

PARKS & RECREATION ADVISORY COMMITTEE (PRAC) AGENDA

March 07, 2023 at 5:30 PM

Assembly Chambers/Zoom Webinar

<https://juneau.zoom.us/j/94184441385> or +1 253 215 8782 Webinar ID: 941 8444 1385

A. CALL TO ORDER

B. ROLL CALL

C. APPROVAL OF AGENDA

D. APPROVAL OF MINUTES

- [1.](#) Meeting of April 5, 2022
- [2.](#) Meeting of May 3, 2022
- [3.](#) Meeting of January 4, 2023

E. PUBLIC PARTICIPATION ON NON-AGENDA ITEMS

F. AGENDA TOPICS

G. NEW BUSINESS

H. UNFINISHED BUSINESS

I. STAFF REPORTS

- [4.](#) **Montana Creek Area Plan Comments** *presented by M. Elfers*- The 35 Mile Riding Park received a conditional use permit in January. Staff is now working on a management agreement that will be considered under an ordinance by the Assembly in May. A grant application to replace the Montana Creek Bridge at the end of Montana Creek Road was submitted to the Alaska Department of Transportation and Public Facilities for Transportation Alternatives Program (TAP) funding.

The public comment period is open through March 29 at 5pm for the Montana Creek Area Plan. Staff is seeking comments on the plan from the PRAC.

- [5.](#) **Board & Committee Reorganization** *presented by G. Schaaf* - Please see attached memo.

J. COMMITTEE MEMBER / LIAISON COMMENTS AND QUESTIONS

6. **Chair Report** - presented by C. Mertl
7. **Liaison to the Assembly Report** - presented by G. Smith
8. **Board Member Liaison Reports**

K. ADJOURNMENT

ADA accommodations available upon request: Please contact the Clerk's office 36 hours prior to any meeting so arrangements can be made for closed captioning or sign language interpreter services depending on the meeting format. The Clerk's office telephone number is 586-5278, TDD 586-5351, e-mail: city.clerk@juneau.org.

PARKS & RECREATION ADVISORY COMMITTEE

TUESDAY, April 5, 2022 – 5:30 PM

Zoom Webinar

I. Call to Order at 5:34 p.m. – C. Mertl, Chair

Present: Josh Anderson, Makayla Chappell, Emily Haynes, Chris Mertl, Will Muldoon, Danika Swanson

Absent: Taylor Murph

Staff Present: George Schaaf, Director; Michele Elfers, Deputy Director; Lauren Verrelli, Recreation & Public Services Manager

II. Agenda Changes – None

III. Approval of Meeting Minutes – None

IV. Public Participation on Non-Agenda Items – None

V. New Business

A. Urban & Community Forestry Program

Elizabeth Graham, acting Urban and Community Forestry Program Manager for Alaska – Liz has been acting Manager for the past several months. She sees funding opportunities on the horizon and wants to help CBJ to maximize those opportunities. She said she would like to see Juneau reinstate their Tree City USA accreditation.

W. Muldoon – How close are we to being certified with Tree City USA?

C. Mertl – We are pretty close. The challenge is there is not a landscape ordinance in place. If we get the certification, it will open doors to getting the top tier of funding.

G. Schaaf – During extreme weather events we are seeing a lot of tree issues. Our urban/forest interface involves trees falling on things rather than catching on fire. That has come to the attention of the CBJ Risk office and we do have a number of tree related policies.

Elizabeth Graham – In most communities, the emphasis is on planting but in Juneau, the focus is on management by removal.

E. Haynes – What are the deadlines for becoming a Tree City USA and for securing funding?

Elizabeth Graham – I can let you know when those dates come up.

B. Kaxdigoowu Trail Rehabilitation

Peter Jackson, ADOTPF Project Manager and Christina Mounce, ADOTPF Environmental Impact Analyst:

Peter and Christina briefly described current condition of the trail and the proposed construction and improvements project. The project includes improvements to the bridge, streambanks, trail pavement and culverts. The project is expected to be completed in several phases over 3-4 months and require temporary trail closures during construction.

E. Haynes – Disclosed that she works for DOT. It was decided that this does not create a conflict for this meeting.

C. Auke Lake Temporary Closure

George Schaaf, CBJ P&R Director: George explained the lake will need to be closed during the Ironman Alaska triathlon (August 6-7, 2022). CBJ P&R is working closely with the state and with CBJ departments and they are looking for a recommendation from the PRAC to the Assembly. Ordinance 2022-23 authorizing the closure is before the assembly.

C. Mertl – Are you giving yourself enough time with just one day?

George Schaaf – The organizers want to keep the closure as short as possible in order to limit the inconvenience to the public.

Tracy Gilmore (9343 River Court Way): How will this work with people swimming prior to the competition? There may be conflict with user groups.

George Schaaf – I agree and we are expecting an increase in people swimming in the pools as well as the lake. We also expect to see more runners and bicyclists on the roads. Ironman has a plan to inform and educate the public on the expected impacts.

*J. Anderson moves that the Parks & Recreation Advisory Committee recommends that the Assembly adopt the ordinance temporarily closing Auke Lake during the IRONMAN Alaska triathlon. **Adopted.***

D. 35 Mile ORV Riding Park

Michelle Elfers, CBJ P&R Deputy Director, and Darrin Crapo, Juneau Off Road Association President: Michelle presented the status of the proposed 35 Mile ORV Riding Park. The proposed park is comprised of approximately 530 acres near Bridget Cove. Darrin presented the conceptual site plan including the entry area, parking area, and courses. The park will be open during the summer, will have an onsite caretaker, and will feature a variety of obstacles and topographies. (Mud bog, loop trails, cross-country riding areas). They are asking for PRAC approval and recommendation to the assembly.

J. Anderson – Of the \$250,000 in CIP funding, how much has been spent?

Michelle Elfers – None of the CIP funds have been spent so far. Money spent in 2013 to pay for a consultant came from other funds. The \$250,000 is still available.

J. Anderson – How much of the CIP funding will be spent on the 35-mile site and how much will be left for future ORV groups?

Michelle Elfers – My thought is that money should be used to leverage grant funding. If this site is developed successfully and managed well, it may become a model for obtaining more funding in the future.

J. Anderson – Will the park be insured with private insurance or under the umbrella of CBJ insurance?

Michelle Elfers – JORA would be responsible for providing the insurance. It would not be under CBJ insurance.

J. Anderson – Would there be overnight camping at the site?

Darrin Crapo – Overnight camping is not currently in the plans. It may be allowed in the future.

D. Swanson – How far will the sound carry? Will hikers in Bridget Point hear the noise from the ORV Park?

Darrin Crapo – We are going to see how far the sound carries by putting people on the highway, on a trail and out on a boat and will measure the volumes there.

Michelle Elfers – This is something we will be studying. The Planning Commission will focus on noise when considering the permit.

C. Mertl – Thinks this is great and would like to see camping allowed in the future.

Chair Mertl left the meeting at 6:59 p.m. leaving J. Anderson as acting chair.

E. Haynes – The financing seems low. Do you have any concerns with how the project is going insofar as securing permitting, etc.?

Darrin Crapo – We have spent a lot of time working with people to address concerns. We are keeping communication open so we can know what people are concerned about. We want this to be a win for the community. Regarding expenses, we are excited about the state program that allows a portion of gas taxes for off road vehicles.

E. Haynes – The next step is to secure a conditional use permit. What are the steps following that?

Michelle Elfers – When we go to the planning commission for the permit, we would include a draft MOA in the packet. The planning commission may amend the MOA with conditions. We will then go back to the assembly for a resolution. Once that is finalized, the MOA would be signed but could be amended or adjusted over time. It will be a 'living document'

Dave Hanna (Back Loop Road) – Is excited to see this moving forward. While this won't satisfy everybody's needs, it is a great first step. Considering costs, suggested watching the funds and utilizing volunteers when possible.

Chris Zimmer (Cohen Drive) – Thanked Darrin for offering this as an alternative to the problem of illegal riding. Would like to see more in the form of enforcement in the Echo Cove area.

J. Anderson – Part of getting the ORV park to work will include education and good signage.

Michelle Elfers – Goldbelt has been involved in several of the meetings and they are supportive of the ORV park as a possible solution to the illegal riding on their lands.

*E. Haynes moves that the Parks & Recreation Advisory Committee recommends that the Assembly support the manager to negotiate an agreement with JORA to permit, design, construct, operate and maintain an off-road vehicle riding park at 35 mile. **Adopted.***

VI. Unfinished Business –

A. Disposal of Park Land (Parcel NO. 4B2801020070)

Dan Bleidorn, CBJ Lands Manager – Presented the request to purchase the property and explained it is being retained by the CBJ for waterfront access. The applicant wants to purchase the parcel to develop parking and access to their residence. The Lands department concluded if the CBJ disposes the land, staff recommend platting a public access and utility easement from Glacier Highway to the shoreline in order to retain public access.

E. Haynes: I have concerns that this is disposing of park property. The limitations on the private property were existing when the parcel was purchased. What level of analysis has been done to evaluate alternatives to avoid using parks property?

Dan Bleidorn: Deferred to the applicant

C. Mertl: Once again we are disposing of park lands. There needs to be a strategy to find alternatives to protect public access to park lands.

J. Anderson: Agreed with Emily and Chris that we should avoid disposing of park land and added that when park land is sold, the parks department loses current and future value of that land and the lands department (not the parks department) gets the money from the sale.

Jim Parise, applicant: Mr. Parise explained the garage currently in place is dangerous because the retaining wall blocks view of oncoming street traffic. Obtaining the parcel would help solve the problem.

Dave Hanna (Back Loop Road): This is an instance where disposing of the land makes sense. Keep in mind that this will add to the tax rolls and will be money coming back to the CBJ.

E. Haynes moves that the Parks & Recreation Advisory Committee does not recommend that the Assembly dispose of the Beach Access parcel adjacent to 12005 Glacier Hwy.

C. Mertl: Objected to say they need to set up with the City Manager a mechanism that will track land that is sold so the funds can be earmarked for the department.

Dan Bleidorn: Explained that the Lands department is responsible for all CBJ lands and proceeds from all disposals are recorded to the Lands fund. All sales and purchases are tracked and the Lands department can use those funds to acquire parcels to be used by the Parks department.

Raised Hand Vote:

Y: Emily, Josh, Makayla

N: Chris, Danika

The motion passes 3 yea 2 nay.

VII. Staff Reports – None

VIII. Committee, Liaison, and Board Member Reports

A. Chair Report— Welcome to the new PRAC members. There remain 2 vacant seats to be filled. Asked George for update on the retreat. George reported the retreat will be held April 16 at the Mendenhall Valley Library.

B. Liaison to the Assembly Report— None

C. Liaison Reports—

Aquatics – None

YAB – J. Anderson: The board is busy reviewing grant applications. Grants will be awarded soon.

Eaglecrest – None

Jensen-Olson Arboretum— None

Lands, Economic Developing, Housing – C. Merti: Met and discussed the purchase of Family Practice by Bartlett and the MOU for the up to \$10M CLIAA for support for the JACC/Centennial Hall improvements.

Park Foundation— None

Treadwell Arena Board – None

Trail Mix— E. Haynes: None

1% for Art— J. Anderson: None

D. Other Member Business – None

Adjournment – 8:00 p.m. *Having no other business before the board.*

Respectfully submitted by *Kathleen Jorgensen Business Assists (907)723-6134* 🍷

PARKS & RECREATION ADVISORY COMMITTEE

TUESDAY, MAY 3, 2022 – 5:30 PM

Zoom Webinar

I. Call to Order at 5:33 p.m. – W. Muldoon, Co-Chair

Present: Josh Anderson, Makayla Chappell, Emily Haynes, Will Muldoon, Taylor Murph, Danika Swanson

Absent: Chris Mertl

Staff Present: George Schaaf, Director; Michele Elfers, Deputy Director; Lauren Verrelli, Recreation & Public Services Manager

II. Agenda Changes – None

III. Approval of Meeting Minutes

- A. From April 16, 2022 Retreat – J. Anderson moves to approve retreat minutes, no objection.
Minutes adopted.

IV. Public Participation on Non-Agenda Items – None

V. New Business

A. Retreat Work Plan Discussion

G. Schaaf presented the draft 2022-2023 workplan developed during the retreat. He explained the goal is to get agreement from the committee on the plan. The plan includes meeting topics by month for the next year.

June regular meeting topics includes 'PRAC Assignments to ORV and Commercial Use Projects.'

J. Anderson – Would like to remain on the ORV

E. Haynes – If the ORV may not have traction, is this an appropriate use of time resources?

G. Schaaf – There is traction for the ORV project. It is moving forward through the public process and we expect it will be coming before the PRAC in the future.

January topic includes a review of the operating budget.

E. Haynes – Remembering the tight timeline regarding operating and CIP budget reviews, would a mid-year review be appropriate?

G. Schaaf – The operating budget timeline is always challenging as we rely on finance and other departments for information. Once we receive the information, we have about a month to develop and submit a proposed budget. It might make sense to add a meeting during the budget process.

M. Elfers – The CIP budget is on the October agenda for discussion. We could also discuss it during the November meeting and would have time to submit it by the deadline.

VI. Unfinished Business – None

VII. Staff Reports –

A. Quarterly Staff Update: 2022 Construction

M. Elfers - Presented the P&R Quarterly Project Update – Current projects include

- Trail Projects - avalanche/landslide cleanup, parking lot expansion, and beaver damage mitigation and other improvements
 - Playground Projects – ADA upgrades and equipment replacements
 - Pipeline Skate Park - lighting and other safety improvements
-
- J. Anderson – Would like to see the land behind Home Depot acquired for a motocross park
 - W. Muldoon – Asked what the department was planning for the land behind Pipeline Skate Park.
M. Elfers – Any use would be preferable to leaving it dark forest. Making it more usable to the public would cut down on the undesirable activities in the area.

VIII. Committee, Liaison, and Board Member Reports

A. Chair Report— None

B. Liaison to the Assembly Report— None

C. Liaison Reports—

Aquatics – W. Muldoon: DPAC upgrades is in process. The manager will be leaving in May.

YAB – J. Anderson: met and disbursed about \$300,000 in support of local sports, arts, and academics

Eaglecrest – None

Jensen-Olson Arboretum— None – M. Chappell would like to be the arboretum liaison

Lands, Economic Developing, Housing – C. Mertl: None.

Park Foundation— C. Mertl: None

Treadwell Arena Board – None

Trail Mix— E. Haynes: met last week. National Trails Day is June 4

1% for Art— J. Anderson: None

Other Member Business – None

Adjournment – 6:15 p.m. *Having no other business before the board.*

Respectfully submitted by *Kathleen Jorgensen Business Assists (907)723-6134* 🇺🇸

PARKS & RECREATION ADVISORY COMMITTEE (PRAC) MINUTES

January 03, 2023 at 5:30 PM

Zoom Webinar

A. CALL TO ORDER

- a. Chairman Christopher Mertl called the meeting to order at 5:38pm

B. ROLL CALL

- a. Board Members present: Brandie Hofmeister, Christopher Mertl, Christina Mounce, Danika Swanson, Josh Anderson, Makayla Chappell, Will Muldoon
Board Members absent: Taylor Murph
Staff present: George Schaaf, Parks and Recreation Director; Michele Elfers, Parks and Recreation Deputy Director; Eric Moots, Parks and Recreation Staff Liaison; Greg Smith, Assembly Liaison

C. APPROVAL OF AGENDA

- a. Will Muldoon motioned to unanimously approve the agenda for the meeting. No objection was heard, so the motion passed unanimously

D. APPROVAL OF MINUTES

- a. No new minutes were presented for approval

E. PUBLIC PARTICIPATION ON NON-AGENDA ITEMS

- a. There was no public participation on non-agenda items

F. NEW BUSINESS

- a. **Board & Committee Reorganization** *presented by George Schaaf*
 - i. Mr. Schaaf presented on the proposed ordinance of the City Assembly to reorganize and consolidate the Aquatics Board, Treadwell Arena Advisory Board, the Jensen-Olson Arboretum Advisory Board and the Parks and Recreation Advisory Committee (PRAC).

Mr. Schaaf's presentation detailed the history of the establishment of boards concerning the Parks and Recreation Department. He highlighted the Aquatics Board as an example. The Aquatics Board was established as a community response to the Parks and Recreation Department's decision to close the Juneau pools in 2014 as a form of budget cuts. Following that, Mr. Schaaf explained how the ordinance would affect the PRAC.

Ms. Swanson expressed concern that the Jensen-Olsen Arboretum Advisory Board (JOAAB) would not be able to have operational decisions made if they are to be consolidated into the PRAC. Mr. Schaaf said the JOAB was not in charge of operational decisions, but the JOAAB is in charge of bigger picture decisions. Along with that, Mr. Schaaf stated that the Friends of Jensen-Olsen Arboretum, a non-profit organization, had started having overlap with many of the responsibilities that JOAAB were in charge of. Mr. Mertl stated that before the establishment of the other boards PRAC often invited members of the community who were more knowledgeable about any situation that required more informed discussion.

Ms. Hofmeister asked about the Board Reorganization ordinance's effect on the length of meetings. Mr. Mertl stated that, historically speaking, PRAC meetings were quite a bit longer. Mr. Schaaf stated that it would be up to the PRAC members to determine the length of the meetings.

Mr. Muldoon stated that PRAC needed to have more thorough staff reports present for discussion. Mr. Muldoon also believes the ordinance is overly reliant on the Parks and Recreation Staff to be

well-intentioned, citing the original establishment of the Aquatics Board as a time when that was not the case. With that said, Mr. Muldoon expressed his support for the ordinance.

Ms. Swanson expressed concern the ordinance will be circling back to where PRAC was before the subsequent boards were established, which would inevitably lead to reestablishing the boards. Ms. Swanson questioned why the Assembly believes it will be effective this time. Mr. Mertl stated that the establishment of the other Parks and Recreation boards were a direct response to specific concerns the community had with the Parks and Recreation department. Mr. Mertl believes the current Parks and Recreation department has had many years of good direction and good community support and that now is a good time to return to what the model was originally. Mr. Anderson agreed with Mr. Mertl's assessment of how PRAC was previously operated.

Ms. Mounce stated that she would like to figure out a few operational concerns before deciding her opinion on the ordinance. She wished to know when PRAC would be meeting in person again, as well as wanting to receive the PRAC packet in further advance of the meeting so the board would have time to review it. Mr. Schaaf stated with relative certainty that with a new staff liaison in place that PRAC will be able to meet in person in the February meeting. Mr. Schaaf also states that the packets should be available more in advance and will work to make that the case.

Mr. Muldoon asked when this would go into effect and what the reapplication process would look like for the current PRAC members. Mr. Schaaf stated that the ordinance at the time has April 1st as the effective date, but was not sure if that was accurate. Mr. Smith stated that the Assembly would look into that.

Ms. Hofmeister asked what the motivation for the ordinance is and why it had any urgency. Mr. Mertl stated that an ordinance to reorganize the Parks and Recreation department boards had been under discussion for 3 or 4 years. The reason for urgency, Mr. Mertl believed, was because it was going through the City Assembly at this time. Mr. Mertl stated that if the boards were not having meetings regularly, that the boards had run their course.

Mr. Muldoon moved that the City and Borough of Juneau Parks and Recreation Advisory Committee write a letter affirming their support for the proposed board reorganization before the CBJ Assembly to CBJ Leadership. Mr. Anderson seconded the motion. Ms. Hofmeister moved to amend the current motion to recommend to the Assembly that subcommittees could be comprised of both members of PRAC and members of the public. Mr. Muldoon seconded this motion. The amended motion passed unanimously.

G. UNFINISHED BUSINESS

H. COMMITTEE REPORTS

a. Aquatics Board

- i. Mr. Muldoon reported on the Aquatics Board and their thoughts on the ordinance reorganizing the Parks and Recreation department boards.

b. Youth Activities Board

- i. Mr. Anderson reported on the Youth Activities Board (YAB) most recent meeting. YAB reviewed their previous year's process of scoring grants.

I. ADJOURNMENT

- a. Meeting adjourned at 6:50p

Respectfully submitted by Eric Moots on 1/20/23

APPENDICES

- i. Infrastructure Plan Map 14
- ii. Motorized Use Maps 16
- iii. Survey Document 21
- iv. Public Comments 74

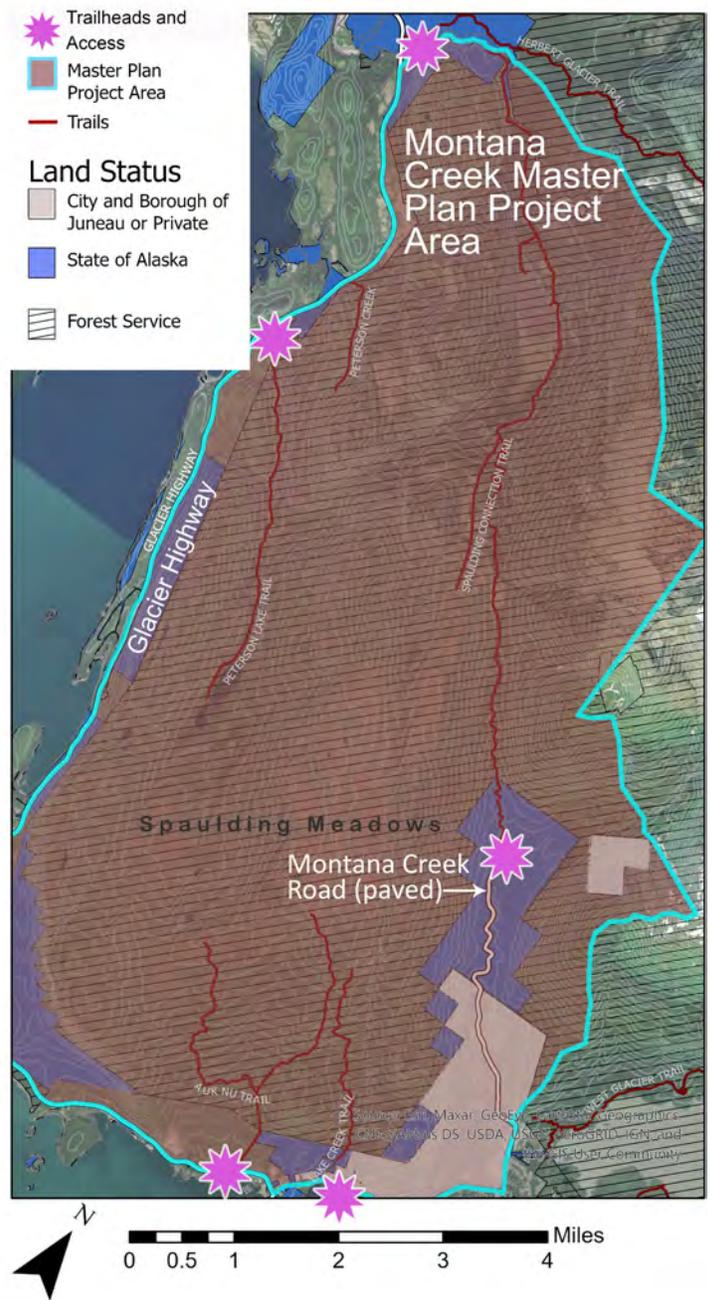

I. PROJECT OVERVIEW AND PROJECT AREA

The Montana Creek Area Plan has been developed over one and a half years with community input through a survey, stakeholder meetings, public meetings and interagency discussions with land managers. The time and effort of the community to create this plan shows that the Juneau community highly values the Montana Creek valley and watershed, Spaulding Meadows, and surrounding areas for recreation, subsistence and abundant natural resources.

This process seeks to understand why this area is so highly valued, how the community is using it and if there are ways to improve the use of the area for recreational purposes while preserving the high environmental resources that are the foundation of the excellent recreational and subsistence opportunities.

Fishing, hunting, snowmobiling, shooting sports, hiking, skiing, snowshoeing, four wheeling, camping, and subsistence harvesting are some of the activities occurring in this area. Montana Creek is considered by the community to be one of the most valuable fish streams in the Juneau area. Despite the close proximity to the densely populated Mendenhall Valley, the area seems remote and Juneauites can feel like they are far from Juneau with a short hike. In the winter, the area remains colder than many other low elevation areas in Juneau. Snow remains in the valley longer because of this and allows for winter sports at times when other parts of Juneau have thawed and do not have the snowpack to support these sports.

The project area extends from its western boundary of Glacier Highway to the eastern boundary which is approximately the ridgeline on the east side of Montana Creek. To the south, it is bounded by Back Loop Road and extends north to Herbert River Road. The area is vast and includes the Montana Creek to Windfall Lake valley and Spaulding Meadows. The majority of land is managed by the United States Forest Service (USFS).

Within the Montana Creek valley the State of Alaska Department of Natural Resources (DNR) manages land as well as parcels at the north, west and southern ends of the project area. The City and Borough of Juneau is the third largest land managing agency with land primarily in the Montana Creek valley along Montana Creek Road. Other smaller government land managing agencies include the Alaska Department of Transportation and

Public Facilities (DOT) and the University of Alaska. There is also some non-profit and privately owned land in the project area, changes to these lands are not being proposed as part of this project.

II. MANAGEMENT AND OWNERSHIP

The primary land managing agencies along with Trail Mix, Inc. are facilitating this planning process and leading the discussion on use and improvements. Representatives from these agencies currently working on the project include:

Tristan Fluharty, District Ranger, United States Forest Service
 Pete Schneider, Recreation Staff Officer, United States Forest Service
 Megan Hillgartner, Southeast Regional Manager, Alaska Department of Natural Resources
 George Schaaf, Director Parks and Recreation, City and Borough of Juneau
 Michele Elfers, Deputy Director Parks and Recreation, City and Borough of Juneau
 Greg Lockwood, Engineer IV, Alaska Department of Transportation and Public Facilities
 Ryan O'Shaughnessy, Executive Director, Trail Mix, Inc.

Regulations and management of land varies across the project area depending on which agency manages the land. The community has indicated that this is confusing and difficult to know what regulations and policies apply throughout the project area. The following is a summary of existing land management guiding documents for the three primary land managing agencies.

1. UNITED STATES FOREST SERVICE – 2016 TONGASS LAND AND RESOURCE MANAGEMENT PLAN

- Semi Remote Recreation
- Opportunities for independence, closeness to nature, self-reliance requiring challenging motorized or non-motorized transportation
- Interactions between users are infrequent
- Minimal facilities, rustic in appearance

2. STATE OF ALASKA DEPARTMENT OF NATURAL RESOURCES – JUNEAU STATE LAND PLAN, 1993

- Managed for high recreation, habitat and harvest values
- Primarily recreation, wildlife habitat, wild harvest, water resources uses
- Recommends DNR enter into a Cooperative Management Agreement with CBJ to manage select lands within the Master Plan area

3. CITY AND BOROUGH OF JUNEAU – PARKS AND RECREATION MASTER PLAN, 2019

- Natural Area Park, Conservation Area
- Provides open space, access to water and opportunities for passive and dispersed recreation
- Recognized for high value environment
- Intent is to protect and manage the natural environment with recreation as a secondary objective

III. PROJECT GOALS

The project goals were created based on survey results and initial input on process and vision from meetings with user groups. The following goals underlie planning and outreach efforts.

- Create a master plan for the next ten years through a public process.
- Identify recreational facilities to meet public needs.
- Coordinate planning and management across land managing agencies, CBJ, DNR, USFS, and DOT.

Throughout the process, the project has considered the two components of infrastructure and management based on community input on use, ideas, and changes. The first step of the process has created an Infrastructure Plan that is included in this document and steps on funding, priorities and initial planning for implementation are underway. The next steps include work on proposed management changes. This is part of the master plan process but management changes often require regulatory and legal changes. Change in management reaches beyond community planning

Photo credit: Brad Elfers

work and requires additional public process often under formal procedures with policy makers. Section VIII, Management Plan and Public Engagement, summarizes processes for management changes through different land managing agencies and how the public can initiate and/or engage. Section X: Next Steps, summarizes some discussion and planning that is underway for management changes.

IV. PUBLIC OUTREACH

The need for the Montana Creek Area plan was first realized in the fall of 2020 when the Juneau Nordic Ski Club (JNSC) requested that CBJ close Montana Creek Road in the winter to motorized use. During a public comment period preceding a Parks and Recreation Advisory Committee (PRAC) meeting on the topic, the department received 827 written comments on the issue both opposed and in favor of the change. The PRAC recommended no change to management of the road and the CBJ followed this recommendation. However, the high volume of comments on this issue prompted staff to talk to the community, user groups and the other land managing agencies in the area about this issue. Parks and Recreation Department (P&R) staff recognized the high value the community placed on the Montana Creek area and formed a working group with the land agencies to start a public outreach process as the first step in creating an area plan.

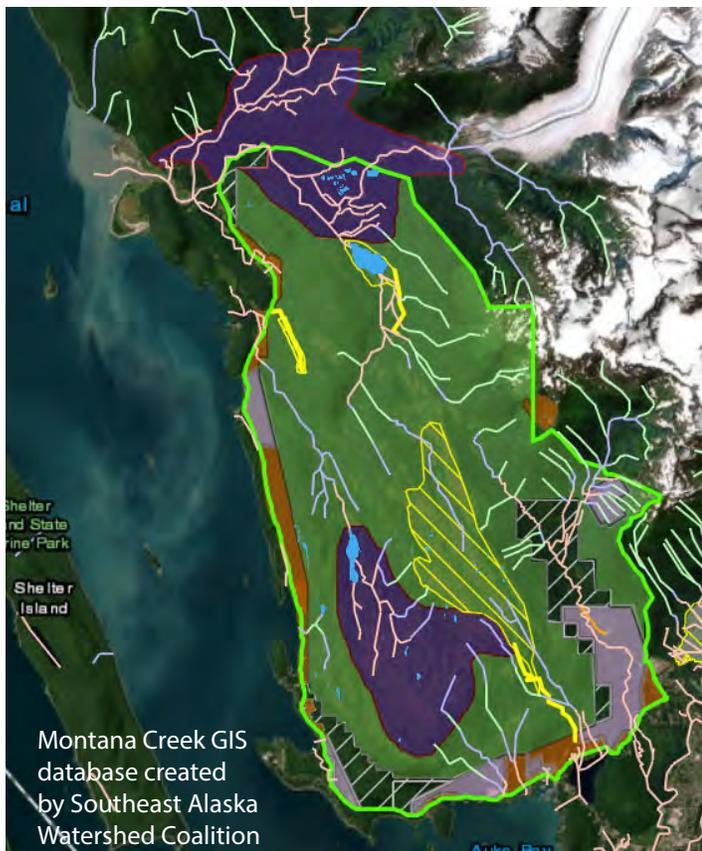

Formal public outreach began in August 2021 with a survey. Questions were asked about how the community uses the project area, barriers to use and how the area could be improved to enhance use and user experience. 1016 responses were received that helped to guide the process and inform the continuing discussion. The survey report and all comments are in Appendix iii.

After the survey, the land agencies held small group meetings with organized user groups that have interests in the Montana Creek area. Questions were asked to understand how they used this area, what the plan process should look like and how they envision the area in the future. The following groups were contacted and most participated:

- Central Council Tlingit Haida
- Douglas Indian Association
- Sealaska Heritage Institute
- Goldbelt Heritage
- Discovery Southeast
- Juneau Nordic Ski Club
- Youth Nordic Ski Team
- Lynn Canal Adventures
- Juneau Mountain Bike Alliance (JMBA)
- Juneau Trail and Road Runners
- Juneau Alpine Club
- Juneau Snowmobile Club
- Juneau Off-Road Association (JORA)
- Southeast Jeep Club
- Hank Harmon Public Range (HHPR)
- Juneau Archery Club
- Territorial Sportsmen
- Trout Unlimited
- Southeast Alaska Independent Living (SAIL)
- Southeast Alaska Watershed Coalition (SAWC)
- Southeast Alaska Conservation Council (SEACC)

In April 2022, a follow up workshop was held with user groups to draft their ideas for the area on a map. The ideas from this meeting were put together into the first draft of an infrastructure plan for the area.

This draft plan was presented to the public via zoom in a community meeting on August 10, 2022. Comments from the public received after this meeting were then used to revise the infrastructure plan and start a discussion on priorities, funding and management of the area. The revised plan was presented again at a meeting on December 7, 2022. Comments received after this meeting were used to revise the plan and inform next steps on plan implementation and management of the area as presented in this document. Public comments received after these meetings are in Appendix iv.

V. SUPPORTING DATA

Requests and input from the survey and initial user group meetings indicated that background data should be collected and presented to help answer questions and inform planning efforts. The following data was collected and presented as part of the planning effort and is available on the project webpage: bit.ly/MontanaCreekPlan.

1. GIS DATABASE

A public GIS database was created under contract with the Southeast Alaska Watershed Coalition with existing resource data layers. The project area boundary and aerial imagery is included to help identify and locate areas. Data layers included in the map are watershed boundaries, lakes streams, culverts, wetlands, invasive plants, wildlife habitat, riparian areas, areas of core biological value, elevation contours, land ownership, trails, roads, other recreation infrastructure, motorized social trails, motorized use boundaries based on the motorized use maps developed as part of this project.

2. EXISTING COMMUNITY PLANS

Existing plans relevant to the project area were assembled, made available on the webpage and reviewed. These include the Parks and Recreation Master Plan, City and Borough of Juneau Comprehensive Plan, the Juneau State Land Plan, the Montana Creek Watershed Stewardship Plan, The Kaxdigoowu Héen watershed scoping document, and the Montana Creek Lands Assessment and Recreation Corridor Conservation Proposal.

3. CURRENT REGULATIONS ON MOTORIZED AND NON-MOTORIZED USE

USFS, DNR, and CBJ collaborated to create motorized use maps for the project area with regulations for each land management area. The dates, boundaries and information on the plans are based on regulations from the USFS, DNR and CBJ. See Appendix ii for motorized use maps.

VI. PLAN THEMES

Throughout the planning process, themes have coalesced from community input and discussion. These themes guide the infrastructure plan, priorities and funding, and ongoing consideration of management of the area.

1. ACCESS, CONNECTIONS AND DIVERSE USERS

The planning area is large and most formalized access points are to the south with two at the northern end. To the south, a small parking area and trailhead exists at the Spaulding Meadow trailhead for non- motorized use and a small parking area with a gated trail exists on Lake Creek Road which serves as access in the summer for non- motorized access and in the winter it is the primary motorized access to Spaulding Meadows. Montana Creek Road has multiple small parking areas for recreational access such as the staircase to the canyon area of the creek or in the summer the cul de sac at the end of the paved road. In the winter, the road is gated at the Hank Harmon Public Range and there is motorized and non-motorized access along the closed Montana Creek Road. To the north there are parking areas at the Peterson Lake and Windfall Lake trailheads.

Improved and expanded parking lots at Montana Creek Road, Spaulding Meadows and Herbert River Road are proposed as part of the plan based on community input. Trailhead facilities such as signage, restrooms, benches, covered areas should also be considered at trailheads. In the winter, many people come to this area because the cold air in the valley holds snow longer and extends the snow sports season. With climate change forecasting warmer and wetter winters, this access to higher elevations and snow will become more important. Motorized and non-motorized users would like to extend road access to higher elevations so that as snow starts melting in the shoulder seasons, snow activities can continue longer. The plan recommends researching

the feasibility of extending the Lake Creek Road access or the 25 Mile Road access with a parking area at a higher elevation for winter use.

Improvements to access for diverse users and abilities is also a key component and focus of the plan. Ensuring people who use the area for subsistence harvesting can get into the area to fish, pick berries and hunt is important, comments suggest adding shelters and day use areas to accommodate this use. Children and families exploring the area often have a shorter radius from trailheads that they explore and providing for nature education based experiences close to trailheads along with ADA standards in design is important for these groups.

The Juneau community, in general, loves public use cabins. The area holds three existing public use cabins currently; two are in non-motorized use areas and one is in a winter motorized use area. A fourth cabin is proposed in the Infrastructure Plan that would be accessible from motorized and non-motorized use areas. Trails proposed to connect to the cabins would create a four cabin hut to hut experience for non-motorized access and a two cabin hut to hut

experience for motorized access in the winter.

Loop and connecting trails are a key component of access planning. Working with user groups and the community, concept locations for trails are proposed that create loops throughout the area for both motorized and non-motorized access. While much of the project area is outside of developed residential or commercial areas, the southern end abuts schools and the Auke Bay/Back Loop Road communities. A connecting trail is proposed from existing Spaulding Meadows, Lake Creek Road and the Auke Lake Trail to University of Alaska Southeast and Auke Bay Elementary Schools. This would create connections into communities to bring people into the recreational network of trails.

Signage and communication of information and regulations is also an important piece of accessibility. Coordinating among land managing agencies and land owners to ensure consistent and clear signage for wayfinding, regulations and interpretation are placed in the right locations should be a focus of the plan implementation.

Joey Meier fishing on Montana Creek.

project area. Recognizing the excellent habitat in this watershed, many of the recommendations in the Lands Assessment pertain to this project area. These include creating a stream conservation corridor extending 500' from either bank of Montana Creek, protecting all wetlands associated with Montana Creek, and building a trail along Montana Creek and connecting it to the existing trail network (300' from creek). These recommendations should be followed in all future development in the project area.

Trail maintenance is an important component of habitat protection and restoration. Maintaining trails in the right locations to get people where they want to go and provide for an enjoyable experience is important. Providing good quality, easily accessible trails will discourage the creation of social trails that often damage habitat, stream crossings, or scenic viewpoints.

2. HABITAT PROTECTION AND RESTORATION

Much of the recreation and subsistence in the project area directly or indirectly depend on conservation and protection of fish and wildlife habitat and water quality. Community input has shown that the Montana Creek – Windfall Creek - Spaulding Meadow system is extremely high value habitat in Juneau and resource and efforts should be focused on protection and restoration.

Trout Unlimited published a Lands Assessment of the Montana Creek watershed in 2006 that explains to the community the high value of the watershed and makes management recommendations to ensure sustainability of fish habitat and recreational opportunities. The hydrology initiates in the Stroller White and McGinnis mountains and flows on the surface, subsurface and in creeks to feed the extensive system of bog and reed-sedge wetlands. The wetland, creek and forest systems support diverse wildlife and fish habitat. The creeks are prized in Juneau for supporting wild stocks of coho, pink, chum, steelhead trout, Dolly Varden char, cutthroat trout, and sockeye salmon in addition to other types of resident fish. Excellent spawning and rearing habitat exists in the

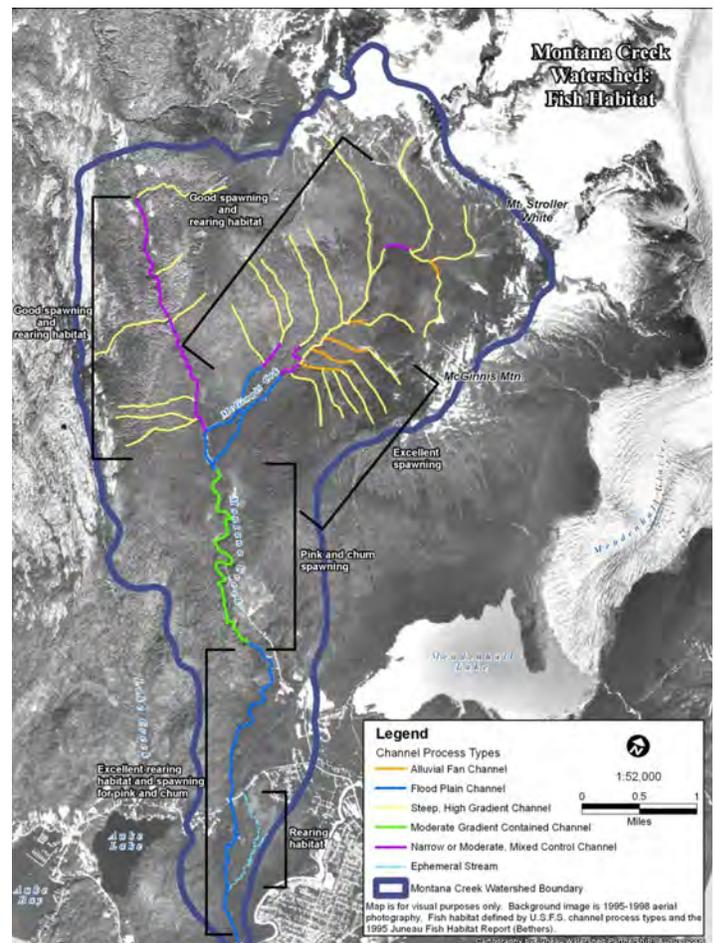

Photo credit: Trout Unlimited Lands Assessment, 2006

3. MOTORIZED AND NON – MOTORIZED USE

A significant number of comments have focused on issues of motorized and non-motorized use. The topics include separated vs. shared use on trails, current boundaries of regulated areas, management of access points, motorized use in the summer season, and trail design and construction for a particular type of use. Through public comment it became clear that regulations regarding use in the project area were confusing and not well understood by the community. For this reason, one of the early tasks in this process was for the agencies to work together to create maps showing current regulations for motorized and non-motorized use. These maps are shown in Appendix ii.

Photo credit: Juneau Snowmobiler Club

Under existing regulations, much of the project area is open in the winter to motorized vehicles running on a track or skis with sufficient snow cover; regulations can be found on the maps. Additionally, specific locations within the project area in the winter are dedicated to non-motorized use and other locations allow motorized vehicles of a certain size on wheels under certain snow conditions. The regulations vary across the project area. It is very important to understand the existing regulations in order to understand the proposed improvements and changes to the project area in the Infrastructure Plan. The Infrastructure Plan shown in this document

is based on existing regulations regarding motorized and non-motorized use. This was done because any changes to this use will have to undergo a public process that is determined by the land managing agency and will likely involve a structured decision making process.

The Infrastructure Plan proposed changes can be worked on and implemented while other management and use processes occur. The Montana Creek Area Plan process will continue as the public engages with each agency to consider management changes. See Section VIII: Management, for continued discussion.

Photo credit: Juneau Nordic Ski Club

VII. INFRASTRUCTURE PLAN – TRAILS, CABIN AND ACCESS

Through user input, the Infrastructure Plan was developed to address improvements related to trails, cabin and access within the existing management and use regulations. The plan is broad in scope and conceptual, meaning the intent and purpose of use, general locations, and connections between improvements are shown. For most elements, site analysis and further study must be done to verify feasibility and identify exact locations of the improvements. After further study it may be found that certain plan elements cannot be constructed because of slope and elevation issues, creek or habitat impacts, or other considerations. Or it may be determined that elements need to be moved to different locations.

The following elements correspond to items shown on the plan in Appendix i.

1 and 2. Reconstruct Existing Trails from Montana Creek Road to Windfall Lake Trailhead/Herbert River Road. Improve drainage and tread, construct alternate trail access 300' away from creek where possible.

3. Develop new Mendenhall Glacier Area Access Trail to connect to Montana Creek Road. Include winter connection along or near the road to the groomed trail to allow for continuous ski access. Work with partners on maintenance, management and grooming.

4. Develop University - Auke Lake - Auke Bay Elementary - Spaulding Meadows Community connector trail. Connect existing and social trails between community facilities and access points to neighborhoods. Work with the University of Alaska and the Juneau School District on trail design to ensure community connections.

5. Develop new Montana Creek Road to Lake Creek/Spaulding Meadows connector trail. Topographical

and in the field analysis needed to identify if appropriate slopes can be constructed.

6. Develop new Auke Nu to Spaulding Meadows Trail to Lake Creek Connector Loop trail. Work with partners on design, maintenance, management and grooming.

Photo credit: Trail Mix and Trout Unlimited volunteer day, 2022

7. Construct new John Muir Cabin to Peterson Lake Cabin connector trail. This trail could include a loop to the base of Auke Mountain. Work with partners on design, maintenance, management and grooming.

8. Construct new Peterson Lake Trail to new cabin to Montana Creek Trail connector.

9. Construct trail extending from the end of 25 Mile Road to new cabin. Work with partners to design, manage and maintain the trail for winter motorized use.

10. Extend Lake Creek Road. Consider extending the trail and allowing vehicular traffic in winter to park at a higher elevation to access Spaulding Meadows and provide shoulder season access to snow. Develop partnerships for maintenance and management.

11. Extend 25 Mile Road. Consider extending the 25 Mile Road and allowing vehicular traffic in winter to park at a higher elevation to access Spaulding Meadows and provide shoulder season access to snow. Assess route for topography and climate to determine if access is possible and if this area would hold snow and colder temperatures longer. Develop maintenance and management partnerships.

The cost of extending either road (#10 or #11) and maintaining it for winter access will likely be significant and so both options should be studied together to determine which one provides better benefit and is less costly.

VIII. MANAGEMENT PLAN AND PUBLIC ENGAGEMENT

Many comments were received throughout the planning process requesting and recommending changes to existing regulations regarding management of CBJ, DNR and USFS lands, as well as the DOT-owned bridge and road section. The requests are for increased motorized use, increased non-motorized use, decreased or elimination of motorized use, increase of grooming activities, decrease of grooming activities to allow for more backcountry conditions, and changes in boundaries in Spaulding Meadow for motorized and non-motorized uses. The work to address management issues of the land will continue in the next phases of the master plan process. The process to address management depends on the land managing agency with responsibility over the land in question. Information on the process for changing regulations and management in each land type is discussed below along with some information on working with Trail Mix, Inc. as a liaison and collaborator between agencies for trail based work and changes.

1. UNITED STATES FOREST SERVICE

Changes to public land use designations (LUD's) such as adjusting existing motorized and non-motorized boundaries or allowing OHV use would require a revision to the Forest Plan. LUD's define which types of activities are allowable. The Tongass is currently in the pre-assessment phase of the revision process that is scheduled to begin in 2024. This will be a multi-year effort. During this process the Forest Service will accept comments from the public on proposed changes to land use designations. Topics involving motorized use changes would be addressed during this Forest-wide effort. This entire process will be similar in size and scope to conducting an Environmental Impact Statement which takes into consideration the full scope of existing conditions and impacts related to proposed changes. Final decisions on Forest Plan revisions are then signed by the Forest Supervisor.

Parties interested in getting involved in funding a specific project can reach out to the Juneau Ranger District Recreation Department. The Forest Service is supportive of working with partner organizations and can often share costs and workloads through cooperative agreements to accomplish tasks identified and approved through the planning process.

2. DEPARTMENT OF NATURAL RESOURCES

The public can propose specific changes or provide input on regulations by visiting DNR's "Propose Changes to Current Regulations" webpage, accessible here: bit.ly/3Z2BUam

Administrative Order 266 directs agencies to confer with the public and stakeholders to gather input and simplify or streamline regulation changes. DNR submits an annual report to the governor's office outlining the department's effort to support this process.

DNR conducts public scoping before drafting regulations. Individuals can sign up to receive future online public notices on DNR’s proposed regulation changes by visiting the Alaska Online Public Notices webpage and clicking on the “Subscriptions” tab at the bottom of the page (under Feature Spotlight: <https://aws.state.ak.us/OnlinePublicNotices/>)

For capital funding requests, the Parks and Recreation Advisory Committee offers the opportunity for public input on the Capital Improvement Program (CIP) in November and December each year as the CIP is developed. There are additional opportunities for public input with the Finance Committee of the Assembly in later winter and early spring as the CIP is finalized.

Improvements outlined in community plans, such as the Montana Creek Area Plan are typically prioritized in the CIP as the community process shows interest and value by the community.

4. TRAIL MIX, INC.

Trail Mix Inc. was created to enhance collaboration and communication between land managers. Trail Mix works with land managers to craft an annual work plan that brings together resources to meet the needs of the trail system. While Trail Mix does not manage public lands, members of the public are encouraged to provide input on the trail system at large as well as specific issues. The CBJ Parks and Recreation, Alaska DNR, and USFS Juneau Ranger District hold ex-officio seats on the Trail Mix board of directors and meet regularly on the fourth Thursday of each month. Trail Mix board meetings are an excellent forum to provide input and feedback to agency representatives collectively. More information on Trail Mix board meetings can be found at www.trailmixinc.org, on social media, or by subscribing to the Trail Mix newsletter.

Photo credit: Trail Mix

3. CITY AND BOROUGH OF JUNEAU

Public requests on land issues should be brought to the Lands Division or the managing department, which for the Montana Creek area is the Parks and Recreation Department. Changes to management of the area, for example changing land from a Park designation or changing motorized use regulations, would require a public process. The request would be brought to the Parks and Recreation Advisory Committee for a recommendation of support and then depending on the issue it would likely go to the Lands, Housing and Economic Development Committee for consideration. The issue may then continue to the full Assembly for consideration. Changes to code may be required and there may be additional public meetings, public notice and involvement with other departments.

IX. INFRASTRUCTURE PLAN PRIORITIES

Priorities for the implementation of the plan based on public input, feasibility, planning work required, and funding are as follows:

PLAN #	ACTION ITEM	LAND MANAGER	PRIORITY
1, 2	Reconstruct Existing Trails from Montana Creek Road to Windfall Lake Trailhead/Herbert River Road	CBJ, DOT, DNR, and USFS	mid
3	Develop new Mendenhall Glacier Area Access Trail to connect to Montana Creek Road	CBJ, USFS	short
4	Develop University - Auke Lake - Auke Bay Elementary - Spaulding Meadows Community connector trail	CBJ, UA	short
5	Develop new Montana Creek Road to Lake Creek/Spaulding Meadows connector trail	USFS	long
6	Develop new Auke Nu to Spaulding Meadows Trail to Lake Creek Connector Loop trail	USFS	long
7	Develop new John Muir Cabin to Peterson Lake Cabin connector trail	USFS	long
8	Develop new Peterson Lake Trail to new cabin to Montana Creek Trail connector	USFS	mid
9	Develop trail extending from the end of 25 Mile Road to new cabin	USFS	long
10	Extend Lake Creek Road	USFS	long
11	Extend 25 Mile Road	USFS	long
	Develop New Cabin	USFS	short
	Develop Covered Picnic Areas	CBJ	short
	Expand Parking and Trailhead Improvements Montana Creek Road	CBJ	mid
	Expand Parking and Trailhead Improvements Auke Nu	CBJ	mid
	Develop Signage	CBJ, DOT, DNR, and USFS	short
	Perform Habitat Restoration	CBJ, DNR, ADFG	short
	Replace Montana Creek Road Bridge	CBJ, DOT	short
	Work towards DNR Cooperative Management Agreement	CBJ, DNR	short

X. NEXT STEPS

1. DOT and CBJ are collaborating on the application for Transportation Alternatives Program (TAP) grant funding to replace the Montana Creek Bridge. The current proposal would transfer bridge and road management to CBJ upon completion of the new bridge installation.
2. USFS is requesting funding for cabin and access trails - The recent Bipartisan Infrastructure Law (BIL) has provided funds for the construction of a new cabin and spur trail in the Montana Creek drainage. Prior to construction, the Forest Service will need to undergo a NEPA process to properly identify and approve the final design and location. This effort may be bundled together with the analysis of other BIL-funded cabin proposals on the Juneau Ranger District.
3. CBJ and USFS are coordinating on a trail connection from Mendenhall Glacier Recreation Area to Montana Creek Recreation Area, #3 on the plan.
4. DNR and CBJ Cooperative Management Agreement – CBJ and DNR will begin discussions regarding the process for entering into a Cooperative Resource Management Agreement for DNR-managed lands near Montana Creek Road. The process will be public with opportunities for input and comment from the community.
5. Agency collaboration on signage, education and enforcement is ongoing.

Management changes occur through different processes and on different timelines as outlined in Section VIII. These changes will require public engagement and in some cases public initiation of a process. This plan narrative, public comment, maps and background data can be used to support requests for management changes with specific agencies and can be used by policy makers as background data to inform decision making.

All documents and public process information referenced in this report can be found on the project webpage: bit.ly/MontanaCreekPlan.

Survey Document

SECTION 1:

BACKGROUND

The City and Borough of Juneau is working with the United States Forest Service, the State of Alaska Department of Natural Resources, and Trail Mix to develop the Montana Creek Master Plan. As a first step in this process, the public was invited to take a community survey. The goal of the survey is to understand community values and use of the area.

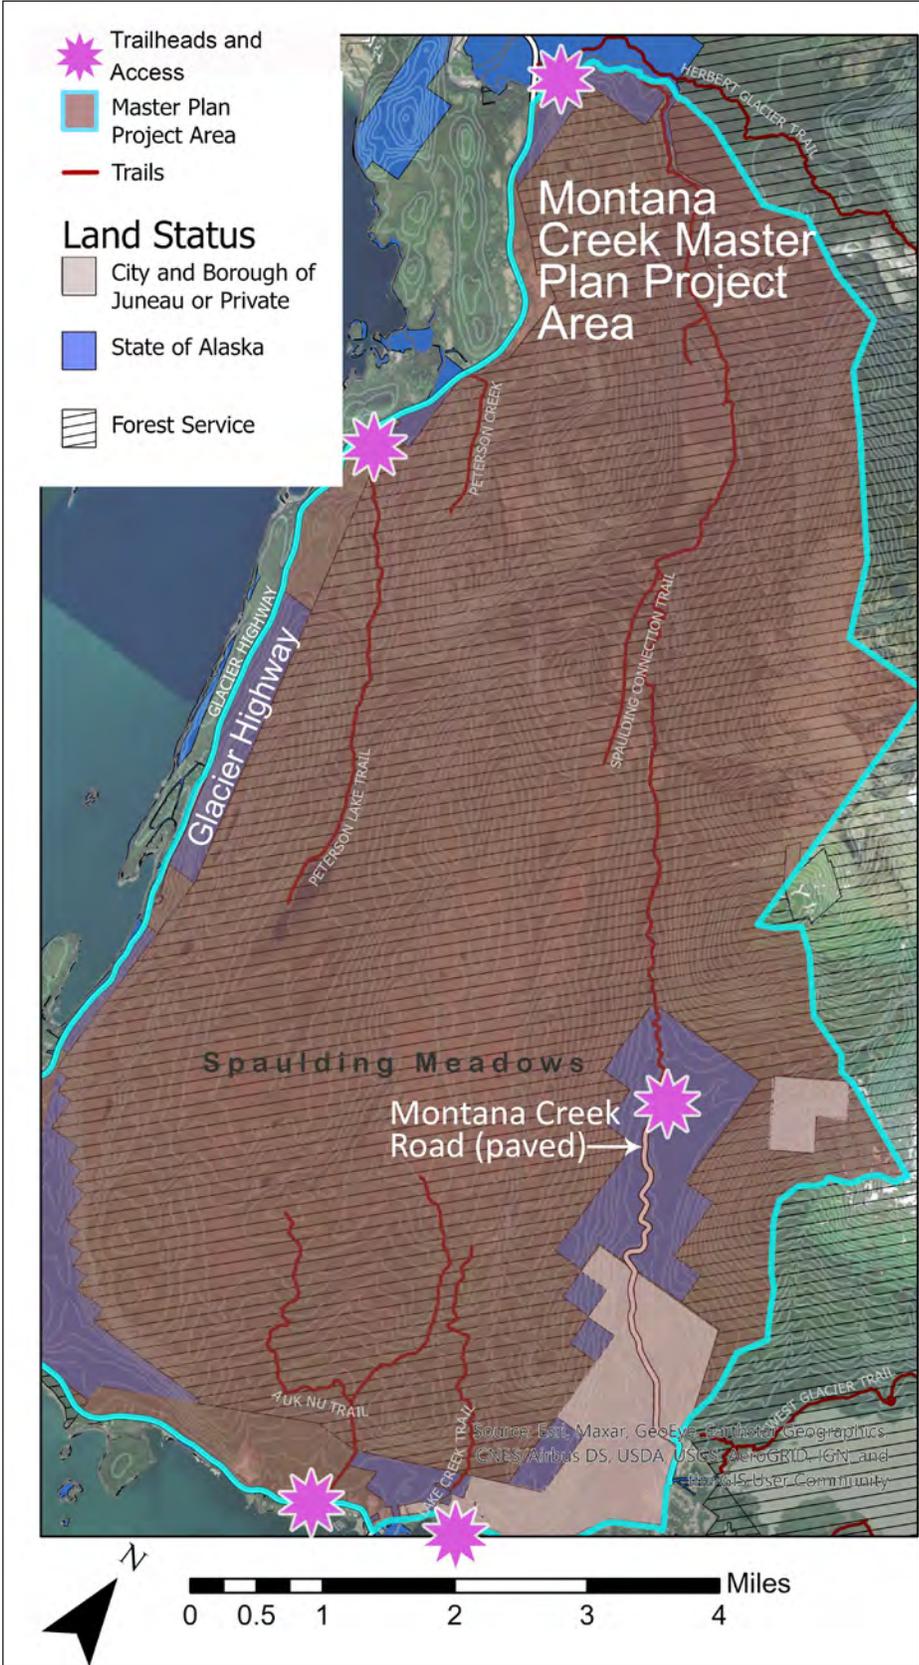

The Montana Creek Master Plan will encompass the Montana Creek valley, watershed, Spaulding Meadows, and surrounding areas. Recreational activities that take place there include fishing, hunting, snowmobiling, shooting sports, hiking, skiing, snowshoeing, four wheeling, camping, and subsistence harvesting.

The survey ended Thursday August 19th, 2021 and **1,016 responses were collected.**

The results have been tabulated and converted into a summary contained within this document. The following are the major parts cover by the survey to which the results are reflected:

- Part 1: User Information
- Part 1.2 Family Use
- Part 2: Vision for the Creek
- Part 3: Values and Priorities
- Part 4: Knowledge of the Fish Creek Recreation Area

Narrative comments have been categorized and added at the end of the report.

Montana Creek Road Area Land Ownership Map

Community Planning & Survey Administrators

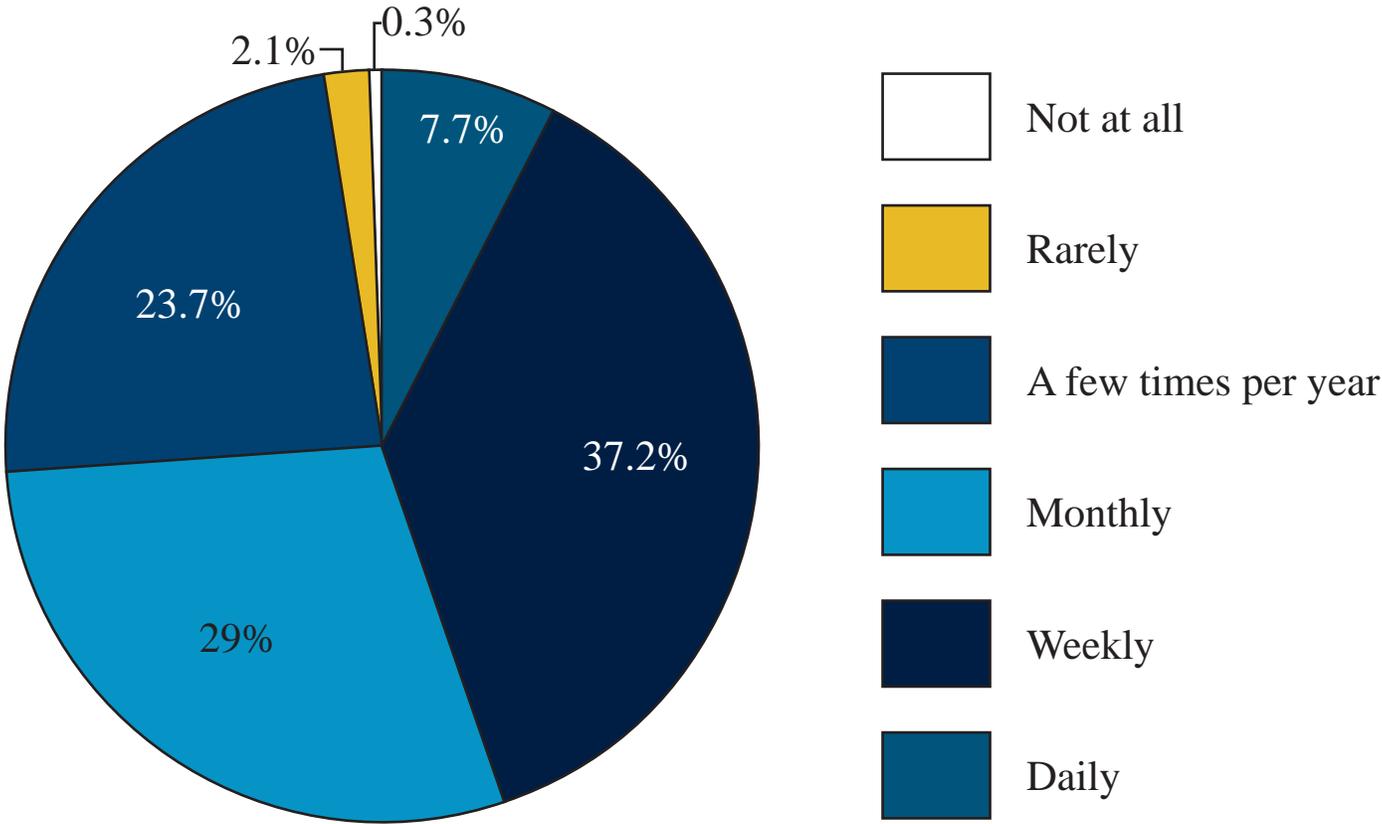

SECTION 2:

SURVEY RESULTS

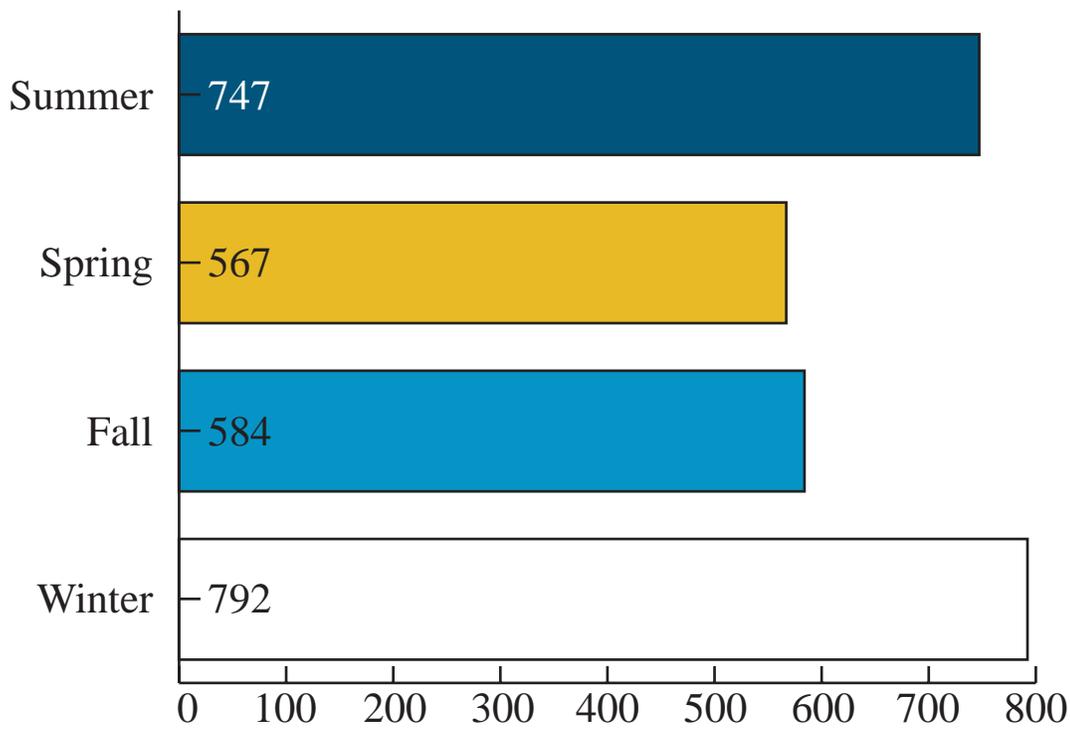

Question 1: How frequently do you use the Montana Creek Recreation Area?

Responses: 1,010

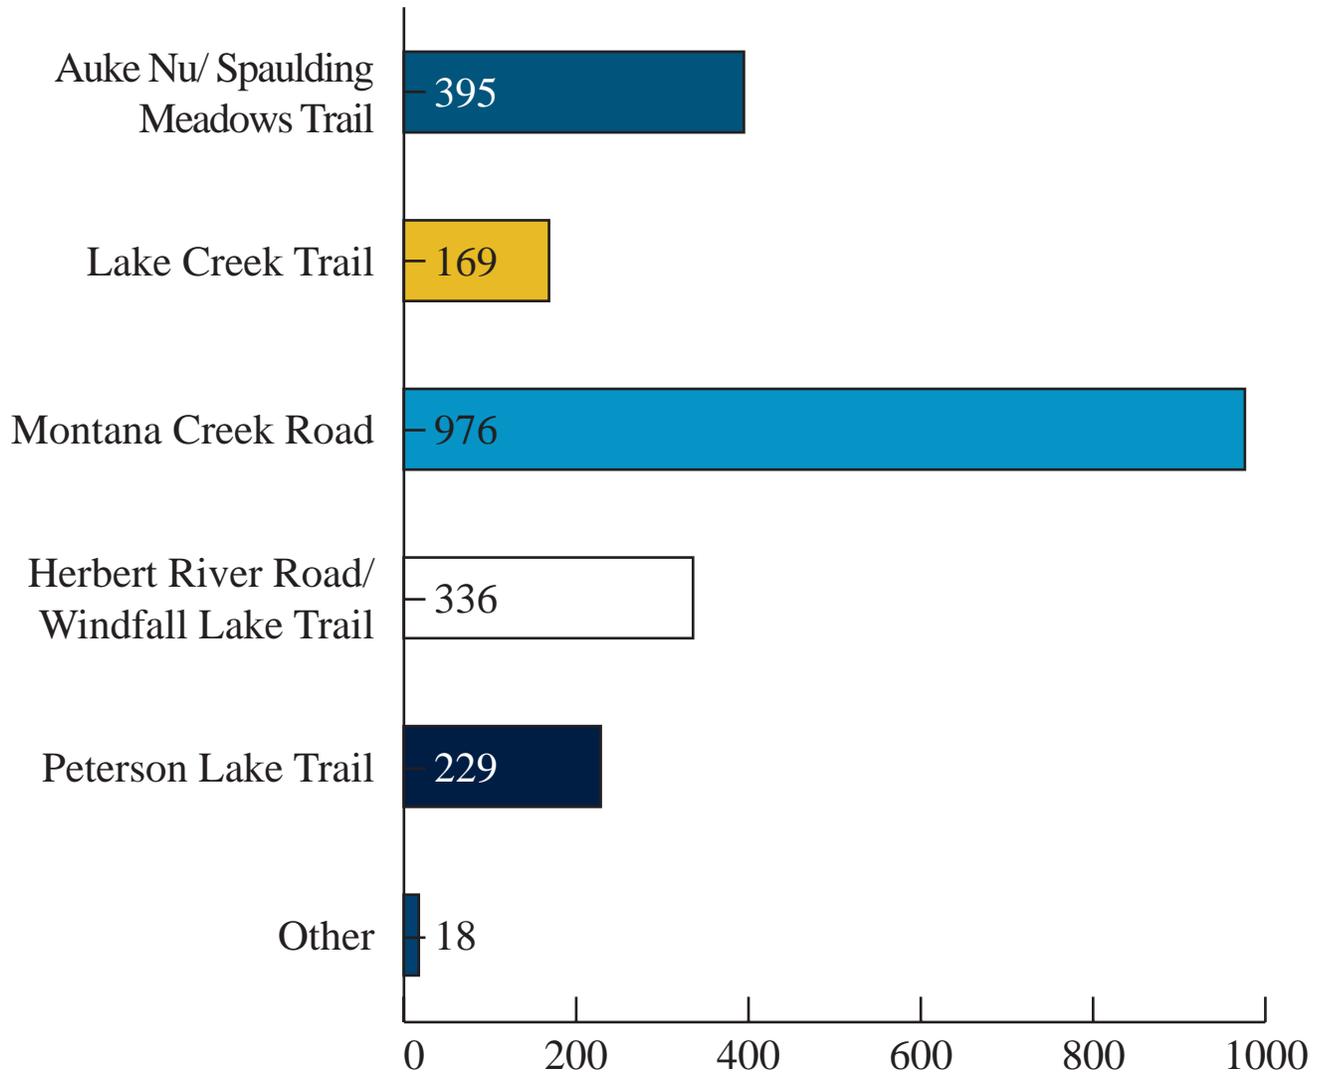

Question 2: During which seasons do you mostly use the area? (Check all that apply)

Responses: 1,009 Responses

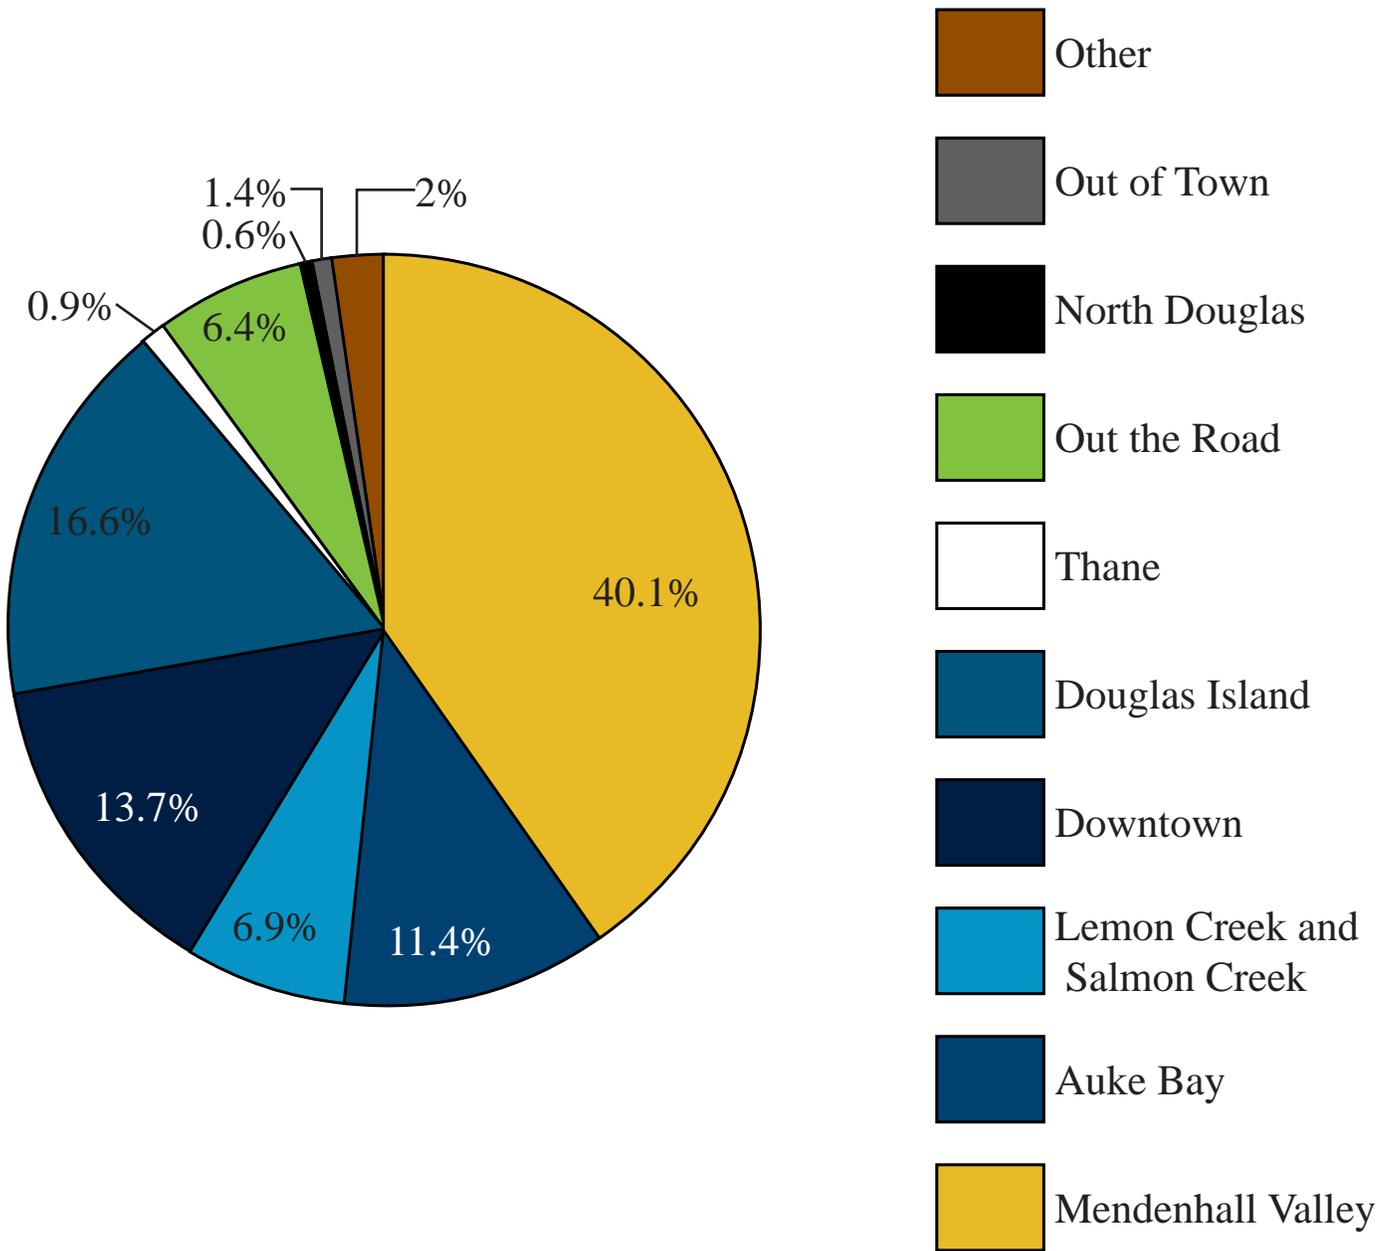

Question 3: How do you access the Montana Creek area?

Responses: 1,009 Responses

Question 4: What area of town do you live in?

Responses: 1,014

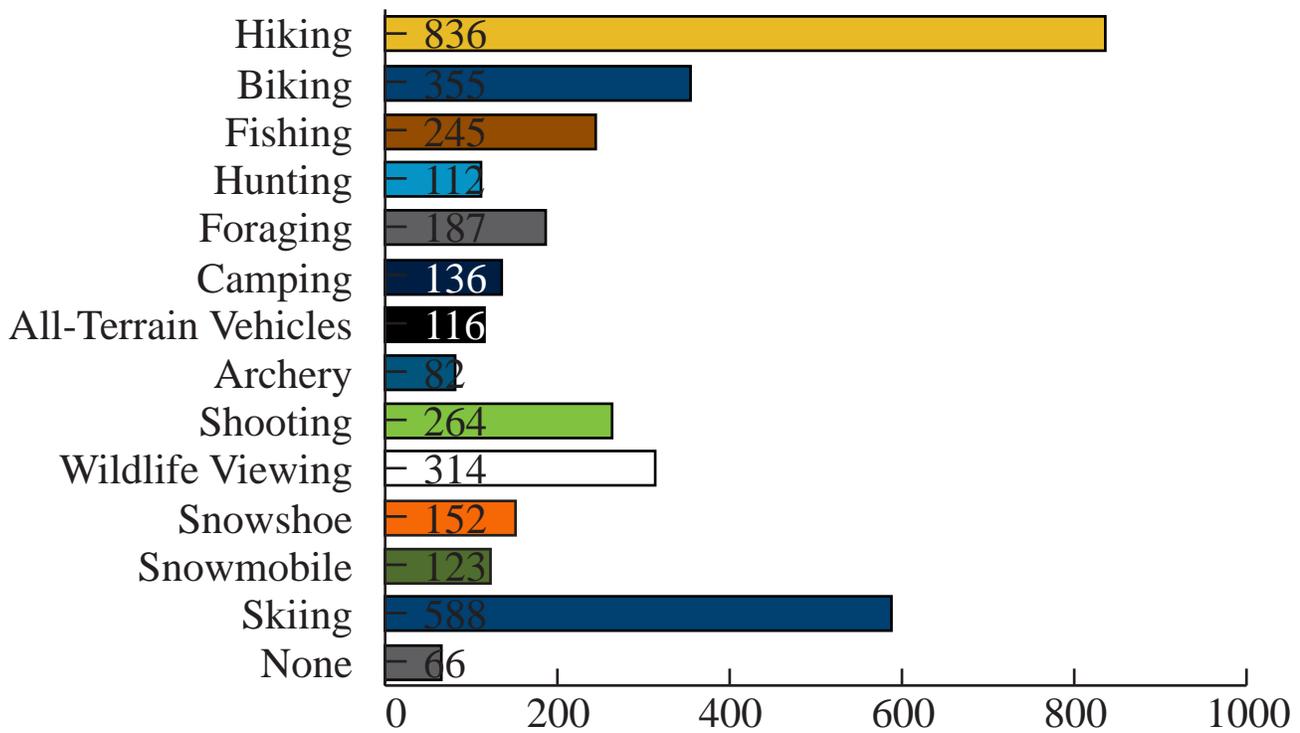

Question 5: Choose one word to describe how you feel about the existing Montana Creek recreation opportunities:

Responses: 895

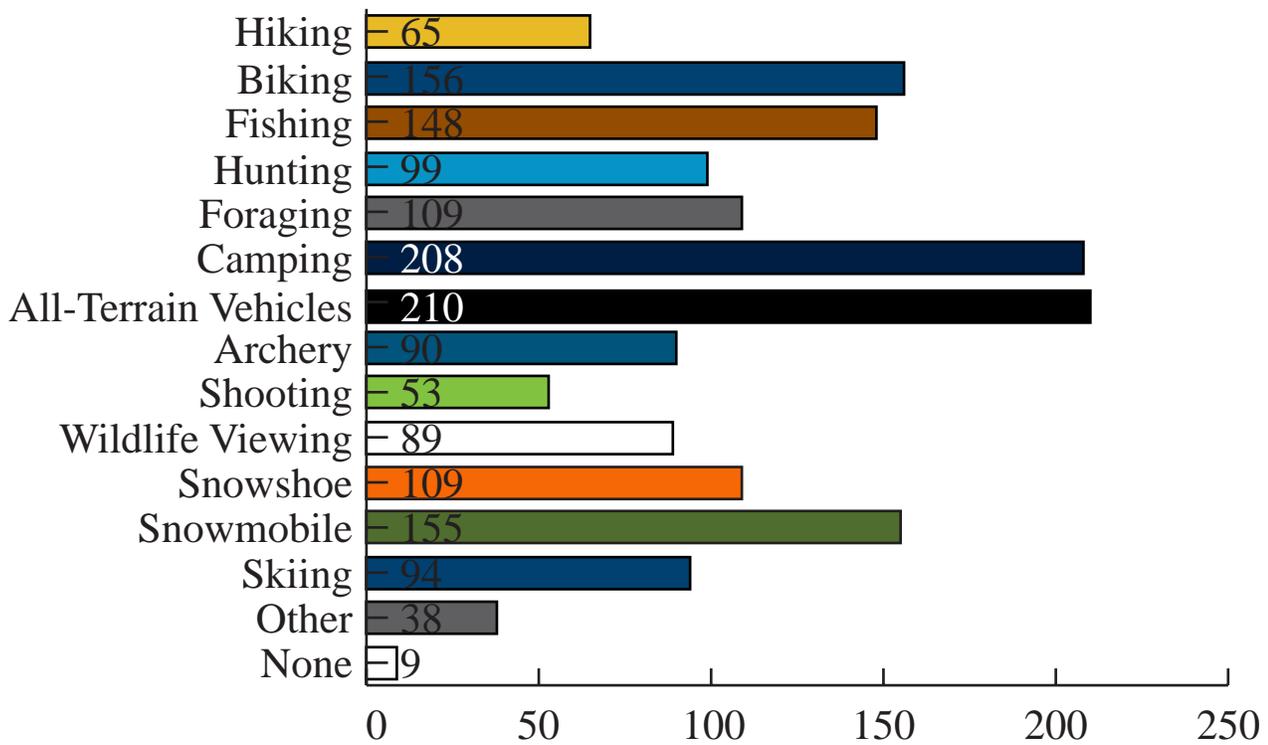

Question 6: In the last twelve months, which recreational activities in the Montana Creek area did you most frequently engage in? (check all that apply)

Responses: 1,005

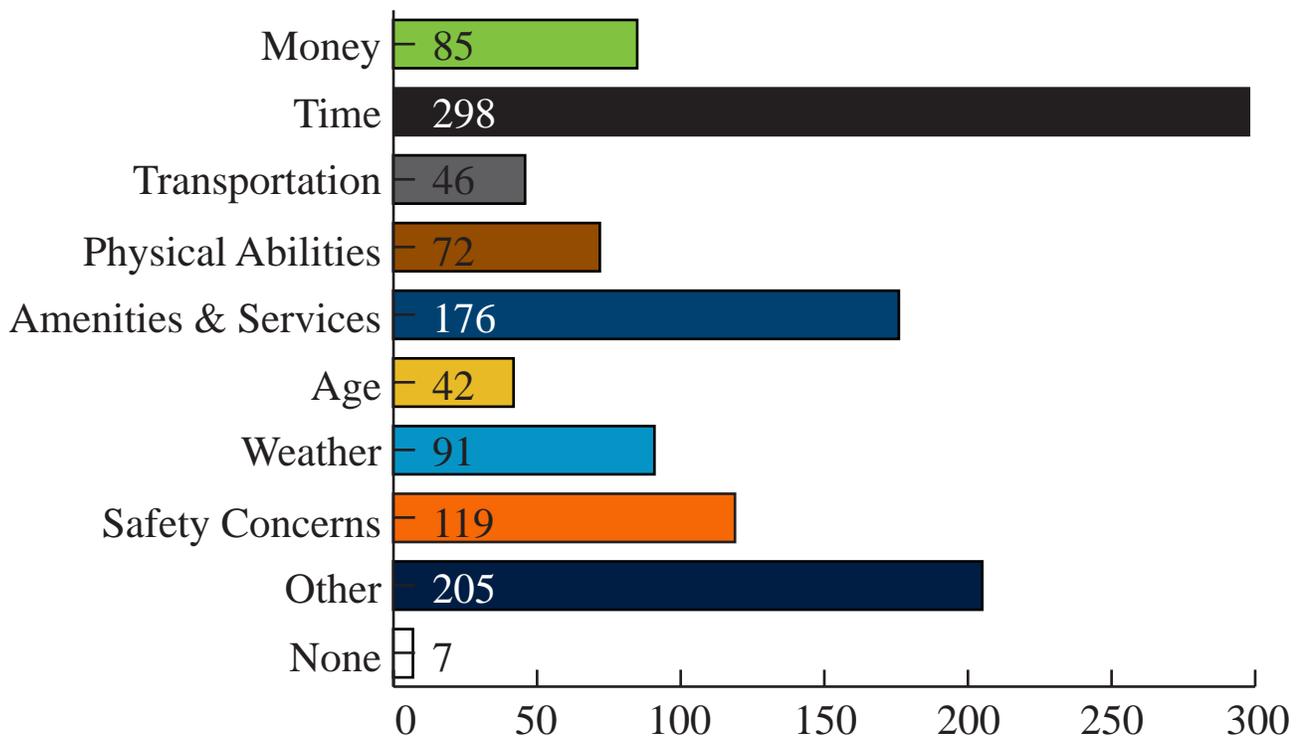

Question 7: What recreational activities do you or others in your household NOT PARTICIPATE IN THAT YOU WOULD LIKE TO in this area? (check all that apply)

Responses: 705

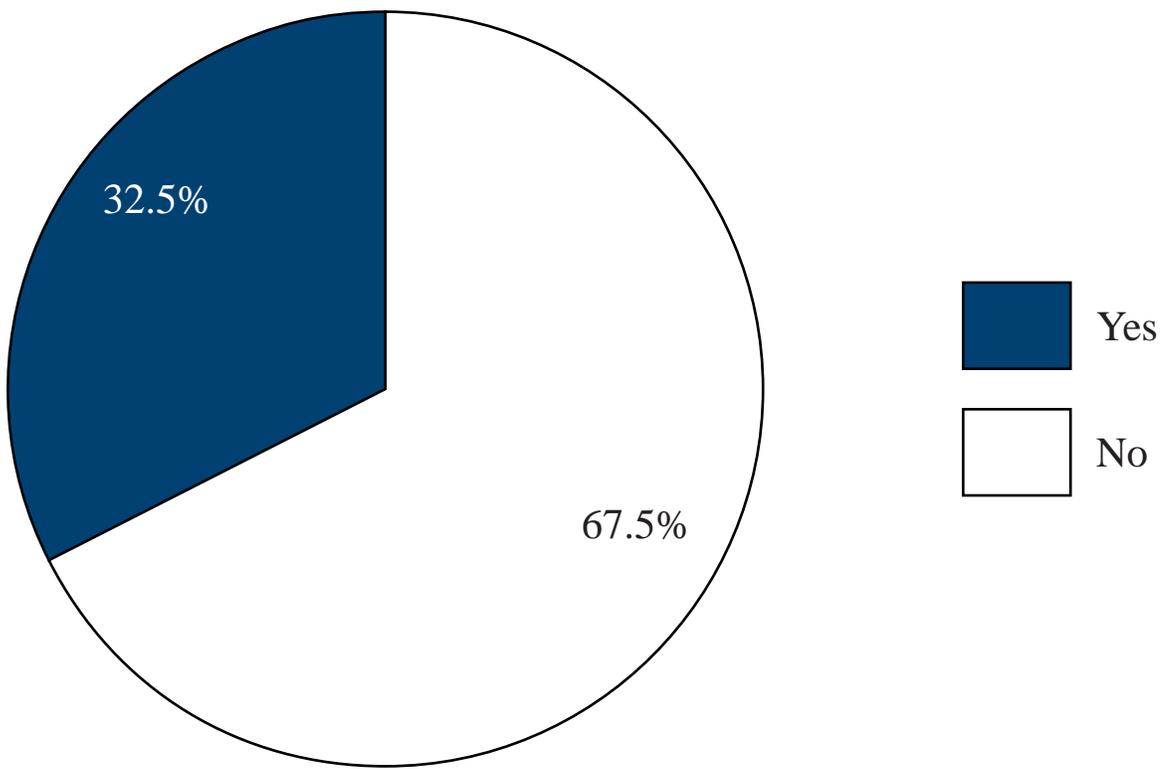

Question 8: What barriers are keeping you or any other in your household from participating in these activities in this area? (check all that apply)

Responses: 743

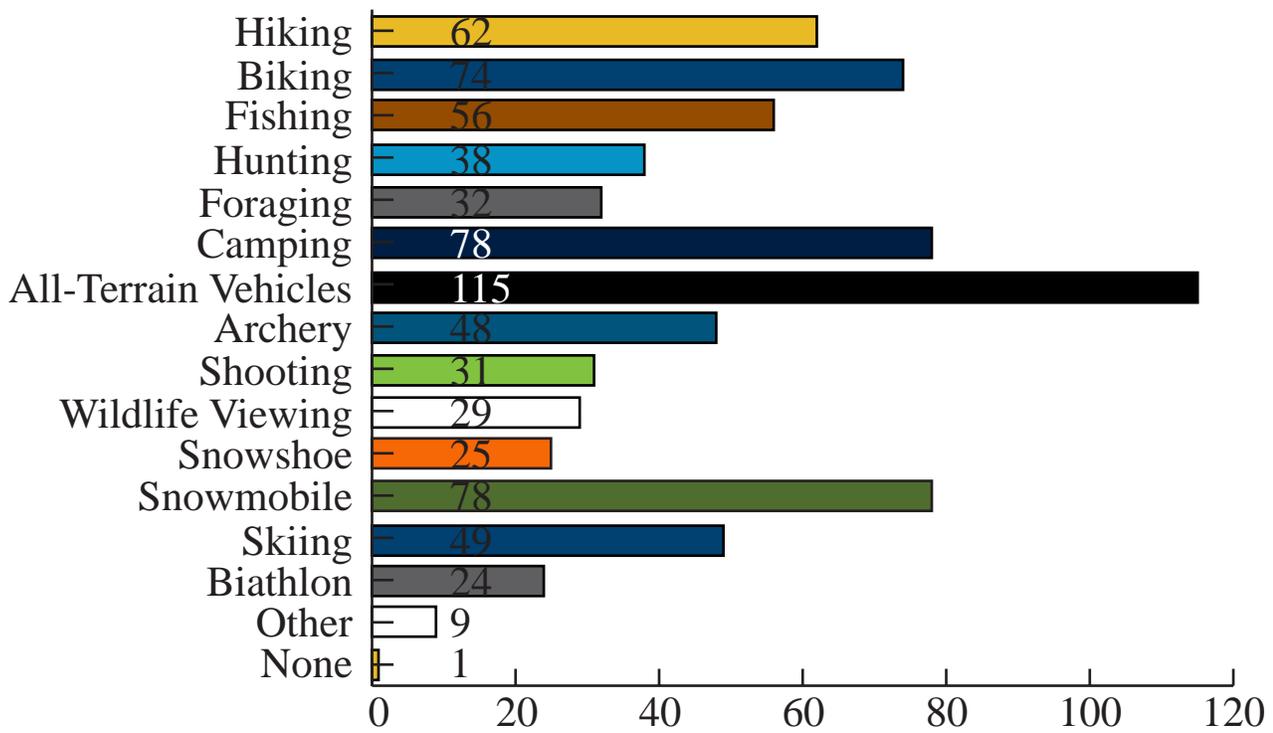

Question 10: Is anyone in your household below the age of 18?

Responses: 1,008

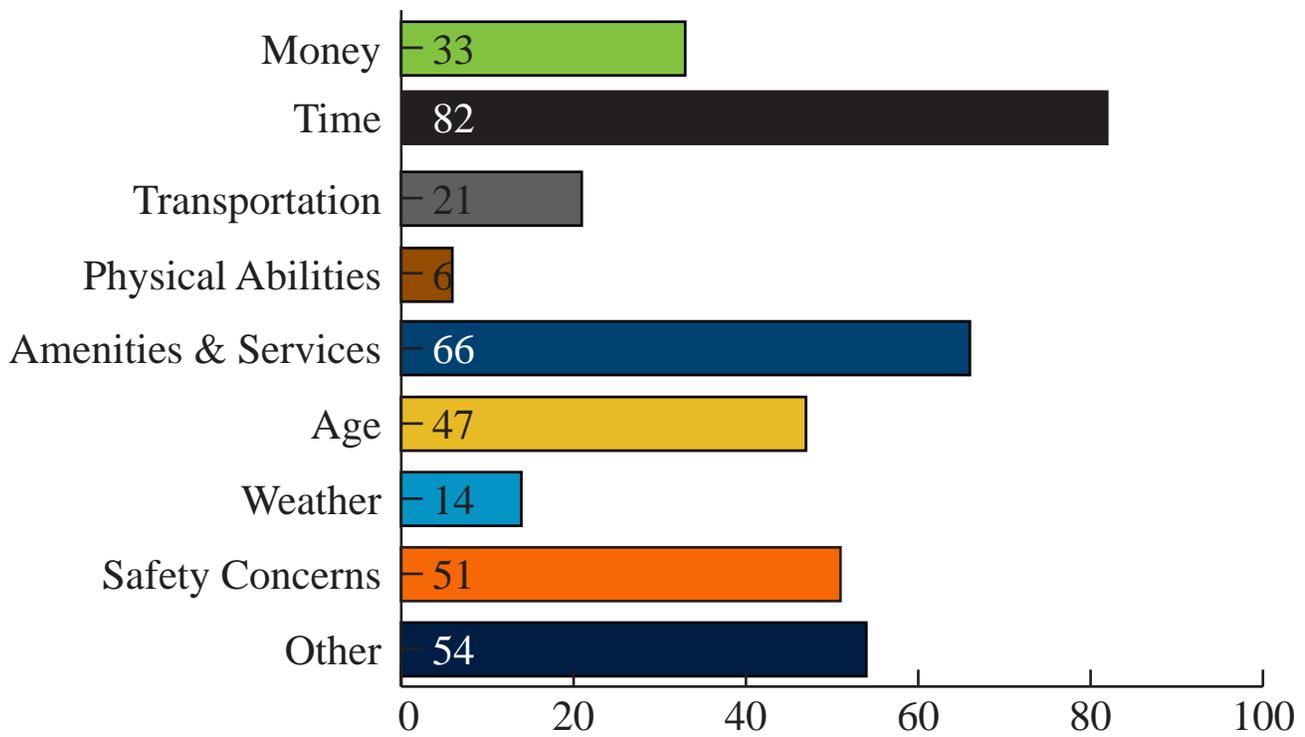

Question 11: What activities do children in your household NOT PARTICIPATE IN THAT YOU WOULD LIKE TO in this area? (check all that apply)

Responses: 242

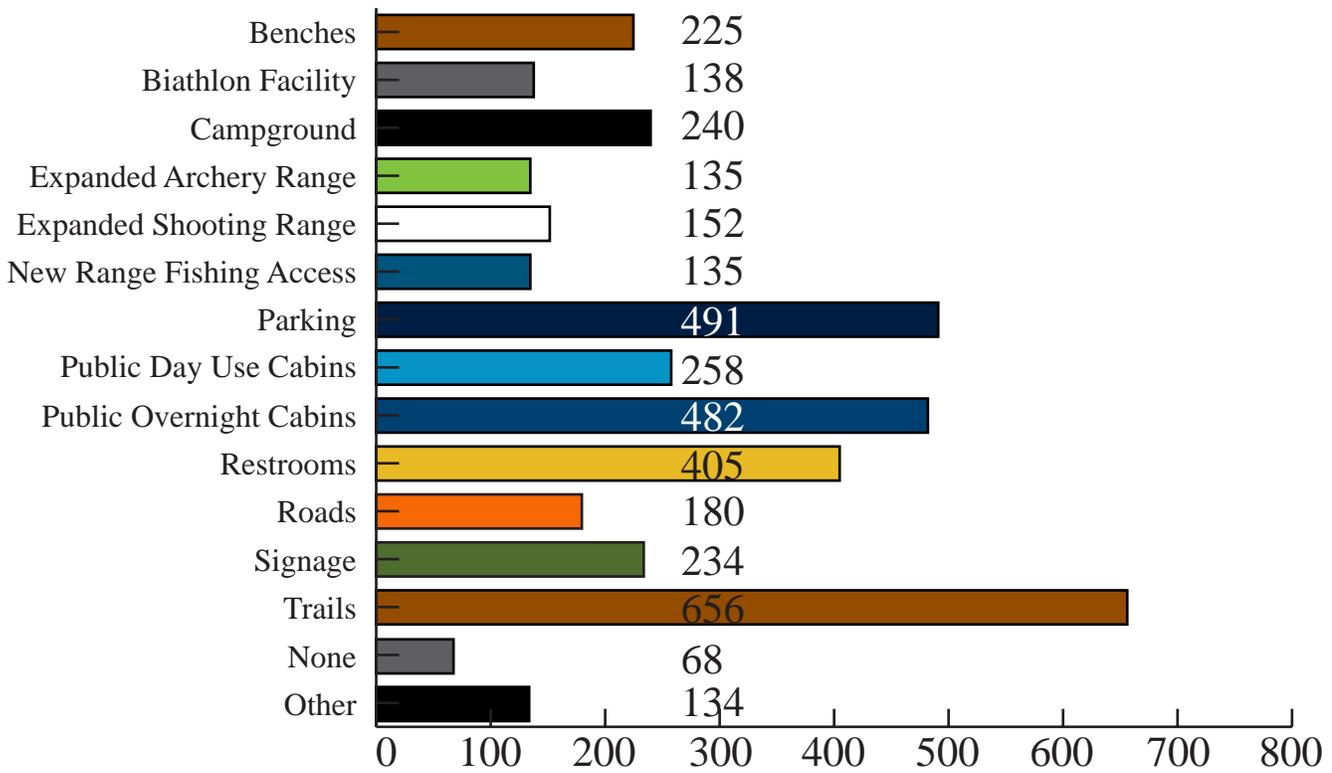

Question 12: What barriers are keeping children in your household from participating in these activities in this area? (check all that apply)

Responses: 233

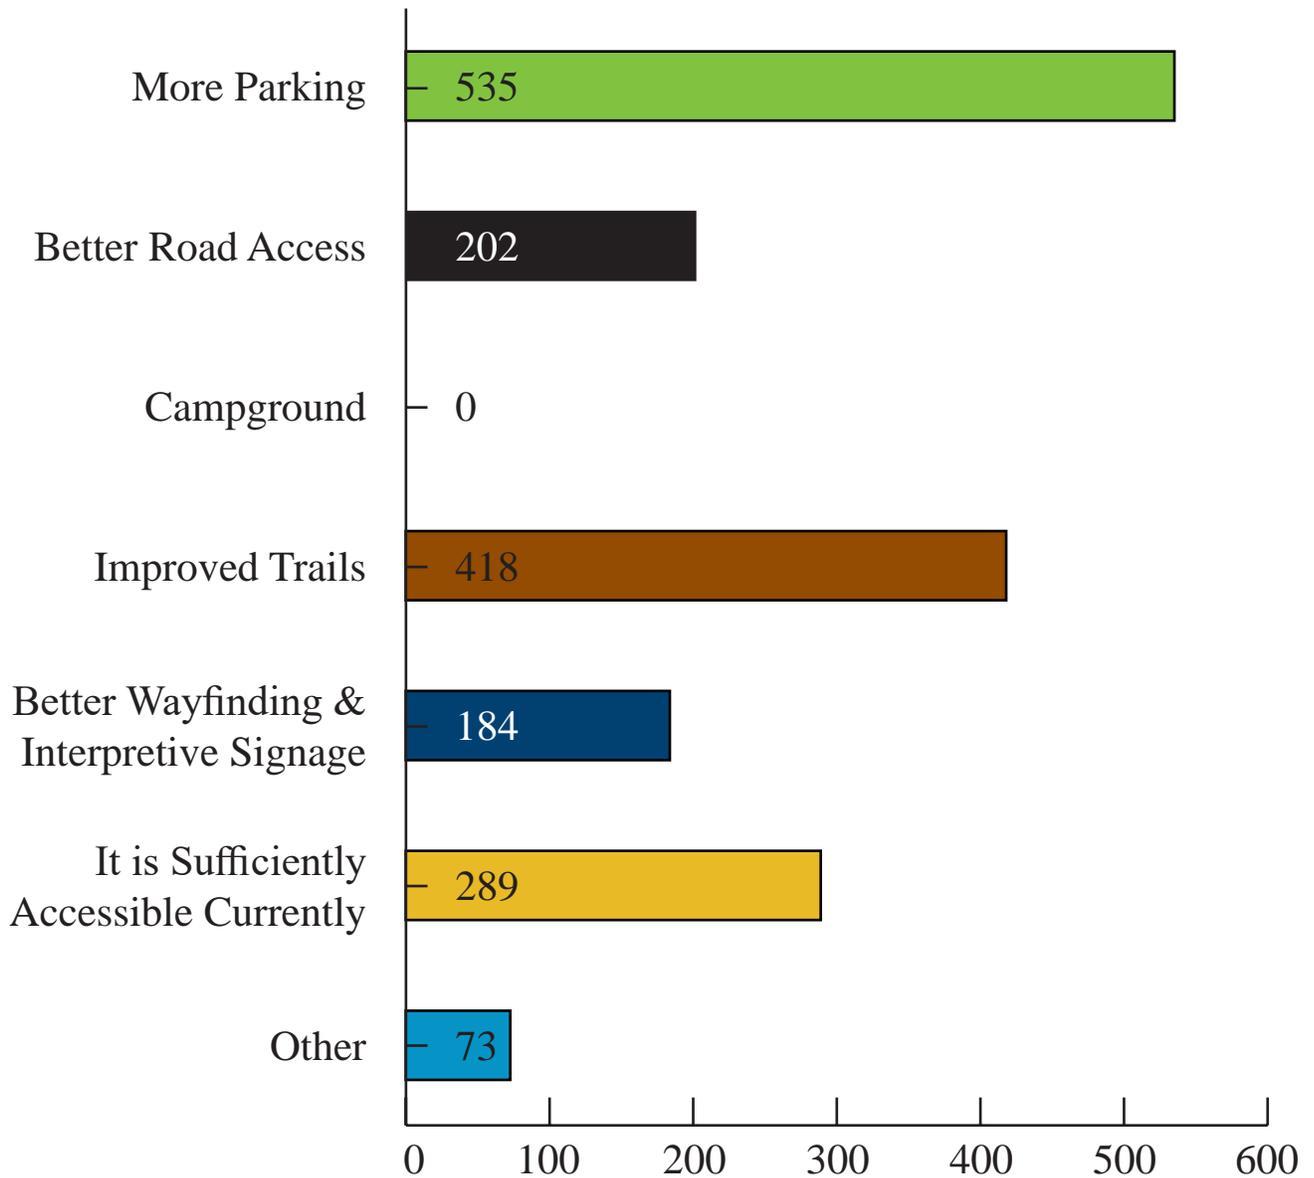

Question 14: What types of specific investments in new recreation assets or support infrastructure do you think should be made in the next 10 years? (check all that apply)

Responses: 999

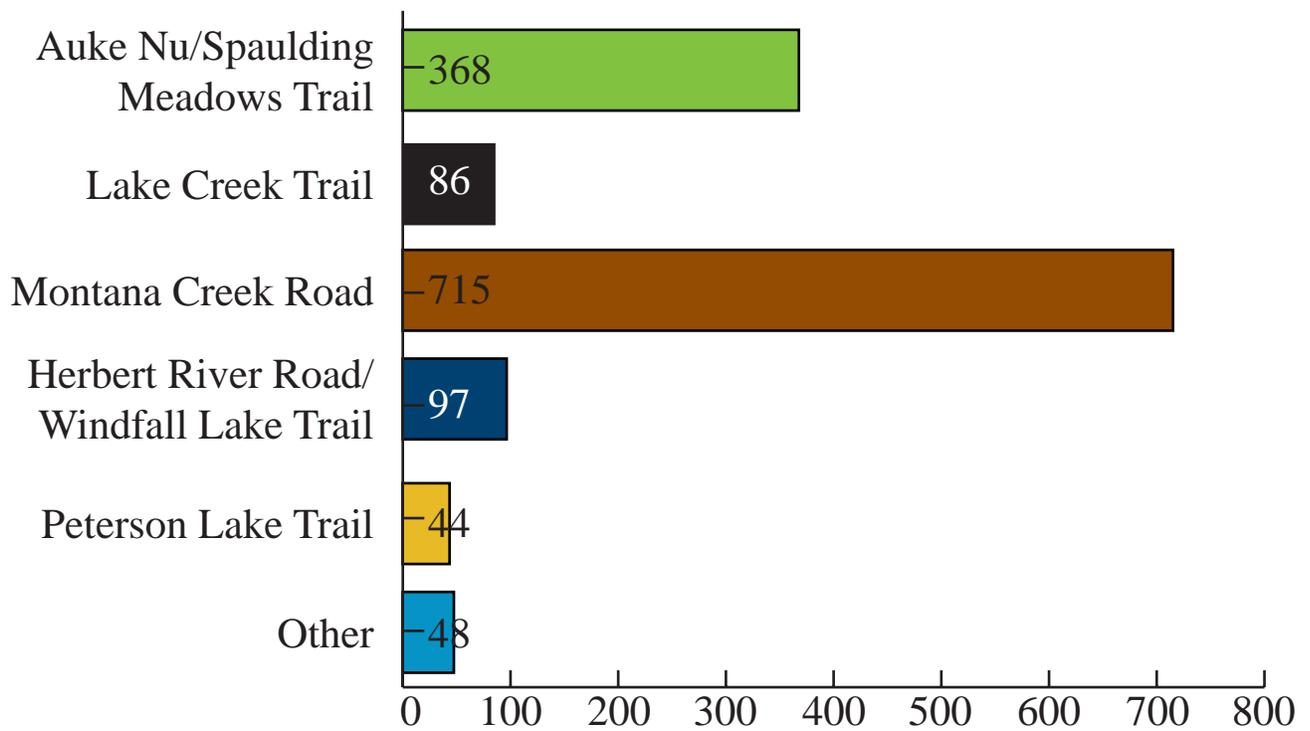

Question 15: How can this area be made more accessible for recreation?
(check all that apply)

Responses: 985

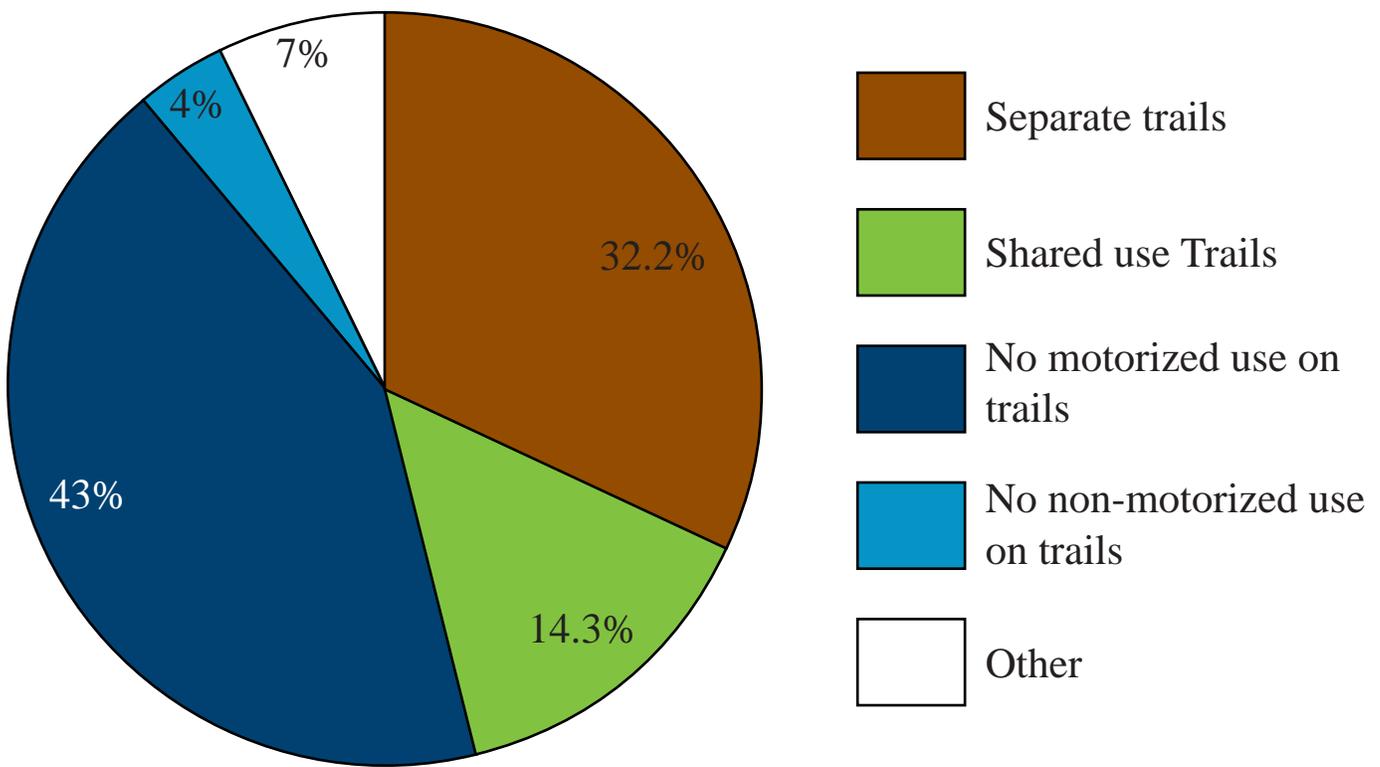

Question 16: If parking for Montana Creek access is added, where should there be more parking? (check all that apply)

Responses: 871

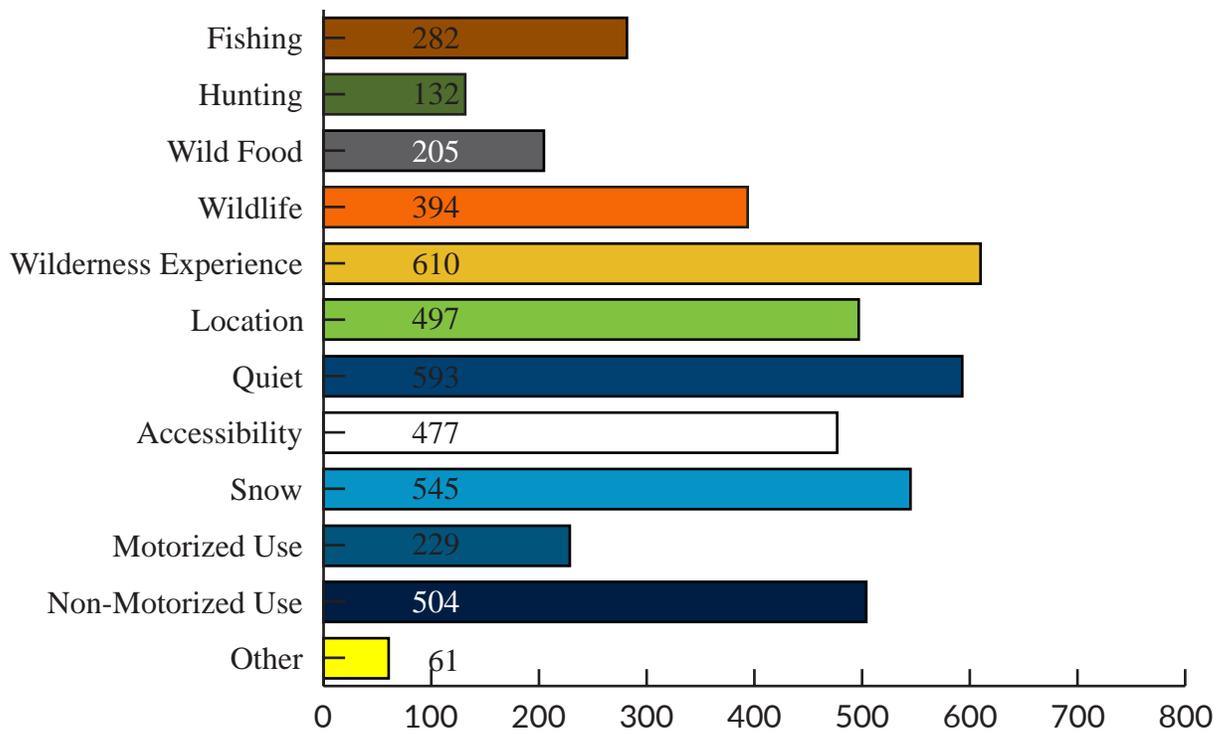

Question 17: Would one of these options improve your recreational experience of the area?

Responses: 980

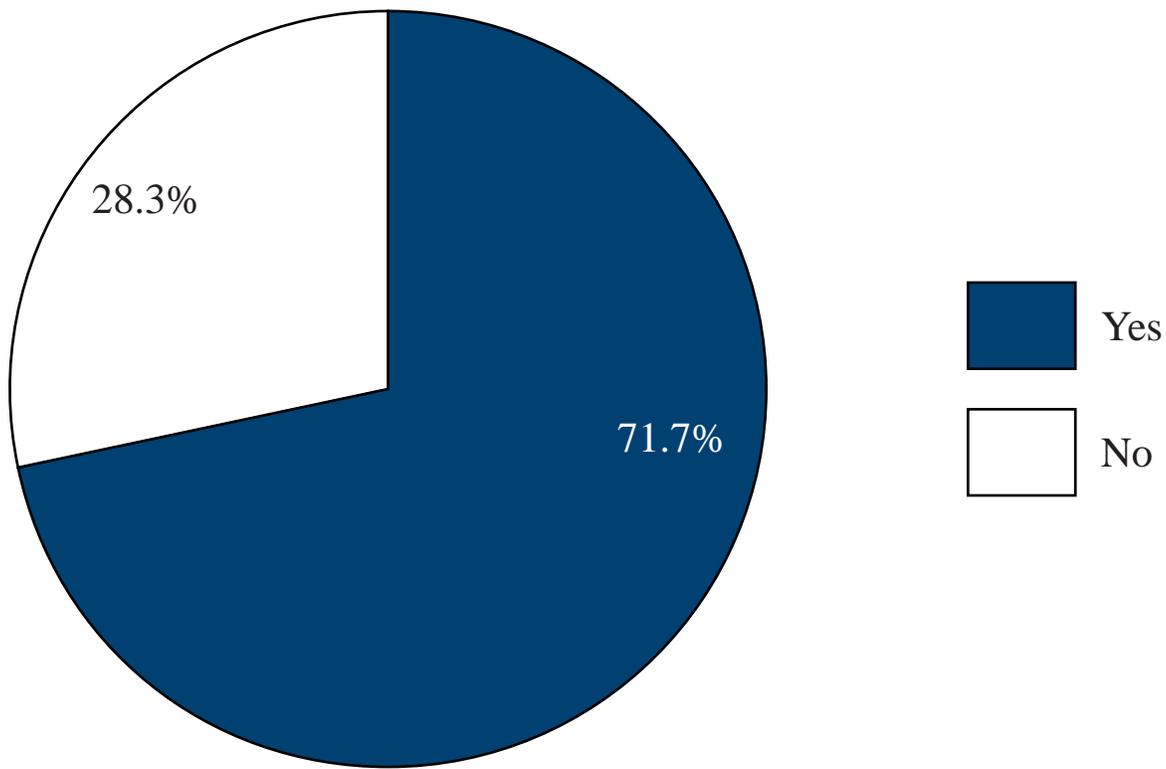

Question 18: What do you value most about the Montana Creek Recreational Area? Please prioritize what the most important features in the area are for you. (Check all that apply).

Responses: 1,008

Question 19: Did you know that three government agencies (United States Forest Service, State of Alaska Department of Natural Resources, and the City and Borough of Juneau) share management responsibilities for lands within this area?

Responses: 1,010

SECTION 3:

NARRATIVE COMMENTS

Below are all of the narrative comments received in the survey, organized and categorized by topic. Some of the comments may appear more than once if they pertain to multiple topics.

Circulation and Access Comments:

A way to access the other side of the river.

Access

Access

Access for all user groups

Access to trails

Add more access

Add more parking and roads

Again, noth much fro the kids to do unless they want I hike or ski with the greenie crowd.

Allow for public access to public lands across all user groups we each should have equal rights.

Allow more diverse use not just the tourist and the environmentalist groups

Allow more ORV access, allow the building of trails,

allow motorized vehicles

Allow off road vehicles

allowable access

Am mobility impared

Another bridge across the river for atv only. Would lessen the risk of someone getting hurt.

Being given our freedom back. The selfishness of others who do not want us in the areas

Better accessibility in case of emergency.

Better parking and sanctioned uses

Better trail and signage that says ATV's are allowed.

Better trail maintenance for safety and better linking of trails for longer hiking or backpacking/camping

Better/More motorized access. Network of 4x4 trails.

bigger parking lot for winter use

bridge that got removed

Build more interconnecting ski trails and a biathlon facility. Build a road to Spaulding meadows to access groomed ski trails and a biathlon facility and snow mobile trails. Build more rental cabins in Spaulding Meadows.

Build bigger parking lot.

Build spaces at end of Montana Creek Road

car pooling, research and learn from others, get gear (silly q's for planning)

Clear guidelines posted with enforcement, accessibility for parking and trail, board created for volunteer management of rec area.

Clear Rules to help us all share the trails.

clearer guidelines on what kinds of activities are allowed based on who currently is using the area.

Clearly authorized mixed use signage

continue access to all user groups

Develop a new trail for these activities

Develop better road access

Develop better road access

Develop connecting trails using Trail Mix; build a new cabin using grants and volunteers.

Expand access via improved trail system.

Expand parking at trailheads incl. Montana Creek, increase trail upkeep

fix the bridge and repair the road

Get rid of the gate

I'd like to hike and camp more in the area and I think there is great potential for more camping and hiking for multiple user groups. I ski montana creek often in the winter but get bored with the same out and back. i like hiking/running up to john muir and would like to connect the cabins via routefinding. it'd be nice if the trails were maintained better, including the montana creek to windfall route.

Improve the Upper Montana Creek trail to make it easier for more people to use.

Improved parking, trails, designed camping areas

Increase accessibility - expand parking lots, trails, and ensure clearly marked signage to increase safety.

increase parking lot size

Increase parking, develop hardened ORV use trails. Encourage the skiing community to use the other hundred areas available to them.

Increase parking, develop hardened ORV use trails. Encourage the skiing community to use the other hundred skiing friendly areas.

It would be wonderful if the Montana creek to Windfall lake trail could be rerouted or improved where it has deteriorated/eroded into the creek.

Lack of parking

Larger parking area for all recreational use

Limit cruise ships to reduce helicopter tours

Limited Access

Longer ski trails that connects Spaulding meadows would be great.

Maintenance of existing infrastructure, better access, emergency services

Make the area non-motorized, or split the seasons. Close barrier to prevent motorized use. Increase enforcement during non-motorized periods. There is too much conflict for safe use unless in a group.

Make trails multi-use and provide adequate parking

Mixed motorized use on the trail makes it feel inaccessible in the summer time to go fishing. It is already nerve racking in the winter when a ORV comes down the trail. Biathlon would be a great natural addition as the area already attracts people to the rifle range and the groomed ski trails and might attract both user groups to work together. There is limited parking space at both the Montana Creek road access and the Spaulding Meadows access which make it difficult during peak access days.

Modify some trails (or create new trails) to accommodate beginner to intermediate bicyclists

montana creek rd and Herbert river rd are mining roads and should be reopened

More access

More access places more trails

more accessible to adults will mean more accessible to kids

More area to access

More communication of the allowed use of the area as well as better on trail signage of the possible uses.

More communications on the allowed use of the area.

more motorized access

More motorized access, less negative pressure.

MORE OPEN PLACES TO ATVS

More parking

More parking away from gun range

More parking would be nice. Re-banning snowmachines on the existing trail is important. I hate the noise they make, but if they had their own trail and trailhead that was completely separate, and properly planned and executed, I'd prefer that to the current status quo.

More parking, lighting in the parking lot and hardened trails

More Parking, remove the gate

More trails for motorized use and parking

Motorized access needed

Need more parking and Nordic ski club needs their own trail since Montana creek road is a permitted road way.

Need more trails for off-road use

new cross country/ quad / snowmobile trail connecting montana creek and spaulding meadows trail.

No atv machines while skiing or biking

no atvs on ski trails

No biathlon is offered to participate. No designated camping spots with parking, grill etc.

None really, it's just a pain to drive from north Douglas to Montana creek and if there's a lot of snow it takes even more time.

not allow motor vehicles on the montana road access during winter snow season months

open a parking lot

Parking, roads, campgrounds

Please improve the Spaulding Meadows trail conditions and create a connecting trail over to the John Muir Cabin.

Please put a real bridge back in across Montana Creek and open the road. Build a snowmachine/ off road trail to higher elevation.

provide atv access and better parking

Rebuild the bridge, rebuild the road all the way to the previous end.

reroute city bus service to include this area. Or route school bus to service this area when ski practice is occurring there.

Remove locked gate

remove rocks and allow traffic across the bridge for challenged people

Remove that gate at the gun range so I can use the archery targets in the winter

Remove the gate

Remove the gate.

Reroute Montana creek trail

Road and parking improvements, campgrounds

Second crossing

Short of paving for wheelchair access nothing

snow machines and four wheelers during the winter on the groomed cross country ski trail.

stop blocking off the trails (cutting bridges in 1/2) purposely making bridges narrower than a 4 wheeler or snow machine

Take out the gate

They need to be a little older to go out on their own, But soon they will be spending lots of time there. Its kind of our Go to Family outdoor recreation area.

Trail building access

Trail improvements or connections to additional trails that are bike accessible.

Trail maintenance

unlock the gate and repair the bridge and repair and maintain the road

We need more accedes snd places for ATVs

widen some existing trails to accommodate multi-use (bikers and walkers). Connect some trails? create/communicate updated online trail maps (something similar to the short 'trails around Juneau' book - brief summary of each trail).

You could remove the physical barrier that's blocking the road and keep the Nordic ski club from turning the road into a sheet of ice so I can actually walk to the bow range in the spring

Your survey is designed to have people answer that they need motorized access. Who the heck approved this biased survey tool?

Maintenance Regulatory Comments

allow motorized vehicles in this entire Recreation Area. Allow commercial permits.

Clearly identify and maintain separate ATV trails, esp in the winter. XC skiers use road (past gun range) Nov-Apr (lock the gate and change ordinance to prohibit motorized use in winter). ATVs have road access May-Oct.

educating them , the road is STATE OWNED on the other side of the bridge and CBJ BEFORE the bridge.I have 2 questions / 1. who removed the bridge? 2. How many people involved with putting out this survey ride ATV.

I am not sure...there is a subculture within the gun-enthusiasts/motorsports folx that is downright reckless and aggressive. You cannot change that. Unfortunately, those people affect the whole. I hesitate to say ban...I hesitate to say increase park/law enforcement or surveillance... I am not sure how this gets fixed.

Improve main trail grade for biking and extend Montana Creek trail above back loop bridge (for fly fishing as biking)

Limit motorized vehicles and require some sort of cost free/low price "permit" that requires motorized users from taking a course in leaving "no trace."

Not clear what is allowed use and we don't want the "Karen's" of the world yelling at my kids. Un spoken rules or complaints from other users

Rumors of drug use and aggressive behavior and spent hypodermic needle hazards, particularly at the end of the old road. I can't attest to this on a personal level, but have been warned by reputable people and businesses in town.

A area clearly posted of approved activity's close to town so my kids can ride dirt bikes and snow sled with out being yelled at by cross country skiers and snow showers. Or having them call the JPD on them.

Access for ATVs and beginning enforcement of new ATV rules.

Active trail maintenance; build/maintain trails for biking

Approved Activity's clearly posted

Archery range that is not in a muskeg; expand shooting range, fix wood stove at Skaters

Auk nu trail needs (more) work! Some of those planks are so iffy that I don't like to go up if it's raining.

Better parking and sanctioned uses

Better trail maintenance for safety and better linking of trails for longer hiking or backpacking/camping

Better trail maintenance. Are there even realistic trail biking options right now?

chainsaw the logs

Change the rules

Clean up the mudslide

Clear guidelines posted with enforcement, accessibility for parking and trail, board created for volunteer management of rec area.

Clear rules on what you are and are not allowed to do or use

Clear Rules to help us all share the trails.

Clear the log jams on Montana creek, so people can float down the river and fish. Also do this on Cowee Creek. If you clear the log jams in creeks, then more and more people will be able to enjoy outdoor activities on the water that don't require a huge boat.

clearer guidelines on what kinds of activities are allowed based on who currently is using the area.

Clearly authorized mixed use signage

Close to all motorized machines summer and winter unless they have a permit to operate.

Compromise multi-use and more surveillance and enforcement of druggies

Do some trail grading and improvements.

Expand parking at trailheads incl. Montana Creek, increase trail upkeep

Extended trail grooming/brushing, etc

Family friendly trails that are safe for young toddlers around atv use. Signs large fines community shunning

fix the bridge and repair the road

Fix the washed out trails

Fix trail past end of road that has fallen into stream.

Forest Service/Ranger patrol

I don't go in the summer when the ATV riders are out there. I've stumbled onto some rowdy parties in the past that made me feel uncomfortable. The trash and animal carcasses left to rot at the trailhead were/are a danger (bears) and disgusting.

I'd like to hike and camp more in the area and I think there is great potential for more camping and hiking for multiple user groups. I ski montana creek often in the winter but get bored with the same out and back. i like hiking/running up to john muir and would like to connect the cabins via routefinding. it'd be nice if the trails were maintained better, including the montana creek to windfall route.

Improve better access to Montana Creek for fishing

improve extension of main Montana Creek Trail for bikers and hikers

Improve outdoor archery range maintenance

Improve part of the Montana creek trail

Improve quality oh hiking trails, increase quantity of cabins.

Improve the Auke Nu/John Muir trail into more gravel instead of rotten boardwalk

Improving the trail surface (summer & winter) would help with physical challenges. Motorized vehicles damage the surfaces and also represent a safety concern for non-motorized users.

Infrastructure

It would be nice if there were less rules and clearer expectations for recreational vehicles

It would be wonderful if the Montana creek to Windfall lake trail could be rerouted or improved where it has deteriorated/eroded into the creek.

Legal and designated area

Let the local ATV community manage a section of the area specifically for the responsible riding of ATV's

Lights for winter cross country skiing. Have some toilet facilities at trail heads!

Limit cruise ships to reduce helicopter tours

Maintenance of existing infrastructure, better access, emergency services

Maintenance on the Montana Creek side of the trail that connects to Windfall Lake Trail

Make the area non-motorized, or split the seasons. Close barrier to prevent motorized use. Increase enforcement during non-motorized periods. There is too much conflict for safe use unless in a group.

Manage the area for peace and quiet.

Management

Montana creek trail needs work to be more easily passable

More cabins, better trail upkeep, more limits to motorized vehicles

Once amenities such as outhouses, camp sites, are offered we would do it.

Open public vote on land use, trail maintenance, proper stewardship of the land

Outhouse, fire ring, and bear box facilities

Outhouse, fire ring, and bear box facilities

Perhaps keep separate trails for bikes apart from those hiking or traveling on foot. Provide dog poo bags and added parking, as well as trash disposal near the trail head areas. If there were a designated campground area that had firepit and or shelters (similar to the Auke Rec campgrounds) that would encourage more recreational usage of that area for our household.

Port-A-Potties

put signs that say watch for skiers/atv's and use speed limits on trail so both hobby's can share space in winter.

Ranger Patrol

Rebuild and maintain trail systems

Repair/rebuild the trail along Montana Creek where it has severe erosion problems. Also rebuild trail in the areas that flood or are typically wet and mucky. Fixing these trail issues would allow it to be used more often during the year by more people.

Restrooms, campsites,

Sign with regulations

some maintenance of wood sweepers/strainers that is still respectful of fish habitat

Some trails need new planks and general upkeep

Temporary waivers of existing regulations

the gate should be closed to snow machines in the winter, enforcement of non motorized boundaries . Please do not increase the access of that area to atv, 4 wheelers ect

The soil tends to get torn up around the trails by recreational vehicles not sticking to the road.

The spaulding meadows trail needs some work.

the Spaulding Trail and the Peterson Lake Trail need some maintenance! Also, I am not sure of the condition of the Montana Creek Trail connecting to the other trails, but that is a route I would like to do again. I hiked it about 20 years ago and it was a bit rough. So maybe it needs some maintenance as well? I wish I was younger, but I'm still trying to do more hiking and backpack camping.

The trails could be better maintained, Montana creek trail in particular has a lot of wash outs

Trail clearing/grooming

Trail development and maintenance

Trail improvement between Montana Creek gravel trail and windfall lake.

Trail improvements or connections to additional trails that are bike accessible.

Trail maintenance

Trail maintenance so Spaulding isn't a death March when it's been raining

Trail work on mountain creek trail leading to the grandchild's peak trail

unlock the gate and repair the bridge and repair and maintain the road

Wider trail and more marker in the woods and after the bridge

Split and Shared Use Comments:

A 50/50 split = close Montana Creek for motorized use during November-May and allow for motorized use during the summer.

Free up more land so all user groups can use area. I have been apart of off road groups down south and it works great. I have many ideas

Make Spaulding open to all activities more geared towards family, lots of people stereotype snowmobilers as party people. I believe a wider trail, access to the cabins available, and more law enforcement presence on the trail could make Spaulding a very enjoyable area for family winter activities. Not just XC ski specific or snowmobile specific but all combined.

ORV's shouldn't be allowed until the ground is frozen and there is adequate snow cover or there is a hardened surface of some kind. If you go to the very end of the Montana Creek Road the environmental damage is quite apparent.

Web site describing how areas are shared, and "good spots" to consider for fishing.

widen some existing trails to accommodate multi-use (bikers and walkers). Connect some trails? create/communicate updated online trail maps (something similar to the short 'trails around Juneau' book - brief summary of each trail).

Work with all user groups instead of catering to militant skiers

Access for all user groups

Additional shared space and time with ATV

Allow Authorized activity in summer not winter

Balance out the needs between both the ATV groups, and Xc skiers. There are plenty more places to ski in town

Budget time, save money to acquire proper weather gear, limit motorized use on trail.

Build bike specific trails

Build campsites, cooperation between Nordic Ski club and other users to allow equitable use of the area for everyone in Juneau, not just skiers

CBJ to open up motorized riding areas, to include joint use areas.

Clear Rules to help us all share the trails.

Close to all motorized machines summer and winter unless they have a permit to operate.

Compromise multi-use and more surveillance and enforcement of druggies

Consider using this land for recreation activities to all not just one small group. An ATV track would be great in this area.

Cooperation of land use, utilization of available services and funding to develop so said land for enjoyment of all.

Create a master plan that is inclusive to all user groups like motor vehicle users!

Don't allow motorized vehicles beyond gate.

eliminate motorized & non-motorized recreation on same trail during same season.

Family friendly trails that are safe for young toddlers around atv use. Signs large fines community shunning

Fewer or separated motorized users.

Find a way to allow multiple users

For skiing/snowshoeing safety concerns, eliminating motor traffic (from the skiing side, and having motor vehicle users stick to their side) would highly reduce potential accidents and make the skiing trails far more safe.

Have a separate Nordic ski track for them.

Have part of it available for 4 wheelers and dirtbikes

having concurrent motorized and active non motorized activities is a safety concern for my family

Increase parking, develop hardened ORV use trails. Encourage the skiing community to use the other hundred skiing friendly areas.

It is a controversial area. Everyone wants the space for "their" activity. Until the multi-use issues get resolved, there will be concerns.

It would be great to share the space equally, for what activities are done in the area. Skinning hiking on certain days snowmachining at some done on others.

It's unfortunate but most people walk or hike for fun, myself included. There will always be some opposition but we literally have hundreds of hikeable trails that are awesome elsewhere. An atv place would reduce wear and tear elsewhere and give the riders right of way so if dogs or other people can't hack it they can go someplace else. Riders don't have any cbj options nearby.

Make it easier for other groups to be out there and not just one group

Make the area non-motorized, or split the seasons. Close barrier to prevent motorized use. Increase enforcement during non-motorized periods. There is too much conflict for safe use unless in a group.

Make this use area equal to all user groups

Make trails multi-use and provide adequate parking

More parking would be nice. Re-banning snowmachines on the existing trail is important. I hate the noise they make, but if they had their own trail and trailhead that was completely separate, and properly planned and executed, I'd prefer that to the current status quo.

More trails! A variety is good.

No motorized vehicles during winter months

Non motorized use only in the winter

not allow motor vehicles on the section of montana cr road during the winter snow season

Not good to have motorized vehicles and skiing, hiking, biking in the same area

Not have the one sided user groups being catered to all the time.

Open area to all users

"Open it up to a broader audience so all have an opportunity to enjoy this land. There is more than enough to go around"

Open more areas to the diverse needs and desires of our population.

open to all user groups

Open up multi use in established trails and create ATV specific areas by partnering with the riding groups.

opening area to everyone all year

Perhaps keep separate trails for bikes apart from those hiking or traveling on foot. Provide dog poo bags and added parking, as well as trash disposal near the trail head areas. If there were a designated campground area that had firepit and or shelters (similar to the Auke Rec campgrounds) that would encourage more recreational usage of that area for our household.

Proper development of areas to allow increased/diverse user groups

put signs that say watch for skiers/atv's and use speed limits on trail so both hobby's can share space in winter.

Re: safety concerns: motorized and non-motorized should not be on the same trails. Re: amenities and services: biathlon does not exist yet, but we would be interested in using it. Also, developing more cross country skiing/walking/snowshoeing trails would be amazing.

Responsible development of motorized use access points.

Restrict motorized traffic during winter months

Safer and better laid out trails in the woods woods motorized vehicles. A single track trail for 2 wheeled vehicles would be much easier on the environment than the wheelers. On shared trails they should be wide enough to allow a pedestrian and motorcycle to fit safely

Separate area for them to recreate in

separate areas for motorized and non motorized use

Separate areas for motorized and non-motorized uses - they are not compatible

Separate hiking and motorized vehicle trails, or more ATV access in other areas.

Separate motorized users from non-motorized users

Shared use agreements

Some kind of limited or scheduled motor sports

Stop catering to special interest groups

Teach said skiers how to share

Wide developed trails for biking and skiing, designated places or times for varied activities so motorized vehicles and shooting activities don't risk others

Safety Concern Comments:

A area clearly posted of approved activity's close to town so my kids can ride dirt bikes and snow sled with out being yelled at by cross country skiers and snow showers. Or having them call the JPD on them.

I have a FEAR of four wheelers or ski machines during the winter on road past shooting range. I don't have a solution for this and do not know how we can safely share that road during the winter season. Hundreds of skiers use that trail weekly and the youth ski teams use it at night after school with headlamps. The trail is groomed by volunteers and donated money for fuel and it is disappointing to go out when trail grooming is destroyed by all terrain vehicles/ski machines.

I'm not sure about how a biathlon range would work. If it were unsupervised, I could see it becoming a more remote version of Hank Harmon, with folks taking up the range after postholing in so that a true biathlon couldn't be done. At worst it would be a range where folks would take the "it's a range where you ski in" idea and turn that into "it's a move and shoot range" where it would become some sort of mini tactical training range with lots of dangerous unsupervised "tactical experts" out there. So I'd love to have a biathlon range but in the end it would be unworkable unless it were staffed and I just don't see parks & rec having a budget for that.

Rumors of drug use and aggressive behavior and spent hypodermic needle hazards, particularly at the end of the old road. I can't attest to this on a personal level, but have been warned by reputable people and businesses in town.

You can't control personalities, but I would rather not be treated like an unknown, and I'm not a big sports person. I do like to be outside when I can. Montana Creek is just not very friendly anymore.

Auk nu trail needs (more) work! Some of those planks are so iffy that I don't like to go up if it's raining.

Better accessibility in case of emergency.

Compromise multi-use and more surveillance and enforcement of druggies

Concerned about conflicts between motorized users and non-motorized users -- seems like it could be dangerous

Erosion of the river bank makes hiking a little sketchy.

Family friendly trails that are safe for young toddlers around atv use. Signs large fines community shunning

Fear of bears in the area during summer leads me to only use the area when in a group.

For skiing/snowshoeing safety concerns, eliminating motor traffic (from the skiing side, and having motor vehicle users stick to their side) would highly reduce potential accidents and make the skiing trails far more safe.

having concurrent motorized and active non motorized activities is a safety concern for my family

Having user groups that are not compatible in this area. I no longer bring my dog skiing with me as I'm afraid of a collision with a snow mobiler.

I am not sure...there is a subculture within the gun-enthusiasts/motorsports folx that is downright reckless and aggressive. You cannot change that. Unfortunately, those people affect the whole. I hesitate to say ban...I hesitate to say increase park/law enforcement or surveillance... I am not sure how this gets fixed.

I am nervous to bring my child to ski because there have been snowmobiles driving very very fast along the curvy trail.

I don't go in the summer when the ATV riders are out there. I've stumbled onto some rowdy parties in the past that made me feel uncomfortable. The trash and animal carcasses left to rot at the trailhead were/are a danger (bears) and disgusting.

I feel that all terrain vehicles are dangerous and harm the environment. I wouldn't use them.

I would like for Montana Creek to go back to non-motorized use. I am afraid of getting plowed over by a snow machine in the winter.

I'm mostly concerned about bears and wolves, and I don't know how to solve that problem.

Improving the trail surface (summer & winter) would help with physical challenges. Motorized vehicles damage the surfaces and also represent a safety concern for non-motorized users.

Lack of facilities and conflicts

Lack of facilities and conflicts

make Montana Creek road/trail limited to non-motorized use. I have heard stories of motorized users acting aggressively towards skiers. the motorized users can also make the groomed track difficult to ski, which increases the likelihood of a fall

Make the area non-motorized, or split the seasons. Close barrier to prevent motorized use. Increase enforcement during non-motorized periods. There is too much conflict for safe use unless in a group.

Mixed motorized use on the trail makes it feel inaccessible in the summer time to go fishing. It is already nerve racking in the winter when a ORV comes down the trail. Biathlon would be a great natural addition as the area already attracts people to the rifle range and the groomed ski trails and might attract both user groups to work together. There is limited parking space at both the Montana Creek road access and the Spaulding Meadows access which make it difficult during peak access days.

Motorized vehicles tear up the space and don't watch for users in man-powered vehicles or non vehicles (hiking).

no longer allow snow machine access on this limited trail due to safety/ speed concerns

Not sure. Loose dogs are a problem all over Juneau. Not sure how to get dog owners to care.

Re: safety concerns: motorized and non-motorized should not be on the same trails. Re: amenities and services: biathlon does not exist yet, but we would be interested in using it. Also, developing more cross country skiing/walking/snowshoeing trails would be amazing.

remove atvs, i can no longer take my children with me because of the hazards they present

Renovation of the trail from Montana Creek road to Windfall lake would make the trail safer for mountain biking.

Right now, personal conditioning. As I have experienced with other trails, I would be concerned about dodging bikes, motorized vehicles, and unleashed dogs.

Safe bear viewing structures

Safer and better laid out trails in the woods woods motorized vehicles. A single track trail for 2 wheeled vehicles would be much easier on the environment than the wheelers. On shared trails they should be wide enough to allow a pedestrian and motorcycle to fit safely

The River road trailhead parking area is still frequented by people doing suspicious things like loitering, and partying. I have called in a few of these.

We don't go as much as we would if hunting the gun range and snow machining were not allowed.

Wide developed trails for biking and skiing, designated places or times for varied activities so motorized vehicles and shooting activities don't risk others

You could remove the physical barrier that's blocking the road and keep the Nordic ski club from turning the road into a sheet of ice so I can actually walk to the bow range in the spring

Off Road Vehicle Comments:

A 50/50 split = close Montana Creek for motorized use during November-May and allow for motorized use during the summer.

A area clearly posted of approved activity's close to town so my kids can ride dirt bikes and snow sled with out being yelled at by cross country skiers and snow showers. Or having them call the JPD on them.

allow motorized vehicles in this entire Recreation Area. Allow commercial permits.

Build more interconnecting ski trails and a biathlon facility. Build a road to Spaulding meadows to access groomed ski trails and a biathlon facility and snow mobile trails. Build more rental cabins in Spaulding Meadows.

Clearly identify and maintain separate ATV trails, esp in the winter. XC skiers use road (past gun range) Nov-Apr (lock the gate and change ordinance to prohibit motorized use in winter). ATVs have road access May-Oct.

Free up more land so all user groups can use area. I have been apart of off road groups down south and it works great. I have many ideas

I have a FEAR of four wheelers or ski machines during the winter on road past shooting range. I don't have a solution for this and do not know how we can safely share that road during the winter season. Hundreds of skiers use that trail weekly and the youth ski teams use it at night after school with headlamps. The trail is groomed by volunteers and donated money for fuel and it is disappointing to go out when trail grooming is destroyed by all terrain vehicles/ski machines.

Make Spaulding open to all activities more geared towards family, lots of people stereotype snowmobilers as party people. I believe a wider trail, access to the cabins available, and more law enforcement presence on the trail could make Spaulding a very enjoyable area for family winter activities. Not just XC ski specific or snowmobile specific but all combined.

Nordic skiers already have camp ground in Valley and Eagle Crest in Douglas. Give them a groomed trail down River Rd to Brotherhood Bridge and let the snowmobiles have Montana Creek. There are no relatively flat places for families to ride.

Simple, stop letting the greenies take everything over. I pay \$8,000 a year in property tax yet, I can't legally ride a four wheeler anywhere.

waive liability for people getting injured and give ATV riders a place to go.

A trail to ride my Enduro would be pretty cool.

Access for ATVs and beginning enforcement of new ATV rules.

Additional shared space and time with ATV

Additional XC trails

All use of OHV

Allow access for ATVs

Allow All terrain vehicles easier safe access,

allow ATV trails to be built as requested

Allow ATV use in Montana Creek

Allow more ORV access, allow the building of trails,

allow motorized vehicles

Allow off road vehicles

Allow recreational development to include atv users in this area

Allow responsible 4wheeling along Montana Creek.

Allow the ATV club to build the trail and camp ground access they're proposing

Allow the expansion of Montana creek that was suggested by the Juneau off-road group

Another bridge across the river for atv only. Would lessen the risk of someone getting hurt.

ATV in summer

ATV, snow machine access so my mother could get further out that she can't get to by foot due to her age.

Balance out the needs between both the ATV groups, and Xc skiers. There are plenty more places to ski in town

Ban snowmobiles

Ban snowmobiles and ATVs

Better trail and signage that says ATV's are allowed.

Better/More motorized access. Network of 4x4 trails.

Built ATV and Snowmachine trails

Camp ground and ATV trails

CBJ needs to finally acknowledge and support its citizens that ride ATV's

CBJ to open up motorized riding areas, to include joint use areas.

City can allow ATV like the rest of the State does

Close the entire area to all motorized use

Consider using this land for recreation activities to all not just one small group. An ATV track would be great in this area.

Create a master plan that is inclusive to all user groups like motor vehicle users!

Designated areas/trails for motorized equipment.

Designated ATV and biathlon area.

Develop more riding trails and area

Developed motorized trail system for off road for dirt and trail biking, snowmobiling and ATV.

Don't own a snowmobile, would like to see some 4wd trails or access.

Expand 4 wheeler opportunities

Expanding more terrain for off road vehicles

Four wheelers to rent

Fully allowing the use of motor vehicles. With the idea of motor use some people have gone out of their way to try and shut it down and keep the area secluded to few user groups. I grew up in Juneau and used to ride here as a kid

Have part of it available for 4 wheelers and dirtbikes

Having fewer motorized vehicles in the area (ATVs, snowmachines) would make it a much safer area to snowshow, and would increase wildlife viewing opportunities.

He is to young to ride. I would like to see this area stay open to wheelers and sleds so my son will have an area to ride when he is old enough.

I am supportive of building an ATV trail and potential campground in the area.

I feel that all terrain vehicles are dangerous and harm the environment. I wouldn't use them.

I feel that with the right steps snow machines and atv use could have a low impact and create more oportunities for those young and old to travel out doors that may not be able to hike or even walk

I really like the idea of building ATV trails and a network for riding. You could use the trail system to access more hiking, hunting, and camping opportunities.

I would like for Montana Creek to go back to non-motorized use. I am afraid of getting plowed over by a snow machine in the winter.

I would like my son to have access to trails to ride four wheelers on when he is old enough.

Improve the Montana creek, Windfall Lake, and Herbert River Trails to allow year round ATV , and snowmobile use.

Improving the trail surface (summer & winter) would help with physical challenges. Motorized vehicles damage the surfaces and also represent a safety concern for non-motorized users.

Increase parking, develop hardened ORV use trails. Encourage the skiing community to use the other hundred areas available to them.

Increase parking, develop hardened ORV use trails. Encourage the skiing community to use the other hundred skiing friendly areas.

Introducing the ability for them to ride all terrain vehicles in this area. We need a legal place to ride.

It should be opened up for motorized access. Nowhere in Juneau is going to be acceptable to those against any area for 4 wheeler access. This is the perfect spot, people in this town (especially the young) to do just that. We should have a dedicated place like this for that purpose.

It would be great to share the space equally, for what activities are done in the area. Skinning hiking on certain days snowmachining at some done on others.

It would be nice if there were less rules and clearer expectations for recreational vehicles

It's unfortunate but most people walk or hike for fun, myself included. There will always be some opposition but we literally have hundreds of hikeable trails that are awesome elsewhere. An atv place would reduce wear and tear elsewhere and give the riders right of way so if dogs or other people can't hack it they can go someplace else. Riders don't have any cbj options nearby.

Juneau desperately needs a designated area to enjoy motorsports. These areas have been stripped away and there currently is almost nowhere to enjoy these types of activities.

Just getting into motocross! We want to explore more!

Keep ATV users off the road

Keep it as is, do not add additional motorized travel

Let the local ATV community manage a section of the area specifically for the responsible riding of ATV's

Limit use of ATVs and Snow Machines

Make a space for safe ATV recreation and camping

Make area non motorized

Make area non motorized

Make the area non-motorized, or split the seasons. Close barrier to prevent motorized use. Increase enforcement during non-motorized periods. There is too much conflict for safe use unless in a group.

Making the area non-motorized

more access to trails for snowmobile in Juneau, then there would be more access to snowmobile rentals/used purchase/etc.

more motorized access

More motorized access, less negative pressure.

MORE OPEN PLACES TO ATVS

More open places to ride for kids

More parking would be nice. Re-banning snowmachines on the existing trail is important. I hate the noise they make, but if they had their own trail and trailhead that was completely separate, and properly planned and executed, I'd prefer that to the current status quo.

More trails for motorized use and parking

Motorized access needed

Motorized trail development

Motorized trail development

Motorized vehicles tear up the space and don't watch for users in man-powered vehicles or non vehicles (hiking).

Need more trails for off-road use

Needs to be more accessible for off-road vehicles!

new cross country/ quad / snowmobile trail connecting montana creek and spaulding meadows trail.

no atvs on ski trails

no longer allow snow machine access on this limited trail due to safety/ speed concerns

No motorized traffic

Non motorized accesd

Non motorized use

not allow motor vehicles on the montana road access during winter snow season months

Open areas up to atv use

Open atv trails...

Open more or new trails to motorized use

Open more roads to ATV

Open more trails for motorized use

Open more up to motorized users

Open the area to ORV's and snowmobiles.

Open to all motorized use

open to ATY's

Open up access to ATV users and provide the population (silent majority) of ATV users with a safe, legal place to access terrain as currently there really isn't any legal place to ride. People have been riding at the end of the road which is really private property. Juneau is a large land mass that should have access for motorized ATV use.

Open up multi use in established trails and create ATV specific areas by partnering with the riding groups.

Open up the trail to All terrain Vehicles continue trail to Spaulding

Open up to all motorized use

Opening more area to use by All-terrain vehicles

Please make AT LEAST 1 Recreational vehicle park or allow to use 4wheelers & snow machines.

Please put a real bridge back in across Montana Creek and open the road. Build a snowmachine/ off road trail to higher elevation.

Provide a trail and more access for atvs

provide atv access and better parking

Provide more access for atvs and snowmobiling

put signs that say watch for skiers/atv's and use speed limits on trail so both hobby's can share space in winter.

Reconstruct the trail (for non-motorized use)

Recreate a safe fun area for the locals to have fun on there atvs. Such as dirt bikes, fourwheelers, side by sides, and snowmachines.

remove atvs, i can no longer take my children with me because of the hazards they present

remove the atvs from the zone

Responsible development of motorized use access points.

Retrict the area to non-mechanical uses of travel

Safer and better laid out trails in the woods woods motorized vehicles. A single track trail for 2 wheeled vehicles would be much easier on the environment than the wheelers. On shared trails they should be wide enough to allow a pedestrian and motorcycle to fit safely

Separate hiking and motorized vehicle trails, or more ATV access in other areas.

snow machines and four wheelers during the winter on the groomed cross country ski trail.

stop motorized vehicles

The clear answer for day one has been to lock the gate and prohibit motorized vehicles during the winter months

the gate should be closed to snow machines in the winter, enforcement of non motorized boundaries . Please do not increase the access of that area to atv, 4 wheelers ect

The legal ability to ride in this area

too many motorized vehicles in winter

We need more accedes and places for ATVs

Would be nice to have a place for overland trail riding and camping.

Skiing Comments:

Build more interconnecting ski trails and a biathlon facility. Build a road to Spaulding meadows to access groomed ski trails and a biathlon facility and snow mobile trails. Build more rental cabins in Spaulding Meadows.

Clearly identify and maintain separate ATV trails, esp in the winter. XC skiers use road (past gun range) Nov-Apr (lock the gate and change ordinance to prohibit motorized use in winter). ATVs have road access May-Oct.

I have a FEAR of four wheelers or ski machines during the winter on road past shooting range. I don't have a solution for this and do not know how we can safely share that road during the winter season. Hundreds of skiers use that trail weekly and the youth ski teams use it at night after school with headlamps. The trail is groomed by volunteers and donated money for fuel and it is disappointing to go out when trail grooming is destroyed by all terrain vehicles/ski machines.

reroute city bus service to include this area. Or route school bus to service this area when ski practice is occurring there.

Work with all user groups instead of catering to militant skiers

Additional XC trails

A area clearly posted of approved activity's close to town so my kids can ride dirt bikes and snow sled with out being yelled at by cross country skiers and snow showers. Or having them call the JPD on them.

Build more bike trails and ski trails

Build new nordic ski trails to connect with Mendenhall Lake Area

connect the skiing trails to the shooting range

Create a biathlon range parallel to the hank Harmon range and ski trail connection

Entitlement of a certain ski grp

establish a track or course connected to the rifle range.

Extended trail grooming/brushing, etc

For skiing/snowshoeing safety concerns, eliminating motor traffic (from the skiing side, and having motor vehicle users stick to their side) would highly reduce potential accidents and make the skiing trails far more safe.

Have a separate Nordic ski track for them.

Having user groups that are not compatible in this area. I no longer bring my dog skiing with me as I'm afraid of a collision with a snow mobiler.

I am nervous to bring my child to ski because there have been snowmobiles driving very very fast along the curvy trail.

It would be great to share the space equally, for what activities are done in the area. Skinning hiking on certain days snowmachining at some done on others.

Larger Nordic Trail System

Lights for winter cross country skiing. Have some toilet facilities at trail heads!

Longer ski trails that connects Spaulding meadows would be great.

make Montana Creek road/trail limited to non-motorized use. I have heard stories of motorized users acting aggressively towards skiers. the motorized users can also make the groomed track difficult to ski, which increases the likelihood of a fall

Maybe a scholarship for them to get skis?

Mixed motorized use on the trail makes it feel inaccessible in the summer time to go fishing. It is already nerve racking in the winter when a ORV comes down the trail. Biathlon would be a great natural addition as the area already attracts people to the rifle range and the groomed ski trails and might attract both user groups to work together. There is limited parking space at both the Montana Creek road access and the Spaulding Meadows access which make it difficult during peak access days.

More bicycle, and ski trails

Need more parking and Nordic ski club needs their own trail since Montana creek road is a permitted road way.

Once he can drive, he may recreate in this area more often. He uses it regularly in the winter with the Juneau Nordic Ski Team.

Promote skiing and biking

promote skiing and biking

put signs that say watch for skiers/atv's and use speed limits on trail so both hobby's can share space in winter.

Re: safety concerns: motorized and non-motorized should not be on the same trails. Re: amenities and services: biathlon does not exist yet, but we would be interested in using it. Also, developing more cross country skiing/walking/snowshoeing trails would be amazing.

Ski club would like to set up a biathlon in the area

snow machines and four wheelers during the winter on the groomed cross country ski trail.

well, a biathlon range would be needed for that to happen, seems this would involve ski trails and designated shooting area.

You could remove the physical barrier that's blocking the road and keep the Nordic ski club from turning the road into a sheet of ice so I can actually walk to the bow range in the spring

Pedal Bike Comments:

Improve main trail grade for biking and extend Montana Creek trail above back loop bridge (for fly fishing as biking)

widen some existing trails to accommodate multi-use (bikers and walkers). Connect some trails? create/communicate updated online trail maps (something similar to the short 'trails around Juneau' book - brief summary of each trail).

Active trail maintenance; build/maintain trails for biking

Better trail maintenance. Are there even realistic trail biking options right now?

Build bike specific trails

Build more bike trails and ski trails

Build Mountain bike trails

Build mountain bike trails

I would love to see the trail connecting Montana Creek to Windfall improved for hiking/biking access during non-snowy seasons.

improve extension of main Montana Creek Trail for bikers and hikers

Improve the trail for biking

Improve trail for biking

Improved MTB trails.

It would be fun to have a single track mountain bike trail

Make the trail better for bikers.

Modify some trails (or create new trails) to accommodate beginner to intermediate bicyclists

More bicycle, and ski trails

More bike paths

more biking and hiking up MT Ck

Promote skiing and biking

promote skiing and biking

Renovation of the trail from Montana Creek road to Windfall lake would make the trail safer for mountain biking.

Some established smooth-ish bike trails would be great. More parking at the Spaulding meadows/Auk Nu trailhead

Trail improvements or connections to additional trails that are bike accessible.

Wide developed trails for biking and skiing, designated places or times for varied activities so motorized vehicles and shooting activities don't risk others

Camping Cabin Shelter Comments:

Build more interconnecting ski trails and a biathlon facility. Build a road to Spaulding meadows to access groomed ski trails and a biathlon facility and snow mobile trails. Build more rental cabins in Spaulding Meadows.

It'd be great if there were a cabin in the basin below grandchild peaks (which is accessed from Montana Creek road). That would facilitate mountaineering and climbing in the incredible (and accessible) peaks of this area and provide a great alpine hut option, something we do not have anywhere in Juneau.

Tent pads in back country

A place to camp without disturbing habitat.

Allow more development of trails and camping.

Better trail maintenance for safety and better linking of trails for longer hiking or backpacking/camping

Build a couple more cabins for locals to rent. Hard to plan 6 months out for a cabin.

Build campsites, cooperation between Nordic Ski club and other users to allow equitable use of the area for everyone in Juneau, not just skiers

Camp ground and ATV trails

Camping area

Create a camping area near Montana creek

Create a camping area near Montana creek, better lighting in some areas.

Develop connecting trails using Trail Mix; build a new cabin using grants and volunteers.

I am supportive of building an ATV trail and potential campground in the area.

I really like the idea of building ATV trails and a network for riding. You could use the trail system to access more hiking, hunting, and camping opportunities.

I'd like to hike and camp more in the area and I think there is great potential for more camping and hiking for multiple user groups. I ski montana creek often in the winter but get bored with the same out and back. i like hiking/running up to john muir and would like to connect the cabins via routefinding. it'd be nice if the trails were maintained better, including the montana creek to windfall route.

Improve quality oh hiking trails, increase quantity of cabins.

Improved parking, trails, designed camping areas

It would be nice to have a maintained campground or cabin in the area

Make a space for safe ATV recreation and camping

Maybe a separate picnic pavilion for offset bad weather.

More cabins, better trail upkeep, more limits to motorized vehicles

More shelters up on Spaulding or along trails.

No biathlon is offered to participate. No designated camping spots with parking, grill etc.

Once amenities such as outhouses, camp sites, are offered we would do it.

Open it and build cabins and camp areas.

Open it up and and build the cabins/ camp areas.

Outhouse, fire ring, and bear box facilities

Parking, roads, campgrounds

Perhaps keep separate trails for bikes apart from those hiking or traveling on foot. Provide dog poo bags and added parking, as well as trash disposal near the trail head areas. If there were a designated campground area that had firepit and or shelters (similar to the Auke Rec campgrounds) that would encourage more recreational usage of that area for our household.

Restrooms, campsites,

Road and parking improvements, campgrounds

Sponsor an event or create camping area

Tent pads

There are no camping facilities

Would be nice to have a place for overland trail riding and camping.

Archery, Fishing, Hunting & Shooting Comments:

Improve main trail grade for biking and extend Montana Creek trail above back loop bridge (for fly fishing as biking)

People gold dredging in the creek have been a problem. It's forced us from fishing spots

Web site describing how areas are shared, and "good spots" to consider for fishing.

Access to biathlon/archery equipment

Children's area and/or designated time to learn to shoot with parental supervision

Educate myself on where to fish and what we are fishing for

I don't go in the summer when the ATV riders are out there. I've stumbled onto some rowdy parties in the past that made me feel uncomfortable. The trash and animal carcasses left to rot at the trailhead were/are a danger (bears) and disgusting.

I really like the idea of building ATV trails and a network for riding. You could use the trail system to access more hiking, hunting, and camping opportunities.

Improve better access to Montana Creek for fishing

Improve outdoor archery range maintenance

Larger or less crowded ranges

Limit hunting and shooting

Maybe a community schools archery class.

Maybe a rental shop for gear for things like fishing or classes to teach the youth

Mixed motorized use on the trail makes it feel inaccessible in the summer time to go fishing. It is already nerve racking in the winter when a ORV comes down the trail. Biathlon would be a great natural addition as the area already attracts people to the rifle range and the groomed ski trails and might attract both user groups to work together. There is limited parking space at both the Montana Creek road access and the Spaulding Meadows access which make it difficult during peak access days.

No fishing notices!

No guns

poorly marked archery range and a crowded shooting range

Remove that gate at the gun range so I can use the archery targets in the winter

Used to fish Montana Creek all the time, it just got too busy for me.

Biathlon Comments:

Build more interconnecting ski trails and a biathlon facility. Build a road to Spaulding meadows to access groomed ski trails and a biathlon facility and snow mobile trails. Build more rental cabins in Spaulding Meadows.

Extending the ski trailer around and extending the gun range to allow for biathlon

I don't know anyone who does biathalon so I need help

I'm not sure about how a biathlong range would work. If it were unsupervised, I could see it becoming a more remote version of Hank Harmon, with folks taking up the range after postholing in so that a true biathlon couldn't be done. At worst it would be a range where folks would take the "it's a range where you ski in" idea and turn that into "it's a move and shoot range" where it would become some sort of mini tactical training range with lots of dangerous unsupervised "tactical experts" out there. So I'd love to have a biathlon range but in the end it would be unworkable unless it were staffed and I just don't see parks & rec having a budget for that.

A biathalon safety zone would need to be identified and put in place

a biathlon course would be cool!

Access to biathlon/archery equipment

Build a range attached to ski and running trails.

Create a biathlon range parallel to the hank Harmon range and ski trail connection

Creation of a biathlon course. This would be amazing and unique!

Designate a biathlon course

Designated ATV and biathlon area.

establish a track or course connected to the rifle range.

Last I heard a study plan for biathalon was being considered, time to move the project along to development

Mixed motorized use on the trail makes it feel inaccessible in the summer time to go fishing. It is already nerve racking in the winter when a ORV comes down the trail. Biathlon would be a great natural addition as the area already attracts people to the rifle range and the groomed ski trails and might attract both user groups to work together. There is limited parking space at both the Montana Creek road access and the Spaulding Meadows access which make it difficult during peak access days.

No biathalon is offered to participate. No designated camping spots with parking, grill etc.

Not sure, would love to have a biathlon course here in juneau

Open up biathalon shooting area. (With laser style guns or 22's)

Organized biathlon would be super cool and makes a ton of sense at that location.

Re: safety concerns: motorized and non-motorized should not be on the same trails. Re: amenities and services: biathlon does not exist yet, but we would be interested in using it. Also, developing more cross country skiing/walking/snowshoeing trails would be amazing.

Ski club would like to set up a biathlon in the area

well, a biathlon range would be needed for that to happen, seems this would involve ski trails and designated shooting area.

Miscellaneous Comments:

Add a disc golf course. It's an activity that can be played year round and there's no added noise pollution. The sport has also been growing tremendously in recent years and it would be nice to have another course to play in town.

develop he area some been the same for 60 years

Better Developed Land

Clear the log jams on Montana creek, so people can float down the river and fish. Also do this on Cowee Creek. If you clear the log jams in creeks, then more and more people will be able to enjoy outdoor activities on the water that don't require a huge boat.

Create a camping area near Montana creek, better lighting in some areas.

expand recreational area

Expand trail

Give up some other recreation item that now competes.

if you build it, they will shoot at it

More walking trails

Safe bear viewing structures

They need to be a little older to go out on their own, But soon they will be spending lots of time there. Its kind of our Go to Family outdoor recreation area.

To allow associations and groups to develop recreational opportunities.

Trail development

Trail development and maintenance

One of those time turners that Hermione used to save buckbeak in Harry Potter and the prisoner of Azkaban

Subject: Montana Creek Master Plan

Dear Michele,

Thank you for the opportunity to comment on the Montana Creek Master Plan.

The Southeast Alaska Watershed Coalition (SAWC) is a Juneau-based non-profit organization dedicated to improving watershed health and stewardship in communities throughout Southeast Alaska. We work with a wide variety of Tribal, state, federal, municipal, and private partners to assess watershed conditions and design projects that address watershed impacts resulting from urbanization, forestry management, and other land use and development activities. Through these partnerships, we restore salmon habitat, manage stormwater pollution, control invasive plants, and collect scientific data for gauging environmental health and monitoring the effectiveness of our projects. Recent examples of our work in Juneau include:

- 1) Partnering with CBJ Parks and Recreation to develop a Fish Creek Estuary Area Plan
- 2) Partnering with Juneau International Airport to improve the lower Jordan Creek greenbelt area for fish, wildlife and people through bridge and trail improvements, interpretive signage, invasive plant control, stormwater management, and habitat restoration
- 3) Managing high-priority invasive plants on CBJ parklands, and
- 4) Developing restoration designs to improve sockeye salmon habitat in Lake Creek

As you know, SAWC is actively participating in the Montana Creek Master Plan planning process by providing geospatial mapping services, providing watershed reports to CBJ, and attending stakeholder meetings. We have reviewed the draft Montana Creek

Master Plan maps and offer the following comments and recommendations to protect and restore habitat in the planning area.

A) Existing Watershed Damage

Existing roads, official trails, and unofficial trails have eliminated habitat and, in many cases, are causing erosion, sedimentation, and altered ground- and surface-water pathways. These impacts have negative consequences for overall watershed health as well as the availability and productivity of fish and wildlife habitat. For example, numerous illegal motorized vehicle trails have eliminated trees, shrubs, and herbaceous vegetation and severely damaged wetland soils resulting in severe erosion, habitat loss, and altered hydrology in the planning area. Similar problems have been caused by unofficial (i.e., unplanned, unmaintained) non-motorized trails in the planning area. Montana Creek Road, from the Montana Creek bridge to the north end of the road, lies directly adjacent to the stream along much of its length. Construction of this road has eliminated trees and other riparian vegetation, which provide numerous ecological functions, along thousands of feet of salmon habitat. These functions include stream bank stabilization, wildlife travel corridors, fish habitat-forming large woody debris sources, stream shading, and carbon and nutrient cycling that support aquatic and terrestrial food webs. These functions are considered so important that the State of Alaska, U.S. Forest Service, and City and Borough of Juneau protect up to 100 feet of riparian area on either side of salmon streams to maintain these functions on lands in their respective jurisdictions.

Recommendations:

1. Decommission Montana Creek road from the bridge to its north end and restore native vegetation in the road corridor
2. Block access to and restore native vegetation on unofficial motorized and non-motorized trails that clearly adversely impact soils, vegetation, or hydrology.

The above actions should be the highest priority projects in the planning area to ensure that damaged habitat and erosion and sedimentation problems are eliminated prior to building new or enhancing existing recreation infrastructure.

B) Enforcement.

In 2021, SAWC mapped numerous unauthorized ORV trails along Montana Creek and found evidence of recent off trail riding and new trail construction. Impacts to wetlands, streams, soils, and vegetation were observed. Prior to constructing or improving any new trails or infrastructure CBJ, State of Alaska, and US Forest Service should develop, fund, and implement an enforcement plan to prevent further degradation of watershed conditions by unauthorized ORV use, off trail riding, and unauthorized trail construction. New trail construction and trail improvements should only occur after enforcement has

proven to be successful. If new hardened trails are developed, gates and additional enforcement will be needed to ensure these trails do not enable illegal ORV use/off trail riding.

C. New Trail Construction

New trail and parking lot construction will impact watershed functions in the planning area. These impacts will include loss of vegetation, wetland loss, altered hydrology, and likely altered wildlife travel patterns and habitat use due to increased noise and presence of humans and dogs. We expect that multi-use and non-motorized trails will essentially be roads replacing vegetation and soils with fill (i.e., rock). The relationship between road density (road miles/square mile of watershed area) and overall watershed health is well established: increasing road density contributes to increased erosion, altered hydrology, invasive plant establishment, noise, and reduced presence of certain wildlife species.

Recommendations:

- 1) Avoid building roads across or near wetlands. Wetlands, particularly fen and bog wetlands, are regionally rare and extremely sensitive to foot and vehicle traffic. In our experience, trails constructed near these types of wetlands in Juneau experience severe damage when humans and dogs leave the formal trail to access these wetlands. Locating trails away from these wetlands eliminates the attraction to them.
- 2) Avoid constructing redundant trails. The draft plan maintains the existing multi-use road along the west side of Montana Creek and adds a new non-motorized trail on the east side of the stream. Two roads essentially doubles the impacts described above in an ecologically sensitive stream corridor. We recommend, abandoning and restoring the existing road (as state above) and constructing one multi-use trail connecting the proposed parking area at the end of Montana Creek Road with existing and proposed trails in the vicinity of the McGinnis Creek-Montana Creek confluence.
- 3) Whenever possible, bridges should be favored over culverts to ensure maintenance of natural channel functions including sediment and debris transport, and fish passage. Use fencing to prevent trail users from crossing the stream in the channel.
- 4) Mitigate impacts to wetland and streams. While we encourage CBJ to prioritize avoidance and minimization of impacts to streams and wetland, if CBJ decides to move forward with activities that impact aquatic resources we ask that CBJ proactively mitigate impacts. Mitigation should occur in the watershed. For example, there are three private parcels within the Montana Creek floodplain along Montana Creek Road. These parcels are subject to flooding and development encroaches on wetland & stream habitat. Purchase, demolition of structures, and restoration of the floodplain could be appropriate

mitigation. *(Note: there is encroachment from parcel number 4B2901410021 onto CBJ Property, including fill material, ORV trails, and structures).*

Thank you for considering our comments.

Sincerely,

A handwritten signature in black ink, appearing to read "Rob Cadmus", with a long horizontal flourish extending to the right.

A glance at the map raises some immediate concerns.

1. An official trail for motorized traffic encourages more users. If that trail is in or anywhere near a meadow, there will always be more off-trail traffic. There has been little or no control over such off-trail traffic, which always produces serious habitat damage, as we see near the rifle range and over on Douglas (for example). ATV ruts last for years. The ground cover is shredded; more mud holes develop. Avian nesting habitat (e.g., for greater yellowlegs) is wrecked. Low-bush blueberry bushes are thrashed, reducing the berry crop (for birds, bears, and humans). It would be a downright shame to ruin Spaulding Meadows!
2. There already exist several unauthorized bushwhack routes between Spaulding and Montana Creek. If motorized traffic on Spaulding increases, it is a sure thing that some of those vehicles would use the bushwhack routes down to Montana Creek. That would seriously degrade the recreational values of Montana Creek for skiers, snowshoes, and hikers, which must be protected. It also increases the risk of damage to the creek itself, from erosion of the slopes etc., which would impair the fish runs and the fishing opportunities for bears and humans. Note: the slopes of Montana Creek valley are demonstrably unstable in some places now, and more can be expected.
3. For these reasons, I am asking that the master plan include effective measures to control habitat damage in the meadows and prevent access to Montana Creek. No master plan for this (or any other) area can be complete without explicit consideration of the ecological values of the area and how to prevent/reduce damage to them.

Hello,

I'm enthusiastic to support the planning process and the comments of the Juneau Nordic Ski Club Board. We are fortunate to have a group of community members putting time and effort into maintaining current trails and give input for future development. I have greatly enjoyed nordic skiing in recent years and look forward to future enhancements to our trail system. Thank you for your work on this plan!

Dear Michele and other agencies,

Our comments regarding the preliminary master plan maps are in the attached PDF.

We wish to thank CBJ P&R and the other management agencies for their willingness to work with JNSC and other groups to produce a final master plan.

We would really enjoy discussing our ideas in more detail once you and others have had a chance to review our comments. Perhaps we can arrange a video conference?

Thank you again for your work towards development of a master plan and for including us in the process.

Roman Motyka, on behalf of the JNSC Nordic Trails Subcommittee

General Comments

The Juneau Nordic Ski Club (JNSC) would like to thank Michele Elfers and CBJ P&R for their efforts in coordinating development of a “Master Plan” for the Montana Creek watershed and for getting the ball rolling by hosting the Aug 10 2022 and other meetings. We would also like to thank CBJ P& R and the other management agencies for their willingness to work with JNSC and other groups to produce the plan.

CBJ (and the other management agencies) presented a preliminary “plan” at the Aug 10th meeting in the form of two maps. We view these maps as preliminary concepts rather than constituting an actual plan. Currently, the online video of the meeting and slides are the only background information regarding the maps that is currently available. Without supporting narrative and background information, it is difficult for us to know who or which agency proposed a specific trail, cabin, parking area etc. and the rationale behind the choices. However, based on email exchanges with Michele Elfers, we understand that the intent of management agencies is obtain comments on the preliminary maps from interested parties, which would then be used as part of an iterative process to formulate the eventual master plan. In that spirit, JNSC is pleased to offer its comments and advice on the “plan” and hope that they will be considered and incorporated. Because the master plan maps lack any supportive materials, we found that we needed to ask numerous questions and make comments to help clarify issues.

We divided our specific comments into two categories:

1. Trails
2. Additional Comments and Issues

Trails

1. Trails in general:

It is not entirely clear from the current “master plan” map and information thus far provided which trails are winter only vs. year-round, particularly the Spaulding Meadows access trails and the John Muir to Peterson Lake trail. The plan also has to make a distinction between “ski-touring” trails and Nordic ski trails. The distinction is discussed in our “JNSC Nordic Ski Trail Development Plan for Juneau, Alaska”:

NORDIC SKIING is defined as free-heel skiing on trails that have been groomed for classic tracked and skate skiing techniques.

SKI-TOURING is typically over ungroomed slopes using wider, often metal-edged skis.

We provide parameters and specifications for construction of Nordic ski trails in the appendix accompanying our comments.

2. Montana Creek and McGuinness Valley Nordic skiing/hiking/biking trails

The CBJ MP map shows a pink dashed line parallel to Montana Creek as well as another line as a connector to the MGRA. We presume these are “placeholders” for the actual design of the Nordic/multi-user non-motorized trails. We applaud the inclusion of these trails on the preliminary maps. In Figures 1 and 2, we show the JNSC vision for layout of these trails in much more detail and request that our trail routes be the ones included in the master plan.

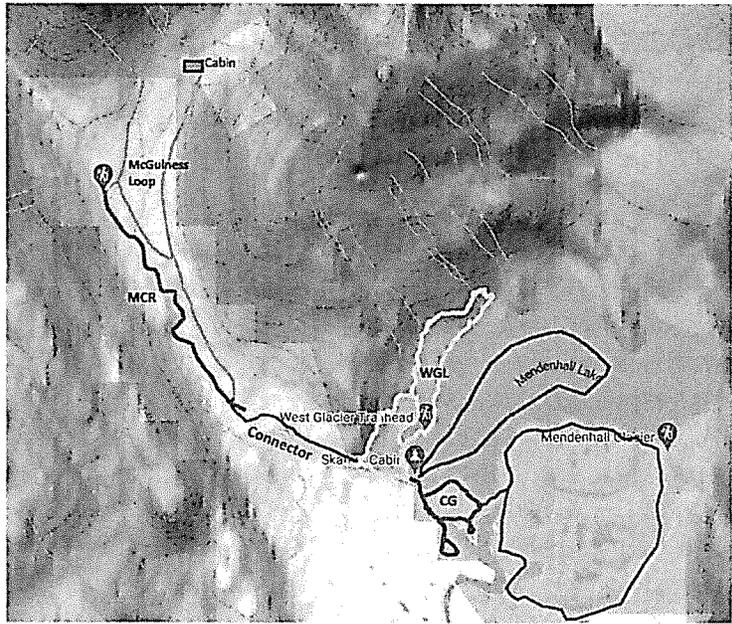

Figure 1. Current Montana Creek groomed trail (MCR, red). Also shown are several proposed additions and connector trails (yellow). WGL = West Glacier Loop (yellow); MMSC = MMS connector trail (black); and MV = McGuinness Valley loop trail (orange) (adopted from the JNSC Trails Development Plan).

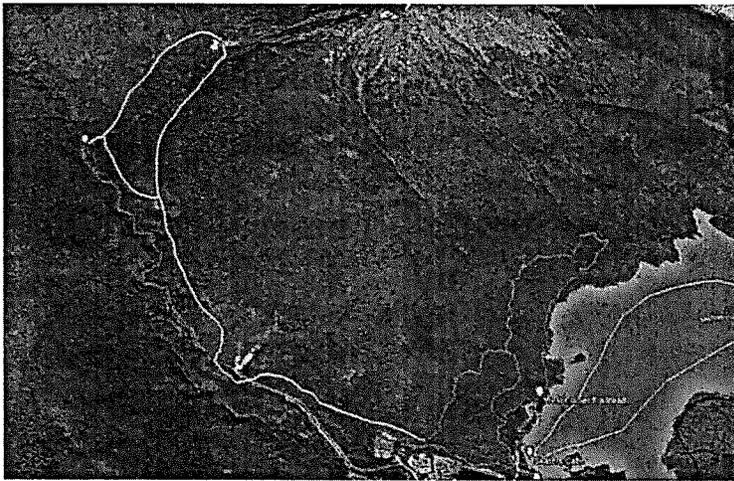

Figure 2. Similar to Figure 1 but using Google Earth satellite image as background and also showing location of a recreational cabin in McGuinness Valley.

In the Aug 10 video narration, “loop” trails were held up as being particularly attractive features for trail development. The trail system depicted in Figures 1 and 2 offer multiple different loops: a) the McGuinness Valley loop; b) the Montana Creek loop, combining trails on either side of the river; and c) the entire Montana Creek – McGuinness Valley loop. These loops and trails would have great appeal for skiers, hikers, and bikers and also provide access for ski touring and ski mountaineering in the upper McGuinness Valley. We insist that the added trails be for non-motorized users only!

Figure 2 also shows the potential location of a recreational use cabin in the valley. The desirability of such cabins was emphasized in the Aug 10 meeting and this would be a perfect location for one, either on USFS land or adjacent CBJ land.

The construction of the Montana Creek and McGuinness Valley Nordic loop ski trails can be staged over time with the eastside trail parallel to Montana Creek given a five-year goal of achievement and the McGuinness Valley loop and recreational cabin designated as part of a ten-year goal for the plan.

3. Interconnect between MGRA and Montana Creek Trail Systems

Such a connection is integral to the JNSC Nordic Ski Trail Development Plan. We are encouraged that both of the CBJ MP maps show an interconnect to the MGRA trail system, similar to what was presented in the JNSC trail plan. Figures 1 and 2 show the potential location of such a trail in much more detail (Figure 1, black; shown as orange in Figure 2). We suggest development of this interconnect be given highest priority as most of it occurs on CBJ land, with construction commencing within the next two years following plan approval.

4. Montana Creek to Windfall Lake Trail Upgrade

Restoration and upgrading of the Montana Creek to Windfall Lake primitive trail was proposed by the USFS during informal conversations with JNSC last winter. The improved trail would potentially add ~ 8 – 10 km to the Montana Creek system (Fig. 3). Trail restoration could qualify for GAOA funding if this program is renewed. JNSC requests that upgrading of this trail be included in the plan and that it be designated non-motorized.

5. Spaulding Meadows Nordic Trails

Development of a Nordic Trail system in the Spaulding Meadows non-motorized sector (as shown in Figures 3 and 4) is the key feature in the ten-year goals of the JNSC trail plan. It is therefore disappointing that this trail system was not included in the preliminary CBJ M Cr MP maps. As explained in the JNSC trail plan, development of this trail system is a key component in providing Nordic skiing opportunities as climate change and regional warming intensify. JNSC requests that the trails outlined in Figures 3 and 4 (yellow) be included in the next iteration of the M Cr MP.

Another priority is to develop a road to Spaulding Meadows that would create a trailhead at higher elevation, approximately ~ 400-460 m (~1300 to 1500 ft), where snow falls earlier and remains longer (Fig. 3). JNSC sees construction of a road to Spaulding Meadows as an important opportunity for maintaining accessible Nordic ski trails for the general public as climate change continues. JNSC seeks to partner with the Juneau Snowmobile Club to make this improved access and equity to Spaulding Meadows a reality for both user groups.

6. Auke Mountain Loop

This 5-mile (8 km) Nordic ski loop trail would venture from the Spaulding Meadows loop past the John Muir Cabin to the base of Auke Mountain and return (Figures 3 and 4, cyan). The trail would traverse beautiful rolling meadows and would appeal to more advanced Nordic skiers and should be included as part of the plan's ten-year goals, perhaps first as a classic trail and eventually widened for skate skiing depending on demand.

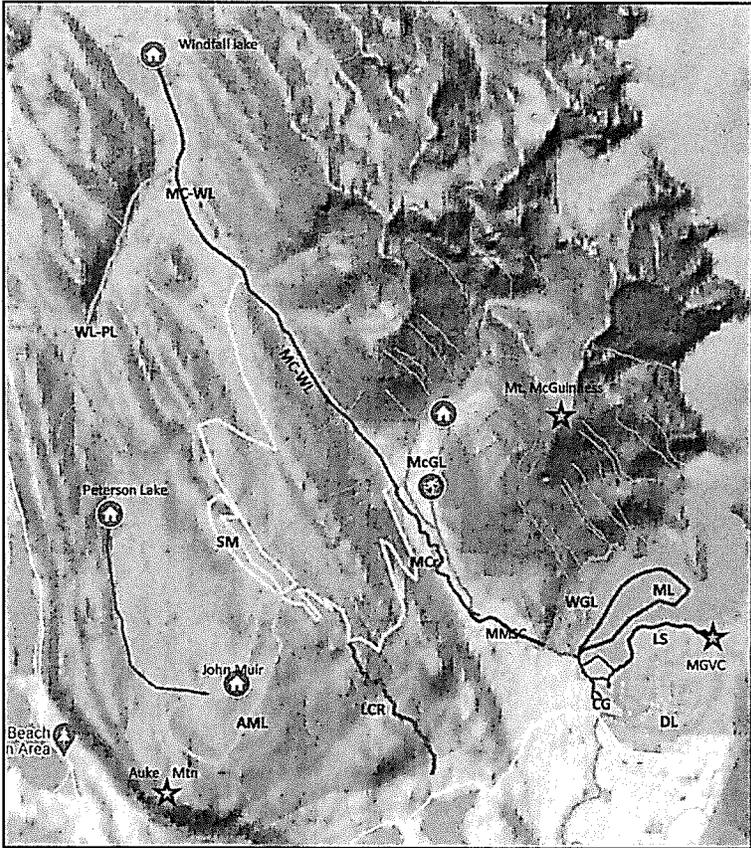

Figure 3. Mendenhall – Montana Creek – Spaulding Meadows Intertie (MMS) proposed Nordic trails: Spaulding Meadows (SM, yellow) and interconnects to Montana Creek; Auke Mountain loop (AML; cyan); connector to Windfall Lake (MC-WL, purple); Lake Creek Road access (LCR, magenta); Windfall Lake to Peterson Lake connector (WL-PL, orange). MGRA trails and other connectors also shown. Together, these trails would constitute the Mendenhall – Montana Creek – Spaulding Meadows Intertie (MMS), a world-class trail system for Nordic skiing and hiking. (Adopted from the JNSC Nordic Ski Trails Development Plan.)

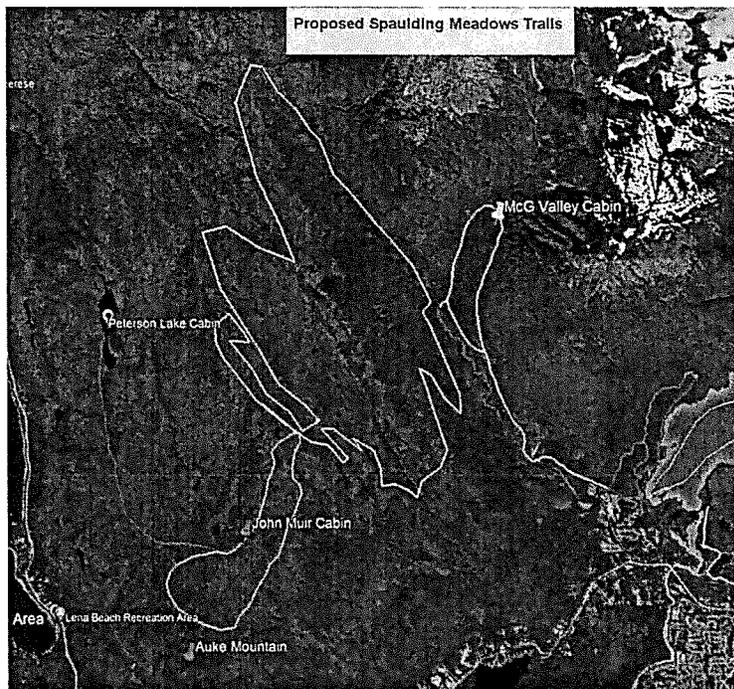

Figure 4. Spaulding Meadows Nordic ski trail system on Google Earth satellite image.

7. Peterson Lake – Muir Cabin trail

JNSC supports inclusion of this winter ski and snowshoe spur trail as shown on the master plan maps. We include it in Figures 3 and 4 (magenta) as an extension of our proposed Auke Mountain Loop. The trail to Peterson Lake is already marked and periodically used by the ski-touring community. Better signage and trail development would make this option of cabin to cabin skiing even more attractive. However, JNSC wants to emphasize that the leg to Peterson Lake is a “ski-touring” trail and not a trail we would normally groom for Nordic skiing.

8. 25-mile Trail

We are curious who proposed this motorized/ “multi-use” trail? We view this new trail with deep apprehension! The video presentation was confusing: is this solely a winter trail or is it intended for summer use also? Please clarify. Safety on such a trail if constructed would be a critical issue. Will there be speed limits and trail signage? Who will police activity on this trail?

Additional Comments and Issues

1. Summer Map Needed

JNSC requests that the management agencies provide a summer map for the watershed plan in order to clarify issues about trail use, cabin access, and parking. Which trails will be hardened for summer use and which will be winter only? The region is heavily used in the summer as well as winter and deserves to be included in the master plan process.

2. Parking

Parking at trailheads has been an issue for some time. We agree with expansion of the John Muir and Auke Nu trailhead parking as this lot often experiences overflow. **We vehemently oppose the location of the Montana Creek trailhead parking zone as shown on the M Cr MP maps!** We hope that this was an oversight of the management agencies when making the maps, unless this lot is intended for summer use only.

The steep icy hill would pose a significant challenge to automobile traffic and for snow plowing in the winter. Its location would also cut off the first ½ km of the current M Cr Nordic ski trail.

Parking for winter use of the Nordic ski trails should be located near the current winter lot. Plans are already underway to expand the parking in this area. The map and plan should include this additional parking, projected to be developed this fall.

Lake Creek parking (see also number 4 under “Trails” above): the proposed Lake Creek Road should be at the ~ 400 – 450 m (1300 – 1500 ft) elevation with adequate parking for both motorized and non-motorized users. The location shown on the draft map is too low in elevation for Nordic skier access.

3. Bridges

JNSC is aware that development of Nordic/ biking / hiking trails in the Montana Creek and McGuiness Valley area will require river crossings. These bridges should be wide enough to accommodate Nordic trail grooming equipment (see appendix and/or the JNSC Nordic Trails Development Plan for details). In general, trail and bridge width should be 10 – 14 ft.

An ongoing concern is to find a permanent solution to the Montana Creek trail bridge at the summer trailhead. This bridge is vital to Nordic ski winter grooming operations. The bridge has become increasingly subject to damaging floods, most recently this past August. JNSC has helped with repairing and reinforcing the bridge in past and has volunteered to do so again this fall. **JNSC recommends that replacement of this bridge with a stronger, more permanent bridge be among the highest priorities in the draft plan.**

4. Agencies and Land Management

Land ownership: we have multi-agencies to deal with. Can DNR and DOT transfer responsibility to CBJ so that only two agencies are overseeing area management? Four different government agencies have land ownership in the plan area with the USFS having the largest. JNSC recommends that DNR cede their lands in the plan area to CBJ and likewise, DOTPF transfer responsibility for the bridge and road to CBJ. CBJ should then add this acreage to the designated Montana Creek Natural Area and take responsibility for management and maintenance.

5. Expertise for Nordic Trail design and construction

JNSC recommends that CBJ P&R and/or Trail Mix contract expertise for Nordic trail design and construction (see Appendix for details on standards)

6. Construction, Maintenance, Signage and Policing

The draft plan needs to spell out in detail 1) plans for obtaining funding for construction of trails, cabins and parking areas, 2) agency responsible for construction and maintenance of each trail, 3) the

regulations governing the use of the trails and cabins, particularly trails designated as motorized/multi-user. Will there be speed limits posted on the 25-mile trail and the Spaulding Meadows access trails?

We presume that Trail Mix will be the primary partner that will work with CBJ, USFS, and the other agencies for constructing trails. We ask that Trail Mix and the management agencies engage a professional expert for designing and constructing the Nordic ski trails included in the plan. JNSC will want to be directly involved in this process.

Our club has a membership base that is very willing to devote hours of volunteer time to make a Nordic Trail system a reality. We note that JNSC has already devoted hundreds of hours of volunteer time in repairing the Montana Creek trail from landslide damage and debris as well as doing work on stabilizing the bridge. Our volunteers have also worked many hours to maintain the Pioneer Road on North Douglas.

7. Cabin locations

The draft plan/map shows two new cabins located in the Spaulding Meadows area on 25-mile trail and which border the motorized and non-motorized regions. The location of the proposed new cabins will favor dominance by the over-snow motorized community in the winter as has happened with the Dan Moller cabin. We recommend moving at least one of the cabins to the non-motorized sector or instead, preferably, build a new cabin in the McGuinness Valley as shown in Figures 1 and 2.

We also advocate for the addition of warming shelters on the trail system, locations to be decided.

8. Motorized vs. Non-motorized Areas

For over thirty years JNSC has been a staunch advocate for Nordic skiing and for construction of non-motorized trails to support wintertime enjoyment of the Montana Creek Watershed. However, the allowance of winter-time motorized use of the Montana Creek trail has increased the likelihood of potentially dangerous encounters on that narrow and winding trail. The effects of motorized use are two-fold: the first is safety issues between skiers and ATVs on a narrow, winding trail; the second is rutting of the groomed trail that requires additional grooming to smooth ruts before being safe for skiers. We therefore request that any new Nordic ski trails, such as the McGuinness Valley loops, be designated for non-motorized use.

In support of this request we draw attention to the results of the survey commissioned by CBJ P&R, which showed that respondents preferred non-motorized to motorized use of the region by over a 2:1 margin (see slide 9, CBJ master plan website)! “Wilderness experience”, “Snow”, and “Quiet” all far out-weighted any other values. Thus, CBJ’s own survey shows the strong preference for non-motorized use of the area.

We also point out the gross inequity in acreage allotted to over-snow motorized use vs. non-motorized regions in the Montana Creek watershed. How was this boundary defined and what is its legal basis? How can we access the documents used to define this boundary?

The current non-motorized portion of Spaulding Meadows useable for groomed Nordic ski trails (non-treed and relatively flat meadow) to 70 and 120 acres compared to the 1400 to 1700 acres of main meadow allotted to motorized use. The non-motorized part of the main meadow is a tiny sliver of one

side. We are not willing to sacrifice as much as 95% of Spaulding Meadows to motorized use, which would severely limit Nordic skiing.

In summary, we recommend the plan specifically ask for expansion of the non-motorized region in Spaulding Meadows and, wherever necessary, construct separate trails for motorized vs. non-motorized users.

9. Prioritization

- 1) The top priority should be to define and publish a roadmap for completion of the Master Plan process, complete with supporting materials and background information. The roadmap should also include timelines, approximate dates for public meetings and comment periods, and most importantly, who will make the decisions on what to include and exclude from the plan, and what the decision process will be based on.
- 2) Identify potential funding opportunities for development of trails, cabins, and infrastructure.
- 3) Add additional parking at rifle range for winter users.
- 4) Find permanent solution to Montana Creek Bridge.
- 5) Nordic Trails five-year goals:
 - a. Obtain Right-of-way and begin construction of the interconnect trail between MGRA and Montana Creek system.
 - b. Construct new non-motorized Nordic / hiking / biking trail on the east side of Montana Creek with a bridge across the creek to connect to the current end of the Montana Creek Nordic ski trail.
 - c. Construct the McGuinness Valley Nordic Trail loop with connections to the Montana Creek system.
 - d. Construct a recreational cabin in the McGuinness Valley
- 6) Nordic Trails ten-year goals:
 - a. Upgrade the Montana Creek to Windfall Lake trail to Nordic ski standards.
 - b. Construct the Lake Creek road providing access to Spaulding Meadows.
 - c. Construct the Spaulding Meadows Nordic Loop trail system.
 - d. Construct the Auke Mountain loop trail.
 - e. Construct an additional recreation cabin and warming shelters.

APPENDIX

For general layout and construction specifications of Nordic ski trails, an example of guidance comes from Northern Arizona University, which cites the manual, "Recreational Trail Design and Construction," developed by the Minnesota Extension Service of the University of Minnesota. It emphasizes the following aspects of recreational Nordic trail layout and construction:

1. Trail layout and length – The trail system should comprise loops with internal connectors and cutoffs that allow the skier discretion in how long to ski. Loop lengths should range from 5 to 15 km with a beginner’s loop of about 1 km. Minimum clearing widths should range between 3 and 5 meters, depending on what type of skiing is accommodated and whether a steep section would require herringbone technique uphill or turns downhill. Grades should usually be less than 5% rise over run for general skiing with occasional sustained pitches of 10% and short (less-than-50-m) pitches of up to 25%.
2. Trail construction – Trails should be smooth enough and free from protrusions to accommodate grooming when snow depth reaches 0.3 m. Trails should have gentle curves, especially avoiding sharp turns at the bottom of downhills. Bridges should accommodate the width and weight of grooming and maintenance equipment.
3. Other considerations – Nordic and cross-country ski trails are considered compatible with winter snowshoeing and summer hiking and bicycling. They are considered to be incompatible with snowmobiling and wheeled traffic. Nordic and cross-country skiing venues should have adequate parking areas, rest areas for skiers, shelters every 15 to 20 km, and appropriate signage.

EXTERNAL E-MAIL: BE CAUTIOUS WHEN OPENING FILES OR FOLLOWING LINKS

1. Any time you allow motorized and non-motorized equipment to mix, you create a serious safety hazard and issues with law suits. Skis are fragile and if motorized equipment runs over it, it is permanently damaged and there is no license plate for the off-road equipment, nor is there an insurance requirement. Extracting dead or injured persons from these areas will raise costs for the Fire Department, cause damage to the trails, and negatively impact the lives of people and families in Juneau.

2. Bicycles and pedestrians are also a bad mix, as has been well established. Smart cities separate bicyclists from pedestrians, many of which are pushing baby strollers. That being said, winter bicycles on ski trails are an accident waiting to happen. Bicycles are great but they have other places to ride than the ski trails. Lets keep them off the ski trails. Its too dangers and there is also the high likelihood for equipment damage. Skis can easily cost \$1000 and bicycles can cost between \$800 and \$10,000. Lets not build an accident with these new plans.

3. Lastly, this is supposed to be a "recreation" area and there are lungs at work. The emissions from off-road equipment creates very, very dirty air for people trying to use "recreation" to live a healthier life. Montana Creek is wonderful because the temperature inversions hold down the cold air allowing skiing until May. The flip side is that this inversion also holds down the the air pollutants. The problem with snowmobile emissions was so bad at Yellow Stone Park that rangers had to wear masks. The problem is so bad in the Fairbanks winter that it's air is amongst the worst in the nation, worse that some of our biggest cities like L.A. The problem is so bad in the Juneau Valley that there are burn bans. It is far worse in the Montana Creek area where the temperature inversion, which keeps all this snow, is on steroids. Requiring all off road equipment to use 4-stroke engines will somewhat mitigate the problem. However, you will still be inviting highly unhealthy air into a "recreation" area for people who are trying to live healthy and trying keep strong against COVID or the next pandemic.

Please increase the number of ski opportunities presented in the Montana Creek master plan.

This is the second time I have lived in Juneau and the increase in cross country skiing opportunities has been fantastic. This new opportunity will continue that growth in skiing through extremely low impact to environment that enhances community linkages and promotes healthy lifestyles. Thanks you for the opportunity to comment.

Hi,

I am writing today on behalf of the Juneau Snowmobile club. After reviewing the Montana Creek Master plan and being involved with most of the meetings on this topic I wanted to comment on how well this Plan was drafted and that we are in support of this Master plan draft. We as a Club are very supportive of adding cabins to the Spaulding Meadows area , access to 25 mile, and adding a new parking lot at the lake creek trailhead area for better Snow access during the winter months. Our Club is also very supportive of all these other ideas as well since we believe that the Montana Creek area should be open to all user groups through out the year. Thank you for taking the time and energy in drafting this Master plan and getting all the groups together for discussing in this process. Thanks

Dear CBJ Parks & Rec,

I am writing in support of the Juneau Nordic Ski Club's response to the draft Montana Creek Master Plan. Please increase the number of ski opportunities presented in the Montana Creek master plan. As an avid (though not particularly skilled!) cross-country skier, I use many of our local ski trails weekly on average, though normally at least twice a week in a good snow year. Montana Creek is a family favorite, and it would be great to see it expand in a way that is safe for skiers and environmentally responsible, while opening up trails to additional outdoor uses and users.

Thank you for your consideration of the JNSC's comments.

Please increase the number of ski opportunities presented in the Montana Creek master plan.

I support what the JNSC Board is advocating for:

- Trails built wide enough to accommodate ski grooming equipment;
- New Nordic skiing/hiking/biking trails developed in the Montana Creek and McGinissValley;
- Upgrading the Montana Creek to Windfall Lake trail to accommodate ski grooming in the winter;
- Enhanced/new ski trails and routes in Spaulding Meadow;
- Interconnected trails linking the Mendenhall Campground and West Glacier area to the Montana Creek valley on up to Spaulding Meadow.

Thanks for the opportunity to comment.

Hello--

Thank you for the work you are doing on the Montana Creek Master Plan. I am writing with support for including

- 1) developing new Nordic skiing/hiking/biking trails in the Montana Creek and McGuinness Valley area
- 2) upgrading the Montana Creek to Windfall Lake trail so that it could accommodate ski grooming in the winter
- 3) building trails wide enough to allow for ski grooming equipment
- 4) making new and improved ski trails and routes in Spaulding Meadow
and
- 5) linking trails from the Montana Creek/Spaulding area to the Mendenhall Campground/West Glacier area.

Thank you so much for helping us increase our winter activity access and ensure access for all sports!

Best,
Megan

Thank you for the opportunity to comment on the draft "Master Plan for Montana Creek." The maps presented are not supported by any narrative material, and can be difficult to interpret. However, they do provide some general concepts which I think have merit.

1. Connector trail to MGRA trails. This should be a top priority. It would greatly extend the amount of groomed trails by linking existing maintained trails.

2. Hike/bike/ski connector Montana Creek to Spaulding Meadows. This would be a great addition to connect current ski areas. There is a second possibility for this route, as proposed by JNSC. That is to make this a road for motorized access to a higher elevation parking lot. This would provide equitable access for both skiers to the non-motorized portion of Spaulding Meadows and for motorized users in the motorized portion of the Meadows. Given the inexorable effects of climate change, having another higher-elevation trailhead besides Eaglecrest would help assure access to winter recreation opportunities without long hikes.

3. Upgrade Montana Creek to Windfall Lake Trail so that it can be groomed for Nordic skiing. Designate the section from Montana Creek to the intersection with Spaulding Meadows (where the trail starts to drop into the Windfall drainage) for non-motorized use. With the development of access from 25 mile and access from Lake Creek, motorized users will have additional opportunity to access the Meadows and link to the existing trail to Windfall Lake cabin. Making the Montana Creek trail non-motorized would resolve the current incompatible winter use of the trail, one of the few places that hold snow and can be groomed for Nordic skiing at lower elevations.

I hope these brief comments are useful, I look forward to seeing the next iteration of the plan.

Dear Michele Elfers,

Thank you very much for taking the time to study and plan for the future of Montana Creek! That area is an integral part of what makes Juneau such a wonderful place to live and recreate. As you know, consistent snowfall will continue to be less reliable and access to Montana Creek and Spaulding Meadows will only become more important to those of us who enjoy recreating outside in Juneau. So thanks for taking the time and effort to try to get it right!

The previous comment period that CBJ conducted concluded that the Juneau public prefers non-motorized use by a margin of over 2:1. I believe both user groups have a right to the area and that Parks & Rec can find a way to allow both motorized and non-motorized users to enjoy separate parts of Montana Creek. That said, the public clearly prefers non-motorized trails and I think Montana Creek should be developed with that in mind. I ski at least 5 days a week in the winter and our nordic trails and parking lots are at capacity. We've been lucky with a few snowy years lately, but we can't rely on snow to sea level on a regular basis. I fully support the Juneau Nordic Ski Club's stance and comments on the Master Plan. My personal favorite ideas are listed below:

- The construction of Lake Creek Road. The parking area should be at the highest elevation possible.
- Construction of the McGuinness Valley Trail (non-motorized) and McGuinness Valley Cabin. Backcountry skiing and climbing on the Juneau Icefield is world renowned, but accessing it is very challenging. Access is getting harder and more dangerous every year as the Mendenhall Glacier retreats. A trail and cabin in the McGuinness Valley would be a world-class asset to our community!
- Connecting the current Montana Creek trail system to the Mendenhall Glacier trails.

Thanks for asking the public for their opinions and taking the time to listen. I'm excited and hopeful for the future of Spaulding Meadows and Montana Creek!

Here are my thoughts on the Montana Creek master plan. I have commented before and my ideas have not changed. I believe this area should be free of any form of recreational motorized use, other than the controlled ski trail grooming by the Juneau Nordic Ski Club. Motorized vehicles hurt and destroy wilderness areas, plain and simple. The Montana Creek area is a classic wetland and rainforest environment and the presence of motorized vehicles at any time of the year can cause great damage to this fragile area. If so-called boundaries are established between motorized and non-motorized use, I can guarantee you that the motorized users will not respect those boundaries, as evidenced by the transgressions that happen every year in the Spaulding Meadows area. I have seen this happen again and again since I first started skiing and hiking in that area in the early 1970s. The losers are the hikers, skiers, fishermen, mountain bikers, berry-pickers, and bird-watchers who are the very people that Parks and Recreation should be thinking of and planning for.

Respectfully,
Betsy Fischer
Juneau resident since 1972

As a frequent nordic skier who uses the Montana Creek trail and Mendenhall Campground ski areas that are groomed by the Nordic Ski Club, I would like to comment on the proposed plan. Please increase the number of ski opportunities presented in the Montana Creek master plan.

Expand the trails so they are wide enough to accommodate ski grooming equipment.

Build new Nordic skiing/hiking/biking trails in the Montana Creek area and the McGuinness valley.

Upgrade the Montana Creek to Windfall Lake trail to accommodate ski grooming in the winter, right now we can only ski 3 kilometers out and 3 back, it would be great to get a longer ski in on that trail.

Enhance the present trail and build new ski trails and routes in Spaulding Meadow.

Interconnect trails linking the Mendenhall Campground and West Glacier are to the Montana Creek valley on up to Spaulding Meadow.

Along with this increased access to trails, it would also be good to increase the parking availability.

Thanks

CBJ Parks and Recreation Board & staff,

We are long-time alpine & Nordic skiers of our town. We have enjoyed skiing since our youth growing up here. We saw the hard work of many volunteers that made alpine and Nordic skiing possible for us and many others. We feel so lucky to have had such wonderful wintertime outdoor ski opportunities.

Volunteering to support skiing has been an ongoing activity for us for over fifty years. This includes supporting young skiers from an early age learning a healthy and fun wintertime activity. Other volunteer efforts that keep us busy are trail maintenance, grooming ski tracks, maintaining grooming equipment plus much more.

We are writing to express our full support for the Nordic ski trail development plan as presented in the current Montana Creek Master Plan. When Montana Creek became organized with consistently groomed cross-country ski trails veteran and new skiers could enjoy perfectly groomed ski trails. More and more people discovered the benefits of gliding on snow.

With a bigger population of Nordic skiers we need more ski trails and parking areas. We support new trails built wide enough for ski grooming equipment.

Thanks for all the work the CBJ Parks and Recreation staff has put into the Montana Creek Master Plan.

Sincerely yours,

Donald & Christine Thomas

Hello,

I am in support of all aspects of the master plan and proposed improvements as long as they do not limit motorized use to this area. Constructing Cabins along the montana creek trail for summer and winter multi use activities (motorized and non-motorized) is a great idea and i suspect they will get great usage rates. It will also provide an economic benefit to Juneau's contractors. I also support the parking pad expansion at the Lake Creek Trailhead and construction of additional access into the recreation area.

All efforts to increase all uses in the area have my support. I do not support giving preference to one user or another, uses should be balanced not discriminatory.

Thanks,
Garrett Paul

CBJ Parks and Recreation-

Access to safe hiking and Nordic ski trails is one of the best aspects of living in Juneau! As a moderate level, active senior, I love the idea that CBJ parks and rec are developing plans for new Nordic skiing/hiking/biking trails in the Montana Creek and McGuiness Valley.

Please consider EXPANDING the Nordic trail systems in your plans. I am very much in favor of: 1) your upgrading the Montana Creek to Windfall Lake trails to accommodate ski grooming in the winter; 2) creating enhanced/new ski trails and well marked routes in Spaulding Meadow; 3) your development of interconnected trails linking the Mendenhall Campground and West Glacier area to Montana Creek valley and on up to Spaulding Meadow. It's important for my safe usage of these trails, that they are built wide enough to accommodate ski grooming equipment.

My husband and I moved to Juneau from Sitka, and although the Sitka Trail Works have developed some amazing hiking trails, sadly Sitka has never had enough snow for much Nordic skiing. Winter in Juneau has been a true wonderland for us and for our adult daughter. I urge the CBJ Parks and Recreation department to move forward with your plans to enhance ski opportunities in the Spaulding Meadow and Montana Creek Valley drainage areas. Please consider expanding and increasing the proposed Nordic ski trail development as presented in your current draft of the Montana Creek Master Plan. Additional trails will enhance the experience and opportunities for skiers at all ability levels, benefit multi-season/multi-sport users, alleviate congestion, user conflict, and support healthy lifestyles in Juneau.

Thank you very much for your hard work and dedication to providing multi-user solutions for Juneau. It's crucial that non-motorized trails be developed and linked together without interference and destruction from motorized users. Likewise, motorized users need their own roads where they can recreate without worries of running into skiers/hikers. Providing recreational cabins for each group (one for motorized and one for non-motorized only) within their respective road/trails networks would be great! Thank you again for making concerted efforts to work with a consortium of user groups and other interested parties.

Sincerely,
Kristy K.Totten

EXTERNAL E-MAIL: BE CAUTIOUS WHEN OPENING FILES OR FOLLOWING LINKS

Michele,

Excellent presentation. Thanks for taking the time to research all of the info required for a project of this scope. I noticed that a map of spring/summer use was not shared, and was hoping there are some options for OHV (jeep, Atv, side by side) use.

On that note,

Can we look into creating/allowing access to SOA land via CBJ parks lands for OHV use?

1. Can we look at using existing driveway access for Aant'iyek Park to create OHV access next-door to SOA-DNR lands?
2. Can we also look at allowing OHV access to Windfall lake road to access SOA-DNR lands?
3. And finally can we look into expanded use of 25-mile road OHV use? (I believe this is federal lands?) To include jeeps and side-by sides?

From my observations these areas are underused due to lack of access, and therefor lack issues from other user groups.

Plus continue to include me in the planing process. As I would like to continue to advocate for OHV use opportunities, that will allow for Juneau's Residents to further expand their outdoor entertainment options through out the borough. Along with providing responsible options for our youth to enjoy the outdoors.

Thank you,

Noah Lager

Subject: Montana Creek Public Use Cabins

EXTERNAL E-MAIL: BE CAUTIOUS WHEN OPENING FILES OR FOLLOWING LINKS

Trail Mix has taken the stand of "the more cabins the better." I am a member of Trail Mix and I disagree, we have enough cabins. More is not better, less is more and more is less. Cabins are popular right now due to COVID Cabin Fever. That fad will end about the time you build all those eye-sore cabins.

Existing cabins cost \$60 per night and the price is only going up. They are no longer a getaway for those on a budget.

Moreover, a cabin might be nice for the wealthy elite that use them, but they take away from the entire remote experience that is truly Alaska. We don't have to have a cabin everywhere we go. That is what Air BnB is for. We don't need an elevator going up to Mt. Denali or a cable car taking us down the Grand Canyon. Lets leave some wilderness please. Foggy Mountain, Nugget Outfitters, and Sportsman's Warehouse will all happily sell you quality tents and sleeping bags. Shopping at those stores will support the local economy better than government overspending. Enough with the cabin sprawl already.

Most sincerely,

Paul Khera

Subject: Montana Creek watershed proposed motor vehicle use

EXTERNAL E-MAIL: BE CAUTIOUS WHEN OPENING FILES OR FOLLOWING LINKS

Dear planning committee:

I would like to suggest that motorized vehicle use never occur on the same trail as generally used for hiking and cross country skiing.

I have lived here long enough to remember the motorized use of dredge lake trails. The narrow trails and motorized vehicles & cross country skiers was recognized as a very dangerous situation.

If more motorized trails are proposed, please make sure that there is no possibility of accidents between motor riders and walkers or skiers.

Also, the present trail along Montana Creek is a very important route for brown bears to reach good fishing areas from Peterson Creek to Montana Creek. Brown bears also need protection from motorized vehicles on narrow trails.

Thank you,
Brenda Wright

Subject: Public Comment - Montana Creek Master Plan

EXTERNAL E-MAIL: BE CAUTIOUS WHEN OPENING FILES OR FOLLOWING LINKS

To whom it may concern:

I would like to add my comments as an almost 30 year resident of the West Glacier area and a several times a week user (walking, skiing, running, hiking) of the Montana Creek, Mendenhall Campground, West Glacier trail area year round. I'm a 60+ year old nurse, mother and grandmother who walks/skis these trails almost daily with family and friends as both a social outing and a way to exercise.

I highly value the ability to step out our door and exercise in nature, the benefits which are well documented. Prioritizing opportunities for our citizens to do just that are innumerable. Depression is the leading cause of disability worldwide and is a major contributor to the overall burden of disease. Scientific studies have shown that "green exercise" can improve self-esteem and mood, as well as reducing anxiety disorders and depression. By comparing different exercise settings, studies showed that regular use of woods or parks for physical exercise reduced the risk of poor mental health, whereas no such pattern was found in non-natural settings like gyms.

My observations on motorized versus non-motorized users on both the Mendenhall Lake in the winter and Montana Creek trail is that one might encounter 1 - 2 motorized users a week compared to the constant flow of folks sharing the trails, out for a ski or walk/jog/hike. The occasional motorized user fills the air with exhaust, shatters the calm and causes one to fear for their safety on narrow trails. It is also very distressing to see them tear up a carefully groomed ski trail that hours of volunteer labor go into maintaining and are enjoyed by hundreds of our citizens. It is also distressing to see the destruction to the landscape. Just take a look at the area just beyond the Rifle Range before you drop down the hill to Montana Creek bridge. The beautiful muskeg has been rutted and turned into a muddy bog as a result of motorized users ripping around. That is what is visible from the road. I cringe to think of what would happen to the habitat if you expand access to motorized vehicles in the Spaulding Meadow area. Who will be up there to make sure they remain on the 25 mile road that is being proposed? I've seen 4-wheelers coming up the Montana Creek trail and then just shoot off the trail up the hillside tearing up everything in their path, making their own trail if you will. Do you seriously think they will remain sedately on the designated trail? They don't now, why would they if you open up more access for motorized use.

I agree with all the points brought forth by the Juneau Nordic Ski Club (JNSC) in their comments and would like to particularly comment on your proposed expansion of the parking for year round use at the bottom of the Montana Creek hill just before crossing the bridge to the trail. This parking is fine for the summer and doesn't particularly need expansion (maybe a little improvement). The parking that needs attention is right there at the Hank Harmon Rifle Range. Expanding this space to accommodate the heavy use by skiers in the winter is needed. It makes no sense to move it to the bottom of the icy hill thus removing 1/2 km of groomed trail which includes a nice hill workout. I am well aware of the complaints of the Rifle Range folks and their attempts to claim only Rifle Range users can park inside their gate. Hello, we are all residents of CBJ and in no other CBJ parking lot do we attempt to police who can park there (with the exception of the downtown library parking

garage). My observations during the many years of using this parking area during the winter is that there might be 2 or 3 vehicles at the rifle range parked right up close to where they are shooting. The skiers are parked on the road and just inside the gate. At no time have I witnessed rifle range users being squeezed out of a place to park. One simple solution would be to move their fence/gate closer to the range. This option would still give them plenty of space and allow better use of the remaining space. In the rare event that more parking is needed for rifle range users, they could park outside the fence in the general parking area.

I would also like to add my thumbs up to JNSC comment: "In summary we recommend the plan specifically ask for expansion of the non-motorized region in Spaulding Meadows and, wherever necessary, construct separate trails for motorized vs. non-motorized users."

Expanding the access for your citizens to get out and exercise in our beautiful land is an investment with incredible returns for the health and well-being of our people. As we have demonstrated with regular trail grooming for cross country skiing in the winter at Montana Creek, "you build it and they will come". This area is loved for the beautiful skiing along the creek in an area that holds its snow much longer, thus extending the season for such a beneficial sport that you can do on into old age as demonstrated by the many seniors out on the trails. Please continue to expand for non-motorized use and tap into the expertise by partnering with JNSC as you move forward.

Respectfully,

Maureen Hall

Hello,

Thank you for the opportunity to comment on the Montana Creek Master Planning process. This is the first I have heard of the process. My interests are non-consumptive appreciation of nature with the least impact, so hiking, photography, wildlife viewing and birding. I would like to see another planning meeting and I recommend reaching out to Juneau Audubon Society as a potential representative of these perspectives. I have copied them on this email. Another group you might consider reaching out to is the Community Garden, which is in the planning area. I would think you could find out how to contact them through CBJ.

I hope you will gather more input before finalizing any plans.

Best Regards,
Linda Shaw

To whom it may concern. I would like to voice my support for the proposed improvements to the Spaulding meadows / Montana creek trail and cabin system. The more shared use trails and cabins the better. The power sports enthusiasts in Juneau have been sequestered and ignored for years. This would be a great step in reconciliation.

Chargers for EVs at the trail heads and toes (Is there such a thing as a trail toe?) But not just cars and trucks but ev 4 wheelers and snow machines and electric bikes.

There will be grumblers, but it will be a win for all.

JNSC is signed up for a utility version of the Taiga, it is already been in service at ski areas around the west.

Comment on MT Creek draft plan attached

September 10, 2022

Michele Elfers
Deputy Director
CBJ Parks and Recreation Department
155 S. Seward Street - City Hall Rm 218
Juneau, AK 99801

Thank you for the opportunity to comment on the Montana Creek Master Plan.

My main comment is that the Draft Plan does not adequately recognize or describe the extensive habitat degradation and damage due to the use of ATV's in the watershed. Nor does the plan propose any significant measures to halt and restore the habitat damage. In fact, the draft plan appears to provide increased ATV use in the watershed, without any analysis of the damage from existing motorized use or an analysis of the impacts of the additional motorized use and access the draft plan would provide. This contradicts the fact that public comment to date has shown a preference for non-motorized access to motorized access by more than 2 to 1. It makes no sense to propose additional access without dealing with the problems created so far by AV access.

According to the CBJ Powerpoint:

Motorized Uses

Winter- Connects Lake Creek to 25 Mile Road with access to 3 cabins

Summer – Existing use under current regulations on Montana Creek Road, DNR land and 25 Mile Road

This appears to simply maintain the status quo of ATV use and access during summer months. As the Southeast Alaska Watershed Coalition emphasized in its comments dated September 6, **“Existing roads, official trails, and unofficial trails have eliminated habitat and, in many cases, are causing erosion, sedimentation, and altered ground- and surface-water pathways.”** I fail to understand why the CBJ is not specifically addressing this issue.

20 years of habitat damage from ATV use in the watershed clearly shows that A) it is nearly impossible to prevent this illegal and damaging activity through enforcement and B) ATV riders simply cannot be trusted to avoid the habitat damage caused by illegal trail construction, off trail riding, riding in the creek, etc.

My recommendations are:

- Ban ATV use across the bridge across the creek that is currently in disrepair;
- Ban ATV use beyond this bridge;
- Block access to and restore native vegetation on unofficial motorized and non-motorized trails that clearly adversely impact soils, vegetation, or hydrology;
- If necessary work with DNR and USFS to accomplish the 3 measured listed above;
- Obtain a transfer of the DNR land across the bridge to CBJ;
- Replace the existing bridge with a bridge that would allow foot traffic, but not ATV's; and
- Ensure that the winter only trails are not used by ATV's during the summer.

There is no need to provide ATV access to Montana Creek. The area to ride is very limited and does not provide a good riding experience. The development of the ATV park out the road near Cowee Creek will

provide a far better riding experience and reduce or eliminate user conflicts. The city is spending hundreds of hours of staff time and hundreds of thousands of dollars for the ATV park. There should be a formal or informal quid pro quo here. ATV riders get a new park, but they must give up the riding area in Montana Creek.

This is a real opportunity to solve some of the major ATV related habitat damage and user conflicts, but only if CBJ steps up and takes specific measures to stop the damage caused by ATV's in the Montana Creek watershed and specifically links the development of the ATV park out the road with a halt to ATV use in Montana Creek.

Thank you for considering these comments.

Sincerely,

Agency Managers,

I grew up here and as a family we were always active, enjoying outdoor activities year around and I continue to do so.

I fully support the expansion of non motorized trails in the Montana Creek plan and area wide. A self powered sport activity versus a motorized activity are starkly different and they do not mix well.

Thank you.

To Whom It May Concern,

Please consider my comments regarding the Montana Creek Master Plan and current management of the Montana Creek Natural Area.

- The comment period was short, especially at the end of summer, when residents tend to be busy. **I request the period be extended.**
- Moving forward, more stakeholder groups should be engaged. In addition to landholders such as Southeast Alaska Land Trust, it appears that more user groups could be queried. Its my impression that the planning is being driven mostly by only two organized and vocal interests, off-road vehicles and Nordic skiing. In particular, I suggest reaching out to birdwatchers via Juneau Audubon Society, night sky watchers via the Planetarium, and dog walkers via Grateful Dogs of Juneau.
- A winter use plan, primarily on US Forest Service land, does not address the current needs for the city land near the rifle range. The following issues still need to be addressed: accommodating multiple use in the winter on the existing roadbed; illegal trail building by off-roaders; restoration along Montana Creek; reparation of the bridge over Montana Creek.
- The project scope has grown well beyond the lands adjacent to Montana Creek; perhaps a more descriptive plan name is in order, or a scaling back of its zone of influence.
- Personally, I highly value the opportunity take a quiet walk and bird watch, take photographs, and view the night sky in winter, within a short commute of my home.
- Development of new trails should include routes that are close to residential areas. While long treks and connection cabins are great for some users, it is the close-in greenbelt type areas that get the most use. Juneau has an aging population, some people face mobility issues, and most residents live busy lives. The most community benefit is likely to come from trails that can be accessed after work, on a lunch hour, and where trekking gear or a snow mobile is not needed.
- New parking around the rifle range may be necessary to allow access. I hope that the streetlight there could be improved in the process. A lower level downward aiming light (perhaps also on a motion sensor) would reduce the light pollution of nearby areas for night sky watching. Any lighting should also be compliant with that latest guidelines for bird safety (for more information see [Bird-Friendly lighting flyer 2020.pdf \(audubonportland.org\)](#)).
- I would appreciate clarification and perhaps some limitation on rifle range hours. The sign mentions sunset, the streetlight coming on -- and 9 PM. Which is it actually? Personally, I would very much enjoy some evening times that the range would be closed a little before official sunset. The hill offers beautiful sunset views, but they are less enjoyable when there is loud shooting nearby. In the winter, shooting until 9 p.m., which may be long after sunset, is both annoying to aurora watchers, and unsafe to wildlife – deer and bears both occasionally wander down range.

- I would also appreciate clear signage and consistent ski grooming in the winter that makes a clear path for walkers and cyclists. Even while being careful not to interfere with the ski track, I have been told move off the trail.

Thanks for your consideration.

Sincerely,

Gwen Baluss

Subject: Comments on Draft Montana Creek Master Plan

EXTERNAL E-MAIL: BE CAUTIOUS WHEN OPENING FILES OR FOLLOWING LINKS

Dear Michelle and CBJ Staff,

Here are my comments on the Draft Montana Creek Master Plan. These are my personal comments, not on behalf of any organization. Thanks for your time addressing this issue.

Any new parking must not shorten the nordic trails. If parking is constructed for Montana Creek, it should be at the gun range or earlier. Montana Creek skiing is already a too-short out and back of only a couple kilometers. We should focus on extending, not shortening it. If this plan results in shortening it, by as much as 1/4, it would be an absolute shame and failure to achieve the goals of this plan. This plan is meant to enhance the use of the park and trail, yet reducing the trail length and the ability to ski one of its most diverse sections would be a stunning step in the wrong direction. I have been at several meetings regarding Montana Creek, and recall being told new parking would not shorten the trail, and I'm disappointed that it appears to do so in the draft.

It's hard to emphasize that point enough. If Parks and Rec is trying to benefit the skiing community by creating a parking lot, but the skiing community is opposed to the negative impact it would have permanently on the most used and loved ski trail, you need to take a time out and think it over better. CBJ's construction of a parking lot should have thousands of nordic skiers grateful, a step that instead undercuts their use should not be taken.

I appreciate the interconnected trails proposed for Spaulding Meadows. It's smart to connect trails creating loops and through hikes. Both will result in much higher trail use summer and winter, and offer a lot to Juneau residents and travelers.

I would like to see the plan acknowledge and prioritize trail compaction for ski trails. Groomability in marginal snow conditions relies on having a well-compacted surface underneath. I suggest acknowledging that in the master plan's discussion so it remains a commitment. Were this plan to result in trail alternatives to Montana Creek, but have them groomed for skiing a fraction of the time because they're not hardened, it would be a dramatic step backwards.

I would like to see broad acknowledgement of the vast number of skier days. CBJ has obviously made a commendable effort to balance multiple uses, but I think that has sometimes come at the cost of acknowledging the weight of the user numbers. Hundreds of skiers are on Montana Creek daily, and I'm consistently blown away that even in the dark of a cold night, I always encounter other skiers on the trail. That's a great thing that Parks and Rec can be proud of. The city's financial investment in development should mirror this community demand. As the department moves on the steps of this plan, they will no doubt consider competing uses, but I hope they prioritize projects based on best serving the number of users, not just the number of uses.

Similarly, I would like to see Parks and Rec trumpeting the contributions and user numbers of the skiing community and organizations. Last year I was surprised to see hand-ringing at over-used parking lots instead

of celebrations at the number of people using our parks and trails. That's a clear positive, and it's not just about numbers. The nordic skiing youth programs reach dozens of children daily, longitudinally across 10 years. They do so in ways that foster the participation of at-risk and underserved families, and provide a healthy outdoor recreation foundation that lasts life-long. Then, of course, the ski club leverages tens of thousands of dollars of contributions plus volunteer hours annually to contribute to maintenance, grooming, outreach, and programming. Many municipal governments could only dream of providing this--let alone from volunteers at no cost. I would like to see Parks and Rec invest in a culture that highlights and propels those users and contributions every day. It should do so at every level from staff meetings to social media to public newsletters, and from internal reporting to external funding requests.

Economic equity and access should be considered when prioritizing trails. Some uses can require expensive investments, such as a motorized vehicle, trailer, and tow vehicle, that are beyond many citizens. When the municipality invests in trail infrastructure, we should be careful not to over invest in trails in which only economically well-off individuals can participate.

If a parallel trail is built along Montana Creek, I wonder if it could divert motorized traffic from the existing one. It's notable that we're considering a parallel trail to the already-compacted one along Montana Creek. If a parallel trail is constructed, I wonder if it would make sense to have it be a less-built trail, and serve motorized uses? In other words, it might be expensive to build a new, compacted trail for skiing, and a better use of funds might be to build a less-developed second trail, and allow motorized winter use there instead of on the existing trail. To the extent motorized uses are on the current Montana Creek trail in the winter, it appears they're there as access not an end of itself. That is, motorized users generally do not want to be going slowly on a bland trail, rather they're getting to the area they want to ride. If that's the case, why not allow those uses on a parallel, less-built trail, that avoids the bland current hardened trail, and keep the current trail for skiing in the winter.

I'd like to see CBJ acknowledge its right to manage the Montana Creek trail. As a municipality we decide how our trails and roads are used. Some trails don't allow bikes or commercial use, some roads don't allow certain vehicles or modes of transportation, and are even closed seasonally. We trust our government to take such steps in order to improve safety and the experience of the users. Yet CBJ appears hesitant to temporarily or seasonally close Montana Creek to certain vehicles or uses. I do not believe the trail has ever been adjudicated under RS2477, and CBJ should not treat it as such. If temporal, seasonal closures serve the vast majority of users, they should be considered.

I appreciate the acknowledgement of multi use when proposing motorized trails, and would appreciate it being explicitly discussed. We make multiple user groups happy if trails are wide enough to allow ski grooming on one side and motorized travel on the other. I have heard that acknowledged and proposed by CBJ at meetings, and hope it is acknowledged in the plan. This plan was largely spurred due to the conflict of uses on the same part of the trail, so acknowledging that a multi-use trail can serve both if wide enough to segregate uses seems important to clarify, ensuring that the multi-use motorized trails are eventually built wide enough to make that accomodation.

Extending the Lake Creek road to a higher parking lot should be evaluated for impact on the entire Spaulding Meadows. Motorized use is limited to winter due to the impact it can have on the area when there's low or no snow. The current Lake Creek road protects for that by limiting motorized access when snow doesn't exist on the road. If a road extension allows access even with less snow, CBJ needs to consider the impacts of motorized use in those lower snow levels across the entire area accessed.

I know Parks and Rec has put extensive time and consideration into this plan. I appreciate the efforts, and I look forward to a Montana Creek/Spaulding Meadows plan that really expands enjoyment of that area. Thank

you for considering these comments.

To Whom It May Con

To Whom It May Con
To Whom It May Concern,

Having access to an extensive number of trails for skiing, hiking, and biking is one of the things I love most about living in Juneau. Our area trails provide extraordinary avenues to greater physical health, mental and emotional health, and general wellbeing.

CBJ’s proposed plans for improving and developing more trails in the Montana Creek, McGinnis Valley, Spaulding Meadows, and Mendenhall Campground/West Glacier areas is a testament to Juneau’s commitment to a world class trail system. Thank you.

My general comments concerning the current proposed plans are:

- Construct separate trails/areas for motorized and non-motorized use. This will make trails safer for both user groups, will help alleviate user conflicts, and will increase enjoyment for motorized and non-motorized users alike.
- Create non-motorized trails that link together, without the possibility of interference and/or damage from motorized users.
- Develop a strategic plan for protecting landscape adjacent to trails from being damaged by motorized users.
- Ensure non-motorized trails are built wide enough to accommodate ski grooming equipment.

My specific trail comments are:

- I support new skiing/hiking/biking trails in the Montana Creek area and in the McGinnis Valley.
- I support upgrading the Montana Creek to Windfall Lake trail to accommodate ski grooming in the winter.

- I support the expansion of a non-motorized region in Spaulding Meadows, including enhanced/new ski trails and well-marked routes.
- I support the development of interconnected trails that link the Mendenhall Campground, West Glacier area, Montana Creek valley, and Spaulding Meadows.

Thank you for providing safe and enjoyable trails for skiers, bikers, and hikers of all ability levels. Your hard work helps make Juneau an amazing place to live.

Sincerely,

Cinda Stanek

Regarding Montana Creek Master Plan
Fred Hiltner
9/8/22

Dear Montana Creek Master Plan Planners,

As a long-time Juneau outdoor enthusiast, I thank you for the opportunity to comment on the Montana Creek Master Plan. As one of the most used valley trails in the Juneau area, optimal planning for the coming decades will continue to create safe, well designed, and enjoyable outdoor recreational activities for thousands of Juneau residents, as well as our many visitors.

Of course, safety needs to continue to be our top priorities. To promote that, my number one priority one would be designating designating non-motorized areas to minimize the danger to hikers, snowshoers, fishers, dog walkers, etc. who are out on trails.

One easy step towards safety (and reduced liability) would be to share use on the current Montana Creek trail between motorized and non-motorized by restricting motorized vehicles during the winter season from November 1 through April 15.

As we see every year, motorized vehicles have the potential for serious accidents, especially around the many sharp turns on the Montana Creek Trail. Skiers and snowshoers are quite at risk, as dodging snow machines is very difficult when surprised by one zooming around the corner towards you. Of course, a collision would be catastrophic for both the motorized vehicle as well as the walker, skier, snowshoer, etc. The rest of the year offers plenty of use for motorized vehicles using this trail.

I fully support:

- Expansion of the cross-country ski trails as proposed by the draft Montana Creek Master Plan.
- Trails wide enough to continue the established grooming of trails by the Juneau Nordic Ski Club.
- Non-motorized access trail up to Spaulding Meadows for snowshoers, hikers, skiers, etc. with well-marked routes and signage.

- Grooming-wide ski route to Windfall Lake Cabin.
- Cross country ski routes that connect with Mendenhall Lake and Dredge Lake areas.

Let's work together to expand the myriad of outdoor recreation opportunities. It is one of the greatest pleasures of living in Juneau, and careful planning is the key for long-lasting, safe, and accessible trails for such a wide variety of users.

Again, I appreciate and thank you for the opportunity to comment on the draft plan. What a dream opportunity it is for launching into the rest of the twenty-first century!

With highest regards,

Fred Hiltner

Subject: Comments on Montana Creek Master Plan

EXTERNAL E-MAIL: BE CAUTIOUS WHEN OPENING FILES OR FOLLOWING LINKS

Thank you for the opportunity to comment on the Montana Creek Master Plan. My family lives off Backloop and we use the Montana Creek project area regularly all year long. I really appreciate the development of a plan -- new and improved access will be wonderful!

Some specific comments:

- I am very supportive of the plan to develop a new ski trail along Montana creek. This trail gets so much use and is so narrow that we have stopped using it for skate skiing-- it is just too crowded to try and skate ski and deal with oncoming ski traffic, and walkers, and dogs. I would love to be able to use the area again -- please make this a broad trail that could accommodate all the people! Ideally, there would be a separate trail for people who are walking, since the snow is often soft and walkers tear up the skate skiing track.
- YES on more parking for the Montana Creek trail!
- It is hard to tell on the map, but I am assuming the new parking area for Montana Creek would be in the muskeg meadow just past the rifle range. This is a really nice spot with a beautiful view -- it would be great to have a picnic area to enjoy it. But I'm not sure if the loud noise from the rifle range can be avoided or mitigated somehow? At a minimum, it would be fantastic not to try plug my ears to avoid gun shots when trying to put on skis. (note, we use the rifle range a lot, so I'm not opposed to this facility. It is just unfortunate that it sits right in the access to Montana Creek).
- I like the idea of new parking area for Lake Creek trail. Our family uses this trail year-round for hiking and snow shoeing and is our preferred access to Spaulding Meadows. I'd prefer that this entire trail was non-motorized, but I acknowledge that this plan is also attempting to provide access to snow machines. However, I think Lake Creek Trail could be improved and better designed to accommodate BOTH motorized and non-motorized access to avoid conflict and potential injuries to skiers and hikers.
- The USFS area that is open to vehicles 50" or less Spaulding Meadows is a very special place for snow shoeing in the winter -- and it is higher elevation and therefore better snow than the non-motorized use area around John Muir Cabin. I recommend that that area be split into a non-motorized and a motorized section to accommodate both.
- I am very supportive of the proposed new cabins, but again, emphasize that we need well designed access to accommodate both motorized and non-motorized use.

Thank you, again, for the work on this project and the opportunity to provide input.

Attached are comments from the Tongass Chapter of Trout Unlimited on the Draft Montana Creek Master Plan,

Tongass Chapter of Trout Unlimited #581
Juneau, AK 99801

September 10, 2022

Subject: Comments on the Draft Montana Creek Master Plan

These comments are on behalf of the Board of Directors of the Tongass Chapter of Trout Unlimited (TU). TU is a national non-profit organization with 300,000 members in 400 chapters. TU's mission is to conserve, protect and restore North America's coldwater fisheries and their watersheds. The Tongass Chapter of TU has about 160 members including several businesses. Most of these members live in Juneau. For over 25 years, we have worked to protect, enhance, and restore trout, char, and salmon habitat in the City and Borough of Juneau, and adjacent rivers and streams. We have partnered with government agencies and others in the past to get 500 ft buffers to development around parts of Montana Creek as part of the CBJ's Comprehensive Plan. We also partnered with the USFWS to provide funding for habitat restoration - the removal of junk cars and a decrepit house in the watershed. This past summer we partnered with Trail Mix to improve and reroute an existing trail that makes access to Montana Creek safer and minimizes impacts to salmon and trout habitat. Residents of Juneau are very lucky to have Montana Creek in our backyard. The watershed is easily accessible and is the best urban wild trout and salmon fishery in our town. The watershed is home to wild Coho Salmon, Dolly Varden, Cutthroat and Steelhead trout.

As one of the stewards of Montana Creek, in the past we have consistently expressed our concern about the impacts of off-road ATV use in the watershed upstream of the Montana Creek Bridge. A survey of the area conducted by ADFG has documented illegal anadromous stream crossing by ATVs, many of which are in the vicinity of the proposed project (Lindgren, J. 2021. Montana Creek ATV Stream Crossings. Alaska Department of Fish and Game Memorandum Jan 22, 2021). The ADFG survey noted that unpermitted ATV stream crossings have caused streambank instability, channel widening, and altered stream courses that have impacted fish habitat. These illegal stream crossings have taken place despite signage explaining the regulations. For example, there are signs that say "Do not drive motor vehicles and ATVs into the creek and adjacent side streams (AS 16.05.871, AS 16.10.010)" and another sign that says "No motorized vehicles off road (CBJ 67.01)", and "no trail building without a permit." We recognize that enforcement of this illegal activity is problematic.

The Draft Master Plan does not alleviate our concerns because under the Plan the existing trail above the bridge will remain open to ATV use. **For this reason the Tongass Chapter of Trout Unlimited recommends that the Plan be modified to close the trail above the bridge permanently to ATV use and consider making the bridge passible to only foot traffic and bicycles.** We recognize that this section of the watershed is primarily land managed by DNR. Thus our recommendation may require a special regulation by DNR. **We also recommend that the DNR consider transferring the parcel above the bridge to CBJ.** We believe this transfer is consistent with the 1993 Juneau State Land Plan as presented in the slide show. This will enable more consistent management of the area and enable the area to be more aligned with 2019 Parks and Recreation Master Plan for the watershed "to protect and manage the natural environment with recreation as a secondary objective".

We are sympathetic with the desire for ATV users to have a place to ride and the Draft Plan provides more opportunities for this group. TU can potentially provide funding and volunteer labor for restoration of impacted fish habitat caused by ATVs and for any road/trail structures and improvements needed to curtail ATV access to this section of the watershed.

Sincerely,

Jon Heifetz

President of the Tongass Chapter of TU

CBJ:

I am excited for the mixed used updates to the Montana Creek recreation area. Juneau is a small town that is densely populated on the road system and I believe that mixed user groups need to coexist. Building more cabins in strategic areas looked like great additions for CBJ revenue streams and anyone can attempt to reserve cabins on the road system to understand their popularity. I have concerns about maintenance costs (facilities, trail upgrades, plowing) and hope that is included in planning discussions (for example, can Juneau hire enough folks to accomplish maintenance?). Juneauites are on trails year-round and I hope energy goes into building quality trails that can be used year-round. I support additional loop trails because driving to do through hikes is challenging logistically (for example Windfall Lake to Montana Creek).

Agency Managers

I have been a part of the Juneau outdoor recreational community since 1961 and have many opportunities to enjoy the outdoors via hiking, cross-country skiing, running and biking. I hope to have many more opportunities to have the quiet enjoyment of non-motorized recreational sports. It is critical for me and many of my family members and friends to continue to have places of quiet retreat particularly with the growing cacophony associated with the out of control cruise/industrial tourism loads that seem to have no bounds.

It is extremely important to follow the guidance given via CBJ Parks and Rec survey showing more than a 2:1 preference for non-motorized use of our recreational areas.

In addition, since the onset of COVID it has become more apparent that we have increasing incidence of anxiety and depression which can be in part mitigated by outdoor activities such as walking, hiking, biking, etc.

Given that a majority of us desire/need quiet enjoyment of the outdoors for our physical, mental and emotional health I strongly support:

- Construction of non-motorized cross-country skiing/hiking/biking trails on the east side of Montana Creek with a bridge connecting to the end of the present Montana Creek ski trail
- Construction of McGuinness Valley cross country ski loop connecting to the Montana Creek system
- Upgrade the Montana Creek to Windfall Lake for cross country skiing (and less treacherous hiking)
- Construction of Spaulding Meadows cross country ski loop system
- Construction of additional cabin/warming shelters.

Thank you for the opportunity to comment. As a retired healthcare provider, I hope this will be the beginning of ongoing development of healthy non-motorized activities in our community.

Please reduce the number of ATV access opportunities presented in the Montana Creek master plan. ATVs have no place in sensitive wetland muskeg habitat. Please read my comments attached.

Liz Flory

Comments on draft master plan for the Montana Creek valley and watershed area

September 9, 2021

By Elizabeth Flory
4546 River Road
Juneau AK 99801

I am writing to comment on the Montana Creek Master Plan. I am opposed to allowing motorized vehicles to access muskeg habitat owing to the tendency to turn sensitive wetland vegetated areas into churned mud and to introduce loud engine noise into otherwise quiet areas. An exception would be the use of snow grooming equipment used in winter only to make ski trails for the many ski trail users.

I have been a Juneau resident for nearly 25 years and a keen hiker and skier who frequently makes use of Montana Creek valley in spring, summer, fall and winter. I feel that providing easier access to the open muskeg areas of Montana Creek watershed will destroy the scenic beauty and natural habitat of the area. There are already frequent mudslides on the banks of Montana Creek as gravel slopes appear to slide easily over lenses of clay in the area (see pics from 2021).

An enormous amount of rock fill would be required to build a road through the area as might have been learned from the amount of fill required for recent housing development projects on wetland areas near Glacier Highway, just north of the Brotherhood Bridge in Juneau. Once a road across the muskeg is built there is nothing to stop ATVs from running all over the sensitive muskeg bogs rendering them devoid of any vegetation for years to come.

The Juneau Off-Road Association proposed constructing a 25ft wide road accessed from the much narrower Montana Creek Trail and via "existing ATV trails", which appear to consist of deep muddy tracks that were made in summer 2020 by ATVs attempting to force a trail through the forest and up the steep hill immediately adjacent to Montana Creek. Montana Creek has a hardened surface, but it is not paved and would likely turn to mud with use of motorized vehicles in summer. In our rainy climate, the mud from Montana Creek and from the ATV trails going up hill would wash straight into Montana Creek and negatively impact fish habitat.

According to the State of Alaska Department of Fish and Game Anadromous Waters Catalog Montana Creek supports Chinook, coho, chum and pink salmon, steelhead and cutthroat trout and Dolly Varden. Buffer strips of undisturbed vegetation along the sides of streams are important to help protect these fishery resources. Keeping vegetation intact along river banks is important in preventing exposed soil entering the river and affecting water quality and destroying sensitive salmon spawning habitat. Salmon require large (3-4 inch rocks) for laying their eggs in, but soil washed into a stream ends up deposited amongst these rocks and smothers salmon eggs. The US Forest Service guideline is to maintain a 100m (330ft) wide buffer strip next to the stream within which, natural vegetation including trees, shrubs and

ground cover is left intact. The existing hard surface of Montana Creek trail was constructed before this understanding of salmon habitat was gained. Using it now for motorized traffic when no buffer strip of vegetation can exist between the trail and the stream would undoubtedly affect fish habitat.

I am opposed to extending the road at the Lake Creek trail and opposed to construction of a parking lot on the upper wetland area. Easy access to the sensitive wetlands in the area by all-terrain vehicles in summer will destroy the sensitive plant communities there and greatly impact the unique beauty of the area. I am also opposed to providing motorized access to sensitive wetlands via a road at 25 mile on Glacier Highway.

The proposal states that the newly constructed road would be useable by skiers and other foot traffic, but the trailhead of Lake Creek Trail, currently used by snow mobiles in winter has signage warning people that hiking and skiing is not recommended due to motorized traffic. Montana Creek is too narrow to allow fast-moving machines and slow-moving foot traffic to pass each other safely. At least one skier reported "reckless endangerment" by snow machines on the trail this past winter, which increased their speed on approaching the skier instead of slowing down when requested to do so. A similar incident was reported by walkers endangered by an ATV in the summer of 2019.

Winter use of "all-terrain" motorized vehicles (other than grooming equipment) destroys carefully set groomed ski tracks and would prevent skiers from using the currently popular Montana Creek trail in winter months. As an active member of the Juneau Nordic Ski Club I do not support the use of motorized vehicles other than grooming equipment on Montana Creek Trail in winter.

Montana Creek trail is unique in offering a relatively flat area for cross-country skiing suitable for all age groups and skill levels. Mendenhall Lake can sometimes be used for cross-country skiing, but the past two winters the ice has only been thick enough for skiing for a few days each season. The proposal mentions use of ATVs for people as they age, but many other people in their 60s and 70s like to ski on Montana Creek groomed trails and will lose this important winter recreation and physical exercise if motorized vehicles are permitted on the trail. There is no shared space with off-road vehicles due to their size and speed on the narrow road there and it is difficult for other users on foot or skis to hasten out of the way quick enough to avoid them. Montana Creek trail is used by skiers of all ages and volunteers dedicate many hours each winter to setting a groomed ski track to make it skiable. Motorized vehicles traffic immediately destroys the groomed tracks and can leave deep frozen ruts that can be dangerous to try and ski on.

I do support the development and maintenance of non-motorized ski trails particularly the proposal linking the Mendenhall Campground and West Glacier area to the Montana Creek valley on up to Spaulding Meadow, but there is simply no place for the summer use of all-terrain vehicles on soft, wetland muskeg habitat common around Juneau.

Following page shows one of the many mudslides that already occur alongside Montana Creek. Not an environment for ATVs.

Sincerely
Elizabeth Flory

Greetings,

I am writing to support the development of new non-motorized but multi-use trails (hike/bike/ski) in the Montana Creek watershed. In particular I support upgrading the Montana Creek to Windfall Lake trail so we can have a point to point trail in Juneau. I also support developing ski trails in the Spaulding Meadows area and connecting trails to the West Glacier area. I especially think it is important to ensure the trails are wide enough to accommodate ski grooming equipment. It will be important to have motorized and nonmotorized areas in Spaulding meadows to avoid user conflicts. Considering the current problems with parking and congestion, ensuring that there is adequate space at trail head parking lots is also important.

Thanks for the opportunity to weigh in, and for working on a Master Plan for this important area!

Gretchen Roffler

I would like to see expanded access, parking, and territory for ATV users in this area. ATV users seem to have zero opportunities to legally ride in Juneau. Most every other community in Alaska embraces ATV use. ATV owners deserve the opportunity to recreate in a responsible fashion. As a hiker, skier, ATV owner, former snow machine owner, and 63 year resident of Juneau, I think it can be done with minimal impacts to other users ... there is more than enough room in this area for everyone to enjoy their activity of choice.

There are well over 100 non-motorized trails in Juneau; the time is right to have the Montana creek area become available for ALL of Juneau's residents, especially the motorized sports community.

I appreciate all of the organizations working towards this goal.

Thank you,
Scott Spickler

EXTERNAL E-MAIL: BE CAUTIOUS WHEN OPENING FILES OR FOLLOWING LINKS

Comments on the Draft Montana Creek (Winter) Master Plan:

I want to comment first on negative aspects of the Plan, then comment on the positives.

Why have a second trail for USFS vehicles from the 'new' parking lot at the Lake Creek trailhead? It does nothing to gain anything beyond the existing snowmachine trail. Why does it cross both the Lake Creek Trail and the Auke Nu Trail? In summer, this will be yet another trail (third trail in the spread of a mile at their endpoints) that accesses Spaulding Meadows.

The proposed Lake Creek Cabin is just not necessary. It is not far enough away from either the John Muir Cabin or the trailhead for snowmachiners at Lake Creek. It will be an attractive draw in both winter and summer adding a significant load of more people. It will cause high impact at the cabin site to the fragile ecosystem. It is not necessary for either the public or USFS personnel.

Why extend the road to the parking lot for Lake Creek trailhead? With no Lake Creek Cabin, the use at the existing parking lot will remain as – is; currently the parking lot does not fill up, even on long weekends which have days with high levels of snow.

The reroute of the hike/bike/ski trail at Montana Creek is unjustified. Most hikers and bikers will continue to use the existing Montana Creek roadbed and trail. Will skiers be able to depend on grooming of the reroute? The reroute is not adequately represented by the map. It appears to enter broad areas of McGuinness Creek. In summer, this will serve to add a significant load of more people to that area with impacts to fish (coho salmon) and wildlife. Further, the reroute is located in an area that is designated 'DNR motorized use generally allowable'. Does this mean that skiers will again have to compete for space?

Now I will comment on the positive aspects.

I whole-heartedly support the proposed improvement of the route going from the John Muir Cabin to Peterson Lake Cabin. It will improve and turn skiing the John Muir Cabin/ Peterson Lake Cabin trails into taking a total of three days, something that is unusual in the Juneau area.

The proposed 'Spaulding Meadows Cabin' in the area designated 'USFS Vehicles 50" or less allowed' seems like a good thing.

Your proposed draft plan is troublesome, especially the provisions dealing with all terrain vehicles. For years, neither the CBJ, DNR or USFS have been able to monitor, control or enforce ATV off road travel along Montana Creek. And neither have the organizations that support off road motorized activity. Consequently, this extraordinarily valuable fish habitat was assaulted by illegal stream crossings with destruction of associated riparian habitat.

So this history strongly suggests that banning ATVs is the only effective method of protecting vital fish habitat in and around Montana Creek. And this option should be the cornerstone feature of the draft CBJ plan.

In addition, once the bridge is repaired/replaced, capital improvements should be kept to an absolute minimum. This wild, scenic and productive area is a precious gem. You cannot improve upon it. So help to maintain the integrity of our magnificent backyard playground by respecting it and planning to let nature have its way along Montana Creek. Keep in mind there is a strong economic incentive in effectively managing this wild land because the visitors that come to Juneau looking for the "real Alaska" will find it at Montana Creek only--- if you plan more carefully to protect it---as is.

I apologize for the lateness of my response. I hope my thoughts will still be considered for this level of the planning process. I appreciate the effort that has already gone into this process, and appreciate the opportunity for community involvement.

The entire Montana Creek area has so much potential for outdoor recreation. As avid skiers and hikers, it is an absolute favorite for our family and friends. I have watched with amazement as the number of people cross country skiing has grown in recent years. And I give tremendous credit for that to the efforts of the Juneau Nordic Ski Club. I hope as this process evolves, there will be greatly increased skiing potential as part of the Montana Creek master plan.

I strongly support the plan recommendations made by the JNSC, with the important inclusion of new trail construction with the width necessary to use grooming equipment. As a family, we ski the existing Montana Creek trail more than any other trail in Juneau. And that trail magically holds its snow when it is long gone elsewhere. That whole valley has so much potential for increased trails that can be used year round for hiking and biking as well as skiing.

We could have a truly world class system of connected trails and future cabins, with access to the whole Mendenhall Lake and Spaulding Meadows areas. Please go big with planning for healthy outdoor recreation for our community: skiing, hiking and mountain biking.

Again, thank you for the opportunity to be involved.

Sincerely,
Karen Wilson

- Trails built wide enough to accommodate ski grooming equipment;
- New Nordic skiing/hiking/biking trails developed in the Montana Creek and McGuiness Valley;
- Upgrading the Montana Creek to Windfall Lake trail to accommodate ski grooming in the winter;
- Enhanced/new ski trails and routes in Spaulding Meadow;
- Interconnected trails linking the Mendenhall Campground and West Glacier area to the Montana Creek valley on up to Spaulding Meadow. *Wouldn't it be amazing to ski from the Campground to Auk Mountain without ever having to kick your skis off!?*

Good morning Juneau parks and rec! I'm sorry to say I missed the draft comment period for the Montana Creek Master Plan. That said, I'm sending my comments in hopes that they can be used.

I have personally used the entire area in the proposed master plan in the last 40 years. It is a beautiful and yet fragile ecosystem. Wetlands, muskeg, stream corridors, lakes and ponds, tall timber, and access to many trail systems are all included. The thought of motorized traffic competing with hikers, runners, bikers, and hunters is a terrible mix. I support expanded use of the area, but with very limited motorized access. Even winter time use of Spaulding Meadows needs to be carefully calculated. I've been up there too many times in the winter xc-skiing, only to be chased around by snow machines when they cross over their designated use area. The thought of summer access of ATV'S up in Spaulding Meadows makes me really concerned about the future of recreation in Juneau. It feels like P&R is trying to do it all, but is really sacrificing one sport for another (non) sport; motorized.

Let's not motorize MONTANA CREEK area!

Thanks - Jeff

TO: Parks & Recreation Advisory Committee
FROM: George Schaaf, Parks & Recreation Director
DATE: March 1, 2023
RE: Parks & Recreation Boards and Committees

On February 27, 2023, the Assembly adopted Ordinance No. 2022-64(c) reorganizing and consolidating the Aquatics Board, the Treadwell Arena Advisory Board, the Jensen-Olson Arboretum Advisory Board, and the Parks and Recreation Advisory Committee (PRAC). The ordinance repealed all of these committees and reestablished the PRAC with expanded responsibilities. The new PRAC will include two permanent subcommittees:

- The Jensen-Olson Arboretum Endowment Subcommittee will meet at least once per year to advise the CBJ on use of the Jensen-Olson Arboretum Endowment.
- The Facilities Subcommittee will meet at least twice a year to focus on the health and good repair of all facilities under the purview of the PRAC.

Several amendments were made by the Assembly:

- Added a requirement that staff provide the PRAC with quarterly reports for each facility.
- Changed the date when the current PRAC will be dissolved to April 30, 2023.
- Changed the date when the new PRAC will be reestablished to May 1, 2023.
- Added a provision allowing members of the public (other than PRAC members) to participate on subcommittees.

Current members are invited to apply to serve on the reestablished PRAC. Staff are also planning an extensive outreach and recruitment effort that will specifically include underrepresented communities. To apply for the PRAC or any other CBJ board or committee, please visit <https://juneau.org/clerk/boards-committees>.

On behalf of the Parks & Recreation Department, we are extraordinarily grateful for the time and service of everyone who participated on these committees over the years. We look forward to continuing to work with many of these dedicated volunteers, not only through the PRAC, but also through our many facilities and programs.

Presented by: The Manager
Presented: 12/12/2022
Drafted by: R. Palmer III

ORDINANCE OF THE CITY AND BOROUGH OF JUNEAU, ALASKA
Serial No. 2022-64(c)

An Ordinance Reorganizing and Consolidating the Aquatics Board, the Treadwell Arena Advisory Board, the Jensen-Olson Arboretum Advisory Board, and the Parks and Recreation Advisory Committee.

WHEREAS, the Jensen-Olson Arboretum Advisory Board was most recently created by Resolution 2377 (12/11/2006); and

WHEREAS, the Parks and Recreation Advisory Committee was most recently created by Resolution 2646 (6/3/2013); and

WHEREAS, the Treadwell Arena Advisory Board was most recently created by Ordinance 2019-04(b) (1/28/2019); and

WHEREAS, the Aquatics Board was most recently created by Ordinance 2019-03(b) (1/28/2019); and

WHEREAS, the Assembly appreciates the community engagement and extensive volunteer hours members of the Jensen-Olson Arboretum Advisory Board, the Treadwell Arena Advisory Board, the Aquatics Board, and the Parks and Recreation Advisory Committee invested into our community; and

WHEREAS, the current Assembly Advisory Board Rules of Procedure are located in Resolution 2686 (6/9/2014); and

WHEREAS, Resolution 2686 requires appointments to advisory boards based on talent and interest instead of race, creed, color, age, religion, national origin, sex, marital status, political ideology, sexual orientation, or sensory, mental or physical handicap; and

1 WHEREAS, Resolution 2686 also requires diverse appointments to advisory boards to
2 reflect a membership appropriate for accomplishing the goals of the board, which should include
3 cultural, social, political, technical, and economic viewpoints sufficient to ensure wide-ranging
4 and active debate; and

5
6 WHEREAS, consolidation of the Jensen-Olson Arboretum Advisory Board, the Treadwell
7 Arena Advisory Board, and the Aquatics Board duties into the Parks and Recreation Advisory
8 Committee is in the best interest of the community because recruitment and retention of 43
9 engaged volunteers is challenging, board morale is low when meetings are not meaningful, staff
10 support time can be better spent on other projects, and fewer boards representing a larger
11 portion of the community would be more effective and impactful.

12 THEREFORE BE IT ENACTED BY THE ASSEMBLY OF THE CITY AND BOROUGH OF JUNEAU,
13 ALASKA:

14 **Section 1. Classification.** Sections 2, 3, 4, and 7 are noncode provisions. Sections 5
15 and 6 are code provisions.

16
17 **Section 2. Repeal of Resolution 2377.** Resolution 2377 is repealed. The Jensen-Olson
18 Arboretum Advisory Board is dissolved upon the effective date of this ordinance.

19
20 **Section 3. Repeal of Resolution 2646.** Resolution 2646 is repealed. The Parks and
21 Recreation Advisory Committee is reestablished consistent with Section 6 of this ordinance.

22
23 **Section 4. Repeal of Ordinance 2019-04(b).** Ordinance 2019-04(b) is repealed. The
24 Treadwell Arena Advisory Board is dissolved upon the effective date of this ordinance.
25

1 **Section 5. Repeal of Chapter 67.10.** Chapter 67.10 – Aquatics Facilities is repealed
2 and reserved. The Aquatics Board is dissolved upon the effective date of this ordinance.
3

4 **Section 6. Amendment of Chapter 67.01.** Chapter 67.01 – Recreation Areas is
5 amended by adding articles to reestablish the Parks and Recreation Advisory Committee.
6

7
8 **Chapter 67.01 – RECREATION AREAS**

9 **ARTICLE I. RECREATION AREA ORDINANCE**

10 **67.01.010 Short title.**

67.01.100 Criminal liability.

...

ARTICLE II. PARKS AND RECREATION ADVISORY COMMITTEE

67.01.200 Establishment.

There is established the Parks and Recreation Advisory Committee (“PRAC”).

67.01.210 Membership.

(a) Membership. The members of the PRAC shall be nine citizens of the City and Borough of Juneau.

(b) Term. Members shall be appointed by the assembly. Members shall be appointed to staggered three-year terms. A new member shall be seated upon appointment and serve until their term ends or until their successor is appointed. A member serves at the pleasure of the assembly and may be removed at any time by an affirmative vote of six members of the assembly.

(c) Quorum. Five members constitutes a quorum.

67.01.220 Meetings.

(a) Procedure. The PRAC shall be governed by the Advisory Board Rules of Procedure, which generally follows Robert’s Rules of Order.

(b) Regular and special meetings. The PRAC should hold regular meetings on a schedule established by the PRAC and may hold special meetings—at the call of the chairperson or three members—as necessary to conduct business.

20
21
22
23
24
25

1 **67.01.230 Subcommittees.**

2 (a) Jensen-Olson Arboretum Endowment Subcommittee. There is established a permanent
3 subcommittee to advise on use of the Jensen-Olson Arboretum Endowment. This subcommittee
4 should meet at least once per year and as necessary to effectuate the business of the
5 endowment.

6 (b) Special subcommittees. The chairperson—subject to ratification by the PRAC—or majority
7 of the PRAC may create temporary special subcommittees to facilitate any discrete PRAC
8 business issue. Membership on subcommittees may include public seats in addition to PRAC
9 members. While all PRAC members may attend and participate in subcommittee proceedings,
10 only designated subcommittee members may vote. Temporary subcommittees should exist for
11 no longer than 24 months and dissolve upon completion of the enabling charge.

12 (c) Facilities Subcommittee. There is established a Facilities Subcommittee that will focus on
13 the health and good repair of all facilities under the purview of the PRAC. At a minimum of
14 one two times per year the Facilities Subcommittee shall engage users of each facility to hear
15 from those users and to plan for facility needs.

16
17
18
19 **67.01.240 Duties.**

20 (a) Intent. With the exception of parking management and facilities maintenance services
21 provided to other departments, the PRAC should advise the assembly regarding all Parks and
22 Recreation Department managed lands, facilities, and services including, but not limited to, the
23 Treadwell Arena, the Aquatics Facilities, and the Jensen-Olson Arboretum.

24 (b) The PRAC should review and provide recommendations to the parks and recreation
25 director and assembly regarding the following:

1
2
3
4
5
6
7
8
9
10
11

19
20
21
22
23
24
25

- (1) Planning and development of all aspects of recreation and associated issues affecting parks and recreation in the community.
- (2) The Capital Improvement Plan (excluding Facilities Maintenance and Centennial Hall).
- (3) The department's Fee Schedule (excluding parking).
- (4) Adopted and proposed legislation, including regulations, related to the department.
- (5) Acquisition or disposal of City and Borough of Juneau lands managed or dedicated for park or recreation purposes.
- (6) Naming of parks or recreation facilities.

67.01.250 Staff Assistance.

Staff support and assistance to the PRAC may be provided by the City Manager as available and appropriate.

The director of each parks and recreation facility shall provide quarterly reports to the PRAC.

Section 7. Parks and Recreation Advisory Committee Transition Period. The Assembly intends on reestablishing the PRAC by ~~April 1, 2023~~ **July 1, 2023**. Current members of the PRAC will continue to serve through March 30, 2023, and need to reapply if interested in a future PRAC position. In addition to new public members, all members of the Jensen-Olson Arboretum Advisory Board, the Treadwell Arena Advisory Board, and the Aquatics Board are encouraged to apply for a PRAC position. The Assembly shall appoint transitional PRAC positions as follows: three members for one-year terms, three members for two-year terms, and three members for three-year terms.

Section 8. Effective Date. This ordinance shall be effective 30 days after its adoption.

Adopted this _____ day of _____, 2023.

Carole Triem, Acting Mayor

Attest:

Elizabeth J. McEwen, Municipal Clerk

1 **Ord 2022-64(b) Amendment 1 (via Mayor Weldon) - Ord 2022-64(c)**

2

3 Motion: I move to amend Ordinance 2022-64(b) as follows:

4

5 1. Amend **Section 6** CBJC 67.01.230(c) to read:

6 ...

7 At a minimum of ~~once~~ **two times** per year the Facilities Subcommittee shall engage
8 users of each facility to hear from those users and to plan for facility needs.

9

10 2. Amend **Section 6** CBJC 67.01.250 to read:

11 **67.01.250 Staff Assistance.**

12 Staff support and assistance to the PRAC may be provided by the City Manager as
13 available and appropriate.

14 **The director of each parks and recreation facility shall provide quarterly reports to**
15 **the PRAC.**

16

17 3. Amend **Section 7 Parks and Recreation Advisory Committee Transition Period.**

18 The Assembly intends on reestablishing the PRAC by ~~April 1, 2023~~ **July 1, 2023.**

19 ...

20 **Clerk Note:**

At the 2/27 Assembly meeting the transition effective date changed from July
1, 2023 to May 1, 2023 with April 30, 2023 as the various P&R Board sunset
dates.
