AGENDA REPORT

MEETING: LAWRENCEVILLE ARTS COMMISSION

AGENDA CATEGORY: GENERAL DISCUSSION

Item:	Paver Art
Department:	Community Relations
Date of Meeting:	Tuesday, May 10, 2022
Fiscal Impact:	\$0
Presented By:	Aura-Leigh Sanders
Action Requested:	Discussion

Summary: The City of Lawrenceville Engineering Department is working on a project to raise the crosswalk at Seminary Street and has brought the idea forth to incorporate art within the pavers. Paver Art is a sustainable way to incorporate long-lasting art in streetscapes and attached is an example of work done in the Patchogue Village. This discussion will open the floor on how to best proceed.

"Call to Artists to design pavers for the Roe Walkway Project"

•February 4, 2018

<https://patchoguearts.org/roe-walkway-public-art-project/>

"The Patchogue Arts Council (PAC), as arts consultant to the Community Development Agency (CDA), is requesting submissions from artists interested in designing one of four custom pavers to be part of the 2018 Roe Walkway Public Art Project. Four final designs will be transformed into six foot round custom paver art pieces. They will be incorporated into a permanent path leading from the Roe Archway through the parking lot to Terry Street, home of the Patchogue Arts Council, Artspace Lofts, and the Plaza Cinema and Media Arts Center – Patchogue's Path to the Arts!"

"Artists are encouraged to review the paverart.com site to gain a better understanding of the materials and process. "

"Patchogue Village creates arts district; hopes to transform Terry Street"

patchoguearts We agree @kevinross1346 🙌 Patchogue is the only town on LI with a project utilizing custom pavers featuring original artwork from local artists!

patchoguearts @patchoguearts there's also a very large lot just east of the walkway on the south side that is under utilized, never crowded and free! 🙌

How PAVERART Started...

18 Years Ago, We Were Given A Challenge.....

"We just built 4 intersections that have broken down in less than 2 years with decorative/stained concrete. Can you build 4 artistic streetscapes that will stand the test of time with custom-colored Concrete Pavers?"

The answer was Yes, launching PAVERART, and they still look great to this day.

Representative Decorative/Stained Concrete Application

Beautifying The World of Hardscapes....

8.

- *Over the next 18 years our work has evolved to include municipalities, professional sports teams, universities, corporate branding and residential designs. Our company is best summarized by our name “PAVERART” combined with our 3-word tagline:*

Imagine. Create. Beautify.

Our Guiding Principles

From Job #1 To Today

- **Our products are BUILT TO LAST.**

- We often joke, but we are dead serious with the following quip: “We will all be long gone, but PAVERART will still be in the ground, perfectly strong and looking great!”

- **Our products have that “Wow Factor!”**

- Our patented technology can not be replicated with traditional hardscape cutting methods. Seeing is believing. Browse our past projects to get a feel for our capabilities.

imagine. create. beautify.

Richard j

"I needed to redo the sidewalk in front of my house, and wanted to do a horse racing mural in pavers. I found Paverart in the spring of 2020 and picked them to do the work. I had an art workup of what I wanted done, but it was the Paverart guys that really made this project succeed. Mike and Mark helped me understand what was possible, and listened to me to make sure I got what I wanted.

The project was ambitious and technically challenging, requiring patience on Paverart's side as I went back and forth on design and what I wanted. But Paverart delivered. They cut and sorted the pieces, loaded them on pallets in reverse order of installation, created detailed instructions and videos on how it should be installed, and frequently consulted with my hardscaper (DNHardscaping in Albany, NY) to make sure the job was done correctly.

The whole team at Paverart did a fantastic job - I highly recommend them for any paver project you have. The more challenging the better!"

Excitement Worth Sharing!

Stew W

8.

"I'm excited! My day and weekend have been made. Allow me to explain..."

Some of you know and some of you don't know that my BIG project for this year is that I am ripping out our asphalt driveway and replacing it with a heated paver driveway. "Heated" means a hydronic snowmelt system. "Hydronic" means a glycol/water mixture pumped through flexible plastic tubing running back and forth underneath the driveway to melt accumulated snow, or prevent it from accumulating in the first place. "Paver" means paver bricks set in a sand bed, which creates an aesthetically pleasing and beautiful surface.

However, I am doing something special with our paver driveway. If you take a look at the image, you will see a 16-ft. diameter "Steal Your Face" or "Stealie" for short, the iconic Grateful Dead logo that is recognized worldwide. Each one of the individual squares that you see is 1-ft. across. This gorgeous work of art was created by Mike Bull and his team at Paver Art LLC, a New Jersey company that does nothing but create art in pavers. They are pretty much the only company who does such work in all of north America. Should you be interested, Mike is super guy and a pleasure to work with. I love when a company is so easy to do business with that you actually enjoy giving them a large sum of money. Such is the case with Mike Bull and Paver Art LLC.

In case you haven't figured it out by now, this 16-ft. diameter work of art will be incorporated into the north end of our driveway, just behind the garage apron, where our driveway is its widest.

Now I really can't wait for the finished product! Construction is set to start in roughly another six (6) weeks." **See Less**

Stew Weis

July 11, 2017 · 🌐

...

New Paver Driveway with Snowmelt System is now complete as far as the pavers go. Still have some final steps to complete for the snowmelt system. But here's the completed paver driveway featuring our 16-ft. diameter Grateful Dead "Stealie", thanks to Paver Art, LLC in Lindenwold, New Jersey.

Ken Gelwasser

What was the process to creating the Stealy? The image is it hand painted on?

Like · Reply · 3y

1

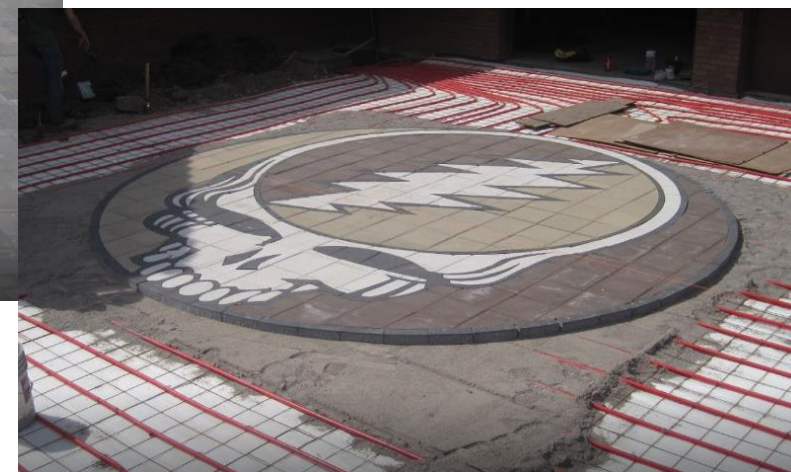

Stew Weis

No way painted on, Ken! The entire Stealie is made from colored pavers, 2-3/8" thick, cut with highly-specialized, computer-controlled cutting equipment made for the purpose. Here's a close-up of one section of the Stealie that illustrates what I'm saying.

***Excitement
Worth Sharing!***

"One of life's great pleasures for me is to do business with a company whose level of performance, standards, customer service and desire to exceed expectations is so over the top that it becomes an absolute pleasure to write the check and hand over my hard-earned dollars. Such is the case with PaverArt.

The attention to detail was unmistakable. The level of communication was nothing short of impressive and ensured that I, as the customer, knew exactly what was going on every step of the way.

Mike and Mark are truly two of the nicest guys in the world and are an absolute pleasure to do business with. I can easily recommend PaverArt to anybody with 100% confidence that you WILL be as happy as I am with the finished product."

Municipal & Commercial Safety Symbols: Paint vs PAVERART

- 1) Paint is always “cheap”
- 2) Cheap, can often become Expensive
- 3) The only question with Paint, is WHEN it breaks down and how many times it will be re-done over 20 years?

<https://www.paverart.com/post/the-streetscape-challenge-when-cheap-becomes-expensive>
