

**SPECIAL JOINT MEETING OF THE KETCHUM URBAN RENEWAL AGENCY AND CITY COUNCIL**

**Monday, November 18, 2024 at 3:00 PM  
191 5th Street West, Ketchum, Idaho 83340**

---

**AMENDED AGENDA**

**PUBLIC PARTICIPATION INFORMATION**

Public information on this meeting is posted outside City Hall.

**We welcome you to watch Council Meetings via live stream.**

You will find this option on our website at <https://www.ketchumura.org/kura/meetings>.

**If you would like to comment on a public hearing agenda item, please select the best option for your participation:**

Join us via Zoom (*please mute your device until called upon*) **Join the Webinar:**

<https://ketchumidaho-org.zoom.us/j/87286207064>

Webinar ID:872 8620 7064

Join us at City Hall.

Submit your comments in writing at [info@ketchumura.org](mailto:info@ketchumura.org) (*by noon the day of the meeting*).

*This agenda is subject to revisions. All revisions will be underlined.*

---

**CALL TO ORDER:**

**ROLL CALL:** Pursuant to Idaho Code 74-204(4), all agenda items are action items, and a vote may be taken on these items.

**PUBLIC HEARING:**

1. ACTION ITEM: Recommendation to provide direction on public parking options, costs and funding options within the First and Washington project

**ADJOURNMENT:**

City of Ketchum

November 18, 2024

Joint Meeting of City Council and Ketchum Urban Renewal Agency

**RECOMMENDATION TO PROVIDE DIRECTION ON PUBLIC PARKING OPTIONS, COSTS AND FUNDING OPTIONS WITHIN THE FIRST AND WASHINGTON PROJECT**

**Introduction**

This report provides the following information to assist the City Council and KURA in the decision to include and fund public parking within the First + Washington workforce housing project:

- Background and analysis conducted in Spring 2023 for public parking in proposed project
- Updated public parking options and costs
- Options for funding public parking and available KURA funding
- Potential operational measures for implementation

As presented in this report, there are several public parking and funding options that could be incorporated into the First + Washington workforce housing project. At this juncture, staff requests the City Council and KURA decide if public parking should be included in the project, if so, the preferred option, and the approach to funding. If there is support to include and fund public parking, staff will return with additional details. If there is no support, the project will proceed without public parking.

**Background**

Prior to issuing a request for proposals to develop the First and Washington site for workforce housing, the KURA conducted public outreach with surrounding stakeholders and the community to gather public input on the three project goals and to identify any issues of concern. The community and stakeholders supported the three goals for the project:

- **Goal 1.** Provide local, affordable workforce housing downtown, particularly for professionals and those essential to a strong, diverse downtown economy.
- **Goal 2.** Provide structured public parking in anticipation of long-term downtown growth and development.
- **Goal 3.** Provide active ground floor opportunities to maintain the vibrancy of downtown.

During the public engagement stakeholders and the public were concerned about the impact the development would have on parking downtown and supported the potential for sub-grade public parking that would help offset the development and maintain public parking in the area. In recognition of the public outreach, the RFP identified the three goals that any future project must meet.

### 2023 Public Parking Options

After the development team was selected, KURA hired Desman Parking Consultants and Parking Garage Design to identify different public parking configurations for consideration by the Board. The site dimensions are challenging. The width and length of the site is not conducive to the development of a functionally efficient and cost-effective parking garage. An efficient structure typically consists of 350-370 square feet per parking space. The parking options identified for this site ranged from 482-487 square feet per space. However, this is a typical site in Ketchum and one of the largest sites available for public parking. Parking is possible but the cost is higher because there is insufficient area for efficient vehicle ramps and parking spaces.

Seven parking options/configurations were identified. The cost for each option was prepared by McAlvain Contractors, one of the project contractors working with the Wood River Community Housing Trust. The footprint for the above grade and below grade parking options stayed within the site property lines. Attachment A provides the 2023 parking options/configurations and cost estimates.

In all the structured parking options, the parking on site would be shared parking between the public and residential users without dedicated residential parking. To facilitate this arrangement, the parking would be managed by either the KURA or the city. All the parking would be public parking and available on a first come first served basis. No priority, special privilege or reduced rate could be given to the residents of the development.

Of the seven options/configurations, two options, options 3 and 3A (3-1 level at grade, 2 levels below grade, 3A-1 level at grade, 1 level below grade) met the KURA goals for the project. Those options provided 93 and 54 parking spaces, respectively.

In April 2023, the KURA and City Council held a joint meeting to discuss the parking proposals and options for financing. At that time, KURA had borrowing capacity between \$4.5- \$5.0 million and a cash contribution of \$4.0 million for a total KURA contribution of \$8.5-\$9.0 million. The KURA and City Council determined the cost of a parking structure was too high in light of the number of parking spaces provided.

### **Revisiting Public Parking in the First + Washington Workforce Project**

KURA hosted a public open house in August 2024 to gather community feedback on the proposed workforce housing project design. At that meeting, options were presented to address public and employee parking concerns expressed by the community. The following options were presented for community feedback:

- Lease or purchase property in downtown core for public or employee parking
- Implement a free public valet service on Main Street. Free valet stations could be located on Main Street for easy access to businesses
- Designate easily accessible street parking areas for late night employees
- Establish a parking permit program that requires residents without parking who live in the First + Washington project to park on designated streets that do not impact customer parking for businesses
- Re-evaluate the inclusion of public parking as part of the First + Washington project
- Based on resident parking demand, allow the public to use First + Washington parking during the day

The feedback from the meeting overwhelmingly supported re-evaluating inclusion of public parking in the First + Washington project. After the public meeting, the KURA, development team and city staff moved forward with a new study and cost estimates that could incorporate public parking within the First + Washington project.

The 2024 analysis differs from the 2023 analysis in the following ways:

- The below grade footprint of the parking structure is expanded to the centerline of surrounding streets, First Street, Washington Avenue, and Second Street. In one option, the below grade footprint is expanded beyond the street centerlines and all the way across the street to the opposite curb. This change helps improve the efficiency of the garage and increase the number of parking spaces.
- Cost estimates have been developed by two contractors, Conrad Brothers and McAlvain Construction.
- Desman Parking and Garage Design Consultants prepared 5 potential options. A peer review of the Desman options was conducted by KPFF Engineers, and a sixth option was identified.
- Five options eliminated the Washington Blvd commercial square footage and used the ground floor for parking.

Attachment B provides design details and cost estimates for the 2024 proposed options. The following summarizes the six options presented for consideration:

	Proposed Project	Desman					KPFF
	Original	Option 1	Option 2	Option 3	Option 4	Option 5	Option 6
	One level of parking at grade for residents	One level of parking at grade, one level parking below grade	One level of parking at grade, one level below grade	One level of parking at grade, two levels below grade	One level of parking at grade, one level below grade, one level above grade	One level of parking at grade, one level below grade extending to curb line	One level of parking at grade, two levels below grade
Units	66	66	66	66	43	66	66
Stalls at Grade	44	28	28	28	32	51	0
Below Grade Stalls		76	77	157	122	143	195
Total Stall Count	44	104	105	185	154	194	195
Compact Stall Count	0	8	11	20	24	7	0
Compact Stall Percentage	0%	8%	10%	11%	16%	4%	0%
Garage SF	N/A	49,920	49,920	83,265	69,215	75,755	65,618
Efficiency	N/A	480	475	450	449	390	337
Floor-to-floor height	N/A	10'-6"	10'-6"	10'-6"	10'-6"	10'6"	9'-6"
Parking Clearance	N/A	8'-6"	8'-6"	8'-6"	8'-6"	8'6"	7'-6"
Retail SF	3425	0	0	0	0	0	3000
Lobby/Amenity SF	1494	2200	1900	2100	0	0	2000
Total Construction Cost		\$12,200,000	\$12,600,000	\$19,600,000	\$17,300,000	\$22,510,518	\$19,600,000
Soft Cost Estimate		\$2,896,000	\$2,989,000	\$4,649,000	\$4,103,000	\$5,402,524	\$4,649,000
Total Cost		\$15,096,000	\$15,589,000	\$24,249,000	\$21,403,000	\$27,913,042	\$24,249,000
Public \$/stall		\$145,154	\$148,467	\$131,076	\$138,981	\$143,882	\$124,354

The cost estimates are based on preliminary plans and would be refined as construction plans are developed. When evaluating the options, the KPFF option 6 provides the greatest number of spaces at the lowest cost per space. The efficiency is 337 square feet per space, in line with the typical 350-370 square feet per space for public parking garages. In addition, this option preserves the commercial and lobby amenity on the ground floor of the project. Option 5, which involves excavating to the curb line of the adjacent street, involves significant unknowns related to relocation of utilities, potential shoring of buildings fronting the streets and significant street closures.

**Financing Option**

The estimated cost of Option 6 is \$24 million. Financing options assumed the cost of a structure at \$21 million. In the event the Council and KURA support this level of expenditure, staff will work with the development team to value engineer the structure cost. A \$21 million structure could be financed by the city issuing a Certificate of

Participation (COP) and establishment of a Local Improvement District (LID) in addition to a KURA financial commitment. A COP is a method of funding used by government agencies for construction of public facilities. It consists of lease financing to offset the debt payment for the public facility. A COP does not require voter approval. An LID can be created by the city for the purpose of constructing and financing the cost and expense of improvements within the designated district. Properties within an LID are assessed to fund the public improvement.

Using the COP and LID approach to financing, the following summarizes the parking structure financing plan:

- KURA cash contribution of \$4.0 million
- \$8.5 million Certificate of Participation issued by the City of Ketchum with a 20-year term.
- City leases the structure to KURA and KURA pays the \$639k annual debt service until 2030.
- After 2030, City pays debt service using projected tax increment revenue returning to city after KURA district expires.
- Local Improvement District (LID) is established and issues \$8.5m in debt for a 15-year period.
- LID funds \$778k annually with debt service for 15 years.

As illustrated in Table 1, the LID concept could consist of two zones with different assessment rates.

Zone 1 properties would be assessed \$0.29 per square feet and Zone 2 properties would be assessed \$0.14 per square feet. Table 2 provides an example of the annual cost for properties in the two zones.

	<b>Square Feet</b>	<b>Cost per Sq Ft</b>	<b>LID Annual Cost</b>
<b>Sawtooth Club</b>	2755.79	0.29 \$	797.02
<b>Chapter One</b>	527.59	0.29 \$	152.59
<b>Village Market</b>	26664.91	0.29 \$	7,711.95
<b>Wells Fargo Bank</b>	10937.42	0.14 \$	1,581.65
<b>Gather Yoga Studio</b>	5496.33	0.14 \$	794.82

**Available KURA Funding**

Attachment C and Attachment D provide projected KURA revenue available for capital projects and identifies the list of potential projects KURA has targeted for funding. Currently, the KURA has committed \$820,000 for Bluebird infrastructure, \$7.0 million towards First + Washington infrastructure, and \$500,000 towards plans for First + Washinton. The funds for the plans would be reimbursed once the project obtains entitlements. Attachment E illustrates the availability of funding should the KURA provide \$4.0 million towards the parking structure and pay the debt service until 2030. With the KURA contribution, no funds will be available for capital projects such as sidewalks or other workforce housing infrastructure for four years, until FY29. Funds could be available for capital projects in FY29 and FY30. As shown in Attachment E, in FY28, there is a projected funding deficit. The KURA budget along with debit service and payments would be structured to resolve the projected deficit.

**Alternative Parking Mitigation Measures**

In the event the City Council and KURA decide inclusion of public parking in the First + Washinton project is not financially feasible, staff will pursue other operational mitigation measures such as those identified at the KURA public open house. Measures to be explored include but are not limited to:

- Identify properties in downtown core available for public or employee parking
- Explore free public valet service on Main Street. Free valet stations could be located on Main Street for easy access to businesses
- Designate easily accessible street parking areas for late night employees
- Establish a parking permit program that requires residents without parking who live in the First + Washington project to park on designated streets that do not impact customer parking for businesses
- Based on resident parking demand, allow the public to use First + Washington parking during the day
- Continue funding and installing missing and new sidewalks and lighting to improve pedestrian safety

**Conclusion**

- The site at First and Washington is constrained resulting in an inefficient below or above grade parking structure. While a structure can be constructed, the cost of a structure is significant because of the site size and dimensions. However, the site reflects the dimensions of a standard city block in Ketchum and is one of largest sites available in the downtown area.
- In 2023 seven parking options and related costs were explored and in 2024, six new options with costs are identified. The most cost-effective option provides 195 parking spaces at an estimated construction cost of \$24.2 million. This translates into \$124,126 per space.
- Financing can consist of a combination of KURA funding, city issuance of a certificate of participation and creation of a local improvement district to fund the parking structure.
- If the city council and KURA determine a parking structure at this location is not financially feasible, staff will pursue operational parking mitigation measures.

## **Recommendation**

Staff recommends the city council and KURA provide direction on the following:

- Evaluate the 2024 parking structure options and determine if public parking should be included in the First + Washington project.
- If parking should be included, provide direction on the preferred parking option.
- Provide direction on the proposed financing options.

## March/April 2023 Parking Options

Option	Number of Spaces	Number of Parking Levels	Number of Residential Levels	Cost Estimate	Cost Per Space
Option 1	93	2 levels above grade, 1 level at grade	1 level	\$10,548,868	\$113,428
Option 1A	54	1 level above grade, 1 level at grade	2 levels	\$7,698,868	\$142,571
Option 2	93	1 level above grade, 1 level at grade, 1 level below grade	2 levels	\$12,349,096	\$132,785
Option 3	93	1 level at grade, 2 levels below grade	3 levels	\$13,568,747	\$145,900
Option 3A	54	1 level at grade, one level below grade	3 levels	\$9,448,868	\$174,979
Option 4	31	1 level at grade	3 levels	\$4,898,868	\$158,028
Option 4A	49-17 public spaces, 32 dedicated residential spaces	1 level at grade	3 levels	\$4,898,868	\$288,168

**MOMORANDUM**

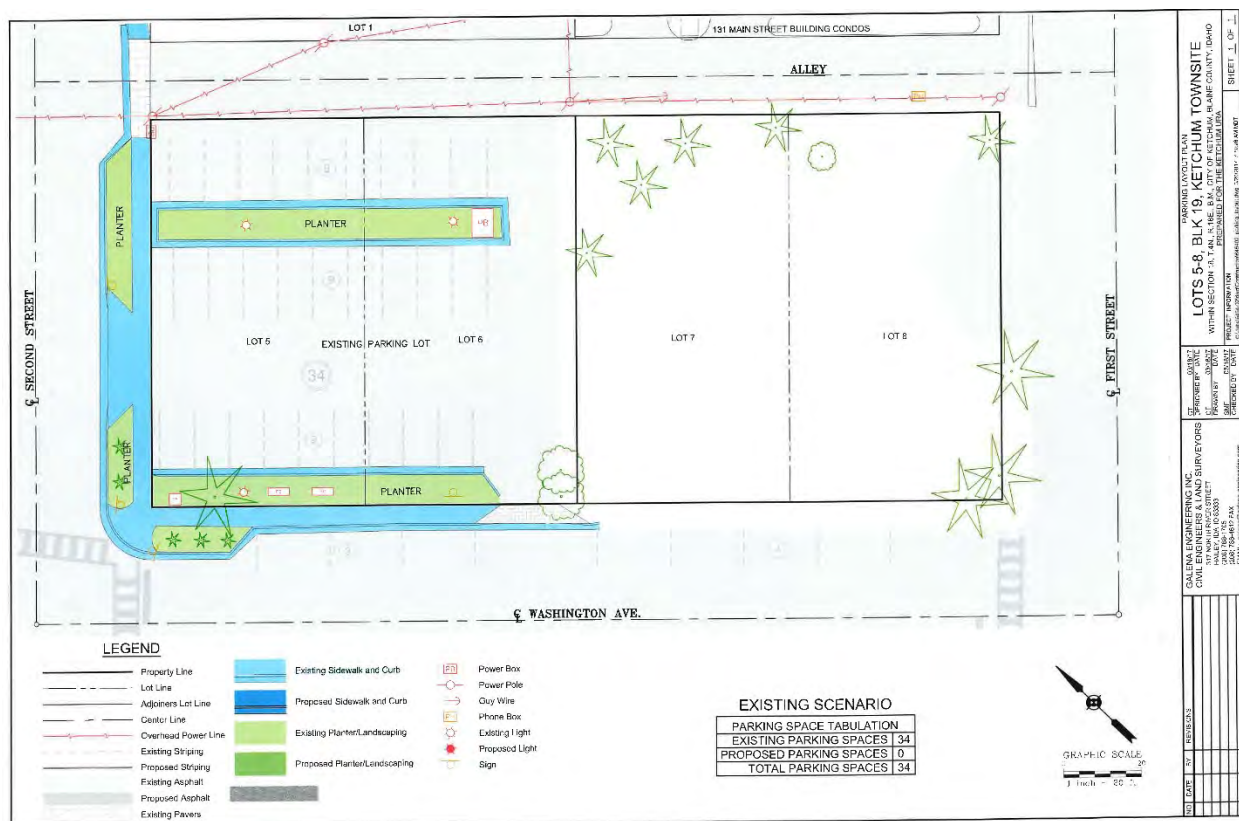

TO: Suzanne Frick, KURA Executive Director

FROM: Scot Martin, DESMAN Senior Planner

RE: First & Washington Parking Garage Concept Plans

DATE: March 9, 2023

DESMAN has been hired by the Ketchum Urban Renewal Authority (KURA) to develop concept plans for a proposed parking garage to be located at First Street and Washington Avenue in downtown Ketchum. The site for the proposed garage is currently a parking lot with approximately 60 spaces (Lots 5, 6, 7 and 8). The site is approximately 100' wide and 220' long. Refer to the site/survey plan from Galena Engineering Inc. below.

Given setback requirements, the maximum building footprint is 92' x 210'. The width of the site is not conducive to the development of a functionally efficient and cost-effective parking garage at this location. Currently envisioned is ground floor commercial space with limited parking, up to two full levels of parking and residential development below the parking and/or commercial development. The maximum building height is 52 feet.

The original concepts for the site developed by Pivot North Architects are Options A and B. Option A provides one level of surface parking with 44 parking spaces and retail/commercial, a bike room, lobby/amenity space and trash/mechanical on the ground level with three floors of residential above with a combination of studio, one- and two-bedroom deed restricted units. Option B contains the same amenities on the ground level with 20 parking spaces and a speed ramp down to two levels of below-grade containing 71 parking spaces. KURA has requested that DESMAN develop the following six concepts for the site:

1. Commercial space with limited parking on the ground level with one and two levels of parking above, and deed-restricted housing above the parking (Options 1 and 1A).
2. Commercial space with limited parking on the ground level with one level of parking below grade and one level of parking above the commercial space, and deed-restricted housing above the upper level of parking (Option 2).
3. Commercial space with limited parking on the ground level with one level or two levels of below-grade parking with deed-restricted housing above the commercial space (Option 3).
4. Surface parking with commercial space on the ground level with deed-restricted housing above (Option 4).

Following are the concept plans developed by DESMAN for the purpose of preliminary pricing and a KURA Board decision on which option, if any, to further pursue based on the feasibility of the parking and its anticipated cost. **Option 1** provides 93 parking space on three levels, all above grade, with one floor of residential above the parking. **Option 1A** provides 54 parking spaces on two levels, all above grade, with two floors of residential above the parking.

**Option 2** provides 93 parking space on three levels with one level below grade, one level at grade with commercial space, and one level above grade, and two floors of residential development above the upper level of parking.

**Option 3** provides 93 parking spaces on three levels with limited parking and commercial space on the ground level, two levels of below-grade parking, and three floors of residential above the commercial space and limited parking on the ground level. **Option 3A** provides 54 parking spaces with limited parking and commercial space on the ground level, one level of below-grade parking, and three floors of residential above the commercial space and parking on the ground level.

**Option 4** provides 31 surface parking spaces and commercial/other space at grade with three floors residential above the commercial/other space. The elimination of the ramps to access the parking below and above the grade levels allows for more parking in a tandem layout. Tandem parking is generally suitable for residential parking only.

Vehicle ingress/egress is from Washington Avenue and the alley for Options 1, 1A, 3, 3A and 4. Vehicle ingress/egress is from Washington Avenue and Second Street for Option 2. The alley access is not feasible with this option given the location of the ramp down to the lower parking level(s). There are two code-required stairs and one elevator provided with each option. Short-span column spacing is assumed for each of the options based on supporting the residential development above with heavier loads. The footprints of the full parking levels (B2, B1, 2 and 3) vary slightly. The above-grade levels are 92'-0" x 204'-4" with eight-inch spandrels. The below-grade levels are 92'-8" x 205'-0" with 12-inch walls. The square footage of the full parking levels is approximately 18,798 square feet and 18,997 square feet, respectively. The parking efficiency for 39 spaces per level is 482 square feet per space and 487 square feet per space,

respectively. An efficient parking garage layout with short-span column spacing is typically in the range of 350 to 375 square feet per space.

The grade-level parking and circulation on Options 1, 1A, 2, 3 and 3A measure approximately 7,412 square feet. Given only 15 spaces on this level the parking efficiency is 494 square feet per space. The grade-level parking and circulation on Option 4 measures approximately 11,370 square feet. Given 31 spaces on this level the parking efficiency is 367 square feet per space. The tandem parking improves the parking efficiency for this option. The total commercial space provided in Options 1, 1A, 2, 3 and 3A is 5,000 square feet. The total commercial/other space provided in Option 4 is 6,800 square feet. The depth of some of this space may not be conducive to commercial development and the space could represent more viable bicycle parking, storage space, trash, mechanical/electrical or another unspecified use.

Parking and circulation dimensions are indicated on the concept plans. The end-bay drive aisles are slightly wider than the standard 24'-0" drive aisles at 27'-0", which improves the right turns onto and off the 30'-0" wide ramp. Most of the parking spaces are 9'-0" wide in each option. There are a few narrower spaces in each option where the available space for parking warranted them.

**DETAILED BUDGET**

PARKING OPTION REVIEW

MIRROR PROPOSAL WITH NEW HARD COSTS

Assumptions:

- a. All soft costs will need to be re-evaluated with updated/current cost
- b. Soft costs have been held at the same proposed cost included in the Proposal
- c. Ground floor parking has been allocated to public parking, this is a difference from the Proposal
- d. All contractor cost have been allocated by above- or below-grade lines and include all costs as GC in Proposal estimate
- e. Costs are based on today's dollars and may change until an agreement is in place and construction commences
- f. All parking is assumed to be public in this analysis (no parking is allocated to residential)
- g. All soft cost are additive to the residential only model, cost allocation may need to be adjusted to better allocate soft cost to proper user/owner

PARKING OPTION REVIEW

MIRROR PROPOSAL WITH NEW HARD COSTS

Assumptions:

- a. All soft costs will need to be re-evaluated with updated/current cost
- b. Soft costs have been held at the same proposed cost included in the Proposal
- c. Ground floor parking has been allocated to public parking, this is a difference from the Proposal
- d. All contractor cost have been allocated by above- or below-grade lines and include all costs as GC in Proposal estimate
- e. Costs are based on today's dollars and may change until an agreement is in place and construction commences
- f. All parking is assumed to be public in this analysis (no parking is allocated to residential)
- g. All soft cost are additive to the residential only model, cost allocation may need to be adjusted to better allocate soft cost to proper user/owner

# 1<sup>st</sup> and Washington

## Conceptual Budget Proposal

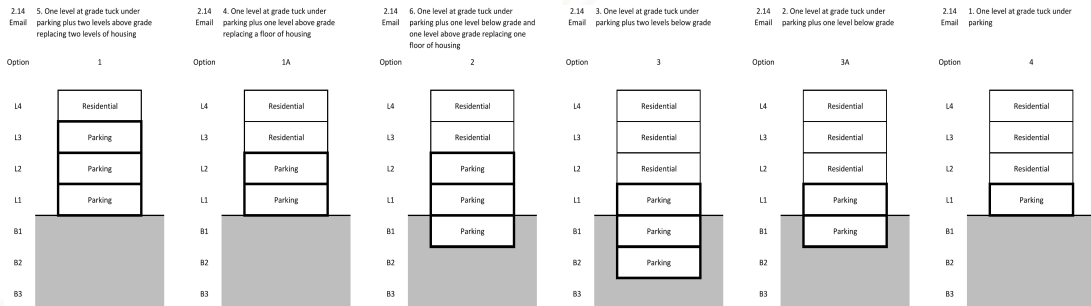

### PROJECT DESCRIPTION

The following conceptual budget is provided for the 1<sup>st</sup> & Washington residential and parking project in Ketchum, ID. The basis of pricing is the concept drawing package provided by DESMAN Design Management and includes (6) options, each with wood framed residential over concrete parking structure.

**This budget includes the concrete structure parking levels only. All costs associated with the residential scope have been excluded from this pricing.**

### PROGRAM

OPTIONS	1	1A	2	3	3A	4	QTY
AG Parking	57,195	38,130	38,130	19,065	19,065	19,065	SF

B2 Parking	0	0 </td <td>0</td> <td>19,065</td> <td>0</td> <td>0</td> <td>SF</td>	0	19,065	0	0	SF
<b>Total</b>	<b>57,195</b>	<b>38,130</b>	<b>57,195</b>	<b>57,195</b>	<b>38,130</b>	<b>19,065</b>	<b>SF</b>
Stalls	93	54	93	93	54	31	EA

### PROJECT SPECIFIC EXCLUSIONS

1. Design fees
2. Builders risk insurance
3. Impact fees
4. Building permit(s)
5. Utility connection & relocation fees
6. Escalation / design contingency
7. Preconstruction services
8. Mechanical ventilation at above grade parking levels
9. Overexcavation or rock blasting
10. Dewatering
11. Remediation of contaminated subsurface soils
12. Deep foundations

**OPTIONS SUMMARY**

2.14 5. One level at grade tuck under  
Email parking plus two levels above grade  
replacing two levels of housing

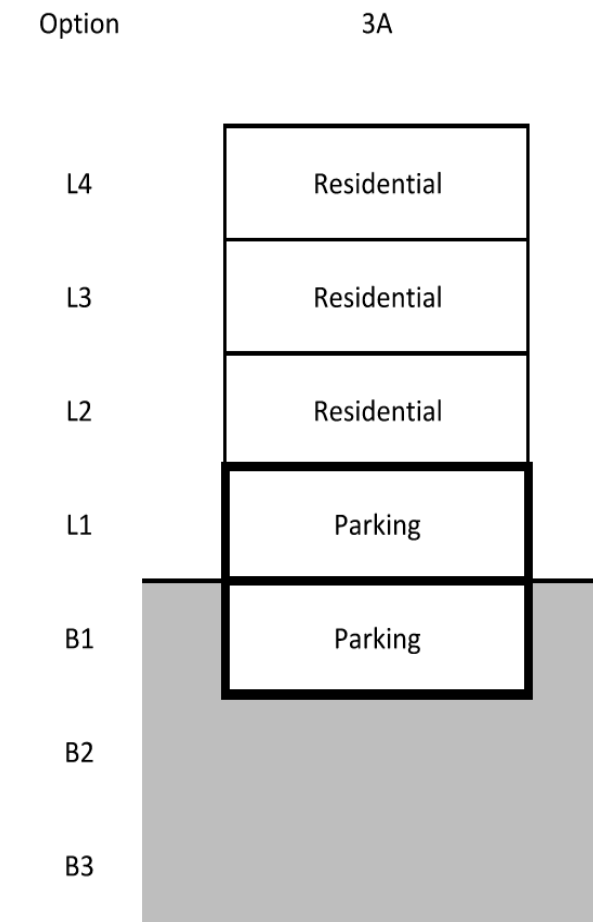

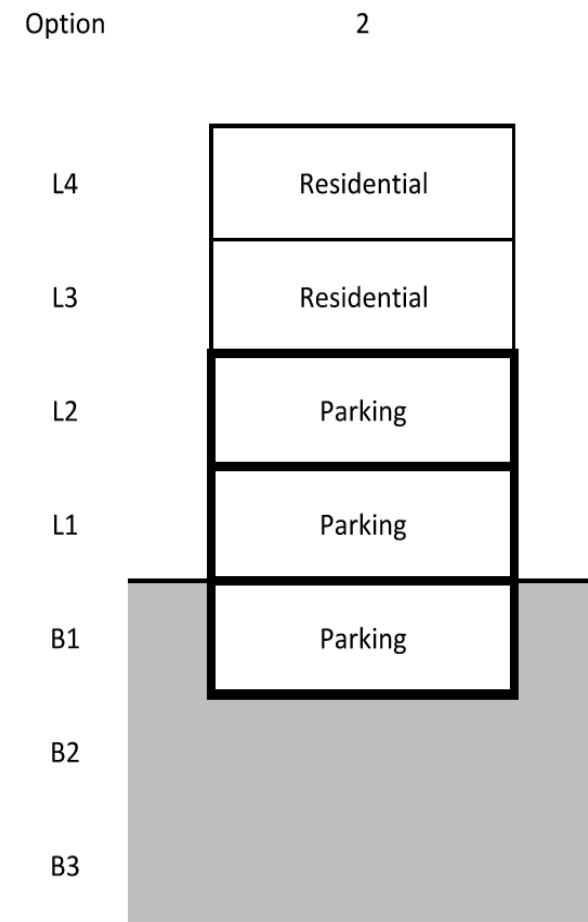

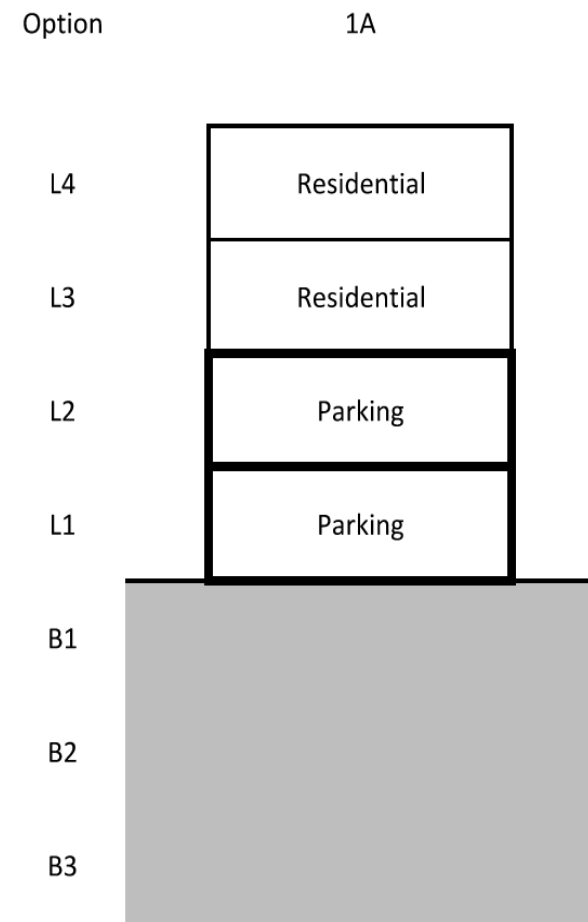

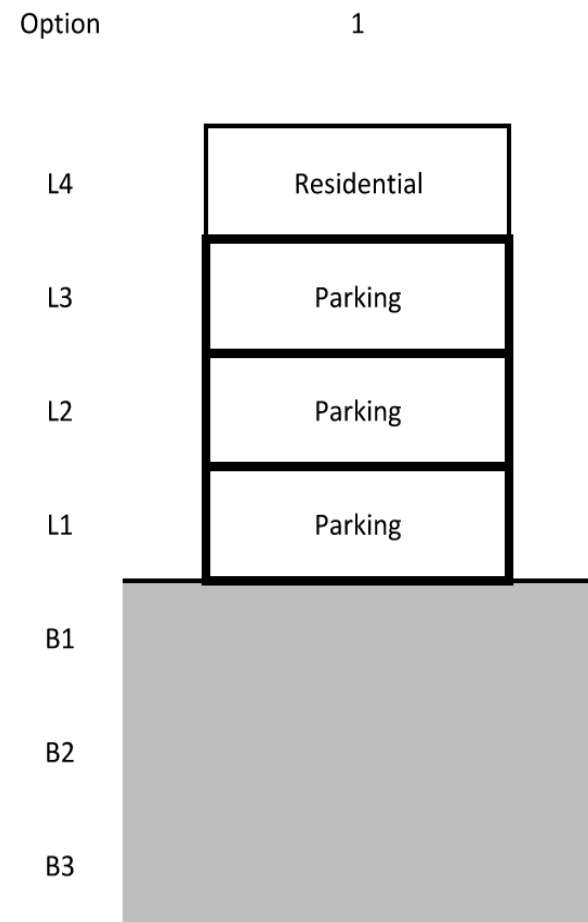

2.14 4. One level at grade tuck under  
Email parking plus one level above grade  
replacing a floor of housing

2.14 6. One level at grade tuck under  
Email parking plus one level below grade and  
one level above grade replacing one  
floor of housing

2.14 3. One level at grade tuck under  
Email parking plus two levels below grade

2.14 2. One level at grade tuck under  
Email parking plus one level below grade

2.14 1. One level at grade tuck under  
Email parking

## Attachment B

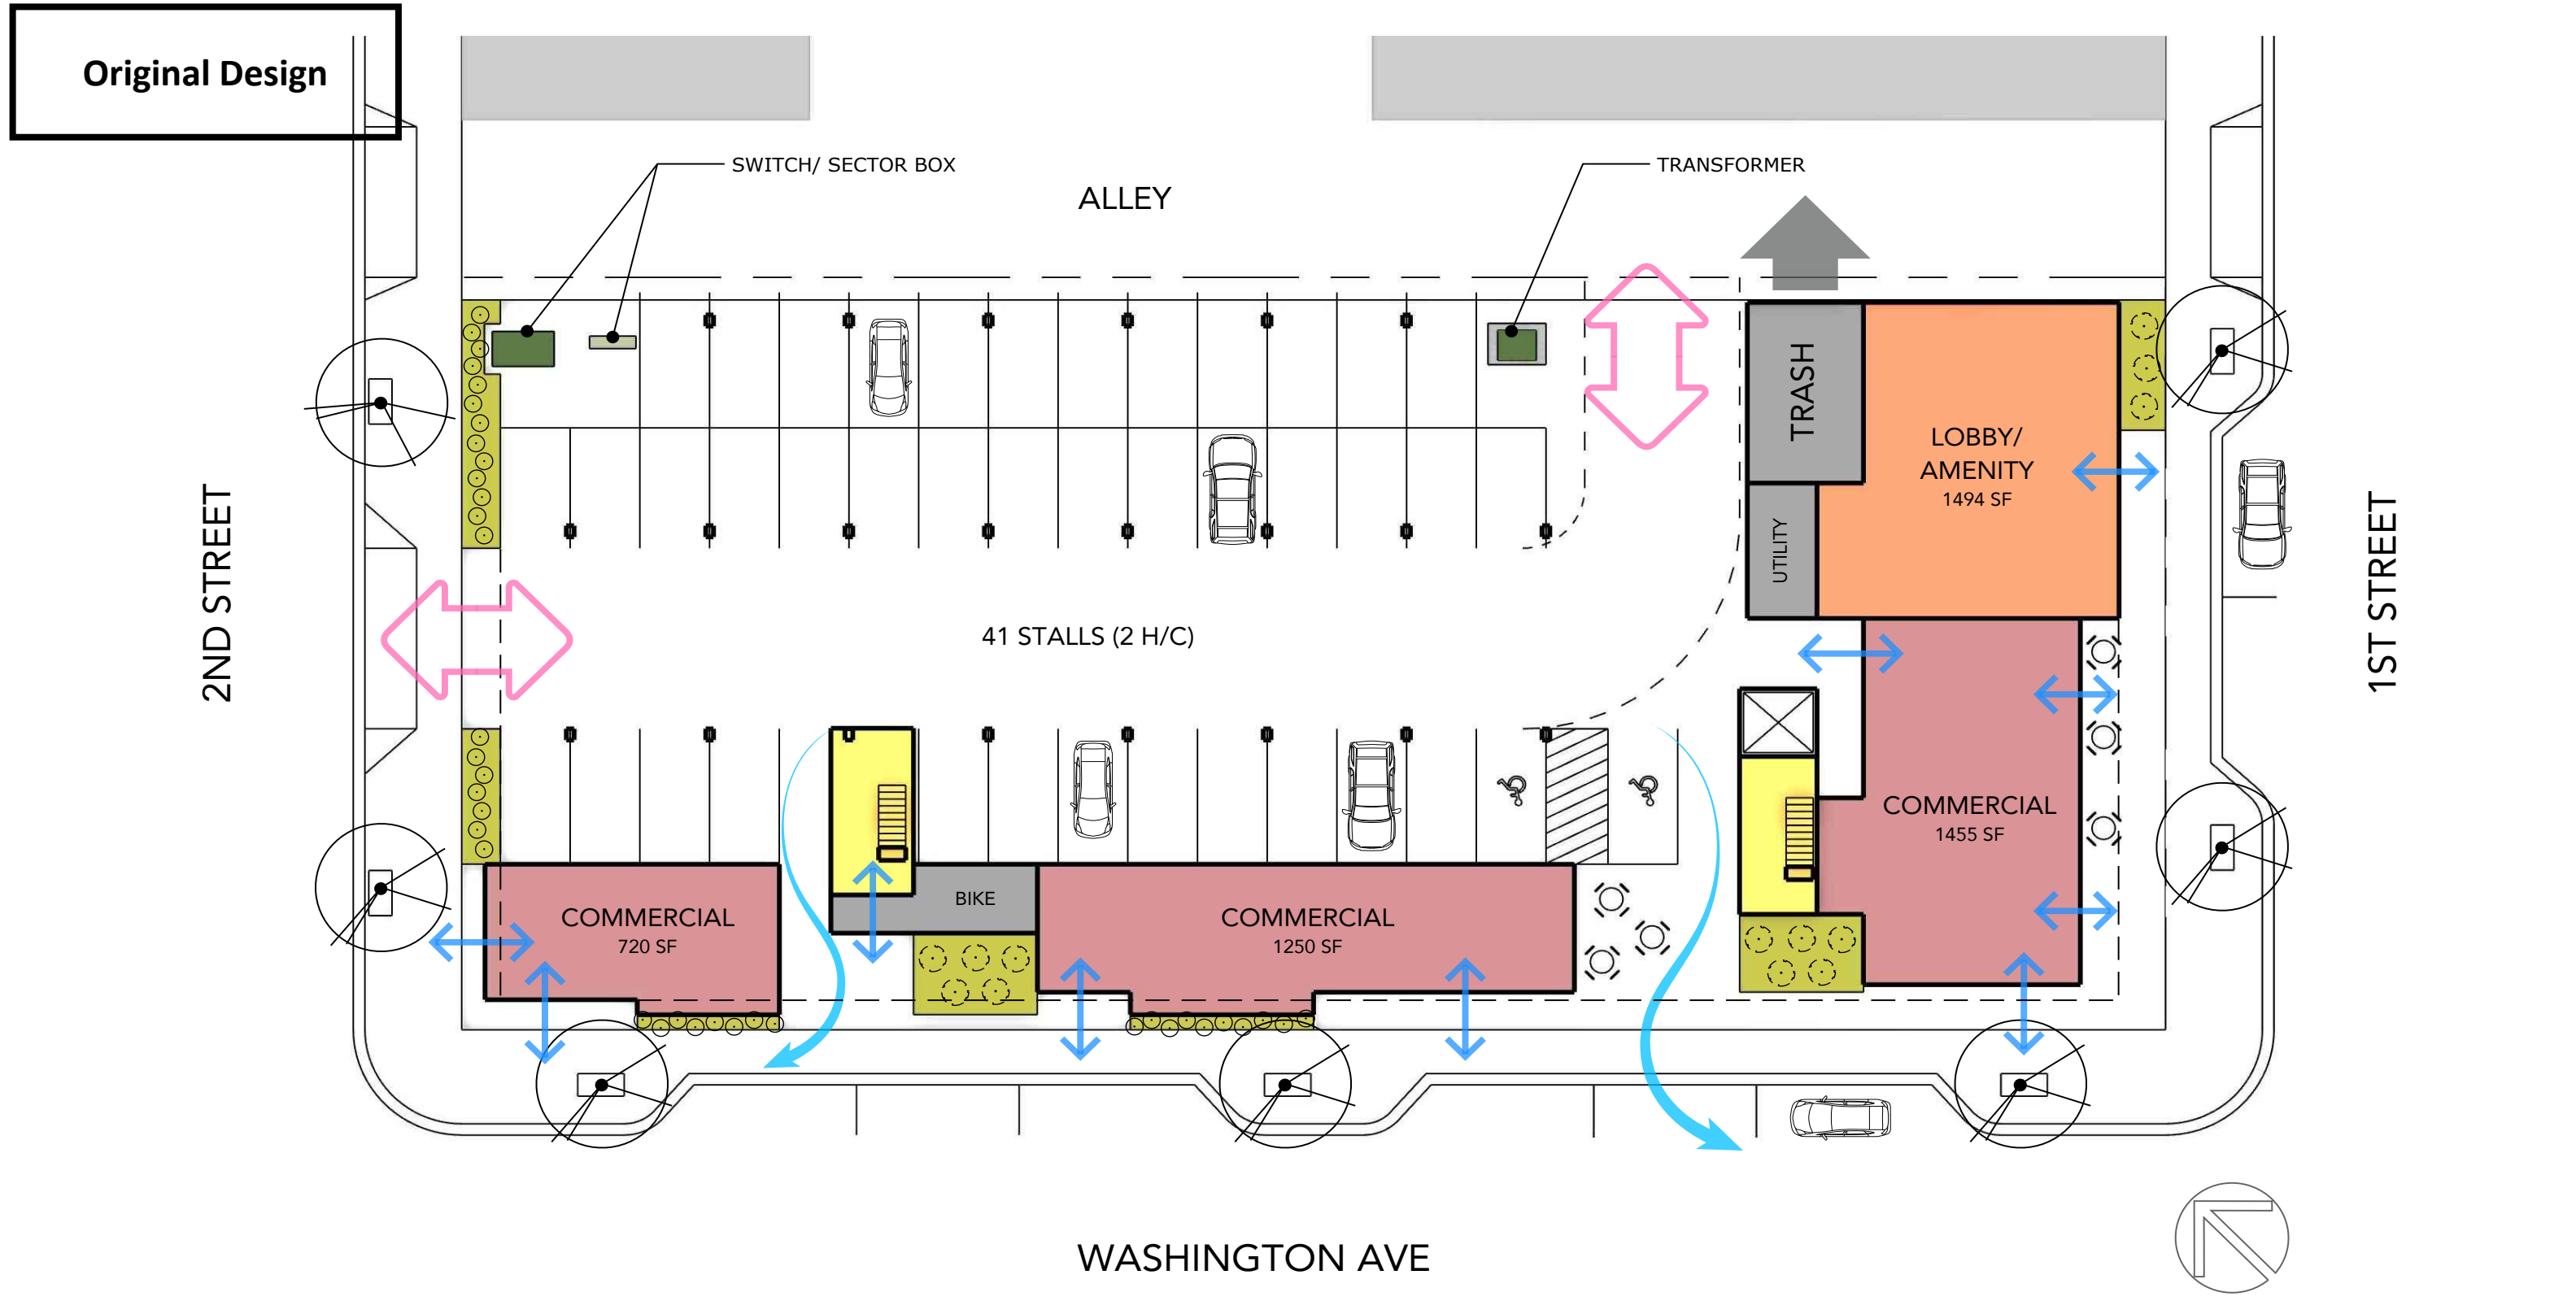

### 1<sup>st</sup> and Washington Project Update and Timeline

The development team has worked to refine the parking design in response to the community’s July 24<sup>th</sup> Public Workshop feedback. Below is a summary of key milestones:

- **July 24th Public Workshop:** Gathered valuable feedback about the community’s desire to retain onsite public parking and pause the advancement of the project entitlement process.
- **Pause in Project Advancement:** In response to public concerns, the project was paused to study below-grade parking options and evaluate associated costs.
- **Desman Design Management:** On August 29th, Desman provided four new parking design alternatives for the project.
- **Pricing and Feedback:** These options were priced by the contractor in early October.
- **Pricing Concerns:** The initial pricing feedback indicated that the proposed designs were not cost-effective enough to meet the project’s financial goals.
- **Redesign Efforts:** In response to pricing concerns the development team suggested engaging KPFF’s Seattle based parking design group.
- **Development of Fifth Parking Option:** The new design includes:
  - **Increased Parking Stall Count:** A higher number of parking stalls to better meet the needs of the community.
  - **Improved Stall Efficiency:** More efficient use of space within the parking structure.
  - **Enhanced Street Frontage:** Expanded retail and residential lobby space along the street front, improving both functionality and the pedestrian experience.

**OPTION #1:** One Level Below 12'6" - 1.5:1 Layback on Second and Washington. Road Closure on Second. Vertical with Soil Nails at First Street. Street Level Parking with Three Levels Residential above.

**OPTION #2:** One Level Below - 12'6" Vertical with Soil Nails at Second, Washington, and First. Single Travel Lanes. Street Level Parking with Three Levels Residential above.

**OPTION #3:** Two Levels Below - 25' Vertical with Soil Nails at Second, Washington, and First. Single Travel Lanes. Street Level Parking with Three Levels Residential above.

**OPTION #4:** One Level Below with Street Level Parking, and 2nd Level Parking - 12'-6" Vertical with Soil Nails at Second, Washington, and First. Single Travel Lanes. Plus Two Levels Residential above.

**OPTION #5:** This is a pricing exercise that uses our preliminary First & Washington parking prices to account for additional square footage in excavation, extending from curb to curb. The term "curb to curb" refers to First St., Washington St., and Second St., where excavation will extend to the opposing sidewalk curb. Options 1-4 only covered excavation up to the center of the road on First St., Washington St., and Second St.
