Staff Report for Ordinance 3042 Amending Chapter 26, Article V, Sections 26.90 and 26.91 of the Livingston Municipal Code Entitled Street Maintenance and Street Lighting Districts

Recommendation and Summary

Staff recommends the Commission approve changes to the Livingston Municipal Code sections related to the assessment of costs for street maintenance and street lighting by adopting the following motion:

"I move to approve the first reading of Ordinance 3042 and authorize the conduct of a final public hearing before its adoption."

The reasons for the recommendation are as follows:

- The Montana Code Annotated provides that cities assess the costs of street maintenance to owners of land parcels within the City.
- City staff has reviewed the current assessment methodology and is recommending that the City Commission adopt a new methodology based on parcel valuation.

Introduction and History

Chapter 12 of Title 7 of the Montana Code Annotated (MCA) provides for the creation and operation of street maintenance districts. Specifically, MCA 7-12-4422 allows for the assessment of costs based on: parcel size, street frontage, taxable value, trip generation or an equal amount per parcel. Currently, the City assesses such costs based on parcel size with certain limitations to the maximum assessment amount. The City Commission received several community comments regarding the assessment method and the Commission directed the City Manager to evaluate the assessment method in December 2022.

Analysis

City staff has reviewed the current and allowed methods and is recommending that the City move to an assessment based on land valuation. Doing so will remove certain inefficiencies wherein larger undeveloped parcels are assessed a significantly higher rate than smaller parcels.

Additionally, as many General Fund services are funded through property taxes based on valuation, adopting this method for street maintenance and lighting districts will more closely align the assignment of costs of City service.

Fiscal Impact

The City will receive the same revenue under any adopted method of assessment. However, certain parcel owners may experience differential assessments based on the selected method.

Strategic Alignment

Funding City street maintenance and lighting is critical to achieving the strategic goals of the City related to infrastructure.

Staff Report for 5095 Resolution of Intent to Increase Water Rates

Recommendation and Summary

Staff is recommending the Commission Approve Resolution 5095 to increase water rates for FY 23-24.

"I move to approve Resolution Number 5095 and authorize the Chair and City Manager to sign Resolution Number 5095."

The reasons for the recommendation are as follows:

- Operating costs continue to rise.
- Capital costs are increase at a rate that is making it difficult to fund the replacement of aging infrastructure.

Introduction and History

Water connection fees and rates were first discussed at the June 20th, 2023 Commission Meeting. Staff is recommending an implementation of tiered rates due to increased demand during the Summer season. Additionally, the cost of providing staff, operating costs, and capital costs for water infrastructure and services continues to increase.

Analysis

The City operates 6 wells, historically 2 are need from October through March then increasing each month from April to mid-July when water demand requires all wells to be running. Over the last couple of years, the need for all 6 wells is becoming necessary earlier in the year. The use of all 6 wells used to allow the City to replenish is reservoirs at night but with the use of more sprinkler systems, this is becoming increasingly difficult. Tiered rates will assist the City in encouraging water conservation among its residents and allow reservoirs to be replenished during times of low usage.

For users, the tiered rates will be charged as follows:

Gallons		Proposed		
		Connection	Usage	
From	To	Fee	Fee	
-	I	15.21	ı	
1	10,000	15.21	3.51	
10,001	30,000	15.21	3.69	
30,001	70,000	15.21	3.76	
>70,000	100,000	15.21	3.86	

A review of customer water usage for the past year shows the following data:

	Tier 1	Tier 2	Tier 3	Tier 4
% of Billing	58.57%	22.31%	5.62%	13.51%
% of Users	83.80%	14.18%	1.27%	0.75%

Fiscal Impact

The expected increase in revenue for the FY 2024 year is approximately \$475,000. This projection is based on historical usage along with the implementation of tiered rates.

Strategic Alignment

Continue to support operations and the infrastructure of the City.

Staff Report for 5096 Resolution of Intent to Increase Wastewater Rates

Recommendation and Summary

Staff is recommending the Commission Approve Resolution 5096 to increase wastewater rates for FY 23-24.

"I move to approve Resolution Number 5096 and authorize the Chair and City Manager to sign Resolution Number 5096"

The reasons for the recommendation are as follows:

- Operating costs continue to rise.
- Capital costs are increase at a rate that is making it difficult to fund the replacement of aging infrastructure.

Introduction and History

Wastewater connection fees and rates were first discussed at the June 20th, 2023 Commission Meeting. Staff is recommending an increase to all sewer rates of 5%. The cost of providing staff, operating costs, and capital costs for wastewater infrastructure and services continues to increase.

Analysis

User charges is the primary source of revenue for the wastewater system. Over the past couple of years, there has been a significant increase to the cost of providing wastewater services to the community. In addition, the Sewer Fund has several outstanding debt obligations with covenants that require the City to maintain debt service coverage equal to 125%. Because of this, as operating costs continue to rise, so must the rate system users are charged.

The average residential user will pay between \$1.01 and \$5.01 in additional costs as a result of this rate change.

Fiscal Impact

The expected increase in revenue for the FY 2024 year is approximately \$125,000. This projection is based on historical usage.

Strategic AlignmentContinue to support operations and the infrastructure of the City.

Staff Report for Selection of Location Preference for Community Wellness Center Project

Recommendation and Summary

Staff is requesting the City Commission provide its preference for the location of the Community Wellness Center project with the Four Ranges Community Recreation Foundation. Commission direction is appreciated to enable the project to move forward with programming and design.

The reasons for the requested direction are as follows:

- The City and Foundation have been working on four components of the project: facility use, location, capital funding and operating arrangements in advance of a planned November 2023 referendum question to electors.
- Understanding the City Commission's location preference will enable the project to proceed more efficiently toward the November election.

Introduction and History

The 4 Ranges Community Recreation Foundation (Foundation) was formed in 2018 to support the creation and operation of community recreation facilities in the City of Livingston. In 2019, the Foundation performed both community needs and fundraising assessments. On March 7, 2023, the City and Foundation approved a memorandum of understanding to guide their work on the community wellness center project.

Since the June 20, 2023, meeting where four finalist locations were presented to the City Commission, staff has engaged the public to solicit feedback on the project, including both location and facility use. The City and Foundation are working toward community approval of the special district to fund the operations of the project at the November 2023 election.

Analysis

By designating location preferences, the City Commission will enable City staff and the Foundation to continue the project development process including the finalization of building concepts, site layout and operating budget. Working with project partners including the Foundation and Montana State University, City staff have narrowed the list of viable project locations from thirteen down to four, as shown in Attachment A.

The initial staff assessment of sites that yielded the finalist locations was based on the following criteria:

- Accessibility: consideration of site current and future site access.
- Ownership: consideration of site ownership.
- Size: consideration of the ability fit planned facilities.
- Utility Connections: consideration of existing and planned utilities to location.

As the City Commission moves provides direction to City staff regarding the four finalist locations, several additional criteria are worthy of consideration, including:

- Land Use: consideration of existing land use designations surrounding location.
- Facility Planning: consideration of impact to other existing and planned facilities.
- Location-specific Costs: consideration of additional site-specific costs of a location.

Fiscal Impact

There may be fiscal impact arising from the direction provided. The capital costs of the project are expected to be provided by the Foundation. However, certain locations may have additional operating or infrastructure costs.

Strategic Alignment

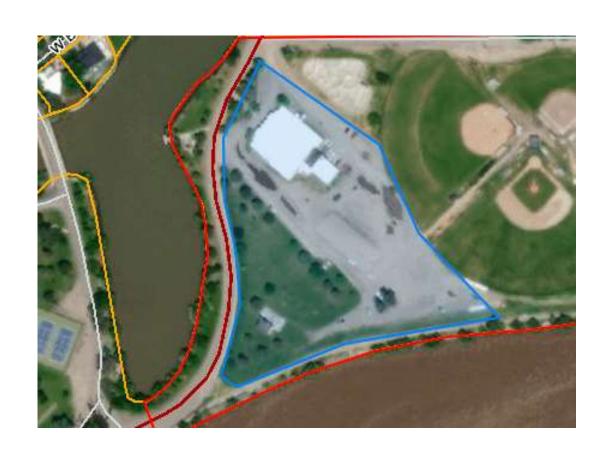

The improvement of community recreation facilities is related to several objectives of the growth policy, including 2.2.2, and 3.2.1.
