116	Distel Drive @ Marich Way	Two-way stop	HCM 6th Edition	SWB Thru	0.011	25.4	D
128	San Antonio @ Jordan	Two-way stop	HCM 6th Edition	WB Left	1.859	663.2	F

V/C, Delay, LOS: For two-way stop, these values are taken from the movement with the worst (highest) delay value. For all other control types, they are taken for the whole intersection.

MEMORANDUM OF UNDERSTANDING
330 DISTEL CIRCLE

This Memorandum of Understanding (this "MOU") is made as of January 28, 2021, by and between the CITY OF LOS ALTOS, a municipal corporation of the State of California (the "City"), and the COUNTY OF SANTA CLARA, a political subdivision of the State of California (the "County").

WHEREAS, the County expects to enter into a Purchase and Sale Agreement (the "Purchase Agreement") with MidPeninsula Regional Open Space District to acquire property known as 330 Distel Circle in the City of Los Altos (the "Property") for the purpose of developing affordable and supportive multifamily housing, utilizing funds from the County's 2016 Measure A Affordable Housing Bond ("Housing Bond").

WHEREAS, the Housing Bond is a $950 million affordable housing bond measure passed by voters in Santa Clara County in 2016. The Housing Bond is part of an ongoing effort to: 1) increase affordable housing opportunities for our community's most vulnerable and poorest residents; and, 2) to prevent and reduce homelessness throughout Santa Clara County. The Housing Bond builds on key policy shifts and communitywide partnerships that have occurred over the last five years.

WHEREAS, the Purchase Agreement is contingent on the County's due diligence review of the Property and the potential development, including a commitment from the City on entitlements for the Project (defined below).

WHEREAS, the purpose of this MOU is to set forth the parties' support for a potential affordable housing development at Property and outline a path for potential waiver of contingencies by the County under the Purchase Agreement.

NOW THEREFORE, the parties hereby declare and acknowledge the following:

1. The County is considering acquiring the Property to develop, or to ground lease to a developer to develop, an affordable housing project (the "Project").
2. The Project is anticipated to contain a minimum of 90 units, with 100% of the units restricted to occupants earning 80% or less of the area medium income (AMI), with a minimum of 5% earning 30% or less of the area medium income (AMI), 50% earning 50% or less of the area medium income (AMI), and 45% earning 80% or less of the area medium income (AMI). The Parties acknowledge that the final affordability restrictions will depend in part on the requirements of available funding sources, including tax credit financing.
3. The County would solicit an affordable housing developer, either by issuing an RFP or selecting from a pre-approved list, and would impose development requirements and affordable housing restrictions on the Project through a ground lease with the developer and/or conditions set forth in Measure A loans provided to the developer.
4. The City supports the development of affordable housing on the Property and of the Project as described above and will provide transparency and flexibility, to the extent possible, in the entitlement process for the Project. The City shall be the agency responsible for the review and approval of zoning and land use requirements for the Project and shall receive any RHNA credits issued in connection with the Project. The City acknowledges that the County will need

DocuSign Envelope ID: 245E16F0-31C4-4063-8491-E7E9387073F3

binding entitlements for the Project prior to April 27, 2021 in order for the County to waive contingencies under the Purchase Agreement.

5. In furtherance of its support of the Project, the City intends to provide the Project with a discount of up to 100% from the City's impact fees. The total, non-discounted impact fees for the Project are currently estimated to be $252,344.08 for traffic fees and $4,392,000 for park in lieu fees.

6. The parties further declare and acknowledge that the City's and the County's commitment to the Project are subject to compliance with all legal requirements, including but not limited to, compliance with the California Environmental Quality Act. Nothing in this MOU shall be construed to compel the County or City to approve or make any particular findings with respect to any environmental documentation that is prepared, pursuant to CEQA, for any portion of the Project. The City retains its full discretion to refuse to approve any CEQA document prepared to analyze the environmental impacts of the Project.

Distel Circle Apartments

Density Bonus Report – Planning Application

July 74, 2022

Project:	**90-Unit Multifamily Affordable Housing Community**
Location:	330 Distel Circle, Los Altos (APN# 170-04-051)
Current Landowner:	Midpen Regional Open Space District
Applicant/Developer:	EAH Housing

As a permanently affordable rental community incorporating a mix of unit types and a range of rent tiers that supports a diversity of income-eligible tenants earning incomes from 30% to no more than 80% of Area Median Income (AMI), the 330 Distel Circle development is eligible for a density bonus in accordance with California Government Code Section 65915 et seq. ("Density Bonus Law").

EAH as the applicant is requesting an increase in the density allowable at 330 Distel Circle and other incentives, waivers, concessions, and parking reductions allowed by the Density Bonus Law.

Requested Density Bonus

Density Bonus is considered in the LAMC section 14.28.040 (C) and contemplates density bonus up to 35% depending on both the affordability and the number of restricted units. The LAMC also has a provision that can provide a for additional density bonus 14.28.040 (E)(7) which states: Nothing in this section shall be construed to prohibit the city from granting a density bonus greater than what is described in this section for a development that meets the requirements of this section or from granting a proportionately lower density bonus than what is required by this section for developments that do not meet the requirements of this section.

The California Government Code Section 65915 also allows for unlimited density for 100% affordable developments that are withing one-half mile from a major transit stop, section 65915 (f)(3)(D)(ii). 330 Distel Circle is within one-half mile from a major transit stop (please see Memorandum on Consistency with Density Bonus Provisions - Glaser Weil).

In alignment with the MOU between the City of Los Altos and the County of Santa Clara, that acknowledges the development to contain a minimum of 90 units at 330 Distel Circle, EAH is requesting a density bonus to allow for 103.45 units per acre.

The California Government Code Section 65915(d)(2)(D) allows for a height increase of an additional 3 stories or 33 feet for 100% affordable housing developments. The current zoning district (CT) allows for structures up to 45 feet in height and considering the additional 33 feet allowed by the Density Bonus Law, a building up to 78 feet would be consistent with the height allowed under the law. The proposed building height at 330 Distel Circle is 64 feet and consistent with Density Bonus Law.

Zoning	Commercial Thoroughfare District (CT)
General Plan	Thoroughfare Commercial
Maximum Density	38 dwelling units per net acre (dua)
Site Size	38,030 sf (0.87 acres)
Units Permitted	0.87 X 38 = 33.06 units
Total Units Proposed	90 units
Proposed Affordable Units	88 units (100% exclusive of managers units)
Proposed Bonus Percentage	90 ÷ 33 =272%
Number of Density Bonus Units	90 – 33 = 57 units
Proposed Density Per Acre	90 ÷ 0.87 = 103.45 dua
Proposed Market Rate Bedrooms	0
Proposed Affordable Unit Bedrooms	155
Proposed Manager's Unit Bedrooms	4

Unit Mix – 330 Distel		AMI					
	SQFT PU	30%	50%	60%	80%	**Unit Total**	**Unit Mix**
SRO/Efficiency	465	14	3	7	-	24	27%
1-BR	645	9	3	7	1	20	22%
2-BR	965	12	3	4	2	21	23%
3-BR	1140	10	3	7	3	23	26%
4-BR	0	-	-	-	-	-	0%
MGR	965					2	2%
Unit Total		45	12	25	6	**90**	100%
Affordability Dist.		50%	13%	28%	7%	100%	
Average Affordability	**44.66%**						

The existing use of 330 Distel Circle is a single-story office building that is owned and occupied by Midpeninsula Regional Open Space District. There are currently no dwelling units on the site nor has there been in five years preceding the date of submittal of this application.

There are no recorded covenants, ordinances or laws applicable to the site that restrict rents.

Requested Incentives and Concessions

The applicant is requesting the following four (4) concessions:

- Reduced Front Yard Set Back
- Reduced Front Side Step-back
- Reduced Average-Per-Unit Open Space Provided
- Reduced EV Ready Parking Stalls

Reduced Front Yard Set Back

Los Altos Municipal Code (LAMC) section 14.50.090 has a standard of a 25-foot minimum depth of which 50% of the area should be landscaped. We are requesting a reduction in the minimum setback from 25 feet to 10 feet. LAMC Section 14.28.040 (F)(1)(e) allows for an On-Menu incentive to reduce the setback requirement by up to 20%. However, the reduction requested is greater than 20% and therefore is considered an **off-menu** request.

Reason for Request: The reason for this request is because a 25-foot setback would decrease the building area and thereby decrease the unit count.

Reduced Front Side Step-back

LAMC 14.50.170 (B)(1)(b) requires a minimum step-back of 10 feet from the ground floor façade for stories above 45 feet. EAH is requesting no step-back on the 4th and 5th levels. This is an **off-menu** request because step-back reductions are not an on-menu incentive.

Reason for Request: The reason for this request is because a step-back on the 4th and 5th level would decrease the building area and thereby decrease the unit count.

Reduced Average-Per-Unit Open Space Provided

LAMC 14.50.150(A) requires that an average of fifty (50) square feet of private open space shall be provided for the total number of dwelling units within the project. EAH is requesting a reduction in the average square feet of private open space from 50 to 25 square feet. LAMC Section 14.28.040 (F)(1)(f) allows for an On-Menu incentive to reduce the open-space requirement by up to 20%. However, the reduction requested is greater than 20% and therefore is considered an **off-menu** request.

Reason for Request: The site has a 10' foot public utility easement (PUE) running along the front of the property along Distel Drive. The PUE has to be clear to sky and therefore we are unable to provide cantilevering balconies along the Distel frontage. Providing decks within the units along Distel would require a decrease in unit size, a decrease in unit count or an increase in cost due to customization of modular units. We have mitigated the reduction in Private Open Space by proving more Common Open Space than required.

Reduced EV Ready Parking Stalls

LAMC 4.106.4.2 (Exceptions) requires all multifamily Affordable Housing, 10% of dwelling units with parking space(s) shall be provided with at least one Level 2 EV Ready Space. Calculations for the required minimum number of Level 2 EV Ready spaces shall be rounded up to the nearest whole number. The remaining dwelling units with parking space(s) shall each be provided with at least one Level 1 EV Ready Space. The required spaces with this calculation would be the following. We are requesting to provide the state minimum required by our current code (2019) which is 10% EV Ready spaces- 9 total- instead of the 90 required by Los Altos code.

Level 2 EV Ready Space = 9 spaces
Level 1 EV Ready Space = 81 spaces
Total = 90 spaces

Reason for Request: The additional costs related for infrastructure, transformer(s), and cost of pedestals for charging.

1. Meeting the requirement will increase the amount of costs of utility infrastructure required such as conduit/raceways and transformers. We are estimating the costs as $1000/stall per Energy Solutions report (dated 2019 so costs are likely higher). For the additional stalls beyond the 10% required by CalGreen we estimate $81,000 (81 stalls x $1,000).

Table 1. Estimated Cost of Installing EV Infrastructure (price per spot)

Code Scenario:	Market Rate 25% Level 2 75% Level 1		Affordable Housing 10% Level 2 90% Level 1	
Building Type	New Construction	Retrofit[4]	New Construction	Retrofit
60-Unit MUD	$1,410	$4,443	$1,049	+$3,982
150-Unit MUD	$1,197	$4,101	$1,002	+$3,854
60-Space Office Building	$1,166	$3,232	N/A	N/A

Table 1: Energy Solutions article dated November 5, 2019. EV Infrastructure Cost Analysis Report for Peninsula Clean Energy and Silicon Valley Clean Energy (page 1).

2. If/when the mechanized stalls go from EV Ready to having the capability to charge, Level 2 chargers will require ±$2,500 per pedestal depending on the manufacturer. For Level 1 chargers, 110v receptacle can be added to the platform.

3. The project is required to have zero parking spaces as a result of being a 100% affordable housing project within ½ mile of major transit. As such, if we were to provide zero stalls, we would not be required to provide any EV Ready stalls per CA and City of Los Altos code and CA Cal Green code.

Cost Justification:

There are two areas of focus related to the cost containment of this affordable housing community and how it relates to the requested concessions: the total costs to build the units (hard costs) and the average cost per unit including all other soft costs.

Hard costs associated with the construction of the modular units include the material and labor expense it takes to create and build each unit. The modular factories are set up for standardization, not for customization, so any modification to the factory standards would lead to additional costs and additional waist. By way of a simple example, if the factory is set up to build units using wood in 20 foot lengths but we request shorter units that require 18 foot lengths, then the factory would need to customize the machinery to cut the shorter lengths. This customization would increase the labor costs and slow the process down adding more time. In addition, more waist is created because in this example, the two-foot section of wood is unlikely to be re-used and will be thrown away.

The second area of focus is the developments cost per unit. This development has fixed costs including the land and other soft costs including design and environmental analysis. By way of a simple example, if the design fees are $3 million and the design yields 90 units, the per-unit cost is $33,333. However, if the same design fees were yielding only 60 units, the per-unit cost would be $50,000. While this does not increase the total cost of development, a higher cost per unit makes this project less competitive when trying to leverage additional funding source at the State and Federal level. Therefore, a design or building standard that leads to a reduction of building area or total number of units is considered to increase costs and reduce competitiveness.

Requested Waivers

The applicant is requesting the following waivers:

- Visibility of Interior Courtyard
- Exterior Materials
- Trash Staging Area

Visibility of Interior Courtyard

LAMC 14.50.170 (C)(5)(a) requires that an interior courtyard must be partially visible from the street and linked to the street by a clear accessible path of travel. EAH is requesting that this requirement be satisfied by allowing visibility from the parking lot behind the building. In addition, EAH is requesting that the interior courtyard not be required to be linked to the street by a clear accessible path of travel. This is an **off-menu** request.

Reason for Request: The courtyard has been raised to the second level to provide additional parking on the ground level. A second level courtyard also provides additional privacy to the residents and neighbors. Removing a portion of the building to make the courtyard visible from the street would decrease units and parking area.

Exterior Building Materials:

LAMC 14.66.280 (D)(4)(a) Base. For multistory buildings, the base of the building shall be defined by a distinct material selected from among the following: Stone, brick, concrete, CMU, or stucco ("base material"). EAH is requesting that wood be approved as a distinct material for the base.

Reason for Request: We believe that the intent of this design standard is being achieved because wood serves as a distinct material. We are proposing wood and storefront glazing at the base of the building.

Trash Staging Area:

LAMC 14.50.060 (C) (2) states that every development will be required to provide suitable space on-site for solid waste separation, collection, storage, and pick up and shall site these in locations that facilitate access, collection, and minimize any negative impact on persons occupying the development site, neighboring properties, or public rights-of-way. EAH is requesting a waiver from the requirement so that the solid waste collection can take place in the public right of way (Distel Circle).

Reason for Request: The location of trash storage is on the ground floor in the garage but is not in a location that can be serviced by the collection company, Mission Trails. Mission Trails requests that the trash staging area be within a specific distance from the street so that the trucks can access the trash bins. Redesigning the ground floor to accommodate a staging area closer to the street is not desirable because it would require relocating the bicycle parking, resulting in the loss of amenity space on the ground floor. Our proposal is to have building staff stage the trash bins on Distel Circle on trash pick-up day and return the bins to the trash room after the trash has been collected.

Requested Parking Reductions

LAMC 14.28.040(G)(2)(b) - For low or very low income housing near major transit stop. Upon the request of the developer, the city shall not impose a parking requirement, inclusive of handicapped and guest parking, that exceeds one-half parking spaces per bedroom if the development includes the maximum percentage of low or very low income units; and the development is located within one-half mile of a major transit stop; and there is unobstructed access to the major transit stop to the development. EAH is requesting parking requirement alterations be applied to the proposed development because the development:

- Exceeds the percentage required of low or very low income units
- Is within one half-mile of a major transit stop
- Has unobstructed access to the major transit stop to the development This is an ***On-Menu*** request.

The proposed development at 330 Distel Circle will have a total of 159 bedrooms. Using the one-half parking space per bedroom outlined in the LAMC would require 80 parking spaces. As proposed, this community will have 90 parking spaces.

State Density Bonus Law does not require any parking for 100% affordable developments that are withing one-half mile from a major transit stop, section 65915 (p)(3). 330 Distel Circle is within one-half mile from a major transit stop (please see Memorandum on Consistency with Density Bonus Provisions - Glaser Weil).

330 Distel: Density Bonus, Concessions, Waivers				
Allowed by Density Bonus Law				
Density (DU/acre)	38du/acre	90 Units = 103 du/acre	Density Bonus Law	14.5.080 (LAMC)
Height	45ft + 33ft = 78ft permitted	64ft, 5 stories	Density Bonus Law	
Concession	**Standard**	**Proposed**	**Reason**	Code Section
Setback, Front Yard	25ft min. depth, 50% of which shall be landscaped	10ft setback	25ft setback would decrease building area and unit count	14.5.090 (LAMC)
Stepback	Street Side: Minimum 10 feet from ground floor façade above 45 feet in height	Requesting no stepback on 4th and 5th levels.	We need building area to get to 90 units.	14.50.170_1B. Obj. Standards
Open Space	50SF; An average of fifty (50) square feet of private open space shall be provided for the total number of dwelling units within a project.	Approximately 25 sf average / unit requested	10ft Public Utility Easement has to be clear to sky so we are unable to provide cantilevering balconies along the Distel frontage. Juliette balconies are provided on Distel. Providing decks within the units would require a decrese in unit area and impact unit count. Private open space provided on all decks except for those facing Distel.	14.50.150 (LAMC)
EV Ready Parking stalls	4.106.4.2 New multifamily dwellings. Exception: For all multifamily Affordable Housing, 10% of dwelling units with parking space(s) shall be provided with at least one Level 2 EV Ready Space. Calculations for the required minimum number of Level 2 EV Ready spaces shall be rounded up to the nearest whole number. The remaining dwelling units with parking space(s) shall each be provided with at least one Level 1 EV Ready Space. Calculation: (9) Level 2 EV ready spaces and (81) Level 1 EV ready spaces.	Requesting 10% (9 stalls) to be EV Ready stalls per Cal Green code.	1. Cost of utility infrastructure 2. Cost of pedestal costs if EV is installed in future 3. Parking required is zero, which means zero EV Ready stalls would be required.	4.106.4.2 (LAMC)
Waiver	**Standard**	**Proposed**	**Reason**	
Interior Courtyard	Partially visible from the street and linked to the street by a clear accessible path of travel.	Requesting visibility from back parking lot, no access from exterior to courtyard	Raised courtyard on level 2 not visible from Distel, may be visible from El Camino. Raised courtyard to provide additional parking. Also creates privacy for single family neighbor and residents. Removing a leg of the building to make the courtyard visible would decrease unit and parking area.	14.50.170_5A. Obj. Standards
Materials	Base. For multistory elements, the base of the building shall be defined by a distinct material selected from among the following: Stone, brick, concrete, CMU, or stucco ("base material").	Requesting approval of wood as a distinct material.	Intent achieved. Wood serves as distinct material. Wood and storefront glazing proposed at the base.	14.66.280_DA Obj. Standards
Trash	Pickup not in right of way	Waiver from requirement	PUE Easement, no other location for trash	14.50.060_C2 Required Conditions

Project Name: 330 Distel Circle
Project No: 210042

Re: EV Capable Concession Request

From: Lily Ciammaichella, AIA, BD+C
KTGY Architecture + Planning

Dear Radha,

We are requesting to make the Los Altos EV capable charging requirement as a State Density Bonus Law inentive/concession. From section **4.106.4.2** of the Los Altos municipal code, we are required to provide the following:

4.106.4.2 New multifamily dwellings
Exception: For all multifamily Affordable Housing, 10% of dwelling units with parking space(s) shall be provided with at least one Level 2 EV Ready Space. Calculations for the required minimum number of Level 2 EV Ready spaces shall be rounded up to the nearest whole number. The remaining dwelling units with parking space(s) shall each be provided with at least one Level 1 EV Ready Space.

Required EV Ready stalls
EV2 ready = 9 spaces
EV1 ready = 81 spaces
Total = 90 spaces

We are requesting to provide less EV capable stalls to 10% of the total number of parking spaces (9 stalls) as Level 1 spaces.

The reasons are as follows:

1. Meeting the requirement will increase the amount of costs of utility infrastructure required such as conduit/raceways and transformer needs. We are estimating the costs as $1000/stall per Energy Solutions report. For the additional stalls beyond the 10% required by CalGreen and proposed, or 81 stalls x$1,000 = $81,000. Cost was from 2019 report by Energy Solutions and costs are likely more than estimated below.

Table 1. Estimated Cost of Installing EV Infrastructure (price per spot)

Code Scenario:	Market Rate 25% Level 2 75% Level 1		Affordable Housing 10% Level 2 90% Level 1	
Building Type	New Construction	Retrofit[4]	New Construction	Retrofit
60-Unit MUD	$1,410	$4,443	$1,049	+$3,982
150-Unit MUD	$1,197	$4,101	$1,002	+$3,854
60-Space Office Building	$1,166	$3,232	N/A	N/A

2. If/when the mechanized stalls will be ready to convert the mechanized stalls to have the capability to charge, at this time, Level 2 chargers will require ±$2,500 per pedestal depending on the manufacturer. For Level 1 chargers, 110v receptacle cade be added to the platform.

3. The project is required to have zero parking spaces as a result of being a 100% affordable housing project within ½ mile of major transit. As such, if we were to provide zero stalls, we would not be required to provide any EV Ready stalls per CA and City of Los Altos code and CA Cal Green code.

Definitions:

Electric vehicle infrastructure Cost Analysis Report for Peninsula Clean Energy & Silicon Valley Clean energy. By Enegry Solutions. Page 4

EV Capable	Includes conduit / raceways
EV Ready ("Plug and play")	Includes full circuit with a receptacle / outlet
EV Installed	Includes full charging capability with EVSE

Los Altos Municipal code Definitions:

"Level 1 EV Ready Space" means a parking space served by a complete electric circuit with a minimum of 110/120 volt, 20-ampere capacity including electrical panel capacity, overprotection device, a minimum 1" diameter raceway that may include multiple circuits as allowed by the California Electrical Code, wiring, and either a) a receptacle labelled "Electric Vehicle Outlet" with at least a ½" font adjacent to the parking space, or b) electric vehicle supply equipment (EVSE).

"Level 2 EV Ready Space" means a parking space served by a complete electric circuit with 208/240 volt, 40-ampere capacity including electrical panel capacity, overprotection device, a minimum 1" diameter raceway that may include multiple circuits as allowed by the California Electrical Code, wiring, and either a) a receptacle labelled "Electric Vehicle Outlet" with at least a ½" font adjacent to the parking space, or b) electric vehicle supply equipment (EVSE) with a minimum output of 30 amperes.

Glaser Weil

MEMORANDUM

TO: EAH Housing

FROM: Elisa Paster and Eric Geier

DATE: February 9, 2022

SUBJECT: 330 Distel Circle-Project Consistency with Density Bonus Provisions

I. Introduction

EAH Housing is partnering with the City of Los Altos ("City") to develop a 100% affordable housing project, with the exception of a manager's unit, using a Density Bonus (the "Project") at 330 Distel Circle, Los Altos, California 94022 ("Project Site"). The Project is a 64 foot building that consists of 90 affordable units (24 Studio, 20 one-bedroom, 23 two-bedroom, and 23 three-bedroom) and 90 parking spaces. The Project is seeking a 165% Density Bonus, existing zoning allows for 34 units (rounded up from 33.06) at the Project Site.

Based on its proximity to transit, as demonstrated below, state law permits the Project to an unlimited Density Bonus, a height increase up to 33 feet, and no minimum parking requirements. As the Project is 100% affordable, even if a determination is made that the Project is not within one-half mile of a major transit stop, the Project can still be approved as designed with the approval of concessions and waivers.

II. The Project Site is Within One-Half Mile of a Major Transit Stop

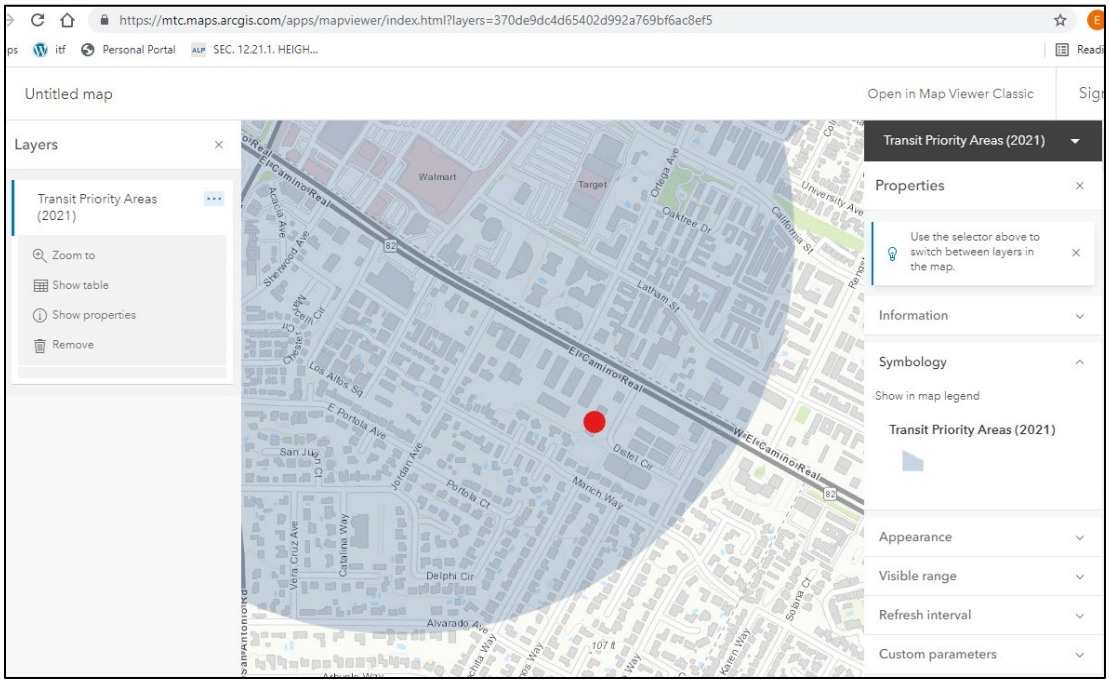
For the purpose of State Density Bonus law, codified in Government Code (GOV) section 65195, a major transit stop is defined as existing or planned rail or bus rapid transit (BRT) stations, ferry terminals served by either a bus or rail transit service, and the intersection of two or more bus routes with a frequency of service interval of fifteen minutes or less during the morning and afternoon peak commute periods. (Public Resources Code (PRC) §§ 21064.3, 21155(b).)[1]

A. Available Resources Identify the Project Site as Being One-Half Mile of a Major Transit Stop

A Transit Priority Area is defined as "an area within one-half mile of a major transit stop that is existing or planned, if the planned stop is scheduled to be completed within the planning horizon included in a Transportation Improvement Program or applicable regional transportation plan." (PRC § 21099(a).) Accordingly, if the Project Site is

[1] State Density Bonus law treats planned major transit stops as existing major transit stops. Limited analysis was performed on whether major transit stops are planned within one-half mile of the Project Site. Our initial conclusion is that no such transit stops are planned, thus our research focused on existing major transit stops.

located in a Transit Priority Area, it is by definition within one-half mile of a major transit stop. The Metropolitan Transportation Commission (MTC), the metropolitan planning organization for the San Francisco Bay Area, identifies the Project Site as being within a Transit Priority Area. The graphic below is taken from the MTC's GIS system, which shades the TPAs in blue; the Project Site is designated by a red dot.



B. A Major Transit Stop is Located at El Camino Real and Showers Drive

Although the MTC identifies the Project Site as being within a Transit Priority Area, it does not identify the major transit stop within one-half mile of the Project Site. Because the Project Site is not within one-half mile of a rail station, ferry terminal, or BRT station,[2] analysis focuses on the intersection of two or more bus routes with requisite service during the peak hour commute periods.

The statute does not define morning and afternoon peak commute hours, nor does the Los Altos Municipal Code (LAMC) or other City documentation. The Santa Clara Valley Transportation Authority (VTA), the City's transit provider, defines peak hours as "the highest morning or evening hour of travel reported on a transportation network or street." As the Congestion Management Agency for Santa Clara County, the VTA's Guidelines can be considered applicable in the absence of any other City guidance.

[2] Note that the Rapid 522 does not appear to have the elements of BRT service identified in the PRC, such as 1) dedicated bus lanes or a separate right-of-way, 2) transit signal priority, 3) all door boarding, 4) fare collection system promoting efficiency, and 5) defined stations. (PRC § 21060.2.) Accordingly, the Rapid 522 does not establish a major transit stop in and of itself.

Typically, peak hours are defined at between 7:00 am and 9:00 am and 4:00 pm and 6:00 pm.

The bus stop at the intersection of El Camino Real and Showers Drive, approximately 1,513 feet from the Project Site, constitutes a major transit stop, as VTA lines 22, 40, and Rapid 522 operate at less than 15 minute intervals between 7:00 am and 9:00 am and 4:00 pm and 6:00 pm, morning and afternoon peak commute periods. A chart demonstrating the bus lines frequency follows.

Northbound/Eastbound				**Southbound*/Westbound**			
Morning Peak Hours (7:00 AM-9:00 AM)		**Afternoon Peak Hours (4:00 PM-6:00 PM)**		**Morning Peak Hours (7:00 AM-9:00 AM)**		**Afternoon Peak Hours (4:00 PM-6:00 PM)**	
Time	**Bus Line**	**Time**	**Bus Line**	**Time**	**Bus Line**	**Time**	**Bus Line**
7:07 AM	22	4:01 PM	22	7:09 AM	522	4:01 PM	22

8:59 AM	22	5:49 PM	522				

*There are two southbound stops for Line 40 at Latham Street, one is south of Latham Street, approximately a third of the distance to El Camino Real. This stop functionally serves to connect Line 40 to Line 22 and Rapid 522.

III. Consistency with Density Bonus Provisions Based on Proximity to a Major Transit Stop

A. Density Bonus

The LAMC provisions contemplate up to a 35% Density Bonus. (LAMC § 14.28.040(C).) Alternatively, the Government Code allows for unlimited density for projects that are 100% affordable (at least 80% low income and up to 20% moderate income) and within one-half mile of a major transit stop. (GOV § 65915(f)(3)(D)(ii).) As the Project is a 100% affordable housing project, using Santa Clara County Measure A funding, City of Los Altos fee waivers, and Low Income Housing Tax Credits, its affordability will be subject to a covenant. Accordingly, as a 100% affordable project, the 165% Density Bonus is permitted by state law. The density increase is not considered an incentive/concession.

B. Height

Projects that are 100% affordable and within one-half mile of a major transit stop are entitled to a height increase of three additional stories, or 33 feet. (GOV § 65915(d)(2)(D).) The Project is designed to be 64 feet in height, 19 feet greater than the 45 feet allowed in the Commercial Thoroughfare zone. (LAMC § 14.50.140.) However, because the 64 feet would be within the additional 33 feet allowed for by GOV § 65915(d)(2)(D), the Project height is consistent with state Density Bonus provisions. Per the Government Code, this height increase is not considered an incentive/concession. (GOV § 65915(d)(2)(D).)

C. Parking

The City's Density Bonus provisions include a parking standard of .5 parking space per bedroom for affordable housing with unobstructed access to a major transit stop within one-half mile. (LAMC § 14.28.040(G)(2)(b).) As the Project consists of 159 bedrooms, this provision would require the Project to provide 80 parking spaces. Alternatively, state Density Bonus provisions do not require any parking for 100% affordable projects with unobstructed access to a major transit stop located within one-half mile of the project site. (GOV § 65915(p)(3).) As the Project proposes to include 90 parking spaces, it would satisfy both the state and local requirement. Use of these provisions is not considered an incentive/concession. (GOV § 65915(p)(9), LAMC § 14.28.040(G)(2)(e).)

D. Incentives, Concessions, and Waivers

Projects that are 100% affordable are entitled to four concessions or incentives. (GOV § 65915(d)(2)(D).) Concession or incentive is defined as "A reduction in site

development standards or a modification of zoning code requirements or architectural design requirements…that results in identifiable and actual cost reductions, to provide for affordable housing costs…." (GOV § 65915(k)(1).) Although entitled to four concessions, we understand that the EAH Housing is requesting two concessions which will result in cost reductions to allow the Project to be built: 1) a reduction in front yard setback from 25 feet to 10 feet, and 2) a reduction in private open space from a 50 square foot average to 25 square foot average.[3] The application for the Project should include findings or evidence demonstrating that reduction of the front yard setback and reduction of the open space would result in cost reductions to provide for the affordable housing. We can assist with those findings at your request.

EAH Housing may also request waivers, apart from an incentive/concession. (LAMC § 14.28.040(H).) The LAMC defines waiver as "the deletion or reduction of any development standards that would otherwise have the effect of physically precluding" a Density Bonus Development. (LAMC § 14.28.040(B)(27).) The Project is seeking a waiver to reduce the front step back of a minimum 10 feet from ground floor façade for stories above 45 feet in height, as maintaining that step back would preclude the Project from being constructed with the identified density. The application for the Project should include findings or evidence demonstrating that imposition of the front step back requirement would physically preclude the construction of the Project. We can assist with those findings at your request.

IV. Alternative Consistency with Density Bonus Provisions

As demonstrated above the Project Site is located within one-half mile of a major transit stop as defined by the Government Code and Public Resources Code. The subsequent analysis demonstrates that the Project Site's proximity to a major transit stop qualifies the Project for unlimited density, increased height, and decreased parking. However, even if the Project Site is not determined to be within one-half mile of a major transit stop, it would still be consistent with state and local Density Bonus provisions based on available concessions and waivers.

Projects that are 100% affordable are entitled to four concessions or incentives. (GOV § 65915(d)(2)(D).) The LAMC does not include a limitation on the number of waivers a project can seek, but rather contemplates the use of multiple waivers by using the plural of the term, waivers, in relevant provisions.[4] State law specifically allows a city to grant multiple waivers. (GOV § 65915(e)(3).)

[3] The staff report for the Joint City Council/Planning Commission Study Session on January 11, 2022 identified a third concession, increase in building height. As noted above, this increase in allowed by state law and not considered an incentive, consistent with GOV § 65915(d)(2)(D).
[4] See LAMC §§ 14.28.040(A), 14.28.040(C), 14.28.040(D)(1)(f), 14.28.040(H).

If the Project Site is not determined to be within one-half mile of a major transit stop, the Density Bonus can still be processed by including the following concessions and waivers.

A. Incentives/Concessions

An incentive or concession is defined as "A reduction in site development standards or a modification of zoning code requirements…that results in identifiable and actual cost reductions, to provide for affordable housing costs." (GOV § 65915(k)(1).) As density is specifically identified as a zoning code requirement, an increase to the identified level, 103.45 dwelling units/acre as opposed to the 38 dwelling units/acre identified in LAMC § 14.50.080, would constitute a modification to a zoning code requirement, and therefore an incentive/concession. As it is not enumerated in LAMC § 14.28.040(F)(1), this would be considered an off-menu incentive or potentially a wavier (discussed below).

A reduction in required parking is specifically cited as an example of a concession or incentive. (GOV § 65915(k)(1).) The LAMC specifically allows for "off-menu parking requirement alterations." (LAMC § 14.28.040(G)(3).) Further, the LAMC vests the City with broad authority to determine the parking required for a project: "This section does not preclude the city from reducing or eliminating a parking requirement for development projects of any type in any location." (LAMC § 14.28.040(G)(4).)

The Project has previously identified the reduction in front yard setback from 25 feet to 10 feet and the reduction in private open space from a 50 square foot average to 25 square foot average as potential incentives/concessions. The staff report for the Joint City Council/Planning Commission Study Session on January 11, 2022 identified both of these as on-menu incentives/concessions.

B. Waivers

As noted above, maintaining the step back requirement would preclude the Project from being constructed with the identified density. Similarly, limiting the Project's height to 45 feet would preclude the Project from being constructed at the identified density. The Project, as designed, includes dwelling unit square footages consistent with code requirements and ground floor amenities, as well as required parking. Reducing the Project to 45 feet would cause the removal of two stories from the Project. Maintaining the identified density while reducing the Project by two stories would likely require 1) redesign of the Project to include rooms of a substandard size, and/or 2) the removal of required parking and Project amenities on the ground floor, which would be displaced by residential units. Accordingly, the increased height would constitute a permissible waiver, as maintaining the 45 foot height limit would reduce the Project's density.

The Project's increased density could also be considered a waiver. As the Project seeks to construct an affordable housing development with a density of 103.45 dwelling units/acre, maintaining the density required by the LAMC would have the effect of physically precluding the Project. Accordingly, the Project's increased density could treated as a waiver rather than an incentive.

RAND|PASTER|NELSON

MEMORANDUM

VIA EMAIL

TO: EAH Housing

FROM: Elisa Paster

DATE: September 15, 2022

SUBJECT: **330 Distel Circle - Density Bonus**

I. INTRODUCTION

EAH Housing is partnering with the City of Los Altos ("City") to develop a 100% affordable housing project, with the exception of two manager's units, using a Density Bonus (the "Project") at 330 Distel Circle, Los Altos, California 94022 ("Project Site"). The Project is a 64 foot building that consists of 90 affordable units (24 Studio, 20 one-bedroom, 21 two-bedroom, and 23 three-bedroom) and 90 parking spaces. The Project is seeking a 165% Density Bonus; existing zoning allows for 34 units (rounded up from 33.06) at the Project Site. Based on its proximity to transit, as demonstrated below, state law permits the Project to receive an unlimited increase in density, a height increase up to 33 feet, and no minimum parking requirements.

EAH Housing is requesting the following concessions:

- Reduced front yard setback from 25 feet to 10 feet
- Reduced front side step-back on the 4th and 5th levels
- Reduced average per-unit open space requirement from 50 square feet to 25 square feet
- Reduced EV ready parking stalls from 90 to 9 stalls

EAH Housing is also requesting the following waivers:

- Modification of the requirement for an inner courtyard to be partially visible from the street and linked by a clear accessible path of travel
- Allowance to use wood as a distinct material for the base of the building
- Allowance to locate the solid waste staging area in the public right-of-way

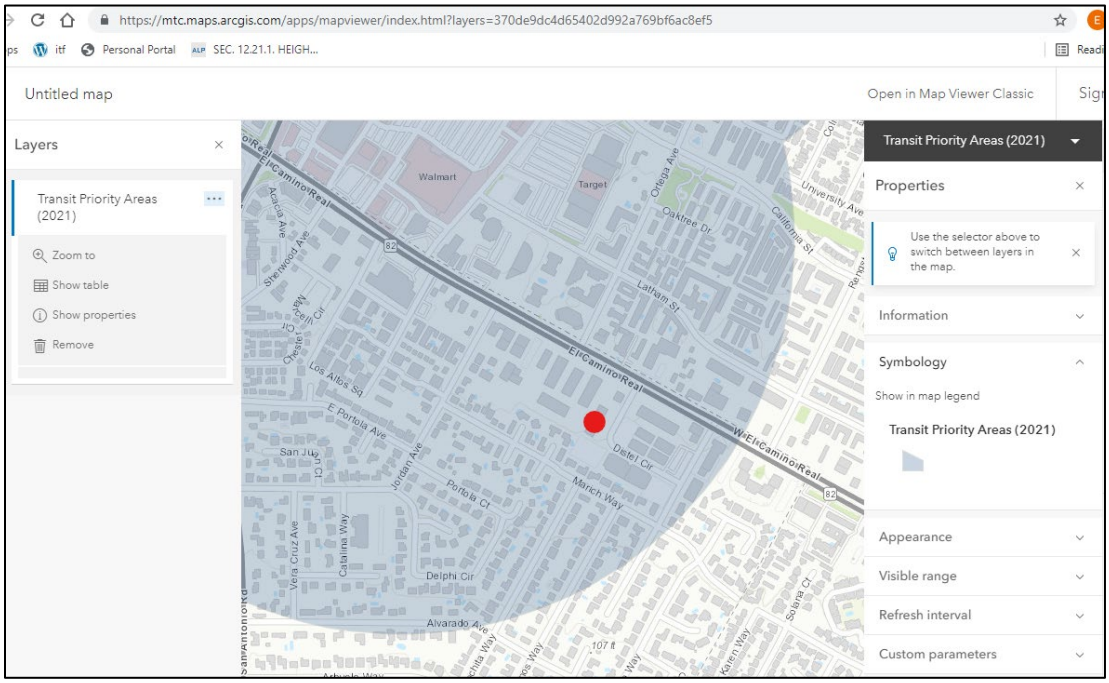
II. THE PROJECT SITE IS WITHIN ONE-HALF MILE OF A MAJOR TRANSIT STOP

For the purpose of state Density Bonus law, codified in Government Code (GOV) section 65195, a major transit stop is defined as existing or planned rail or bus rapid transit (BRT) stations, ferry terminals served by either a bus or rail transit service, and the intersection of two or more bus routes with a

frequency of service interval of fifteen minutes or less during the morning and afternoon peak commute periods. (Public Resources Code (PRC) §§ 21064.3, 21155(b).)[1]

A. Available Resources Identify the Project Site as Being One-Half Mile of a Major Transit Stop

A Transit Priority Area is defined as "an area within one-half mile of a major transit stop that is existing or planned, if the planned stop is scheduled to be completed within the planning horizon included in a Transportation Improvement Program or applicable regional transportation plan." (PRC § 21099(a).) Accordingly, if the Project Site is located in a Transit Priority Area, it is by definition within one-half mile of a major transit stop. The Metropolitan Transportation Commission (MTC), the metropolitan planning organization for the San Francisco Bay Area, identifies the Project Site as being within a Transit Priority Area. The graphic below is taken from the MTC's GIS system, which shades the TPAs in blue; the Project Site is designated by a red dot.



A. A Major Transit Stop is Located at El Camino Real and Showers Drive

Although the MTC identifies the Project Site as being within a Transit Priority Area, it does not identify the major transit stop within one-half mile of the Project Site. Because the Project Site is not within one-half mile of a rail station, ferry terminal, or BRT station,[2] analysis focuses on the intersection of two or more bus routes with requisite service during the peak hour commute periods.

[1] State Density Bonus law treats planned major transit stops as existing major transit stops. Limited analysis was performed on whether major transit stops are planned within one-half mile of the Project Site. Our initial conclusion is that no such transit stops are planned, thus our research focused on existing major transit stops.

[2] Note that the Rapid 522 does not appear to have the elements of BRT service identified in the PRC, such as 1) dedicated bus lanes or a separate right-of-way, 2) transit signal priority, 3) all door boarding,

The statute does not define morning and afternoon peak commute hours, nor does the Los Altos Municipal Code (LAMC) or other City documentation. The Santa Clara Valley Transportation Authority (VTA), the City's transit provider, defines peak hours as "the highest morning or evening hour of travel reported on a transportation network or street." As the Congestion Management Agency for Santa Clara County, the VTA's Guidelines can be considered applicable in the absence of any other City guidance. Typically, peak hours are defined at between 7:00 am and 9:00 am and 4:00 pm and 6:00 pm.

The bus stop at the intersection of El Camino Real and Showers Drive, approximately 1,513 feet from the Project Site, constitutes a major transit stop, as VTA lines 22, 40, and Rapid 522 operate at less than 15 minute intervals between 7:00 am and 9:00 am and 4:00 pm and 6:00 pm, morning and afternoon peak commute periods. A chart demonstrating the bus lines frequency follows.

Northbound/Eastbound				**Southbound*/Westbound**			
Morning Peak Hours (7:00 AM-9:00 AM)		**Afternoon Peak Hours (4:00 PM-6:00 PM)**		**Morning Peak Hours (7:00 AM-9:00 AM)**		**Afternoon Peak Hours (4:00 PM-6:00 PM)**	
Time	**Bus Line**	**Time**	**Bus Line**	**Time**	**Bus Line**	**Time**	**Bus Line**

8:53 AM	522	5:57 PM	40			5:56 PM	40
8:59 AM	22						

4) fare collection system promoting efficiency, and 5) defined stations. (PRC § 21060.2.) Accordingly, the Rapid 522 does not establish a major transit stop in and of itself.

*There are two southbound stops for Line 40 at Latham Street, one is south of Latham Street, approximately a third of the distance to El Camino Real. This stop functionally serves to connect Line 40 to Line 22 and Rapid 522.

II. Consistency with Density Bonus Provisions Based on Proximity to a Major Transit Stop

A. Density Bonus

The LAMC provisions contemplate up to a 50% Density Bonus. (Chapter 14.28, Article 2.) The Government Code also allows for unlimited density for projects that are 100% affordable (at least 80% low income and up to 20% moderate income) and within one-half mile of a major transit stop. (GOV § 65915(f)(3)(D)(ii).) As the Project is a 100% affordable housing project, using Santa Clara County Measure A funding, City of Los Altos fee waivers, and Low Income Housing Tax Credits, and its affordability will be subject to a covenant, it will qualify for unlimited density. Therefore, the 165% Density Bonus is permitted by state law, and is not considered an incentive/concession.

B. Height

Projects that are 100% affordable and within one-half mile of a major transit stop are entitled to a height increase of three additional stories, or 33 feet. (GOV § 65915(d)(2)(D).) The Project is designed to be 64 feet in height, 19 feet greater than the 45 feet allowed in the Commercial Thoroughfare zone. (LAMC § 14.50.140.) However, because the 64 feet would be within the additional 33 feet allowed for by GOV § 65915(d)(2)(D), the Project height is consistent with state law. Per the Government Code, this height increase is not considered an incentive/concession. (GOV § 65915(d)(2)(D).)

C. Parking

The City's Density Bonus law incorporates state parking reductions, which permit a parking standard of .5 parking space per bedroom for affordable housing with unobstructed access to a major transit stop within one-half mile. (LAMC § 14.28.046.) As the Project consists of 159 bedrooms, this provision would require the Project to provide 80 parking spaces. Alternatively, state Density Bonus provisions do not require any parking for 100% affordable projects with unobstructed access to a major transit stop located within one-half mile of the project site. (GOV § 65915(p)(3).) As the Project proposes to include 90 parking spaces, it would satisfy both the state and local requirement. Use of these provisions is not considered an incentive/concession. (GOV § 65915(p)(9), LAMC § 14.28.042.)

D. Incentives, Concessions, and Waivers

Projects that are 100% affordable are entitled to four concessions or incentives. (GOV § 65915(d)(2)(D).) Concession or incentive is defined as "A reduction in site development standards or a modification of zoning code requirements or architectural design requirements…that results in identifiable and actual cost reductions, to provide for affordable housing costs…." (GOV § 65915(k)(1).) The Project seeks four incentives or concessions:

- Reduced front yard setback from 25 feet to 10 feet because implementing the setback would decrease the building area and unit count.

- Reduced front side step-back on the 4th and 5th levels because implementing the stet-back would decrease the building area and unit count.
- Reduced average per-unit open space requirement from 50 square feet to 25 square feet because the existing of a ten foot wide utility easement prevents cantilevered balconies along the Distel frontage. Modifying the units to accommodate additional open space would decrease the building area and unit count.
- Reduced EV ready parking stalls from 90 to 9 stalls because providing 90 EV ready stalls is cost prohibitive.

The City must approve the incentives or concessions, unless the City makes written findings, based upon substantial evidence, of any of the following:

> "(A) The concession or incentive does not result in identifiable and actual cost reductions, consistent with subdivision (k), to provide for affordable housing costs, as defined in Section 50052.5 of the Health and Safety Code, or for rents for the targeted units to be set as specified in subdivision (c).
>
> (B) The concession or incentive would have a specific, adverse impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon public health and safety or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact without rendering the development unaffordable to low-income and moderate-income households.
>
> (C) The concession or incentive would be contrary to state or federal law."
> (GOV § 65915(d)(1).)

No substantial evidence supports denial of the Project based on the above factors. Additional information is provided in the applicant's memo to the City dated July 24, 2022.

EAH Housing may also request waivers, in addition to any incentives or concessions. (LAMC § 14.28.040(H).) The Project is seeking the following waiver:

- Modification of the requirement for an inner courtyard to be partially visible from the street and linked by a clear accessible path of travel because the courtyard has been raised to the second level to accommodate parking on the ground level.
- Allowance to use wood as a distinct material for the base of the building because the prescribed materials would preclude the Project.
- Allowance to locate the solid waste staging area in the public right-of-way because the trash collection company requires that the staging area be within a specified distance from the street. Moving the trash collection area on the site would result in lost amenity space.

The City must approve the waivers only "if the waiver or reduction would have a specific, adverse impact . . . upon health, safety, or the physical environment," would have "an adverse impact" on an historic resource, or "would be contrary to state or federal law." (GOV § 65915(e)(1).) Further, the City may not impose any development standard that would have the effect of physically precluding the construction of the Project. No substantial evidence supports denial of the Project based on the above factors. Additional information is provided in the applicant's memo to the City dated July 24, 2022.

JOINT PLANNING COMMISSION/COMPLETE STREETS COMMISSION MEETING AGENDA

7:00 PM - Thursday, August 18, 2022

via Teleconference

Per California Executive Order N-29-20, the Commission will meet via teleconference only. Members of the Public may call (253) 215-8782 to participate in the conference call (Meeting ID: 831 9438 7650 and Passcode: 538635 or via the web at https://tinyurl.com/y6unt9hs or https://losaltosca-gov.zoom.us/j/83194387650?pwd=VDMybmhuS09KaWVmUjdyakRZUzdVdz09&from=addon). Public testimony will be taken at the direction of the Chair and members of the public may only comment during times allotted for public comments. Members of the public are also encouraged to submit written testimony prior to the meeting at PCPublicComment@losaltosca.gov. Emails received prior to the meeting will be included in the public record.

ESTABLISH QUORUM

ITEMS FOR CONSIDERATION/ACTION

CONSENT CALENDAR

1. **Planning Commission Minutes**
   Approve minutes of the regular meeting of July 21, 2022.

PUBLIC HEARING

2. **D22-0002 – EAH Housing – 330 Distel Circle**
   Multiple-Family Design Review and Conditional Use Permit for a new multiple-family development with a five-story building with 90 condominium units for rent along 330 Distel Circle with mechanized parking system and amenity space on the first floor. The proposal is for a 100% affordable housing project seeking a density bonus which allows increased height and reducing parking ratios with development incentives including step-back reduction, reduced courtyard visibility and base material to be wood for the design review approval. The project is categorically exempt from environmental review pursuant to Section 15332 (Class 32), Infill Exemption of the California Environmental Quality Act (CEQA) Guidelines. *Project Planner: Hayagreev*

COMMISSIONERS' REPORTS AND COMMENTS

POTENTIAL FUTURE AGENDA ITEMS

ADJOURNMENT

SPECIAL NOTICES TO PUBLIC

In compliance with the Americans with Disabilities Act, the City of Los Altos will make reasonable arrangements to ensure accessibility to this meeting. If you need special assistance to participate in this meeting, please contact the City Clerk 72 hours prior to the meeting at (650) 947-2720. Agendas, Staff Reports and some associated documents for Planning Commission items may be viewed on the Internet at *http://www.losaltosca.gov/citycouncil/online/index.html*. Commission Meetings are televised live and rebroadcast on Cable Channel 26. On occasion the Planning Commission may consider agenda items out of order. All public records relating to an open session item on this agenda, which are not exempt from disclosure pursuant to the California Public Records Act, and that are distributed to a majority of the legislative body, will be available for public inspection at the Office of the City Clerk's Office, City of Los Altos, located at One North San Antonio Road, Los Altos, California at the same time that the public records are distributed or made available to the legislative body. If you wish to provide written materials, please provide the Community Development Department with 10 copies of any document that you would like to submit to the Planning Commission for the public record. If you challenge any planning or land use decision made at this meeting in court, you may be limited to raising only those issues you or someone else raised at the public hearing held at this meeting, or in written correspondence delivered to the Planning Commission at, or prior to, the public hearing. Please take notice that the time within which to seek judicial review of any final administrative determination reached at this meeting is governed by Section 1094.6 of the California Code of Civil Procedure. For other questions regarding the Planning Commission meeting proceedings, please contact the Community Development Department at (650) 947-2750.

PLANNING COMMISSION MEETING MINUTES

7:00 PM - Thursday, July 21, 2022

Telephone/Video Conference Only

CALL MEETING TO ORDER

At 7:02 p.m. Chair Doran called the meeting to order.

ESTABLISH QUORUM

PRESENT:	Chair Doran, Vice-Chair Mensinger, Commissioners Ahi (joined the meeting at approximately 7:18 PM), Bodner, Marek, and Roche
ABSENT:	Commissioners Steinle
STAFF:	Development Services Director Zornes, City Attorney Houston, Interim Planning Services Manager Golden, and Consulting Senior Planner Hayagreev

PUBLIC COMMENTS ON ITEMS NOT ON THE AGENDA

None.

ITEMS FOR CONSIDERATION/ACTION

CONSENT CALENDAR

1. **Planning Commission Minutes**
   Approve minutes of the regular meeting of July 7, 2022.

Action: Upon motion by Vice-Chair Mensinger, seconded by Commissioner Roche, the Commission recommended approval of the minutes from the July 7, 2022 Regular Meeting as written.
The motion was approved (5-0) by the following vote:
AYES: Chair Doran, Vice-Chair Mensinger, Commissioners Bodner, and Roche
NOES: None
ABSENT: Commissioners Ahi and Steinle

PUBLIC HEARING

2. **D22-0002 – EAH Housing – 330 Distel Circle**
   Multiple-Family Design Review and Conditional Use Permit for a new multiple-family development with a five-story building with 90 condominium units for rent along 330 Distel Circle with 90 parking spaces utilizing a mechanized parking system and a common amenity space on the first floor. The proposal is for a 100% affordable housing project and is eligible for a density bonus, development incentives, and development waivers under state law and city ordinance. The project is categorically exempt from environmental review pursuant to Section 15332 (Class 32), Infill Exemption of the California Environmental Quality Act (CEQA) Guidelines. *Project Planner: Hayagreev* This item has been removed from the agenda. The item will be re-noticed for a future meeting.

3. **19-D-01, 19-UP-01 and 19-SD-01 – Gregory and Angela Galatolo – 4350 El Camino Real**
Multiple-Family Design Review, Conditional Use Permit and Tentative Subdivision map for a new multiple-family development with a five-story building with 47 condominium units along El Camino Real with two levels of underground parking. The proposal includes seven affordable units with four moderate-income units and three very-low-income units, and a density bonus with development incentives to allow for increased building height and a reduced parking aisle width. A Mitigated Negative Declaration with Mitigation Monitoring and Reporting Program in compliance with the California Environmental Quality Act (CEQA) will be considered. *Project Planner: Hayagreev* THIS ITEM WAS CONTINUED FROM THE JUNE 16, 2022 PC MEETING DUE TO LACK OF A QUORUM.

STAFF PRESENTATION
Consulting Senior Planner Hayagreev gave the staff presentation.

COMMISSIONER QUESTIONS
None.

COMMISSIONER AHI JOINED THE MEETING AT APPROXIMATELY 7:18 PM.

APPLICANT PRESENTATION
Applicant Angela Galatolo introduced project architect Alex Seidel and David Kornfield, project planner. Both provided presentations.

Applicant requested changes to the following conditions:

- Reword Condition No. 27 to add a beginning phrase referring to the list of "items the plans shall include" (Prior to Building Permit Condition).
- Reword Condition 27.6 to omit the sentence "Replace existing shelter with a new VTA standard shelter (17-foot Full Back with Ad panel) consistent with VTA direction" for consistency with VTA approval to allow a bench or custom architectural enclosure.
- Reword Condition No. 45 to omit the requirement to rebuild an off-site ADA ramp at the southwest corner of the intersection – no nexus.

COMMISSIONER QUESTIONS
Vice-Chair Mensinger asked questions about the BMR unit distribution proposed by staff. These were accepted by applicant. She then asked a clarifying parking question.

David Kornfield, project planner and project architect Alex Seidel responded.

Regarding Condition 27.6, Interim Planning Services Manager Golden said staff is amenable to change the language to allow an alternative design at the discretion and approval of the Valley Transportation Authority.

Regarding Condition 45, Interim Planning Services Manager Golden responded that in general, the entire facility is typically improved when a crosswalk or ramp on either side is improved, but will be reviewed further with the Engineering Division.

PUBLIC COMMENT
None.

Chair Doran closed the Public Comment period and Commission discussion proceeded.

Action: Upon motion by Chair Doran, seconded by Commissioner Roche, the Commission moved to recommend approval of the Mitigated Negative Declaration to the City Council and recommend approval to the City Council of Multiple-Family Design Review, Conditional Use Permit and Tentative Subdivision map applications 19-D-01, 19-UP-01 and 19-SD-01 subject to the staff report findings and conditions with staff's revised comments and with the following change:

- Modify Condition 27.6 to revise the language to install the bus shelter per Valley Transportation Authority (VTA) standards (17-foot Full Back with Ad Panel) or an alternative proposed design by the Applicant as acceptable, and at the discretion of VTA.

The motions were approved (6-0) by the following vote:
AYES: Chair Doran, Vice-Chair Mensinger, Commissioners Ahi, Bodner, Marek and Roche
NOES: None
ABSENT: Commissioner Steinle

COMMISSIONERS' REPORTS AND COMMENTS

City Attorney Houston mentioned a webinar training for the Planning Commissioners taking place tomorrow, July 22nd.

Development Services Director Zornes noted that the 30-day public comment period for the Housing Element Update was closing at midnight this Sunday, July 24, 2022.

POTENTIAL FUTURE AGENDA ITEMS

None.

ADJOURNMENT

Chair Doran adjourned the meeting at 8:10 PM.

Steve Golden
Interim Planning Services Manager

DATE: AUGUST 18, 2022

Agenda Item # 2

RECOMMENDATION

Recommend to the City Council approval of Multiple-Family Design Review (application D22-0002) and Conditional Use Permit (application CUP22-0001) with a Density Bonus and Development Incentives and Development Waivers for a 90-unit residential development at 330 Distel Circle per the findings and conditions contained in the resolution.

Recommend the City Council consider the Project categorically exempt from environmental review pursuant to Section 15332 (Class 32), Infill Exemption of the California Environmental Quality Act (CEQA) Guidelines.

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

ENVIRONMENTAL REVIEW

To conform with the California Environmental Quality Act (CEQA) requirements, the City of Los Altos has made findings that the proposed project on 330 Distel Circle is categorically exempt from environmental review pursuant to Section 15332 (Class 32), Infill Exemption of the California Environmental Quality Act (CEQA) Guidelines and that the proposed project will not have a significant effect on the environment.

The development proposal is consistent with the General Plan and Zoning Ordinance, as set forth in this staff report; does not result in any significant effects related to traffic, noise, air or water quality; is adequately served by all required utilities and public services; and none of the exceptions stated in CEQA Guidelines Section 15300.2 to applicability of the exemption applies. A Notice of Exemption (NOE) has been prepared, as referenced in Attachment B. Exhibit B1 has the technical analyses and reports to support the Notice of Exemption.

PROJECT DESCRIPTION

The project site (APN 170-04-051) is approximately 0.87-acres located at 330 Distel Circle at the western area of Distel Circle. The project site is designated Thoroughfare Commercial (TC) in the General Plan and zoned Commercial Thoroughfare (CT). The site is currently developed with an approximately 12,120 square foot, single-story office building with perimeter landscaping including twenty-seven trees, and surface parking. The project would demolish the existing office building, remove nineteen trees that would be impacted by the new development and preserve the remaining eight trees, and remove of the surface parking lot to construct a newbuilding and associated improvements.

The proposed project (Project) includes a five-story apartment building with 90 rental units, all of which are proposed to be affordable (100 percent affordable project). The first/ground floor is comprised of only common building amenities with no residential units and will be mass timber construction. Parking will be provided at the ground-level in a podium parking garage containing a total of 90 vehicle parking spaces that includes eight at grade parking spaces and 82 parking spaces on a mechanical parking lift system. The ground floor also contains a common amenity space, tenant administrative offices, tenant coworking space, trash collection and sorting room, a bike locker room for 45 bicycles, and other common amenities. The upper floors constructed on top of the mass timber system will be constructed using a modular unit system that are manufactured off-site and assembled on-site.

The second floor has a 5,530 square-foot common open space courtyard. The upper four floors consist of a total of ninety (90) residential units. The unit distribution is twenty-four (24) studio units,

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

twenty (20) one-bedroom units, twenty-three (23) two-bedroom units, and twenty-three (23) three-bedroom units. A complete set of design plans including site and landscape plans, architectural plans, and engineering plans are included in Attachment M. An arborist report (Attachment H) includes a detailed assessment of the trees and describes the disposition of tree preservation or removal and tree preservation guidelines for the eight trees which are proposed to be preserved on site.

The following table summarizes the project's technical details and comparison to objective development standards.

Table 1 Development Standards

	Standard (in CT zone)	Proposed	Complies	Notes
General Plan	Thoroughfare Commercial (TC)	Residential	Yes.	Per Table LU-1 of the General Plan, the TC land use designation can accommodate mixed-use projects and affordable residential projects.
Zoning	Commercial Thoroughfare (CT)	Residential	Yes	Per LAMC 14.50.040 K. Multiple-family housing requires a Conditional Use Permit
Density	38 du/acre	104 du/acre	Yes, when the density bonus to which the project is entitled is applied.	LAMC – 14.28.040
Lot Size	38,050 sq. Ft. (0.87 acres)			
Units	31	90	Yes, project site is within one-half mile	Applying Density bonus provisions. Pursuant to Gov.

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

	Standard (in CT zone)	Proposed	Complies	Notes
			of a major transit stop.	Code, § 65915, subd. (f)(3)(D)(ii)
Site Area	Min 20,000 sq. Ft. Frontage 75ft.	38,050 sq. Ft and 222'-6"	Yes	Per LAMC 14.50.070
Height	45ft	64' 6"	Yes, applying State Density bonus Law Provisions	Per State Density Bonus Law provisions, height increase for affordable housing projects can be over 3 stories or 33ft above max. allowed height.
Height of Ground Floor commercial / mixed-use structures	12ft minimum	14' 6"	Yes	
Front Setback	25ft	10ft	Yes, if the requested concession is granted.	Concession-1 requested
Front Setback Landscaping	50% landscaped	More than 50% landscape with entry planter boxes	Yes	
Side Setback	Average 7'- 6"	10'-11"	Yes	
Rear Setback	0ft.	11'-0"	Yes	Complies. Parcel adjoins CT and OA-1 Zone

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

	Standard (in CT zone)	Proposed	Complies	Notes
Private Open Space	Not required for every unit, average 50 sq. Ft. shall be provided for the total number of dwelling units. For 90 units 4,500 sq. ft	25 sq. Ft. Average 2,550 sq. ft.	Yes, if the requested concession is granted.	Concession-2 requested
Common Open Space	3200 sq. Ft.	5,530 sq. ft.	Yes	
Parking alternative Standard (LAMC 14.28.040 G)	If 14.28.040 G (2)b - on-menu alternate standard - ½ mile from transit = 45 parking spaces.	90	Yes	Per State Density Bonus Law, affordable housing projects within 1/2 mile from a major transit stop can avail parking exemptions.
Bicycle Parking	1 Class I (Bike Locker) for every 3 units (30 required)	45	Yes	
	1 Class II (Bike Rack) for every 15 units (6 required)	10	Yes	Sheet L1.1 of Attachment-E
Loading spaces	1 truck loading space	1	Yes	Sheet L1.1 of Attachment-E

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

	Standard (in CT zone)	Proposed	Complies	Notes
Width of driveway	One way – 12ft Two-way drive min – 18ft	23ft	Yes	Sheet A2.1 of Attachment-E
Design Control Standards (LAMC 14.50.170) and Required Conditions of CT District (LAMC 14.50.060) are detailed in Attachment G-Objective Design Standard Conformance Matrix.				
Design Control 14.50.170 B (1) Building Massing and articulation. Upper Story Step-Back	Min 10ft from ground floor façade for stories above 45ft in height (top story)	No step back	Yes, if the requested concession is granted.	Concession-3 requested
Design Control 14.50.170 C (5) a. Building Design. Interior Courtyard.	Interior courtyard must be partially visible from the street and linked to the street by a clear accessible path of travel	Raised courtyard on level 2 not visible from the street. Access to courtyard and exit via stair.	Yes, if the requested waiver is granted.	Waiver-1
Design Control 14.50.170 D (4) a. Materials. Materials Defining Building Elements.	For multistory elements, the base of the building shall be defined by a distinct material selected from among the following: stone, brick, concrete, CMU, or stucco ("base material")	Wood serves as a distinct base material	Yes, if the requested waiver is granted.	Waiver-2

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

	Standard (in CT zone)	Proposed	Complies	Notes
CT required conditions 14.50.0t60 C. 2. Access and screening of refuse collection	Every development will be required to provide suitable space on-site for solid waste separation, collection, storage and pick up and shall site these in locations that facilitate access, collection, and minimize any negative impact on persons occupying the development site, neighboring properties, or public right-of-way	Solid waste separation, collection and storage are on-site, but the pickup is proposed to be in the service staging area on the public right-of-way	Yes, if the requested waiver is granted.	Waiver -3

The project is consistent with the objective design standards for the CT zone of the Los Altos Zoning Code if the requested concessions/waivers are granted, as noted in Table 1 above. Additional details with all design control standards is available in Attachment G.

BACKGROUND

The City of Los Altos is partnering with the County of Santa Clara for this proposed 100 percent affordable housing project. A Memorandum of Understanding (MOU) was executed between the City and County on January 28, 2021, memorializing the expected purchase agreement by the County for the property from Midpeninsula Open Space District and the commitment to develop a 90-unit affordable housing project with certain affordability levels and the City's commitment to waive 100 percent of the project's development impact fees. Since January 2021, the project Applicant, EAH Housing has conducted a series of community outreach meetings to receive the community's feedback, submitted a Preliminary SB 330 application, and received feedback from the Planning Commission during a Pre-application Project Review study session that is summarized below.

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

The City's webpage has an archive of the community outreach efforts along with the supporting documents, link here -https://www.losaltosca.gov/communitydevelopment/page/330-distel-circle

The Applicant conducted several community meetings, both virtually and in-person to share details of and to receive feedback from the community to inform the completion of their design. One significant change to the design resulted from community input for voluntary inclusion of parking within the project[1] which now provides 90 parking stalls.

The community outreach meetings that were conducted for the project are as follows:

January 27, 2021	Virtual Community Meeting #1
February 11, 2021	Virtual Community Meeting #2
May 13, 2021	Affordable Housing Tour
August 12, 2021	Virtual Community Meeting #3
September 9, 2021	Virtual Community Meeting #4
September 20, 2021	Open House

Planning Commission Study Session

On October 21, 2021, the Applicant submitted an SB 330 Preliminary application that also served as a Pre-Application Design Review application that is typically reviewed by the Planning Commission only, but since this is a city sponsored project, the City Council was also included in the Pre-Application review to obtain their early feedback to inform the completion of the design. On January 11, 2022, the Planning Commission and City Council held a joint study session. The project received significant support from community members and appointed and elected officials. A number of public commenters and city officials also expressed an interest in expediting the formal review process since it is a 100 percent affordable project. Additionally, at this meeting, the applicant received suggestions to consider improving the design and address concerns by members of the community and city officials. A detailed summary of the comments can be found in the joint meeting minutes in Attachment I.

[1] As discussed further in the document, since the project is 100 percent affordable, it is exempt from providing parking pursuant to State Density Bonus Law.

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

SB 330 - Joint Complete Streets Commission and Planning Commission Meeting
Development project applications submitted after January 1, 2020, are subject to SB 330, the Housing Crisis Act of 2019. To be consistent with California Government Code Section 65905.5(a). the city is limited to no more than five hearings to make an approval determination of the proposed housing development project. The application was submitted on March 3, 2020; therefore, the project is subject to the maximum five hearing limitation. One public hearing was already conducted on March 22, 2022, for the Applicant's request to the City Council for an exemption to the requirement for the installation of story poles pursuant to the Council's Open Government Policy.

Pursuant to Section 14.78.090 of the Zoning Code, multiple-family residential development projects are subject to a multi-modal transportation review hearing by the Complete Streets Commission (CSC) and recommendation to the Planning Commission (PC) and City Council. Pursuant to Section 14.78.020(C), the PC shall review development project applications at a public hearing and provide a recommendation to the City Council. To reduce the total number of hearings, the Los Altos City Council directed staff and commissions to hold a joint CSC/PC meeting to provide joint recommendation to the City Council. As specified by the Zoning Code, the CSC is tasked with reviewing the bicycle, pedestrian, parking, and traffic elements of a development application. Prior to consideration by the City Council, the PC completes a more comprehensive development review of the application and provides a recommendation to the City Council. This agenda report combines information addressing both the CSC's multi-modal transportation review and the PC's comprehensive review of the development project.

Story Pole Exemption
On March 22, 2022, the City Council approved an exemption to the story pole installation for this development project. As an alternative, the Applicant was required to install additional billboard signs which included an additional 3D rendering of the proposed project from the residential neighborhood on Marich Way. The billboard signs including the additional 3D rendering were installed per the approved plans on May 12th as verified by staff. Per the story pole policy, the requirement is for the story poles to remain installed 30days prior to any public hearing approval. Refer to Attachment B for details of the installed poles and compliance provided by the applicant.

DISCUSSION/ANALYSIS
This section includes discussion and analysis for review and consideration for approving this project including General Plan Conformance, Density Bonus and Affordable Housing, Design Review, Conditional Use Permit, Multi-modal Transportation Analysis, and the Environmental Review.

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

Los Altos General Plan Conformance

The General Plan contains goals and policies for the El Camino Real Corridor under the Special Planning Area in the Land Use Element, Community Design and Historic Resources Element, Housing Element and Economic Development Element. Together these elements discourage exclusive office use, promotes inclusion of residential development, encourages affordable housing projects, increases height for residential development, intensifies development along the El Camino Real Corridor, and provides streetscape improvements and pedestrian friendly streetscape designs. The proposed project is generally consistent with the following goals and objectives of the General Plan that are envisioned for the neighborhood around El Camino Real Corridor.

Community Design and Historic Resources Element

Goal 4 Policy 4.3: Evaluate development applications to ensure compatibility with neighborhoods south of the corridor.

Land Use Element

Goal 4 Improve the land use mix along El Camino Real to ensure fiscal stability, encourage affordable housing, and to allow for development intensification along this corridor in a manner that is compatible with the adjacent residential neighborhoods and the local circulation system.

Goal 4 Policy 4.3 Encourage residential development on appropriate sites within the El Camino Real corridor.

Goal 4 policy 4.4 Encourage the development of affordable housing.

Housing Element

Housing Element Policy 2.1 The City will maintain zoning that provides for a range of housing sizes and residential densities.

Housing Element Goal 4 Allow a variety of housing densities and types in appropriate locations to accommodate housing needs at all income categories.

Housing Element Program 4.3.4 Continue to encourage maximum densities.

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

State Density Bonus Provisions and Affordable Housing The proposed 90-unit residential project is a 100 percent affordable project exclusive of two manager units. As such, pursuant to State Density Bonus Law and the Los Altos Density Bonus (Chapter 14.28, Article 2), the project is eligible for a density bonus, development incentives, and eliminates the parking requirements that would otherwise be required in compliance with the zoning code. Per the Commercial Thoroughfare (CT) zoning district standards (Section 14.50.080 LAMC), the maximum permitted residential density shall be 38 dwelling units per net acre which would allow up to a maximum of 33 units on the project site. With density bonus, there is no maximum density limitation since 100 percent of the housing units will be affordable and the project is located within one-half mile of a major transit stop. (Table D of the Appendix to the Affordable Housing Ordinance (Chapter 14.28 LAMC) and State Density Bonus (Government Code Section 65915 (f)(3)(D)(ii).

Per State Density Bonus Law Section 65915(o)(4) "major transit stop" has the same meaning as defined in subdivision (b) of Section 21155 of the Public Resources Code, and pursuant to subdivision (b) of Section 21155 of the Public Resources Code, among other definitions a "major transit stop" also includes a "major transit stop" as defined in Section 21064.3 of the Public Resources Code. And finally, per Section 21064.3 (a) of the Public Resources Code, a "major transit stop" includes an existing rail or bus rapid transit station.

The project site is 0.4 miles to a major transit bus stop at El Camino Real and Showers Drive since VTA Rapid line 522 makes a stop at this location (also see page 1-3 of Attachment D1); therefore, the project is within one-half mile of a major transit stop as defined in the State Density Bonus Law and is eligible for unlimited density.

Unit Distribution and Affordability Rates. The proposed project has eighty-eight below market rate units and two market rate units utilized as manager's units.

The table below provides the proposed unit distribution and affordability rates of each unit. All units except the two manager's units will fall within one of the following affordability levels: less than 80% AMI indicates Low Income units (LI), 50% AMI indicated Very Low-income housing (VLI), 30% or lesser AMI indicates Extremely Low-income units (ELI).

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

Unit Mix – 330 Distel		AMI					
	SQFT PU	30%	50%	60%	80%	Unit Total	Unit Mix
SRO/Efficiency	465	14	3	7	-	24	27%
1-BR	645	9	3	7	1	20	22%
2-BR	965	12	3	4	2	21	23%
3-BR	1140	10	3	7	3	23	26%
4-BR	0	-	-	-	-	-	0%
MGR	965					2	2%
Unit Total		45	12	25	6	**90**	100%
Affordability Dist.		50%	13%	28%	7%	100%	
Average Affordability	**44.66%**						

Density Bonus, Development Concessions, and Waivers

Per State Density Bonus Law and the Los Altos Density Bonus Ordinance (Chapter 12.28 LAMC, Article 2), projects providing 100 percent affordable units including total units and density bonus units, exclusive of manager's units, are entitled to four development concessions. The table below summarizes the four concessions requested by the applicant that are detailed further in the applicant's submitted Density Bonus report (Attachment D and D1) including the project's eligibility for the density bonus allowances, the concession and waiver requests and justification for the requests.

Table 4: Concessions and Waivers

	Standard (in CT zone)	**Proposed**	**Concessions and Waivers**
Front Setback LAMC 14.50.090	25ft	10ft	Concession -1
Private Open Space LAMC 14.50.150	Not required for every unit, average 50 sq. Ft. shall be provided for the total number of dwelling units. For 90 units 4,500 sq. ft	25 sq. Ft. Average 2,550 sq. ft.	Concession - 2

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

Design Control 14.50.170 B (1) Building Massing and articulation. Upper Story Step-Back	Min 10ft from ground floor façade for stories above 45ft in height (top story)	No step back	Concesssion-3
Reduced Standards for Los Altos REACH codes for EV Ready charging points for affordable housing projects to meet reduced requirement which is 10% EV2 ready spaces of total of 9 spaces in total.	EV2 ready spaces – 9 EV1 ready spaces – 81	Meets affordable housing 10% EV2 ready spaces. (2019 code) Proposed EV2 ready - 9	Concession – 4

Requested Concessions

All requested concessions in the proposed project are off-menu concessions per the Los Altos Density Bonus

Pursuant to Govt Code Section 65915(d)(1), A concession request must be granted unless the City Council is able to make one of the following findings:

1. The concession requested will not result in an identifiable and actual cost reduction to provide for affordable housing cost; or
2. Granting the concession would violate federal or state law; or
3. Granting the concession would have a specific, adverse impact on public health or safety that cannot be mitigated feasibly, or on real property listed in the California Register of Historic Resources.

Concession #1**:** To reduce the front yard setback to 10 feet whereas a standard front setback of 25 feet for the CT zoning district is required per Section 14.50.090 (LAMC).
The standard requirement of 25-foot setback would reduce the proposed building footprint and floor area and thereby reduce the unit count.

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

Finding 1: The concession requested will not result in an identifiable and actual cost reduction to provide for affordable housing cost.

> Staff review: *This finding cannot be made* because reducing the setback increases the floor area and number of affordable housing unit thereby lowering the per-unit soft cost for the project. For example, if the soft costs for providing 90 units is $3 million, the per unit cost is $33,333. If the project complies with the 25-foot setback requirement and can accommodate only 60 units, the per unit soft cost would be $60,000. A conforming project without the benefit of the development concessions would result in a project with less units and therefore higher development costs per unit.

Finding 2: Granting the concession would violate federal or state law; or

> Staff review: *This finding cannot be made* since granting the reduced step back would not violate federal or state law.

Finding 3: Granting the concession would have a specific, adverse impact on public health or safety that cannot be mitigated feasibly, or on real property listed in the California Register of Historic Resources.

> Staff review: *This finding cannot be made* because the project site is not listed in the California Register of Historic Resources. The project setback reduction will not have a specific, adverse impact on the public health or safety as determined by the CEQA categorical exemption for environmental impact analysis reports.

Concession #2: To reduce the private open space requirement to an average 28 square feet whereas an average of 50 square feet of open space is required in the CT zoning district per Section 14.50.150 (LAMC).

The front setback has a ten-foot public utility easement which prevents any cantilever balconies. Customizing the modular units to have a recessed balcony/deck bay would decrease the livable area of the unit size and potentially decrease the unit count, and likely increase the construction cost due to customization of modular units. The Applicant cites that the proposal mitigates the reduced private open space by providing more common open space in the second-floor courtyard.

Finding 1: The concession requested will not result in an identifiable and actual cost reduction to provide for affordable housing cost.

Staff Review: *This finding cannot be made.* The concession of reduced private balcony space for units in the front setback area is to accommodate the 10ft easement. Customizing the modular units to have a recessed balcony/deck bay would decrease the livable area of individual units and potentially decrease the unit count, and likely increase the construction cost due to customization of the modular units. The reduction in private open space would also allow construction of the project at the highest possible density and provide more affordable housing and reduce identifiable soft costs per unit.

Finding 2: Granting the concession would violate federal or state law; or

Staff Review: *This finding cannot be made.* Granting reduced private open space does not violate federal or state law.

Finding 3: Granting the concession would have a specific, adverse impact on public health or safety that cannot be mitigated feasibly, or on real property listed in the California Register of Historic Resources.

Staff review: *This finding cannot be made.* From the studies conducted for air quality, noise impacts under the CEQA requirement, this reduced private open space does not create significant impact on the public health and safety. The project site is not listed in the California Register of Historic Resources.

Concession #3: To eliminate the 10-foot upper story step-back from the ground floor façade for stories above 45 feet in height as required in the CT Zoning District per Section 14.50.170.B.1 (LAMC).

The elimination of the upper story step back requirement allows for more building area and therefore more units within the allowable height limits.

Finding 1: The concession requested will not result in an identifiable and actual cost reduction to provide for affordable housing cost.

Staff review: *This finding cannot be made*. Elimination of the step back increases the floor area and number of units, which in turn reduces the soft costs for each unit. The step back provision would require customization of the modular units which increases costs; therefore, eliminating the step back provision reduces the customization of the units thereby reducing construction costs.
Granting the step back concession results in identifiable cost savings per unit.

Finding 2: Granting the concession would violate federal or state law; or

> Staff review: *This finding cannot be made* since granting the reduced step back would not violate federal or state law.

Finding 3: Granting the concession would have a specific, adverse impact on public health or safety that cannot be mitigated feasibly, or on real property listed in the California Register of Historic Resources.

> Staff review: *This finding cannot be made* because the project site is not listed in the California Register of Historic Resources. The project step back reduction will not have a specific, adverse impact on the public health or safety as determined by the CEQA categorical exemption for environmental impact analysis reports.

Concession #4**:** To eliminate the required electric vehicle parking requirements provided in the City's adopted REACH Codes per Section 4.106.4.2 (as the same may be renumbered or amended from time to time)

Electric vehicle (EV) parking requirements are required under the California Building Standards Code (Building Code) and the city has increased the requirements for EV parking under the city's adopted REACH codes. The REACH codes are the city's local amendment to the Building Code and under State Density Bonus Law, a developer cannot receive a development concession for a requirement under state law; therefore, the standards under the Building Code and more specifically the mandatory measures for EV parking under the California Green Building Standards Code would still apply.

Additionally, although the project is eligible to eliminate all parking spaces under State Density Bonus Laws because it is a 100% affordable housing project within one-half mile of a major transit stop, since the project is providing parking, the project is required to provide the minimum standards pursuant to the Building Codes and REACH code. Currently, Section 4.106.4.2 of the Los Altos Municipal Code requires for all multifamily affordable housing projects, a minimum of 10 percent of the dwelling units with parking space(s) shall be provided with at least one Level 2 EV Ready space and the remaining dwelling units with parking space(s) shall each be provided with at least one Level 1 EV ready space. For the 90 parking spaces being provided, nine spaces would be required to be Level 2 EV ready and 81 spaces Level 1 ready. Absent of the REACH codes, the California Green Building Standards (Cal Green) (adopted as part of the Building Code) requires 10 percent of the parking spaces be EV ready. The applicant has submitted information that the estimated cost for EV ready improvements is approximately $1,000 per space or an additional $81,000 for the additional 81 EV ready parking spaces under the REACH code.

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

Please be advised that compliance review with the EV parking requirement is determined with the building permit and similar to other Building Code compliance requirements, the requirement that is in effect at the time of Building Permit submittal is the effective requirement. Therefore, the city can approve a concession to eliminate the REACH code EV parking requirement, but the number of EV parking spaces would still need to comply with the requirements of the Building Code (Cal Green) that are in effect at the time of building permit submittal. The city has made the applicant aware of changes to the Cal Green EV parking standards that become effective with the 2022 Building Code adoption cycle.

Finding 1: The concession requested will not result in an identifiable and actual cost reduction to provide for affordable housing cost.

> Staff review: *This finding cannot be made*. The elimination of additional EV ready spaces would result in lowering the cost of installing the infrastructure of the EV equipment detailed above which reduces the overall costs of building the affordable units.

Finding 2: Granting the concession would violate federal or state law; or

> Staff review: *This finding cannot be made* since eliminating the REACH code requirement for providing the EV parking is a local amendment to the Green Building Standards. The project would still need to comply with the requirement of the State Building Standards that are in effect at the time of Building Permit submittal.

Finding 3: Granting the concession would have a specific, adverse impact on public health or safety that cannot be mitigated feasibly, or on real property listed in the California Register of Historic Resources.

Staff review: *This finding cannot be made* because the project site is not listed in the California Register of Historic Resources. Granting the local EV Ready requirement elimination does not adversely impact the public health or safety.

In summary, the first three of the concessions would facilitate construction at a higher density, which will reduce soft costs per unit, and the fourth concession for relief from the city's EV parking requirements would reduce direct project costs. A conforming project without the benefit of the development concessions would result in a project with less floor area and units and therefore higher soft costs per unit.

Additionally, the applicant states that as a 100 percent affordable project, the higher cost per unit makes this a less competitive project when trying to leverage additional funds at the State and Federal level.

Requested Waivers

In addition to requesting concessions, density bonus projects are typically eligible for waivers of any development standards that would physically preclude the construction of a project with the density bonus and the incentives or concessions to which the development is entitled; however, per State Density Bonus Laws, development waivers are optional for 100 percent affordable projects within one-half mile of a major transit stop since the project is entitled up to a 33-foot building height increase and are at the discretion of city council approval.

	Standard (in CT zone)	**Proposed**	**Waivers**
Design Control 14.50.170 C (5) a. Building Design. Interior Courtyard.	Interior courtyard must be partially visible from the street and linked to the street by a clear accessible path of travel	Raised courtyard on level 2 not visible from the street. Access to courtyard and exit via stair.	Waiver-1
Design Control 14.50.170 D (4) a. Materials. Materials Defining Building Elements.	For multistory elements, the base of the building shall be defined by a distinct material selected from among the following: stone, brick, concrete, CMU, or stucco ("base material")	Wood serves as a distinct material	Waiver-2
CT required conditions 14.50.060 C. 2. Access and screening of refuse collection	Every development will be required to provide suitable space on-site for solid waste separation, collection, storage and pick up and shall site these in locations that	Solid waste separation, collection and storage are on-site, but the pickup is proposed to be in the service staging area	Waiver-3

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

	facilitate access, collection, and minimize any negative impact on persons occupying the development site, neighboring properties, or public right-of-way	on the public right-of-way	

The applicant has requested three waivers that are necessary to the project as proposed. Because the project is a 100 percent affordable project, exclusive of the managers units, with 63 percent of the units for Very-Low and Extremely Low Income households, and because the City is a co-sponsor of the project and the project will help the City meet Regional Housing Needs Allocation (RHNA) targets at multiple affordability levels, staff recommends granting the optional waivers.

A waiver cannot be granted if doing so would have violate state or federal law or if the waiver would have a specific, adverse impact on public health or safety that cannot be mitigated feasibly, or on real property listed in the California Register of Historic Resources. Also, ordinarily an applicant must demonstrate that not granting the waiver would physically preclude the applicant from constructing a project that the applicant wants to construct at the allowed density and with the concessions granted. Because the waivers requested here are optional and no density limit applies to the project, other relevant factors may be considered. These factors may include, for example, the ability to provide parking even though no parking is required for the project (as discussed below), the desire otherwise to maximize the use of the site for affordable housing or to provide suitable amenities and services to residents, cost savings for affordable housing (like with a concession), the inability to achieve a concession or to realize its cost saving benefits without a waiver, or flexibility to achieve a superior design.

Waiver #1: No visibility and direct access to street from the second-floor interior courtyard whereas Design Control Section 14.50.170 C (5) (a) of the CT zoning district requires for interior courtyards partially visible from the street and linked to the street by a clear accessible path of travel visibility from street and lined to the street by a clear accessible path of travel to propose no visibility pursuant to Design Control

In the proposed design, the street frontage includes common amenity space and the parking garage which are suitable amenities and services provided to residents making the private courtyard raised to the second floor and surrounded by residential units, making it a private amenity for the residents.

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

Findings: A waiver cannot be granted if doing would have violate state or federal law or if the waiver would have a specific, adverse impact on public health or safety that cannot be mitigated feasibly, or on real property listed in the California Register of Historic Resources.

> Staff Review: *The findings cannot be made* because approving the requested waiver would not violate any State or Federal law and would not have an adverse impact on the health or safety. Additionally, the property is not listed and will not impact any property listed in the California Register of Historic Resources. The waiver would benefit the project and result in a superior design because it allows on-site parking and common area amenities for the residents while also allowing the residents to have access to a common open space for passive use or recreational purposes.

Waiver #2**:** Temporary placement of refuse and recycling containers within the public right-of-way whereas Section 14.50.060 C 2. of the CT zoning district requires separation, collection, storage and pick-up is located in areas that minimize any negative impact on persons occupying the development site, neighboring properties, or public right-of-way.

The applicant states that the refuse collections operations would include that the building maintenance staff to stage the refuse containers on Distel Circle on the collection day(s) and return the containers to the collection room after the refuse has been collected. The more permanent location for the refuse containers will be inside the collection room where collection, separation and storage will be handled, but inaccessible by waste hauling trucks.

Findings: A waiver cannot be granted if doing would have violate state or federal law or if the waiver would have a specific, adverse impact on public health or safety that cannot be mitigated feasibly, or on real property listed in the California Register of Historic Resources.

Staff Review: *The findings cannot be made* because the temporary staging of refuse containers for pick up on collection days does not violate state or federal law. The temporary staging of refuse containers on the street is limited to collection times and it would not result in an impact on public health and safety since the receptacles would not be located in the travel lanes of the street and would not inhibit traffic circulation. Additionally, the property is not listed and will not impact any property listed in the California Register of Historic Resources.

Waiver #3**:** Use of wood as a distinct base material whereas Design Control Section 14.50.170 D (4) a. of the CT zoning district requires distinct material options of stone, brick, concrete, CMU, or stucco as the base material.

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

Wood is not part of the standard base material listed in Section 14.50.170 D (4) a. LAMC. The proposed project design is using mass timber for the construction of the base of the building and therefore the materials listed in the zoning code would physically preclude this material being used. The use of mass timber wood at the base has architectural integrity with the overall building design yet contrasts with the upper stories and creates a visual differentiation at the pedestrian level.

Findings: A waiver cannot be granted if doing would have violate state or federal law or if the waiver would have a specific, adverse impact on public health or safety that cannot be mitigated feasibly, or on real property listed in the California Register of Historic Resources.

Staff Review: *The findings cannot be made* because granting the use of mass timber does not violate State or federal law and would not adversely impact public health and safety or impact any real property listed in the California Register of Historic Resources. Furthermore, the use of mass timber as the base material provides a similar architectural and design objective as the materials listed in the zoning code. Additionally, mass timber is a superior material considering its sustainability as compared to the materials in the zoning code.

Discretionary Entitlements

The project requires a Design Review Permit and a Conditional Use Permit, as discussed in greater detail below. Because at least 20 percent of the units in the project would provide housing for households at or below 60 percent of Area Median Income, the Housing Accountability Act states at Government Code Section 65589.5(d) that the City cannot deny the project or approve it subject to conditions of approval that would make the project infeasible for housing at the levels of affordability proposed, unless one of the following findings can be made:

(1) The City has met its RHNA targets for the current housing cycle at each of the affordability levels proposed for this project;
(2) Denial or the imposition a condition of approval that would have the effect of rendering the project infeasible for affordable housing is necessary to avoid a violation of state or federal law;
(3) The project site is located on land for agriculture or resource preservation and either: (1) the site lacks adequate water or wastewater facilities, or (2) the project site is surrounded on at least two sides by land used for agriculture or resource preservation;
(4) The project would have a specific, adverse, and unmitigable impact on public health or safety; or
(5) All the following are true: (1) the project is inconsistent with the zoning ordinance; (2) the project is inconsistent with the applicable general plan land use designation; (3) the City has a

certified Housing Element; and (4) the project site is not identified in the Housing Element inventory or is proposed at a greater density than projected in the inventory.

Even if one of the foregoing findings can be made, under Government Code Section 65589.5(j), the project must be approved at the density proposed if it complies with all applicable objective standards, unless the project would have a specific, adverse, and unmitigable impact on public health or safety, as defined in the statute. A project is deemed to be consistent with an objective standard unless notice of inconsistency was provided to the applicant pursuant to Government Code Section 65589.5(j)(2).

Finding 1. The City has met its RHNA targets for the current housing cycle at each of the affordability levels proposed for this project;

Staff Review: *The findings cannot be made.* The city has not met its RHNA targets for the current housing cycle at each of the affordability levels of the project.

Finding 2: Denial or the imposition a condition of approval that would have the effect of rendering the project infeasible for affordable housing is necessary to avoid a violation of state or federal law;

Staff Review: *The findings cannot be made.* The city has not imposed a condition of approval or recommends denial that would result in rendering the project infeasible for affordable housing to avoid a violation of state or federal law.

Finding 3: The project site is located on land for agriculture or resource preservation and either: (1) the site lacks adequate water or wastewater facilities, or (2) the project site is surrounded on at least two sides by land used for agriculture or resource preservation;

Staff Review: *The findings cannot be made.* The project site is in an urban infill site, surrounded by urban land uses and has an existing functional facility with adequate water and wastewater services.

Finding 4: The project would have a specific, adverse, and unmitigable impact on public health or safety; or

Staff Review: *The findings cannot be made.* The project site does not have a specific, adverse and unmitigable impact on public health. The project will be considered as a Class 32 categorical exemption pursuant to the guidelines and standards under the California Environmental Quality Act and a detailed analysis has been conducted to make this determination. There is no specific, adverse, or unmitigable impact on public health or safety as a result of the proposed project.

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

Finding 5: All the following are true: (1) the project is inconsistent with the zoning ordinance; (2) the project is inconsistent with the applicable general plan land use designation; (3) the City has a certified Housing Element; and (4) the project site is not identified in the Housing Element inventory or is proposed at a greater density than projected in the inventory.

> Staff Review: *The findings cannot be made.* The project is consistent with the zoning ordinance and applicable general plan land use designation, and the city has a certified Housing Element. The city is currently updating the Housing Element (6th cycle) and the public available draft does not identify the project site as a housing opportunity site.

Therefore, pursuant to the Housing Accountability Act, the city cannot deny the project or approve it subject to conditions of approval that would make the project infeasible for housing at the levels of affordability proposed and the project must be approved at the density proposed.

Design Review

Pursuant to Section 14.76.060 LAMC, Design Review Findings, the City Council needs to make the following findings for the approval of the Design Review Permit.

A. The proposal meets the goals, policies and objectives of the general plan and any specific plan, design guidelines and ordinance design criteria adopted for the specific district or area.

   Staff review: Conformance of the project proposal to the zoning standards for CT district is shown in Table 1 above. The proposal meets the goals, policies and objectives of the General Plan, design guidelines and ordinance design criteria adopted for the Commercial Thoroughfare District. With the requested concessions and waivers, the project complies with the objective design standards.

B. The proposal has architectural integrity and has an appropriate relationship with other structures in the immediate area in terms of height, bulk and design.

   Staff Review: The proposal demonstrates architectural integrity while meeting most of the city's adopted design standards required in the CT zoning district. The Project is eligible for density bonus concessions and waivers. The applicant requests concessions and waivers to the objective design standards. The immediate area has structures that are 4-5 story tall structures, quite similar in scale and proportion to the proposed project. The relationship of this proposal with the neighboring structures and that of the recently approved projects in the area will result in harmonious buildings as envisioned in the General Plan for this zone and the El Camino Corridor Vision.

C. Building mass is articulated to relate to the human scale, both horizontally and vertically. Building elevations have variation and depth and avoid large blank wall surfaces. Residential or mixed-use residential projects incorporate elements that signal habitation, such as identifiable entrances, stairs, porches, bays, and balconies.

Staff Review: The project conforms to the city's adopted objective design standards with eligible concessions and waivers as noted in the agenda report. The bulk and massing have been appropriately scaled using architectural design elements such as metal screens, façade material separation into primary and secondary bays, mass timber canopy at the first floor, to articulate the human scale. The first-floor landscaping and primary façade make an inviting space to signal habitation in the amenity space while providing human scale to the five-story building. Each entrance has projecting wooden pergola elements and the pedestrian entrance is set inside. The walls are made of glass providing a visual connection between the outside and inside space enhancing the signs of habitation.

D. Exterior materials and finishes convey high quality, integrity, permanence and durability, and materials are used effectively to define building elements such as base, body, parapets, bays, arcades, and structural elements. Materials, finishes, and colors have been used in a manner that serves to reduce the perceived appearance of height, bulk, and mass, and are harmonious with other structures in the immediate area.

Staff review: The exterior base material is mass timber which is an alternative to the standard list of base materials; however, the applicant requests a development waiver. Although this is not part of the standard pre-approved for the base material, the mass timber as a material choice brings a high-quality architectural character to the structure while rendering a warm welcoming experience to the pedestrian environment. The exterior material of the upper floors is primarily stucco with highlights of wood panels, metal railings, wood composite railings and white metal and vinyl windows. All facades show accents of perforated metal screens which provide relief to a long façade in addition to the primary and secondary bays. The materials above in the second thru fifth floor are alternating dark grey and light grey stucco to highlight the primary and secondary bays. Each floor has a horizontal band showing visual separation for each floor. These materials and finishes are used in the manner to reduce the bulky nature of the five-story building and are harmonious with the other structures in the immediate area.

E. Landscaping is generous and inviting, and landscape and hardscape features are designed to complement the building and parking areas, and to be integrated with the building architecture and the surrounding streetscape. Landscaping includes substantial street tree canopy, either in the public right-of-way or within the project frontage.

Staff review: The landscape plan (Sheet L2.1 of Attachment M) shows six new proposed street trees along the Distel Circle frontage. There are twenty-seven peripheral trees and shrubs proposed along the side and rear setback. Additional six trees in planter boxes with other landscape features are shown in the 5,530 square foot courtyard space (Sheet L2.2)

Landscaping is generous and inviting. The project incorporates the appropriate designed hardscape and softscape features at the lobbies and entrances to signify entry elements. The tree canopy is substantial along the main Distel Circle side as well as the side setback areas. The landscaped courtyard area includes amenities such as play mounds, waterlily balance play structure, community garden planters, and gathering space with seating areas. The courtyard also has large trees in planters.

F. Signage is designed to complement the building architecture in terms of style, materials, colors, and proportions.

Staff Review: The architectural rendering indicates entrance signage which complement the building architectural style. A sign permit review is required if the project is approved.

G. Mechanical equipment is screened from public view and the screening is designed to be consistent with the building architecture in form, material, and detailing.

Staff review*:* The rooftop mechanical and other mechanical equipment appear to be set inside and appropriately screened from public view using a roof screen which is consistent with the building. Surface area for photovoltaic panels are set inside from the parapet line on the rooftop. These are consistent with the building architecture in form, material, and detailing.

H. Service, trash, and utility areas are screened from public view, or are enclosed in structures that are consistent with the building architecture in materials and detailing.

Staff review: The refuse collection room on the first floor is screened from public view and enclosed. Per requested waiver #2, temporary staging of refuse containers is requested to be located on Distel Circle on collection days. The location and design of the service, trash and utility areas are integrated well into the building architecture and is consistent with the rest of the building with the material use and detailing.

Conditional Use Permit Review

To grant Conditional Use Permit UP19-001, the City Council must make the following findings in accordance with Chapter 14.80.060 of the LAMC:

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

A. That the proposed location of the conditional use is desirable or essential to the public health, safety, comfort, convenience, prosperity, or welfare.

Staff review: The proposed multi-family residential building is envisioned as a conditional use in the General Plan and has been reviewed and conditioned for approval for health and safety and environmental considerations. Based upon the technical reports and the categorical infill exemption for the project, there is evidence that the project will have no significant impact on the surrounding community. The project will enhance the affordable housing stock and make available more homes to enhance comfort, prosperity, and welfare of the community, furthering the City's housing goals.

B. That the proposed location of the conditional use is in accordance with the objectives of the zoning plan as stated in Chapter 14.02 of this title;

Staff review: The project is categorically exempt from CEQA as an infill project, and it will meet many of the goals and objectives of the General Plan and complies with the City's inclusionary housing requirements. Pursuant with State Density Bonus requirements, the project complies with the density bonus and avails additional height increase and parking reduction standards. The requested concessions and waivers are in compliance with the density bonus allowances. The project meets all the City's design policies and objectives, as set forth above with respect to the Design Review Permit findings. Notwithstanding the requested concessions and waivers, the project complies with all the objectives set forth in Section 14.02.020 of the Los Altos Municipal Code.

C. That the proposed location of the conditional use, under the circumstances of the particular case, will not be detrimental to the health, safety, comfort, convenience, prosperity, or welfare of persons residing or working in the vicinity or injurious to property or improvements in the vicinity.

Staff review: Because the project is categorically exempt as an infill project, the development of a housing project at 330 Distel Circle will not be detrimental to the health and safety, comfort, convenience, prosperity or welfare of persons residing or working in the vicinity to property or improvement in the vicinity.

D. That the proposed conditional use will comply with the regulations prescribed for the district in which the site is located and the general provisions of Chapter 14.02;

Staff review: Notwithstanding the density bonus concessions, waivers and approvals which is consistent with State Law, the proposed conditional use of a multi-family residential project

complies with the regulations prescribed for the CT district as detailed in the staff report analysis and development standards Table 1.

Multi-modal Transportation Review

Pursuant to Section 14.78.090 of the Zoning Code, an application for City Council design review shall be subject to a multimodal transportation review and recommendation to the Planning Commission and City Council by the Complete Streets Commission as part of the approval process to assess potential project impacts to various modes of transportation such as but not limited to bicycle, pedestrian, parking, traffic impacts on public streets, and/or public transportation.

For the Commercial Thoroughfare (CT) Zone, all projects are required to comply with the provisions of off-street parking, off street loading, parking design and access, site circulation and access, service area and screening and off-street Loading for residential sections of the LAMC chapter 14.50.

General Plan Circulation Element/Transportation Impact Analysis

Regarding transportation impact analysis, the Circulation Element in the General Plan includes Implementing Programs C7 and C8 that outlines the criteria for reviewing traffic and circulation impacts for new development.

Implementing C7 states:

> Maintain a minimum Level of service "D" operating standard at all signalized intersections under Los Altos jurisdictions. Identify minimum Levels of Service for intersections shared with adjacent communities and pursue agreements with adjacent communities to maintain those intersections at the agreed upon Level of Service.

Implementing Program C8 states:

> Require a transportation analysis for all development projects resulting in 50 or more net new daily trips. The analysis shall identify potential impacts to intersection and roadway operations, project access, and non-automobile travel modes, and shall identify feasible improvements or project modifications to reduce or eliminate impacts. Impact significance should be consistent with the criteria maintained by the Santa Clara Valley Transportation Authority. City staff should have the discretion to require focused studies regarding access, sight distance, and other operational and safety issues.

Implementing programs C7 and C8 also states that the City should maintain a minimum Level of Service (LOS) "D" operating standard at all signalized intersections under Los Altos jurisdiction and

that only after preparation of an environmental impact report with associated findings, accept LOS E or F operations at City-monitored signalized intersections after finding that no practical and feasible improvements can be implemented to mitigate the lower levels of service. This effectively established a significance threshold that was implemented under the California Environmental Quality Act (CEQA).

In 2013, Senate Bill 743 was signed by Governor Brown. SB 743 directed the State Office of Planning and Research (OPR) to develop new CEQA guidelines and to replace Level of Service (LOS) as the evaluation measure for transportation impacts under CEQA with another measure such as Vehicle Miles Traveled (VMT). In December 2018, the California Natural Resources Agency adopted new CEQA Guidelines including sections to implement SB 743. In that update, every project was required to, among other things that: a project's effect on automobile delay (i.e., Level of Service) shall not constitute a significant environmental impact under CEQA. It also stated that a lead agency must adopt the provisions no later than July 1, 2020. VMT is the most appropriate measure of transportation impacts; and a lead agency has the discretion to choose the most appropriate methodology to evaluate a project's VMT.

It should be noted that SB 743 does not preclude cities from retaining General Plan policies related to LOS. Furthermore, cities may continue to require transportation analyses of a project's consistency with the adopted LOS goals and/or other operational issues related to transportation. The City's General Plan Circulation Element has Level of Service (LOS) guidelines, which can form the basis of conditions of approval. The project has been analyzed for compliance with these guidelines as detailed in the Transportation Analysis report (Exhibit B1)

The results of the intersection level of service analysis under existing conditions, near-term conditions, and cumulative conditions, with and without the project determined that the addition of project trips would not adversely affect traffic operations at the signalized study intersections because these trips would not increase the average delay at the intersection by more than four seconds.

The unsignalized intersections of San Antonio Road and Jordan Avenue and Distel Circle and El Camino Real operate at an unacceptable level of service during at least one peak hour under all study scenarios, without and with the project, therefore, a signal warrant check was conducted for the intersections based on the peak-hour traffic warrant. However, the analysis shows that the signal warrant is not met at either of these intersections.

The analysis also made additional conclusions and recommendations for the project:

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

Recommendation: On-street parking should be prohibited approximately 40 feet to the south and 35 feet to the north of the project driveway. This would provide adequate sight distance for exiting drivers at the driveway to see the oncoming traffic along Distel Circle. The project driveway should also be free and clear of any obstructions such as shrubs or other landscape features to optimize sight distance, thereby ensuring that exiting vehicles can see pedestrians on the sidewalk and other vehicles traveling on Distel Circle.

Staff review: Staff concurs with the recommendation for eliminating on-street parking adjacent to the project site driveway and has included a condition of approval in the draft resolution (Item 1(e))(see Attachment A)

Recommendation: The site plan does not provide the height of the pit for the three-level mechanical stacker. Minimum 7 feet deep parking pits should be provided to accommodate the height of a design vehicle.

Staff review: Staff concurs with this requirement and has included a condition of approval in the draft resolution (Item 1(f)) (see Attachment A)

Recommendation: The applicant should work with the City and Mission Trail Waste Systems to design a plan for waste collection service.

Staff review: Staff concurs with this requirement and has included a condition of approval (Item1(g)) in the draft resolution (Attachment A) to address waste collection services.

VMT analysis:
With regards to VMT, the City had not adopted formal standards by July 1, 2020; however, in lieu of formal adoption, the Planning Division developed interim guidance for City review of projects to evaluate VMT impacts based on OPR Technical Advisory. The interim VMT policy, currently in effect, has set a standard for VMT for residential projects. The nine-county regional average for residential VMT per capita threshold is set at 13.95 VMT per capita for residential. If a project is 15% below this regional average (or 11.86), then a project is considered to not have a significant environmental impact. Per the Santa Clara County map based VMT evaluation tool, the project site is located within the area with a residential VMT per capita of 9.51 without the project, which is below the threshold set forth in the Interim VMT policy. Therefore, the project would also be screened out from further analysis using the threshold of significance in the Interim VMT policy. Refer to Attachment B, Exhibit B1 for more details on the transportation analysis.

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

The City's Draft VMT Policy, which hasn't been adopted, also has screening criteria wherein projects with 100 percent affordable housing shall be presumed to have a less than significant transportation impact on VMT. Attachment B, Exhibit B1 has details of the transportation analysis for this project. Since the project proposes 100 percent affordable housing, it is presumed to have a less-than significant transportation impact on VMT and is screened out from further VMT analysis.

In summary, the project is screened out from further VMT analysis if the Interim Departmental VMT guideline is applied since the project is in an area that is more than 15% below the regional VMT per capita average for residential development and since the project is 100 percent affordable which the draft VMT policy assumes to have a less than significant impact to per capita VMT.

Density Bonus and Parking

Pursuant to Government Code Section 65915 (p)(3), and Section 14.28.040 Table F of the Los Altos Density Bonus Ordinance, any project that is 100 percent affordable and has unobstructed access to a major transit stop located within a one-half mile radius does not require any vehicle parking. This special parking reduction is allowed in addition to any requested development concession or waiver. In lieu of the required parking elimination, the Applicant proposes 90 parking spaces. Additional discussion is provided below regarding the proposed parking.

Off Street Parking

The proposed project is located within one-half mile of a major transit stop on El Camino Real (see Attachment D and D1.) The VTA stop on El Camino Real and Showers Drive qualifies as a major transit stop, which is 0.4 miles from the project site with a continuous sidewalk access to reach the stop. Pursuant to Government Code Section 65915 (p)(3), any project that is 100 percent affordable and located within one half mile radius within a major transit stop with an unobstructed access to the stop does not require any parking. The proposed project includes 90 parking spaces even though none are required

The garage is located on the first floor of the project which has two rows of parking stalls with a 24-foot drive aisle. One row of parking stalls contains 69 parking stalls within a mechanical parking lift system. The lift system is designed as a three-level stacking solution with one level of parking platforms lowered into a pit, a second level at grade, and third stacked above. The opposite row contains regular at-grade stalls. The parking also provides for electric vehicle (EV) parking provisions, accessible parking, and a loading area. Details of the parking can be found in Sheets A2.1 and A3.0 of the design plans (Attachment M).

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

Since, vehicle parking requirements are eliminated for this project, any parking provided exceeds the minimum required.[2]

On-Street Parking

According to Attachment B, Exhibit B1 Transportation analysis reports that the on-street parking should be prohibited for approximately 40 feet to the south and 35 feet to the north of the project driveway. This would provide adequate sight distance for exiting drivers at the driveway to see the oncoming traffic along Distel Circle. The project driveway should also be free and clear of any obstructions (such as shrubs or other landscape features to optimize sight distance) thereby ensuring that exiting vehicles can see pedestrians on the sidewalk and other vehicles on Distel Circle.

The city of Los Altos has received complaints regarding the parking of commercial vehicles on Distel Circle and Distel Drive and will be posting signs in the near future to prohibit parking of commercial vehicles on those streets.

Off-Street Loading

Per LAMC 14.50.180 off-street loading for a multi-family residential project is required to accommodate on-site loading/unloading space to accommodate the deliver and shipping of goods. The requirements for off-street loading and the project's proposal are listed in Table 2 below.

Table 2 Off-street Loading for CT district

Standard **LAMC 14.50.180**	**Proposed**	**Conforms (Yes/No)**	**Notes**
One Loading/Unloading space provided, at least 10 ft X 25ft Vertical Clearance 14ft	One loading space provided 12ft X 27ft Vertical Clearance – 14'6"	Yes	Attachment M: Sheet 2.1 Sheet A3.0
Loading and unloading spaces shall be located and designed so that the vehicles intended to use them can	The unassigned spaces 70-72 is intended to be utilized for loading and	Yes	Attachment M: Sheet 2.1

[2] Since parking is being provided, minimum requirements for accessible parking and electric vehicle charging must be provided consistent with Building Code requirements.

Subject: 330 Distel Circle – 90-unit Affordable Housing Project

maneuver safely and conveniently to and from a public Right-of-way without interfering with the orderly movement of traffic and pedestrian on any public way and complete the loading and unloading operations without obstructing or interfering with any parking space or parking lot aisle.	unloading. The drive aisle will not be occupied.		
No area allocated to loading and unloading facilities may be used to satisfy the area requirements for off-street parking, nor shall any portion of any of off-street parking area be used to satisfy the area requirements for loading and unloading facilities.	The parking requirement for off-street parking is over the required threshold. See Section off-street parking above.	Yes.	Attachment M: Sheet 2.1 Spaces 70-72 designated as loading/unloading spaces.
A loading/unloading space may be located in the front yard setback but shall comply with other required setbacks.	Not Applicable (N/A)	N/A	
All loading spaces shall be designed and maintained so that vehicles do not back in from, or onto, a public street;	Loading space is inside the garage backing out to a private drive	Yes	Attachment M: Sheet 2.1
Loading spaces shall be striped indicating the loading spaces and identifying the spaces for "loading only." The striping shall be permanently maintained by the property owner/tenant in a clear and visible manner at all times.	Not striped but labelled as loading above spaces 70-72	Conditional approval	Attachment M: Sheet 2.1
Adequate signage shall be provided that directs delivery vehicles to the loading space.	Not available	Conditional approval	Attachment M: Sheet 2.1

The loading/unloading spaces marked on Sheet 2.1 of Attachment M is intended to occupy parking spaces numbered 70-72. Staff recommends that the applicant comply with the conditional striping and signage requirement as detailed in Table 2 above to ensure that this space is dedicated for loading/unloading purposes for the proposal to be more consistent with the off-street loading requirements. Condition of approval Item 1(d) of Attachment A reflects this striping requirement for loading/unloading space.

Public Transit

The closest bus stops are located approximately 0.1 mile from the subject site at El Camino Real and Distel Circle, which is considered an acceptable walking distance. Local VTA route 22 and Route C shuttle of the Mountain View Go mobility service.

El Camino and Showers is located at 0.4 miles away from the subject site, which is also considered acceptable walking distance. Local VTA route 22 and rapid bus line 522 provide service at this stop with less than 15-minute intervals during peak hour commute. Routes 22 and rapid 522 provide service between Palo Alto Transit Center and Eastridge. In addition to this, route number 40 intersects at this location providing service from Foothill College to Mountain View transit Center via North Bayshore.

Bicycle and Pedestrian

As recommended by the VTA guidelines, multiple family residential projects should provide one Class I bicycle parking space for every three units and one Class II bicycle parking space for every fifteen units (but no less than two). The Project is providing forty-five Class I bike lockers and ten Class II bicycle rack, whereas thirty-five Class I and six Class II bicycle parking spaces are required.

The Class I bicycle parking spaces would be located on the ground level in a closed room that is assumed to have lockable hardware (see Sheet L1.1 of Attachment M). The Class II spaces are at street level in front of the building (see Sheet L1.1 of Attachment M). With regards to the nearest dedicated bicycle facility, a Class II bicycle lane exists along San Antonio Road.

A sidewalk currently exists along the street frontage. The nearest improvement planned in the Complete Streets Master Plan is on Distel Drive as seen in the preliminary maps. [3]

[3] See maps https://losaltoscompletestreets.com/wp-content/uploads/2021/03/Concept-Plan-Line-Distel-Drive_Public_v2.pdf

The schools serving the site are Almond Elementary, Egan Middle School, and Los Altos High School. The City of Los Altos recently completed suggested "Walk n' Roll" maps for each school and suggested proposed improvements for some of the schools including the ones utilized by this Project[4]. No improvements are planned on the suggested routes and there is no nexus to require the proposed project to contribute to those improvements.

Public Notification and Correspondence

For this meeting, a public hearing notice was published in the *Town Crier*, and mailed to 455 property owners and 534 current tenants within 1,000 feet of the site (Attachment M). Four large public notice billboard with color renderings was installed along the project's Distel Circle frontage in conformance with the story pole exception approved by the City Council on March 22, 2022 (Resolution 2022-13, Attachment C).

All public correspondences received prior to the publication of this report are contained in Attachment F.

Options

Complete Streets Commission Recommendation

Consistent with the zoning code provisions, the CSC is recommended to adopt a motion recommending the project to the Planning Commission. The CSC can recommend denial with justification(s) for denial or approval with or without recommendations that could be incorporated as conditions of approval. If making specific recommendations for conditions, the Commission should state the justification for each condition with an understanding that the condition cannot lower the density of the proposed development, that there is nexus and proportionality to the request, and is feasible to incorporate into the proposed design. Because the project is an affordable housing project, a condition of approval also may not render the project infeasible for affordable housing at any income level.

Planning Commission

The Planning Commission is recommended to adopt a motion recommending approval, approval with modifications or incorporated as conditions, or denial of the proposed project with justification(s) for denial. If making specific recommendations for conditions, the Commission should

[4] See maps found here: https://losaltoscompletestreets.com/suggested-routes-to-school/

state the justification for each condition with an understanding that the condition cannot lower the density of the proposed development, that there is nexus and proportionality to the request, and is feasible to incorporate into the proposed design. Because the project is an affordable housing project, a condition of approval also may not render the project infeasible for affordable housing at any income level. Once the Planning Commission makes a recommendation, the Project will be forwarded to the City Council for consideration and final action.

Expanding the range of opportunities for all by developing, managing and promoting quality affordable housing and diverse communities.

Distel Circle Apartments

Density Bonus Report – Planning Application

July 74, 2022

Project:	**90-Unit Multifamily Affordable Housing Community**
Location:	330 Distel Circle, Los Altos (APN# 170-04-051)
Current Landowner:	Midpen Regional Open Space District
Applicant/Developer:	EAH Housing

As a permanently affordable rental community incorporating a mix of unit types and a range of rent tiers that supports a diversity of income-eligible tenants earning incomes from 30% to no more than 80% of Area Median Income (AMI), the 330 Distel Circle development is eligible for a density bonus in accordance with California Government Code Section 65915 et seq. ("Density Bonus Law").

EAH as the applicant is requesting an increase in the density allowable at 330 Distel Circle and other incentives, waivers, concessions, and parking reductions allowed by the Density Bonus Law.

Requested Density Bonus

Density Bonus is considered in the LAMC section 14.28.040 (C) and contemplates density bonus up to 35% depending on both the affordability and the number of restricted units. The LAMC also has a provision that can provide a for additional density bonus 14.28.040 (E)(7) which states: Nothing in this section shall be construed to prohibit the city from granting a density bonus greater than what is described in this section for a development that meets the requirements of this section or from granting a proportionately lower density bonus than what is required by this section for developments that do not meet the requirements of this section.

The California Government Code Section 65915 also allows for unlimited density for 100% affordable developments that are withing one-half mile from a major transit stop, section 65915 (f)(3)(D)(ii). 330 Distel Circle is within one-half mile from a major transit stop (please see Memorandum on Consistency with Density Bonus Provisions - Glaser Weil).

In alignment with the MOU between the City of Los Altos and the County of Santa Clara, that acknowledges the development to contain a minimum of 90 units at 330 Distel Circle, EAH is requesting a density bonus to allow for 103.45 units per acre.

The California Government Code Section 65915(d)(2)(D) allows for a height increase of an additional 3 stories or 33 feet for 100% affordable housing developments. The current zoning district (CT) allows for structures up to 45 feet in height and considering the additional 33 feet allowed by the Density Bonus Law, a building up to 78 feet would be consistent with the height allowed under the law. The proposed building height at 330 Distel Circle is 64 feet and consistent with Density Bonus Law.

Zoning	Commercial Thoroughfare District (CT)
General Plan	Thoroughfare Commercial
Maximum Density	38 dwelling units per net acre (dua)
Site Size	38,030 sf (0.87 acres)
Units Permitted	0.87 X 38 = 33.06 units
Total Units Proposed	90 units
Proposed Affordable Units	88 units (100% exclusive of managers units)
Proposed Bonus Percentage	90 ÷ 33 =272%
Number of Density Bonus Units	90 – 33 = 57 units
Proposed Density Per Acre	90 ÷ 0.87 = 103.45 dua
Proposed Market Rate Bedrooms	0
Proposed Affordable Unit Bedrooms	155
Proposed Manager's Unit Bedrooms	4

Unit Mix – 330 Distel		AMI					
	SQFT PU	30%	50%	60%	80%	**Unit Total**	**Unit Mix**

Affordability Dist.		50%	13%	28%	7%	100%	
Average Affordability	**44.66%**						

The existing use of 330 Distel Circle is a single-story office building that is owned and occupied by Midpeninsula Regional Open Space District. There are currently no dwelling units on the site nor has there been in five years preceding the date of submittal of this application.

There are no recorded covenants, ordinances or laws applicable to the site that restrict rents.

Requested Incentives and Concessions

The applicant is requesting the following four (4) concessions:

- Reduced Front Yard Set Back
- Reduced Front Side Step-back
- Reduced Average-Per-Unit Open Space Provided
- Reduced EV Ready Parking Stalls

Reduced Front Yard Set Back

Los Altos Municipal Code (LAMC) section 14.50.090 has a standard of a 25-foot minimum depth of which 50% of the area should be landscaped. We are requesting a reduction in the minimum setback from 25 feet to 10 feet. LAMC Section 14.28.040 (F)(1)(e) allows for an On-Menu incentive to reduce the setback requirement by up to 20%. However, the reduction requested is greater than 20% and therefore is considered an **off-menu** request.

Reason for Request: The reason for this request is because a 25-foot setback would decrease the building area and thereby decrease the unit count.

Reduced Front Side Step-back

LAMC 14.50.170 (B)(1)(b) requires a minimum step-back of 10 feet from the ground floor façade for stories above 45 feet. EAH is requesting no step-back on the 4th and 5th levels. This is an **off-menu** request because step-back reductions are not an on-menu incentive.

Reason for Request: The reason for this request is because a step-back on the 4th and 5th level would decrease the building area and thereby decrease the unit count.

Reduced Average-Per-Unit Open Space Provided

LAMC 14.50.150(A) requires that an average of fifty (50) square feet of private open space shall be provided for the total number of dwelling units within the project. EAH is requesting a reduction in the average square feet of private open space from 50 to 25 square feet. LAMC Section 14.28.040 (F)(1)(f) allows for an On-Menu incentive to reduce the open-space requirement by up to 20%. However, the reduction requested is greater than 20% and therefore is considered an **off-menu** request.

Reason for Request: The site has a 10' foot public utility easement (PUE) running along the front of the property along Distel Drive. The PUE has to be clear to sky and therefore we are unable to provide cantilevering balconies along the Distel frontage. Providing decks within the units along Distel would require a decrease in unit size, a decrease in unit count or an increase in cost due to customization of modular units. We have mitigated the reduction in Private Open Space by proving more Common Open Space than required.

Reduced EV Ready Parking Stalls

LAMC 4.106.4.2 (Exceptions) requires all multifamily Affordable Housing, 10% of dwelling units with parking space(s) shall be provided with at least one Level 2 EV Ready Space. Calculations for the required minimum number of Level 2 EV Ready spaces shall be rounded up to the nearest whole number. The remaining dwelling units with parking space(s) shall each be provided with at least one Level 1 EV Ready Space. The required spaces with this calculation would be the following. We are requesting to provide the state minimum required by our current code (2019) which is 10% EV Ready spaces- 9 total- instead of the 90 required by Los Altos code.

Level 2 EV Ready Space = 9 spaces
Level 1 EV Ready Space = 81 spaces
Total = 90 spaces

Reason for Request: The additional costs related for infrastructure, transformer(s), and cost of pedestals for charging.

1. Meeting the requirement will increase the amount of costs of utility infrastructure required such as conduit/raceways and transformers. We are estimating the costs as $1000/stall per Energy Solutions report (dated 2019 so costs are likely higher). For the additional stalls beyond the 10% required by CalGreen we estimate $81,000 (81 stalls x $1,000).

Table 1. Estimated Cost of Installing EV Infrastructure (price per spot)

Code Scenario:	Market Rate 25% Level 2 75% Level 1		Affordable Housing 10% Level 2 90% Level 1	
Building Type	New Construction	Retrofit[4]	New Construction	Retrofit
60-Unit MUD	$1,410	$4,443	$1,049	+$3,982
150-Unit MUD	$1,197	$4,101	$1,002	+$3,854
60-Space Office Building	$1,166	$3,232	N/A	N/A

Table 1: Energy Solutions article dated November 5, 2019. EV Infrastructure Cost Analysis Report for Peninsula Clean Energy and Silicon Valley Clean Energy (page 1).

2. If/when the mechanized stalls go from EV Ready to having the capability to charge, Level 2 chargers will require ±$2,500 per pedestal depending on the manufacturer. For Level 1 chargers, 110v receptacle can be added to the platform.

3. The project is required to have zero parking spaces as a result of being a 100% affordable housing project within ½ mile of major transit. As such, if we were to provide zero stalls, we would not be required to provide any EV Ready stalls per CA and City of Los Altos code and CA Cal Green code.

Cost Justification:

There are two areas of focus related to the cost containment of this affordable housing community and how it relates to the requested concessions: the total costs to build the units (hard costs) and the average cost per unit including all other soft costs.

Hard costs associated with the construction of the modular units include the material and labor expense it takes to create and build each unit. The modular factories are set up for standardization, not for customization, so any modification to the factory standards would lead to additional costs and additional waist. By way of a simple example, if the factory is set up to build units using wood in 20 foot lengths but we request shorter units that require 18 foot lengths, then the factory would need to customize the machinery to cut the shorter lengths. This customization would increase the labor costs and slow the process down adding more time. In addition, more waist is created because in this example, the two-foot section of wood is unlikely to be re-used and will be thrown away.

The second area of focus is the developments cost per unit. This development has fixed costs including the land and other soft costs including design and environmental analysis. By way of a simple example, if the design fees are $3 million and the design yields 90 units, the per-unit cost is $33,333. However, if the same design fees were yielding only 60 units, the per-unit cost would be $50,000. While this does not increase the total cost of development, a higher cost per unit makes this project less competitive when trying to leverage additional funding source at the State and Federal level. Therefore, a design or building standard that leads to a reduction of building area or total number of units is considered to increase costs and reduce competitiveness.

Requested Waivers

The applicant is requesting the following waivers:

- Visibility of Interior Courtyard
- Exterior Materials
- Trash Staging Area

Visibility of Interior Courtyard

LAMC 14.50.170 (C)(5)(a) requires that an interior courtyard must be partially visible from the street and linked to the street by a clear accessible path of travel. EAH is requesting that this requirement be satisfied by allowing visibility from the parking lot behind the building. In addition, EAH is requesting that the interior courtyard not be required to be linked to the street by a clear accessible path of travel. This is an **off-menu** request.

Reason for Request: The courtyard has been raised to the second level to provide additional parking on the ground level. A second level courtyard also provides additional privacy to the residents and neighbors. Removing a portion of the building to make the courtyard visible from the street would decrease units and parking area.

Exterior Building Materials:

LAMC 14.66.280 (D)(4)(a) Base. For multistory buildings, the base of the building shall be defined by a distinct material selected from among the following: Stone, brick, concrete, CMU, or stucco ("base material"). EAH is requesting that wood be approved as a distinct material for the base.

Reason for Request: We believe that the intent of this design standard is being achieved because wood serves as a distinct material. We are proposing wood and storefront glazing at the base of the building.

Trash Staging Area:

LAMC 14.50.060 (C) (2) states that every development will be required to provide suitable space on-site for solid waste separation, collection, storage, and pick up and shall site these in locations that facilitate access, collection, and minimize any negative impact on persons occupying the development site, neighboring properties, or public rights-of-way. EAH is requesting a waiver from the requirement so that the solid waste collection can take place in the public right of way (Distel Circle).

Reason for Request: The location of trash storage is on the ground floor in the garage but is not in a location that can be serviced by the collection company, Mission Trails. Mission Trails requests that the trash staging area be within a specific distance from the street so that the trucks can access the trash bins. Redesigning the ground floor to accommodate a staging area closer to the street is not desirable because it would require relocating the bicycle parking, resulting in the loss of amenity space on the ground floor. Our proposal is to have building staff stage the trash bins on Distel Circle on trash pick-up day and return the bins to the trash room after the trash has been collected.

Requested Parking Reductions

LAMC 14.28.040(G)(2)(b) - For low or very low income housing near major transit stop. Upon the request of the developer, the city shall not impose a parking requirement, inclusive of handicapped and guest parking, that exceeds one-half parking spaces per bedroom if the development includes the maximum percentage of low or very low income units; and the development is located within one-half mile of a major transit stop; and there is unobstructed access to the major transit stop to the development. EAH is requesting parking requirement alterations be applied to the proposed development because the development:

- Exceeds the percentage required of low or very low income units
- Is within one half-mile of a major transit stop
- Has unobstructed access to the major transit stop to the development This is an ***On-Menu*** request.

The proposed development at 330 Distel Circle will have a total of 159 bedrooms. Using the one-half parking space per bedroom outlined in the LAMC would require 80 parking spaces. As proposed, this community will have 90 parking spaces.

State Density Bonus Law does not require any parking for 100% affordable developments that are withing one-half mile from a major transit stop, section 65915 (p)(3). 330 Distel Circle is within one-half mile from a major transit stop (please see Memorandum on Consistency with Density Bonus Provisions - Glaser Weil).

330 Distel: Density Bonus, Concessions, Waivers				
Allowed by Density Bonus Law				
Density (DU/acre)	38du/acre	90 Units = 103 du/acre	Density Bonus Law	14.5.080 (LAMC)
Height	45ft + 33ft = 78ft permitted	64ft, 5 stories	Density Bonus Law	
Concession	**Standard**	**Proposed**	**Reason**	Code Section
Setback, Front Yard	25ft min. depth, 50% of which shall be landscaped	10ft setback	25ft setback would decrease building area and unit count	14.5.090 (LAMC)
Stepback	Street Side: Minimum 10 feet from ground floor façade above 45 feet in height	Requesting no stepback on 4th and 5th levels.	We need building area to get to 90 units.	14.50.170_1B. Obj. Standards
Open Space	50SF; An average of fifty (50) square feet of private open space shall be provided for the total number of dwelling units within a project.	Approximately 25 sf average / unit requested	10ft Public Utility Easement has to be clear to sky so we are unable to provide cantilevering balconies along the Distel frontage. Juliette balconies are provided on Distel. Providing decks within the units would require a decrese in unit area and impact unit count. Private open space provided on all decks except for those facing Distel.	14.50.150 (LAMC)
EV Ready Parking stalls	4.106.4.2 New multifamily dwellings. Exception: For all multifamily Affordable Housing, 10% of dwelling units with parking space(s) shall be provided with at least one Level 2 EV Ready Space. Calculations for the required minimum number of Level 2 EV Ready spaces shall be rounded up to the nearest whole number. The remaining dwelling units with parking space(s) shall each be provided with at least one Level 1 EV Ready Space. Calculation: (9) Level 2 EV ready spaces and (81) Level 1 EV ready spaces.	Requesting 10% (9 stalls) to be EV Ready stalls per Cal Green code.	1. Cost of utility infrastructure 2. Cost of pedestal costs if EV is installed in future 3. Parking required is zero, which means zero EV Ready stalls would be required.	4.106.4.2 (LAMC)
Waiver	**Standard**	**Proposed**	**Reason**	
Interior Courtyard	Partially visible from the street and linked to the street by a clear accessible path of travel.	Requesting visibility from back parking lot, no access from exterior to courtyard	Raised courtyard on level 2 not visible from Distel, may be visible from El Camino. Raised courtyard to provide additional parking. Also creates privacy for single family neighbor and residents. Removing a leg of the building to make the courtyard visible would decrease unit and parking area.	14.50.170_5A. Obj. Standards
Materials	Base. For multistory elements, the base of the building shall be defined by a distinct material selected from among the following: Stone, brick, concrete, CMU, or stucco ("base material").	Requesting approval of wood as a distinct material.	Intent achieved. Wood serves as distinct material. Wood and storefront glazing proposed at the base.	14.66.280_DA Obj. Standards
Trash	Pickup not in right of way	Waiver from requirement	PUE Easement, no other location for trash	14.50.060_C2 Required Conditions

Date: July 5, 2022
Project Name: 330 Distel Circle
Project No: 210042

Re: EV Capable Concession Request

From: Lily Ciammaichella, AIA, BD+C
KTGY Architecture + Planning

Dear Radha,

We are requesting to make the Los Altos EV capable charging requirement as a State Density Bonus Law inentive/concession. From section **4.106.4.2** of the Los Altos municipal code, we are required to provide the following:

4.106.4.2 New multifamily dwellings
Exception: For all multifamily Affordable Housing, 10% of dwelling units with parking space(s) shall be provided with at least one Level 2 EV Ready Space. Calculations for the required minimum number of Level 2 EV Ready spaces shall be rounded up to the nearest whole number. The remaining dwelling units with parking space(s) shall each be provided with at least one Level 1 EV Ready Space.

Required EV Ready stalls
EV2 ready = 9 spaces
EV1 ready = 81 spaces
Total = 90 spaces

We are requesting to provide less EV capable stalls to 10% of the total number of parking spaces (9 stalls) as Level 1 spaces.

The reasons are as follows:

1. Meeting the requirement will increase the amount of costs of utility infrastructure required such as conduit/raceways and transformer needs. We are estimating the costs as $1000/stall per Energy Solutions report. For the additional stalls beyond the 10% required by CalGreen and proposed, or 81 stalls x$1,000 = $81,000. Cost was from 2019 report by Energy Solutions and costs are likely more than estimated below.

Table 1. Estimated Cost of Installing EV Infrastructure (price per spot)

Code Scenario:	Market Rate 25% Level 2 75% Level 1		Affordable Housing 10% Level 2 90% Level 1	
Building Type	New Construction	Retrofit[4]	New Construction	Retrofit
60-Unit MUD	$1,410	$4,443	$1,049	+$3,982
150-Unit MUD	$1,197	$4,101	$1,002	+$3,854
60-Space Office Building	$1,166	$3,232	N/A	N/A

2. If/when the mechanized stalls will be ready to convert the mechanized stalls to have the capability to charge, at this time, Level 2 chargers will require ±$2,500 per pedestal depending on the manufacturer. For Level 1 chargers, 110v receptacle cade be added to the platform.

3. The project is required to have zero parking spaces as a result of being a 100% affordable housing project within ½ mile of major transit. As such, if we were to provide zero stalls, we would not be required to provide any EV Ready stalls per CA and City of Los Altos code and CA Cal Green code.

Definitions:

Electric vehicle infrastructure Cost Analysis Report for Peninsula Clean Energy & Silicon Valley Clean energy. By Enegry Solutions. Page 4

EV Capable	Includes conduit / raceways
EV Ready ("Plug and play")	Includes full circuit with a receptacle / outlet
EV Installed	Includes full charging capability with EVSE

Los Altos Municipal code Definitions:

"Level 1 EV Ready Space" means a parking space served by a complete electric circuit with a minimum of 110/120 volt, 20-ampere capacity including electrical panel capacity, overprotection device, a minimum 1" diameter raceway that may include multiple circuits as allowed by the California Electrical Code, wiring, and either a) a receptacle labelled "Electric Vehicle Outlet" with at least a ½" font adjacent to the parking space, or b) electric vehicle supply equipment (EVSE).

"Level 2 EV Ready Space" means a parking space served by a complete electric circuit with 208/240 volt, 40-ampere capacity including electrical panel capacity, overprotection device, a minimum 1" diameter raceway that may include multiple circuits as allowed by the California Electrical Code, wiring, and either a) a receptacle labelled "Electric Vehicle Outlet" with at least a ½" font adjacent to the parking space, or b) electric vehicle supply equipment (EVSE) with a minimum output of 30 amperes.

Glaser Weil

MEMORANDUM

TO: EAH Housing

FROM: Elisa Paster and Eric Geier

DATE: February 9, 2022

SUBJECT: 330 Distel Circle-Project Consistency with Density Bonus Provisions

I. Introduction

EAH Housing is partnering with the City of Los Altos ("City") to develop a 100% affordable housing project, with the exception of a manager's unit, using a Density Bonus (the "Project") at 330 Distel Circle, Los Altos, California 94022 ("Project Site"). The Project is a 64 foot building that consists of 90 affordable units (24 Studio, 20 one-bedroom, 23 two-bedroom, and 23 three-bedroom) and 90 parking spaces. The Project is seeking a 165% Density Bonus, existing zoning allows for 34 units (rounded up from 33.06) at the Project Site.

Based on its proximity to transit, as demonstrated below, state law permits the Project to an unlimited Density Bonus, a height increase up to 33 feet, and no minimum parking requirements. As the Project is 100% affordable, even if a determination is made that the Project is not within one-half mile of a major transit stop, the Project can still be approved as designed with the approval of concessions and waivers.

II. The Project Site is Within One-Half Mile of a Major Transit Stop

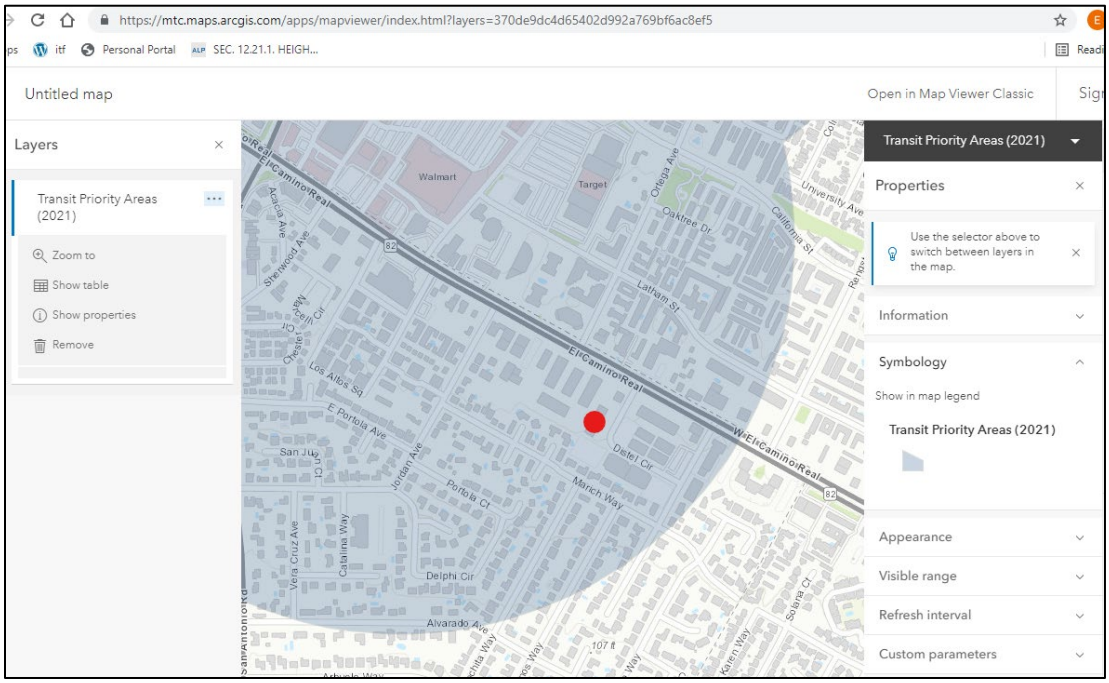
For the purpose of State Density Bonus law, codified in Government Code (GOV) section 65195, a major transit stop is defined as existing or planned rail or bus rapid transit (BRT) stations, ferry terminals served by either a bus or rail transit service, and the intersection of two or more bus routes with a frequency of service interval of fifteen minutes or less during the morning and afternoon peak commute periods. (Public Resources Code (PRC) §§ 21064.3, 21155(b).)[1]

A. Available Resources Identify the Project Site as Being One-Half Mile of a Major Transit Stop

A Transit Priority Area is defined as "an area within one-half mile of a major transit stop that is existing or planned, if the planned stop is scheduled to be completed within the planning horizon included in a Transportation Improvement Program or applicable regional transportation plan." (PRC § 21099(a).) Accordingly, if the Project Site is

[1] State Density Bonus law treats planned major transit stops as existing major transit stops. Limited analysis was performed on whether major transit stops are planned within one-half mile of the Project Site. Our initial conclusion is that no such transit stops are planned, thus our research focused on existing major transit stops.

located in a Transit Priority Area, it is by definition within one-half mile of a major transit stop. The Metropolitan Transportation Commission (MTC), the metropolitan planning organization for the San Francisco Bay Area, identifies the Project Site as being within a Transit Priority Area. The graphic below is taken from the MTC's GIS system, which shades the TPAs in blue; the Project Site is designated by a red dot.



B. A Major Transit Stop is Located at El Camino Real and Showers Drive

Although the MTC identifies the Project Site as being within a Transit Priority Area, it does not identify the major transit stop within one-half mile of the Project Site. Because the Project Site is not within one-half mile of a rail station, ferry terminal, or BRT station,[2] analysis focuses on the intersection of two or more bus routes with requisite service during the peak hour commute periods.

The statute does not define morning and afternoon peak commute hours, nor does the Los Altos Municipal Code (LAMC) or other City documentation. The Santa Clara Valley Transportation Authority (VTA), the City's transit provider, defines peak hours as "the highest morning or evening hour of travel reported on a transportation network or street." As the Congestion Management Agency for Santa Clara County, the VTA's Guidelines can be considered applicable in the absence of any other City guidance.

[2] Note that the Rapid 522 does not appear to have the elements of BRT service identified in the PRC, such as 1) dedicated bus lanes or a separate right-of-way, 2) transit signal priority, 3) all door boarding, 4) fare collection system promoting efficiency, and 5) defined stations. (PRC § 21060.2.) Accordingly, the Rapid 522 does not establish a major transit stop in and of itself.

Typically, peak hours are defined at between 7:00 am and 9:00 am and 4:00 pm and 6:00 pm.

The bus stop at the intersection of El Camino Real and Showers Drive, approximately 1,513 feet from the Project Site, constitutes a major transit stop, as VTA lines 22, 40, and Rapid 522 operate at less than 15 minute intervals between 7:00 am and 9:00 am and 4:00 pm and 6:00 pm, morning and afternoon peak commute periods. A chart demonstrating the bus lines frequency follows.

Northbound/Eastbound				**Southbound*/Westbound**			
Morning Peak Hours (7:00 AM-9:00 AM)		**Afternoon Peak Hours (4:00 PM-6:00 PM)**		**Morning Peak Hours (7:00 AM-9:00 AM)**		**Afternoon Peak Hours (4:00 PM-6:00 PM)**	
Time	**Bus Line**	**Time**	**Bus Line**	**Time**	**Bus Line**	**Time**	**Bus Line**

8:59 AM	22	5:49 PM	522				

*There are two southbound stops for Line 40 at Latham Street, one is south of Latham Street, approximately a third of the distance to El Camino Real. This stop functionally serves to connect Line 40 to Line 22 and Rapid 522.

III. Consistency with Density Bonus Provisions Based on Proximity to a Major Transit Stop

A. Density Bonus

The LAMC provisions contemplate up to a 35% Density Bonus. (LAMC § 14.28.040(C).) Alternatively, the Government Code allows for unlimited density for projects that are 100% affordable (at least 80% low income and up to 20% moderate income) and within one-half mile of a major transit stop. (GOV § 65915(f)(3)(D)(ii).) As the Project is a 100% affordable housing project, using Santa Clara County Measure A funding, City of Los Altos fee waivers, and Low Income Housing Tax Credits, its affordability will be subject to a covenant. Accordingly, as a 100% affordable project, the 165% Density Bonus is permitted by state law. The density increase is not considered an incentive/concession.

B. Height

Projects that are 100% affordable and within one-half mile of a major transit stop are entitled to a height increase of three additional stories, or 33 feet. (GOV § 65915(d)(2)(D).) The Project is designed to be 64 feet in height, 19 feet greater than the 45 feet allowed in the Commercial Thoroughfare zone. (LAMC § 14.50.140.) However, because the 64 feet would be within the additional 33 feet allowed for by GOV § 65915(d)(2)(D), the Project height is consistent with state Density Bonus provisions. Per the Government Code, this height increase is not considered an incentive/concession. (GOV § 65915(d)(2)(D).)

C. Parking

The City's Density Bonus provisions include a parking standard of .5 parking space per bedroom for affordable housing with unobstructed access to a major transit stop within one-half mile. (LAMC § 14.28.040(G)(2)(b).) As the Project consists of 159 bedrooms, this provision would require the Project to provide 80 parking spaces. Alternatively, state Density Bonus provisions do not require any parking for 100% affordable projects with unobstructed access to a major transit stop located within one-half mile of the project site. (GOV § 65915(p)(3).) As the Project proposes to include 90 parking spaces, it would satisfy both the state and local requirement. Use of these provisions is not considered an incentive/concession. (GOV § 65915(p)(9), LAMC § 14.28.040(G)(2)(e).)

D. Incentives, Concessions, and Waivers

Projects that are 100% affordable are entitled to four concessions or incentives. (GOV § 65915(d)(2)(D).) Concession or incentive is defined as "A reduction in site

development standards or a modification of zoning code requirements or architectural design requirements…that results in identifiable and actual cost reductions, to provide for affordable housing costs…." (GOV § 65915(k)(1).) Although entitled to four concessions, we understand that the EAH Housing is requesting two concessions which will result in cost reductions to allow the Project to be built: 1) a reduction in front yard setback from 25 feet to 10 feet, and 2) a reduction in private open space from a 50 square foot average to 25 square foot average.[3] The application for the Project should include findings or evidence demonstrating that reduction of the front yard setback and reduction of the open space would result in cost reductions to provide for the affordable housing. We can assist with those findings at your request.

EAH Housing may also request waivers, apart from an incentive/concession. (LAMC § 14.28.040(H).) The LAMC defines waiver as "the deletion or reduction of any development standards that would otherwise have the effect of physically precluding" a Density Bonus Development. (LAMC § 14.28.040(B)(27).) The Project is seeking a waiver to reduce the front step back of a minimum 10 feet from ground floor façade for stories above 45 feet in height, as maintaining that step back would preclude the Project from being constructed with the identified density. The application for the Project should include findings or evidence demonstrating that imposition of the front step back requirement would physically preclude the construction of the Project. We can assist with those findings at your request.

IV. Alternative Consistency with Density Bonus Provisions

As demonstrated above the Project Site is located within one-half mile of a major transit stop as defined by the Government Code and Public Resources Code. The subsequent analysis demonstrates that the Project Site's proximity to a major transit stop qualifies the Project for unlimited density, increased height, and decreased parking. However, even if the Project Site is not determined to be within one-half mile of a major transit stop, it would still be consistent with state and local Density Bonus provisions based on available concessions and waivers.

Projects that are 100% affordable are entitled to four concessions or incentives. (GOV § 65915(d)(2)(D).) The LAMC does not include a limitation on the number of waivers a project can seek, but rather contemplates the use of multiple waivers by using the plural of the term, waivers, in relevant provisions.[4] State law specifically allows a city to grant multiple waivers. (GOV § 65915(e)(3).)

[3] The staff report for the Joint City Council/Planning Commission Study Session on January 11, 2022 identified a third concession, increase in building height. As noted above, this increase in allowed by state law and not considered an incentive, consistent with GOV § 65915(d)(2)(D).
[4] See LAMC §§ 14.28.040(A), 14.28.040(C), 14.28.040(D)(1)(f), 14.28.040(H).

If the Project Site is not determined to be within one-half mile of a major transit stop, the Density Bonus can still be processed by including the following concessions and waivers.

A. Incentives/Concessions

An incentive or concession is defined as "A reduction in site development standards or a modification of zoning code requirements…that results in identifiable and actual cost reductions, to provide for affordable housing costs." (GOV § 65915(k)(1).) As density is specifically identified as a zoning code requirement, an increase to the identified level, 103.45 dwelling units/acre as opposed to the 38 dwelling units/acre identified in LAMC § 14.50.080, would constitute a modification to a zoning code requirement, and therefore an incentive/concession. As it is not enumerated in LAMC § 14.28.040(F)(1), this would be considered an off-menu incentive or potentially a wavier (discussed below).

A reduction in required parking is specifically cited as an example of a concession or incentive. (GOV § 65915(k)(1).) The LAMC specifically allows for "off-menu parking requirement alterations." (LAMC § 14.28.040(G)(3).) Further, the LAMC vests the City with broad authority to determine the parking required for a project: "This section does not preclude the city from reducing or eliminating a parking requirement for development projects of any type in any location." (LAMC § 14.28.040(G)(4).)

The Project has previously identified the reduction in front yard setback from 25 feet to 10 feet and the reduction in private open space from a 50 square foot average to 25 square foot average as potential incentives/concessions. The staff report for the Joint City Council/Planning Commission Study Session on January 11, 2022 identified both of these as on-menu incentives/concessions.

B. Waivers

As noted above, maintaining the step back requirement would preclude the Project from being constructed with the identified density. Similarly, limiting the Project's height to 45 feet would preclude the Project from being constructed at the identified density. The Project, as designed, includes dwelling unit square footages consistent with code requirements and ground floor amenities, as well as required parking. Reducing the Project to 45 feet would cause the removal of two stories from the Project. Maintaining the identified density while reducing the Project by two stories would likely require 1) redesign of the Project to include rooms of a substandard size, and/or 2) the removal of required parking and Project amenities on the ground floor, which would be displaced by residential units. Accordingly, the increased height would constitute a permissible waiver, as maintaining the 45 foot height limit would reduce the Project's density.

The Project's increased density could also be considered a waiver. As the Project seeks to construct an affordable housing development with a density of 103.45 dwelling units/acre, maintaining the density required by the LAMC would have the effect of physically precluding the Project. Accordingly, the Project's increased density could treated as a waiver rather than an incentive.

330 Distel Circle 5 story building

Weiyan Farmer <[redacted]>
Mon 6/20/2022 11:08 PM

To: Radha Hayagreev [redacted]ov ;Steve Golden <sgolden@losaltosca.gov>;330distelcircle@eahhousing.org
[redacted]

Hi

I heard this from my neighbor, Damian I totally agree with his thoughtful suggestions Hopefully, you will take serious considerations about his suggestions.

Thanks.

Kate

To the Planning Commission and Los Altos City Council,

The 5 story building to be developed on 330 Distel Circle will impact the privacy of several homes located on Marich Way. This is due to the fact that the building windows facing Marich Way will be overlooking the various homes' backyards, swimming pools, and (bedroom) windows. The current trees provide little coverage due to the height of this new development. None of the houses developed on Marich Way or in the neighborhood, expected such a tall construction to be developed. I would like to request the developer of this building to plant additional trees (or equivalent tall vegetation) closer to the actual impacted homes so privacy can be respected (see image below). Alternatively, the windows of the building facing Marich should be reduced to small windows close to the ceiling of the apartment units so people inside the unit cannot see down while light can still go through. Looking forward to hearing from you.

Thanks

Subject: Re: 330 Distel Circle housing development impacting my family privacy

Steve, thanks for the note. Based on this, I would like to file a formal public comment, below. Would you let me know what are the next steps? Should I get in touch with the developer as well?

To the Planning Commission and Los Altos City Council,
The 5-story building to be developed on 330 Distel Circle will impact the privacy of several homes located on Marich Way. This is due to the fact that the building windows facing Marich Way will be overlooking the various homes' backyards, swimming pools, and (bedroom) windows. The current trees provide little coverage due to the height of this new development. None of the houses developed on Marich Way or in the neighborhood, expected such a tall construction to be developed. I would like to request the developer of this building to plant additional trees (or equivalent tall vegetation) closer to the actual impacted homes so privacy can be respected (see image below). Alternatively, the windows of the building facing Marich should be reduced to small windows close to the ceiling of the apartment units so people inside the unit cannot see down while light can still go through. Looking forward to hearing from you.

FW: EAH Housing Proposal 330 Distel Circle

Yvonne Dupont <ydupont@losaltosca.gov>
Tue 6/7/2022 8:46 AM
To: Radha Hayagreev rhayagreev@losaltosca.gov

From: Steve Folkman [redacted]
Sent: Monday, June 06, 2022 10:09 PM
To: Public Comment PC PCpubliccomment@losaltosca gov ; Jonathan Weinberg jweinberg@losaltosca gov
Subject: EAH Housing Proposal 330 Distel Circle

Dear Planning Commission Members and Council Liaison,

I am a resident of Marich Way, the residential street directly behind Distel Circle
Many of the properties on Marich (admittedly not mine) share a backyard fence with other properties on Distel Circle I am concerned that allowing a 5 story building on Distel Circle sets precedent for other 5 story buildings on Distel CIrcle.

I would ask that the Planning Commission NOT APPROVE a 5 story structure but limit the structure to 3 stories. I am concerned that if a 5 story building is approved on Distel Circle, then the next developer will argue that their development should be allowed to be 5 stories also. Perhaps, then, PAMF may ask to expand their facility to 5 stories, leading to 5 story buildings sharing backfences with residents on Marich Or PAMF may sell to a developer who demands "equal treatment" to a 5 story development on the existing PAMF property.

Increased traffic on Marich and surrounding neighborhood streets is also a concern. Consider a trip from Distel Circle intended northwest bound on El Camino or southbound on San Antonio Road (towards downtown Los Altos!).
The traveller is most likely to turn right out of the complex to avoid the unregulated intersection at El Camino and Distel Circle. So the main thoroughfare route would be left out of Distel Circle onto Distel Dr, then through 6 lights, or potential stops, [Distel Dr / El Camino left turn, Distel Circle crosswalk, Ortega, Showers, San Antonio / El Camino] to get through the intersection at El Camino and San Antonio. Alternatively a right turn onto Distel Drive leads to a path down Marich, Jordan and Portola with a single stop sign at Marich before the next traffic control at the light at San Antonio / Portola.

Even traffic northbound across El Camino at San Antonio might use the route down Marich to save passing through 2 3 traffic lights

Adding to the undesirableness of a trip down El Camino will be the increased traffic density that occurs on El Camino when the proposed bike line is added.

Note that more than 200 residents of the new 5150 El Camino project headed northwest on El Camino or south on San Antonio will find it advantageous to use the Marich / Jordan / Portola corridor for access to or north of San Antonio Rd.

It is not the type of housing that is at issue here, but rather the precedent and size of the proposed developments ***I am concerned that the committee is not considering the aggregate of the effects of multiple projects on the residents of Marich Way and the surrounding neighborhood.***

Best regards,
Steve Folkman

ATTACHMENT G

330 Distel Circle Los Altos, CA **Objective Standards Compliance Chart (September 2021)**		5.25.22	
14.50.170	Design Control (CT)	Comment	Waiver/Concession/Density Bonus Permitted/Council Discussion
A. Building Placement.			
	A minimum 75 percent of ground-floor building frontages facing El Camino Real must be built at the minimum setback line. This standard applies to the building frontage only (exclusive of side setbacks).	Not facing ECR	
B. Building Massing and Articulation.			
	1. Upper-story Step-backs.		
	A. Front: Minimum 10 feet from ground floor façade for fifth story and above	Not stepping back on 4th and 5th floor. Need building area to get to 90 units	Concession
	B. Street Side: Minimum 10 feet from ground floor façade above 45 feet in height		
	2. Vertical Articulation.		
	a. When a building façade exceeds 100 feet in length along a right of way, it must be separated into primary façade bays no greater than 50 feet and secondary façade bays defined by a recess a minimum of 3 feet deep and 10 feet wide	Primary façade: Comply with 50ft bays. Secondary façade: Comply with 10ft width, and 3ft recess from the solar shade to the secondary wall.	
	b. A minimum one entrance shall be provided per 150 linear feet along El Camino Real and per primary façade bay along all other rights of way	Not facing ECR, one ped entrance and vehicle entrance provided on Distel Circle	
	c. The eave/roof of a secondary façade bay shall be no higher than the corresponding elements of the primary façade bay.	Secondary façade bay top of roof about 24inches less than the Primary façade bay	
3. Horizontal Articulation. New facades and façade modifications along a street or civic space shall be designed to visually express a base, middle, and top.			
	a. One or more of the following patterns shall be used to define the base:		
	i. Watertable: Base material extends from grade to between 8 and 54 inches above grade	Not used	
	ii. Podium: The base material encompasses the lowest story (or stories) of the building, with or without mezzanine(s), and terminates in a sill, string course, or cornice at its upper bound. (Multi-story buildings only.)	Comply- Mass timber base	
	iii. Watertable + Cornice/String Course: A watertable using the base material is combine with a cornice or string course at the lowest story's upper bound, including any mezzanine (multi-story buildings only).		
	b. The top of each building mass/bay shall be defined by elements spanning the full length of the façade of the mass/bay. Such elements may include a cornice, eave and/or gable(s), or other elements listed under Section 17.50.170.B.6. These elements shall be consistent with the overall architectural style of the building mass/bay.	Top of parapet and the solar shade as cornice	
4. Adjacencies.			
	a. Facades Adjacent to an R-1 District.	Does not apply. We are not adjacent to R-1. Adjacent to CT and O	
	b. Storefront Facades Adjacent to Storefront Facades	Does not apply. No adjacent buildings with retail storefront facades we are adjacent to	
	c. Compatibility with Adjacent Shorter Buildings with Height Difference of One Story or More. When adjacent to an existing shorter building with a height difference of one story or more, a proposed building must utilize two or more of the following strategies:		
	i. Incorporate the uppermost floor into the roof form		
	ii. Break the mass of the building into smaller modules through changes in wall plane, setbacks, and/or height	Does not apply. However, our storefront is similar in proportion to nearby office.	
	iii. Match window heights and/or proportions	Does not apply. However, large glazing elements similar to offices nearby.	
	v. Relate roof cornices and moldings at floor lines	Does not apply. However, 14ft office buildings adjacent work with our level 1 base	

330 Distel Circle Los Altos, CA **Objective Standards Compliance Chart (September 2021)**		5.25.22	
14.50.170	Design Control (CT)	Comment	Waiver/Concession/Density Bonus Permitted/Council Discussion
5. Privacy and Line of Sight		Comply	
	a. Primary living spaces and balconies located along a side setback shall orient principal windows and balconies toward the front and rear of the building	Comply	
	b. Where windows are within 10 feet of and oriented toward an interior side setback, glazing shall either be a minimum 30-degree angle measured perpendicular to the adjacent side setback line, have minimum sill height of 42 inches, or be opaque	Noted. On our side yards we are providing windows with a minimum sill height of 42 inches	
	c. The maximum sill height for an ingress/egress window is 44 inches from finished floor	Noted. We are Type IIIA. Egress Windows not required	
6. Roofline and Roof Design			
	a. Roof designs shall be limited to: i. Hipped; ii. Gable; iii. Shed; iv. Dormer; v. Parapet	We are providing a parapet	
	v. Parapet - (a) When used on the first or second floor, a parapet longer than 25 feet in length must include at least one but not more than two of the following design elements to break up the length of the parapet: (1) Steps; (2) Curves; (3) Angled surfaces	Parapet not provided on level 1 and 2 except at the small portion where Distel turns at the multipurpose room. That section is <25ft	
	(b) The length of a parapet segment on the third floor and above may not exceed 25 feet	No parapet on third floor	
	b. When the top story is stepped back and embedded in a sloped roof form, the floor below must (and other floors may) be stepped back to meet the slop of the top story	Top story is not stepped back. Would reduce the number of units. See exhibit A1.2	
	c. Building facades facing an R-1 district must have a hipped or gable roof and may incorporate dormers.	Do not face R-1	
	d. Roofline/parapet at corners shall not exceed roofline/parapet of adjacent wall planes by more than 24 inches	The difference between primary and secondary facades is 24" or less.	
C. Building Design			
	1. Façade Design		
	a. Building facades shall be arranged in an orderly composition of bays, defined by vertically aligned openings alternating horizontally with solid walls or columns. The pattern shall be visually expressed through the spacing of openings, recesses, eaves, inset panels, cornices, overhangs, trellises, exposed rafters, columns, or bay windows.	Bays on levels 2-5 provided	
	b. The pattern may be shared between the ground floor and upper stories provided the ground floor exhibits enhanced detail or modulation.	Ground floor has different articulation with mass timber columns and storefront	
	c. Residential facades shall incorporate at least one element that signals habitation, such as bay windows, or balconies.	Juliette balconies provided on Distel (area constraints). Other sides and courtyard have balconies	
	d. Non-glazed wall areas (blank walls) must be enhanced with architectural details, landscaping, and/or landscaped trellises or lattices.	No blank walls	
	2. Ground Level Transparency. A minimum 60 percent of commercial ground floor street-facing facades between 2 and 7 feet in height shall be transparent window surface. Opaque, reflective, or dark tinted glass is not allowed.	No commercial along Distel. However, large, transparent glazing area provided.	
	3. Pedestrian-Scaled Entrances		
	a. Buildings more than 70 feet in length along a right-of-way must incorporate at least one forecourt frontage on the right-of-way-facing façade. Required forecourts must also comply with the standards of Section 14.50.170.C.3.b.v. below	We comply with ii: Shopfront. Awning and mass timber columns do not exceed 25ft	
	b. Each street-facing building façade must incorporate at one of the following entry features. See Section 14.66.275 (Entrance Type Standards) for design standards applicable for each entrance type listed: i. Stoop; ii. Shopfront; iii. Gallery; iv. Arcade; v. Forecourt; vi. Terrace	We comply with ii: Shopfront. Awning and mass timber columns do not exceed 25ft	
	ii. Shopfront (a) Shopfronts more than 25 feet in width must incorporate variations in bulkhead, awnings, materials and/or color to visually articulate the shopfront into modules not to exceed 25 continuous feet.	Our storefront glazing is separated by columns that are less than 25ft	
	v. Forecourt (a) Forecourts must feature at least one entry to a shop and/or second floor use.		

330 Distel Circle Los Altos, CA **Objective Standards Compliance Chart (September 2021)**		5.25.22	
14.50.170	Design Control (CT)	Comment	Waiver/Concession/Density Bonus Permitted/Council Discussion
	(b) The size of the forecourt must be appropriate relative to the size of the building. The maximum ratio of building	Does not apply- we are complying with Shopfront	
	(c) Forecourt must be minimum 15 feet in width.		
	(d) Forecourt must be enclosed on at least three sides by buildings.		
	(e) Forecourt must remain open to the sky (arbors and trellises are allowed).		
	c. Primary Entrance Location(s). - Locate primary entrance on the front right-of-way.	Lobby entry along Distel	
	d. Individual Entries. - Ground floor residential units facing a street must provide individual entries along the street frontage.	No ground floor residential	
	e. Corner Entrances. - Chamfered corners must incorporate a building entrance. Any required entrances may be provided on the corner of the building assuming one of the intersecting sides is a primary frontage.	No corner entrances	
	f. Street-facing Entries to Upper Floors. - Street-facing entries to upper floors shall be equal in quality and detail to storefronts. This standard may be satisfied through two or more of the following:	No street facing entries to upper floors	
	i. Dedicated awning, canopy, or other roof element	Awning provided	
	ii. Stairs with a single color applied to treads and a contrasting color or pattern applied to risers	Not selected	
	iii. Dedicated light fixture(s)	Light figures provided	
	iv. Decorative street address numbers or tiles	Decorative address numbers provided	
	v. Plaque signs for upper-floor business tenants	Not selected	
	g. Entry Protection. - Primary street-facing entrances shall be protected by a recess in the building frontage at least 3 feet deep or by a projection extending outward at least 3 feet measured horizontally from the entrance, and wide enough to clear the building entryway on both sides.	Primary entry more than 3ft deep	
	i. Protection may be coterminous with an accent element	Noted	
	ii. Protection may take the form of an extended eave, overhang, awning, door canopy, gallery arcade frontage, or other element that provides shade and shelter from the elements.	Protection provided via awning and arcade on Distel	
	iii. The lowest edges of a projected awning or door canopy shall have a vertical clearance of no more than 8 feet.	Our awning is underneath the podium base. We are not extending out as the diagram shows.	
	iv. Recessed entries shall differentiate pavement within the recess through the use of a dedicated paving material or pattern.	Noted	
	h. Accent elements demarcating building frontage, entrance, and common open space areas shall not exceed the height of the ground floor story. Roof elements are excepted.	Noted	
4. Ground Floor Floor-to-Ceiling Height			
	a. Minimum 24 inches taller than typical upper floor floor-to-ceiling height where ground floor is non-residential.	Not applicable	
	b. Minimum 12 inches taller than typical upper floor floor-to-ceiling height where ground floor is residential.	Noted. We are 5ft taller than typical residential to fit mechanized parking	
5. Interior Courtyard. Interior Courtyards must be:			
	a. Partially visible from the street and linked to the street by a clear accessible path of travel.	Raised courtyard on level 2 not visible from street. Creating privacy for single family neighbor, western light for courtyard. Removing a leg of the building to make the courtyard visible would decrease unit and parking area. Access to courtyard and exit via stair.	Concession
	b. Enclosed on at least two sides by buildings.	Comply	
	c. Open to the sky (arbors and trellises are allowed).	Comply	
	d. A minimum width of 20 feet and a minimum area of 400 square feet.	Comply	
6. Paseos. Paseos must be:		No paseos in project	

330 Distel Circle Los Altos, CA **Objective Standards Compliance Chart (September 2021)**		5.25.22	
14.50.170	Design Control (CT)	Comment	Waiver/Concession/Density Bonus Permitted/Council Discussion
	a. A minimum of 10 feet for through-block paseos.	No paseos in project	
	b. A minimum width of 4 feet for entries to courtyards or individual single businesses.	No paseos in project	
D. Window Design. Vinyl windows are prohibited on facades visible from a right-of-way.		Vinyl windows not provided along Distel Circle. See elevations.	
E. Building Materials			
	1. Primary shall mean 50 percent or more of a façade surface area excluding transparent surfaces. Permitted primary cladding materials are limited to:		
	a. Stucco (minimum 2-coat stucco; synthetic stucco or EIFS not allowed)	Stucco proposed	
	b. Siding (lap, vertical, panelized, or shingle)	Not used	
	i. All siding shall be wood, composite wood, or cement fiberboard.	Not used	
	ii. Wood siding shall be painted or stained.	Mass Timber at base to be stained	
	iii. Vinyl and aluminum siding are not permitted.	Not used	
	c. Stone	Not used	
	d. Brick	Not used	
	e. Concrete (board-form only).	Not used	
	2. Secondary shall mean less than 50 percent of a façade surface area excluding transparent surfaces. Permitted secondary cladding materials are limited to:		
	a. Stucco (minimum 2-coat stucco; synthetic stucco not allowed, EIFS not allowed)	Stucco proposed	
	b. Siding (lap, vertical, panelized, or shingle)	Not used	
	i. All siding shall be wood, composite wood, or cement fiberboard.	Not used	
	ii. Wood siding shall be painted or stained.	Not used	
	iii. Vinyl and aluminum siding are not permitted.	Not used	
	c. Stone (building base only)	Not used	
	d. Brick (building base only)	Not used	
	e. Tile	Not used	
	f. Metal (matte finish or Cor-ten)	Matte finish for solar shades proposed	
	i. Ribbed metal, titanium, and mirrored finishes are not permitted.	Noted	
	g. Concrete Masonry Units (water table and building base only, and not allowed on any façade facing a right-of-way or a single-family zone)	Not used	
	h. Concrete (building base only, board-form only, cast concrete not permitted)	Not used	
	3. On attached elements, such as bay windows, orioles, and balconies.	Incomplete Statement	IMC has an incomplete senten
F. Ground Level Open Space. Where any required front, rear, or side yard setback is 10 feet or greater, on-site ground level open space shall be provided within the setback.		Provided	
	1. The ground level open space shall be usable and accessible.		
	2. The minimum dimension for ground level open space shall be 8 feet.		
G. Landscaping and Paving		External driveway not provided	
	1. Landscaping must be placed on each side of a driveway at grade or in raised planters.	Noted	
	2. Landscape elements shall be integrated with the building architecture, parking, and streetscape. Recommended patterns shall include, but are not limited to:		
	a. Planters for flowers and shrubs within street frontage.	Noted	
	b. Landscape buffers between parking spaces and building facades.	Noted	
	c. Landscaping within and/or on walls adjacent to courtyards, open spaces, and setbacks.	Noted	

330 Distel Circle Los Altos, CA **Objective Standards Compliance Chart (September 2021)**		5.25.22	
14.50.170	Design Control (CT)	Comment	Waiver/Concession/Density Bonus Permitted/Council Discussion
3. See Sections 14.66.180 (Maintenance of Landscaped Areas) and 14.70.070 (Landscaped Strips) for additional landscaping standards.		Noted	
H. Parking Design and Access			
1. Where structured park	a. Lined with ground-floor non-residential uses at least 30 feet deep as measured from the front façade; or	Comply. Amenity provided in front of parking	
	b. Designed such that the floor elevation is a minimum 4 vertical feet below the elevation of the adjacent sidewalk.	Not applicable. Comply with a. above	
		Structured parking not visible from Distel Circle	
2. Visible structured park	a. Regular punched openings designed to resemble windows of habitable spaces	Not applicable	
	b. Trellis/living wall	Not applicable	
	c. Custom textured or decorative screening	Not applicable	
3. Entrances to Parking Fa	a. A maximum of two curb cuts for one-way traffic and one curb cut for two-way traffic may be permitted per street frontage per lot.	Comply. One curb cut provided.	
	b. Controlled entrances to parking facilities (gates, doors, etc.) shall be located a minimum 10 feet from the back of sidewalk.	Comply. Gate set back from back of sidewalk	
	c. Entrances to parking facilities along a street frontage shall be separated by a minimum of 60 feet.	Only one parking entrance provided	
	d. Where possible, curb cuts serving adjacent parking facilities shall be shared.		
I. Site Circulation and Access		Not applicable	
1. New development on abutting lots shall be designed to allow cross-access for internal pedestrian, bicycle, and vehicular circulation systems.		Noted	
2. Bicycle racks shall be p	a. In or within 50 feet of every parking area; and	Provided in indoor bicycle rack	
	b. Within 20 feet of at least one building entrance.	Provided in outdoor bicycle rack	
J. Services Areas and Screening			
	1. Service areas must be located at the rear of lot.	Trash room within building.	
	2. Service areas must be enclosed on enclosures that are architecturally consistent with primary building in terms of materials, colors, and style.	Noted	
K. Additional Design Standards. See Section 14.66.280 for additional design standards applicable to all residential mixed-use development in the CT District.			
14.66.280	**New Section 14.66.280 Design Standards Applicable to all multifamily and residential mixed use development**		
A. Architectural Integrity			
	1. Material palette on all floors above the ground floor, not including floors contained with a sloped roof form, must be consistent.	Achieved. Levels 2-5 are primarily stucco with metal solar shades	
	2. Change in material may occur only at the inside corner of a change in wall plane. Material must wrap around outside corners.	Noted. Comply	
B. Firewalls and Visible Sidewalls			
	1. Any exposed surfaces shall be consistent with and expressive of the overall building design and shall be finished in the same palette of materials as the rest of the building. Front façade finished materials, façade cornices, wall top projections, decorative details, and moldings must be carried and repeated on the side wall.	Noted	
	2. At least one of the following techniques must be employed on firewalls/visible sidewalls:	Noted	
	a. Incorporation of windows where code allows and adequate fire protection can be provided.	Noted	
	b. Gable and hip roofs to vary the height and appearance of sidewalls.	Not applicable	
	c. Inset panels.	Noted	

330 Distel Circle Los Altos, CA **Objective Standards Compliance Chart (September 2021)**		5.25.22	
14.50.170	Design Control (CT)	Comment	Waiver/Concession/Density Bonus Permitted/Council Discussion
	d. Stepped back front façade of upper floor(s) to vary the sidewall profile.	Noted	
C. Durability. Exterior finish materials shall have an expected lifespan of no less than 30 years.		Noted	
	1. Features to direct rainwater away from exterior walls shall include one or more of the following:	Noted	
	a. Cornice , with drip at outer edge of corona (minimum 12-inch projection).	Noted	
	b. Projecting eaves (minimum 12-inch projection)	Noted	
	c. Scuppers, with our without downspouts (min. 12-inch projection if no downspouts are used)	Noted	
	d. Gutters, with downspouts or rain chains.	Noted	
	i. Downspouts shall be one color and shall not change colors to match the wall behind them.	Noted	
	ii. Downspouts shall be round or rectangular, made of copper or metal.	Noted	
	iii. Downspouts shall not break façade profiles (such as a cornice) but shall wrap around projecting a profile	Noted	
	2. Exterior timber shall be protected from decay by one or more of the following:	Noted	
	a. Material properties (e.g. cedar)	Noted	
	b. Staining and sealing	Wood Mass Timber elements to be sealed	
	c. Painting	Noted	
	3. Exterior ferrous metals shall be protected from corrosion by one or more of the following:		
	a. Metallurgical properties (e.g. galvanized, stainless, or weathering still)	Noted	
	b. Painting or other impermeable coating.	Noted	
	4. Windows		
	a. All windows must be recessed a minimum of 3 inches from the outer wall surface for all Commercial and Multi-family zones except the CT zone.	We are CT zone. Does not apply	
	b. Window openings surrounded by masonry finish materials shall include a lintel that that is taller than the sill/apron and proportional to the load it appears to carry.	No masonry. Does not apply	
D. Materials: Materials shall appear only in places and configurations appropriate to their structural properties.			
	1. Where walls use masonry finish materials (e.g. stone, brick, CMU), any openings spanned by the material must be either:	No masonry. Does not apply	
	a. Arched, with each arch defined by a continuous series of voussoirs and a single keystone at the apex; or	No masonry. Does not apply	
	b. Rectangular, with a continuous lintel spanning the opening and extending beyond by 4 to 6 inches at each end. Vertical dimensions of the lintel shall be no less than 1/2 of the clear span. Steel lintels are exempt from this minimum vertical dimension.	No masonry. Does not apply	
	2. When used, exterior timber posts, beams, rafters, purlins, brackets, etc. shall be joined according to structural principles.	Noted	
	3. Where a change in material is desired, all façade materials shall turn the corner and terminate into a vertical element of the façade composition.	Noted	
	4. Materials Defining Building Elements		
	a. Base. For multistory elements, the base of the building shall be defined by a distinct material selected from among the following: Stone, brick, concrete, CMU, or stucco ("base material").	Wood serves as distinct material. Wood and storefront glazing proposed at the base.	Waiver
	b. Body. Typical materials for the main body of the building include wood, fiber cement, brick, stone, or stucco. If brick is used, it must extend vertically to the base; if stone is used, it must extend vertically to the foundation.	Stucco proposed for body	
	c. Parapet. Parapets shall terminate in a parapet cap of stone, concrete tile, metal, or molded stucco.	Noted	

330 Distel Circle Los Altos, CA **Objective Standards Compliance Chart (September 2021)**		5.25.22	
14.50.170	Design Control (CT)	Comment	Waiver/Concession/Density Bonus Permitted/Council Discussion
	d. Bays. Horizontal changes in finish material shall occur at the boundaries between bays rather than within a bay.	Noted. Comply	
	e. Arcades. Arcades shall be supported by columns or piers in concrete/cast stone, fiberglass, or stucco. Archivolts and imposts shall be expressed using similar materials/appearance.	Arcades not proposed	
	f. Structural elements. Structural elements visible on the building exterior (e.g. rafters, purlins, posts, beams, balconies, brackets, trusses, columns, arches, etc.), even when ornamental, shall be sized and spaced according to their corresponding structural role, and arterials shall be selected accordingly (see A. architectural integrity).	Noted	
	5. Materials allowed for Building Details/Ornament	Noted	
	a. Wood	Noted	
	b. Metal (wrought iron, copper, aluminum, tin)	Noted	
	c. Glass fiber reinforced concrete (GFRC)/fiberglass	Noted	
	d. Terra Cotta	Noted	
	e. Tile	Noted	
	f. Plaster	Noted	
E. Colors		Noted	
	1. A maximum of 4 colors shall be applied to be the building façade:		
	a. 1 primary color comprising 50 percent or more of the façade excluding	Comply: Blue/Green primary	
	b. 1 secondary color comprising no more than 30 percent of the façade excluding transparent surfaces.	Comply: Secondary insets are gray	
	c. 1 tertiary color comprising no more than 20 percent of the façade excluding transparent surfaces.	Noted. No other color suggested	
	d. 1 accent color for use of trim and architectural details.	Balconies are composite wood color	
	2. Materials with intrinsic, naturally-occurring coloration shall not count towards this maximum. Such materials are limited to copper, Corten steel, unpainted wood, tile, and brick. Materials with prefinished color (stucco, cement fiberboard, colorized metal) shall count towards the maximum.	Mass timber applies here	
	3. Changes in color may occur:		
	a. To articulate changes between base, body, and top portions of a façade, which must be separated by a cornice or profile or a change in material and must remain consistent across the length of the façade by.	Noted. Comply	
	b. When a portion of the elevation is articulated as a separate building with a break in the roof form and a step back in the façade plan 5 feet or greater or step up in façade height at least 10ft.	Noted. Comply	
	c. On attached elements, such as bay windows, orioles, and balconies.	Noted. Comply.	
F. Façade Lighting: Façade lighting shall be incorporated into all storefront design and all facades facing an R-1 district. Fixtures shall be:		Not facing an R-1 district. Facing O and CT. We will be providing lighting along Distel along storefront and will review lighting in lighting design further as the design develops.	
	1. Shielded and directed onto the building façade.	Noted	
	2. Consistent in style with the primary building.	Noted	
G. Habitable Outdoor Space. Private, habitable outdoor space supported by the building structure.			
	1. Pergola: Posts supporting beams with brackets, which in turn support purlins and/or rafters. Posts shall be no narrower in any dimension than 3.5" or 1/20 of the unbraced post length, whichever is greater.	Does not apply	
	2. Trabeation: Post or columns supporting beams with or without brackets, which in turn support either an additional floor level (for multi-story porches/balconies) or a full roof system based on rafters and or purlins with decking and finish material. Posts shall be no narrower in any dimension than 3.5" or 1/20 of the unbranched post length, whichever is greater. The distance between posts shall be no wider than the total post height.	Does not apply	

330 Distel Circle Los Altos, CA **Objective Standards Compliance Chart (September 2021)**		5.25.22	
14.50.170	Design Control (CT)	Comment	Waiver/Concession/Density Bonus Permitted/Council Discussion
	3. Arcuation: Encompassed by walls that are penetrated by arched openings bounded by either columns or piers. The ratio of the column diameter [at lowest part of shaft] to column height shall be no less than 1:10 and no greater than 1:7. Width of piers at corners [abutments] shall be no less than 1/3 of the opening width; piers between multiple arched openings may be narrower.	Does not apply	
	4. Rectilinear: Bounded by square/rectangular piers framing rectilinear wall openings. If lintels are expressed on the façade, they shall extend over the piers by 4"-6" at each end. Piers shall be no narrower in any dimension than 15.5" or 1/6 of the opening width, whichever is greater. Piers at corners shall be wider than the piers between openings.	Does not apply	
	5. Fabric Shading: Shaded by fabric elements such as awnings or stretched canvas, secured to the building structure, sheltered by Main Roof Form, supported by other building volumes.	Does not apply	
	a. Cantilevered balconies shall be secured architecturally to the wall below by brackets.	The floor system and brackets above will support the cantilevering balconies.	
	b. Bracket material shall be consistent with that of the balcony's floor structure	No brackets proposed	
H. Historic Preservation	Not applicable		
I. Sustainability in Design			
	1. All new construction shall incorporate landscaping and fenestration to passively cool the building; energy-efficient HVAC; and energy efficient lighting.	Noted	
	2. All energy generation devices must blend with the building color.	Noted	
	3. All on-site landscaping shall be drought-resistant and require minimal irrigation.	Noted	
J. On-site landscaping			
	1. Trees proposed within street-facing setbacks must be selected from the Los Altos Street Tree Planting List	Noted	
	2. Trees planted on the south side of the building must be deciduous.	Noted	
	3. Species shall be selected and located according to direct sunlight needs.	Noted	
	4. Vegetation shall be installed along all exposed east and west facing walls.	Noted	
	5. Groundcovers shall be planted over a minimum 50 percent of landscaped areas to prevent ground reflection and keep surfaces cool.	Noted	
	6. When parking is tucked under a building, landscape planters must be provided to break up the continuous paving at the building's edge.	Parking in structure, not tuck under	
K. Screening			
	1. Rooftop mechanical equipment must be screened from public view.	Noted	
	2. Barbed wire, chain-link, and razor wire are not permitted.	Noted. Not proposed

Tree Assessment Plan

Preliminary Arborist Report
330 Distel Circle, Los Altos CA

Introduction and Overview
EAH Housing is proposing to redevelop the property located at 330 Distel Circle, in Los Altos. The plan proposes to construct affordable housing using modern, flexible and sustainable building approaches. HortScience | Bartlett Consulting (HBC), Divisions of The F. A. Bartlett Tree Expert Co. was asked to prepare a **Preliminary Arborist Report** to meet the City of Los Altos' requirements.

This report provides the following information:

1. An assessment of trees within and immediately adjacent to the project site.
2. An assessment of the impacts of constructing the proposed project on the trees.
3. Preliminary recommendations for tree preservation and removal.
4. Preliminary guidelines for tree preservation during the design, construction and maintenance phases.

Assessment Methods
Trees were assessed on July 29, 2021. All trees measuring 6" or greater in diameter, within the project area or with portions of their crowns extending into the project area, were included (per City of Los Altos Chapter 11.08, Tree Protection Regulations). The assessment procedure consisted of the following steps:

1. Identifying the tree as to species;
2. Tagging each tree with an identifying number and recording its location on a map;
3. Measuring the trunk diameter at a point 48" above grade;
4. Evaluating the health and structural condition using a scale of 1–5:
   - ***5*** - A healthy, vigorous tree, reasonably free of signs and symptoms of disease, with good structure and form typical of the species.
   - ***4*** - Tree with slight decline in vigor, small amount of twig dieback, minor structural defects that could be corrected.
   - ***3*** - Tree with moderate vigor, moderate twig and small branch dieback, thinning of crown, poor leaf color, moderate structural defects that might be mitigated with regular care.
   - ***2*** - Tree in decline, epicormic growth, extensive dieback of medium to large branches, significant structural defects that cannot be abated.
   - ***1*** - Tree in severe decline, dieback of scaffold branches and/or trunk; most of foliage from epicormics; extensive structural defects that cannot be abated.
5. Rating the suitability for preservation as "high", "moderate" or "low". Suitability for preservation considers the health, age and structural condition of the tree, and its potential to remain an asset to the site for years to come.
   - ***High***: Trees with good health and structural stability that have the potential for longevity at the site.
   - ***Moderate***: Trees with somewhat declining health and/or structural defects than can be abated with treatment. The tree will require more intense management and monitoring, and may have shorter life span than those in 'good' category.
   - ***Low***: Tree in poor health or with significant structural defects that cannot be mitigated. Tree is expected to continue to decline, regardless of treatment. The species or individual may have characteristics that are undesirable for landscapes, and generally are unsuited for use areas.

Description of Trees

Twenty-seven (27) trees were assessed, representing 11 species (Table 1, following page). Eight (8) off-site trees with portions of their crowns extending onto the development site were included in the assessment (#449, 450 and 452-457). Descriptions of each tree are found in the ***Tree Assessment Form*** and locations are plotted on the ***Tree Assessment Plan*** (see Exhibits).

The site was a single-story office building, with perimeter landscaping. Vegetation at the site was primarily exotic species, with a handful of native coast live oaks and coast redwoods.

Nine (9) holly oaks made up the backbone of the landscaping, with #431-435 on the north side of the building and #440, 441, 445 and 450 (off-site) on the south side of the building. The majority of these were young to semi-mature, with trunk diameters from 7" to 15". Holly oak #433 was mature at 20" in trunk diameter and the only holly oak in good condition (**Photo 1**). Most had not been provided sufficient space for full development and were crowded by adjacent trees, producing one-sided crowns and leaning trunks. Seven holly oaks were in fair condition, #435 was in poor and #433 was in good condition.

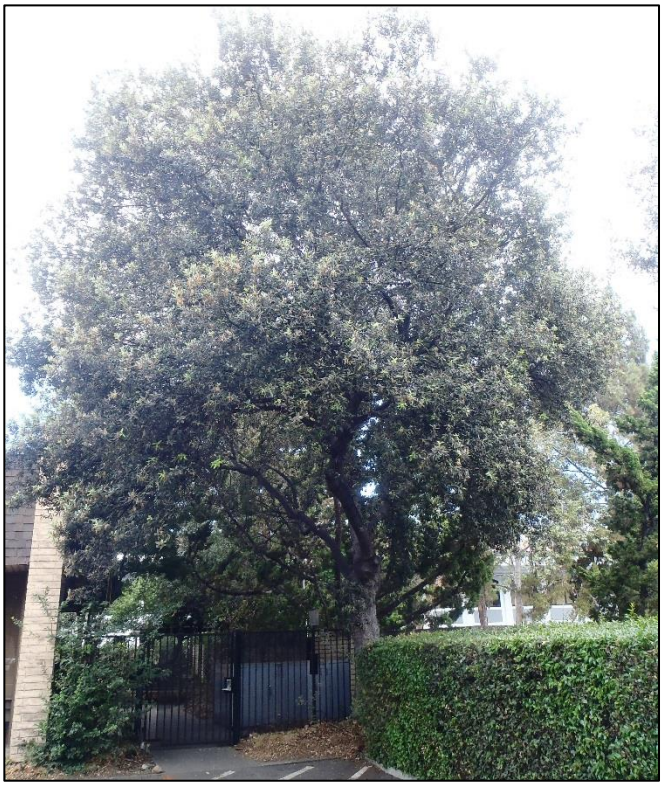

Photo 1: Looking north at holly oak #433. This was the only holly oak on the site that was mature (20" in diameter) and in good condition.

Four evergreen pears were growing adjacent to the building, with #437 and 438 on the west side and #443 and 444 on the east side. They were semi-mature (11" to 15" in trunk diameter) and primarily in fair condition, with #443 in good condition. Most leaned as a result of competition for light and #443 and 444 had been planted in close proximity to the existing building and parking lot, displacing the adjacent asphalt by an estimated 5".

Three coast live oaks were assessed, with #436 located in the northwest corner of the site and #449 (off-site) and 451 located to the south of the building. Coast live oak #436 was young (9" in diameter) and in fair condition. Coast live oaks #449 and 451 were both mature and in good condition.

Sweetgums #447 and 448 were growing in the planter behind the sidewalk along Distal Circle. Sweetgum #447 was young (10" in diameter) and #448 was semi-mature at 14" in diameter. Both were in fair condition, but #447 was in decline, with a very sparse crown.

Table 1. Tree condition and frequency of occurrence.
330 Distel Circle, Los Altos

Common Name	Scientific Name	Condition Rating			No. of trees
		Poor (1)	Fair (3)	Good (4-5)	
African fern pine	*Afrocarpus falcatus*	-	-	1	1
Hollywood juniper	*Juniperus chinensis 'Kaizuka'*	-	2	-	2
Sweetgum	*Liquidambar styraciflua*	-	2	-	2
Olive	*Olea europaea*	-	-	1	1
Calif. sycamore	*Platanus racemosa*	-	-	1	1
Callery pear	*Pyrus kawakamii*	-	3	1	4
Coast live oak	*Quercus agrifolia*	-	1	2	3
Holly oak	*Quercus ilex*	1	7	1	9
Coast redwood	*Sequoia sempervirens*	-	2	-	2
Mexican fan palm	*Washingtonia robusta*	-	-	1	1
Xylosma	*Xylosma congestum*	-	1	-	1
Total		**1**	**18**	**8**	**27**
		4%	66%	30%	100%

A row of off-site tree were assessed along the northern fence line and included the following. All of the trees had been planted too close to the wall, with the bases of trees #452 and 454 growing against the wall (**Photo 2**).

- Hollywood junipers #452 and 453. Both were in fair condition but leaned.
- Coast redwoods #454 and 456 were mature and in fair condition. Both had sparse canopies.
- Xylosma #455 was in fair condition, with a low canopy that extended W. over the fence.

Photo 2: Looking southwest at trees #452-456 (L to R). The row of off-site trees were in fair condition but had been planted close to the wall separating the two properties. Inset below shows the base of coast redwood #454, which was growing against the wall.

The remaining species were represented by the following individuals:

- Mexican fan palm #439 was growing on the west side of the building. It was mature and in excellent condition.
- African fern pine #442 was growing in the planter in front of the building, adjacent to evergreen pears #443 and 444. It was mature (22" in diameter) and in good condition. However, it too had been planted too close to the building and parking lot and was displacing the adjacent asphalt by an estimated 5".
- Olive #446 was multi-stemmed and growing in the landscape along the Distal Circ. Frontage. It was in good condition, with good form and structure and a slightly sparse canopy.
- Calif. sycamore #457 was located just off-site on the west side of the property. It was mature (24" in diameter) and leaned northwest. It had been planted in a very small space and the base was growing against both the wall and curb.

Average tree condition for the site was fair, with 18 trees or 66% of the population. Eight (8) trees were in good condition (30%) and holly oak #435 was the only tree in poor condition (4%). Table 1 (previous page) provides a summary of condition by species.

The City of Los Altos protects all trees with diameters of 15" or greater located on private property. Removal of any tree with a diameter of 15" or greater requires a permit issued by the City, per Chapter 11.08 (Tree Protection Regulations). Based on this definition, 13 of the trees assessed at the 330 Distal Circ. Site qualified as *Protected*. All *Protected* trees are identified in the ***Tree Assessment Form*** (see Exhibits).

Suitability for Preservation

Before evaluating the impacts that will occur during development, it is important to consider the quality of the tree resource itself, and the potential for individual trees to function well over an extended length of time. Trees that are preserved on development sites must be carefully selected to make sure that they may survive development impacts, adapt to a new environment and perform well in the landscape.

Our goal is to identify trees that have the potential for long-term health, structural stability and longevity. For trees growing in open fields, away from areas where people and property are present, structural defects and/or poor health presents a low risk of damage or injury if they fail. However, we must be concerned about safety in use areas. Therefore, where development encroaches into existing plantings, we must consider their structural stability as well as their potential to grow and thrive in a new environment. Where development will not occur, the normal life cycles of decline, structural failure and death should be allowed to continue.

Evaluation of suitability for preservation considers several factors:

- **Tree health**
  Healthy, vigorous trees are better able to tolerate impacts such as root injury, demolition of existing structures, changes in soil grade and moisture, and soil compaction than are non-vigorous trees.

- **Structural integrity**
  Trees with significant amounts of wood decay and other structural defects that cannot be corrected are likely to fail. Such trees should not be preserved in areas where damage to people or property is likely. Holly oak #435 is an examples of such a tree.

- **Species response**
  There is a wide variation in the response of individual species to construction impacts and changes in the environment. In our experience, for example, holly oak, coast live oak and coast redwood are tolerant of site disturbance, while sweetgum is more sensitive to site disturbance.

- **Tree age and longevity**
  Old trees, while having significant emotional and aesthetic appeal, have limited physiological capacity to adjust to an altered environment. Young trees are better able to generate new tissue and respond to change.

- **Invasiveness**
  Species which spread across a site and displace desired vegetation are not always appropriate for retention. This is particularly true when indigenous species are displaced. The California Invasive Plant Inventory Database (http://www.cal-ipc.org/paf/) lists species identified as being invasive. Los Altos is part of the Central West Floristic Province. Olive was the only species assessed at the 330 Distal Circ. site considered to have 'Limited' invasiveness.

Each tree was rated for suitability for preservation based upon its age, health, structural condition and ability to safely coexist within a development environment. Table 2 provides a summary of suitability ratings. Suitability ratings for individual trees are provided in the ***Tree Assessment Forms*** (see Exhibits).

We consider trees with high suitability for preservation to be the best candidates for preservation. We do not recommend retention of trees with low suitability for preservation in areas where people or property will be present. Retention of trees with moderate suitability for preservation depends upon the intensity of proposed site changes.

Table 2: Tree Suitability for Preservation
330 Distel Circle, Los Altos

High	These are trees with good health and structural stability that have the potential for longevity at the site. Three (3) of the trees were highly suitable for preservation, including Mexican fan palm #439, olive #446 and coast live oak #451.
Moderate	Trees in this category have fair health and/or structural defects that may be abated with treatment. Trees in this category require more intense management and monitoring, and may have shorter life-spans than those in the "high" category. Sixteen (16) of the trees were of moderate suitability for preservation, including 4 holly oaks, 3 evergreen pears, 2 coast live oaks, 2 Hollywood junipers, 2 coast redwoods and one each of: African fern pine, xylosma and Calif. sycamore.
Low	Trees in this category are in poor health or have significant defects in structure that cannot be abated with treatment. These trees can be expected to decline regardless of management. Eight (8) trees were of low suitability for preservation, including 5 holly oaks, sweetgums #447 and 448 and evergreen pear #437.

Preliminary Evaluation of Impacts and Recommendations

Appropriate tree retention develops a practical match between the location and intensity of construction activities and the quality and health of trees. The ***Tree Assessment*** was the reference point for tree condition and quality. Impacts from construction were evaluated using the Preliminary Grading & Utility Plan C3.0, prepared by BKF Engineers dated October 18, 2021.

The plans were preliminary however, included utilities and accurate trunk locations. However, a final assessment is based on final plans.

The plan proposes to redevelop the site into 90 residential units in 5-stories, with ground floor amenities and vertical/mechanical lift parking. Site amenities would include a courtyard, community room, laundry facility and lounge. The main entry would be located along the northeast property boundary, providing access to parking in the north corner of the building. A utility box will be located at the south corner of the site.

Impacts from construction were estimated for each tree. Based on my review of the plans, all of the on-site trees will be removed to accommodate development plan, including eight *Protected* trees (#432, 433, 438-440, 442, 443, and 451). Table 3 (following page) provides the recommendations for each tree along with a description of the impacts and their *Protected* status.

Eight trees have been identified for preservation, all of which are off-site. Five of the trees identified for preservation qualified as *Protected*. Preservation of trees is predicated on following the ***Tree Preservation Guidelines*** provided on the following page.

Some amount of root and canopy pruning of off-site trees may be required for construction clearance. Recommendations for Tree Protection Zones are provided in the ***Tree Preservation Guidelines*** (following page).

Table 3. Recommendations for preservation and removal.
330 Distel Circle, Los Altos

Tag #	Species	Diameter	Protected	Impacts
431	Holly oak	10	No	Remove, within drive isle
432	Holly oak	15	Yes	Remove, within drive isle
433	Holly oak	20	Yes	Remove, within drive isle
434	Holly oak	7	No	Remove, within drive isle
435	Holly oak	9	No	Remove, within drive isle
436	Coast live oak	9	No	Remove, within building footprint
437	Evergreen pear	11	No	Remove, within building footprint
438	Evergreen pear	15	Yes	Remove, within building footprint
439	Mexican fan palm	16	Yes	Remove, within building footprint
440	Holly oak	15	Yes	Remove, within building footprint
441	Holly oak	13	No	Remove, within building footprint
442	African fern pine	22	Yes	Remove, within building footprint
443	Evergreen pear	15	Yes	Remove, within building footprint
444	Evergreen pear	14	No	Remove, within building footprint
445	Holly oak	8	No	Remove, within building footprint
446	Olive	9,9,8,7,7	No	Remove, in area of impact
447	Sweetgum	10	No	Remove, low suitability
448	Sweetgum	14	No	Remove, low suitability
449	Coast live oak	15,15,13	Yes	**Preserve**, off-site
450	Holly oak	14	No	**Preserve**, off-site
451	Coast live oak	20	Yes	Remove, In utility box area

Tag #	Species	Diameter	Protected	Impacts
452	Hollywood juniper	8,7	No	**Preserve**, off-site
453	Hollywood juniper	16	Yes	**Preserve**, off-site
454	Coast redwood	18	Yes	**Preserve**, off-site
455	Xylosma	9	No	**Preserve**, off-site
456	Coast redwood	22	Yes	**Preserve**, off-site
457	Calif. sycamore	24	Yes	**Preserve**, off-site

Preliminary Tree Preservation Guidelines

The goal of tree preservation is not merely tree survival during development but maintenance of tree health and beauty for many years. Trees retained on sites that are either subject to extensive injury during construction or are inadequately maintained become a liability rather than an asset. The response of individual trees will depend on the amount of excavation and grading, the care with which demolition is undertaken, and the construction methods.

The following recommendations will help reduce impacts to trees from development and maintain and improve their health and vitality through the clearing, grading and construction phases.

Design recommendations

1. Any plan affecting trees should be reviewed by the Consulting Arborist with regard to tree impacts. These include, but are not limited to, improvement plans, utility and drainage plans, grading plans, landscape and irrigation plans and demolition plans.

2. A **TREE PROTECTION ZONE** must be established for trees to be preserved, in which no disturbance is permitted. No trenching, excavation, construction or storage of materials shall occur within that zone. No underground services including utilities, sub-drains, water or sewer shall be placed in the **Tree Protection Zone**. Spoil from trench, footing, utility or other excavation shall not be placed within the **Tree Protection Zone**, either temporarily or permanently. For design purposes, **TREE PROTECTION ZONES** for trees identified for preservation should be established at the dripline in all directions. As plans are refined, more specific **TREE PROTECTION ZONES** will be developed.

3. ***Tree Preservation Guidelines*** prepared by the Consulting Arborist should be included on all plans.

4. No underground services including utilities, sub-drains, water or sewer shall be placed in the **TREE PROTECTION ZONE**. To minimize impacts to trees, locate underground services to provide as much room as possible from trees identified for preservation.

5. Any herbicides placed under paving materials must be safe for use around trees and labeled for that use.

6. Irrigation systems must be designed to avoid trenching within the **TREE PROTECTION ZONE**.

7. Do not apply lime to soil for stabilization within 25' of trees to be preserved. Lime is toxic to tree roots.

Pre-construction treatments and recommendations

1. The demolition contractor and construction superintendent shall meet with the Consulting Arborist before beginning work to discuss work procedures and tree protection.

2. Fence all trees to be retained to completely enclose the **TREE PROTECTION ZONE** prior to demolition, grubbing or grading. Fences shall be 6' chain link anchored firmly in the ground or on stanchions. Fences are to remain until all grading and construction is completed. Place weather proof signs, 2' x 2', on the fencing that read "**Tree Protection Zone** Keep Out" (eg. one sign for each of the four compass points).

3. Where possible, cap and abandon all existing underground utilities within the **TPZ** in place. Removal of utility boxes by hand is acceptable but no trenching should be performed within the **TPZ** in an effort to remove utilities, irrigation lines, etc.

4. Tree(s) to be removed that have branches extending into the canopy of tree(s) to remain must be removed by a qualified arborist and not by demolition or construction contractors. The qualified arborist shall remove the tree in a manner that causes no damage to the tree(s) and understory to remain. Stumps shall be ground below grade.

5. Any brush clearing required within the **TREE PROTECTION ZONE** shall be accomplished with hand-operated equipment.

6. Any work within the **TREE PROTECTION ZONE** shall be approved and monitored by the Consulting Arborist.

7. Prune trees to be preserved to provide adequate clearance and correct any existing defects in structure. All pruning shall be completed by a Certified Arborist or Tree Worker and adhere to the latest edition of the ANSI Z133 and A300 standards as well as the *Best Management Practices -- Tree Pruning* published by the International Society of Arboriculture.

8. All tree work shall comply with the Migratory Bird Treaty Act as well as California Fish and Wildlife code 3503-3513 to not disturb nesting birds. To the extent feasible tree pruning and removal should be scheduled outside of the breeding season. Breeding bird surveys should be conducted prior to tree work. Qualified biologists should be involved in establishing work buffers for active nests.

9. Apply and maintain 4-6" of wood chip mulch within the **TREE PROTECTION ZONE.**

Recommendations for tree protection during construction

1. Prior to beginning work, all contractors working in the vicinity of trees to be preserved are required to meet with the Consulting Arborist at the site to review all work procedures, access routes, storage areas and tree protection measures.

2. If injury should occur to any tree during construction, it should be evaluated as soon as possible by the Consulting Arborist so that appropriate treatments can be applied.

3. Fences have been erected to protect trees to be preserved. Fences define a specific **TREE PROTECTION ZONE** for each tree or group of trees. Fences are to remain until all site work has been completed. Fences may not be relocated or removed without permission of the Consulting Arborist.

4. Construction trailers, traffic and storage areas must remain outside fenced areas at all times.

5. Prior to grading, pad preparation, excavation for foundations/footings/walls, trenching, trees may require root pruning outside the **TREE PROTECTION ZONE** by cutting all roots cleanly to the depth of the excavation. Roots shall be cut by manually digging a trench

and cutting exposed roots with a saw, with a vibrating knife, rock saw, narrow trencher with sharp blades, or other approved root pruning equipment. The Consulting Arborist will identify where root pruning is required and monitor all root pruning activities

6. Any roots damaged during grading or construction shall be exposed to sound tissue and cut cleanly with a saw.

7. All underground utilities, drain lines or irrigation lines shall be routed outside the **TREE PROTECTION ZONE**. If lines must traverse through the protection area, they shall be tunneled or bored under the tree as directed by the Consulting Arborist.

8. No materials, equipment, spoil, waste or wash-out water may be deposited, stored, or parked within the **TREE PROTECTION ZONE** (fenced area).

9. Any additional tree pruning needed for clearance during construction must be performed by a qualified arborist and not by construction personnel.

Maintenance of impacted trees
Trees preserved at the 330 Distel Circ. site may experience a physical environment different from that pre-development. As a result, tree health and structural stability should be monitored. Occasional pruning, fertilization, mulch, pest management, replanting and irrigation may be required. In addition, provisions for monitoring both tree health and structural stability following construction must be made a priority. As trees age, the likelihood of failure of branches or entire trees increases. Therefore, annual inspection for structural condition is recommended.

MINUTES OF THE STUDY SESSION OF THE CITY COUNCIL AND PLANNING COMMISISON OF THE CITY OF LOS ALTOS, 5:00 P.M., TUESDAY, JANUARY 11, 2022, HELD VIA TELECONFERENCE

MEETING CASLLED TO ORDER

At 5:00 p.m., Mayor Enander called the meeting to order.

ESTABLISH QUORUM

PRESENT: Council Members Fligor, Lee Eng, Weinberg, Vice Mayor Meadows, and Mayor Enander

ABSENT: Planning Commissioners Ahi, Mensinger, Roche, Steinle, Vice Chairperson Doran Planning Commissioner Marek and Planning Chairperson Bodner

PUBLIC COMENTS ON AGENDA ITEM

Mayor Enander reordered the agenda to hear Public Comments following the project presentation

DISCUSSION ITEM

1. **330 Distel Circle Project Pre-Application Submittal:** Review the submitted material and provide preliminary feedback to the applicant to address before submitting the formal development application. (R. Hayagreev)

Planning Consultant Hayagreev provided project information to the Council and introduced the development team of Welton Jordan of EAH Housing, Lily Ciammaichella of KTGY and Bruce Jett of Jett Landscaping. Each presented information on the proposed development and answered questions from the Council and Planning Commissioners.

PUBLIC COMENTS ON AGENDA ITEM

The following individuals provided public comment: County Supervisor Simitian, Salim, Anne Paulson, David Law, Jeanine Valadez, Roberta Phillips, Elaine Haight, Pierre Beddard, Jon Baer, Lois Bear Kelsey, Susan Russell representing the League of Women Voters, Ellen D., Scott Spielman and Donna Poulos

Councilmembers and Commissioners discussed various details of the design and offered several suggestions relative to the design, exterior color, bike storage access, potential green elements and garage and parking access for the applicants to consider.

ADJOURNMENT

Mayor Enander adjourned the meeting at 6:29 p.m.

Anita Enander, MAYOR

Andrea M. Chelemengos, MMC, CITY CLERK

Expanding the range of opportunities for all by developing, managing and promoting quality affordable housing and diverse communities.

Distel Circle Apartments

PC/CC Study Session Responses – Planning Application

February 28, 2022

Project:	**90-Unit Multifamily Affordable Housing Community**
Location:	330 Distel Circle, Los Altos (APN# 170-04-051)
Current Landowner:	Midpen Regional Open Space District
Applicant/Developer:	EAH Housing

On January 11, 2022 the Los Altos Planning Commission and City Council held a Joint Study Session to review the proposed development for 330 Distel Circle. During the Study Session members of the City Council, the Planning Commission and the public made comments. The following is our response to the questions and comments we heard.

Comment: Bike access only accessible in garage?
Response: Bicycle room has been relocated along Distel Circle with access from the lobby.

Comment: Reduction in building height? Reduce the plate heights of any levels?
Response: Per density bonus law, we are permitted 78ft. We are proposing 64ft typically. We have reviewed with our manufacturers- modular and mechanized parking and have found the following:

- For Level 1: Ground level is 16 ft floor to floor to accommodate for the 2 level mechanized parking system, MEP, and floor/ceiling assembly.
- For Levels 2-5: This housing product type- multifamily residential- has nominal 9ft ceilings which also allows for 8ft in areas that are drop down for mechanical, electrical, and plumbing. In addition, as we are designing for modular units, the typical floor to floor height is 11ft which equates to a 9ft ceiling. Anything less than this dimension would have a significant financial impact as factories are set up for 9ft ceilings.
- For Parapet height: To account for roof drainage and guardrail we are accounting for 5ft. This would be to the highest point and accounts for variation in the roof parapet height.

Comment: The objective standards state that the courtyard should be open to the front.
Response: We are requesting a concession. Our massing is focused towards Distel and further from the single-family homes to provide more privacy for these neighbors. The courtyard would get Western sunlight and a more protected courtyard for the residents.

Comment: Look at massing and individuality on façade with more accents.
Response: Design has been revised to break up the building to have 5 primary bay elements of varying widths instead of 4 with the same width. Secondary façade elements between these blue-grey bays have been accentuated with warm composite panel, larger windows, and made white to break down the scale of the building.

Comment: How are trash and loading addressed?
Response: Designated loading area in front of building proposed for trash and loading. Trash containers will be moved by building staff using an electric pallet jack to the proposed staging area on Distel Circle. Only one container will be staged 4x per week for servicing by the hauler, once serviced staff will move containers back into the trash collection room.

Comment: Consider moving the vehicular driveway to the other side of the building
Response: We have reviewed moving the driveway entry and entering the building where Distel begins to turn is a difficult turning maneuver.

Comment: Provide more landscape along Distel
Response: Distel frontage revised to show additional green landscaping. See Landscape plans.

DRAFT -EAH Housing -DRAFT
330 Distel Circle
Los Altos, CA
Trash Management Plan

Task: Design a waste and recycling system for an affordable housing project with 90 residential units that minimizes costs, staffing requirements and environmental impacts, while providing convenient trash disposal for the building's residents. Please note the word "trash" when used in this plan covers waste, recycling, and compost.

Waste and Recycling Removal: The City of Los Altos has granted Mission Trail Waste System a license to provide residential and commercial Waste and Recycling services to residents and businesses located within the city and county. This license is a de facto exclusive franchise for trash removal for any property located within city limits. Mission Trail provides three types of service: waste, commingled recycling and compost collection. Garbage rates includes an appropriate level of recycling and organics service for no additional charge. Adequate garbage service is required.

State and Local Recycling Mandates: Statewide the passage of AB341 (July 1st, 2012) and subsequent AB1826 required all business that have more than 5 residential units or generate more than 4 cubic yards of municipal solid waste to separate recyclable and compostable materials from the waste stream. Finally, AB 1383 — although not fully implemented by all local governments — will lead to mandatory food waste diversion from residential, multi-family and commercial business by 2022. These laws directs local jurisdictions to implement recycling and composting regulations and programs.

Los Altos Ordinance No. 2015-417, Chapter 6 states:
6.12.050 Mandatory commercial and multi-family recycling and organic recycling.

A. Commercial generators responsible for compliance. Each commercial generators, as defined in Section 6.12.010.E, shall be responsible for ensuring and demonstrating its compliance with the requirements of this chapter, including all multi-family dwellings if four units or more, and also including all multi-family dwellings under four units that shared solid waste collection containers and service under one subscription with the franchised hauler.

B. Commercial recycling and organics collection required. Each commercial generator shall subscribe to a level of service with the franchised hauler that is sufficient to handle all volume of recycle materials and organic materials generated or accumulated on the premises, or complete and retain on-site self hauling form certifying that all self-hauling activities will be completed in accordance with Section 6.12.100.C. or any other applicable law or regulation. The commercial generator shall make a copy of such form avail to the city manager upon request. Additionally, each commercial generator shall ensure the proper separation of solid waste, as established by the franchised hauler, by placing each type of material in designated receptacles or containers, and ensure that employees, contractors, volunteers, customers, visitors, and other persons on-site conduct proper separation of solid waste.

Specific Project Design Summary:

First, trash will be collected in 3 streams (waste, recycling, and compost) to meet the State requirements of AB341, AB 1826 and SB 1383 and the local Recycling and Composting Ordinance.

Second, **we recommend eliminating the proposed compost chute and collecting compost on each residential floor in Rubbermaid 'Slim Jim' containers.** These containers will be emptied by staff into toter carts for collection by Mission Trails. Alternative compost options include: 2-chute system with a bisorter in the waste chute, or a 3-chute system.

Third, due to the projected trash volumes and ground floor resident for the building, **waste and recycling will be collected in compacted 2CY bins on the Level 01. Compost will be collected in a 64 gallon toter cart.**

Fourth, **we recommend replacing the proposed double-swing doors at the entry/exit to the trash room with a roll-up door and separate egress door.** While this is a more expensive option at the outset, it is ATM's experience that in the long run this design change saves money and prevents maintenance problems. Due to the weight of the bins moving in and out of the trash room, a double door cannot have a threshold. Door sweeps will eventually degrade and let in bugs and vermin. Additionally, the doors will be damaged from getting hit by the unwieldy trash bins and will require repair or replacement long before a roll-up door will.

Fifth, **the residential trash waste and recycle chutes should be 30" diameter with automatic opening 15"x18" hopper-type intake doors.** NFPA 82 minimum required 24" chutes have a higher probability of chute jams due to large objects (super-size pizza boxes, Costco boxes, ironing boards, crutches, etc.) being thrown down the chute. NFPA 82 also requires that chutes vent at full diameter at least 36" above the finished roof.

Sixth, the chute core wall is shared with residential units. **We recommend installing double walls, sound dampening coating, or sound isolation padding to reduce sounds, vibration, and odors.**

Seventh, a safe and accessible location for staging needs to be determined. We recommend identifying a location on Distel Circle. **The waste hauler, Mission Trail has in the past, moved loose bins from the temporary staging area to the street at no additional cost, however we will need to confirm if they are able to move compacted bins.**

Eighth, **add 1 CFM/SF mechanical ventilation per CBC, floor drain, hose bib and odor control to the trash collection rooms.**

Ninth, due to the number of units, **this building is projected to generate about 315 cardboard boxes per week. To reduce the potential for chute jams, we recommend considering designating a convenient space for residents to place their flattened cardboard boxes.** These boxes will then be moved by building staff to the mixed recycling bin.

Projected Residential Waste and Recycling Levels: The following metrics were used to project residential waste and recycling levels:

Residential Waste: 0.16 Cubic Yard (32 gallon) per week/unit. **NOTE: This is the equivalent of over 2 large kitchen garbage cans per unit week (~2.8 - 13 gallon bags).**

Residential Recycling: 0.16 Cubic Yard (32 gallon) per week/unit. **NOTE: This is the equivalent of 2 large kitchen garbage cans per unit week (~2.8 - 13 gallon bags).**

Residential Compost: 0.012 Cubic Yard (2.4 gallon) per week/unit. **NOTE: This is the equivalent of small compost pail per unit week.**

Below is a summary of projected LOOSE trash volumes. See detailed analysis on page 19.

Units	Loose Waste Volume CY/WK	Loose Recycle Volume CY/WK	Loose Compost Volume CY/WK	Loose 3CY Waste Bins/WK	Loose 3CY Recycle Bins/WK	Total # of Compost Carts/WK
90	14.4	14.4	1.08	5	5	4

Below is a summary of projected COMPACT trash volumes. See detailed analysis on page 19.

Units	Loose Waste Volume CY/WK	Loose Recycle Volume CY/WK	Loose Compost Volume CY/WK	COMPACT 2CY Waste Bins/WK	COMPACT 2CYRecycle Bins/WK	Total # of Compost Carts/WK
90	3.6	3.6	1.08	2	2	4

Proposed Residential Trash handling system:

To comply with City ordinances, the project's residential trash will be collected in 3 different streams: Waste, Mixed Recyclables (paper, cardboard & containers) and Compost (organic materials).

Chutes for Waste & Recycling. The single trash chute core per building can handle the volume of trash generated by the project. Residential waste and mixed recycling streams will be deposited by tenants on upper floors into dedicated gravity chutes. Compost will be collected in 64 G toter carts.

We recommend the trash core have two (2) 30" diameter trash chutes per core with 15 x 18 automatic opening (pneumatic) intake doors. Increasing the chute size to 30" will slightly increase the chute system cost but it will reduce the possibility of chute jams due to large objects (Amazon, super-size pizza and "Costco" boxes) being thrown down the chute and thereby reduce ongoing maintenance cost while increasing tenant convenience.

The chutes should be 16 gauge galvaneal or aluminized steel and be isolated from the building structure using Mason BR mounts or equivalent. The chute should be coated with a sound dampening compound (Soundcoat GP-1 or equivalent) equal to the thickness of the metal.

Compactors. We recommend all residential waste and recycling be collected in 2CY chute fed compactors. Compactors will reduce disposal costs and on-site staffing requirements while minimizing property truck traffic thereby lowering the projects overall environmental impact. All compactor bins will incorporate locks on the lids and compactor opening so the containers cannot be accessed by vagrants. Compactor bins will be moved using an electric pallet jack.

Service	Compaction Ratio	Monthly Fee
3-CY loose bins 5 times per week	N/A	$2,286.54
2-CY compacted bin 2 times per week	4:1	$760.70

Lower Waste Disposal costs. Front-load compaction is less expensive than front-load loose waste services. (See cost benefit analysis on page 19).

Lower labor costs. A 3-cubic yard loose waste bins serviced Monday-through-Saturday must be moved from the trash chute to the trash staging locations 5x per week. Comparable compacted service is one 2-cubic yard bin picked up 2x per week. That represents 50% fewer times to move the bins from the trash areas to the street for pickup. More importantly compacted bins reduce the truck trips and thereby reducing the noise impact on the project's neighbors. Compactors also eliminate the need to rake or rotate loose bins and solve the problem of Sundays (one of the heaviest trash days of the week). (See cost benefit analysis on page 19).

Lower environmental costs. Less truck trips and less bin emptying results in cleaner air and quieter neighborhood.

Residential Compost. Food scrap diversion is not currently required for multi-family properties however, compost will be required in 2022 by SB1383. Compost can be handled in three ways:

Option 1: Eliminate the proposed compost chute. Residential compost can be collected in Rubbermaid 'Slim Jim' containers placed in each chute vestibule. The Slim Jim's should be emptied by building staff into a 64G toter cart for emptying by the trash hauler.

Advantage: Lowest upfront equipment cost.
Disadvantage: A full-time janitorial staff is typically required for this option hence, the long term labor costs are much higher. Compost should be emptied on a regular basis to prevent sanitation and odor issues.

Option 2: 3 Chute design system.

Advantage: Low upfront equipment cost.
Disadvantage: ATM does not recommended collecting apartment compostable materials using a gravity chutes due to the sanitation issues, the collection issues, the corrosive properties of the material, and odorous nature of putrefying household food waste, which is the primary component of organic waste from apartments

Option 3: Design a 30' stainless steel chute for waste with a bi-sorter to dispose of compost.

© American Trash Management, Inc. 2022

AMERICAN TRASH MANAGEMENT

(415) 292-5400
(415) 292-5410 Fax
www.trashmanage.com

Advantage: This option has lower labor costs.
Disadvantage: The additional piece of equipment increases upfront costs.
We recommend food scrap compost be collected in each chute vestibule in Rubbermaid "Slim Jim" containers. These containers would then need to be emptied by building staff into the collection container (typically a 64- or 96-gallon toter cart).

We recommend eliminating the proposed compost chute, and collecting compost in Rubbermaid 'Slim Jims' containers placed in each chute vestibule. The Slim Jims should be emptied by building staff into a 64G toter cart for emptying by the trash hauler.

ATM does not recommended collecting apartment compostable materials using a gravity chutes due to the sanitation issues, the collection issues, the corrosive properties of the material, and odorous nature of putrefying household food waste, which is the primary component of organic waste from apartments. The compostable materials will adhere to the sides of the chutes and require frequent chute wash downs. This will increase the project water usage and sewage loads. The acidic nature of fermenting compost will cause the chute to rust prematurely unless they are made of 304 stainless steel. It is important that proper sanitation protocols are followed since the compostable material that will adhere on the chutes wall is an excellent medium to grow fruit flies, maggots, molds, fungus, yeast and bacteria which can cause insect infestations, allergic reactions and malodors.

Cardboard. Multi-family dwellings generate a tremendous amount of cardboard due to online shopping and food delivery. Typically, half of the units will receive a delivery in a cardboard box every day. This building is projected to receive around **315** cardboard boxes per week. A space should be designated for residents to place flattened cardboard that will not fit in the mixed recycle chute to avoid chute jams. This cardboard will need to be moved by building staff to the recycling bin for disposal.

Odor Control. To mitigate malodors in the trash room(s), a four-pronged approach is recommended including cleaning, proper ventilation, and installing a deodorizer system.

1. Mechanical Exhaust of Trash Collection Room. The mechanical ventilation required rate is 1 CFM/SF, however, ATM recommends increasing this rate as needed, especially in areas with warmer climate. Exhaust should vent through the roof. ATM does not recommend a chilled/refrigerated trash room. A cooled space will not delay decomposition, and will have minimal impacts on odorous trash.
2. Cleaning the Trash Room. Trash rooms should be swept clean of debris on a weekly basis. Trash room wash-downs should be scheduled quarterly. These should include cleaning any trash equipment such as compactors, as well as floors and the walls. If possible, bins or compactor receiver containers should be cleaned at the same time, assuming the containers are empty.(Bins should be cleaned by onsite staff. If hauler-provided dumpsters become especially dirty, they should be replaced by the hauler.)

3. Cleaning the Trash Chute. Almost all trash chutes are equipped with deodorizing and sanitizing (D&S) units, located on the top floor behind an access door. These should be operated on a WEEKLY basis, for ~5 minutes. Trash chutes that are designed for a high level of food wastes often also have a "Chute Janitor" built-in wash down system. These should be operated less often, such as 1x per month. When turned on, they should be allowed to run through their normal Rinse-Wash-Rinse cycle. Even with the presence of the D&S and Chute Janitor systems, all trash chutes should be pressured washed at least once a year to clean materials that adhere to the sides of the chutes. In areas with warmer climate we recommend quarterly wash downs. The chute wash down service should include cleaning the trash discharge room, specifically the floors, walls and the trash compactor.

www.trashmanage.com

4. Odor Control Systems. Odor control systems can be helpful in controlling odors, but most have limited effectiveness or create other problems. Popular low-cost systems that spray a masking agent into the air, only serve to hide odors in the trash room and not eliminate them. Ozone generators are more effective, but the odor-destroying product they create — ozone — can have deleterious effect on human health and can also destroy compactor hoses and seals. One odor control system that avoids these problems is the Piian Mini Vaporizer. It creates a very fine 50-micron mist that bonds with — and ultimately destroys — odor causing molecules. And unlike ozone, the entirely natural blend of plant extracts, essential oils and emulsifiers which is safe and does not damage equipment.

Recommended Residential Trash System-Equipment:
Below is a summary of the recommended trash system equipment for compacted service.

Chutes	Size	Material	Bin Type	Bin Size Cubic Yards	# of Bins/ Carts
2	(2) 30”	(2) Galvaneal or Aluminized	Front Load	2CY waste 2CY recycle 64G compost	2 waste 2 recycle 4 compost

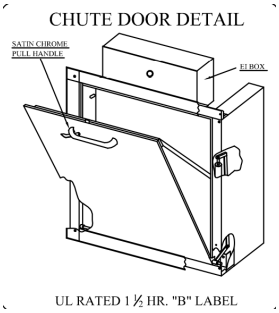
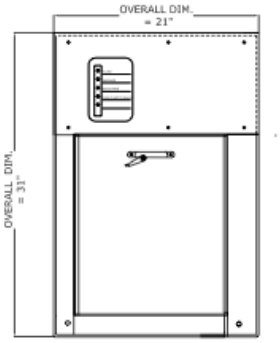
Residential Trash Systems:
Automatic Opening (Pneumatic) Chute Intake Door Recommended to meet Housing Accessibility Section 1138A.4.4.

Manual Chute Intake Door	Air Assist Recycling Chute Intake Door
	




Chute Intake Doors and the Americans' with Disabilities Act of 1990 (ADA)

This is a summary of the current state as we understand it. This is not intended to be legal advice and should not be relied upon with out seeking advice of an ADA expert and your legal counsel.

Per most building codes and FHA requirements, “common use” building areas and building elements, such as a trash rooms and trash chutes are required to be accessible. Specifically, the trash chute door is required to comply with accessibility requirements:

- Clear floor space for a wheel chair at the chute door
- Chute door hardware within reach range
- Chute door hardware complying with operability requirements.

The operability requirements mandate that the chute door hardware must not involve any of the following:

- Two handed operation (such as depressing a button while turning a door handle)
- Tight grasping or pinching
- Twisting of the wrist
- Force to activate the hardware that exceeds 5.0 pounds.

The majority of manual chute intake chute door installations do not comply with the accessibility requirements. Lower quality chute doors require grasping, twisting of the wrist and more than 5 pounds of force to open the chute door. Regardless of what has been installed for the chute door, the chute door is still required by both Code and FHA requirements to comply with accessibility requirements. In the cases where non-compliant chutes have been installed, the building Owner has made management decision to handle the accessibility requirement using other means.

Residential and other buildings are subject to the progressively revised provisions of Federal and Local ADA laws and regulations. To meet the current ADA Standards as they apply to Gravity Trash Chute Intake Doors, the person using the door must not have to grasp, twist, or pinch the control mechanism in

www.trashmanage.com

order to operate the intake door. ADA Standards also limits the maximum operating force required to open an interior door (without specificity to size) to 5 pounds of force. The maximum allowable mounting height of the operating mechanisms (i.e. door handle, etc) of an ADA compliant device is 48" (for side reach revised as of July 1, 2012 from 54") or 48" (for front reach when hopper door is open). The maximum allowable projection of an ADA compliant device is 4" off the projection surface of the wall.

The Wilkinson Signature Series and IDC-2000 Recycling Manually operated doors require the person operating the door to push a membrane selector switch (waste, recycling or compost) and grasp the u-shaped handle, push down on the thumb latch with a finger and pull open the door. This type of intake doors meets the mounting height, the projection, the twist and the pinch requirements but it does not meet the pulling force or the grasp requirement.

Lower quality manual chute intake doors from other manufacturers all use a T-handle or L-handle operating mechanism. These doors fail on 3 counts. They do not meet the pulling force, the grasp and twist requirements. These door are especially hard to operate for persons with arthritis due to the required simultaneously grasping, twisting and pulling motion.

The Wilkinson Signature Series and IDC 2000 Pneumatic Assist door meet all the above requirements since it is operated by pushing a palm button which opens the door automatically. The door closes after a set time and latches so it meets all the current fire code requirements. The air assist mechanism is designed to preclude the need to grasp, twist, or pinch the control mechanism in order to operate the intake door. The push button meets the height, projection and force requirements too. It is conceivable, however that certain disabled persons will still not be able to operate this type of door. ADA law requires one to accommodate all persons with disabilities.

The supra-majority of all new construction within the US still uses manually operated chute intake doors due to the extra upfront (~ $900 per floor) and higher maintenance costs of the Pneumatic Assist Chute Intake type of doors. Many building owners have chosen to only install the pneumatic assist doors in facilities with a high senior or disabled population and in order to meet the above ADA requirements make it their policy to provide a staff person to assist any individual with disabilities who need assistance in operating the manual operated door.

Trash chute systems have been designed to meet the fire and life safety found within Building Codes. All trash chute intake doors are required to be behind a rated fire-barrier and any door in these walls is required to be a fire-rated door.

This fire-rated-door is required to be self-closing (or automatic-closing upon the detection of smoke), so it has a closer mechanism and positive latch. Because this door is designated as a “fire-door”, per most codes and accessibility standards (including ANSI A117.1 used for FHA compliance), the door opening force for this door is exempt from typical accessibility requirements (maximum 5 pounds) and allowed to have a minimum opening force allowed by the authority having jurisdiction (typically a maximum of 15 pounds). The opening force for the required fire-rated doors in front of trash chute intake doors routinely exceeds 5 pounds and is more typically in the 14-18 pound range.

Requiring the chute intake door to meet accessibility requirements while allowing the fire-rated door in front of the trash chute intake door to not meet the pull force and grasp requirements is illogical. If an individual with accessibility needs cannot open the fire door in front of the trash chute intake then they will not be able to access the non compliant chute. Owners should always have a policy in place to provide assistance to any person who can not access the trash chute (with or without automatic opening doors).

Waste, Recycling and Compost Analysis: (Rates reflect the rate increase effective July 1, 2020)
Below is a comparative analysis of the disposal and labor costs of handling waste and recycling in loose versus compacted bins. We recommend installing gravity chute-fed compactors under the waste chutes and serious consideration should be given to compacting the recycling stream so as to reduce disposal costs, space requirements and onsite labor costs. The effective service life of a quality compactor can be over 10 years. Please note that the projections below are estimates derived from actual audits of comparable multifamily complexes in California. They are not guaranteed. They are to be used for planning purposes only and may be higher or lower than projected.

TOTAL RESIDENTIAL WASTE AND RECYCLING SYSTEM ANALYSIS

		Units:	**90**		
	Volume Waste:		0.16	cubic yard/week/unit	32.32
	Volume Recycling:		0.16	cubic yard/week/unit	32.32

Expanding the range of opportunities for all by developing, managing and promoting quality affordable housing and diverse communities.

Distel Circle Apartments

Proposal Statement – Planning Application

February 28, 2022

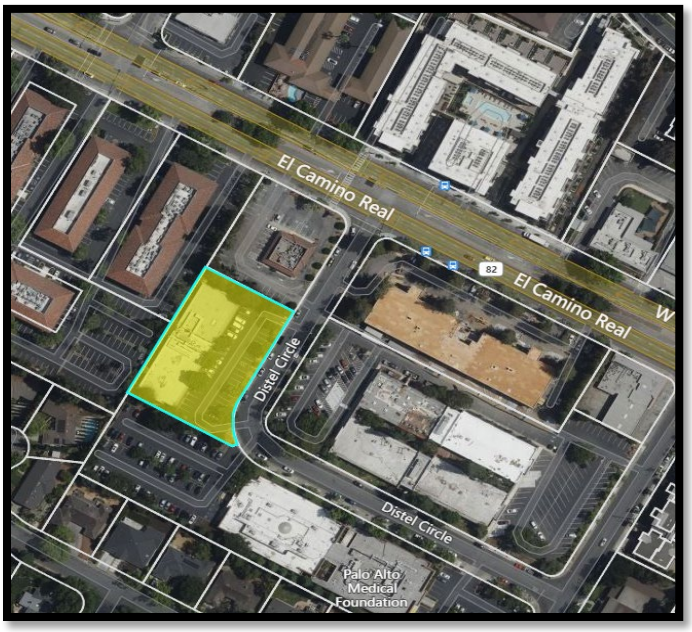
Project:	**90-Unit Multifamily Affordable Housing Community**
Location:	330 Distel Circle, Los Altos
Current Landowner:	Midpen Regional Open Space District
Applicant/Developer:	EAH Housing

BACKGROUND

The County of Santa Clara is under contract to purchase 330 Distel Circle (APN# 170-04-051), a 0.87-acre site containing a 12,120 sq ft single story office building ("Property"). EAH proposes to demolish existing office building and to develop a 90 unit, permanently affordable deed-restricted multifamily community. The proposed development will also have about 10,130 sq ft of amenity space, 90 parking stalls and 45 bicycle stalls.

In alignment with the MOU between the City of Los Altos and the County of Santa Clara, we are in a public-private partnership between EAH, the County, and the City of Los Altos that will create a beautiful, inclusive, and healthy rental community offering permanently affordable housing to income and program-eligible residents.

PROPERTY CHARACTERISTICS



The Property is located a half block from the El Camino Real corridor and is within the El Camino Real Special Planning Area delineated within the current City of Los Altos General Plan. The site is conveniently located in proximity to the Sutter Health-affiliated Palo Alto Medical Foundation and within safe walking distance to public transit and commercial, service, and recreational amenities along the El Camino corridor. The Property is located within a Transit Priority Area, as identified by The Metropolitan Transportation Commission (MTC) and is within one-half mile from a Major Transit Stop located at El Camino Real and Showers Drive. The Property is a generally flat parcel bounded by Distel Circle to the East, and commercial properties to the North, South, and West. Single family homes are along Marich Way to the South and Southwest of the Property but do not directly abut the subject parcel.

Our proposal seeks to achieve the following key outcomes:

- A community comprised of diverse tenants who qualify under CA Low Income Housing Tax Credit guidelines, and which creatively integrates affirmative set asides for households meeting the program criteria for Permanent Supportive Housing
- An environmentally sustainable building program designed to LEED Silver or comparable certification
- An economically viable and intentionally flexible building program designed to factory-built modular or panelized specification and incorporates a mechanical parking system which maximizes ground floor uses and site efficiency.

The site is not in a very high fire severity zone, or wetlands and is not considered a hazardous waste site. The subject parcel is in Flood Zone X (0.2% chance of flooding). The parcel is not in a delineated earthquake fault zone nor does the subject parcel have a stream or other resource that may be subject to a streamed alteration agreement.

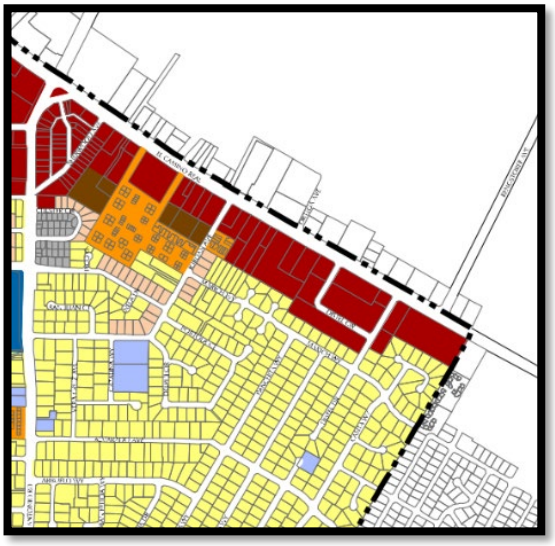
DEVELOPMENT PROPOSAL

Note: On January 11, 2022, the City held a publicly notified Joint Study Session with the City Council, the Planning Commission, EAH and its design team. This current Proposal Statement and its associated plans and materials incorporate various edits in response to comments and direction received through the Joint Study Session.

The development proposal delivers measurable outcomes in relation to neighborhood densification and diversification, sustainable and affordable housing, and mass transit use and mobility. EAH proposes:

- A public-private partnership with the City of Los Altos which efficiently streamlines entitlement approvals, as necessary to promptly secure commitments of local, State and Federal financing that will move the project to shovel-ready status
- Demolish the existing building for the development of a 5-story, Type III building containing 90 apartments (a mix of studio, 1-, 2-, and 3-bedrooms) and ground floor residential serving amenity space. The amenity space will include lobby, community common area, laundry room, mail/package area, bicycle storage, and offices for property management and resident services.
- A permanently affordable rental community incorporating a mix of unit types and a range of rent tiers that supports a diversity of income-eligible tenants earning incomes from 30% to no more than 80% of Area Median Income (AMI).

***Land-Use*:**



As proposed, the 330 Distel Circle development will advance a great number of plans, policies, and objectives adopted by the City of Los Altos and other regional agencies, including:

- Los Altos General Plan - Land Use Element Goals
- Los Altos General Plan - Housing Element Goals:
- Los Altos Climate Action Plan
- Los Altos Reach Codes
- Affordable Housing Ordinance
- Santa Clara County Office of Supportive Housing
- ABAG Plan Bay Area 2050

Los Altos Land Use Element encourages a variety of residential housing opportunities by allowing residential uses with adequate parking in appropriate commercial areas, including sections along El Camino Real. The Land Use Element also identifies the Special Planning Area of El Camino Real with a

specific goal to improve the land use mix along El Camino Real to ensure fiscal stability, encourage affordable housing, and allow for development intensification along this corridor in a manner that is compatible with the adjacent residential neighborhoods and the local circulation system.

The Property carries a General Plan designation of Thoroughfare Commercial which permits affordable residential opportunities along El Camino Real Corridor. The Property is zoned CT – Commercial Thoroughfare District which has the specific purpose to encourage a variety of residential developments, including affordable housing developments. Per Los Altos Zoning Code, upon granting of a use permit, Multiple-family housing shall be permitted in the CT District. The proposed development is consistent with the underlying land-use.

We anticipate that the proposed development will either comply with the CEQA Class 32 Infill Development criteria and requirement for a categorical exemption or will meet CEQA approval through a Mitigated Negative Declaration.

Design:

The development proposed for 330 Distel Circle is designed as a walkable, equitable, and integral addition to a lively and thriving El Camino Real corridor. This project includes 90 rental units in a single 5 story building. As previously noted, the project as proposed is consistent with existing land use designations. The apartments include a range of studios (465 sq ft), One-Bedroom (645 sq ft), Two-Bedroom (965 sq ft) and Three-Bedroom Plans (1,105 to 1,175 sq ft.). The Gross Building Area is 114,970 sf with 96,840 sf dedicated to net rentable residential area. Planned amenities include Residential Community Center, exterior courtyards, a co-working area, Bike Storage, and secured parking. The building will include

elevator access to all floors. The project will include vehicular access to a private and secure 90-stall parking area with access provided by a gated entry located on Distel Circle.

AFFORDABILITY PROGRAM

The proposed development is designed to provide a beautiful and healthy rental community and is currently modeled to provide affordable rents ranging from 30% AMI up to 80% AMI. As currently structured, the project provides rents affordable to households earning incomes ranging from ELI to LI, with an average affordability of approximately 45% AMI. Rental rates and regulatory use restrictions are proposed to be consistent with the terms, conditions, and underwriting requirements of the County of Santa Clara Measure A program, the County of Santa Clara Sect. 8 Project Based Voucher program, CA HCD soft-loan programs, and the 4% Low Income Housing Tax Credit program. Accordingly, regulatory agreements will be recorded against the property to ensure continued affordability and restricted use over no less than a 55-year term.

As currently modeled, 45 units (or 50% of the total units) will have rents affordable to families or individuals earning no more than 30% AMI, 12 units will have rents up to 50% AMI, 25 units will have rents up to 60% AMI and 6 units will have rents up to 80% AMI. Based on these proposed rent levels, the proposed development will comply with the Los Altos Affordable Housing Ordinance.

PLAN REVIEW No. 22 2476

BLDG PERMIT No.

DEVELOPMENTAL REVIEW COMMENTS

Plans and Scope of Review:

This project shall comply with the following:

The California Fire (CFC) & Building (CBC) Code, 2019 edition, as adopted by the City of Los Altos Municipal Code (LAMC), California Code of Regulations (CCR) and Health & Safety Code.

The scope of this project includes the following:

Proposed new 116,040 SF five-story 90 unit multifamily residential facility with one-level of underground parking and one level of commercial space.

Plan Status:

Plans are **APPROVED** with the following conditions.

Plan Review Comments:

1. **Review of this Developmental proposal is limited to acceptability of site access, water supply and may include specific additional requirements as they pertain to fire department operations, and shall not be construed as a substitute for formal plan review to determine compliance with adopted model codes. Prior to performing any work, the applicant shall make application to, and receive from, the Building Department all applicable construction permits.**

2. **Fire Sprinklers Required:** *(As noted on Sheet A0.4)* Approved automatic sprinkler systems in new and existing buildings and structures shall be provided in the locations described in this Section or in Sections 903.2.1 through 903.2.18.

3. **Fire Alarm Requirements:** *(As noted on Sheet A0.4)* Refer to CFC Sec. 907 and the currently adopted edition of NFPA 72. Submit shop drawings (3 sets) after planning permit approval and a permit application to the SCCFD for approval before installing or altering any system. Call (408) 341 -4420 for more information.

DEVELOPMENTAL REVIEW COMMENTS

4. **Two-way communication system:** *(As noted on Sheet A0.4)* Two-way communication systems shall be designed and installed in accordance with NFPA 72, the California Electrical Code, the California Fire Code (2019 edition), the California Building Code (2019 edition), and the city ordinances where two way system is being installed, policies, and standards. Other standards also contain design/installation criteria for specific life safety related equipment. These other standards are referred to in NFPA 72.

5. **Emergency responder radio coverage in new buildings:** *(As noted on Sheet A0.4)* All new buildings shall have approved radio coverage for emergency responders within the building based upon the existing coverage levels of the public safety communication systems of the jurisdiction at the exterior of the building. This section shall not require improvement of the existing public safety communication systems.

6. **Required Aerial Access:** Where required: Buildings or portions of buildings or facilities exceeding 30 feet (9144 mm) in height above the lowest level of fire department vehicle access shall be provided with approved fire apparatus access roads capable of accommodating fire department aerial apparatus. Overhead utility and power lines shall not be located within the aerial fire apparatus access roadway. 2. Width: *Fire apparatus access roads shall have a minimum unobstructed width of 26 feet* (7925) in the immediate vicinity of any building or portion of building more than 30 feet (9144 mm) in height. 3. *Proximity to building: At least one of the required access routes meeting this condition shall be located within a minimum of 15 feet (4572) and a maximum of 30 feet (9144mm) from the building, and shall be positioned parallel to one entire side of the building, as approved by the fire code official.* [CFC Chp. 5 and SCCFD SD&S A-1]. *Aerial access is required for this building.*

-Show on the plans that the area not compliant with aerial apparatus requirements will be red curbed and/or that signs stating "fire lane" will be installed ***(Shown on Sheet A0.4)****.*

-Provide building/street section view showing how the aerial ladder access will be achieved and any landscaping that may obstruct access ***(Shown on Sheet A0.5)****.*

PLAN REVIEW No. 22 2476

BLDG PERMIT No.

DEVELOPMENTAL REVIEW COMMENTS

7. **Buildings and Facilities Access:** Approved fire apparatus access roads shall be provided for every facility, building or portion of a building hereafter constructed or moved into or with the jurisdiction. The fire apparatus access road shall comply with the requirements of this section and shall extend to within 150 feet of all portions of the facility and all portions of the exterior walls of the first story of the building as measured by an approved route around the exterior of the building or facility. [CFC, Section 503.1.1]. *Distances up to 300 feet are justified on Sheet A0.4. Elements conductive to firefighter safety include a NFPA 13 fire sprinkler system, 4 foot navigable path around the exterior of the building, narrow canopied trees and landscaping, and standpipes on the West side of the building.*

8. **Required Fire Flow:** The fire flow for this project is 5,000 GPM at 20 psi residual pressure. Since an automatic fire sprinkler system will be installed, the fire flow will be reduced by 75%, establishing a required adjusted fire flow of 1,250 GPM at 20 psi residual pressure. Note: The minimum required number and spacing of the hydrants shall be in accordance with CFC Table C102.1. *Will serve letter provided by CalWater.*

9. **Public Fire Hydrant Proposed:** Provide a public fire hydrant at a final location to be determined jointly by the Fire Department and CalWater. Fire hydrants shall be provided along required fire apparatus access roads and adjacent public streets. CFC Sec. 507, and Appendix B and associated Tables, and Appendix C. *A new public fire hydrant is proposed on Sheet A0.4 and A1.1. Prior to installation, applicant shall submit fire hydrant spotting plans to SCCFD to confirm final location. Will serve letter provided by CalWater.*

10. **Standpipes Required:** Standpipe systems shall be provided in new buildings and structures where the floor level of the highest story is located more than 30 feet above the lowest level of fire department vehicle access. Fire hose threads used in connection with standpipe systems shall be approved and shall be compatible with fire department hose threads. The location of fire department hose connections shall be approved. Standpipes shall be manual wet type. In buildings used for high-piled combustible storage, fire hose protection shall be in accordance with Chapter 32. Installation standard. Standpipe systems shall be installed in accordance with this section and NFPA 14 as amended in Chapter 47. CFC Sec. 905.

PLAN REVIEW No. 22 2476

BLDG PERMIT No.

DEVELOPMENTAL REVIEW COMMENTS

11. **Fire Department Connection:** The fire department connection (FDC) for the structure in support of the sprinkler system shall be installed at the street on the street address side of the building. It shall be located within 100 feet of a public fire hydrant and within ten (10) feet of the main PIV (unless otherwise approved by the Chief due to practical difficulties). FDC's shall be equipped with a minimum of two (2), two-and-one-half (2- 1/2") inch national standard threaded inlet couplings. Orientation of the FDC shall be such that hose lines may be readily and conveniently attached to the inlets without interference. FDC's shall be painted safety yellow [SCCFD, SP-2 Standard]. **FDC shall be located within 100 feet of the public hydrant.**

12. **Emergency Gate/Access Gate Requirements:** Gate installations shall conform with Fire Department Standard Details and Specification G-1 and, when open shall not obstruct any portion of the required 20' width for emergency access roadways. Locks, if provided, shall be fire department approved prior to installation. Gates across the emergency access roadways shall be equipped with an approved access device. If the gates are operated electrically, an approved Knox key switch shall be installed; if they are operated manually, then an approved Knox padlock shall be installed. CFC Sec. 503.6 and 506. *As shown on Sheet A0.4.*

13. Roof access, pathways and spacing is required around solar photovoltaic power systems in accordance with CFC 1204. Review of required pathways will be completed as part of the building permit plan review.

14. **Construction Site Fire Safety:** All construction sites must comply with applicable provisions of the CFC Chapter 33 and our Standard Detail and Specification S1-7. Provide appropriate notations on subsequent plan submittals, as appropriate to the project. CFC Chp. 33.

15. **Timing of installation**: When fire apparatus access roads or a water supply for fire protection is required to be installed, such protection shall be installed and made serviceable prior to and during the time of construction except when approved alternative methods of protection are provided. Temporary street signs shall be installed at each street intersection when construction of new roadways allows passage by vehicles in accordance with Section 505.2. Construction documents. Construction documents for proposed fire apparatus access, location of fire lanes, security gates across fire apparatus access and construction documents and hydraulic calculations for fire hydrant systems shall be submitted to the fire department for review and approval prior to construction. CFC Sec. 501.3, 501.4.

PLAN REVIEW No. 22 2476

BLDG PERMIT No.

DEVELOPMENTAL REVIEW COMMENTS

16. **Water Supply Requirements:** Potable water supplies shall be protected from contamination caused by fire protection water supplies. It is the responsibility of the applicant and any contractors and subcontractors to contact the water purveyor supplying the site of such project, and to comply with the requirements of that purveyor. Such requirements shall be incorporated into the design of any water-based fire protection systems, and/or fire suppression water supply systems or storage containers that may be physically connected in any manner to an appliance capable of causing contamination of the potable water supply of the purveyor of record. Final approval of the system(s) under consideration will not be granted by this office until compliance with the requirements of the water purveyor of record are documented by that purveyor as having been met by the applicant(s). 2019 CFC Sec. 903.3.5 and Health and Safety Code 13114.7.

17. **Address identification:** New and existing buildings shall have approved address numbers, building numbers or approved building identification placed in a position that is plainly legible and visible from the street or road fronting the property. These numbers shall contrast with their background. Where required by the fire code official, address numbers shall be provided in additional approved locations to facilitate emergency response. Address numbers shall be Arabic numbers or alphabetical letters. Numbers shall be a minimum of 4 inches (101.6 mm) high with a minimum stroke width of 0.5 inch (12.7 mm). Where access is by means of a private road and the building cannot be viewed from the public way, a monument, pole or other sign or means shall be used to identify the structure. Address numbers shall be maintained. CFC Sec. 505.1.

This review shall not be construed to be an approval of a violation of the provisions of the California Fire Code or of other laws or regulations of the jurisdiction. A permit presuming to give authority to violate or cancel the provisions of the fire code or other such laws or regulations shall not be valid. Any addition to or alteration of approved construction documents shall be approved in advance [CFC, Ch.1, 105.3.6].

RESOLUTION NO. 2022-13

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALTOS GRANTING AN EXCEPTION FROM THE CITY'S STORY POLE POLICY TO THE PROPOSED DEVELOPMENT AT 330 DISTEL CIRCLE AND MAKING FINDINGS OF CEQA EXEMPTION

WHEREAS, on March 22, 2022 the City Council adopted an Open Government Policy that included a requirement for all multi-story commercial, multiple-family, mixed-use and public facility development projects subject to Planning Commission and City Council review to erect story poles as part of the application and public review process (the "Story Pole Policy"); and

WHEREAS, the City Council may grant exceptions to the Story Pole Policy due to a public health or safety concern, or if such an installation would impair the use of existing structure(s) or the site to the extent it would not be able to be occupied and the existing business and/or residential use would be infeasible; and

WHEREAS, by letter February 17, 2022 the applicant for the proposed development at 330 Distel Circle submitted a request for an exception from the City's Story Pole Policy due to public health and safety concerns, impairment of the existing structures and site related to placement of story poles in close proximity to drive aisles and affordable housing expediated timeline request; and

WHEREAS, this action The approval of the story poll exception is exempt from review under the California Environmental Quality Act ("CEQA") pursuant to CEQA Guidelines Section 15061(b)(3) in that it can be seen with certainty that not erecting temporary structures would not result in a significant environmental effect, and none of the circumstances set forth in CEQA Guidelines Section 15300.2 applies.

NOW THEREFORE, BE IT RESOLVED, that the City Council of the City of Los Altos hereby approves the applicant's request for an exception from the installation of story poles per the City's Story Pole Policy based on the following finding:

1. There is a public health and safety concern or impairment of the existing site or buildings due to the placement of the story poles and guy wires posing a threat of physical harm to users and a safety concern if a story pole or guy wire were to cause damage to personal property or result in personal injury to an individual attempting to access the site; and

2. Installation of story poles per the City's Story Pole Policy would require additional time and resources, including impediment to current operations of the Mid-Peninsula Open Space District and cause significant delay in transfer of current ownership to be able to access and install the poles; and

3. The installation of the Story Poles causing significant delay in the timelines of approval of the 100 % affordable housing project seeking density bonus and concession causing delays in securing affordable housing funding in a timely manner; and

4. To direct staff to work with the applicant to create alternatives that show different angles of the building including dimensions at pedestrian eye level renderings, particularly to include a rendering from the residential neighborhood behind the proposed parcel to be showcased on the on-site billboard for noticing.

I HEREBY CERTIFY that the foregoing is a true and correct copy of a Resolution passed and adopted by the City Council of the City of Los Altos at a meeting thereof on the 22nd day of March, 2022 by the following vote:

AYES:	Council Members Fligor, Weinberg and Vice Mayor Meadows
NOES:	Council Member Lee Eng and Mayor Enander
ABSENT:	None
ABSTAIN:	None

Anita Enander, MAYOR

NOTICE OF DEVELOPMENT PROPOSAL: 330 DISTEL CIRCLE

PROJECT DESCRIPTION:

The proposed building is 5 stories with a stepdown in the building to 4 levels at the western corner of the site. The building is 100% affordable with 90 units and 90 parking stalls.

Key sustainable features include: mass timber at the ground level, solar shading, water efficient landscape, and the potential for solar photovoltaics.

Agenda Item # 10.

PUBLIC HEARING NOTICE

Thursday, June 16, 2022 at 6:00 pm

The City of Los Altos will hold a Joint Planning Commission/Complete Street Commission public hearing to consider the project at the above date and time with an opportunity for public comment.

Per California Executive Order N-29-20, the Commission will meet via teleconference only. Members of the Public may call (833) 548-0282 to participate in the conference call (Meeting ID: 844 3478 8562 and Passcode: 859237) or via the web at https://zoom.us/j/84434788562. Members of the Public may only comment during times allotted for public comments. Public testimony will be taken at the direction of the Chair and members of the public may only comment during times allotted for public comments. Members of the public are also encouraged to submit written testimony prior to the meeting at PCPublicComment@losaltosca.gov. Emails received prior to the meeting will be included in the public record.

Project plans and information are available for review electronically at: https://www.losaltosca.gov/communitydevelopment/page/330-distel-circle. The staff report and project plans are posted on the City's website the Thursday before the meeting date. https://www.losaltosca.gov/planningcommission/page/planning-commission-68. Written comments may be mailed to the Planning Division at Los Altos City Hall or emailed to the Project Planner.

Project Summary

Site Area	.87 acres
Dwelling Units	90 Units
Proposed Use	Multifamily Residential
Construction Type	Type IIIA 5 stories
Parking	Surface + Mechanized Parking

Fire Access Plan

- 26' aerial apparatus access road
- 300' maximum. See request below per Exception 1 of 503.1.1 of Santa Clara County code.
- Stair Fire Riser
- Wet Standpipe
- Stair with roof access
- Ladder: Maximum 75 degree laddering angle to meet 15-30ft requirement from building to fire staging area.
- Red curbed area and/or fire lane signage to be installed
- Knox box for garage gate

Project is requesting for 300ft hose reach from Distel per Exception 1 of 503.1.1 Santa Clara County code below.

-NFPA 13 Fire sprinkler system proposed.
-4ft gravel path around the building for fire access.
-3 sides are surrounded on the other side of our property line with parking so access from adjacent parcels are available.
-Main frontage has aerial apparatus access.
-A narrow canopied variety of tree proposed on the West, North, East sides. See Landscape Drawings.
-Western stair goes to the roof.
-Western stair has standpipe connection at ground level from exterior.
-Wet standpipe proposed on the Courtyard - Level 2

NOTES

1. NFPA 13 Sprinkler system proposed. To be deferred submittal.
2. Fire alarm system to be submitted as a deferred submittal.
3. A two-way communication system shall be provided as a deferred submittal.
4. Emergency responder radio coverage shall be provided as a deferred submittal.
5. Knox key for automatic gates per section CFC Sec. 503.6 and 506.

330 DISTEL CIRCLE

We propose an innovative solution to the housing and parking needs for today and the future through four design concepts while providing an inclusionary and healthy community:

1. **Mechanized Parking Solution**
2. **Mass Timber**
3. **Modular Units**
4. **Sustainabilty**

CONCEPTS

A1.0

MECHANIZED PARKING SOLUTION

The efficient parking design and space optimization of a mechanized parking solution allows for 90 parking spaces. A long entry drive has been designed into the ground level plan to allow for a generous queuing area.

A1.1

MASS TIMBER

Our project team anticipates several key benefits from utilizing mass timber as opposed to concrete to construct the ground level of the project.

- **Renewable Resource**
- **Reduced Carbon Footprint**
- **Faster Construction**
- **Less disruptive construction process**
- **Natural warm wood aesthetic**

SUSTAINABILITY

Environmentally healthy features include the following:

SITE

- Stormwater control
- Resource Efficient Landscapes
- Courtyard
- Bicycle Storage

MATERIALS

- Low VOC paints
- Environmentally preferred materials
- Wood

ENERGY + WATER

- Solar PV
- Energy star appliances
- High efficacy lighting
- EV charging stations
- Water efficient fixtures
- High Efficiency Irrigation System

BUILDING ENVELOPE

- Passive Solar Shading
- Construction material efficiencies
- Double glazed windows

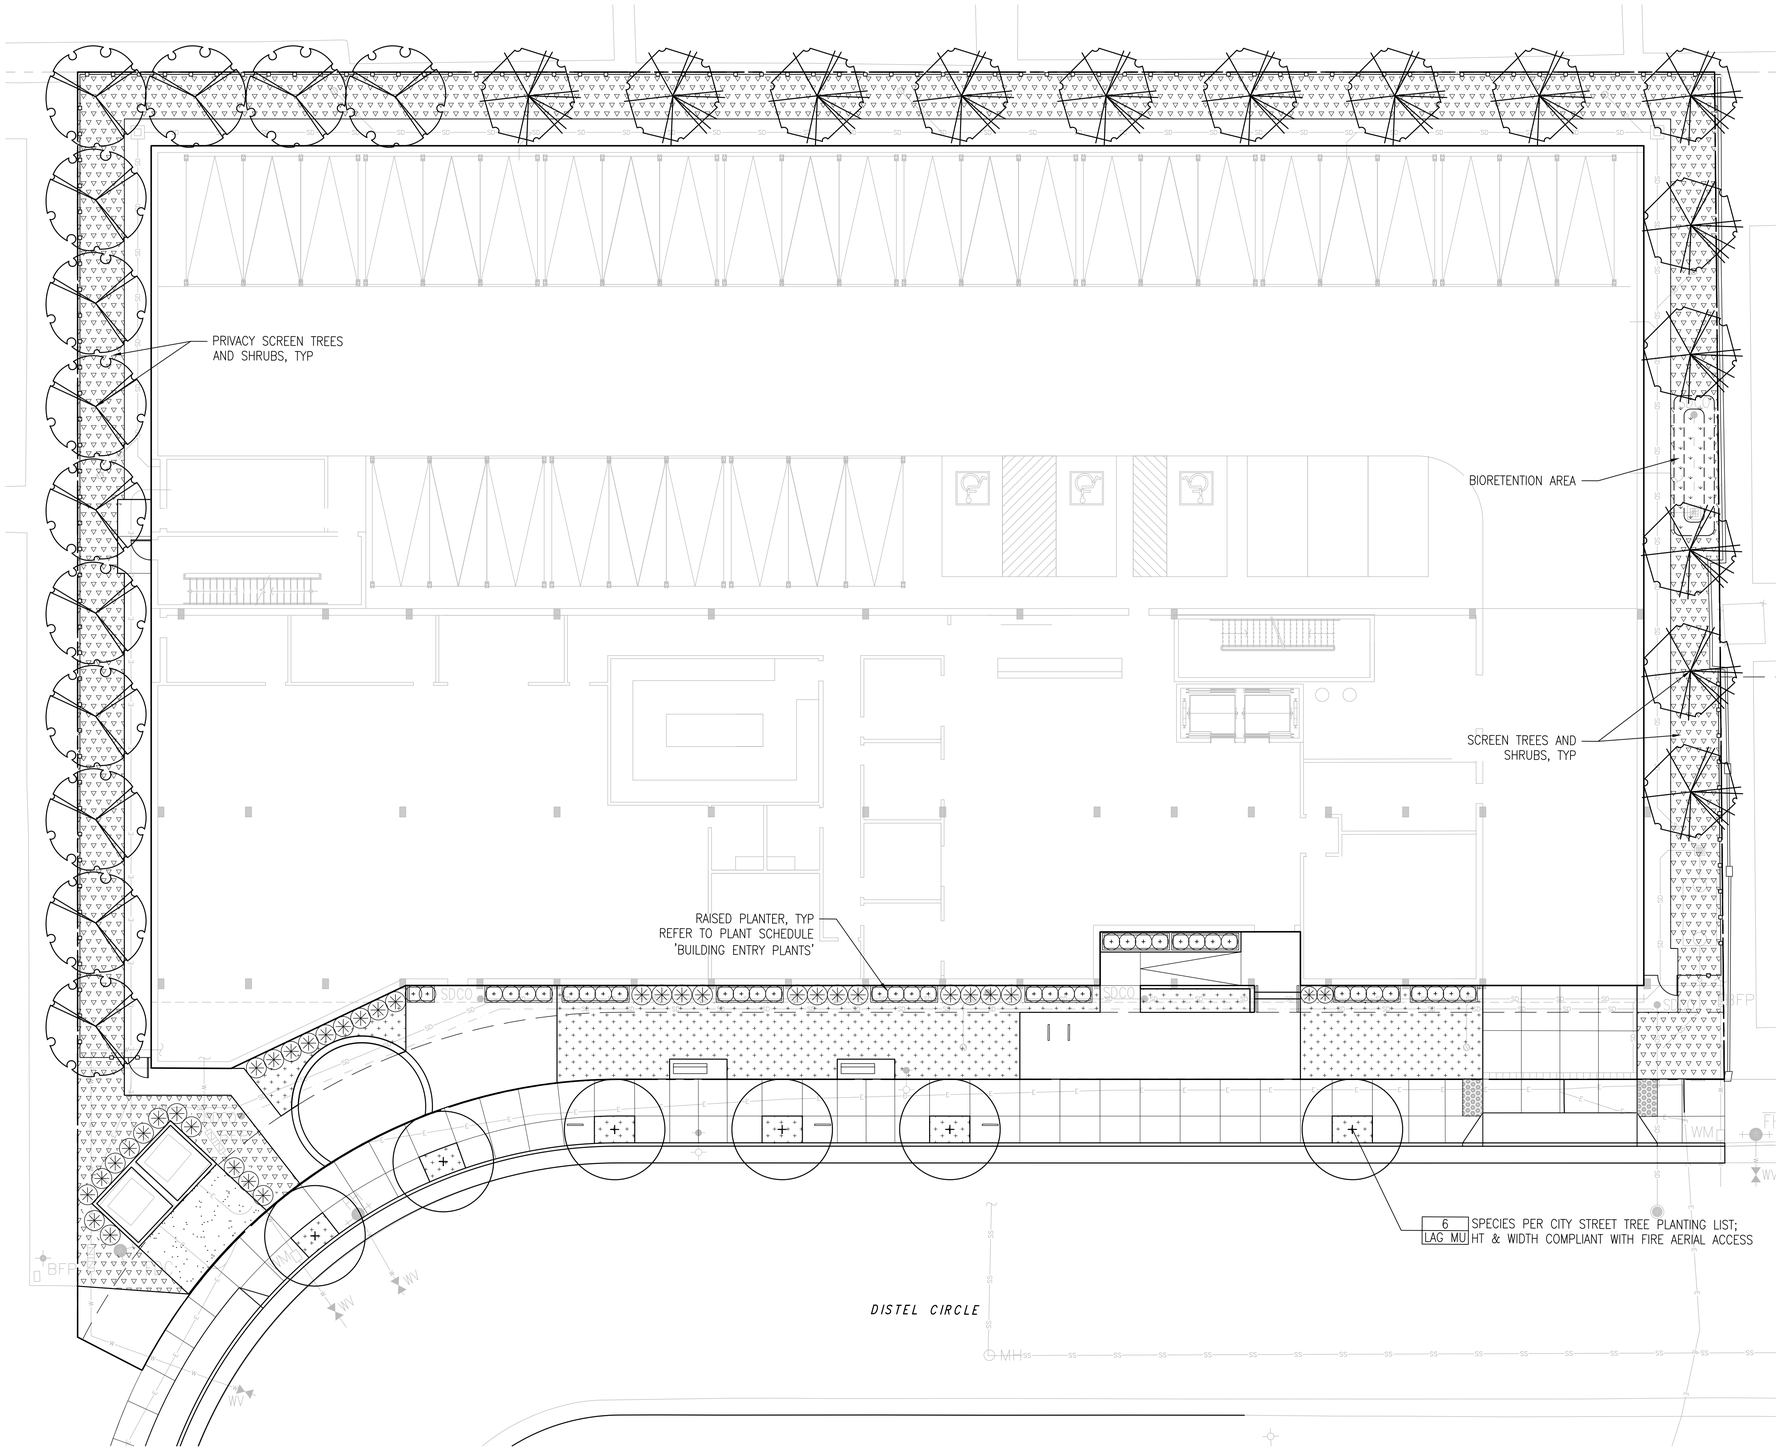
L1.2



IRRIGATION DESIGN INTENT

1. THIS PLAN SHALL COMPLY WITH THE REQUIREMENTS OF THE BOTH THE STATE OF CALIFORNIA AND CITY OF LOS ALTOS WATER EFFICIENT LANDSCAPE ORDINANCES (MWELO) AS WELL AS LOCAL WATER PURVEYOR REQUIREMENTS.
2. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO PROVIDE THE MINIMUM AMOUNT OF WATER NECESSARY TO SUSTAIN GOOD PLANT HEALTH.
3. THE IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC, WEATHER-BASED SYSTEM USING RAIN SENSOR, LOW FLOW DRIP AND BUBBLER DISTRIBUTION.
4. ALL SELECTED COMPONENTS SHALL BE PERMANENT, COMMERCIAL GRADE, SELECTED FOR DURABILITY, VANDAL RESISTANCE AND MINIMUM MAINTENANCE REQUIREMENT, INSTALLED BELOW-GRADE, AND DESIGNED FOR 100% COVERAGE.
5. THE SYSTEM SHALL INCLUDE A MASTER CONTROL VALVE AND FLOW SENSING CAPABILITY WHICH WILL SHUT DOWN ALL OR PART OF THE SYSTEM IF LEAKS ARE DETECTED.
6. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO DELIVER WATER TO HYDROZONES BASED ON MOISTURE REQUIREMENTS OF THE PLANT GROUPING.
7. POINT OF CONNECTION (P.O.C.) AFTER BACKFLOW PREVENTER FOR IRRIGATION, SCD. IRRIGATION DEMAND: **18 GPM** AT **65 PSI** STATIC PRESSURE AFTER BACKFLOW ASSEMBLY. CONTRACTOR TO FIELD VERIFY WATER PRESSURE & FLOW BEFORE ANY NEW WORK IS STARTED AND NOTIFY THE LANDSCAPE ARCHITECT IF THE PRESSURE IS DIFFERENT THAN NOTED.
8. RECYCLED WATER READY: ALL ONSITE PLUMBING FOR NON-DOMESTIC WATER USES (E.G. IRRIGATION, INDUSTRIAL PROCESSES, COOLING, ECT.) SHALL BE DESIGNED FOR RECYCLED WATER USE AND SHALL COMPLY WITH ALL RECYCLED WATER REGULATIONS IN SANTA CLARA MUNICIPAL CODE CHAPTER 13.15, WATER, ARTICLE IV. REGULATION OF RECYCLED WATER SERVICE AND USE.

C.3 TREATMENT FACILITIES CONSTRUCTION NOTES:

1. DURING THE BEGINNING OF THE CONSTRUCTION, THE PROJECT APPLICANT SHALL ARRANGE FOR A SITE VISIT (INSPECTION) BY A THIRD-PARTY REVIEWER ACCEPTABLE TO THE CITY OF LOS ALTOS THAT THE INSTALLED STORMWATER TREATMENT MEASURES HAVE BEEN CONSTRUCTED IN ACCORDANCE WITH THE APPROVED BUILDING PLANS. THE THIRD-PARTY REVIEWER WILL RECOMMEND THE REQUIRED NUMBER OF SITE INSPECTIONS AT DIFFERENT INTERVALS OF CONSTRUCTION. THE THIRD-PARTY REVIEWER MUST BE A CIVIL ENGINEER, ARCHITECT OR LANDSCAPE ARCHITECT REGISTERED IN THE STATE OF CALIFORNIA AND MUST HAVE A CURRENT TRAINING ON STORMWATER TREATMENT DESIGN. A LIST OF QUALIFIED THIRD-PARTY REVIEWERS CAN BE FOUND ON THE SANTA CLARA VALLEY URBAN RUNOFF POLLUTION PREVENTION PROGRAM (SCVURPPP) WEBSITE AT WWW.SCVURPPP-W2K.COM/CONSULTANTS_LIST.SHTML
2. INSTALLATION OF POROUS PAVEMENT AND/OR VAULTS SHALL BE DONE PER STANDARD DETAILS AND SPECIFICATIONS. THIRD PARTY REVIEWER OR VENDOR SHALL INSPECT THE POROUS PAVEMENT AND/OR VAULTS INSTALLATION (INCLUDING IF NECESSARY, PERFORMING PERCOLATION TEST) AND SUBMIT THEIR CONCURRENCE LETTER TO THE CITY OF LOS ALTOS.

From: Damian H <[redacted]
Sent: Monday, September 12, 2022 6:31 PM
To: City Council <council@losaltosca.gov>; Anita Enander <aenander@losaltosca.gov>; Sally Meadows <smeadows@losaltosca.gov>; Neysa Fligor <nfligor@losaltosca.gov>; Lynette Lee Eng <lleeeng@losaltosca.gov>; Jonathan Weinberg <jweinberg@losaltosca.gov>
Subject: 330 Distel Circle Privacy Concern

Los Altos City Council, the 5-story building to be developed on 330 Distel Circle will impact the privacy of several homes located in the Marich Way neighborhood (see diagram below). This is due to the fact that the 5-story building windows facing Marich Way will be overlooking the various homes' backyards, swimming pools, and (bedroom) windows. The current trees provide little coverage due to the height of this new development (existing trees on 330 Distel Circle will be removed)

I moved to my house about 2-years ago and I followed all the laws to remodel it. We even reduced the size of the roof on the backyard (which would have provided extra privacy) to meet the Los Altos city code. None of the houses developed on Marich Way or in the neighborhood, expected such a tall construction to be developed. With this in mind, I would like to request the developer of this property to come up with a proposal to avoid endangering the privacy of the current homes, such as: 1) Reducing the height of the development, 2) Plant additional trees (or equivalent tall vegetation) closer to the actual impacted homes so privacy can be respected, 3) The windows of the building facing Marich should be reduced to small windows close to the ceiling of the apartment units so people inside the unit cannot see down while light can still go through.

I have been working with the developers on this issue but little progress is happening. Though I attended the last council meeting on August 18th, I did not feel that neighbors had enough time to voice their concerns (we had 2 mins on a full 2-hour presentation). In other words, we spendt almost 2 hours discussing the property in question but less than 2 mins to voice concerns and we were not able to be part of the overall discussion (i.e. the approach does not seem fair necessarily).

Lastly, the City of Los Altos seems to not be willing/able to properly enforce parking codes (which impact RVs as well as vehicles parked overnight). Case in point, I reported an RV parked on 330 Distel Circle and it took more than 5 attempts to get it handled. More concerning, the 330 Distel Circle property will only have 90 mechanical parking spaces for the 90-units being proposed (which will be insufficient since in general most units will have 2 cars each) In addition, there is no reassurance that the actual mechanical parking unit will be required to be used, stay functional, etc. As such, there is a very high chance that cars from this new building will be parked on the streets for days and/or overnight. Based on https://www.losaltosca.gov/cityclerk/page/los-altos-municipal-code, "The Los Altos City Code contains provisions and laws adopted by the City Council to maintain a healthy and safe community and to preserve the quality-of-life in Los Altos. The Code includes Zoning and Building regulations as well as administrative regulations." As such, why does the City enforces certain codes, while not others (such as "8.20.090 - Parking for more than 72 hours" and "8.20.220 - All night parking prohibited."? How would these City codes be enforced for this new building? How does the City determine which codes to enforce while maintaining a safe community and good quality-of-life? We need to ensure that we are consistent on how we enforce the City code or change them accordingly to reflect changes. I have emailed these concerns to the planning committed in July, but I have yet to get a proper response.

I am in favor of affordable housing, however we should be mindful of the privacy implications for the current residents as well. We need to find a balanced approach.

What do you recommend as next steps? I will be attending the meeting on 9/20.

Thanks

September 14, 2022

Dear Mayor Enander, Vice Mayor Meadows, and members of the Los Altos City Council,

On behalf of Los Altos Community Voices (LACV), we urge you to approve the design and issue a conditional use permit for the proposed all-affordable, 90-unit development at 330 Distel Circle. The applicant has conducted extensive outreach to inform the community about their plans and has been very responsive to suggested modifications.

Robin Abrams, Curtis Cole, Kim Cranston, Bill Sheppard, Marie Young

Re: Agenda Item #2, City Council Meeting Sept. 20th – 330 Distel Circle

Dear Mayor and Members of the City Council:

As we have written earlier to both the Planning Commission and the Council, the LWV enthusiastically supports the EAH development at 330 Distel Circle, the first all-affordable housing to be built in Los Altos. The LWV supports action at all levels of government for the provision of affordable housing for all Californians. We compliment the Staff on its comprehensive report explaining the concessions and waivers allowed by State law including State Density Bonus Law.

We also compliment EAH for working with the community, as well as with the City and County, to design a project that meets neighborhood concerns but still provides the 90 units of affordable housing originally projected for this site. The location is ideal for lower-income households, near transit and services. We are also pleased to see that the percentage of very low-income units (including extremely low income) has increased from the 55% anticipated in the original MOU with the County to over 63%, as these households are the most in need of affordable housing. We urge the Council to approve this project on September 20th.

Thank you for considering our input,

(Please send any questions about this email to Sue Russell at [redacted]

Karin Bricker, President LWV of Los Altos/Mountain View

September 17, 2022

Dear Councilmembers,

For over half a century in California, we have had the legal right to make decisions about our reproductive health care, including whether to continue a pregnancy or have an abortion, and whether to choose or refuse contraceptives, based on our personal life circumstances, beliefs, and health concerns. These are among the most private, consequential, and complex decisions we make in our lives.

Physicians and other health care providers have also had legal protection to serve our reproductive health needs without being prosecuted or second-guessed by unqualified, unaffected, and often politically motivated forces.

This year, the Supreme Court of the United States, in "Dobbs v. Jackson Women's Health Organization", removed the federal protection of Roe v. Wade and left it to each state to determine whether we will retain, or lose, these fundamental reproductive rights.

As a result, individuals, organizations, and government entities all over California are joining together to support **Proposition 1, "Right to Reproductive Freedom Amendment (2022)",** which would protect these rights in our state. Prop 1 is just three sentences:

> SEC. 1.1. The state shall not deny or interfere with an individual's reproductive freedom in their most intimate decisions, which includes their fundamental right to choose to have an abortion and their fundamental right to choose or refuse contraceptives. This section is intended to further the constitutional right to privacy guaranteed by Section 1, and the constitutional right to not be denied equal protection guaranteed by Section 7. Nothing herein narrows or limits the right to privacy or equal protection.[4]

Since 1879, California's constitution has been amended over 500 times. There have been few cases where the need for a state constitutional amendment has been so clear, so urgent, and so widely supported as with Proposition 1. The bill to put Proposition 1 on our November ballot passed with overwhelming majorities in our state legislature, and is supported by the California Medical Association, the League of Women Voters, and the Santa Clara County Board of Supervisors, among many others.

As the tragic real-life consequences of the Supreme Court decision become clear in headlines across our country, it is up to us to protect the right of all Californians to make decisions about their reproductive lives, in private, based on their own beliefs and circumstances, and with the guidance of health care professionals who are able to practice to the highest ethical standards of care.

We urge the City of Los Altos to join us in supporting Proposition 1 "Right to Reproductive Freedom Amendment (2022)".

Sincerely,

Los Altos Women's Caucus

Los Altos Mountain View Community Foundation

Los Altos/Mountain View Chapter,

To: City Council
Cc: Radha Hayagreev
Subject: EAH Housing
Date: Friday, September 16, 2022 7:36:12 AM

Dear Members of the Los Altos City Council,

I understand that EAH Housing has requested approval of the proposed development at 330 Distel Circle. This approval should not be granted. EAH Housing has not been honest in their statements concerning this development and EAH Housing is not an organization with which the city and county should do business.

For example, EAH Housing has stated that any person can walk a distance of one half mile radius (that is, 0.7 miles) in 8 minutes. This is laughable false any they are using this and similar false claims to promote the proposed development site. EAH Housing has stated that 45 parking spaces is perfectly adequate for a development of 90 units, which is again false. The 90 families in this unit would have at least 150 vehicles, and most of these would be parked on the street, or nearby streets, considering that an additional 200 families (with 400 vehicles) would live at the (mostly non-subsidized, with inadequate parking) housing a block away, at 5150 El Camino Real.

EAH Housing has not bothered to assess the impact of this development on the neighboring residents. I know this for a fact, because I am a neighboring resident. They have evidently tricked some city officials into thinking that this development is some kind of “asset” to the community. If this is true, why not move the development to a better location, such as University Avenue? But one answer is, that EAH Housing is not proposing any public space, such as a children’s playground, to go with this development.

EAH housing has also flooded my inbox with spam. This is another sign of an organization that exists only for marketing (that is, profit) rather than public service. Their proposed construction methodology is to use low cost, pre-fabricated modules, such as can be seen in similar aesthetically undesirable developments in Mountain View. It is simply not right for Los Altos.

Sincere regards,
Peter Robertson

330 Distel - SB330 project

The proposal is an SB 330 project and with the intention to stay within the limit of total 5 public meetings

1. March 22, 2022 - Story Pole Exemption hearing
2. August 18, 2022 – Joint Planning Commission / Complete Streets Commission hearing - Design Review and Conditional Use Permit, Multi-modal Transportation Review
3. September 20, 2022 – *tonight* City Council Hearing

Project Overview – 330 Distel Circle

- General Plan Designation- Thoroughfare Commercial (TC)
- Zoning – Commercial Thoroughfare (CT)

Project Overview – 330 Distel Circle

- New multi-family residential development
- 0.87 acres at 330 Distel Circle
- 90 for –rent condominium units
- 88 units – 100 % affordable housing
- 2 units – Manager units at Market rate.
- 64’ – 6” tall, five-story building
- First floor of amenities and parking
- Common open space in the rear

Housing Accountability Act

Because at least 20 percent of the units in the project would provide housing for households at or below 60 percent of Area Median Income, Per Government Code Section 65589.5 (d), the City cannot deny the project or approve it subject to conditions of approval that would make the project infeasible for housing at the levels of affordability proposed, unless one of the following findings can be made:

1.The City has met its RHNA targets for the current housing cycle at each of the affordability levels proposed for this project;

2.Denial or the imposition a condition of approval that would have the effect of rendering the project infeasible for affordable housing is necessary to avoid a violation of state or federal law;

3.The project site is located on land for agriculture or resource preservation and either: (1) the site lacks adequate water or wastewater facilities, or (2) the project site is surrounded on at least two sides by land used for agriculture or resource preservation;

4.The project would have a specific, adverse, and unmitigable impact on public health or safety; or

5.All the following are true: (1) the project is inconsistent with the zoning ordinance; (2) the project is inconsistent with the applicable general plan land use designation; (3) the City has a certified Housing Element; and (4) the project site is not identified in the Housing Element inventory or is proposed at a greater density than projected in the inventory.

Design Review Permit (D22-0002) and Conditional Use Permit (CUP22-0001)

Multiple-Family Design Review (application D22-0002) and Conditional Use Permit (application CUP22-0001) with a Density Bonus and Development Incentives and Development Waivers for a 90-unit residential development at 330 Distel Circle per the findings and conditions contained in the resolution.

Affordable Housing project

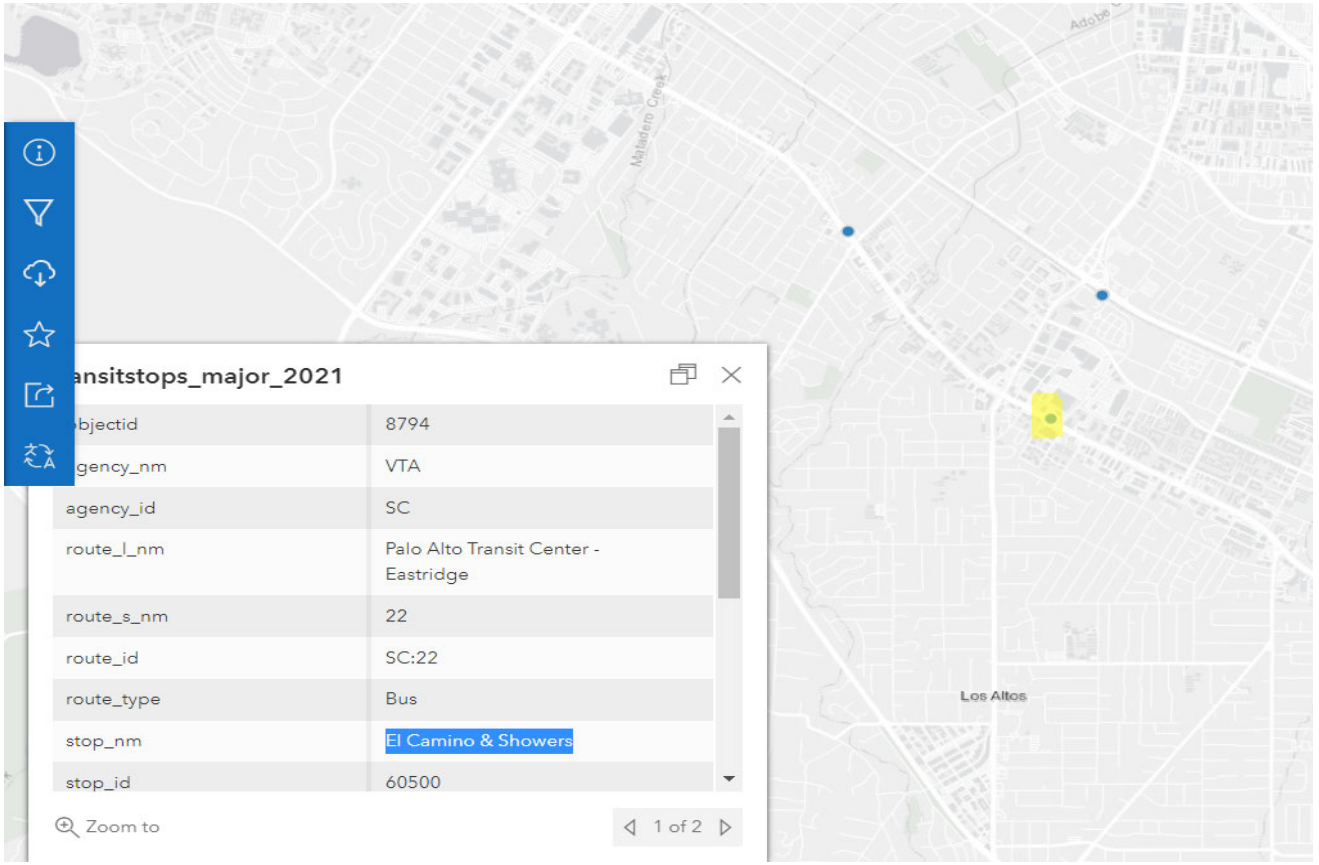
Density Bonus for Affordable housing within ½ mile of a major transit stop

The Density Bonus law definitions of **major transit stop** is:

The intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods;

El Camino and Showers drive has route 22, rapid 522 and route 40 at the frequency of service to qualify as major transit stop

MTC recognizes El Camino and Showers as a major transit stop



Source: https://opendata.mtc.ca.gov/datasets/transit-stops-major-2021-1/explore?location=37.400347%2C-122.099160%2C13.78

Density Bonus and Affordable Housing

Residential Projects that are:

- 100 percent affordable units
- Located within ½ mile of major transit stop

Are Eligible for:

- No maximum density
- No parking restriction
- Height exception of three stories or 33 feet
- Up to Four concessions

Project Density	
Lot Size	37,890 square feet, or 0.87 acres
General Plan	Thoroughfare Commercial (38 units per acre)
Zoning	Commercial Thoroughfare (38 units per acre)
Allowed Density	Base Density 33 units
Affordable Housing Requirement (LAMC)	(15%) 5 units
Affordable Housing Provided	88 units (31 Low income, 12 Very low income, 45 Extremely low income)
Eligible State Density Bonus	***No density maximum*** *(owing to affordable housing located within ½ mile of major transit stop)*
Eligible Gross Density	46 units (if using 38.75% density bonus provisions)
Additional Density Bonus Units Proposed	44 units
Total Number Dwelling Units Proposed	90 units
Percent Density Bonus proposed	274%

BMR distribution – 330 Distel Circle

Unit Mix – 330 Distel		AMI					
	SQFT PU	30%	50%	60%	80%	**Unit Total**	**Unit Mix**

2-BR	965	12	3	4	2	21	23%
3-BR	1140	10	3	7	3	23	26%
MGR	965					2	2%
Unit Total		45	12	25	6	**90**	100%
Affordability Dist.		50%	13%	28%	7%	100%	

Concessions

Per State Density Bonus Law and the Los Altos Density Bonus Ordinance (Chapter 12.28 LAMC, Article 2), projects providing 100 percent affordable units including total units and density bonus units, exclusive of manager's units, are entitled to four development concessions

In addition, when located within ½ mile of major transit stop, the project is entitled to a building height increase up to 33 feet

	Standard (in CT zone)	Proposed	Concessions and Waivers
Front Setback LAMC 14.50.090	25ft	10ft	Concession -1
Private Open Space LAMC 14.50.150	Not required for every unit, average 50 sq. Ft. shall be provided for the total number of dwelling units. For 90 units 4,500 sq. ft	25 sq. Ft. Average 2,550 sq. ft.	Concession - 2
Design Control 14.50.170 B (1) Building Massing and articulation. Upper Story Step-Back	Min 10ft from ground floor façade for stories above 45ft in height (top story)	No step back	Concesssion-3
Reduced Standards for Los Altos REACH codes for EV Ready charging points for affordable housing projects to meet reduced requirement which is 10% EV2 ready spaces of total of 9 spaces in total.	EV2 ready spaces – 9 EV1 ready spaces – 81	Meets affordable housing 10% EV2 ready spaces. (2019 code) Proposed EV2 ready - 9	Concession – 4

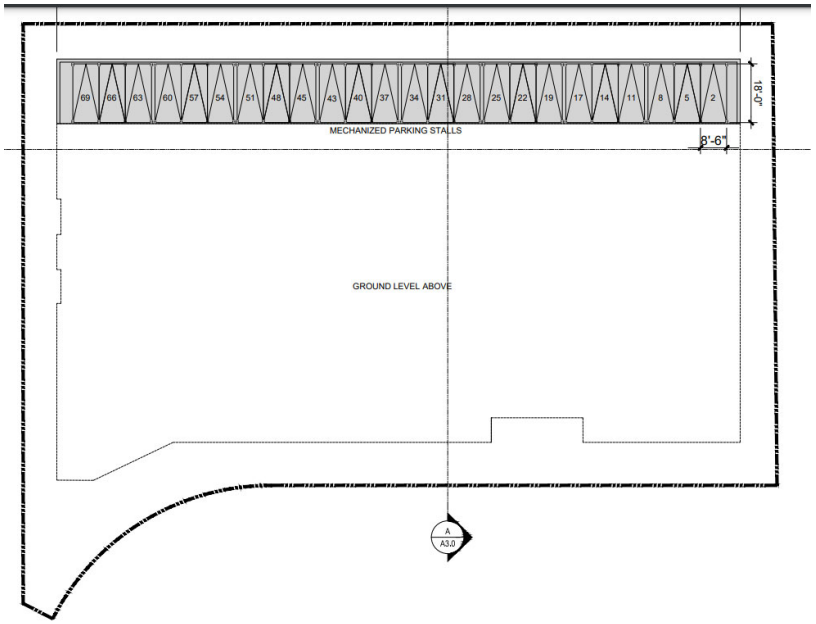
Waivers

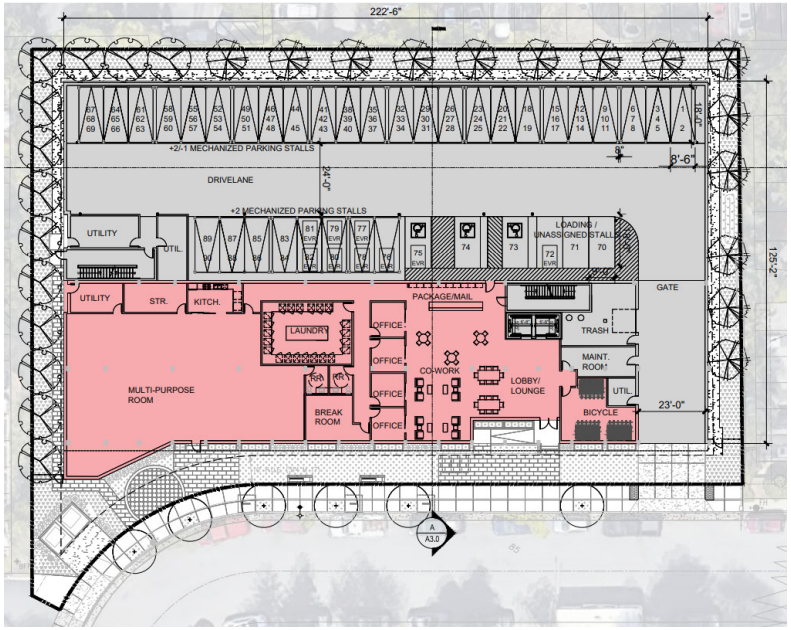
In addition to requesting concessions, density bonus projects are typically eligible for waivers of any development standards that would physically preclude the construction of a project with the density bonus and the incentives or concessions to which the development is entitled.

However, waivers are discretionary for this project.

	Standard (in CT zone)	Proposed	Waivers
Design Control 14.50.170 C (5) a. Building Design. Interior Courtyard.	Interior courtyard must be partially visible from the street and linked to the street by a clear accessible path of travel	Raised courtyard on level 2 not visible from the street. Access to courtyard and exit via stair.	Waiver-1
Design Control 14.50.170 D (4) a. Materials. Materials Defining Building Elements.	For multistory elements, the base of the building shall be defined by a distinct material selected from among the following: stone, brick, concrete, CMU, or stucco (“base material”)	Wood serves as a distinct material	Waiver-2
CT required conditions 14.50.060 C. 2. Access and screening of refuse collection	Every development will be required to provide suitable space on-site for solid waste separation, collection, storage and pick up and shall site these in locations that facilitate access, collection, and minimize any negative impact on persons occupying the development site, neighboring properties, or public right-of-way	Solid waste separation, collection and storage are on-site, but the pickup is proposed to be in the service staging area on the public right-of-way	Waiver-3

Parking





Density Bonus Parking Requirement = 0
Project Proposal = 87 parking spaces with 3 spaces designated for loading/unloading

Los Altos Affordable Housing Alliance
To educate and inspire the Los Altos community to build housing that is affordable for our workforce.

Los Altos Affordable Housing Alliance

September 19, 2022

Dear Mayor Enander, Vice Mayor Meadows, and Councilmembers,

The Los Altos Affordable Housing Alliance continues to enthusiastically support the project at 330 Distel Circle. Creating more housing at affordable levels is a huge challenge for our city, and 330 Distel Circle is a huge opportunity. Our city will benefit greatly from welcoming new neighbors at this all-affordable project.

It bears repeating that EAH Housing has done an outstandingly thorough job to engage the community and incorporate feedback into its final plan. City staff have clearly worked very hard with the developer and the County throughout the process to keep the project on track and progressing through the necessary steps.

We urge the Council to approve the 330 Distel Circle project.

Respectfully,
The Los Altos Affordable Housing Alliance

Los Altos, CA 94022

Re: Proposed 330 Distel Circle Affordable Housing Development.

Dear City Council and City Attorney:

The California Renters Legal Advocacy and Education Fund (CaRLA) submits this letter to inform the Los Altos City Council that they have an obligation to abide by all relevant state housing laws when evaluating the proposed 330 Distel Circle Multiple Family Affordable Housing Development Project. The Housing Accountability Act (GOV 65589.5) requires approval of zoning and general plan compliant projects unless findings can be made regarding specific, objective, written health and safety hazards.

As you are well aware, California remains in the throes of a statewide crisis-level housing shortage. New housing such as this is a public benefit; it will bring increased tax revenue, new customers to local businesses, decarbonization in the face of climate crisis, but most importantly it will reduce displacement of existing residents into homelessness or carbon-heavy car commutes.

CaRLA is a 501(c)3 non-profit corporation whose mission includes advocating for increased access to housing for Californians at all income levels, including low-income households. Consistent with the general plan, the proposed development will provide badly needed housing and contribute to the creation of a harmonious neighborhood through architectural integrity with neighboring structures. In addition, the proposed development will further Los Altos' affordable housing stock, thus enhancing community comfort, prosperity, and welfare.

While no one project will solve the regional housing crisis, the proposed 330 Distel Road development is the kind of housing Los Altos needs to mitigate displacement, provide shelter for its growing population, and arrest unsustainable housing price appreciation. You may learn more about CaRLA at www.carlaef.org.

Subject: AB 481 Military Equipment Use Policy

Summary:

- California Assembly Bill 481 requires the Los Altos Police Department to obtain City Council approval by the adoption of a military equipment use policy prior to taking certain actions relating to the funding, acquisition, or use of military equipment as defined by the legislature.

Staff Recommendation:
Staff recommends adoption of Los Altos Police Department Draft Policy 709, Military Equipment Use.

Purpose

To adopt an ordinance approving Los Altos Police Lexipol Policy 709 pertaining to the funding, acquisition, and use of military equipment.

Background

On September 30, 2021, Governor Newsom signed a series of eight (8) policing reform legislation aimed at increasing transparency of peace officer misconduct records and creates a system to decertify peace officers for serious misconduct, improving policing responsibility and accountability guidelines, raising eligibility standards, banning harmful restraint techniques, and creates a public forum for the funding, acquisition and use of military equipment. Assembly Bill 481 (AB 481) was authored by Assemblymember David Chiu (D-San Francisco) to address the funding, acquisition and use of military equipment.

California Government Section 7071 requires a law enforcement agency's military equipment policy, which includes the type of equipment the department may acquire and use, to be approved by the governing body. "Military equipment" is not related to whether or not the equipment was acquired through military sources. The Los Altos Police Department does not possess any equipment specifically designed for military use, nor has the department acquired any equipment through a military surplus program, commonly known as the 1033 Program. Our "military equipment" is included in the attached policy under inventory, and includes items such as patrol rifles, several less lethal force options, and training flash bangs utilized as diversionary devices by our SWAT team.

As part of the approval process outlined in Assembly Bill 481, the proposed military equipment policy was made available on the department website at least 30 days prior to any public hearing concerning the military equipment at issue (Government Code § 7071). The police department also hosted a community meeting to discuss AB 481 on May 12th.

Subject: AB 481 Military Equipment Use Policy

Pursuit to Government Code 7072, upon approval of a military equipment policy, the Chief of Police or the authorized designee will submit a military equipment report to the governing body for each type of military equipment approved within one year of approval, and annually thereafter for as long as the military equipment is available for use. The first annual report will be presented in September 2023.

Discussion/Analysis

California Assembly Bill 481, signed into law on September 30, 2021, requires police agencies to obtain City Council approval by the adoption of a military equipment use policy prior to taking certain actions relating to the funding, acquisition, or use of military equipment as defined by the legislature. The bill requires an annual report to the governing board regarding the military equipment.

Recommendation

The staff recommends Council adopt the attached policy by ordinance, allowing for the Police Department to continue the utilization of their military equipment.

Military Equipment

709.1 PURPOSE AND SCOPE

The purpose of this policy is to provide guidelines for the approval, acquisition, and reporting requirements of military equipment (Government Code § 7070; Government Code § 7071; Government Code § 7072). Assembly Bill 481 (AB 481), signed into law on September 30, 2021, requires law enforcement agencies to create a policy establishing guidelines and requirements for the funding, acquisition, and use of "military equipment" (Government Code § 7070, 7071, and 7072), including requirements to host informational meetings with the public, generate annual "military equipment" use reports, and seek annual approval from their respective governing bodies. The purpose of this policy is to make sure that safeguards exist, including transparency, governing body oversight, and accountability measures, to ensure the funding, acquisition, and use of "military equipment" is consistent with the provisions set forth by the governing body and as outlined in AB 481. This policy will also provide the public with a transparent view of the "military equipment" utilized by the Los Altos Police Department.

709.1.1 DEFINITIONS

Definitions related to this policy include (Government Code § 7070):

Governing body – The Los Altos City Council for the adoption of this ordinance and the approval of the annual report ~~elected or appointed body that oversees the~~ .

POST - Peace Officer Standards and Training

SWAT - Special Weapons and Tactics

Military equipment – Per AB 481, military equipment i ~~I~~ncludes but is not limited to the following:

(1) Unmanned, remotely piloted, powered aerial or ground vehicles.

(2) Mine-resistant ambush-protected (MRAP) vehicles or armored personnel carriers. However, police versions of standard consumer vehicles are specifically excluded from this subdivision.

(3) High mobility multipurpose wheeled vehicles (HMMWV), commonly referred to as Humvees, two and one-half-ton trucks, five-ton trucks, or wheeled vehicles that have a breaching or entry apparatus attached. However, unarmored all-terrain vehicles (ATVs) and motorized dirt bikes are specifically excluded from this subdivision.

(4) Tracked armored vehicles that provide ballistic protection to their occupants and utilize a tracked system instead of wheels for forward motion.

(5) Command and control vehicles that are either built or modified to facilitate the operational control and direction of public safety units.

(6) Weaponized aircraft, vessels, or vehicles of any kind.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(7) Battering rams, slugs, and breaching apparatuses that are explosive in nature. However, items designed to remove a lock, such as bolt cutters, or a handheld ram designed to be operated by one person, are specifically excluded from this subdivision.

(8) Firearms of.50 caliber or greater. However, standard issue shotguns are specifically excluded from this subdivision.

(9) Ammunition of.50 caliber or greater. However, standard issue shotgun ammunition is specifically excluded from this subdivision.

(10) Specialized firearms and ammunition of less than.50 caliber, including assault weapons as defined in Sections 30510 and 30515 of the Penal Code, with the exception of standard issue service weapons and ammunition of less than.50 caliber that are issued to officers, agents, or employees of a law enforcement agency or a state agency.

(11) Any firearm or firearm accessory that is designed to launch explosive projectiles.

(12) "Flashbang" grenades and explosive breaching tools, "tear gas," and "pepper balls," excluding standard, service-issued handheld pepper spray.

(13) Taser Shockwave, microwave weapons, water cannons, and the Long Range Acoustic Device (LRAD).

(14) The following projectile launch platforms and their associated munitions: 40mm projectile launchers, "bean bag," rubber bullet, and specialty impact munition (SIM) weapons.

(15) Any other equipment as determined by a governing body or a state agency to require additional oversight.

(16) Not withstanding paragraphs (1) through (15), "military equipment" does not include general equipment not designated as prohibited or controlled by the federal Defense Logistics Agency.

~~Unmanned, remotely piloted, powered aerial or ground vehicles.~~

- ~~Mine-resistant ambush-protected (MRAP) vehicles or armored personnel carriers.~~
- ~~High mobility multipurpose wheeled vehicles (HMMWV), two-and-one-half-ton trucks, five-ton trucks, or wheeled vehicles that have a breaching or entry apparatus attached.~~
- ~~Tracked armored vehicles that provide ballistic protection to their occupants.~~
- ~~Command and control vehicles that are either built or modified to facilitate the operational control and direction of public safety units.~~
- ~~Weaponized aircraft, vessels, or vehicles of any kind.~~
- ~~Battering rams, slugs, and breaching apparatuses that are explosive in nature. This does not include a handheld, one-person ram.~~
- ~~Firearms and ammunition of .50 caliber or greater, excluding standard-issue shotguns and standard-issue shotgun ammunition.~~

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

- ~~Specialized firearms and ammunition of less than – .50 caliber, including firearms and accessories identified as assault weapons in Penal Code § 30510 and Penal Code § 30515, with the exception of standard-issue firearms.~~
- ~~Any firearm or firearm accessory that is designed to launch explosive projectiles.~~
- ~~Noise-flash diversionary devices and explosive breaching tools.~~
- ~~Munitions containing tear gas or OC, excluding standard, service-issued handheld pepper spray.~~
- ~~TASER® Shockwave, microwave weapons, water cannons, and long-range acoustic devices (LRADs).~~
- ~~Kinetic energy weapons and munitions.~~
- ~~Any other equipment as determined by a governing body or a state agency to require additional oversight.~~

709.2 POLICY

It is the policy of the Los Altos Police Department that members of the department comply with the provisions of Government Code § 7071 with respect to qualifying "military equipment". "Military equipment" shall be used by members of the Department who have completed applicable training, including training required by the Commission on Peace Officer Standards and Training (POST). See the Military Equipment Inventory List (section 709.4) for associated "military equipment" training requirements.

"Military equipment", which has been approved for use by the governing body, shall be used in accordance with all other applicable department policies and laws. These policies and laws include, but are not limited to:

- ~~•~~ Los Altos Police Department Policy 300 (Use of Force)
- Los Altos Police Department Policy 308 (Control Devices and Techniques) ~~It is the policy of the that members of this comply with the provisions of Government Code § 7071 with respect to military equipment.~~
- Los Altos Police Department Policy 312 (Firearms)
- Los Altos Police Department Policy 414 (Hostage and Barricade Incidents)
- California Assembly Bill No. 48 (Use of Kinetic Energy Projectiles and Chemical Agents-Assemblies, Protests, and Demonstrations)
- California Penal Code Section 13652 (Use of Kinetic Energy Projectiles and Chemical Agents)

This policy expressly prohibits the use of "military equipment" on individuals or groups solely based on actual or perceived characteristics, such as race, ethnicity, national origin, religion, sex, sexual orientation, gender identity or expression, economic status, age, cultural group, or disability.

709.3 MILITARY EQUIPMENT COORDINATOR

The Chief of Police should designate a member of this department to act as the military equipment coordinator. The responsibilities of the military equipment coordinator include but are not limited to:

(a) Acting as liaison to the governing body for matters related to the requirements of this policy.

(b) Identifying department equipment that qualifies as military equipment in the current possession of the Department, or the equipment the Department intends to acquire that requires approval by the governing body.

(c) Conducting an inventory of all military equipment at least annually.

(d) Collaborating with any allied agency that may use military equipment within the jurisdiction of Los Altos Police Department (Government Code § 7071).

(e) Preparing for, scheduling, and coordinating the annual community engagement meeting to include:

1. Publicizing the details of the meeting.
2. Preparing for public questions regarding the department's funding, acquisition, and use of equipment.

(f) Preparing the annual military equipment report for submission to the Chief of Police and ensuring that the report is made available on the department website (Government Code § 7072).

(g) Establishing the procedure for a person to register a complaint or concern, or how that person may submit any questions about the use of a type of military equipment, and how the Department will respond in a timely manner.

709.4 MILITARY EQUIPMENT INVENTORY

The following constitutes a list and description of qualifying equipment for the Department:

(a) **40 MM Launchers and Rounds:** 40mm Launchers are utilized by department personnel as a less lethal tool to launch impact rounds.

(a) Description, quantity, capabilities, and purchase cost

i. PENN ARMS GL-140-C, 40MM SINGLE SHOT LAUNCHER, cost: $1,000, quantity: 3. The 40mm Single Launcher is a tactical single shot launcher that features a collapsible stock. It will fire standard 40mm less lethal ammunition, up to 6.0 inches in cartridge length. 40mm launchers are capable of firing a variety of munitions with a maximum effective range of one hundred twenty (120) feet.

ii. SAGE CONTROL ORDINANCES INC K041 STANDARD ENERGY IMPACT BATON PROJECTILE, cost: $21.00, quantity: 14. A less lethal 40mm impact baton projectile fired from a single 40mm grenade launcher with a rifled barrel at 51-72 MPS (meters per second). The projectile provides accurate and effective performance when fired from the recommended firing distances of not less than 10 feet and no greater than 75 feet.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(b) Purpose: To limit the escalation of conflict where employment of lethal force is prohibited or undesirable.

(c) Authorized Use: Subject to subsection (g) below, s Situations for use of the less lethal weapon systems may include, but are not limited to the following: however, other situations not listed here may also be deemed authorized use cases under applicable penal codes ad case law, and, in general shall reflect necessary, reasonable, and proportional use of less lethal weapon systems: :

i. The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.

ii. The suspect has made credible threats to harm him/herself or others.

iii. The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers.

iv. There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.

v. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of less lethal weapon system.

(d) – Training: All personnel who are authorized to carry a control device must be properly trained and certified to carry the specific control device and are retrained or re-certified as necessary. Proficiency training shall be monitored and documented by a certified, control-device weapons or tactics instructor.

(e) Lifespan:

i. Penn Arms GL-140-C- No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear

ii. K041 Standard Energy Impact Batons-5 years

(f) Fiscal Impact: Annual maintenance is approximately $100 for each launcher.

(g) Legal and Procedural Rules: Use of the 40mm launcher and 40mm baton rounds are subject to the requirements of Policy 300 (USE OF FORCE), 308 (CONTROL DEVICES AND TECHNIQUES), 308.9 (KINETIC ENERGY PROJECTILE GUIDELINES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize the 40mm only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(b) **Less Lethal Shotgun and Rounds**: Less Lethal Shotgun is used to deploy the less lethal 12-gauge Super-Sock Beanbag Round.

(a) Description, quantity, capabilities, and purchase cost

i. REMINGTON 870 LESS LETHAL SHOTGUN, cost: $950, quantity: 11. The Remington 870 Less Lethal Shotgun is used to deploy the less lethal 12-gauge Super-Sock Beanbag Round up to a distance of 75 feet. The range of the weapon system helps to maintain space between officers

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

and a suspect reducing the immediacy of the threat which is a principle of deescalation. The less lethal 12- gauge shotgun is distinguishable by an orange butt stock and fore grip.

ii. 12-GAUGE SUPER-SOCK BEANBAG ROUND 2581, cost: $6, quantity: 90. A less lethal 2.4-inch 12-gauge shotgun round firing a ballistic fiber bag filled with 40 grams of lead shot at a velocity of 270-290 feet per second (FPS). CTS (Combined Tactical Systems) Super-Sock rounds are discharged from a dedicated 12- gauge shotgun that is distinguishable by an orange butt stock and fore grip. This round provides accurate and effective performance when fired from the approved distance of not fewer than five (5) feet. The maximum effective range of this munition is up to 75 feet from the target. The Model 2581 Super-Sock is in its deployed state immediately upon exiting the barrel. It does not require a minimum range to "unfold" or "stabilize." The Super-Sock is an aerodynamic projectile. However, accuracy is relative to the shotgun, barrel length, environmental conditions, and the operator. The Super-Sock is very accurate. However, effectiveness depends on many variables, such as distance, clothing, stature, and the point where the projectile impacts.

(b) Purpose: To limit the escalation of conflict where employment of lethal force is prohibited or undesirable.

(c) Authorized Use - Subject to subsection (g) below, s Situations for use of the less lethal weapon systems may include, but are not limited to the following: :

i. The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.

ii. The suspect has made credible threats to harm him/herself or others.

iii. The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers.

iv. There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.

v. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of less lethal weapon system.

(d) Lifespan:

i. Remington 970 Less Lethal Shotgun-25 years

ii. Super Sock Round Model 2581: No listed expiration date

(e) Training: All personnel who are authorized to carry a control device must be properly trained and certified to carry the specific control device and are retrained or re-certified as necessary. Proficiency training shall be monitored and documented by a certified, control-device weapons or tactics instructor.

(f) Fiscal Impact: Annual maintenance is approximately $100 per shotgun.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(g) Legal and Procedural Rules: Use of the less lethal shotgun and Super Sock rounds are subject to the requirements of Policy 300 (USE OF FORCE), 308 (CONTROL DEVICES AND TECHNIQUES), 308.9 (KINETIC ENERGY PROJECTILE GUIDELINES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize the less lethal shotgun only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(c) **5.56mm Semi-Automatic Rifles and Ammunition:** The Colt AR-15/M4 5.56 mm/.223 semiautomatic rifles are used for both patrol and the SWAT Team.

(a) Description, quantity, capabilities, and purchase cost

i. COLT AR RIFLES ~~/M4 RIFLES~~, cost: $1200, quantity: 27. These rifles, equipped and locked in each patrol car or police motorcycle, offer a higher degree of accuracy at a longer distance. The ammunition used in rifles are also more effective at penetrating body armor (as some suspects have worn during high-profile shooting events in the country). They are normally kept secured in patrol cars or in the Police station and are only deployed on specific incidents where officers believe guns or weapons are involved.

ii. .223 CALIBER or 5.56MM RIFLE AMMUNITION, cost: $280 per case of 500 rounds, quantity: 10,800 rounds. This rifle ammunition used in conjunction with an AR-15 type rifle provides officers the ability to engage hostile suspects at distances generally greater than the effective distance of their handguns. Rifle ammunition fired from AR-15 rifles offer advantages over handguns, such as increased accuracy potential and the ability to defeat soft body armor but are not appropriate for every situation.

(b) Purpose: To be used as precision weapon to address a threat with more precision and/or greater distances than a handgun, if present and feasible.

(c) Authorized Use - Members may deploy the patrol rifle in any circumstance where the member can articulate a reasonable expectation that the rifle may be needed. Subject to subsection (g) below), s ~~S~~ituations for use of these ~~e less lethal~~ weapon systems may include, but are not limited to the following: ~~:~~

i. Situations where the member reasonably anticipates an armed encounter.

ii. When a member is faced with a situation that may require accurate and effective fire at long range.

iii. Situations where a member reasonably expects the need to meet or exceed a suspect's firepower.

iv. When a member reasonably believes that there may be a need to fire on a barricaded person or a person with a hostage.

v. When a member reasonably believes that a suspect may be wearing body armor.

vi. When authorized or requested by a supervisor.

vii. When needed to euthanize an animal.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

viii. When an officer is training at an approved range or other approved facility

ix. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of this weapon system.

(d) Lifespan:

i. Colt AR~~/M4~~ Rifles: Approximately 15-20 years

ii. 223 Caliber or 5.56mm rifle ammunition: No expiration

(e) Training: Officers must successfully complete a 24-hour patrol rifle course as well as regular Department firearms training and qualifications as required by law and policy. Firearm Instructors attend a 40-hour POST-approved rifle instructor class, and SWAT personnel must attend an 80-hour basic SWAT Team course.

(f) Fiscal Impact: Annual maintenance is approximately $100 per rifle.

(g) Legal and Procedural Rules: Use of the patrol rifles and ammunition are subject to the requirements of Policy 300 (USE OF FORCE), Policy 312.3.2 (PATROL RIFLES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize rifles only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(d) **.308 Caliber Remington 700 and Heckler & Koch HK-91 Sniper Rifles and Ammunition:** The sniper rifles are capable of firing a.308 caliber bullet. This rifle may only be used by a SWAT Officer trained and certified to be a sniper (LAPD currently has two such officers) and may be deployed to assist the SWAT Team in a critical incident or emergency.

(a) Description, quantity, capabilities, and purchase cost

i. .308 CALIBER REMINGTON 700 AND 700 LTR RIFLE, cost: $1,000, quantity: 2. Remington 700: No cost, surveyed, Remington 700LTR $1,000.

ii. .308 CALIBER HECKLER & KOCH HK-91 RIFLE, cost: No cost, surveyed, , quantity: 1.

iii. .308 AMMUNITION, cost: $1.50 per round, quantity: 3, ~~.~~040 rounds. These nickel-plated bonded soft-point 308/7.62 cartridges from Speer Gold-Dot are resistant to corrosion, capable of expansion from barrels as short as 10", and retain accuracy from a variety of barrels lengths.

(b) Purpose: This rifle may only be used by a SWAT Officer trained and certified to be a sniper and may be deployed to assist the SWAT Team in a critical incident or emergency. The main use of this weapon system is for observation of an incident and to be able to accurately and immediately be able to stop a threat to life.

(c) Authorized Use: Subject to subsection (g) below, e ~~E~~xamples of situations for deploying the sniper rifle may include, but are not limited to the following: ~~:~~

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

i. where the Officer reasonably anticipates an armed encounter;

ii. when the Officer is faced with a situation that may require accurate and effective fire at a long distance;

iii. where an Officer reasonably expects the need to meet or exceed the firearms and ammunition that a suspect is reported or believed to possess;

iv. when an Officer reasonably believes that there may be a need to fire on a barricaded person or a person with a hostage;

v. when an Officer reasonably believes that a suspect may be wearing body armor.

vi. When an officer is training at an approved range or other approved facility

vii. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of this weapon system.

(d) Lifespan:

i. .308 Caliber Remington 700/700LTR: Approximately 15 years

ii. .308 Caliber Heckler & Koch HK-91: Approximately 15 years

iii. .308 Ammunition: No expiration

(e) Training: In addition to patrol rifle and standard SWAT operator training, SWAT snipers must successfully complete a California POST-certified sniper course as well as regular SWAT sniper training and qualifications as required by law and policy.

(f) Fiscal Impact: Annual maintenance is approximately $100 per Remington rifle. The HK is not used.

(g) Legal and Procedural Rules: Use of the sniper rifles and ammunition are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos, Policy 300 (USE OF FORCE), Policy 312.3.2 (PATROL RIFLES), Policy 312 (FIREARMS), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the Los Altos Police Department to utilize rifles only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(e) **Benelli M3Super90 12 gauge shotgun and ammunition: This firearm is not currently used by the department and is stored in the armory.** The Benelli M3 is a dual-mode (hybrid pump-action and semi-automatic) shotgun The ammunition for the shotgun is 00 Buck and slug rounds.

(a) Description, quantity, capabilities, and purchase cost

i. BENELLI M3SUPER90 12 GAUGE SHOTGUN, cost $500, quantity: 1. The Benelli M3 is a combination Pump-Action and Semi-Automatic Shotgun. The shotgun can be chambered for 12 GA shells with a 20 inch barrel.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

ii. 00 BUCK AMMUNITION, cost: $1.80 per round, quantity: 600 rounds. A typical 12-gauge, 2 ¾-inch 00 Buckshot shell holds 8 pellets that are 0.33" in diameter. A 3-inch shell most often contains 12 of these same sized pellets.

iii. SLUG AMMUNITION, cost: $1.40 per round, quantity: 100. The Foster-type shotgun slug features exterior rifled grooves which contact the shotgun's bore to give it spin; and, the slug's hollow-point design initiates expansion to augment stopping power.

(b) Purpose: This shotgun is not currently utilized by the department. The only shotguns used by the Department are the less lethal shotguns. The ammunition is purchased solely for recruits in the police academy, where shotgun instruction occurs.

(c) Authorized Use: There is currently no authorized use for the shotgun in our policy.

(d) Lifespan:

i. Benelli M3Super90 12 gauge shotgun: Approximately 15 years

ii. OO Buck Ammunition: No expiration

iii. Slug ammunition: No expiration

(e) Training: Officers receive training in shotgun use in the police academy, and have to pass firearm qualifications. There is no further training with the Benelli shotgun or ammunition.

(f) Fiscal Impact: None, the weapon is not utilized.

(g) Legal and Procedural Rules: Use of all firearms fall under the following policies: Policy 300 (USE OF FORCE) and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize firearms only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(f) **Remington 870 MCS 12 Gauge Breaching shotgun and breaching rounds: This firearm/ammunition is not currently used by the department and is stored in the SWAT armory.**

(a) Description, quantity, capabilities, and purchase cost

i. REMINGTON 870 MCS 12 GAUGE BREACHING SHOTGUN, cost: $1,400, quantity: 1. Extremely compact breaching model 12 gauge with a ten inch cylinder bore breaching barrel with parkerized finish, a Knoxx recoil reducing breacher pistol grip stock, and synthetic modular fore-end.

ii. 12 GAUGE BREACHING ROUNDS, cost: $5.00 per round, quantity: 25 rounds. The 12-Gauge TKO Breaching Round is a 12-Gauge shell loaded with a compressed zinc slug, utilizing smokeless powder as a propellant. The is a widely used method to breach door locks or hinges for entry during tactical operations.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(b) Purpose: The breaching shotgun is used to safely gain entry into a structure. When properly deployed, the TKO breaching round is capable of defeating door lock mechanisms, door knobs, hinges, dead bolts, safety chains, and pad locks on both wooden or hollow core doors. Upon impact with the target, the zinc slug disintegrates in to a fine powder eliminating fragmentation. The Explosive Breaching Program, conducted in conjunction with the Mountain View Police Department, was established to provide the joint SWAT Team the ability to quickly create an opening in a wall or window to quickly enter a building for an emergency rescue of hostages. It is reserved for rescue operations only.

(c) Authorized Use: Subject to subsection (g) below, t ~~T~~his equipment would only be deployed during a SWAT incident, and its use would need specific authorization from the Incident Commander. The equipment may only be used by a "tactical breacher" on the SWAT team. We currently do not have any authorized users at the Department.

(d) Lifespan:

i. Remington 870 MCS 12 Gauge Breaching shotgun: Approximately 15 years

ii. 12-Gauge TKO Breaching Round: Approximately 5 years

(e) Training: The training consists of an 80-hour course for a member of the SWAT Team specifically designated as the "breacher." At the conclusion of the course, the breacher must pass a test proctored by CAL/OSHA. The OSHA certification is valid for 5 years. Before the expiration of the certification, the breacher must retake and pass the test.

(f) Fiscal Impact: None, the weapon is not utilized.

(g) Legal and Procedural Rules: Use of the breaching shotgun and ammunition are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

(g) **Kaiser Precision Vulcan II Munitions Pole: Telescoping tool utilized by SWAT personnel to safely deliver approved noise/diversionary devices.**

(a) Description, quantity, capabilities, and purchase cost

i. KAISER PRECISION VULCAN II MUNITIONS POLE, cost: $2,000, quantity: 1. The munitions pole is a multi-purpose breaching tool, constructed of lightweight aluminum square tubing used to deploy distraction devices and chemical munitions in order to gain entrance into a building, structure or even a vehicle.

(b) Purpose: The munitions pole is used to safely deploy diversionary devices, chemical munitions, or other objects (cell phones, cameras) during SWAT operations.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(c) Authorized Use: Subject to subsection (g) below, t ~~T~~his equipment would be deployed during primarily during a SWAT incident, but could be utilized to gain entry into a residence during other high- ~~-~~risk operations on patrol.

(d) Lifespan: Approximately 10 years

(e) Training: Kaiser Precision provided an instructional video for individual and team training.

(f) Fiscal Impact: None, does not require annual maintenance

(g) Legal and Procedural Rules: Use of the munitions pole are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 317 (HIGH RISK OPERATIONS PROTOCOL), Policy 322 (SEARCH AND SEIZURE), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

(h) **CTS Flash-bang Training Kit:** The training flash-bangs are built and weigh exactly the same as it's equivalent live Flash-Bang, but have no flash charge.

(a) Description, quantity, capabilities, and purchase cost

i. CTS FLASH-BANG TRAINING KIT, cost: $964, Quantity 1 kit (comes with 70 reload Training Fuzes, 1 body), current fuze inventory is 25. The training bodies are painted with a bright blue coating, and can be used an unlimited number of times. The M201FB fuze for this system has 10 times the output of a normal M201 fuze and it is threaded with a left hand thread so it can not be accidentally used in any other munitions. The training devices produce an output of about 120db.

(b) Purpose: Flash-bangs are used to distract and temporarily immobilize dangerous suspects by overwhelming their senses of vision and hearing. The distraction gives Officers time to seize a moment and create an opportunity to take control of high-risk or dangerous situations.

(c) Authorized Use: Subject to subsection (g) below, SWAT operators may utilize the training flash-bangs as a training tool to distract and temporarily immobilize dangerous suspects by overwhelming their senses of vision and hearing. Los Altos Police Department does not have any live flash-bangs in the inventory. Our operators use live flash-bangs while on SWAT events or at training with Mountain View Police Department.

(d) Lifespan: 5 years

(e) Training: These are a training tool. SWAT operators must attend and pass an 80-hour SWAT training class. Flash-bang training is provided by an instructor who has completed an 8-hour noise flash diversionary device course.

(f) Legal and Procedural Rules: Use of the **live** flash-bangs are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 317 (HIGH RISK OPERATIONS

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

PROTOCOL), Policy 322 (SEARCH AND SEIZURE), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

(i) **Specialty Impact Munition (SIM) weapons and ammunition:** Simunition® is the pioneer and world leader in providing military, law enforcement and approved range members with the most realistic and non-lethal force-on-force, short range, simulation training system.

(a) Description, quantity, capabilities, and purchase cost

i. SIMUNITION GLOCK 17T, cost: $500 each, quantity: 8. The GLOCK Training Pistols were developed with the purpose of enabling reality-based tactical operations training using color marking or plastic projectile ammunition. When utilized in a pistol caliber barrel training platform (9mm), SIMs have an effective range of 25 feet.

ii. SIM CONVERTED BERETTA 92, cost: $500 each, quantity: 4. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized in a pistol caliber barrel training platform (9mm), SIMs have an effective range of 25 feet.

iii. HK MP5 CONVERSION KITS, cost: $500 each, quantity 2. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized with a training munition bolt carrier group in a 5.56mm rifle platform, SIMs have an effective range of approximately 27 yards.

iv. SIMUNITION COLT AR-15 CARBINE RIFLE UPPERS, cost: $1,000 each, quantity: 3. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized with a training munition bolt carrier group in a 5.56mm rifle platform, SIMs have an effective range of approximately 27 yards.

v. FX MARKING CARTRIDGES, cost: $350 for 500 rounds, quantity: 3,500 rounds. The reduced-energy, non-lethal cartridges leave a detergent-based, water-soluble color-marking compound. The visible impacts allow accurate assessment of simulated lethality. They feature tactical accuracy up to 25 feet (7.6 meters).

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(b) Purpose: Enabling reality-based, force-on-force tactical operations training using color marking or plastic projectile ammunition.

(c) Authorized Use: Subject to subsection (g) below, s Simunition weapons and marking rounds are non-operational rounds and non-operational weapons systems. These munitions provide for realistic close quarters firearms training while allowing the shooter to visually assess shot placement and accuracy in force on force training scenarios. These items are used for training purposes for all sworn staff members.

(d) Lifespan:

i. Simunition Glock 17T: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

ii. Sim Converted Beretta: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

iii. HK MP5 Conversion Kits: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

iv. Simunition Colt AR-15 Rifle Uppers: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

v. FX Marking Cartridges: Shelf life five (5) years.

(e) Training: These are a training tool. Simunition Instructors attend an informative, three-day (24-hour) course designed to provide students with substantial hands-on experience with Simunition® FX® training ammunition technology, weapons conversion kits, and the Simunition® line of protective equipment. The course provides in-depth, hands-on instruction in scenario-based training program development and training methodology, and gives critical practical experience to students on the best use of Simunition® training products in a highly effective, realistic, extremely safe training program. Sworn staff members are given extensive firearms handling courses and weapons safety instruction to include the use of SIMs for training purposes.

(f) Legal and Procedural Rules: Use of the Simunition firearms and marking rounds are subject to the requirements of Policy 300 (USE OF FORCE) and Policy 312 (FIREARMS) while training. It is the policy of the Los Altos Police Department to utilize Simunition equipment only for official law enforcement training purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

709.5 APPROVAL

The Chief of Police or the authorized designee shall obtain approval from the governing body by way of an ordinance adopting the military equipment policy. As part of the approval process, the Chief of Police or the authorized designee shall ensure the proposed military equipment policy is submitted to the governing body and is available on the department website at least 30 days

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

prior to any public hearing concerning the military equipment at issue (Government Code § 7071). The military equipment policy must be approved by the governing body before the Department engages in any of the following ~~prior to engaging in any of the following~~ (Government Code § 7071):

(a) Requests ~~ing~~ military equipment made available pursuant to 10 USC § 2576a.

(b) Seeki~~s~~ ~~ng~~ funds for military equipment, including but not limited to applying for a grant, soliciting or accepting private, local, state, or federal funds, in-kind donations, or other donations or transfers.

(c) Acquir~~es~~ ~~ing~~ military equipment either permanently or temporarily, including by borrowing or leasing.

(d) Collaborat~~es~~ ~~ing~~ with another law enforcement agency in the deployment or other use of military equipment within the jurisdiction of this department.

(e) Usi~~es~~ ~~ng~~ any new or existing military equipment for a purpose, in a manner, or by a person not previously approved by the governing body.

(f) Solicit~~s~~ ~~ing~~ or respond~~s~~ ~~ing~~ to a proposal for, or enter~~s~~ ~~ing~~ into an agreement with, any other person or entity to seek funds for, apply to receive, acquire, use, or collaborate in the use of military equipment.

(g) Acquiri~~es~~ ~~ng~~ military equipment through any means not provided above.

709.6 COORDINATION WITH OTHER JURISDICTIONS

Military equipment used by other law enforcement agencies that are providing mutual aid to this jurisdiction or otherwise engaged in law enforcement operations within this jurisdiction shall comply with their respective military equipment policies in rendering mutual aid.

709.7 ANNUAL REPORT

Upon approval of a military equipment policy, the Chief of Police or the authorized designee should submit a military equipment report to the governing body for each type of military equipment approved within one year of approval, and annually thereafter for as long as the military equipment is available for use (Government Code § 7072).

The Chief of Police or the authorized designee should also make each annual military equipment report publicly available on the department website for as long as the military equipment is available for use. The report shall include all information required by Government Code § 7072 for the preceding calendar year for each type of military equipment in department inventory.

709.8 POLICY COMPLIANCE AND SUBMITTING COMPLAINTS

The Chief of Police or the authorized designee will ensure that all Los Altos Police Department employees comply with this policy. Suspected violations of the provisions set forth in this policy, or in other laws or policies governing the use of "military equipment", shall be handled in accordance with Los Altos Police Department Policy 340 (Standards of Conduct). Additionally, violations of the provisions set forth in this policy, or in other laws or policies governing the use of "military equipment", will be reported to the governing body via the annual Military Equipment Report.

Any member of the community can submit a complaint regarding the use of "military equipment" to any Los Altos Police Department employee or the Independent Intake Official. Complaints can be submitted in any form (e.g., in person, online, telephone, email, etc.). Once a complaint is received, it will be handled in accordance with Los Altos Police Department Policy 340 (Standards of Conduct) and LAPD Policy 1020 (Personnel Complaints). Formal complaints regarding alleged violations of this policy will be handled by an independent investigator.

Complaints may be made directly to the Los Altos Police Department in one of the following ways (for online options, please visit https://www.losaltosca.gov/police/page/how-are-we-doing-0):

In Person:

Los Altos Police Department

STATE OF CALIFORNIA
AUTHENTICATED
ELECTRONIC LEGAL MATERIAL

Assembly Bill No. 481

CHAPTER 406

An act to add Chapter 12.8 (commencing with Section 7070) to Division 7 of Title 1 of the Government Code, relating to military equipment.

[Approved by Governor September 30, 2021. Filed with Secretary of State September 30, 2021.]

LEGISLATIVE COUNSEL'S DIGEST

AB 481, Chiu. Law enforcement and state agencies: military equipment: funding, acquisition, and use.

Existing law designates the Department of General Services as the agency for the State of California responsible for distribution of federal surplus personal property, excepting food commodities, and requires the department to, among other things, do all things necessary to the execution of its powers and duties as the state agency for the distribution of federal personal surplus property, excepting food commodities, in accordance with specified federal law. Existing law, the Federal Surplus Property Acquisition Law of 1945, authorizes a local agency, as defined, to acquire surplus federal property without regard to any law which requires posting of notices or advertising for bids, inviting or receiving bids, or delivery of purchases before payment, or which prevents the local agency from bidding on federal surplus property. Existing federal law authorizes the Department of Defense to transfer surplus personal property, including arms and ammunition, to federal or state agencies for use in law enforcement activities, subject to specified conditions, at no cost to the acquiring agency.

This bill would require a law enforcement agency, defined to include specified entities, to obtain approval of the applicable governing body, by adoption of a military equipment use policy, as specified, by ordinance at a regular meeting held pursuant to specified open meeting laws, prior to taking certain actions relating to the funding, acquisition, or use of military equipment, as defined. The bill would also require similar approval for the continued use of military equipment acquired prior to January 1, 2022. The bill would allow the governing body to approve the funding, acquisition, or use of military equipment within its jurisdiction only if it determines that the military equipment meets specified standards. The bill would require the governing body to annually review the ordinance and to either disapprove a renewal of the authorization for a type, as defined, of military equipment or amend the military equipment use policy if it determines, based on an annual military equipment report prepared by the law enforcement agency, as provided, that the military equipment does not comply with the above-described standards for approval. The bill would specify these provisions do not preclude a county or local municipality from implementing

additional requirements and standards related to the purchase, use, and reporting of military equipment by local law enforcement agencies.

This bill would also require a state agency, as defined, to create a military equipment use policy before engaging in certain activities, publish the policy on the agency's internet website, and provide a copy of the policy to the Governor or the Governor's designee, as specified. The bill would also require a state agency that seeks to continue use of military equipment acquired prior to January 1, 2022, to create a military equipment use policy.

This bill would also include findings that the changes proposed by this bill address a matter of statewide concern rather than a municipal affair and, therefore, apply to all cities, including charter cities.

By adding to the duties of local officials with respect to the funding, acquisition, and use of military equipment, this bill would impose a state-mandated local program.

The California Constitution requires local agencies, for the purpose of ensuring public access to the meetings of public bodies and the writings of public officials and agencies, to comply with a statutory enactment that amends or enacts laws relating to public records or open meetings and contains findings demonstrating that the enactment furthers the constitutional requirements relating to this purpose.

This bill would make legislative findings to that effect.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The people of the State of California do enact as follows:

SECTION 1. The Legislature finds and declares all of the following:

(a) The acquisition of military equipment and its deployment in our communities adversely impacts the public's safety and welfare, including increased risk of civilian deaths, significant risks to civil rights, civil liberties, and physical and psychological well-being, and incurment of significant financial costs. Military equipment is more frequently deployed in low-income Black and Brown communities, meaning the risks and impacts of police militarization are experienced most acutely in marginalized communities.

(b) The public has a right to know about any funding, acquisition, or use of military equipment by state or local government officials, as well as a right to participate in any government agency's decision to fund, acquire, or use such equipment.

(c) Decisions regarding whether and how military equipment is funded, acquired, or used should give strong consideration to the public's welfare, safety, civil rights, and civil liberties, and should be based on meaningful public input.

(d) Legally enforceable safeguards, including transparency, oversight, and accountability measures, must be in place to protect the public's welfare, safety, civil rights, and civil liberties before military equipment is funded, acquired, or used.

(e) The lack of a public forum to discuss the acquisition of military equipment jeopardizes the relationship police have with the community, which can be undermined when law enforcement is seen as an occupying force rather than a public safety service.

SEC. 2. Chapter 12.8 (commencing with Section 7070) is added to Division 7 of Title 1 of the Government Code, to read:

Chapter 12.8. Funding, Acquisition, and Use of Military Equipment

7070. For purposes of this chapter, the following definitions shall apply:

(a) "Governing body" means the elected body that oversees a law enforcement agency or, if there is no elected body that directly oversees the law enforcement agency, the appointed body that oversees a law enforcement agency. In the case of a law enforcement agency of a county, including a sheriff's department or a district attorney's office, "governing body" means the board of supervisors of the county.

(b) "Law enforcement agency" means any of the following:

(1) A police department, including the police department of a transit agency, school district, or any campus of the University of California, the California State University, or California Community Colleges.

(2) A sheriff's department.

(3) A district attorney's office.

(4) A county probation department.

(c) "Military equipment" means the following:

(1) Unmanned, remotely piloted, powered aerial or ground vehicles.

(2) Mine-resistant ambush-protected (MRAP) vehicles or armored personnel carriers. However, police versions of standard consumer vehicles are specifically excluded from this subdivision.

(3) High mobility multipurpose wheeled vehicles (HMMWV), commonly referred to as Humvees, two and one-half-ton trucks, five-ton trucks, or wheeled vehicles that have a breaching or entry apparatus attached. However, unarmored all-terrain vehicles (ATVs) and motorized dirt bikes are specifically excluded from this subdivision.

(4) Tracked armored vehicles that provide ballistic protection to their occupants and utilize a tracked system instead of wheels for forward motion.

(5) Command and control vehicles that are either built or modified to facilitate the operational control and direction of public safety units.

(6) Weaponized aircraft, vessels, or vehicles of any kind.

(7) Battering rams, slugs, and breaching apparatuses that are explosive in nature. However, items designed to remove a lock, such as bolt cutters,

or a handheld ram designed to be operated by one person, are specifically excluded from this subdivision.

(8) Firearms of .50 caliber or greater. However, standard issue shotguns are specifically excluded from this subdivision.

(9) Ammunition of .50 caliber or greater. However, standard issue shotgun ammunition is specifically excluded from this subdivision.

(10) Specialized firearms and ammunition of less than .50 caliber, including assault weapons as defined in Sections 30510 and 30515 of the Penal Code, with the exception of standard issue service weapons and ammunition of less than .50 caliber that are issued to officers, agents, or employees of a law enforcement agency or a state agency.

(11) Any firearm or firearm accessory that is designed to launch explosive projectiles.

(12) "Flashbang" grenades and explosive breaching tools, "tear gas," and "pepper balls," excluding standard, service-issued handheld pepper spray.

(13) Taser Shockwave, microwave weapons, water cannons, and the Long Range Acoustic Device (LRAD).

(14) The following projectile launch platforms and their associated munitions: 40mm projectile launchers, "bean bag," rubber bullet, and specialty impact munition (SIM) weapons.

(15) Any other equipment as determined by a governing body or a state agency to require additional oversight.

(16) Notwithstanding paragraphs (1) through (15), "military equipment" does not include general equipment not designated as prohibited or controlled by the federal Defense Logistics Agency.

(d) "Military equipment use policy" means a publicly released, written document governing the use of military equipment by a law enforcement agency or a state agency that addresses, at a minimum, all of the following:

(1) A description of each type of military equipment, the quantity sought, its capabilities, expected lifespan, and product descriptions from the manufacturer of the military equipment.

(2) The purposes and authorized uses for which the law enforcement agency or the state agency proposes to use each type of military equipment.

(3) The fiscal impact of each type of military equipment, including the initial costs of obtaining the equipment and estimated annual costs of maintaining the equipment.

(4) The legal and procedural rules that govern each authorized use.

(5) The training, including any course required by the Commission on Peace Officer Standards and Training, that must be completed before any officer, agent, or employee of the law enforcement agency or the state agency is allowed to use each specific type of military equipment to ensure the full protection of the public's welfare, safety, civil rights, and civil liberties and full adherence to the military equipment use policy.

(6) The mechanisms to ensure compliance with the military equipment use policy, including which independent persons or entities have oversight

authority, and, if applicable, what legally enforceable sanctions are put in place for violations of the policy.

(7) For a law enforcement agency, the procedures by which members of the public may register complaints or concerns or submit questions about the use of each specific type of military equipment, and how the law enforcement agency will ensure that each complaint, concern, or question receives a response in a timely manner.

(e) "State agency" means the law enforcement division of every state office, officer, department, division, bureau, board, and commission or other state body or agency, except those agencies provided for in Article IV (except Section 20 thereof) or Article VI of the California Constitution.

(f) "Type" means each item that shares the same manufacturer model number.

7071. (a) (1) A law enforcement agency shall obtain approval of the governing body, by an ordinance adopting a military equipment use policy at a regular meeting of the governing body held pursuant to the Bagley-Keene Open Meeting Act (Article 9 (commencing with Section 11120) of Chapter 1 of Part 1 of Division 3 of Title 2) or the Ralph M. Brown Act (Chapter 9 (commencing with Section 54950) of Part 1 of Division 2 of Title 5), as applicable, prior to engaging in any of the following:

(A) Requesting military equipment made available pursuant to Section 2576a of Title 10 of the United States Code.

(B) Seeking funds for military equipment, including, but not limited to, applying for a grant, soliciting or accepting private, local, state, or federal funds, in-kind donations, or other donations or transfers.

(C) Acquiring military equipment either permanently or temporarily, including by borrowing or leasing.

(D) Collaborating with another law enforcement agency in the deployment or other use of military equipment within the territorial jurisdiction of the governing body.

(E) Using any new or existing military equipment for a purpose, in a manner, or by a person not previously approved by the governing body pursuant to this chapter.

(F) Soliciting or responding to a proposal for, or entering into an agreement with, any other person or entity to seek funds for, apply to receive, acquire, use, or collaborate in the use of, military equipment.

(G) Acquiring military equipment through any means not provided by this paragraph.

(2) No later than May 1, 2022, a law enforcement agency seeking to continue the use of any military equipment that was acquired prior to January 1, 2022, shall commence a governing body approval process in accordance with this section. If the governing body does not approve the continuing use of military equipment, including by adoption pursuant to this subdivision of a military equipment use policy submitted pursuant to subdivision (b), within 180 days of submission of the proposed military equipment use policy to the governing body, the law enforcement agency shall cease its use of

the military equipment until it receives the approval of the governing body in accordance with this section.

(b) In seeking the approval of the governing body pursuant to subdivision (a), a law enforcement agency shall submit a proposed military equipment use policy to the governing body and make those documents available on the law enforcement agency's internet website at least 30 days prior to any public hearing concerning the military equipment at issue.

(c) The governing body shall consider a proposed military equipment use policy as an agenda item for an open session of a regular meeting and provide for public comment in accordance with the Bagley-Keene Open Meeting Act (Article 9 (commencing with Section 11120) of Chapter 1 of Part 1 of Division 3 of Title 2) or the Ralph M. Brown Act (Chapter 9 (commencing with Section 54950) of Part 1 of Division 2 of Title 5), as applicable.

(d) (1) The governing body shall only approve a military equipment use policy pursuant to this chapter if it determines all of the following:

(A) The military equipment is necessary because there is no reasonable alternative that can achieve the same objective of officer and civilian safety.

(B) The proposed military equipment use policy will safeguard the public's welfare, safety, civil rights, and civil liberties.

(C) If purchasing the equipment, the equipment is reasonably cost effective compared to available alternatives that can achieve the same objective of officer and civilian safety.

(D) Prior military equipment use complied with the military equipment use policy that was in effect at the time, or if prior uses did not comply with the accompanying military equipment use policy, corrective action has been taken to remedy nonconforming uses and ensure future compliance.

(2) In order to facilitate public participation, any proposed or final military equipment use policy shall be made publicly available on the internet website of the relevant law enforcement agency for as long as the military equipment is available for use.

(e) (1) The governing body shall review any ordinance that it has adopted pursuant to this section approving the funding, acquisition, or use of military equipment at least annually and, subject to paragraph (2), vote on whether to renew the ordinance at a regular meeting held pursuant to the Bagley-Keene Open Meeting Act (Article 9 (commencing with Section 11120) of Chapter 1 of Part 1 of Division 3 of Title 2) or the Ralph M. Brown Act (Chapter 9 (commencing with Section 54950) of Part 1 of Division 2 of Title 5), as applicable.

(2) The governing body shall determine, based on the annual military equipment report submitted pursuant to Section 7072, whether each type of military equipment identified in that report has complied with the standards for approval set forth in subdivision (d). If the governing body determines that a type of military equipment identified in that annual military equipment report has not complied with the standards for approval set forth in subdivision (d), the governing body shall either disapprove a renewal of the authorization for that type of military equipment or require modifications

to the military equipment use policy in a manner that will resolve the lack of compliance.

(f) Notwithstanding subdivisions (a) to (e), inclusive, if a city contracts with another entity for law enforcement services, the city shall have the authority to adopt a military equipment use policy based on local community needs.

7072. (a) A law enforcement agency that receives approval for a military equipment use policy pursuant to Section 7071 shall submit to the governing body an annual military equipment report for each type of military equipment approved by the governing body within one year of approval, and annually thereafter for as long as the military equipment is available for use. The law enforcement agency shall also make each annual military equipment report required by this section publicly available on its internet website for as long as the military equipment is available for use. The annual military equipment report shall, at a minimum, include the following information for the immediately preceding calendar year for each type of military equipment:

(1) A summary of how the military equipment was used and the purpose of its use.

(2) A summary of any complaints or concerns received concerning the military equipment.

(3) The results of any internal audits, any information about violations of the military equipment use policy, and any actions taken in response.

(4) The total annual cost for each type of military equipment, including acquisition, personnel, training, transportation, maintenance, storage, upgrade, and other ongoing costs, and from what source funds will be provided for the military equipment in the calendar year following submission of the annual military equipment report.

(5) The quantity possessed for each type of military equipment.

(6) If the law enforcement agency intends to acquire additional military equipment in the next year, the quantity sought for each type of military equipment.

(b) Within 30 days of submitting and publicly releasing an annual military equipment report pursuant to this section, the law enforcement agency shall hold at least one well-publicized and conveniently located community engagement meeting, at which the general public may discuss and ask questions regarding the annual military equipment report and the law enforcement agency's funding, acquisition, or use of military equipment.

7073. (a) A state agency shall create a military equipment use policy prior to engaging in any of the following:

(1) Requesting military equipment made available pursuant to Section 2576a of Title 10 of the United States Code.

(2) Seeking funds for military equipment, including, but not limited to, applying for a grant, soliciting or accepting private, local, state, or federal funds, in-kind donations, or other donations or transfers.

(3) Acquiring military equipment either permanently or temporarily, including by borrowing or leasing.

(4) Collaborating with a law enforcement agency or another state agency in the deployment or other use of military equipment within the territorial jurisdiction of the governing body.

(5) Using any new or existing military equipment for a purpose, in a manner, or by a person not previously approved by the governing body pursuant to this chapter.

(6) Soliciting or responding to a proposal for, or entering into an agreement with, any other person or entity to seek funds for, or to apply to receive, acquire, use, or collaborate in the use of, military equipment.

(7) Acquiring military equipment through any means not provided by this subdivision.

(b) No later than May 1, 2022, a state agency seeking to continue the use of any military equipment that was acquired prior to January 1, 2022, shall create a military equipment use policy.

(c) A state agency that is required to create a military equipment use policy pursuant to this section shall do both of the following within 180 days of completing the policy:

(1) Publish the military equipment use policy on the agency's internet website.

(2) Provide a copy of the military equipment use policy to the Governor or the Governor's designee.

7074. The Legislature finds and declares that ensuring adequate oversight of the acquisition and use of military equipment is a matter of statewide concern rather than a municipal affair as that term is used in Section 5 of Article XI of the California Constitution. Therefore, this chapter applies to all cities, including charter cities and shall supersede any inconsistent provisions in the charter of any city, county, or city and county.

7075. Nothing in this chapter shall preclude a county or local municipality from implementing additional requirements and standards related to the purchase, use, and reporting of military equipment by local law enforcement agencies.

SEC. 3. The Legislature finds and declares that Section 1 of this act, which adds Chapter 12.8 (commencing with Section 7070) to Division 7 of Title 1 of the Government Code, furthers, within the meaning of paragraph (7) of subdivision (b) of Section 3 of Article I of the California Constitution, the purposes of that constitutional section as it relates to the right of public access to the meetings of local public bodies or the writings of local public officials and local agencies. Pursuant to paragraph (7) of subdivision (b) of Section 3 of Article I of the California Constitution, the Legislature makes the following findings:

Requiring local agencies to hold public meetings prior to the acquisition of military equipment further exposes that activity to public scrutiny and enhances public access to information concerning the conduct of the people's business.

SEC. 4. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because the only costs that may be incurred by a local agency or school district under this act would

result from a legislative mandate that is within the scope of paragraph (7) of subdivision (b) of Section 3 of Article I of the California Constitution.

O

ORDINANCE NO.

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF LOS ALTOS ADDING A NEW CHAPTER 7.30, ENTITLED "MILITARY EQUIPMENT POLICY," TO THE LOS ALTOS CITY CODE IN COMPLIANCE WITH ASSEMBLY BILL 481

WHEREAS, on September 30, 2021, Governor Gavin Newsom signed into law Assembly Bill 481 ("AB 481") (creating Government Code, Section 7070, et seq.), relating to the use of military equipment by California law enforcement agencies; and

WHEREAS, AB 481 seeks to provide transparency, oversight, and an opportunity for meaningful public input on decisions regarding whether and how military equipment is funded, acquired, or used; and

WHEREAS, the Los Altos Police Department is in possession of certain items of equipment that qualify as "military equipment" under AB 481; and

WHEREAS, AB 481 requires that a law enforcement agency possessing and using such qualifying equipment prepare a publicly released, written military equipment use policy document covering the inventory, description, purpose, use, acquisition, maintenance, fiscal impacts, procedures, training, oversight, and complaint process applicable to the Los Altos Police Department's use of such equipment; and

WHEREAS, the Policy and supporting information must be approved by the governing body by ordinance and reviewed annually; and

WHEREAS, the City Council of the City of Los Altos, having received the information required under AB 481 regarding the Los Altos Police Department's use of military equipment as defined in said law, deems it to be in the best interest of the City to approve the Military Equipment Policy as set forth herein.

NOW THEREFORE, the City Council of the City of Los Altos does hereby ordain as follows:

SECTION 1. AMENDMENT TO CHAPTER 7 OF THE MUNICIPAL CODE. Section 7.30.010 is hereby added to the Los Altos Municipal Code to read as follows:

"7.30.010. Military equipment policy.

A. The City Council has made the following determinations:

1. The military equipment inventoried and presented to the City Council is necessary because there is no reasonable alternative that can achieve the same objective of officer and civilian safety.

2. The proposed military equipment use policy ("Policy") will safeguard the public's welfare, safety, civil rights and civil liberties (said Policy is attached hereto as Exhibit "A" and incorporated by this reference).

3. The equipment is reasonably cost-effective compared to available alternatives that can achieve the same objective of officer and civilian safety (if any).

4. Prior military equipment use complied with the applicable equipment use policy (which included equipment now defined as military equipment) that was in effect at the time, or if prior uses did not comply with the accompanying military equipment use policy, corrective action has been taken to remedy nonconforming uses and ensure future compliance.

B. The Policy was considered by the City Council as an agenda item in an open session of regular meeting and noticed in accordance with the Ralph M. Brown Act, at which public comment was permitted.

C. The Policy shall be made publicly available on the Los Altos police department's website for as long as the military equipment is available for use.

D. The Los Altos police department shall submit an annual military equipment report to the city council containing the information required in California Government Code, Section 7072, and the city council shall determine whether each type of military equipment identified in that report has complied with the standards for approval set forth in Paragraphs (a)(1)-(4) above.

E. The City Council shall review this ordinance and vote on whether renew it, on an annual basis at a regular meeting, in accordance with California Government Code Section 7071(e)(2).

F. The City Council approves the use of the Policy and finds that it satisfies the requirements of California Government Code Section 7070(d)."

SECTION 2. This Ordinance is not subject to the California Environmental Quality Act ("CEQA") pursuant to Sections 15060(c)(2) of the CEQA Guidelines (Title 14, Chapter 3 of the California Code of Regulations) (the activity will not result in a direct or reasonable foreseeable indirect physical change in the environment) and 15060(c)(3) (the activity is not a project as defined in Section 15378 of the CEQA Guidelines because it has no potential for resulting in physical change to environment, directly or indirectly).

SECTION 3. CONSTITUTIONALITY. If any section, subsection, sentence, clause or phrase of this code is for any reason held to be invalid or unconstitutional, such decision shall not affect the validity of the remaining portions of this code.

SECTION 4. PUBLICATION. This Ordinance shall be published as provided in Government Code section 36933.

SECTION 5. EFFECTIVE DATE. This Ordinance shall be effective upon the commencement of the thirty-first day following the adoption date.

The foregoing Ordinance was duly and properly introduced at a regular meeting of the City Council of the City of Los Altos held on _____, 2022 and was thereafter, at a regular meeting held on _____, 2022 passed and adopted by the following vote:

AYES:
NOES:

Angel Rodriguez, INTERIM CITY CLERK

Military Equipment

709.1 PURPOSE AND SCOPE

The purpose of this policy is to provide guidelines for the approval, acquisition, and reporting requirements of military equipment (Government Code § 7070; Government Code § 7071; Government Code § 7072).

709.1.1 DEFINITIONS

Definitions related to this policy include (Government Code § 7070):

Governing body – The elected or appointed body that oversees the Department.

Military equipment – Includes but is not limited to the following:

- Unmanned, remotely piloted, powered aerial or ground vehicles.
- Mine-resistant ambush-protected (MRAP) vehicles or armored personnel carriers.
- High mobility multipurpose wheeled vehicles (HMMWV), two-and-one-half-ton trucks, five-ton trucks, or wheeled vehicles that have a breaching or entry apparatus attached.
- Tracked armored vehicles that provide ballistic protection to their occupants.
- Command and control vehicles that are either built or modified to facilitate the operational control and direction of public safety units.
- Weaponized aircraft, vessels, or vehicles of any kind.
- Battering rams, slugs, and breaching apparatuses that are explosive in nature. This does not include a handheld, one-person ram.
- Firearms and ammunition of .50 caliber or greater, excluding standard-issue shotguns and standard-issue shotgun ammunition.
- Specialized firearms and ammunition of less than .50 caliber, including firearms and accessories identified as assault weapons in Penal Code § 30510 and Penal Code § 30515, with the exception of standard-issue firearms.
- Any firearm or firearm accessory that is designed to launch explosive projectiles.
- Noise-flash diversionary devices and explosive breaching tools.
- Munitions containing tear gas or OC, excluding standard, service-issued handheld pepper spray.
- TASER® Shockwave, microwave weapons, water cannons, and long-range acoustic devices (LRADs).
- Kinetic energy weapons and munitions.
- Any other equipment as determined by a governing body or a state agency to require additional oversight.

709.2 POLICY

It is the policy of the Los Altos Police Department that members of this department comply with the provisions of Government Code § 7071 with respect to military equipment.

709.3 MILITARY EQUIPMENT COORDINATOR

The Chief of Police should designate a member of this department to act as the military equipment coordinator. The responsibilities of the military equipment coordinator include but are not limited to:

(a) Acting as liaison to the governing body for matters related to the requirements of this policy.

(b) Identifying department equipment that qualifies as military equipment in the current possession of the Department, or the equipment the Department intends to acquire that requires approval by the governing body.

(c) Conducting an inventory of all military equipment at least annually.

(d) Collaborating with any allied agency that may use military equipment within the jurisdiction of Los Altos Police Department (Government Code § 7071).

(e) Preparing for, scheduling, and coordinating the annual community engagement meeting to include:

1. Publicizing the details of the meeting.
2. Preparing for public questions regarding the department's funding, acquisition, and use of equipment.

(f) Preparing the annual military equipment report for submission to the Chief of Police and ensuring that the report is made available on the department website (Government Code § 7072).

(g) Establishing the procedure for a person to register a complaint or concern, or how that person may submit a question about the use of a type of military equipment, and how the Department will respond in a timely manner.

709.4 MILITARY EQUIPMENT INVENTORY

The following constitutes a list and description of qualifying equipment for the Department:

1. **40 MM Launchers and Rounds:** 40mm Launchers are utilized by department personnel as a less lethal tool to launch impact rounds.

   (a) Description, quantity, capabilities, and purchase cost

      i. PENN ARMS GL-140-C, 40MM SINGLE SHOT LAUNCHER, cost: $1,000, quantity: 3. The 40mm Single Launcher is a tactical single shot launcher that features a collapsible stock. It will fire standard 40mm less lethal ammunition, up to 6.0 inches in cartridge length. 40mm launchers are capable of firing a variety of munitions with a maximum effective range of one hundred twenty (120) feet.

      ii. SAGE CONTROL ORDINANCES INC K041 STANDARD ENERGY IMPACT BATON PROJECTILE, cost: $21.00, quantity: 14. A less

lethal 40mm impact baton projectile fired from a single 40mm grenade launcher with a rifled barrel at 51-72 MPS (meters per second). The projectile provides accurate and effective performance when fired from the recommended firing distances of not less than 10 feet and no greater than 75 feet.

(b) Purpose: To limit the escalation of conflict where employment of lethal force is prohibited or undesirable.

(c) Authorized Use: Situations for use of the less lethal weapon systems may include, but are not limited to:

i. The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.

ii. The suspect has made credible threats to harm him/herself or others.

iii. The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers.

iv. There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.

(d) Training: All personnel who are authorized to carry a control device must be properly trained and certified to carry the specific control device and are retrained or re-certified as necessary. Proficiency training shall be monitored and documented by a certified, control-device weapons or tactics instructor.

(e) Lifespan:

i. Penn Arms GL-140-C- No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear

ii. K041 Standard Energy Impact Batons-5 years

(f) Fiscal Impact: Annual maintenance is approximately $100 for each launcher.

(g) Legal and Procedural Rules: Use of the 40mm launcher and 40mm baton rounds are subject to the requirements of Policy 300 (USE OF FORCE), 308 (CONTROL DEVICES AND TECHNIQUES), 308.9 (KINETIC ENERGY PROJECTILE GUIDELINES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize the 40mm only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

2. **Less Lethal Shotgun and Rounds**: Less Lethal Shotgun is used to deploy the less lethal 12-gauge Super-Sock Beanbag Round.

(a) Description, quantity, capabilities, and purchase cost

i. REMINGTON 870 LESS LETHAL SHOTGUN, cost: $950, quantity: 11. The Remington 870 Less Lethal Shotgun is used to deploy the less lethal 12-gauge Super-Sock Beanbag Round up to a distance of 75 feet. The range of the weapon system helps to maintain space between officers and a suspect reducing the immediacy of the threat which is a principle of

DRAFT

Published with permission by Los Altos Police Department

deescalation. The less lethal 12- gauge shotgun is distinguishable by an orange butt stock and fore grip.

ii. 12-GAUGE SUPER-SOCK BEANBAG ROUND 2581, cost: $6, quantity: 90. A less lethal 2.4-inch 12-gauge shotgun round firing a ballistic fiber bag filled with 40 grams of lead shot at a velocity of 270-290 feet per second (FPS). CTS Super-Sock rounds are discharged from a dedicated 12- gauge shotgun that is distinguishable by an orange butt stock and fore grip. This round provides accurate and effective performance when fired from the approved distance of not fewer than five (5) feet. The maximum effective range of this munition is up to 75 feet from the target. The Model 2581 Super-Sock is in its deployed state immediately upon exiting the barrel. It does not require a minimum range to "unfold" or "stabilize." The Super-Sock is an aerodynamic projectile. However, accuracy is relative to the shotgun, barrel length, environmental conditions, and the operator. The Super-Sock is very accurate. However, effectiveness depends on many variables, such as distance, clothing, stature, and the point where the projectile impacts.

(b) Purpose: To limit the escalation of conflict where employment of lethal force is prohibited or undesirable.

(c) Authorized Use - Situations for use of the less lethal weapon systems may include, but are not limited to:

i. The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.

ii. The suspect has made credible threats to harm him/herself or others.

iii. The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers.

iv. There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.

(d) Lifespan:

i. Remington 970 Less Lethal Shotgun-25 years

ii. Super Sock Round Model 2581: No listed expiration date

(e) Training: All personnel who are authorized to carry a control device must be properly trained and certified to carry the specific control device and are retrained or re-certified as necessary. Proficiency training shall be monitored and documented by a certified, control-device weapons or tactics instructor.

(f) Fiscal Impact: Annual maintenance is approximately $100 per shotgun.

(g) Legal and Procedural Rules: Use of the less lethal shotgun and Super Sock rounds are subject to the requirements of Policy 300 (USE OF FORCE), 308 (CONTROL DEVICES AND TECHNIQUES), 308.9 (KINETIC ENERGY PROJECTILE GUIDELINES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize the less lethal shotgun only for official

law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

3. **5.56mm Semi-Automatic Rifles and Ammunition:** The Colt AR-15/M4 5.56 mm/.223 semiautomatic rifle are used for both patrol and the SWAT Team.

   (a) Description, quantity, capabilities, and purchase cost

      i. COLT AR/M4 RIFLES, cost: $1200, quantity: 27. These rifles, equipped and locked in each patrol car or police motorcycle, offer a higher degree of accuracy at a longer distance. The ammunition used in rifles are also more effective at penetrating body armor (as some suspects have worn during high-profile shooting events in the country). They are normally kept secured in patrol cars or in the Police station and are only deployed on specific incidents where officers believe guns or weapons are involved.

      ii. .223 CALIBER or 5.56MM RIFLE AMMUNITION, cost: $280 per case of 500 rounds, quantity: 10,800 rounds. This rifle ammunition used in conjunction with an AR-15 type rifle provides officers the ability to engage hostile suspects at distances generally greater than the effective distance of their handguns. Rifle ammunition fired from AR-15 rifles offer advantages over handguns, such as increased accuracy potential and the ability to defeat soft body armor but are not appropriate for every situation.

   (b) Purpose: To be used as precision weapon to address a threat with more precision and/or greater distances than a handgun, if present and feasible.

   (c) Authorized Use - Members may deploy the patrol rifle in any circumstance where the member can articulate a reasonable expectation that the rifle may be needed. Situations for use of the less lethal weapon systems may include, but are not limited to:

      i. Situations where the member reasonably anticipates an armed encounter.

      ii. When a member is faced with a situation that may require accurate and effective fire at long range.

      iii. Situations where a member reasonably expects the need to meet or exceed a suspect's firepower.

      iv. When a member reasonably believes that there may be a need to fire on a barricaded person or a person with a hostage.

      v. When a member reasonably believes that a suspect may be wearing body armor.

      vi. When authorized or requested by a supervisor.

      vii. When needed to euthanize an animal.

   (d) Lifespan:

      i. Colt AR/M4 Rifles: Approximately 15-20 years

      ii. 223 Caliber or 5.56mm rifle ammunition: No expiration

DRAFT

Published with permission by Los Altos Police Department

(e) Training: Officers must successfully complete a 24-hour patrol rifle course as well as regular Department firearms training and qualifications as required by law and policy. Firearm Instructors attend a 40-hour POST-approved rifle instructor class, and SWAT personnel must attend an 80-hour basic SWAT Team course.

(f) Fiscal Impact: Annual maintenance is approximately $100 per rifle.

(g) Legal and Procedural Rules: Use of the patrol rifles and ammunition are subject to the requirements of Policy 300 (USE OF FORCE), Policy 312.3.2 (PATROL RIFLES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize rifles only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

4. .**308 Caliber Remington 700 and Heckler & Koch HK-91 Sniper Rifles and Ammunition:** The sniper rifles are capable of firing a.308 caliber bullet. This rifle may only be used by a SWAT Officer trained and certified to be a sniper (LAPD currently has two such officers) and may be deployed to assist the SWAT Team in a critical incident or emergency.

(a) Description, quantity, capabilities, and purchase cost

i. .308 CALIBER REMINGTON 700 AND 700 LTR RIFLE, cost: $1,000, quantity: 2. Remington 700: No cost, surveyed, Remington 700LTR $1,000.

ii. .308 CALIBER HECKLER & KOCH HK-91 RIFLE, cost: No cost, surveyed, , quantity: 1.

iii. .308 AMMUNITION, cost: $1.50 per round, quantity: 3.040 rounds. These nickel-plated bonded soft-point 308/7.62 cartridges from Speer Gold-Dot are resistant to corrosion, capable of expansion from barrels as short as 10", and retain accuracy from a variety of barrels lengths.

(b) Purpose: This rifle may only be used by a SWAT Officer trained and certified to be a sniper and may be deployed to assist the SWAT Team in a critical incident or emergency. The main use is for observation of an incident and to be able to accurately and immediately be able to stop a threat to life.

(c) Authorized Use: Examples of situations for deploying the rifle may include, but are not limited to the following:

i. where the Officer reasonably anticipates an armed encounter;

ii. when the Officer is faced with a situation that may require accurate and effective fire at a long distance;

iii. where an Officer reasonably expects the need to meet or exceed the firearms and ammunition that a suspect is reported or believed to possess;

iv. when an Officer reasonably believes that there may be a need to fire on a barricaded person or a person with a hostage;

DRAFT

Published with permission by Los Altos Police Department

v. when an Officer reasonably believes that a suspect may be wearing body armor.

(d) Lifespan:

i. .308 Caliber Remington 700/700LTR: Approximately 15 years

ii. .308 Caliber Heckler & Koch HK-91: Approximately 15 years

iii. .308 Ammunition: No expiration

(e) Training: In addition to patrol rifle and standard SWAT operator training, SWAT snipers must successfully complete a California POST-certified sniper course as well as regular SWAT sniper training and qualifications as required by law and policy.

(f) Fiscal Impact: Annual maintenance is approximately $100 per Remington rifle. The HK is not used.

(g) Legal and Procedural Rules: Use of the sniper rifles and ammunition are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos, Policy 300 (USE OF FORCE), Policy 312.3.2 (PATROL RIFLES), Policy 312 (FIREARMS), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the Los Altos Police Department to utilize rifles only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

5. **Benelli M3Super90 12 gauge shotgun and ammunition: This firearm is not currently used by the department and is stored in the armory.** The Benelli M3 is a dual-mode (hybrid pump-action and semi-automatic) shotgun The ammunition for the shotgun is 00 Buck and slug rounds.

(a) Description, quantity, capabilities, and purchase cost

i. BENELLI M3SUPER90 12 GAUGE SHOTGUN, cost $500, quantity: 1. The Benelli M3 is a combination Pump-Action and Semi-Automatic Shotgun. The shotgun can be chambered for 12 GA shells with a 20 inch barrel.

ii. 00 BUCK AMMUNITION, cost: $1.80 per round, quantity: 600 rounds. A typical 12-gauge, 2 ¾-inch 00 Buckshot shell holds 8 pellets that are 0.33" in diameter. A 3-inch shell most often contains 12 of these same sized pellets.

iii. SLUG AMMUNITION, cost: $1.40 per round, quantity: 100. The Foster-type shotgun slug features exterior rifled grooves which contact the shotgun's bore to give it spin; and, the slug's hollow-point design initiates expansion to augment stopping power.

(b) Purpose: This shotgun is not currently utilized by the department. The only shotguns used by the Department are the less lethal shotguns. The ammunition is purchased solely for recruits in the police academy, where shotgun instruction occurs.

DRAFT

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

(c) Authorized Use: There is currently no authorized use for the shotgun in our policy.

(d) Lifespan:

i. Benelli M3Super90 12 gauge shotgun: Approximately 15 years

ii. OO Buck Ammunition: No expiration

iii. Slug ammunition: No expiration

(e) Training: Officers receive training in shotgun use in the police academy, and have to pass firearm qualifications. There is no further training with the Benelli shotgun or ammunition.

(f) Fiscal Impact: None, the weapon is not utilized.

(g) Legal and Procedural Rules: Use of all firearms fall under the following policies: Policy 300 (USE OF FORCE) and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize firearms only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

6. **Remington 870 MCS 12 Gauge Breaching shotgun and breaching rounds: This firearm/ammunition is not currently used by the department and is stored in the SWAT armory.**

(a) Description, quantity, capabilities, and purchase cost

i. REMINGTON 870 MCS 12 GAUGE BREACHING SHOTGUN, cost: $1,400, quantity: 1. Extremely compact breaching model 12 gauge with a ten inch cylinder bore breaching barrel with parkerized finish, a Knoxx recoil reducing breacher pistol grip stock, and synthetic modular fore-end.

ii. 12 GAUGE BREACHING ROUNDS, cost: $5.00 per round, quantity: 25 rounds. The 12-Gauge TKO Breaching Round is a 12-Gauge shell loaded with a compressed zinc slug, utilizing smokeless powder as a propellant. The is a widely used method to breach door locks or hinges for entry during tactical operations.

(b) Purpose: The breaching shotgun is used to safely gain entry into a structure. When properly deployed, the TKO breaching round is capable of defeating door lock mechanisms, door knobs, hinges, dead bolts, safety chains, and pad locks on both wooden or hollow core doors. Upon impact with the target, the zinc slug disintegrates in to a fine powder eliminating fragmentation. The Explosive Breaching Program, conducted in conjunction with the Mountain View Police Department, was established to provide the joint SWAT Team the ability to quickly create an opening in a wall or window to quickly enter a building for an emergency rescue of hostages. It is reserved for rescue operations only.

(c) Authorized Use: This equipment would only be deployed during a SWAT incident, and its use would need specific authorization from the Incident Commander. The equipment may only be used by a "tactical breacher" on the SWAT team. We currently do not have any authorized users at the Department.

DRAFT

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

(d) Lifespan:

i. Remington 870 MCS 12 Gauge Breaching shotgun: Approximately 15 years

ii. 12-Gauge TKO Breaching Round: Approximately 5 years

(e) Training: The training consists of an 80-hour course for a member of the SWAT Team specifically designated as the "breacher." At the conclusion of the course, the breacher must pass a test proctored by CAL/OSHA. The OSHA certification is valid for 5 years. Before the expiration of the certification, the breacher must retake and pass the test.

(f) Fiscal Impact: None, the weapon is not utilized.

(g) Legal and Procedural Rules: Use of the breaching shotgun and ammunition are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

7. **Kaiser Precision Vulcan II Munitions Pole: Telescoping tool utilized by SWAT personnel to safely deliver approved noise/diversionary devices.**

(a) Description, quantity, capabilities, and purchase cost

i. KAISER PRECISION VULCAN II MUNITIONS POLE, cost: $2,000, quantity: 1. The munitions pole is a multi-purpose breaching tool, constructed of lightweight aluminum square tubing used to deploy distraction devices and chemical munitions in order to gain entrance into a building, structure or even a vehicle.

(b) Purpose: The munitions pole is used to safely deploy diversionary devices, chemical munitions, or other objects (cell phones, cameras) during SWAT operations.

(c) Authorized Use: This equipment would be deployed during primarily during a SWAT incident, but could be utilized to gain entry into a residence during other high risk operations on patrol.

(d) Lifespan: Approximately 10 years

(e) Training: Kaiser Precision provided an instructional video for individual and team training.

(f) Fiscal Impact: None, does not require annual maintenance

(g) Legal and Procedural Rules: Use of the munitions pole are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 317 (HIGH RISK OPERATIONS PROTOCOL), Policy 322 (SEARCH AND SEIZURE), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to

utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

8. **CTS Flash-bang Training Kit:** The training flash-bangs are built and weigh exactly the same as it's equivalent live Flash-Bang, but have no flash charge.

   (a) Description, quantity, capabilities, and purchase cost

      i. CTS FLASH-BANG TRAINING KIT, cost: $964, Quantity 1 kit (comes with 70 reload Training Fuzes, 1 body), current fuze inventory is 25. The training bodies are painted with a bright blue coating, and can be used an unlimited number of times. The M201FB fuze for this system has 10 times the output of a normal M201 fuze and it is threaded with a left hand thread so it can not be accidentally used in any other munitions. The training devices produce an output of about 120db.

   (b) Purpose: Flash-bangs are used to distract and temporarily immobilize dangerous suspects by overwhelming their senses of vision and hearing. The distraction gives Officers time to seize a moment and create an opportunity to take control of high-risk or dangerous situations.

   (c) Authorized Use: SWAT operators may utilize the training flash-bangs as a training tool to distract and temporarily immobilize dangerous suspects by overwhelming their senses of vision and hearing. Los Altos Police Department does not have any live flash-bangs in the inventory. Our operators use live flash-bangs while on SWAT events or at training with Mountain View Police Department.

   (d) Lifespan: 5 years

   (e) Training: These are a training tool. SWAT operators must attend and pass an 80-hour SWAT training class. Flash-bang training is provided by an instructor who has completed an 8-hour noise flash diversionary device course.

   (f) Legal and Procedural Rules: Use of the **live** flash-bangs are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 317 (HIGH RISK OPERATIONS PROTOCOL), Policy 322 (SEARCH AND SEIZURE), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

9. **Specialty Impact Munition (SIM) weapons and ammunition:** Simunition® is the pioneer and world leader in providing military, law enforcement and approved range members with the most realistic and non-lethal force-on-force, short range, simulation training system.

   (a) Description, quantity, capabilities, and purchase cost

      i. SIMUNITION GLOCK 17T, cost: $500 each, quantity: 8. The GLOCK Training Pistols were developed with the purpose of enabling reality-based tactical operations training using color marking or plastic projectile

DRAFT

Published with permission by Los Altos Police Department

ammunition. When utilized in a pistol caliber barrel training platform (9mm), SIMs have an effective range of 25 feet.

ii. SIM CONVERTED BERETTA 92, cost: $500 each, quantity: 4. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized in a pistol caliber barrel training platform (9mm), SIMs have an effective range of 25 feet.

iii. HK MP5 CONVERSION KITS, cost: $500 each, quantity 2. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized with a training munition bolt carrier group in a 5.56mm rifle platform, SIMs have an effective range of approximately 27 yards.

iv. SIMUNITION COLT AR-15 CARBINE RIFLE UPPERS, cost: $1,000 each, quantity: 3. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized with a training munition bolt carrier group in a 5.56mm rifle platform, SIMs have an effective range of approximately 27 yards.

v. FX MARKING CARTRIDGES, cost: $350 for 500 rounds, quantity: 3,500 rounds. The reduced-energy, non-lethal cartridges leave a detergent-based, water-soluble color-marking compound. The visible impacts allow accurate assessment of simulated lethality. They feature tactical accuracy up to 25 feet (7.6 meters).

(b) Purpose: Enabling reality-based, force-on-force tactical operations training using color marking or plastic projectile ammunition.

(c) Authorized Use: Simunition weapons and marking rounds are non-operational rounds and non-operational weapons systems. These munitions provide for realistic close quarters firearms training while allowing the shooter to visually assess shot placement and accuracy in force on force training scenarios. These items are used for training purposes for all sworn staff members.

(d) Lifespan:

i. Simunition Glock 17T: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

ii. Sim Converted Beretta: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

DRAFT

Published with permission by Los Altos Police Department

iii. HK MP5 Conversion Kits: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

iv. Simunition Colt AR-15 Rifle Uppers: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

v. FX Marking Cartridges: Shelf life five (5) years.

(e) Training: These are a training tool. Simunition Instructors attend an informative, three-day (24-hour) course designed to provide students with substantial hands-on experience with Simunition® FX® training ammunition technology, weapons conversion kits, and the Simunition® line of protective equipment. The course provides in-depth, hands-on instruction in scenario-based training program development and training methodology, and gives critical practical experience to students on the best use of Simunition® training products in a highly effective, realistic, extremely safe training program. Sworn staff members are given extensive firearms handling courses and weapons safety instruction to include the use of SIMs for training purposes.

(f) Legal and Procedural Rules: Use of the Simunition firearms and marking rounds are subject to the requirements of Policy 300 (USE OF FORCE) and Policy 312 (FIREARMS) while training. It is the policy of the Los Altos Police Department to utilize Simunition equipment only for official law enforcement training purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

DRAFT

709.5 APPROVAL

The Chief of Police or the authorized designee shall obtain approval from the governing body by way of an ordinance adopting the military equipment policy. As part of the approval process, the Chief of Police or the authorized designee shall ensure the proposed military equipment policy is submitted to the governing body and is available on the department website at least 30 days prior to any public hearing concerning the military equipment at issue (Government Code § 7071). The military equipment policy must be approved by the governing body prior to engaging in any of the following (Government Code § 7071):

(a) Requesting military equipment made available pursuant to 10 USC § 2576a.

(b) Seeking funds for military equipment, including but not limited to applying for a grant, soliciting or accepting private, local, state, or federal funds, in-kind donations, or other donations or transfers.

(c) Acquiring military equipment either permanently or temporarily, including by borrowing or leasing.

(d) Collaborating with another law enforcement agency in the deployment or other use of military equipment within the jurisdiction of this department.

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

(e) Using any new or existing military equipment for a purpose, in a manner, or by a person not previously approved by the governing body.

(f) Soliciting or responding to a proposal for, or entering into an agreement with, any other person or entity to seek funds for, apply to receive, acquire, use, or collaborate in the use of military equipment.

(g) Acquiring military equipment through any means not provided above.

709.6 COORDINATION WITH OTHER JURISDICTIONS

Military equipment used by other law enforcement agencies that are providing mutual aid to this jurisdiction or otherwise engaged in law enforcement operations within this jurisdiction shall comply with their respective military equipment policies in rendering mutual aid.

709.7 ANNUAL REPORT

Upon approval of a military equipment policy, the Chief of Police or the authorized designee should submit a military equipment report to the governing body for each type of military equipment approved within one year of approval, and annually thereafter for as long as the military equipment is available for use (Government Code § 7072).

The Chief of Police or the authorized designee should also make each annual military equipment report publicly available on the department website for as long as the military equipment is available for use. The report shall include all information required by Government Code § 7072 for the preceding calendar year for each type of military equipment in department inventory.

709.8 COMMUNITY ENGAGEMENT

Within 30 days of submitting and publicly releasing the annual report, the Department shall hold at least one well-publicized and conveniently located community engagement meeting, at which the Department should discuss the report and respond to public questions regarding the funding, acquisition, or use of military equipment.

Pursuant to California Government Code 7070(d)(7), members of the public may register complaints or concerns or submit questions about the use of each specific type of listed equipment in this policy by any of the following means:

(a) Via email to: policefeedback@losaltosca.gov

(b) Via phone call to : 650-947-2672

(c) Via mail sent to:

Gabe, here is the Public Comment email referenced in the other email I just sent. I sent the email below June 30 but it was somehow not read by the city. The PDFs I submitted with that Public Comment are hereby attached as well. Please advise as to anything I need to do to effect a corrected Public Comment posting for me to this 9/20 Council packet.

Thank you,

Jeanine Valadez

Military Equipment (PUBLIC COMMENT V.5 JAV)

709.1 PURPOSE AND SCOPE

The purpose of this policy is to provide the Los Altos Police Department (Department) guidelines for conforming to ~~The purpose of this policy is to provide guidelines for the approval, acquisition, and reporting requirements of military equipment (~~Government Code~~s~~ § 7070; ~~Government Code~~ § 7071; and ~~Government Code~~ § 7072).

This policy fulfills the obligations set forth in Assembly Bill No. 481 (c.2021), enacting the foregoing statutes' Code sections. These obligations include, but are not limited to, seeking approval for the use and acquisition of specific items deemed to be military equipment, and requirements related to training, compliance, annual reporting, cataloging, community engagement, independent oversight, and complaints regarding these items. This policy also includes requirements and assessment criteria to achieve annual approval from the Department's governing body, the Los Altos City Council, as herein described.

The philosophy behind this policy recognizes that military equipment in our community may impact the public's safety and welfare, so this policy makes sure that safeguards exist, including transparency, ~~-~~governing body oversight, independent oversight, and accountability measures. These safeguards serve to ensure the public's right to know that the acquisition and use of military equipment by the Department is consistent with the provisions set forth by the City Council and as outlined in AB481.

This policy will also provide the public with a transparent view of the military equipment owned, used, and in some cases, not used, by the Department.

[Sources: amalgamations of Los Alamitos PD, Hayward PD, Long Beach PD, San Diego County Sheriff, Sacramento PD, and Culver City PD ME Use Policies, Purpose, Scope, and Philosophy sections (variously numbered), plus AB481 itself]

709.1.1 DEFINITIONS

Definitions related to this policy include (Government Code § 7070):

Governing body – ~~The elected or appointed body that oversees the Department~~The Los Altos City Council.

Military equipment – Includes but is not limited to the following:

- Unmanned, remotely piloted, powered aerial or ground vehicles.
- Mine-resistant ambush-protected (MRAP) vehicles or armored personnel carriers.
- High mobility multipurpose wheeled vehicles (HMMWV), two-and-one-half-ton trucks, five-ton trucks, or wheeled vehicles that have a breaching or entry apparatus attached.
- Tracked armored vehicles that provide ballistic protection to their occupants and utilize

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

a tracked system instead of wheels for forward motion.

- Command and control vehicles that are either built or modified to facilita operational control and direction of public safety units.
- Weaponized aircraft, vessels, or vehicles of any kind.
- Battering rams, slugs, and breaching apparatuses that are explosive in nature. This does not include non-explosive items designed to remove a lock, or a handheld, one-person ram.
- Firearms and ammunition of .50 caliber or greater, excluding standard-issue shotguns and standard-issue shotgun ammunition.
- Specialized firearms and ammunition of less than .50 caliber, including firearms and accessories identified as assault weapons in Penal Code § 30510 and Penal Code § 30515, with the exception of standard-issue firearms and ammunition of less than .50 caliber.
- Any firearm or firearm accessory that is designed to launch explosive projectiles.
- Noise-flash diversionary devices and explosive breaching tools.
- Munitions containing tear gas or OC (Oleoresin capsicum), excluding standard, service-issued handheld pepper spray.
- TASER® Shockwave, microwave weapons, water cannons, and long-range acoustic devices (LRADs).
- Kinetic energy weapons and munitions, including, but not limited to, lethal and less-lethal implementations of 40mm projectile (baton) launchers, pellet bag- and rubber bullet-firing weapons, and specialty impact munition (SIM) weapons.
- Any other equipment as determined by a governing body or a state agency to require additional oversight.

Published with permission by Los Altos Police Department

709.2 POLICY

It is the policy of the Los Altos Police Department that members of this department comply with the provisions of Government Codes § 7070, 7071, and 7072 with respect to military equipment.

(a) All approved inventory and uses pursuant to this policy shall be used in accordance with all applicable Department policies and laws.

(b) Compliance: The Chief of Police shall ensure that all Department members comply with this policy.

(c) Independent Oversight: Suspected or alleged violations of this policy or of any other applicable laws or policies governing the use of military equipment shall be referred to an independent oversight entity established for investigation (GC §7070 Subdiv (d) para (6)) in accordance with law and all applicable conduct policies within the Department.

(d) Consequences (sanctions) for violating policy will be in accordance with Department rules and regulations and escalated as necessary up to and including in consultation with the Office of the District Attorney. All confirmed violations shall be included in the annual report to the governing body.

(e) The Department acknowledges the historical use of certain police equipment to intimidate and oppress certain communities and groups more than others, including those that are defined by a common race, ethnicity, religion, national origin, cultural affiliation, income level, sexual orientation, gender identity/expression, disability, mental health condition, or political perspective. As such, this policy expressly prohibits the use of military equipment on individuals or groups solely based on such actual or perceived characteristics. [Sources: case law and case studies: https://www.dhs.gov/sites/default/files/publications/use-of-race-policy_0.pdf , Source of text: Hayward PD Policy 706 ME Use, abridged.]

709.3 MILITARY EQUIPMENT COORDINATOR

The Chief of Police should designate a member of this department to act as the military equipment coordinator. The responsibilities of the military equipment coordinator include but are not limited to:

(a) Acting as liaison to the governing body for matters related to the requirements of this policy.

(b) Identifying department equipment that qualifies as military equipment in the current possession of the Department, or the equipment the Department intends to acquire that requires approval by the governing body.

(c) Conducting an inventory of all military equipment at least annually.

(d) Collaborating with any allied agency that may use military equipment within the jurisdiction of Los Altos Police Department (Government Code § 7071).

(e) Preparing for, scheduling, and coordinating the annual community engagement meeting to include:

1. Publicizing the details of the meeting.
2. Preparing for public questions regarding the department's funding, acquisition, and use of equipment.

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

(f) Preparing the annual military equipment report for submission to the Chief of Police and ensuring that the report is made available on the department website (Government Code § 7072).

(g) Establishing the procedure for a person to register a complaint or concern, or how that person may submit any questions about the use of a type of military equipment, including, but not limited to results of past tests conducted to verify efficacy of military equipment owned by Department, and how the Department will respond in a timely manner. [Source for redline: several LE members I know (all management) with whom I spoke; their experience was that such data are or should be gathered and archived regularly, especially in smaller agencies where use of ME, both weapons and munitions, is rare. The worst thing that can happen is malfunction of equipment due to age.]

709.4 MILITARY EQUIPMENT INVENTORY

The following constitutes a list and description of qualifying equipment for the Department:

1. **40 MM Launchers and Rounds:** 40mm Launchers are utilized by department personnel as a less lethal tool to launch impact rounds.

   (a) Description, quantity, capabilities, and purchase cost

      i. PENN ARMS GL-140-C, 40MM SINGLE SHOT LAUNCHER, cost: $1,000, quantity: 3. The 40mm Single Launcher is a tactical single shot launcher that features a collapsible stock. It will fire standard 40mm less lethal ammunition, up to 6.0 inches in cartridge length. 40mm launchers are capable of firing a variety of munitions with a maximum effective range of one hundred twenty (120) feet.

      ii. SAGE CONTROL ORDINANCES INC K041 STANDARD ENERGY IMPACT BATON PROJECTILE, cost: $21.00, quantity: 14. A less

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

lethal 40mm impact baton projectile fired from a single 40mm grenade launcher with a rifled barrel at 51-72 MPS (meters per second). The projectile provides accurate and effective performance when fired from the recommended firing distances of not less than 10 feet and no greater than 75 feet.

(b) Purpose: To limit the escalation of conflict where employment of lethal force is prohibited or undesirable.

(c) Authorized Use: Situations for use of the less lethal weapon systems may include, but are not limited to the following; however, these and other situations not listed here may also be deemed authorized use cases under applicable penal codes and case law, and, in general shall reflect necessary, reasonable, and proportional use of less lethal weapon systems:

i. The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.

ii. The suspect has made credible threats to harm him/herself or others.

iii. The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers.

iv. There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.

(d) Training: All personnel who are authorized to carry a control device must be properly trained and certified to carry the specific control device and are retrained or re-certified as necessary. Proficiency training shall be monitored and documented by a certified, control-device weapons or tactics instructor.

(e) Lifespan:

i. Penn Arms GL-140-C- No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear

ii. K041 Standard Energy Impact Batons-5 years

(f) Fiscal Impact: Annual maintenance is approximately $100 for each launcher.

(g) Legal and Procedural Rules: Use of the 40mm launcher and 40mm baton rounds are subject to the requirements of Policy 300 (USE OF FORCE), 308 (CONTROL DEVICES AND TECHNIQUES), 308.9 (KINETIC ENERGY PROJECTILE GUIDELINES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize the 40mm only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

2. **Less Lethal Shotgun and Rounds**: Less Lethal Shotgun is used to deploy the less lethal 12-gauge Super-Sock Beanbag Round.

(a) Description, quantity, capabilities, and purchase cost

i. REMINGTON 870 LESS LETHAL SHOTGUN, cost: $950, quantity: 11. The Remington 870 Less Lethal Shotgun is used to deploy the less lethal 12-gauge Super-Sock Beanbag Round up to a distance of 75 feet. The range of the weapon system helps to maintain space between officers and

DRAFT

a suspect reducing the immediacy of the threat which is a principle of

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

deescalation. The less lethal 12- gauge shotgun is distinguishable by an orange butt stock and fore grip.

ii. 12-GAUGE SUPER-SOCK BEANBAG ROUND 2581, cost: $6, quantity: 90. A less lethal 2.4-inch 12-gauge shotgun round firing a ballistic fiber bag filled with 40 grams of lead shot at a velocity of 270-290 feet per second (FPS). CTS (Combined Tactical Systems) Super-Sock rounds are discharged from a dedicated 12- gauge shotgun that is distinguishable by an orange butt stock and fore grip. This round provides accurate and effective performance when fired from the approved distance of not fewer than five (5) feet. The maximum effective range of this munition is up to 75 feet from the target. The Model 2581 Super-Sock is in its deployed state immediately upon exiting the barrel. It does not require a minimum range to "unfold" or "stabilize." The Super-Sock is an aerodynamic projectile. However, accuracy is relative to the shotgun, barrel length, environmental conditions, and the operator. The Super-Sock is very accurate. However, effectiveness depends on many variables, such as distance, clothing, stature, and the point where the projectile impacts.

(b) Purpose: To limit the escalation of conflict where employment of lethal force is prohibited or undesirable.

(c) Authorized Use - Situations for use of the less lethal weapon systems may include, but are not limited to the following; however, these and other situations not listed here may also be deemed authorized use cases under applicable penal codes and case law, and, in general shall reflect necessary, reasonable, and proportional use of less lethal weapon systems:

i. The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.

ii. The suspect has made credible threats to harm him/herself or others.

iii. The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers.

iv. There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.

(d) Lifespan:

i. Remington 970 Less Lethal Shotgun-25 years

ii. Super Sock Round Model 2581: No listed expiration date

(e) Training: All personnel who are authorized to carry a control device must be properly trained and certified to carry the specific control device and are retrained or re-certified as necessary. Proficiency training shall be monitored and documented by a certified, control-device weapons or tactics instructor.

(f) Fiscal Impact: Annual maintenance is approximately $100 per shotgun.

(g) Legal and Procedural Rules: Use of the less lethal shotgun and Super Sock rounds are subject to the requirements of Policy 300 (USE OF FORCE), 308 (CONTROL DEVICES AND TECHNIQUES), 308.9 (KINETIC ENERGY PROJECTILE GUIDELINES), and Policy 312 (FIREARMS). It is the policy of

DRAFT

the Los Altos Police Department to utilize the less lethal shotgun only for official

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

3. **5.56mm Semi-Automatic Rifles and Ammunition:** The Colt AR-15/M4 5.56 mm/.223 semiautomatic rifles are used for both patrol and the SWAT Team.

   (a) Description, quantity, capabilities, and purchase cost

      i. COLT AR/M4 RIFLES, cost: $1200, quantity: 27. These rifles, equipped and locked in each patrol car or police motorcycle, offer a higher degree of accuracy at a longer distance. The ammunition used in rifles are also more effective at penetrating body armor (as some suspects have worn during high-profile shooting events in the country). They are normally kept secured in patrol cars or in the Police station and are only deployed on specific incidents where officers believe guns or weapons are involved. [PROBLEM: This listing is vague. Do we actually include both AR15 (semi-auto) and M4 (burst and fully auto) rifles in our inventory? Or is the use of the descriptor "AR-15/M4" being used as a generic term and we actually only stock semi-auto rifles? It would be better to itemize by name/model what kinds of rifles we actually have because they have different capabilities, barrel lengths (and therefore different targeting-efficacy metrics and close-quarters suitability), and costs. Clarification is needed here.]

      ii. .223 CALIBER or 5.56MM RIFLE AMMUNITION, cost: $280 per case of 500 rounds, quantity: 10,800 rounds. This rifle ammunition used in conjunction with an AR-15 type rifle provides officers the ability to engage hostile suspects at distances generally greater than the effective distance of their handguns. Rifle ammunition fired from AR-15 rifles offer advantages over handguns, such as increased accuracy potential and the ability to defeat soft body armor but are not appropriate for every situation.

   (b) Purpose: To be used as precision weapon to address a threat with more precision and/or greater distances than a handgun, if present and feasible.

   (c) Authorized Use - Members may deploy the patrol rifle in any circumstance where the member can articulate a reasonable expectation that the rifle may be needed. Situations for use of ~~the less~~ this lethal weapon system~~s~~ may include, but are not limited to the following; however, these and other situations not listed here may also be deemed authorized use cases under applicable penal codes and case law, and, in general shall reflect necessary, reasonable, and proportional use of less lethal weapon systems:

      i. Situations where the member reasonably anticipates an armed encounter.

      ii. When a member is faced with a situation that may require accurate and effective fire at long range.

      iii. Situations where a member reasonably expects the need to meet or exceed a suspect's firepower.

      iv. When a member reasonably believes that there may be a need to fire on a barricaded person or a person with a hostage.

      v. When a member reasonably believes that a suspect may be wearing body

armor.

vi. When authorized or requested by a supervisor.

vii. When needed to euthanize an animal (there will be situations where distance is required from an animal for safety or accessibility reasons, demanding the use of this equipment).

(d) Lifespan:

i. Colt AR/M4 Rifles: Approximately 15-20 years

ii. 223 Caliber or 5.56mm rifle ammunition: No expiration

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

(e) Training: Officers must successfully complete a 24-hour patrol rifle course as well as regular Department firearms training and qualifications as required by law and policy. Firearm Instructors attend a 40-hour POST-~~approved~~ certified rifle instructor class, and SWAT personnel must attend an 80-hour basic SWAT Team course. (POST is the Peace Officer Standards and Training Council; SWAT is Special Weapons and Tactics.)

(f) Fiscal Impact: Annual maintenance is approximately $100 per rifle.

(g) Legal and Procedural Rules: Use of the patrol rifles and ammunition are subject to the requirements of Policy 300 (USE OF FORCE), Policy 312.3.2 (PATROL RIFLES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize rifles only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

4. **.308 Caliber Remington 700 and Heckler & Koch HK-91 Sniper Rifles and Ammunition:** The sniper rifles are capable of firing a .308 caliber bullet. This rifle may only be used by a SWAT Officer trained and certified to be a sniper (LAPD currently has two such officers) and may be deployed to assist the SWAT Team in a critical incident or emergency.

(a) Description, quantity, capabilities, and purchase cost

i. .308 CALIBER REMINGTON 700 AND 700 LTR RIFLES, cost: $1,000, quantity: 2. Remington 700: No cost, surveyed, Remington 700LTR $1,000.

ii. .308 CALIBER HECKLER & KOCH HK-91 RIFLE, cost: No cost, surveyed, ~~,~~ quantity: 1.

iii. .308 AMMUNITION, cost: $1.50 per round, quantity: ~~3,040~~ 3,040 rounds. These nickel-plated bonded soft-point 308/7.62 cartridges from Speer Gold-Dot are resistant to corrosion, capable of expansion from barrels as short as 10", and retain accuracy from a variety of barrels lengths.

(b) Purpose: This rifle may only be used by a SWAT Officer trained and certified to be a sniper and may be deployed to assist the SWAT Team in a critical incident or emergency. The main use of this lethal weapon system is for observation of an incident and to be able to accurately and immediately be able to stop a threat to life.

(c) Authorized Use: Examples of situations for deploying the sniper rifle may include, but are not limited to the following; however, these and other situations not listed here may also be deemed authorized use cases under applicable penal codes and case law, and, in general shall reflect necessary, reasonable, and proportional use of less lethal weapon systems:

i. where the Officer reasonably anticipates an armed encounter;

ii. when the Officer is faced with a situation that may require accurate and effective fire at a long distance;

iii. where an Officer reasonably expects the need to meet or exceed the firearms and ammunition that a suspect is reported or believed to possess;

DRAFT

Published with permission by Los Altos Police Department

iv. when an Officer reasonably believes that there may be a need to fire on a barricaded person or a person with a hostage;

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

v. when an Officer reasonably believes that a suspect may be wearing body armor.

(d) Lifespan:

i. .308 Caliber Remington 700/700LTR: Approximately 15 years

ii. .308 Caliber Heckler & Koch HK-91: Approximately 15 years

iii. .308 Ammunition: No expiration

(e) Training: In addition to patrol rifle and standard SWAT operator training, SWAT snipers must successfully complete a California POST-certified sniper course as well as regular SWAT sniper training and qualifications as required by law and policy. The Department's SWAT snipers achieve team operational efficacy by training fully with Mountain View SWAT and are integrated with that team.

(f) Fiscal Impact: Annual maintenance is approximately $100 per Remington rifle. The HK is not used.

(g) Legal and Procedural Rules: Use of the sniper rifles and ammunition are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos, Policy 300 (USE OF FORCE), Policy 312.3.2 (PATROL RIFLES), Policy 312 (FIREARMS), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the Los Altos Police Department to utilize rifles only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

5. **Benelli M3Super90 12 gauge shotgun and ammunition: This firearm is not currently used by the department and is stored in the armory.** The Benelli M3 is a dual-mode (hybrid pump-action and semi-automatic) shotgun The ammunition for the shotgun is 00 Buck and slug rounds.

(a) Description, quantity, capabilities, and purchase cost

i. BENELLI M3SUPER90 12 GAUGE SHOTGUN, cost $500, quantity: 1. The Benelli M3 is a combination Pump-Action and Semi-Automatic Shotgun. The shotgun can be chambered for 12 GA shells with a 20 inch barrel.

ii. 00 BUCK AMMUNITION, cost: $1.80 per round, quantity: 600 rounds. A typical 12-gauge, 2 ¾-inch 00 Buckshot shell holds 8 pellets that are 0.33" in diameter. A 3-inch shell most often contains 12 of these same sized pellets.

iii. SLUG AMMUNITION, cost: $1.40 per round, quantity: 100. The Foster-type shotgun slug features exterior rifled grooves which contact the shotgun's bore to give it spin; and, the slug's hollow-point design initiates expansion to augment stopping power.

(b) Purpose: This shotgun is not currently utilized by the department. The only shotguns used by the Department are the less lethal shotguns. The ammunition is purchased solely for recruits in the police academy, where shotgun instruction occurs.

DRAFT

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

(c) Authorized Use: There is currently no authorized use for the shotgun in our policy.

(d) Lifespan:

i. Benelli M3Super90 12 gauge shotgun: Approximately 15 years

ii. OO Buck Ammunition: No expiration

iii. Slug ammunition: No expiration

(e) Training: Officers receive training in shotgun use in the police academy, and have to pass firearm qualifications. There is no further training with the Benelli shotgun or ammunition.

(f) Fiscal Impact: None, the weapon is not utilized.

(g) Legal and Procedural Rules: Use of all firearms fall under the following policies: Policy 300 (USE OF FORCE) and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize firearms only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

6. **Remington 870 MCS 12 Gauge Breaching shotgun and breaching rounds: This firearm/ammunition is not currently used by the department and is stored in the SWAT armory.**

(a) Description, quantity, capabilities, and purchase cost

i. REMINGTON 870 MCS 12 GAUGE BREACHING SHOTGUN, cost: $1,400, quantity: 1. Extremely compact breaching model 12 gauge with a ten inch cylinder bore breaching barrel with parkerized finish, a Knoxx recoil reducing breacher pistol grip stock, and synthetic modular fore-end.

ii. 12 GAUGE BREACHING ROUNDS, cost: $5.00 per round, quantity: 25 rounds. The 12-Gauge TKO Breaching Round is a 12-Gauge shell loaded with a compressed zinc slug, utilizing smokeless powder as a propellant. ~~The~~ This is a widely used method to breach door locks or hinges for entry during tactical operations.

(b) Purpose: The breaching shotgun is used to safely gain entry into a structure. When properly deployed, the TKO breaching round is capable of defeating door lock mechanisms, door knobs, hinges, dead bolts, safety chains, and pad locks on both wooden or hollow core doors. Upon impact with the target, the zinc slug disintegrates (explodes) in ~~–~~to a fine powder eliminating fragmentation. The Explosive Breaching Program, conducted in conjunction with the Mountain View Police Department, was established to provide the joint SWAT Team the ability to quickly create an opening in a wall or window to quickly enter a building for an emergency rescue of hostages. It is reserved for rescue operations only.

(c) Authorized Use: This equipment would only be deployed during a SWAT incident, and its use would need specific authorization from the Incident Commander. The equipment may only be used by a "tactical breacher" on the SWAT team. We currently do not have any authorized users at the Department.

DRAFT

Published with permission by Los Altos Police Department

(d) Lifespan:

i. Remington 870 MCS 12 Gauge Breaching shotgun: Approximately 15 years

ii. 12-Gauge TKO Breaching Round: Approximately 5 years

(e) Training: The training consists of an 80-hour course for a member of the SWAT Team specifically designated as the "breacher." At the conclusion of the course, the breacher must pass a test proctored by CAL/OSHA. The OSHA certification is valid for 5 years. Before the expiration of the certification, the breacher must retake and pass the test.

(f) Fiscal Impact: None, the weapon is not utilized.

(g) Legal and Procedural Rules: Use of the breaching shotgun and ammunition are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

7. **Kaiser Precision Vulcan II Munitions Pole: Telescoping tool utilized by SWAT personnel to safely deliver approved noise/diversionary devices.** **[This product does not come up in any Google or manufacturer's searches. I think I found its patent, though). Is it obsolete? Lots of court cases and settlements in favor of complainants who suffered injuries as a result of burns and impact by flash-bang deployment using poles similar to this one.]**

(a) Description, quantity, capabilities, and purchase cost

i. KAISER PRECISION VULCAN II MUNITIONS POLE, cost: $2,000, quantity: 1. The ~~–~~munitions pole is a multi-purpose breaching tool, constructed of lightweight aluminum square tubing used to deploy distraction devices and chemical munitions in order to gain entrance into a building, structure or even a vehicle.

(b) Purpose: The munitions pole is used to safely deploy diversionary devices, chemical munitions, or other objects (cell phones, cameras) during SWAT operations.

(c) Authorized Use: This equipment would be deployed ~~during~~ primarily during a SWAT incident, but could be utilized to gain entry into a residence during other high~~-~~risk operations on patrol; however, these and other situations not listed here may also be deemed authorized use cases under applicable penal codes and case law, and, in general shall reflect necessary, reasonable, and proportional use of less lethal weapon systems~~.~~

(d) Lifespan: Approximately 10 years

(e) Training: Kaiser Precision provided an instructional video for individual and team training.

(f) Fiscal Impact: None, does not require annual maintenance

(g) Legal and Procedural Rules: Use of the munitions pole are subject to the

utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

8. **CTS Flash-bang Training Kit:** The training flash-bangs are built and weigh exactly the same as it's equivalent live Flash-Bang, but have no flash charge.

   (a) Description, quantity, capabilities, and purchase cost

      i. CTS FLASH-BANG TRAINING KIT, cost: $964, Quantity 1 kit (comes with 70 reload Training Fuzes, 1 body), current fuze inventory is 25. The training bodies are painted with a bright blue coating, and can be used an unlimited number of times. The M201FB fuze for this system has 10 times the output of a normal M201 fuze and it is threaded with a left hand thread so it can not be accidentally used in any other munitions. The training devices produce an output of about 120db.

   (b) Purpose: Flash-bangs are used to distract and temporarily immobilize dangerous suspects by overwhelming their senses of vision and hearing. The distraction gives Officers time to seize a moment and create an opportunity to take control of high-risk or dangerous situations.

   (c) Authorized Use: SWAT operators may utilize the training flash-bangs as a training tool to distract and temporarily immobilize dangerous suspects by overwhelming their senses of vision and hearing. Los Altos Police Department does not have any live flash-bangs in the inventory. Our operators use live flash-bangs while on SWAT events or at training with Mountain View Police Department.

   (d) Lifespan: 5 years

   (e) Training: These are a training tool. SWAT operators must attend and pass an 80-hour SWAT training class. Flash-bang training is provided by an instructor who has completed an 8-hour noise flash diversionary device course.

   (f) Legal and Procedural Rules: Use of the **live** flash-bangs are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 317 (HIGH RISK OPERATIONS PROTOCOL), Policy 322 (SEARCH AND SEIZURE), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

9. **Specialty Impact Munition (SIM) weapons and ammunition:** Simunition® ~~is the pioneer and world leader in providing~~provides military, law enforcement and approved range members with a ~~the most~~ realistic and non-lethal force-on-force, short range, simulation training system.

   (a) Description, quantity, capabilities, and purchase cost

      i. SIMUNITION GLOCK 17T, cost: $500 each, quantity: 8. The GLOCK Training Pistols ~~were developed with the purpose of enabling~~ enable reality- based tactical operations training using color marking or plastic projectile

Published with permission by Los Altos Police Department

ammunition. When utilized in a pistol caliber barrel training platform (9mm), SIMs have an effective range of 25 feet.

ii. SIM CONVERTED BERETTA 92, cost: $500 each, quantity: 4. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized in a pistol caliber barrel training platform (9mm), SIMs have an effective range of 25 feet.

iii. HK MP5 CONVERSION KITS, cost: $500 each, quantity 2. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized with a training munition bolt carrier group in a 5.56mm rifle platform, SIMs have an effective range of approximately 27 yards.

iv. SIMUNITION COLT AR-15 CARBINE RIFLE UPPERS, cost: $1,000 each, quantity: 3. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized with a training munition bolt carrier group in a 5.56mm rifle platform, SIMs have an effective range of approximately 27 yards.

v. FX MARKING CARTRIDGES, cost: $350 for 500 rounds, quantity: 3,500 rounds. The reduced-energy, non-lethal cartridges leave a detergent-based, water-soluble color-marking compound. The visible impacts allow accurate assessment of simulated lethality. They feature tactical accuracy up to 25 feet (7.6 meters).

(b) Purpose: Enabling reality-based, force-on-force tactical operations training using color marking or plastic projectile ammunition.

(c) Authorized Use: Simunition weapons and marking rounds are non-operational rounds and non-operational weapons systems. These munitions provide for realistic close quarters firearms training while allowing the shooter to visually assess shot placement and accuracy in force-on-force training scenarios. These items are used for training purposes for all sworn staff members.

(d) Lifespan:

i. Simunition Glock 17T: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

ii. Sim Converted Beretta: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

DRAFT

Published with permission by Los Altos Police Department

iii. HK MP5 Conversion Kits: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

iv. Simunition Colt AR-15 Rifle Uppers: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

v. FX Marking Cartridges: Shelf life five (5) years.

(e) Training: These are a training tool. Simunition Instructors attend ~~an informative~~a, a three-day (24-hour) course ~~designed to provide students with substantial~~to obtain hands- on experience with Simunition® FX® training ammunition technology, weapons conversion kits, and the Simunition® line of protective equipment. The course provides in-depth, hands-on instruction in scenario-based training program development and training methodology, and gives critical practical experience to students on the best use of Simunition® training products in a highly effective, realistic, extremely safe training program. Sworn staff members are given extensive firearms handling courses and weapons safety instruction to include the use of SIMs for training purposes.

(f) Legal and Procedural Rules: Use of the Simunition firearms and marking rounds are subject to the requirements of Policy 300 (USE OF FORCE) and Policy 312 (FIREARMS) while training. It is the policy of the Los Altos Police Department to utilize Simunition equipment only for official law enforcement training purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

709.5 APPROVAL

The Chief of Police or the authorized designee shall obtain approval from the governing body by way of an ordinance adopting the military equipment policy (Government Code §7071(a)(1)). As part of the approval process, the Chief of Police or the authorized designee shall ensure the proposed military equipment policy is submitted to the governing body and is available on the department website at least 30 days prior to any public hearing concerning the military equipment at issue (~~Government Code~~GC § 7071(b)). The military equipment policy must be approved by the governing body prior to the Department engaging in any of the following (~~Government Code~~GC § 7071(a)(1)(A)-(G)):

(a) Requesting military equipment made available pursuant to 10 USC § 2576a.

(b) Seeking funds for military equipment, including but not limited to applying for a grant, soliciting or accepting private, local, state, or federal funds, in-kind donations, or other donations or transfers.

(c) Acquiring military equipment either permanently or temporarily, including by borrowing or leasing.

(d) Collaborating with another law enforcement agency in the deployment or other use of military equipment within the jurisdiction of this department.

DRAFT

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

(e) Using any new or existing military equipment for a purpose, in a manner, or by a person not previously approved by the governing body.

(f) Soliciting or responding to a proposal for, or entering into an agreement with, any other person or entity to seek funds for, apply to receive, acquire, use, or collaborate in the use of military equipment.

(g) Acquiring military equipment through any means not provided above.

The governing body shall only approve the military equipment use policy if all of the following are true (§7071 Subdiv (d) para (1) subpara (A)-(D)):

(a) Each military equipment is necessary for lack of a reasonable alternative.
(b) The military equipment use policy will safeguard the public's welfare, safety, civil rights, and civil liberties.
(c) The military equipment is reasonably cost effective.
(d) All current or prior non-confirming uses have been remedied to assure future compliance with policy
(e) All required components of the military equipment use policy are included in the policy presented for approval, including at least the following for each item of equipment (GC §7070 Subdiv (d) para (1)-(7)):
    a. Description
    b. Purpose(s) and authorized use(s)
    c. Fiscal impact, initial costs and maintenance costs
    d. Legal and procedural rules that govern authorized use(s)
    e. Training required
    f. Mechanisms to ensure compliance, independent oversight, and legal consequences (sanctions) for violation of policy
    g. Methods by which public engagement is achieved (complaints, concerns, questions, suggestions)

709.6 COORDINATION WITH OTHER JURISDICTIONS

Military equipment used by other law enforcement agencies that are providing mutual aid to this jurisdiction or otherwise engaged in law enforcement operations within this jurisdiction shall comply with their respective military equipment policies in rendering mutual aid.

The Department's policy in this regard best serves the public because it allows the providers of mutual aid to rely on the training and operational protocols with which they are familiar to achieve situational objectives. Requiring providers of mutual aid to change their operational parameters would introduce risk into the service of mutual aid. [Source: this is my opinion, but my LE associates agree.]

709.7 ANNUAL REPORT AND ANNUAL REVIEW

Upon approval of a military equipment policy, the Chief of Police ~~or the authorized designee should submit~~shall be responsible for the issuance of an annual ~~a~~ military equipment report to the governing body for each type of military equipment approved within one year of approval, and annually thereafter for as long as the military equipment is available for use (Government Code § 7072).

The Chief of Police or the authorized designee ~~should~~ shall also make each annual military

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

equipment report publicly available on the department website for as long as the military equipment is available for use. The report shall include all information required by Government Code § 7072 for the preceding calendar year for each type of military equipment in department inventory.

The governing body shall review the ordinance it has adopted approving the military equipment use policy at least annually in combination with a review of the annual report generated by the Department. Should the governing body at any review cycle fail to approve any component(s) of military equipment (GC §7071 Subdiv (e) para (1)-(2) abridged) or the military equipment use policy or any element of the policy within 180 days of the commencement of said review cycle, the use of military equipment, or specific component(s) of military equipment, shall cease by the Department until that time that the governing body approves the military equipment policy (GC §7071 Subdiv (a) para (2) abridged).

709.8 COMMUNITY ENGAGEMENT

Within 30 days of submitting and publicly releasing the annual report, the Department shall hold at least one well-publicized and conveniently located community engagement meeting, at which the Department should discuss the report and respond to public questions regarding the funding, acquisition, or use of military equipment.

Pursuant to California Government Code 7070(d)(7), members of the public may register complaints or concerns or submit questions about the use of each specific type of listed equipment in this policy by any of the following means:

2022_06_30 Los Altos PD – Policy 709 Military Equipment Use

Key Issues Summary – refers to REDLINE of 709 generated by Jeanine Valadez, Version V.5

Prior publication: Public Comment to 6/14/2022 City Council Meeting – V.1

==========

Background: I conducted an extensive search through ME Use Policies and some contact with many other LE agencies and personnel throughout Calif. All agencies I accessed used Lexipol template as basis, though there was quite a bit of variance as to content, which sections of the template they chose to deploy, the decisions they made to expand upon or abridge template sections, etc. Anecdotally, I found that as many agencies were more expansive in their policy statements as those that were "bare-minimum" agencies. I would put our policy more towards the end of the spectrum of bare minimum with some actual missing elements of AB481. In the end, my recommendations constitute what I consider to be a best practices suggestion that balances PD's need for accuracy, justifiable use of the equipment, and necessity of ME to effect public safety, with the public's interest in transparency, explicitly abiding by the law (AB481), compliance and accountability, protection of civil rights, and empathy for those historically negatively affected by such equipment.

Key Issues (Not in order of Policy Outline)

1) Our current Policy 709 is missing a comprehensive introduction. It does not inform the public of the philosophy behind why the document exists, nor "what's in it for the public." **SOLUTION**: Expand Purpose and Scope chapter 709.1 as redlined.

2) The definitions section 709.1.1 is abridged excessively. **SOLUTION**: expand military equipment definitions using AB481 wording.

3) 709 does not recognize the overarching desire to protect people in classes of difference from harm simply because they are different; i.e., there is no anti-discrimination statement of any kind. Even AB481's preamble and Sec 1 intro both recognize the negative impact on people of color. **SOLUTION**: I added historical discriminatory use statement under the Policy chapter, 709.2 (e). It complies with the guidelines put out by the DOJ. Additionally, Constitutional Law (Whren v. United States, 517 U.S. 806, 813 (1996) assures this protection (see Dept of Justice website: https://www.dhs.gov/sites/default/files/publications/use-of-race-policy_0.pdf). I sourced the wording from Hayward PD after checking that it conformed to DOJ guidelines.

4) 709 does not show the assessment criteria AB481 requires (see citations in redline for 709.5). The general public does not typically read state bills, laws, or case law. Yet they read local policies. AB481 is deeply replicated in most agencies' ME policies. This informs the public what to expect and amplifies the purpose of the policy as well as the governing bodies' responsibilities therein. The most important duty of the governing body is to make sure they follow the assessment criteria set out by AB481. Those criteria are missing from here. This not only keeps the governing body in the dark, but keeps the public in the dark. **SOLUTION**: Include the full list of assessment criteria for the governing body in the Approval section 709.5.

5) The document insufficiently binds authorized uses throughout 709.4 because it uses the phrase, "included but not limited to" in an unconstrained fashion. This is the NUMBER ONE concern

from the public. While it is true that section (g) in each ME inventory item cites various Department policies that guide and/or constrain authorized use, leaving the phrase above alone continues to rile the public. It looks and smells like a loophole. Some agencies have ameliorated this concern in one of two ways:

a. By adding a few Prohibited Uses

b. By adding a few components of ME that will NOT be sought for funding, acquisition, or use. The most common here are launchers with explosive munitions (grenade launchers or munitions poles) and water cannons (the latter likely because they for so long have been used against protestors and historically against Black and Brown people.

c. **SOLUTION**: I am NOT proposing either mechanism above because I do not believe prohibited uses and prohibited equipment are within the scope of AB481. It is true that AB481 allows agencies to go beyond the min requirements of the bill (see AB481 preamble, end of 3rd paragraph), but I think doing so in the specific case leads us into murky waters. Therefore, my solution is to add ***obvious redundancy*** to this clause by adding the text in my redlines in 709.4 for each applicable item of ME in paragraphs under Section 709.4, understanding that section (g) of each item of ME, by listing applicable policy codes does the same, in effect. These *redundant* additions quell the public's concerns and do not dispute in any way the existing policies of the Department. My LE friends (again, all but one is a managerial officer or Asst chief or Chief) recommended to additionally use the phrase, "necessity, reasonableness, and proportional use" for each item of ME in the inventory as they have found this phrase calming to the public while still being consistent with any continuum of force, or use of force, or rubric of force policies that any agency in their experience has ever deployed operationally.

6) The document has typos and many acronyms. **SOLUTION**: correct them and spell out acronyms at least first time used. I hope my redlines have captured them all.

7) The semi-automatic rifle section 709.4 (3) (a) (i) is vague. Do we actually include both AR15 (semi-auto) and M4 (burst and fully auto) rifles in our inventory? Or is the use of the descriptor "AR-15/M4" being used as a generic term and we actually only stock semi-auto rifles? **SOLUTION**: It would be better to itemize by name/model, as has been done in all other sections, what kinds of rifles we actually have because they have different capabilities, barrel lengths (and therefore different targeting-efficacy metrics and close-quarters suitability), and costs. Clarification is needed here

8) The review mechanisms included in 709.7 do not meet the requirements of AB481. **SOLUTION**: Add the fact that the policy itself must be annually reviewed by law. The current policy 709 only states that an annual report must be issued. Expanded 709.7 to cover ANNUAL REPORT AND ANNUAL REVIEW. Redline was created by extracting cited clauses from AB481.

9) The Community Engagement section 709.8 lacks Independent Oversight contact information. **SOLUTION**: Add placeholders as shown in my redlines.

10) The policy does not take full advantage of what the law (AB481) allows. Specifically, AB481 allows agencies to add requirements and standards to their ME Use Policy that go beyond the minimum requirements of AB481: "The bill would specify these provisions [the specified standards in AB481] do not preclude a county or local municipality from implementing additional requirements and standards related to the purchase, use, and reporting of military equipment by local law enforcement agencies." **SOLUTIONS**: I have added the following as valuable to obtaining the public's buy-in to approval of the policy:

    a. add the explicit statement holding the Chief of Police accountable for members compliance with the policy in the spirit of part of the "accountability" and "compliance" requirements (added in 709.2)

    b. expand the Purpose and Scope section to give legislative background to policy and to elaborate the considerations given the public in creating the policy (in 709.1)

    c. spell out first use of all acronyms

    d. expand any statement of an individual authorized use case if doing so helps the public understand it better (example I have chosen: 709.4 (3) (c) (vii), added wording justifying use of semi-auto rifle to euthanize an animal)

    e. augment the description of training of authorized sniper rifle users in the Department with a statement that they undergo the same training with Mountain View SWAT team and are fully integrated therein. You have mentioned the MV team analogously in section 709.4. (6) with the breaching shotgun.

    f. clarify whether or not the flashbang munitions pole seems to be obsolete. I have added my commentary in the redline, 709.4 (7)

    g. delete marketing-oriented text from description of SIM weapons, 709.4 (9) for obvious reasons. See redline.

    h. add to 709.5 the assessment criteria the governing body must use to approve policy 709. Doing this more precisely clarifies PD's commitment to fulfill the criteria in the law, even though elements may not be completely implemented right now (for example, current Policy 709 does not have an independent oversight mechanism in the policy; yet, by committing to have one, the governing body could approve it pending the establishment of said mechanism to a date certain after which, if not implemented, the policy would be disapproved until that time the mechanism is implemented. In simple words, adding this section from AB481 to section 709.5 engenders the public's patience with the fact that certain elements are not completely implemented. (This redline was created by me by extracting wording from AB481 Sec 7071 Subdiv (d) para (1) subpara A-D, and wording from Sec 7070 Subdiv (d) para 1-7.

    i. Add rationale to 709.6 as to why our 709 policy allows agencies provide us mutual aid to conform to their ME use policies and NOT conform to ours. I found several agencies that require local conformance. **SOLUTION**: I do NOT believe in asking mutual aid providers to conform to our policies and support the policy as written in 709.6.

However, I know it will calm members of the public if a rationale is offered. I have included my rationale in the redline. I checked this text with several LE members I know and they all supported it.

==========END OF REDLINE OVERVIEW

The table below comprises a current collection of concerns or questions from many members of the public. I have gathered these without regard to source or frequency, though I have already said above that the #1 concern is the "included but not limited to" clause under authorized uses and the #2 concern was the non-compliance with AB481's requirements for accountability, independent oversight, and consequences. Many of these concerns have been addressed in my redlines IF you accept them. I have highlighted these in *italicized* text. I have lightened the concerns my redlines have not addressed. I believe these latter questions and concerns all require answers and the ones involving Independent Oversight and use of the Complaint Form need to be done soon. Please be aware that more concerns may arise as more people learn of policy 709.

lacks the independent oversight required in AB481
lacks statements about what happens when a member of LAPD violates the policy
the policy does not identify where the buck stops in PD
there are lots of typos in the document
the "included, but not limited to" opens the door to all kinds of corner cases and loopholes
AB481 requires mechanisms for accountability and this policy has none
some cities commit to not use certain types of ME, like water cannons or weapons that launch explosive materials. Why don't we do this? If you are saying nothing is off the table, I cannot endorse this, even with your changes!
We all know Black and Brown individuals, People of Color, people with disabilities, and those who are experiencing a mental crisis are more likely to be subject to lethal and less lethal weapons as has been shown throughout history and continues today. This policy says nothing about protecting these populations from use of this equipment based on perceived or unperceived biases; a statement should be added acknowledging this discrepancy and implicit bias training must be implemented.
some listings in the inventory list are vague or seem incomplete, for example, AR15s are NOT the same rifle as an M4 rifle; why are they combined?
AB481 explicitly requires the City Council to make sure that the ME Use Policy meets certain requirements for content, transparency, oversight, accountability, and complaint submission, yet this policy is missing whole sections. You cannot approve this!
Why can't we use the Independent Intake Official (IIO) for complaints like we do with other Police Complaints?
Why doesn't this policy refer complainants to the online Complaint Form?
We need prohibited uses in this policy; aren't there certain things we just won't do?
the Purpose Statement seems incomplete. There is no overview of what this policy is supposed to do. This policy is more than an inventory list. It's supposed to provide transparency to the public and agency to the city council to give a hoot about the equipment our PD uses. That opening statement needs improvement.

this policy says nothing about who is liable when an officer damages property, injures a person, or kills a person unjustly (as proven by an investigation). Who is liable, the officer, the PD, the City, the taxpayers? This policy needs more detail in this regard.
I read the list of what's considered military equipment at AB481. The list in this 709 ME use policy is highly abridged. For example, I thought a tracked vehicle was a vehicle with embedded GPS and visual tracking technology, but reading AB481, a tracked vehicle is a tank! This whole list needs to be put in compliance with AB481.
AB481 specifically says that while the bill specifies the minimum provisions for our ME Use policy, this (and I quote) "does not preclude a county or local municipality from implementing additional requirements and standards related to the purchase, use, and reporting of military equipment by local law enforcement agencies." Why are we doing the bare minimum to protect our residents?
I was looking at other cities' ME policies and some require mutual aid providers or contractors to conform to the city's ME policy (invoking 7071 (f)), and some allow collaborators to use their own policies for use of ME when they come onto our turf. Our policy cites the latter. WHY do we do this?

PUBLIC CORRESPONDENCE

The following is public correspondence received by the City Clerk's Office after the posting of the original agenda. Individual contact information has been redacted for privacy. This may *not* be a comprehensive collection of the public correspondence, but staff makes its best effort to include all correspondence received to date.

To send correspondence to the City Council, on matters listed on the agenda please email PublicComment@losaltosca.gov

Subject: PUBLIC COMMENT AGENDA ITEM #12 6/14/2022
Date: Monday, June 13, 2022 12:01:45 PM
Attachments: 2022_04_22 City of Los Altos Policy Military Equipment DRAFT redline V.1.pdf

---

City Council, City Staff, Los Altos PD,

I cannot support Policy 709 as written. It is missing key elements of AB481 (most notably the requirement for accountability and consequences) and the vocabulary used doesn't properly constrain authorized uses of ME in our city.
I am available to discuss the rationale behind each and every edit or suggestion.
Please see attached redline,

Jeanine Valadez
Disclosure: I am a PARC commissioner but am writing this as a member of the public.

Military Equipment

709.1 PURPOSE AND SCOPE

The purpose of this policy is to provide guidelines for the approval, acquisition, and reporting requirements of military equipment (Government Code § 7070; Government Code § 7071; Government Code § 7072).

709.1.1 DEFINITIONS

Definitions related to this policy include (Government Code § 7070):

Governing body – The elected or appointed body that oversees the Department (for Los Altos, this is the City Council).

Military equipment – Includes but is not limited to the following:

- Unmanned, remotely piloted, powered aerial or ground vehicles.
- Mine-resistant ambush-protected (MRAP) vehicles or armored personnel carriers.
- High mobility multipurpose wheeled vehicles (HMMWV), two-and-one-half-ton trucks, five-ton trucks, or wheeled vehicles that have a breaching or entry apparatus attached.
- Tracked armored vehicles that provide ballistic protection to their occupants and utilize a tracked system instead of wheels for forward motion.
- Command and control vehicles that are either built or modified to facilitate the operational control and direction of public safety units.
- Weaponized aircraft, vessels, or vehicles of any kind.
- Battering rams, slugs, and breaching apparatuses that are explosive in nature. This does not include items designed to remove a lock, or a handheld, one-person ram.
- Firearms and ammunition of .50 caliber or greater, excluding standard-issue shotguns and standard-issue shotgun ammunition.
- Specialized firearms and ammunition of less than .50 caliber, including firearms and accessories identified as assault weapons in Penal Code § 30510 and Penal Code § 30515, with the exception of standard-issue firearms and ammunition of less than .50 caliber.
- Any firearm or firearm accessory that is designed to launch explosive projectiles.
- Noise-flash diversionary devices and explosive breaching tools.
- Munitions containing tear gas or OC (Oleoresin capsicum), excluding standard, service-issued handheld pepper spray.
- TASER® Shockwave, microwave weapons, water cannons, and long-range acoustic devices (LRADs).
- Kinetic energy weapons and munitions, including lethal and less-lethal implementations.
- Any other equipment as determined by a governing body or a state agency to require additional oversight.

709.2 POLICY

It is the policy of the Los Altos Police Department that members of this department comply with the provisions of Government Code § 7071 with respect to military equipment.

709.3 MILITARY EQUIPMENT COORDINATOR

The Chief of Police should designate a member of this department to act as the military equipment coordinator. The responsibilities of the military equipment coordinator include but are not limited to:

(a) Acting as liaison to the governing body for matters related to the requirements of this policy.

(b) Identifying department equipment that qualifies as military equipment in the current possession of the Department, or the equipment the Department intends to acquire that requires approval by the governing body.

(c) Conducting an inventory of all military equipment at least annually.

(d) Collaborating with any allied agency that may use military equipment within the jurisdiction of Los Altos Police Department (Government Code § 7071).

(e) Preparing for, scheduling, and coordinating the annual community engagement meeting to include:

1. Publicizing the details of the meeting.
2. Preparing for public questions regarding the department's funding, acquisition, and use of equipment.

(f) Preparing the annual military equipment report for submission to the Chief of Police and ensuring that the report is made available on the department website (Government Code § 7072).

(g) Establishing the procedure for a person to register a complaint or concern, or how that person may submit any questions about the use of a type of military equipment, including, but not limited to results of past tests conducted to verify efficacy of military equipment owned by Department, and how the Department will respond in a timely manner.

709.4 MILITARY EQUIPMENT INVENTORY

The following constitutes a list and description of qualifying equipment for the Department:

1. **40 MM Launchers and Rounds:** 40mm Launchers are utilized by department personnel as a less lethal tool to launch impact rounds.

   (a) Description, quantity, capabilities, and purchase cost

      i. PENN ARMS GL-140-C, 40MM SINGLE SHOT LAUNCHER, cost: $1,000, quantity: 3. The 40mm Single Launcher is a tactical single shot launcher that features a collapsible stock. It will fire standard 40mm less lethal ammunition, up to 6.0 inches in cartridge length. 40mm launchers are capable of firing a variety of munitions with a maximum effective range of one hundred twenty (120) feet.

      ii. SAGE CONTROL ORDINANCES INC K041 STANDARD ENERGY

lethal 40mm impact baton projectile fired from a single 40mm grenade launcher with a rifled barrel at 51-72 MPS (meters per second). The projectile provides accurate and effective performance when fired from the recommended firing distances of not less than 10 feet and no greater than 75 feet. [Note: many agencies now use K08 SST (Super Soft Tip) projectiles instead of this version]

(b) Purpose: To limit the escalation of conflict where employment of lethal force is prohibited or undesirable.

(c) Authorized Use: Situations for use of the less lethal weapon systems may include, but are not limited to the following; however, other situations not listed here may also be deemed authorized use cases under applicable penal codes and case law, and, in general shall reflect necessary, reasonable, and proportional use of less lethal weapon systems:

i. The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.

ii. The suspect has made credible threats to harm him/herself or others.

iii. The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers.

iv. There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.

(d) Training: All personnel who are authorized to carry a control device must be properly trained and certified to carry the specific control device and are retrained or re-certified as necessary. Proficiency training shall be monitored and documented by a certified, control-device weapons or tactics instructor.

(e) Lifespan:

i. Penn Arms GL-140-C- No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear

ii. K041 Standard Energy Impact Batons-5 years

(f) Fiscal Impact: Annual maintenance is approximately $100 for each launcher.

(g) Legal and Procedural Rules: Use of the 40mm launcher and 40mm baton rounds are subject to the requirements of Policy 300 (USE OF FORCE), 308 (CONTROL DEVICES AND TECHNIQUES), 308.9 (KINETIC ENERGY PROJECTILE GUIDELINES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize the 40mm only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

2. **Less Lethal Shotgun and Rounds**: Less Lethal Shotgun is used to deploy the less lethal 12-gauge Super-Sock Beanbag Round.

(a) Description, quantity, capabilities, and purchase cost

i. REMINGTON 870 LESS LETHAL SHOTGUN, cost: $950, quantity: 11. The Remington 870 Less Lethal Shotgun is used to deploy the less lethal 12-gauge Super-Sock Beanbag Round up to a distance of 75 feet. The

Published with permission by Los Altos Police Department

deescalation. The less lethal 12- gauge shotgun is distinguishable by an orange butt stock and fore grip.

ii. 12-GAUGE SUPER-SOCK BEANBAG ROUND 2581, cost: $6, quantity: 90. A less lethal 2.4-inch 12-gauge shotgun round firing a ballistic fiber bag filled with 40 grams of lead shot at a velocity of 270-290 feet per second (FPS). CTS (Combined Tactical Systems) Super-Sock rounds are discharged from a dedicated 12- gauge shotgun that is distinguishable by an orange butt stock and fore grip. This round provides accurate and effective performance when fired from the approved distance of not fewer than five (5) feet. The maximum effective range of this munition is up to 75 feet from the target. The Model 2581 Super-Sock is in its deployed state immediately upon exiting the barrel. It does not require a minimum range to "unfold" or "stabilize." The Super-Sock is an aerodynamic projectile. However, accuracy is relative to the shotgun, barrel length, environmental conditions, and the operator. The Super-Sock is very accurate. However, effectiveness depends on many variables, such as distance, clothing, stature, and the point where the projectile impacts.

(b) Purpose: To limit the escalation of conflict where employment of lethal force is prohibited or undesirable.

(c) Authorized Use - Situations for use of the less lethal weapon systems may include, but are not limited to the following; however, other situations not listed here may also be deemed authorized use cases under applicable penal codes and case law, and , in general shall reflect necessary, reasonable, and proportional use of less-lethal weapon systems:

i. The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.

ii. The suspect has made credible threats to harm him/herself or others.

iii. The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers.

iv. There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.

(d) Lifespan:

i. Remington 970 Less Lethal Shotgun-25 years

ii. Super Sock Round Model 2581: No listed expiration date

(e) Training: All personnel who are authorized to carry a control device must be properly trained and certified to carry the specific control device and are retrained or re-certified as necessary. Proficiency training shall be monitored and documented by a certified, control-device weapons or tactics instructor.

(f) Fiscal Impact: Annual maintenance is approximately $100 per shotgun.

(g) Legal and Procedural Rules: Use of the less lethal shotgun and Super Sock rounds are subject to the requirements of Policy 300 (USE OF FORCE), 308 (CONTROL DEVICES AND TECHNIQUES), 308.9 (KINETIC ENERGY PROJECTILE GUIDELINES), and Policy 312 (FIREARMS). It is the policy of

DRAFT

the Los Altos Police Department to utilize the less lethal shotgun only for official

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

3. **5.56mm Semi-Automatic Rifles and Ammunition:** The Colt AR-15/M4 5.56 mm/.223 semiautomatic rifles are used for both patrol and the SWAT Team.

   (a) Description, quantity, capabilities, and purchase cost

      i. COLT AR/M4 RIFLES, cost: $1200, quantity: 27. These rifles, equipped and locked in each patrol car or police motorcycle, offer a higher degree of accuracy at a longer distance. The ammunition used in rifles are also more effective at penetrating body armor (as some suspects have worn during high-profile shooting events in the country). They are normally kept secured in patrol cars or in the Police station and are only deployed on specific incidents where officers believe guns or weapons are involved.[Question: This listing is vague. Do we actually include both AR15 (semi-auto) and M4 (burst and fully auto) rifles in our inventory? Or is the use of the descriptor "AR-15/M4" being used as a generic term and we actually only stock semi-auto rifles? It would be better to itemize what kinds of rifles we actually have because they have different capabilities, barrel lengths (and therefore different targeting-efficacy metrics and close-quarters suitability), and costs. Clarification is needed here.]

      ii. .223 CALIBER or 5.56MM RIFLE AMMUNITION, cost: $280 per case of 500 rounds, quantity: 10,800 rounds. This rifle ammunition used in conjunction with an AR-15 type rifle provides officers the ability to engage hostile suspects at distances generally greater than the effective distance of their handguns. Rifle ammunition fired from AR-15 rifles offer advantages over handguns, such as increased accuracy potential and the ability to defeat soft body armor but are not appropriate for every situation.

   (b) Purpose: To be used as precision weapon to address a threat with more precision and/or greater distances than a handgun, if present and feasible.

   (c) Authorized Use - Members may deploy the patrol rifle in any circumstance where the member can articulate a reasonable expectation that the rifle may be needed. Situations for use of ~~the less~~ this lethal weapon system~~s~~ may include, but are not limited to the following; however, other situations not listed here may also be deemed authorized use cases under applicable penal codes and case law, and, in general, shall reflect necessary, reasonable, and proportional use of lethal weapon systems:

      i. Situations where the member reasonably anticipates an armed encounter.

      ii. When a member is faced with a situation that may require accurate and effective fire at long range.

      iii. Situations where a member reasonably expects the need to meet or exceed a suspect's firepower.

      iv. When a member reasonably believes that there may be a need to fire on a barricaded person or a person with a hostage.

      v. When a member reasonably believes that a suspect may be wearing body armor.

Published with permission by Los Altos Police Department

vi. When authorized or requested by a supervisor.

vii. When needed to euthanize an animal.

(d) Lifespan:

i. Colt AR/M4 Rifles: Approximately 15-20 years

ii. 223 Caliber or 5.56mm rifle ammunition: No expiration

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

(e) Training: Officers must successfully complete a 24-hour patrol rifle course as well as regular Department firearms training and qualifications as required by law and policy. Firearm Instructors attend a 40-hour POST-~~approved~~ certified rifle instructor class, and SWAT personnel must attend an 80-hour basic SWAT Team course. (POST is the Peace Officer Standards and Training Council; SWAT is Special Weapons and Tactics.)

(f) Fiscal Impact: Annual maintenance is approximately $100 per rifle.

(g) Legal and Procedural Rules: Use of the patrol rifles and ammunition are subject to the requirements of Policy 300 (USE OF FORCE), Policy 312.3.2 (PATROL RIFLES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize rifles only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

4. .**308 Caliber Remington 700 and Heckler & Koch HK-91 Sniper Rifles and Ammunition:** The sniper rifles are capable of firing a .308 caliber bullet. This rifle may only be used by a SWAT Officer trained and certified to be a sniper (LAPD currently has two such officers) and may be deployed to assist the SWAT Team in a critical incident or emergency.

(a) Description, quantity, capabilities, and purchase cost

i. .308 CALIBER REMINGTON 700 AND 700 LTR RIFLES, cost: $1,000, quantity: 2. Remington 700: No cost, surveyed, Remington 700LTR
$1,000.

ii. .308 CALIBER HECKLER & KOCH HK-91 RIFLE, cost: No cost, surveyed, ~~,~~ quantity: 1.

iii. .308 AMMUNITION, cost: $1.50 per round, quantity: ~~3,040~~ 3,040 rounds. These nickel-plated bonded soft-point 308/7.62 cartridges from Speer Gold-Dot are resistant to corrosion, capable of expansion from barrels as short as 10", and retain accuracy from a variety of barrels lengths.

(b) Purpose: This rifle may only be used by a SWAT Officer trained and certified to be a sniper and may be deployed to assist the SWAT Team in a critical incident or emergency. The main use of this lethal weapons system is for observation of an incident and to be able to accurately and immediately be able to stop a threat to life.

(c) Authorized Use: Examples of situations for deploying the sniper rifle may include, but are not limited to the following; however, other situations not listed here may also be deemed authorized use cases under applicable penal codes and case law, and, in general, shall reflect necessary, reasonable, and proportional use of lethal weapon systems:

i. where the Officer reasonably anticipates an armed encounter;

ii. when the Officer is faced with a situation that may require accurate and effective fire at a long distance;

iii. where an Officer reasonably expects the need to meet or exceed the

v. when an Officer reasonably believes that a suspect may be wearing body armor.

(d) Lifespan:

i. .308 Caliber Remington 700/700LTR: Approximately 15 years

ii. .308 Caliber Heckler & Koch HK-91: Approximately 15 years

iii. .308 Ammunition: No expiration

(e) Training: In addition to patrol rifle and standard SWAT operator training, SWAT snipers must successfully complete a California POST-certified sniper course as well as regular SWAT sniper training and qualifications as required by law and policy.

(f) Fiscal Impact: Annual maintenance is approximately $100 per Remington rifle. The HK is not used.

(g) Legal and Procedural Rules: Use of the sniper rifles and ammunition are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos, Policy 300 (USE OF FORCE), Policy 312.3.2 (PATROL RIFLES), Policy 312 (FIREARMS), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the Los Altos Police Department to utilize rifles only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

5. **Benelli M3Super90 12 gauge shotgun and ammunition: This firearm is not currently used by the department and is stored in the armory.** The Benelli M3 is a dual-mode (hybrid pump-action and semi-automatic) shotgun The ammunition for the shotgun is 00 Buck and slug rounds.

(a) Description, quantity, capabilities, and purchase cost

i. BENELLI M3SUPER90 12 GAUGE SHOTGUN, cost $500, quantity: 1. The Benelli M3 is a combination Pump-Action and Semi-Automatic Shotgun. The shotgun can be chambered for 12 GA shells with a 20 inch barrel.

ii. 00 BUCK AMMUNITION, cost: $1.80 per round, quantity: 600 rounds. A typical 12-gauge, 2 ¾-inch 00 Buckshot shell holds 8 pellets that are 0.33" in diameter. A 3-inch shell most often contains 12 of these same sized pellets.

iii. SLUG AMMUNITION, cost: $1.40 per round, quantity: 100. The Foster-type shotgun slug features exterior rifled grooves which contact the shotgun's bore to give it spin; and, the slug's hollow-point design initiates expansion to augment stopping power.

(b) Purpose: This shotgun is not currently utilized by the department. The only shotguns used by the Department are the less lethal shotguns. The ammunition is purchased solely for recruits in the police academy, where shotgun instruction occurs.

DRAFT

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

(c) Authorized Use: There is currently no authorized use for the shotgun in our policy.

(d) Lifespan:

i. Benelli M3Super90 12 gauge shotgun: Approximately 15 years

ii. OO Buck Ammunition: No expiration

iii. Slug ammunition: No expiration

(e) Training: Officers receive training in shotgun use in the police academy, and have to pass firearm qualifications. There is no further training with the Benelli shotgun or ammunition.

(f) Fiscal Impact: None, the weapon is not utilized.

(g) Legal and Procedural Rules: Use of all firearms fall under the following policies: Policy 300 (USE OF FORCE) and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize firearms only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

6. **Remington 870 MCS 12 Gauge Breaching shotgun and breaching rounds: This firearm/ammunition is not currently used by the department and is stored in the SWAT armory.**

(a) Description, quantity, capabilities, and purchase cost

i. REMINGTON 870 MCS 12 GAUGE BREACHING SHOTGUN, cost: $1,400, quantity: 1. Extremely compact breaching model 12 gauge with a ten inch cylinder bore breaching barrel with parkerized finish, a Knoxx recoil reducing breacher pistol grip stock, and synthetic modular fore-end.

ii. 12 GAUGE BREACHING ROUNDS, cost: $5.00 per round, quantity: 25 rounds. The 12-Gauge TKO Breaching Round is a 12-Gauge shell loaded with a compressed zinc slug, utilizing smokeless powder as a propellant. The is a widely used method to breach door locks or hinges for entry during tactical operations.

(b) Purpose: The breaching shotgun is used to safely gain entry into a structure. When properly deployed, the TKO breaching round is capable of defeating door lock mechanisms, door knobs, hinges, dead bolts, safety chains, and pad locks on both wooden or hollow core doors. Upon impact with the target, the zinc slug disintegrates in to a fine powder eliminating fragmentation. The Explosive Breaching Program, conducted in conjunction with the Mountain View Police Department, was established to provide the joint SWAT Team the ability to quickly create an opening in a wall or window to quickly enter a building for an emergency rescue of hostages. It is reserved for rescue operations only.

(c) Authorized Use: This equipment would only be deployed during a SWAT incident, and its use would need specific authorization from the Incident Commander. The equipment may only be used by a "tactical breacher" on the SWAT team. We currently do not have any authorized users at the Department.

DRAFT

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

(d) Lifespan:

i. Remington 870 MCS 12 Gauge Breaching shotgun: Approximately 15 years

ii. 12-Gauge TKO Breaching Round: Approximately 5 years

(e) Training: The training consists of an 80-hour course for a member of the SWAT Team specifically designated as the "breacher." At the conclusion of the course, the breacher must pass a test proctored by CAL/OSHA. The OSHA certification is valid for 5 years. Before the expiration of the certification, the breacher must retake and pass the test.

(f) Fiscal Impact: None, the weapon is not utilized.

(g) Legal and Procedural Rules: Use of the breaching shotgun and ammunition are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

7. **Kaiser Precision Vulcan II Munitions Pole: Telescoping tool utilized by SWAT personnel to safely deliver approved noise/diversionary devices. [This product does not come up in any Google or manufacturer's searches. I think I found its patent, though). Is it obsolete? Lots of court cases and settlements in favor of complainants who suffered injuries as a result of burns and impact by flash-bang deployment using poles similar to this one.]**

(a) Description, quantity, capabilities, and purchase cost

i. KAISER PRECISION VULCAN II MUNITIONS POLE, cost: $2,000, quantity: 1. The –munitions pole is a multi-purpose breaching tool, constructed of lightweight aluminum square tubing used to deploy distraction devices and chemical munitions in order to gain entrance into a building, structure or even a vehicle.

(b) Purpose: The munitions pole is used to safely deploy diversionary devices, chemical munitions, or other objects (cell phones, cameras) during SWAT operations.

(c) Authorized Use: This equipment would be deployed during primarily during a SWAT incident, but could be utilized to gain entry into a residence during other high--risk operations on patrol.

(d) Lifespan: Approximately 10 years

(e) Training: Kaiser Precision provided an instructional video for individual and team training.

(f) Fiscal Impact: None, does not require annual maintenance

(g) Legal and Procedural Rules: Use of the munitions pole are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 317 (HIGH RISK OPERATIONS PROTOCOL), Policy 322 (SEARCH AND SEIZURE), and Policy 414

utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

8. **CTS Flash-bang Training Kit:** The training flash-bangs are built and weigh exactly the same as it's equivalent live Flash-Bang, but have no flash charge.

   (a) Description, quantity, capabilities, and purchase cost

      i. CTS FLASH-BANG TRAINING KIT, cost: $964, Quantity 1 kit (comes with 70 reload Training Fuzes, 1 body), current fuze inventory is 25. The training bodies are painted with a bright blue coating, and can be used an unlimited number of times. The M201FB fuze for this system has 10 times the output of a normal M201 fuze and it is threaded with a left hand thread so it can not be accidentally used in any other munitions. The training devices produce an output of about 120db.

   (b) Purpose: Flash-bangs are used to distract and temporarily immobilize dangerous suspects by overwhelming their senses of vision and hearing. The distraction gives Officers time to seize a moment and create an opportunity to take control of high-risk or dangerous situations.

   (c) Authorized Use: SWAT operators may utilize the training flash-bangs as a training tool to distract and temporarily immobilize dangerous suspects by overwhelming their senses of vision and hearing. Los Altos Police Department does not have any live flash-bangs in the inventory. Our operators use live flash-bangs while on SWAT events or at training with Mountain View Police Department.

   (d) Lifespan: 5 years

   (e) Training: These are a training tool. SWAT operators must attend and pass an 80-hour SWAT training class. Flash-bang training is provided by an instructor who has completed an 8-hour noise flash diversionary device course.

   (f) Legal and Procedural Rules: Use of the **live** flash-bangs are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 317 (HIGH RISK OPERATIONS PROTOCOL), Policy 322 (SEARCH AND SEIZURE), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

9. **Specialty Impact Munition (SIM) weapons and ammunition:** Simunition® is the pioneer and world leader in providing military, law enforcement and approved range members with the most realistic and non-lethal force-on-force, short range, simulation training system.

   (a) Description, quantity, capabilities, and purchase cost

      i. SIMUNITION GLOCK 17T, cost: $500 each, quantity: 8. The GLOCK Training Pistols were developed with the purpose of enabling reality-based tactical operations training using color marking or plastic projectile

DRAFT

Published with permission by Los Altos Police Department

ammunition. When utilized in a pistol caliber barrel training platform (9mm), SIMs have an effective range of 25 feet.

ii. SIM CONVERTED BERETTA 92, cost: $500 each, quantity: 4. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized in a pistol caliber barrel training platform (9mm), SIMs have an effective range of 25 feet.

iii. HK MP5 CONVERSION KITS, cost: $500 each, quantity 2. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized with a training munition bolt carrier group in a 5.56mm rifle platform, SIMs have an effective range of approximately 27 yards.

iv. SIMUNITION COLT AR-15 CARBINE RIFLE UPPERS, cost: $1,000 each, quantity: 3. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized with a training munition bolt carrier group in a 5.56mm rifle platform, SIMs have an effective range of approximately 27 yards.

v. FX MARKING CARTRIDGES, cost: $350 for 500 rounds, quantity: 3,500 rounds. The reduced-energy, non-lethal cartridges leave a detergent-based, water-soluble color-marking compound. The visible impacts allow accurate assessment of simulated lethality. They feature tactical accuracy up to 25 feet (7.6 meters).

(b) Purpose: Enabling reality-based, force-on-force tactical operations training using color marking or plastic projectile ammunition.

(c) Authorized Use: Simunition weapons and marking rounds are non-operational rounds and non-operational weapons systems. These munitions provide for realistic close quarters firearms training while allowing the shooter to visually assess shot placement and accuracy in force-on-force training scenarios. These items are used for training purposes for all sworn staff members.

(d) Lifespan:

i. Simunition Glock 17T: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

ii. Sim Converted Beretta: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

DRAFT

iii. HK MP5 Conversion Kits: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

iv. Simunition Colt AR-15 Rifle Uppers: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

v. FX Marking Cartridges: Shelf life five (5) years.

(e) Training: These are a training tool. Simunition Instructors attend an informative, three-day (24-hour) course designed to provide students with substantial hands-on experience with Simunition® FX® training ammunition technology, weapons conversion kits, and the Simunition® line of protective equipment. The course provides in-depth, hands-on instruction in scenario-based training program development and training methodology, and gives critical practical experience to students on the best use of Simunition® training products in a highly effective, realistic, extremely safe training program. Sworn staff members are given extensive firearms handling courses and weapons safety instruction to include the use of SIMs for training purposes.

(f) Legal and Procedural Rules: Use of the Simunition firearms and marking rounds are subject to the requirements of Policy 300 (USE OF FORCE) and Policy 312 (FIREARMS) while training. It is the policy of the Los Altos Police Department to utilize Simunition equipment only for official law enforcement training purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

DRAFT

709.5 APPROVAL

The Chief of Police or the authorized designee shall obtain approval from the governing body by way of an ordinance adopting the military equipment policy. As part of the approval process, the Chief of Police or the authorized designee shall ensure the proposed military equipment policy is submitted to the governing body and is available on the department website at least 30 days prior to any public hearing concerning the military equipment at issue (Government Code § 7071). The military equipment policy must be approved by the governing body ~~prior to~~before the Department engag~~es~~ing in any of the following (Government Code § 7071):

(a) Request~~s~~ing military equipment made available pursuant to 10 USC § 2576a.

(b) Seek~~s~~ing funds for military equipment, including but not limited to applying for a grant, soliciting or accepting private, local, state, or federal funds, in-kind donations, or other donations or transfers.

(c) Acquir~~es~~ing military equipment either permanently or temporarily, including by borrowing or leasing.

(d) Collaborat~~es~~ing with another law enforcement agency in the deployment or other use of military equipment within the jurisdiction of this department.

Copyright Lexipol, LLC 2022/04/22, All Rights Reserved.
Published with permission by Los Altos Police Department

(e) Us~~ing~~es any new or existing military equipment for a purpose, in a manner, or by a person not previously approved by the governing body.

(f) Solicit~~ing~~es or respond~~ing~~s to a proposal for, or enter~~ing~~es into an agreement with, any other person or entity to seek funds for, apply to receive, acquire, use, or collaborate in the use of military equipment.

(g) Acquir~~ing~~es military equipment through any means not provided above.

The governing body shall approve the military equipment use policy in accordance with the scope of assessment described in AB 481: Subsection 7071 (1), Sec 2, Para 2, subpara A-D. Should the governing body at any review cycle fail to approve the military equipment use policy within 180 days of the commencement of said review cycle, the use of military equipment shall cease by the Department until that time that the governing body approves a military equipment policy.

709.6 COORDINATION WITH OTHER JURISDICTIONS

Military equipment used by other law enforcement agencies that are providing mutual aid to this jurisdiction or otherwise engaged in law enforcement operations within this jurisdiction shall comply with their respective military equipment policies in rendering mutual aid.

709.7 ANNUAL REPORT

Upon approval of a military equipment policy, the Chief of Police or the authorized designee should submit a military equipment report to the governing body for each type of military equipment approved within one year of approval, and annually thereafter for as long as the military equipment is available for use (Government Code § 7072).

The Chief of Police or the authorized designee should also make each annual military equipment report publicly available on the department website for as long as the military equipment is available for use. The report shall include all information required by Government Code § 7072 for the preceding calendar year for each type of military equipment in department inventory.

709.8 COMMUNITY ENGAGEMENT

Within 30 days of submitting and publicly releasing the annual report, the Department shall hold at least one well-publicized and conveniently located community engagement meeting, at which the Department should discuss the report and respond to public questions regarding the funding, acquisition, or use of military equipment.

Pursuant to California Government Code 7070(d)(7), members of the public may register complaints or concerns or submit questions about the use of each specific type of listed equipment in this policy by any of the following means:

(a) Via email to: policefeedback@losaltosca.gov

(b) Via phone call to~~-~~: 650-947-2672

(c) Via mail sent to:

Subject: PUBLIC COMMENT AGENDA ITEM 12 - JUNE 12 2022
Date: Monday, June 13, 2022 3:09:39 PM

To Mayor, Vice-Mayor, and CouncilmembersI do not support the approval of our draft Military Equipment Use policy as is. The policy as proposed does not safeguard the public's welfare, safety, civil rights, and civil liberties, so it should not be approved. The policy leaves too many loopholes for the usage of military equipment in any capacity. I want to see prohibited use cases for each piece of military equipment so that we can minimize injuries and fatalities in our community.Thank you for your consideration of this matter.Sincerely

Dear Mayor, Vice-Mayor, and Councilmembers,

I do not support the approval of the current draft of the Military Equipment Use policy. It does not sufficiently safeguard the public's welfare, safety, civil rights, and civil liberties, so should not be approved. The policy leaves too many loopholes for the usage of military equipment in any capacity. I want to see prohibited use cases for each piece of military equipment so that we can minimize injuries and fatalities in our community and best protect public safety.

Thank you for your consideration of this matter.

Best,
Anne Rogaski

Subject: Fwd: Military Equipment Use Policy
Date: Tuesday, June 14, 2022 2:23:14 PM

Dear Mayor, Vice-Mayor & City Council Members,

The LAPD has submitted its Military Equipment Use Policy for review and vote by City Council. As per CA Govt. Code 7071, City Council can only approve this policy if it meets all four of these requirements:

(A) The military equipment is necessary because there is no reasonable alternative that can achieve the same objective of officer and civilian safety.
(B) The proposed military equipment use policy will safeguard the public's welfare, safety, civil rights, and civil liberties.
(C) If purchasing the equipment, the equipment is reasonably cost effective compared to available alternatives that can achieve the same objective of officer and civilian safety.
(D) Prior military equipment use complied with the military equipment use policy that was in effect at the time, or if prior uses did not comply with the accompanying military equipment use policy, corrective action has been taken to remedy nonconforming uses and ensure future compliance.

LARE does not feel that this proposal meets requirement B. Below we outline the issues and our proposed changes to safeguard the safety and civil rights of Los Altans. We would be happy to chat about our proposal and go over any questions you may have.

Renee Rashid
On behalf of LARE.

GOVERNING BODY

Current:
709.1.1: Los Altos City Council should be explicitly defined as the governing body so there is no confusion.

Proposed Change:
709.1.1 - Governing body - **The Los Altos City Council which oversees the department**.

MILITARY EQUIPMENT
Current:
The definitions of military equipment used in this policy do not match the definitions in AB 481. We believe they should match.

Proposed Change:
The offending definitions along with the corrections to make it match AB 481 are below.

- Tracked armored vehicles that provide ballistic protection to their occupants **and utilize a tracked system instead of wheels for forward motion.**
- Battering rams, slugs, and breaching apparatuses that are explosive in nature. This does not include items **designed to remove a lock, or** a handheld, one-person ram.
- Specialized firearms and ammunition of less than .50 caliber, including firearms and accessories identified as assault weapons in Penal Code § 30510 and Penal Code § 30515, with the exception of standard-issue firearms **and ammunition of less than .50 caliber.**
- Munitions containing tear gas or OC (**Oleoresin capsicum**), excluding standard, service-issued handheld pepper spray.
- Kinetic energy weapons and munitions, **including lethal and less-lethal implementations.**

VIOLATIONS OF POLICY

Current:

709.2: There is no indication of who can investigate violations of this policy and repercussions for violations found. Los Altans should have a route for private right of action for violations on the usage of military equipment by the Police Department.

Proposed Change: 709.2 could be modified in the following way, or a new section - 709.9 - could be created for COMPLIANCE AND ACCOUNTABILITY, which is what 7070 (d)(6) requires. (We would prefer a new section be created, but sample wording/accountability is below)

709.2 - It is the policy of the Los Altos Police Department that members of this department comply with the provisions of Government Code § 7071 with respect to military equipment. **Any violations can be investigated by the Los Altos IIO and be brought to the City Council. The City Council may vote on sanctions for violations. If the Los Altos Police Department or its individual officers violate this policy, they shall be liable for actual damages resulting from military equipment used against individuals.**

AUTHORIZED USE OF EQUIPMENT

Current:

Each of the military equipment items listed in the PD inventory must have an authorized use. In fact, every one of our authorized use cases uses the language “may include, but not limited to”. This seemingly authorizes ALL use cases without limitation. However, the use of lethal and non-lethal weapons has limitations in the CA penal code, which is not evident here. We are still digging in to whether there are loopholes in state law that we feel should be addressed here through prohibited use cases to strengthen accountability, but at the very least, we should state more explicitly that we rely on state laws and penal code.

Proposed Change:

Each of authorized use cases should have verbiage like this that refer to our state code.

"Examples of situations for deploying the <equipment> may
include, but are not limited to the following; however, other situations not listed
here may also be deemed authorized or unauthorized use cases under applicable penal codes
and case law, and, in general, shall reflect necessary, reasonable, and
proportional use of <lethal or non/lethal> weapon systems"

Thank you for your consideration,

Renee Rashid
on behalf of Los Altos for Racial Equity

Assembly Bill (AB) 481: Military Equipment Funding, Acquisition and Use

Chief Angela Averiett

Captain Katie Krauss

Why AB 481

On September 30, 2021 – Gov. Newsom signed eight police reform bills, including AB 481

AB 481 does the following:

- Increases transparency, accountability, oversight for acquisition and use of equipment
- Provides safeguards to protect public's welfare, safety, civil rights and liberties
- Creates public forum for input and engagement

AB 481 Requirements

- Governing Body approval of a Policy and Ordinance for continued use of items purchased prior to January 1, 2022
- It also requires an annual report; LAPD's first annual report is planned for January 2023
- Annual Report to include:
  - How equipment is being used
  - Maintenance and use costs
  - Internal audits
  - Community feedback on use
- AB 481 requires approval for the acquisition of funds associated with purchase of new equipment
- Establish a concern or complaint process. LAPD has established processes for the public to submit commendations, questions, concerns and complaints online, over the phone, or in person to LAPD staff or the Independent Intake Official

Community Engagement Activities

- April 28, 2022 – Meeting notice on Los Altos Police Department website, City Manager Weekly Update and social media
  - Full text of AB 481
  - AB 481 defined list of military equipment currently in Los Altos Police Department possession
  - Los Altos Police Department summary of AB 481
  - Draft Lexipol Policy 709
- May 12, 2022 – Community Meeting to Discuss AB 481 and Draft Policy 709
- May-September—Reviewed public comments from Council meetings and met with community members to get additional feedback/input
- September 20, 2022--Present to City Council to gain approval and recommendations

Los Altos PD's Equipment Inventory

Equipment Category	Item(s)	Funding Source for Acquisition
7	Breaching Equipment (Breaching Shotgun)	Grant, Asset Forfeiture or General Fund
10	Specialized firearms and ammunition of less than .50 caliber (Rifles, ammunition)	Grant, Asset Forfeiture or General Fund
11	Any firearm or firearm accessory that is designed to launch explosive projectiles (Simunition firearms, ammunition)	Grant, Asset Forfeiture or General Fund
12	Flashbang grenades and explosive breaching tools (Training flashbang devices, munitions pole)	Grant, Asset Forfeiture or General Fund
14	Kinetic energy weapons and munitions (40mm less lethal platform, less lethal shotgun, less lethal rounds)	Grant, Asset Forfeiture or General Fund

Recommendation

- Introduce an Ordinance Approving a Military Equipment Funding, Acquisition and Use Policy Pursuant to Assembly Bill 481

PUBLIC CORRESPONDENCE

The following is public correspondence received by the City Clerk's Office after the posting of the original agenda. Individual contact information has been redacted for privacy. This may *not* be a comprehensive collection of the public correspondence, but staff makes its best effort to include all correspondence received to date.

To send correspondence to the City Council, on matters listed on the agenda please email PublicComment@losaltosca.gov

From: Los Altos Racial Equity
To: Angela Averiett; Kathryn Krauss; Jolie Houston; Public Comment
Subject: PUBLIC COMMENT AGENDA ITEM #11 - 9/20/22
Date: Tuesday, September 20, 2022 12:37:56 PM

To Mayor Enander, Vice-Mayor Meadows, Councilmembers, Attorney Jolie, Chief Averiett & Capt. Krauss

Los Altos for Racial Equity (LARE) has taken a look at the new draft of the Los Altos Military Equipment Use Policy (MEUP). We want to thank City Council for allowing additional time to work on this important document. We also want to thank and recognize Chief Averiett & the PD (especially Capt. Krauss) for spending many hours taking our feedback into account and

- Adding City Council as the governing body
- Correcting and expanding definitions
- Citing appropriate code and providing further explanations
- Adding the phrase “necessary, reasonable, and proportional use” for authorized use cases to further guide the usage of military equipment
- Adding a section on compliance

We feel that these additions will greatly improve transparency for this policy.

However, there is one significant deviation in our policy from what is required by AB 481, which states:

§7070(d)(6): The mechanisms to ensure compliance with the military equipment use policy, including which ***independent persons or entities*** have oversight authority, and if applicable, what legally enforceable sanctions are put in place for violations of the policy.

As we understand it, our draft policy in 709.8 gives oversight authority - meaning the authority to conduct an investigation into misuse/misconduct - to the Chief of Police, which clearly is not an independent person or entity. Without an interpretation from Counsel, it seems that our policy as drafted could be in danger of being out-of-compliance with the law. While we do not doubt Chief Averiett’s character or integrity, assigning oversight to the Police Chief leads to an obvious conflict-of-interest that undermines accountability and transparency.

We are instead pushing for independent oversight, which we do not currently have (the Independent Intake Official has no oversight role, merely intake). However, we want to ensure accountability, transparency, and compliance with state law, and we feel that the time is right to come up with a solution that can provide this important function. We did see the inclusion of “Formal complaints regarding alleged violations of this policy will be handled by an independent investigator” in 709.8. If this is truly the method in which investigations will be conducted, we applaud this inclusion, but then this statement needs to be followed with more detail on who this person or entity would be, how & when the investigation would be launched, conducted and concluded, and who would have ultimate authority on handing consequences. We look forward to further clarification.

Thank you for your thoughtful attention to this matter,

Renee Rashid, Toni Moos & Tanya Maluf
On behalf of Los Altos for Racial Equity

Subject: PUBLIC COMMENT AGENDA ITEM #11 9/20/2022
Date: Tuesday, September 20, 2022 2:00:07 PM
Attachments: 2022_09_07 Military Equipment Use Policy 709 Los Altos PD bluelines JAV EDITS V1.pdf

Honorable City Council, City Manager, City Attorney, and Asst. City Clerk,

Please see attached for my public comment on the most recent draft of MEUP 709.

Jeanine Valadez
I am a PARC commissioner but am speaking as a member of the public.

Military Equipment

709.1 PURPOSE AND SCOPE

The purpose of this policy is to provide guidelines for the approval, acquisition, and reporting requirements of military equipment (Government Code § 7070; Government Code § 7071; Government Code § 7072). Assembly Bill 481 (AB 481), signed into law on September 30, 2021, requires law enforcement agencies to create a policy establishing guidelines and requirements for the funding, acquisition, and use of "military equipment" (Government Code § 7070, 7071, and 7072), including requirements to host informational meetings with the public, generate annual "military equipment" use reports, and seek annual approval from their respective governing bodies. The purpose of this policy is to make sure that safeguards exist, including transparency, governing body and independent oversight, and accountability measures, to ensure the funding, acquisition, and use of "military equipment" is consistent with the provisions set forth by the governing body and as outlined in AB 481. This policy will also provide the public with a transparent view of the "military equipment" utilized by the Los Altos Police Department, as well as the criteria by which the governing body will assess and approve the funding, acquisition, and use of "military equipment" in this Department.

[Ed. note: In this edition, you removed my suggestion to include, within the scope of this policy, the assessment criteria the governing body (City Council) will use to approve the policy. By including these criteria in this policy, you not only enable enrichment of section 709.5 ("Approval"), but you inform the public of said criteria so that they may form their own assessment of whether or not the policy protects the public welfare as they observe their City Council render approval. In this light, I request incorporation of the above words and seek an explanation as to why Staff opposes their inclusion.]

709.1.1 DEFINITIONS

Definitions related to this policy include (Government Code § 7070):

Governing body – The Los Altos City Council, who will annually review this policy and approve, by ordinance, ~~for the adoption of this ordinance and the approval of~~ the annual report. ~~elected or appointed body that oversees the~~ .

POST - Peace Officer Standards and Training

SWAT - Special Weapons and Tactics

Military equipment – Per AB 481, military equipment ~~m~~eans the following: ~~i Includes but is not limited to the following:~~

(1) Unmanned, remotely piloted, powered aerial or ground vehicles.

(2) Mine-resistant ambush-protected (MRAP) vehicles or armored personnel carriers. However, police versions of standard consumer vehicles are specifically excluded from this subdivision.

(3) High mobility multipurpose wheeled vehicles (HMMWV), commonly referred to as Humvees, two and one-half-ton trucks, five-ton trucks, or wheeled vehicles that have a breaching or entry

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

apparatus attached. However, unarmored all-terrain vehicles (ATVs) and motorized dirt bikes are specifically excluded from this subdivision.

(4) Tracked armored vehicles that provide ballistic protection to their occupants and utilize a tracked system instead of wheels for forward motion.

(5) Command and control vehicles that are either built or modified to facilitate the operational control and direction of public safety units.

(6) Weaponized aircraft, vessels, or vehicles of any kind.

Published with permission by Los Altos Police Department

(7) Battering rams, slugs, and breaching apparatuses that are explosive in nature. However, items designed to remove a lock, such as bolt cutters, or a handheld ram designed to be operated by one person, are specifically excluded from this subdivision.

(8) Firearms of.50 caliber or greater. However, standard issue shotguns are specifically excluded from this subdivision.

(9) Ammunition of.50 caliber or greater. However, standard issue shotgun ammunition is specifically excluded from this subdivision.

(10) Specialized firearms and ammunition of less than.50 caliber, including assault weapons as defined in Sections 30510 and 30515 of the Penal Code, with the exception of standard issue service weapons and ammunition of less than.50 caliber that are issued to officers, agents, or employees of a law enforcement agency or a state agency.

(11) Any firearm or firearm accessory that is designed to launch explosive projectiles.

(12) "Flashbang" grenades and explosive breaching tools, "tear gas," and "pepper balls," excluding standard, service-issued handheld pepper spray.

(13) Taser Shockwave, microwave weapons, water cannons, and the Long Range Acoustic Device (LRAD).

(14) The following projectile launch platforms and their associated munitions: 40mm projectile launchers, "bean bag," rubber bullet, and specialty impact munition (SIM) weapons.

(15) Any other equipment as determined by a governing body or a state agency to require additional oversight.

(16) Not withstanding paragraphs (1) through (15), "military equipment" does not include general equipment not designated as prohibited or controlled by the federal Defense Logistics Agency.

~~Unmanned, remotely piloted, powered aerial or ground vehicles.~~

- ~~Mine resistant ambush protected (MRAP) vehicles or armored personnel carriers.~~
- ~~High mobility multipurpose wheeled vehicles (HMMWV), two and one half ton trucks, five ton trucks, or wheeled vehicles that have a breaching or entry apparatus attached.~~
- ~~Tracked armored vehicles that provide ballistic protection to their occupants.~~
- ~~Command and control vehicles that are either built or modified to facilitate the operational control and direction of public safety units.~~
- ~~Weaponized aircraft, vessels, or vehicles of any kind.~~
- ~~Battering rams, slugs, and breaching apparatuses that are explosive in nature. This does not include a handheld, one person ram.~~
- ~~Firearms and ammunition of .50 caliber or greater, excluding standard issue shotguns and standard issue shotgun ammunition.~~

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

- ~~Specialized firearms and ammunition of less than – .50 caliber, including firearms and accessories identified as assault weapons in Penal Code § 30510 and Penal Code § 30515, with the exception of standard issue firearms.~~
- ~~Any firearm or firearm accessory that is designed to launch explosive projectiles.~~
- ~~Noise flash diversionary devices and explosive breaching tools.~~
- ~~Munitions containing tear gas or OC, excluding standard, service issued handheld pepper spray.~~
- ~~TASER® Shockwave, microwave weapons, water cannons, and long-range acoustic devices (LRADs).~~
- ~~Kinetic energy weapons and munitions.~~
- ~~Any other equipment as determined by a governing body or a state agency to require additional oversight.~~

709.2 POLICY

It is the policy of the Los Altos Police Department that members of the department comply with the provisions of Government Code § 7071 with respect to qualifying "military equipment". "Military equipment" shall be used by members of the Department who have completed applicable training, including training required by the Commission on Peace Officer Standards and Training (POST). See the Military Equipment Inventory List (section 709.4) for associated "military equipment" training requirements.

"Military equipment", which has been approved for use by the governing body, shall be used in accordance with all other applicable department policies and laws. These policies and laws include, but are not limited to:

- ~~•~~ Los Altos Police Department Policy 300 (Use of Force)
- Los Altos Police Department Policy 308 (Control Devices and Techniques) ~~It is the policy of the that members of this comply with the provisions of Government Code § 7071 with respect to military equipment.~~
- Los Altos Police Department Policy 312 (Firearms)
- Los Altos Police Department Policy 414 (Hostage and Barricade Incidents)
- California Assembly Bill No. 48 (Use of Kinetic Energy Projectiles and Chemical Agents-Assemblies, Protests, and Demonstrations)
- California Penal Code Section 13652 (Use of Kinetic Energy Projectiles and Chemical Agents)

This policy expressly prohibits the use of "military equipment" on individuals or groups solely based on actual or perceived characteristics, such as race, ethnicity, national origin, religion, sex, sexual orientation, gender identity or expression, economic status, age, cultural group, or disability.

709.3 MILITARY EQUIPMENT COORDINATOR

The Chief of Police should designate a member of this department to act as the military equipment coordinator. The responsibilities of the military equipment coordinator include but are not limited to:

(a) Acting as liaison to the governing body for matters related to the requirements of this policy.

(b) Identifying department equipment that qualifies as military equipment in the current possession of the Department, or the equipment the Department intends to acquire that requires approval by the governing body.

(c) Conducting an inventory of all military equipment at least annually.

(d) Collaborating with any allied agency that may use military equipment within the jurisdiction of Los Altos Police Department (Government Code § 7071).

(e) Preparing for, scheduling, and coordinating the annual community engagement meeting to include:

1. Publicizing the details of the meeting.
2. Preparing for public questions regarding the department's funding, acquisition, and use of equipment.

(f) Preparing the annual military equipment report for submission to the Chief of Police and ensuring that the report is made available on the department website (Government Code § 7072).

(g) Establishing the procedure for a person to register a complaint or concern, or how that person may submit any questions about the use of a type of military equipment, and how the Department will respond in a timely manner.

709.4 MILITARY EQUIPMENT INVENTORY

The following constitutes a list and description of qualifying equipment for the Department:

[Ed. Note: why did you change the itemization of equipment items from numerical to alphabetical? This creates a confusing hierarchy where letters are directly subordinate to letters. For example, 709.4(a)(a) points to “Description, quantity…”. Instead, either revert to using numerical assignments for each item of equipment, as in the original 709.4.1(a), or retain the alpha, but change the subordinate insets to numbers, for example, 709.4(a)(1) points to “Description, quantity…”]

(a) **40 MM Launchers and Rounds:** 40mm Launchers are utilized by department personnel as a less lethal tool to launch impact rounds.

(a) Description, quantity, capabilities, and purchase cost

i. PENN ARMS GL-140-C, 40MM SINGLE SHOT LAUNCHER, cost: $1,000, quantity: 3. The 40mm Single Launcher is a tactical single shot launcher that features a collapsible stock. It will fire standard 40mm less lethal ammunition, up to 6.0 inches in cartridge length. 40mm launchers are capable of firing a variety of munitions with a maximum effective range of one hundred twenty (120) feet.

ii. SAGE CONTROL ORDINANCES INC K041 STANDARD ENERGY IMPACT BATON PROJECTILE, cost: $21.00, quantity: 14. A less lethal 40mm impact baton projectile fired from a single 40mm grenade launcher

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

with a rifled barrel at 51-72 MPS (meters per second). The projectile provides accurate and effective performance when fired from the recommended firing distances of not less than 10 feet and no greater than 75 feet.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(b) Purpose: To limit the escalation of conflict where employment of lethal force is prohibited or undesirable.

(c) Authorized Use: Subject to subsection (g) below, s~~S~~ituations for use of the less lethal weapon systems may include, but are not limited to the following: ~~however, other situations not listed here may also be deemed authorized use cases under applicable penal codes ad case law, and, in general shall reflect necessary, reasonable, and proportional use of less lethal weapon systems: :~~

i. The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.

ii. The suspect has made credible threats to harm him/herself or others.

iii. The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers.

iv. There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.

v. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of less lethal weapon system.

(d) ~~-~~Training: All personnel who are authorized to carry a control device must be properly trained and certified to carry the specific control device and are retrained or re-certified as necessary. Proficiency training shall be monitored and documented by a certified, control-device weapons or tactics instructor.

(e) Lifespan:

i. Penn Arms GL-140-C- No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear

ii. K041 Standard Energy Impact Batons-5 years

(f) Fiscal Impact: Annual maintenance is approximately $100 for each launcher.

(g) Legal and Procedural Rules: Use of the 40mm launcher and 40mm baton rounds are subject to the requirements of Policy 300 (USE OF FORCE), 308 (CONTROL DEVICES AND TECHNIQUES), 308.9 (KINETIC ENERGY PROJECTILE GUIDELINES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize the 40mm only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(b) **Less Lethal Shotgun and Rounds**: Less Lethal Shotgun is used to deploy the less lethal 12-gauge Super-Sock Beanbag Round.

(a) Description, quantity, capabilities, and purchase cost

i. REMINGTON 870 LESS LETHAL SHOTGUN, cost: $950, quantity: 11. The Remington 870 Less Lethal Shotgun is used to deploy the less lethal 12-gauge Super-Sock Beanbag Round up to a distance of 75 feet. The range of the weapon system helps to maintain space between officers

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

and a suspect reducing the immediacy of the threat which is a principle of deescalation. The less lethal 12- gauge shotgun is distinguishable by an orange butt stock and fore grip.

ii. 12-GAUGE SUPER-SOCK BEANBAG ROUND 2581, cost: $6, quantity: 90. A less lethal 2.4-inch 12-gauge shotgun round firing a ballistic fiber bag filled with 40 grams of lead shot at a velocity of 270-290 feet per second (FPS). CTS (Combined Tactical Systems) Super-Sock rounds are discharged from a dedicated 12- gauge shotgun that is distinguishable by an orange butt stock and fore grip. This round provides accurate and effective performance when fired from the approved distance of not fewer than five (5) feet. The maximum effective range of this munition is up to 75 feet from the target. The Model 2581 Super-Sock is in its deployed state immediately upon exiting the barrel. It does not require a minimum range to "unfold" or "stabilize." The Super-Sock is an aerodynamic projectile. However, accuracy is relative to the shotgun, barrel length, environmental conditions, and the operator. The Super-Sock is very accurate. However, effectiveness depends on many variables, such as distance, clothing, stature, and the point where the projectile impacts.

(b) Purpose: To limit the escalation of conflict where employment of lethal force is prohibited or undesirable.

(c) Authorized Use - Subject to subsection (g) below, s~~S~~ituations for use of the less lethal weapon systems may include, but are not limited to the following: ~~:~~

i. The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.

ii. The suspect has made credible threats to harm him/herself or others.

iii. The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers.

iv. There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.

v. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of less lethal weapon system.

(d) Lifespan:

i. Remington 970 Less Lethal Shotgun-25 years

ii. Super Sock Round Model 2581: No listed expiration date

(e) Training: All personnel who are authorized to carry a control device must be properly trained and certified to carry the specific control device and are retrained or re-certified as necessary. Proficiency training shall be monitored and documented by a certified, control-device weapons or tactics instructor.

(f) Fiscal Impact: Annual maintenance is approximately $100 per shotgun.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(g) Legal and Procedural Rules: Use of the less lethal shotgun and Super Sock rounds are subject to the requirements of Policy 300 (USE OF FORCE), 308 (CONTROL DEVICES AND TECHNIQUES), 308.9 (KINETIC ENERGY PROJECTILE GUIDELINES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize the less lethal shotgun only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(c) **5.56mm Semi-Automatic Rifles and Ammunition:** The Colt AR-15~~/M4~~ 5.56 mm/.223 semiautomatic rifles are used for both patrol and the SWAT Team.

(a) Description, quantity, capabilities, and purchase cost

i. COLT AR RIFLES ~~/M4 RIFLES~~, cost: $1200, quantity: 27. These rifles, equipped and locked in each patrol car or police motorcycle, offer a higher degree of accuracy at a longer distance. The ammunition used in rifles are also more effective at penetrating body armor (as some suspects have worn during high-profile shooting events in the country). They are normally kept secured in patrol cars or in the Police station and are only deployed on specific incidents where officers believe guns or weapons are involved.

ii. .223 CALIBER or 5.56MM RIFLE AMMUNITION, cost: $280 per case of 500 rounds, quantity: 10,800 rounds. This rifle ammunition used in conjunction with an AR-15 type rifle provides officers the ability to engage hostile suspects at distances generally greater than the effective distance of their handguns. Rifle ammunition fired from AR-15 rifles offer advantages over handguns, such as increased accuracy potential and the ability to defeat soft body armor but are not appropriate for every situation.

(b) Purpose: To be used as precision weapon to address a threat with more precision and/or greater distances than a handgun, if present and feasible.

(c) Authorized Use - Members may deploy the patrol rifle in any circumstance where the member can articulate a reasonable expectation that the rifle may be needed. Subject to subsection (g) below, ~~s~~ Situations for use of these ~~e less lethal~~ weapon systems may include, but are not limited to, the following: ~~:~~

i. Situations where the member reasonably anticipates an armed encounter.

ii. When a member is faced with a situation that may require accurate and effective fire at long range.

iii. Situations where a member reasonably expects the need to meet or exceed a suspect's firepower.

iv. When a member reasonably believes that there may be a need to fire on a barricaded person or a person with a hostage.

v. When a member reasonably believes that a suspect may be wearing body armor.

vi. When authorized or requested by a supervisor.

vii. When needed to euthanize an animal at safe distance.

[Ed note: without the prepositional phrase, this use seems unnecessarily excessive.]

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

viii. When an officer is training at an approved range or other approved facility

ix. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of this weapon system.

(d) Lifespan:

i. Colt AR~~/M4~~ Rifles: Approximately 15-20 years

ii. 223 Caliber or 5.56mm rifle ammunition: No expiration

(e) Training: Officers must successfully complete a 24-hour patrol rifle course as well as regular Department firearms training and qualifications as required by law and policy. Firearm Instructors attend a 40-hour POST-approved rifle instructor class, and SWAT personnel must attend an 80-hour basic SWAT Team course.

(f) Fiscal Impact: Annual maintenance is approximately $100 per rifle.

(g) Legal and Procedural Rules: Use of the patrol rifles and ammunition are subject to the requirements of Policy 300 (USE OF FORCE), Policy 312.3.2 (PATROL RIFLES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize rifles only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(d) **.308 Caliber Remington 700 and Heckler & Koch HK-91 Sniper Rifles and Ammunition:** The sniper rifles are capable of firing a.308 caliber bullet. This rifle may only be used by a SWAT Officer trained and certified to be a sniper (LAPD currently has two such officers) and may be deployed to assist the SWAT Team in a critical incident or emergency.

(a) Description, quantity, capabilities, and purchase cost

i. .308 CALIBER REMINGTON 700 AND 700 LTR RIFLE, cost: $1,000, quantity: 2. Remington 700: No cost, surveyed, Remington 700LTR $1,000.

ii. .308 CALIBER HECKLER & KOCH HK-91 RIFLE, cost: No cost, surveyed, , quantity: 1.

iii. .308 AMMUNITION, cost: $1.50 per round, quantity: 3, ~~.~~040 rounds. These nickel-plated bonded soft-point 308/7.62 cartridges from Speer Gold-Dot are resistant to corrosion, capable of expansion from barrels as short as 10", and retain accuracy from a variety of barrels lengths.

(b) Purpose: This rifle may only be used by a SWAT Officer trained and certified to be a sniper and may be deployed to assist the SWAT Team in a critical incident or emergency. The main use of this weapon system is for observation of an incident and to be able to accurately and immediately be able to stop a threat to life.

(c) Authorized Use: Subject to subsection (g) below, e~~E~~xamples of situations for deploying the sniper rifle may include, but are not limited to the following: ~~:~~

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

i. where the Officer reasonably anticipates an armed encounter;

ii. when the Officer is faced with a situation that may require accurate and effective fire at a long distance;

iii. where an Officer reasonably expects the need to meet or exceed the firearms and ammunition that a suspect is reported or believed to possess;

iv. when an Officer reasonably believes that there may be a need to fire on a barricaded person or a person with a hostage;

v. when an Officer reasonably believes that a suspect may be wearing body armor.

vi. When an officer is training at an approved range or other approved facility

vii. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of this weapon system.

(d) Lifespan:

i. .308 Caliber Remington 700/700LTR: Approximately 15 years

ii. .308 Caliber Heckler & Koch HK-91: Approximately 15 years

iii. .308 Ammunition: No expiration

(e) Training: In addition to patrol rifle and standard SWAT operator training, SWAT snipers must successfully complete a California POST-certified sniper course as well as regular SWAT sniper training and qualifications as required by law and policy.

(f) Fiscal Impact: Annual maintenance is approximately $100 per Remington rifle. The HK is not used.

(g) Legal and Procedural Rules: Use of the sniper rifles and ammunition are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos, Policy 300 (USE OF FORCE), Policy 312.3.2 (PATROL RIFLES), Policy 312 (FIREARMS), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the Los Altos Police Department to utilize rifles only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(e) **Benelli M3Super90 12 gauge shotgun and ammunition: This firearm is not currently used by the department and is stored in the armory.** The Benelli M3 is a dual-mode (hybrid pump-action and semi-automatic) shotgun The ammunition for the shotgun is 00 Buck and slug rounds.

(a) Description, quantity, capabilities, and purchase cost

i. BENELLI M3SUPER90 12 GAUGE SHOTGUN, cost $500, quantity: 1. The Benelli M3 is a combination Pump-Action and Semi-Automatic Shotgun. The shotgun can be chambered for 12 GA shells with a 20 inch barrel.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

ii. 00 BUCK AMMUNITION, cost: $1.80 per round, quantity: 600 rounds. A typical 12-gauge, 2 ¾-inch 00 Buckshot shell holds 8 pellets that are 0.33" in diameter. A 3-inch shell most often contains 12 of these same sized pellets.

iii. SLUG AMMUNITION, cost: $1.40 per round, quantity: 100. The Foster-type shotgun slug features exterior rifled grooves which contact the shotgun's bore to give it spin; and, the slug's hollow-point design initiates expansion to augment stopping power.

(b) Purpose: This shotgun is not currently utilized by the department. The only shotguns used by the Department are the less lethal shotguns. The ammunition is purchased solely for recruits in the police academy, where shotgun instruction occurs.

(c) Authorized Use: There is currently no authorized use for the shotgun in our policy.

(d) Lifespan:

i. Benelli M3Super90 12 gauge shotgun: Approximately 15 years

ii. OO Buck Ammunition: No expiration

iii. Slug ammunition: No expiration

(e) Training: Officers receive training in shotgun use in the police academy, and have to pass firearm qualifications. There is no further training with the Benelli shotgun or ammunition.

(f) Fiscal Impact: None, the weapon is not utilized.

(g) Legal and Procedural Rules: Use of all firearms fall under the following policies: Policy 300 (USE OF FORCE) and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize firearms only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(f) **Remington 870 MCS 12 Gauge Breaching shotgun and breaching rounds: This firearm/ammunition is not currently used by the department and is stored in the SWAT armory.**

(a) Description, quantity, capabilities, and purchase cost

i. REMINGTON 870 MCS 12 GAUGE BREACHING SHOTGUN, cost: $1,400, quantity: 1. Extremely compact breaching model 12 gauge with a ten inch cylinder bore breaching barrel with parkerized finish, a Knoxx recoil reducing breacher pistol grip stock, and synthetic modular fore-end.

ii. 12 GAUGE BREACHING ROUNDS, cost: $5.00 per round, quantity: 25 rounds. The 12-Gauge TKO Breaching Round is a 12-Gauge shell loaded with a compressed zinc slug, utilizing smokeless powder as a propellant. The is a widely used method to breach door locks or hinges for entry during tactical operations.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(b) Purpose: The breaching shotgun is used to safely gain entry into a structure. When properly deployed, the TKO breaching round is capable of defeating door lock mechanisms, door knobs, hinges, dead bolts, safety chains, and pad locks on both wooden or hollow core doors. Upon impact with the target, the zinc slug disintegrates in~~–~~to a fine powder eliminating fragmentation. The Explosive Breaching Program, conducted in conjunction with the Mountain View Police Department, was established to provide the joint SWAT Team the ability to quickly create an opening in a wall or window to quickly enter a building for an emergency rescue of hostages. It is reserved for rescue operations only.

(c) Authorized Use: Subject to subsection (g) below, t~~T~~his equipment would only be deployed during a SWAT incident, and its use would need specific authorization from the Incident Commander. The equipment may only be used by a "tactical breacher" on the SWAT team. We currently do not have any authorized users at the Department.

(d) Lifespan:

i. Remington 870 MCS 12 Gauge Breaching shotgun: Approximately 15 years

ii. 12-Gauge TKO Breaching Round: Approximately 5 years

(e) Training: The training consists of an 80-hour course for a member of the SWAT Team specifically designated as the "breacher." At the conclusion of the course, the breacher must pass a test proctored by CAL/OSHA. The OSHA certification is valid for 5 years. Before the expiration of the certification, the breacher must retake and pass the test.

(f) Fiscal Impact: None, the weapon is not utilized.[Question: Even if the weapon is not utilized, doesn't the department have to ensure the weapon's efficacy for use through maintenance? If so, then there must eb a fiscal impact. If not, then why has this piece of equipment not been decommissioned and eliminated?]

(g) Legal and Procedural Rules: Use of the breaching shotgun and ammunition are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

(g) **Kaiser Precision Vulcan II Munitions Pole: Telescoping tool utilized by SWAT personnel to safely deliver approved noise/diversionary devices.**

(a) Description, quantity, capabilities, and purchase cost

i. KAISER PRECISION VULCAN II MUNITIONS POLE, cost: $2,000, quantity: 1. The munitions pole is a multi-purpose breaching tool, constructed of lightweight aluminum square tubing used to deploy distraction devices and chemical munitions in order to gain entrance into a building, structure or even a vehicle.

(b) Purpose: The munitions pole is used to safely deploy diversionary devices, chemical munitions, or other objects (cell phones, cameras) during SWAT

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

operations.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(c) Authorized Use: Subject to subsection (g) below, t~~T~~his equipment would be deployed during primarily during a SWAT incident, but could be utilized to gain entry into a residence during other high- ~~-~~risk operations on patrol.

~~(c)~~i. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of this weapon system.

(d) Lifespan: Approximately 10 years

(e) Training: Kaiser Precision provided an instructional video for individual and team training.

(f) Fiscal Impact: None, does not require annual maintenance

(g) Legal and Procedural Rules: Use of the munitions pole are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 317 (HIGH RISK OPERATIONS PROTOCOL), Policy 322 (SEARCH AND SEIZURE), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

(h) **CTS Flash-bang Training Kit:** The training flash-bangs are built and weigh exactly the same as it's equivalent live Flash-Bang, but have no flash charge.

(a) Description, quantity, capabilities, and purchase cost

i. CTS FLASH-BANG TRAINING KIT, cost: $964, Quantity 1 kit (comes with 70 reload Training Fuzes, 1 body), current fuze inventory is 25. The training bodies are painted with a bright blue coating, and can be used an unlimited number of times. The M201FB fuze for this system has 10 times the output of a normal M201 fuze and it is threaded with a left hand thread so it can not be accidentally used in any other munitions. The training devices produce an output of about 120db.

(b) Purpose: Flash-bangs are used to distract and temporarily immobilize dangerous suspects by overwhelming their senses of vision and hearing. The distraction gives Officers time to seize a moment and create an opportunity to take control of high-risk or dangerous situations.

(c) Authorized Use: Subject to subsection (g) below, SWAT operators may utilize the training flash-bangs as a training tool to distract and temporarily immobilize dangerous suspects by overwhelming their senses of vision and hearing. Los Altos Police Department does not have any live flash-bangs in the inventory. Our operators use live flash-bangs while on SWAT events or at training with Mountain View Police Department.

~~(c)~~i. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of this weapon system.

(d) Lifespan: 5 years

(e) Training: These are a training tool. SWAT operators must attend and pass an 80-hour SWAT training class. Flash-bang training is provided by an instructor

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

who has completed an 8-hour noise flash diversionary device course.

~~(e)~~(f) Fiscal Impact: MISSING SECTION, need to fill.

~~(f)~~(g) Legal and Procedural Rules: Use of the **live** flash-bangs are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 317 (HIGH RISK OPERATIONS

PROTOCOL), Policy 322 (SEARCH AND SEIZURE), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

(i) **Specialty Impact Munition (SIM) weapons and ammunition:** Simunition® is the pioneer and world leader in providing military, law enforcement and approved range members with the most realistic and non-lethal force-on-force, short range, simulation training system.

(a) Description, quantity, capabilities, and purchase cost

i. SIMUNITION GLOCK 17T, cost: $500 each, quantity: 8. The GLOCK Training Pistols were developed with the purpose of enabling reality-based tactical operations training using color marking or plastic projectile ammunition. When utilized in a pistol caliber barrel training platform (9mm), SIMs have an effective range of 25 feet.

ii. SIM CONVERTED BERETTA 92, cost: $500 each, quantity: 4. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized in a pistol caliber barrel training platform (9mm), SIMs have an effective range of 25 feet.

iii. HK MP5 CONVERSION KITS, cost: $500 each, quantity 2. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized with a training munition bolt carrier group in a 5.56mm rifle platform, SIMs have an effective range of approximately 27 yards.

iv. SIMUNITION COLT AR-15 CARBINE RIFLE UPPERS, cost: $1,000 each, quantity: 3. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized with a training munition bolt carrier group in a 5.56mm rifle platform, SIMs have an effective range of approximately 27 yards.

v. FX MARKING CARTRIDGES, cost: $350 for 500 rounds, quantity: 3,500 rounds. The reduced-energy, non-lethal cartridges leave a detergent-based, water-soluble color-marking compound. The visible impacts allow accurate assessment of simulated lethality. They feature tactical accuracy up to 25 feet (7.6 meters).

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(b) Purpose: Enabling reality-based, force-on-force tactical operations training using color marking or plastic projectile ammunition.

(c) Authorized Use: Subject to subsection (g) below, s~~S~~imunition weapons and marking rounds are non-operational rounds and non-operational weapons systems. These munitions provide for realistic close quarters firearms training while allowing the shooter to visually assess shot placement and accuracy in force on force training scenarios. These items are used for training purposes for all sworn staff members.

~~(c)~~i. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of this weapon system.

(d) Lifespan:

i. Simunition Glock 17T: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

ii. Sim Converted Beretta: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

iii. HK MP5 Conversion Kits: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

iv. Simunition Colt AR-15 Rifle Uppers: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

v. FX Marking Cartridges: Shelf life five (5) years.

(e) Training: These are a training tool. Simunition Instructors attend an informative, three-day (24-hour) course designed to provide students with substantial hands-on experience with Simunition® FX® training ammunition technology, weapons conversion kits, and the Simunition® line of protective equipment. The course provides in-depth, hands-on instruction in scenario-based training program development and training methodology, and gives critical practical experience to students on the best use of Simunition® training products in a highly effective, realistic, extremely safe training program. Sworn staff members are given extensive firearms handling courses and weapons safety instruction to include the use of SIMs for training purposes.

~~(e)~~(f) Fiscal Impact: section MISSING, need to fill out or state None.

~~(f)~~(g) Legal and Procedural Rules: Use of the Simunition firearms and marking rounds are subject to the requirements of Policy 300 (USE OF FORCE) and Policy 312 (FIREARMS) while training. It is the policy of the Los Altos Police Department to utilize Simunition equipment only for official law enforcement training purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

prior to any public hearing concerning the military equipment at issue (Government Code § 7071). The military equipment policy must be approved by the governing body before the Department engages in any of the following ~~prior to engaging in any of the following~~ (Government Code § 7071):

(a) Requests ~~ing~~ military equipment made available pursuant to 10 USC § 2576a.

(b) Seekis ~~ng~~ funds for military equipment, including but not limited to applying for a grant, soliciting or accepting private, local, state, or federal funds, in-kind donations, or other donations or transfers.

(c) Acquires ~~ing~~ military equipment either permanently or temporarily, including by borrowing or leasing.

(d) Collaborates ~~ing~~ with another law enforcement agency in the deployment or other use of military equipment within the jurisdiction of this department.

(e) Usies ~~ng~~ any new or existing military equipment for a purpose, in a manner, or by a person not previously approved by the governing body.

(f) Solicits ~~ing~~ or responds ~~ing~~ to a proposal for, or enters ~~ing~~ into an agreement with, any other person or entity to seek funds for, apply to receive, acquire, use, or collaborate in the use of military equipment.

(g) Acquiries ~~ng~~ military equipment through any means not provided above.

[Ed. Note: You did not include the assessment criteria for the governing body (see my note under 709.1). An alternative is to add a new section here called Policy Review and Approval (you would change all the number ordering below) and include the criteria there. I include these words here again for your consideration and, as stated before want to understand what legal barriers exist to including them.]

[SECTION TBD] The governing body shall only approve the military equipment use policy if all of the following are true (§7071 Subdiv (d) para (1) subpara (A)-(D)):
(a) Each military equipment is necessary for lack of a reasonable alternative.
(b) The military equipment use policy will safeguard the public's welfare, safety, civil rights, and civil liberties.
(c) The military equipment is reasonably cost effective.
(d) All current or prior non-confirming uses have been remedied to assure future compliance with policy
(e) All required components of the military equipment use policy are included in the policy presented for approval, including at least the following for each item of equipment (GC §7070 Subdiv (d) para (1)-(7)): a. Description
b. Purpose(s) and authorized use(s)
c. Fiscal impact, initial costs and maintenance costs
d. Legal and procedural rules that govern authorized use(s)
e. Training required
f. Mechanisms to ensure compliance, independent oversight, and legal consequences (sanctions) for violation of policy

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

g. Methods by which public engagement is achieved (complaints, concerns, questions, suggestions)

709.6 COORDINATION WITH OTHER JURISDICTIONS

Military equipment used by other law enforcement agencies that are providing mutual aid to this jurisdiction or otherwise engaged in law enforcement operations within this jurisdiction shall comply with their respective military equipment policies in rendering mutual aid.

709.7 ANNUAL REPORT

Upon approval of a military equipment policy, the Chief of Police or the authorized designee ~~should~~ shall submit a military equipment report to the governing body for each type of military equipment approved within one year of approval, and annually thereafter for as long as the military equipment is available for use (Government Code § 7072).

The Chief of Police or the authorized designee ~~should~~ shall also make each annual military equipment report publicly available on the department website for as long as the military equipment is available for use. The report shall include all information required by Government Code § 7072 for the preceding calendar year for each type of military equipment in department inventory.

Published with permission by Los Altos Police Department

709.8 POLICY COMPLIANCE AND SUBMITTING COMPLAINTS

The Chief of Police or the authorized designee will ensure that all Los Altos Police Department employees comply with this policy. Suspected violations of the provisions set forth in this policy, or in other laws or policies governing the use of "military equipment", shall be handled in accordance with Los Altos Police Department Policy 340 (Standards of Conduct). Additionally, violations of the provisions set forth in this policy, or in other laws or policies governing the use of "military equipment", will be reported to the governing body via the annual Military Equipment Report.

Any member of the community can submit a complaint regarding the use of "military equipment" to any Los Altos Police Department employee or the Independent Intake Official. Complaints can be submitted in any form (e.g., in person, online, telephone, email, etc.). Once a complaint is received, it will be handled in accordance with Los Altos Police Department Policy 340 (Standards of Conduct) and LAPD Policy 1020 (Personnel Complaints). Formal complaints regarding alleged violations of this policy will be handled by an independent investigator.

[Ed. Note: while I applaud the addition of an independent investigator, I remain incredulous that this is the first time this term has been shown in this policy, located at the end of two substantial paragraphs.. This statement insufficiently describes the scope and authority of this role, where they sit in the Department or outside it, to whom they are accountable, if they will render consequences, and how the public will be informed of their work. This, coupled with the fact the IIO has no role other than intake, I remain unsatisfied that independent oversight has been manifested in this policy.

Complaints may be made directly to the Los Altos Police Department in one of the following ways (for online options, please visit https://www.losaltosca.gov/police/page/how-are-we-doing-0):

709.9 COMMUNITY ENGAGEMENT

Within 30 days of submitting and publicly releasing the annual report, the Department shall hold at least one well-publicized and conveniently located community engagement meeting, at which the Department should discuss the report and respond to public questions regarding the funding, acquisition, or use of military equipment.

~~Pursuant to California Government Code 7070(d)(7), members of the public may register complaints or concerns or submit questions about the use of each specific type of listed equipment in this policy by any of the following means:~~

(a) ~~Via email to: policefeedback @losaltosca.gov~~

(b) ~~Via phone call to : 650-947-2672~~

(c) ~~Via mail sent to:~~

Date: Tuesday, September 20, 2022 2:50:15 PM
Attachments: 2022_09_07 Military Equipment Use Policy 709 Los Altos PD bluelines JAV EDITS V1.pdf

Honorable City Council, City Manager, City Attorney, and Asst. City Clerk,

I want to personally thank Captain Krauss for considering and including most of my previous suggested edits to this Military Equipment Use Policy (MEUP)
Whether these edits were incorporated directly, or were incorporated in spirit using other words or paragraph structure, the effect was the same: excellent!
I also loved some of the edits Capt. Krauss and/or staff took on themselves to ameliorate many ambiguities and inconsistencies with AB481; for example, the Definitions section is top-notch now.
Overall, the policy has been improved by a very large extent. THANK YOU.

However, and I do not intend to sound ungrateful, concerns remain such that I still cannot endorse the draft as written.
The green-lined PDF that I submitted separately captures almost all of my concerns. This letter completes the inventory and I hope that Capt. Krauss will continue to work with me to resolve these issues:

1) Reasons I was given for not including some of my suggestions were cited as relating to liability or legality. Given that virtually every change I suggested came from the MEUPs of other LE agencies in the state, I would have thought they would pass risk and legal muster. I would like an itemized rational as to what legal/liability barriers exist to inclusion.

2) While not staunching the functionality of the MEUP, it is very disappointing and notable that Staff has steered clear of any recognition of the underlying historical reckoning embodied in AB 481. It's as though this omission is by intention. Concerns that acknowledging history somehow reflects poorly on our current Department members are nonsense. It is exactly the lack of this acknowledgment that engenders mistrust.

3) In a similar vein, the current draft continues to sidestep the use of the term "independent oversight," despite the reality that this concept is literally all over the text of the law and is very clearly an underpinning of the goals the law sets out to achieve. While we appreciate that the IIO has been invoked, that role has no oversight authority, as currently defined. And a brief mention of an independent investigator leaves more questions than it answers. My colleagues at LARE will expand this topic further to express what is needed.

4) I remember being very concerned about how our 2 sniper-trained officers could ever be effective in their job because everything I read and heard from LE personnel told me nothing about how they would be trained to be part of a cohesive SWAT team. Everything I had read about operational efficacy in SWAT had to do with a cohesive, seamless, properly scaled operational team. Two officers were, in my

mind, stranded, and that introduced great risk. Yet, at the small scale of our city, having a full SWAT team would be senseless. It was only after meeting with Capt. Krauss and asking her to answer this question, that I learned how integrated our SWAT officers are with the Mountain View PD SWAT team. Quickly, my fears and concerns were ameliorated. It seemed so simple to add a mention of this integration in the Training paragraph for Sniper weapons and munitions. In fact, under the Breaching programs paragraph, such a mention exists in paragraph 709.4(f)(b), albeit in the Purpose statement. And yet, this edit suggestion was removed for sniper weapons. I would like an explanation as to why its inclusion would in any way injure the viability of this policy.

5) There are some missing Fiscal Impact paragraphs for some ME items. They must be present for every item, even if no financial impact exists. However, I contend that, even if an item is not used, if it is in our armory, it MIGHT be used, and, therefore, there must be some fiscal impact in terms of testing and maintenance. If there is absolutely no possibility of use and the item will sit in idle storage, then, in my opinion, it becomes a possible risk due to lack of maintenance. It should be decommissioned and eliminated from the armory.

6) I failed to include in my submitted greenlines an edit concerning the 1033 program. I did not included it because I had not heard back from Capt. Krauss on my questions surrounding this program as it relates to our ME. Having just heard back from her, I can now itemize my request: In the spirit of transparency, many other agencies include the citation below in their MEUPs. Including this statement does two things: a) it stalls any claims that our city is getting equipment directly from the Military, and, b) it alerts the public to the fact that should our agency every wish to acquire ME from the Military, they will have to educate themselves on what that means and how it impacts public safety and welfare, including requiring that any such acquisitions be thoroughly documented for public review. The requested addition belongs in the Policy section:

"The Department has not obtained, nor does it utilize, any equipment procured from the United States Department of Defense through the Law Enforcement Support Program, authorized under the National Defense Authorization Act, also known as the 1208 (pre-1997) or 1033 (1997 and later) program."

I look forward to continuing discussion with staff and Council on this topic. The goal here is to get a rock-solid, best-of-class MEUP for our city.

Thanks,

Jeanine Valadez
Pardon typos. I am a PARC commissioner but am speaking as a member of the public.

Military Equipment

709.1 PURPOSE AND SCOPE

The purpose of this policy is to provide guidelines for the approval, acquisition, and reporting requirements of military equipment (Government Code § 7070; Government Code § 7071; Government Code § 7072). Assembly Bill 481 (AB 481), signed into law on September 30, 2021, requires law enforcement agencies to create a policy establishing guidelines and requirements for the funding, acquisition, and use of "military equipment" (Government Code § 7070, 7071, and 7072), including requirements to host informational meetings with the public, generate annual "military equipment" use reports, and seek annual approval from their respective governing bodies. The purpose of this policy is to make sure that safeguards exist, including transparency, governing body and independent oversight, and accountability measures, to ensure the funding, acquisition, and use of "military equipment" is consistent with the provisions set forth by the governing body and as outlined in AB 481. This policy will also provide the public with a transparent view of the "military equipment" utilized by the Los Altos Police Department, as well as the criteria by which the governing body will assess and approve the funding, acquisition, and use of "military equipment" in this Department.

[Ed. note: In this edition, you removed my suggestion to include, within the scope of this policy, the assessment criteria the governing body (City Council) will use to approve the policy. By including these criteria in this policy, you not only enable enrichment of section 709.5 ("Approval"), but you inform the public of said criteria so that they may form their own assessment of whether or not the policy protects the public welfare as they observe their City Council render approval. In this light, I request incorporation of the above words and seek an explanation as to why Staff opposes their inclusion.]

709.1.1 DEFINITIONS

Definitions related to this policy include (Government Code § 7070):

Governing body – The Los Altos City Council, who will annually review this policy and approve, by ordinance, ~~for the adoption of this ordinance and the approval of~~ the annual report. ~~elected or appointed body that oversees the~~ .

POST - Peace Officer Standards and Training

SWAT - Special Weapons and Tactics

Military equipment – Per AB 481, military equipment means the following: ~~i Includes but is not limited to the following:~~

(1) Unmanned, remotely piloted, powered aerial or ground vehicles.

(2) Mine-resistant ambush-protected (MRAP) vehicles or armored personnel carriers. However, police versions of standard consumer vehicles are specifically excluded from this subdivision.

(3) High mobility multipurpose wheeled vehicles (HMMWV), commonly referred to as Humvees, two and one-half-ton trucks, five-ton trucks, or wheeled vehicles that have a breaching or entry

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

apparatus attached. However, unarmored all-terrain vehicles (ATVs) and motorized dirt bikes are specifically excluded from this subdivision.

(4) Tracked armored vehicles that provide ballistic protection to their occupants and utilize a tracked system instead of wheels for forward motion.

(5) Command and control vehicles that are either built or modified to facilitate the operational control and direction of public safety units.

(6) Weaponized aircraft, vessels, or vehicles of any kind.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(7) Battering rams, slugs, and breaching apparatuses that are explosive in nature. However, items designed to remove a lock, such as bolt cutters, or a handheld ram designed to be operated by one person, are specifically excluded from this subdivision.

(8) Firearms of.50 caliber or greater. However, standard issue shotguns are specifically excluded from this subdivision.

(9) Ammunition of.50 caliber or greater. However, standard issue shotgun ammunition is specifically excluded from this subdivision.

(10) Specialized firearms and ammunition of less than.50 caliber, including assault weapons as defined in Sections 30510 and 30515 of the Penal Code, with the exception of standard issue service weapons and ammunition of less than.50 caliber that are issued to officers, agents, or employees of a law enforcement agency or a state agency.

(11) Any firearm or firearm accessory that is designed to launch explosive projectiles.

(12) "Flashbang" grenades and explosive breaching tools, "tear gas," and "pepper balls," excluding standard, service-issued handheld pepper spray.

(13) Taser Shockwave, microwave weapons, water cannons, and the Long Range Acoustic Device (LRAD).

(14) The following projectile launch platforms and their associated munitions: 40mm projectile launchers, "bean bag," rubber bullet, and specialty impact munition (SIM) weapons.

(15) Any other equipment as determined by a governing body or a state agency to require additional oversight.

(16) Not withstanding paragraphs (1) through (15), "military equipment" does not include general equipment not designated as prohibited or controlled by the federal Defense Logistics Agency.

~~Unmanned, remotely piloted, powered aerial or ground vehicles.~~

- ~~Mine resistant ambush protected (MRAP) vehicles or armored personnel carriers.~~
- ~~High mobility multipurpose wheeled vehicles (HMMWV), two and one half ton trucks, five ton trucks, or wheeled vehicles that have a breaching or entry apparatus attached.~~
- ~~Tracked armored vehicles that provide ballistic protection to their occupants.~~
- ~~Command and control vehicles that are either built or modified to facilitate the operational control and direction of public safety units.~~
- ~~Weaponized aircraft, vessels, or vehicles of any kind.~~
- ~~Battering rams, slugs, and breaching apparatuses that are explosive in nature. This does not include a handheld, one person ram.~~
- ~~Firearms and ammunition of .50 caliber or greater, excluding standard issue shotguns and standard issue shotgun ammunition.~~

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

- ~~Specialized firearms and ammunition of less than – .50 caliber, including firearms and accessories identified as assault weapons in Penal Code § 30510 and Penal Code § 30515, with the exception of standard issue firearms.~~
- ~~Any firearm or firearm accessory that is designed to launch explosive projectiles.~~
- ~~Noise flash diversionary devices and explosive breaching tools.~~
- ~~Munitions containing tear gas or OC, excluding standard, service issued handheld pepper spray.~~
- ~~TASER® Shockwave, microwave weapons, water cannons, and long-range acoustic devices (LRADs).~~
- ~~Kinetic energy weapons and munitions.~~
- ~~Any other equipment as determined by a governing body or a state agency to require additional oversight.~~

709.2 POLICY

It is the policy of the Los Altos Police Department that members of the department comply with the provisions of Government Code § 7071 with respect to qualifying "military equipment". "Military equipment" shall be used by members of the Department who have completed applicable training, including training required by the Commission on Peace Officer Standards and Training (POST). See the Military Equipment Inventory List (section 709.4) for associated "military equipment" training requirements.

"Military equipment", which has been approved for use by the governing body, shall be used in accordance with all other applicable department policies and laws. These policies and laws include, but are not limited to:

- ~~•~~ Los Altos Police Department Policy 300 (Use of Force)
- Los Altos Police Department Policy 308 (Control Devices and Techniques) ~~It is the policy of the that members of this comply with the provisions of Government Code § 7071 with respect to military equipment.~~
- Los Altos Police Department Policy 312 (Firearms)
- Los Altos Police Department Policy 414 (Hostage and Barricade Incidents)
- California Assembly Bill No. 48 (Use of Kinetic Energy Projectiles and Chemical Agents-Assemblies, Protests, and Demonstrations)
- California Penal Code Section 13652 (Use of Kinetic Energy Projectiles and Chemical Agents)

This policy expressly prohibits the use of "military equipment" on individuals or groups solely based on actual or perceived characteristics, such as race, ethnicity, national origin, religion, sex, sexual orientation, gender identity or expression, economic status, age, cultural group, or disability.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

709.3 MILITARY EQUIPMENT COORDINATOR

The Chief of Police should designate a member of this department to act as the military equipment coordinator. The responsibilities of the military equipment coordinator include but are not limited to:

(a) Acting as liaison to the governing body for matters related to the requirements of this policy.

(b) Identifying department equipment that qualifies as military equipment in the current possession of the Department, or the equipment the Department intends to acquire that requires approval by the governing body.

(c) Conducting an inventory of all military equipment at least annually.

(d) Collaborating with any allied agency that may use military equipment within the jurisdiction of Los Altos Police Department (Government Code § 7071).

(e) Preparing for, scheduling, and coordinating the annual community engagement meeting to include:

1. Publicizing the details of the meeting.
2. Preparing for public questions regarding the department's funding, acquisition, and use of equipment.

(f) Preparing the annual military equipment report for submission to the Chief of Police and ensuring that the report is made available on the department website (Government Code § 7072).

(g) Establishing the procedure for a person to register a complaint or concern, or how that person may submit any questions about the use of a type of military equipment, and how the Department will respond in a timely manner.

709.4 MILITARY EQUIPMENT INVENTORY

The following constitutes a list and description of qualifying equipment for the Department:

[Ed. Note: why did you change the itemization of equipment items from numerical to alphabetical? This creates a confusing hierarchy where letters are directly subordinate to letters. For example, 709.4(a)(a) points to “Description, quantity…”. Instead, either revert to using numerical assignments for each item of equipment, as in the original 709.4.1(a), or retain the alpha, but change the subordinate insets to numbers, for example, 709.4(a)(1) points to “Description, quantity…”]

(a) **40 MM Launchers and Rounds:** 40mm Launchers are utilized by department personnel as a less lethal tool to launch impact rounds.

(a) Description, quantity, capabilities, and purchase cost

i. PENN ARMS GL-140-C, 40MM SINGLE SHOT LAUNCHER, cost: $1,000, quantity: 3. The 40mm Single Launcher is a tactical single shot launcher that features a collapsible stock. It will fire standard 40mm less lethal ammunition, up to 6.0 inches in cartridge length. 40mm launchers are capable of firing a variety of munitions with a maximum effective range of one hundred twenty (120) feet.

ii. SAGE CONTROL ORDINANCES INC K041 STANDARD ENERGY IMPACT BATON PROJECTILE, cost: $21.00, quantity: 14. A less lethal 40mm impact baton projectile fired from a single 40mm grenade launcher

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

with a rifled barrel at 51-72 MPS (meters per second). The projectile provides accurate and effective performance when fired from the recommended firing distances of not less than 10 feet and no greater than 75 feet.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(b) Purpose: To limit the escalation of conflict where employment of lethal force is prohibited or undesirable.

(c) Authorized Use: Subject to subsection (g) below, s~~S~~ituations for use of the less lethal weapon systems may include, but are not limited to the following: ~~however, other situations not listed here may also be deemed authorized use cases under applicable penal codes ad case law, and, in general shall reflect necessary, reasonable, and proportional use of less lethal weapon systems: :~~

i. The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.

ii. The suspect has made credible threats to harm him/herself or others.

iii. The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers.

iv. There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.

v. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of less lethal weapon system.

(d) ~~-~~Training: All personnel who are authorized to carry a control device must be properly trained and certified to carry the specific control device and are retrained or re-certified as necessary. Proficiency training shall be monitored and documented by a certified, control-device weapons or tactics instructor.

(e) Lifespan:

i. Penn Arms GL-140-C- No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear

ii. K041 Standard Energy Impact Batons-5 years

(f) Fiscal Impact: Annual maintenance is approximately $100 for each launcher.

(g) Legal and Procedural Rules: Use of the 40mm launcher and 40mm baton rounds are subject to the requirements of Policy 300 (USE OF FORCE), 308 (CONTROL DEVICES AND TECHNIQUES), 308.9 (KINETIC ENERGY PROJECTILE GUIDELINES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize the 40mm only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(b) **Less Lethal Shotgun and Rounds**: Less Lethal Shotgun is used to deploy the less lethal 12-gauge Super-Sock Beanbag Round.

(a) Description, quantity, capabilities, and purchase cost

i. REMINGTON 870 LESS LETHAL SHOTGUN, cost: $950, quantity: 11. The Remington 870 Less Lethal Shotgun is used to deploy the less lethal 12-gauge Super-Sock Beanbag Round up to a distance of 75 feet. The range of the weapon system helps to maintain space between officers

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

and a suspect reducing the immediacy of the threat which is a principle of deescalation. The less lethal 12- gauge shotgun is distinguishable by an orange butt stock and fore grip.

ii. 12-GAUGE SUPER-SOCK BEANBAG ROUND 2581, cost: $6, quantity: 90. A less lethal 2.4-inch 12-gauge shotgun round firing a ballistic fiber bag filled with 40 grams of lead shot at a velocity of 270-290 feet per second (FPS). CTS (Combined Tactical Systems) Super-Sock rounds are discharged from a dedicated 12- gauge shotgun that is distinguishable by an orange butt stock and fore grip. This round provides accurate and effective performance when fired from the approved distance of not fewer than five (5) feet. The maximum effective range of this munition is up to 75 feet from the target. The Model 2581 Super-Sock is in its deployed state immediately upon exiting the barrel. It does not require a minimum range to "unfold" or "stabilize." The Super-Sock is an aerodynamic projectile. However, accuracy is relative to the shotgun, barrel length, environmental conditions, and the operator. The Super-Sock is very accurate. However, effectiveness depends on many variables, such as distance, clothing, stature, and the point where the projectile impacts.

(b) Purpose: To limit the escalation of conflict where employment of lethal force is prohibited or undesirable.

(c) Authorized Use - Subject to subsection (g) below, s~~S~~ituations for use of the less lethal weapon systems may include, but are not limited to the following: ~~:~~

i. The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.

ii. The suspect has made credible threats to harm him/herself or others.

iii. The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers.

iv. There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.

v. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of less lethal weapon system.

(d) Lifespan:

i. Remington 970 Less Lethal Shotgun-25 years

ii. Super Sock Round Model 2581: No listed expiration date

(e) Training: All personnel who are authorized to carry a control device must be properly trained and certified to carry the specific control device and are retrained or re-certified as necessary. Proficiency training shall be monitored and documented by a certified, control-device weapons or tactics instructor.

(f) Fiscal Impact: Annual maintenance is approximately $100 per shotgun.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(g) Legal and Procedural Rules: Use of the less lethal shotgun and Super Sock rounds are subject to the requirements of Policy 300 (USE OF FORCE), 308 (CONTROL DEVICES AND TECHNIQUES), 308.9 (KINETIC ENERGY PROJECTILE GUIDELINES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize the less lethal shotgun only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(c) **5.56mm Semi-Automatic Rifles and Ammunition:** The Colt AR-15~~/M4~~ 5.56 mm/.223 semiautomatic rifles are used for both patrol and the SWAT Team.

(a) Description, quantity, capabilities, and purchase cost

i. COLT AR RIFLES ~~/M4 RIFLES~~, cost: $1200, quantity: 27. These rifles, equipped and locked in each patrol car or police motorcycle, offer a higher degree of accuracy at a longer distance. The ammunition used in rifles are also more effective at penetrating body armor (as some suspects have worn during high-profile shooting events in the country). They are normally kept secured in patrol cars or in the Police station and are only deployed on specific incidents where officers believe guns or weapons are involved.

ii. .223 CALIBER or 5.56MM RIFLE AMMUNITION, cost: $280 per case of 500 rounds, quantity: 10,800 rounds. This rifle ammunition used in conjunction with an AR-15 type rifle provides officers the ability to engage hostile suspects at distances generally greater than the effective distance of their handguns. Rifle ammunition fired from AR-15 rifles offer advantages over handguns, such as increased accuracy potential and the ability to defeat soft body armor but are not appropriate for every situation.

(b) Purpose: To be used as precision weapon to address a threat with more precision and/or greater distances than a handgun, if present and feasible.

(c) Authorized Use - Members may deploy the patrol rifle in any circumstance where the member can articulate a reasonable expectation that the rifle may be needed. Subject to subsection (g) below), s ~~S~~ituations for use of these ~~e less lethal~~ weapon systems may include, but are not limited to, the following: ~~:~~

i. Situations where the member reasonably anticipates an armed encounter.

ii. When a member is faced with a situation that may require accurate and effective fire at long range.

iii. Situations where a member reasonably expects the need to meet or exceed a suspect's firepower.

iv. When a member reasonably believes that there may be a need to fire on a barricaded person or a person with a hostage.

v. When a member reasonably believes that a suspect may be wearing body armor.

vi. When authorized or requested by a supervisor.

vii. When needed to euthanize an animal at safe distance.

[Ed note: without the prepositional phrase, this use seems unnecessarily excessive.]

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

viii. When an officer is training at an approved range or other approved facility

ix. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of this weapon system.

(d) Lifespan:

i. Colt AR~~/M4~~ Rifles: Approximately 15-20 years

ii. 223 Caliber or 5.56mm rifle ammunition: No expiration

(e) Training: Officers must successfully complete a 24-hour patrol rifle course as well as regular Department firearms training and qualifications as required by law and policy. Firearm Instructors attend a 40-hour POST-approved rifle instructor class, and SWAT personnel must attend an 80-hour basic SWAT Team course.

(f) Fiscal Impact: Annual maintenance is approximately $100 per rifle.

(g) Legal and Procedural Rules: Use of the patrol rifles and ammunition are subject to the requirements of Policy 300 (USE OF FORCE), Policy 312.3.2 (PATROL RIFLES), and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize rifles only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(d) **.308 Caliber Remington 700 and Heckler & Koch HK-91 Sniper Rifles and Ammunition:** The sniper rifles are capable of firing a.308 caliber bullet. This rifle may only be used by a SWAT Officer trained and certified to be a sniper (LAPD currently has two such officers) and may be deployed to assist the SWAT Team in a critical incident or emergency.

(a) Description, quantity, capabilities, and purchase cost

i. .308 CALIBER REMINGTON 700 AND 700 LTR RIFLE, cost: $1,000, quantity: 2. Remington 700: No cost, surveyed, Remington 700LTR $1,000.

ii. .308 CALIBER HECKLER & KOCH HK-91 RIFLE, cost: No cost, surveyed, , quantity: 1.

iii. .308 AMMUNITION, cost: $1.50 per round, quantity: 3, ~~.~~040 rounds. These nickel-plated bonded soft-point 308/7.62 cartridges from Speer Gold-Dot are resistant to corrosion, capable of expansion from barrels as short as 10", and retain accuracy from a variety of barrels lengths.

(b) Purpose: This rifle may only be used by a SWAT Officer trained and certified to be a sniper and may be deployed to assist the SWAT Team in a critical incident or emergency. The main use of this weapon system is for observation of an incident and to be able to accurately and immediately be able to stop a threat to life.

(c) Authorized Use: Subject to subsection (g) below, e~~E~~xamples of situations for deploying the sniper rifle may include, but are not limited to the following: ~~:~~

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

i. where the Officer reasonably anticipates an armed encounter;

ii. when the Officer is faced with a situation that may require accurate and effective fire at a long distance;

iii. where an Officer reasonably expects the need to meet or exceed the firearms and ammunition that a suspect is reported or believed to possess;

iv. when an Officer reasonably believes that there may be a need to fire on a barricaded person or a person with a hostage;

v. when an Officer reasonably believes that a suspect may be wearing body armor.

vi. When an officer is training at an approved range or other approved facility

vii. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of this weapon system.

(d) Lifespan:

i. .308 Caliber Remington 700/700LTR: Approximately 15 years

ii. .308 Caliber Heckler & Koch HK-91: Approximately 15 years

iii. .308 Ammunition: No expiration

(e) Training: In addition to patrol rifle and standard SWAT operator training, SWAT snipers must successfully complete a California POST-certified sniper course as well as regular SWAT sniper training and qualifications as required by law and policy.

(f) Fiscal Impact: Annual maintenance is approximately $100 per Remington rifle. The HK is not used.

(g) Legal and Procedural Rules: Use of the sniper rifles and ammunition are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos, Policy 300 (USE OF FORCE), Policy 312.3.2 (PATROL RIFLES), Policy 312 (FIREARMS), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the Los Altos Police Department to utilize rifles only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(e) **Benelli M3Super90 12 gauge shotgun and ammunition: This firearm is not currently used by the department and is stored in the armory.** The Benelli M3 is a dual-mode (hybrid pump-action and semi-automatic) shotgun The ammunition for the shotgun is 00 Buck and slug rounds.

(a) Description, quantity, capabilities, and purchase cost

i. BENELLI M3SUPER90 12 GAUGE SHOTGUN, cost $500, quantity: 1. The Benelli M3 is a combination Pump-Action and Semi-Automatic Shotgun. The shotgun can be chambered for 12 GA shells with a 20 inch barrel.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

ii. 00 BUCK AMMUNITION, cost: $1.80 per round, quantity: 600 rounds. A typical 12-gauge, 2 ¾-inch 00 Buckshot shell holds 8 pellets that are 0.33" in diameter. A 3-inch shell most often contains 12 of these same sized pellets.

iii. SLUG AMMUNITION, cost: $1.40 per round, quantity: 100. The Foster-type shotgun slug features exterior rifled grooves which contact the shotgun's bore to give it spin; and, the slug's hollow-point design initiates expansion to augment stopping power.

(b) Purpose: This shotgun is not currently utilized by the department. The only shotguns used by the Department are the less lethal shotguns. The ammunition is purchased solely for recruits in the police academy, where shotgun instruction occurs.

(c) Authorized Use: There is currently no authorized use for the shotgun in our policy.

(d) Lifespan:

i. Benelli M3Super90 12 gauge shotgun: Approximately 15 years

ii. OO Buck Ammunition: No expiration

iii. Slug ammunition: No expiration

(e) Training: Officers receive training in shotgun use in the police academy, and have to pass firearm qualifications. There is no further training with the Benelli shotgun or ammunition.

(f) Fiscal Impact: None, the weapon is not utilized.

(g) Legal and Procedural Rules: Use of all firearms fall under the following policies: Policy 300 (USE OF FORCE) and Policy 312 (FIREARMS). It is the policy of the Los Altos Police Department to utilize firearms only for official law enforcement purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

(f) **Remington 870 MCS 12 Gauge Breaching shotgun and breaching rounds: This firearm/ammunition is not currently used by the department and is stored in the SWAT armory.**

(a) Description, quantity, capabilities, and purchase cost

i. REMINGTON 870 MCS 12 GAUGE BREACHING SHOTGUN, cost: $1,400, quantity: 1. Extremely compact breaching model 12 gauge with a ten inch cylinder bore breaching barrel with parkerized finish, a Knoxx recoil reducing breacher pistol grip stock, and synthetic modular fore-end.

ii. 12 GAUGE BREACHING ROUNDS, cost: $5.00 per round, quantity: 25 rounds. The 12-Gauge TKO Breaching Round is a 12-Gauge shell loaded with a compressed zinc slug, utilizing smokeless powder as a propellant. The is a widely used method to breach door locks or hinges for entry during tactical operations.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(b) Purpose: The breaching shotgun is used to safely gain entry into a structure. When properly deployed, the TKO breaching round is capable of defeating door lock mechanisms, door knobs, hinges, dead bolts, safety chains, and pad locks on both wooden or hollow core doors. Upon impact with the target, the zinc slug disintegrates in~~–~~to a fine powder eliminating fragmentation. The Explosive Breaching Program, conducted in conjunction with the Mountain View Police Department, was established to provide the joint SWAT Team the ability to quickly create an opening in a wall or window to quickly enter a building for an emergency rescue of hostages. It is reserved for rescue operations only.

(c) Authorized Use: Subject to subsection (g) below, t~~T~~his equipment would only be deployed during a SWAT incident, and its use would need specific authorization from the Incident Commander. The equipment may only be used by a "tactical breacher" on the SWAT team. We currently do not have any authorized users at the Department.

(d) Lifespan:

i. Remington 870 MCS 12 Gauge Breaching shotgun: Approximately 15 years

ii. 12-Gauge TKO Breaching Round: Approximately 5 years

(e) Training: The training consists of an 80-hour course for a member of the SWAT Team specifically designated as the "breacher." At the conclusion of the course, the breacher must pass a test proctored by CAL/OSHA. The OSHA certification is valid for 5 years. Before the expiration of the certification, the breacher must retake and pass the test.

(f) Fiscal Impact: None, the weapon is not utilized.[Question: Even if the weapon is not utilized, doesn't the department have to ensure the weapon's efficacy for use through maintenance? If so, then there must eb a fiscal impact. If not, then why has this piece of equipment not been decommissioned and eliminated?]

(g) Legal and Procedural Rules: Use of the breaching shotgun and ammunition are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

(g) **Kaiser Precision Vulcan II Munitions Pole: Telescoping tool utilized by SWAT personnel to safely deliver approved noise/diversionary devices.**

(a) Description, quantity, capabilities, and purchase cost

i. KAISER PRECISION VULCAN II MUNITIONS POLE, cost: $2,000, quantity: 1. The munitions pole is a multi-purpose breaching tool, constructed of lightweight aluminum square tubing used to deploy distraction devices and chemical munitions in order to gain entrance into a building, structure or even a vehicle.

(b) Purpose: The munitions pole is used to safely deploy diversionary devices, chemical munitions, or other objects (cell phones, cameras) during SWAT

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

operations.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(c) Authorized Use: Subject to subsection (g) below, t~~T~~his equipment would be deployed during primarily during a SWAT incident, but could be utilized to gain entry into a residence during other high- ~~-~~risk operations on patrol.

~~(c)~~i. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of this weapon system.

(d) Lifespan: Approximately 10 years

(e) Training: Kaiser Precision provided an instructional video for individual and team training.

(f) Fiscal Impact: None, does not require annual maintenance

(g) Legal and Procedural Rules: Use of the munitions pole are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 317 (HIGH RISK OPERATIONS PROTOCOL), Policy 322 (SEARCH AND SEIZURE), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

(h) **CTS Flash-bang Training Kit:** The training flash-bangs are built and weigh exactly the same as it's equivalent live Flash-Bang, but have no flash charge.

(a) Description, quantity, capabilities, and purchase cost

i. CTS FLASH-BANG TRAINING KIT, cost: $964, Quantity 1 kit (comes with 70 reload Training Fuzes, 1 body), current fuze inventory is 25. The training bodies are painted with a bright blue coating, and can be used an unlimited number of times. The M201FB fuze for this system has 10 times the output of a normal M201 fuze and it is threaded with a left hand thread so it can not be accidentally used in any other munitions. The training devices produce an output of about 120db.

(b) Purpose: Flash-bangs are used to distract and temporarily immobilize dangerous suspects by overwhelming their senses of vision and hearing. The distraction gives Officers time to seize a moment and create an opportunity to take control of high-risk or dangerous situations.

(c) Authorized Use: Subject to subsection (g) below, SWAT operators may utilize the training flash-bangs as a training tool to distract and temporarily immobilize dangerous suspects by overwhelming their senses of vision and hearing. Los Altos Police Department does not have any live flash-bangs in the inventory. Our operators use live flash-bangs while on SWAT events or at training with Mountain View Police Department.

~~(c)~~i. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of this weapon system.

(d) Lifespan: 5 years

(e) Training: These are a training tool. SWAT operators must attend and pass an 80-hour SWAT training class. Flash-bang training is provided by an instructor

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

who has completed an 8-hour noise flash diversionary device course.

~~(e)~~(f) Fiscal Impact: MISSING SECTION, need to fill.

~~(f)~~(g) Legal and Procedural Rules: Use of the **live** flash-bangs are subject to the requirements of the SWAT Standard Operating Procedures for Mountain View/Los Altos. Use is also under Policy 317 (HIGH RISK OPERATIONS

PROTOCOL), Policy 322 (SEARCH AND SEIZURE), and Policy 414 (HOSTAGE AND BARRICADE INCIDENTS). It is the policy of the LAPD to utilize diversion devices only for official law enforcement purposes and pursuant to State and Federal law regarding the use of force.

(i) **Specialty Impact Munition (SIM) weapons and ammunition:** Simunition® is the pioneer and world leader in providing military, law enforcement and approved range members with the most realistic and non-lethal force-on-force, short range, simulation training system.

(a) Description, quantity, capabilities, and purchase cost

i. SIMUNITION GLOCK 17T, cost: $500 each, quantity: 8. The GLOCK Training Pistols were developed with the purpose of enabling reality-based tactical operations training using color marking or plastic projectile ammunition. When utilized in a pistol caliber barrel training platform (9mm), SIMs have an effective range of 25 feet.

ii. SIM CONVERTED BERETTA 92, cost: $500 each, quantity: 4. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized in a pistol caliber barrel training platform (9mm), SIMs have an effective range of 25 feet.

iii. HK MP5 CONVERSION KITS, cost: $500 each, quantity 2. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized with a training munition bolt carrier group in a 5.56mm rifle platform, SIMs have an effective range of approximately 27 yards.

iv. SIMUNITION COLT AR-15 CARBINE RIFLE UPPERS, cost: $1,000 each, quantity: 3. The Simunition® conversion kit, conversion bolt, bolt carrier assembly and safety-ring insert allow the FX® Marking Cartridges and the SecuriBlank® to be fired safely from the user's own service weapon. These easy-to-install kits help preclude the inadvertent chambering of live ammunition and ensure the proper operation and cycling of the weapons. When utilized with a training munition bolt carrier group in a 5.56mm rifle platform, SIMs have an effective range of approximately 27 yards.

v. FX MARKING CARTRIDGES, cost: $350 for 500 rounds, quantity: 3,500 rounds. The reduced-energy, non-lethal cartridges leave a detergent-based, water-soluble color-marking compound. The visible impacts allow accurate assessment of simulated lethality. They feature tactical accuracy up to 25 feet (7.6 meters).

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

(b) Purpose: Enabling reality-based, force-on-force tactical operations training using color marking or plastic projectile ammunition.

(c) Authorized Use: Subject to subsection (g) below, s~~S~~imunition weapons and marking rounds are non-operational rounds and non-operational weapons systems. These munitions provide for realistic close quarters firearms training while allowing the shooter to visually assess shot placement and accuracy in force on force training scenarios. These items are used for training purposes for all sworn staff members.

~~(c)~~i. Other situations not listed here may also be deemed authorized use cases under applicable penal code and case law, and shall reflect necessary, reasonable, and proportional use of this weapon system.

(d) Lifespan:

i. Simunition Glock 17T: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

ii. Sim Converted Beretta: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

iii. HK MP5 Conversion Kits: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

iv. Simunition Colt AR-15 Rifle Uppers: – 24-month limited warranty. No lifespan indicated by manufacturer. Lifespan varies on operational usage and wear.

v. FX Marking Cartridges: Shelf life five (5) years.

(e) Training: These are a training tool. Simunition Instructors attend an informative, three-day (24-hour) course designed to provide students with substantial hands-on experience with Simunition® FX® training ammunition technology, weapons conversion kits, and the Simunition® line of protective equipment. The course provides in-depth, hands-on instruction in scenario-based training program development and training methodology, and gives critical practical experience to students on the best use of Simunition® training products in a highly effective, realistic, extremely safe training program. Sworn staff members are given extensive firearms handling courses and weapons safety instruction to include the use of SIMs for training purposes.

~~(e)~~(f) Fiscal Impact: section MISSING, need to fill out or state None.

~~(f)~~(g) Legal and Procedural Rules: Use of the Simunition firearms and marking rounds are subject to the requirements of Policy 300 (USE OF FORCE) and Policy 312 (FIREARMS) while training. It is the policy of the Los Altos Police Department to utilize Simunition equipment only for official law enforcement training purposes, in accordance with all requirements under State and Federal law, including those regarding the use of force.

709.5 APPROVAL

The Chief of Police or the authorized designee shall obtain approval from the governing body by

way of an ordinance adopting the military equipment policy. As part of the approval process, the Chief of Police or the authorized designee shall ensure the proposed military equipment policy is submitted to the governing body and is available on the department website at least 30 days

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

prior to any public hearing concerning the military equipment at issue (Government Code § 7071). The military equipment policy must be approved by the governing body before the Department engages in any of the following ~~prior to engaging in any of the following~~ (Government Code § 7071):

(a) Request~~s~~ ~~ing~~ military equipment made available pursuant to 10 USC § 2576a.

(b) Seeki~~s~~ ~~ng~~ funds for military equipment, including but not limited to applying for a grant, soliciting or accepting private, local, state, or federal funds, in-kind donations, or other donations or transfers.

(c) Acquir~~es~~ ~~ing~~ military equipment either permanently or temporarily, including by borrowing or leasing.

(d) Collaborat~~es~~ ~~ing~~ with another law enforcement agency in the deployment or other use of military equipment within the jurisdiction of this department.

(e) Usi~~es~~ ~~ng~~ any new or existing military equipment for a purpose, in a manner, or by a person not previously approved by the governing body.

(f) Solicit~~s~~ ~~ing~~ or respond~~s~~ ~~ing~~ to a proposal for, or enter~~s~~ ~~ing~~ into an agreement with, any other person or entity to seek funds for, apply to receive, acquire, use, or collaborate in the use of military equipment.

(g) Acquiri~~es~~ ~~ng~~ military equipment through any means not provided above.

[Ed. Note: You did not include the assessment criteria for the governing body (see my note under 709.1). An alternative is to add a new section here called Policy Review and Approval (you would change all the number ordering below) and include the criteria there. I include these words here again for your consideration and, as stated before want to understand what legal barriers exist to including them.]

[SECTION TBD] The governing body shall only approve the military equipment use policy if all of the following are true (§7071 Subdiv (d) para (1) subpara (A)-(D)):
(a) Each military equipment is necessary for lack of a reasonable alternative.
(b) The military equipment use policy will safeguard the public's welfare, safety, civil rights, and civil liberties.
(c) The military equipment is reasonably cost effective.
(d) All current or prior non-confirming uses have been remedied to assure future compliance with policy
(e) All required components of the military equipment use policy are included in the policy presented for approval, including at least the following for each item of equipment (GC §7070 Subdiv (d) para (1)-(7)): a. Description
b. Purpose(s) and authorized use(s)
c. Fiscal impact, initial costs and maintenance costs
d. Legal and procedural rules that govern authorized use(s)
e. Training required
f. Mechanisms to ensure compliance, independent oversight, and legal consequences (sanctions) for violation of policy

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

g. Methods by which public engagement is achieved (complaints, concerns, questions, suggestions)

709.6 COORDINATION WITH OTHER JURISDICTIONS

Military equipment used by other law enforcement agencies that are providing mutual aid to this jurisdiction or otherwise engaged in law enforcement operations within this jurisdiction shall comply with their respective military equipment policies in rendering mutual aid.

709.7 ANNUAL REPORT

Upon approval of a military equipment policy, the Chief of Police or the authorized designee ~~should~~ shall submit a military equipment report to the governing body for each type of military equipment approved within one year of approval, and annually thereafter for as long as the military equipment is available for use (Government Code § 7072).

The Chief of Police or the authorized designee ~~should~~ shall also make each annual military equipment report publicly available on the department website for as long as the military equipment is available for use. The report shall include all information required by Government Code § 7072 for the preceding calendar year for each type of military equipment in department inventory.

Copyright Lexipol, LLC 2022/09/07, All Rights Reserved.
Published with permission by Los Altos Police Department

709.8 POLICY COMPLIANCE AND SUBMITTING COMPLAINTS

The Chief of Police or the authorized designee will ensure that all Los Altos Police Department employees comply with this policy. Suspected violations of the provisions set forth in this policy, or in other laws or policies governing the use of "military equipment", shall be handled in accordance with Los Altos Police Department Policy 340 (Standards of Conduct). Additionally, violations of the provisions set forth in this policy, or in other laws or policies governing the use of "military equipment", will be reported to the governing body via the annual Military Equipment Report.

Any member of the community can submit a complaint regarding the use of "military equipment" to any Los Altos Police Department employee or the Independent Intake Official. Complaints can be submitted in any form (e.g., in person, online, telephone, email, etc.). Once a complaint is received, it will be handled in accordance with Los Altos Police Department Policy 340 (Standards of Conduct) and LAPD Policy 1020 (Personnel Complaints). Formal complaints regarding alleged violations of this policy will be handled by an independent investigator.

[Ed. Note: while I applaud the addition of an independent investigator, I remain incredulous that this is the first time this term has been shown in this policy, located at the end of two substantial paragraphs.. This statement insufficiently describes the scope and authority of this role, where they sit in the Department or outside it, to whom they are accountable, if they will render consequences, and how the public will be informed of their work. This, coupled with the fact the IIO has no role other than intake, I remain unsatisfied that independent oversight has been manifested in this policy.

Complaints may be made directly to the Los Altos Police Department in one of the following ways (for online options, please visit https://www.losaltosca.gov/police/page/how-are-we-doing-0):

Subject: Commission Appointments – Parks and Recreation Commission, Design Review Commission, Planning Commission, Historical Commission, Public Arts Commission

Staff Recommendation:

Appoint applicants to fill the vacancies on the Parks and Recreation Commission, Design Review Commission, Planning Commission, Historical Commission, Public Arts Commission.

Subject: Commission Appointments – Parks and Recreation Commission, Design Review Commission, Planning Commission, Historical Commission, Public Arts Commission

Purpose

To fill existing or upcoming, due to expiration of terms, Commission vacancies.

Background

The City Council appoints individuals to serve on the various City Commissions and one Committee.

Except for Senior and Youth Commissioners, members are appointed to four-year terms and may serve a total of two consecutive terms plus the fulfillment of an unexpired term should they be so appointed.

Discussion/Analysis

Currently there are eleven (11) vacancies total across five (5) Commissions resulting in the following Commission seats to be filled:

Parks and Recreation Commission: One partial term expiring in March 2025

Design Review Commission: Two terms expiring in September 2026

Planning Commission: Three terms expiring in September 2026

Historical Commission; Four terms expiring in September 2026

Public Arts Commission: One partial term expiring in September 2025

On August 30, 2022, the City Council interviewed all but one of the applicants.

3. City of Los Altos Non-Profit and Civic Organization Contributions Audit Report

Initiated by:
City Council

Previous Council Consideration:
None.

Fiscal Impact:
The following policy will cost a varying amount depending upon the particular request from each organization.

Environmental Review:
Not applicable

Policy Question(s) for Council Consideration:
- Does the City Council want to establish a formal policy for any contributions to non-profit and civic organizations benefitting the Los Altos community?

Summary:
- City Council has historically approved contributions individually due to a lack of policy.
- This policy will allow different avenues for City Council to allocate contributions to Los Altos non-profit and civic organizations.
- This policy will increase transparency for residents during the budget process.
  This policy ensure the City meets its non-discretionary obligations for contracts and participation in JPAs.

Subject: City of Los Altos Non-Profit and Civic Organization Contributions Policy

Staff Recommendation:
Adopt the City of Los Altos Non-Profit and Civic Organization Contributions Policy.

Purpose
Create a common policy outlining the process and requirements for non-profit and civic organization contributions from the City of Los Altos.

Background
The City of Los Altos has historically allocated funds to organizations. The City also allocates funds annually as legally required through contracts or participation in Joint Powers Authority (JPA) agreements.

The City Council directed staff to create a formal process for discretionary requests and contributions that could be implemented during the next regular budget cycle. The recommended policy will also make a distinction between the discretionary contributions to organizations, and the non-discretionary allocations, such as contract payments or participation in a JPA.

In the current budget year, the City has provided discretionary funds to:

- WomenSV ($20,000)
- The Los Altos Chamber of Commerce ($60,000)

The City provided non-discretionary funds, through contracts or JPA participation, as follows:

- The City of Los Altos has a signed contract with the Los Altos History Museum in the amount of $65,000 annually.
- The City of Los Altos has a Joint Powers Agreement with Town of Los Altos Hills, City of Mountain View, Los Altos School District, Mountain View School District, Mountain View-Los Altos Union High School District, and Whisman School District for Counseling & Mental Health Services (CHAC) in the amount of $49,000.

Discussion/Analysis
In an effort to increase transparency and budget certainty, the City Council directed staff to recommend a policy for contributions to non-profit and civic organizations. Additionally, this policy will create a distinction between discretionary and non-discretionary allocations.

City staff researched other cities' policies and created a policy that allows non-profit and civic organizations to request their contributions as part of the annual budget process. The most efficient use of time and resources is to consolidate this review so City Council will only need to complete one review of all non-profit and civic organization contribution requests annually. City staff will complete an initial review to verify that the organization has met all requirements for the program without any prior or outstanding issues with the City and will then incorporate initially-qualified

Subject: City of Los Altos Non-Profit and Civic Organization Contributions Policy

requests into the budget for a review by City Council through the budget adoption process. City Council will retain final authority to approve or deny these discretionary funding requests.

All requirements for applicants are outlined in the resolution and reiterated through the application form attached to this agenda report.

In addition to discretionary funding requests, the City also provides funding to organizations that are not discretionary. Funding that takes place as part of a contractual obligation or participation in a JPA will also be included in the budget process, but will not be listed as discretionary.

The City Council may opt to enter into contracts with organizations as opposed to reviewing and approving certain expenditures on an annual basis. Contracts would allow long-standing organizations to not request funding annually while still meeting annual reporting requirements to verify that the funds are spent properly.

Recommendation

The staff recommends adoption of the City of Los Altos Non-Profit and Civic Organization Contributions Policy.

RESOLUTION NO. 2022-___

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LOS ALTOS DEFINING A NON-PROFIT AND CIVIC ORGANIZATION CONTRIBUTIONS POLICY

WHEREAS, the City of Los Altos has historically allocated funds to a number of non-profit and civic organizations every year in the budget ;and

WHEREAS, City Council expressed a desire to create a formal process ;and

WHEREAS, The purpose of this policy is to establish a process for non-profit and civic organizations to request funding contributions from the City Council ;and

WHEREAS, The policy is intended to allow the City Council to fully evaluate all funding requests at one time with budget appropriation.

NOW THEREFORE, BE IT RESOLVED, that the City Council of the City of Los Altos hereby adopts the following policy:

City of Los Altos requires all organizations interested in funding to provide the completed "City of Los Altos Non-Profit and Civic Organization Contribution Application" and all other required documents to City staff by January 1st of every year for consideration in the next budget cycle. These applications will be considered annually as part of the budget process.

1. Applicant Criteria
    a. The organization must be a non-profit or civic organization.
    b. The organization must provide a direct benefit to the Los Altos community.
    c. Current recipients may be given priority.

2. Application Availability and Deadline
    a. Applications for the next Fiscal Year (July-June) will be available on the City's website annually in October.
    b. Completed applications will be due annually on January 1st of every year.
    c. For example, organizations that are requesting a contribution for FY 23-24 must submit by January 1, 2023 in order to allow time for staff review and preparation of the appropriate budget documents.

3. Review and Approval Process
    a. Applications will be reviewed by City staff.
    b. Funding applications and details will be included annually in the budget development or mid-cycle budget review process.
    c. The City Manager will make recommendations on funding to the City Council based on established Council priorities and funding constraints.

d. The City Council shall award and include final funding within the budget.
e. Once approved, the City and the organization will enter into a contract, where the organization must meet all requirements outlined in the contract.

4. Reporting Requirements
    a. An annual report must be submitted by July 30 for the prior fiscal year from the organization.
    b. The report shall include a record of the use of City funds and information that provides details on the organization's impact to the community.
    c. City Council or staff may impose additional reporting requirements as necessary.
    d. If an organization does not submit their annual report, funding will be withdrawn for the next fiscal year.

5. Contribution Length
    a. The organization may either apply for a one-year or multi-year contract, which requires that the organization only apply when their contract runs out.
    b. Organizations that select longer than one year will still be required to submit their annual report on the prior fiscal year's the use of City funds annually.

I HEREBY CERTIFY that the foregoing is a true and correct copy of a Resolution passed and adopted by the City Council of the City of Los Altos at a meeting thereof on the ___ day of ____, 2022 by the following vote:

AGENDA REPORT SUMMARY

Meeting Date: September 20, 2022

Subject Consider approval of the updated License Agreement with SFPUC for Hetch Hetchy Trail in Los Altos; find that the approval of the agreement is exempt from review under the California Environmental Quality Act ("CEQA") pursuant to CEQA Guidelines Section 15301 (Existing Facilities).

Prepared by: Manny A. Hernandez, Parks and Recreation Director
Approved by: Gabriel Engeland, City Manager

Attachment(s):
1. Updated License Agreement between San Francisco Public Utilities Commission and the City of Los Altos.
2. Hetch Hetchy Regional Water System Amendment to the Right of Way Integrated Vegetation Management Policy.
3. Land Use Permit Dated February 4, 1987 (P3137B)

Initiated by:
Staff

Previous Council Consideration:
None

Fiscal Impact:
None

Environmental Review:
The approval of the updated license agreement is exempt from review under the California Environmental Quality Act ("CEQA") pursuant to CEQA Guidelines Section 15301 (Existing Facilities) in that the only work required under the agreement is limited to the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of existing or former use, and none of the circumstances identified in CEQA Guidelines Section 15300.2 applies.

Subject: Updated License Agreement with SFPUC for Hetch Hetchy Trail in Los Altos

---

Policy Question(s) for Council Consideration:

- Does City Council desire to maintain usage of the easement on the SFPUC property as a public recreation trail?
    - If so, does City Council wish to amend the license agreement with the SFPUC under the proposed terms?

Summary:

- Keeping the SFPUC parcels open as a bicycle and pedestrian trail is important to the public
- There will be a noticeable impact when the vegetation along the trail is brought up to current vegetation management policy as mandated by SFPUC
- Protection and maintenance of the SFPUC infrastructure is vital
- Staff will work with SFPUC to maintain as much current vegetation as possible under the updated license agreement and vegetation management policy

Staff Recommendation:

Staff recommends the City Council authorize the City Manager to execute the updated license agreement with the San Francisco Public Utilities Commission for the continued use of the Hetch Hetchy Trail as a publicly accessible recreation trail that connects with Palo Alto across the Adobe Creek pedestrian bridge.

Direct staff to work with SFPUC to maintain as much current vegetation as possible while complying with the updated license agreement and vegetation management policy.

Purpose

Provide continued public bicycle and pedestrian access along the Hetch Hetchy Trail that connects with Palo Alto at the Adobe Creek pedestrian bridge and begin maintenance of three additional parcels located on the east side of Los Altos Avenue which are currently maintained by SFPUC.

Background

The San Francisco Public Utilities Commission ("SFPUC") is responsible for the delivery of potable water and the collection and treatment of wastewater for some 800,000 customers within the City of San Francisco; it is also responsible for the delivery of potable water to 26 other water retailers with a customer base of 1.8 million.

The City of Los Altos currently has a land use permit with the San Francisco Public Utilities Commission that allows the City to maintain SFPUC parcel numbers 236 and 237 (between Los Altos Ave. and the Adobe Creek pedestrian bridge) as a bike and pedestrian path that connects to Palo Alto along the Hetch Hetchy trail. As part of this land use permit the City is expected to maintain the landscaping along these parcels and are subject to approval by the SFPUC for any

modifications or improvements. There are three additional SFPUC parcels (numbers 233-A and portions of 232-A and 234-A) within City of Los Altos property that are not included in the current Land Use Permit, but would be incorporated into the permit if the recommended license agreement is approved by the City Council.

SFPUC will complete the maintenance of the parcels by removing vegetation that is not in conformance with their vegetation management policy regardless of whether or not the City agrees to an updated license agreement.

Discussion/Analysis

The San Francisco Public Utilities Commission is mandating updates to the current land use permit with the City of Los Altos that would allow for the continued public use of the Hetch Hetchy trail as a bike and pedestrian trail that connects to Palo Alto across Adobe Creek. The required updates will be part of a License Agreement between the SFPUC and the City of Los Altos.

As part of the license agreement, the City of Los Altos will be expected to maintain all or a portion of three additional parcels of land between Los Altos Avenue and Mercedes Avenue, as well as maintain both parcels included in the current Land Use agreement, in accordance with the SFPUC amended Right of Way Integrated Vegetation Management Policy. The initial work to bring the vegetation up to the SFPUC amended policy will be done by the SFPUC before handing over maintenance duties to the City.

According to the SFPUC Vegetation Management Policy, it is established to manage vegetation on the transmission, distribution and collection systems within the SFPUC Right of Way so that it does not pose a threat or hazard to the system's integrity and infrastructure or impede utility maintenance and operations. The existence of large woody vegetation and water transmission lines within the right of way are not considered compatible. Roots can impact transmission pipelines by causing corrosion. The existence of trees and other vegetation directly adjacent to pipelines makes emergency and annual maintenance very difficult, hazardous, and expensive, and increases concerns for public safety. The risk of fire within the ROW is always a concern and the reduction of fire ladder fuels within these corridors is another reason to modify the vegetation mosaic. One of the other objectives of this policy is to reduce and eliminate as much as practicable the use of herbicides on vegetation within the right of way and to implement integrated pest management.

The following is a guideline for the size at maturity of plants (small trees, shrubs, and groundcover) that may be permitted to be used as landscape materials. Note: All distance measurements are for mature trees and plants measured from the edge of the drip-line to the edge of the pipeline.

- Plants that may be permitted to be planted directly above existing and future pipelines: shallow rooted plants such as ground cover, grasses, flowers, and very low growing plants that grow to a maximum of one foot in height at maturity.
- Plants that may be permitted to be planted 15–25 feet from the edge of existing and future pipelines: shrubs and plants that grow to a maximum of five feet in height at maturity.
- Plants that may be permitted to be planted 25 feet or more from the edge of existing and future pipelines: small trees or shrubs that grow to a maximum of twenty feet in height and fifteen feet in canopy width.

Trees and plants that exceed the maximum height and size limit (described above) may be permitted within a leased or licensed area provided they are in containers and are above ground. Container load and placement location(s) are subject to review and approval by the SFPUC. Low water use plant species are encouraged and invasive plant species are not allowed. All appurtenances, vaults, and facility infrastructure must remain visible and accessible at all times.

City of Los Altos staff has evaluated the maintenance plan for the current and added parcels to this license agreement and it is not expected to add significant cost or labor hours to the Park Maintenance Division of the Parks and Recreation Department. Under the SFPUC amended Vegetation Management Policy, staff has concluded that maintenance can be accomplished within the current operating budget and maintenance crew staffing levels. There is no expected fiscal impact.

It is anticipated that a significant amount of existing vegetation on the trail will be removed by the SFPUC in order to bring it into compliance with the amended Right of Way Integrated Vegetation Management Policy. City staff has reached out to the residents and trail users in that area to assist in answering questions and relay concerns to the SFPUC. Staff is also working with the SFPUC to prepare the area and surrounding residents for the initial vegetation removal.

Recommendation

The staff recommends the City Council authorize the City Manager to execute the Revocable License Agreement with the San Francisco Public Utilities Commission.

SAN FRANCISCO PUBLIC UTILITIES COMMISSION
REVOCABLE LICENSE

(Replacing and Superseding Four (4) SFPUC Real Estate Agreements identified in Section 2 of this License)
(License #P4550)

THIS REVOCABLE LICENSE (this "**License**") dated for reference purposes only as of _____, 2022 (**"Effective Date"**), is made by and between the CITY AND COUNTY OF SAN FRANCISCO, a municipal corporation ("**City**"), acting by and through its Public Utilities Commission ("**SFPUC**"), and CITY OF LOS ALTOS, a California municipal corporation ("**Licensee**"). City and Licensee are sometimes collectively referred to in this License as the "**Parties**" or singularly as a "**Party**." This License is entered into with reference to the following facts and understandings of the Parties.

RECITALS

A. City owns certain real property under the SFPUC's jurisdiction in the City of Los Altos commonly referred to as the Bay Division Pipeline No. 3 and 4 right of way ("**Right of Way**").

B. Pursuant to that certain Revocable Permit entered into by and between City and Licensee, dated April 4, 1961 ("**GEN-0215**"), City granted Licensee permission to use a portion of the Right of Way designated as SFPUC Parcel No. 236 for a street extension and a six-foot (6') sewer line, as shown on drawings prepared by George S. Nolte, Consulting Civil Engineer's, Inc., Sheet 1 of Job No. 246-60 entitled "Improvement Plan Tract No. 2930 Preliminary Los Altos, California" and dated March of 1961, and attached hereto as **Exhibit B-1**.

C. Pursuant to that certain Revocable Permit entered into by and between the City and Licensee, dated May 21, 1963 ("**GEN-0687**"), City granted Licensee permission to use a portion of the Right of Way designated as SFPUC Parcel Nos. 232A, 233B and 234A for Licensee's use as a cul-de-sac, storm drain and a ten-foot (10') fire department access roadway, as depicted in the attached San Francisco Water Department Drawing B-2518, attached hereto as **Exhibit B-2**.

D. Pursuant to that certain Land Use Permit entered into by and between City and Licensee, dated May 9, 1972 ("**GEN -1339**"), City granted Licensee permission to use a portion of the Right of Way, designated as SFPUC Parcels Nos. 234A and 236 for the purpose of street widening and landscaping, as reflected in the drawing attached hereto as **Exhibit B-3**. GEN-0215 together with GEN-0687 and GEN-1339 are collectively referred to as the "**Engineering Permits**".

E. Pursuant to that certain Land Use Permit entered into by and between the City and Licensee, dated June 12, 1974 ("**Permit No. 3137**"), City granted Licensee permission to use a portion of the Right of Way, designated as SFPUC Parcel Nos. 234-A, 236, and 237 for the construction of landscaping and a bicycle path, including a pedestrian bridge, in accordance with the drawing entitled "Preliminary Landscape Plan," dated July 11, 1973 (revised March 21, 1974)

prepared by Royston, Hanamoto, Beck & Abey, Landscape Architects ("**Landscaping Plans**"), and that set of Plans prepared by George Nolte and Associates, drawing Numbers 6070-73, sheets, 2,3,4 and 5, dated May 1974 and attached hereto as **Exhibit B-4** ("**Bridge Plans**"). The pedestrian bridge shall hereinafter be referred to as the "**Bridge**".

F. Pursuant to that certain Land Use Permit entered into by and between the City and Licensee, dated February 4, 1987, and effective retroactively as of December 1, 1985 (**"Permit No. 3137B**"), which superseded and revoked Permit No. 3137, City granted Licensee permission to use portions of the Right of Way, being the entirety of SFPUC Parcel No. 233-A, and portions of SFPUC Parcel Nos. 232-A, 234-A, 236 and 237, as depicted on San Francisco Water Department drawing C-1061-1, attached hereto as **Exhibit B-5** for a bicycle path, including the Bridge, and landscaping purposes in accordance with the Landscaping Plans, the Bridge Plans attached hereto as **Exhibit B-4**, and the drawings from the Licensee, dated November 19, 1985, showing added permit area for Licensee, attached hereto as **Exhibit B-6**.

G. Permit No. P3137B was amended by that certain letter from City to Licensee, dated April 22, 2005 ("**Letter Amendment**"), wherein City, in response to Licensee's request set forth in that certain letter from Licensee to City dated March 22, 2005 ("**Amendment Request**"), agreed to remove the entirety of Parcel 233-A and portions of Parcels 232-A and 234-A from the permit area governed by Permit No. 3137B, thereby leaving Parcels 236 and 237 as areas permitted for Licensee's use.

H. City and Permittee now desire to enter into this License to, among other things: (a) add back to the areas permitted for Licensee's use portions of the Right of Way, designated as the entirety of SFPUC Parcel Nos. 233-A and 233-B, and portions of SFPUC Parcel Nos. 232-A and 234-A, that were removed under the Letter Amendment; and (b) revoke, supersede and replace the Engineering Permits and Permit No. 3137B with the terms contained in this License.

AGREEMENT

NOW, THEREFORE, for and in consideration of the foregoing Recitals, which are incorporated into this License by this reference, the mutual covenants and obligations of the Parties contained in this License, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties hereby agrees as follows.

BASIC LICENSE INFORMATION

The following is a summary of basic license information ("**Basic License Information**"). Each item below shall be deemed to incorporate all of the terms set forth in this License pertaining to such item. In the event of any conflict between the information in this Section and any more specific provision of this License, the more specific provision shall control.

City:	CITY AND COUNTY OF SAN FRANCISCO, acting by and through its Public Utilities Commission
Licensee:	CITY OF LOS ALTOS, a California municipal corporation

Combined License Area (**Section 1 and Section 5(b)):**	The Combined License Area shall consist of the Pathway Area and the Maintenance Area.
Pathway Area:	Approximately 80,000 square feet, consisting of SFPUC Parcel Nos. 236 and 237 in Los Altos, California, as more particularly described in the legal description attached as **Exhibit A** and as shown in the attached **Exhibit B**, together with any appurtenances.
Maintenance Area (Section 5(b)):	Approximately 50,000 square feet, consisting of portions of SFPUC Parcel Nos. 232-A and 234-A and the entirety of SFPUC Parcel Nos. 233-A and 233-B in Los Altos, California, as shown in the attached **Exhibit C**.
Term (**Section 2**):	Month-to-month commencing on the Commencement Date. Actual Commencement Date: _____
Pathway Area Permitted Acts (**Section 6(a)**):	The "**Permitted Acts**" within the Pathway Area include the following: **(i)** Maintaining in compliance with all applicable Laws and Disability and Safety Regulations (as defined in **Section 11**) four (4) disabled-access curb ramps ("**ADA Ramps**") in the locations shown on the engineering drawings attached as **Exhibit E**; **(ii)** operating, maintaining, and repairing an existing concrete-paved recreational pathway on the Pathway Area, as shown on **Exhibit B**; **(iii)** maintaining vegetation consisting of low-growing shrubs, grass and other plants in accordance with the SFPUC Vegetation Management Policy (**Exhibit F**); **(iv)** removing all non-compliant vegetation ("**Vegetative Encroachments**") that do not comport with the SFPUC Vegetation Management Policy (**Exhibit F**) and one (1) light pole, in strict accordance with **Section 3** ("**Encroachment Removal"**); **(v)** maintaining the Bridge; **(vi)** installing and maintaining signage on the Pathway Area in accordance with **Section 5(a)**;

	(vii) the use, maintenance, and repair of the street crossing at Estrellita Way, as shown on **Exhibit B-1**; **(viii)** the use, operation, maintenance, and repair of one (1) six- inch (6") sewer line at Estrellita Way, as shown on **Exhibit B-1**; **(ix)** the use, maintenance, and repair of the street widening at Los Altos Avenue that extends into the Combined License Area, as shown on **Exhibit B-3**; and **(x)** the use, maintenance, and repair of the street crossing and storm drain at Via Del Pozo, as shown on **Exhibit B-2**. The improvements to be installed or maintained by Licensee listed as items (i) and (ii) and (v) through (x) above are collectively referred to as the "**Permitted Improvements**".
Maintenance Area Permitted Acts (**Section 5(b)**):	The "**Permitted Acts**" within the Maintenance Area include the maintenance of the surface of the parcels owned by City and identified on the attached **Exhibit C** (the "**Maintenance Area**"): **(i)** the mowing of grass, removal of weeds, and trimming or removal of trees when necessary in accordance with the SFPUC Vegetation Management Policy or at the discretion of the SFPUC Right of Way Manager and, in any event, at least twice each calendar year, and **(ii)** the regular (at least once every calendar month) removal of trash, debris, and graffiti as reasonably required or necessary to keep the Maintenance Area in a safe, sanitary, and sightly condition and to prevent the existence of a nuisance on the Maintenance Area.

City and Licensee agree as follows:

1. License; Supersession and Revocation.

(a) License. City confers to Licensee a revocable, personal, non-exclusive, and non-possessory privilege to enter upon and use that certain real property owned by City situated in the County of Santa Clara, State of California, as more particularly described in the attached **Exhibit A** and more particularly depicted on **Exhibit B** and **Exhibit C** (together, the "**Combined License Area**"), for the limited purpose and subject to the terms, conditions, and restrictions set forth below. This License gives Licensee a license only and notwithstanding anything to the contrary in this License, it does not constitute a grant by City of any ownership, leasehold, easement, or other property interest or estate whatsoever in any portion of the Combined License Area. Nothing in this License shall be construed as granting or creating any franchise rights pursuant to any federal, state, or local laws.

THE PRIVILEGE GIVEN TO LICENSEE UNDER THIS LICENSE IS EFFECTIVE ONLY INSOFAR AS THE RIGHTS OF CITY IN THE COMBINED LICENSE AREA ARE CONCERNED, AND LICENSEE SHALL OBTAIN ANY FURTHER PERMISSION NECESSARY BECAUSE OF ANY OTHER EXISTING RIGHTS AFFECTING THE COMBINED LICENSE AREA. WITHOUT LIMITING THE FOREGOING, THIS LICENSE IS BEING ISSUED SUBJECT AND SUBORDINATE TO ALL OF THE TERMS AND CONDITIONS OF THAT CERTAIN DEED (A) DATED AUGUST 4, 1949, AND RECORDED IN BOOK 1921, AT PAGE 268, OF OFFICIAL RECORDS OF SANTA CLARA COUNTY, AND (B) DATED JANUARY 3, 1950 AND RECORDED SEPTEMBER 5, 1950 IN BOOK 2047, AT PAGE 466 OF OFFICIAL RECORDS OF SANTA CLARA COUNTY, AND (C) DATED SEPTEMBER 21, 1950, AND RECORDED NOVEMBER 20, 1950 IN BOOK 2099, AT PAGE 9, OF OFFICIAL RECORDS OF SANTA CLARA COUNTY, AND (D) DATED MAY 16, 1950, AND RECORDED IN BOOK 1994 AT PAGE 182 OF THE OFFICIAL RECORDS OF SANTA CLARA COUNTY, AND (E) DATED MARCH 1, 1950, AND RECORDED MARCH 2, 1950 IN

BOOK 1937 AT PAGE 565 IN THE OFFICIAL RECORDS OF SANTA CLARA COUNTY, PURSUANT TO WHICH CITY ACQUIRED ITS INTEREST IN THE COMBINED LICENSE AREA, COPIES OF WHICH ARE ATTACHED TO THIS LICENSE AS **EXHIBIT D (**THE "**DEEDS**"), AND ALL OTHER EXISTING AND FUTURE DOCUMENTS AND INSTRUMENTS OF RECORD AFFECTING THE COMBINED LICENSE AREA (COLLECTIVELY, WITH THE DEEDS, THE "**RECORDED DOCUMENTS**"). LICENSEE MUST SECURE ALL ADDITIONAL NECESSARY APPROVALS, PERMITS, LICENSES, AND CONSENTS, AND DELIVER ALL NECESSARY NOTICES, BEFORE COMMENCING WORK IN THE COMBINED LICENSE AREA, INCLUDING ANY APPROVALS, PERMITS, LICENSES, CONSENTS, OR NOTICES REQUIRED FROM OR TO THE GRANTORS UNDER THE RECORDED DOCUMENTS. FOR CITY'S BENEFIT, LICENSEE COVENANTS AND AGREES THAT LICENSEE SHALL FULLY COMPLY WITH THE TERMS AND CONDITIONS OF THE RECORDED DOCUMENTS AND ANY OTHER RULES AND REGULATIONS PROMULGATED BY CITY AS THEY APPLY TO ANY WORK TO BE PERFORMED OR FACILITIES TO BE INSTALLED BY LICENSEE ON THE COMBINED LICENSE AREA PURSUANT TO THIS LICENSE, AND CITY SHALL HAVE NO RESPONSIBILITY OR LIABILITY OF ANY KIND WITH RESPECT THERETO. LICENSEE ACKNOWLEDGES AND AGREES THAT NEITHER CITY NOR ANY OF ITS DEPARTMENTS, COMMISSIONS, OFFICERS, DIRECTORS, AND EMPLOYEES, AND ALL PERSONS ACTING BY, THROUGH, OR UNDER EACH OF THEM HAVE MADE, AND CITY DISCLAIMS, ANY REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED, CONCERNING THE PRESENT OR FUTURE SUITABILITY OF THE COMBINED LICENSE AREA FOR LICENSEE'S INTENDED WORK OR FACILITIES, THE IMPACT OF ANY TERM OR CONDITION OF THE RECORDED DOCUMENTS ON LICENSEE'S RIGHTS UNDER THIS LICENSE, OR THE ABILITY TO OBTAIN OR DELIVER, OR THE PROCEDURE FOR OBTAINING OR DELIVERING, ANY NECESSARY APPROVALS, LICENSES, PERMITS, CONSENTS OR NOTICES FROM OR TO THE GRANTOR UNDER THE RECORDED DOCUMENTS OR ANY OTHER PARTY WITH RESPECT TO ANY MATTERS CONTAINED IN THIS LICENSE.

(b) Supersession and Revocation. Effective as of the Commencement Date (defined in **Section 2** [Term of License] below), this License shall immediately supersede, replace, and revoke the following permits and agreements previously issued to Licensee by City, and each of such instruments shall be deemed to have terminated as of the Commencement Date and have no further force or effect thereafter; provided, however, that any provisions expressly stated to survive under any such permit shall continue; provided, further that such termination shall not nullify or release Licensee of any obligations accruing under any such instrument with respect to periods prior to the Commencement Date:

(i) the Engineering Permits; and

(ii) Permit P3137B.

2. Term of License; Suspension During Emergency or SFPUC Project; Early Termination.

(a) Term. The privilege conferred to Licensee pursuant to this License shall commence on the Actual Commencement Date, as shown in the Basic License Information and shall immediately expire upon written notice from City revoking this License. The Actual

Commencement Date is the date on which this License is executed and delivered by City following the SFPUC authorization and approval and the receipt of all fees and insurance certificates required to be provided by this License ("**Commencement Date**"). City may revoke this License at any time for Good Cause (as defined in **Section 2(c)**) without penalty, liability or expense of any kind to City, including, any obligation to reimburse Licensee for any improvements installed by Licensee; provided, however that in the event City revokes this License for any reason other than for Good Cause, City will, at the request of Licensee, reimburse Licensee for the cost of any improvements that have been installed by Licensee on the Pathway Area after the Commencement Date with the City's prior written consent, less straight line depreciation for such improvements, assuming a ten (10) year useful life. Notwithstanding the foregoing, City and Licensee herby acknowledge and agree that City will not and shall have no obligation to reimburse Licensee for any improvements that have been installed: (1) by Licensee without Licensee's prior written consent; (2) by another party; or (3) by Licensee below the surface of the City's parcels or within any public right of way on the City's parcels. Upon termination of this License, Licensee will immediately surrender the Combined License Area in the condition required by this License.

(b) Suspension during Emergency or SFPUC Project. In the event that an emergency requires City repairs or construction on or about the License Area ("**Emergency Work**") or City determines to undertake a capital improvement, upgrade, replacement, or repair project ("**SFPUC Project**") within the License Area, City, at its sole option in lieu of revocation of this License, may declare that the Parties' respective rights and obligations pursuant to this License with respect to all or any portion of the License Area will be suspended during the course of any such Emergency Work or SFPUC Project, as the case may be. Accordingly, upon no less than sixty (60) days' prior written notice from City to Licensee, except in the case of an emergency, where City may suspend this License by giving such notice as reasonably practicable under the circumstances, this License will be suspended for the duration of the SFPUC Project or Emergency Work with respect to the License Area, or the portion of the License Area designated by City, until City notifies Licensee that such SFPUC Project or Emergency Work is complete. Upon any receipt of any such City suspension notice, Licensee shall surrender all or the portion of the License Area subject to suspension when and as required by City and promptly coordinate with City to accomplish the removal of any of Licensee's personal property from the License Area subject to such suspension in accordance with Section 14 [Removal or Alteration of facilities or Improvements]. At its discretion, City may fence the portion of the License Area required for the SFPUC Project or Emergency Work. Upon completion of the SFPUC Project or Emergency Work, City will remove any such fencing and restore the surface of the License Area level with adjacent ground, with grass or gravel at the surface, and not to its previous condition, and this License will apply again to the entire License Area. City's rights under this Section are in addition to and cumulative with those described in Section 6(b) [Subject to City Uses] below.

(c) Early Termination. If Licensee fails to comply with the terms and conditions of this License and such failure is not cured by Licensee within five (5) business days of City's notice to Licensee specifying such failure, or in the case of a non-compliance that cannot be cured within five (5) business days, Licensee both fails to cure such non-compliance within such five (5)- day period and fails to diligently pursue such cure to completion on or before the date that is thirty (30) days after the City's initial notice of Licensee's failure to comply, such non-compliance shall constitute "**Good Cause**" for City to revoke this License, and this License shall terminate thirty (30) days after City's notice of termination to Licensee, and if City directs Licensee (at City's sole discretion) to remove all equipment and installations from the License Area, then Licensee shall

forthwith remove such equipment and installations at Licensee's cost and shall restore the License Area to its former condition as of the Effective Date of this License.

3. Encroachment Removal. Licensee's compliance with this Section is partial consideration for City's issuance of this License.

(a) Initial Removal of Vegetative Encroachments; Communications.

(i) Within two hundred seventy (270) days of the Commencement Date ("**Initial Removal Period**"), Licensee shall remove, at its sole cost, Vegetative Encroachments as follows: **(A)** on the northern portion of the Pathway Area, Licensee shall remove all Vegetative Encroachments from the ground and airspace within fifteen feet (15') from the edge of SFPUC Bay Division Pipeline No. 3 and **(B)** on the southern portion of the Pathway Area, Licensee shall remove all Vegetative Encroachments from the ground and airspace within fifteen feet (15') from the edge of the SFPUC Bay Division Pipeline No. 4 ("**Initial Removal**"). Within the first thirty (30) days of the Initial Removal Period, City and Licensee will meet to review the trees on the License Area and designate any trees that do not constitute Vegetative Encroachments to ensure these trees are not removed from the License Area; provided, however, that City reserves the right to make the final determination regarding which trees pose unacceptable risks to the SFPUC facilities and must be removed.

(ii) In accordance with Section 3(g) below, Licensee is responsible for all communications with third parties, including members of the public, regarding the removal of the Vegetative Encroachments, including, without limitation, any pruning and tree removal.

(iii) Licensee shall remove other Vegetative Encroachments to conform to the requirements of **Section 3 (h)**.

(b) Phase Two Removal of Vegetative Encroachments. Within three hundred sixty-five (365) days of the Commencement Date ("**Phase Two Removal Period**"), Licensee shall remove, at its sole cost, Vegetative Encroachments on the southern portion of the Pathway Area from the ground and airspace within twenty feet (20') from the edge of the SFPUC Day Division Pipeline No. 4. In accordance with Section 3(g) below, Licensee is responsible for all communications with third parties, including members of the public, regarding the removal of the Vegetative Encroachments, including, without limitation, any pruning and tree removal.

(c) Continuing Vegetative Encroachments Removal Obligations. Following the Phase Two Removal Period, Licensee shall remove Vegetative Encroachments every other year, or annually at the SFPUC Right of Way Manager's direction, as follows: **(i)** on the northern portion of the Combined License Area, as depicted on **Exhibit B**, Licensee shall remove all Vegetative Encroachments from the ground and airspace within fifteen feet (15') from the edge of SFPUC Bay Division Pipeline No. 3 and **(ii)** on the southern portion of the Combined License Area, as depicted on **Exhibit B**, Licensee shall remove all Vegetative Encroachments from the ground and airspace within twenty feet (20') from the edge of the

SFPUC Bay Division Pipeline No. 4. Licensee shall keep the Combined License Area clear of regrowth of foliage as is necessary to retain vertical clearance above SFPUC facilities. Licensee shall remove all young seedlings, regrowth, and shrubs as the SFPUC's Right of Way directs as necessary to prevent future Vegetative Encroachments.

(d) **Annual Meetings**. Licensee shall meet with the SFPUC Right of Way Manager annually, promptly upon the SFPUC's request, to inspect the Combined License Area and expeditiously resolve any issues regarding Licensee's compliance with this Section.

(e) **Light Pole Removal**. Licensee shall remove the light pole located at the west side of Estrellita Way within the Pathway Area within sixty (60) days of the Commencement Date.

(f) **Other Encroachment Removal**. Licensee shall cause all Encroachments (as defined below) to be removed in accordance with the SFPUC's Encroachment Policy (attached as **Exhibit G**). This obligation applies to Encroachments discovered by, or reported to, Licensee and City. Licensee shall enforce Laws (as defined below) related to Encroachments within the Combined License Area. "**Encroachments**" are improvements (as defined in Section 8 [Restrictions on Use]) or vegetation within the Combined License Area not approved by City.

(g) **Communications**. During the term of this License, Licensee shall inform property owners adjoining the Combined License Area, and respond to third party inquiries, if any, of Licensee's efforts to remove the Vegetative Encroachments and/or Encroachments from the Combined License Area. The SFPUC will inform Licensee by written notice of any known third-party violations of the SFPUC's Encroachment Policy, Vegetation Management Policy, or related guidelines (and risks resulting from such violations) occurring in and on the Combined License Area. Licensee to sign reasonable requests from City for Licensee to co-sign SFPUC correspondence to applicable third parties regarding any such violations.

(h) **Vegetative Encroachment Removal Standards**. Licensee shall retain, at its cost, an International Society of Arboriculture Certified Arborist to oversee removal of Vegetative Encroachments. Licensee shall conduct all Vegetative Encroachment removal in accordance with applicable Laws (as defined below), including restrictions regarding nesting birds. Consistent with the Migratory Birds Treaty Act, 16 U.S.C. §§ 703–712, trees will be removed and, or pruned outside of nesting bird season which extends from February 15th through August 15th; or, if removal and or trimming is proposed during the nesting season, Licensee will, at its cost, retain a biologist to inspect the trees in advance of work and, if active nests are present, work will be delayed until nestlings have fledged.

4. **Permitted Encroachments**. City will allow Licensee to maintain the following existing encroachments (together, "**Permitted Encroachments**") installed by Licensee within the Pathway Area in their current locations on the Pathway Area:

(a) three (3) wooden trail signs;

(b) five (5) wooden benches;

(c) three (3) garbage cans;

(d) two (2) bicycle safety signs;

(e) one (1) water fountain;

(f) one (1) backflow preventor; and

(g) one (1) concrete bench.

Licensee acknowledges that City may require Licensee to remove any or all Permitted Encroachments at the SFPUC's sole and absolute discretion. If City requires the removal of any or all Permitted Encroachments from the Pathway Area, Licensee shall remove any or all such Permitted Encroachments within thirty (30) days of City's notice to remove, except in an emergency when Licensee shall remove all such Permitted Encroachments as soon as possible. At its sole discretion, City may elect to remove any or all of the Permitted Encroachments itself, at Licensee's sole cost, by notifying Licensee of such fact, in which event Licensee shall pay City the cost of such removal within thirty (30) days after receipt of City's invoice. Licensee may use the Permitted Encroachments until they reach the end of their useful lives, as determined by City in its sole discretion, at which point, the SFPUC may require removal or relocation to a location approved by the City.

5. Consideration.

(a) Educational Signage. As partial consideration for City entering into this License, Licensee shall install and maintain, at its sole cost, at least one (1) educational sign on the Pathway Area in accordance with this Section. Licensee shall work with SFPUC staff to install one (1) sign within the Pathway Area within one-hundred eighty (180) days of the Commencement Date at a location to be approved by the SFPUC Land Engineering Division and the SFPUC Right of Way Manager. The size and content of any such sign shall be subject to the SFPUC's approval, in its sole discretion.

(b) Maintenance Area Obligations. As additional partial consideration for City entering into this License, Licensee will maintain the surface of the parcels comprising the Maintenance Area, located adjacent to the Pathway Area. As used in this **Section 5(b),** the terms "maintain," "maintenance," and "maintenance obligations," mean that, with respect to the Maintenance Area, Licensee shall be solely responsible to **(i)** mow grass, remove weeds, and trim or remove trees when necessary in accordance with the SFPUC Vegetation Management Policy or at the discretion of the SFPUC Right of Way Manager and, in any event, at least twice each calendar year, and **(ii)** regularly (at least once every calendar month) remove trash, debris, and graffiti as reasonably required or necessary to keep the Maintenance Area in a safe, sanitary, and sightly condition and to prevent the existence of a nuisance on the Maintenance Area.

In the course of maintaining the Maintenance Area, Licensee shall not do anything in, on, under, or about the Maintenance Area that could cause damage to or interference with any pipelines or other property located in, on, under, or about the Maintenance Area. Licensee shall use, and shall cause its employees, contractors, and agents to use, due care at all times to avoid any damage or harm to City's water pipelines or other property and natural attributes of the

Maintenance Area and to minimize slope erosion. Licensee shall not perform any excavation work without City's prior written approval, which City may withhold at its sole discretion. Under no circumstances shall Licensee damage, harm, or remove any rare, threatened, or endangered species that are present on or about the Maintenance Area.

Licensee's obligations to maintain the Maintenance Area shall continue until the earlier of the following dates: (1) the date Licensee receives City's notice terminating all of Licensee's then remaining maintenance obligations pursuant to this Section 5 (b) or (2) the date that this License is terminated. Licensee shall notify City in writing not less than five (5) days before performing any maintenance work on the Maintenance Area, except in the case of an emergency wherein Licensee shall notify City telephonically and in writing as soon as reasonably possible. For the purposes of the foregoing notice obligation, "maintenance work" shall not be deemed to include the mowing, or the weed, trash, debris, and graffiti removal regularly performed by Licensee pursuant to this Section. Notwithstanding the foregoing, at all times, City shall retain all of its property rights with respect to the Maintenance Area, including, without limitation, the right at all relevant times to enter upon, or over the Maintenance Area. If, at any time prior to the termination of Licensee's maintenance obligations pursuant to this **Section 5**(b), City notifies Licensee of deficiencies or failures in Licensee's performance of such obligations, Licensee shall promptly remedy or cure such deficiencies or failures.

6. Use of Combined License Area.

(a) Permitted Acts. Licensee may enter and use the Combined License Area for the sole purpose of performing the Permitted Acts (as defined in the Basic License Information) and in strict accordance with **Section 7(a)** [Approval of Plans and Specifications] below, and for no other purpose whatsoever. Except as specifically permitted by this License or otherwise approved by City pursuant to the terms of this License, Licensee shall not permit, construct, maintain, or allow any other improvements, structures, or paved areas on, across, within, over, or under the Combined License Area other than the Permitted Improvements and the Permitted Encroachments allowed on the Pathway Area.

(b) Subject to City Uses. Licensee is aware that the Combined License Area constitutes a portion of City's regional water pipeline delivery system. Notwithstanding anything to the contrary in this License, any and all of Licensee's activities pursuant to this License shall be subject and subordinate at all times to City's existing and future use of the Combined License Area for municipal and other purposes. City shall in no way be liable for any damage or destruction to Licensee's property and/or improvements resulting from the condition of the Combined License Area or the SFPUC facilities, from any pipeline break or from any pipeline repair or maintenance activities. At City's request, Licensee shall immediately remove any of Licensee's property or improvements from the Combined License Area to allow City access to the SFPUC facilities. If City deems it necessary, at City's sole discretion, City may remove any such property or improvements and City shall not be responsible for restoring or returning the same to its prior condition.

7. Installation and Maintenance of Facilities. Licensee may perform the Permitted Acts described in **Section 6(a)** [Permitted Acts] above and shall install certain facilities on the Pathway Area consisting of the signage required under **Section 5 (a)** [Educational Signage]. Licensee shall also maintain the ADA Ramps authorized by City under the consent letter issued by City prior to the Commencement Date (the "**Consent Letter**"). The ADA Ramps and signage to be installed

on the Pathway Area shall hereinafter collectively be referred to as the "**Facilities**") and shall be installed only upon satisfaction of the following conditions, which are for City's sole benefit:

(a) Approval of Plans and Specifications. Licensee shall install and maintain the permitted Facilities in accordance with plans and specifications (including drawings) approved in advance and in writing by the SFPUC and attached as **Exhibit E** ("**Approved Plans**"). The Approved Plans may be revised or amended only with the SFPUC's prior written approval after the SFPUC's Bureau of Environmental Management has determined that no further environmental review is required by CEQA as a result of any such revision or amendment.

(b) Energy Service and Related Facilities. If Licensee seeks electrical service for use in the Combined License Area, or for any licensed Facilities, Licensee shall contact the Interconnection Services Department in the Power Enterprise of the SFPUC to arrange for service. Licensee shall purchase all electricity necessary for its operations at the Combined License Area from the SFPUC, at the SFPUC's standard rates charged to third parties, unless the SFPUC determines, in its sole judgment, that it is not feasible to provide such service to the Combined License Area. The SFPUC is the provider of electric services to City property, and the SFPUC's Interconnection Services Department coordinates with Pacific Gas and Electric Company and others to implement this Section. Except as provided above with respect to any electricity services provided by the SFPUC, Licensee shall make arrangements and pay for all utilities and services furnished to the Combined License Area, including gas, electricity, water, sewage, telephone, and trash collection services, and for all deposits, connection, and installation charges.

Except as otherwise provided in this License, the SFPUC has no responsibility or liability of any kind with respect to any utilities that may be on or about the Combined License Area. Licensee has the sole responsibility to locate any utility facilities within the Combined License Area and protect them from damage resulting from Licensee's use of the Combined License Area.

(c) Permits, Licenses, and Approvals. Before beginning any permitted improvement or alteration work in the Combined License Area, Licensee shall obtain any and all permits, licenses, and approvals (collectively, "**Approvals**") of all regulatory agencies and other third parties that are required for Licensee to commence, complete, and maintain the permitted work. Promptly upon receipt of such Approvals, Licensee shall deliver copies of them to the SFPUC. No approval by the SFPUC for purposes of Licensee's work under this License shall be deemed to constitute the approval of any federal, state, or local regulatory authority with jurisdiction, and nothing in this License shall limit Licensee's obligation to obtain all such regulatory Approvals, at Licensee's sole cost.

(d) Limits of City's or SFPUC's Consent. City's or the SFPUC's consent to or approval of any improvements, equipment, or fixtures shall not relieve Licensee or its engineers, architects, or contractors from any liability for negligence, errors, or omissions associated with the design and construction of any such improvements, equipment, or fixtures. In no event shall the SFPUC's approval of plans or specifications be deemed to constitute a representation or warranty by City concerning the suitability of the improvements, equipment, or fixtures for Licensee's purposes or that the work called for in the plans and specifications complies with applicable building codes or other applicable Laws (defined in **Section 11** [Compliance with Laws] below), or industry standards, nor shall such approval release Licensee from its obligation to supply plans and specifications that conform to applicable building codes, other applicable Laws, and industry standards.

(e) Exercise of Due Care. Licensee shall use, and shall cause its Agents (defined in **Section 21** [Indemnity] below) to use, due care at all times to avoid any damage or harm to City's water pipelines, facilities, or other property and to native vegetation and natural attributes of the Combined License Area and to minimize slope erosion. Licensee shall not disturb the surface of the Combined License Area or perform any excavation work without City's prior written approval, which City may withhold at its sole discretion. City may condition and/or oversee any permitted excavation work. At its own expense, Licensee shall mark the location of City's water pipelines or other facilities within the Combined License Area and shall not use any pick, plow, or other sharp tool to remove the two feet of soil around the pipelines or other facilities, provided that Licensee may use hand shovels or pneumatic shovels in compliance with all other terms and conditions of this License. Licensee shall immediately inform City of any actual or potential damage to the coating of the pipeline, and any such damage shall be promptly repaired by Licensee, at its own expense, to City's satisfaction prior to backfilling; provided, at its sole discretion, City may elect to make any necessary repairs itself, at Licensee's sole cost, by notifying Licensee of such fact. Upon completion of the repairs, City shall send to Licensee a bill therefor, which Licensee shall pay within thirty (30) days following receipt. Under no circumstances shall Licensee damage, harm, or take any rare, threatened, or endangered species present on or about the Combined License Area.

(f) Cooperation with Public Utilities Commission. Licensee and its Agents shall work closely with City personnel to minimize any potential disturbance (even if temporary) of the natural features of the Combined License Area and to avoid disruption (even if temporary) of City facilities, in, under, on, or about the Combined License Area and City uses of such facilities.

(g) Heavy Equipment. Licensee shall not use any heavy construction equipment over or about City's pipelines, except as otherwise expressly allowed in **Section 8(i)** [Heavy Equipment and Vehicles] below.

(h) Work Schedule. Licensee must begin installation work, if at all, within ninety (90) days after the commencement of the term of this License. At least ten (10) business days prior to the commencement of any improvement or alteration work on the Combined License Area, Licensee shall notify City's Construction Inspector ("**Construction Inspector**"), at (650) 871-3015, of the date such work shall commence and the intended construction schedule. Notification must also be given to Underground Service Alert at least two (2) days prior to start of work. Notwithstanding the approval of such schedule by the SFPUC, the Construction Inspector shall have the right to require Licensee to adjust such schedule from time to time. All work must be performed during regular working hours (Monday through Friday) between 8:00 a.m. and 4:30 p.m., exclusive of City holidays. Any work performed during any other time or day must be preapproved by the SFPUC at least ten (10) business days prior to commencing such work. In connection with such approval, City may charge Licensee additional inspection fees payable prior to the SFPUC's approval of the request. Notwithstanding the work hours set forth above, Licensee shall comply with any applicable local ordinance that imposes later start times and/or earlier cessation times for construction activities. Licensee shall complete all work and restoration no later than (365) days after the commencement of the term of this License.

(i) Restoration of License Area. Immediately following completion of any work permitted under this License, Licensee shall remove all debris and any excess dirt and shall restore the Combined License Area to its condition immediately prior to such work, to City's satisfaction. Licensee shall restore any damage caused to existing roads and restore excavated areas with new

vegetation (including irrigation and maintenance until established) and erosion control netting, all as requested by City, and shall comply with all applicable regulations of the regulatory agency with jurisdiction.

(j) Pipeline Depth/Installation of Above-Ground Markers. Before commencing any excavation work in the Combined License Area, Licensee shall measure the depth of City's pipelines, if any, located in the Combined License Area by potholing and forward such information to City. Any potholing authorized by this License shall be subject to the requirements of **Section 7(p)** [Potholing] below. Upon completion of work, Licensee shall promptly notify City in writing of the depth of City's pipeline and related facilities in the Combined License Area. Licensee shall install above-ground markers identifying the location of any underground facilities installed pursuant to this License. The location, type, and installation of markers and identifying information on the markers shall be subject to the SFPUC's prior written approval.

(k) As-Built Drawings/Reports. Promptly upon completion of the installation of the Facilities, Licensee shall furnish the SFPUC with two (2) complete copies of final as-built drawings for the Facilities, which drawings shall include sufficient detail so as to allow City to precisely locate the Facilities. If Licensee or any of its Agents or consultants prepares any environmental, seismic, geophysical, or other written report relating to the Combined License Area and/or any work performed on the Combined License Area, Licensee shall furnish to City a complete copy of such report, including any schedules, exhibits, and maps, promptly upon completion of the same.

(l) Responsibility for Maintenance of Facilities. Licensee shall be solely responsible for repairing and maintaining all Facilities placed in or on the Combined License Area pursuant to this License or the Consent Letter in good and safe condition, and City shall have no duty whatsoever for any repair or maintenance of the Combined License Area or any such Facilities. Licensee shall notify City in writing not less than five (5) days before performing any repair or maintenance work in the Combined License Area, except in the case of an emergency when Licensee shall notify City telephonically and in writing as soon as reasonably possible.

(m) Revocability. The installation of the Facilities to the Combined License Area, regardless of cost, shall not in any way whatsoever limit City's right to revoke this License pursuant to its terms or any of City's other rights under this License.

(n) Contractors. Licensee shall not accept and release its contractor for work authorized or required by this License before securing the SFPUC's written approval.

(o) Cathodic and Other Protection. City may adopt from time to time such rules and regulations with regard to Licensee's Facilities and operations under this License as City may determine are necessary or appropriate, at City's sole discretion, to safeguard against corrosion of, or other damage to, City's pipelines and related facilities. Licensee shall immediately comply with all such rules and regulations upon receipt of a copy of such rules and regulations.

(p) Potholing. Any potholing authorized by this License shall be subject to the direction of City's Construction Inspector. Potholing using the soft dig method (vacuum soil extraction system) is preferred. If Licensee wishes to use any other mechanical method such as digging with a backhoe, License must submit a written request to the SFPUC at least five (5) business days prior to commencing such work and obtain the SFPUC's prior written consent.

Notwithstanding the foregoing, the last two feet (2') above the top of the pipe must be dug manually, without the use of any machines.

8. **Restrictions on Use**. The following uses (by way of example only) of the Combined License Area by Licensee, or any other person claiming by or through Licensee, are inconsistent with the limited purpose of this License and are strictly prohibited as provided below:

(a) **Improvements**. Except as otherwise expressly provided in this License, Licensee shall not construct or place any temporary or permanent structures or improvements in, on, under, or about the Combined License Area, nor shall Licensee make any alterations or additions to any existing structures or improvements on the Combined License Area, unless Licensee first obtains the SFPUC's prior written consent, which the SFPUC may give or withhold at its sole and absolute discretion. For purposes of this License, the term "**improvements**" includes asphalt, concrete, and cementitious driveways, sidewalks, and parking areas, shacks, storage facilities, and fences.

(b) **Trees and Other Plantings**. Licensee shall not plant any trees or other vegetation in or on the Combined License Area, except as otherwise expressly provided in this License and except in accordance with detailed plans consistent with the SFPUC's Vegetation Management Policy (attached as **Exhibit F**), which may be amended from time to time and as approved by the SFPUC in writing in advance.

(c) **Dumping**. Licensee shall not cause or permit the dumping or other disposal in, on, under, or about the Combined License Area of landfill, refuse, Hazardous Material (defined in **subsection (d)** [Hazardous Material] below), or any other materials, including materials that are unsightly or could pose a hazard to the human health or safety, native vegetation or wildlife, or the environment.

(d) **Hazardous Material**. Licensee shall not cause, nor shall Licensee allow any of its Agents or Invitees (defined in **Section 21** [Indemnity] below) to cause, any Hazardous Material to be brought upon, kept, used, stored, generated, released, or disposed of in, on, under, or about the Combined License Area, or transported to, from, or over the Combined License Area. Licensee shall immediately notify City when Licensee learns of, or has reason to believe that, a release of Hazardous Material has occurred in, on, under, or about any part of the Combined License Area. Licensee shall further comply with all applicable Laws requiring notice of such releases or threatened releases to governmental agencies, and shall take all action necessary or desirable to mitigate the release or minimize the spread of contamination. If Licensee or its Agents or Invitees cause a release of Hazardous Material, Licensee shall promptly return the Combined License Area to the condition immediately prior to the release, without cost to City, in accordance with all Laws, and using the highest and best technology available. In connection with such remedial action, Licensee shall afford City a full opportunity to participate in any discussion or negotiations with governmental agencies and environmental consultants regarding any settlement agreement, cleanup or abatement agreement, consent decree, or other compromise proceeding involving Hazardous Material, and any other abatement or cleanup plan, strategy, and procedure. For purposes of this License, "**Hazardous Material**" means material that, because of its quantity, concentration, or physical or chemical characteristics, is at any time now or hereafter deemed by any federal, state, or local governmental authority to pose a present or potential hazard to public health, welfare, or the environment. Hazardous Material includes the following: any material or substance defined as a "hazardous substance, pollutant or contaminant" pursuant to the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended,

42 U.S.C. Sections 9601 et seq., or pursuant to Section 25316 of the California Health & Safety Code or any other federal, state, or local Law; a "hazardous waste" listed pursuant to Section 25140 of the California Health & Safety Code; any asbestos and asbestos containing materials whether or not such materials are part of the Combined License Area or are naturally occurring substances in the Combined License Area; and any petroleum, including crude oil or any crude-oil fraction, natural gas, or natural gas liquids, provided, the foregoing shall not prohibit Licensee from traversing to, from, and across the Combined License Area in standard motor vehicles that do not exceed the weight limitations set forth below. The term "**release**" or "**threatened release**" when used with respect to Hazardous Material shall include any actual or imminent spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing in, on, under, or about the Combined License Area. Notwithstanding any contrary provision contained in this License, Licensee will not be responsible for any release of Hazardous Materials to the extent caused by any act or omission of the City.

(e) Nuisances. Licensee shall not conduct any activities in, on, under, or about the Combined License Area that constitute waste, nuisance, or unreasonable annoyance (including emission of objectionable odors, noises, or lights) to City, to the owners or occupants of neighboring property, or to the public, or that constitute waste or nuisance per se.

(f) Damage. Licensee shall not do anything in, on, under, or about the Combined License Area that could cause damage to or interference with any pipelines, facilities, or other property located in, on, under, or about the Combined License Area. Licensee will compensate City for any and all damage caused to the Combined License Area and City facilities resulting from the activities of Licensee and its Agents and Invitees, including damage resulting from defective work.

(g) Use of Adjoining Land. Licensee acknowledges that the privilege given under this License shall be limited strictly to the Combined License Area. Licensee shall not traverse over or otherwise use any adjoining lands of City.

(h) Ponding; Water Courses. Licensee shall not cause any ponding on the Combined License Area or any flooding on adjacent land. Licensee shall not engage in any activity that causes any change, disturbance, fill, alteration, or impairment to the bed, bank, or channel of any natural water course, wetland, or other body of water on, in, under, or about the Combined License Area, nor shall Licensee engage in any activity that could pollute or degrade any surface or subsurface waters or result in the diminution or drainage of such waters.

(i) Heavy Equipment and Vehicles. To prevent damage to City's underground pipelines, Licensee's use of vehicles and equipment within twenty feet (20') of each side of the centerline of any City pipeline (measured on the surface) shall be subject to the following restrictions:

(i) The depth of soil cover over the tops of City's pipelines must be at least three feet (3') for steel cylinder pipe and four feet (4') for reinforced pre-stressed concrete cylinder pipe to accommodate the loading defined in **subsection (ii)** below. If any equipment with axle loading exceeds the loads stated in **subsection (ii)** below or if the depth of soil cover is less than stated above, Licensee shall submit to the SFPUC for review and approval, at the SFPUC's sole discretion, engineering calculations prepared by a licensed Professional Engineer licensed in California showing that City's pipelines will not be adversely affected by Licensee's proposed

activities. If City's pipelines may be adversely affected, Licensee shall submit remedial measures for City's approval to ensure that no adverse effect will occur.

(ii) The effects of vehicle and equipment loads to the pipeline must not exceed the effects of the "AASHTO Standard H-10 Loading." H-10 loading is defined as loading caused by a two-axle truck with a gross weight of ten tons (20,000 lbs.), axles fourteen feet (14') apart, and rear axle carrying eight tons (16,000 lbs.). Licensee shall be responsible for providing the SFPUC adequate evidence that its equipment and vehicles meet the foregoing requirements.

(iii) Licensee shall not use vibrating compaction equipment without the SFPUC's prior written approval, which approval may be given or withheld at the SFPUC's sole discretion.

(iv) If the depth of the soil cover over the pipeline (determined by potholing or other proof procedure) is less than the minimum stated in **subsection (i)** above, unless an alternate method is approved by the SFPUC in writing, all excavation and grading over the pipeline shall be performed manually. For any machinery or equipment excavation and grading over and/or within twenty feet (20') of each side of the centerline of the pipeline (measured on the surface), Licensee shall submit a written proposal together with all supporting calculations and data to the SFPUC for review and approval. In any case, the two feet (2') of soil around the pipeline shall be removed manually or by other methods approved by the SFPUC with due care as provided in **Section 7(e)** [Exercise of Due Care] above.

9. **License Fee(s)**. Without limiting its right to revoke this License or any of its other rights under this License, at any time, upon not less than thirty (30) days' written notice to Licensee, City may charge a use fee for the privileges granted by this License if City establishes a general policy for charging fees for the use(s) permitted by this License, and City may increase such fee from time to time in accordance with such policy**.**

10. **Required Insurance Coverages**. Licensee's compliance with the provisions of this Section 10 shall in no way relieve or decrease Licensee's indemnification or other obligations under this License. Licensee must maintain in force for the use of the Combined License Area, during the full term of this License, insurance in the amounts and coverages listed below. In addition, Licensee shall cause each Agent (defined in Section 21 [Indemnity] below) performing work on the Combined License Area to procure and keep in effect during the course of such work appropriate amounts of insurance and add City as additional insureds for those respective policies.

(a) Commercial General Liability Insurance with limits not less than $3,000,000 each occurrence for Bodily Injury and Property Damage, including Contractual Liability, Personal Injury, Independent Contractors, Explosion, Collapse, and Underground (XCU), Broad Form Property Damage and Products, and Completed Operations.

(b) Commercial Automobile Liability Insurance with limits not less than $1,000,000 each occurrence, "Combined Single Limit" for Bodily Injury and Property Damage, including Owned, Non-Owned, and Hired auto coverage, as applicable.

(c) Workers' Compensation, in statutory amounts, with Employers' Liability Limits not less than $1,000,000 each accident, injury, or illness.

(d) Additional Insured Endorsements.

(i) The Commercial General Liability policy must be endorsed to name as Additional Insured the City and County of San Francisco, its Officers, Agents, and Employees.

(ii) The Commercial Automobile Liability Insurance policy must be endorsed to name as Additional Insured the City and County of San Francisco, its Officers, Agents, and Employees.

(e) Waiver of Subrogation Endorsements. The Workers' Compensation policy(ies) and all Liability Policies referenced above shall be endorsed with a waiver of subrogation in favor of City for all work performed by Licensee or its Agents.

(f) Primary Insurance Endorsements.

(i) The Commercial General Liability policy shall provide that such policies are primary insurance to any other insurance available to the Additional Insureds, with respect to any claims arising out of this License, and that the insurance applies separately to each insured against whom claim is made or suit is brought.

(ii) The Commercial Automobile Liability Insurance policy shall provide that such policies are primary insurance to any other insurance available to the Additional Insureds, with respect to any claims arising out of this License, and that the insurance applies separately to each insured against whom claim is made or suit is brought.

(iii) Such policies shall also provide for severability of interests and that an act or omission of one of the named insureds which would void or otherwise reduce coverage shall not reduce or void the coverage as to any insured, and shall afford coverage for all claims based on acts, omissions, injury, or damage that occurred or arose (or the onset of which occurred or arose) in whole or in part during the policy period.

(g) Other Insurance Requirements.

(i) Thirty (30) days' advance written notice shall be provided to City of cancellation, intended non-renewal, or reduction in coverages, except for non-payment for which no less than ten (10) days' notice shall be provided to City. Notices shall be sent to the City address set forth in Section 31 [Notices].

(ii) Should any of the required insurance be provided under a claims-made form, Licensee shall maintain such coverage continuously throughout the term of this License and, without lapse, for a period of three years beyond the expiration of this License, to the effect that, should occurrences during the License term give rise to claims made after expiration of the License, such claims shall be covered by such claims-made policies.

(iii) Should any of the required insurance be provided under a form of coverage that includes a general annual aggregate limit or provides that claims investigation or legal defense costs be included in such general annual aggregate limit, such general annual aggregate limit shall be double the occurrence or claims limits specified above.

(iv) Should any required insurance lapse during the term of this License, requests for payments originating after such lapse shall not be processed until City receives satisfactory evidence of reinstated coverage as required by this License, effective as of the lapse date. If insurance is not reinstated, City may, at its sole option, terminate this License effective on the date of such lapse of insurance.

(v) Prior to the Commencement Date of this License, Licensee shall furnish to City certificates of insurance and additional insured policy endorsements with insurers with ratings comparable to A-, VIII or higher, that are authorized to do business in the State of California, and that are satisfactory to City, in form evidencing all coverages set forth above. Licensee and its contractors shall submit or cause their respective insurance brokers to submit requested information through the Exigis insurance verification program designated by City or any successor program used by City for verification of Licensee and contractor insurance coverage. Approval of the insurance by City shall not relieve or decrease Licensee's liability hereunder. If Licensee shall fail to procure such insurance, or to deliver such policies or certificates, at its option, City may procure the same for the account of Licensee, and Licensee shall reimburse City for any costs so paid by City within five (5) business days after delivery to Licensee of bills therefor.

(vi) If Licensee will use any subcontractor(s) to perform the Permitted Acts, Licensee shall require the subcontractor(s) to provide all necessary insurance and to name the City and County of San Francisco, its officers, agents and employees, and the Licensee as additional insureds.

(vii) Upon City's request, Licensee and City shall periodically review the limits and types of insurance carried pursuant to this Section. If the general commercial practice in the City and County of San Francisco is to carry liability insurance in an amount or coverage materially greater than the amount or coverage then being carried by Licensee for risks comparable to those associated with the Combined License Area, then, at its sole discretion, City may require Licensee to increase the amounts or coverage carried by Licensee hereunder to conform to such general commercial practice.

(h) Self-Insurance.

Licensee shall have the right to self-insure with respect to any of the insurance requirements required under this License, to the extent permitted by applicable law. If Licensee elects to self-insure with respect to any of the insurance requirements required under this License, before the Commencement Date and upon written request by the SFPUC, within thirty (30) days of the commencement of each year thereafter, Licensee shall submit to the SFPUC a certificate of self-insurance signed by a duly authorized representative of Licensee, such certificate evidencing that Licensee's self-insurance program is adequately funded, in full force and effect and in compliance with and subject to all the terms, agreements, covenants, conditions and provisions of this License. If Licensee elects to self-insure, Licensee shall give City prompt written notice of any significant change in or the depletion of its self-insurance fund. Notwithstanding the foregoing, Licensee is also responsible for causing any contractors, subcontractors, and/or Agents to maintain commercially reasonable insurance coverages and coverage limits as required under this License.

Any deductibles or self-insured retentions must be declared. All deductibles and self-insured retentions shall be paid by Licensee.

With respect to any claim, loss, or liability that would have been covered by the insurance policies (including the status as an "additional insured" thereunder of City, the SFPUC, and their respective Agents and Employees) required by this License to be maintained by Licensee but within the self-insured retention or deductible amount, Licensee shall cover such claim, loss, or liability on the same basis as the insurance arrangements or deductibles on such insurance policies, including such insurance carrier responsibility to protect City, the SFPUC, and their respective Agents and Employees as an "additional insured."

11. Compliance with Laws.

(a) At its expense, Licensee shall conduct and cause to be conducted all activities on the Combined License Area permitted by this License in a safe and reasonable manner and in compliance with all laws, statutes, ordinances, rules, regulations, policies, orders, edicts, and the like (including, without limitation, the Americans with Disabilities Act ("**ADA**") codified at Title 42 U. S.C. 12-101 and the regulations issued thereunder, and any other applicable disability access ordinances, laws and regulations, fire safety laws, ordinances or regulations collectively the "**Disability and Safety Regulations**") (collectively, "**Laws**") of any governmental or other regulatory entity with jurisdiction and all covenants, restrictions, and provisions of record, whether presently in effect or subsequently adopted and whether or not in the contemplation of the parties.

(b) Licensee shall be responsible for causing all improvements and alterations installed by or on behalf of Licensee (including, without limitation, the Facilities and those improvements and alterations that predate this License) to be installed and maintained, in compliance with all Disability and Safety Regulations, and Licensee shall indemnify, defend, and hold City harmless from and against any and all claims or causes of action asserting (i) that any improvements or alterations installed by or on behalf of Licensee, regardless of whether such improvements or alternations predate this License, have caused the Combined License Area to be in violation of any Disability and Safety Regulations, or (ii) a cause of action or claim of violation of any applicable Disability and Safety Regulations resulting from or relating to any improvements or alterations undertaken by Licensee or on behalf of Licensee. Licensee's obligations under this Section shall survive any revocation of this License.

(c) In the event Licensee receives a notice from any governmental agency or is otherwise made aware that any improvement or alteration on the Combined License Area, including, without limitation, the Bridge and the ADA Ramps, is in violation of any Disability and Safety Regulations, Licensee shall immediately inform City and provide City a copy of such notice or documents informing Licensee of such violation. Licensee shall, at is sole cost and expense, and without cost to City, address any such violations in accordance with such notice and shall keep the City abreast of such negotiations and obtain the City's consent prior to performing any necessary repairs.

(d) At its sole expense, Licensee shall procure and maintain in force at all times during its use of the Combined License Area any and all business and other licenses or approvals necessary to conduct the activities allowed by this License.

(e) City is entering into this License in its capacity as a property owner with a proprietary interest in the Combined License Area and not as a regulatory agency with police powers. No approval by City for purposes of this License shall be deemed to constitute approval of any federal, state, City, or other local regulatory authority with jurisdiction, and nothing in this

License shall limit Licensee's obligation to obtain all such regulatory approvals at Licensee's sole cost, or limit in any way City's exercise of its police powers.

12. Covenant to Maintain License Area. Throughout the term of this License, at its sole cost, Licensee shall maintain the Combined License Area, including, without limitation, the Bridge and other Permitted Improvements, at all times in a good, clean, safe, secure, sanitary, and sightly condition, so far as the Combined License Area may be affected by Licensee's activities under this License.

13. Monuments.

(a) By its execution and delivery of this License, Licensee acknowledges that the monuments shown on the attached **Exhibit B**, if any, are in place and in good condition. During the installation of any permitted Facilities or alterations of, the Combined License Area pursuant to this License and at all times during Licensee's use of the Combined License Area, Licensee shall protect and safeguard City's monuments. Licensee shall promptly notify City if Licensee becomes aware of any change in the condition of City's monuments, regardless of the cause of such change.

(b) If Licensee damages a monument necessitating resurvey, repair, or replacement, as determined by City at its sole discretion, Licensee shall survey, file a land surveyor's map in the Official Records of the County of Santa Clara, and install a replacement monument within thirty (30) days of completion of work authorized under this License, all at Licensee's expense and to City's satisfaction. A recorded surveyor's map shall be furnished by Licensee to the SFPUC for its records.

(c) During the term of this License, City may replace missing monuments or install new monuments. When City replaces missing monuments or installs new monuments, City shall give Licensee written notice of such replacement or installation. Upon deposit of such notice in the U.S. mail by City, postage prepaid, Licensee shall assume the protection and replacement responsibilities set forth in this License.

(d) Notwithstanding any contrary provision contained in this License, Licensee will not be responsible for any damage, destruction or displacement of monuments caused by City's own acts or omissions.

14. Removal or Alteration of Facilities or Improvements. Without limiting City's rights under this License, at City's written request, Licensee shall promptly alter or remove, at its sole expense, any and all Facilities, improvements, plantings, or other property installed or placed in, on, under, or about the Combined License Area by or on behalf of Licensee (including any improvements, plantings, or other property that predate this License), as may be necessary to avoid any actual or potential interference with the installation, construction, maintenance, operation, repair, replacement, or removal of any of City's pipelines, power lines, facilities, or other structures now or later constructed or with any other operations or land uses by City. In the request, City may specify reasonable time limits for completion of the work. If, after such written notice, Licensee fails to complete the requested work within the prescribed time limits, City may perform the requested work and charge Licensee all costs and expenses so incurred by City. Such amount shall be due and payable upon City's demand. In the event of an emergency, at City's sole option, at Licensee's sole expense, and without notice, City may, alter, remove, or protect any and all

facilities, improvements, plantings, or other property installed or placed in, on, under, or about the Combined License Area by Licensee. Upon City's written or oral notice that an emergency exists, the owner of such utility facilities shall take immediate action at its sole expense to protect, remove, or relocate such facilities as required by City to meet the emergency.

15. Interruption or Disruption of License Area. Without limiting City's rights under this License or any applicable Laws, if Licensee's use of the Combined License Area is interrupted or disrupted for any reason in connection with any SFPUC request for removal or alteration of Licensee's Facilities located on the Combined License Area pursuant to **Section 14** [Removal or Alteration of Facilities] above, at its sole cost, Licensee shall be responsible for: **(a)** any and all costs of alteration, removal, and/or restoration of Licensee's Facilities or other improvements or alterations to a condition similar to that which existed prior to such interruption, disruption, alteration, or removal, and **(b)** the implementation or satisfaction of any mitigation measures or obligations that may arise under any applicable Laws, including the California Environmental Quality Act ("**CEQA**"), related to any interruption or disruption of Licensee's use of the Combined License Area. City shall not be responsible for mitigation of any potential recreational use impacts or other impacts associated with any interruption or disruption of use of the Combined License Area, or any related costs. If Licensee fails to promptly perform its obligations under this Section, at its sole option, City may elect to terminate this License immediately by written notice, or to exercise any and all other rights or remedies available to City under this License or at law, including the rights set forth in **Section 19** [City's Right to Cure Defaults by Licensee] of this License.

City would not be willing to give this License in the absence of Licensee's assurances under this **Section 15**, and Licensee expressly assumes any and all liability or obligations that may arise under this **Section 15**.

16. Signs. In addition to Licensee's obligations under **Section 5(a)** [Educational Signs] above, City, at its sole discretion, may require Licensee to install signs with language required by the SFPUC. Except **(a)** as expressly authorized under this **Section 16, (b)** as expressly authorized under Section 4 [Permitted Encroachments] or **(c)** for any pipeline markers required by City or any regulatory agency with jurisdiction, Licensee shall not place, erect, or maintain any sign, advertisement, banner, or similar object in, on, or about the Combined License Area without City's prior written consent, which City may give or withhold at its sole discretion; provided, however, that, without City's prior written consent, if necessary for Licensee's construction use, Licensee may place in the Combined License Area a temporary sign of less than thirty (30) days' duration that does not penetrate the ground surface.

17. Surrender. Upon the expiration of this License or within ten (10) days after any sooner revocation or other termination of this License, Licensee shall surrender the Combined License Area in the same condition as received, and broom clean, free from hazards, and clear of all debris. At such time, Licensee shall remove all of its property from the Combined License Area and all signs other than the Educational Signs and, upon City's request, the Facilities and any other structures, improvements, or alterations placed on the Combined License Area during the term of this License, and shall repair, at its cost, any damage to the Combined License Area caused by such removal. Licensee's obligations under this Section shall survive any termination of this License.

18. **Repair of Damage**. If any portion of the Combined License Area or any City property located on or about the Combined License Area is damaged or threatened by any of the activities conducted by Licensee or anyone acting by or through Licensee, at its sole cost, Licensee shall immediately notify City of such damage or threat by **(a)** telephoning the SFPUC's dispatch operator as specified in **Section 33(b)** [Emergency Contacts] below, and **(b)** providing written notice in accordance with **Section 33(a)** [Notices] below. City may, but shall not be obligated to, remedy such damage or threat at Licensee's sole cost, or City may elect to witness Licensee's repair work. If City elects not to remedy such damage or threat, Licensee shall repair any and all such damage and restore the Combined License Area or property to its previous condition subject to City's inspection, review, and approval. City has no responsibility or liability of any kind with respect to any utilities that may be on, in, or under the Combined License Area. Licensee is solely responsible for the location of any such utilities and other existing facilities and their protection from damage. Licensee shall be solely responsible to arrange and pay directly for any utilities or services necessary for its activities pursuant to this License; provided, Licensee shall obtain City's prior written approval to the provision of such services or utilities in, on, under, or through the Combined License Area.

19. **City's Right to Cure Defaults by Licensee**. If Licensee fails to perform any of its obligations under this License to restore the Combined License Area, remove or alter any of Licensee's Facilities, or improvements or alterations, or repair damage, or if Licensee defaults in the performance of any of its other obligations under this License, then, at its sole option, City may remedy such failure for Licensee's account and at Licensee's expense by providing Licensee with three (3) days' prior written or oral notice of City's intention to cure such default (except that no such prior notice shall be required in the event of an emergency as determined by City). Such action by City shall not be construed as a waiver of any of City's rights or remedies under this License, and nothing in this License shall imply any duty of City to do any act that Licensee is obligated to perform. Licensee shall pay to City upon demand, all costs, damages, expenses, or liabilities incurred by City, including reasonable attorneys', experts', and consultants' fees, in remedying or attempting to remedy such default. Licensee's obligations under this Section shall survive the termination of this License.

20. **No Costs to City**. Licensee shall bear all costs or expenses of any kind or nature in connection with its use of the Combined License Area, and shall keep the Combined License Area free and clear of any liens or claims of lien arising out of or in any way connected with its use of the Combined License Area.

21. **Indemnity**. Licensee shall indemnify, defend, reimburse, and hold harmless City, its officers, agents, employees, and contractors, and each of them, from and against any and all demands, claims, legal or administrative proceedings, losses, costs, penalties, fines, liens, judgments, damages, and liabilities of any kind ("**Claims**"), arising in any manner out of **(a)** any injury to or death of any person or damage to or destruction of any property occurring in, on, or about any part of the Combined License Area, whether such injury, death, damage, or destruction is caused by the person or property of Licensee, its officers, directors, members, employees, agents, consultants, contractors, or subcontractors (collectively, "**Agents**"), its invitees, guests, or business visitors (collectively, "**Invitees**"), or third persons, relating to any use or activity under this License, **(b)** any failure by Licensee to faithfully observe or perform any of the terms, covenants, or conditions of this License, **(c)** the use of the Combined License Area, including, without limitation, the Bridge, the other Permitted Improvements and any other improvements

installed by or on behalf of Licensee that predate this License, or any activities conducted on the Combined License Area by Licensee, its Agents, or Invitees, **(d)** any release or discharge, or threatened release or discharge, of any Hazardous Material caused or allowed by Licensee, its Agents, or Invitees, on, in, under, or about the Combined License Area, any improvements or into the environment, or **(e)** any failure by Licensee to faithfully observe or perform any terms, covenants, or conditions of the Recorded Documents to the extent that such terms, covenants, or conditions relate to or are triggered by the work to be performed or Facilities or other improvements or alterations installed pursuant to this License; except solely to the extent of Claims resulting directly from the willful misconduct of City or City's authorized representatives. In addition to Licensee's obligation to indemnify City, Licensee has an immediate and independent obligation to defend City from any claim that actually or potentially falls within this indemnity provision even if such allegation is or may be groundless, fraudulent, or false, which obligation arises at the time such claim is tendered to Licensee by City and continues at all times thereafter. The foregoing indemnity shall include reasonable attorneys', experts', and consultants' fees and costs, investigation and remediation costs, and all other reasonable costs and expenses incurred by the indemnified parties, including damages for decrease in the value of the Combined License Area and claims for damages or decreases in the value of adjoining property. Licensee's obligations under this Section shall survive the expiration or other termination of this License.

22. <u>Waiver of Claims</u>.

(a) Neither City nor any of its commissions, departments, boards, officers, agents, or employees shall be liable for any damage to the property of Licensee, its officers, agents, employees, contractors, or subcontractors, or their employees, or for any bodily injury or death to such persons, resulting or arising from the condition of the Combined License Area or its use by Licensee, or Licensee's Agents or Invitees.

(b) Because this License is freely revocable by City, Licensee expressly assumes the risk of making any expenditure in connection with this License, even if such expenditures are substantial. Without limiting any indemnification obligations of Licensee or other waivers contained in this License and as a material part of the consideration for this License, Licensee fully RELEASES, WAIVES, AND DISCHARGES forever any and all claims, demands, rights, and causes of action against, and covenants not to sue, City, its departments, commissions, officers, directors, and employees, and all persons acting by, through, or under each of them, under any present or future Laws, including any claim for inverse condemnation or the payment of just compensation under law or equity, if City exercises its right to revoke or terminate this License.

(c) Licensee acknowledges that it will not be a displaced person at the time this License is terminated or revoked or expires by its own terms, and Licensee fully RELEASES, WAIVES, AND DISCHARGES forever any and all claims, demands, rights, and causes of action against, and covenants not to sue, City, its departments, commissions, officers, directors, and employees, and all persons acting by, through, or under each of them, under any present or future Laws, including any and all claims for relocation benefits or assistance from City under federal and state relocation assistance laws.

(d) The fees payable pursuant to this License do not take into account any potential City liability for any consequential or incidental damages including lost profits and arising out of disruption to or any Facilities or other improvements or alterations installed pursuant to this License; or Licensee's uses of the Combined License Area permitted by this License. City would

not be willing to grant this License in the absence of a waiver of liability for consequential or incidental damages resulting from the acts or omissions of City or its departments, commissions, officers, directors, and employees, and by all persons acting by, through, or under each of them, and Licensee expressly assumes the risk with respect thereto. Accordingly, without limiting any indemnification obligations of Licensee or other waivers contained in this License and as a material part of the consideration for this License, Licensee fully RELEASES, WAIVES, AND DISCHARGES forever any and all claims, demands, rights, and causes of action against City for consequential and incidental damages (including lost profits) and covenants not to sue for such damages City, its departments, commissions, officers, directors, and employees, and all persons acting by, through, or under each of them, arising out of this License or the uses authorized under this License, including any interference with uses conducted by Licensee pursuant to this License, regardless of the cause, and whether or not due to the negligence of City or its departments, commissions, officers, directors, and employees, and all persons acting by, through, or under each of them, except for the gross negligence and willful misconduct of City or its departments, commissions, officers, directors, and employees, and all persons acting by, through, or under each of them.

(e) As part of Licensee's agreement to accept the Combined License Area in its "As Is" condition as provided below, and without limiting such agreement, Licensee, on behalf of itself and its successors and assigns, waives its right to recover from, and forever releases and discharges, City and its officers, agents, and employees, and their respective heirs, successors, administrators, personal representatives, and assigns, from any and all Claims, whether direct or indirect, known or unknown, foreseen and/or unforeseen, that may arise on account of or in any way be connected with the physical or environmental condition of the Combined License Area and any related improvements or any applicable Laws or the suitability of the Combined License Area for Licensee's intended use.

(f) In connection with the foregoing releases, Licensee acknowledges that it is familiar with Section 1542 of the California Civil Code, which reads:

> A general release does not extend to claims that the creditor or releasing party does not know or suspect to exist in his or her favor at the time of executing the release and that, if known by him or her, would have materially affected his or her settlement with the debtor or released party.

Licensee acknowledges that the releases contained in this License include all known and unknown, disclosed and undisclosed, and anticipated and unanticipated claims. Licensee realizes and acknowledges that it has agreed upon this License in light of this realization and, being fully aware of this situation, it nevertheless intends to waive the benefit of California Civil Code Section 1542, or any statute or other similar law now or later in effect. The releases contained in this License shall survive any termination of this License.

23. <u>As Is Condition of License Area; Disability Access; Disclaimer of Representations</u>. Licensee accepts the Combined License Area in its "AS IS" condition, without representation or warranty of any kind by City, its departments, commissions, officers, directors, and employees, and all persons acting by, through, or under each of them, and subject to all applicable Laws governing the use of the Combined License Area. Without limiting the foregoing, this License is made subject to any and all existing and future covenants, conditions, restrictions, easements, encumbrances, and other title matters affecting the Combined License Area, whether foreseen or

unforeseen, and whether such matters are of record or would be disclosed by an accurate inspection or survey.

City discloses (i) City has not been issued a disability access inspection certificate as described in California Civil Code Section 55.53(e), (ii) pursuant to California Civil Code Section 1938, that Landlord has not ordered, performed, or caused to be performed, a Certified Access Specialist ("**CASp**") inspection of the Combined License Area (sometimes referred to as "premises" or "subject premises" for the herein disclosures), and (iii) City makes the following statutory disclosure per California Civil Code Section 1938 (required "**CASp Disclosure**"):

"A Certified Access Specialist ("**CASp**") can inspect the subject premises and determine whether the subject premises comply with all of the applicable construction-related accessibility standards under state law. Although state law does not require a CASp inspection of the subject premises, the commercial property owner or lessor may not prohibit the lessee or tenant from obtaining a CASp inspection of the subject premises for the occupancy or potential occupancy of the lessee or tenant, if requested by the lessee or tenant. The parties shall mutually agree on the arrangements for the time and manner of the CASp inspection, the payment of the fee for the CASp inspection and the cost of making any repairs necessary to correct violations of construction-related accessibility standards within the premises."

24. **No Assignment**. This License is personal to Licensee and shall not be assigned, conveyed, or otherwise transferred by Licensee under any circumstances. Any attempt to assign, convey, or otherwise transfer this License shall be null and void and cause the immediate termination and revocation of this License.

25. **Cessation of Use**. Licensee will not terminate its activities on the Combined License Area pursuant to this License without prior written notice to City.

26. **No Joint Ventures or Partnership; No Authorization**. This License does not create a partnership or joint venture between City and Licensee as to any activity conducted by Licensee on, in, or relating to the Combined License Area. Licensee is not a state actor with respect to any activity conducted by Licensee on, in, under or around the Combined License Area. City's provision of this License does not constitute City's authorization or approval of any activity conducted by Licensee on, in, around, or relating to the Combined License Area.

27. **MacBride Principles - Northern Ireland**. The provisions of San Francisco Administrative Code Section 12F are incorporated into and made a part of this License by this reference. By signing this License, Licensee confirms that Licensee has read and understood that City urges companies doing business in Northern Ireland to resolve employment inequities and to abide by the MacBride Principles, and urges San Francisco companies to do business with corporations that abide by the MacBride Principles.

28. **Non-Discrimination in City Contracts and Benefits Ordinance**.

(a) **Covenant Not to Discriminate.** In the performance of this License, Licensee shall not discriminate against any employee of, any City employee working with Licensee, or applicant for employment with, Licensee, or against any person seeking accommodations, advantages, facilities, privileges, services, or membership in all business, social, or other establishments or organizations, on the basis of the fact or perception of a person's race, color, creed, religion, national origin,

ancestry, age, height, weight, sex, sexual orientation, gender identity, domestic partner status, marital status, disability or Acquired Immune Deficiency Syndrome or HIV status (AIDS/HIV status), or association with members of such protected classes, or in retaliation for opposition to discrimination against such classes.

(b) Other Subcontracts. Licensee shall include in all subcontracts relating to the Combined License Area a non-discrimination clause applicable to such subcontractor in substantially the form of **Section 28 (a)** [Covenant Not to Discriminate] above. In addition, Licensee shall incorporate by reference in all subcontracts the provisions of Sections 12B.2(a), 12B.2(c)-(k), and 12C.3 of the San Francisco Administrative Code and shall require all subcontractors to comply with such provisions. Licensee's failure to comply with the obligations in this subsection shall constitute a material breach of this License.

(c) Non-Discrimination in Benefits. Licensee does not as of the date of this License and will not during the term of this License, in any of its operations in San Francisco, on real property owned by City, or where the work is being performed for City or elsewhere within the United States, discriminate in the provision of bereavement leave, family medical leave, health benefits, membership or membership discounts, moving expenses, pension and retirement benefits, or travel benefits, as well as any benefits other than the benefits specified above, between employees with domestic partners and employees with spouses, and/or between the domestic partners and spouses of such employees, where the domestic partnership has been registered with a governmental entity pursuant to state or local law authorizing such registration, subject to the conditions set forth in Section 12B.2(b) of the San Francisco Administrative Code.

(d) Condition to License. As a condition to this License, Licensee shall execute the "Chapter 12B Declaration: Nondiscrimination in Contracts and Benefits" form (Form CMD-12B-101) with supporting documentation and secure the approval of the form by the San Francisco Contract Monitoring Division.

(e) Incorporation of Administrative Code Provisions by Reference. The provisions of Chapters 12B and 12C of the San Francisco Administrative Code relating to non-discrimination by parties contracting for the license of City property are incorporated in this Section by reference and made a part of this License as though fully set forth. Licensee shall comply fully with and be bound by all of the provisions that apply to this License under such Chapters of the San Francisco Administrative Code, including the remedies provided in such Chapters. Without limiting the foregoing, Licensee understands that pursuant to Section 12B.2(h) of the San Francisco Administrative Code, a penalty of $50 for each person for each calendar day during which such person was discriminated against in violation of the provisions of this License may be assessed against Licensee and/or deducted from any payments due Licensee.

29. Reserved.

30. Notification of Prohibition on Contributions. Licensee acknowledges that it is familiar with Section 1.126 of the San Francisco Campaign and Governmental Conduct Code, which prohibits any person who contracts with City for the selling or leasing of any land or building to or from City whenever such transaction would require the approval by a City elective officer, the board on which that City elective officer serves, or a board on which an appointee of that individual serves, from making any campaign contribution to **(a)** the City elective officer, **(b)** a candidate for the office held by such individual, or **(c)** a committee controlled by such individual or candidate,

at any time from the commencement of negotiations for the contract until the later of either the termination of negotiations for such contract or twelve months after the date the contract is approved. Licensee acknowledges that the foregoing restriction applies only if the contract or a combination or series of contracts approved by the same individual or board in a fiscal year have a total anticipated or actual value of $100,000 or more. Licensee further acknowledges that **(i)** the prohibition on contributions applies to each Licensee; each member of Licensee's board of directors, and Licensee's chief executive officer, chief financial officer, and chief operating officer; any person with an ownership interest of more than ten percent (10%) in Licensee; any subcontractor listed in the contract; and any committee that is sponsored or controlled by Licensee; and **(ii)** within thirty (30) days of the submission of a proposal for the contract, the City department seeking to enter into the contract must notify the Ethics Commission of the parties and any subcontractor to the contract. Additionally, Tenant certifies it has informed each of the persons described in the preceding sentence of the prohibitions contained in Section 1.126 by the time it submitted a proposal for the contract to the City, and has provided the names of the persons required to be informed to the City department seeking to enter into that contract within thirty (30) days of submitting its contract proposal to the City department receiving that submittal, and acknowledges the City department receiving that submittal was required to notify the Ethics Commission of those persons.

31. Tropical Hardwoods and Virgin Redwoods. City urges companies not to import, purchase, obtain, or use for any purpose, any tropical hardwood, tropical hardwood wood product, virgin redwood, or virgin redwood wood product, except as expressly permitted by the application of Sections 802(b) and 803(b) of the San Francisco Environment Code. Except as permitted by the application of Sections 802(b) and 803(b), Licensee shall not use or incorporate any tropical hardwood, tropical hardwood wood product, virgin redwood, or virgin redwood wood product in the performance of this License.

32. Taxes, Assessments, Licenses, License Fees, and Liens.

(a) Licensee recognizes and understands that this License may create a possessory interest subject to property taxation and that Licensee may be subject to the payment of property taxes levied on such interest. Licensee further recognizes and understands that any transfer or assignment permitted under this License and any exercise of any option to renew or extend this License may constitute a change in ownership for purposes of property taxation and therefore may result in a revaluation of any possessory interest created hereunder.

(b) Licensee shall pay taxes of any kind, including possessory interest taxes, that may be lawfully assessed on the interest created by this License and shall pay all other taxes, excises, licenses, permit charges, and assessments based on Licensee's usage of the Combined License Area that may be imposed upon Licensee by law, all of which shall be paid when the same become due and payable and before delinquency.

(c) Licensee shall not allow or suffer a lien for any such taxes or charges to be imposed upon the Combined License Area or upon any equipment or property located on the Combined License Area without promptly discharging the same, provided that Licensee may contest the validity of the same by paying under protest or posting adequate (at City's sole discretion) security during any such contest.

33. Notices.

(a) Any notice, consent, or approval required or permitted to be given under this License shall be in writing and shall be given by **(i)** hand delivery, against receipt, **(ii)** reliable next-business-day courier service that provides confirmation of delivery, or **(iii)** United States registered or certified mail, postage prepaid, return receipt required, and addressed as follows (or to such other address as either party may from time to time specify in writing to the other upon five (5) days' prior, written notice in the manner provided above):

34. Prohibition of Tobacco Sales and Advertising. No advertising or sale of cigarettes or tobacco products is allowed on the Combined License Area. This advertising prohibition includes the placement of the name of a company producing cigarettes or tobacco products or the name of any cigarette or tobacco product in any promotion of any event or product.

35. Prohibition of Alcoholic Beverage Advertising. No advertising of alcoholic beverages is allowed on the Combined License Area. For purposes of this Section, "alcoholic beverage" shall be defined as set forth in California Business and Professions Code Section 23004, and shall not include cleaning solutions, medical supplies, and other products and substances not intended for drinking. This advertising prohibition includes the placement of the name of a company producing alcoholic beverages or the name of any alcoholic beverage in any promotion of any event or product.

36. Restrictions on the Use of Pesticides. Chapter 3 of the San Francisco Environment Code ("Integrated Pest Management Program Ordinance or "**IPM Ordinance**") describes an integrated pest management ("**IPM**") policy to be implemented by all City departments. Licensee shall not use or apply or allow the use or application of any pesticides on the Combined License Area or contract with any person or entity to provide pest abatement or control services to the Combined License Area without first receiving City's written approval of an IPM plan that **(a)** lists, to the extent reasonably possible, the types and estimated quantities of pesticides that Licensee may need to apply to the Combined License Area during the term of this License, **(b)** describes the steps Licensee will take to meet the City's IPM Policy described in Section 300 of the IPM Ordinance and **(c)** identifies, by name, title, address, and telephone number, an individual to act as the Licensee's primary IPM contact person with the City. Licensee shall comply, and shall require all of Licensee's contractors to comply, with the IPM plan approved by the City and shall comply with the requirements of Sections 300(d), 302, 304, 305(f), 305(g), and 306 of the IPM Ordinance, as if Licensee were a City department. Among other matters, such provisions of the IPM

Ordinance: **(i)** provide for the use of pesticides only as a last resort, **(ii)** prohibit the use or application of pesticides on property owned by the City, except for pesticides granted an exemption under Section 303 of the IPM Ordinance (including pesticides included on the most current Reduced Risk Pesticide List compiled by City's Department of the Environment), **(iii)** impose certain notice requirements, and **(iv)** require Licensee to keep certain records and to report to City all pesticide use at the Combined License Area by Licensee's staff or contractors.

If Licensee or Licensee's contractor will apply pesticides to outdoor areas at the Combined License Area, Licensee must first obtain a written recommendation from a person holding a valid Agricultural Pest Control Advisor license issued by the California Department of Pesticide Regulation ("**CDPR**") and any such pesticide application shall be made only by or under the supervision of a person holding a valid, CDPR-issued Qualified Applicator certificate or Qualified Applicator license. City's current Reduced Risk Pesticide List and additional details about pest management on City property can be found at the San Francisco Department of the Environment website, http://sfenvironment.org/ipm.

37. Conflict of Interest. Licensee acknowledges that it is familiar with the provisions of Section 15.103 of City's Charter, Article III, Chapter 2 of City's Campaign and Governmental Conduct Code, and Sections 87100 et seq. and Sections 1090 et seq. of the California Government Code and certifies that it does not know of any facts that would constitute a violation of said provisions. If Licensee becomes aware of any such fact during the term of this License, Licensee shall immediately notify City.

38. Disclosure. City's Sunshine Ordinance (San Francisco Administrative Code Chapter 67) and the State Public Records Law (Gov't Code Sections 6250 et seq.), apply to this License and any and all records, information, and materials submitted to City in connection with this License. Accordingly, any and all such records, information, and materials may be subject to public disclosure in accordance with City's Sunshine Ordinance and the State Public Records Law. Licensee authorizes City to disclose any records, information, and materials submitted to City in connection with this License.

39. Food Service and Packaging Waste Reduction. Licensee shall comply fully with and be bound by all of the provisions of the Food Service and Packaging Waste Reduction Ordinance, as set forth in San Francisco Environment Code Chapter 16, including the remedies provided therein, and implementing guidelines and rules. The provisions of Chapter 16 are incorporated into this License by this reference and made a part of this License as though fully set forth. Capitalized terms used in this Section that are not otherwise defined in this License have the same meaning assigned to such terms in San Francisco Environment Code, Chapter 16. Accordingly, Licensee acknowledges that City contractors, lessees, and licensees may not use Disposable Food Service Ware that contains Polystyrene Foam in City Facilities while performing under a City contract, lease, or license, and shall instead use suitable Biodegradable/Compostable or Recyclable Disposable Food Service Ware. This provision is a material term of this License.

40. Severability. If any provision of this License, or its application to any person, entity, or circumstance, shall be held to be invalid or unenforceable by a court of competent jurisdiction, the remainder of this License, or the application of such provision to persons, entities, or circumstances other than those as to which it is invalid or unenforceable, shall not be affected thereby, and each other provision of this License shall be valid and be enforceable to the fullest extent permitted by law, except to the extent that enforcement of this License without the invalidated provision would

be unreasonable or inequitable under all the circumstances or would frustrate a fundamental purpose of this License.

41. Cooperative Drafting. This License has been drafted through a cooperative effort of both Parties, and both Parties have had an opportunity to have the License reviewed and revised by legal counsel. No party shall be considered the drafter of this License, and no presumption or rule that an ambiguity shall be construed against the party drafting the clause shall apply to the interpretation or enforcement of this License.

42. Reserved.

43. San Francisco Packaged Water Ordinance. Licensee shall comply with San Francisco Environment Code Chapter 24 ("**Chapter 24**"). Licensee shall not sell, provide or otherwise distribute Packaged Water, as defined in Chapter 24 (including bottled water), in the performance of this License or on City property unless Licensee obtains a waiver from the City's Department of the Environment. If Licensee violates this requirement, the City may exercise all remedies in this License and the Director of the City's Department of the Environment may impose administrative fines as set forth in Chapter 24.

44. General Provisions. **(a)** This License may be amended or modified only by a writing signed by City and Licensee. **(b)** No waiver by any party of any of the provisions of this License shall be effective unless in writing and signed by an officer or other authorized representative, and only to the extent expressly provided in such written waiver. No waiver shall be deemed a subsequent or continuing waiver of the same, or any other, provision of this License. **(c)** The exhibits referenced in and attached to this instrument are incorporated into this License. **(d)** This License contains the entire agreement between the Parties regarding the subject matter of this License, and all prior written or oral negotiations, discussions, understandings, and agreements are merged into this License. **(e)** The Section and other headings of this License are for convenience of reference only and shall be disregarded in the interpretation of this License. **(f)** Time is of the essence in all matters relating to this License. **(g)** This License shall be governed by California law and City's Charter. **(h)** If either party commences an action against the other or a dispute arises under this License, the prevailing party shall be entitled to recover from the other reasonable attorneys' fees and costs. For purposes of this License and the indemnifications set forth in this License, reasonable attorneys' fees of City shall be based on the fees regularly charged by private attorneys in San Francisco with comparable experience notwithstanding City's use of its own attorneys. **(i)** If Licensee consists of more than one person then the obligations of each person shall be joint and several. **(j)** Licensee may not record this License or any memorandum of this License. **(k)** Subject to the prohibition against assignments or other transfers by Licensee hereunder, this License shall be binding upon and inure to the benefit of the Parties and their respective heirs, representatives, successors, and assigns. **(l)** Any sale or conveyance of the property burdened by this License by City shall automatically revoke this License. **(m)** Notwithstanding anything to the contrary contained in this License, no officer or employee of City has authority to commit City to this License unless and until a resolution of the SFPUC shall have been duly adopted approving this License and authorizing the transaction contemplated by this License. Therefore, any of City's obligations or liabilities pursuant to or under this License are contingent upon enactment of such a resolution, and this License shall be null and void if, at its sole discretion, the SFPUC does not approve this License. **(n)** Each of the persons executing this License on Licensee's behalf do hereby represent and warrant that Licensee is a duly formed or organized (as applicable) and validly existing entity under the laws of California, that Licensee

is in good standing and qualified to do business in California (and covenants to maintain such status during the term of this License), that Licensee has full right and authority to enter into this License, and that each and all of the persons signing on behalf of Licensee are authorized to do so. Upon City's request, Licensee shall provide City with evidence reasonably satisfactory to City confirming the foregoing representations and warranties. **(o)** Except as expressly provided to the contrary, all approvals, consents, and determinations to be made by City under this License may be made at City's sole and absolute discretion. **(p)** Whenever this License requires City's or the SFPUC's consent or approval, the General Manager of the SFPUC, or his or her designee, shall be authorized to provide such consent or approval, except as otherwise provided by applicable Laws, including City's Charter, or by the SFPUC's Real Estate Guidelines. No consent, approval, election, or option shall be effective unless given, made, or exercised in writing. **(q)** This License may be executed in two or more counterparts, each of which shall be deemed an original, but all of which taken together shall constitute one and the same instrument. **(r)** City and Licensee respectively agree to execute and deliver such further instruments and to take such further actions as City may reasonably request from time to time in order to carry out the provisions of this License. **(s)** Use of the word "including" or similar words will not be construed to limit any general term, statement, or other matter in this License, whether or not language of non-limitation, such as "without limitation" or similar words, are used.

NOTWITHSTANDING ANYTHING TO THE CONTRARY CONTAINED IN THIS LICENSE, NO OFFICER OR EMPLOYEE OF CITY HAS AUTHORITY TO COMMIT CITY TO THIS LICENSE UNLESS AND UNTIL CITY'S PUBLIC UTILITIES COMMISSION SHALL HAVE DULY ADOPTED A RESOLUTION APPROVING THIS LICENSE AND AUTHORIZING THE TRANSACTIONS CONTEMPLATED IN THIS LICENSE. THEREFORE, ANY OBLIGATIONS OR LIABILITIES OF CITY UNDER THIS LICENSE ARE CONTINGENT UPON ADOPTION OF SUCH A RESOLUTION, AND THIS LICENSE SHALL BE NULL AND VOID IF CITY'S PUBLIC UTILITIES COMMISSION DO NOT APPROVE THIS LICENSE, AT THEIR RESPECTIVE SOLE DISCRETION. APPROVAL OF THIS LICENSE BY ANY DEPARTMENT, COMMISSION, OR AGENCY OF CITY SHALL NOT BE DEEMED TO IMPLY THAT SUCH RESOLUTION WILL BE ENACTED, NOR WILL ANY SUCH APPROVAL CREATE ANY BINDING OBLIGATIONS ON CITY.

[SIGNATURES ON FOLLOWING PAGE]

LICENSEE REPRESENTS AND WARRANTS TO CITY THAT IT HAS READ AND UNDERSTANDS THE CONTENTS OF THIS LICENSE, HAS HAD AN OPPORTUNITY TO REVIEW AND DISCUSS IT WITH COUNSEL OF ITS CHOOSING, AND AGREES TO COMPLY WITH AND BE BOUND BY ALL OF ITS PROVISIONS.

AMENDMENT TO THE

RIGHT OF WAY INTEGRATED VEGETATION MANAGEMENT POLICY

Approved January 13, 2015

by

SFPUC Resolution No. 15-0014

12.000 RIGHT OF WAY INTEGRATED VEGETATION MANAGEMENT POLICY

12.001 General

The San Francisco Public Utilities Commission ("SFPUC") is responsible for the delivery of potable water and the collection and treatment of wastewater for some 800,000 customers within the City of San Francisco; it is also responsible for the delivery of potable water to 26 other water retailers with a customer base of 1.8 million. **The following policy is established to manage vegetation on the transmission, distribution and collection systems within the SFPUC Right of Way ("ROW") so that it does not pose a threat or hazard to the system's integrity and infrastructure or impede utility maintenance and operations.**

The existence of large woody vegetation[1], hereinafter referred to as vegetation, and water transmission lines within the ROW are not compatible and, in fact, are mutually exclusive uses of the same space. Roots can impact transmission pipelines by causing corrosion. The existence of trees and other vegetation directly adjacent to pipelines makes emergency and annual maintenance very difficult, hazardous, and expensive, and increases concerns for public safety. The risk of fire within the ROW is always a concern and the reduction of fire ladder fuels within these corridors is another reason to modify the vegetation mosaic. In addition to managing vegetation in a timely manner to prevent any disruption in utility service, the SFPUC also manages vegetation on its ROW to comply with local fire ordinances enacted to protect public safety.

One of the other objectives of this policy is to reduce and eliminate as much as practicable the use of herbicides on vegetation within the ROW and to implement integrated pest management (IPM).

12.002 Woody Vegetation Management

1.0 Vegetation of any size or species will not be allowed to grow within certain critical portions of the ROW, pumping stations or other facilities as determined by a SFPUC qualified professional, and generally in accordance with the following guidelines.

1.1 Emergency Removal

SFPUC Management reserves the right to remove any vegetation without prior public notification that has been assessed by a SFPUC qualified professional as an immediate threat to transmission lines or other utility infrastructure, human life and property due to acts of God, insects, disease, or natural mortality.

1.2 Priority Removal

Vegetation that is within 15 feet of the edge of any pipe will be removed and the vegetative debris will be cut into short lengths and chipped whenever possible. Chips will be spread upon the site where the vegetation was removed. Material that cannot be chipped will be hauled away to a proper disposal site.

[1] Woody vegetation is defined as all brush, tree and ornamental shrub species planted in (or naturally occurring in) the native soil having a woody stem that at maturity exceeds 3 inches in diameter.

If vegetation along the ROW is grouped in contiguous stands[2], or populations, a systematic and staggered removal of that vegetation will be undertaken to replicate a natural appearance. Initial removal[3] will be vegetation immediately above or within 15 feet of the pipeline edges; secondary vegetation[4] within 15 to 25 feet from pipelines will then be removed.

1.3 Standard Removal

Vegetation that is more than 25 feet from the edge of a pipeline and up to the boundary of the ROW will be assessed by a SFPUC qualified professional for its age and condition, fire risk, and potential impact to the pipelines. Based on this assessment, the vegetation will be removed or retained.

1.4 Removal Standards

Each Operating Division will develop its own set of guidelines or follow established requirements in accordance with local needs.

2.0 All stems of vegetation will be cut flush with the ground and where deemed necessary or appropriate, roots will be removed. All trees identified for removal will be clearly marked with paint and/or a numbered aluminum tag.

3.0 Sprouting species of vegetation will be treated with herbicides where practicable, adhering to provisions of Chapter 3 of the San Francisco Environment Code.

4.0 Erosion control measures, where needed, will be completed before the work crew or contractors leave the work site or before October 15 of the calendar year.

5.0 Department personnel will remove in a timely manner any and all material that has been cut for maintenance purposes within any stream channel.

6.0 All vegetation removal work and consultation on vegetation retention will be reviewed and supervised by a SFPUC qualified professional. All vegetation removal work and/or treatment will be made on a case-by-case basis by a SFPUC qualified professional.

7.0 Notification process for areas of significant resource impact that are beyond regular and ongoing maintenance:

7.1 County/City Notification – The individual Operating Division will have sent to the affected county/city a map showing the sections of the ROW which will be worked, a written description of the work to be done, the appropriate removal time for the work crews, and a contact person for more information. This should be done approximately 10 days prior to start of work. Each Operating Division will develop its own set of guidelines in accordance with local need.

[2] A stand is defined as a community of trees possessing sufficient uniformity in composition, structure, age, arrangement, or condition to be distinguishable from adjacent forest communities to form a management unit.
[3] Initial removal is defined as the vegetation removed during the base year or first year of cutting.
[4] Secondary vegetation is defined as the vegetative growth during the second year following the base year for cutting.

7.2 Public Notification – The Operating Division will have notices posted at areas where the vegetation is to be removed with the same information as above also approximately 10 days prior to removal. Notices will also be sent to all property owners within 300 feet of the removal site. Posted notices will be 11- by 17-inches in size on colored paper and will be put up at each end of the project area and at crossover points through the ROW. Questions and complaints from the public will be handled through a designated contact person. Each Operating Division will develop its own set of guidelines in accordance with local needs.

12.003 Annual Grass and Weed Management

Annual grasses and weeds will be mowed, disked, sprayed or mulched along the ROW as appropriate to reduce vegetation and potential fire danger annually. This treatment should be completed before July 30 of each year. This date is targeted to allow the grasses, forbs and weeds to reach maturity and facilitate control for the season.

12.004 Segments of ROW that are covered by Agricultural deed rights

The only vegetation that may be planted within the ROW on those segments where an adjacent owner has Deeded Agricultural Rights will be: non-woody herbaceous plants such as grasses, flowers, bulbs, or vegetables.

12.005 Segments of ROW that are managed and maintained under a Lease or License

Special allowance may be made for these types of areas, as the vegetation will be maintained by the licensed user as per agreement with the City, and not allowed to grow unchecked. Only shallow rooted plants may be planted directly above the pipelines.

Within the above segments, the cost of vegetation maintenance and removal will be borne by the tenant or licensee exclusively. In a like fashion, when new vegetative encroachments are discovered they will be assessed by a SFPUC qualified professional on a case-by-case basis and either be permitted or proposed for removal.

The following is a guideline for the size at maturity of plants (small trees, shrubs, and groundcover) that may be permitted to be used as landscape materials. Note: All distance measurements are for mature trees and plants measured from the edge of the drip-line to the edge of the pipeline.

- Plants that may be permitted to be planted directly above existing and future pipelines: shallow rooted plants such as ground cover, grasses, flowers, and very low growing plants that grow to a maximum of one foot in height at maturity.
- Plants that may be permitted to be planted 15–25 feet from the edge of existing and future pipelines: shrubs and plants that grow to a maximum of five feet in height at maturity.
- Plants that may be permitted to be planted 25 feet or more from the edge of existing and future pipelines: small trees or shrubs that grow to a maximum of twenty feet in height and fifteen feet in canopy width.

Trees and plants that exceed the maximum height and size limit (described above) may be permitted within a leased or licensed area provided they are in containers and are above ground. Container load and placement location(s) are subject to review and approval by the SFPUC.

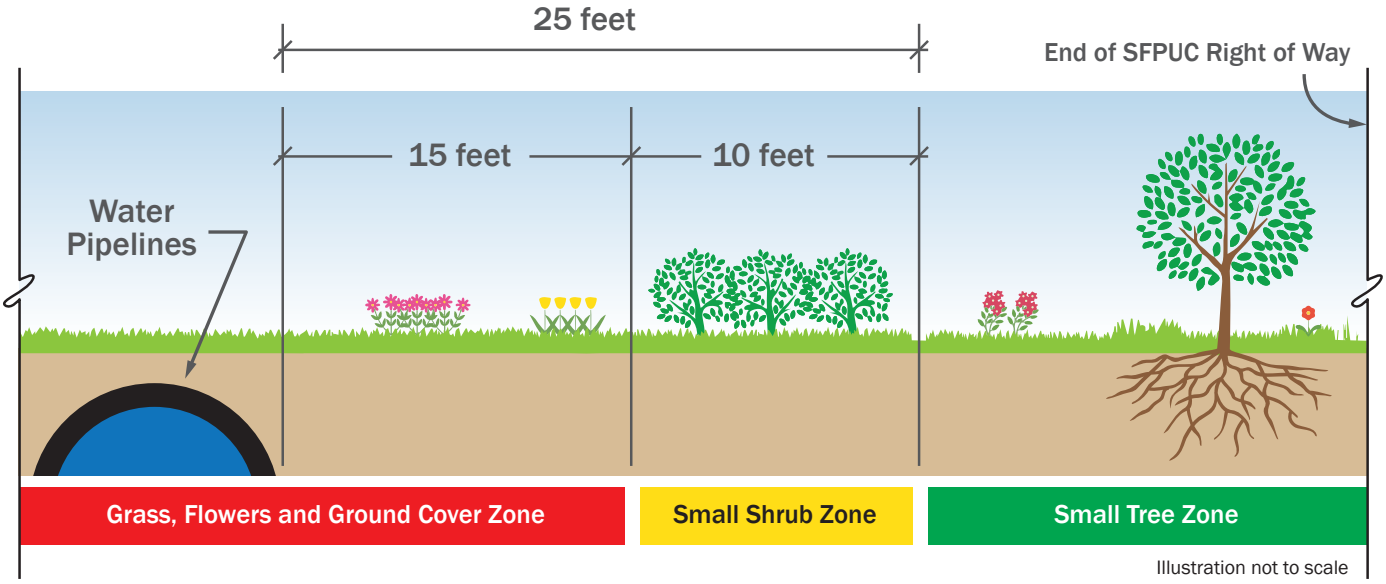
Low water use plant species are encouraged and invasive plant species are not allowed.

All appurtenances, vaults, and facility infrastructure must remain visible and accessible at all times. All determinations of species acceptability will be made by a SFPUC qualified professional.

The above policy is for general application and for internal administration purposes only and may not be relied upon by any third party for any reason whatsoever. The SFPUC reserves the right at its sole discretion, to establish stricter policies in any particular situation and to revise and update the above policy at any time.

San Francisco Public Utilities Commission (SFPUC)

Right Of Way (ROW) Landscape Vegetation Guidelines



The following vegetation types are permitted on the ROW within the appropriate zones.

Plantings that may be permitted directly above existing and future pipelines:

Ground cover, grasses, flowers, and very low growing plants that reach no more than one foot in height at maturity.

Plantings that may be permitted 15–25 feet from the edge of existing and future pipelines:

Shrubs and plants that grow no more than five feet tall in height at maturity.

Plantings that may be permitted 25 feet or more from the edge of existing and future pipelines:

Small trees or shrubs that grow to a maximum of twenty feet in height and fifteen feet in canopy width or less.

Agenda Item # 14.

SAN FRANCISCO WATER DEPARTMENT

LAND USE PERMIT

Pursuant to authority granted by the Public Utilities Commission, permission is hereby granted to

CITY OF LOS ALTOS
ONE NORTH SAN ANTONIO ROAD
LOS ALTOS, CALIFORNIA 94022

(hereinafter called "Permittee") to occupy and utilize the following described parcel or premises owned by the City and County of San Francisco (hereinafter called "City") an under jurisdiction of the Water Department:

The entirety of Parcel 233-A and portion of Parcels 232-A, 234-A, 236 and 237 of Bay Division Pipeline Nos. 3 and 4 right of way according to San Francisco Water Department records; said parcels as shown on San Francisco Water Department drawing C-1061-1 attached hereto and made a part hereof. Containing 2.53 acres more or less;

for the purpose of bicycle path and landscaping at the location referred to above.

This permit is granted subject to the following conditions:

1. Unless otherwise specifically provided herein this permit shall become effective when the Public Utilities Commission or its authorized representative and the Permittee have signed it. A copy shall be furnished to Permittee.
2. This permit does not constitute a lease, deed or grant of an easement, or of a fee interest by City. It is not transferable or assignable, and is revocable at any time at the option of the Public Utilities Commission.
3. The use authorized by this permit is limited solely to the purposes set forth herein, and, except as expressly herein provided, construction, excavation or installation of structures is not authorized.
4. Neither City nor any commission, board, officer, or employee thereof shall be held responsible or liable for damage to any property of the Permittee installed or located on the premises covered by this permit.
5. Permittee shall at all times keep City's lands in good and sightly condition, so far as the same may be affected by Permittee's operation hereunder.
6. In the event City institutes and prevails in any action for the enforcement of any of its rights hereunder, Permittee will pay to City such reasonable attorney's fees as may be determined by the Court, as part of the costs of such action.

7. Permittee shall, on receipt of notice to do so and within such reasonable time limits as may be fixed by said notice, alter or remove at his own expense any of his improvements, plantings, or other property to such extent as may be required to avoid interference with any of City's pipe, power lines, or other structures now or hereafter to be constructed, with the maintenance thereof, or with any other operations or land use by City. In the event Permittee fails to alter or remove any of his improvements, plantings, or other property within the time limit specified in said notice, said improvements, plantings, or other property may be removed by City, the reasonable expense of which shall be paid to City by Permittee.

8. In the event of any emergency City may, at its sole option and without notice, alter, remove or protect at Permittee's expense, any improvements, plantings, or other property, except utility facilities owned either by a private company or a public agency. On notice that an emergency exists, owners of utility facilities, at their own expense, must take immediate action to protect, remove or relocate such facilities as required to meet the emergency.

9. Permittee shall be responsible and liable for any and all damage to City's structures or property, due directly or indirectly to Permittee's occupation and use of City lands pursuant to this permit, and shall promptly pay any just claim therefor. Permittee shall assume the defense of and indemnify and save harmless the City and County of San Francisco, its Public Utilities Commission, officers, and employees from all claims, loss, liens, damage, injury and liability of every kind, nature and description, directly or indirectly arising from Permittee's occupation and use of City lands pursuant to this permit regardless of responsibility for negligence.

10. Any gardening or landscaping shall be limited to low growing shrubs, grass or plants. Planting of trees on pipeline or electric line rights-of-way is expressly not permitted.

11. To the extent that any special conditions set forth herein conflict with or are inconsistent with the printed conditions, the special conditions shall prevail.

12. In the event the purpose of this permit is to allow Permittee to install utility facilities underground across City's premises, the clear distance between the bottom of Permittee's installation and the top of City's existing and proposed future water lines shall not be less than six inches and Permittee's said installation shall be placed at an approximately constant grade for the entire crossing.

13. In the event the purpose of this permit is to allow Permittee to install utility facilities underground across City's premises, Permittee shall properly mark the alignment of the underground installation with witness posts.

14. All conditions of this permit are subject to periodic review.

15. This permit supersedes and revokes permit numbered 3137 commencing June 1974 and issued to City of Los Altos.

16. This permit is made subject to restrictions, conditions and to any and all easements and encumbrances of record.

17. Pursuant to Section 7 of this permit, City shall not be responsible for replacement of Permittee's improvements, plantings or other property.

    In the event maintenance is required on the existing pipelines or the installation of an additional line, then all costs of removing and replacing the Permittee's improvements shall be at no cost to the City.

18. Trees are expressly prohibited on Premises. Plants used for landscaping shall not exceed six (6) feet in height and shall be limited to varieties whose trunk at maturity does not exceed three (3) inches in diameter at a point six (6) inches above the ground surface.

19. Permittee's improvements and permitted area shall be in accordance with: (1) drawing entitled "Preliminary Landscape Plan" dated July 11, 1973, (revised March 21, 1974) prepared by Royston, Hanamoto, Beck & Abey, Landscape Architects; (2) set of Plans prepared by George Nolte and Associates, drawing numbers 6070-73, sheets 2, 3, 4 and 5 dated May 1974; and (3) drawing from City of Los Altos dated November 19, 1985, showing added permit area for City of Los Altos. Copies of said drawings, bearing signed approval of General Manager and Chief Engineer of San Francisco, hereinafter called "Manager", are on file with the Water Department.

    Permittee shall not perform any new earthwork, construction work or alteration work on Premises without prior written approval of Manager. Permittee shall notify the Manager of Suburban Operations of the San Francisco Water Department, Telephone (415) 697-4424, five (5) working days prior to the date of undertaking any work so approved.

20. Permittee shall exercise extreme care in the use of any tools and equipment in the course of any work permitted hereunder so as to not damage or injure City's pipelines or appurtenances. Permittee's use of vehicles and construction equipment within twenty (20) feet of City's pipelines shall be restricted as follows:

    a. Minimal cover over the pipelines shall be three (3) feet.

b. "Axle loading" of vehicles and construction equipment shall not exceed "AASHO Standard H-10 Loading". H-10 loading is defined as loading caused by a two axle truck with a gross weight of ten tons (20,000 lbs.), axles 14 feet apart, and rear axle carrying 8 tons (16,000 lbs.). It is Permittee's responsibility to provide substantiation that his equipment meets this requirement. Should this loading requirement prove to be inadequate protection for the pipelines, a more stringent limitation should be effective upon City's notice to Permittee.

c. The use of vibrating compaction equipment is prohibited.

21. Permit drawing attached and made a part of this permit shows the location of all City's pipeline right-of-way survey monuments. These monument points are noted in the drawings as "Existing" for monuments in place, and "Missing" for monuments not in place.

In accepting this permit, Permittee acknowledges that "existing" monuments are in good condition. During the term of this permit, Permittee shall assume full responsibility for protecting "existing" monuments from dislocation, damage and destruction.

Permittee agrees to reimburse City in the amount of $750.00 for each monument necessitating resurvey, repair and/or replacement.

During the term of this permit, the City may replace "missing" monuments, or install new monuments. When "missing" monuments are replaced, or new monuments installed, the Permittee will be given written notice and thereafter Permittee shall assume the same protection and reimbursement responsibilities as with "existing" monuments provided herebefore.

22. This permit shall commence retroactively from December 1, 1985 and shall be subject to annual review unless revoked sooner, pursuant to hereinabove Condition No. 2.

23. Permittee shall reimburse the City for fifty percent (50%) of all taxes and assessments levied on the subject permit area. Permittee recognizes and understands that this permit may create a possessory interest subject to property taxation and that the Permittee may be subject to the payment of property taxes levied on such interest.

24. Exhibit A entitled "Addendum to All City and County of San Francisco Contracts" is attached hereto and is hereby incorporated by reference.

25. Public Liability and Property Damage Insurance:

Permittee agrees to maintain in force during the existence of this permit, and at its cost and expense, comprehensive general liability insurance, including automobile and products liability insurance if required by the Public Utilities Commission. The policy or policies of said insurance shall name as insured, or as additional insureds, City, Public Utilities Commission and its members, and the officers, agents and employees of each. Said policy or policies shall insure said persons against loss or liability for damages for bodily injury, death or property damage occasioned by reason of the operations of Permittee in, on and about the property permitted to be occupied by or used with minimum liability limits as follows:

$1,000,000 Combined Single Limit for bodily injury or death of any one person; and
for bodily injury or death of two or more persons,
in any one occurrence; and
for damage to property resulting from any one occurrence.

A copy of said insurance policy or policies shall be furnished to the General Manager and Chief Engineer, San Francisco Water Department, hereinafter referred to as Manager, upon the execution of this permit and shall contain a provision that written notice of cancellation or of any material change thereof shall be delivered to Manager thirty (30) days in advance of the effective date thereof. In the event that others than the aforesaid persons are named in said policy or policies as insureds, or additional insureds, Permittee shall furnish Manager with a satisfactory severability of interests endorsement thereon. Approved forms of the last two aforesaid endorsements may be obtained from Manager.

Thereafter and during the term of this permit, Permittee shall furnish to Manager, from time to time, a duly executed certificate to the effect that the insurance coverage furnished to City is being maintained by Permittee. Such policies or certificates shall be issued by a company or companies approved in writing by City's Controller and as to form by City's City Attorney. Permittee shall increase the aforesaid limits upon the written demand of City provided that said increases are reasonable and justifiable by City.

CHAPTER 12C OF THE SAN FRANCISCO ADMINISTRATIVE CODE

AMENDING THE SAN FRANCISCO ADMINISTRATIVE CODE BY ADDING CHAPTER 12C THERETO, PROHIBITING DISCRIMINATION IN REAL PROPERTY CONTRACTS ON THE GROUND OR BECAUSE OF RACE, COLOR, CREED, NATIONAL ORIGIN, ANCESTRY, AGE, SEX, SEXUAL ORIENTATION OR DISABILITY.

Be it ordained by the People of the City and County of San Francisco:

Section 1. Chapter 12C is added to the San Francisco Administrative Code to read as follows:

CHAPTER 12C

NONDISCRIMINATION IN PROPERTY CONTRACTS

SEC. 12C.1. All Property Contracts to Include Nondiscrimination Provisions.

All contracting agencies of the City and County of San Francisco, or any department thereof, acting for or on behalf of the City and County, shall include in all contracts, franchises, leases, concessions or other agreements involving the lease, rental, or other use of real property and improvements thereon of the City and County of San Francisco, for a period exceeding twenty-nine (29) days in any calendar year, whether by singular or cumulative instrument, a provision obligating the contractor, franchisee, lessee, concessionaire, or other party of said agreement not to discriminate on the ground or because of race, color, creed, national origin, ancestry, age, sex, sexual orientation or disability against any person seeking accommodations, advantages, facilities, privileges, services, or membership in all business, social, or other establishments or organizations, operating from or making use of said real property, and shall require such contractor, franchisee, lessee, or concessionaire to include a similar provision in all subcontracts, subleases, or other subordinate agreements for a period exceeding twenty-nine (29) days in any calendar year, whether by singular or cumulative instrument, let, awarded, negotiated or entered into thereunder.

SEC. 12C.2. Definitions.

As used in this chapter the term:

"Age" for the purpose of membership refers to and shall include any person who has attained the age of eighteen (18) years, except for bona fide senior citizen organizations.

"Contract" shall mean and include an agreement to operate from or make use of real property of the City and County of San Francisco in the operation of a business, social, or other establishment or organization.

"Contractor" means any person or persons, firm, partnership, corporation, or combination thereof, who enters into a contract to operate from or make use of real property of the City and County of San Francisco in the operation of a business, social, or other establishment or organization.

"Subcontract" shall mean and include an agreement or contract under or subordinate to a prime contract, franchise, lease, or concession to operate from or make use of real property of the City and County of San Francisco in the operation of a business, social or other establishment or organization.

"Concession" includes a grant of land or other property by or on behalf of the City and County of San Francisco to a person for the purpose or use specified in said grant.

"Concessionaire" shall mean and include a person who is the grantee or beneficiary of a concession as herein defined.

"Franchise" shall mean and include a right or privilege conferred by grant from the City and County of San Francisco, or any contracting agency thereof, and vested in and authorizing a person to conduct such business, social, or other activity as is specified in said grant.

"Franchisee" shall mean and include a person who is the grantee or beneficiary of a franchise as herein defined.

"Instrument" shall mean and include a contract, franchise, lease, concession or other agreement to operate from or make use of real property of the City and County of San Francisco in the operation of a business, social or other establishment or organization.

"Lease" shall mean and include a contract by which the City and County of San Francisco, or any contracting agency thereof, grants to a person the temporary possession and use of property, for reward, and the latter agrees to return the same to the former at a future time.

"Lessee" shall mean and include a person or tenant taking possession of real property under a lease as herein provided.

"Sublease" shall mean and include a lease by which a lessee or tenant transfers or lets to another person part or all of the leased real property for a portion of the term and under which said lessee or tenant retains some right or interest under the original lease.

"Real Property" shall mean and include land in which the City and County of San Francisco holds a legal interest and improvements to said real property.

"Sex" shall mean the character of being male or female.

"Sexual Orientation" shall mean the choice of human adult sexual partner according to gender.

"Disability" is a physical or mental impairment which does not make the person incapable of making use of the accommodations, advantages, facilities, privileges, services or membership in business, social or other establishments or organizations with a reasonable accommodation to his or her disability, and does not make the person incapable of making such use in a manner which would not endanger his or her health and safety or the health and safety of others.

"Tenant" shall mean the person or persons, firm, partnership, corporation or combination thereof who enter into a contract, franchise, lease, concession or other agreement involving the lease, rental or other use of real property and improvements thereon of the City and County of San Francisco.

SEC. 12C.3. Nondiscrimination Provisions of Property Contracts.

Every contract, franchise, lease, concession or other agreement entered into by any agency of the City and County of San Francisco, or any department thereof, involving the lease, rental, or other use of real property and improvements thereon of the City and County of San Francisco for a period exceeding twenty-nine (29) days in any calendar year, whether by singular or cumulative instrument, shall contain the provisions following, which shall be known as the nondiscrimination provisions of such property contract.

In the performance of this contract, the tenant agrees as follows:

(a) The tenant or subtenant will not discriminate against any person seeking accommodations, advantages, facilities, privileges, services, or membership in the business, social or other establishment or organization operated by the tenant or subtenant on the real property of the City and County of San Francisco, on the ground or because of race, color, creed, national origin, ancestry, age, sex, sexual orientation, or disability.

(b) Should the tenant or subtenant operate as a membership organization, the tenant will permit access to his membership records, rules, regulations and other pertinent data, by the awarding authority, or the San Francisco Human Rights Commission, for the purpose of investigating to ascertain compliance with the nondiscrimination provisions of this contract, and on request provide evidence that has or will comply with the nondiscrimination provisions of this contract.

(c) That tenant or subtenant shall be deemed to have breached the nondiscrimination provisions of this contract upon:

(1) A finding by the Director of the San Francisco Human Rights Commission or such other official who may be designated by the Human Rights Commission, that tenant has wilfully violated such nondiscrimination provisions.

(2) Upon such finding by the Director of the Human Rights Commission, or other official designated by the Human Rights Commission, the awarding authority shall notify tenant, or subtenant that unless he demonstrates to the satisfaction of the Director of the San Francisco Human Rights Commission or other official designated by the Human Rights Commission within such reasonable period as the Human Rights Commission shall determine, that the violation has been corrected, action will be taken as set forth in subparagraph (d).

(3) The Human Rights Commission shall, within ten days of the date of issuance of any finding by the Director of the Human Rights Commission or other official designated by the Commission in the enforcement of this chapter, mail to any person or persons affected by said finding, a copy of said finding, together with written notice of his right to appeal. Notice of appeal must be filed in writing with the Chairman of the Commission within 20 days of the date of mailing said copy and notice.

(4) For purposes of appeal proceedings under this section, a quorum shall consist of eight members of the Commission. The vote of the majority of the full Commission shall be necessary to affirm, reverse or modify such decisions, order or other action rendered hereunder. Should a member of the Human Rights Commission be designated under Section 12B.2 (c) (1) of this contract, that commissioner may not participate in an appeal under this section except as a witness.

(5) The presiding officer of the Commission shall have the power to administer oaths to witnesses in appeals before the Commission under this section. In the event that any person shall fail or refuse to appear as a witness in any such proceeding after being requested to do so, and if it shall appear to the Commission that his testimony, or books, records, documents or other things under his control are material and relevant as evidence in the matter under consideration by the Commission in the proceeding, the presiding officer of the Commission may subpoena such person, requiring his presence at the proceeding and requiring him to bring such books, records, documents or other things under his control.

(6) All appeals to the Human Rights Commission shall be open to public inspection. Upon reaching a decision in any appeal, the Commission shall give written notice thereof to the Director of the Human Rights Commission, or other official designated by the Human Rights Commission, and the appellant or appellants. The decision of the Commission shall be final unless within 15 days of the filing and service of written notice thereof appropriate legal proceedings are filed in a court of competent jurisdiction by any party to this contract.

(7) If any tenant or subtenant under contract to the City and County of San Francisco shall fail to appear at an appeal proceeding of the Commission after having been given written notice to appear, such failure to appea shall be grounds for cancellation of the contract or subcontract and such tenant or subtenant shall be deemed to have forfeited all rights, benefits and privileges thereunder.

(8) The Human Rights Commission of San Francisco shall promulgate rules and regulations for the implementation of the nondiscrimination provisions of this contract, and such rules and regulations shall, so far as practicable, be similar to those adopted in applicable federal executive orders.

(d) A breach of the nondiscrimination provisions in the performance of this contract shall be deemed by the City and County of San Francisco to be a material breach of contract and basis for determination by the officer, board or awarding authority responsible for the awarding or letting of such contract that the tenant or subtenant is an irresponsible tenant, lessee, franchisee or concessionaire as to all future contracts for the use of real property. Such person, firm or corporation shall not, for a period of two (2) years thereafter, or until he/she shall establish and carry out a program in conformity with the nondiscrimination provisions of this contract, be allowed to act as a tenant or subtenant under any contract involving the lease, rental or other use of real property and improvements thereon, of the City and County of San Francisco.

(e) Nothing contained in this contract shall be construed in any manner so as to prevent the City and County of San Francisco from pursuing any other remedies that may be available at law.

SEC. 12C.4. Human Rights Commission Empowered.

The San Francisco Human Rights Commission, its presiding officer and its director are hereby granted the power to do all acts and exercise all powers referred to in Section 12C.2 hereof.

SEC. 12C.5. Funding.

The Board of Supervisors shall appropriate such funds from the general fund of the City and County of San Francisco, subject to budgetary and fiscal provisions of the charter, as it may deem necessary for enforcement of this ordinance.

SEC. 12C.6. Severability.

If any clause, sentence, paragraph or part of this title or the application thereof to any person or circumstances shall, for any reason, be adjudged by a court of competent jurisdiction to be invalid, such jurisdiction shall not affect, impair or invalidate the remainder of this chapter.

SUBJECT: HETCH HETCHY RIGHT OF WAY LAND USE PERMIT

Dear Mr. Dowd,

The City of Los Altos currently holds a Land Use Permit from the San Francisco Public Utilities Commission to occupy and utilize the entirety of Parcel 233-A and portions of Parcels 232-A, 234-A, 236 and 237 of Bay Division Pipeline Nos. 3 and 4 right of way for the purpose of a bicycle path and landscaping. A copy of the Use Permit is attached. A bicycle path exists on Parcels 236 and 237. Parcel 233-A and portions of Parcels 232-A, 234-A are currently undeveloped.

Los Altos requests that the Use Permit by modified to delete Parcel 233-A and portions of Parcels 232-A, 234-A from the Use Permit. The City has abandoned our proposed plan to construct a bicycle path in this area west of Los Altos Avenue. However, we wish to continue to maintain the existing bicycle path and landscaping east of Los Altos Avenue on Parcels 236 and 237. A drawing showing the area to be deleted from the Use Permit is attached.

Please advise on the process or procedure for modifying the Use Permit. Your assistance in this matter is greatly appreciated. If you have any questions, please feel free to contact me at (650) 947-2622.

Sincerely,

Jim Porter
Public Works Director

SUBJECT: HETCH HETCHY RIGHT OF WAY LAND USE PERMIT

Dear Mr. Porter,

Per the request of the City of Los Altos to delete portions of the Land Use Permit P-3137A, the San Francisco Public Utilities Commission has agreed to the deletions for the entirety of Parcel 233-A and portions of Parcels 232-A and 234-A from the land use permit. The Land Use Permit will retain Parcels 236 and 237, including the maintenance of the bike path and landscaping on those parcels. The Land Use Permit has been renumbered P-3137B. A map showing the active parcels covered under this permit is attached.

If you have any questions regarding this matter, feel free to contact me at (415) 554-1522.

Sincerely,

Robert Reiter
Real Property Officer

Date: Sunday, September 18, 2022 2:10:12 PM

Dear Council Members:
Please do not rubber stamp the SFPUC agreement. Those of us who use the path and also appreciate the established tree canopy of Los Altos would like to find a way to help SFPUC reduce the damage from their proposed actions.
Let us work together on this.
Thank you,

Subject: Hetch Hetchy Trail license agreement
Date: Sunday, September 18, 2022 10:35:51 PM
Attachments: Tom Evatt Park.png
John W. Christian Greenbelt.png
John Christian Greenbelt Sunnyvale .png
B9F8E1D4-2F6A-4E73-87B3-C82AE82CE6B4.png

To the honorable Los Altos City Council,

I am writing in regards to the updated license agreement with SFPUC for the Hetch Hetchy Trail (item 14 on the Agenda for the Tuesday, Sept. 20, 2022 meeting). As you know, interest in this item is quite high based on the large turnout at the meeting held about the Hetch Hetchy property in the community center (see photo).

I would like to propose that as part of the negotiations, the city of Los Altos develop a plan and form a committee for improving the existing trail and make it into a better maintained greenbelt. This can be presented as part of the discussions with the Hetch Hetchy board. It could also be included in the agreement such that they cannot later change it.

If you follow the Hetch Hetchy pipeline through other cities, you will see many parks and greenbelts that are built over the pipeline including right across the street from Los Altos at 2640 W. El Camino Real in Mountain View. Other locations similar in shape to the Los Altos trail are the long multiple greenbelts called "John W. Christian Greenbelt" in Sunnyvale and the Tom Evatt Park in Milpitas. Photos of these three areas are attached below.

The concern that people have is the threat of cutting down the trees on the property. There are many tall older trees that are largely along the perimeter of the property. Some of these trees are old oak trees likely planted over 100 years ago when the Hetch Hetch Aqueduct was built in the years from 1914 to 1934. Many of these trees appear to be over 25 feet away from the underground pipeline and most of them are over 15 feet away, however the Hetch Hetchy property is wider than this at 80 feet wide. This means that per the Hetch Hetchy diagram, any tree that is over 20 feet high or has a canopy over 15 feet wide can be removed (see the green zone in the document attached).

With best regards,
Donald Gardner, Ph.D.

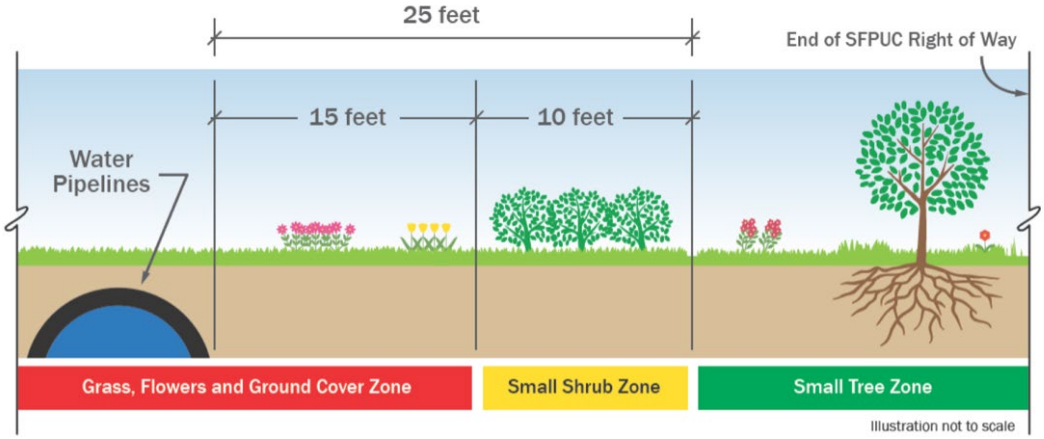
San Francisco Public Utilities Commission (SFPUC)

Right Of Way (ROW) Landscape Vegetation Guidelines



The following vegetation types are permitted on the ROW within the appropriate zones.

Plantings that may be permitted directly above existing and future pipelines:

Ground cover, grasses, flowers, and very low growing plants that reach no more than one foot in height at maturity.

Plantings that may be permitted 15–25 feet from the edge of existing and future pipelines:

Shrubs and plants that grow no more than five feet tall in height at maturity.

Plantings that may be permitted 25 feet or more from the edge of existing and future pipelines:

Small trees or shrubs that grow to a maximum of twenty feet in height and fifteen feet in canopy width or less.

Subject: [Suspicious Impersonation] SFPUC agreement and trees on Hetch Hetchy trail.
Date: Monday, September 19, 2022 12:19:44 PM

Dear Members of the Los Altos City Council,

I am requesting that you do NOT sign the SFPUC agreement yet. I understand you are obligated to consider the agreement but we residents of Los Altos were only just recently made aware of the intentions of the SFPUC tree removal along the Hetch Hetchy path that lies within Los Altos.

We think signing the agreement now may result in trees being removed that are not actually impeding maintenance of the SFPUC pipe. We would like the city arborist, a representative from SFPUC and any other pertinent city officials and residents to walk the train together to mark the actual location of the pipe and so as to protect trees that are not a threat or actually lie on private property.

Please do not sign the SFPUC agreement until more information can be gathered.

respectfully,
Chris Tucker
280 Margarita Crt.

The new agreement is 47 pages long.
Please work WITH the community that elected you.
1. Postpone approving the agreement for one week.
2. Adequately publicize a meeting with the community to discuss the new proposal. We had over 100 people last week with nearly no notice.
3. Gabe should present a few Powerpoint slides highlighting the key elements of the new plan.
4. Agree to have a small group of specific residents walks the path with Gabe and SFPUC to mark trees etc.
(all abutters and some users of the Bike Path.)
5. Then, after that, you can sign and have changed the tone of the Council to one of actually getting the community input.

Subject: Please Do Not sign the agreement with SFPUC re: the Hetch Tetchy Bike Walking Path
Date: Monday, September 19, 2022 3:47:50 PM

Los Altos City Council,
At your Council meeting tomorrow evening, you will be asked to vote on an agreement with SFPUC regarding the Hetch Hetchy Bike Walking Path from Adobe Creek to Mercedes (item #14 on the agenda). **Please vote NO** tomorrow evening**.**

Community members need the opportunity to review the agreement, understand the implications and offer perspective. There has not been sufficient time for the community to weigh in – and with a NO vote tomorrow night, you will enable the community to have a voice in your decision-making process.

Thank you for your consideration,

Holly Cohen

Subject: PUBLIC COMMENT AGENDA ITEM #14 9/20/22
Date: Tuesday, September 20, 2022 12:12:02 AM

I would like to very much express my appreciation to Gabe Engeland for taking the time last Thursday to explain the license renewal situation with SFPUC and to field all the questions from the 104 people in attendance at the information session. As we saw at the information session, it was very clear that there was very passionate interest by the community to make sure the Hetch Hetchy path is kept as tree-friendly as possible.

And personally as an abutter to the path, there are two large oak trees that are right next to our property that sounds like they are at high risk from the SFPUC maintenance guidelines. It would be a tragedy if these beautiful trees were lost unnecessarily.

While we understand Gabe's strategy to try to get on good terms with the SFPUC for negotiating saving as many trees as possible, we believe this is a high risk strategy. We would like to involve the community in trying to figure out the best approach for negotiating with the SFPUC.

To this end, we would like to make the following recommendations for the approval tomorrow:

- DO NOT sign or approve the agreement with SFPUC on Sept 20th
- Ask the council members to form a committee with residents to review the SFPUC issue; let's include the community in this discussion.
- Give that combined committee time to meet with SFPUC and bring them to the table for a discussion.

We hope that we can cooperatively figure out the best strategy for resolving this situation with the SFPUC.

Thank you for all your help.

Subject: PUBLIC COMMENT AGENDA ITEM #14 9/20/22
Date: Tuesday, September 20, 2022 8:59:09 AM

Hi City of Los Altos,

We would like to express our concerns to allow SFPUC to cut down the large heritage trees on the Hetchy Hetchy path. This is a path that we enjoy and use daily and it would be a great loss to the city of Los Altos, if the natural beauty of the path was lost.

While we understand that SFPUC would like to cut the trees down for maintenance, I believe a compromise including discussions with members of the community should be completed and also looking into other ways of performing maintenance while saving as many of the trees as possible. Los Altos goes to large efforts to protect all heritage trees and I believe the same rules should apply in this case.

Thank you for your help.

Thanks,
-Vincent

To the honorable Los Altos City Council,

I am writing in regards to the updated license agreement with SFPUC for the Hetch Hetchy Trail (item 14 on the Agenda for the Tuesday, Sept. 20, 2022 meeting).

I received an inquiry from a council member about locations of parks and areas that have trees that are within 25 feet of the Hetch Hetchy pipeline. In response to this request, attached are images of parks and open areas that appear to have tall trees that are within 25 feet the Hetch Hetchy pipeline. Nearby locations with 40+ feet tall trees include the Rex Manor Park in Mountain View and the Alta Mesa Memorial Park at 700 Arastradero Rd, Palo Alto. There are also many areas along Junipero Serra Blvd and in the area of the Stanford Dish at Stanford University that appear to have such trees close to the pipelines. In addition, there is a location near 700 Tangelo Ct. Fremont where the pipeline crosses a stream with trees similar to that at Adobe Creek.

It is also worth noting that it has been shown that trees help reduce the soil disturbance and protect the land from liquifying during an earthquake. Trees are actually beneficial to be in the vicinity of the waterline to help protect it during an earthquake. Perhaps not all of the implications of removing trees have been considered.

With best regards,
Donald Gardner, Ph.D.

Attached is a list and images from 10 locations of parks and areas.

Rex Manor Park @ 185 Farley St., Mountain View
Alta Mesa Memorial Park @ 700 Arastradero Rd, Palo Alto
Park next to 255 S. Rengstorff Ave, Mountain View

Subject: SFPUC and the trail
Date: Tuesday, September 20, 2022 11:48:55 AM

Dear Members of the Los Altos City Council,

I am requesting that you do consider but NOT sign the SFPUC agreement yet. I understand you are obligated to consider the agreement but we residents of Los Altos were only just recently made aware of the intentions of the SFPUC tree removal along the Hetch Hetchy path that lies within Los Altos.

Our property is very near the trail and we use the trail often. Removing trees on the trail would result in complete lack of privacy in homes abutting the trail, or very near the trail like ours. It would also remove large areas of shade, with major adverse effects on current trees and vegetation in the adjoining areas and adjoining properties. It would result in a significant increase in noise from the sports fields and adjoining schools. Finally many of the trees are majestic oak trees that may be over 100 years old and should be protected to maintain the character of our Los Altos community.

We think signing the agreement now may result in trees being removed that are not actually impeding maintenance of the SFPUC pipe. We would like the city arborist, a representative from SFPUC and any other pertinent city officials and residents to walk the trail together to mark the actual location of the pipe and to work with the SFPUC to arrive at a reasonable solution that preserves the beautiful old trees along the trail.

Please do not sign the SFPUC agreement until more information can be gathered and reviewed, and a reasonable compromise struck with the SFPUC.

Respectfully,

Didier Moretti and Katrina Philip, 465 Mundell Way, Los Altos

Date: Tuesday, September 20, 2022 2:22:45 PM

Esteemed Mayor and Members of the Los Altos City Council:

We are writing to you with a request that you **NOT sign the agreement with SFPUC that would cut down the trees along the Los Altos-Palo Alto Bike Path**. We were shocked to learn about this plan from a neighbor and are appalled that our own city government did not seek greater community input on an issue that would effectively wipe out one of the most beautiful green areas in our city.

The trees and greenery along the bike path provide much needed shade and relief during the hottest months. They contribute to the beauty of the area and allow for privacy for the adjacent property owners. For those who use the bike path for commuting, the trees make the ride more bearable in the heat, enabling us to cycle (instead of riding cars) lessening overall congestion and pollution.

Without the trees it would be a brown, dead, barren wasteland for 9 months of the year. It would adversely affect the enjoyment of those who regularly use the path and the property values of those who own lots near it. It would transform a picturesque pathway into an eye sore.

We understand that SFPUC might have legitimate needs for their property maintenance, but as part of any corporate-social responsibility commitment that most similar entities adhere to, **any action that might have negative consequences on a community needs to be (1) necessary, (2) proportionate, and (3) the least restrictive to achieve the intended legitimate goal.** We currently do not have any evidence that the tree removal is necessary (Have there been any assessments or studies for the path specifically?). Even if some trees are shown to have the impact, we ask you whether the action of cutting down *all trees* is proportionate.

We urge the council not to sign the agreement today. Instead, we hope that you would form an advisory committee in partnership with residents to search for a solution and draft an addendum to the agreement that would be acceptable to all. As the city council, your job is to represent the interests of our community and our community has told you loud and clear–including in the meeting last week attended by over 100 residents – that we do not want the agreement signed as it currently stands.

We typically do not care about local politics, but this will be our #1 issue in the local elections this fall. Many others feel the same.

Sincerely,

Sanja and Jason Kelly

Please do not cut down the trees lining the pathway. Clear cutting is excessive and unnecessary. Green Los Altos has an initiative to plant new trees, which require more water than existing, older ones, and we are proposing to cut down establshed oak trees.

Nature is beautiful;. Part of the charm of Los ALtos is being able to meander along paths. If all the trees are cut down it will be ugly, unshaded, bad for the environment and extremely short-sighted on the town's behalf.

R Lisa Bernard, MD

Subject: Agenda item #14 Hetch Hetchy Trail Land Use Permit
Date: Tuesday, September 20, 2022 4:47:55 PM

Please delay the signing of the Land Use Permit for just two weeks so the City can meet with each abutter and establish where the SFWD water pipes run alongside their property line and what trees are within 20’ of the southern pipe (90”) and within 15’ of the northern pipe (72”).

Since SFWD wants to meet with only a representative of the City, this preliminary resident-focused process will give the abutters and the community that supports them the most comfort that they were heard and respected in this eleventh hour of negotiations.

Icing on the PR cake would be the City knowing which trees it too wants to save and is willing to offer removal services at the City's expense if a tree remains inside the clear-cut zones of 15 and 20 feet but needs to be removed for water pipe repair.

Subject: PUBLIC COMMENT AGENDA ITEM #14 - MEETING DATE OF SEPT 20, 2022
Date: Tuesday, September 20, 2022 6:53:36 PM

Dear Mayor Anita Enander and City Council Members Sally Meadows, Neysa Fligor, Lynette Lee Eng and Jonathan Weinberg:

My family members are residents of Los Altos for more than 25 years. Although we are not directly on the SFPUC/HH path, we are nearby. And for all these years we have biked, jogged, walked, strolled all along the path. We love the path, we love Los Altos. We are so proud to be part of this community.

We already participated, live, in the meeting of Thurs Sept 15/22. It was earlier that week that we learned of the dastardly fate that awaits our Los Altos trees along that path. NOOOOOO! Please please please do not sign the the latest SFPUC agreement. It seems to us that doing so would be the "path of least resistance" for the City Council to take. And that is AFTER many years of procrastinating and temporizing on this issue. City Council has done nothing to prepare for this inevitability for year after year!

It is time for our City Council to DO its job! And that job is to work with the residents of Los Altos to prepare in the best possible manner for the future of our city. The City Council should work with other Mayors, including those of Palo Alto and Mountain View. You should work with the Mayor of San Francisco. You should understand the makeup of the SFPUC and those who work on the Hetch Hechy project. Work with all these groups instead of continuing to do nothing!

BOTTOM LINE: PLEASE DO NOT SIGN THE SFPUC AGREEMENT without the residents input.

Thank you!

from Mary et Jacques Fossourier,

25+ year residents of Los Altos.

1168 Laureles Drive, Los Altos, 94022.

1. Santa Clara County Multi-Jurisdictional Program for Public Information Annual Evaluation Report for FY22

Initiated by:
Development Services Division/Floodplain Administrator

Previous Council Consideration:
July 13, 2021 – Council Adoption of the 2021 Santa Clara County Multi-Jurisdiction Program for Public Information

Fiscal Impact:
None

Environmental Review:
Not applicable

Policy Question(s) for Council Consideration:
None

Summary:
- The Program for Public Information (PPI) is a program under the National Flood Insurance Program's Community Rating System (CRS) which contributes to the city's rating. The Federal Emergency Management Agency requires the elected body of each community to approve the PPI to receive credit for having a plan pursuant to the CRS guidelines and receive an annual report on PPI efforts and requires the community to share the annual report with their governing body.

Subject: 2021 Santa Clara County Multi-Jurisdictional Program for Public Information (PPI) Annual Report (FY22 - Year 1)

- Accept FY22 (Year 1) Annual Report for the 2021 Santa Clara County Multi-Jurisdictional Program for Public Information

Staff Recommendation:
Move to receive the 2021 Santa Clara County Multi-Jurisdictional Program for Public Information Annual Report (FY22-Year 1)

Purpose
Accept the 2021 Santa Clara County Multi-Jurisdictional Program for Public Information Annual Report (FY22-Year 1) so the City will continue to receive credit under the National Flood Insurance Program's Community Rating System program.

Background
The CRS is a voluntary program that allows communities to earn flood insurance premium discounts for residents and businesses by promoting flood risk reduction practices, floodplain management, and encourage buying flood insurance. These activities go above and beyond the normal enforcement of floodplain regulations and the community earn various points for different activities. There are CRS Class ratings that are assigned at 500-point increments, and each improvement in class rating nets an additional 5% discount for property owners paying flood insurance premiums. The PPI is a committee-based localized and coordinated approach to flood hazard community outreach efforts, which is primarily being organized and lead by the Santa Clara Valley Water District ("Valley Water"). The PPI is a major component of the public outreach effort that Los Altos earn points for having some of the activities implemented locally or at the County level. The total savings in flood premium discounts for Santa Clara County residents from the CRS program (11 participating agencies) is approximately $2.37 million per year[1]. The PPI was reviewed by the Federal Emergency Management Agency (FEMA) to make sure its provisions fully comply with their requirements prior to approval by any participating agency's governing body. FEMA informed the participating agencies that this is one of the first multi-jurisdictional PPI to be completed, and it involves the largest number of participating communities to date.

Every five years, CRS communities must update the PPI. The 2021 Santa Clara County Multi-Jurisdictional Program for Public Information represents the Five-Year Plan. The PPI was developed jointly, but it must be individually approved by each community's elected body for that community to receive CRS points for its implementation. Valley Water's Board approved the PPI on April 27, 2021. On July 13, 2021, the City Council adopted the PPI for the city of Los Altos.

[1] Last reviewed in 2021.

Subject: 2021 Santa Clara County Multi-Jurisdictional Program for Public Information (PPI) Annual Report (FY22 - Year 1)

Under the CRS requirements, each year, the CRS communities must reconvene to evaluate whether the flood risk reduction messages are still appropriate and adjust the PPI, as needed. Additionally, a report to FEMA must be submitted annually describing the PPI implementation, and the report is shared with each participating community governing body.

Discussion/Analysis

In October 2021, the city of Los Altos completed its mandated five-year audit administered by FEMA through the Insurance Services Office (ISO) which reviewed in detail all the local CRS recognized activities. Prior to the audit, the CRS activities contributed to the city's Class 8 rating, giving residents a 10% discount on insurance premiums. With the adoption of the 2021 Santa Clara County Multi-Jurisdictional Program for Public Information (PPI) and the incorporation of city recognized CRS activities, the city received additional points along with other activities to improve its rating to a Class 7 which will give residents a 15% discount on insurance premiums issued or renewed on or after April 1, 2023.

The FY22 Annual Report is the first annual report for the 2021 Santa Clara County Multi-Jurisdictional Program for Public Information (PPI) Annual Report (Attached). The report includes background information on how the PPI was developed by the participants, the preparation of the annual evaluation, the PPI accomplishments for FY22, and new initiatives. With regard to projects accomplished in FY22, Attachment 2 of the Annual Report lists all the projects proposed in the 2021 PPI (titled "Appendix A CRS Creditable Outreach and Flood Response Project by CRS Community"), with a column titled "Project Accomplishments" noting actions taken during the first year of the PPI (FY22). The most extensive outreach project was the Valley Water's Annual Flood Awareness Campaign, which the city of Los Altos gets CRS credit for since it targets our community. Specific city activities include: making brochures available in public buildings; including flood information and links to Valley Water Flood Awareness and FEMA information on the city's website; publishing two newspaper ads in the Town Crier titled "Assess Your Flood Risk and Flood Insurance Availability"; coordinating with Mission Trail to send out a Valley Water flood awareness bill insert (no cost to city); and participating in PPI coordination meetings. It should be noted and recognized that as described in the report the establishment of the five-year PPI was delayed and some outreach activities such as community events were canceled altogether as related to COVID-19 pandemic impacts and workforce augmentation.

Recommendation

Receive the 2021 Santa Clara County Multi-Jurisdictional Program for Public Information Annual Report (FY22-Year 1).

Santa Clara County Multi-Jurisdictional Program for Public Information 2021

Annual Evaluation Report for FY22

(Year 1: July 2021 to June 2022)

June 2022

Prepared by:

Santa Clara Valley Water District

and

County of Santa Clara CRS Participating Communities

I. INTRODUCTION

The Community Rating System (CRS) is a voluntary program of the Federal Emergency Management Agency's (FEMA) National Flood Insurance Program (NFIP). The CRS program allows communities to earn flood insurance premium discounts for their residents and businesses by implementing local mitigation, floodplain management, and outreach activities that exceed the minimum NFIP requirements to reduce the risk of flooding.

In Santa Clara County, 11 (eleven) communities have been active participants in the FEMA NFIP CRS for over 30 years.

The CRS participating communities are City of Cupertino, City of Gilroy, City of Los Altos, City of Milpitas, City of Morgan Hill, City of Mountain View, City of Palo Alto, City of San Jose, City of Santa Clara, City of Sunnyvale, and the Santa Clara Valley Water District (Valley Water).

CRS participating communities, along with their external non-governmental stakeholders, non-participating communities: *City of Saratoga, Town of Los Altos Hills, Town of Los Gatos, and County of Santa Clara* who opted to join the 2021 Program for Public Information (PPI), comprise the PPI Committee. The PPI Committee is listed in *Table 1. Members of the Santa Clara County Multi-Jurisdictional 2021 PPI Committee* of the 2021 PPI. (Attachment #1)

FEMA requires that each community participating in the PPI provide at least two representatives to the regional PPI Committee, with at least half of the representatives from outside the local government. Additionally, at least half of the representatives must attend all the meetings of the regional PPI Committee.

An important benefit of the PPI Committee's work is close collaboration between local public agency staff who work on flood protection throughout Santa Clara County. Together, PPI Committee members continue strengthening their individual CRS programs and ensuring communities can evaluate their flood programs against a nationally recognized benchmark.

The 2021 PPI Committee, along with the remaining non-participating communities (*City of Campbell and City of Monte Sereno),* and other interested parties, make up the Santa Clara County CRS Users Group.

The Santa Clara County CRS Users Group collaborates to ensure floodplain management activities provide enhanced public safety, reduced damage to property and public infrastructure, and avoidance of economic disruption and loss in Santa Clara County. Through the 5-year PPI development and the annual reporting process, members of the SC County CRS Users Group learn from one another about local floodplain management activities, including flood protection and land use issues. For both the Santa Clara County CRS Users Group and the PPI Committee, the PPI is one of the most impactful activities of the CRS Program.

Under the CRS program, flood insurance premium rates are discounted to reward CRS participating community actions that meet the three goals of the CRS: (1) reduce flood damage to insurable property; (2) strengthen and support the insurance aspects of the NFIP; and (3) encourage a comprehensive approach to floodplain management.

Flood insurance premiums for participating CRS communities are reduced in 5% increments for every 500 CRS points earned. As of April 30, 2022, the total savings for Santa Clara County residents from CRS discounts is approximately $2 million.

Valley Water is the lead flood risk reduction agency for Santa Clara County. Valley Water performs many flood preparedness outreach and stream stewardship/maintenance activities that earn CRS points for participating communities. Since Valley Water is not a land-use agency, the points Valley Water earns, as a fictitious community, provide a foundation upon which the CRS participating communities can build. FEMA approved this unique arrangement with Valley Water in 1998.

The *CRS Coordinator's Manual, 2013 Edition,* included the option to undertake a Program for Public Information (PPI) which is a method to customize flood risk and loss reduction outreach messages and increase CRS points. Each participant of the PPI Committee brings unique perspectives and suggestions that enhance the PPI. Each community must adopt the PPI through a formal vote by the community's governing body.

In 2013, Valley Water initiated and facilitated the effort to develop the first Multi-Jurisdictional PPI so that all Santa Clara County CRS participating communities could work together and benefit from this activity. Non-participating communities were also invited to participate in the development of the PPI. This work effort resulted in the 2015 Multi-Jurisdiction PPI (2015 PPI).

On April 14, 2015, Valley Water's Board adopted the 2015 PPI, which sunset in April 2020. Following Valley Water's lead, the other CRS participating communities' governing bodies adopted the 2015 PPI soon thereafter.

Under the CRS, the PPI must be updated every 5-years. Each subsequent year after adopting the PPI, the committee must submit an Annual Evaluation Report to FEMA describing the PPI implementation for the prior fiscal year. The PPI Committee must evaluate whether the flood risk reduction messages in the PPI are still relevant and adjust the PPI, if needed. The Annual Evaluation Report is shared with each participating community's governing body as an informational item.

As required, Annual Evaluation Reports for FY16 (Year 1) through FY19 (Year 4) for the 2015 PPI were prepared, sent to the governing body, and included in annual recertifications.

FY20 (Year 5), the PPI Committee was required to update the 2015 PPI. The Insurance Services Office (ISO), FEMA's CRS management contractor, exempted the committee from submitting an Annual Evaluation Report for FY20 (Year 5) as the committee focused on updating the 2015 PPI.

In February 2020, Valley Water hosted the start of the 5-year PPI process. Fifteen Santa Clara County communities worked together to update the 2015 PPI. These communities included the current eleven CRS participating communities as well as four non-participating communities that expressed interest in joining the CRS. Staff and external stakeholders from each community participated in developing the new PPI.

In March 2020, the Coronavirus (COVID-19) outbreak started. The California State Emergency Services Act, the Governor's Emergency Declaration related to the COVID-19 pandemic, the Governor's Executive Order N-29-20, and Order of the County of Santa Clara Public Health Officer dated March 16, 2020, went into effect.

The COVID-19 pandemic caused far-reaching, unprecedented changes. Businesses and organizations faced economic and operational uncertainty across every industry and sector. The workforce impacts during COVID-19 caused delays beyond control, including the PPI Committee's ability to continue its work of updating the 2015 PPI. Many communities shifted priorities to respond to the public health crisis; therefore, FEMA provided an extension of completing the update to the 2015 PPI to early 2021.

The PPI Committee reconvened in October 2020 to resume the PPI update. Several virtual meetings followed until the PPI Committee completed the 2021 PPI in April 2021. The 2021 PPI was adopted by participating communities, as indicated in *Table 1. Dates 2021 PPI Adopted*.

II. 2021 PPI DEVELOPMENT PROCESS

Valley Water, along with the CRS participating and non-participating communities, initiated the 2021 PPI process in February 2020. The Santa Clara County 2021 Multi-Jurisdictional Program for Public Information document was completed in April 2021 (*refer to Section I. Introduction for COVID-19 related delays).*

Virtual meetings were held between 2020 and 2021 to develop the 2021 PPI. In addition to FEMA's six priority topic messages, three additional messages below were identified as important for Santa Clara County. See *Table 3 in the 2021 PPI: CRS Priority Messages* for the complete list.

I. Encourage residents and workers to make a personal Family Emergency Plan.
II. Ask residents to download disaster apps; and
III. Urge drivers to slow down on wet roads and avoid driving through ponded water to reduce traffic accidents.

The PPI Committee worked between the meetings to draft the 2021 PPI and review the extensive list of outreach and flood response projects. (Attachment 2, *which is Appendix A of the 2021 PPI*)

Based on the PPI Committee's evaluation of the 2015 PPI, the consensus was that most of the 2015 PPI flood risk reduction messages were still relevant, so only minor edits were incorporated as needed. This became the basis for the 2021 PPI; therefore, no additional FEMA review was required, as the 2015 PPI already ensured its provisions were fully compliant with FEMA requirements.

The number of CRS points that the 2021 PPI activities will earn is determined by FEMA's CRS Specialist and Technical Reviewers in the Insurance Services Office (ISO). The PPI Committee estimates that of the possible 350 points, participating communities could earn up to 300+/- points per participating community for the PPI efforts.

Once Valley Water approved the 2021 PPI (5-Year Plan), the final document was provided to the PPI Committee to present to their government bodies for adoption and implementation. *Table 1. Dates of PPI Adoption* shows the 2021 PPI approval dates by agency (Community).

All 11 CRS participating communities have adopted the 2021 PPI as noted in *Table 1 Dates 2021 PPI Adopted* below. As non-participating communities are not in the CRS Program, they

are not required to adopt the PPI. At this time, all non-participating communities have chosen not to adopt the 2021 PPI.

Table 1. Dates 2021 PPI Adopted

Agency (Community)	Date Presented	Adoption*
Santa Clara Valley Water District	4/27/21	X
City of Cupertino	8/17/21	X

**Non-CRS communities are encouraged to participate in PPI Committee activities and initiatives, but are not required to adopt the PPI, nor report out in the Annual Evaluation Reports.*

III. ANNUAL EVALUATION REPORTS

The 2021 PPI states that the PPI Committee will meet at least once yearly to evaluate the PPI and incorporate any needed revisions. This meeting is coordinated in conjunction with the ongoing CRS User's Group meetings, which occur at least twice a year.

The evaluation will cover:

- Reviewing projects that were completed.
- Evaluation of progress toward outcomes.
- Recommendations on projects that have not been completed.
- Recommendations for new projects not previously identified.
- Target Audience changes; and
- Impact of the program during a real flood event if one has occurred.

The Annual Evaluation Report is prepared by the PPI Committee for submission with each CRS community's annual CRS recertification package (or schedule 5-year cycle visits). The report is then shared with each CRS participating community's governing body as an informational item.

Section V. 2022 Santa Clara County CRS Users Group/PPI Committee Meetings – Monitoring and Evaluating the 2021 PPI of this report, summarizes the meetings held to develop the FY22 Annual Evaluation Report (Year 1 of the 2021 PPI).

Table 2 below shows how each community expects to share the FY22 Annual Evaluation Report with its governing body.

Table 2. How the 2021 PPI Annual Evaluation Report for FY22, Year 1 will be shared with Community's Governing Body

Community	Method for Sharing*
Santa Clara Valley Water District	Board Non-Agenda Item
City of Cupertino	Consent Item Council Agenda
City of Gilroy	Consent Calendar
City of Los Altos	Council Consent Calendar or Informational Staff Report
Town of Los Altos Hill *(non-CRS community)*	Not required
Town of Los Gatos *(non-CRS community)*	Not required

County of Santa Clara *(non-CRS community)*	Not required
City of Saratoga *(non-CRS community)*	Not required
City of Sunnyvale	City Manager's "Update Sunnyvale"

**Non-CRS communities are not required to share the 2021 PPI Annual Reports with their governing bodies.*

IV. 2021 PPI ACCOMPLISHMENTS FOR FY22

The PPI Committee identified three efforts needed from each CRS participating community for the 2021 PPI and to prepare and finalize subsequent Annual Evaluation Reports.

1. Governing bodies must adopt the 2021 PPI (*Table 1. Dates 2021 PPI Adopted*). The PPI Committee must prepare Annual Evaluation Reports and share the reports with its governing body as informational items.
2. For each fiscal year (*July 1 - June 30*) the communities must carry out and monitor the implementation of the outreach/flood response projects identified in *Attachment A CRS Creditable Outreach and Flood Response Projects by CRS Community of the 2021 PPI.* (Attachment 2)
3. The PPI Committee must review and consider the 'New Initiatives' identified in the 2021 PPI (*page 66*) for advancing flood risk reduction efforts.

Governing Bodies Approval: Including Valley Water, all 11 CRS participating communities' governing bodies adopted the 2021 PPI by the end of FY22. The approval dates are shown by agency (Community) in *Table 1. Dates of 2021 PPI Adopted* noted above.

Tracking System: The 2021 PPI is multi-jurisdictional and includes 15 agencies (*11 CRS participating communities and four non-participating communities*). Tracking implementation is quite complex compared to a single-agency PPI. As the informal lead, Valley Water continues to oversee the record-keeping to ensure consistency throughout the county. An electronic file-sharing system, Egnyte, is set up with folders for each community to file and share documents related to the 109 potential outreach/flood response projects identified in the 2021 PPI, and all CRS-related documentation. This also includes a comprehensive spreadsheet tracking which projects were accomplished in any given fiscal year, by the individual communities. This spreadsheet, along with the Annual Evaluation Report, will be submitted with annual CRS recertifications or a part of scheduled 5-year cycle visits.

Insurance Services Office (ISO) assigns credit for Valley Water outreach/flood response projects to all Santa Clara County CRS participating communities' ratings. Some communities also choose to carry out and report on their own outreach/flood response projects, in addition to those of Valley Water. These projects are shown on the composite spreadsheet and include input from each agency.

The PPI Committee discussed the benefits of using the Egnyte shared-filing system for tracking the 2021 PPI outreach/flood response projects and all CRS-related documentation. The PPI Committee also discussed the importance of ensuring each agency uploads their CRS documentation regularly. These benefits are:

- Information Share/Knowledge Transfer: CRS participating communities can view each other's program documentation. When a community improves its CRS rating, another community can access the documents submitted to determine how the CRS credited activities helped improve the score.
- Document Repository: A central location for CRS-related documentation, organized to mirror the CRS Coordinator's Manual (by community/activity/element) proves helpful when a community experiences staff turnover.
- Documentation Submittals: CRS documents are organized and easy to share with the CRS Specialists conducting cycle visits and/or annual recertification.

Summary of PPI Projects Accomplished in FY22

The complete list of outreach/flood response projects is included as Attachment 2 of this Report, listing all projects proposed in the 2021 PPI, with a "Project Accomplishments" column noting actions taken during the first year of the PPI, FY22.

Audiences	Projects Accomplished	
Community at Large (CAL)	81 potential projects, 63 accomplished	
Residents and Businesses in the Special Flood Hazard Area (SFHA)	18 potential projects, 16 accomplished	
Messengers to Other Target Audiences (Organizations & Businesses Serving the Community)	10 potential projects, 10 were accomplished	
	***Total Accomplished Projects**	89 of 109

* *Note: All projects carried out by CRS participating communities were accomplished in FY22.*

Variance in the number of potential projects versus accomplished projects is due to no updates received from non-participating communities, which is not required for this report.

These numbers go well beyond the minimum requirements of the CRS Program, and we anticipate all CRS participating communities will receive the maximum number of credits for our collective efforts in FY22.

It is important to note that most public events in 2020 through 2022 were heavily impacted or canceled due to shelter-in-place orders and the COVID-19 pandemic. Those events that were not canceled were often redesigned for virtual participation or smaller, socially distanced groups.

Valley Water's Outreach/Flood Response Projects

Annual Flood Awareness Campaign

Valley Water's FY22 Flood Awareness Campaign theme was "Flooding Can Happen During a Drought." It launched after the [1]Fourth National Climate Assessment was published; there could not have been a better time to have this conversation. The federal report assessed that intense extreme weather and climate-related events are becoming more frequent and will have catastrophic impacts on vulnerable communities, infrastructure, ecosystems, and our economy. Extreme storm events could result in more frequent and severe flooding in our region. Valley Water's message emphasized its commitment to reducing flood risks and protecting the community but acknowledging we cannot eliminate all risks. Thus, our communities must adapt and prepare; and it starts with being informed and aware of risks.

An educational paid advertising campaign supplemented Valley Water's community outreach effort. This year, its advertising campaign was supported by a series of formative research to understand target audiences, their awareness levels, and explore what educational messages and images most appealed to them.

The Flood Awareness Campaign lasted four months, from mid-November 2021 to February 2022. The paid advertisement campaign cost a total of $200,000.

Valley Water's FY22 Annual Flood Awareness Campaign shifted from general digital and public space advertising to a series of direct mailings to the 52,000 homes and businesses in Santa Clara County's FEMA SFHA.

Valley Water sent three separate targeted mailers to all homes and businesses in or near a high-risk flood area, as designated by the FEMA SHFA. The mailers were multilingual (English, Spanish, Chinese, and Vietnamese) and are posted on Valley Water's website.

1. Annual Floodplain Mailer
   54,790 mailed on December 13-14, 2021
   4,450 delivered to cities/county (*Public Works and Planning Departments*) between December 2021 – February 1, 2022
2. Multilingual Postcards with 9 CRS tips and links to flood preparedness webpages
   52,502 mailed on October 29, 2021
3. "You Live in a Flood Zone–Do You Know What to Do Before, During, and After a Flood?" Trifold.
   54,790 mailed on January 11, 2022

[1] US Global Change Resource Program (USGCRP) has a legal mandate to conduct a state-of-the-science synthesis of climate impacts and trends across U.S. regions and sectors every four years, known as the National Climate Assessment (NCA).

During FY22, Santa Clara County experienced a drought emergency. Valley Water's annual Floodplain Mailer reminded everyone that flooding can happen anytime it rains, and that climate change has made extreme weather the new normal. Drought conditions can harden the ground and increase run-off to streams and creeks during the first few days of heavy rain, increasing the risk of flooding. In addition, the flood mailer showcased Valley Water's ongoing flood protection projects in areas susceptible to flooding.

In FY22, the mailer featured QR codes, a magnet with important flood safety websites, a detachable emergency phone list, and photos of our most recent flood protection projects.

The direct mailing strategy was developed after the 2020-2021 post-Flood Awareness Campaign poll which indicated that only 29% of FEMA SFHA residents remembered receiving the annual Floodplain Mailer, while recollection of other broad advertising efforts hovered lower. The outreach shift from advertising to targeted mailings resulted in substantial savings while proving much more effective.

Valley Water also deployed a small-scale multilingual social media campaign, with the slogan "Flooding can happen during a drought," on social media and the web platforms including Facebook, Instagram, Google Ads, El Observador, Cali Today, and News for Chinese. The campaign launched in Winter FY22, starting with the season's first rains in December 2021 and continuing through January 2022. Digital ads targeted residents and commuters in or near the SFHA, using zip codes from published FEMA flood maps.

A key strategy for the paid campaign was incorporating all 2021 PPI messages in Valley Water ads. Staff crafted messages derived from Valley Water's annual Floodplain Mailer to residents in the SFHA. Additionally, the Valley Water Board of Directors shared posts on Nextdoor highlighting the "Flooding can happen during a drought" messaging and the nine CRS topics in Winter 2021. Valley Water posted a flood preparedness blog on its website in November 2021 and a digital copy of the Floodplain Mailer.

Valley Water also used its monthly newsletter, news blog, and social media profiles to enhance flood awareness efforts before and during forecasted storms starting as early as September. During the length of the campaign and leading up to anticipated storm events, Valley Water posted flash flood warnings, shared posts with critical messages about flood safety, and promoted the Flood Watch Tool throughout the winter.

Valley Water's flood protection resources page at ValleyWater.org/floodready serves as a hub of flood safety information with icons leading to a series of related web pages, including information on flood zone maps, signing up for emergency alerts, sandbags, reporting local flooding, and safety tips.

Of these subpages, the flood zone awareness page was the most accessed, which features a brief explanation for determining if a home is in a FEMA-designated flood zone. It also features an instructional YouTube tutorial for using FEMA's Map Service and a reminder that flooding can happen anytime it rains.

All communities were requested to add a link redirecting visitors to ValleyWater.org/floodready, floodsmart.gov, and ready.gov from their respective flood protection resource pages or homepage. All Santa Clara County communities received hard copies of Valley Water's Floodplain Mailer.

Valley Water shared a "Flood Follows Drought 2021-22 Flood Awareness Campaign Media Toolkit" with the CRS communities. The toolkit provided links to the multilingual floodplain mailer, social media graphics, messages for all nine flood awareness tips (PPI CRS message topics), and blog posts for all Santa Clara County communities to use.

The 2021-2022 post-Flood Awareness Campaign survey found:

- 59% recalled receiving mail with information about flood safety (29% in 2020-21).
- 76% are confident they have taken all necessary precautions to protect themselves from floods (64% in 2020-21).
- 61% rate the job Valley Water is doing at keeping them informed as excellent, good, or fair (32% in 2020-21).
- 10% increase in food zone awareness over last year (now at 50-60% awareness).
- 32% increase in recall of flood mailings vs. last year (now at 59% reach) with good recall amongst Spanish, Mandarin, and Vietnamese speakers.
- 58% of respondents clearly understood Valley Water's three main calls to action (find your risk, get flood insurance, develop a plan).
- 12% increase in respondents who believe they have taken all steps to be ready for a flood (now at 76%).
- 11% increase in respondents who have flood insurance (now at 51%).
- 100% of high-risk residents in mobile home parks are aware of our messaging.

The results above demonstrate an effective campaign that is less expensive than general advertising, yielding a savings of approximately $150,000 with more robust results. In the future, direct mailings to the FEMA SFHA seem to be an alternative outreach strategy for the flood awareness campaign rather than targeted advertising.

Valley Water discussed the new targeted mail approach with the PPI Committee and the Insurance Services Office (ISO). All agreed with this strategy.

Valley Water Education Outreach Program

Valley Water's Education Outreach includes flood awareness messaging in every program presented year-round. A dedicated flood-focused program is offered from October through April, depending on the rainfall situation on any given year.

Valley Water's role as a flood protection agency is highlighted in all presentations, so that participants in the Education Outreach Programs know that flood protection is one of Valley Water's core objectives in Santa Clara County.

The following are the Education Outreach efforts from October 2021 – March 2022.

Valley Water Flood Awareness Messaging

Flood awareness messaging is included in classroom presentations, STEAM (*Science, Technology,*

Engineering, Art, and Math) programs, libraries, camps, and Wonders of Water Wednesday, an after-school science program.

The following numbers represent the results of general flood protection messaging:

- 197 Presentations
- 4801 attendees
- 193 Educators

Flood-focused Programs

Education Outreach has two programs that focus on flood awareness and preparedness: "The Three Little Pigs and The Bad Weather Wolf" and "Watershed Maps".

The following numbers represent the results of Flood-focused Programs:

- 47 Presentations
- 986 attendees
- 54 Educators

Community Events

Due to the COVID-19 pandemic, countywide community events in FY22 were postponed.

CRS Participating Communities Outreach/Flood Response Projects

The PPI Committee identified the outreach/flood response projects for each community. The implementation of these projects is reflected in the FY 2022 'Project Accomplishments' column of Attachment 2.

V. 2022 SANTA CLARA COUNTY CRS USERS GROUP/PPI COMMITTEE MEETINGS – MONITORING AND EVALUATING THE 2021 PPI

Santa Clara County CRS Users Group/PPI Committee meetings were held on March 10, 2022, and May 19, 2022. Agenda and attendance sheets for each meeting are included. (Attachments 3-6)

Attendance was good at both meetings and quorum was met with staff from the eleven CRS participating communities. Staff from some non-participating communities, external stakeholders, and other interested parties were also in attendance.

As required by CRS, the objective for the March and May meetings was to monitor the implementation of the 2021 PPI and to determine if the desired outcomes were achieved, as well to discuss if any changes to the 2021 PPI were needed to complete this Annual Evaluation Report. The PPI Committee agreed that the 2021 PPI messaging and projects would remain the same for the duration of the 2021 PPI, which sunsets in 2026.

Santa Clara County 2021 Multi-Jurisdictional Program for Public Information
Annual Evaluation Report for FY22 (*Year 1: July 2021 to June 2022)*

At the March 10, 2022 meeting, a draft Project Accomplishment PPI Annual Evaluation Report for FY22 was shared with the communities to review.

The PPI Committee:

- Assessed whether the desired outcomes of the 2021 PPI were achieved in FY22, and what, if anything, should be changed.
- Discussed which communities have adopted the 2021 PPI and that conformed/enacted copy of their agenda items related to submitting the 2021 PPI to their respective governing bodies should be uploaded into Egnyte and a copy sent to Valley Water.
- Provided instruction on how communities will submit updates to Appendix A of the 2021 PPI to Valley Water for consolidating report.
- Communities were informed that all updates were due by the next CRS Users Group Meeting or sooner.

An ISO CRS Specialist shared best practices for Verification Cycle Visits. The specialist also reviewed updated/new/modified prerequisites for CRS Classes 6, 8, and 9, per the Addendum to the 2017 CRS Coordinator's Manual (Edition 2021) which went into effect January 1, 2021.

Lastly, to comply with *CRS Activity 350 - Flood Protection Information, Element c). Flood Protection Website,* from the CRS Coordinator's Manual, CRS participating communities were reminded to ensure to review their flood information landing page *monthly,* to verify all links are valid and *annually*, to ensure content is still relevant and current.

At the May 19, 2022 meeting, the PPI Committee discussed the 2021 PPI Annual Evaluation Report for FY22, reminding the group that the report will be due during scheduled 5-year cycle visits (f*or Cities of Gilroy and Morgan Hill)* or as part of communities' annual CRS recertification package which are due on August 1, 2022.

Valley Water Communications staff presented an overview of the 2021-2022 Flood Awareness Campaign, including the Floodplain Mailer that was mailed in December 2021 to all addresses in the FEMA Special Flood Hazard Area (SFHA), as well as to city/town/county managers, public works and planning directors, and the communities' CRS staff.

Additionally, Valley Water Communications staff also shared the FY22 post-campaign polling results with results. Valley and the PPI Committee determined that future flood awareness campaigns have an opportunity for expanded outreach to renters of both single-family homes and multi-family units, as well as providing localized historical flood information and outreach materials in public spaces.

Valley Water CRS staff shared information on the Department of Water Resources (DWR) statewide agency coordination calls scheduled to begin by July 2022. The DWR calls lead up to the 2022 California Flood Preparedness Week (CFPW) that is held annually each October (s*pecific dates for October 2022 to be announced*). We shared Valley Water's experience in participating on these calls, including the benefits of learning about CFPW, ways to participate, setting up lobby displays for the public, and how to access available resources for public events.

All communities were strongly encouraged to participate this year, including presenting a Resolution (*Valley Water's template available, upon request*) to their respective city councils to adopt CFPW, and to forward the information to their communication and emergency service teams.

We also discussed Valley Water's plan to provide all communities with 'emergency starter kits' and 'flood event kits' for their use as plans to recommence booth support at various city-hosted events, safety fairs, etc. These resources will ensure our messaging and information on how to 'Get Flood Ready' is uniformed throughout the county.

The consensus of the PPI Committee is that our 2021 PPI implementation is on target and that no changes are needed. Cities who have had the PPI approved by their elected officials reported receiving strong support.

This Annual Evaluation Report is the first report for the 2021 PPI to document our outreach project activities.

VI. FUTURE MESSAGING – Other New Initiatives

The PPI committee identified several new initiatives:

1. Continue and expand the standardized flood message prepared for each community to include flood messages in utility bills yearly, including PG&E.
2. Expand on partnerships with local chambers of commerce to disseminate and share flood preparedness information.
3. Expand on outreach to the Asian and Latino communities who live in flood-prone areas.
4. Expand on outreach to "hot spot" flood-prone areas by hosting on-site or virtual events.
5. Expand on reaching local homeowners associations (HOA)s and apartment associations (*i.e., Executive Council of Homeowners [ECHO]*).
6. Expand on reaching residents in marginal and low-income communities through partnering with organizations that reach these communities (*i.e., Second Harvest Food Bank and others*).
7. Communities could pursue FEMA Matching Funds Grants for severe Repetitive Loss Areas.
8. Review and expand other public information activities, such as Flood Protection Assistance (Activity 360) and Flood Insurance Promotion (Activity 370).
9. Develop a region-wide Flood Response Preparations (FRP) messaging plan.

The messages that the PPI Committee originally chose are still relevant to Santa Clara County. The committee will continue to increase its efforts to encourage people to prepare personal/family emergency plans and be flood-ready. This will be incorporated into the flood preparedness outreach that is done every fall. The PPI Committee will also continue coordinating efforts with the Valley Water's Education Outreach Program to promote flood preparedness in local schools.

The PPI Committee recommends continued use of social media for messaging. Mobile usage among individuals has increased exponentially over the years and online platforms are rapidly adjusting to mobile-friendly standards. This provides an excellent opportunity to modernize campaign ad efforts by utilizing social media and digital advertising to increase exposure and reach a greater number of residents in Santa Clara County. Furthermore, these modern advertising methods allow for specialized demographic targeting to allow reaching a narrow and defined audience, improving the ability to effectively reach vulnerable populations.

In support of our preparedness messaging, the PPI Committee will continue to promote the importance of having family emergency plans and emergency kits ready to go ***before*** an emergency/flood event occurs.

In October 2021, Valley Water partnered with Second Harvest Food Bank of Silicon Valley, to distribute 2,000 emergency preparedness starter kits of emergency supplies to underserved communities.

The PPI Committee will continue to promote the American Red Cross All-Hazard App which monitors alerts for severe weather, including floods, and the Floodsmart.gov and Ready.gov websites. The communities will distribute American Red Cross Emergency Contact Cards at events throughout the county.

VII. CONCLUSION

Overall, the CRS Users Group/PPI Committee successfully implemented the 2021 PPI in FY22. The 2021 PPI allowed participating communities to mutually decide which flood risk reduction messages are most appropriate and identified means by which messages are delivered. The objectives of participating in the 2021 PPI are to enhance the effectiveness of the flood risk messages to residents, reduce flood risks within the county, and earn valuable CRS credit points when identified projects are implemented by communities.

The CRS Users Group/PPI Committee will continue their work efforts through FY23.

.

			(SUN OP #38) The city has a "Flood Protection" webpage Sunnyvale, CA - Flood Protection (*listed in Appendix B*)	City of Sunnyvale	Year Round	N/A	Sunnyvale: The City continues to maintain its flood protection website.

Appendix A
CRS Creditable Outreach and Flood Response Projects by CRS Community
Santa Clara County Multi-Jurisdictional PPI 2021
FY 2022 (Year 1) Project Accomplishments by CRS Communities

Audience	[1] Message	Outcome	Project(s) Proposed to Support the Messages (XX denotes Community acronym, and Outreach Project #)	Assignment	[2] Schedule	[3] Stakeholder	FY 2022 Project Accomplishments INPUT HERE ONLY
	Topics 1-9 and supporting messages Flood Awareness Media Campaign, including social media	Educate our community on flood protection and preparedness measures	(VW OP #39) Conducts a flood awareness media campaign, reaching the community at large, including our multilingual community. Many of the Santa Clara County CRS Communities recognize Valley Water's Flood Awareness Campaign and link it on their community's flood information web page and redirect to Valley Water's Flood Ready webpage (Topics 1-9) *Campaign features social media videos and postings on various platforms (i.e. Facebook, Twitter, Instagram, Nextdoor, etc.), digital banners, newspaper advertorials, radio ads, billboards, utility bill inserts for communities to use, communities redirect to ValleyWater.org/FloodReady and television/mobile ads targeting residents who live in flood-prone areas and multilingual ethnic communities*	Valley Water Communications	Annually, for the duration of the rainy season, typically from November to April	All Santa Clara County CRS Communities	Valley Water: In addition to social media outreach, in lieu of a Flood Awareness Campaign, Valley Water mailed out 3 targeted pieces to addresses in the SFHA. All outreach projects included the 9 CRS topics and were multilanguage. 1. FPM – 60,790 were printed; 4,450 were given to the cities/county (Public Works and Planning Departments) between December 2021 – February 1, 2022; 54,790 were mailed on December 13-14, 2021; The FPM is posted on Valley Water's website 2. Postcard – 55,000 were printed; 52,502 were mailed on 10/29/21 (need soft copy of postcard) 3. "You Live in a Flood Zone – Do You Know What to Do Before, During, and After a Flood?" trifold: 54,790 mailed on January 11, 2022 We received the results of the 2021-22 Flood Awareness Probolsky Poll. The results below point to an effective campaign that was less expensive than general advertising, yielding a savings of about $150,000 with stronger results. Going forward, direct mailings to the FEMA SFHA seem to be a good outreach strategy for the flood awareness campaign vs. targeted advertising. Some highlights: • 28% increase in those who believe that Valley Water is doing an excellent job in keeping them informed of a flood (now 87% believe we do an excellent, good or fair job). • 10% increase in food zone awareness over last year (now at 50-60% awareness). • 32% increase in recall of flood mailings vs. last year (now at 59% reach) with good recall amongst Spanish, Mandarin and Vietnamese speakers. • 58% of respondents clearly understood our 3 main calls to action (find your risk, get flood insurance, develop a plan). • 12% increase in respondents who believe they have taken all steps to be ready for a flood (now at 76%). • 11% increase in respondents who have flood insurance (now at 51%). • 64% Believe home is prepared for a flood (100% of Chinese, 75% of Vietnamese believe they are ready). • 100% of high-risk residents in mobile home parks are aware of our messaging.

FY 2022 (Year 1) Project Accomplishments by CRS Communities

Audience	[1] Message	Outcome	Project(s) Proposed to Support the Messages (XX denotes Community acronym, and Outreach Project #)	Assignment	[2] Schedule	[3] Stakeholder	FY 2022 Project Accomplishments INPUT HERE ONLY
							Cupertino's Flood Section under the "Citizen Preparedness" webpage has a link to Valley Water's Floodplain Mailer. The City also includes the "Do Not Dump" messaging in The Cupertino Scene's annual flood preparedness article. Palo Alto has Valley Water's CWM and FPM linked on the City's Flood Information and Winter Storm Preparedness website.
			(VW OP #66) "Do Not Dump" signs placed by waterways/channels	Valley Water O&M	Year Round	N/A	Valley Water's Operations & Maintenance continues its practice of placing 'Do Not Dump' signs on waterways/ channels.
			(VW OP #67) Lists Pollution Hotline number in all Project Notices	Valley Water Communications	Year Round	N/A	Valley Water's project notices lists the pollution hotline number. https://www.valleywater.org/project-updates/your-neighborhood
			(SCC OP #68) Storm Drain Stenciling/Medallion Program	Santa Clara County	Year Round	All Santa Clara County CRS Communities	Palo Alto installs Storm Drain Stenciling/Medallion on all public right of way catch basin and inlets. City of Santa Clara: Stenciling/Medallion installed on public catch basins/inlets. Santa Clara County: No update available - non-CRS participating community.
			(SUN OP #69) The city's "Horizon" newsletter, includes Do Not Dump messaging	City of Sunnyvale	Annually, fall	N/A	Sunnyvale: The City still produces the Horizon newsletter and includes a "Do Not Dump" message.
			(ALL OP #70) Developments that are modifying or constructing new catch basins/storm drains/inlets are required, per the below-noted permits, to stencil the "No Dumping! Flows to Bay." In addition, some of these cities require all bid documents for capital projects which are modifying or constructing new catch basins, and require the contractors to install the same stencil. The program is also highlighted on cities' websites. ▪ *South County municipalities are subject to the statewide "Phase II" NPDES Permit* ▪ *North County municipalities are subject to the SF Bay Municipal Regional Stormwater NPDES Permit*	All	Year Round	N/A	Valley Water mark's each inlet with a "No Dumping! Flows to Bay" message on Valley Water properties. Gilroy requires all new storm inlets and catch basins to include a stencil or medallion with no dumping, flows to creek/waterway language for development projects. Morgan Hill requires all storm drain inlets and catch basins within the project area of development applications to be stenciled with prohibitive language (such as: "NO DUMPING – DRAINS TO CREEK") and/or graphical icons to discourage illegal dumping.
			(CUP OP #71) The city's annual flood notice in the local newsletter, 'The Cupertino Scene,' contains dumping is illegal messaging and how to report	City of Cupertino	Annually, October - November	N/A	Cupertino includes the "Do Not Dump" messaging in The Cupertino Scene's annual flood preparedness article.

FY 2022 (Year 1) Project Accomplishments by CRS Communities

Audience	[1] Message	Outcome	Project(s) Proposed to Support the Messages (XX denotes Community acronym, and Outreach Project #)	Assignment	[2] Schedule	[3] Stakeholder	FY 2022 Project Accomplishments INPUT HERE ONLY
	Message 4C - Sandbags can offer protection against a foot or less of floodwater Message 4E - Get sandbags before a flood Topic 5: Build responsibility Message 5A - Build responsibly in floodplains Message 5B - Comply with development requirements Message 5C - Check with your local floodplain manager before you build Topic 6: Protect natural floodplain functions Message 6A -Keep creeks clean and flowing Message 6B - Keep debris and trash out of our streams Message 6C - Don't pollute, dump, or drain anything in creeks Topic 7: Develop a Family Emergency Plan Message 7A: Develop an emergency plan Topic 8: Download disaster Apps Message 8A - Download disaster emergency apps Topic 9: Understand shallow flooding risks – don't drive through standing water Message 9A - Understand shallow flooding risks - don't drive through standing water FEMA's message: "Turn Around Don't Drown®."		(ALL OP #103) Other New Initiatives *(as noted in the PPI document)* 1. Continue and expand the standardized flood message prepared for each community to include flood messages in utility bills each year, including PG&E. 2. Expand on partnerships with local chambers of commerce to disseminate and share flood preparedness information. 3. Expand on outreach to the Asian and Latino communities who live in flood prone areas. 4. Expand on outreach to "hot spot" flood prone areas by hosting on-site or virtual events. 5. Expand on reaching local homeowners associations (HOA)s and apartment associations (*i.e. Executive Council of Homeowners (ECHO)*) 6. Expand on reaching residents in marginal and low-income communities through partnering with organizations that reach these communities. *(i.e. Second Harvest Food Bank and others*) 7. Communities could pursue FEMA Matching Funds Grants for severe Repetitive Loss Areas. 8. Review and expand other public information activities, such as Flood Protection Assistance (Activity 360) and Flood Insurance Promotion (Activity 370). 9. Develop a region-wide Flood Response Preparations (FRP) messaging plan.	All	TBD	TBD	Valley Water, as the lead agency for the Santa Clara County CRS Group/PPI Committee, included the 'New Initiative' topic for discussion on its August 2021, March 10, 2022, and May 19, 2022 meeting agendas. The following new initiatives were accomplished in FY22: 1). Valley Water continues to offer assistance to all communities for standardizing flood messaging to include as a utility bill insert. 5). Valley Water's 'Let's Talk Water: Speakers Bureau Program offers presentations on the history of the district and how we operate and includes information on flood preparedness. Presentations can be customized for groups, as requested. 6). Due to the COVID-19 pandemic, countywide in-person community events in FY22 were postponed or canceled. Instead, Valley Water partnered with Second Harvest Food Bank of Silicon Valley to distribute 2,000 emergency preparedness starter kits of emergency supplies to underserved communities in October 2021. 9). At the May 19, 2022 CRS Users Group/PPI Committee Meeting, this initiative was discussed. The idea was to develop an FRP similar to the one submitted by the City of Santa Clara for which full FRP credit was yielded. As we are looking at the feasibility of regionalizing the CRS Program for our area, this initiative will be evaluated in conjunction with the Feasibility Study being conducted.
			(CUP OP #104) The city provides a Winter Preparedness notification informing contractors that during the winter season, they need to winterize their project(s) site as certain soil disturbance activities are not allowed during the rainy season	City of Cupertino	On a project-specific basis	Various contractors	Cupertino continues to prepare and mail the rainy season letters every year to applicable projects. These letters were mailed in late August 2021.
			(MIL OP#105) On a project-specific basis, the city provides contractors a Winter Preparedness notification that informs them that during the winter season, they need to winterize their project(s) site. Certain soil disturbance activities are not allowed during the rainy season	City of Milpitas	On a project-specific basis	Various contractors	Milpitas: On-going. The City of Milpitas will be sending out winterization notices to larger development projects this winter.
	Topic 2: Insure your property for your flood hazard Message 2A - Get flood insurance ahead of time Message 2B – Insure your property Message 2C – There is a 30-day waiting period for the policy to take place	Increase in number of flood insurance policies in the SFHAs and in the county in general Prospective buyers understand flood risks	(MH OP #106) The city mails out a newsletter, "Ask Before You Buy: Know Your Flood Risk!" to local real estate agents which are provided to homebuyers to help determine the flood risk of the property being purchased *(listed in Appendix B)*	City of Morgan Hill	During the rainy season	Real Estate Agencies/Agent	Morgan Hill will be sending the brochure to real estate agents in Fall 2022.
			(PA OP #107) Sends out letters to real estate agencies informing them of their responsibility to identify flood hazard areas and to take advantage of the Flood Zone Lookup on the city's website	City of Palo Alto	Annually, beginning of flood season (September/ October)	Real Estate Agencies/Agent	Palo Alto sent letters to real estate agencies informing of their responsibility to identify flood hazard areas in August 2021.

		*These projects are **credited under Activity 340** (DFH and REB) – Additional credit is provided if the PPI states that real estate agents should (or have agreed to) advise house hunters about the flood hazard and that real estate agents give house hunters a REB brochure*	(SJ OP #108) Sends out letters to real estate and insurance agencies and lenders, informing them of their responsibility to identify flood hazard areas and to take advantage of the Flood Zone Lookup on the city's website on the "Flood Hazard Zones webpage and advises to contact the city for map reading services and elevation certificates on file	City of San Jose	At the beginning of the flood season (September – December)	Real Estate Agencies/Agent	San Jose: Email letters to real estate, insurance agencies and lenders in January 2022.
			(SUN OP #109) Sends mailer/postcard targeted to real estate agents informing them of the client's responsibility for identification and purchase of flood insurance and the availability of the automatic 15% discount	City of Sunnyvale	Each October	Real Estate Agencies/Agents	Sunnyvale: The City sent the mailers to real estate agents September 2021.

Agenda

Santa Clara County CRS Users Group & Program for Public Information (PPI) Committee Me

Agenda Item # 15.

March 10, 2022 | 1-3 p.m.

Zoom Meeting

https://valleywater.zoom.us/j/88438590277?pwd=VDBFbWs5aEVBSlAyQ2FaT3BValNoZz09&from=addon

Meeting ID: 884 3859 0277 | Passcode: 568494 | +1 669 900 9128 US (San Jose)

Purpose: PPI Stakeholder Committee Annual Evaluation Meeting to monitor the Implementation of the 2021 Santa Clara County Multi-Jurisdictional Program for Public Information per Activity 330, Outreach Project, Element 332.c. Program for Public Information (PPI), Step 7 requirement (*See page 2 of this agenda*)

Outcome: 2021 PPI Annual Evaluation Report, Year 1 of 5 (*See page 2 of this agenda*)

Section	Meeting Topic	Presenter	Time
1.	Introductions	All	10 min
2.	Review of the meeting Purpose and Outcome	Merna Leal	2 min
3.	350 – Flood Protection Information Element c). Flood Protection Website (WEB): • Monthly *(links)* and annual review *(content)* of communities' Flood Information landing page	Merna Leal	2 min
4.	Best practices for the Verification Cycle Visit - Discussion by Insurance Services Office (ISO) ▪ Addendum to the 2017 CRS Coordinators Manual (Edition: 2021) *Effective January 1, 2021* - Class 8 New Prerequisite: Enforcement of a freeboard standard for residential buildings - Class 6 Updated Prerequisite: New subsection inserted - Class 9 New/modified Prerequisite: Subsection (3) replaced, and first sentence of Subsection (5) replaced ▪ Need to see all higher NFIP regulations marked up in community's ordinance or regulations ▪ Correlate Open Spaces with required parcel spreadsheet(s)	Heidi Carlin, ISO CRS Specialist	5 min
5.	2021 Multi-Jurisdictional Program for Public Information (PPI) Annual Evaluation Report, Year 1 of 5 ▪ Assess whether the desired outcomes were achieved and what, if anything, should be changed ▪ Which communities have adopted the PPI? Conformed/enacted copy should be in Egnyte; please upload and send copy to VW ▪ Using the 2021 PPI and Activity 330 Outreach Project worksheets provided on 5/20/21, discuss how communities will submit updates to Valley Water for consolidating report input ▪ Communities' updates due by next CRS Users Group Meeting or sooner	All	45 min
6.	Next meeting – Joint CRS Users Group/Program for Public Information (PPI) Committee Meeting	All	2 min
7.	Adjourn		

Step 7: Implement, monitor, and evaluate the program. The Program for Public Information committee meets at least annually to monitor the implementation of the outreach projects. The committee assesses whether the desired outcomes were achieved and what, if anything, should be changed. This work is described in an evaluation report that is prepared each year, sent to the governing body, and included in the annual recertification.

Documentation for PPI Provided by the Community

In addition to the materials provided for OP and FRP credit:

(1) At the initial verification visit,

(a) A copy of the Program for Public Information document.

(b) Minutes of the meetings, sign-in sheets, or other documentation of the committee members' participation.

(c) Documentation that the Program for Public Information has been adopted by the community.

(2) At each annual recertification,

(a) Documentation that the Program for Public Information document has been reviewed and adjusted annually. This is in the form of a report, table, or spreadsheet that summarizes each outreach project, what was done, and the outcomes.

(b) Minutes of the meetings, sign-in sheets, or other documentation of the committee members' participation in the annual review.

(3) At subsequent verification visits when a Program for Public Information update is due,

(a) Documentation that the Program for Public Information document has been updated. This can be a new document or an addendum to the existing document that updates the needs assessment and all sections that should be changed based on evaluations of the projects. The update must be adopted following the same process as approval of the original document.

(b) Minutes of the meetings, sign-in sheets, or other documentation of the committee members' participation in the update.

(c) Documentation that the Program for Public Information update has been adopted by the community.

Quorum Met: Missing communities, Town of Los Altos Hills, Town of Los Gatos

1 North San Antonio Road
Los Altos, California 94022-3087

M E M O R A N D U M

DATE: September 20, 2022

TO: Gabriel Engeland, City Manager

FROM: Anthony Carnesecca, Economic Development Administrator

SUBJECT: **CITY OF LOS ALTOS COMMITTEES AND COMMISSIONS OUTREACH AND ENGAGEMENT POLICY**

PURPOSE:

The purpose of this policy is to establish a policy and process for formal outreach and engagement by City commissioners and committee members.

BACKGROUND:

The City did not have a formal policy or guidelines for commissioners or committee members that would like to conduct outreach or feedback with the community on behalf of the City. City staff has implemented this policy that will be incorporated into the Commissioner handbook.

POLICY:

Commissioners and committee members are able to conduct informal outreach and engagement with their neighbors and residents on potential community concerns. Some examples of this include attendance at community events, individual interactions with community members or groups, or any interactions representing themselves individually. Informal outreach does not require review by City staff.

Commissioners and committee members must speak directly with their board or commission staff liaison if they plan to conduct any formal outreach or engagement on behalf of the City. A formal outreach or engagement would be defined as the following:

- Any representation or notation that the information is provided officially by the City, commission, or committee as a whole
- Any inclusion of the City name, logo, or brand

Some examples of this include, but are not limited to, community engagement webinars, direct residential mailers, and formal questionnaires or surveys.

Commissions and committees may conduct this formal outreach themselves as part of their specified workplan, but are not allowed to direct any City staff members to complete formal outreach.

This formal outreach requires a review by City staff, including the Public Information Officer, in order to ensure that the content is appropriately representing the City and that all copy material meets the City's brand guidelines. The formal outreach will then need to be reviewed and approved by the commission or committee in a formal vote after approval by City staff.

Commissioners and committee members may not conduct any formal outreach without prior written approval by their City staff liaison or staff member and the commission or committee.
