METHODOLOGY & BENEFIT TYPES REFERENCE

FTE Calculation Methodology

Full-time equivalent (FTE) is calculated based on annual budgeted hours relative to the standard full-time schedule for the applicable employee class:

Fire/EMS (Dept 4000): 2,756 hours = 1.00 FTE (based on 24-hour shift schedule). 1,378 hours = 0.50 FTE. Overtime hours are included in gross wages but not in the FTE hours denominator.

All Other Departments: 2,080 hours = 1.00 FTE (based on 40-hour work week x 52 weeks). Part-time and seasonal employees are prorated accordingly. Examples: 1,040 hrs = 0.50 FTE; 520 hrs = 0.25 FTE.

Multi-Department Positions: Positions allocated across multiple departments contribute proportionally to each department's FTE. A position at 50% to two departments contributes 0.50 FTE to each.

Allocation Percentage: Reflects what share of the employee's cost is charged to each department. Total cost is the full cost; allocated cost is the prorated share per department.
