

COMMUNITY LIFE, INFRASTRUCTURE AND PUBLIC PROPERTY (CLIPP) COMMITTEE MEETING AGENDA

June 01, 2026 at 6:00 PM

Kronenwetter Municipal Center - 1582 Kronenwetter Drive Board Room (Lower Level)

1. CALL MEETING TO ORDER

- A. Pledge of Allegiance
- B. Roll Call

2. PUBLIC COMMENT

Please be advised per State Statute Section 19.84(2), information will be received from the public. It is the policy of this Village that Public Comment will take no longer than 15 minutes with a three-minute time period, per person, with time extension per the Chief Presiding Officer's discretion. Be further advised that there may be limited discussion on the information received, however, no action will be taken under public comments.

3. APPROVAL OF MINUTES - DISCUSSION AND POSSIBLE ACTION

- C.** May 4, 2026 CLIPP Committee Meeting Minutes

4. REPORTS AND DISCUSSIONS

- D.** Police Chief Report
- E.** Fire Chief Report
- F.** Public Works Director Report

5. OLD BUSINESS - DISCUSSION AND POSSIBLE ACTION

- G.** Kronenwetter Flanner/Jamroz Rehabilitation Bids

6. NEW BUSINESS - DISCUSSION AND POSSIBLE ACTION

- H.** Municipal Garage Building Proposals
- I.** Buska Park Fundraising Update
- J.** Kronenwetter Parks Committee
- K.** Trails and Leisure for Village Owned Property on Lea Rd.

7. NEXT MEETING: July 6, 2026

8. CONSIDERATION OF ITEMS FOR FUTURE AGENDA

9. ADJOURNMENT

NOTE: Requests from persons with disabilities who need assistance to participate in this meeting or hearing should be made at least 24 hours in advance to the Village Clerk's office at (715) 693-4200 during business hours.

COMMUNITY LIFE, INFRASTRUCTURE AND PUBLIC PROPERTY (CLIPP) COMMITTEE MEETING MINUTES

May 04, 2026 at 6:00 PM

Kronenwetter Municipal Center - 1582 Kronenwetter Drive Board Room (Lower Level)

1. CALL MEETING TO ORDER

Village Clerk Jennifer Poyer called the May 4, 2026 CLIPP Committee Meeting to order at 6 p.m.

A. Pledge of Allegiance

Those in attendance were invited to stand and recite the Pledge of Allegiance.

B. Roll Call

PRESENT: *President Dan Joling, Trustee Aaron Myszka, Garrett Lysne, Patty Tikalsky, Paul Mijal*

STAFF: *Administrator James Davel, Public Works Director Greg Ulman, Finance Director John Jacobs, Police Chief Terry McHugh, Fire Chief Theresa O'Brien*

2. SELECTION OF A CHAIRPERSON

Trustee Myska was nominated for the chairperson position by Patty Tikalsky and seconded by President Joling. Trustee Myszka elected chairperson by acclamation.

3. SELECTION OF A VICE-CHAIRPERSON

Garrett Lysne was nominated for the vice-chairperson position by President Joling and seconded by Patty Tikalsky. Nomination approved with a voice vote. 4:0:1 – Lysne abstained from the vote.

4. COMMITTEE DUTIES AND RESPONSIBILITIES

C. CLIPP Committee Duties and Responsibilities

Administrator Davel reviewed the duties and responsibilities of the CLIPP Committee. He mentioned the committee should set priorities. He mentioned possible focuses for the committee members for the upcoming months.

5. PUBLIC COMMENT

David Baker-690 Happy Hollow Road, Kronenwetter, WI 54455- *Baker's comment was read by the clerk and attached to the minutes.*

Patty Tikalsky – 2153 Peach Road, Kronenwetter, WI 54455 – *Tikalsky thanked the Kronenwetter Police Department, Fire Department and Public Works Department regarding the work and aid they offered during the recent severe weather events.*

6. APPROVAL OF MINUTES - DISCUSSION AND POSSIBLE ACTION

D. April 6, 2026 CLIPP Committee Meeting Minutes

Motion by Joling/Mijal to approve the minutes. Motion carried by voice vote. 5:0.

7. REPORTS AND DISCUSSIONS

E. Police Chief Report

Police Chief McHugh presented his report and answered a question regarding the recent hirings of new police officers.

F. Fire Chief Report

Fire Chief O'Brien said April 2026 is the busiest month she has experienced. She said there were 24 fire calls and 55 med calls. She also said the live burn training was a success for her department members.

G. Public Works Director Report

Public Works Director Ulman presented his report. He updated the committee on the effects of the recent flooding and tornado. He said he met with Lee Recreation to develop a design proposal for Buska Park. He answered questions from the committee regarding the cost of Country Pumpers, the capability of a sewer vacuum truck and park donations. Finance Director Jacobs and Administrator Davel answered questions regarding the budget and the Bulk Item Drop-off event.

H. Community Development, Planning and Zoning Director

Administrator Davel presented the Community Development Director report. He said Peter Wegner is no longer with the Village. He said the Village is currently hiring a new director and planning tech.

I. Complaint Log

Administrator Davel presented the report. He said complaint numbers have gone up.

8. OLD BUSINESS - DISCUSSION AND POSSIBLE ACTION

J. Wausau Metropolitan Planning Organization Draft Model E-Bike Ordinance

Motion by Joling/Mijal to support the language of the Wausau Metropolitan Planning Organization Draft Model E-Bike Ordinance. Motion carried by voice vote. 5:0. Administrator Davel gave synopsis of the comments from residents regarding e-bikes in the Village. Police Chief McHugh said he had no concerns about the ordinance language. The committee surmised it was an agreeable set of standards that could be uniform throughout our area.

K. Discussion of Possible Truck Route on Kowalski Road

Public Works Director Ulman gave a review of this topic. He spoke of the possibilities regarding a truck route on Village roads. He said at this time there is no need for a truck route, but it could be revisited when the distribution center is completed.

L. Quit Claim Deed Proposed Marathon County Highway Shop Facility

Motion by Mijal/Lysne to recommend the Village Board approve the Quit Claim Deed for Tax Parcel ID Number: 145-2707-023-0994.

Administrator Davel presented this agenda item. He spoke of why the committee should approve it and recommend it to the Village Board. Marathon County staff members were on hand to discuss the County Highway Garage Facility project. Administrator Lance Leonhard spoke to what the county has done to help move the project forward and benefit the Village residents. He said the county would make a better effort to attend Village meetings on this subject. County staff commented on the timeline of the project; the need for the quit claim deed; and possible benefits of the facility for Kronenwetter. They answered questions from committee members.

9. NEW BUSINESS - DISCUSSION AND POSSIBLE ACTION

M. Kronenwetter Flanner/Jamroz Rehabilitation Bids

Public Works Director Ulman asked that this item be tabled until further information can be collected. He said the bids came in a lot higher than expected. Item was tabled until next meeting.

10. NEXT MEETING: June 1, 2026

11. CONSIDERATION OF ITEMS FOR FUTURE AGENDA

Finance Director Jacobs said he is hoping to present the CIP with street information to CLIPP in July.

12. ADJOURNMENT

Motion by Lysne/Joling to adjourn. Motion carried by voice vote. 5:0.

Meeting adjourned at 7:13 p.m.

Public Comment for May 4, 2026 CLIPP Meeting

David Baker

690 Happy Hollow Road

Kronenwetter, WI

Thank you to each of you for your willingness to serve the Village. This public comment pertains specifically to Item 8L Quit Claim Deed and more generally to the topic of the planning process for the proposed new Marathon County Highway Facility.

The County has requested that the Village consider transferring 2 Village owned pieces of property that are adjacent to the proposed Highway facility to the County. Please consider making this transfer contingent upon or tied to the County's agreement to take jurisdiction of and upgrade Highway Business 51.

During my short tenure as Village President, I had the opportunity to meet with Marathon County Administrator Lance Leonhard regarding the proposed Highway Facility. In that meeting I requested that the County consider several items as they moved forward in order for them to be a good neighbor and gain general acceptance for the proposed facility among Kronenwetter residents.

- 1) Treat the immediate neighbors fairly. At the time we met, the County Board was planning to build a fence around the Scheftgen's property and leave their house in place. The Village subsequently changed its zoning code to require a 500 foot setback from residential property for the newly adopted Highway Facility use. The County reached a fair resolution with the Scheftgens shortly after.
- 2) I asked that the burdens caused by the proposed facility be shared among all County residents, not just by Kronenwetter residents. I acknowledged to Administrator Leonhard that the County is unwilling to pay a PILOT payment in lieu of taxes because it would set a precedent for all County property, but asked that the County consider taking steps which would lessen the burden on Kronenwetter residents and taxpayer due to the proposed facility. These steps could include items 3 through 5.
- 3) Consider placing a well on the property to provide water for the brining operation in order not to strain our water system. An additional waste water meter would be added for any well water that entered the sewer system. Kronenwetter would supply all water for domestic water use in the new shop. At the time, the County was amenable to this approach.
- 4) Have the County and Village agree to make a jurisdictional transfer of Highway 51 from Village Way to Kowalski Road from the Village to the County. This would shift the cost of maintaining this section of road to the County and thus the impact of the additional truck traffic would not be borne solely by Kronenwetter taxpayers.
- 5) Have the County upgrade the 2 lane sections of Highway 51 from Village Way to Kowalski Road to 4 lanes. This would minimize the impact on Kronenwetter residents from the increased truck traffic,

increased safety issues and potential commuting delays that would occur as trucks pull in and out of the facility.

The stated motivations for moving the Highway facility from its current location included safety and time delay impacts on the County Highway employees and Wausau residents. It does not make sense to just transfer these issues to Kronenwetter without upgrading Business 51 to mitigate the problems which will undoubtedly arise without the 4 lane upgrade.

Newly elected Supervisor/Trustee Coyle serves on the Marathon County Infrastructure Committee so he will have a seat at the table as these items are discussed at the County Standing Committee level.

Thank you for your time and consideration.

David Baker

KRONENWETTER POLICE DEPARTMENT

Office of the Chief of Police Executive Summary for June 2026 CLIPP

TO: CLIPP COMMITTEE MEMBERS

DEPARTMENT ACTIVITY SUMMARY – In April, we handled 724 total calls for service. Some highlights included the following:

- An OWI arrest after the officer stopped a reckless vehicle on I-39 on an attempt to locate call. The driver was arrested for third offense OWI.
- Four domestic disturbances:
 - One subject was arrested for disorderly conduct and felony bail jumping. A second subject who was not part of the domestic relationship but was involved in the disturbance was cited for disorderly conduct.
 - One subject was arrested for battery and misdemeanor bail jumping
 - A case was referred to the DA's Office for a verbal dispute that included one subject in possession of marijuana.
 - The last case was a subject arrested for disorderly conduct.
- PD responded to 32 medical emergencies and 18 fire related calls in April. As Chief O'Brien can tell you, the FD experienced a very busy month.
- Two subjects were arrested for outstanding warrants. One was a misdemeanor warrant pick up at a residence and the other was a felony Dept. of Corrections warrant that was the result of a traffic stop.
- We had an overnight burglary to 51 Bar and Grill. The suspects in this case also hit a few taverns in Mountain Bay's jurisdiction and in each case, they targeted the gaming machines. We coordinated with MBPD, who developed leads, and served a search warrant at the suspect's residence. Both suspects confessed to the various burglaries and are facing numerous charges.

DEPARTMENT PERSONNEL ISSUES & STATUS – Our first new hire, Officer Austin Wadzinski, just started on Friday, June 6. Officer Wadzinski is a US Marine Corps veteran and has five years of law enforcement experience. He was with the Lincoln County Sheriff's office prior to coming to KPD. Officer Wadzinski served four years in the USMC and left as a Sgt, E-5. We're very excited about bringing him on board and I believe he's going to be a great addition to the team! He has started field training, where he rides with a Field Training Officer, and is currently working second shift. The second hire will begin on October 1st and we will start working on his background investigation in the near future.

We recently had two officers graduate from the *First Line Supervisor* course, which is a prerequisite in our promotional matrix. This is an excellent two-week school that prepares patrol officers for the transition to first line supervisor. The school is part of the DOJ's leadership course curriculum. As my time continues to wind down over the next couple of years, it's important to develop future leaders as part of our succession plan. We were fortunate to have a course hosted in Stevens Point because it saves us a ton of money in lodging and travel costs.

CURRENT GRANTS AND EQUIPMENT — We have already received one of our two new squad cars from the installer, and it is road ready. The second squad car is done, but with staffing and a priority investigation taking precedence, we haven't been able to pick it up yet. We were very fortunate to receive a used squad car radio from the Sheriff's Office for the second vehicle. We ran into an unforeseen situation and needed a radio. As always, the Marathon County Sheriff's Office was there for us. They are an incredible partner to the Village, and they saved taxpayers a lot of money by furnishing us with this used radio.

KRONENWETTER FIRE DEPARTMENT
APRIL 2026

Fire Training:

This month's fire training utilized the donated structures on Old Hwy 51 and covered the following topics:

- Search & Rescue
- Ventilation
- Radio Communications
- Live Fire Training – instructed by NTC

EMS Training:

- Scene safety drill
- EMS scenario drills utilizing donated structure

Incident Response Summary

Fire Calls

The department responded to 24 fire-related incidents, including:

- 1 grass/brush fire
- 4 weather-related incidents
- 7 CO/gas/fire alarms within Kronenwetter
- 6 structure fires
- 5 structure fire dispatches mutual aid for Riverside Fire
- 1 structure fire dispatches mutual aid for Mosinee

EMS Calls

The department handled 57 EMS calls

Vehicle/Equipment Updates:

- Monthly apparatus and equipment maintenance completed
- Annual oil changes/DOT inspections initiated

Personnel Development

The department continues to invest in member training and certification:

- 2 members enrolled in Firefighter I/Hazmat Operations
- 4 members completed Certified Driver/Operator – Aerial
- 1 member enrolled in Fire Inspector I
- 3 members enrolled in Fire and Emergency Services Instructor

Recent & Upcoming Events:

- Live fire training in acquired structures completed on April 25, 2026

Grant Funding & Upcoming Applications:

The department is actively pursuing external funding opportunities to support equipment, training enhancements and operational readiness. Current and upcoming grant initiatives include:

- Wisconsin DNR Fire Fighter Protection (FFP) grant – Targeting wildland fire equipment and communication equipment upgrades.
- FEMA Assistance to Firefighters Grant (AFG) – preparing applications focused on PPE, SCBA replacements, and firefighter safety equipment.
- Firehouse Subs Grant – Seeking funding for water and ice rescue equipment to enhance technical rescue capabilities.
- WPS Rewarding Responders Grant – Application planned for the purchase of a thermal imaging camera.

These grant efforts aim to reduce budget impact while ensuring the department maintains modern, reliable equipment and continues to support high-quality training for personnel.

Report to CLIPP

Item Name: Director of Public Works and Utilities Report

Meeting Date: June 1, 2026

Referring Body:

Committee Contact:

Staff Contact: Greg Ulman

Report Prepared by: Greg Ulman

- Public Works crews have been busy putting plow equipment away for the season, fixing/installing culverts, and restoring the sand and gravel that was washed away at the municipal pond.
- The utility crew wrapped up the spring flushing season, as well have been busy with digger hotline locating.
- The numbers for the sewage going through our lift station system has been falling back towards normal. Even though it is still elevated, it's a trend in the right direction.
- There were a few contractor errors on Kronenwetter Dr. with the new road, in particular south of the Bull Junior bridge. Crews will be out this week and next week re-pouring concrete on the bridge approaches as well as laying new asphalt where there was a shortage of materials on the project, as well as elevations which were put in too low.
- Greg and Kim Coyle have been working on Community Development with the absence of a director. We are keeping the department running while performing our other duties. Items will keep being presented to the Plan Commission, and residents will still see permits being processed. We do ask for patience as some items may take longer to process as we are more limited with time and knowledge compared to a department with a full staff. We would also like to acknowledge the Marathon County Zoning department, especially Shad Harvey, who has been a tremendous resource during this time.
- The Buska Park rendering came back from the design department at Lee Recreation, attached below. We are excited to start the fundraising for the new playground with a goal of \$200,000. Flyers are available and signs will be put up at Buska Park with QR codes to make it easy to donate.

Report to CLIPP

Agenda Item: Discussion and Possible Action: Flanner/Jamroz Rehabilitation Bids
Meeting Date: June 1, 2026
Referring Body: CLIPP
Committee Contact:
Staff Contact: Greg Ulman
Report Prepared by: Greg Ulman

AGENDA ITEM: Discussion and Possible Action: Flanner/Jamroz Rehabilitation Bids

OBJECTIVE(S): To inform the CLIPP committee on the status of the project.

HISTORY/BACKGROUND: In May staff informed the CLIPP committee of the bid pricing and that it was over budget, however we may have some money coming back to the Village with the Kronenwetter Dr. project deficient in a few areas. Now that we have more firm numbers I can say we will not have enough money to proceed with the Flanner/Jamroz project as intended. We will instead be completing a change order (more on that next month) and will have even less of a budget to spend on Flanner/Jamroz. We can come back to this project in the future as we have the engineering plans in our control.

RECOMMENDED ACTION: No action needed.

Report to CLIPP

Agenda Item: RFP Garage Building
Meeting Date: June 1, 2026
Referring Body: CLIPP
Committee Contact:
Staff Contact: Greg Ulman
Report Prepared by: Greg Ulman

AGENDA ITEM: RFP Garage Building

OBJECTIVE(S): To select a contractor for building the 6-Bay equipment garage.

HISTORY/BACKGROUND: With the shortage of indoor vehicle storage space, staff brought this item to CLIPP, Utility Committee, and the Village Board last year, as well as having on our CIP. The garage will house up to 4 police cars which currently sit outside, parks equipment which sits in the fire bays during winter, as well as a new sewer and hoist truck for the water and sewer department. Without this garage we will not be able to purchase the sewer and hoist truck.

We have the budget at \$800,000 for the project with \$266,666 coming from the sewer utility and \$533,334 from the Capital Projects fund. We will not need to borrow for this project as we have enough money in both accounts to fund this project.

The contractors who submitted RFP’s are design/build contractors who will help with a design of the garage as well as build it. The contractors are as follows:

- Samuels Group
- Scherrer Construction
- S.D. Ellenbecker
- Alliance Construction
- 8 Pine
- Brickl Bros.

RECOMMENDED ACTION: Select a contractor to recommend for approval to the Village Board.

Village of Kronenwetter

Attn: Greg Ulman

1582 Kronenwetter Drive Kronenwetter, WI 54956

Re: Village of Kronenwetter Request for Proposals: New Equipment Garage

Dear Greg:

8PINE. Inc. is extremely excited to submit our proposal for the design and construction management services for the New Equipment Garage Project in Kronenwetter. We are confident that we will be a valued partner throughout the process, offering several significant advantages to your team.

-LOCAL EXPERIENCE: With 8PINE. being a close neighbor in Shawano, we consider ourselves right next door. Our team is currently managing a project at Central Wisconsin Airport, working with the Wittenberg-Birnamwood School District, and has been trusted with several projects with the DC Everest School District. We are already in your backyard and hope to continue building this amazing community.

-TEAM: We have assembled a strong and collaborative team to work on this project. Project Executive Rick Berken and Project Superintendent Luke Fochs have worked on several municipality projects. The team is local, with Luke Fochs just a few minutes down the road in Mosinee and dedicated to this project and ready to hit the ground running.

-SUPPORT: As your design and construction manager, our priority is to support your goals and vision for the Village of Kronenwetter. With several community and non-profit based projects in our portfolio, we know how to construct these facilities both on time and on budget. We also understand our role in ensuring we get the Village of Kronenwetter in their new facility as soon as possible. The Village of Kronenwetter is a core value for many families in the area, and ensuring the team maintains a tight budget will be priority #1.

Thank you for the opportunity to submit our qualifications for this exciting project. After reviewing our submission, we hope you will agree that our experience, relationships, innovative services, and-most importantly-our **PASSION** make 8PINE. INC. the best choice for your team. If you have any questions or require additional information, please do not hesitate to call.

Sincerely,

Kurt Wolfgram

Chief Growth Operations Officer

THANK YOU

Dear Greg Ulman,

Alliance Construction and Design prides itself on completing projects on time and under budget. Our mission is to provide the highest standard construction services through unwavering integrity, determination, foresight and teamwork. We have been delivering on that standard for 15 years and have finished projects for hundreds of our satisfied clients. If you would like us to put you in touch with any of them, We would be more than happy to oblige. We have full confidence that every one of our previous clients would give us nothing but ringing endorsements .

At Alliance, we know that realizing projects requires a combination of drive, skills and technical know-how. We are confident in every single member of our team and are certain our employees can handle any task or challenges they confront. Our passion for quality is laid into our foundation, starting with our employees. With more than 400 cumulative years of experience between them, our team leaders are well seasoned and prepared to tackle the obstacles that arise in project design and construction.

Unlike many of our competitors, Alliance Construction and Design offers internal design, estimating, engineering and project management. By refusing to outsource out core strengths, we maintain constant contact with the project at every step and can better deliver on-time and under-budget solutions. Our priority is always complete client satisfaction, and we deliver nothing less.

Over the last 15 years, the company has been blessed with successful growth through a thought out and planned evolution process. Employing proven management procedures and processes, Alliance has built a team that is attracting top talent in northeast Wisconsin and is being recognized by the subcontractor community as one of the premier general contractors to partner with in the region.

We would like to extend our thanks for taking the time to review our teams' qualifications as well as our proposal for your project. We look forward to working with you.

Best Regards,

Travis Zimmerman

Alliance
CONSTRUCTION & DESIGN

WHO IS ALLIANCE CONSTRUCTION & DESIGN

WHO WE ARE

Our main objective is to provide our customer with complete satisfaction. The name "Alliance" highlights how we form alliances with local tradesmen, as well as industry and field experts, and use those connections to help meet the needs of your project. Our multi-level project management helps to build a partnership with clients, contractors, and subcontractors. Ultimately, this garners excellent results and helps us exceed the clients' expectations allowing us to generate, on average, 85% repeat business from our customers.

Here at Alliance Construction and Design, we take pride in our teams that have expertise and experience in the industry. We are a dedicated, results-orientated construction company with strong leadership and innovative, problem-solving skills.

We work closely with owners and subcontractors to produce a high-quality project that is cost-effective. To reach project success, we employ a clear chain of command and responsibility, as well as practice flexibility, accountability, and single source cost control. Our reputation and customers complete satisfaction are our primary concerns.

OUR STORY

Alliance Construction was founded in 2009 by a civil engineer and a successful local businessman, both Wisconsin natives. They rented a small office in De Pere, Wisconsin and began living out their dream of running a successful construction company. The first project completed was a small room remodel for \$1,800. They then moved on to design and build a garage addition. As the workload began to increase, they hired architectural designers, salesmen, tradesmen, and project managers.

As time passed, the number of projects they had were increasing in size and frequency. By 2011, Alliance had outgrown their small office on Franklin Street in De Pere and moved to a much larger space on Orlando Drive. After again outgrowing that space, the Alliance Leadership team purchased a property and began their long-term growth in the emerging business park on the west end of Wrightstown, Wisconsin. This space allowed for both office and field growth, created a tool warehouse and fabrication shop along with a one-acre equipment yard.

Today, Alliance has completed hundreds of millions of dollars worth of projects, large and small. We are also attracting top talent from across northeast Wisconsin in the fields of project management, architectural design, field supervision and field carpentry.

"We are the construction team that's changing the industry, We're Alliance Construction & Design. Building customers' futures - one relationship at a time"

OUR VISION & MISSION

VISION

To continually go above and beyond to build solid relationships that ensure long-lasting success of our company, clients and employees.

MISSION

To provide the highest standard of design-build services through unwavering integrity, determination, foresight and teamwork.

CORE VALUES

1. Uphold the Value of Our Reputation – *Our people. Our community. Our product.*
2. Never Quit – *Do what it takes to finish the job.*
3. Forward Thinking – *Working today with and eye for next week.*
4. Team First – *Putting company and teammates' needs above our own.*

MESSAGE FROM OUR PRESIDENT

Alliance Construction and Design's rapid growth is a result of the dedication, experience and hard work of our employees. As a team, I continually challenge ourselves to deliver the most efficient, effective and high-quality design build projects.

Our principles of continuous education, training and innovation will help us continue to expand our business through repeat clientele.

Alliance designs and builds small and large projects, new structures, remodels, and renovations. There is no project that is too large or too small for our team. I take every construction project seriously and with the following goals in mind.

- Quality service
- Complete client
- On time and within budget
- Employee safety

We are looking forward to working with you.

COMPANY ORGANIZATIONAL CHART

Section 6, Item H.

TODD PARCZICK

PRESIDENT

ABOUT TODD:

As a company owner and President, Todd plays a key role in Alliance’s leadership. As President, he works closely with the entire Alliance team to determine the company’s strategic planning, visioning, operations and business development.

Todd believes strongly in a collaborative construction process from design and preconstruction through project closeout and occupancy. This includes owners, designers, community, project stakeholders, contractors, and the design team. His ability to facilitate a project from the beginning to the completion of construction has led to highly successful projects in in many markets including retail, multifamily and industrial buildings.

With more than twenty-five years of experience working in the field of engineering, Todd has extensive knowledge of high-performance building systems, foundation engineering, structural steel, wood-multistory, industrial, wastewater, integrated stand-off dust house structures PCMC/KC and is an advocate for energy-efficient buildings.

Todd has blend of skills and passions. He enjoys spending time in the outdoors riding snowmobiles and motorcycles, hunting, fishing, and whitewater rafting.

TRAVIS ZIMMERMAN

PRINCIPAL/BUSINESS DEVELOPMENT

Section 6, Item H.

ABOUT TRAVIS:

Travis contributes 38 years of experience in the construction industry to the Alliance team. He has 11 years tenured in field labor and 27 years of well seasoned management. His projects include commercial, industrial, and residential projects ranging from a few thousand dollars, to multi-million dollar projects.

With a diverse background, Travis has a proven history of developing strategic partnerships with private and public entities, implementing marketing initiatives, and working with owners and developers to further organizational goals and add to profitability through their construction projects. In his role with Alliance, Travis is responsible for developing and maintaining relationships with new and existing clients, and for identifying and pursuing potential opportunities covering Wisconsin, Minnesota and the upper Midwest.

Travis' previous work includes a broad scope of categories, but his experience is exceptionally strong retail, municipal and industrial construction. He also excels at working with concrete, masonry, steel, and carpentry projects both in new ground up and remodels.

Outside the office, Travis enjoys finding back country roads to ride his motorcycle on. He also enjoys spending time with family, friends and his two dogs.

KEVIN HAVLOVITZ

ARCHITECT

Section 6, Item H.

ABOUT KEVIN:

Kevin joined the Alliance team in 2022 with over 9 years of architectural experience. He graduated from the University of Wisconsin, Milwaukee with his bachelor's degree in architectural studies and became a Licensed Architect. Kevin's experience includes architectural design from concept to construction documents, technical knowledge of building code, and architectural visualization through rendering software.

In his role with Alliance, Kevin is responsible for the assignment of projects within the design team. He also works collaboratively throughout projects with the design team to develop and deliver a great product for the client. Kevin has focused on the efficiency and effectiveness of the team, is detail oriented, organized, and proactive.

Outside of the office, Kevin loves spending time with his growing family and friends, traveling, and various home renovation projects.

ABOUT OLIVIA:

While studying Architectural Technologies at Northeast Wisconsin Technical College, Olivia had the opportunity to work with the Alliance team as a design intern. Here she gained valuable experience in building design and architecture. After graduation, Olivia joined the Alliance team as an Architectural Designer.

Olivia most enjoys working with clients to help create aesthetically pleasing solutions to their building needs, and the gratification of watching an idea move from her mind to the built environment. Her strong problem-solving skills and creativity make Olivia an invaluable member of the Alliance team.

When not creating one-of-a-kind building designs, Olivia loves spending time with family and friends, fishing, hiking, kayaking and camping throughout Wisconsin. She also enjoys experiencing changes in the environment, culture and architecture while traveling.

OUR PROCESS

PROJECT COORDINATION

Communication is a top priority at Alliance Construction and Design. Our construction process is set up to ensure constant and clear communication with the owner throughout all stages of the project. Below is what you can expect from the Alliance project team.

WEEKLY

- Detailed weekly updates with jobsite photos and highlights from the current work in process
- 3 week look-ahead schedule that forecasts work committed over the next 3 weeks
- Issue/Action Log that lists tasks that need to be completed and team members responsibility in order to keep you project on track

BI-WEEKLY

- Site coordination meeting to review construction progress, schedule updates, financial updates, issue/action log and any other items that come up for discussion

MONTHLY

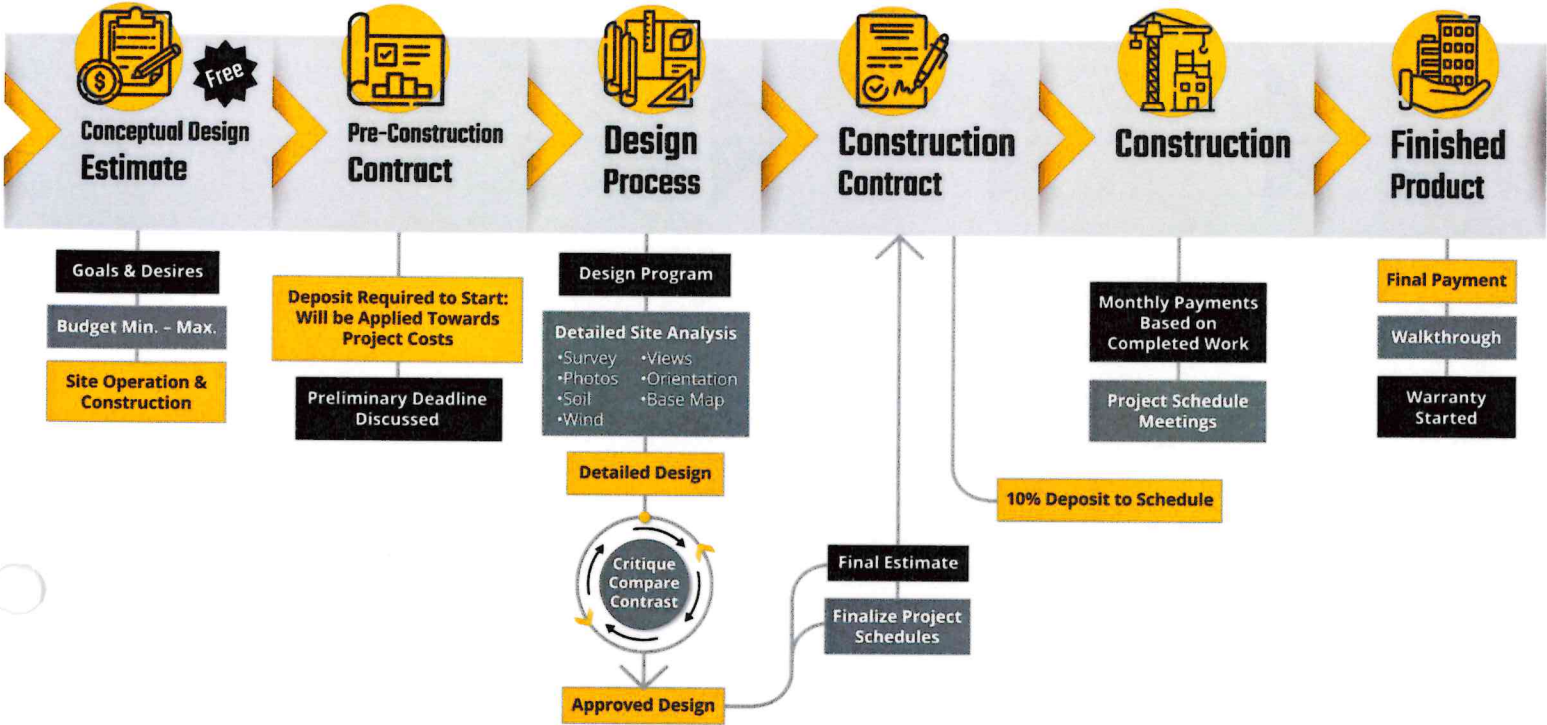

- Master (critical path) schedule review
- Project budget overview/update
- Monthly invoicing review

OWNERSHIP

- If there is anything that you would like for your team at any point, we adjust our process to fit your business needs

ALLIANCE PROJECT LIFECYCLE

Building Beyond Expectations

BUDGET PROPOSAL FOR

Kronenwetter New Equipment Garage

05/20/26

PROJECT SUMMARY

Budget proposal for a six-bay equipment garage to house large equipment in four of the bays, while the police department will look to house squad cars in two of the bays. The overall size of the garage is 65'x120' with six 14'x14' overhead doors. The equipment garage and squad car house will be separated by a 3-hour fire wall.

SCOPE OF WORK

- Division 01: General Requirements
 - Project management and site supervision.
 - Local building permit.
 - Rental equipment necessary for completion of project.
 - Construction waste removal.
- Division 03: Concrete
 - The building is designed to be constructed on a thickened edge concrete slab.
 - Concrete aprons are included in front of the overhead doors and service doors
- Division 04: Masonry
 - 8" masonry fire wall separating the large equipment for the police department vehicles.
- Division 05: Steel
 - Steel Stud Framing
 - 3-5/8" light gauge steel stud framing for walls and ceiling of Restroom.
- Division 07: Thermal and Moisture Protection
 - Insulation
 - Interior walls have R11 batt insulation.
- Division 08: Openings
 - Exterior Doors
 - The exterior service doors to be hollow metal doors with hollow metal frames.
 - Interior Doors
 - The bathroom door will be a hollow metal door and a hollow metal frame.
 - Overhead Doors
 - Insulated overhead doors with side mount operators.

Building Beyond Expectations

- Division 09: Finishes
 - Wall and Ceiling Finish
 - Bathroom to have metal liner panel on the interior and exterior.
 - Garage Area (Walls and Ceiling): White, vinyl faced fabric covering all fiberglass insulation.
 - Flooring
 - Garage floor: Smooth trowel finish and sealer.
- Division 10: Specialties
 - Fire extinguishers per code.
- Division 13: Special Construction
 - Pre-Engineered Metal Building.
 - 16' high sidewalls.
 - Standing seam metal roof.
 - Exposed fastener metal siding.
 - Full cavity building insulation, per 2021 energy code requirements.
- Division 22: Plumbing
 - Includes a single use bathroom and fixtures.
- Division 23: HVAC
 - Garage
 - (2) unit heaters in equipment bays.
 - (1) unit heater in police bay.
 - Equipment bay has sidewall mounted exhaust fan with CO/NO2 detection system and intake louver.
 - Police Bay has sidewall mounted exhaust fan with CO/NO2 detection system and intake louver.
- Division 26: Electrical
 - Electrical
 - 400 AMP 3 phase service.
 - High bay emergency lighting.
 - Exterior wall packs.
 - Wiring for overhead doors.
 - General receptacle power.
 - HVAC wiring.
- Division 31: Earthwork
 - By owner.

TOTAL PROJECT BUDGET

Total project budget is \$787,900.00

Ready to Build Your Vision?

Pahlow Masonry LLC is a leading Masonry Contractor in Northeast Wisconsin. We provide our clients with a comprehensive approach to contracting and specialize in a wide range of services. Ever since starting out as a professional Masonry Contractor in 2000, we've prioritized serving our clients' needs and satisfaction above everything else. If you're looking for quality work from a reputable company, we are ready to be a part of your project!

Since 1940

EZ Glide was founded in 1940 by my grandfather Lamb Schommer and at that time it was called Essential Products as we manufactured wood and fiber glass doors as well as small parts for the military.

We focused on garage doors in the 1960's as our main production and EZ Glide Garage Doors was established.

Currently we are transitioning from 3rd generation to 4th generation and have 35 full time employees.

EZ Glide sells and installs around 75% percent commercial garage door products and this also includes other products like fire doors, high speed doors, screen doors and security style doors.

We work out of our 50,000 square foot Little Chute WI warehouse and carry over a million dollars in perpetual inventory.

EZ Glide has a fleet of twelve install / service vehicles and we cover a 75 mile radius from our Little Chute office / warehouse on a daily basis.

EZ Glide also sells and services high speed doors, rollup fire doors and screen/security doors & gates.

Nedd Schommer / EZ Glide Doors Since 1940

Serving All Your Overhead Garage Door Needs

EZ Glide Garage Doors and Openers, located in Little Chute, Wisconsin, is a family-owned and operated company that has maintained a tradition of quality products and outstanding service for over 80 years. We employ professional and courteous technicians who take great pride in their artistry and dedication to our customers. Our pricing is competitive, and our service is second to none.

Our company continues to grow based on customer satisfaction. When you contact us, you will get quality products and an entire service team to meet all your overhead door needs. EZ Glide's reputation is based on our commitment to providing the best service at the best price.

Our experienced and well-trained technicians look forward to serving you with all your garage door needs. If you have any questions, do not hesitate to call us.

For feedback and suggestions, use our **contact page** to tell us what we're doing right or what we can improve on.

Since 1940

Commercial Door Installation Services in Northeast Wisconsin

EZ Glide Garage Doors and Openers is your premier choice for high-quality commercial garage doors in Little Chute, WI, and surrounding areas. With over 80 years of experience serving Northeast Wisconsin, we are proud to be a family and locally-owned company that provides top-notch solutions for all your commercial door needs.

Fire and Service Doors

Ensure the safety and security of your commercial property with our durable and reliable fire and service doors. Our fire doors are designed to meet safety standards and provide protection during a fire, while our service doors offer convenient access for personnel and equipment.

High-Speed Screen Doors

Enhance productivity and efficiency in your facility with our high-speed screen doors. Ideal for warehouses, manufacturing facilities, and distribution centers, our high-speed doors help streamline operations by minimizing wait times and reducing energy costs.

Glass Full-View Doors

Make a statement with our stylish and modern glass full-view doors. Our glass doors combine functionality with aesthetic appeal, perfect for storefronts, restaurants, and commercial spaces seeking to maximize natural light and visibility.

Section 6, Item H.

Screen Doors

Create a comfortable and inviting environment with our durable and versatile screen doors. Whether you need to keep insects out while allowing fresh air to flow in or provide ventilation in a warehouse or garage, our screen doors are the perfect solution.

Coiling Commercial Doors

Coiling commercial doors are perfect for businesses seeking a space-saving and efficient door solution. At EZ Glide Garage Doors and Openers, we offer a wide range of coiling commercial doors designed to meet the unique needs of businesses throughout Northeast Wisconsin.

Complete Commercial Door Repairs

At EZ Glide Garage Doors and Openers, we understand the importance of keeping your commercial doors in optimal condition to ensure your business operations' safety, security, and efficiency. That's why we offer professional commercial door repair services to address any issues you may encounter with your doors.

Reach Out to Us Today!

Ready to upgrade your commercial garage doors? Contact EZ Glide Garage Doors and Openers today at **920-788-3561** to schedule a consultation with one of our experienced professionals. With our extensive selection of commercial door options and expert installation services, we're here to help you find the perfect solution for your business.

New Equipment Garage

05/20/2026

COMPANY EXPERIENCE

Headquartered in West Salem, WI, Brickl Bros., Inc. is a true design/build general contractor. Founded in 1970 by brothers Karl, Jim and Stan Brickl, over the course of the past half-century, Brickl Bros., Inc. grew from the three founding owners to over 100 skilled construction professionals. Family-held for the first 49 years in business, the company entered 2020 – its 50th anniversary year – a newly transitioned, employee-owned company. Brickl Bros., Inc. has completed several projects throughout the tri-state area (Wisconsin, Minnesota, and Iowa) and has earned its reputation as an outstanding general contractor. The company’s vast and comprehensive project history has given Brickl Bros., Inc. the ability to complete this project efficiently and effectively to the highest of professional standards.

See the below listed contract references for projects of similar size and complexity which Brickl Bros., Inc. has completed within the last two calendar years as the prime contractor.

Project 1: Village of Holmen Plow Storage
Village of Holmen
750 Amy Drive, Holmen, WI 54636
Design-build 50’x100’ heated storage building for equipment maintenance.
Year Completed: 2025
Project Dollar Value: \$730,000.00
Project Size: 5000 SF

Project 2: Town of Strongs Prairie Addition
Town of Strongs Prairie
1588 WIS-21, Arkdale, WI 54613
New Build 60’x70’ addition to the existing shop building with interior restroom.
Year Completed: 2025
Project Dollar Value: \$450,000.00
Project Size: 4200SF

Project 3: Town of Viroqua Storage Bldg.
Town of Viroqua
E7560 County BB, Viroqua, WI 54665
New Build 50’x80’ cold storage building for vehicle storage.
Year Completed: 2023
Project Dollar Value: \$280,000.00
Project Size: 4000 SF

Project 4: Vernon County Hwy Dept. Bldg.
Vernon County Highway Dept.
1335 Railroad Ave, Viroqua, WI 54665
New build 50’x80’ heated storage building with interior office and restroom.
Year Completed: 2023
Project Dollar Value: \$350,000.00
Project Size: 4000 SF

KEY PERSONNEL

General Superintendent:

Jeremy Pryne	Years with Brickl Bros., Inc.:	18
	Years in Construction Industry:	24

As the General Superintendent, Jeremy is responsible for ensuring the quality, timeliness, efficiency, and safety for all construction projects at Brickl Bros., Inc. Jeremy is engaged in all projects from the planning stages through to completion, and his primary objective is to achieve maximum client satisfaction. Jeremy may assign project-specific site superintendents/supervisors as he deems necessary for different projects. These appointed site superintendents/supervisors report directly to Jeremy on all aspects of the on-going projects and will act to ensure that all project activities are carried out according to Brickl Bros., Inc. standards for work and excellence.

Construction Operations Manager:

Wade Olson	Years with Brickl Bros., Inc.:	29
	Years in Construction Industry:	32

As the Construction Operations Director, Wade is responsible for managing logistics, field operations and project management/superintendent staff. He also directs resource planning for all Brickl Bros., Inc. projects. Wade’s role is instrumental in ensuring the professionalism and capability of the Brickl Bros., Inc. workforce, the timely and efficient execution of projects, and the quality of work. He is OSHA 30 certified and has hazards certifications such as: Fall, Caught-in or -between, Struck-by, Electrocutation Hazards, Scaffold Competent Man, Forklift Rough Terrain, Rigging and Signaling, 1st Aid, and CPR/AED. He has a B.A. from the University of Wisconsin at River Falls and an M.B.A. from Viterbo University.

Project Manager:

Mitch Romens	Years with Brickl Bros., Inc.:	8
	Years in Construction Industry:	25

As a Project Manager, Mitch is responsible for managing all day-to-day and onsite activities needed to complete the project. Mitch has decades of experience across the residential and commercial sectors, and He has managed ground-up builds ranging from custom homes and commercial developments. He has experience coordinating architects, engineers, and trade subcontractors under both traditional and design-build delivery methods. His hands-on experience with site coordination, permitting, scheduling, procurement, and owner communication makes him well-equipped to guide a design-build vehicle storage project from early concept through final turnover.

Brickl Bros., Inc. proposes the following for materials, labor, project management, site supervision, and equipment necessary to construct a new 65'x120' six bay garage per the RFP provided by the Village of Kronenwetter. Based on the attached Schematic Design Drawings dated 05/18/2026 and details below.

SCOPE OF WORK

Division 01 – General Conditions

- Includes Engineering and Design to produce Architectural, Civil, Mechanical, Electrical, and Plumbing 'For Construction' drawings.
- Includes Construction Management Services to host a public bid for the project work.
- Includes Project Management, Supervision, Equipment, Temporary Facilities, and Dumpsters as needed to complete this scope of work.

Division 03 – Concrete

- Furnish and Install 7800 SF of 6" thick (4000 psi) concrete floor w/ #4 rebar 18" OCEW.
- Furnish and Install 24"x18" grade beam below perimeter walls and firewall.
- Includes 2" foam insulation, 6mil vapor barrier underneath slab, and (1) coat of sealer.
- Furnish and Install 1200 SF of 10' wide 6" thick concrete apron at South side of building.
- Furnish and Install (4) pipe bollards at each overhead door opening, with bollard covers.

Division 04 – Masonry

- Furnish and Install 65 LF of 8" thick Light-weight CMU wall, to be a 3-HR Firewall, built to underside of steel roofing.

Division 06 – Woods and Plastics

- Furnish and Install 4-ply 2x6 48" OC Ladder Frame Walls, 16' high, for perimeter walls.
- Furnish and Install 2x4 16" OC Stud Frame Walls, 8' high, for interior walls.
- Furnish and Install 2x10 16" OC Joist Frame Mezzanine, above interior walls.
- Furnish and Install 2x4 24" OC Pre-Engineered Roof Trusses, 65' wide, with bracing for roof framing.

Division 07 – Thermal and Moisture Protection

- Furnish and Install 7/16" Zip System R-Sheathing (R-3) on exterior walls.
- Furnish and Install 5/8" CDX Plywood Sheathing for roof sheathing.
- Furnish and Install 29ga. Corrugated Steel Siding with exposed fasteners on exterior walls.
- Includes a 4' high steel siding wainscot in second color on exterior walls.
- Furnish and Install 24ga. Snap-Loc Standing Seam Steel Roofing with concealed fasteners.
- Furnish and Install 6" Unfaced Batt Insulation (R-21) for exterior walls.
- Furnish and Install Blown-in Insulation (R-49) for attic space.

Division 08 – Openings

- Furnish and Install (6) 14'x14' "Clopay 3720" Overhead Doors, or equal, with operators and remotes.
- Furnish and Install (4) Exterior Hollow Metal Doors and Frames with standard hardware.
- Furnish and Install (2) Fire-Rated Hollow Metal Doors and Frames with standard hardware.

Division 09 – Finishes

- Furnish and Install 29ga. Corrugated Steel Liner with exposed fasteners for Garage walls and ceilings.
- Furnish and Install E.P.I. Liner with trims for Restroom walls and ceilings.
- Furnish and Install ½” Plywood Wall Liner for Utility Room walls and Ceilings.

Division 10 – Specialties

- Furnish and Install (1) Standard set Toilet Accessories for Restroom.
- Furnish and Install (3) Bracket-mounted #10 Fire Extinguishers for Garage Areas.

Division 22 – Plumbing

- Furnish and Install Trench Drains and Catch Basin for Garage Areas.
- Furnish and Install (1) Floor Mounted Toilet Fixture.
- Furnish and Install (1) Wall Mounted Sink Fixture.
- Furnish and Install (1) 24”x24” Mop Basin.
- Includes Connections for Water and Sewer Services.

Division 23 – Heating, Ventilating, and Air Conditioning

- Furnish and Install (2) Electric Unit Heaters, rated at 100,000 BTU for Village Garage.
- Furnish and Install (1) Electric Unit Heater, rated at 100,000 BTU for Police Garage.
- Furnish and Install (1) Electric Wall Heater, rated at 3500 BTU for Restroom.
- Furnish and Install (1) Electric Wall Heater, rated at 3500 BTU for Utility Room.
- Furnish and Install (2) Wall Mounted Exhaust Fans, for Village Garage.
- Furnish and Install (1) Wall Mounted Exhaust Fan, for Police Garage.
- Furnish and Install (1) Ceiling Mounted Exhaust Fan, for Restroom.
- Furnish and Install (1) Ceiling Mounted Exhaust Fan, for Utility Room.
- Includes gas piping, ducting, and thermostats for HVAC systems.

Division 26 – Electrical

- Furnish and Install (10) Exterior Light Fixtures.
- Furnish and Install (10) Wall Mounted Duplex Outlets for Village Garage.
- Furnish and Install (4) Wall Mounted Duplex Outlets for Police Garage.
- Furnish and Install (8) Ceiling Mounted LED Shop Light Fixtures for Village Garage.
- Furnish and Install (4) Ceiling Mounted LED Shop Light Fixtures for Police Garage.
- Furnish and Install (1) Ceiling Mounted LED Can Light Fixture for Restroom.
- Furnish and Install (1) Ceiling Mounted LED Can Light Fixture for Utility Room.
- Includes 200-amp Service and Connections for Electrical Service.

Division 31 – Earthwork

- Excavation and Backfill for building foundations.
- Trenching and Backfill for Utilities and Electrical Service.

BID AMOUNT:

Project Budget:

\$1,030,500.00

Price is good for 30 days, subject to change based on final design, construction drawings, and specifications.

EXCLUSIONS

This proposal excludes the following:

- Owner to pay for any and all special inspections.
- Builders risk insurance.
- Permit applications and permit fees.
- Septic Systems and/or Wells, assumed to be on sanitary sewer and domestic water services.
- Site preparation, clearing, and grubbing.
- Unsuitable soils remediation, including rock blasting/removal and/or dewatering.
- Seeding or sodding.
- All other items not specified.

SITE LAYOUT

Village of Kronenwetter – New Garage Building

General Notes:
 -The Village Public Works Department will prep the site to any specific grade needed for construction and will do the fine restoration of the site.
 -The exterior/interior construction materials of the building will vary throughout the design process, which Village staff will plan out with the designer.

Concrete Scope:
 -Building slab to be 6" (4000 PSI) Finished Concrete, with rebar grid at 18" OCEW.
 -Building slab to have 24"x18" grade beam at perimeter and firewall.
 -Building apron to be 6" (4000 PSI) Broomed Concrete, with rebar grid at 18" OCEW.
 -Building apron to have 9"x9" thickened edge at perimeter.
 -2" under-slab foam insulation, 6 mil. Poly vapor barrier, and (1) coat of sealer.
 -(4) Pipe Bollards located at each overhead door, with bollard covers.

Mechanical Scope:
 -(2) Electric Powered Unit Heaters, rated at 100,000 BTU for Village Garage.
 -(1) Electric Powered Unit Heater, rated at 100,000 BTU for Police Garage.
 -(1) Electric Wall Heater, rated at 3500 BTU for Restroom.
 -(1) Electric Wall Heater, rated at 3500 BTU for Utility Room.
 -(2) Wall Mounted Exhaust Fans, for Village Garage.
 -(1) Wall Mounted Exhaust Fan, for Police Garage.
 -(1) Ceiling Mounted Exhaust Fan, for Restroom.
 -(1) Ceiling Mounted Exhaust Fan, for Utility Room.

Plumbing Scope:
 -Trench Drains and Catch Basin for Garage Areas.
 -(1) Floor Mounted Toilet Fixture.
 -(1) Wall Mounted Sink Fixture.
 -(1) 24"x24" Mop Basin.
 -Connections for Water and Sewer Services.

Electrical Scope:
 -(10) Exterior Light Fixtures.
 -(10) Wall Mounted Duplex Outlets for Village Garage.
 -(4) Wall Mounted Duplex Outlets for Police Garage.
 -(8) Ceiling Mounted LED Shop Light Fixtures for Village Garage.
 -(4) Ceiling Mounted LED Shop Light Fixtures for Police Garage.
 -(1) Ceiling Mounted LED Can Light Fixture for Restroom.
 -(1) Ceiling Mounted LED Can Light Fixture for Utility Room.
 -200-amp Service and Connections for Electrical Service.

Title: Vice - President

S.D. Ellenbecker Inc.
GENERAL CONTRACTOR
ATHENS, WISCONSIN

S.D. Ellenbecker Inc. has extensive experience delivering new construction projects that closely align with the scope, complexity, and functionality of new equipment garage facilities. Since our founding in 1968, our team has successfully completed a wide range of commercial, municipal, and industrial projects, including maintenance facilities, storage buildings, shop spaces, and ground-up developments requiring coordinated planning, structural work, and durable interior and exterior finishes.

Our experience includes site development, concrete foundations and floor slabs, pre-engineered and conventional wood and steel building systems, overhead door installations, mechanical/electrical/plumbing coordination, equipment-ready utility layouts, and building designs focused on long-term durability and operational efficiency. We routinely manage projects that require detailed scheduling, subcontractor oversight, code compliance, and close collaboration with owners, architects, engineers, and local municipalities.

Through more than five decades in the construction industry, S.D. Ellenbecker Inc. has built a reputation for delivering durable, high-quality facilities on time and within budget. Our background in commercial and industrial construction ensures we understand the unique demands of equipment garage projects—including heavy-duty concrete work, vehicle and equipment access requirements, storage functionality, ventilation needs, and long-term performance—making us well-qualified to perform the work associated with this new equipment garage project.

Proposal Submitted To: Village of Kronenwetter

Project to be completed at: Municipal Center Location – 1582 Kronenwetter drive Kronenwetter, WI 54455

We offer to provide all necessary labor and materials for the successful completion of: **65’ x 120’ x 16’ tall new equipment garage.**

- Includes a state submitted Lester Building package.
- Includes concrete slab for building with a thickened grade beam around perimeter and required reinforcing.
- Includes 3 hour drywall fire rated separation wall between the police bays and municipal bays.
- Includes 6 overhead doors and 2 exterior walk doors.
- Includes a liner panel finish in the interior of the building.
- Includes 1 ADA bathroom with 1 toilet and 1 sink.
- Includes 1 hot water heater and 1 mop sink per code.
- Includes all necessary electrical work including lights, power for OH doors, necessary outlets and a 200 amp service.
- Includes (2) gas powered unit heaters and necessary HVAC equipment per state code.
- Includes 6” gutters on building.

- Excludes building excavation and any final restoration needed (by owner)

Total Budgetary Cost: \$799,780.00

Notes:

- *This quote does not provide for additional costs involved with heated concrete, cold weather protection for concrete or any other material involved with any cold weather protection. Any weather-related costs, variations to the work or changes in the Total Estimated Cost will be reflected in written change orders.*
- *Excludes supply and installation of anchor bolts that will be set into concrete foundation per plans (if applicable).*
- *Due to the volatility of the current economy and market, the prices provided in this proposal will only be valid for 15 days. If this proposal is not accepted and returned within 15 days from the date of this proposal or if the work is not completed by (2023), SDE Inc. Reserves the right to withdraw the proposal or modify the terms of the proposal/contract.*
- *SDE Inc. will not be held liable for any project delays due to Covid-19 or any other epidemics or pandemics.*
- *SDE will be closed from June 29th to July 5th, 2026. No work will be performed during this time.*

PAYMENT TERMS: NET 15 DAYS / FINANCE CHARGE OF 1 ½% PER MONTH ON PAST DUE ACCOUNTS

All material is guaranteed to be as specified and the above work to be performed in accordance with the drawings and specifications submitted for above work and completed in a substantial workmanlike manner. **Any alteration or deviation from above specifications involving extra costs will be executed upon written or verbal orders and will become an extra charge over and above the estimate.** All agreements are contingent upon strikes, accidents or delays beyond our control. **Owners to carry fire, tornado and other necessary insurance for Project.** Public Liability Insurance and Worker’s Compensation Insurance on the above work to be is taken out by S.D. Ellenbecker Inc.

Respectfully submitted by Contractor:
S.D. Ellenbecker, Inc.
 1222 Mount View Lane
 Athens, WI 54411

By: Jared Diers

Dated: 5/20/26

Note: This Proposal may be withdrawn by us if not accepted as a Contract by Owner within 15 days of the date signed above.
 Note: The parties hereby acknowledge that there is a page 2 of this Proposal/Contract, the terms and provisions of which are agreed upon.

ACCEPTANCE OF PROPOSAL AS CONTRACT: As consideration for the above prices, specifications and conditions, including any attachments or other related documents, provided by Contractor above, Owner hereby accepts this Proposal as a written Contract for the work to be performed. Contractor is authorized to do the work as specified. Payment will be made as outlined above.

ACCEPTED: _____ SIGNATURE: _____

COMPANY NAME: _____ ADDRESS: _____

DATE: _____ PRINT NAME & TITLE: _____

**** PLEASE SIGN AND RETURN A COPY OF THIS PROPOSAL IF IT IS ACCEPTED AS A CONTRACT TO PERFORM THE WORK SPECIFIED****

**** NO WORK WILL BE STARTED UNTIL THIS ACCEPTED PROPOSAL IS SIGNED AND RECEIVED****

****A "LETTER OF COMMITMENT" FROM YOUR BANKING FACILITY MAY ALSO BE REQUESTED AT THE DISCRETION OF CONTRACTOR BEFORE WE CAN BEGIN ANY WORK ON THIS PROJECT****

LIEN LAWS: As required by the Wisconsin Construction Lien Law, builder hereby notifies owner that persons or companies furnishing labor or materials for the construction on owner's land may have lien rights on owner's land and buildings if not paid. Those entitled to lien rights, in addition to the undersigned builder, are those who contract directly with the owner or who give the owner notice within 60 days after they first furnish labor or materials for the construction. Accordingly, owner probably will receive notices from those who furnish labor or materials for the construction and should give a copy of each notice received to his mortgage lender, if any. Builder agrees to cooperate with the owner and his lender, if any, to see that all potential lien claimants are duly paid.

MISCELLANEOUS:

Neither this Proposal/Contract nor any right, benefit or obligation of Owner arising hereunder for this work may be voluntarily or involuntarily sold, transferred or assigned. The Contractor may assign its rights and obligations under this Agreement without the consent of Owner.

All notices and other communications provided for in this Proposal/Contract shall be given in writing by registered or certified mail and shall be addressed to the Owner and Contractor at their respective addresses listed in this Proposal/Contract. Any notice given pursuant to this paragraph shall be deemed given as of three (3) business days after the date of mailing.

Contractor shall not have any liability to Owner whatsoever for any consequential, incidental, liquidated or special damages under or in connection with this Contract.

If Contractor deems it necessary to initiate legal means to collect sums owed by Owner arising out of or connected to this Proposal/Contract, Owner agrees to pay all costs of collection (including court costs) and reasonable attorney's fees thereby incurred by Contractor with respect to any collection or legal action initiated.

village of kronenwetter municipal building
I-39 frontage rd
Mosinee, WI 54455
Day Phone: 715-693-4200

Dear village of kronenwetter municipal building,

Thank you for the opportunity to provide you with a quotation for a Lester Building. For your review, please see the enclosed proposal, which is based on our understanding of your building requirements up to this point.

As you review it, please be assured that we understand new building projects always come with many decisions and a fair amount of stress! Our goal is to help make those decisions easier and reduce your stress with what we feel is our industry's most responsive and collaborative buying experience.

Some other important factors set us apart and help us offer long-term customer satisfaction. For instance, the renowned quality and engineering standards of Lester Buildings means you get the most value from your investment. In fact, with a solid reputation going back to 1947, Lester Buildings feature:

- Unmatched design flexibility to meet your unique needs
- Fast, cost-effective construction
- Strong, straight and true structures, with excellent curb appeal
- An industry-leading Lifetime Structural Design warranty

Of course, we do our own part by providing full-service project planning and construction services. We do so with one goal in mind: to complete your project just as you envisioned it, in the agreed-upon time frame.

Our team here at S. D. Ellenbecker Inc stands ready to work with you and we look forward to your comments and questions.

Thanks again and, as always, feel free to contact us anytime at 715-581-6433 or jdiers@sdellenbecker.com.

Respectfully Submitted,

S. D. Ellenbecker Inc

LIMITED WARRANTY

Lester Building Systems, LLC

Lester Building Systems, LLC (“LESTER”) provides the limited warranties and statement of limited warranties described in this Limited Warranty to the Owner (“OWNER”) and subject to the terms, conditions and limitations set forth below. The warranty protection herein, is based on the design parameters specified for this project, as follows:

Owner: village of kronenwetter municipal building		Building Code: ASCE 7-05
Structure: Uni-Frame Not Embedded 65'-0" x 120'-0" x 16'-0"		Allowable Roof Snow Load: 39.7 psf
End Use Code: Commercial Truck Garage		Allowable Roof Dead Load: 10 psf
Improv #: R13A-15743-01-02		Allowable Ceiling Load: 5 psf
Project Number:	Order Date:	Allowable Wind Load: 90 mph; Exp.: C

Structural Design - Lifetime

LESTER warrants that the building designed by LESTER will not experience an occurrence of structural failure* due to structural design, due to weather conditions, such as wind, ice and snow, so long as Allowable Loads noted above have not been exceeded. The foregoing warranty is limited to fifty (50) years with respect to the OWNER which is not a natural person. This structural warranty does not apply to the exterior renovation of a previously built building.

** Loss of load-carrying capacity of a component or member within a structure or of the structure itself. Structural failure is initiated when the material in a structure is stressed to its strength limit, thus causing fracture or excessive deformations.*

Preservative-Treated Lumber - 50 Years

Preservative-treated lumber, including preservative-treated structural columns, are warranted by the original wood preservative supplier against failure due to fungal decay and termite infestation for a period of fifty (50) years from the date of purchase.

Steel Panel Paint System

The painted roofing and/or siding product, Lester Uni-Rib™ and/or Lester Eclipse Roof System®, is warranted by the original paint manufacturer per the following schedule:

Sherwin-Williams Paint System	Film Integrity ¹ Checking, cracking & loss of adhesion (peeling)	Chalk ASTM D-4214-98 Method AD659 rating standard	Fade ² ASTM D-2244-02 Hunter delta-E units rating standard	Red Rust ³ Not to exceed 1/2" accumulation or more
WeatherXL™ Siliconized Polyester	40 Years	30 Years Roof: not to exceed 6 rating Walls: not to exceed 8 rating	30 Years Roof: not to exceed 7 units of color Walls: not to exceed 5 units of color	10 Years (G90) N/A (AZ50)
Fluropon® PVDF	35 Years	30 Years Roof and walls: not to exceed 8 rating	30 Years Roof and Walls: not to exceed 5 rating	5 Years (G60) N/A (AZ50)

1. Excludes micro-fracturing which may occur during proper steel panel fabrication or failure due to substrate corrosion.
2. Color changes may not be uniform on surfaces that are not equally exposed to the sun.
3. Applies to non-vertical installations and normal outdoor atmospheric conditions, including acid rain. The Red Rust warranty applies only to products with a galvanized substrate and is not applicable (N/A) to products with a Galvalume® substrate.

For an existing building receiving exterior steel panel replacement, this paint warranty applies only if 100% of the exterior roof and walls are replaced.

TERMS AND CONDITIONS

- 1. To Whom Applicable.** This Warranty is applicable only to the OWNER and may not be assigned or transferred by OWNER.
- 2. Effective Date.** This Warranty is conditioned upon and shall not become effective until OWNER's installing Lester builder/dealer receives all amounts due by OWNER.
- 3. Automatic Voiding of Warranty.** This Warranty becomes null and void upon OWNER's failure to comply with any term of the contract between OWNER and the installing Lester builder/dealer.
- 4. Claims Procedure.** LESTER's obligations under this Warranty shall not arise unless LESTER receives in writing, OWNER's complaint which sets forth OWNER's claim of failure, within sixty (60) days of the date OWNER first becomes aware of such claimed failure, and in no event, later than the expiration of the applicable warranty period. LESTER shall be given a reasonable opportunity to investigate claims made by OWNER. Notification to a LESTER dealer is not considered notification to LESTER, and LESTER will not be liable for any costs of repair, or replacement, which is not authorized in writing by LESTER. Upon LESTER's determination that a claim by the OWNER is valid, LESTER shall determine whether correction of the defect or failure shall be by repair or by the furnishing of replacement materials. Title to any defective material replaced by LESTER pursuant to this warranty shall transfer to LESTER at the time of replacement.
- 5. Exclusions.** The warranties expressed herein do not apply to: (a) materials installed in areas subject at any time to exposure to corrosive or aggressive conditions such as airborne abrasives, spray of water, fallout or exposure to fumes, vapor or solid emanations containing acids, alkalis or compounds of mercury or other chemicals, ash or fumes or cement dust; (b) failures arising out of any damage which may occur while stored at the building project site; (c) deterioration caused by condensates or corrosive fumes generated or released inside the building, or failure to remove construction debris or other accumulations of other foreign substances or material from LESTER's materials; (d) failures caused by acts of God, falling objects, external forces, explosions, fire, riots, civil commotion, acts of war, radiation, defects in any part of the building or adjacent structures not constructed by LESTER, or defects in materials or workmanship supplied by LESTER resulting from the installation, use or attachment to the building structure of components such as vents, flashing, signs, fascia, skylights, snow retention devices or any other such materials, accessories or machinery, which are not reflected in the design plans and specifications for the building structure provided by LESTER or which is the result of work which is not performed by LESTER; (e) products which are not manufactured by LESTER, including without limitation, equipment, motors and minor hardware (door and window latches, hooks, etc.), regardless of whether same are furnished or installed by LESTER; provided, however, LESTER passes on to OWNER the transferable warranty which LESTER received from the manufacturer, if any, a copy of such warranties may be obtained from Lester by requesting same in writing; (f) used materials, or materials repaired or replaced under this Warranty except to the extent of the remainder of the warranty period; (g) failure caused by any paints or coatings applied to the materials provided by LESTER which were not applied by or approved in writing by LESTER; (h) failure of masonry foundations and floors due to settling caused by others' failure to properly fill the area or prepare the substrate prior to the installation of those elements; (i) normal shrinkage cracks in masonry materials; to normal wear and tear on concrete floors due to excessive traffic areas, frequent power washing or feed acidity, or any other such excessive exposure or treatment; (j) damage or defect caused by abuse, modifications not executed by LESTER, improper or insufficient building maintenance, failure to address issues such as but not limited to water intrusion, improper operation or normal wear and tear under normal usage; (k) buildings designed with large openings that utilize sliding, sectional overhead, hydraulic or other doors that are left open during severe weather (wind) conditions; (l) damage caused by inadequate ventilation of the building; (m) variables beyond LESTER's control, such as excessive population of animals, inadequate building management of any kind, power failures, improper electrical wiring or equipment failures that may cause damage to the building. The OWNER hereby acknowledges that the total well-being of any animals housed in the building is dependent upon the OWNER's source of electrical power and/or the OWNER's ability to manually ventilate the building during periods of power or equipment failures. LESTER disclaims any liability for losses resulting from conditions which are beyond its control.
- 6. Limitations.** The following limitations apply to the coverage of this Warranty: (a) loss under this Warranty shall be limited to the original purchase price of the defective product subject to OWNER's claim, and shall be further limited as provided herein; (b) metal covered structures are not warranted to be leak-free, particularly leakage caused by extreme weather conditions involving wind, storm or rain which is not normal for the area in which the building is erected; (c) unpainted galvanized or Galvalume® siding or roofing sheets are not warranted to be or remain perfectly uniform in appearance (d) flashings to existing structures, or around silos are not warranted to be leak free; (e) LESTER does not warrant that components or accessory items such as windows and doors shall be free of condensation caused by high humidity inside the building or temperature differentials between the interior and exterior of the building; (f) LESTER does not warrant any part, product or material to meet local, municipal, or state ordinances, codes, laws or regulations; (g) "oil canning" (visible waviness in the flat areas of metal wall and roofing panels) is an inherent quality of flat metal and is not a cause for rejection of or replacement of steel panels and/or steel trim components.
- 7. Exclusive Warranty.** THE FOREGOING SETS FORTH THE ONLY GUARANTEES OR WARRANTIES APPLICABLE TO THE WORK OR MATERIALS PROVIDED BY LESTER AND SAID WARRANTIES ARE GIVEN EXPRESSLY AND IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE AND ALL OTHER WARRANTIES ARE DISCLAIMED BY LESTER. The OWNER agrees that oral statements about the building and the components thereof made by LESTER's dealers or representatives, or statements contained in LESTER's or other third parties general advertising, pamphlets, brochures or other advertising material, do not constitute warranties and that acquisition of the building and components thereof was not made in reliance upon them.
- 8. Owner's Remedies.** Except where such disclaimers and exclusions are specifically prohibited by applicable law, THE OWNER ACKNOWLEDGES THAT ITS SOLE AND EXCLUSIVE REMEDY AGAINST LESTER SHALL BE LIMITED TO THE APPLICABLE WARRANTIES SET FORTH HEREIN AND NO OTHER REMEDY (INCLUDING BUT NOT LIMITED TO THE RECOVERY OF PROFITS, LOST SALES, INCIDENTAL OR CONSEQUENTIAL DAMAGES, OR INJURY TO PERSON OR PROPERTY, OR ANY OTHER LOSS) SHALL BE AVAILABLE TO THE OWNER OR ANY OTHER PERSONS OR ENTITIES, WHETHER BY DIRECT ACTION, FOR CONTRIBUTION OR INDEMNITY, OR OTHERWISE. This exclusive remedy shall not be deemed to have failed its essential purpose as long as LESTER is willing and able to carry out the terms of the Warranty as set forth herein. Some states do not allow limitations on how long an implied warranty lasts or do not allow limitation on incidental or consequential damages, so the foregoing limitations may not apply to you. This warranty provides you with specific legal rights and you may have other rights which vary from state to state.
- 9. Choice of Law.** The construction and interpretation of this Limited Warranty shall be governed by the laws of the State of Minnesota.

May 20, 2026

Greg Ulman, Director of Public Works
Village of Kronenwetter
1582 Kronenwetter Drive
Kronenwetter, WI 54455

Dear Greg,

On behalf of the Samuels Group, we are pleased to submit our proposal for the design and construction of the Village of Kronenwetter's new equipment garage. We appreciate the opportunity to partner with the Village on this important investment that will support both Public Works operations and Police Department needs.

We understand the Village is seeking a qualified design-build partner to deliver a six-bay, approximately 65' x 120' facility with functional separation for police and public works operations, durable construction, and efficient mechanical systems all within a defined budget and on an expedited timeline. Our team is well-positioned to meet these goals through an integrated approach that emphasizes early collaboration, cost control, and practical, performance-driven design solutions.

Our design-build methodology provides a single point of accountability and fosters real-time coordination between design and construction. This allows us to align scope, budget, and schedule from the outset minimizing risk and ensuring transparency throughout the process. We are particularly focused on delivering value through efficient building systems, constructible detailing, and proactive communication with Village stakeholders.

We recognize the importance of meeting the Village's evaluation criteria, including demonstrated experience with similar municipal facilities, strong client service, qualified staffing, and the ability to meet project timelines. Our team brings extensive experience delivering garages, maintenance facilities, and public safety buildings, with a proven track record of responsive service and successful project delivery for municipal clients.

In addition, we understand that the Village intends to move forward quickly and is seeking a collaborative partner to refine design details while maintaining alignment with the project's approximately \$800,000 budget. Our team is prepared to engage immediately, working alongside Village staff to develop a practical, cost-effective solution that meets operational needs and long-term durability expectations.

We are excited about the opportunity to contribute to the Village of Kronenwetter and to deliver a facility that enhances daily operations and serves the community for years to come. Thank you for your consideration of our proposal.

DESIGN ■ CONSTRUCT ■ FURNISH

Samuels Group is a preferred Midwest commercial construction company. Our team has decades of experience and provides a true turnkey approach to your building needs. From pre-construction, to design, construction, and commercial furniture solutions, our team will work with you from conception to completion. The Samuels Group leads the way in providing project cost savings and environmentally sound solutions.

WHAT MAKES US DIFFERENT

Samuels Group is not your typical contractor, we are Innovators and Over Achievers! We offer our clients trusted and personalized solutions by learning about their project and approaching it based on their specific needs. Each project is evaluated so that the right team is assembled to deliver an exceptional project experience to all stakeholders. Our team will bring experience and passion to your project and we will go the extra mile to meet your needs.

WAUSHARA COUNTY NEW HIGHWAY GARAGE 1001 EAST MAIN STREET, WAUTOMA, WI 54982-9613

SCOPE

The new 107,000 SF Waushara County Highway Garage includes spaces for administrative and staff offices, locker room, boardroom, break / training room, sign shop, parts, fabrication, wash bay, and brine accommodations. Six repair bays and approximately 52-vehicle garage are also included with the project. Additional scope to the project includes updates to an existing fuel island. A communications plan (including direct mail, website, and community information meetings) was developed to help educate and inform the public about the project.

SIMILAR PROJECTS

WAUSHARA COUNTY NEW HIGHWAY GARAGE (cont.) 1001 EAST MAIN STREET, WAUTOMA, WI 54982-9613

PROJECT COMPLEXITY

The project was developed during the COVID-19 pandemic, which presented challenges such as material shortages, plant shutdowns, and rising costs. To address these issues, the design team, estimators, and project management worked in close collaboration to align the project's functional requirements with the evolving constraints. By leveraging this teamwork, the team was able to provide the client with the most cost-effective solution at the time. We believe that the ongoing collaboration between the design team, estimators, and project management is crucial to the success of any project.

SIMILAR PROJECTS

WAUSHARA COUNTY EMS STATION NO. 1 N2400 SOUTH TOWNLINE ROAD, WAUTOMA, WI 54982

SCOPE

The 6,000 SF single-story facility serves as a multi-functional EMS hub for Waushara County, combining both administrative and operational spaces in a 50/50 split. The building includes administrative offices, a flexible training room for staff development and emergency exercises, a central supply area, and a three-bay garage for emergency vehicles and equipment. Crew quarters are designed to accommodate four EMTs and include a living room, kitchen, and a storm shelter for severe weather protection. The exterior was designed to align with the color palette of other EMS stations in the county, maintaining a consistent brand identity. Additionally, the building's mechanical systems are integrated with the county's existing automation controls, allowing for efficient centralized monitoring and management.

SERVICES PROVIDED

Samuels Group provided pre-construction, cost estimating, architectural design, space planning, interior design, community communications plan, commercial furniture solutions, and self-perform carpentry work. Samuels Group served as the Construction Manager at Risk.

WAUSHARA COUNTY EMS STATION NO. 5 AND SENIOR DINING CENTER N4258 STATE ROAD 49, POY SIPPI, WI 54967

SCOPE

New mixed-use facility with about 1/3 of the building dedicated to a County operated Senior Dining Center and the remaining building dedicated to the new Poy Sippi EMS Station. Featured in the EMS portion was the 2 bay pull through apparatus garage a masonry storm shelter, EMT day room with kitchen and two offices/sleeping rooms. The owner wished to find a more cost-effective alternative to providing building code required fire suppression throughout the building so a petition for variance was pursued that utilized additional fire-resistant construction around the sleeping rooms among other enhanced life safety features. The overall exterior design is meant to have a residential feel and scale that blends into the surrounding neighborhood. A communications plan (including direct mail, website, and community information meetings) was developed to help educate and inform the public about the project.

DOOR COUNTY HISTORIC DAIRY NEW EMS RENOVATION & ADDITION 1309 RANGE LINE ROAD, WASHINGTON ISLAND, WI 54246

SCOPE

The Door County Historic Dairy project transformed a historic agricultural structure into a modern Emergency Medical Services (EMS) facility serving Washington Island. Purchased by Door County in 2020, the existing dairy building was thoughtfully renovated and expanded to support critical emergency response operations while preserving the character of the original structure.

The project included both renovation of the existing two-story dairy and the addition of a new apparatus garage to accommodate emergency vehicles. The design integrates modern functionality with the building's historic materials, including stone veneer and board-and-batten siding, maintaining a strong connection to the island's rural heritage.

The first floor is organized to support rapid response and daily operations, featuring two rescue squad bays, a public lobby, offices, locker rooms, decontamination space, laundry, and sleeping quarters for EMS personnel. Support spaces such as a lounge, kitchenette, and conference areas enhance staff comfort and operational efficiency. The second floor provides flexible training space, additional support areas, and storage to accommodate ongoing staff development and community needs.

Site improvements include updated access drives, parking, and infrastructure to support emergency vehicle circulation and response times. The project required careful coordination due to the island location, including ferry access logistics and material transport considerations.

SERVICES PROVIDED

Samuels Group provided project planning, pre-construction, estimating services, architectural design and interior design for complete architectural services.

VILAS COUNTY STORAGE GARAGE 330 COURT STREET, EAGLE RIVER, WI 54521

SCOPE

Vilas County required an affordable storage solution to accommodate two large emergency management and law enforcement vehicles near the existing courthouse. The chosen solution was a 1,600-square-foot, wood-framed building with a raised concrete stem wall. To keep costs within budget while maintaining a cohesive look, vinyl siding and asphalt shingles were selected for the exterior, matching a nearby storage building. The interior features durable OSB sheathing, designed to be both practical and adaptable for potential future modifications to the garage.

PROJECT COMPLEXITY

This project had a fixed budget and tight timeline, requiring close collaboration between design, estimators, and construction teams to ensure design changes stayed within budget and on schedule. Anticipating an 8-week State plan review, we submitted an early footing foundation approval to begin construction and avoid winter delays. This coordination was key to meeting the County's deadline for project completion by the end of 2024.

SERVICES PROVIDED

Samuels Group provided project design, pre-construction, estimating services, construction management services, and self-performed studs, concrete, doors, roofing, and rough and finish carpentry. Samuels Group served as construction manager on this project.

LETTERS OF REFERENCE

700 North Twelfth Street | Wausau, WI 54403-5007 | T 715.845.7010 | lywam.org

July 12, 2024

On behalf of the Leigh Yawkey Woodson Art Museum in Wausau, Wisconsin, it is my pleasure to write a letter in support of The Samuels Group.

Over the past fourteen years, The Samuels Group has provided the Woodson Art Museum with exceptional work through numerous capital projects, ranging from major building additions to small re-imaginings of interior spaces. With each project, the attention to detail, care, foresight, and customer service that are hallmarks of The Samuels Group's work has been evident.

No doubt after reading this recommendation, you will research the Leigh Yawkey Woodson Art Museum. I encourage you to do so, and if you are lucky, you will see photos of the Museum's campus before and after 2010. What you will hopefully see is the transformation of a beautiful building into an even more beautiful complex which reflects reverence for our past but helps us better serve our visitors for the future. Most of this is due to the talents of The Samuels Group. Whether it was the Museum's expansive 2012 addition, renovations in the Museum's main entrance and visitor services area, the creation of the Museum's Rooftop Sculpture Garden, or the construction of our purpose-built space for visiting artists dubbed "The Glass Box Studio," The Samuels Group's influence and fine work cannot be missed visiting the Museum.

Before I became the Woodson Art Museum's Director, I served as the Assistant Director, and Project Coordinator. In those two former roles, one of my responsibilities was to act as the liaison between the Museum and The Samuels Group during each one of the aforementioned capital projects. I had the pleasure to work with many different architects, designers, project managers, site superintendents, carpenters, interior designers, safety coordinators, estimators, marketing professionals, and others through the years who all treated me, the Museum, and our projects with the utmost respect, sincerity, hard-work, and dedication. Simply put, they are an important partner for the Museum, and they have repeatedly answered the bell, allowing us to better serve our community.

I hope you will see the quality of their work and jump at the chance to collaborate with them. It's a decision you won't regret.

Sincerely,

Matt Foss
Director, Leigh Yawkey Woodson Art Museum

LETTERS OF REFERENCE

WISCONSIN WOODCHUCKS

July 9th, 2016

Sid Samuels, President
The Samuels Group
311 Financial Way, Suite 300
Wausau, WI 54401

Sid,

I am very proud to write this reference letter for the work The Samuels Group has completed at Athletic Park. If I had a nickel for every compliment that I have received on the Athletic Park Renovations, I could have paid the bill. Every night several fans approach me and compliment me on the transformation of Athletic Park. Your team at the Samuels Group took on the challenge of building new facilities, inside a historic park, and knocked the ball out of the park.

In August 2013, the challenge we presented you was huge. The Samuels Group was asked to build a new modern grandstand inside Historic Athletic Park with a short lead time and in the dead of winter. The winter of 2013/2014 turned out to be the coldest in Wisconsin since 1909. Your team struggled through 70 days of sub-zero temperature to complete a project that needed warm days to pour concrete. The Grandstand that your group designed was not only more comfortable with great premium seating options, but it enhanced the historic look at Athletic Park. When fans approach the entrance to Athletic Park they make comparisons to Wriggley Field and Fenway Park. At the same time your team designed and built a Neighborhood Park that was attached to the stadium. This new park, which is the first built in Wausau in 20 years, now serves as the entrance to Athletic Park and has received compliments from fans for its design and the enhancements it brings to the atmosphere.

The work continued in the fall of 2015 with Phase 2. Phase 2 was a complete reconstruction of the 3rd base side of Athletic Park. It was challenging, again, because of the narrow work area and the need to bring all the materials over the Historic Wall. The Samuels Group brought the project in on time and under budget. The new Concession Stand and Ministry Health Care Terrace have added to the historic charm of Athletic Park and have received many compliments all over town. The project included a complicated bleacher design that needed to incorporate new bathrooms and cold storage. The Samuels Group creative team accepted the challenge and created a bleacher design that is both functional and attractive.

With both Phases of the Renovation of Athletic Park, The Samuels Group has shown creativity, cost awareness and a genuine pride in the finished project. I have been very impressed with The Samuels Group's response to my concerns, complaints and requests.

Sincerely,

Mark Macdonald
Owner

LETTERS OF REFERENCE

**National
Railroad
Museum**

October 14, 2025

I would like to recommend the Samuels Group for the BUILD Wisconsin Award. Throughout the process they worked to "get it right" and have succeeded. It has changed the look of our facilities to align with our national museum designation, but more importantly the final product allows us to better serve our community and meet our mission.

Throughout the construction of the National Railroad Museum's Fox River Expansion, the Samuels Group acted as an engaged partner of the National Railroad Museum. As early as the inception of the project in 2015, the Samuels Group stepped up to provide a rendered fly-over of the project that the Museum used throughout its planning, its communications with the community and governmental agencies as well as financial stakeholders who donated funds to support the project. They also contribute construction activities to our annual family Paw Patrol-themed event that teaches children about the "doers" of the community as well as serves as a fundraiser for the Museum.

That engagement continued as construction began in May 2024. I was given the opportunity to attend all of the weekly owner and the subcontractor meetings, and we continued with nearly daily communications as the Samuels Group included me as part of their team. The Museum was fully operating and open to the public throughout the construction, making these meetings extremely valuable as we were able to work together addressing the changing site, visitor and safety issues. Samuels Group's project manager and site supervisor were highly responsive to any special requests ranging from providing a barrier to protect children using our playground to working around our family event schedule to creating safety procedures for the subcontractors as they navigated between construction spaces on tourist-congested grounds.

The Fox River Expansion is a unique addition that required one-of-a-kind manufacture and assembly of its truss system. The manufacture of the steel required the creation of new shop drawings, followed by a wait before the trusses could be formed and then brought to the site, slid into position and welded together in place. The design required collaboration between the architect and Samuels Group as well as input from the Museum. From the concept to shop drawings to the final truss joined 40 feet in the air, the process took nearly half of the 16-month project.

The Samuels Group did not allow the rest of the project to sit idle during the truss manufacture process, however. After the standard site preparation and underground facilities were put into place, they found ways to move the project forward by pouring the floor and starting upward construction in more traditionally designed areas. They were also excellent in addressing unusual site problems during this time including establishing whether a newly discovered 100+ year drainage old pipe was active, developing a protocol for the stabilization of a historic cistern, and followed State guidelines regarding discovering a potential cultural site. Despite what could have been setbacks, I was impressed that the project was completed in a timely manner.

The Samuels Group's willingness to collaborate and think about the project differently allowed a non-traditional project to move forward with minimal impact to the more than 100,000 who visited the Museum during the construction. The real impact happened as the Fox River Expansion opened to the public on September 20, 2025. The finished result is exceptional. On the first day it was open 1039 people visited - more than 300% our normal Saturday visitation, and the numbers continue to be double what they normally might be for each day since.

LETTERS OF REFERENCE

**National
Railroad
Museum**

The Museum has hosted multiple corporate events in the space already, and we are booking weddings in 2026 and 2027. As a 501 c3 privately funded Congressionally designated Museum, these events allow us to financially support the operations of the Museum and lower the cost of admission to the families who visit.

At its core, the new Fox River Expansion was built to preserve and display historic train cars for public use and provide a better place for the more than 12,000 students who take part in our educational programs each year. Supporting educators through our immersive programs help them reach students with special needs, have surpassed what is offered in the classroom, or those who simply do not thrive in a classroom. This building provides a space for even more students to take part in educational activities that move them outside on the covered terrace or require active movement inside during the winter. The space that they are immersed in inspires students far more than a desk in a classroom can and delivers accessibility to all learners.

The building also has a positive economic impact to the community. Tourists are curious about what they are looking at as they cross the near-by Hwy. 172 bridge and visit to the Museum. The media has already found us with the Hallmark Channel filming onsite and ESPN scheduled to do the same. We had been receiving calls and emails asking about when the new building opens and those who come to the community for a Green Bay Packers game, stay longer to view the Museum and consequently spend money with other businesses, supporting the livelihoods of those living here. We expect our \$20 million impact to grow to \$35 million within the first few years of operation and the number of visitors will only grow as the Museum's reputation does.

Through building the Fox River Expansion, the National Railroad Museum is now able to meet its educational mission, grow as an organization and serve the community. Samuels Group's dedication to the project demonstrated their commitment to serve the community, establishing that their excellence is not only in the build but how they serves others.

With Regard,

Jacqueline D. Frank, CEO
National Railroad Museum

TEAM RESUMES

Justin Keller

Director of Estimating

Justin Keller is the Director of Estimating for Samuels Group. He will work closely with your team in the pre-construction phase of the project and investigate your needs and perform the pre-construction services necessary for further design work. His responsibilities include developing budget analyses, construction costs, and scheduling requirements. His daily estimating activities provide him with the relationships, resources, and knowledge of current construction costs, supply, and demand of specialty contractors, construction materials, and their required lead times.

TEAM RESUMES

Henry Kropp, AIA

Architect

Henry Kropp is an Architect at Samuels Group, where he specializes in designing and producing construction documents for a diverse range of facilities, including commercial, healthcare, educational, and government projects. He excels in helping clients visualize their concepts through advanced computer graphics and videos. In addition to his visualization expertise, Henry leverages Building Information Modeling (BIM) to create detailed building models and facilitate coordination and clash detection across multiple design disciplines. This proactive approach identifies potential issues before construction begins, ultimately saving both time and money on projects.

TEAM RESUMES

Eric Engstrom

General Superintendent

Eric Engstrom, General Superintendent, directs the project management field team to provide quality, technical, and responsive services to clients, at profits that meet corporate financial expectations. Eric will be the primary client interface, maintain community relations, contribute to corporate long-range planning, and support all corporate policies and standards. Eric will lead superintendents, assistant superintendents, and other field staff to deploy the project strategy, communicate expectations and direction regarding schedules, construction methods, policies and standards. Eric makes regularly scheduled visits to assigned job sites, performs thorough walkthroughs, monitors construction progress and quality control, and ensures compliance to the Samuels Group and OSHA safety standards. His expertise and knowledge of the industry has assisted in completing numerous projects under budget and delivered on schedule.

05 LIST OF SUBCONTRACTORS

SUBCONTRACTORS

The full scope of subcontractors required for construction-related trades (e.g., rough carpentry, electrical, plumbing) has not yet been determined. Subcontractor selection will be refined during later phases of design and in coordination with the Village.

Specialty subcontractors and trade contractors (e.g., electrical, plumbing, carpentry) are not applicable to the design phase and will be identified during construction procurement. As noted in discussions with the Village, these may be omitted at this stage.

All future subcontractors will be prequalified based on experience, licensing, insurance, and past performance. The project team will coordinate with the Village to ensure all subcontractors meet or exceed project requirements.

SELF-PERFORM WORK

Samuels Group can self-perform portions of its construction projects including:

- Construction Management
- Rough Carpentry
- Finished Carpentry
- Concrete
- Demolition
- Drywall
- Commercial Furniture

Self-performing offers owners substantial benefits:

- Allows us to quickly identify and solve any challenges
- Implement changes orders
- Efficiently reduce or eliminate subcontractor delays
- Better control of the schedule
- Sets craftsmanship standards

To assure our self-performance costs are competitive, we provide sealed bid 24 hours in advance.

We have the skilled labor, specialized equipment and hands-on experience to complete the job but we also feel it is important to discuss with the Owner how involved they want us to be. This is a topic we can discuss in greater detail during our interview.

Scherrer
— CONSTRUCTION —

Village of Kronenwetter Request for Proposals

New Equipment Garage

Mail out: April 17, 2026
Proposal Due Date: May 20, 2026 at 1:30 PM
Anticipated Award: June 1, 2026 CLIPP Committee Meeting

SUBMITTED BY:

Contractor: Scherrer Construction Co., Inc.

Address: 151411 Robin Ln #100, Wausau, WI 52201

Telephone Number: (715) 804-0830 **Fax Number:** (262) 539-3101

Contact Person: Craig Frieders

Title: Regional Manager & Project Executive

May 20, 2026

Village of Kronenwetter,

Scherrer Construction appreciates the opportunity to submit our proposal for the new garage facility at the Municipal Center. We value our past working relationship with the Village of Kronenwetter and welcome the opportunity to continue partnering with the Village on this important project.

We understand the importance of developing a durable, efficient, and functional facility that supports the Village's current operations while providing long-term flexibility for future needs. Municipal service facilities require careful planning, coordination, and budgeting to ensure they effectively support day-to-day operations, equipment storage, maintenance functions, and staff workflow.

Scherrer Construction's role would focus on serving as the Village's construction partner early in the process, providing preconstruction leadership and guidance throughout planning and design development. Our team will assist the Village with budgeting, scheduling, constructability review, and architect selection to help establish a strong foundation for the project from the outset. By becoming involved early, we can help align project goals, evaluate options, and provide real-time cost and scheduling input that supports informed decision-making throughout the design process.

Our approach emphasizes collaboration, proactive communication, and value-driven planning to help deliver a high-quality facility while maintaining budget and schedule expectations. As a local contractor with extensive municipal experience, Scherrer understands the importance of transparency, accountability, and responsible stewardship of public funds.

We appreciate your consideration and look forward to the opportunity to continue working with the Village of Kronenwetter on this project. Please feel free to contact us with any questions regarding our proposal.

Sincerely,

A handwritten signature in black ink, appearing to read "Craig Frieders".

COMPANY PROFILE

Scherrer Construction is a trusted construction management firm that has been serving the state of Wisconsin since 1928. With nearly a century of experience, we excel in delivering high-quality projects across various markets. Our portfolio includes education facilities, municipal buildings, commercial and industrial structures, multi-family housing, senior living communities, healthcare centers, religious institutions, sports venues, hospitality venues, and luxury custom homes.

We offer a comprehensive range of services, from pre-construction to post-occupancy for all project types including new builds, expansions, and renovations.

Dedicated to excellence and client satisfaction, we utilize our industry knowledge and commitment to building with integrity to ensure every project meets the highest standards of quality, safety, and durability.

CREATING LONG-LASTING SOLUTIONS FOR MUNICIPALITIES

Scherrer Construction is dedicated to delivering high-quality municipal buildings that provide lasting value. We recognize the essential role these facilities have in promoting community pride and ensuring safety and functionality. Drawing from our successful history of municipal construction, we emphasize creating solutions that address the immediate requirements of municipalities and benefit future generations. Our commitment to excellence guarantees that every project enhances the civic landscape and strengthens the values that bind each community together.

Tailored Solutions for Sustainable Municipal Development

We specialize in collaborating closely with municipalities of all sizes, tailoring our approach to your unique requirements. Whether modernizing existing structures or constructing new facilities such as fire stations, libraries, community centers, and public spaces, we focus on delivering sustainable and cost-effective solutions. Our experienced team provides comprehensive support at every stage—ensuring the process is smooth and collaborative.

Building Stronger Communities Through Local Investment

We believe that community pride begins with local investment. By prioritizing the use of local contractors and tradespeople, we help strengthen the economy and the fabric of the community itself. Together, we can transform your vision into reality and enhance the public spaces that serve our communities well into the future.

WESTON PUBLIC SAFETY BUILDING

RENOVATION & ADDITION | WESTON, WI

This project included a comprehensive renovation of the existing police and fire facilities to better support day-to-day operations and community safety. Updates included remodeled sleeping quarters for fire personnel, a refreshed office layout, and upgraded conference and meeting spaces. The public lobby was reconstructed with bullet-resistant drywall and glazing to enhance security while maintaining accessibility. Additional improvements included new locker rooms, exterior canopies for protected access, and a brand-new parking lot. The facility also features reconfigured areas for police vehicle storage, ensuring secure and efficient fleet operations. Overall, the renovation modernized the building, improved functionality, and extended the life of this essential public safety hub.

WAUSAU FIRE STATION

NEW CONSTRUCTION | WAUSAU, WI

Station No. 2 of the Wausau Fire Department is a satellite station that provides comprehensive living quarters. The station consists of six individual dorm rooms, a kitchen, a day room, a training room, a training tower, an exercise room, a decontamination area, and a watch office that overlooks all four apparatus bays.

Upgraded technology has been installed for increased safety, and a ladder truck can be kept on site. A new alert system has also been implemented which will speed up response times in order to better serve the community.

The training tower enhances firefighter readiness and operational efficiency. The tower serves dual purposes: a state-of-the-art training center and a functional hose tower.

WALWORTH COUNTY DPW

NEW CONSTRUCTION | ELKHORN, WI

In partnership with Angus Young Architects and Walworth Co DPW, the Scherrer team completed the construction of this state-of-the-art facility designed to cater to all of Walworth County’s vehicle maintenance and servicing needs.

This new construction project encompassed the installation of standard and heavy-duty lifts, automated systems for bulk fluids and compressed air, expansive heated equipment and truck storage, three cranes, a welding bay, a wash bay, a parts storage area, a tire shop, and exterior space designed for outbuildings.

Our team ensured that each component was installed to the highest standards, creating a municipal facility that will serve Walworth County for many years to come.

WESTSIDE WAREHOUSING

ADDITIONS | WAUSAU, WI

The Westside Warehouse project was developed to increase storage and distribution capabilities while improving operational efficiency for customers and transportation partners. The project included two additions: a new warehouse distribution area and expanded storage space designed to support a wide range of logistics services and product handling needs.

Our team constructed the additions with rail access and multiple loading docks to streamline shipping and receiving operations across various product types. The completed facility supports services including cross docking, repackaging, transportation scheduling, and inventory management—providing flexible, efficient solutions designed to support ongoing business growth and distribution demands.

ESTIMATING & BUDGETING

The Scherrer estimating team works closely with our clients and architect partners to develop the preliminary project budget. This budget is pivotal in the project's financial planning as the baseline for all design phase budgets.

Budget updates are generated at each interval of the design phase: Conceptual Design, Schematic Design, Design Development, and Construction Documentation.

Our team consistently tracks budget items as the design progresses to ensure budget adherence. Open communication is upheld throughout this and all phases of pre-construction.

VALUE ENGINEERING

Value engineering is an integral part of our process. We thoroughly analyze project requirements and explore alternatives that can positively impact the budget without compromising quality.

Our experienced team will evaluate proposed systems to identify opportunities for enhancing project deliverables. Our strategic approach to value engineering allows our clients to gain a comprehensive understanding of how their decisions can influence construction costs and the long-term performance of the systems.

SCHEDULING AND PHASING

A detailed schedule/phasing plan is critical to developing an accurate budget .

The schedule is divided into phases, clearly outlining the planned sequence of operations. As the design progresses, the schedule is reviewed and updated, enabling recalculations that identify the critical path, milestones, and project completion date. Including the schedule with the bid documents ensures that subcontractors are aware of what time of year their work is taking place allowing them to provide a more accurate bid.

BIDDING AND AWARDING

Scherrer coordinates the bidding process by actively soliciting bids from our extensive network of qualified subcontractors and suppliers. We actively encourage businesses local to the project to bid.

Our plan distribution software further enhances the bidding process and drives competitive bids, allowing us to maintain an average of 4.51 bids per trade.

Once bids are submitted, we will perform scope reviews with all subcontractors to ensure bids are complete then make recommendations to the Owner.

VALUE ENGINEERING

"We met regularly to discuss options that wouldn't take away from the big scope of the project.

I trusted Scherrer to say, John, you could reduce this here and it's going to be a very minimal impact, or on the flip side, you could reduce here, but in five years you're going to pay for it on the back end.

They're great communicators and they also give us the information that we needed to make the right decisions as we went through the process."

- John Gendron
District Administrator | Westosha High School

DESIGN-BUILD SERVICES

Scherrer's Design-Build services bring design, construction, and ownership together under one team. With our in-house architect working alongside project managers, estimators, and superintendents, we streamline communication, accelerate delivery, and create a seamless experience for our clients.

Our Design-Build delivery method integrates design, construction, subcontractors, and ownership under a single point of responsibility. This streamlined approach strengthens communication, minimizes delays, and drives collaboration that fosters innovation and higher-quality project outcomes. With design and construction working together from the start, cost considerations are built into every decision, resulting in earlier knowledge of firm costs, fewer changes, and fewer claims. By allocating risk to those best positioned to manage it, projects are completed faster, more cost-effectively, and with greater budget certainty. In many cases, our in-house design services also deliver additional savings compared to outsourcing to outside architects. Design-Build is especially effective for small to medium-sized, complex projects that demand speed, cost control, and seamless delivery.

CONSTRUCTION SERVICES

Since 1928, we have made it our main goal to build structures that have the right balance of functionality, cost-efficiency, and timeless aesthetic appeal. We are dedicated to a gold standard of service and our ongoing efforts have earned us numerous construction awards, including Builder of the Year.

| PROJECT MANAGEMENT | QUALITY CONTROL | SUBCONTRACTOR MANAGEMENT |
| JOB SITE MANAGEMENT | PROGRESS REPORTING | COMMUNICATION & MEETING FACILITATION |
| SCHEDULE MANAGEMENT | | |

COMMUNICATION & MEETING FACILITATION

Effective communication among the project owner, teams, and subcontractors is vital for construction success, ensuring progress updates and strong relationships.

OAC MEETINGS

The owner, architect, and contractor (Scherrer) meet weekly at the job site to review progress, budgets, and address open items, with meeting minutes and an updated project schedule shared with stakeholders after each meeting.

SUBCONTRACTOR MEETINGS

The project manager meets with subcontractors and suppliers to discuss schedules, critical path items, and coordination issues, while distributing meeting minutes and an updated project schedule to all stakeholders afterward.

Project stakeholders are informed via a monthly report including:

- Safety
- Manpower, Project Status, and Schedule
- Budget, Change Order Log, Projected Cash Flow, and Construction Bulletin Summary
- RFI Tracking
- Contractor Directory and Progress Photos

Ongoing communication occurs with the project architect, subcontractors and other key stakeholders. The project manager visits the job site regularly to address potential issues and assess progress.

TECHNOLOGIES

Scherrer utilizes a variety of platforms to share information, including DocuSign, PlanSwift, On-Screen Takeoff, Bluebeam, and Procore.

DOCUMENTATION

All project documentation, including drawings and specifications with past revisions, project photos, submittals, inspections, reports, meeting minutes, job schedules, daily job reports, contracts, change orders, and cost status, will be stored on Procore.

COST CONTROL

To control costs throughout the, the project manager will update the budget using reports that offer an accurate and timely analysis of costs. Regular budget updates will be presented to the Owner for their review.

QUALITY ASSURANCE QUALITY CONTROL

Scherrer’s QA/QC program ensures a level of quality that exceeds industry standards. QA/QC meetings are held regularly throughout the project. Specified materials and installation methods are reviewed with subcontractors prior to installation.

DISRUPTION AVOIDANCE (IF WORKING IN OCCUPIED SPACES)

Prior to sub-bidding, we will determine the safe tolerance for construction activity. Required phasing, hours of construction activity, and controls that will be built into the subcontracts and master schedule. Effectiveness of these controls is measured through daily communication with the Owner and at weekly Owner meetings.

POST-CONSTRUCTION SERVICES

We believe that creating a building is an ongoing project that doesn't just end when construction is complete. We take pride in maintaining solid relationships and continue to serve our clients to ensure every aspect of the project meets their full expectations.

SERVICES

- BUILDING SYSTEMS COMMISSIONING
- OWNER SYSTEMS TRAINING
- DIGITAL CLOSE-OUT PROGRAM
- OPERATIONS & MAINTENANCE MANUALS

- TRAINING VIDEOS
- AS-BUILT RECORD DRAWINGS
- OCCUPANCY CERTIFICATION
- WARRANTY CERTIFICATES & SUPPORT

PROJECT CLOSE OUT

The closeout process is critical to ensure our clients are ready to move into and utilize their new facility. Our project team will oversee the turnover and commissioning of your building by creating a detailed operational maintenance and management plan.

Manuals for operating and maintaining your new equipment will be compiled, cataloged, and include project documentation, photos, record drawings, warranties, and O&M manuals. This information will also be provided in a digital format for ease of use and distribution among the maintenance team.

We will organize required training and offer support throughout the warranty period.

WARRANTY

Prior to one year of occupancy, Scherrer will conduct a post-construction walk-through. Together with the client, a checklist of items is inspected and tested to ensure that they meet the agreed-upon standards. These items may include electrical systems, plumbing fixtures, HVAC systems, roofing, and flooring. Any deficiencies found during the walk-through are documented and addressed.

WARRANTY, OPERATION & MAINTENANCE MANUALS

Manuals for operating and maintaining your new equipment will be compiled, cataloged, and include project documentation, photos, record drawings, warranties, and O&M manuals. This information is also provided in a digital format for ease of use and distribution among the maintenance team.

We will organize required training and offer support throughout the warranty period and beyond.

SCHERRER SAFETY PROGRAM

Our continued superior performance is built upon an uncompromising commitment to safety. The well-being of our employees, clients, trade partners, site visitors, and the public is our highest priority. Our goal is simple: every employee returns home in the same condition in which they arrived. Our Safety Director is responsible for developing, implementing, and monitoring all corporate safety programs to ensure compliance and continuous improvement.

TRAINING AND CERTIFICATIONS

Safety begins on Day One. All employees complete Scherrer's Safety Orientation before stepping onto a jobsite. All supervisory personnel maintain OSHA 10-Hour or 30-Hour certification. All employees receive annual refresher training, with additional instruction provided as required by project-specific needs.

JOB SPECIFIC SAFETY PLAN (JSSP)

Every project has a pre-construction meeting prior to breaking ground. Information gathered during this meeting is used to create a customized Job Specific Safety Plan (JSSP), which is issued as part of the project documents. This plan includes emergency procedures, site-specific protocols, and daily job briefing requirements. All contractors working on-site are required to review, acknowledge, and comply with the JSSP. No individual is permitted to work on the jobsite until all required safety documentation, including JSSP review, is completed.

SAFETY COMMITTEE

Scherrer's Safety Committee's primary purpose is to reduce or eliminate injuries and strengthen our safety culture. The committee reviews safety policies, evaluates all incidents, determines root causes, and implements corrective actions. Through this process, we foster a proactive, continuously improving safety culture rather than a reactive one.

DAILY JOB BRIEFINGS

Daily job briefings are led by the Superintendent and/or Foreman. During these meetings, trade partners and Scherrer personnel review the day's planned tasks, associated hazards, and the steps that will be taken to mitigate risks.

SAFETY AUDITS

Daily safety audits are conducted by the on-site Superintendent and subcontractor Foremen to ensure compliance and reinforce accountability. In addition, the Safety Director performs weekly jobsite audits to verify adherence to safety standards and identify potential upcoming hazards.

WEEKLY SAFETY MEETINGS

All jobsite personnel are required to attend weekly safety meetings. Supervisory staff conduct project-specific "Toolbox Talks" addressing relevant safety topics and jobsite conditions.

SELF-PERFORM TRADES

Throughout our history, we have assembled a team of highly skilled craftsmen who embody a strong work ethic and a deep understanding of what it takes to deliver exceptional workmanship.

We collaborate with our local trade unions to maximize the employment of local craft workers and ensure proper manpower is allocated to each project.

Our self-perform trades significantly enhance the overall project by providing the benefits below.

SCHEDULE CONTROL

By using our self-perform trades on our projects, we are able to control the project schedule and ensure all critical milestones are achieved.

QUALITY

Our crews' tenure in the construction industry, along with their experience in completing work to Scherrer's high standards, helps optimize the quality of the work performed, efficiency in the field, and collaboration with our office team.

COST CONTROL & EFFICIENCY

Our experienced self-perform crews provide a distinct advantage in accurately estimating project costs. During construction, our crews possess a predetermined understanding of the project scope and production requirements.

LOCAL INVOLVEMENT

Utilizing local craftsmen assures the work stays local and gives workers a sense of ownership and pride to be working on projects within their own community.

SELECTIVE DEMOLITION

Selective demolition involves carefully and strategically removing specific parts of existing structures.

- Structural demolition including bracing and shoring
- Interior walls
- Interior flooring and ceilings
- Removal of cabinets, accessories, etc.

CONCRETE

Our concrete services cover a wide range of applications including:

- Footings
- Foundation walls
- Slab on grade and concrete topping
- Site concrete (sidewalks, retaining walls)
- Ramps and stairs on grade

MASONRY

Ideal for both new construction and renovations, our masonry services offer:

- Structural/load bearing CMU walls
- Interior non-load bearing walls
- Exterior block walls
- Brick/stone facade work
- Maintenance (restoration, tuckpointing)

CARPENTRY

From framing to finishing touches, our carpentry crews provide:

- Rough blocking
- Rough framing
- Finish carpentry (cabinets, trim, doors, accessories)

SCHERRER'S COMMITMENT TO SUPPORTING OUR COMMUNITIES

At Scherrer Construction, community involvement is a core value. To further our commitment to giving back, we established our nonprofit organization, Scherrer Cares. Through this program, we proudly support a wide range of local organizations, with a strong emphasis on first responders. Each year, Scherrer Cares makes an annual donation to Back the Badge, reinforcing our ongoing support of law enforcement and those who serve and protect our communities. In addition, our outreach extends to military organizations, libraries, schools, animal shelters, and other local initiatives that strengthen the communities we serve.

Report to CLIPP

Agenda Item: Buska Park Fundraising Update

Meeting Date: June 1, 2026

Referring Body: CLIPP

Committee Contact: Aaron Myszka

Staff Contact: Greg Ulman

Report Prepared by: Greg Ulman

AGENDA ITEM: Buska Park Fundraising Update

OBJECTIVE(S): To inform the CLIPP Committee about the fundraising and renovations of the Buska Park playground.

HISTORY/BACKGROUND: Buska Park has the oldest playground structure in Kronenwetter. The existing equipment is a wood structure that is in need of replacement. Since a nice playground isn't in the budget for a few years, staff decided to start a fundraising campaign to get a good playground for the residents sooner rather than later. Through an RFP process we chose Lee Recreation to design and ultimately build a playground for us. We recently received the rendering of the playground we picked out and share it with you today.

Since this is a fundraising campaign and are in the early stages of this process, we can custom make the playground to add more amenities if we exceed our goal of \$200,000, as well as customize the paint scheme. Over the course of the spring, summer, and fall we will go to various businesses to ask for donations, as well as encourage residents to donate to the project as well. A QR code is on the design page for donating. There will be a spot for listing donors, possibly a donor wall, as well as memorial benches available to purchase.

BURKE GENERATIONS WARRANTY

Section 6, Item 1.

BCI Burke Company, LLC ("Burke") warrants that all standard products are warranted to be free from defects in materials and workmanship, under normal use and service, for a period of one (1) year from the date of shipment.

We stand behind our products.

In addition, the following products are warranted, under normal use and service from the date of shipment as follows:

- One Hundred (100) Year Limited Warranty on aluminum and steel upright posts (including Nucleus®, Nucleus Evolution®, Nucleus Aspire®, Intensity®, Level X®, Synergy®, Synergy Imagination® & 4ME®) against structural failure due to corrosion, deterioration or workmanship.
- One Hundred (100) Year Limited Warranty on KoreKconnect® Clamp Castings against structural failure due to corrosion, deterioration or workmanship.
- One Hundred (100) Year Limited Warranty on Hardware (nuts, bolts, washers).
- One Hundred (100) Year Limited Warranty on bolt-through and direct-bolt fastening and clamp systems (Synergy®, Intensity®, Nucleus®).
- Twenty-Five (25) Year Limited Warranty on spring assemblies and aluminum cast animals.
- Fifteen (15) Year Limited Warranty on structure platforms and decks, metal roofs, table tops, bench tops, railings and barriers against structural failure due to materials or workmanship.
- Fifteen (15) Year Limited Warranty on all plastic components against structural failure due to materials or workmanship.
- Ten (10) Year Limited Warranty on ShadePlay® Canopies fabric, threads, and cables against degradation, cracking or material breakdown resulting from ultra-violet exposure, natural deterioration or manufacturing defects. This warranty is limited to the design loads as stated in the specifications.
- Ten (10) Year Limited Warranty on NaturePlay® Boulders and GFRc products against structural failure due to natural deterioration or workmanship. Natural wear, which may occur with any concrete product with age, is excluded from this warranty.
- Ten (10) Year Limited Warranty on Full Color Custom Signage against manufacturing defects that cause delamination or degradation of the sign. Full Color Custom Signs also carry a two (2) year warranty against premature fading of the print and graphics on the signs.
- Five (5) Year Limited Warranty on Nucleus®, Intensity®, and RopeVenture® cables against premature wear due to natural deterioration or manufacturing defects. Determination of premature wear will be at the manufacturer's discretion.
- Five (5) Year Limited Warranty on rubber belt material against premature wear due to natural deterioration or manufacturing defects. Determination of premature wear will be at the manufacturer's discretion.
- Five (5) Year Limited Warranty on moving parts, including swing components, against structural failure due to materials or workmanship.
- Five (5) Year Limited Warranty on PlayEnsemble® cables and mallets against defects in materials and workmanship.
- Three (3) Year Limited Warranty on electronic panel speakers, sound chips and circuit boards against electronic failure caused by manufacturing defects.

The warranty stated above is valid only if the equipment is erected in conformity with the layout plan and/or installation instructions furnished by BCI Burke Company, LLC using approved parts; have been maintained and inspected in accordance with BCI Burke Company, LLC instructions. Burke's liability and your exclusive remedy hereunder will be limited to repair or replacement of those parts found in Burke's reasonable judgment to be defective. Any claim made within the above stated warranty periods must be made promptly after discovery of the defect. A part is covered only for the original warranty period of the applicable part. Replacement parts carry the applicable warranty from the date of shipment of the replacement from Burke. After the expiration of the warranty period, you must pay for all parts, transportation and service charges.

Burke reserves the right to accept or reject any claim in whole or in part. Burke will not accept the return of any product without its prior written approval. Burke will assume transportation charges for shipment of the returned product if it is returned in strict compliance with Burke's written instructions.

THE FOREGOING WARRANTIES ARE EXCLUSIVE AND IN LIEU OF ANY OTHER WARRANTY, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. IF THE FOREGOING DISCLAIMER OF ADDITIONAL WARRANTIES IS NOT GIVEN FULL FORCE AND EFFECT, ANY RESULTING ADDITIONAL WARRANTY SHALL BE LIMITED IN DURATION TO THE EXPRESS WARRANTIES AND BE OTHERWISE SUBJECT TO AND LIMITED BY THE TERMS OF BURKE'S PRODUCT WARRANTY. SOME STATES DO NOT ALLOW THE EXCLUSION OF CERTAIN IMPLIED WARRANTIES, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

Warranty Exclusions: The above stated warranties do not cover: "cosmetic" defects, such as scratches, dents, marring, or fading; damage due to incorrect installation, vandalism, misuse, accident, wear and tear from normal use, exposure to extreme weather, immersion in salt or chlorine water, unauthorized repair or modification, abnormal use, lack of maintenance, or other cause not within Burke's control; and

Limitation of Remedies: Burke is not liable for consequential or incidental damages, including but not limited to labor costs or lost profits resulting from the use of or inability to use the products or from the products being incorporated in or becoming a component of any other product. If, after a reasonable number of repeated efforts, Burke is unable to repair or replace a defective or nonconforming product, Burke shall have the option to accept return of the product, or part thereof, if such does not substantially impair its value, and return the purchase price as the buyer's entire and exclusive remedy. Without limiting the generality of the foregoing, Burke will not be responsible for labor costs involved in the removal of products or the installation of replacement products. Some states do not allow the exclusion of incidental damages, so the above exclusion may not apply to you.

The environment near a saltwater coast can be extremely corrosive. Some corrosion and/or deterioration is considered "normal wear" in this environment. Product installed within 500 yards of a saltwater shoreline will only be covered for half the period of the standard product warranty, up to a maximum of five years, for defects caused by corrosion. Products installed in direct contact with saltwater or that are subjected to salt spray are not covered by the standard warranty for any defects caused by corrosion.

Contact your local Burke Representative for warranty information regarding Burke Turf® and Burke Tile products.

Terms of Sale

Pricing: Prices published in this catalog are in USD, are approximate and do not include shipping & handling, surfacing, installation nor applicable taxes. All prices are subject to change without notice. Contact your Burke representative for current pricing. Payments are to be made in USD.

Weights: Weights are approximate and may vary with actual orders.

Installation: All equipment is shipped unassembled. For a list of factory-certified installers in your area, please contact your Burke representative.

Specifications: Product specifications in this catalog were correct at the time of publication. However, product improvements are ongoing at Burke, and we reserve the right to change or discontinue specifications without notice.

Loss or Damage in Transit: A signed bill of lading is our receipt from a carrier that our shipment to you was complete and in good condition upon arrival. Before you sign, please check the Bill of Lading carefully when the shipment arrives to make sure nothing is missing and there are no damages. Once the shipment leaves our plant, we are no longer responsible for any damage, loss or shortage.

For more information regarding the warranty, call Customer Service at 920-921-9220 or 800-356-2070.

Village of Kronenwetter, WI

May 21 at 3:53 PM · 🌐

We're excited to officially announce the launch of the Buska Park Renovation Project & Community Fundraiser! 🌱🌿

🌿 For generations, Buska Park has been a neighborhood gathering place filled with play, connection, and community memories. Now, it's time to invest in its future.

The Village is working to transform Buska Park into a more welcoming, accessible and inclusive space for everyone by adding:

- ✓ Modern playground equipment
- ✓ ADA-accessible features and pathways
- ✓ Updated gathering spaces
- ✓ Improved community amenities

This project is about more than a park—it's about creating a space where future generations can play, gather and grow together.

But we can't do it alone.

Today, we're inviting residents, families, local businesses and community supporters to help bring this vision to life through donations and sponsorships.

Every contribution—big or small—helps build a park that welcomes everyone.

■ Watch for donation opportunities, fundraising events, and project updates throughout the campaign. Together, we can create something truly special for our community.

If you want to donate right now, head to the following link and get us one step closer to a BETTER Buska Park! https://www.kronenwetter.org/.../a_park_for_everyone...

Thank you! It takes a Village to build a park!

Sounds beautiful! Improvements like this park upgrade help keep Kronenwetter a great place to live while maintaining the clean, safe community we all value.

That said, what about keeping our streets safe too? Pleasant Drive has become a racetrack. With plans for two additional subdivisions along Pleasant Drive, traffic is only going to increase. It's unclear where all of those vehicles will enter and exit, but this road was never designed to handle city-level traffic. Something needs to be done before it becomes an even bigger safety concern for residents, walkers, and children in the area.

Teresa Andersen Holeywinski

The park improvement has been a long time need. I'm glad it's finally happening. Can we see the budget breakdown for the yearly replacement of old equipment? This should help offset the \$150K fundraising amount. Also, what happened to the surveys sent to residents about park needs? Having lived across from the park for 30+ years the name change from Sunset to Buska is still an adjustment. Go back to whomever approved the change and cost as a result to fund some of the park. For those on the CLIPP committee making decisions on our parks I request you walk all the parks to see what residents concerns and questions are. Looking forward to supporting the new and improved park!

1 👍

LaVonne Goytowski

This is the farmers market park. They want to update benches, tennis areas and more. Also, make it more ADA friendly. Went to the CLIPP meeting this month and it was discussed.

👑 Top fan

Jon Kittel

I have never used this park or gone to it. Is this the park where the farmer's market is in the summertime? As the park sits right now, are there some amenities it does not offer so that it is excluding anyone from using it? I'm not complaining about updates, I'm just wondering what problems it faces as it stands currently? Thanks

Jon Kittel the equipment itself is not safe, between the wood, chipped paint and rust. I grew up there when it was Sunset Park. It's been the same equipment for over 20 years with no upkeep to it. It's been sad to see it just sit especially since they've worked so hard to get the Farmers Market established there.

It would also be nice if it had something geared towards younger children.

Jon Kittel I'm not part of the committee or anything ...but I know with the farmers market it's all on grass which makes it difficult for wheel chair users (and strollers). The playground also requires people to cross a big swath of grass to get to it with no paths for wheels.

This is awesome! I sure wish Weston would have taken accessibility into account when redoing 5 playgrounds last year and made at least one of them more inclusive.

Actually Sunset Park for generations. 🙌
What is the total amount needed for funding? Seems beneficial to know. What amount are the Buskas contributing for their newly named park?
Also, the rendering doesn't cater to smaller children. Hopefully that is taken into account because what is shown isn't really hitting a large population who actually use the park.
People have been begging for this update for years. The village has gone and fixed other parks instead. Now asks for donations for this one. Seems backwards if this park is such a big deal, money should have been allocated differently.

Sunset Park has been around for generations. Buska Park is a new sign. The slide equipment has been around for about 30 years and it's an accident waiting to happen. I'd thought when the tennis courts were fixed up that the equipment would be at the same time. The colored equipment really doesn't have any purpose. There is 1 baby swing so it's definitely not geared towards younger children. Maybe if people could have a picture of what the village is wanting to build people might be more excited to donate. I'm not trying to fight with anyone. I've just lived by the park since 1992.

Comment as Village of Kronenwetter, WI

	<h1>REPORT TO CLIPP</h1>
ITEM NAME:	Kronenwetter Park Committee
MEETING DATE:	6/1/26
PRESENTING COMMITTEE:	CLIPP
COMMITTEE CONTACT:	Aaron Myszka
STAFF CONTACT:	Jennifer Poyer
PREPARED BY:	Aaron Myszka

ISSUE: To determine if a Kronenwetter Park Committee should be started

OBJECTIVES: To discuss the if there is a need to form a Park Committee

ISSUE BACKGROUND/PREVIOUS ACTIONS: During the Bike and Walk for the Health of It event on May 14, a Kronenwetter parks survey was distributed to residents to gather feedback on what they value about our parks, suggested improvements, and interest in serving on the Kronenwetter Parks Committee. Three residents expressed interest in serving on the Parks Committee.

PROPOSAL: To discuss if Kronenwetter should start a Parks committee

ADVANTAGES: We can have a committee made up of both residents and board members focused on giving recommendations and leading fundraiser efforts.

DISADVANTAGES:

ITEMIZE ALL ANTICIPATED COSTS (Direct or Indirect, Start-Up/One-Time, Capital, Ongoing & Annual, Debt Service, etc.)

RECOMMENDED ACTION: To determine if we want to have a Parks Committee

OTHER OPTIONS CONSIDERED: We just started fundraising for the Buska Park project and it would be helpful to have a committee of both citizens and board members to lead the effort in improving our neglected parks.

TIMING REQUIREMENTS/CONSTRAINTS:

FUNDING SOURCE(s) – Must include Account Number/Description/Budgeted Amt CFY/% Used CFY/\$ Remaining CFY

Account Number:

Description:

Budgeted Amount:

Spent to Date:

Percentage Used:

Remaining:

ATTACHMENTS (describe briefly):

Report to CLIPP

Agenda Item: Discussion and Possible Action: Trails and Leisure for Village Owned Property on Lea Rd.

Meeting Date: June 1, 2026

Referring Body: CLIPP

Committee Contact: Aaron Myszka

Staff Contact: Greg Ulman

Report Prepared by: Greg Ulman

AGENDA ITEM: Discussion and Possible Action: Trails and Leisure for Village Owned Property on Lea Rd.

OBJECTIVE(S): To have the CLIPP Committee discuss the potential trails and leisure activity on the Village owned property by Lea Rd.

HISTORY/BACKGROUND: On August 4, 2025 CLIPP voted to add trails to the Village owned property on Lea Rd. by the municipal wells. The plan was to make roughly a half-mile of trails for biking and walking. Village crews were to cut trees down, remove the stumps, smooth the terrain, and gravel and mulch the trails. In addition, there was to be a gravel parking lot off of Terrebonne Dr.

Cost Breakdown:

Walking path – 1,300ft.	\$9,000
Bike path – 2,600ft.	\$26,000
Mulched Trails -	\$6,500
Parking Lot -	\$14,000
Driveway -	\$3,000
Totals:	\$58,500

The costs above reflect the prices of gravel and trucking costs to do the project.

Recently members of CLIPP asked where we were at with the project. Currently, we have the trails cut in and are at the stage of removing the stumps. They also asked us to not add the gravel and just leave the trails in a natural state of short grass suitable for walking when the project is complete. This would save the Village thousands of dollars from the park fund account. By doing this we would need a vote from CLIPP and the Village Board since the Village Board approved the original scope last fall.

RECOMMENDED ACTION: To give direction as CLIPP sees fit.

Map 3.2: This feature displays the floodplain, areas of interest and possible trail extent within the parcels (left) and the trail design within the floodplain and areas of interest (right).

Ultimately, the final design is as follows:

Map 3.3: This map displays the final trail design within the study area.

Trail Amenities

The final suitability analysis that needed to be conducted was for park amenities. The important criteria for trail amenity placement is as follows:
