Yavapai Hills Lift Station #1 Rehabilitation
- Village Way Lift Station
- CMAR City of Prescott Water Production Facility
- Ash Fork Water Infrastructure Improvements
- Arizona Water Company Mogollon Well No 3 Arsenic Treatment Facility
- Oak Creek Water District Arsenic Removal Systems and Tank Repairs
- City of Prescott Chino Production Well 3 Rehab
- City of Prescott Zone 56 Tank and Zone 7 Improvements

2014 - 2019 · Midwest Construction Group, Fargo ND

Director of Field Operations/PM/Safety Director

As Director of Field Operations, Paul was responsible for all aspects of the day to day operations including creating and maintaining construction budgets with a scope of up to $17 million. He sourced and hired superintendents and field personnel, trained and mentored new hires and assisted with the setting of goals/expectations and annual performance reviews. As the Safety Director, Paul maintained an effective safety program with a <.75 EMR for the division working closely with employees and subcontractors to keep job sites in compliance and promote a healthy safety culture. As a Project Manager, Paul participated in estimating and bidding negotiated and hard bid projects, managed projects utilizing Procore software, and created and in-house scope exhibits for contracts using AIA software.

Paul Johnson Professional Experience continued

2002 - 2013 · Nor-Son Inc., Baxter MN

Superintendent / Construction Manager

Paul had a full range of responsibilities associated with large commercial construction project management in this position. He field managed projects for Merit Health Care System (now Sanford Health) including being the Construction Manager for a $65 million addition on a hospital campus in downtown Fargo, ND. The project included a new Heart Center with a 4-suite cardiac catheter unit with emergency OR suite, remodeling and expansion of the Roger Maris Cancer Center, and a new parking structure. Paul also managed the remodeling of rural hospitals and clinics, and Hotel/Casino refacing and remodels in MN.

1999 – 2002 · Triebwasser, Helenske and Associates (now Helenske Design Group), Fargo ND

Construction Manager

As Construction Manager, Paul oversaw various projects mostly for the Minnesota State Colleges and University System at the Thief River Falls MN campus. Projects were phased, multi-million dollar contracts. His responsibilities included estimating for architectural staff, designing development budgets, marketing, and public relations.

1991-1999 · Stamson and Blair, Inc., Grand Rapids MN

Project Superintendent

This was Paul's first experience with commercial construction and full time Superintendent duties. He was responsible for daily jobsite operations and implementation of plans and specifications, coordination and scheduling of crews and subcontractors, supplies and equipment, and stringent quality control. He also managed communications between owners, architects, and engineers.

David "Bim" Syme
General Superintendent

Summary of Experience

Mr. Syme has also been working in the industry for over 40 years specializing in underground utilities, roadway construction, and project development, the last five years with Fann Environmental. Before joining FE, Bim had taken part in over 300 public and private projects ranging from $20,000 to $16 million plus throughout Arizona, Utah, and Wyoming. Bim is responsible for overseeing the operations of active projects, developing and overseeing the crews, managing the materials and equipment needed to complete projects and directing crews to keep projects within scope, time frame, and budget. Bim is well-respected within the construction community and has an extensive network of contacts in the industry and related utilities.

Certifications and Training

- OSHA 10
- NUCA Competent Person
- Competent Person Excavation, Trenching, Confined Space
- Storm Water Pollution Prevention Program (SWPPP)
- Forklift and Aerial Work Platform Training
- First Aid/CPR

Professional Experience

2019 - Present · Fann Environmental, LLC

General Superintendent

Relevant Projects

- Yavapai Hills #1 Lift Station Rehabilitation
- CMAR City of Prescott Intermediate Pump Stations
- Village Way Lift Station
- City of Prescott Zone 56 Tank and Zone 7 Improvements
- Arizona Water Company Mogollon Well No 3 Arsenic Treatment Facility

2013 - 2019 & 1984 - 2011 · Johansen Construction Inc., Mt. Pleasant UT

Arizona Branch Manager/Project Manager

- Specialized in underground pipeline construction for private and public contracts
- Worked over 300 jobs ranging from $20,000 to $16 million+ in Arizona, Utah, Wyoming
- Business development through competitive bidding, conducting weekly oral progress meetings with owners and employees/subcontractors, creating and managing production schedules for job projections, maintaining records of equipment use, safety training, weekly safety meetings, material costs, billing and labor schedules.

2011 - 2013 · West African Heavy Equipment Ltd / Bodie Machine and Metal Works LLC, Ghana, Africa

Operations Manager

Originally hired to manage rental of heavy machinery, but role transitioned to procuring, establishing and leading the company's overall gold mining operation including managing staff of over 135 Ghanaians and Americans, managing use and maintenance of 50 pieces of heavy equipment, overseeing product refinement and security and interacting and negotiating with local chiefs and commissioners.

Robert Kinkade

Ryan Shy
Electrical Department Manager/Superintendent

Summary of Experience

Mr. Shy has nearly 25 years of experience in the construction field. Ryan successfully completed the Arizona Statutes and Rules Training Course and Exam for Contractor Licensing and AZ CR-11 Electrical Licensing Exam. He began as a laborer and quickly worked his way up to journeyman and administrative level positions. Ryan has supervised both piping and electrical work as well as the work of subcontractors on Fann Environmental projects. His projects are consistently completed on time and within budget. Ryan has worked extensively with Arizona Public Service in coordination of providing new electrical service to several City of Prescott treatment facilities. He is often the first person clients call when they have an electrical emergency because they know he will be responsive and be able to make the repairs needed to get them back on track.

Certifications and Accreditations

- Arizona Registrar of Contractors CR-11 Contractors License
- 40 Hour EM385 Hazard Recognition
- Competent Person Excavation, Confined Space
- Forklift and Aerial Operator Safety
- MSHA 8 hour

Education

- Independent Electrical Contractors Association 4-year, 8,000 hour Apprenticeship Program

Professional Experience

2018 – Present · Fann Environmental, LLC

Electrical Department Manager Superintendent

Relevant Projects

- City of Prescott Water Production Facility and Intermediate Pump Stations
- Oak Creek Water District Arsenic Removal Systems and Tank Repairs
- City of Prescott Airport Well No 5 Improvements
- City of Prescott Zone 16 Tank, Pump Station, and Water Main
- Arizona Water Company Santiago Trail Nitrate Removal, Booster Station and Storage Tank

2015 – 2018 · LPC Construction, Yuma AZ

Project Superintendent

Duties included Estimating projects, reviewing submittals, plans, and specifications, building project schedules and ensuring subcontractors are adhering to plans, specifications and schedules, coordinating materials and subcontractor work, conducting weekly progress and safety meetings.

1999-2015 · Westmoor Electric, Yuma AZ

Laborer through Project Manager

Duties included installing conduit per plans, specifications and national electrical code, pulling and terminating wire for complete electrical system, laying out and coordinating electrical systems with other trades, operating backhoe, forklift, scissor lifts and boom lifts, overseeing electrical apprentices and laborers, communicating with engineers and owners on project issues.

TOM COLE, DIRECTOR,
ARIZONA REGISTRAR OF CONTRACTORS

USDA
Form RD 400-6
(Rev. 12-09)

Form Approved
OMB No. 0575-0018

COMPLIANCE STATEMENT

This statement relates to a proposed contract with Town of Jerome

(Name of borrower or grantee)

who expects to finance the contract with assistance from either the Rural Housing Service (RHS), Rural Business-Cooperative Service (RBS), or the Rural Utilities Service (RUS) or their successor agencies, United States Department of Agriculture (whether by a loan, grant, loan insurance, guarantee, or other form of financial assistance). I am the undersigned bidder or prospective contractor, I represent that:

1. I ☒ have ☐ have not, participated in a previous contract or subcontract subject to Executive 11246 (regarding equal employment opportunity) or a preceding similar Executive Order.

2. If I have participated in such a contract or subcontract, I ☒ have, ☐ have not, filed all compliance reports that have been required to file in connection with the contract or subcontract.

☒ If the proposed contract is for $50,000 or more: or ☐ if the proposed nonconstruction contract is for $50,000 or more and I have 50 or more employees, I also represent that:

3. I ☒ have, ☐ have not previously had contracts subject to the written affirmative action programs requirements of the Secretary of Labor.

4. If I have participated in such a contract or subcontract, ☒ I have, ☐ have not developed and placed on file at each establishment affirmative action programs as required by the rules and regulations of the Secretary of Labor.

I understand that if I have failed to file any compliance reports that have been required of me, I am not eligible and will not be eligible to have my bid considered or to enter into the proposed contract unless and until I make an arrangement regarding such reports that is satisfactory to either the RHS, RBS or RUS, or to the office where the reports are required to be filed.

I also certify that I do not maintain or provide for my employees any segregated facilities at any of my establishments, and that I do not permit my employees to perform their services at any location, under my control, where segregated facilities are maintained. I certify further that I will not maintain or provide for my employees any segregated facilities at any of my establishments, and that I will not permit my employees to perform their services at any location, under my control, where segregated facilities are maintained. I agree that a breach of this certification is a violation of the Equal Opportunity clause in my contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms and wash rooms, restaurants and other eating areas time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, creed, color, or national origin, because of habit, local custom, or otherwise. I further agree that (except where I have obtained identical certifications for proposed subcontractors for specific time periods) I will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding $10,000 which are not exempt from the provisions of the Equal Opportunity clause; that I will retain such certifications in my files; and that I will forward the following notice to such proposed subcontractors (except where the proposed subcontractors have submitted identical certifications for specific time periods):

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays the valid OMB control number. The valid OMB control number for this information collection is 0575-0018. The time required to complete this information collection is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

NOTICE TO PROSPECTIVE SUBCONTRACTORS OF REQUIREMENTS FOR CERTIFICATIONS OF NON-SEGREGATED FACILITIES

A certification of Nonsegregated Facilities, as required by the May 9, 1967, order (32F.R. 7439, May 19, 1967) on Elimination of Segregated Facilities, by the Secretary of Labor, must be submitted prior to the award of a subcontract exceeding $ 10,000 which is not exempt from the provisions of the Equal Opportunity clause. The certification may be submitted either for each subcontract or for all subcontracts during a period (i.e., quarterly, semiannually, or annually).

NOTE: The penalty for making false statements in offers is prescribed in 18 U.S.C. 1001.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion Lower Tier Covered Transactions

AD-1048

The following statement is made in accordance with the Privacy Act of 1974 (5 U.S.C. § 552a, as amended). This certification is required by the regulations implementing Executive Order 12549, Debarment and Suspension, and 2 C.F.R. §§ 180.300, 180.335, Participants' responsibilities. The regulations were amended and published on August 31, 2005, in 70 Fed. Reg. 51865-51880. Copies of the regulations may be obtained by contacting the Department of Agriculture agency offering the proposed covered transaction.

According to the Paperwork Reduction Act of 1995 an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0505-0027. The time required to complete this information collection is estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The provisions of appropriate criminal and civil fraud privacy, and other statutes may be applicable to the information provided.

(Read instructions on page two before completing certification.)

A. The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency;

B. Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at How to File a Program Discrimination Complaint (https://www.ascr.usda.gov/filing-program-discrimination-complaint-usda-customer) and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442.

Instructions for Certification

(1) By signing and submitting this form, the prospective lower tier participant is providing the certification set out on page 1 in accordance with these instructions.

(2) The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension or debarment.

(3) The prospective lower tier participant shall provide immediate written notice to the person(s) to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

(4) The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549, at 2 C.F.R. Parts 180 and 417. You may contact the department or agency to which this proposal is being submitted for assistance in obtaining a copy of those regulations.

(5) The prospective lower tier participant agrees by submitting this form that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.

(6) The prospective lower tier participant further agrees by submitting this form that it will include this clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

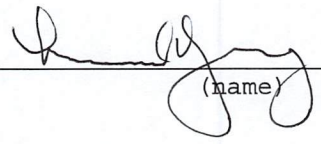
(7) A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the System for Award Management (SAM) database.

(8) Nothing contained in the foregoing shall be construed to require establishment of a system of records to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

(9) Except for transactions authorized under paragraph (5) of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

RD Instruction 1940-Q
Exhibit A-1

CERTIFICATION FOR CONTRACTS, GRANTS AND LOANS



The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant or Federal loan, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant or loan.

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant or loan, the undersigned shall complete and submit Standard Form - LLL, "Disclosure of Lobbying Activities," in accordance with its instructions.

3. The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including contracts, subcontracts, and subgrants under grants and loans) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

1. The Contractor and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to the Owner for the performance of the Construction Contract, which is incorporated herein by reference.
2. If the Contractor performs the Construction Contract, the Surety and the Contractor shall have no obligation under this Bond, except when applicable to participate in a conference as provided in Paragraph 3.
3. If there is no Owner Default under the Construction Contract, the Surety's obligation under this Bond will arise after:
    3.1. The Owner first provides notice to the Contractor and the Surety that the Owner is considering declaring a Contractor Default. Such notice may indicate whether the Owner is requesting a conference among the Owner, Contractor, and Surety to discuss the Contractor's performance. If the Owner does not request a conference, the Surety may, within five (5) business days after receipt of the Owner's notice, request such a conference. If the Surety timely requests a conference, the Owner shall attend. Unless the Owner agrees otherwise, any conference requested under this Paragraph 3.1 will be held within ten (10) business days of the Surety's receipt of the Owner's notice. If the Owner, the Contractor, and the Surety agree, the Contractor shall be allowed a reasonable time to perform the Construction Contract, but such an agreement does not waive the Owner's right, if any, subsequently to declare a Contractor Default;
    3.2. The Owner declares a Contractor Default, terminates the Construction Contract and notifies the Surety; and
    3.3. The Owner has agreed to pay the Balance of the Contract Price in accordance with the terms of the Construction Contract to the Surety or to a contractor selected to perform the Construction Contract.
4. Failure on the part of the Owner to comply with the notice requirement in Paragraph 3.1 does not constitute a failure to comply with a condition precedent to the Surety's obligations, or release the Surety from its obligations, except to the extent the Surety demonstrates actual prejudice.
5. When the Owner has satisfied the conditions of Paragraph 3, the Surety shall promptly and at the Surety's expense take one of the following actions:
    5.1. Arrange for the Contractor, with the consent of the Owner, to perform and complete the Construction Contract;
    5.2. Undertake to perform and complete the Construction Contract itself, through its agents or independent contractors;
    5.3. Obtain bids or negotiated proposals from qualified contractors acceptable to the Owner for a contract for performance and completion of the Construction Contract, arrange for a contract to be prepared for execution by the Owner and a contractor selected with the Owners concurrence, to be secured with performance and payment bonds executed by a qualified surety equivalent to the bonds issued on the Construction Contract, and pay to the Owner the amount of damages as described in Paragraph 7 in excess of the Balance of the Contract Price incurred by the Owner as a result of the Contractor Default; or
    5.4. Waive its right to perform and complete, arrange for completion, or obtain a new contractor, and with reasonable promptness under the circumstances:

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

5.4.1 After investigation, determine the amount for which it may be liable to the Owner and, as soon as practicable after the amount is determined, make payment to the Owner; or

5.4.2 Deny liability in whole or in part and notify the Owner, citing the reasons for denial.

6. If the Surety does not proceed as provided in Paragraph 5 with reasonable promptness, the Surety shall be deemed to be in default on this Bond seven days after receipt of an additional written notice from the Owner to the Surety demanding that the Surety perform its obligations under this Bond, and the Owner shall be entitled to enforce any remedy available to the Owner. If the Surety proceeds as provided in Paragraph 5.4, and the Owner refuses the payment, or the Surety has denied liability, in whole or in part, without further notice, the Owner shall be entitled to enforce any remedy available to the Owner.

7. If the Surety elects to act under Paragraph 5.1, 5.2, or 5.3, then the responsibilities of the Surety to the Owner will not be greater than those of the Contractor under the Construction Contract, and the responsibilities of the Owner to the Surety will not be greater than those of the Owner under the Construction Contract. Subject to the commitment by the Owner to pay the Balance of the Contract Price, the Surety is obligated, without duplication for:

   7.1. the responsibilities of the Contractor for correction of defective work and completion of the Construction Contract;

   7.2. additional legal, design professional, and delay costs resulting from the Contractor's Default, and resulting from the actions or failure to act of the Surety under Paragraph 5; and

   7.3. liquidated damages, or if no liquidated damages are specified in the Construction Contract, actual damages caused by delayed performance or non-performance of the Contractor.

8. If the Surety elects to act under Paragraph 5.1, 5.3, or 5.4, the Surety's liability is limited to the amount of this Bond.

9. The Surety shall not be liable to the Owner or others for obligations of the Contractor that are unrelated to the Construction Contract, and the Balance of the Contract Price will not be reduced or set off on account of any such unrelated obligations. No right of action will accrue on this Bond to any person or entity other than the Owner or its heirs, executors, administrators, successors, and assigns.

10. The Surety hereby waives notice of any change, including changes of time, to the Construction Contract or to related subcontracts, purchase orders, and other obligations.

11. Any proceeding, legal or equitable, under this Bond must be instituted in any court of competent jurisdiction in the location in which the work or part of the work is located and must be instituted within two years after a declaration of Contractor Default or within two years after the Contractor ceased working or within two years after the Surety refuses or fails to perform its obligations under this Bond, whichever occurs first. If the provisions of this paragraph are void or prohibited by law, the minimum periods of limitations available to sureties as a defense in the jurisdiction of the suit will be applicable.

12. Notice to the Surety, the Owner, or the Contractor must be mailed or delivered to the address shown on the page on which their signature appears.

13. When this Bond has been furnished to comply with a statutory or other legal requirement in the location where the construction was to be performed, any provision in this Bond conflicting with said statutory or legal requirement will be deemed deleted therefrom and provisions conforming to such

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

statutory or other legal requirement will be deemed incorporated herein. When so furnished, the intent is that this Bond will be construed as a statutory bond and not as a common law bond.

14. Definitions

14.1. *Balance of the Contract Price*—The total amount payable by the Owner to the Contractor under the Construction Contract after all proper adjustments have been made including allowance for the Contractor for any amounts received or to be received by the Owner in settlement of insurance or other claims for damages to which the Contractor is entitled, reduced by all valid and proper payments made to or on behalf of the Contractor under the Construction Contract.

14.2. *Construction Contract*—The agreement between the Owner and Contractor identified on the cover page, including all Contract Documents and changes made to the agreement and the Contract Documents.

14.3. *Contractor Default*—Failure of the Contractor, which has not been remedied or waived, to perform or otherwise to comply with a material term of the Construction Contract.

14.4. *Owner Default*—Failure of the Owner, which has not been remedied or waived, to pay the Contractor as required under the Construction Contract or to perform and complete or comply with the other material terms of the Construction Contract.

14.5. *Contract Documents*—All the documents that comprise the agreement between the Owner and Contractor.

15. If this Bond is issued for an agreement between a contractor and subcontractor, the term Contractor in this Bond will be deemed to be Subcontractor and the term Owner will be deemed to be Contractor.

16. Modifications to this Bond are as follows:

16.1. Pursuant to ARS Section 34-222.G:

The conditions and provisions in the performance bond regarding the surety's obligations shall follow the following form:

Now, therefore, the condition of this obligation is such, that if the principal faithfully performs and fulfills all of the undertakings, covenants, terms, conditions and agreements of the contract during the original term of the contract and any extension of the contract, with or without notice to the surety, and during the life of any guaranty required under the contract, and also performs and fulfills all of the undertakings, covenants, terms, conditions and agreements of all duly authorized modifications of the contract that may hereafter be made, notice of which modifications to the surety being hereby waived, the above obligation is void. Otherwise it remains in full force and effect.

Provided, however, that this bond is executed pursuant to the provisions of title 34, chapter 2, article 2, Arizona Revised Statutes, and all liabilities on this bond shall be determined in accordance with the provisions of title 34, chapter 2, article 2, Arizona Revised Statutes, to the extent as if it were copied at length in this agreement.

The prevailing party in a suit on this bond shall recover as part of the judgment reasonable attorney fees that may be fixed by a judge of the court.

EJCDC® C-615, Payment Bond.
Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. The Contractor and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to the Owner to pay for labor, materials, and equipment furnished for use in the performance of the Construction Contract, which is incorporated herein by reference, subject to the following terms.
2. If the Contractor promptly makes payment of all sums due to Claimants, and defends, indemnifies, and holds harmless the Owner from claims, demands, liens, or suits by any person or entity seeking payment for labor, materials, or equipment furnished for use in the performance of the Construction Contract, then the Surety and the Contractor shall have no obligation under this Bond.
3. If there is no Owner Default under the Construction Contract, the Surety's obligation to the Owner under this Bond will arise after the Owner has promptly notified the Contractor and the Surety (at the address described in Paragraph 13) of claims, demands, liens, or suits against the Owner or the Owner's property by any person or entity seeking payment for labor, materials, or equipment furnished for use in the performance of the Construction Contract, and tendered defense of such claims, demands, liens, or suits to the Contractor and the Surety.
4. When the Owner has satisfied the conditions in Paragraph 3, the Surety shall promptly and at the Surety's expense defend, indemnify, and hold harmless the Owner against a duly tendered claim, demand, lien, or suit.
5. The Surety's obligations to a Claimant under this Bond will arise after the following:
    5.1. Claimants who do not have a direct contract with the Contractor
        5.1.1. have furnished a written notice of non-payment to the Contractor, stating with substantial accuracy the amount claimed and the name of the party to whom the materials were, or equipment was, furnished or supplied or for whom the labor was done or performed, within ninety (90) days after having last performed labor or last furnished materials or equipment included in the Claim; and
        5.1.2. have sent a Claim to the Surety (at the address described in Paragraph 13).
    5.2. Claimants who are employed by or have a direct contract with the Contractor have sent a Claim to the Surety (at the address described in Paragraph 13).
6. If a notice of non-payment required by Paragraph 5.1.1 is given by the Owner to the Contractor, that is sufficient to satisfy a Claimant's obligation to furnish a written notice of non-payment under Paragraph 5.1.1.
7. When a Claimant has satisfied the conditions of Paragraph 5.1 or 5.2, whichever is applicable, the Surety shall promptly and at the Surety's expense take the following actions:
    7.1. Send an answer to the Claimant, with a copy to the Owner, within sixty (60) days after receipt of the Claim, stating the amounts that are undisputed and the basis for challenging any amounts that are disputed; and
    7.2. Pay or arrange for payment of any undisputed amounts.
    7.3. The Surety's failure to discharge its obligations under Paragraph 7.1 or 7.2 will not be deemed to constitute a waiver of defenses the Surety or Contractor may have or acquire as to a Claim, except as to undisputed amounts for which the Surety and Claimant have reached agreement. If, however, the Surety fails to discharge its obligations under Paragraph 7.1 or 7.2, the Surety shall indemnify the Claimant for the reasonable attorney's fees the Claimant incurs thereafter to recover any sums found to be due and owing to the Claimant.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

8. The Surety's total obligation will not exceed the amount of this Bond, plus the amount of reasonable attorney's fees provided under Paragraph 7.3, and the amount of this Bond will be credited for any payments made in good faith by the Surety.

9. Amounts owed by the Owner to the Contractor under the Construction Contract will be used for the performance of the Construction Contract and to satisfy claims, if any, under any construction performance bond. By the Contractor furnishing and the Owner accepting this Bond, they agree that all funds earned by the Contractor in the performance of the Construction Contract are dedicated to satisfying obligations of the Contractor and Surety under this Bond, subject to the Owner's priority to use the funds for the completion of the work.

10. The Surety shall not be liable to the Owner, Claimants, or others for obligations of the Contractor that are unrelated to the Construction Contract. The Owner shall not be liable for the payment of any costs or expenses of any Claimant under this Bond, and shall have under this Bond no obligation to make payments to or give notice on behalf of Claimants, or otherwise have any obligations to Claimants under this Bond.

11. The Surety hereby waives notice of any change, including changes of time, to the Construction Contract or to related subcontracts, purchase orders, and other obligations.

12. No suit or action will be commenced by a Claimant under this Bond other than in a court of competent jurisdiction in the state in which the project that is the subject of the Construction Contract is located or after the expiration of one year from the date (1) on which the Claimant sent a Claim to the Surety pursuant to Paragraph 5.1.2 or 5.2, or (2) on which the last labor or service was performed by anyone or the last materials or equipment were furnished by anyone under the Construction Contract, whichever of (1) or (2) first occurs. If the provisions of this paragraph are void or prohibited by law, the minimum period of limitation available to sureties as a defense in the jurisdiction of the suit will be applicable.

13. Notice and Claims to the Surety, the Owner, or the Contractor must be mailed or delivered to the address shown on the page on which their signature appears. Actual receipt of notice or Claims, however accomplished, will be sufficient compliance as of the date received.

14. When this Bond has been furnished to comply with a statutory or other legal requirement in the location where the construction was to be performed, any provision in this Bond conflicting with said statutory or legal requirement will be deemed deleted here from and provisions conforming to such statutory or other legal requirement will be deemed incorporated herein. When so furnished, the intent is that this Bond will be construed as a statutory bond and not as a common law bond.

15. Upon requests by any person or entity appearing to be a potential beneficiary of this Bond, the Contractor and Owner shall promptly furnish a copy of this Bond or shall permit a copy to be made.

16. Definitions

    16.1. *Claim*—A written statement by the Claimant including at a minimum:

        16.1.1. The name of the Claimant;

        16.1.2. The name of the person for whom the labor was done, or materials or equipment furnished;

        16.1.3. A copy of the agreement or purchase order pursuant to which labor, materials, or equipment was furnished for use in the performance of the Construction Contract;

        16.1.4. A brief description of the labor, materials, or equipment furnished;

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

16.1.5. The date on which the Claimant last performed labor or last furnished materials or equipment for use in the performance of the Construction Contract;

16.1.6. The total amount earned by the Claimant for labor, materials, or equipment furnished as of the date of the Claim;

16.1.7. The total amount of previous payments received by the Claimant; and

16.1.8. The total amount due and unpaid to the Claimant for labor, materials, or equipment furnished as of the date of the Claim.

16.2. *Claimant*—An individual or entity having a direct contract with the Contractor or with a subcontractor of the Contractor to furnish labor, materials, or equipment for use in the performance of the Construction Contract. The term Claimant also includes any individual or entity that has rightfully asserted a claim under an applicable mechanic's lien or similar statute against the real property upon which the Project is located. The intent of this Bond is to include without limitation in the terms of "labor, materials, or equipment" that part of the water, gas, power, light, heat, oil, gasoline, telephone service, or rental equipment used in the Construction Contract, architectural and engineering services required for performance of the work of the Contractor and the Contractor's subcontractors, and all other items for which a mechanic's lien may be asserted in the jurisdiction where the labor, materials, or equipment were furnished.

16.3. *Construction Contract*—The agreement between the Owner and Contractor identified on the cover page, including all Contract Documents and all changes made to the agreement and the Contract Documents.

16.4. *Owner Default*—Failure of the Owner, which has not been remedied or waived, to pay the Contractor as required under the Construction Contract or to perform and complete or comply with the other material terms of the Construction Contract.

16.5. *Contract Documents*—All the documents that comprise the agreement between the Owner and Contractor.

17. If this Bond is issued for an agreement between a contractor and subcontractor, the term Contractor in this Bond will be deemed to be Subcontractor and the term Owner will be deemed to be Contractor.

18. Modifications to this Bond are as follows:

18.1. Pursuant to ARS Section 34-222.G:

Now, therefore, the condition of this obligation is such, that if the principal promptly pays all monies due to all persons supplying labor or materials to the principal or the principal's subcontractors in the prosecution of the work provided for in the contract, this obligation is void. Otherwise it remains in full force and effect.

Provided, however, that this bond is executed pursuant to the provisions of title 34, chapter 2, article 2, Arizona Revised Statutes, and all liabilities on this bond shall be determined in accordance with the provisions, conditions and limitations of title 34, chapter 2, article 2, Arizona Revised Statutes, to the same extent as if they were copied at length in this agreement.

The prevailing party in a suit on this bond shall recover as a part of the judgment reasonable attorney fees that may be fixed by a judge of the court.

This Power of Attorney is made and executed pursuant to and by authority of the following By-laws and Authorizations of The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company which resolutions are now in full force and effect reading as follows:

ARTICLE IV – OFFICERS: Section 12. Power of Attorney.
Any officer or other official of the Corporation authorized for that purpose in writing by the Chairman or the President, and subject to such limitation as the Chairman or the President may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Corporation to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact, subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Corporation by their signature and execution of any such instruments and to attach thereto the seal of the Corporation. When so executed, such instruments shall be as binding as if signed by the President and attested to by the Secretary. Any power or authority granted to any representative or attorney-in-fact under the provisions of this article may be revoked at any time by the Board, the Chairman, the President or by the officer or officers granting such power or authority.

ARTICLE XIII – Execution of Contracts: Section 5. Surety Bonds and Undertakings.
Any officer of the Company authorized for that purpose in writing by the chairman or the president, and subject to such limitations as the chairman or the president may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Company by their signature and execution of any such instruments and to attach thereto the seal of the Company. When so executed such instruments shall be as binding as if signed by the president and attested by the secretary.

Certificate of Designation – The President of the Company, acting pursuant to the Bylaws of the Company, authorizes Nathan J. Zangerle, Assistant Secretary to appoint such attorneys-in-fact as may be necessary to act on behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations.

Authorization – By unanimous consent of the Company's Board of Directors, the Company consents that facsimile or mechanically reproduced signature of any assistant secretary of the Company, wherever appearing upon a certified copy of any power of attorney issued by the Company in connection with surety bonds, shall be valid and binding upon the Company with the same force and effect as though manually affixed.

I, Renee C. Llewellyn, the undersigned, Assistant Secretary, The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company do hereby certify that the original power of attorney of which the foregoing is a full, true and correct copy of the Power of Attorney executed by said Companies, is in full force and effect and has not been revoked.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the seals of said Companies this 10th day of November 2026.

By: _____
Renee C. Llewellyn, Assistant Secretary

Not valid for mortgage, note, loan, letter of credit, currency rate, interest rate or residual value guarantees.

NOTICE OF AWARD

Date of Issuance:	October 22, 2026		
Owner:	Town of Jerome	Owner's Project No.:	N/A
Engineer:	PACE	Engineer's Project No.:	B614
Project:	Jerome Wastewater Treatment Plant Improvements		
Contract Name:	Jerome Wastewater Treatment Plant Improvements		
Bidder:	Fann Environmental, LLC		
Bidder's Address:	6708 Corsair Ave Ste A Prescott, AZ 86301		

You are notified that Owner has accepted your Bid dated **June 3, 2026** for the above Contract, and that you are the Successful Bidder and are awarded a Contract for:

The Town of Jerome Wastewater Treatment Plant Improvements.

The Contract Price of $10,699,947.60 and Contract are contingent upon USDA-RD concurrence. The Contract Price is subject to adjustment based on the provisions of the Contract, including but not limited to those governing changes, Unit Price Work, and Work performed on a cost-plus-fee basis, as applicable.

One (1) electronic, unexecuted counterparts of the Agreement accompany this Notice of Award, and one copy of the Contract Documents accompanies this Notice of Award, or has been transmitted or made available to Bidder electronically.

☒ Drawings will be delivered separately from the other Contract Documents.

You must comply with the following conditions precedent within 15 days of the date of receipt of this Notice of Award:

1. Deliver to Owner **One (1) hard copy and one (1) electronic,** counterparts of the Agreement, signed by Bidder (as Contractor).
2. Deliver with the signed Agreement(s) the Contract security (such as required performance and payment bonds) and insurance documentation, as specified in the Instructions to Bidders and in the General Conditions, Articles 2 and 6.
3. Other conditions precedent (if any): **None**

Failure to comply with these conditions within the time specified will entitle Owner to consider you in default, annul this Notice of Award, and declare your Bid security forfeited.

Within **30** days after you comply with the above conditions, Owner will return to you one fully signed counterpart of the Agreement, together with any additional copies of the Contract Documents as indicated in Paragraph 2.02 of the General Conditions.

Owner: **Town of Jerome**

AGREEMENT BETWEEN OWNER AND CONTRACTOR

This Agreement is by and between **Town of Jerome** ("Owner") and **Fann Environmental, LLC** ("Contractor").

Terms used in this Agreement have the meanings stated in the General Conditions and the Supplementary Conditions.

Owner and Contractor hereby agree as follows:

ARTICLE 1—WORK

1.01 Contractor shall complete all Work as specified or indicated in the Contract Documents. The Work is generally described as follows: Improvements include conversion of this existing trickling filter facility to a 90,000 GPD Sequencing Batch Reactors (SBR) with removal and demolition of existing wastewater equipment; construction of two new 54,000-gallon SBR basins, aerobic digester basin, equalization basin, sludge dewatering, chlorine contact chamber, drying beds, etc.; installation of new 12-inch PVC gravity sewer main, complete with piping and piping appurtenances; construction of a new access roadway, including all grading and drainage work.

ARTICLE 2—THE PROJECT

2.01 The Project, of which the Work under the Contract Documents is a part, is generally described as follows: **Jerome Wastewater Treatment Plant Improvements.**

ARTICLE 3—ENGINEER

3.01 The Owner has retained **Pacific Advanced Civil Engineering, Inc. (PACE)** ("Engineer") to act as Owner's representative, assume all duties and responsibilities of Engineer, and have the rights and authority assigned to Engineer in the Contract.

3.02 The part of the Project that pertains to the Work has been designed by **the Engineer.**

ARTICLE 4—CONTRACT TIMES

4.01 *Time is of the Essence*

A. All time limits for Milestones, if any, Substantial Completion, and completion and readiness for final payment as stated in the Contract Documents are of the essence of the Contract.

4.02 **[Deleted]**

4.03 *Contract Times: Days*

A. The Work will be substantially complete within **300** days after the date when the Contract Times commence to run as provided in Paragraph 4.01 of the General Conditions, and completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions within **330** days after the date when the Contract Times commence to run.

EJCDC® C-520, Agreement between Owner and Contractor for Construction Contract (Stipulated Price).
Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

4.04 **[Deleted]**

4.05 *Liquidated Damages*

A. Contractor and Owner recognize that time is of the essence as stated in Paragraph 4.01 above and that Owner will suffer financial and other losses if the Work is not completed and Milestones not achieved within the Contract Times, as duly modified. The parties also recognize the delays, expense, and difficulties involved in proving, in a legal or arbitration proceeding, the actual loss suffered by Owner if the Work is not completed on time. Accordingly, instead of requiring any such proof, Owner and Contractor agree that as liquidated damages for delay (but not as a penalty):

1. *Substantial Completion:* Contractor shall pay Owner $**1,600.00** for each day that expires after the time (as duly adjusted pursuant to the Contract) specified above for Substantial Completion, until the Work is substantially complete. **Calculations assume continued RPR field services and associated expenses. It also includes Owner and Engineer project management and office engineering efforts to address unresolved construction issues resulting in extended services beyond the date of substantial completion as stipulated in the contract documents.**

2. *Completion of Remaining Work:* After Substantial Completion, if Contractor shall neglect, refuse, or fail to complete the remaining Work within the Contract Times (as duly adjusted pursuant to the Contract) for completion and readiness for final payment, Contractor shall pay Owner $**533.00** for each day that expires after such time until the Work is completed and ready for final payment. **Liquidated damages beyond the date of project Final Completion are calculated at approximately one-third of the amount for Substantial Completion.**

3. **[Deleted]**

4. Liquidated damages for failing to timely attain ~~Milestones,~~ Substantial Completion, and final completion are not additive, and will not be imposed concurrently.

B. If Owner recovers liquidated damages for a delay in completion by Contractor, then such liquidated damages are Owner's sole and exclusive remedy for such delay, and Owner is precluded from recovering any other damages, whether actual, direct, excess, or consequential, for such delay, except for special damages (if any) specified in this Agreement.

C. **[Deleted]**

4.06 ***[Deleted]***

ARTICLE 5—CONTRACT PRICE

5.01 Owner shall pay Contractor for completion of the Work in accordance with the Contract Documents, the amounts that follow, subject to adjustment under the Contract:

A. For all Work other than Unit Price Work, a lump sum of $10,699,947.60.

EJCDC® C-520, Agreement between Owner and Contractor for Construction Contract (Stipulated Price).
Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 6—PAYMENT PROCEDURES

6.01 *Submittal and Processing of Payments*

A. Contractor shall submit Applications for Payment in accordance with Article 15 of the General Conditions. Applications for Payment will be processed by Engineer as provided in the General Conditions.

6.02 *Progress Payments; Retainage*

A. Owner shall make progress payments on the basis of Contractor's Applications for Payment on or about the **5th** day of each month during performance of the Work as provided in Paragraph 6.02.A.1 below, provided that such Applications for Payment have been submitted in a timely manner and otherwise meet the requirements of the Contract. All such payments will be measured by the Schedule of Values established as provided in the General Conditions (and in the case of Unit Price Work based on the number of units completed) or, in the event there is no Schedule of Values, as provided elsewhere in the Contract.

1. Prior to Substantial Completion, progress payments will be made in an amount equal to the percentage indicated below but, in each case, less the aggregate of payments previously made and less such amounts as Owner may withhold, including but not limited to liquidated damages, in accordance with the Contract.

a. **95** percent of the value of the Work completed (with the balance being retainage).

1) **[Deleted]**

b. **95** percent of cost of materials and equipment not incorporated in the Work (with the balance being retainage).

B. Upon Substantial Completion **of the entire construction to be provided under the construction Contract Documents**, Owner shall pay an amount sufficient to increase total payments to Contractor to **100** percent of the Work completed, less such amounts set off by Owner pursuant to Paragraph 15.01.E of the General Conditions, and less **200** percent of Engineer's estimate of the value of Work to be completed or corrected as shown on the punch list of items to be completed or corrected prior to final payment.

6.03 *Final Payment*

A. Upon final completion and acceptance of the Work, Owner shall pay the remainder of the Contract Price in accordance with Paragraph 15.06 of the General Conditions.

6.04 *Consent of Surety*

A. Owner will not make final payment, or return or release retainage at Substantial Completion or any other time, unless Contractor submits written consent of the surety to such payment, return, or release.

6.05 *Interest*

A. All amounts not paid when due will bear interest at the rate of **1.5** percent per annum.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 7—CONTRACT DOCUMENTS

7.01 *Contents*

A. The Contract Documents consist of all of the following:

1. This Agreement.
2. Bonds:
    a. Performance bond (together with power of attorney).
    b. Payment bond (together with power of attorney).
3. General Conditions.
4. Supplementary Conditions.
5. **Technical** Specifications.
6. Drawings (not attached but incorporated by reference) consisting of **83** sheets with each sheet bearing the following general title: **Jerome Wastewater Treatment Plant.**
8. Addenda (numbers **1** to **5**, inclusive).
9. Exhibits to this Agreement (enumerated as follows):
    a. Contractor's Bid
    b. Certification of Owner's Attorney and Agency Concurrence
    c. Application for Payment
    d. Notice to Proceed.
    e. Work Change Directives.
    f. Change Orders.
    g. Field Orders.
    h. General (Prime) Contractor's Certification for AIS.
    i. Manufacturer's Certification for AIS.
    j. Certificate of Substantial Completion.
    k. Notice of Acceptability of Work.
10. The following which may be delivered or issued on or after the Effective Date of the Contract and are not attached hereto:
    a. Warranty Bond, if any.

B. The Contract Documents listed in Paragraph 7.01.A are attached to this Agreement (except as expressly noted otherwise above).

C. There are no Contract Documents other than those listed above in this Article 7.

D. The Contract Documents may only be amended, modified, or supplemented as provided in the Contract.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 8—REPRESENTATIONS, CERTIFICATIONS, AND STIPULATIONS

8.01 *Contractor's Representations*

A. In order to induce Owner to enter into this Contract, Contractor makes the following representations:

1. Contractor has examined and carefully studied the Contract Documents, including Addenda.

2. Contractor has visited the Site **(if required)**, conducted a thorough visual examination of the Site and adjacent areas, and become familiar with the general, local, and Site conditions that may affect cost, progress, and performance of the Work.

3. Contractor is familiar with all Laws and Regulations that may affect cost, progress, and performance of the Work.

4. Contractor has carefully studied the reports of explorations and tests of subsurface conditions at or adjacent to the Site and the drawings of physical conditions relating to existing surface or subsurface structures at the Site that have been identified in the Supplementary Conditions, with respect to the Technical Data in such reports and drawings.

5. Contractor has carefully studied the reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that have been identified in the Supplementary Conditions, with respect to Technical Data in such reports and drawings.

6. Contractor has considered the information known to Contractor itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Contract Documents; and the Technical Data identified in the Supplementary Conditions or by definition, with respect to the effect of such information, observations, and Technical Data on (a) the cost, progress, and performance of the Work; (b) the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor; and (c) Contractor's safety precautions and programs.

7. Based on the information and observations referred to in the preceding paragraph, Contractor agrees that no further examinations, investigations, explorations, tests, studies, or data are necessary for the performance of the Work at the Contract Price, within the Contract Times, and in accordance with the other terms and conditions of the Contract.

8. Contractor is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Contract Documents.

9. Contractor has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Contractor has discovered in the Contract Documents, and of discrepancies between Site conditions and the Contract Documents, and the written resolution thereof by Engineer is acceptable to Contractor.

10. The Contract Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performance and furnishing of the Work.

EJCDC® C-520, Agreement between Owner and Contractor for Construction Contract (Stipulated Price).
Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

11. Contractor's entry into this Contract constitutes an incontrovertible representation by Contractor that without exception all prices in the Agreement are premised upon performing and furnishing the Work required by the Contract Documents.

8.02 *Contractor's Certifications*

A. Contractor certifies that it has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for or in executing the Contract. For the purposes of this Paragraph 8.02:

1. "corrupt practice" means the offering, giving, receiving, or soliciting of anything of value likely to influence the action of a public official in the bidding process or in the Contract execution;

2. "fraudulent practice" means an intentional misrepresentation of facts made (a) to influence the bidding process or the execution of the Contract to the detriment of Owner, (b) to establish Bid or Contract prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition;

3. "collusive practice" means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish Bid prices at artificial, non-competitive levels; and

4. "coercive practice" means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the execution of the Contract.

8.03 *Standard General Conditions*

A. Owner stipulates that if the General Conditions that are made a part of this Contract are EJCDC® C-700, Standard General Conditions for the Construction Contract (2018), published by the Engineers Joint Contract Documents Committee, and if Owner is the party that has furnished said General Conditions, then Owner has plainly shown all modifications to the standard wording of such published document to the Contractor, through a process such as highlighting or "track changes" (redline/strikeout), or in the Supplementary Conditions.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

IN WITNESS WHEREOF, Owner and Contractor have signed this Agreement.

This Agreement will be effective on November 10, 2026 (which is the Effective Date of the Contract).

Outlook

Jerome WWTP BABA Escalation

From Paul Johnson <paulj@fannenvironmental.com>
Date Tue 10/13/2026 4:24 PM
To Taylor Pierce <tpierce@pacewater.com>; Andrea Jaycox <ajaycox@pacewater.com>
Cc Mike Young <mikeyoung@fannenvironmental.com>; Poppy Keegan <pkeegan@fannenvironmental.com>

Taylor,
In regard to our known price escalations for the Jerome WWTP project I have attached a pdf with the original bid price and the cost escalation or deduct (1) as things sit today. As discussed at the meeting this morning the following is our summary of the bid price:

Base Bid	$9,788,382.60
Bid Alternates	$911,565.00
BABA / Material Escalations	$577,804.63
TOTAL BID PRICE	$11,277,752.23

This total already accounts for approximately ($90,000) Fann Environmental has absorbed in the first review for BABA pricing on or about 6-18-26.

Subcontractor/Supplier	Quote For	Original Quote	Revised Quote	Increase	Notes
Aqua-Aerobic Systems	Batch Reactor, Post-EQ, Digester	$ 786,240.00	$ 1,192,070.00	$ 405,830.00	IES Southwest - Ryan Spielman 10-13-26
Border States	Gear	$ 87,780.00	$ 96,256.00	$ 8,476.00	Update 9-30-26 (Eaton & ASCO Gear (MPZ and Loose breakers from Mex & Dom Rep) 37-41 Weeks for SES, 18-20 Weeks BABA Xfmr
	ATS	$ 22,539.00	$ 28,899.00	$ 6,360.00	
	Lighting	$ 32,106.00	$ 35,601.00	$ 3,495.00	
Brown and White	Guardrail	$ 120,581.00	$ 149,936.25	$ 29,355.25	
Darcor	MCP 1 & 2	$ 50,250.00	$ 59,435.00	$ 9,185.00	Estimate - still working with supplier to finalize
Empire CAT	Generator	$ 59,520.00	$ 73,980.00	$ 14,460.00	
Envirodyne Systems	Sludge Pump & Polymer System	$ 246,620.00	$ 256,620.00	$ 13,335.00	per 9/25/26 email from RE Sheker
Field Lining Systems	Liner Procurement and Installation	$ 117,320.00	$ 124,527.00	$ 7,207.00	
Fortiline	Pipe and Fittings	$ 485,365.38	$ 530,132.94	$ 44,767.56	
ISEC Inc	Metal Lab Cabinets w/ Labor & Hardware	$ 30,988.00	$ 33,932.00	$ 2,943.00	10/7/26
J. Co	Concrete				No price increase thru October
JCH	Submersible Sewage Pumps	$ 190,000.00	$ 110,250.00	$ (79,750.00)	Price reduced if packaged overflow station used / BABA price increase on lift station pumps is $13,250

Mammoth Tech	Structural Steel	$ 157,950.00	$ 178,586.00	$ 20,636.00		
Piping Service	Stainless & Carbon Steel Pipe Fab	$ 73,300.00	$ 86,494.00	$ 13,194.00		10/7/26
Yavapai Block	Manholes and Drying Bed LS	$ 45,217.00	$ 48,162.00	$ 2,945.00	updated 9-23-26	
				$ 502,438.81		
		OH&P		15% $ 75,365.82		
			Total	$ 577,804.63		

10/8/26

VE deductions available to the project:

Surface mixers in lieu of submersibles : ($84,560)

HDPE pipe for 12" sewer main in lieu of FPVC. The difference in the raw pipe cost is: ($44,130)

If you have any questions or need to discuss, please contact us.

Kind regards,

Paul Johnson

Outlook

Jerome WWTP BABA Escalation

From Paul Johnson <paulj@fannenvironmental.com>
Date Tue 10/13/2026 4:24 PM
To Taylor Pierce <tpierce@pacewater.com>; Andrea Jaycox <ajaycox@pacewater.com>
Cc Mike Young <mikeyoung@fannenvironmental.com>; Poppy Keegan <pkeegan@fannenvironmental.com>

Taylor,
In regard to our known price escalations for the Jerome WWTP project I have attached a pdf with the original bid price and the cost escalation or deduct (1) as things sit today. As discussed at the meeting this morning the following is our summary of the bid price:

Base Bid	$9,788,382.60
Bid Alternates	$911,565.00
BABA / Material Escalations	$577,804.63
TOTAL BID PRICE	$11,277,752.23

This total already accounts for approximately ($90,000) Fann Environmental has absorbed in the first review for BABA pricing on or about 6-18-26.

Subcontractor/Supplier	Quote For	Original Quote	Revised Quote	Increase	Notes
Aqua-Aerobic Systems	Batch Reactor, Post-EQ, Digester	$ 786,240.00	$ 1,192,070.00	$ 405,830.00	IES Southwest - Ryan Spielman 10-13-26
Border States	Gear	$ 87,780.00	$ 96,256.00	$ 8,476.00	Update 9-30-26 (Eaton & ASCO Gear (MPZ and Loose breakers from Mex & Dom Rep) 37-41 Weeks for SES, 18-20 Weeks BABA Xfmr
	ATS	$ 22,539.00	$ 28,899.00	$ 6,360.00	
	Lighting	$ 32,106.00	$ 35,601.00	$ 3,495.00	
Brown and White	Guardrail	$ 120,581.00	$ 149,936.25	$ 29,355.25	
Darcor	MCP 1 & 2	$ 50,250.00	$ 59,435.00	$ 9,185.00	Estimate - still working with supplier to finalize
Empire CAT	Generator	$ 59,520.00	$ 73,980.00	$ 14,460.00	
Envirodyne Systems	Sludge Pump & Polymer System	$ 246,620.00	$ 256,620.00	$ 13,335.00	per 9/25/26 email from RE Sheker
Field Lining Systems	Liner Procurement and Installation	$ 117,320.00	$ 124,527.00	$ 7,207.00	
Fortiline	Pipe and Fittings	$ 485,365.38	$ 530,132.94	$ 44,767.56	
ISEC Inc	Metal Lab Cabinets w/ Labor & Hardware	$ 30,988.00	$ 33,932.00	$ 2,943.00	10/7/26
J. Co	Concrete				No price increase thru October
JCH	Submersible Sewage Pumps	$ 190,000.00	$ 110,250.00	$ (79,750.00)	Price reduced if packaged overflow station used / BABA price increase on lift station pumps is $13,250

Mammoth Tech	Structural Steel	$ 157,950.00	$ 178,586.00	$ 20,636.00		
Piping Service	Stainless & Carbon Steel Pipe Fab	$ 73,300.00	$ 86,494.00	$ 13,194.00		10/7/26
Yavapai Block	Manholes and Drying Bed LS	$ 45,217.00	$ 48,162.00	$ 2,945.00	updated 9-23-26	
				$ 502,438.81		
		OH&P		15% $ 75,365.82		
			Total	$ 577,804.63		

10/8/26

VE deductions available to the project:

Surface mixers in lieu of submersibles : ($84,560)

HDPE pipe for 12" sewer main in lieu of FPVC. The difference in the raw pipe cost is: ($44,130)

If you have any questions or need to discuss, please contact us.

Kind regards,

Paul Johnson

K. Consider Selection of a New Enterprise Resource Planning (ERP) Financial Software Suite Vendor and Entering into an Agreement with the Selected Vendor for a New ERP System

Council will consider and may approve the selection of a New ERP vendor and authorize the Mayor or Town Manager to execute the agreement on behalf of the Town following legal review.

TOWN OF JEROME

POST OFFICE BOX 335, JEROME, ARIZONA 86331
(928) 634-7943 FAX (928) 634-0715

Founded 1876
Incorporated 1899

STAFF SUMMARY REPORT

FROM: Brett Klein, Town Manager/Clerk

ITEM: **Item: Consider Selecting a Vendor and Entering into an Agreement for a New ERP System**

MEETING DATE: November 10, 2026

Summary:

The Town entered into an agreement for its first true Enterprise Resource Planning (ERP) financial software suite approximately four years ago with Caselle. We have received numerous efficiency benefits compared to our past patchwork systems. However, we have also experienced many problems and our Town appears to be too insignificant for Caselle to bother to fix the issues. One of those issues should have only required a minor fix, but four years later we still have the same issue – revenues listed as expenditures in our budget document headers for some funds. Moreover, support has been less than acceptable with staff often waiting days for a critical issue to be resolved.

The transition to a new ERP is a time-consuming, intensive planning task, which has kept us from following through with a new vendor for a couple of years. However, with the decreasing reliability in support, the failure to fix old issues and the ever-increasing cost from our current vendor, Caselle, the time to transition is now.

There are few ERP's that make sense for a town our size with limited budget resources, while still delivering a robust product with adequate support. Staff sought out to investigate the two most widely used in the southwestern region and throughout Arizona for communities under 25,000 population, who also have systems experience meeting the needs of much larger communities. Staff examined both Tyler Technologies, ERP Pro, and Springbrook Holding Company, LLC, Springbrook ERP. The demonstrations staff participated provided a slight edge to Tyler ERP Pro, and I have worked many years with Tyler Technologies products. The ease of obtaining information, comprehensive reference checks and pricing are in favor of Springbrook. Springbrook would like to continue to gather clients in the State and aggressively priced their product to include the elimination of any up-front implementation costs (generally $50,000-$100,000+).

Fiscal Impact:

Approximately $6,700 more per year than Caselle for the staff-recommended 5-year low overall bidding vendor (Springbrook) with locked in maximum escalations of 5%, compared to the unknown annual increases from Caselle who have averaged approximately that much or more over the last few years.

Recommendation:

Staff recommend entering into the attached agreement with Springbrook.

Order Details

Customer Name:	Town of Jerome
Customer Contact:	Brett Klein
Governing Agreement(s):	This Order Form is governed by the applicable terms found at: MSA: https://sprbrk.app.box.com/v/sprbrk-saas-terms MLA: https://sprbrk.app.box.com/v/sprbrk-onpremise-terms Professional Services: https://sprbrk.app.box.com/v/sprbrk-svcs-terms
Term(s):	5 Years

Order Terms

In the event of an inconsistency between this Order Form, any governing agreement, purchase order, or invoice, the Order Form shall govern as it pertains to this transaction.

- This Order Form shall become effective as of the last date of signature (the "Effective Date").
- Order Start Date: Software Licenses, Subscriptions, Maintenance, and Hosting commence upon the earlier of a) date of delivery* or log-in to hosted software to Customer; or b) 60 days after Order Form Effective Date.
- Subscriptions, Maintenance, Hosting, and Support (“Recurring Services”) continue from the Order Start Date through the term listed in this Order Form (or if not listed, one (1) year).
- Orders for Recurring Services auto-renew for three (3) years or for the term specified in this Order Form, unless the Customer or Springbrook provides a written notice of non-renewal at least sixty (60) days prior to the expiration of the current Order Term.
- Subscription Service fees and any Recurring Services will be subject to an automatic annual increase by not more than five percent (5%) of the prior year’s Subscription Service fees ("Standard Annual Price Increase").
- Any Software Licenses or Hardware are one-time non-refundable purchases.
- CivicPay Online Subscription fee and CivicPay IVR Subscription fee are subject to increase at per account rate, based on actual accounts.
- CivicPay IVR Message Block Subscriptions expire upon the earlier exhaustion of the Message Block or twelve (12) months from the Order Start Date. Upon expiration, Message Blocks automatically renew.

** The date of delivery of software to the Customer is the date the software is made available to the Customer, either by delivery of software or delivery of first log-in to a hosted environment, which may be either a test or production environment. This date of delivery is frequently earlier than the dates professional services are completed, the Customer completes user acceptance testing, the Customer distributes additional logins to end-users, and the Customer go-live in a production environment.*

Invoice Timing and Delivery

Invoices are delivered electronically via e-mail to the billing contact on file for the Customer. Customer invoices are issued for the full amount of software and services purchased as follows:

Products Ordered	Invoice Timing
Software Licenses, Subscriptions, Maintenance, and Hosting (New):	Annually in advance upon Order Start Date.
Software Subscriptions, Maintenance, and Hosting (Add-Ons):	Upon the order start date, order will be pro-rated to sync with the existing anniversary billing date and will renew annually thereafter.
Software Subscriptions (Migrations):	Upon the order start date, order will be synced with the existing anniversary billing date and will renew annually thereafter unless specified in the Special Order Terms. This order replaces and supersedes any previously executed order as it relates to the products listed within this order. Upon delivery of new product, customer will receive a prorated credit for any prepaid, unused maintenance fees that will be applied to the customer's first invoice.
Software Licenses, Subscriptions, Maintenance, and Hosting (Renewal):	Sixty (60) days in advance of the Order Start Date.
Print Services and Transaction Fees:	Monthly, in arrears for transactions in the prior month.
Hardware and One-Time Licenses:	Upon the Effective Date of this Order Form.
Estimated Time and Material Professional Services, On- Site Professional Services, and Travel Expenses*:	Monthly, in arrears for services in the prior month unless specified in Special Term.
Implementation Fixed Fee Professional Services:	The Effective Date of this Order Form unless specified in Special Terms.

Professional Service Key Terms and Conditions:

- **Time and Material Pricing:** Professional Services time and material pricing is based on expected hours using Springbrook's standard implementation approach. While our goal is to provide accurate hour estimates, there may be variations in actual hours and charges. If project costs surpass the estimated hours within this order form by the greater of $15,000 or 20%, a signed change order is necessary to proceed. Adjustments below this threshold will be implemented and invoiced as incurred.

- ***On-Site Professional Services:** On-Site professional services are billed at a daily minimum rate, regardless of time spent on-site. Travel expenses related to on-site travel will be invoiced as a separate line item as they are incurred.

- **Cancellation or Postponement:** Customer agrees to participate in all scheduled meetings and minimize repeated cancellations. Customer shall provide no less than two (2) business days' written notice should any scheduled meeting, training session or other activity need to be cancelled or postponed. If Customer fails to provide such notice, Springbrook shall invoice the Customer for the lost or delayed scheduled time, with a minimum charge of two (2) hours. Additional charges may apply based on the resources and preparation required for the meeting.

- **Customer Responsibilities:** The customer will provide adequate internal resources and ensure the accuracy of all information provided to Springbrook. Customers are responsible for extracting data from any legacy systems and transferring the data into Springbrook's import templates.

Special Order Terms

Special Order Terms (if any):
The Customer agrees that the current version of Cirrus will be implemented without any modifications to its standard functionality, features, or reports. The Customer understands and accepts that no additional enhancements, customizations, or development efforts will be undertaken as part of this project. The Customer also agrees to adapt its business processes as necessary to align with the capabilities of the Cirrus application. Cirrus will be delivered and installed strictly on an "as-is" basis.
Any discounts applied under this Quote are one-time, non-recurring discounts and apply solely to the specific order referenced herein. Such discounts shall not be construed as establishing a course of dealing, precedent, or entitlement for any future orders. All subsequent orders for products or professional services will be billed at the then-current list price. This Quote does not obligate Springbrook to extend the same or similar discounts in connection with any future orders.

By signing, both parties agree to the terms and conditions set forth in this agreement.

* If the Customer requires a PO number on invoices, the Customer must provide Springbrook with the PO number and a copy of the PO prior to invoice issuance. If a PO number is not provided prior to the invoice issuance date, invoices issued on this Order Form will be valid without a PO reference.

Approved as to form:

SPRINGBROOK CLOUD SERVICE
MASTER AGREEMENT
TERMS AND CONDITIONS

These Terms and Conditions, together with each Order Form entered into by the Parties that references such Terms and Conditions, constitute a binding agreement ("**Agreement**") by and between Springbrook Holding Company, LLC, a Delaware corporation and its Affiliates ("**Springbrook**") and the Customer identified on the Order Form ("**Customer**"). These Terms and Conditions become effective as of the date of the related Order Form or use of the Springbrook Services. Each of Springbrook and Customer is referred to herein individually as a "**Party**" and collectively as the "**Parties**."

Use of the Cloud Service, as defined below, is subject to the Agreement. If Customer is entering into the Agreement on behalf of a company, organization, or another legal entity (an "**Entity**"), Customer is agreeing to this Agreement for that Entity and representing to Springbrook that it has the authority to bind such Entity to the Agreement.

Recitals

WHEREAS, Springbrook has developed an ERP solution for local government agencies that is offered as a SaaS-based cloud service (the "**Cloud Service**"); and

WHEREAS, Customer is interested in obtaining the functionality provided by the Cloud Service;

NOW THEREFORE, in consideration of the mutual promises set forth herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

Agreement

1. Definitions. Certain capitalized terms used in the Agreement shall have the definitions set forth below.

(a) **Affiliate**: means an entity that controls, is controlled by or is under common control with a Party to the Agreement, where control means the legal or beneficial ownership of more than fifty percent (50%) of the voting shares of an entity or the ability to direct or cause the direction of management and policies of such entity.

(b) **Authorized User:** means one individual natural person, authorized by Customer to use the Cloud Service. Authorized Users may include but are not limited to Customer's employees, contractors and agents. Each Authorized User will be associated with a single unique email address and password for purposes of accessing (and being identified within) the Cloud Service.

(c) **Channel Partner**: means an authorized reseller, distributor, or other channel partner of Springbrook from which Customer is able to procure some or all of the Springbrook Services.

(d) **Cloud Software**: means the Springbrook proprietary software, in object code format, including Documentation, updates, patch releases, and upgrades with respect thereto, that Springbrook makes available for download or otherwise provides for use in connection with the Cloud Service. Cloud Software excludes any OSS and other third-party's software. If and as designated in the Specifications, the Cloud Software may be inclusive of application programming interfaces ("APIs") developed by Springbrook to enable interaction and integration with the Cloud Service.

(e) **Cloud Specifications:** means the online specifications for the Cloud Service, as made available by Springbrook at https://sprbrk.box.com/v/sprbrk-software-specs (which URL location and content may be updated from time to time by Springbrook).

(f) **Confidential Information**: means nonpublic, confidential, or proprietary information regarding either Party's business or any aspect of this Agreement, including, without limitation, technology, proprietary data compilations, computer source codes, compiled or object codes, scripted programming statements, byte codes or data codes, entity-relation or workflow diagrams, product plans, pricing, customer information and other technical, financial, marketing and business information. Information that is marked or identified as confidential or proprietary or that would reasonably be considered to be confidential based on the nature of such information and the circumstances under which it is disclosed shall be deemed to constitute Confidential Information. Confidential Information may include confidential or proprietary information of third parties that the Disclosing Party is permitted to disclose, and does disclose, to the Recipient hereunder. Confidential Information may be presented to Recipient in oral, written, graphic, and/or machine-readable formats. Regardless of presentation format, such information will be deemed and treated as Confidential Information. Notwithstanding the above, "Confidential Information" shall not include information that: (i) the Recipient can demonstrate was in its possession at the time of disclosure and was not acquired by the Recipient directly or indirectly from the Disclosing Party on a confidential basis; (ii) becomes available to the Recipient on a non-confidential basis from a source other than Disclosing Party (whether directly or indirectly) and which source to the best of Recipient's knowledge did not acquire the information on a confidential basis; (iii) is approved for release or use without restriction by written authorization of an officer of the Party owning the Confidential Information; (iv) is independently developed by or for the Recipient without use of the Disclosing Party's Confidential Information; (v) subject to mandatory disclosure pursuant to a state's public records laws, or (vi) has become generally available to the public without breach of this Agreement by the Recipient or an affiliate of the Recipient.

(g) **Customer:** means the entity that purchases a Subscription to the Cloud Service directly from Springbrook or through a Channel Partner.

(h) **Customer Data:** means any and all content, eDocuments, materials, data and information that Customer or its Authorized Users, or others who input data into the Cloud Service, such as citizens of the jurisdiction to which Customer provides services, enter into the Cloud Service including but not limited to, personal information, information exchanged between Customer and an Authorized User or an Authorized User and a third party using the Cloud Service, information used to identify account names or numbers, routing information, usernames, passwords, access codes and prompts.

(i) **Disclosing Party:** means a Party that discloses Confidential Information to a Recipient.

(j) **Documentation**: means information describing the features, functionality, operating instructions and other aspects of the Cloud Service or Cloud Software. Information contained on Springbrook's publicly facing website does not constitute Documentation.

(k) **Effective Date**: means the date of the first Order Form that is governed by these Terms and Conditions.

(l) **Fees**: means amounts payable by Customer to Springbrook as consideration for the Springbrook Services.

(m) **Intellectual Property Rights:** means any and all rights existing now or in the future under laws relating to patents, copyright, industrial design, moral rights, trade secrets, trademarks, publicity rights, and any and all similar proprietary rights, and any and all applications for registration, letters patent, renewals, extensions, divisions, continuations, reissues, and restorations thereof, now or hereafter in force and effect anywhere in the world.

(n) **Maintenance and Support Services:** means Springbrook's obligations related to availability, error resolution, response to support requests, bug fixes, and the provision of updates and upgrades to the Cloud Software or Cloud Service as further described in Exhibit A hereto.

(o) **Online Payments Schedule:** means service-specific terms and conditions applicable to the Springbrook Online Payments software, attached hereto as Exhibit B.

(p) **Open Source Software** or **OSS:** means software components that are licensed under a license approved by the Open Source Initiative or similar open source or freeware license and may be embedded in the delivered Cloud Software.

(q) **Optional Cloud Services**: mean the optional add-ons to the Cloud Service that may be available for purchase either directly from Springbrook or through Channel Partner, as more particularly described or identified in the applicable Order.

(r) **Order Form**: means a purchase document executed by Customer and Springbrook in which Customer orders Springbrook Services.

(s) **Order Terms**: means the ordering information (such as order date, products, quantity and similar information) and terms and conditions specified on an Order Form.

(t) **Personal Information:** means any data that can identify or locate an individual.

(u) **Professional Services**: means services relating to the Cloud Service, such as implementation, customization, and training.

(v) **Recipient**: means a Party that receives Confidential Information from a Disclosing Party.

(w) **Springbrook Services**: means the Cloud Service, Cloud Software, Maintenance and Support Services, and Professional Services.

(x) **Subscription**: means a paid for right to access and use the Cloud Service.

(y) **Subscription Period(s):** means the duration of a Customer's and its Authorized Users' active, paid Subscription to the Cloud Service, as designated in the Order Form(s).

(z) **Supported Modification:** means a configuration of or modification to the Cloud Service requested by Customer that can be consistently supported by Springbrook via APIs, does not require direct database changes and is capable of being tested and maintained by Springbrook.

(aa) **Term:** shall be the period of time for which this Agreement is in effect, as further set forth in Section 13. Term is different from a Subscription Period.

(bb) **Third Party Services:** means products, services, technology, and methods other than proprietary Springbrook Services.

2. Cloud Service Terms and Conditions.

(a) Subject to compliance with the terms and conditions of the Agreement, including advance receipt of applicable Fees, Springbrook will make the Cloud Service available to Authorized Users during the Subscription Period for use in connection with the internal business purposes of Customer.

(b) Springbrook hereby grants to Customer a limited, non-exclusive, non-transferrable right to access, implement, and configure the Cloud Software during the Subscription Period, solely for its internal business purposes in connection with use of the Cloud Service and in accordance with the Specifications.

(c) Customer will ensure that all of its Authorized Users using the Cloud Services under its account comply with all of Customer's obligations under this Agreement. Customer is responsible for all activity (whether or not authorized by Customer) occurring under Customer's account, including acts and omissions of its Authorized Users and individuals using credentials of Authorized Users, as though they were those of Customer. Customer will notify Springbrook promptly of any unauthorized access or use of the Springbrook Services.

(d) Customer will be responsible for meeting minimum system requirements for use of the Cloud Service accessible at https://sprbrk.box.com/v/sprbrk-minimum-requirements (which URL location and content may be updated from time to time by Springbrook) for use of the Cloud Service;

(e) Customer will use the Springbrook Services only in accordance with the Agreement, the applicable Documentation, laws and government regulations, and any written instructions provided by Springbrook to Customer.

(f) The Cloud Service is provided with a limit of five hundred gigabytes (500GB) of data storage for all cloud environments. Additional storage can be purchased from Springbrook by Customer in blocks of five hundred megabytes (500MB), with a price of one thousand dollars ($1,000) per year. If a Subscription Period for the Cloud Service is nearing its expiration date or is otherwise terminated, Springbrook will initiate its data retention processes, including the deletion of Customer Data from systems directly controlled by Springbrook. Springbrook's Data Storage Policy can be accessed at https://sprbrk.box.com/v/sprbrk-data-storage-policy (which URL location and content may be updated from time to time by Springbrook).

3. **Restrictions on Use of the Cloud Service and Cloud Software.** Except as otherwise expressly provided in the Agreement (including any Exhibits), Customer shall not (and shall not permit any Authorized User or third party to):

(a) make the Cloud Service available to anyone other than Authorized Users;

(b) use the Cloud Service, or allow access to it, in a manner that circumvents contractual usage restrictions or that exceeds Customer's authorized use or usage metrics as set forth in the Agreement, including the applicable Order Form(s);

(c) sublicense, sell, resell, transfer, assign, distribute, share, lease, make any external commercial use of, outsource, use on a timeshare or service bureau basis, or use in an application service provider or managed service provider environment, or otherwise generate income from, the Springbrook Services;

(d) modify, obscure, alter, or remove any confidentiality or proprietary rights notices contained in the Springbrook Services;

(e) decompile, disassemble, or reverse engineer any portion of the Cloud Software or Cloud Service, or attempt to discover any source code or other operational mechanisms of the Cloud Software or Cloud Service (except where such restriction is expressly prohibited by law without the possibility of waiver, and then only upon prior written notice to Springbrook);

(f) use any third-party software provided with the Cloud Software or Cloud Service other than in connection with the Cloud Software or Cloud Service;

(g) use the Springbrook Services in violation of any applicable laws and regulations;

(h) use the Springbrook Services to (1) store, download or transmit infringing, libelous, or otherwise unlawful or tortious material, or malicious code or malware, or (2) engage in phishing, spamming, denial-of-service attacks, spreading viruses or other harmful code, or other fraudulent or criminal activity, (3) interfere with or disrupt the integrity or performance of third party systems, the Cloud Software, Cloud Service or data contained therein, (4) violate or infringe upon the rights of a third party, including those pertaining to contract, intellectual property, privacy, or publicity, or (5) attempt to gain unauthorized access to the Cloud Software or Cloud Service;

(i) access or use the Springbrook Services (inclusive of any APIs) for the purpose of developing or operating products or services intended to be offered to third parties in competition with the Cloud Service or allow access by a direct competitor of Cloud Service;

(j) access the Springbrook Services for purposes of monitoring availability, penetration, or security testing, or any benchmarking;

(k) obtain or attempt to obtain intellectual property rights to any component of the Springbrook Services (inclusive of APIs) other than those expressly provided herein;

(l) create derivative works based on the Springbrook Services;

(m) use or allow the use of, the Springbrook Services by anyone located in, under the control of, or that is a national or resident of a U.S. embargoed country or territory or by a prohibited end user under

export control laws of the United States or any other applicable jurisdiction.

4. **Customer Cooperation**. Customer is responsible for selecting Authorized Users and represents and warrants it shall select Authorized Users who are qualified to operate the Cloud Service and are familiar with the information, calculations, and reports that serve as input and output. Any data entry errors are the responsibility of Customer and Springbrook does not assume the cost of any necessary servicing, repair or correction arising from such errors. Customer acknowledges that successful installation, implementation and use of the Springbrook Services cannot be accomplished by Springbrook's efforts alone and requires substantial effort and cooperation by Customer. Both Springbrook and Customer shall at all times use their best efforts to actively participate and cooperate in data conversion, system installation, implementation, training and use, shall provide each other accurate and timely information, and shall afford each other reasonable access to information and facilities. All substantive communication between Springbrook and Customer will take place between Springbrook and a project manager designated by Customer.

5. **Third Party Services.** Customer may choose to obtain products and services that are provided or supported by third parties ("**Third-Party Services**") for use in conjunction with the Springbrook Services either directly from the third party providing the Third Party Services or indirectly through Springbrook where Springbrook acts as a reseller of the Third Party Services. Third Party Services may require Customer to enter into a license or other agreement with such third party for use of the Third-Party Services. Customer is solely responsible for obtaining any such license or other agreement for the Third--Party Services. CUSTOMER EXPRESSLY ACKNOWLEDGES AND AGREES THAT THIRD-PARTY SERVICES ARE PROVIDED PURSUANT TO THE TERMS OF THE APPLICABLE THIRD-PARTY LICENSE OR SEPARATE AGREEMENT (IF ANY) BETWEEN THE PROVIDER OF THE THIRD-PARTY SERVICES AND CUSTOMER, CUSTOMER MAY SEEK REDRESS FOR USE OF THE THIRD-PARTY SERVICES SOLELY FROM THE THIRD PARTY PROVIDING THE THIRD-PARTY SERVICES, AND SPRINGBROOK ASSUMES NO RESPONSIBILITY FOR, AND SPECIFICALLY DISCLAIMS ANY LIABILITY OR OBLIGATION WITH RESPECT TO, ANY THIRD-PARTY SERVICE.

6. **Maintenance and Support Terms.**

(a) Support. Maintenance and Support Services, as described in Exhibit A, are included in the Cloud Service Subscription for no additional fees, except as provided otherwise in Exhibit A.

(b) Partner Support. Notwithstanding anything herein to the contrary, if Customer receives Maintenance and Support Services from an authorized Channel Partner, then the terms for such services agreed upon by Customer and such Channel Partner shall govern in lieu of those set forth in the Exhibit A attached hereto, and Springbrook shall have no support obligations to Customer.

7. **Ordering Process**.

(a) Order Forms. Customer may purchase the Springbrook Services (Cloud Service Subscriptions, Cloud Software licenses or Professional Services) by executing and submitting an Order Form. Execution of an Order Form referencing these Terms and Conditions makes them binding upon Customer, as does any access or use of the Springbrook Services. Upon execution of an Order Form by both Parties and subject to Customer's payment of the corresponding Fees, Springbrook will make the Cloud Service or Cloud Software, as applicable, available to Customer. Any terms and conditions contained in any quote, invoice, or purchase order that are inconsistent with or are in addition to the terms and conditions of the Agreement will be deemed stricken, unless expressly agreed to in writing by

Springbrook with explicit reference to the accepted terms and conditions. Upon acceptance of an Order Form, it will become part of the Agreement and will supersede any conflicting terms herein.

(b) No Requirement for Purchase Order. Customer acknowledges that a purchase order is not required and is for administrative convenience only, and that Springbrook has the right to issue an invoice and collect payment without a corresponding purchase order, provided, however, that if a Customer's procurement procedure requires the issuance of a purchase order or a purchase order number on a pertinent Order Form or Statement of Work, the purchase order is required to be provided to Springbrook. If the Customer issues a purchase order, then it shall be for the full amount set forth in the applicable Order Form or Statement of Work.

8. Payment Terms.

(a) Pricing. Customer will be invoiced for those amounts and at those prices set forth in an Order Form. Fees do not include any customization of the Cloud Software or Cloud Service (nor support for any such customizations, unless otherwise agreed in writing). If Customer's usage of the Cloud Software or Cloud Service is in excess of those amounts set forth in the Order Form, Customer may be billed for those overages. Customer acknowledges that purchases under the Agreement are neither contingent on the delivery of any future functionality or features nor dependent on any oral or written public comments made by Springbrook regarding future functionality or features of the Springbrook Services. Except as otherwise specified herein or in an Order Form, (i) fees are based on the specified Springbrook Services purchased, (ii) payment obligations are noncancelable and fees paid are non-refundable, except for amounts paid in error that are not actually due under the Agreement or as otherwise expressly provided herein, and (iii) quantities purchased cannot be decreased during the relevant Subscription Period.

(b) Payments. Springbrook will invoice Customer in advance for the Cloud Service. Customer shall pay Invoices within thirty (30) days of the invoice date. If Customer orders additional Subscription quantities or services part-way through an existing Subscription Period the initial Subscription Period for the additional quantity or services will be made coterminous with the existing Subscription Period and the Cloud Service Fee for such additional quantity will be prorated accordingly. Fees for Optional Cloud Service will be due at the same time as payment for the corresponding Cloud Service, or (if applicable) as otherwise specified in the applicable Order Form or governing terms. Customer is responsible for keeping Springbrook accurately and fully informed of Customer's billing and contact information, including providing any purchase order numbers in advance of invoice issuance. Springbrook shall have no responsibility for any invoices that are not received due to inaccurate or missing information provided by Customer. Customer shall pay interest on all payments not received by the invoice due date set forth above at a rate of one and a half percent (1.5%) per month or the maximum amount allowed by law, whichever is lower. All amounts due under this Agreement shall be paid by Customer in full without any set-off, counterclaim, deduction or withholding. Subscription Fees will be subject to an automatic annual increase in the amount set forth in the applicable Order Form. ("**Standard Annual Price Increase**"). Notwithstanding anything herein to the contrary, if Customer makes its payments pursuant to this Agreement to a Channel Partner, then the payment terms agreed by Customer and such Channel Partner shall govern to the extent anything in this Section 8 conflicts with such payment terms.

(c) Taxes. Fees for Springbrook Services do not include any taxes, levies, duties or similar governmental assessments of any nature, including but not limited to value-added, sales, use or withholding taxes, assessable by any local, state, provincial, federal or foreign jurisdiction (collectively, "**Taxes**"). Customer is responsible for paying all Taxes. If Springbrook has the legal obligation to pay or collect Taxes for which Customer is responsible under this paragraph, the appropriate amount will be invoiced to and paid by Customer, unless Customer provides Springbrook with a valid tax exemption certificate authorized by the appropriate taxing authority prior to invoice issuance. For clarity, Springbrook is solely responsible for taxes assessable against it based on Springbrook's income, property and employees.

(d) Suspension of Service. If any amount owing by the Customer for the Cloud Service is ninety (90) or more days delinquent, Springbrook may, in its sole discretion and cumulative to its other remedies under this Section, temporarily cease providing to Customer the Cloud Service.

9. Ownership.

(a) Ownership of Springbrook Services. As between Springbrook and Customer all right, title and interest to the Cloud Software, the Cloud Service, all technology underlying the foregoing, the Documentation, any improvements, design contributions, updates, or derivative works thereto, any knowledge or processes related thereto and/or provided hereunder, and all associated Intellectual Property Rights, belong solely to Springbrook, and is protected under the laws of the United States and the individual states and by international treaty provisions. Springbrook reserves all rights not granted herein.

(b) Limited Rights. Customer shall only receive those rights in the Springbrook Services that are expressly granted to it hereunder. Customer acknowledges that the rights granted under this Agreement, as they pertain to Maintenance and Support and to the Cloud Software and Cloud Service, do not provide Customer with title to or ownership of the Cloud Software or Cloud Service.

10. Feedback. Customer grants Springbrook a royalty-free, fully-paid, worldwide, transferable, sub-licensable, irrevocable, perpetual license to use or incorporate into the Springbrook Services (or Springbrook's other software or services) any suggestions, enhancement requests, recommendations, or other feedback provided by Customer or Authorized Users relating to the operation or features of the Springbrook Services.

11. Security.

(a) Customer Responsibilities. Information or data generated by the Cloud Service, that is provided to, and stored by, the Customer, is the sole responsibility of the Customer. Springbrook shall not be responsible for the theft, misappropriation, loss, or misuse of personal or entity related financial information, utility billing records, or any other financial information stored in Customer controlled electronic media or physical storage locations. Customer acknowledges that Customer is solely responsible for the Customer's security procedures, including but not limited to password security, encryption of sensitive information, proper handling of payroll

ACH files, physical custody of cash, internal audit procedures and processes, annual reporting, and proper training in security and backup procedures. In addition, the Customer and its related entities and affiliates agree to indemnify and hold harmless Springbrook, its contractors and agents from all costs, damages, expense and attorney's fees incurred in the event of any security breach, theft, misappropriation, loss, misuse of personal or entity related financial information, or other related incident.

(b) Security Breaches. Customer acknowledges that, notwithstanding the security features of the Cloud Service, no product, hardware, software or service can provide a completely secure mechanism of electronic transmission or communication and that there are persons and entities, including enterprises, governments and quasi-governmental actors, as well as technologies, that may attempt to breach any electronic security measure. Subject only to its limited warranty obligations set forth in Section 14, Springbrook will have no liability for any security breach caused by any such persons, entities, or technologies.

(c) Customer Data. Customer shall be responsible for Customer Data as entered in to, applied or used in the Cloud Service. Customer is responsible for ensuring the accuracy, quality, integrity and legality of Customer Data. Customer grants to Springbrook the non-exclusive right to process Customer Data (including personal data) for the sole purpose of and only to the extent necessary for Springbrook: (i) to provide the Springbrook Services; (ii) to verify Customer's compliance with the restrictions set forth in Section 3 (Restrictions on Use of the Cloud Service and Cloud Software) if Springbrook has a reasonable belief of Customer's non-compliance; and (iii) as otherwise set forth in this Agreement, including the Springbrook Privacy Policy. Springbrook may utilize the information concerning Customer's use of the Cloud Service (excluding any use of Customer's personal data or Customer's Confidential Information) to improve the Cloud Service, to provide Customer with reports on its use of the Cloud Services, and to compile aggregate statistics and usage patterns by customers using the Cloud Services. Customer represents and warrants that it owns or has full and unrestricted rights and authority to effectuate the grants set forth in this Section and there are no third parties who may claim rights or interests in the Customer Data or otherwise hinder such grants.

(d) Use of Aggregate Data. Customer agrees that Springbrook may collect, use, and disclose quantitative data derived from the use of the Cloud Service for industry analysis, benchmarking, analytics, marketing, and other business purposes. All disclosed data will be in aggregate form only and will not identify Customer, its Authorized Users, or any third parties utilizing the Cloud Service.

12. Confidentiality.

(a) Confidentiality Term. The obligations described in this Section commence on the Effective Date and will continue until two (2) years following any termination or expiration of this Agreement ("**Confidentiality Term**").

(b) Confidentiality Obligations. During the Confidentiality Term and subject to the other terms of this Agreement (including Springbrook's Privacy Policy, accessible at https://sprbrk.box.com/v/sprbrk-privacy-policy, which URL and its content may be updated from time to time by Springbrook), Recipient will protect the confidentiality of Confidential Information using the same degree of care that it uses to protect its own information of similar importance, but will in any case use no less than a reasonable degree of care to protect Confidential Information. Recipient will not directly or indirectly disclose Confidential Information or any part thereof to any third party without Disclosing Party's advance express written authorization to do so. Recipient may disclose Confidential

Information only to its employees, contractors or advisors on a need-to-know basis and who are bound by confidentiality and non-use restrictions at least as stringent as those contained herein. In responding to a request for Confidential Information, Recipient will cooperate with Disclosing Party, in a timely fashion and in a manner consistent with applicable laws, to protect the Confidential Information to the fullest extent possible.

(c) Legally Compelled Information. In the event the Recipient becomes legally compelled (by deposition, interrogatory, requests for documents, subpoena, civil investigative demand or similar process) to disclose any of the Confidential Information, or the Recipient determines that it is obligated by law, rule, statute or governmental regulation to disclose any of the Confidential Information, the Recipient shall provide the Disclosing Party with prompt written notice of such requirement so that the Disclosing Party, if possible, may seek a protective order or other appropriate remedy and/or waive compliance with the terms of this Agreement. In the event that such protective order or other remedy is not obtained, the Recipient agrees to furnish only that portion of the Confidential Information that it is legally required to furnish and to exercise reasonable efforts to obtain assurance that confidential treatment will be accorded such Confidential Information. A Party's obligations hereunder with respect to legally compelled information shall continue to be applicable for all other purposes.

(d) Publicity. During the term of this Agreement, including the term of any amendment hereto, Springbrook may publicly disclose its ongoing business relationship with Customer. Such disclosures may indicate Customer's identity and the Springbrook Services provided or contracted to be provided to Customer. These disclosures may include press releases or other communications to media, display on Springbrook web sites, or use in other marketing activities, but will not include non-public information or indicate Customer's express endorsement of Springbrook's products or services without Customer's prior written authorization.

13. Term and Termination.

(a) Term. The term of this Agreement begins on the Effective Date and will remain in effect until all Cloud Service Subscriptions expire or until this Agreement is otherwise terminated in accordance with the terms hereof, whichever occurs first (the "**Term**"). Except as otherwise specified in the applicable Order Form, all Cloud Service Subscriptions will have an initial three (3) year term and then automatically renew for successive three (3) year terms unless otherwise stated in the applicable order form, provided that either party may terminate this Agreement effective upon the expiration of the Subscription Period, by notifying the other party in writing at least sixty (60) days prior to the expiration of the Subscription Period. Cancellation notices should be sent to operations@sprbrk.com. This Agreement may be renewed at any time by execution of an Order Form referencing this Agreement, and any such renewal will be deemed part of the "Term" hereunder. Subject to Section 8(b) (Payments), pricing increases will be effective upon renewal of the Subscription Period and annually thereafter.

(b) Termination. Springbrook or Customer may terminate the Agreement if the other party materially breaches a material provision thereof, including associated Order Form(s), and, after receiving a written notice describing the circumstances of the default, fails to correct the breach within thirty (30) calendar days. Springbrook may immediately terminate this Agreement and/or Customer's Cloud Service Subscription or license to the Cloud Software upon Customer's breach of Section 3 (Restrictions on Use of the Cloud Service and Cloud Software). Either Party may also terminate the Agreement upon written notice if the other party suspends payment of its debts or experiences any

other insolvency or bankruptcy-type event.

(c) Effect of Termination. Upon expiration or termination of this Agreement for any reason, (i) Customer shall immediately pay any amounts then owing to Springbrook; (ii) the right to access the Cloud Service or Cloud Software will end; and (iv) each Recipient will return or destroy, at the Disclosing Party's option, the Disclosing Party's Confidential Information in the Recipient's possession or control.

(d) Other Termination. Springbrook may terminate this Agreement in the event the Cloud Software or Cloud Service, as applicable, is phased out across Springbrook's customer base. In such event, Springbrook will provide Customer sufficient advance notice and the parties will mutually agree to a migration plan for converting Customer to another Springbrook generally-available offering with comparable functionality.

(e) Survival. All fees that have accrued as of such expiration or termination, and Sections 1, 5, 8, 9-12, 13(c), 14(d), 15, 16 and 17 will survive any expiration or termination hereof.

14. Warranties.

(a) Mutual Warranties. Each Party represents and warrants that: (a) this Agreement has been duly executed and delivered and constitutes a valid and binding agreement enforceable against it in accordance with the terms of the Agreement; (b) the Agreement does not conflict with any other agreement or arrangement to which a Party is bound, and (c) no authorization or approval from any third party is required in connection with its execution, delivery, or performance of this Agreement.

(b) Limited Warranty. Subject to the limitations set forth below, Springbrook warrants that during the Subscription Period, the Cloud Service will, in all material respects, operate in conformity with the then-current Cloud Specifications for the applicable Cloud Service version. Springbrook's sole and exclusive obligation, and Customer's sole and exclusive remedy, for a breach of this warranty shall be that Springbrook shall be required to use commercially reasonable efforts to modify the Cloud Service to conform in all material respects to the Specifications. Customer further acknowledges that the Cloud Service is not guaranteed to operate without interruptions, failures, or errors. Springbrook will not be responsible to the extent failure of the Cloud Service to operate as warranted is caused by or results from: (i) any modification to the Cloud Service other than a Supported Modification; (ii) combination, operation or use of the Cloud Service with Customer's or Third Party Services, software or systems;

(iii) abuse, willful misconduct, or negligence by anyone other than Springbrook or Springbrook's designee; (iv) installation, configuration and use of the Cloud Service other than in accordance with the terms of this Agreement and/or the applicable Specifications and Documentation or (v) any of the Exclusions (as defined in the Cloud Service Level Commitment).

(c) Subscription Service Level Commitment. During the Subscription Period, Springbrook warrants that the Subscription Service will meet the performance level specified in Exhibit A, which sets forth Customer's sole and exclusive remedy for Springbrook's failure to achieve the stated Cloud Service performance level.

(d) Warranty Disclaimer. EXCEPT AS EXPRESSLY PROVIDED IN THIS SECTION 14, ALL SPRINGBROOK SERVICES ARE PROVIDED "AS IS" AND SPRINGBROOK AND ITS SUPPLIERS EXPRESSLY DISCLAIM ANY

AND ALL OTHER REPRESENTATIONS AND WARRANTIES, EITHER EXPRESS, IMPLIED, STATUTORY, OR OTHERWISE WITH RESPECT THERETO, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT, OR THE CONTINUOUS, UNINTERRUPTED, ERROR-FREE, VIRUS-FREE, OR SECURE ACCESS TO OR OPERATION OF THE SPRINGBROOK SERVICES. SPRINGBROOK EXPRESSLY DISCLAIMS ANY WARRANTY AS TO THE ACCURACY OR COMPLETENESS OF ANY INFORMATION OR DATA ACCESSED OR USED IN CONNECTION WITH THE SPRINGBROOK SERVICES OR MAINTENANCE AND SUPPORT OR THAT THE SPRINGBROOK SERVICES WILL BE COMPATIBLE OR WORK WITH ANY CUSTOMER OR THIRD-PARTY SOFTWARE OR HARDWARE.

15. Mutual Indemnification.

(a) Indemnification by Customer. Customer will defend (or settle), indemnify and hold harmless Springbrook, its officers, directors, employees and subcontractors, from and against any liabilities, losses, damages and expenses, including court costs and reasonable attorneys' fees, arising out of or in connection with any third-party claim: (i) that a third party has suffered injury, damage or loss resulting from Customer's or any Authorized User's use of the Software or Cloud Service, or (ii) arising from allegations that Customer has used the Software or Cloud Service in a manner that violates this Agreement or applicable law, or (iii) in connection with the nature and content of Customer Data processed by the Software or Cloud Service.

(b) Indemnification by Springbrook.

(i) Intellectual Property Indemnification. Subject to the terms and conditions of this Section 15, Springbrook will (a) defend at its expense any filed lawsuit (a "**Claim**") brought against Customer by a third party (the "Claimant") to the extent such Claim alleges that the Cloud Service or Cloud Software provided by Springbrook to Customer hereunder violates or infringes the Claimant's patents, trademarks or copyrights or misappropriates the Claimant's trade secrets (collectively, "**IP Rights**"), and (b) either (i) indemnify Customer with respect to any final, non-appealable judgments, costs, fines or penalties awarded, entered or assessed against Customer by a court of competent jurisdiction that directly result from a Claim, or (ii) pay the value of any settlement with the Claimant agreed to by Springbrook.

(ii) Springbrook Options. If a temporary or permanent injunction is obtained against the use of any part of the Cloud Service or Cloud Software for the reason that they infringe or misappropriate any third party's IP Rights or there is a reasonable likelihood of such an injunction, Springbrook may at its option (a) modify the Cloud Service or Cloud Software to avoid the allegation of infringement, (b) obtain for Customer the right to continue using the Cloud Service or Cloud Software, or (c) replace the allegedly infringing Cloud Service or Cloud Software with non-infringing and functionally equivalent technology. In the event that none of the foregoing is commercially reasonable, Springbrook may terminate Customer's right to use the allegedly infringing portion of the Cloud Service or Cloud Software.

(iii) Exclusions. Springbrook will not be liable or have any obligations hereunder for any infringement of IP Rights resulting from (a) the combination, utilization or integration of the Cloud Service or Cloud Software with Customer's or any third party's products or technology, (b) compliance with Customer's designs, specifications or instructions; (c) unauthorized modification of the Cloud Service or Cloud Software by any entity other than Springbrook, (d) use of the Cloud Service or Cloud Software other than as specified in Springbrook's published specifications and

documentation, (e) Customer's failure to incorporate updates or upgrades that would have avoided the alleged infringement; or (f) Customer's breach of the Agreement.

(iv) THIS SECTION 15 STATES THE ENTIRE OBLIGATION OF SPRINGBROOK, ITS AFFILIATES AND ITS LICENSORS WITH RESPECT TO ANY ALLEGED OR ACTUAL INFRINGEMENT OR MISAPPROPRIATION OF IP RIGHTS BY THE CLOUD SOFTWARE, CLOUD SERVICE OR ANY OTHER SPRINGBOOK SERVICES.

(c) Indemnification Requirements. In connection with any claim for indemnification under this Section 15, the indemnified party must: (i) provide the indemnifying party prompt written notice of such claim; (ii) reasonably cooperate with the indemnifying party, at indemnified party's expense, in defense and settlement of such claim; (iii) give sole authority to the indemnifying party to defend or settle such claim; and (iv) make no admission of liability with respect to the claim. The indemnified party may, at its sole expense, actively participate in any suit or proceeding, through its own counsel.

16. Limitation of Liability.

(a) Waiver of Consequential Damages. Neither Springbrook nor any other person or entity involved in creating, producing, or delivering the Springbrook Services will be liable for any indirect, incidental, special, punitive, exemplary or consequential damages, including lost profits, loss of data or loss of goodwill, loss of revenue, service interruption, computer damage or system failure or the cost of substitute products or services, or other commercial or economic loss of any kind whatsoever, or any liability of Customer to a third party, arising out of or in connection with this Agreement or from the use of or inability to use the Springbrook Services, whether based on warranty, contract, tort (including negligence), product liability or any other legal theory, even if Springbrook was advised of the possibility of such damages. Some jurisdictions do not allow the exclusion or limitation of incidental, consequential or special damages, so the above limitations may not apply to Customer.

(b) Maximum Liability. In no event will Springbrook's aggregate liability hereunder to Customer or any third party arising out of or in connection with this Agreement or from the use of or inability to use the Springbrook Services, whether in contract, tort or under any other theory of liability, exceed the total amount paid by Customer in the twelve (12) month period preceding the incident. These limitations shall apply notwithstanding any failure of essential purpose of any remedy.

(c) If Customer or Authorized Users use the Cloud Service in any application or environment where failure could cause personal injury, loss of life, or other substantial harm, Customer assumes any associated risks and will indemnify Springbrook and hold it harmless against those risks.

17. Other Terms and Conditions.

(a) Dispute Resolution. This Agreement is governed by the laws of the State of Utah without regard for its conflict of laws principles. Any controversy or claim arising out of or relating to this Agreement, or the breach thereof, will be settled by arbitration administered by the American Arbitration Association under its Commercial Arbitration Rules, including the Emergency Interim Relief Procedures, and judgment on the award rendered by the arbitrator may be entered in any court having jurisdiction thereof. The number of arbitrators shall be one (1) unless the Parties mutually agree otherwise. The place of arbitration will be American Fork, Utah. Either party may apply to the

arbitrator for injunctive relief until the arbitration award is rendered or the controversy is otherwise resolved. Either Party also may, without waiving any remedy hereunder, seek from any court having jurisdiction any interim or provisional relief that is necessary to protect the rights or property of that party, pending the arbitrator's determination of the merits of the controversy. Each party will initially bear its own expenses and an equal share of the costs of the arbitration, but the prevailing party may be awarded its expenses, reasonable attorneys' fees, and costs.

(b) Other Agencies. Each Party understands and agrees that this Agreement may be used by other governmental agencies under substantially the same terms and conditions, excluding pricing, duration, scope of services to be provided, and other terms unique to the Customer. Each governmental agency desiring to accept this Agreement, and make an award thereof, shall do so independently of the Customer and/or any other governmental agency. Each governmental agency shall be responsible for its own purchases, and each shall be liable only for materials and/or services ordered and received by it, and no governmental agency, other than Customer, assumes any liability by virtue of this Agreement. This Agreement in no way restricts or interferes with the right of the Customer or any governmental agency to competitively procure any or all items. The foregoing does not authorize either Party to disclose Confidential Information of the other Party.

(c) Equitable Relief. The Recipient acknowledges that unauthorized disclosure of the Disclosing Party's Confidential Information or misappropriation or infringement of a Party's Intellectual Property Rights could cause substantial harm to the Disclosing Party or owner of such Intellectual Property Rights for which damages alone might not be a sufficient remedy and, therefore, that upon any such disclosure, misappropriation or infringement, the injured Party will be entitled to seek appropriate equitable relief in addition to whatever other remedies it might have at law or equity.

(d) Assignment. Springbrook may assign its rights and obligations hereunder for purposes of financing or pursuant to corporate transactions involving merger, acquisition, or the sale of all or substantially all of its stock or assets. Assignment by a Customer of its rights and obligations hereunder requires the advance written consent of Springbrook. Any attempted assignment or transfer, without such consent, will be void. Subject to the foregoing, this Agreement will bind and inure to the benefit of the parties, their respective successors and permitted assigns.

(e) Entire Agreement. This Agreement sets forth the entire agreement between the Parties and supersedes any and all prior agreements of the Parties with respect to the transactions set forth herein.

(f) Severability and Amendment If any particular provision of this Agreement is determined to be invalid or unenforceable, that determination will not affect the other provisions of this Agreement, which will be construed in all respects as if the invalid or unenforceable provision were omitted. No extension, modification, or amendment of this Agreement will be effective unless it is described in writing and signed by all Parties.

(g) Notice. Except as otherwise specified in this Agreement, all notices, permissions and approvals hereunder will be in writing and will be deemed to have been given upon: (i) personal delivery, (ii) the third business day after mailing by first class mail, or (iii) sending by confirmed email if sent during the recipient's normal business hours (or, if not, then on the next business day). Notices will be sent to the address specified by the recipient in writing when entering into this Agreement or establishing Customer's account for the Springbrook Services (or such other address as the recipient may thereafter specify by notice given in accordance with this Section 17).

(h) Compliance with Laws. Each party will comply with all applicable laws and regulations with respect to its activities under this Agreement including, but not limited to, export laws and regulations of the United States and other applicable jurisdictions. Without limiting the foregoing, Customer will not permit Authorized Users to access or use the Cloud Service or Cloud Software in violation of any U.S. export embargo, prohibition or restriction. Further, in connection with the services performed under this Agreement and Customer's use of the Cloud Services or Cloud Software, the Parties agree to comply with all applicable anti- corruption and anti-bribery laws, statutes, and regulations.

(i) Relationship of the Parties. This Agreement does not create a partnership, franchise, joint venture, agency, fiduciary or similar relationship between the parties.

(j) Waiver and Cumulative Remedies. No failure or delay by either party in exercising any right under this Agreement will constitute a waiver of that right. Other than as expressly stated herein, the remedies provided herein are in addition to, and not exclusive of, any other remedies of a party at law or in equity.

(k) Force Majeure. Springbrook will not be liable for any delay or failure to perform under this Agreement to the extent such delay or failure results from circumstances or causes beyond the reasonable control of Springbrook.

Exhibits Follow

EXHIBIT A
MAINTENANCE AND SUPPORT
AVAILABILTY

This Exhibit A is part of the Springbrook Cloud Service Master Agreement Terms and Conditions. It may be updated from time to time by Springbrook in its sole discretion.

I. SUPPORT POLICY

Updates
Updates may address security fixes, critical patches, general maintenance functionality, and documentation and shall be made available at Springbrook's discretion. Springbrook is under no obligation to develop any future functionality or enhancements unless otherwise specified in the Agreement. If an update for the Cloud Service is made available to Customer pursuant to this Support Policy, it will automatically replace the previous version of the applicable Cloud Service.

Support Commitment

In support of the Cloud Service, Springbrook will provide Customer with the following first line support: Telephone Support. Springbrook's Customer Resource Center (CRC), a live technical support facility, will be available to Customer from 5:00 a.m. until 5:00 p.m. Pacific time Monday through Friday, excluding Springbrook's observed holidays.

Email Support. Springbrook provides an electronic mail address (help@sprbrk.com) to which Customer may submit routine or non-critical support requests. Email Support Requests will be addressed by Springbrook during its regular business hours of 5:00 a.m. until 5:00 p.m. Pacific time Monday through Friday.

Online Support Materials. Springbrook will make available to Customer certain archived client-side software updates and other technical information in Springbrook's online support databases. This Online Support will be continuously available to Customers.

Upgrade/Downgrade of Severity Level

If, during the Support Request process, the issue either warrants assignment of a higher severity level than currently assigned or no longer warrants the severity level currently assigned based on its current impact on the production database, then the severity level will be upgraded or downgraded accordingly to the severity level that most appropriately reflects its current impact.

Third Party Product Support

If any third-party software is supplied by Springbrook, Springbrook disclaims all support obligations for such third-party software, unless expressly specified by Springbrook in Customer's Agreement.

Exclusions

The following Support Exclusions are not covered by this Support Policy: (a) Support required due to Customer's or any End User's or third party's misuse of the Services; (b) Support during times outside of Springbrook's regular business hours stated above; (c) Support necessitated by external factors outside of Springbrook's reasonable control, including any force majeure event or Internet access or related problems.

Response and Resolution Goals

Springbrook will respond to Customer's Support Requests in a manner appropriate for the severity of the reported issue and will use good faith efforts to achieve the goals listed below.

A. Critical Severity Level

Definition. System or application is non-functional or seriously affected and there is no reasonable workaround available (e.g., business is halted).

Response goal. Confirmation of receipt within 1 business hour. Update as information arrives or at the interval agreed with the Customer.

Resolution goal. Upon confirmation of receipt, Springbrook begins continuous work on the case. Springbrook will put forth the effort to provide a workaround, fix, or estimated completion date within 72 hours after the problem has been diagnosed and/or replicated, provided there is an agency representative available to assist with issue diagnosis and testing during the resolution process.

B. High Severity Level

Definition. System or application is affected and there is no workaround available, or the workaround is impractical (e.g., system response is very slow, day to day operations continue but are impacted by the work around).

Response goal. Confirmation of receipt within 4 business hours.

Resolution goal. Springbrook will put forth the effort to provide a workaround or fix or estimated completion date within 14 business days after the problem has been diagnosed and/or replicated.

C. Medium Severity Level

Definition. System or application feature is non-functional, and a convenient workaround exists (e.g., non-critical feature is unavailable or requires additional user intervention).

Response goal. Confirmation of receipt within 8 business hours.

Resolution goal. Springbrook will put forth the effort to provide a workaround or fix or estimated completion date within 21 business days after the problem has been diagnosed and/or replicated.

D. Low Severity Level

Definition. System or application feature works, but there is a minor problem (e.g., incorrect label, or cosmetic defect).

Response goal. Confirmation of receipt within 24 business hours

Resolution goal. Resolution for the issue may be released as a patch set or be incorporated into a future release of the product.

II. AVAILABILITY

Service Availability:

Springbrook will use commercially reasonable efforts to (a) provide bandwidth sufficient for Customer's use of the Cloud Service provided hereunder and in an applicable Order Form and (b) operate and manage the Cloud Service with a ninety-nine and one-half percent (99.5%) uptime goal (the "**Availability SLA**"), excluding situations identified as "Exclusions" below.

"Exclusions" means any outage that results from any of the following:

(a) Any maintenance performed by Springbrook during Springbrook's standard maintenance windows. Springbrook will notify Customer within forty-eight (48) hours of any standard maintenance and within twenty-four (24) hours for other non-standard emergency maintenance (collectively referred to herein as "**Scheduled Maintenance**").

(b) Customer's information content or application programming, or the acts or omissions of Customer or its agents, including, without limitation, the following:

1. Customer's failure to provide Springbrook with reasonable advance prior notice of any pending unusual large deployments of new nodes (e.g., adding over ten (10) percent total nodes in less than twenty-four (24) hours);
2. Customer's implementation of any significant configuration changes, including changes that lead to a greater than thirty percent (30%) change in a one week period or greater than fifty percent (50%) change in a one month period in the number of key objects in the system including but not limited to metrics, snapshots, nodes, events and business transactions;
3. Any misconfiguration by Customer (as determined in Springbrook's sole discretion), including, without limitation, configuration errors and bad or unintended usage of the Cloud Service; and
4. Force majeure or other circumstances beyond Springbrook's reasonable control that could not be avoided by its exercise of due care.

(c) Failures of the Internet backbone, telecommunications systems, ISP failures, or the network by which Customer connects to the Internet backbone or any other network unavailability.

(d) Any window of time when Customer agrees that Cloud Service availability/unavailability will not be monitored or counted.

(e) Any problems resulting from Customer combining or merging the Cloud Service with any hardware or software not supplied by Springbrook or not identified by Springbrook in the Specifications as being compatible with the Cloud Service.

(f) Interruptions or delays in providing the Cloud Service resulting from telecommunication or Internet service provider failures. Customer's or any third party's use of the Cloud Service in an unauthorized or unlawful manner.

Remedies for Excessive Downtime:

In the event the Availability of the Cloud Service falls below the Availability SLA in a given calendar month, Springbrook will pay Customer a service credit ("**Service Credit**") equal to the percentage of the fees set forth in the table below corresponding to the actual Availability of the Cloud Service during the applicable calendar month. Springbrook will apply any Service Credits only against future Cloud Service payments otherwise due from Customer. Service Credits will not entitle Customer to any refund or other payment from Springbrook. Service Credits may not be transferred or applied to any other account. Unless otherwise provided in this Agreement, Customer's sole and exclusive remedy for any unavailability, non-performance, or other failure by Springbrook to provide the Cloud Service is the receipt of a Service Credit (if eligible) in accordance with the terms of this Exhibit A.

System availability is measured by the following formula: x = (n - y) *100 / n

Notes:
(1) "x" is the uptime percentage; "n" is the total number of hours in the given calendar month minus Exclusions; and "y" is the total number of downtime hours in the given calendar month not caused by an Exclusion.

Service Availability	Percentage of Monthly Service Fees Credited
>99.5%	**0%**

Customer Account Login:
For Springbrook user interface access, Springbrook uses TLS 1.2 with AES 256 bit or similar encryption for protection of data in transit, which is supported by most modern browsers. Springbrook will also restrict applicable administrative user interface access to Customer corporate networks for additional security on written request by Customer.

Hosting:
Springbrook's SaaS platform (servers, infrastructure, and storage) for the Cloud Service is and will remain hosted in one of the largest data centers in North America, specifically designed and constructed to deliver world- class physical security, power availability, infrastructure flexibility and growth capacity. Springbrook's data center provider is and will remain SSAE 18 SOC2 compliant, meaning it has been fully independently audited to verify the validity and functionality of its control activities and processes. Every Server for the Services is and will remain operated in a fully redundant fail-over pair to ensure high availability. Data is and will remain backed up nightly, stored redundantly and will be restored rapidly in case of failure.
Security Patching and updates are actively evaluated by engineers and will be deployed based upon

the impact and risk and stability benefits they offer to Springbrook's SaaS platform and Customers.

Springbrook will attempt to provide customers reasonable prior notice to security changes, updates, and patches, unless the delay will lead to a significant risk of impact to customer data.

Fees:
Maintenance and Support Services, as described herein, are included in the Cloud Service Subscription for no additional fees, except as follows:

Springbrook will bill Customer on an hourly basis for the following services that are beyond the scope of standard Maintenance and Support Services;

(a) Maintenance or Support in cases where repeated operator-produced error by the same user continues to occur despite notification to Customer;

(b) Maintenance and Support associated with applications not purchased by Customer from Springbrook, as documented in an appropriate Order Form or Statement of Work;

(c) Maintenance and Support outside the scope of this Agreement;

(d) Maintenance and Support necessitated by Customer's failure to provide adequate internal controls to ensure the accuracy and appropriate use of the Cloud Software or Cloud Service and compliance with local, state and federal regulations and auditors requirements;

(e) Costs associated with Customer's creation or modification of data in Springbrook's database except through the appropriate use of the Cloud Software or Cloud Service;

(f) Costs associated with Customer's own actions to integrate the Cloud Software or Cloud Service with applications or services not purchased from Springbrook;

(g) Costs associated with Customer's failure to meet the terms and conditions of this Agreement;

(h) Costs associated with additional labor or out of pocket expenses incurred while providing support to Customer in cases where Springbrook has requested but Customer has denied remote access into a user workstation or the server housing the Cloud Software; and

(i) Labor and travel costs associated with providing on-site for services covered by this Agreement.

EXHIBIT B

ONLINE PAYMENTS SCHEDULE

1. Definitions.

"**Citizen**" means the person who uses Online Payments (as defined below) to complete a payment processing that results in the debiting or charging of an amount to such person's payment instrument and the crediting of funds to Customer.

"**Online Payments**" means an optional third-party add-on to the Cloud Software that Springbrook facilitates designed to collect payment information for the purpose of payment processing.

"**Payment Application(s)**" refers broadly to all third-party payment applications, gateway, processors, payment terminals, and service providers that store, process, or transmit cardholder data as part of authorization or settlement, where these payment applications are sold, distributed or licensed to Customer.

2. Online Payments.

(a) During the Term, and subject to compliance with the terms and conditions of this Exhibit, Springbrook will provide the right to access to, and use of, Online Payments to Customer's Citizens with an Online Payments enabled Account. For the avoidance of doubt, Springbrook is only facilitating access to and use of Online Payments and is not a provider of Online Payments.

(b) To facilitate payments, Customer will be required to provide Springbrook with certain Customer Data, including specifically, information that allows Springbrook to: (a) transmit Customer's identifying information to a Payment Application; (b) if applicable, receive appropriate payment authorization from a Payment Application; and (c) collect any other information that Customer or Payment Application requires of Springbrook in order to facilitate payment processing. Customer authorizes Springbrook to store, process, and transmit Customer Data as necessary for a Payment Application to facilitate payment processing between Customer and a third party designated by Customer. Unless otherwise provided, Online Payments will temporarily store information received from Customer, such as account information for a Payment Application only for the purpose of facilitating the payment processing.

(c) The payment processing facilitated through Online Payments is processing activities between Customer and a third party and/or Customer and a Payment Application, and not with Springbrook. Payment Applications are independent contractors and not agents, employees or subcontractors of Springbrook. Springbrook does not control and is not responsible for the payment methods made available by the Payment Applications through Cloud Software nor the Third-Party Services that are sold or purchased by Customer. Customer acknowledges and agrees that Springbrook cannot ensure that Citizen or third party will complete a payment processing or that it is authorized to do so.

(d) Springbrook will maintain a current PCI-DSS Attestation of Compliance ("AOC") which shall be available upon request to Customer once per year.

3. Additional Customer Responsibilities.

Springbrook's provision of Online Payments is conditioned on Customer's acknowledgement of and agreement of the following:

(a) Customer is solely responsible for registering and maintaining an account with Online Payments in order to facilitate the payment processing via Online Payments;

(b) Customer is solely responsible for complying with: (i) all laws applicable to the payment processing conducted by customer via Online Payments; (ii) all terms of use or other terms and conditions between Customer and Payment Applications.

(c) Customer is solely responsible for the acts and omissions of its Authorized Users in relation to their use of Online Payments and for ensuring that such use complies with the terms of the Agreement;

(d) Customer has exclusive control over and responsibility for the content, quality, and format of any payments processing it submits to be processed via Online Payments. Nothing in this Exhibit may be construed to make Springbrook a party to any payment processed by Online Payments, and Springbrook makes no representation or warranty regarding the payment processing sought to be affected by Customer's use of Online Payments; and

(e) Customer is solely responsible for any and all disputes with any Payment Applications or Citizens related to or in connection with a payment processing sought to be facilitated via Online Payments, including, but not limited to: (i) chargebacks; (ii) products or services not received; (iii) return of, delayed delivery of, or cancelled products or services; (iv) cancelled transactions; (v) duplicate transactions or charges; (vi) electronic debits and credits involving bank accounts, debit cards, credit cards, and check issuances; and (vii) amount of time to complete payment processing.

4. Payment Warranties; Disclaimers' Limitation of Liability.

(a) Springbrook Payments Warranty**.** The parties acknowledge and agree that, notwithstanding any of the provisions of the Agreement, Springbrook's sole and exclusive warranties with respect to Online Payments are set forth in the following sentence. Springbrook warrants that Online Payments as delivered to Customer and used in accordance with the Agreement and its applicable specifications will perform substantially in accordance with the specifications associated with the Software.

(b) Disclaimer**.** Except for the express warranties for the Cloud Software set forth above, Springbrook: (a) makes no additional representation or warrant of any kind-whether express, implied in fact or by operation of law, or statutory-with respect to Online Payments; (b) disclaims all implied warranties, including, but not limited to, merchantability, fitness for a particular purpose, non-infringement and title; and (c) does not warrant that Online Payments will be error-free or meet Customer's requirements. Customer has no right to make or pass on any representation or warranty on behalf of Springbrook to any third party.

(c) Limitation of Liability**.** Springbrook shall not be responsible or liable for any claims, demands and damages (actual and consequential) arising out of or in any way connected with a dispute that may arise between Customer and a Citizen, and /or Customer and a Payment Application

regarding the payment processing ("Payment Processing Disputes"), and Customer hereby agrees that it will not bring or assert any action, claim or cause of action in jurisdiction or forum against Springbrook arising from or relating to a Payment Processing Dispute.

5. Third Party Claims.

In addition to the third party claims obligations and subject to the indemnification procedures under the Agreement, Customer will indemnify and defend Springbrook against, any Claim to the extent arising from or related to: (a) improper use of Online Payments by Customer or its Authorized Users or Citizens; (b) any breach by Customer of its obligations hereunder; (c) the nature and content of all cardholder data or any related data thereto provided by customer, its Authorized Users or Citizens through use of Online Payments; (D) violation of any law or the rights of a third party by Customer through its use of Online Payments and/or the actions or inactions of any third party to whom Customer grants permissions to use Customer's Account or access Online Payments on Customer's behalf; and (e) the terms of an agreement between Customer and a Citizen, or Customer and a Payment Application.

SPRINGBROOK PROFESSIONAL SERVICES AGREEMENT
TERMS AND CONDITIONS

These Terms and Conditions, together with each Order Form entered into by the Parties that references such Terms and Conditions, constitute a binding agreement ("**Agreement**") by and between Springbrook Holding Company, LLC, a Delaware corporation and its Affiliates ("**Springbrook**") and the Customer identified on the Order Form ("**Customer**"). These Terms and Conditions become effective as of the date of the related Order Form. Each of Springbrook and Customer is referred to herein individually as a "**Party**" and collectively as the "**Parties**."

The Agreement governs the provision by Springbrook, and the receipt by Customer, of the Professional Services (defined below) that Springbrook provides to Customer.

1. SCOPE OF SERVICES.

(a) Subject to compliance with the terms and conditions of the Agreement, Springbrook will provide Customer with certain skilled services, such as software implementation, configuration, conversion, customization, upgrade, data extraction, diagnostic, training and/or other services (collectively "**Professional Services**") as specified in the applicable order form executed by Springbrook and Customer (each an "**Order Form**"). Any such Order Form must reference these Terms and Conditions.

(b) Each Order Form, or will include, at a minimum: (i) a description of the Professional Services and any deliverables and/or materials to be provided to Customer (each, a "**Deliverable**"); (ii) applicable fees and payment terms for such Professional Services, if not elsewhere specified, and (iii) other details regarding the Professional Services. All Order Forms will be subject to these Terms and Conditions.

(c) For certain types of Professional Services, Springbrook will prepare and make available to Customer a scope of work or cloud migration project packet before commencing such services.

(d) Customer acknowledges that data conversion services are limited to three (3) years of data.

2. CHANGE ORDERS.

If the Customer or Springbrook requests a change in any of the specifications, requirements, Deliverables, or scope (including drawings and designs) of the Professional Services described in any Order Form, the Party seeking the change will propose the applicable changes by written notice.

Within a reasonable amount of time (not to exceed four (4) business days in the case of implementation services) after receipt of written notice, each Party's designated personnel will meet, either in person or via telephone conference, to discuss and agree upon any proposed changes. Thereafter, Springbrook will prepare a change order describing the proposed changes and any associated changes in the Deliverables,

Deliverable schedule, fees and/or expenses, or other aspects of the change (each, a "Change Order").

Change Orders will not be binding until they are executed by both parties. Executed Change Orders will be deemed part of, and subject to, the Agreement. If the parties disagree about the proposed changes, they will promptly escalate the change request to their respective senior management for resolution.

In the event the Customer requires significant changes (either individually or cumulatively across Change Order(s)) which Springbrook reasonably determines are (i) a material modification of the nature or scope of Professional Services being purchased and/or (ii) significantly outside any Supported Configuration (as defined below), Springbrook may, upon no less than thirty (30) days' notice to the Customer, suspend or terminate the applicable Order Form and/or Change Order(s). In the event of any such termination or suspension, the parties will work together in finalizing agreed-upon Deliverables. Unless otherwise expressly agreed to by the Parties at the time of any such material change, Springbrook will not be deemed to have waived any of the Customer's payment obligations in respect of completed Deliverables. A "Supported Configuration" means a software configuration that can be consistently supported by Springbrook via APIs, does not require direct database changes and is capable of being tested and maintained by Springbrook.

3. ACCEPTANCE.

(a) Acceptance. Unless indicated to the contrary in the Order Form, the Professional Services and accompanying Deliverables will be deemed accepted upon delivery.

(b) Review. Review and testing of Deliverables, if so indicated in the Order Form, shall be conducted pursuant to the acceptance criteria or test plans mutually agreed upon in writing by the Parties and shall take place within the mutually agreed timeframes established in the project plan or schedule. Absent mutual agreement to the contrary, Customer will provide Springbrook with written notification of acceptance or rejection for each Deliverable within five (5) business days of delivery (the "**Acceptance Period**"). Failure to reject a Deliverable within the Acceptance Period will be deemed acceptance. If Customer, in its reasonable and good faith judgment, determines that any submitted Deliverable does not satisfy mutually agreed-upon acceptance criteria, Customer must so notify Springbrook in writing before the end of the Acceptance Period, specifying the deficiencies in detail. Springbrook will use commercially reasonable efforts to correct such deficiencies and resubmit the Deliverable to Customer as soon as practicable.

4. OWNERSHIP RIGHTS AND LICENSES.

(a) License for Deliverables. Subject to these Terms and Conditions and upon payment of fees due under an applicable Order Form, Springbrook grants Customer a limited, non-exclusive, worldwide, nontransferable, terminable license to use the Deliverables solely for Customer's internal operations in connection with authorized use of the applicable Springbrook services. Notwithstanding any other provision of these terms and conditions, nothing herein is intended to assign or transfer any intellectual property rights in the proprietary tools, libraries, know-how, techniques, and expertise ("**Tools**") used by Springbrook to develop the Deliverables and/or provide the Professional Services.

(b) Proprietary Rights. As between the parties, Springbrook shall solely and exclusively own all right, title, and interest in the Professional Services, Deliverables, and any software provided by Springbrook, including all modifications, enhancements, and derivative works thereof and any other of Springbrook's products or services, whether created by Springbrook or Customer, together with all intellectual property and other proprietary rights therein. Customer hereby makes all assignments necessary to accomplish the foregoing ownership. None of the Professional Services or Deliverables will be deemed to constitute work product or work-for-hire inuring to the benefit of Customer.

(c) No Reverse Engineering. Deliverables constitute Springbrook Confidential Information and Customer may not reverse engineer, decompile, disassemble, translate, copy, reproduce, display, publish, create derivative works of, assign, sell, lease, rent, license or grant any interest in the Deliverables to any party except as expressly permitted by Springbrook.

(d) Conflicting Language. In the event any language conflicting with this Section 4 is added to any Order Form or Change Order, the parties expressly agree that such statement will have no effect on Springbrook's rights as set out herein.

5. COOPERATION.

(a) Customer Cooperation. Springbrook's ability to successfully perform the Professional Services is dependent upon Customer's reasonable and good faith cooperation by, without limitation:
(i) allocating sufficient resources and timely performing any tasks reasonably necessary to enable Springbrook to perform its obligations under each Order Form; (ii) timely delivering any materials and other obligations required under each Order Form; (iii) providing Springbrook with access to Customer's sites and facilities during Customer's normal business hours and as otherwise reasonably required by Springbrook to perform the Professional Services; (iv) timely responding to Springbrook's inquiries related to the Professional Services; (v) assigning a project manager as a primary point of contact for Springbrook; (vi) actively participating in scheduled project meetings; and (vii) providing, in a timely manner and at no charge to Springbrook, office workspace, telephone and other facilities, suitably configured computer equipment, access to Customer's appropriate and knowledgeable employees and continuous administrative access to Customer's accounts, and coordination of onsite and telephonic meetings all as reasonably required by Springbrook.

(b) Customer Delays. Delays in Springbrook's provision of the Professional Services caused by Customer (each, a "Delay"), during any implementation period may have adverse collateral effects on Springbrook's overall work schedule. If Springbrook's performance of any of its obligations in respect of the Professional Services is prevented or delayed by any act or omission by Customer, or failure by Customer to perform any of its obligations hereunder the Agreement, such as those identified in subsection (a) above:

- Springbrook shall, without limiting its other rights or remedies, have the right to suspend performance of the Professional Services and relieve it from the

performance of any of its obligations until Customer remedies the Delay.

- Although Springbrook will use its commercially reasonable efforts to promptly resume work following a Delay, Customer acknowledges that schedules for the Professional Services may be delayed by more than the number of days delayed by Customer.

- Customer agrees that if additional time is required to complete the Professional Services as the result of Customer Delays, such time will be charged to Customer at Springbrook's then-current time-and-materials rates.

(c) Customer Postponements. If Customer wishes to postpone or fails to be available for a scheduled meeting, training session or other activity, it shall provide Springbrook with no less than two (2) business days' written notice of such postponement or non-availability. If Customer fails to provide such notice in the required time period, Springbrook's shall invoice the Customer for lost or delayed scheduled time, with a minimum charge of two (2) hours. Additional charges may apply based on the resources and preparation required for the meeting. Such liability will be in addition to the charge for the services at the time they are performed.

6. PAYMENT TERMS.

(a) Invoicing and Payment. Customer will be invoiced for the amounts and at the times set forth in the Order Form. Professional Services fees are due and payable within thirty (30) days of the invoice date.

(b) Billing Info & Overdue Charges. Customer is responsible for keeping Springbrook accurately and fully informed of Customer's billing and contact information, including providing any purchase order numbers in advance of invoice issuance. If any Professional Service fees are not received from Customer by the due date, they will accrue interest at the rate of one and a half percent (1.5%) of the outstanding balance per month, or the maximum rate permitted by law, whichever is lower.

(c) Overdue Payments. If any amount owing by Customer hereunder for any of the Professional Services is thirty (30) or more days overdue, Springbrook may, without limiting its other rights and remedies, accelerate Customer's other unpaid fee obligations, if any, hereunder (including any Order Form) so that all such obligations become immediately due and payable, suspend the Professional Services and/or stop performance of the Professional Services until such amounts are paid in full.

(d) Taxes. Professional Services fees do not include any taxes, levies, duties, or similar governmental assessments of any nature, including but not limited to value-added, sales, use or withholding taxes, assessable by any local, state, provincial, federal, or foreign jurisdiction (collectively,

"**Taxes**"). Customer is responsible for paying all Taxes. If Springbrook has the legal obligation to pay or collect Taxes for which Customer is responsible under this paragraph, the appropriate amount will be invoiced to and paid by Customer, unless Customer provides Springbrook with a valid tax exemption certificate authorized by the appropriate taxing authority prior to invoice issuance. For clarity, Springbrook is solely responsible for taxes assessable against it based on Springbrook's income, property, and employees.

7. WARRANTY.

Springbrook warrants that the Professional Services will be performed for and delivered to Customer in a good, diligent, workmanlike manner, consistent with the practices and standards of care generally accepted within and expected of Springbrook's industry. For any breach of the above warranty, Customer's sole remedy will be the re-performance of the applicable Professional Services by Springbrook. This warranty will be in effect for a period of ninety (90) days from acceptance of any Professional Services.

8. DISCLAIMER.

Section 7 sets forth the sole and exclusive warranties and remedies related to the Professional Services, Deliverables and Tools performed or provided hereunder. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EXCEPT AS EXPRESSLY PROVIDED HEREIN, SPRINGBROOK DOES NOT MAKE ANY WARRANTIES OF ANY KIND, WHETHER EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, AND SPRINGBROOK SPECIFICALLY DISCLAIMS ALL IMPLIED WARRANTIES, INCLUDING ANY WARRANTIES OF MERCHANTABILITY, NON-INFRINGEMENT OR FITNESS FOR A PARTICULAR PURPOSE, OR ANY WARRANTIES ARISING OUT OF COURSE OF DEALING OR USAGE OF TRADE. EXCEPT AS PROVIDED HEREIN, THE PROFESSIONAL SERVICES AND DELIVERABLES PROVIDED TO CUSTOMER ARE ON AN "AS IS" AND "AS AVAILABLE" BASIS.

9. TERM AND TERMINATION.

(a) Term. The Agreement commences on the date of last signature on the first Order Form issued hereunder ("**Effective Date**") and will remain in effect until terminated in accordance with this section (the "**Term**"). Each Order Form will commence on the date it is last signed and will expire upon completion of the project set forth in the applicable Order Form.

(b) Cancellation. Once signed by both parties, an Order Form will be non-cancellable, except as otherwise explicitly stated in such Order Form.

(c) Termination. This Agreement will terminate automatically when any agreement for Cloud Services to which this Agreement is related and/or all Order Forms referencing this Agreement are terminated or expired. Either Party may terminate this Agreement for cause: (i) upon thirty (30) days' notice to the other party of a material breach if such breach remains uncured at the expiration of such period, or (ii) if the other Party becomes the subject of a petition in bankruptcy or any other proceeding relating to insolvency, receivership, liquidation or assignment for the benefit of creditors.

(d) Effect of Termination. For the avoidance of doubt, termination under any of the foregoing subsections will not affect Customer's outstanding payment obligations to Springbrook in respect of Professional Services and Deliverables provided prior to such termination. Upon any termination of this Agreement, Customer will have no rights to continue receipt of any on-going or additional Professional Services, whether or not such Professional Services are completed prior to such termination.

(e) Survival. All fees that have accrued as of such expiration or termination, and Sections 1, 5, 8, 9-12, 13(c), 14(d), 15, 16 and 17 will survive any expiration or termination hereof.

10. CONFIDENTIALITY.

(a) Confidentiality Term. The obligations described in this Section commence on the Effective Date and will continue until two (2) years following any termination or expiration of this Agreement ("**Confidentiality Term**").

(b) Definitions. "**Disclosing Party**" and "**Recipient**" refer respectively to the party which discloses information and the party to which information is disclosed in a given exchange. "**Confidential Information**" means all disclosed information relating in whole or in part to non-public data, proprietary data compilations, computer source codes, compiled or object codes, scripted programming statements, byte codes or data codes, entity-relation or workflow diagrams, financial records or information, client records or information, organizational or personnel information, business plans, or works-in-progress, even where such works, when completed, would not necessarily comprise Confidential Information. The foregoing listing is not intended by the Parties to be comprehensive, and any information which Disclosing Party marks or otherwise designates as "Confidential" or "Proprietary" will be deemed and treated as Confidential Information, as will information that would reasonably be considered to be confidential given its nature and the circumstances under which it is disclosed. Information which qualifies as Confidential Information may be presented to Recipient in oral, written, graphic, and/or machine-readable formats. Regardless of presentation format, such information will be deemed and treated as Confidential Information.

(c) Confidentiality Obligations. During the Confidentiality Term (as defined below) and subject to the other terms of this Agreement (including Springbrook's Privacy Policy, accessible at https://sprbrk.box.com/v/sprbrk-privacy-policy, which URL and its content may be updated from time to time by Springbrook), Recipient will protect the confidentiality of Confidential Information using the same degree of care that it uses to protect its own information of similar importance, but will in any case use no less than a reasonable degree of care to protect Confidential Information. Recipient will not directly or indirectly disclose Confidential Information or any part thereof to any third party without Disclosing Party's advance express written authorization to do so. Recipient may disclose Confidential Information only to its employees, contractors, or advisors on a need-to-know basis and who are bound by confidentiality and non-use restrictions at least as stringent as those contained herein. In responding to a request for Confidential Information, Recipient will cooperate with Disclosing

Party, in a timely fashion and in a manner consistent with applicable laws, to protect the Confidential Information to the fullest extent possible.

(d) Legally Compelled Information. In the event the Recipient becomes legally compelled (by deposition, interrogatory, requests for documents, subpoena, civil investigative demand or similar process) to disclose any Confidential Information, or the Recipient determines that it is obligated by law, rule, statute or governmental regulation to disclose any of the Confidential Information, the Recipient shall provide the Disclosing Party with prompt written notice of such requirement so that the Disclosing Party, if possible, may seek a protective order or other appropriate remedy and/or waive compliance with the terms of this Agreement. In the event that such protective order or other remedy is not obtained, the Recipient agrees to furnish only that portion of the Confidential Information that it is legally required to furnish and to exercise reasonable efforts to obtain assurance that confidential treatment will be accorded such Confidential Information. A Party's obligations hereunder with respect to legally compelled information shall continue to be applicable for all other purposes.

(e) Publicity. During the Term of this Agreement, including the term of any amendment hereto, Springbrook may publicly disclose its ongoing business relationship with Customer. Such disclosures may indicate Customer's identity and the Springbrook Services provided or contracted to be provided to Customer. These disclosures may include press releases or other communications to media, display on Springbrook web sites, or use in other marketing activities, but will not include non-public information or indicate Customer's express endorsement of Springbrook's products or services without Customer's prior written authorization.

(f) Customer's Confidential Information. Springbrook will have the right to use any Customer Confidential Information solely for providing the Professional Services to Customer hereunder. Notwithstanding the foregoing, Springbrook may use aggregate Customer Confidential Information for Springbrook development, internal training, and other reasonable business purposes not specific to Customer or its End Users.

11. LIMITATION OF LIABILITY.

(a) Waiver of Consequential Damages. Neither Springbrook nor any other person or entity involved in creating, producing, or delivering the Professional Services, including any Deliverables, will be liable for any indirect, incidental, special, punitive, exemplary or consequential damages, including lost profits, loss of data or loss of goodwill, loss of revenue, service interruption, computer damage or system failure or the cost of substitute products or services, or other commercial or economic loss of any kind whatsoever, or any liability of Customer to a third party, arising out of or in connection with this Agreement or from the use of or inability to use the Professional Services, whether based on warranty, contract, tort (including negligence), product liability or any other legal theory, even if Springbrook was advised of the possibility of such damages. Some jurisdictions do not allow the exclusion or limitation of incidental, consequential or special damages, so the above limitations may not apply to Customer.

(b) In no event will Springbrook's aggregate liability hereunder to Customer or any third party arising out of or in connection with this Agreement or from the use of or inability to use the Professional

Services, whether in contract, tort or under any other theory of liability, exceed the total amount paid by Customer in the twelve (12) month period preceding the incident. These limitations shall apply notwithstanding any failure of essential purpose of any remedy.

12. GENERAL.

(a) Notice. Except as otherwise specified in this Agreement, all notices, permissions and approvals hereunder must be in writing and will be deemed to have been given upon: (i) personal delivery, (ii) the third business day after mailing by first class mail, or (iii) sending by confirmed email if sent during the recipient's normal business hours (or, if not, then on the next business day). Notices will be sent to the address specified by the recipient in writing when entering into this Agreement or establishing Customer's account for the Professional Services (or such other address as the recipient may thereafter specify by notice given in accordance with this Section 12(a)). Customer's email address for communication and notice purposes relating to this Agreement will be set forth on the Order Form (or subsequent email addresses as advised by Customer). Customer agrees to accept emails from Springbrook at the e-mail address specified in the Order Form.

(b) Compliance with Laws. Each party will comply with all applicable laws and regulations with respect to its activities under this Agreement including, but not limited to, the export laws and regulations of the United States and other applicable jurisdictions.

(c) Relationship of Parties. Springbrook's relationship with Customer pursuant to this Agreement will be that of an independent contractor. Neither party will have any authority to bind the other, to assume or create any obligation, to enter into any agreements, or to make any warranties or representations on behalf of the other. Nothing in this Agreement will be deemed to create any agency, partnership, or joint venture relationship between the parties.

(d) Use of Contractors. Springbrook reserves the right to use third parties (who are under a covenant of confidentiality with Springbrook), including, but not limited to, offshore subcontractors to assist with the Professional Services, including, without limitation, any data migration, configuration, implementation, and custom code development processes.

(e) Waiver and Cumulative Remedies. No failure or delay by either party in exercising any right under this Agreement will constitute a waiver of that right. Other than as expressly stated herein, the remedies provided herein are in addition to, and not exclusive of, any other remedies of a party at law or in equity.

(f) Severability. If any provision of this Agreement is held by a court of competent jurisdiction to be contrary to law, the provision will be modified by the court and interpreted so as best to accomplish the objectives of the original provision to the fullest extent permitted by law, and the remaining provisions of this Agreement will remain in effect.

(g) Assignment. Customer may not assign or transfer this Agreement or any Order Form hereunder,

whether by operation of law or otherwise, without the prior written consent of Springbrook. Any attempted assignment or transfer, without such consent, will be void. Subject to the foregoing, this Agreement will bind and inure to the benefit of the parties, their respective successors and permitted assigns.

(h) Force Majeure. Springbrook will not be liable for any delay or failure to perform under this Agreement to the extent such delay or failure results from circumstances or causes beyond the reasonable control of Springbrook.

(i) Dispute Resolution This Agreement is governed by the laws of the State of Utah without regard for its conflict of laws principles. Any controversy or claim arising out of or relating to this Agreement, or the breach thereof, will be settled by arbitration administered by the American Arbitration Association under its Commercial Arbitration Rules, including the Emergency Interim Relief Procedures, and judgment on the award rendered by the arbitrator may be entered in any court having jurisdiction thereof. The number of arbitrators shall be one (1) unless the Parties mutually agree otherwise. The place of arbitration will be the State of Utah. Either party may apply to the arbitrator for injunctive relief until the arbitration award is rendered or the controversy is otherwise resolved. Either Party also may, without waiving any remedy hereunder, seek from any court having jurisdiction any interim or provisional relief that is necessary to protect the rights or property of that party, pending the arbitrator's determination of the merits of the controversy. Each party will initially bear its own expenses and an equal share of the costs of the arbitration, but the prevailing party may be awarded its expenses, reasonable attorneys' fees, and costs.

(j) Entire Agreement. This Agreement constitutes the entire agreement between the Parties concerning its subject matter and supersedes all prior communications, agreements, proposals, or representations, written or oral, concerning its subject matter. Notwithstanding any language to the contrary therein, no additional or conflicting terms or conditions stated in any master agreement to which this Agreement is incorporated, any Customer Order Form or other order documentation, will be incorporated into or form any part of this Agreement unless expressly agreed to by both parties in a mutually signed writing, and all such terms or conditions will be null. Under no circumstances will the terms, conditions or provisions of any RFP, purchase order, invoice or administrative document issued by Customer in connection with this Agreement be deemed to modify, alter, or expand this Agreement, regardless of any failure of Springbrook to object to such terms, provisions, or conditions. No other act, document, usage, custom or waiver will be deemed to amend or modify this Agreement unless agreed to in writing signed by a duly authorized representative of both parties.

Comments

Services Discount: Discounted 57 hours of services, but Tyler will deliver the full 538 hours.

Work will be delivered remotely unless otherwise noted in this agreement.

SaaS is considered a term of one year unless otherwise indicated.

Third Party Verification Services Work Number by Equifax	Third Party Verification Services will be provided pursuant to the Equifax Verification Terms of Service, and Client will comply with such terms and obligations of furnishers under the FCRA, in each case, found at https://www.tylertech.com/client-terms/equifax-verification-terms-of-service.
Smart Meter Access	Smart Meter Access provides the ability to view AMI data in a chart form thru Utility Access. It provides citizen transparency to track and proactively manage consumption and citizens can opt in to receive consumption notifications and leak alerts. Note: Notifications are billed out quarterly as incurred at $0.10 per call or text. Your use of Smart Meter Access is subject to the following terms: https://www.tylertech.com/terms/twilio-terms-of-use
AP Automation Capture with Disbursements	A fully automated vendor payment system, including an automated invoice capture system, invoice approval system, AP Invoice Access. Tyler Software may include artificial intelligence ("AI") features that are provided as an administrative convenience, designed to analyze data or make suggestions, subject to changing laws applicable in your local jurisdiction. Client is responsible for independently validating the accuracy of data analyzed or suggestions provided via AI features and using such features only to the extent permissible under applicable law. Your year one annual fee for AP Automation Capture is based on expected AP Automation Disbursements use. If, through no fault of Tyler, you do not use AP Automation Disbursements within six (6) months of the date of availability, or do not use AP Automation Disbursements for at least fifty percent (50%) of invoice volume, Tyler reserves the right to adjust pricing of AP Automation Capture at the end of your annual term. We will contact you to communicate the new pricing before we apply it.
Fraud, Risk & Compliance – Finance	Included with AP Automation Capture with Disbursements
