AB 6909: GMA Compliance – Policy Direction on Development Code Amendments

Principal Planner Adam Zack spoke about the three items staff are seeking policy direction on for the development code amendments related to Growth Management Act (GMA) compliance related to:

- What rate and affordability level should be required by the new inclusionary zoning.
- Should “adult entertainment” and “warehousing” be allowed land uses in the new TC-8 subarea.
- Should the Town Center design standards that affect floor area ratio be reviewed during Phase 1 or Phase 2 of the Station Subarea Plan.

He discussed inclusionary zoning and how it relates with fee-in-lieu and by combining inclusionary zoning with fee-in-lieu it would help to close the 0-30% AMI unit deficit by generating funds for these units. Principal

Planner Zack spoke about the alternatives for inclusionary zoning and the staff recommendation of a 10% requirement.

Principal Planner Zack discussed the previous City Council direction to increase height to eight stories in Town Center and six stories in surrounding multifamily zones, which will transition the Town Center from six subareas to two (TC-8 and TCMF-6). He noted there is a need to resolve the allowable land uses when consolidating the land use table for the new subareas and that direction was needed on whether “adult entertainment” and “warehousing uses” should be allowed or prohibited in the new Town Center subareas.

Principal Planner Zack spoke about the design standards in Title 19 of the Mercer Island City Code related floor area ratio and the direction needed on whether to remove them in Phase 1 or review them Phase 2.
