#### Notice of Planning and Zoning Commission AGENDA

#### December 06, 2022 at 6:00 PM

**NOTICE IS HEREBY GIVEN** that a Meeting of the Montgomery Planning and Zoning Commission will be held on **Tuesday, December 06, 2022** at **6:00 PM** at the City of Montgomery City Hall, 101 Old Plantersville Road, Montgomery, Texas.

Members of the public may view the meeting live and download the agenda and packet information on the City's website under Agenda/Minutes and then select **Live Stream Page (located at the top of the page).** The meeting will be recorded and uploaded to the City's website.

#### CALL TO ORDER

#### VISITOR/CITIZENS FORUM:

Any citizen with business not scheduled on the agenda may speak to the Commission. Prior to speaking, each speaker must be recognized by the Chairman. The Commission may not discuss or take any action on an item but may place the issue on a future agenda. The number of speakers along with the time allowed per speaker may be limited.

#### **CONSIDERATION AND POSSIBLE ACTION:**

- **1.** Consideration and possible action on the November 1, 2022 regular meeting minutes.
- 2. Consideration and possible action on proposed canopy signage for the Simmons Bank ATM located at 14340 Liberty Street in the Historic Preservation District.
- 3. Discussion of renovation plans for 14259 Liberty Street in the Historic Preservation District.
- **<u>4.</u>** Consideration and possible action on the proposed relocation of the Southern Roots salon building at 14275 Liberty Street in the Historic Preservation District.
- 5. Consideration and possible action on a Preliminary Plat for Montgomery Bend Section One.
- 6. Presentation and discussion of Feasibility Studies for Olde Montgomery Food Gardens, Summer Wind, and Montgomery Ridge proposed developments.

#### **COMMISSION INQUIRY:**

Pursuant to Texas Government Code Sect. 551.042 the Planning & Zoning Commission may inquire about a subject not specifically listed on this Agenda. Responses are limited to recitation of existing policy or a statement of specific factual information given in response to the inquiry. Any deliberation or decision shall be limited to a proposal to place on the agenda of a future meeting.

#### **ADJOURNMENT**

/s/ Nici Browe

Nici Browe, TRMC, City Secretary

I certify that the attached notice of meeting was posted on the bulletin board at City of Montgomery City Hall, 101 Old Plantersville Road, Montgomery, Texas, on December 2, 2022 at 3:00 p.m.

*This facility is wheelchair accessible and accessible parking spaces are available. Please contact the City Secretary's office at 936-597-6434 for further information or for special accommodations.* 

#### MINUTES OF REGULAR MEETING

#### **November 1, 2022**

#### MONTGOMERY PLANNING AND ZONING COMMISSION

#### CALL TO ORDER

Chairman Waddell declared a quorum was present and called the meeting to order at 6:00 p.m.

- Present: Jeffrey Waddell William Simpson Britnee Ghutzman Merriam Walker
- Absent: Dave McCorquodale, Interim City Administrator Daniel Gazda

Also Present: Nici Browe, City Secretary

#### VISITOR/CITIZENS FORUM:

No comments given.

#### **CONSIDERATOIN AND POSSIBLE ACTION:**

1. <u>Consideration and possible action on the October 4, 2022 Regular Meeting Minutes.</u>

Britnee Ghutzman moved to approve the minutes as presented. William Simpson seconded the motion, the motion carried unanimously. (4-0)

2. <u>Consideration and possible action on proposed side and rear yard fencing at 918</u> <u>Caroline Street located in the Historic Preservation District.</u> Ms. Nici Browe, City Secretary said the homeowner at 918 Caroline Street is planning to construct a side and rear yard fence. Ms. Browe said two other homes nearby on Shepperd Street have the same fence style, though Shepperd Street is not within the Historic Preservation District and do need Planning & Zoning Commission approval for any exterior modifications. Ms. Browe said the proposed fence has a generally neutral appearance, is an appropriate scale for the surroundings, and the color is consistent with other fences in the area.

Britnee Ghutzman asked what the height of the fence is. Ms. Browe said it meets minimum standards. Merriam Walker asked if it is going to be consistent in height. Ms. Browe said per the Zoning Ordinance for fencing there is a minimum standard, but she does not have the details of the height of the fencing and will provide that information via email tomorrow to the commissioners.

Britnee Ghutzman said of the description it is a generally neutral appearance, is an appropriate scale for the surroundings and the color is consistent with other colors in the area. Britnee Ghutzman said the description is a bit vague. Britnee Ghutzman asked if it was wood or composite and is it going to be the same height. Ms. Browe said she would find all of the information out.

Britnee Ghutzman moved to approve with consideration and receipt of information to make sure the proposed side and rear yard fencing at 918 Caroline Street located in the Historic Preservation District is of the same height and composition of the neighborhood. Merriam Walker seconded the motion, the motion carried unanimously. (4-0)

### 3. <u>Consideration and possible action on proposed</u> <u>exterior site modifications for Old</u> <u>Montgomery Steakhouse located at 204 McCown Street in the Historic Preservation</u> <u>District.</u>

Ms. Browe said Mr. Wayne Kung, owner of the Old Montgomery Steakhouse is planning a project that affects the east/back side of the property. Ms. Browe said the project is to include switching from propane to a natural gas service that would allow the existing tank to be removed, adding three parking spaces in the rear of the building for employee parking, and building a trash enclosure on the northeast corner of the property.

Ms. Browe said a site plan is included. Ms. Browe said the plumbing work will require a city permit; the rest of the work required will not.

Ms. Browe said the recommendation by staff is to approve the modifications contingent on the applicant obtaining any required city permits.

Britnee Ghutzman said she likes the idea of enclosing the dumpster and is curious as to how that will be done. Britnee Ghutzman said they wanted them to do the dumpster coverings and set the precedence in the downtown historic area, but they never have which means the steakhouse is going to set the precedence.

William Simpson said he would like to know what the materials will consist of for the trash enclosure.

Jeffrey Waddell said it looks like there is enough clearance for the approach of the garbage truck without damaging anything.

Britnee Ghutzman said where Mr. Kung is considering placing the dumpster, there are lines of trees with a small walkway and entrances to the other building next to it. Britnee Ghutzman said the dumpster is going to back right up to the property line and there is a tree there. Britnee Ghutzman asked if he going to have to get rid of any existing foliage.

Jeffrey Waddell said the property line should be clear there because of the way the parking spaces are existing.

Britnee Ghutzman asked if Mr. Kung will need to obtain any permits if he has to cut any trees down. Ms. Browe said the only permitting required right now would be the city permit for plumbing. Ms. Browe said the rest of the work does not require a permit.

Britnee Ghutzman moved to approve the consideration and possible action on the proposed exterior site modifications for Old Montgomery Steakhouse located at 204 McCown Street in the Historic Preservation District and would like to know the height and make and who will maintain the dumpster closure. William Simpson seconded the motion, the motion carried unanimously. (4-0)

#### 4. <u>Consideration and possible action on proposed canopy signage for the Simmons Bank</u> <u>ATM located at 14340 Liberty Street in the Historic Preservation District.</u>

Ms. Browe said at the October 4, 2022 meeting this item was denied. Ms. Browe said since then, the application has been resubmitted and they have reduced the overall height of the proposed signage to 12 inches. Ms. Browe said discussion was made about incorporating elements of Montgomery's historic nature, though it does not appear the proposed signage incorporates any historical elements of the City.

Ms. Browe said staff recommendation is to consider the revised ATM canopy signage and act as you see fit.

William Simpson asked if this is a structure or an occupied building. Merriam Walker said it is not occupied by any tenants, but it is a structure. William Simpson said it is not a structure but will be an off-premises sign for the bank.

Merriam Walker said she believes the bank would be paying ground rent to Cozy Grape and essentially have rights to the small space which is a self-service kiosk where service is provided onsite.

William Simpson said he does not think it was originally located there for people on FM 149 to see an ATM, but it was for the convenience for those people walking the street downtown. William Simpson said it was not for an everyday drive-up business for people. William Simpson said during festivals those people needing to use an ATM only had the closest options of going to Woodforest or the street near the funeral home.

Jeffrey Waddell said the signage does not need to be seen from SH 105 or from FM 149 and that was the point for reducing the signage down to 12 inches because it is only meant to be seen by those walking around in that particular area.

Jeffrey Waddell said they have to remember banks are different in they have standard logos and have to adhere to corporate standards. Jeffrey Waddell said he thinks it is a nice idea to ask to have the signage look more historic, but because it is a bank, he believes it has to be recognized with their standard logo.

Britnee Ghutzman asked if the size of the sign was reduced. Ms. Browe said the depth of the sign is now 10 inches with a ten by six-foot canopy and the signage is going on the 10-inch depth. Ms. Browe said the sign itself is not luminated but is lit underneath the canopy.

Britnee Ghutzman said she does not want the town to turn into a bunch of signs being displayed everywhere. William Simpson said they have finally taken control of the banner situation.

Jeffrey Waddell asked why it is any different than any other business sign. Jeffrey Waddell said they have quite a mixture of business signs. Jeffrey Waddell said he has not heard any complaints with the signs they already have.

William Simpson said it is not the sign, it is the ordinance. Jeffrey Waddell said that ordinance pertains to when you have a separate sign for a different business on the property. Jeffrey Waddell said this is a sign for what is existing on the land as it is not advertising for something else.

William Simpson said it is a sign or a billboard off premise from the location of the subject advertising content which means Simmons Bank is advertising their bank here in the Historic Preservation District. Merriam Walker asked William Simpson if he would want to see any signage at that location. William Simpson said no. William Simpson said the bank could display it on their machine but not on the framework in the air for the signage.

Jeffrey Waddell said he understands William Simpson's point but to him, proportion wise, with it reduced down to 12-inches he feels it is okay.

Merriam Walker asked if it is more of an eyesore to have no signage. William Simpson said it would blend in and would not be noticed.

Merriam Walker said in her opinion signage looks better and it looks attended to because right now when you look at it you are not sure if it is operational or not.

Ms. Browe said on the last page of the report the dimensions are shown. Ms. Browe said the depth of the canopy is 10-inches, but the actual words would be nine inches.

Merriam Walker asked if in general the hesitation is with the commercialization and standardization of this type of signage. Britnee Ghutzman said yes, and they know that Cozy Grape is going to be building out a patio which the design is in character with their current building with nothing obtrusive that will stick out. Britnee Ghutzman said this ATM canopy signage does stand out. Jeffrey Waddell said this is what you would expect to see of an ATM.

William Simpson said if this were happening across the road, they would not even be discussing this, but this is in the Historical District.

Merriam Walker asked when the ATM was approved was the canopy portion added later. William Simpson said the canopy was added at the same time.

Jeffrey Waddell said if all the other signs in town are at the same height of nine or 10 feet high, he does not know why it would make a difference for this.

William Simpson said they only thing he is going by from the ordinance is the off-premises sign. William Simpson said it is not on the same property as the main operation. Merriam Walker said the individual entity could take that over. Jeffrey Waddell said it is like a mini bank as it is an extension of the bank.

William Simpson said his question is how this is going to affect the future. William Simpson said the reason this is brought to their attention is to preserve the Historical Downtown Montgomery and not to please people within the City or people within neighboring cities.

Britnee Ghutzman moved to approve the proposed canopy signage for the Simmons Bank ATM located at 14340 Liberty Street in the Historic Preservation District. Jeffrey Waddell seconded the motion. Motion failed (2-2). William Simpson and Merriam Walker opposed.

#### **COMMISSION INQUIRY**:

None at this time.

#### **ADJOURNMENT**

Merriam Walker moved to adjourn the meeting at 7:10 p.m. William Simpson seconded the motion, the motion carried unanimously. (4-0)

#### AGENDA REPORT

Item 2.

Meeting Date: December 6, 2022	Budgeted Amount:
Department: Administration	Prepared By: Dave McCorquodale

#### Subject

Consideration and possible action on proposed canopy signage for the Simmons Bank ATM located at 14340 Liberty Street in the Historic Preservation District.

#### Recommendation

Consider the request again and vote to approve or deny the signage.

#### Discussion

As you will recall, this item was denied at the October 4, 2022 meeting as submitted with a sign height of 30" including the sign frame. A revised sign application with the sign height reduced from 30" to 12" was considered at the November 1, 2022 meeting. The 2-2 tie vote resulted in no action to approve or deny the sign. The city attorney confirmed the item should be placed on the next agenda for additional consideration and action.

Montgomery Planning and Zoning Commission AGENDA REPORT

Meeting Date: December 6, 2022	Budgeted Amount:
Department: Administration	Prepared By: Dave McCorquodale

#### Subject

Discussion of renovation plans for 14259 Liberty Street in the Historic Preservation District.

#### Recommendation

Review the details of the proposed renovations and provide feedback to the new owners of the property.

#### Discussion

The Pecan Hill Florist property recently sold to new owners who plan to continue a commercial business on the property but are not continuing the floral or screen-printing businesses that are operating today. In a recent conversation, the new owners have mentioned a gallery space for art and other ideas they can expand on at the meeting.

One of the main points of their planning is an expansion and renovation of the existing structure. The applicants would like to provide an overview of their plans to the Commission to get feedback that may affect the final design. After receiving feedback from the Commission, the owners can continue with the necessary building and development related items to obtain approvals for the work. Currently the owners plan to begin renovations in the spring after submitting final documents to P&Z for review and approval.

A proposed site plan and existing photos are attached.

#### **AGENDA REPORT**

Item 4.

Meeting Date: December 6, 2022	Budgeted Amount:
Department: Administration	Prepared By: Dave McCorquodale

#### Subject

Consideration and possible action on the proposed relocation of the Southern Roots salon building at 14275 Liberty Street in the Historic Preservation District.

#### Recommendation

Staff has no objections to the request.

#### Discussion

The owners of the Southern Roots salon own the building itself and lease the property from the Montgomery Historical Society. The owners are requesting to move the building out of the city limits to their property near Montgomery. MCAD shows the building was constructed in 2000, the owner stated the year as 2005.

As with any other exterior modifications to properties within the Historic Preservation District, approval is required from the P&Z Commission per the City Code of Ordinances:

## Sec. 98-347. - Approval for alteration or new construction within historic preservation districts or affecting historic landmarks.

No person shall carry out any exterior construction, reconstruction, alteration, restoration, rehabilitation, demolition, or <u>relocation of any historic landmark or any property within an historic preservation district</u>, nor shall any person make any material change to other exterior elements visible from a public right-of-way which will affect the appearance and cohesiveness of any historic landmark or any property within an historic preservation district without receiving approval from the planning and zoning commission. New construction within an historic preservation district or on property designated as an historic landmark, or buildings or structures moved onto a property within an historic preservation district or onto property designated as an historic landmark will be subject to and in accordance with the design guidelines for the city.

## Carl Reed <u>936-760-9720</u>

Our family purchased this building on 11/28/2014 with plans of moving it one day. This building was built on this property in 2005. We are moving our building to a location that will be more convenient for our daughters salon clientele. Also there will be less competition. With 4 salons within a few blocks of one another and rumor that a new one is going in next door to our daughters salon. We are notifying the city and anyone else that it concerns ,we will be moving this building.

Thanks Carl Reed

Montgomery Planning and Zoning Commission AGENDA REPORT

Meeting Date: December 6, 2022	Budgeted Amount:
Department: Administration	Prepared By: Dave McCorquodale

#### Subject

Consideration and possible action on a Preliminary Plat for Montgomery Bend Section One.

#### **Recommendation**

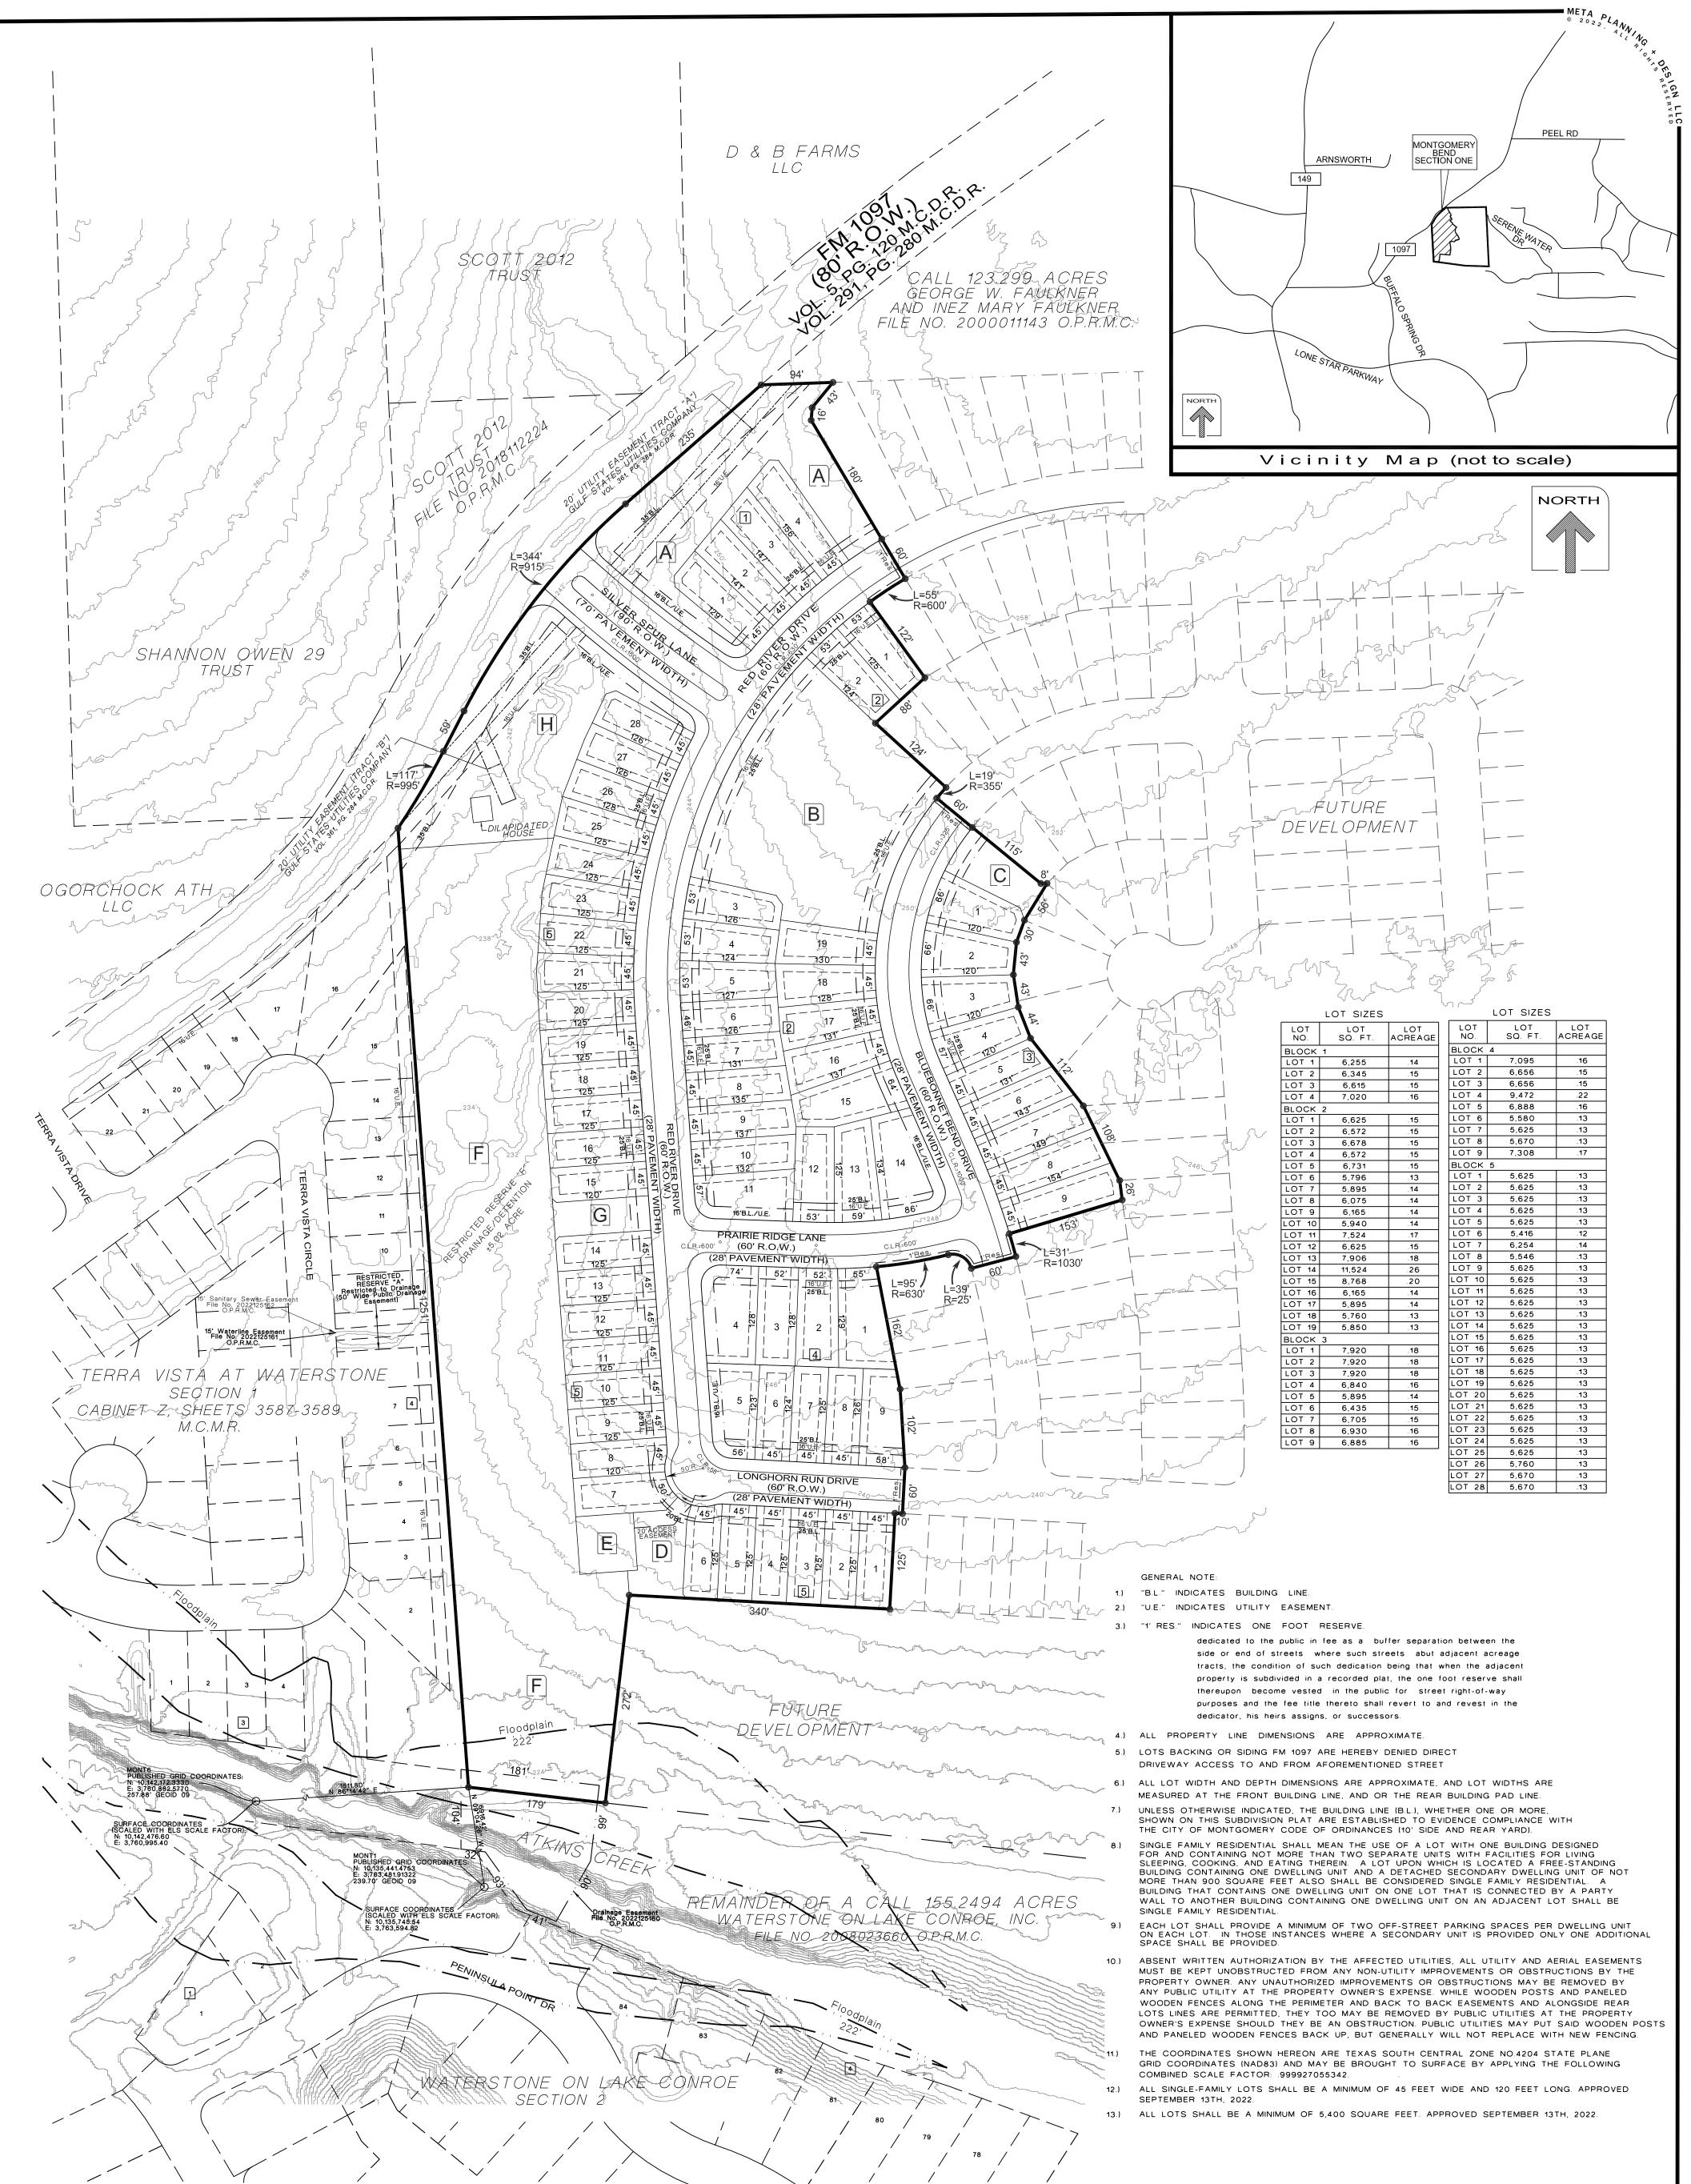

Approve the plat per the engineer's recommendation.

#### Discussion

This is the first phase of development for the Pulte 80-acre single-family residential project in the northeast corner of the City. As you may recall from the presentation of the feasibility study, the development proposed 45-foot-wide lots which were approved by City Council as part of the Development Agreement. With a total buildout of 309 homes, this first section of 69 homes also includes infrastructure and drainage land allocation along with the private amenity sites for the neighborhood.

The engineer's memo and plat are attached for review.

Re: Submission of Preliminary Plat Montgomery Bend Section 1 (Dev. No. 2203)

Dear Commission:

We reviewed the preliminary plat submission for the referenced development on behalf of the City of Montgomery (the "City"). Our review was based on the City's Code of Ordinances, Chapter 78 Section 60 and any other applicable chapters.

We offer no objection to the preliminary plat, and we recommend the Commission approve the preliminary plat as submitted.

If you have any questions or comments, please contact me.

Sincerely,

Chris Romoney

Montgomery Planning and Zoning Commission AGENDA REPORT

Item 6.

Meeting Date: December 6, 2022	Budgeted Amount:
Department: Administration	Prepared By: Dave McCorquodale

#### Subject

Presentation and discussion of Feasibility Studies for Olde Montgomery Food Gardens, Summer Wind, and Montgomery Ridge proposed developments.

#### Recommendation

Listen to the information presented and discuss as you see fit.

#### Discussion

These Feasibility Studies were presented to City Council at recent meetings and are being presented for your information. The proposed developments can be summarized as:

<u>Olde Montgomery Food Gardens:</u> A proposed 1.5-acre food truck park on the north end of downtown roughly across from Jim's Hardware / Clepper Street.

<u>Summer Wind:</u> A proposed 56-acre single-family residential development within Buffalo Springs PD on Lone Star Parkway east of Buffalo Springs Drive. Total of approximately 211 homes.

Montgomery Ridge: A proposed 28-acre single-family residential development on Lone Star Parkway west of Liberty Street / FM 149 North. Total of approximately 81 homes.

Interim City Administrator	Dave McCorquodale	Date: 11/30/2022

FOR

THE CITY OF MONTGOMERY

WGA PROJECT NO. 00574-122

**OCTOBER 2022** 

**PREPARED BY** 

Item 6.

#### **OVERVIEW**

- 1 Executive Summary
- 2 Introduction
- 3 Analysis

#### **Exhibits:**

- A: Tract Boundary
- **B:** Preliminary Site Plan
- C: Water and Wastewater Usage Projection
- D: Excerpt From Impact Fee Analysis
- E: Escrow Calculation

#### **1 EXECUTIVE SUMMARY**

Food Gardens of Olde Montgomery (the "Developer") has requested the City of Montgomery (the "City") to perform a feasibility study for the City to serve future commercial development on a 1.48 acre tract along FM 149, also referred to as the Food Gardens of Olde Montgomery tract. The tract is located within City limits.

This development would consist of parking and food truck pads for in-city service at full build out. The final land plan may affect the estimated costs of and revenues associated with the development.

The analysis shows that after the completion of the City's Water Plant No. 3 Improvements project currently in construction the City will have the water capacity to serve the development, and existing developments, for the next few years but will need additional water plant capacity to serve all existing and proposed developments at full build out.

The analysis shows that based on the existing capacity of Lift Station No. 2, the lift station will have sufficient capacity to serve existing and proposed developments for the next couple of years but will need additional capacity to serve all existing and proposed developments at full build out. The analysis also shows that the City will have the wastewater treatment plant capacity to serve the development and existing developments for the next couple of years but will need additional wastewater treatment plant capacity to serve the development and existing developments for the next couple of years but will need additional wastewater treatment plant capacity to serve all existing and proposed developments at full build out.

The estimated total costs that will be associated with the development are:

<b>Total Estimated Costs</b>	\$14,712
Wastewater Impact Fee	\$6,711
Water Impact Fee	\$3,001
Escrow Account	\$5,000

Based on information provided by the Developer, the estimated total assessed valuation for the development would be approximately \$800,000 at full build out. Based on the City's current tax rate (\$0.1050 for debt service and \$0.2950 for operations and maintenance), the development will bring in approximate tax revenues as shown below:

Total Estimated Annual Tax Revenue	\$ 3,200
Debt Service	\$840
Operations and Maintenance	\$ 2,360

#### 2 INTRODUCTION

This undeveloped tract is located along the western right-of-way of FM 149 between Berkley Street and Clepper Drive and falls completely within the City Limits. An exhibit showing the Tract's boundary is enclosed as **Exhibit A.** A preliminary site plan is enclosed as **Exhibit B** and indicates the Developer's intentions develop the tract to be a food truck park. The Tract is currently partially zoned as R - 1 Residential and partially zoned as B – Commercial, and the proposed usage would require the tract be rezoned as B – Commercial for the entirety of the tract. The tract also falls partially within the City's Historic Preservation District and would require approval from the Planning & Zoning Commission prior to development.

Based on information from the Developer, construction of the development is planned to be complete in 2023. The estimates included in this feasibility are based on the anticipated land use provided by the developer at the time of the study. The final land plan may affect the estimated costs and revenues associated with the development.

#### 3 ANALYSIS

#### Water Production and Distribution

The Tract is located within the City limits and plans to receive service from the City. The City has three (3) active water wells and two existing water plants with a capacity of 875 connections or 568,000 gallons per day per Texas Commission on Environmental Quality ("TCEQ") requirements. The City is currently nearing completion of a water plant improvements project at the existing Water Plant No. 3 to increase the capacity of the City's water system to 2,500 connections while holding the same average daily flow capacity.

The current average daily flow ("ADF") in the City is approximately 434,400 gpd. Inclusive of existing connections, ultimate future projected connections within current platted developments, and developments that are currently in design, the City has committed approximately 583,365 gpd and 1,696 connections. A copy of the updated water usage projections is included as **Exhibit C.** Once the Water Plant No. 3 Improvements Project is complete, the City will have committed approximately 103% of the total ADF capacity and 68% of the connection capacity. The City is not expected to hit these numbers or exceed the current average daily flow capacity until 2024. The addition of a booster pump would increase the ADF capacity to approximately 730,000 gpd.

Based on information from the Developer, the Tract's estimated water capacity requirement is approximately 2,180 gpd. Inclusive of existing connections, platted developments, developments currently underway, other developments in feasibility, and this development, the City will have committed approximately 934,170 gpd or 164% of the total ADF capacity and 136% of the connection capacity at full build out. Based on the projections shown in **Exhibit C**, the City would need additional water plant capacity around 2024.

Upon completion of the proposed improvements and based on the projected ADF, including this Tract, the City is projected to have sufficient water production capacity to meet the demand of the development within the City for the next couple of years. As the existing and upcoming developments build out, the City should be prepared to expand their water production and distribution capacity.

There is an existing 12-inch waterline located along FM 149, which will be able to serve the development. The Developer will be required to provide a utility easement along the FM 149 frontage to allow future developments to access City facilities, as shown in **Exhibit A**. The Developer will be responsible for all costs associated with the required easements.

The ultimate alignment of waterlines interior to the Tract will depend on the final land plan of the proposed development. Waterlines interior to the Tract beyond the water meter must be constructed per all applicable City and TCEQ design criteria, and will be considered private. The developer is responsible for all costs associated with easement acquisitions and recordation.

The Developer is responsible for providing engineered plans and specifications for the water distribution system interior to the development to the City Engineer for review and approval prior to commencing

construction, and to obtain all required Planning and Zoning Commission, City Council and development approvals and permits.

#### **Sanitary Sewer Collection and Treatment**

The City's existing wastewater facilities include 18 public lift stations and two (2) wastewater treatment plants (one of which is currently decommissioned). The Stewart Creek Wastewater Treatment Plant (TPDES Permit No. WQ0011521001) has a permitted capacity of 400,000 gpd. The current Average Daily Flow (ADF) at the Stewart Creek Wastewater Treatment Plant is 184,330 gpd or 46%.

Inclusive of existing connections, platted developments, and developments which are in design or under construction, the City has committed approximately 343,000 gpd or 86% of existing permitted capacity at full build out. A copy of the wastewater usage projections is included as **Exhibit C.** 

Based on the City's historical usage for similar types of development and information from the Developer, the Tract's estimated sanitary sewer capacity requirement is 2,180 gpd (65,400 gallons per month) at full build out. Inclusive of existing connections, platted developments, developments currently underway, other developments in feasibility, and this development, the City will have committed 564,467 gpd or 141% of existing permitted capacity.

The TCEQ requires the City to initiate design of a wastewater treatment capacity expansion when the ADF exceeds 75% of the City's 400,000 gpd permitted capacity for 3 consecutive months. The ADF for the City, including these Tracts and other tracts under design/feasibility, is not expected to exceed 75% of the permitted capacity (300,000 gpd) until around the first quarter of 2024. Additionally, the TCEQ requires the commencement of the construction phase of the expansion after 3 consecutive months of ADF exceeding 90% of the permitted capacity (360,000 gpd). This is expected to occur around third quarter of 2024. We are expecting the construction of Nantucket Apartments, consisting of 385 units. The development will account for 50,000 gpd at full build out. We are not anticipating all units to be filled within 2024 but are accounting for it in these calculations.

The Tract will be served by gravity flow to Lift Station No. 2 as shown on **Exhibit A** which has an ADF capacity of 144,000 GPD. At the time of development, Lift Station No. 2 does have capacity to service the commercial development. Inclusive of existing connections, platted developments, and developments which are in design or under construction and feasibility, the City has committed approximately 216,967 GPD to Lift Station No. 2. Based on this analysis the City will need to upgrade Lift Station No. 2 to be able to serve the development and other tracts at full build out.

The ultimate alignment of sanitary sewer lines interior to the Tract will depend on the final land plan of the proposed development. Sanitary sewer lines interior to the Tract beyond the point of connection must be constructed per all applicable City and TCEQ design criteria, and will be considered private.

The Developer is responsible for providing engineering plans and specifications for the sanitary sewer conveyance system interior to the development to the City Engineer for review and approval prior to commencing construction. The Developer is also responsible for obtaining all Planning and Zoning Commission, City Council, and development approvals and required permits.

The Developer will need to coordinate the installation of sanitary sewer tap(s) into the public system with the City's department of Public Works and will be responsible for all costs associated with said work.

#### Drainage

The onsite storm sewer system will be designated private. Any detention ponds will remain the responsibility of the Developer. All drainage and detention improvements must be designed per the city's Code of Ordinances requiring compliance with the City's floodplain regulations and all applicable Montgomery County Drainage Criteria Manual Standards. Failure to design and construct the drainage facilities per Montgomery County Criteria potentially jeopardizes eligibility for water and sanitary sewer service by the City. The Developer will also be required to perform and submit a drainage study showing the development's impact on the drainage downstream of the Tract and on adjacent properties. The drainage study must be submitted to the City for review and approval prior to approval of the construction plans.

The Developer is responsible for providing engineering plans and specifications for the drainage and detention system interior to the development to the City Engineer for review and approval prior to commencing construction, and to obtain all required Planning and Zoning Commission, City Council, and development approvals and permits.

#### **Paving and Traffic**

Currently, the preliminary land plan, combined with existing infrastructure, provides for two (2) proposed driveways at FM 149 to provide access to the development from both the north and south side of the tract. The currently proposed driveway will connect directly to FM 149 but is aligned to allow for the future roundabout to be constructed.

Per the City and Montgomery County's most recently adopted thoroughfare plan, there are no conflicts with the current land plan. The Developer is also responsible for TxDOT approval for the proposed access points onto FM 149.

#### **Applicable Ordinances**

The project tract is currently partially zoned for R-1 Residential and partially zoned for B-Commercial use. Prior to development the Developer will need to request the property to be rezoned to B-Commercial in its entirety. The Developer must submit all proper documentation including metes and bounds, copies of the deed, site plan, and all necessary payments with their rezoning application, and must attend public hearings at the Planning and Zoning Commission and City Council throughout the rezoning process.

Additionally, the subject tract falls partially within the Historic Preservation District (HPD) of the City. In accordance with Section 98-347 of the City's Code of Ordinances, the Developer must submit all construction plans and the preliminary and final plat for approval to the Planning and Zoning Commission prior to development. Additionally, Section 98-181 of the City's Code of Ordinances states that all commercial properties along major roads shall have a building setback of no less than 35 feet. The City considers a building to be "any structure designed or built for the support, enclosure, shelter, or protection of persons, animals, chattels or property of any kind". Based on the current land plan, the proposed canopies

would be considered a building and are located within the proposed building line. The Developer would be required to obtain a variance for a reduced building setback

In addition to these ordinances, the Development will need to follow all other applicable sections of the Code of Ordinances in order to be approved for development by the City.

Any desired deviations from the Code of Ordinances would require additional analysis and information in the form of a variance request, which would need to be submitted to City Council and the Planning and Zoning Commission for review and approval.

#### **Development Costs**

The Developer will need to engineer and construct the on-site water, sanitary sewer, paving, and drainage facilities to serve the proposed Tract.

The Developer will also need to pay water and wastewater impact fees to the City. The impact fees will be assessed at the time of recordation of the final plat and collected prior to receiving water and sanitary sewer taps. Enclosed as **Exhibit D** is Table 1.1 of the 2017 Revisions to the Montgomery Impact Fee Analysis Report.

The estimated ADF provided by the developer requires the equivalent use of 1 1–inch water meter per the table.

An escrow agreement has been entered into between the Developer and the City and funds have been deposited to cover the cost of this feasibility study. An estimated additional \$5,000 will be required to cover the City's remaining expenses for the development, which includes administrative costs, legal fees, plan reviews and coordination with the Developer. The fees calculation can be seen in **Exhibit E**. These additional funds must be deposited in the escrow prior to any work being completed by the City.

Below is a summary of the estimated costs associated with the development:

ESTIMATED COSTS	
Escrow Account	\$5,000
Water Impact Fee	\$3,001
Wastewater Impact Fee	\$6,711
Total Estimated Costs	\$14,712

These estimates are based on the projected water and wastewater usage provided by the developer. The actual costs will depend on the final land plan, final design, and actual construction costs. **Financial Feasibility** 

The Developer estimates the total assessed value (A.V.) at full development to be approximately \$800,000. Based on the estimated total A.V., the in-city development would generate approximately \$840 per year in debt service revenue, and approximately \$2,360 per year in operations and maintenance revenue. These

estimates are based on the City's \$0.1050/\$100 valuation debt service tax rate and the \$0.2950/\$100 valuation Operations & Maintenance (O&M) tax rate.

This report is our engineering evaluation of the funds required to complete the anticipated future capital improvement for this Tracts and of the potential increase in tax revenue to the City. This report is not intended to be used for the issuance of municipal financial products or the issuance of municipal securities. The City's Financial Advisor(s) can address potential recommendations related to the issuance of municipal financial products and securities.

Thank you for the opportunity to complete this feasibility study and offer our recommendations. Please contact me or Ms. Katherine Vu should you have any questions.

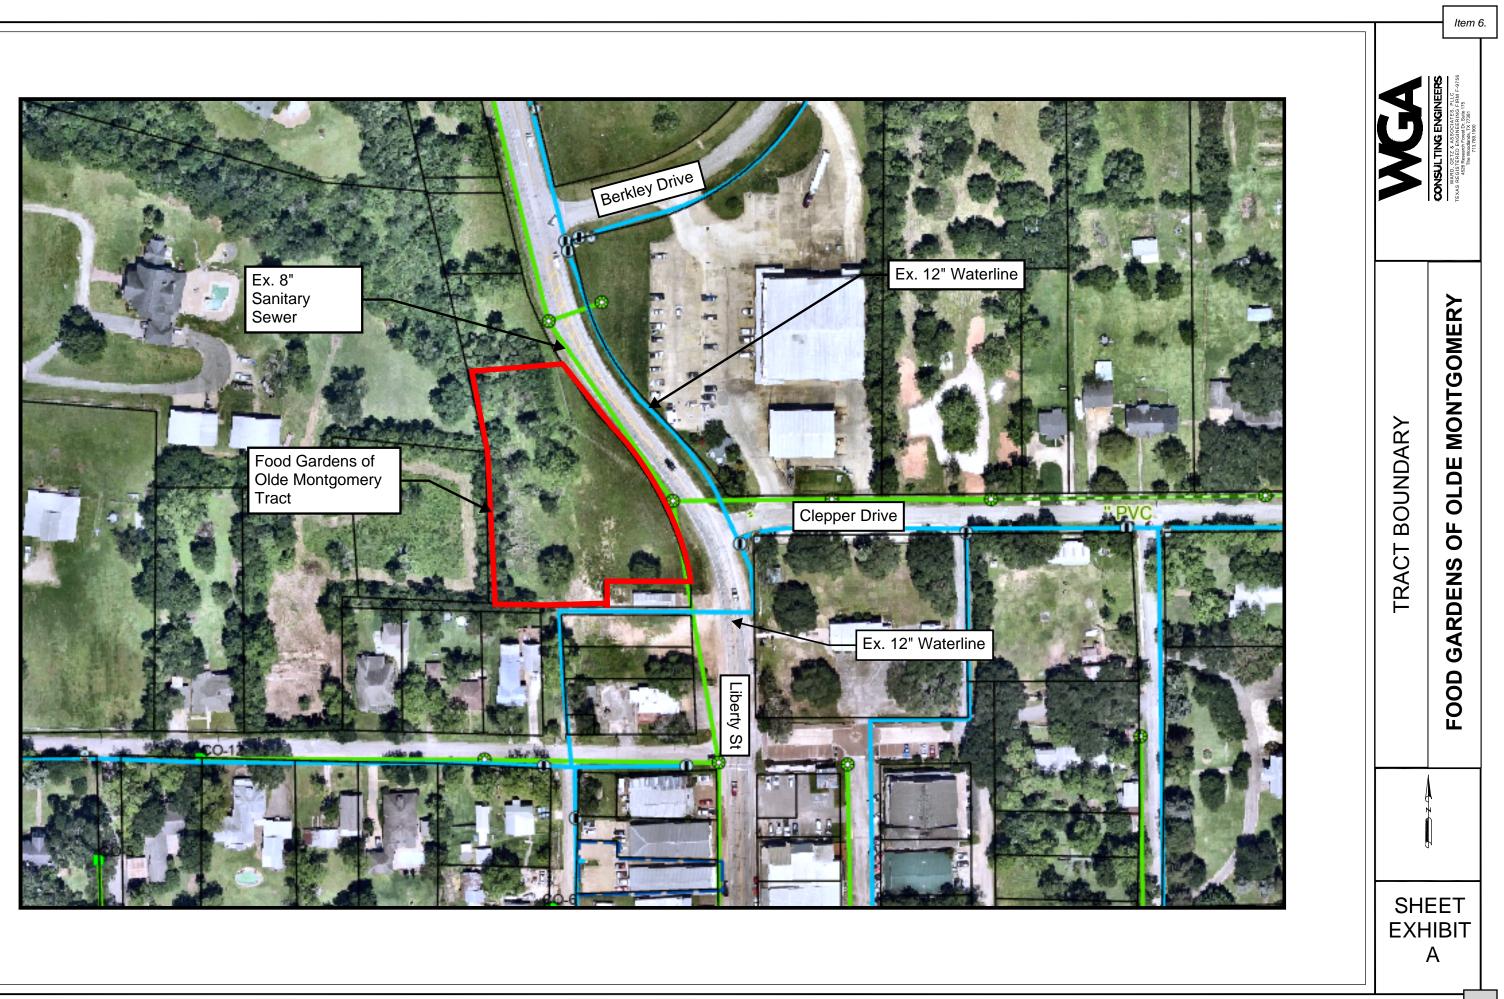

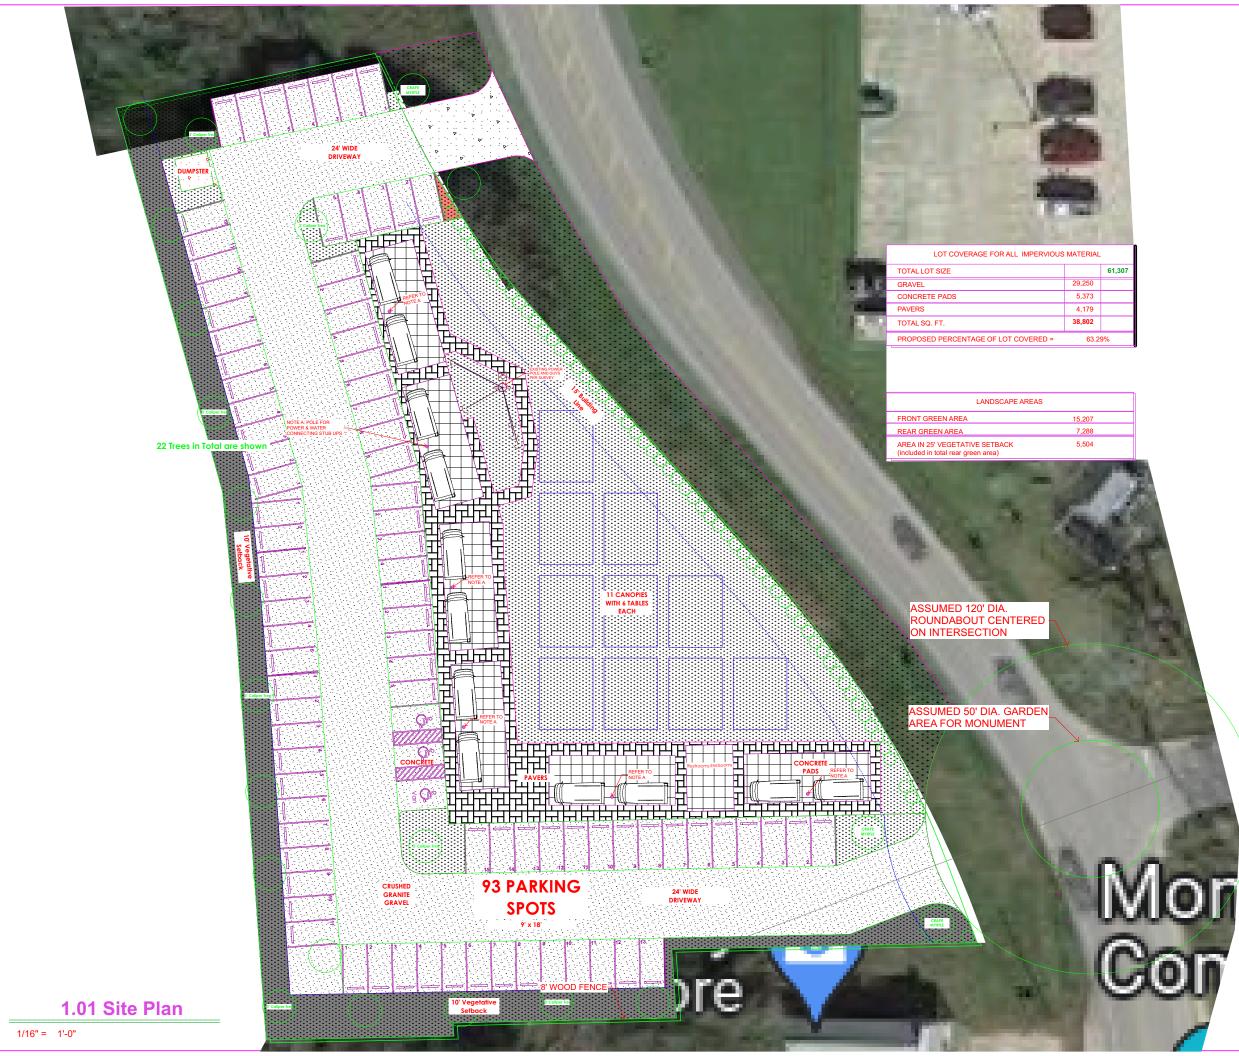

Sincerely,

Chris Romonsy

Chris Roznovsky, PE Engineer for the City

- 2 Introduction
- 3 Analysis

## Exhibits:

- A: Tract Boundary
- **B:** Preliminary Site Plan
- C: Water and Wastewater Usage Projection
- **D:** Escrow Calculation
- E: Preliminary Cost Estimate

## **1 EXECUTIVE SUMMARY**

Montage Partners, LLC (the "Developer") has requested the City of Montgomery (the "City") to perform a feasibility study for the City to serve a future single family development on a 56.7 acre tract along Lone Star Parkway, also referred to as the Summer Wind tract. The tract is located within City limits.

The development falls with Montgomery County Municipal Utility District No. 179. MUD No. 179 does not provide its own water or wastewater so the development would receive water and wastewater services from the City.

This development would consist of approximately 211 single family lots for in-city service at full build out. The final land plan may affect the estimated costs of and revenues associated with the development.

The analysis shows that after the completion of the City's Water Plant No. 3 Improvements project currently in construction the City will have the water capacity to serve the development, and existing developments, for the next few years but will need additional water plant capacity to serve all existing and proposed developments at full build out.

The analysis shows that based on sanitary sewer capacity of Lift Station No. 10, the lift station will need additional capacity to serve all existing and proposed developments at full build out. There is an opportunity of some cost sharing for Lift Station No. 10 improvements with the Developer of the Mabry Tract. All coordination on any potential cost sharing is the responsibility of the Developer. The analysis also shows that the City will have the wastewater treatment plant capacity to serve the development and existing developments for the next couple of years but will need additional sanitary sewer plant capacity to serve all existing and proposed developments at full build out.

The estimated total costs that will be associated with the development are:

Total Estimated Costs	\$412,000
Lift Station No. 10 Improvements*	\$379,000
Escrow Account	\$33,000

\*total cost to of improvements to serve this development and the Pulte development

Based on information provided by the Developer the estimated a total assessed valuation for the development would be approximately \$82,875,000 at full build out. Based on the City's estimated current tax rate (\$0.1050 debt service and \$0.2950 for operations and maintenance) financially, the development will bring in approximate tax revenues as shown below:

Total Estimated Annual Tax Revenue	\$331,500.00
Debt Service	\$ 87,018.75
Operations and Maintenance	\$244,481.25

# 2 INTRODUCTION

This undeveloped tract is located along Lone Star Parkway just east of Buffalo Springs Drive, and falls completely within the City Limits. An exhibit showing the Tract's boundary in relation to the City's boundary is enclosed as **Exhibit A.** A preliminary site plan is enclosed as **Exhibit B** and indicates the Developer's intentions to subdivide the Tract into approximately 211 - 45' wide single family lots.

The Tract is currently zoned as Planned Development as part of the LeFevre Development Agreement. The Planned Development zoning allows for a mixed use of the development which includes single family as proposed in this development.

Based on information from the Developer, construction of the development is planned to be complete in 2026. The estimates included in this feasibility are based on the anticipated land use provided by the developer at the time of the study. The final land plan may affect the estimated costs and revenues associated with the development. The Tract is currently located within the boundary of Montgomery County MUD No. 179.

## 3 ANALYSIS

#### Water Production and Distribution

The Tract is located within the City and would not need to be annexed into the City before receiving service. The City has three (3) active water wells and two existing water plants with a capacity of 875 connections or 568,000 gallons per day per Texas Commission on Environmental Quality ("TCEQ") requirements. The City is nearing completion of a water plant improvements project at the existing Water Plant No. 3 to increase the capacity of the City's water system to 2,500 connections while holding the same average daily flow capacity.

The current average daily flow ("ADF") in the City is approximately 434,400 gpd. Inclusive of existing connections, ultimate future projected connections within current platted developments, and developments that are currently in design, the City has committed approximately 583,365 gpd and 1,696 connections. A copy of the updated water usage projections is included as **Exhibit C.** Once the Water Plant No. 3 Improvements Project is complete, the City will have committed approximately 103% of the total ADF capacity and 68% of the connection capacity. The City is not expected to hit these numbers or exceed the current average daily flow capacity until 2024. The addition of a booster pump would increase the ADF capacity to approximately 730,000 gpd.

The proposed development falls within Montgomery County Municipal Utility District No. 179 ("MUD No. 179"). MUD No. 179 does not intend to provide separate water service so the Development will receive water from the City. Based on information provided by the Developer the Tract is estimated water usage is 79,560 gpd. However, based on historical data from similar developments in the City, the Tract's estimated water capacity requirement is approximately 47,475 gpd. Inclusive of existing connections, platted developments, developments currently underway, other developments in feasibility, and this development, the City will have committed approximately 934,170 gpd or 164% of the total ADF capacity and 136% of the connection capacity at full build out. Based on the projections shown in **Exhibit C**, the City would need additional water plant capacity around 2024.

Upon completion of the proposed improvements and based on the projected ADF, including this Tract, the City is projected to have sufficient water production capacity to meet the demand of the development within the City for the next couple of years. As the existing and upcoming developments build out, the City should be prepared to expand their water production and distribution capacity.

City records indicate that there is an existing 8-inch waterline that stubs at the frontage of the Tract, which will be able to serve the development as shown in **Exhibit A**. This will need to be verified by the Developer. The Developer should also connect to the existing 8-inch waterline that stubs at the end of Peel Point Dr. to provide a looped waterline system throughout the development. The Developer will be responsible for all costs associated with the waterline extension and required easements.

The ultimate alignment of waterlines interior to the Tract will depend on the final land plan of the proposed development. These waterlines will need to be placed in public utility easements located along the public ROW or placed within public ROW interior to the development and constructed per all applicable City and

TCEQ design criteria. The developer is responsible for all costs associated with easement acquisitions and recordation.

The Developer is responsible for providing engineered plans and specifications for the water distribution system interior to the development to the City Engineer for review and approval prior to commencing construction, and to obtain all required Planning and Zoning Commission, City Council and development approvals and permits.

#### Sanitary Sewer Collection and Treatment

The City's existing wastewater facilities include 18 public lift stations and two (2) wastewater treatment plants (one of which is currently decommissioned). The Stewart Creek Wastewater Treatment Plant (TPDES Permit No. WQ0011521001) has a permitted capacity of 400,000 gpd. The current ADF at the Stewart Creek Wastewater Treatment Plant is 184,330 gpd or 46%.

Inclusive of existing connections, platted developments, and developments which are in design or under construction, the City has committed approximately 342,900 gpd or 86% of existing permitted capacity at full build out. A copy of the wastewater usage projections is included as **Exhibit C.** 

The proposed development falls within Montgomery County Municipal Utility District No. 179 ("MUD No. 179"). MUD No. 179 does not intend to provide separate sanitary sewer service so the Development will receive sanitary sewer service from the City. Based on information from the Developer the Tract's estimated sanitary sewer usage is 55,250. However, based on the City's historical usage for similar types of development and information from the Developer, the Tract's estimated sanitary sewer capacity requirement is 27,430 gpd (822,900 gallons per month) at full build out. Inclusive of existing connections, platted developments, developments currently underway, other developments in feasibility, and this development, the City will have committed 564,467 gpd or 141% of existing permitted capacity.

The TCEQ requires the City to initiate design of a wastewater treatment capacity expansion when the ADF exceeds 75% of the City's 400,000 gpd permitted capacity for 3 consecutive months. The ADF for the City, including these Tracts and other tracts under design/feasibility, is not expected to exceed 75% of the permitted capacity (300,000 gpd) until around the first quarter of 2024. Additionally, the TCEQ requires the commencement of the construction phase of the expansion after 3 consecutive months of ADF exceeding 90% of the permitted capacity (360,000 gpd). This is expected to occur around third quarter of 2024. (Note: We are expecting the construction of Nantucket Apartments, consisting of 385 units. The development will account for 50,000 gpd at full build out. We are not anticipating all units to be filled within 2024 but are accounting for it in these calculations.)

There is an existing public sanitary sewer manhole at the end of Peel Point Dr. that can serve as the point of connection for the proposed development. This is based on as-built information for the existing sanitary sewer line and LIDAR elevations for the Tract, and should be verified by the Developer after a topographic survey is completed. The Developer will be responsible for constructing a gravity line to serve the development, as shown in **Exhibit A**. The Developer will be responsible for all costs associated with the sanitary sewer gravity line, and required easements. The final land plan, and grading plan may affect the estimated costs and design associated with the development.

The proposed sanitary sewer capacity of the Development will cause the City's Lift Station No. 10 to exceed capacity at full buildout and will need to be upsized from approximately 350 gpm to 550 gpm. There is an opportunity for cost sharing of these expenses with the Mabry Tract development. The estimated preliminary cost for the improvements is approximately \$379,000 as shown in **Exhibit E**. However, an additional inspection and analysis of Lift Station No. 10 will need to be performed to prepare a final estimated cost of improvements.

The ultimate alignment of sanitary sewer lines interior to the Tract will depend on the final land plan of the proposed development. These sanitary sewer lines will need to be placed within public utility easements located along the public ROW or placed within the public ROW interior to the development and constructed per all applicable City and TCEQ design criteria.

The Developer is responsible for providing engineering plans and specifications for the sanitary sewer conveyance system interior to the development, to the City Engineer for review and approval prior to commencing construction. The Developer is also responsible for obtaining all Planning and Zoning Commission, City Council, and development approvals and required permits.

The Developer will need to coordinate the installation of sanitary sewer tap(s) into the public system with the City's department of Public Works and will be responsible for all costs associated with said work.

## Drainage

The onsite storm sewer system will be designated public and accepted by the City upon completion of the development. Any detention ponds will remain the responsibility of the Developer. All drainage and detention improvements must be designed per the city's Code of Ordinances requiring compliance with the City's floodplain regulations and all applicable Montgomery County Drainage Criteria Manual Standards. Failure to design and construct the drainage facilities per Montgomery County Criteria potentially jeopardizes eligibility for acceptance by the City. The Developer will also be required to perform and submit a drainage study showing the development ultimately has no impact on the drainage downstream of the Tract and on adjacent properties. The drainage study must be submitted to the City for review and approval prior to approval of the construction plans.

The Developer is responsible for providing engineering plans and specifications for the drainage and detention system interior to the development to the City Engineer for review and approval prior to commencing construction, and to obtain all required Planning and Zoning Commission, City Council, and development approvals and permits.

## **Paving and Traffic**

Per the preliminary land plan submitted by the Developer, the streets are proposed to be public and accepted by the City. The Developer is responsible for providing engineered plans and specifications for the roads interior to the development to the City Engineer for review and approval prior to commencing construction, and to obtain all required Planning and Zoning Commission, City Council, and development approvals and permits. Currently, the preliminary land plan, combined with existing infrastructure, provides for one (1) proposed access point along Lone Star Parkway to provide access to the entire 211-home subdivision. The Developer Per the City and Montgomery County's most recently adopted thoroughfare plan, there are no conflicts with the current land plan. The Developer is responsible for Montgomery County approval for the proposed access point onto Lonestar Parkway. The Developer will need to add a stub-out street adjacent to the western boundary to allow for future access through the adjacent property.

### **Development Costs**

The Developer will need to engineer and construct the on-site water, sanitary sewer, paving, and drainage facilities to serve the proposed Tract.

The Developer will not need to pay water and wastewater impact fees to the City. Tap fees will be based on cost of the tap plus 200%, and will be determined by Public Works at the time the tap is requested.

An escrow agreement has been entered into between the Developer and the City and funds have been deposited to cover the cost of this feasibility study. An estimated additional \$33,000 will be required to cover the City's remaining expenses for the development, which includes administrative costs, legal fees, plan reviews, developer and construction coordination, construction inspection, and one year warranty expenses. The fees calculation can be seen in **Exhibit D**. These additional funds must be deposited into the escrow prior to any work being completed by the City.

Below is a summary of the estimated costs associated with the development:

Escrow Account	\$33,000
Lift Station No. 10 Improvements*	\$379,000
Total Estimated Costs	\$412,000

\*total cost of improvements to serve this development and the Pulte development

These estimates are based on the projected water and wastewater usage provided by the developer. The actual costs will depend on the final land plan, final design, and actual construction costs.

This report is our engineering evaluation of the funds required to complete the anticipated future capital improvement for this Tracts and of the potential increase in tax revenue to the City. This report is not intended to be used for the issuance of municipal financial products or the issuance of municipal securities. The City's Financial Advisor(s) can address potential recommendations related to the issuance of municipal financial products and securities.

#### **Financial Feasibility**

The Developer estimates the total assessed value (A.V.) at full development to be approximately \$82,875,000.00. Based on the estimated total A.V., the in-city development would generate approximately \$87,018.75 per year in debt service revenue, and approximately \$244,481.25 per year in operations and

maintenance revenue. These estimates are based on the City's \$0.1050/\$100 valuation debt service tax rate and the \$0.2950/\$100 valuation Operations & Maintenance (O&M) tax rate.

This report is our engineering evaluation of the funds required to complete the anticipated future capital improvement for this Tract and of the potential increase in tax revenue to the City. This report is not intended to be used for the issuance of municipal financial products or the issuance of municipal securities. The City's Financial Advisor(s) can address potential recommendations related to the issuance of municipal financial products and securities.

Thank you for the opportunity to complete this feasibility study and offer our recommendations. Please contact me or Ms. Katherine Vu should you have any questions.

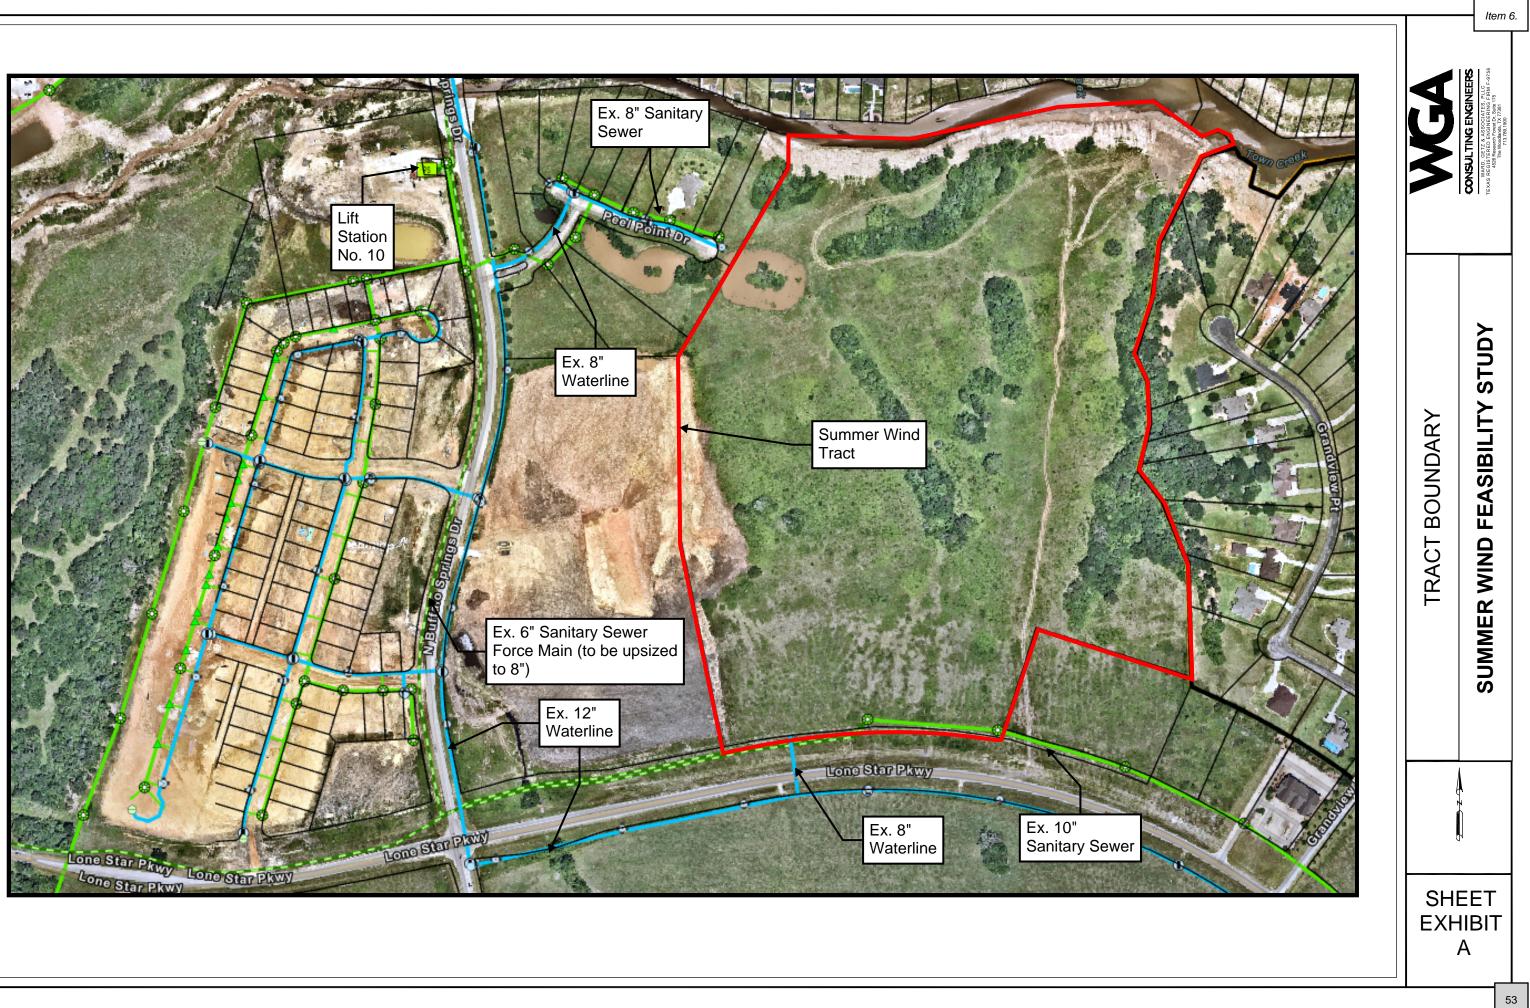

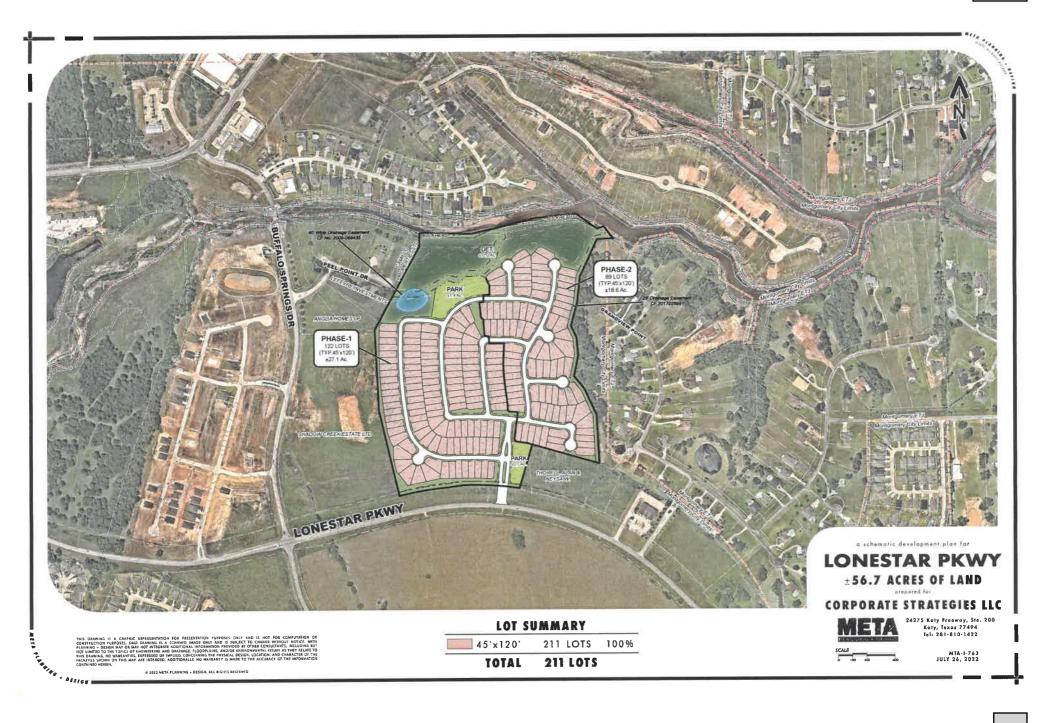

Sincerely,

Chris Rommery

Chris Roznovsky, PE Engineer for the City

## **ESCROW AGREEMENT, SECTION 2.03 ATTACHMENT**

### **BY AND BETWEEN**

## THE CITY OF MONTGOMERY, TEXAS,

## AND

## Summer Wind

#### Dev. No. 2211

THE STATE OF TEXAS 3

COUNTY OF MONTGOMERY 3

As per section 2.03, the Feasibility Study completed an estimate of the additional escrow amount, which was determined for administration costs, legal fees, plan and drainage report reviews, developer coordination, construction coordination, construction inspection, and warranty of services. The required additional amount is below:

Administration	\$ 3,000
City Attorney	\$ 3,000
City Engineer	\$ 27,000
TOTAL	\$ 33,000

**Preliminary Cost Estimate** 

## FOR LIFT STATION NO. 10 IMPROVEMENTS Summer Wind

9/28/2022

Total	\$ 379,000

#### Notes:

- 1 All values rounded up to the nearest thousand.
- 2 This estimate is based on my best judgement as a design professional familiar with the construction industry. We cannot and do not guarantee that bids will not vary from this cost estimate.
- 3 This includes geotechnical investigation, construction materials testing, review fees, reproduction, advertising expenses, and other miscellaneous reimbursable costs.

# MEADOW RIDGE FEASIBILITY STUDY (Dev. No. 2213)

FOR

THE CITY OF MONTGOMERY

WGA PROJECT NO. 00574-124

**NOVEMBER 2022** 

**PREPARED BY** 

CONSULTING ENGINEERS

## **OVERVIEW**

- 1 Executive Summary
- 2 Introduction
- 3 Analysis

## **Exhibits:**

- A. Tract Boundary
- B. City Zoning
- C. Preliminary Site Plan
- D. Water and Wastewater Usage Projection
- E. Impact Fees
- F. Escrow Agreement
- G. Public Utility Extension Cost Estimate

## **1 EXECUTIVE SUMMARY**

Morning Cloud Investments, LLC (the "Developer") has requested the City of Montgomery (the "City") to perform a feasibility study for the City to serve a future 28-acre single family development along Lone Star Parkway, also referred to as the Meadow Ridge tract. A majority of the tract falls within the City limits and would not require annexation. However, approximately 8.25 acres of the tract is located within the City's Extraterritorial Jurisdiction ("ETJ") and would require annexation into the City prior to receiving service.

This development would consist of approximately 81 single family lots for in-city service at full build out. The final land plan may affect the estimated costs of and revenues associated with the development.

The analysis shows that the City has the water capacity to serve the development, and existing developments, for the next few years but will need additional water plant capacity to serve all existing and proposed developments at full build out.

The analysis also shows that the City will have the wastewater treatment plant capacity to serve the development and existing developments for the next couple of years but will need additional sanitary sewer plant capacity to serve all existing and proposed developments at full build out.

The estimated total costs that will be associated with the development are:

Total Estimated Costs	\$1,104,759
Offsite Utility Improvements	\$762,500
Wastewater Impact Fee	\$203,553
Water Impact Fee	\$91,206
Escrow Account	\$47,500

Based on information provided by the Developer the estimated a total assessed valuation for the development would be approximately \$36,000,000 at full build out. Based on the City's estimated current tax rate (\$0.1050 debt service and \$0.2950 for operations and maintenance) financially, the development will bring in approximate tax revenues as shown below, assuming 95% collection and 75% of the properties receive a 20% homestead exemption:

Total Estimated Annual Tax Revenue	\$116,280
Debt Service	\$85,756
Operations and Maintenance	\$30,524

## **2 INTRODUCTION**

This undeveloped tract is located along Lone Star Parkway west of FM 149. Approximately 8.25 acres of the tract falls outside of City limits and would require annexation prior to receiving service. An exhibit showing the Tract's boundary in relation to the City's boundary is enclosed as **Exhibit A.** A preliminary site plan is enclosed as **Exhibit C** and indicates the Developer's intentions to subdivide the Tract into approximately 81 - 75' wide single family lots. Upon annexation of approximately 8.25 acres the tract will need to be zoned R-1 Residential. Enclosed as **Exhibit B** is a map showing the current zoning of the area surrounding the property.

Based on information from the Developer, construction of the development is planned to be complete in 2026. The estimates included in this feasibility are based on the anticipated land use provided by the developer at the time of the study. The final land plan may affect the estimated costs and revenues associated with the development.

## 3 ANALYSIS

### Water Production and Distribution

The Tract is located primarily within the City and would need to be fully annexed into the City before receiving service. The City has three (3) active water wells and two existing water plants with a capacity of 2,500 connections or a 568,000 gallons per day (average daily flow) per Texas Commission on Environmental Quality ("TCEQ") requirements.

The current average daily flow ("ADF") in the City is approximately 434,400 gpd. Inclusive of existing connections, ultimate future projected connections within current platted developments, and developments that are currently in permitting or under construction, the City has committed approximately 593,665 gpd and 1,768 connections. A copy of the updated water usage projections is included as **Exhibit D.** This equates to approximately 104% of the total ADF capacity and 70% of the connection capacity. The City is not expected to hit these numbers or exceed the current average daily flow capacity until 2024. The addition of a booster pump would increase the ADF capacity to approximately 730,000 gpd.

Based on historical data from similar developments in the City, the Tract's estimated water capacity requirement is approximately 18,225 gpd. Inclusive of existing connections, platted developments, developments currently underway, other developments in feasibility and design, and this development, the City will have committed approximately 934,170 gpd or 164% of the total ADF capacity and 136% of the connection capacity at full build out. Based on the projections shown in **Exhibit D**, the City would need additional water plant capacity around 2024. The addition of a booster pump would increase the ADF capacity to 730,000.

Based on the projected ADF, including this Tract, the City is projected to have sufficient water production capacity to meet the demand of the development within the City for the next couple of years. As the existing and upcoming developments build out, the City should be prepared to expand their water production and distribution capacity.

City records indicate that there is an existing 12-inch waterline along Lone Star Parkway, which will be able to serve the development as shown in **Exhibit A**. The Developer will extend this line to the tract's western boundary to allow for a future closed loop of the City's water system. A preliminary cost estimate for the construction costs of the waterline extension can be found in **Exhibit G**. The Developer will be responsible for all costs associated with the waterline extension and required easements. It is recommended that an environmental assessment be conducted to confirm potential wetlands and to identify the limits of the recorded floodplain. The results of this assessment may impact construction costs and timeline. Additionally this waterline is on the City's capital improvements plan and included in the City's Impact Fee calculation. The City should consider completing this waterline loop as part of this project and should take into consideration the sharing of cost of this waterline with the Developer.

The ultimate alignment of waterlines interior to the Tract will depend on the final land plan of the proposed development. These waterlines will need to be placed in public utility easements located along the public ROW or placed within public ROW interior to the development and constructed per all applicable City and

TCEQ design criteria. The developer is responsible for all costs associated with easement acquisitions and recordation.

The Developer is responsible for providing engineered plans and specifications for the water distribution system interior to the development to the City Engineer for review and approval prior to commencing construction, and to obtain all required Planning and Zoning Commission, City Council and development approvals and permits.

#### **Sanitary Sewer Collection and Treatment**

The City's existing wastewater facilities include 18 public lift stations and two (2) wastewater treatment plants (one of which is currently decommissioned). The Stewart Creek Wastewater Treatment Plant (TPDES Permit No. WQ0011521001) has a permitted capacity of 400,000 gpd. The current ADF at the Stewart Creek Wastewater Treatment Plant is 184,330 gpd or 46%.

Inclusive of existing connections, platted developments, and developments which are in permitting or under construction, the City has committed approximately 351,477 gpd or 88% of existing permitted capacity at full build out. A copy of the wastewater usage projections is included as **Exhibit D**.

Based on the City's historical usage for similar types of development and information from the Developer, the Tract's estimated sanitary sewer capacity requirement is 10,530 gpd (315,900 gallons per month) at full build out. Inclusive of existing connections, platted developments, developments currently underway, other developments in feasibility and design, and this development, the City will have committed 564,467 gpd or 141% of existing permitted capacity.

The TCEQ requires the City to initiate design of a wastewater treatment capacity expansion when the ADF exceeds 75% of the City's 400,000 gpd permitted capacity for 3 consecutive months. The ADF for the City, including these Tracts and other tracts in design/feasibility, is not expected to exceed 75% of the permitted capacity (300,000 gpd) until around the first quarter of 2024. Additionally, the TCEQ requires the commencement of the construction phase of the expansion after 3 consecutive months of ADF exceeding 90% of the permitted capacity (360,000 gpd). This is expected to occur around third quarter of 2024. (Note: We are expecting the construction of Nantucket Apartments and Grand Monarch Apartments, consisting of 385 units and 72 units, respectively. The developments will account for 58,600 gpd at full build out. We are not anticipating all units to be filled within 2024 but are accounting for it in these calculations.)

Given the Tract's location relative to the City's existing sanitary sewer facilities and due to the topography across the tract, a new public lift station and force main will need to be constructed to serve the Tract. The Tract will be served by extending gravity sanitary sewer lines to the proposed lift station. The lift station will need to be located and constructed to a depth such that future gravity sanitary sewer lines can also be extended to the surrounding properties to receive sanitary sewer service in the future. This includes properties along Lone Star Parkway up to Town Creek.

The lift station pumps will initially be sized to serve only the Tract and existing developed properties within the City limits that do not currently receive sanitary sewer service. Additionally, the wet well and gravity sanitary sewer lines shall be constructed deep enough to serve a portion of the surrounding properties for future development as previously described. The final location of the lift station will determine the depth and diameter of the wet wells. The lift station will need to be constructed with a permanent backup generator, and the pumps, controls, and design shall be reviewed and approved by the City. The Developer will be responsible for dedicating the necessary lift station site and easements to the City.

The proposed lift station will convey flow via a new public force main extending to the existing public gravity sanitary sewer line located at the southwest corner of the intersection of FM 149 and Lone Star Parkway. We evaluated routing the flow toward Lift Station No. 7; however, Lift Station No. 7 does not have the capacity to serve the Tract. Additionally, by discharging the force at the intersection of FM 149 and Lone Star Parkway, will minimize the number of times the flow would have to be pumped before reaching the City's wastewater treatment plant. A preliminary layout of the improvements can be found in **Exhibit A**, and construction cost estimates for the force main can be found in **Exhibit G**. The developer will need to prepare cost estimates for the proposed lift station and include them in their development cost. The alignment and cost of the improvements are subject to change based on the final land plan of the proposed development. The developer will be responsible for all costs associated with the improvements required to serve the Tract and all required easements.

We additionally evaluated the feasibility of extending a public gravity sanitary sewer line from the Tract to the existing manhole in Lone Star Estates. However due to the elevations of Town creek and the existing 12" sanitary sewer line, this option is not feasible to provide service to the Tract via gravity sanitary sewer.

Lift Station No. 2 is also already projected to be over its calculated capacity, based on a 6 hour per day run time, at full build-out of the existing developments, not including this Tract. (The reason to limit the capacity to 6 hours per day is it then allows for the lift station to handle the 4 times peaking factor.) The City will need to proceed with a study in the next few months to finalize the long-term plan to handle sanitary sewer treatment, which will include evaluation of future sanitary sewer line and lift station upsizing's.

The ultimate alignment of sanitary sewer lines interior to the Tract will depend on the final land plan of the proposed development. These sanitary sewer lines will need to be placed within public utility easements located along the public ROW or placed within the public ROW interior to the development and constructed per all applicable City and TCEQ design criteria.

The Developer is responsible for providing engineering plans and specifications for the sanitary sewer conveyance system interior to the development, to the City Engineer for review and approval prior to commencing construction. The Developer is also responsible for obtaining all Planning and Zoning Commission, City Council, and development approvals and required permits.

The Developer will need to coordinate the installation of sanitary sewer tap(s) into the public system with the City's department of Public Works and will be responsible for all costs associated with said work.

#### Drainage

The onsite storm sewer system will be designated public and accepted by the City upon completion of the development. Any detention ponds will remain the responsibility of the Developer. All drainage and detention improvements must be designed per the city's Code of Ordinances requiring compliance with the City's floodplain regulations and all applicable Montgomery County Drainage Criteria Manual Standards.

Failure to design and construct the drainage facilities per Montgomery County Criteria potentially jeopardizes eligibility for acceptance by the City. The Developer will also be required to perform and submit a drainage study showing the development ultimately has no impact on the drainage downstream of the Tract and on adjacent properties. The drainage study must be submitted to the City for review and approval prior to approval of the construction plans.

The Developer is responsible for providing engineering plans and specifications for the drainage and detention system interior to the development to the City Engineer for review and approval prior to commencing construction, and to obtain all required Planning and Zoning Commission, City Council, and development approvals and permits.

#### **Paving and Traffic**

Per the preliminary land plan submitted by the Developer, the streets are proposed to be public and accepted by the City. The Developer is responsible for providing engineered plans and specifications for the roads interior to the development to the City Engineer for review and approval prior to commencing construction, and to obtain all required Planning and Zoning Commission, City Council, and development approvals and permits.

Currently, the preliminary land plan, combined with existing infrastructure, provides for two (2) proposed access points along Lone Star Parkway to provide access to the entire 81-home subdivision. The Developer is responsible for Montgomery County approval for the proposed access point onto Lone Star Parkway.

Per the 2021 Montgomery County Major Thoroughfare Plan, there is a proposed road that runs east/west across the southern portion of the property. The terminus points of the road per the plan are not feasible and the road would provide minimal benefit to the area. We recommend the developer stub out streets to the west, south, and east of the property to allow the option for future connection but not dedicate a full 60' wide right-of-way for a future collector street through the tract.

#### **Development Costs**

The Developer will need to engineer and construct the on-site and off-site water, sanitary sewer, paving, and drainage facilities to serve the proposed Tract.

The Developer will also need to pay water and wastewater impact fees to the City. The impact fees will be assessed at the time of recordation of the final plat and collected prior to receiving water and sanitary sewer taps. Enclosed as **Exhibit E** is Table 1.1 of the 2017 Revisions to the Montgomery Impact Fee Analysis Report.

The estimated ADF provided by the developer requires the equivalent use of 81  $\frac{5}{8}$  – inch water meters per the table.

An escrow agreement has been entered into between the Developer and the City and funds have been deposited to cover the cost of this feasibility study. An estimated additional \$47,500 will be required to cover the City's remaining expenses for the development, which includes administrative costs, legal fees, plan reviews, developer and construction coordination, construction inspection, and one year warranty

expenses. The fees calculation can be seen in **Exhibit F**. These additional funds must be deposited into the escrow prior to any work being completed by the City.

Below is a summary of the estimated costs associated with the development:

Total Estimated Costs	\$1,104,759
Offsite Utility Improvements	\$762,500
Wastewater Impact Fee	\$203,553
Water Impact Fee	\$91,206
Escrow Account	\$47,500

These estimates are based on the projected water and wastewater usage provided by the developer. The actual costs will depend on the final land plan, final design, and actual construction costs.

#### **Financial Feasibility**

The Developer estimates the total assessed value (A.V.) at full development to be approximately \$36,000,000. Based on the estimated total A.V., and assuming 95% collection and 75% of the residents receive a 20% homesteads exemption the in-city development would generate approximately \$85,756 per year in debt service revenue, and approximately \$30,524 per year in operations and maintenance revenue. These estimates are based on the City's \$0.1050/\$100 valuation debt service tax rate and the \$0.2950/\$100 valuation Operations & Maintenance (O&M) tax rate.

This report is our engineering evaluation of the funds required to complete the anticipated future capital improvement for this Tract and of the potential increase in tax revenue to the City. This report is not intended to be used for the issuance of municipal financial products or the issuance of municipal securities. The City's Financial Advisor(s) can address potential recommendations related to the issuance of municipal financial products and securities.

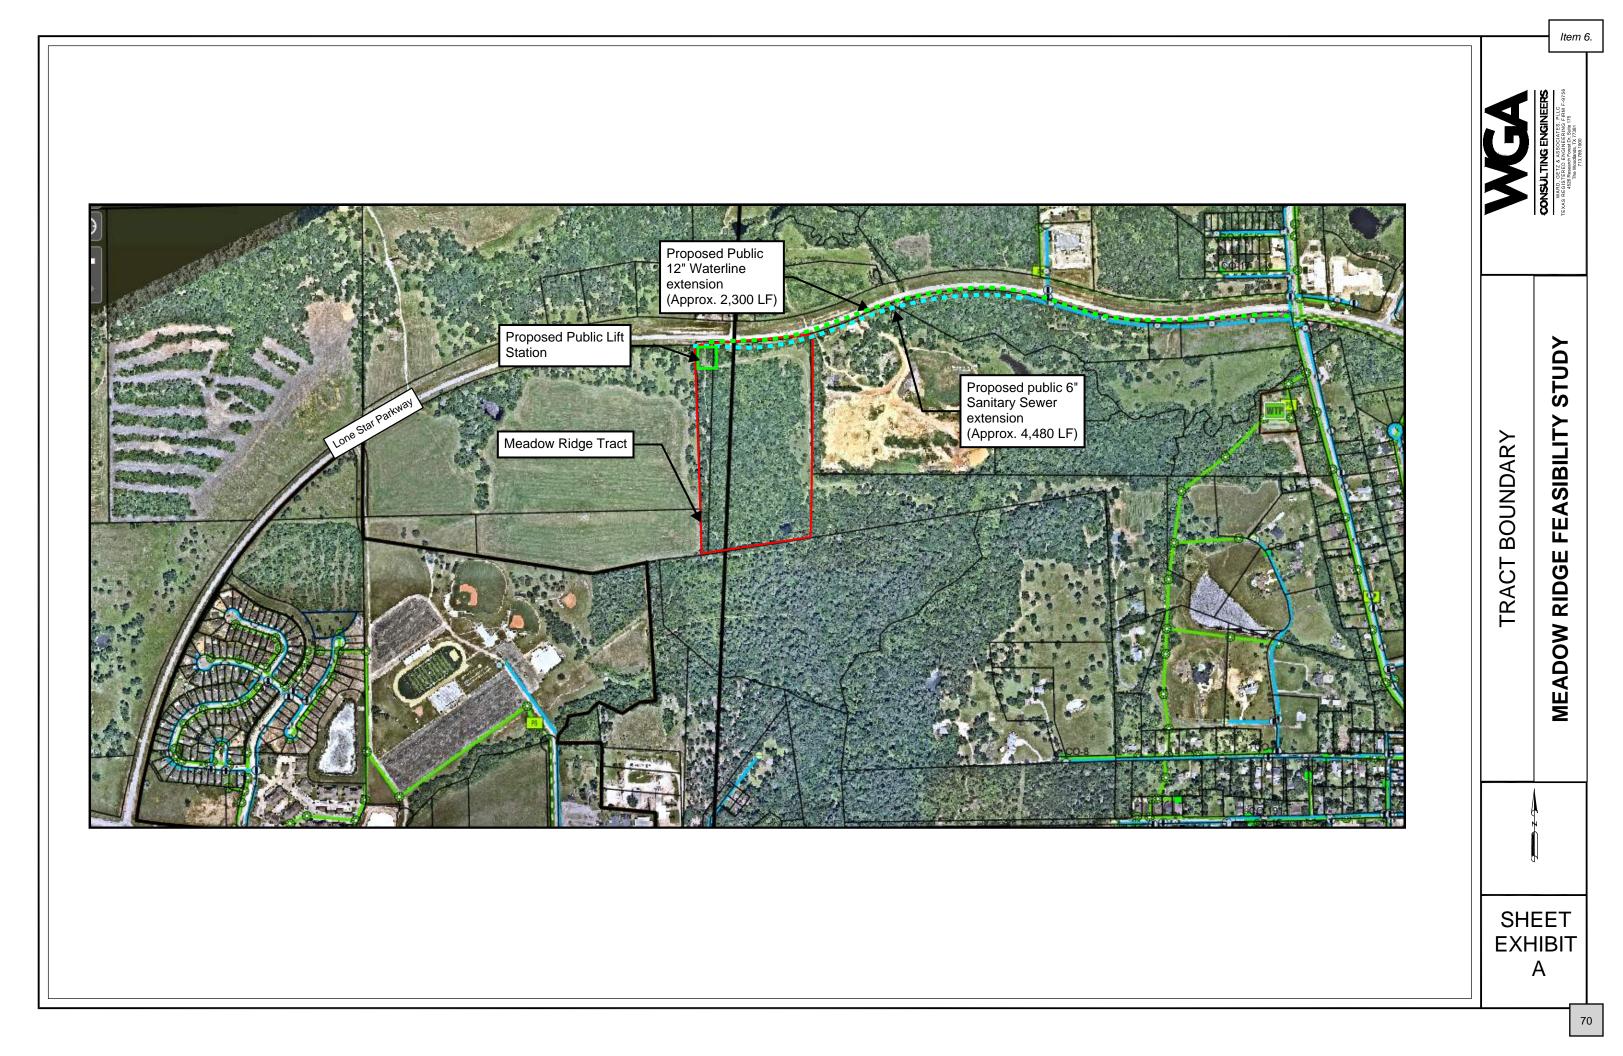

Thank you for the opportunity to complete this feasibility study and offer our recommendations. Please contact me or Ms. Katherine Vu should you have any questions.

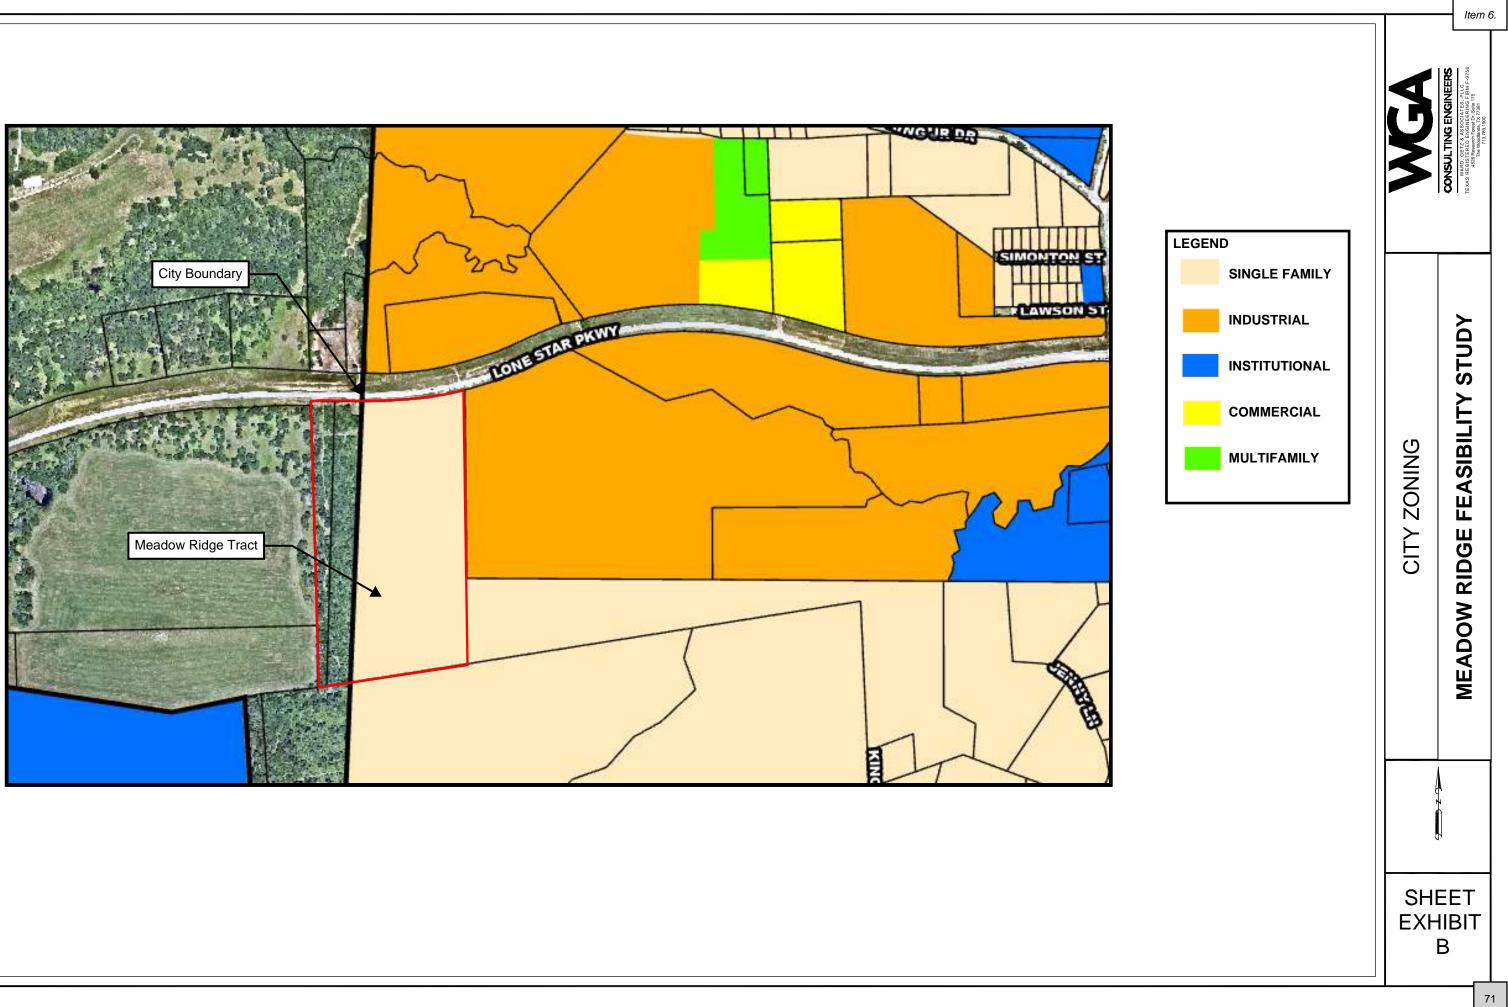

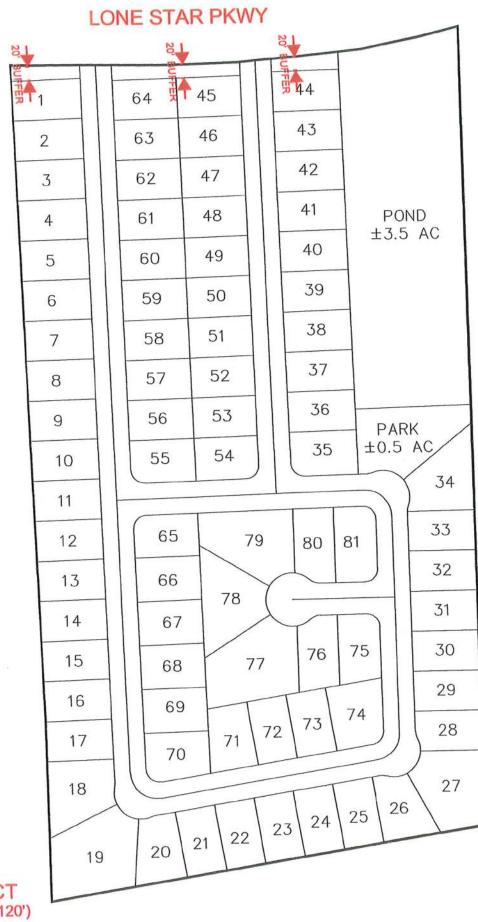

Sincerely,

Chris Roznovsky, PE Engineer for the City

CVR/kv:zlgt

## **ESCROW AGREEMENT, SECTION 2.03 ATTACHMENT**

### **BY AND BETWEEN**

# THE CITY OF MONTGOMERY, TEXAS,

## AND

## Meadow Ridge

#### Dev. No. 2213

THE STATE OF TEXAS 3

COUNTY OF MONTGOMERY 3

As per section 2.03, the Feasibility Study completed an estimate of the additional escrow amount, which was determined for administration costs, legal fees, plan and drainage report reviews, developer coordination, construction coordination, construction inspection, and warranty of services. The required additional amount is below:

Administration	\$ 7,500
City Attorney	\$ 7,500
City Engineer	\$ 32,500
TOTAL	\$ 47,500

# Preliminary Cost Estimate FOR PUBLIC UTILITY IMPROVEMENTS Meadow Ridge 11/3/2022

<u>ltem No.</u>	Description	Quantity	<u>Unit</u>	<u>Unit Price</u>	<u>Cost</u>				
Site Preparation

Environmental Assessment	\$16,500
Engineering Design	\$60,000
Construction Administration	\$18,000
Inspection	\$25,000
Reimbursable Expenses (Survey, Testing, Reproduction, Etc.) <sup>(3)</sup>	\$20,000

Total \$762,500

#### Notes:

- 1 All values rounded up to the nearest hundred.
- 2 This estimate is based on my best judgement as a design professional familiar with the construction industry. We cannot and do not guarantee that bids will not vary from this cost estimate.
- 3 This includes geotechnical investigation, construction materials testing, review fees, reproduction, advertising expenses, and other miscellaneous reimbursable costs.
