Supplemental Material

Supplemental - Thank you note from Leadership 49

Notice

- Public Comment: The public can speak about an item on the agenda during discussion of that item by coming up to the table or podium, signing-in, and then waiting to be recognized by the Chairman. Individuals are reminded that public comments should be limited to items over which the City Commission has supervision, control, jurisdiction, or advisory power (MCA 2-3-202).
- Meeting Recording: An audio and/or video recording of the meeting, or any portion thereof, may be purchased by contacting the City Administration. The City does not warrant the audio and/or video recording as to content, quality, or clarity.
- Special Accommodation: If you need special accommodations to attend or participate in our meeting, please contact the Fire Department at least 24 hours in advance of the specific meeting you are planning on attending.

C. CONSENT - Approve application for Special Parking Space for Nancy Ann Davis

City of Livingston 27 Application for Special Parking Spaces Reserved for Disabled Persons On a Public Street (Please note this process may take up to 90 days from date of submission)
Name of Applicant: Nancy Ann Dawis
Address: 219 W Callender Apt 70 Phone: 406-548-2845
Type of Special Parking Space Requested:
General Public Use X Reserved for Personal Use of a Disabled Person. (\$50 fee)
Specific Location of the Requested Space: Anywhere 3rd + Callerder St.
Reason for the Request: Total knew Replacement / Fibromyalgia

If requesting a "special parking space" reserved for personal use in a residential area, please answer the following questions:
 Do you operate a vehicle displaying a specialty inscribed license plate issued by the state of Montana to disabled persons and displaying a wheelchair symbol, or the letters "DV" issued to disabled veteran's, or do you possess a special parking permit issued by the State of Montana to persons with a disability? (Please provide a copy of the vehicle registration). Yes X No
2. Is the requested parking space adjacent to your permanent residence? Yes X No
3. Does reasonably accessible and practicable off street parking exist? Yes No \underline{X}
4. License plate number of vehicle(s) designated to use the space: MT BVA139
5. Are the designated vehicles operated by you? Yes X No
Administrative Use Only
Date application received: 10/20/2017 Reviewed by: Shannon Holmes
Does request meet criteria? Yes X No Comments Meets the criteria in Code Section 9-243.
City Commission Action:ApprovedDenied Date:

Installation of Sign: Sign installed by:
Amount Collected: Check no
<u>Removal of Sign</u> Sign removed by:
Reason for Removal:

Special reserved parking space requirements: Does it comply with Ordinance # 2012 C:

ADDRESS: 219 W. Callender (Ebert Apartments) Parking space will be on 3rd street. S.E. corner & 3rd + Callender

The space must be located on a smooth, level surfaces as near as practicable to building entrances or walkways that have curb cuts and appropriately designed ramps and access lanes to accommodate wheelchairs.

Comments: Nas ADA Bamp in Croat of parking Space

If parallel to curbside the parking space must be separated from an adjacent space, either in the front or the rear, by at lease 5 ft of striped no-parking area.

Comment: Complies

A parking space reserved for a person with a disability must be designated by a sign showing the international symbol of accessibility, indicating that a permit is required, and stating the penalty for a violation. The sign must be attached to a wall or post in a way that it is not obscured by a vehicle parked in the space.

Comment: will install when approved

In my opinion this space does comply X

Does not comply_____

I suggest that the council Approve X this request

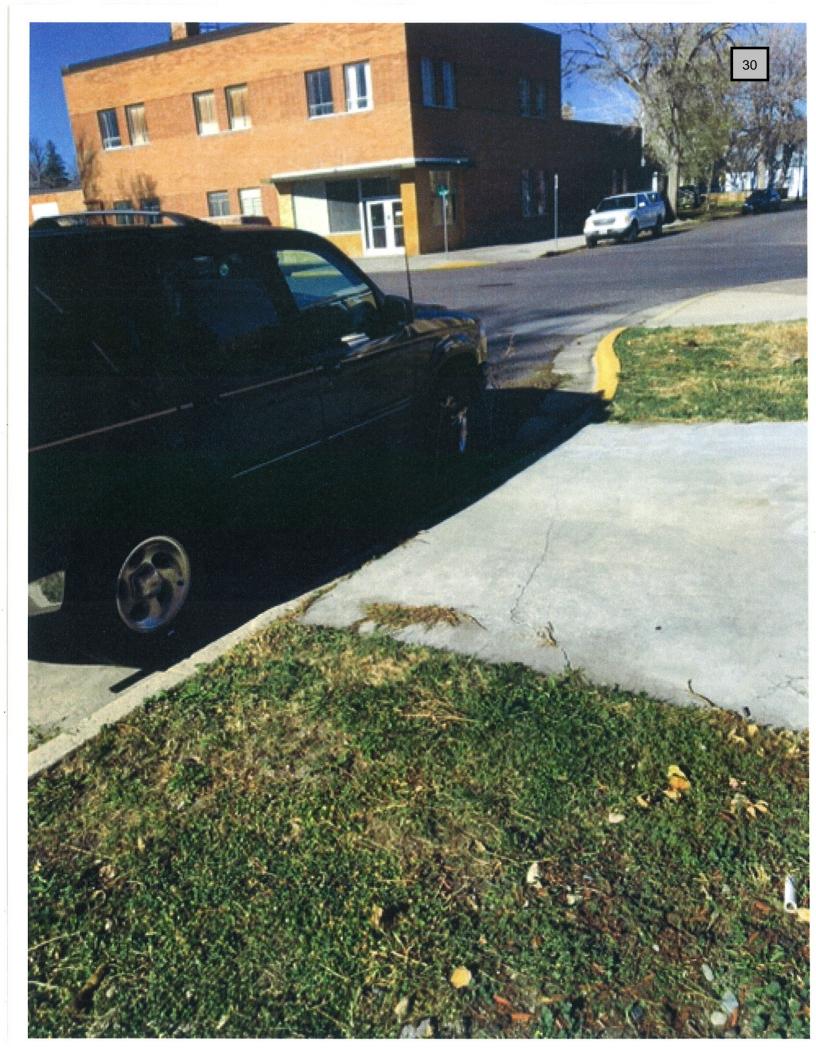

Disapprove_____ this request

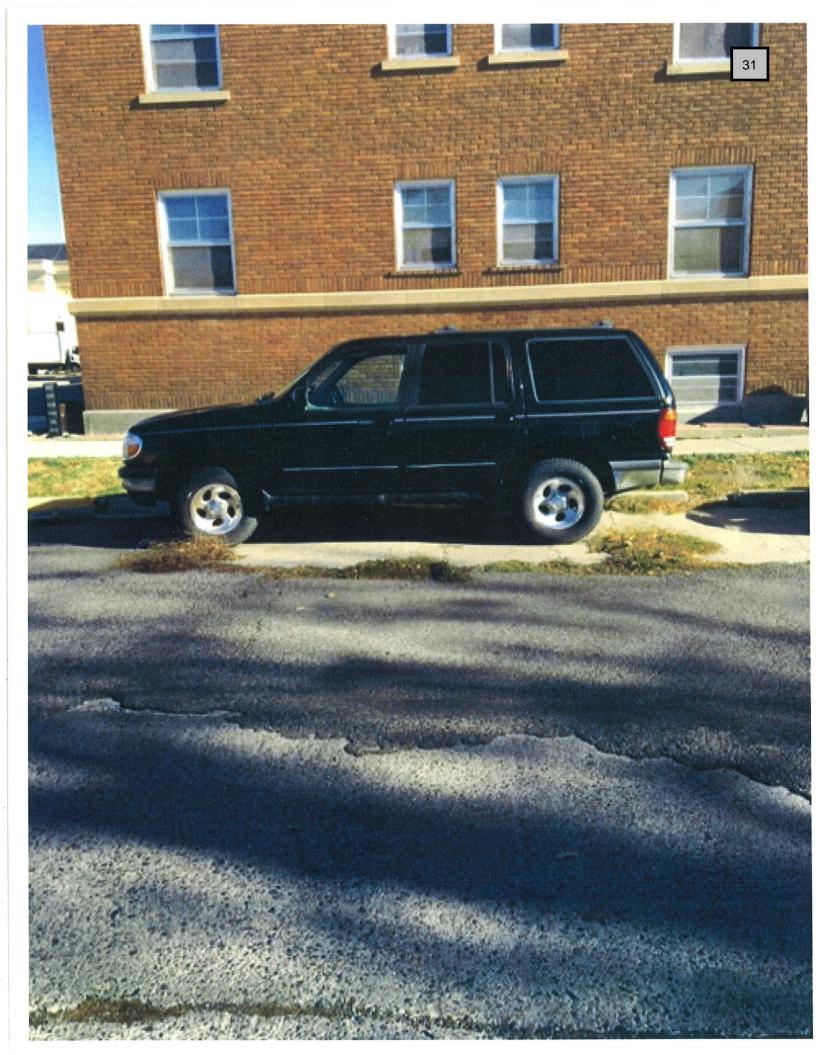

Signature _____.

Backup material for agenda item:

D. CONSENT - Approve WRF change orders for Blower upgrades and SBR basin rebar addition

October 31, 2017

Michael Kardoes, City Manager 414 East Callender Street Livingston, MT 59047 mkardoes@livingstonmontana.org

Re: Recommendation for Approval of Change Order No. G-1 from DAC for the <u>Livingston WRF Upgrade</u> project

Dear Mr. Kardoes:

AE2S recommends the approval of the enclosed Change Order G-1 for the <u>Livingston WRF Upgrade</u> project pending USDA-RD's and DEQ formal Concurrence.

Requested Action:

Please review and approve Change Order G-1. If acceptable, AE2S will facilitate final execution of Change Order G-1 by routing to the appropriate parties for signature.

Summary of Changes:

- 1) <u>Dick Anderson Construction Proposed Change Order No. 1 Blower Upgrades</u>
 - Please refer to the following enclosed letter, dated October 30, 2017 <u>RE: Livingston</u> <u>WRF Upgrade – Consideration of an Upgrade to Integrally Geared Turbo Blowers.</u>
 - See DAC Letter Dated October 18, 2017 <u>RE: Blowers Upgrades</u>

2) Dick Anderson Construction Proposed Change Order No. 2 – SBR Basin Rebar Addition

The delivery method for the Project is Design-Bid-Build. This method is the industry standard for wastewater facility projects in Montana – both USDA-RD and DEQ require design-bid-build and the EJCDC Contracts outline this delivery method explicitly. Inherent in this delivery process are multiple layers of review. The review process helps ensure the products the Contractor delivers are meeting specifications but also allow designers and reviewers the chance to improve details in the design to provide greater value to the project. This system helps to provide the Owner with as much utility as possible while keeping the economic means reasonable and justifiable.

During the review of shop drawing submittals for the structural steel reinforcement for the concrete SBR basin walls, structural reviewers and designers realized the standard detail referenced in the plans for the west wall of SBR Basin 2 could be improved. Though the detail referenced was consistent with the structural demands of structural loadings expected in the design life of the project, it was not consistent with City's desire for this wall to be built with as much potential for future expansion capability as possible. For a relatively minor change in price, additional rebar was provided so that the wall would be capable of providing further value if an additional basin was ever needed in future improvements.

Change Order Cost Evaluation:

EOPCC of Additional Rebar Reinforcement:	\$11,326.17
Proposed Cost Change from Contractor:	\$12,025.79

AE2S and TD&H completed the EOPCC for the Contractor to provide the additional rebar reinforcement prior to receiving the final PCO price from DAC. (The full spreadsheet of this EOPCC showing the calculations and assumptions is enclosed for further review – See "EOPCC for Additional Structural Steel Reinforcement.") As demonstrated by the small margin of cost difference between the EOPCC and PCO, the Engineer feels the Contractor's PCO price is fair and reflects an equitable market value of the material and labor provided. In other words, the cost for adding this additional rebar reinforcement by Change Order is commensurate with the price the City could have expected had this addition been included in the base bid for the project.

Changes to the General Construction Contract:

<u>Change</u>	<u>e in Contract Price:</u>	
0	Current Contract Price:	\$14,782,072.00
0	Cost increase from Change Order G-1:	<u>+ \$58,767.94</u>
0	Adjusted Contract price:	\$14,840,839.94

Change in Contract Times:

• Time adjustments:

2 Days added to Readiness for Final Payment

Project Budget:

This Change Order is contingent upon Funding Agency concurrence, however, assuming concurrence is granted, this Change Order would be an eligible project cost for reimbursement through the City's funding package consisting of grant and loan money from SRF, USDA-RD, DNRC-RRGL, and TSEP which includes \$985,608.00 of contingency.

This Change Order does not change the Total Project Costs previously established and approved by the City and all funding agencies.

We appreciate the opportunity to continue to provide professional engineering services to the City of Livingston and look forward to serving you throughout construction of the <u>Livingston WRF Upgrades</u> project. Should you have any questions or concerns, please do not hesitate to contact me at your convenience. Sincerely,

AE2S Brian Viall, E

Project Engineer

October 30, 2017

Mr. Shannon Holmes Public Works Director 330 Bennett Street Livingston, MT 59047 <u>sholmes@livingstonmontana.org</u>

Re: Livingston WRF Upgrade Consideration of an Upgrade to Integrally Geared Turbo Blowers

Dear Mr. Holmes:

Request:

Please consider this recommendation to approve an upgrade to Integrally Geared Turbo Blowers for the <u>Livingston WRF Upgrade</u> (Project). AE2S recommends upgrading to integrally geared turbo blowers for the benefits predicted in energy cost savings, the operational convenience of procuring a single technology for the aeration requirements for the aerobic digesters and the WAS Holding Basins, the smaller equipment footprint offered by the turbo blowers, and the reduced noise generation.

This letter provides discussion on the following topics to support this recommendation: **Background Information** regarding blower design, selection, and bidding; **Life-Cycle Cost Analysis; Construction Budget Impacts vs. Operational Budget Impacts;** and **Operational Benefits.** Please consider this information when making your final decision.

Background Information

The bid documents for the Project allowed the Contractor to provide one of two blower packages, herein referred to as *Blower Package 1* and *Blower Package 2*, described further below. Both packages were designed to meet the performance requirements for the same intended application – providing aeration for the Aerobic Digesters and the WAS Holding Basins.

Blower Design Parameters & Assumptions

- Aerobic Digestion Blower Discharge Pressure Requirements 9.7 psi.
- WAS Holding Basin (WHB) Discharge Pressure Requirements 5.5 psi.
- Blowers provided shall be supplied by a single manufacturer to simplify long-term O&M.
- High Energy Efficiency is a priority for City and WRF Operators.

Blower Package 1:

- Four (4) Integrally-Geared Turbo Blowers Spec Section 43 11 35
- Estimated Energy Efficiency (based on data provided by manufacturer): 75-80%
- Acceptable Manufacturers: Inovair; Approved Equal

Blower Package 2:

- Two (2) Positive Displacement WAS Holding Basins Spec Section 43 11 33
 - Estimated Energy Efficiency (based on typical PD Blowers): 55-65%
 - Acceptable Manufacturers: Kaeser; Aerzen; Garder-Denver; Atlas Copco; Approved Equal

- Two (2) Rotary Screw Blowers Aerobic Digesters Spec Section 43 11 34
 - Estimated Energy Efficiency (based on data provided by manufacturer): 70-78%
 - Acceptable Manufacturers: Kaeser; Aerzen; Garder-Denver; Atlas Copco; Approved Equal

The Integrally-geared turbo blowers of Blower Package 1 are extremely efficient (75 to 80%) and can handle the discharge pressures of both applications. However, Inovair is currently the only company manufacturing integrally-geared turbo blowers. Sole-sourcing blowers from Inovair during design was not feasible given the additional administrative hurdles presented by the funding agencies, the bidding timeline, and it would likely have resulted in less competitive pricing. Though Inovair blowers offer the energy efficiency and the convenience of a single blower technology, a second competing blower package (Blower Package 2) was specified to meet competitive bidding requirements.

Blower Package 2 included two blower technologies – rotary screw and positive displacement. Rotary screw blowers are almost as efficient as the turbo blowers (70 to 78%), and are suitable for the Aerobic Digesters operating pressure – 9.7%. The high efficiency rotary screw blowers would help keep energy costs lower for the aerobic digesters – where both blowers will operate approximately 18 hours per day, 365 days per year. The operating pressure in the WHB's, however, is relatively low – 5.5 psi. Rotary Screw Blower technology is not compatible with this pressure region. Positive Displacement (PD) blowers would satisfy the aeration needs in the WHBs, and provide backup service to the Aerobic Digester blowers should one fail or otherwise need to be taken out of service. The PD blowers in the WHBs will operate less frequently over time, but will have higher energy costs due to the low energy efficiency (55 – 65%).

After project award but prior to the submittal process, AE2S and Dick Anderson Construction (DAC) spoke about these blower packages. The opportunity to upgrade to the higher efficiency turbo blowers presented itself when DAC shared bid pricing from Inovair and Atlas Copco, lowest bidder for Blower Package 2. The cost difference between the two packages is \$46,742.15. In the interest of providing the City with the highest energy efficiency blowers, AE2S completed a basic Life-Cycle Cost Analysis comparison to see if investing in the turbo blower upgrade makes financial sense.

Life-Cycle Cost Analysis

The electricity cost savings between the two blower packages is approximately \$7,700 per year, using the following criteria:

Average cost of Electricity	\$0.13
(Integrates Demand Charges (kW) with Utilization Charges (kWh)	
WAS Holding Basin (WHB) Blowers	
Blower Discharge Flow	970 SCFM
Blower Discharge Pressure	5.5 PSIG
Blower Efficiency	
Rotary Lobe (isiWest)	60%
Integrally-Geared Turbo (Inovair)	78%
Average Runtime	1 Blower, 12 hours per Day
Estimated Annual Electricity Cost Savings at WHBs	\$3,805
Aerobic Digestion Blowers	
Blower Discharge Flow (Both Blowers in Operation)	1640 SCFM

\\10.1.0.160\ProjectFiles\Livingston\05613-2015-001\060 Construction\Correspondence\Blower Alternative Analysis\Blower Alternatives Analysis (103017).docx

Blower Discharge Pressure	9.7 PSIG
Blower Efficiency	
Rotary Screw (isiWest)	73%
Integrally-Geared Turbo (Inovair)	78%
Average Runtime	2 Blowers, 18 hours per
	Day
Estimated Annual Electricity Cost Savings at Aerobic Digesters	\$3,885
Estimated Total Annual Electricity Cost Savings	\$7,690

- Capital cost difference = \$46,742
- Annual operating/energy savings = \$7,690
- Simple payback period = approximately 6.1 years

Construction Budget Impacts vs. Operational Budget Impacts

- The additional cost for the integrally-geared turbo blowers would be paid for out of the project contingency, which is \$985,608. The first \$464,267 of the contingency is SRF loan at 2.5% with a 22-year term. The remaining portion of the contingency is USDA grant money, but the loan portion must be spent first according to USDA-RD rules and the funding agreements. Amortizing the \$46,742 difference over 22 years, the annual loan payment would be increased by approximately \$2,750.00 including interest.
- Considering the annual estimated energy cost savings is \$7,690, the *annual net savings* of upgrading to turbo blowers *is \$4,940*.
- The simple payback period for this change is 6.1 years (\$46,742 difference divided by annual electricity cost savings of \$7,690).
- This change would help guard the City against potential future, unforeseeable increases in electricity costs.

Operational Benefits

- With integrally-geared turbo blowers, the City will would have one blower technology for both WHB and Aerobic Digestion applications. Along with this comes efficiencies to O&M. By limiting the variety of make and model of blowers, operators will become more familiar with and quicker at completing the O&M routine. There are many advantages to this in terms of workplace satisfaction and labor efficiency, however putting a cost-benefit to this is very subjective.
- The integrally-geared turbo blowers would be provided in a stacked configuration (see enclosed drawing from Inovair). The manufacturer has verified that with this configuration either blower can be taken out of service (or fully removed from the stack) without disrupting operation of the other blower in the stack. The impact of this configuration on the layout of the room is shown conceptually in Figure 1, found on the following page. Most notable is the smaller equipment footprint. Inlet and outlet piping modifications will be coordinated through Inovair shop drawing submittals and Dick Anderson's piping layout.
- Sales literature for both blower packages are enclosed.

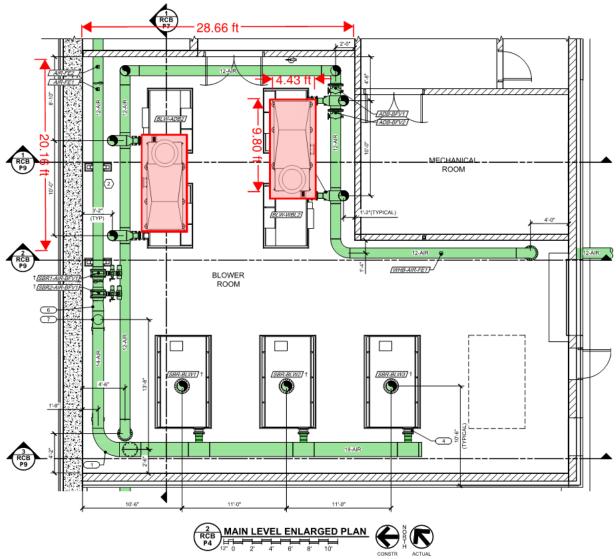

Figure 1 - Floor Plan Concept with Integrally Geared Turbo Blowers

RE: Blowers Upgrades Livingston WRF Upgrade 2017

Mr. Buecker,

This letter is in concerns to the Blower Upgrades that have been discussed. DAC is proposing an upgrade from Atlas Blower Package (ISI West) to Inovair Blower Package (Northwestern Power & Equipment). The upgrade would result in a Change Order amount of \$46,742.15. Attached is a breakdown in cost along with Inovair's proposal.

Thank you for time and consideration. Should you have any questions, please feel free to contact me at 406-551-0523.

Sincerely,

Kyle Kastelitz Project Manager Dick Anderson Construction

Represented By: Northwestern Power Equipment Kent Price Page One

Project: Livingston MT *Quote No:* 328434 - Revised

Date: 10-16-17

Specification: Inovair Standard Design

Four (4) single-stage IM series centrifugal turbo blowers, accessories, and controls with variable frequency drive (VFD) for variable output capacity control. Two designed for a capacity of 600-970 SCFM at 5.54 PSIG discharge pressure (50HP) and two designed to deliver 820-900 SCFM at 9.66 PSIG (60HP). Each unit is equipped with automatic temperature compensation and automatic speed adjustment for varying liquid levels.

Major Skid Components:

Inovair turbo blower with integral speed increasing gearbox and oil reservoir 50/60 HP TEFC high efficiency electric motor, 460v/60hz/3ph suitable for VFD drive Structural steel base Oil lube system with mechanical pump, oil filter, and air-to-oil cooler, initial oil fill Skid mounted instruments Blow-off (bypass) valve, servo-actuated Vibration isolation pads Integral inlet filter

Shipped Loose Components:

Master Control panel Discharge check valves – 8 inches Variable Frequency Drive – 50/60 HP/460VAC/3PH 8" Manual Butterfly Valves 8" Discharge EPDM Expansion Joints

Spare oil filters and oil One spare intake air filter – Washable One spare cabinet air filter - Washable

Instruments Include:

Inlet mass air flow transmitter Inlet pressure transducer Inlet filter differential pressure switch Oil temperature sensor Low oil pressure switch Oil pressure gauge Discharge pressure gauge Discharge pressure transducer

Control Panel:

Each blower unit will come with a NEMA 4 Local control panel that will communicate with the Allen Bradley MicroLogix PLC in the MCP. Panel door mounted items include operator interface monitor (HMI. The power for the LCP will be pulled from a branch of the incoming 480 power.

Paint:

Manufacturer's standard powder coat finish.

Start-up Service:

2 days start-up and operator training is included plus one day follow up visit within one year. Additional service is available at \$1,500 per day plus travel and living expenses billed at cost, plus 10%. Advance notification of 10 working days is required for scheduling.

Factory Test (Non-witnessed):

Factory Performance Test – air-end/gearbox Functional Control Panel System Test Mechanical Run Test Motor Routine Test

Drawings and Shipment:

Standard submittal for information only will be in 3 weeks after acceptance of the order by Inovair. If required additional submittal information to Inovair standards will follow within a reasonable time. Delivery is estimated to be 14-16 weeks after order acceptance by Inovair.

45

Payment Terms: Terms are 20% upon receipt of approved submittal, 70% to be paid Net 30 days after myorce date, with the remaining 10% Net 60 days after invoice date, or 30 days after start-up, whichever occurs sooner. Payment shall not be dependent on the Contractor or Manufacturer's Representative being paid by any third parties. Under no circumstances will payment be dependent on acceptance of the equipment by the Owner.

Items Not Included:

Installation, anchor bolts, interconnecting pipe, fittings, bolts, nuts, gaskets, wiring, electrical line/load filters or reactors, valves, oil and lubricants, or any other items not specifically listed.

Optional Items-Inlcuded in Quote:

Qty (4) 5yr Warranty Qty (4) Endustra External Filter Qty (4) Thermistors on motors Qty (4) Discharge Temperature gauge

Price: \$239,634.00, F.O.B. factory, freight to jobsite included (off loading by others)

Terms are 20% upon receipt of approved submittal, 70% to be paid Net 30 days after invoice date, with the remaining 10% Net 60 days after invoice date, or 30 days after start-up, whichever occurs sooner.

This proposal is firm for 90 days.

Kent C Price NWPE 307-749-6814 e-mail: kprice@nwpeco.com

Warranty:

Inovair turbo blower and accompanying manufactured components are warranted to be free from defects in materials and workmanship for a period of twenty four (24) months, commencing at the time the blower system is placed into service, but in no event are these manufactured components to be warranted for longer than thirty (30) months from date of shipment. Electrical and other purchased components (supplied by other manufacturers) are warranted in accordance to those stated warranty policies, and are not eligible under this warranty.

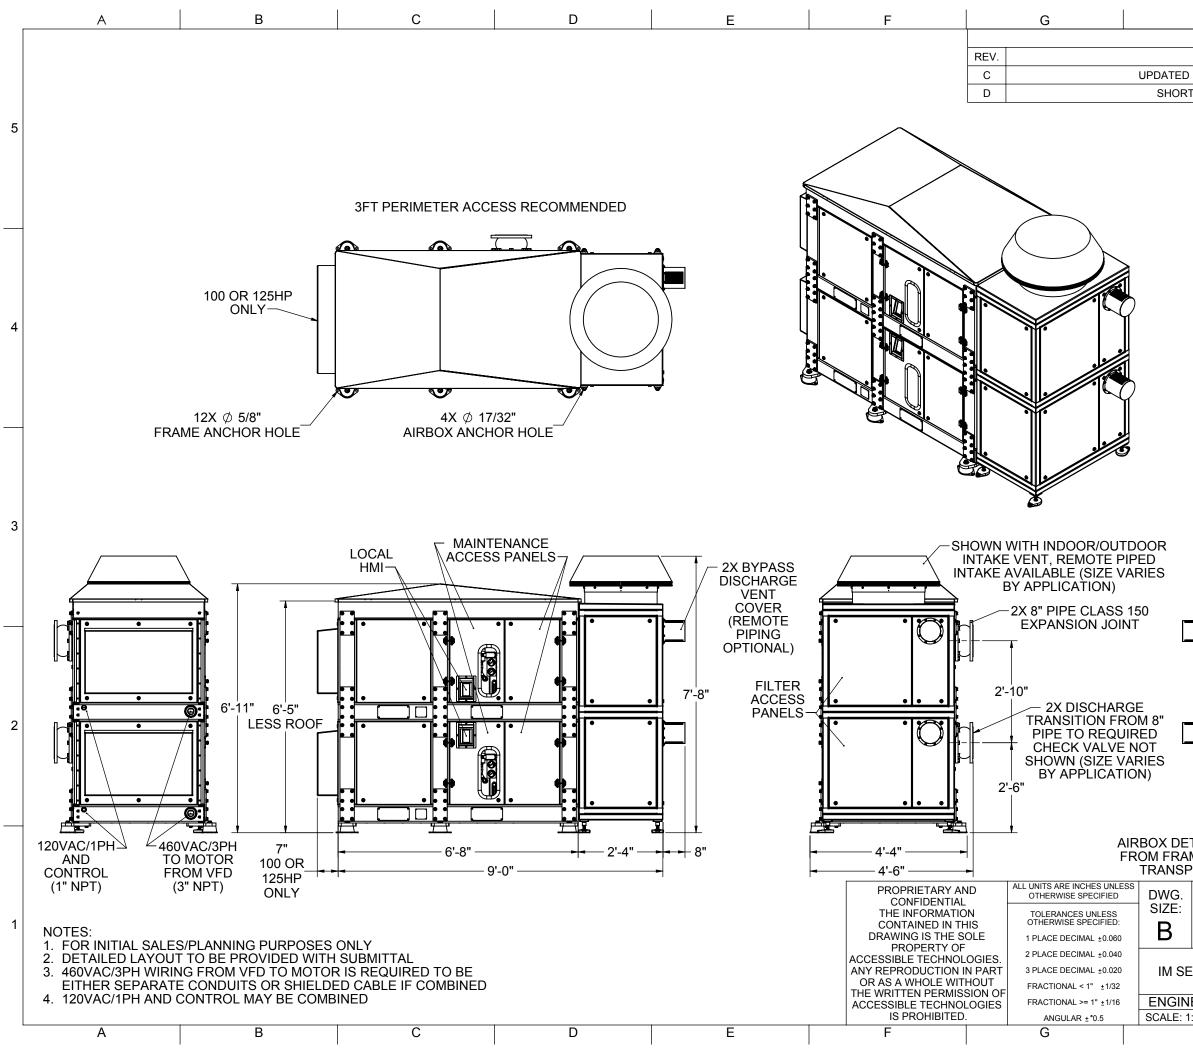

The replacement or repair of parts normally consumed in service such as oil, grease, belts, etc. is considered part of routine maintenance and upkeep and such parts are not eligible for repair or exchange free of charge under this warranty.

During the warranty period, if any warrantied part is defective or fails to perform as specified when operating at design conditions and if the blower system has been environmentally and physically protected prior to start-up and has been installed, operated and maintained all in accordance with the written instructions provided, exchange free of charge a replacement for such defective part. Defective parts must be returned by the owner postage paid. This limited warranty coverage is extended only to the original owner. IF THE BLOWER DRIVE RATIO IS ALTERED IN ANY WAY WITHOUT FACTORY APPROVAL, WARRANTY COVERAGE IS VOID. USE OF ANY PULLEY NOT MANUFACTURED OR SUPPLIED BY BLOWER MANUFACTURER VOIDS ALL WARRANTY COVERAGE. Disassembly of blower or removal of the blower serial plate voids all warranties. Claims for freight damages should be directed to the freight company.

NO OTHER WARRANTY EXPRESSED OR IMPLIED and SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTY AS TO THE MERCHANTABILITY OF THE BLOWER SYSTEM OR AS TO ITS FITNESS FOR ANY PARTICULAR PURPOSE. Blower manufacturer is not responsible for consequential or incidental damages of any nature resulting from such things as, but not limited to, defects in design, material, workmanship, or delays in delivery of blower, availability of replacements or repairs.

The waiver or abridgement of any single provision or group of provisions, either by ruling or agreement, shall not be construed to alter or void any other provisions of this warranty.

Integrally Geared Turbo Blowers

IM SERIES 40-250 HP

The Inovair IM Series is the industry's first truly modular blower design. Offering industry leading efficiency and turndown, modules can be deployed as single units or in a stacked configuration. Many wastewater treatment plants suffer from an inability to optimally regulate flow, causing them to over-aerate or blow-off excess air. Both of these negatively impact energy consumption. The IM Series solves this problem through modularity without burdening the overall blower footprint. IM stacked units provide up to 4:1 turndown to provide an operational range previously unattainable by other technologies.

TOUCHSCREEN

INTERFACE

- DIRECT COUPLE DRIVE SYSTEM FOR MAXIMUM EFFICIENCY
- INDUSTRY LEADING TURNDOWN
- LESS THAN 85 dBA WITH OPTIONAL ENCLOSURE

48

- EXTREMELY DURABLE DESIGN
- TOUCHSCREEN INTERFACE
- LOW COST OF OWNERSHIP
- CUSTOMIZABLE CONFIGURATION
- LOW/ANNUAL MAINTENANCE

Integrally Geared Turbo Blowers

IM SERIES FEATURES

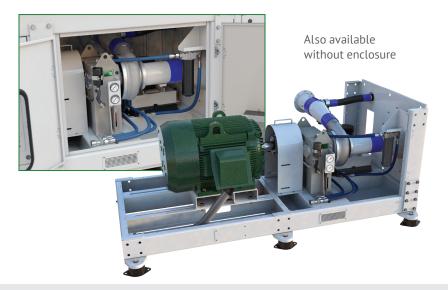

- Energy Efficient (~80% isentropic)
- Proven Integrally-geared Design
- Industry Standard Components
- Compact Design
- Maintenance-friendly
- Engineered and Built in the USA
- Handles fluctuating pressures
- Capable of multiple start/stop cycles every hour
- Reduction in capital costs for stand-by units

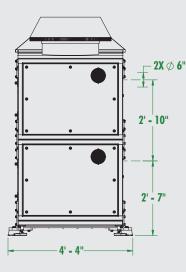

INOVAIR ADVANTAGES

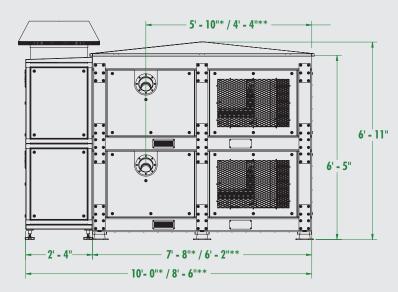

- Industry-first modular blower design
- Up to 4:1 capacity turndown
- Greater process flexibility
- Up to 50% space savings
- Industry-standard components
- Low Noise (75-85 dBA)
- Available as stacked units, a single unit and/or without frame and enclosure

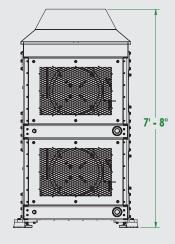

TECHNICAL SPECS

Flow Capacity:	300-4000 scfm
Design Pressure:	4-22 psig
Turndown Ratio:	Up to 4:1 (2:1 per module)
Motor Power:	40-250 HP (1800/3600 RPM)
Drive:	Standard VFD
Input Power:	230V-575V, 60 Hz
Impeller:	5-axis machined 7075-T6 Aluminum
Control System:	Integrated Touchscreen PLC

49

* 40-75 HP motor ** 100-125 HP motor

Atlas Copco Rotary lobe blower packages

ZL 100 - 10000 series 1.5 - 250 kW

Countries covered by Atlas Copco Customers Centers
 Production sites

Atlas Copco has been setting the industry standard in compressed air technology for more than a century. An on-going interaction with our customers, a passion to bring true innovations that increase their productivity, and the commitment to create more value for them, have earned us the market leadership.

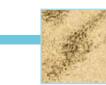

Our dedication to offer the best products and services is not limited to Plant Air solutions, but extends to Low Pressure Air applications, meeting the exact needs of the specific process. Around the clock and around the globe, the ZL blower series is proving to be a trusted partner for the low pressure air process.

Reliable, quality air

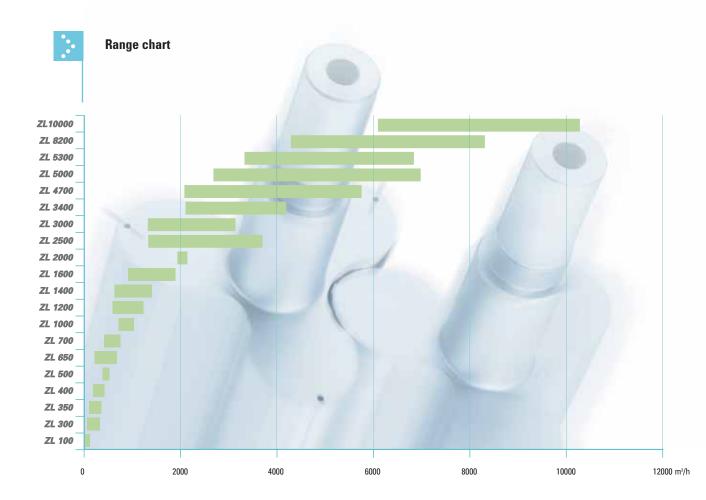

Whether it is for pneumatic conveying of granulates or powders, liquid homogenizing, aeration and filter flushing in water treatment plants, air supply to furnaces, drying of yarn or process air in chemical plants, the ZL series offers reliable, uninterrupted operation around the clock.

Complete range

The ZL range consists of 20 sizes for intake volumes of 100 to over 10000 m³/h, at pressures of up to 1000 mbar, depending on the blower size. The Atlas Copco ZL is a low noise, low vibration and low pulsation blower that comes in a complete, ready-torun package. Because of the total separation of element and oil system, the ZL blower delivers top quality oil-free air; the risk of product contamination or environmental pollution is non-existent by design.

The tri-lobe concept and the pre-filling canals ensure low pulsation air, a prolonged lifetime of rotating components, reduced noise and vibration levels and improved energy efficiency.

Rational design for superior performance

Ruggedized filter/inlet for reduced vibrations

Suitable for harsh environments

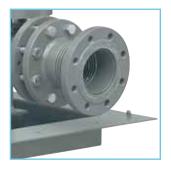

IP55 electric motor compact design for space savings

Start-up & pressure relief valve reliable and simple

Flanged outlet for simplified piping connection

Check valve for easy field installation

1120

Automatic belt tensioner for longer belt lifetime and reduced maintenance

08

Vibro-isolating mounts for low vibration and quieter operation

Integral outlet silencer for dampening of pressure pulsations

Complete package

The Atlas Copco ZL blower comes as a fully equipped machine. There are no hidden extras or costly additions.

Standard version

	IP55 electric motor
	inlet and outlet silencers
	inlet filter
	pressure relief valve (ZL 100 - 700)
	start valve / pressure relief valve (ZL 1000 - 10000)
	outlet flange compensator
	outlet check valve
	automatic belt tensioner
	filter change indicator
	discharge pressure gauge
	low vibration and quieter operation belt-drive cover
	package vibration isolators
Opti	ons
	sound insulated enclosure with canopy ventilation
	fitted with Full Option motor
٠.	no motor

no motor

belt guard (models with canopy)

oil fill

Trusted technology

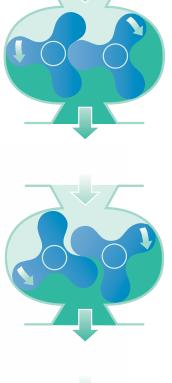

In the ZL blower element, two tri-lobe rotors turn inside an oval shaped casing. The motor transmits its power to the driving lobe, which in turn drives the driven lobe via timing gears. Hence, both rotors turn at the same speed, in opposite directions.

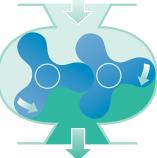

The rotors maintain a high precision clearance between each other and the wall of the casing. As a result, no internal lubrication is required and air remains 100% oil-free.

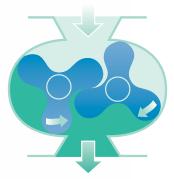

Compression principle

As the rotors turn, air is drawn into the blower when the lobe end of each rotor passes the suction port. The air is caught between two rotor tips and the casing; as the rotors continue their revolution, this volume is transferred from suction side to discharge side. With each turn, six of these enclosed volumes are displaced.

The ZL series delivers an almost constant flow rate, independent of the discharge pressure conditions. The flow rate is proportional to the operating speed.

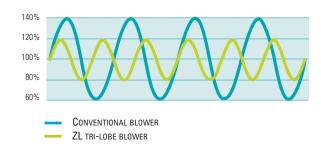

Tri-lobe advantages

Pulsation-free air

Traditionally, positive displacement blowers were designed around two-lobe rotors. The ZL series is based on tri-lobe rotors, which offer superior energy efficiency and a significantly smoother flow.

For further reduction of pressure pulsations, special canals have been milled in the blower casing, to pre-fill the reverse chamber. This design prolongs the lifetime of the flexible elements of aerating systems, but also protects conveyor systems against undesirable pulsations. Inside the blower, the reduction in pulsations has many advantages as well: less vibrations are transmitted to the bearings, increasing bearing lifetime.

An additional advantage of this design is that the sound waves produced by the pre-filling cancel out much of the noise produced by the blower, resulting in an overall reduction of the noise level.

Low noise

The innovative design of the element, with its prefilling canals, decreases noise levels substantially.

Inlet silencer Pulsation noises are better contained within the rugged designed blower silencer.

Superior element design Precisely balanced tri-lobe rotor with pre-filling canals, for lowest air pulsations, a long bearing lifetime, less vibrations and lower noise

Integral outlet silencer Dampening of pressure pulsations are made via the purpose designed outlet silencer.

DISCHARGE PRESSURE

OIL-FREE POSITIVE DISPLACEMENT SCREW BLOWERS

ZS 18-315 (18-315 kW / 24-422 hp) ZS 18-355 VSD (18-355 kW / 24-475 hp)

ZS 75 VSD

PROVEN TECHNOLOGY IN A LEADING DESIGN

Low pressure compressed air is the backbone of many production processes. The ZS is the latest addition to Atlas Copco's air blowing solutions, manufactured to the highest standards of quality and reliability.

Keeping your process up and running

A reliable supply of compressed air is critical to ensure process continuity. Incorporating Atlas Copco's proven screw technology and long standing internal engineering practices, the ZS guarantees exceptional reliability. Designed, manufactured and tested in accordance with ISO 9001 certification, the unique ZS stands for uninterrupted production.

Driving down energy costs

Energy costs can amount to 80% of the Life Cycle Costs of a blower. The ZS range reduces energy costs by an average of 30% when compared to lobe technology. The integrated Variable Speed Drive (VSD) technology offers extra energy savings by automatically tuning the compressed air flow precisely to the air demand.

Easy installation

Delivered ready for use, ZS⁺VSD blowers come as all-in-one packages including a PLC based Elektronikon[®] controller, integrated converter, forklift slots, check valve, air filter, blow-off valve and silencer. The complete scope of supply eliminates the need for extras and reduces installation to an absolute minimum, saving you time and money.

Protecting your reputation and production

In virtually any application, oil contamination of the air supply causes serious productivity issues and increases costs. As the first manufacturer to receive ISO 8573-1 CLASS 0 (2010) certification for its oil-free air blowers, Atlas Copco has set a new standard in air purity. Focusing on the protection of critical applications as well as today's increasing quality demands, Atlas Copco offersTÜV-certified 100% oil-free air.

Assuring your peace of mind

Through continuous investment in our competent, committed and efficient service organization, Atlas Copco ensures superior customer value by maximizing productivity. With a presence in over 170 countries, we offer professional and timely service through interaction and involvement. Uptime is guaranteed by dedicated technicians and 24/7 availability.

A COMPLETE PACKAGE FOR ALL YOUR APPLICATIONS

Built to ensure complete product safety, ZS blowers guarantee a continuous, highly reliable, energy-efficient and 100% oil-free air supply for years on end in all your applications at the lowest possible cost.

Wastewater treatment

- Lowest aeration blower energy cost, representing 70% of the total operational cost.
- Low downtime and low maintenance cost thanks to innovative screw blower technology.
- Very wide flow and pressure operational range.

Pneumatic conveying – dilute phase

- Lowest energy cost, representing up to 80% of the blower life cycle cost.
- Low downtime and low maintenance cost thanks to innovative screw blower technology.

Fermentation

- Lowest energy cost, representing up to 80% of the blower life cycle cost.
- Low downtime and low maintenance cost thanks to innovative screw blower technology.
- Very wide flow and pressure operational range.

Non-woven textile

- Adjustable flow in order to influence fiber characteristics.
- Energy-efficient blowers to come to the lowest operational cost of this 24/7 continuous process.
- Point-of-use installation without noise-preventing measures.

CLASS 0: THE INDUSTRY STANDARD

Oil-free air is used in all kinds of industries where air quality is paramount for the end product and production process. These applications include food and beverage processing, pharmaceutical manufacturing and packaging, chemical and petrochemical processing, semiconductor and electronics manufacturing, the medical sector, automotive paint spraying, textile manufacturing and many more. In these critical environments, contamination by even the smallest quantities of oil can result in costly production downtime and product spoilage.

First in oil-free air technology

Over the past sixty years Atlas Copco has pioneered the development of oil-free air technology, resulting in a range of air compressors and blowers that provide 100% pure, clean air. Through continuous research and development, Atlas Copco achieved a new milestone, setting the standard for air purity as the first manufacturer to be awarded ISO 8573-1 CLASS 0 certification.

Eliminating any risk

As the industry leader committed to meeting the needs of the most demanding customers, Atlas Copco requested the renowned TÜV institute to type-test its range of oil-free compressors and blowers. Using the most rigorous testing methodologies available, all possible oil forms were measured across a range of temperatures and pressures. The TÜV found no traces of oil at all in the output air stream. Thus Atlas Copco is not only the first compressor and blower manufacturer to receive CLASS 0 certification, but also exceeds ISO 8573-1 CLASS 0 specifications.

CLASS	Concentration total oil (aerosol, liquid, vapor) mg/m³
0	As specified by the equipment user or supplier and more stringent than class 1
1	< 0.01
2	< 0.1
3	< 1
4	< 5

Current ISO 8573-1 (2010) classes (the five main classes and the associated maximum concentration in total oil content).

ON AVERAGE 30% ENERGY SAVINGS WITH ZS SCREW BLOWERS OVER CONVENTIONAL LOBE BLOWERS

62

1 Gearbox

- Compared to lobe technology, screw technology does not require belt and pulley replacement.
- Reduced maintenance costs and increased uptime.

2 TEFC high-efficiency IE3/NEMA

Even in dusty and humid environments, the TEFC high-efficiency IE3/NEMA premium motor offers assured operation.

3 State-of-the-art oil-free screw element

- Incorporating acclaimed screw technology, years of experience and innovation.
- Precision timing gears for proven reliability, safe operation and increased uptime.
- Industry proven element coating for closer tolerances and increased lifetime.

4 Air inlet filter

The lifetime of the blower is increased by filtering particles up to 3μ at a performance of 99.9%.

5 Rain canopy option

Optional rain canopy available for outdoor applications.

6 Check valve & pilot operated valve

Reliable, safe and broad operation area.

7

Discharge pulsation damper

- Eliminating the need for external silencer.
- Without damping material suitable for sensitive applications (e.g. food & beverage industry, pharma, pneumatic conveying, etc.)

8

Base frame with forklift slots

- Simple, time-saving installation.
- Reduced start-up costs.

Interface-Box (ZS-IB)*

• Safeguards your investment.

* Rain canopy option

available for outdoor applications.

- Ensures maximum machine safety and easy networking.
- Facilitates quick and smooth commissioning.
- Monitors all parameters to ensure maximum reliability for your blower installation.

* For versions without electrical cabinet.

INCREASE YOUR SAVINGS WITH THE INTEGRATED VARIABLE SPEED DRIVE SYSTEM

1

Dedicated variable speed motor

- With very wide speed range to meet flexible air demand.
- With bearing current protection and optimized motor cooling at lower speeds.

Electrical cubicle with integrated VSD converter

2

- Proven design integrating all required electrical components for optimum reliability (EMC filter, Variable frequency drive, RFI filter, Elektronikon[®] controller).
- Reduced installation and start-up cost thanks to complete integration.

5 Oil system

Longer lifetime of bearings and gears due to lower oil temperature which is achieved by optimum oil system design including an integrated oil pump*, oil cooler and filter.

* Included for certain ranges (please contact your local sales representative for more info).

3

Elektronikon® controller

- To ensure maximum machine safety and easy networking, the Elektronikon[®] system controls both the blower and the integrated converter.
- Monitoring of all parameters to ensure maximum reliability for your blower installation.

4 Noise enclosure with internal baffling

- Intelligent internal baffling design coupled with totally enclosed canopy providing reduced sound levels to 72 dB(A) for an improved working environment.
- Reduced installation costs as there is no need for noise insulated rooms and doors.

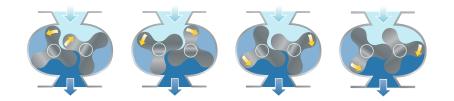

6 Continuous SPM (Shock Pulse Measurement) monitoring

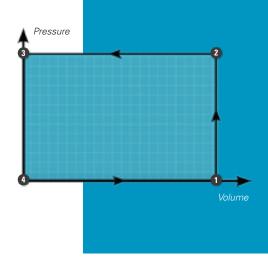

- System of the blower element & motor bearings.
- The sensors are connected to the Elektronikon[®] which is showing the individual vibration levels.
- Alarm and/or shutdown levels can be programmed during commissioning.
- Option.

MINIMIZE ENERGY COSTS WITH THE ZS SCREW BLOWER

The ZS screw blower was developed in Atlas Copco's drive for innovation and its commitment to sustainable technology, and is on average 30% more energy efficient compared to a traditional 'Roots' type lobe blower.

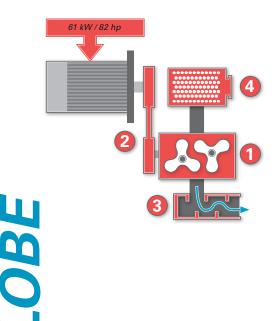

Energy losses by lobe technology

- 4→1: Suction. Air enters the compression chamber. The air volume remains constant while the lobe rotors turn.
- 1→2: External compression. The air is compressed externally due to back-pressure of the connected pipeline.
- $2 \rightarrow 3$: Discharge. Air is pushed out into the pipeline.

As shown in the Pressure/Volume diagram, the compression work is represented by the blue area and is proportional to the energy consumed.

Thermodynamic energy consumption

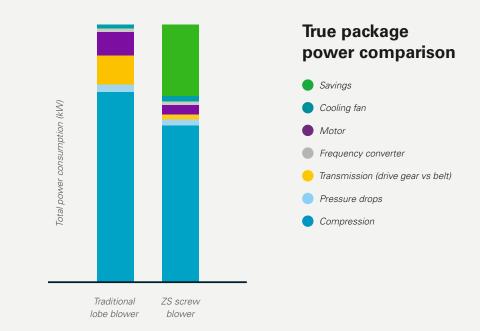

Energy losses in packaging

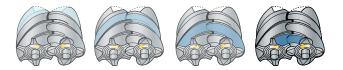

High resistance to the internal air flow leads to high pressure drops and increased energy consumption.

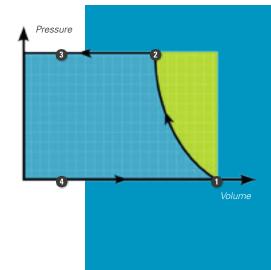

Losses by:

- 1. External compression
- 2. Belt/pulley
- 3. Silencer
- 4. Inlet filter

To deliver a flow of 1600 m³/hr (942 cfm) at a pressure of 0.8 bar(e) (11.6 psig), the tri-lobe blower consumes 61 kW (82 hp) on average.

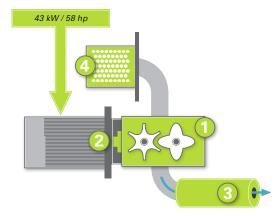

Energy savings by screw technology

- $4 \rightarrow 1$: Suction. Air enters the compression chamber.
- 1→2: Internal compression. As the rotors move towards each other, the air volume decreases.
- 2→3: Discharge. Air is pushed out into the pipeline.

As shown in the Pressure/Volume diagram, the compression work is represented by the blue area and is proportional to the energy consumed. The green area represents energy savings of a screw blower compared to a traditional 'Roots' type rotary lobe blower. This is due to the internal compression.

- O Thermodynamic energy consumption
- Energy savings

Energy savings by integration

In the ZS screw blower, the internal air flow path is optimized to reduce pressure drops and air turbulence.

Maximum savings by:

- 1. Internal compression
- 2. Integrated gearbox
- 3. Smooth silencer
- 4. Inlet filter

To deliver a flow of 1600 m³/hr (942 cfm) at a pressure of 0.8 bar(e) (11.6 psig), the screw blower consumes 43 kW (58 hp) on average.

VSD: DRIVING DOWN ENERGY COSTS

Over 80% of a blower's lifecycle cost is taken up by the energy it consumes. Moreover, the generation of compressed air can account for more than 40% of a plant's total electricity bill. To cut your energy costs, Atlas Copco pioneered Variable Speed Drive (VSD) technology in the compressed air industry. VSD leads to major energy savings, while protecting the environment for future generations. Thanks to continual investments in this technology, Atlas Copco offers the widest range of integrated VSD blowers on the market.

Profile 1

• 64% of all installations

• Factory working 24 hrs/day: low demand at night & high demand during the day

- 28% of all installations
- Factory working 2 shifts/day, no weekend work: erratically varying air demand

Profile 3

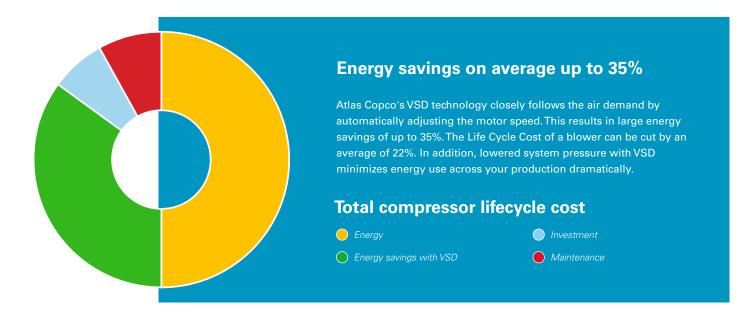

• 8% of all installations

 Factory working 2 shifts/day, no weekend work: typical 'fixed' speed application

Varying air demand in 92% of all installations

In almost every production environment, air demand fluctuates depending on different factors (time of the day, week or even month). Extensive measurements and studies of compressed air demand profiles show that 92% of all compressor and blower installations have substantial variations in air demand. Only 8% of all installations have a more stable air demand. Tests prove that, even in this case, VSD blowers save energy.

ES – FULLY OPTIMIZED SYSTEM

A properly managed compressed air network will save energy, reduce maintenance, decrease downtime, increase production and improve product quality. Atlas Copco's ES central controllers are the most efficient way to monitor and control multiple blowers simultaneously as well as dryers and filters. An ES controller offers one central point of control for your whole compressed air network, ensuring all blowers provide optimum performance for your process. The result is a completely dependable and energy efficient network, giving you peace of mind and keeping your costs to a minimum.

Built-in intelligence

- Improved user-friendliness: 5.7" color display with clear pictograms for easy readout.
- Monitoring of running conditions and graphical indication of the service plan.
- Regulates system pressure within a predefined narrow pressure band.
- Integrated energy savings functions like dual pressure set point, 4 different programmable week schedules.

- Comprehensive icon indications and intuitive navigation.
- 31 different languages including character-based languages.
- Durable keyboard to resist tough treatment in demanding environments.
- Internet-based blower visualization using a simple Ethernet connection.
- Remote control and advanced connectivity functions.

SMARTLink*: Data Monitoring Program

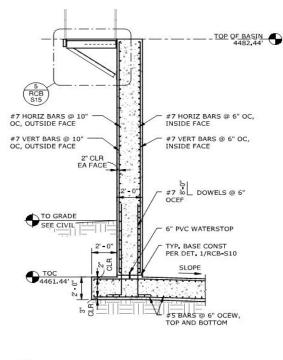

- A remote monitoring system that helps you optimize your compressed air system and save you energy and cost.
- It offers you a complete insight in your compressed air network and anticipates on potential problems by warning you up-front.
- * Please contact your local sales representative for more information.

RE: SBR Basin Rebar Addition Livingston WRF Upgrade 2017

Mr. Buecker,

This letter is in concerns additional rebar in the SBR Basin. The change adding additional #7 Rebar from 10" O.C. to 6" O.C. on the outside mat in the West wall of the SBR Basin. This change is revising that area from Typical Section 1/RCB S5 to 2/RCB S5.

The in requested change Order amount results in additional compensation in the amount of \$12,025.79 and one (1) contract day. Attached is a break down on the cost along with a quote for Teton Steel of Montana

Thank you for time and consideration. Should you have any questions, please feel free to contact me at 406-551-0523.

Sincerely,

Kyle Kastelitz Project Manager Dick Anderson Construction

A. ORDINANCE NO. 2066 - AN ORDINANCE OF THE CITY OF LIVINGSTON, MONTANA, AMENDING ORDINANCE NO. 2036 AND CHAPTER 9, ARTICLE IV OF THE LIVINGSTON MUNICIPAL CODE ENTITLED "PARKING, STOPPING, AND STANDING" AND SPECIFICALLY SECTION 9-243 BY ESTABLISHING TWO RESERVED PARKING SPACES FOR THE "WINDRIDER" BUS SERVICE AND PROVIDING FOR A PENALTY FOR VIOLATION.

ORDINANCE NO. 2066

AN ORDINANCE OF THE CITY OF LIVINGSTON, MONTANA, AMENDING ORDINACE NO. 2036 AND CHAPTER 9, ARTICLE IV OF THE LIVINGSTON MUNICIPAL CODE ENTITLED "PARKING, STOPPING, AND STANDING" AND SPECIFICALLY SECTION 9-243 BY ESTABLISHING TWO RESERVED PARKING SPACES FOR THE "WINDRIDER" BUS SERVICE AND PROVIDING FOR A PENALTY FOR VIOLATION.

Preamble.

The purpose of this Ordinance is to provide for the public health, safety and welfare by designating two reserved parking spaces for the Windrider Bus Service and to provide a monetary fine for enforcement.

WHEREAS, Windrider Bus Service provides a necessary transportation service for the

citizens of Livingston; and

WHEREAS, the City Commission believes it is in the best interests of the community

to establish two reserved parking spaces for Windrider in furtherance of the services provided.

NOW, THERFORE, BE IT ORDAINED by the City Commission of the City of

Livingston, Montana, as follows:

SECTION 1

That Section 9-243 of Chapter 9 of the Livingston Municipal Code is hereby amended,

with additions shaded in gray and deletions struck through, as follows:

Section 9-243 Restricted Parking Zones – Reserved Spaces for Handicapped or Disabled Persons – Reserved Parking Space for Angel Line – Reserved Spaces for Windrider Bus.

Ordinance No. 2066 Amending Ordinance No. 2036 establishing parking spaces for "Windrider" bus service. Page 1 A. Definitions:

1. For the purpose of this section, "special parking spaces" are defined as on street parking spaces reserved for disabled persons who were issued a permit, license plate, or placard by the State of Montana in accordance with MCA 49-4-302 Montana Code Annotated (MCA) which entitles a person to park a motor vehicle in a special parking space reserved for a person

with a disability, whether on public property or on private property available for public use, when the person for whom the permit was issued is using the special parking space to enter or exit the vehicle.

2. "Special reserved parking spaces" are defined as restricted on street parking spaces reserved for the personal use of a disabled person(s) who has been issued a special parking permit by the State of Montana under MCA 49-4-301(1).

B. **Special Parking Spaces**: Any person requesting an on-street special parking space shall make written application to the Public Works Department using a form provided by the City. The application shall state the name and address of the applicant, the location of the requested space and the reason for the request. All eligible applications will be reviewed by City staff and submitted to the City Commission for approval.

1. The following factors will be taken into consideration and used as criteria in approving signs for special parking spaces on public streets:

a. Existing parking problems in the area where the sign is being requested.

b. Overall availability of parking in the area where the sign is being requested.

Ordinance No. 2066

Amending Ordinance No. 2036 establishing parking spaces for "Windrider" bus service. Page 2

- c. The availability of reasonably accessible and practicable off street parking in close proximity to the area where the sign is being requested.
- d. The nature and use of the adjacent buildings.
 - i. The requested space must comply with applicable regulations and legal

mandates in terms of dimensional requirements and location as specified in 49-4-302 MCA as follows:

In accordance with subsection (2) of 49-4-302 MCA, the governing body of a city, town, or county or appropriate state agency may impose all, but not less than all, of the following requirements with respect to any special parking space constructed after September 30, 1985, and reserved for a person with a disability or a permit holder on ways of this state open to the public, as defined in 61-8- 101:

(a) The space must be located on a smooth, level surface as near as practicable to building entrances or walkways that have curb cuts and appropriately designed ramps and access lanes to accommodate wheelchairs.

(b) If parallel to curbside, the parking space must be separated from an adjacent space, either in the front or the rear, by at least 5 feet of striped no-parking area.

(c) If at an angle to curbside, the parking space must

be at least 8 feet wide and free of obstruction if located at the

Ordinance No. 2066

Amending Ordinance No. 2036 establishing parking spaces for "Windrider" bus service. Page 3 end of a line of angle parking spaces, and each other angle parking space designated for a person with a disability must be at least 13 feet wide.

(d) A parking space reserved for a person with a disability must be designated by a sign showing the international symbol of accessibility, indicating that a permit is required, and stating the penalty for a violation. In order to meet the penalty statement requirement, signs existing on October 1, 1993, must have attached a decal stating the penalty for a violation. The sign must be attached to a wall or post in a way that it is not obscured by a

vehicle parked in the space.

This section shall not limit the City from exercising its own discretion in establishing special parking spaces on public streets at other locations as deemed appropriate and as approved by the City Commission.

2. Once approved by the City Commission, the special parking space must be designated by a sign showing the international symbol of accessibility, indicating that a permit is required, and having a decal stating the penalty for a violation. The sign must be attached to a wall or post in a way that is not obscured. The parking space shall be in compliance with any other applicable regulations d legal mandates in terms of dimensional requirements and location.

3. A special parking space may be removed, as approved by the City Commission, Ordinance No. 2066 Amending Ordinance No. 2036 establishing parking spaces for "Windrider" bus service. Page 4 if there is a change in the circumstances such that the parking space shall no longer be appropriate under the criteria referred to herein.

C. Special Reserved Parking Space. A disabled person may request an on-street special reserved parking space restricted for their personal use in a residential area outside of the two- hour parking zone. The application shall be made in writing to the Public Works Department using a form provided by the City. The application shall state the name and address of the applicant, the location of the requested space, the reason for the request, and list the license number(s) of the vehicle(s) authorized to use the space. All eligible applications will be reviewed

by City staff and submitted to the City Commission for approval. If the City Commission approves the personalized special parking space, the applicant will be notified and shall submit a non-refundable \$50 fee to pay for the installation of the sign. The sign will be installed after payment of the fee.

1. The criteria for designating an on street special reserved parking space restricted for the personal use of disabled persons outside of the 2-hour parking zone shall be as follows:

a. The applicant must show that (1) they operate a vehicle(s), registered under MCA 61-3-332(9) or MCA 61-3-458(3)(b) or(3)(i), that displays a specialty inscribed license plate issued by the state of Montana to disabled persons and displaying a wheelchair symbol or the letters "DV" issued to disabled veterans or; (2) they possess a permit issued under MCA 49-4- 301(1) and MCA 49-4-304... A copy

Ordinance No. 2066 Amending Ordinance No. 2036 establishing parking spaces for "Windrider" bus service. Page 5 of the vehicle registration or permit must accompany the application;

- b. The requested special reserved parking space must be adjacent to the applicant's permanent residence.
- c. No more than one special reserved parking space shall be provided to any one individual, or more than one special reserved parking space provided per dwelling unit.
- d. No more than two vehicles may be designated as being authorized to use the space.
- e. No reserved parking space shall be provided within the downtown Two-Hour Parking Zone, as identified in Section 9-246 of this chapter.
 - f. No reserved parking space shall be provided if reasonably accessible and practicable off street parking exists at the requested location.
- g. The requested space must be able to comply with the requirements of 49- 4-302(4) MCA as follows:

In accordance with subsection (2) of 49-4-302 MCA, the governing body of a city, town, or county or appropriate state agency may impose all, but not less than all, of the following requirements with respect to any special parking space constructed after September 30, 1985, and reserved for a person with a disability or a permit holder on ways of this state open to the public, as defined in 61-8-101:

i. The space must be located on a smooth, level surface as near as practicable to building entrances or walkways that have curb cuts and appropriately designed ramps and access lanes to accommodate wheelchairs.

Ordinance No. 2066 Amending Ordinance No. 2036 establishing parking spaces for "Windrider" bus service. Page 6 ii. If parallel to curbside, the parking space must be separated from an adjacent space, either in the front or the rear, by at least 5 feet of striped no-parking area.

iii. If at an angle to curbside, the parking space must be at least 8 feet wide and free of obstruction if located at the end of a line of angle parking spaces, and each other angle parking space designated for a person with a disability must be at least 13 feet wide.

iv. A parking space reserved for a person with a disability must be designated by a sign showing the international symbol of accessibility, indicating that a permit is required, and stating the penalty for a violation. In order to meet the penalty statement requirement,

signs existing on October 1, 1993, must have attached a decal stating the penalty for a violation. The sign must be attached to a wall or post in a way that it is not obscured by a vehicle parked in the space.

2. Once approved by the City Commission, the special reserved parking space must be designated by a sign displaying the license plate number(s) of the vehicle(s) authorized to park in the special reserved parking space and stating the penalty for violation. The sign must be attached to a wall or post in a way that is not obscured.

3. Reapplications to maintain a special reserved parking space must be made by December 31st of each year. A fee of \$5.00 is required with each reapplication. If the reapplication is not received by December 31st, the person will be notified by mail and an application form shall accompany such notice. The sign will be removed if the

Ordinance No. 2066 Amending Ordinance No. 2036 establishing parking spaces for "Windrider"

Amending Ordinance No. 2036 establishing parking spaces for "Windrider" bus service. Page 7 reapplication is not received within 30 days.

4. If a person who has been provided a special reserved parking space moves to a new residence within the City limits, and a space is needed for the new residence, the City will relocate the sign to the new location without additional fee if the City is promptly notified of the change of address and provided that the new address is in a residential area outside of the 2-hour parking zone.

5. A special reserved parking space shall promptly be removed if there is a change in the circumstances such that the parking space shall no longer be appropriate under the criteria referred to herein.

D. Angel Line Reserved Parking Spot. The City Commission hereby establishes and designates a reserve parking zone for Angel Line exclusive use 24 hours per day, 365 days per year, in front of the Senior Center of Park County, 206 South Main Street, Livingston, Montana, which reserved parking zone shall be of sufficient length to accommodate the Angel Line's van.

E. Windrider Reserved Parking Spaces. The City Commission hereby establishes and

designates two bus loading/unloading zones as described below:

1. On the south side of Lewis Street between Main Street and Second Street adjacent to the alley in Block 95.

2. On the north side of Callender Street between Second Street and Third Street, in front of the City-County Library.

The penalty for parking is either of the Windrider spaces is one-hundred dollars (\$100.00).

Ordinance No. 2066 Amending Ordinance No. 2036 establishing parking spaces for "Windrider" bus service. Page 8 **Effective date:**

This ordinance will become effective 30 days after the second and final adoption.

RESOLUTION NO. 4762

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF LIVINGSTON, MONTANA, AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH PARK COUNTY TO FACILITATE ESTABLISHING AND AMENDING INTERLOCAL AGREEMENTS.

WHEREAS, the City of Livingston and Park County, Montana are local governmental units of the State of Montana which from time to time have entered into Interlocal Agreements pursuant to 7-11-101 Montana Code Annotated (MCA); and

WHEREAS, to facilitate establishing and amending Interlocal Agreements, the parties believe that a single, all-inclusive compact setting forth the duties and responsibilities of each party in respect to specified services, infrastructure and/or facilities provided by each would be in the best interest of the residents; and

WHEREAS, the Compact Agreement attached hereto and incorporated herein as Exhibit A sets forth the terms and conditions for the City of Livingston and Park County to facilitate establishing and amending Interlocal Agreements;

NOW, THEREFORE, BE IT RESOLVED, by the City Commission of the City of Livingston, Montana, as follows:

That the City Manager is hereby authorized to enter into the Cooperative Agreement with the Park County, Montana attached hereto as Exhibit A.

City of Livingston and Park County Compact

Whereas, the City of Livingston, a municipal corporation and political subdivision of the State of Montana, hereinafter referred to as the City and the County of Park, a political subdivision of the State of Montana, hereinafter referred to as the County are local governmental units of the State of Montana which from time to time have entered into Interlocal Agreements pursuant to 7-11-101 Montana Code Annotated (MCA) *et seq.*; and

Whereas, to facilitate establishing and amending Interlocal Agreements, the parties believe that a single, all-inclusive compact setting forth the duties and responsibilities of each party in respect to specified services, infrastructure and/or facilities provided by each would be in the best interests of the residents; and

Whereas, the City and County believe that in addition to each entity's public records, a single document consisting of all such agreements would be in the best interests of each unit of local government and their respective residents and would facilitate creating and amending said agreements as well as provide the public with a single source to review such agreements.

NOW THEREFORE IT BE AGREED by the City and the County as follows:

Preamble

It is the purpose of this Compact to permit the City and County to make the most efficient use of their powers by enabling them to cooperate with each other on a basis of mutual advantage and thereby to provide services and facilities in a manner and pursuant to forms of governmental organization that will accord best with geographic, economic, population, and other factors influencing the needs and development of local communities.

1. That there is hereby established this Compact between the City and County which shall set forth all interlocal cooperation agreements between the City and County, and except for the separate chapters established hereby, establishes the general terms and conditions applicable to all such Chapters.

- 2. This Compact shall remain in effect indefinitely. If no current chapters to the Compact exist, it may be terminated by either party upon giving written notice to the other party at least 6 months prior to the requested termination date.
- 3. Any disputes arising out of this Compact will be resolved by the binding arbitration rules for chapters identified in paragraph 5.(17).
- 4. That the areas in which the City and County desire to create an interlocal agreement are identified as chapters, and may include any area of cooperation between the City and County.
- 5. General terms and conditions applicable to all chapters:
 - <u>Duration</u>. All chapters shall be in effect for a maximum term of 5 years. A chapter will not automatically renew. There will be a specified expiration date in each chapter.
 - (2) <u>Effective Date.</u> Each chapter shall become effective once signed by both the City and County representatives. The Effective Date will be annotated at the top of the signature page for the chapter.
 - (3) <u>Organization</u>. If applicable, the precise organization, composition, and nature of any separate legal entity created by the contract will be specified in the applicable chapter.
 - (4) **<u>Purpose</u>**. The purpose or purposes will be specified in each chapter.
 - (5) **<u>Financing</u>**. The manner of financing the joint or cooperative undertaking and establishing and maintaining a budget for the undertaking will be specified in each applicable chapter.
 - (6) **Goals and Property Disposition**. The permissible method or methods to be employed in accomplishing the partial or complete termination of the agreement and, if applicable, for disposing of property upon a partial or complete termination will be specified in each chapter.
 - (7) **Board membership**. Provision for an administrator or a joint board responsible for administering the joint or cooperative undertaking, including representation of the contracting parties on the joint board will be specified in the applicable chapter.
 - (8) **<u>Property</u>**. if applicable, the manner of acquiring, holding, and disposing of real and personal property used in the joint or cooperative undertaking will be specified in the applicable chapter.

- (9) <u>Employment records</u>. The contracting party responsible for reports and payment of retirement system contributions pursuant to 19-2-506 M.C.A will be specified in the applicable chapter.
- (10) **Professional contracts**. If applicable, the manner of sharing the employment of a professional person licensed under Title 37 will be specified in the applicable chapter.
- (11) <u>Termination.</u> Any Chapter covered by this Compact may be terminated by either party upon giving the other party written notice at least 6 months prior to the requested termination date.
- (12) <u>Nondiscrimination</u>. In signing (and in any performance of) this Compact or chapter, County and the City will hire on the basis of merit and qualifications. In awarding (and in any performance of) this Compact or chapter, the City or the County will not discriminate on the basis of race, color, religion, creed, political ideas, sex, age, marital status, physical or mental handicap, or national origin. In accepting (and in any performance of) this Compact or chapter, the City or the County, will hire on the basis of merit and qualifications. In signing (and in any performance of) this Compact or chapter, City and County will not discriminate on the basis of race, color, religion, creed, political ideas, sex, age, marital status, physical or mental handicap, or national origin.
- (13) <u>Interpretation</u>. This Compact or chapter shall be governed by and interpreted according to the laws of the State of Montana. Section headings are for convenience only and are not intended to define or limit the scope of any provision of this Compact or chapter.
- (14) <u>Severability</u>. The Chapters set forth in this Compact are independent and severable and the invalidity, partial invalidity or unenforceability of any one of the provisions, or any portion thereof, shall not affect the validity or enforceability of any other provision.
- (15) <u>Hold Harmless</u>. The parties hereto agree to release, defend, indemnify and hold harmless the other party, its officers, employees, elected officials, agents and assigns from any and all actions, claims, liabilities, demands or assertions of liability, causes of action, losses, costs and expenses including, but not limited to, reasonable attorney's fees, involving or relating to any harm, injury or damage, suffered or sustained by any parties employees, elected officials, agents and representatives, or any third party which in any manner may arise or be alleged to have arisen, or resulted or alleged to have resulted from the performance of the terms and conditions of any chapter of this Compact.

- (16) <u>Insurance.</u> Each party will maintain liability insurance in compliance with 2-9-101 M.C.A., *et seq.*, naming each other as an additional insured.
- (17) **Entire Agreement**. This Agreement is the entire agreement between the parties. No alteration, amendment, modification, or addition shall be binding unless reduced to writing and signed by the parties.
- (18) **<u>Binding Arbitration</u>**. Any dispute arising out of a Compact chapter shall be settled by binding arbitration with an arbitrator to be selected from a list of five (5) qualified commercial arbitrators of the American Arbitration Association, with each party striking two names from said list. The rules of the American Arbitration Association apply. Each party shall pay fifty percent of the costs of arbitration.
- (19) <u>Filing of Agreement</u>. Pursuant to Section 7-11-107 MCA this agreement shall be filed with the County Clerk and Recorder and the Montana Secretary of State.
- (20) <u>Format</u>. A template for the "Chapter" is attached as Appendix A and all subsequently approved "Chapters" to this Compact shall follow this format.
- (21) <u>**Changes.**</u> Any changes to a chapter must be ratified by both the City and County prior to becoming effective.
- (22) <u>**Review**</u>. Each chapter will be reviewed a minimum of 6 months prior to its expiration date.
- (23) **Expiration**. Any chapter that expires will invoke a 3-month expiration period to allow for negotiations to maintain the chapter. At the end of the 3-month expiration period the chapter is null and void and neither party is bound by the terms of that chapter.
- (24) <u>Administration</u>. The administration of the compact will be jointly accomplished by the City Manager and the County Public Communications Administrator. The Compact will include the approving legislation from the City as Appendix B and the approving legislation from the County as Appendix C. A public copy of the Compact and all current chapters will be maintained by both the City and the County.
- (25) <u>Miscellaneous</u>. Any other necessary and proper matters will be specified in the applicable chapter.

Chapter # - TOPIC

Expiration Date: DD MMM YYYY

Statutory Authority: [Federal, State, and Local laws, regulations, and/or ordinances if required]

Purpose: [This section should include language that <u>briefly</u> states the purpose for this agreement]

<u>Governance</u>: [This section should clearly state HOW the agreement will be governed – is there an oversight board (like Joint Health Board? Is a specific staff member given authority (like IT/GIS Director)? Or, does the City/County Commission share administrative oversight?]

Board Membership: [*If* the agreement, by statute or local preference, creates an oversight board – this section should include the details for who appoints, how many members are appointed, what are the limits of board authority, any special requirements on those to be appointed, length of terms, etc.]

Finances: [Will the City or County provide financial monitoring, budgeting, and accounting? A detail of any 'administrative costs' to be charged by the oversight government should be included here. What are the specifics related to how much each agency will provide on an annual basis ? Any other financial details that are distinct to this agreement should be clearly described in this section.]

<u>**Contract Administration:**</u> [What staff, from which agency, will be responsible for contract bids, awards, and administration that will/may be necessary for implementation of the agreement?]

<u>Staff Relationships:</u> [Are there specific authorities, expectations, or other issues, with regard to agency specific staff that need to be explained?]

Employment Records: (only if different from COMPACT)

Professional Contracts: (only if different from COMPACT)

<u>Reporting</u>: [What, if any, reporting mechanisms are expected from the Board, agency specific staff, etc?]

A. DISCUSS/APPROVE/DENY - Approve recommendation from Planning Director Jim Woodhull for Planning Board subcommittee

City Manager Michael Kardoes

414 East Callender Street Livingston, Montana 59047 (406) 222-2005 phone (406) 222-6823 fax citymanager@livingstonmontana.org www.livingstonmontana.org

Incorporated 1889

MEMORANDUM

TO: City Manager

FROM: Director of Building/Planning

SUBJECT: Proposed City/County Planning Sub-committee

Mr. Kardoes,

The City Planning Board would like the City Commission to authorize the creation of a joint planning sub-committee. The purpose of this sub-committee would be as follows:

The City/County Planning Subcommittee will comprise of five members, two from the County Planning and Development Board, two from the City Planning Board, and one member (Peter Fox) who serves as the Chairman of the County Planning and Development Board and the County Representative on the City Planning Board. The Subcommittee will work with City and County staff to explore and address growth and development potential in the area surrounding the City of Livingston. The Subcommittee will look at land use opportunities in this area, traffic concerns and infrastructure development and expansion by the City. In addition, the Subcommittee will also explore the legal framework and statutory opportunities to address the goals mentioned above. Upon completion of this effort, the Subcommittee may make a recommendation to both the City Planning Board and the County Planning and Development Board, each of which may make recommendations to the City Commission and County Commission respectively.

I ask that an action item be placed on the November 7 Commission agenda to consider this proposal.

Backup material for agenda item:

B. DISCUSS/APPROVE/DENY - Approve City - County Solid Waste Compact Agreement

Chapter # 1 - SOLID WASTE

Expiration Date: 08 October 2022

Statutory Authority: The City of Livingston and Park County are local governmental units of the State of Montana which from time to time have entered into Interlocal Agreements pursuant to 7-11-101 Montana Code Annotated (MCA) et seq. The County has previously created the Park County Refuse District and has the power and authority to govern the district by and through its general policy powers and under Title 7, Chapter 11.

Purpose: Park County and the City of Livingston government desires to maximize the efficiency, and cost-effectiveness, of its public solid waste services. Toward that end, a 2011 study and subsequent contract demonstrated that the City of Livingston's municipal transfer station provides an economical and convenient alternative for the disposal of Park County's solid waste.

The City of Livingston is willing to contract with Park County, for the disposal of Park County's solid waste. Such an arrangement does not include the provision of collection services to County residents (non-city) or businesses outside the city limits. Any municipally provided collection services, and the resulting costs, would be added to this chapter after a separate negotiation between Park County and the City of Livingston.

Governance: Sole responsibility for the policy and operation of the municipal transfer station, and all municipal solid waste activities, remains with the City of Livingston Solid Waste Division, Public Works Department, City Manager, and City Commission.

Board Membership: N/A

Finances: Each Park County solid waste vehicle delivering to the Livingston municipal transfer station will be weighed, on a state certified scale; and a receipt/log entry will record the vehicle, date, time, and weight of the solid waste. These records shall be used for the purpose of calculating a monthly invoice to Park County, from the City of Livingston, payment for which will be due within thirty days of receipt of invoice.

• **Municipal Waste** - Park County shall be charged a Transfer Station Operation and Maintenance Fee (TSOMF) of \$22.37 combined with a Transfer and Landfill Fee (TLF) of \$45.63 for municipal waste disposed of from county collection operations. Transfer and Landfill Fee will be a direct cost transfer from Montana Waste Systems. If Park County disposes less than 7,000 tons/year of total waste (excluding green waste), Park County will be back charged any additional cost accrued according to the Montana Waste Systems Contract. Any yearly increases in cost/ton from Montana Waste Systems will be charged to the county.

The Transfer Station Operation and Maintenance Rate shall be subject to increase July 1 of each successive calendar year. The amount of which shall be calculated by adding to the base rate for immediately preceding year as follows:

Base Rate = TSOMF Annual Base Rate Adjustment = [1.0 (CPI)] x the Base Rate for the preceding year Total Fee = Base Rate + TLF Total Fee Year 1 = Base Rate (\$22.37) + TLF (\$45.63) = \$68

In no event shall the Annual Adder exceed five percent of the base rate for the preceding year.

Park County Disposal Vehicles will only be allowed access to the Transfer Station during normal business hours (public hours) unless arrangements are made with the City of Livingston Public Works Department. Park County has no jurisdiction over the operational changes made within the City of Livingston's Solid Waste Department. The City of Livingston will coordinate and communicate any operational changes that will affect Park County operations a minimum of 30 days prior to implementation.

All other acceptable waste types will be charged at the same rate charged to Livingston Businesses. Other waste types are listed below:

- o Construction Waste
- o Green Waste
- Vehicle Batteries
- o Engine Oil
- o Antifreeze
- o Tires
- o Metal Goods
- o Water Heaters, Washers, Dryers, Stoves/Ranges
- o Refrigerators or Freezers Tagged "Freon Removed"
- Refrigerators or freezers with Freon
- o Dead Animals??
- **Recycling** Park County government will contribute \$375/month toward the operational costs of the municipal recycling center located at the municipal transfer station. In return for this remuneration, Park County (non-city) residents are allowed to bring recyclable materials to the municipal recycling center, free of charge. Any significant changes to this partnership, beyond what is currently in place, will be accomplished by further negotiation and subsequent modification/approval of this chapter.
- Hazardous/Unacceptable/Special Waste Park County government shall incur any costs related to the delivery of any waste delivered by Park County government to the City of Livingston's municipal transfer station, which meets the definition of hazardous, unacceptable, or special waste, as defined in the definitions section (Article I) of the contract between the City of Livingston and Montana Waste Systems (dated 9/19/2017), and provided here as Attachment A. Further, Park County government agrees, that in the event they deliver such waste to the municipal transfer station, they will take all steps necessary, at their cost, to comply with Article III and Article IV of the contract between the City of Livingston and Montana Waste Systems (dated 9/19/2017).
- Park County Collection Boxes Collection boxes for park county users with a solid waste "tag" will not be located at the Transfer Station and/or on Livingston property unless negotiated separately and added to this compact.

- **Green Waste** Park County residents and Park County governmental departments will be allowed to dispose of green waste for free with the stipulation that Park County participates in monitoring green waste burns and the hauling of green waste to Swingley Road Compost Site twice a year. Park County Fair Disposal of straw, wood chip and manure will be charged at \$15.00/ton or can be hauled directly to Swingly Road Compost Site.
- Collection Services If a residence or business outside of city limits requests waste collection services from the City of Livingston they may be provided the service at a rate the City deems appropriate. Any and all negotiation on decreasing county refuse assessment cost will be strictly between the entity requesting service and Park County.

Contract Administration: Sole responsibility for the policy and operation of the municipal transfer station, and all municipal solid waste activities, remains with the Public Works Department, City Manager, and City Commission.

<u>Staff Relationships</u>: City of Livingston staff will lead any solid waste joint operations, however, Park County will retain all supervisory rights and responsibilities for Park County staff.

Employment Records: N/A

Professional Contracts: Solid Waste Hauling and Disposal Agreement, 23 Jan 2008 and the Addendum dated 19 Sep 2017.

Reporting: The City of Livingston will provide monthly invoices, and copies of source documents. As requested, the City of Livingston will provide any other available data, operational or financial, with respect to solid waste disposed of by Park County, at the municipal transfer station.
