

COMPLETE STREETS COMMISSION SPECIAL MEETING AGENDA

6:00 PM - Wednesday, May 21, 2025 Los Altos Community Center - Sequoia Room

PARTICIPATION: Members of the public may participate by being present at the Los Altos Community Center - Sequoia Room located at 97 Hillview Avenue, Los Altos, CA during the meeting. Public comment is accepted in person at the physical meeting location, or via email to **transportation@losaltosca.gov**.

REMOTE MEETING OBSERVATION: Members of the public may view the meeting via the link below, but will not be permitted to provide public comment via Zoom. Public comment will be taken inperson, and members of the public may provide written public comment by following the instructions below.

Webinar ID: 971 2976 8892 | Passcode: 205247

https://losaltosca-gov.zoom.us/j/97129768892?pwd=qhxezvHa0JAbcO3TYuBpzLuXPMeJAQ.1

SUBMIT WRITTEN COMMENTS: Verbal comments can be made in-person at the public hearing or submitted in writing prior to the meeting. Written comments can be mailed or delivered in person to the City Clerk's Office or emailed to **transportation@losaltosca.gov**.

Correspondence must be received by 2 PM on the day of the meeting to ensure distribution prior to the meeting. Comments provided after 2 PM will be distributed the following day and included with public comment in the packet.

CALL MEETING TO ORDER

ESTABLISH QUORUM

PLEDGE OF ALLEGIANCE TO THE FLAG

DISCUSSION ITEMS

1. FY24-25 Annual Street Resurfacing Project

City Staff will give a project update on the proposed plans.

ADJOURNMENT

SPECIAL NOTICES TO PUBLIC

In compliance with the Americans with Disabilities Act, the City of Los Altos will make reasonable arrangements to ensure accessibility to this meeting. If you need special assistance to participate in this meeting, please contact the City Clerk 72 hours prior to the meeting at (650) 947-2720.

If you wish to provide written materials, please provide the Commission Staff Liaison with 10 copies of any document that you would like to submit to the Commissioners in order for it to become part of the public record.

NOTE:
ALL TRAFFIC STRIPES AND PAVEMENT
MARKINGS SHALL BE THERMOPLASTIC.

In the Santa Clara Valley, storm drains transport water directly to local creeks and San Francisco Bay without treatment. Storm water pollution is a serious problem for wildlife dependent on our waterways and for the people who live near polluted streams or bay lands. Some common sources of this pollution include spilled oil, fuel, and fluids from vehicles and heavy equipment; construction debris; sediment created by erosion; landscaping runoff containing pesticides or weed killers; and materials such as used motor oil, antifreeze, and paint products that people

Thirteen valley municipalities have joined together with Santa Clara County and the Santa Clara Valley Water District to educate local residents and businesses and fight storm water pollution. TO comply with this program, contractors most comply with the practices described this drawing sheet.

General Construction And Site Supervision

Best Management Practices For Construction

Site supervisors

Inspectors

Home builders

General contractors

Storm Drain Pollution from **Construction Activities** Construction sites are common sources of storn water pollution. Materials and wastes that blow wash into a storm drain, gutter, or street have a direct impact on local creeks and the Bay. As a contractor, or site supervisor, owner o operator of a site, you may be responsible for vironmental damage caused by your stractors or employees.

<u>Doing The Job Right</u> General Principals

- Keep an orderly site and ensure good ousekeeping practices are used.
- ☐ Keep materials away from streets, storm drains and drainage channels ☐ Ensure dust control water doesn't leave site or
- ☐ Schedule excavation and grading activities for dry weather periods. To reduce soil erosion plant temporary vegetation or place other Erosion and Sediment Control Manual, available from the Regional Water Quality Control Board, Control the amount of runoff crossing your site
- check dams or berms where appropriate. Train your employees and subcontractors. ake these best management practices construction site. Inform subcontractors about the storm water requirements and their own
- vehicle refueling, and routine equipment maintenance. The designated area should be well away from streams or storm drain inlets Keep materials out of the rain - prevent runoff In addition to local building permits, you contamination at the source. Cover exposed piles of soil or construction materials with plast sheeting or temporary roofs. Before it rains,

Maintain equipment properly. Cover materials when they are not in use.

- Advance Planning To Prevent Pollution
- (especially during excavation!) by using berms or temporary or permanent drainage ditches to divert water flow around the site. Reduce storm
- 300d Housekeeping Practices Designate one area of the site for auto parking.

drain to storm drains, creeks, or channels

Place trashcans and recycling receptacle

Keep pollutants off exposed surfaces.

- Clean up leaks, drips and other spills immediately so they do not contaminat soil or groundwater or leave residue on paved surfaces. Use dry cleanup method: whenever possible. If you must use water, use just enough to keep the dust down.
 - Cover and maintain dumpsters. Check frequently for leaks. Place dumpsters under roofs or cover with tarps or plastic sheeting secured around the outside of the dumpster. Never clean out a dumpster b hosing it down on the construction site. Set portable toilets away from storm drains. Make sure portable toilets are in good

working order. Check frequently for leaks

- ials/Waste Handling ☐ Practice Source Reduction — minimize waste when you order materials. Order only the amount you need to finish the job. Use recyclable materials whenever possible. Arrange for pick-up of recyclable naterials such as concrete, asphalt, scrap metal, solvents, degreasers, cleared vegetation, paper, rock, and vehicle maintenance materials such as used oil
- antifreeze, batteries, and tires. Dispose of all wastes properly. Many construction materials and wastes, including solvents, water-based paints vehicle fluids, broken asphalt and concrete wood, and cleared vegetation can be recycled. Materials that cannot be recycled must be taken to an appropriate landfill or disposed of as hazardous waste. Never bury waste materials or leave them in the street or near a creek or stream bed.
