LETTER OF INTEREST

June 10, 2020

Dear Website Selection Team:

Thank you for the opportunity to present our quote for website redesign, hosting, and support services. It is our goal to deliver a mobile-friendly website that is professional, easy-to-use, and easy-to-maintain.

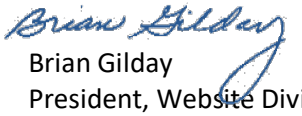

Our team has developed a portfolio of online services that are tailored for local government agencies. We have worked with cities, towns, villages, counties and other local government agencies for over sixty-five years continually striving to make your job easier. When it comes to posting content on the web, our solution is simple and straight-forward.

Our websites make it easier for your community to find content by providing multiple navigation paths to each page. Our designs reinforce self-service to enable 24x7 online access to your organization's services.

We create your website using Drupal, an industry-leading content management system. Since Drupal is open source, your website is truly yours unlike those of many other government redesign companies that use their own proprietary software.

We are thrilled at the opportunity to partner on such an important initiative.

Sincerely,

Brian Gilday
President, Website Division

PROJECT TIMELINE AND APPROACH

The typical project takes from 3 to 7 months. The high-level timeline below is an approximation. We will finalize the schedule once we meet with you:

Project Timeline Sample

Client Responsibilities

The client's responsibility and the key to a smooth on-time deployment is providing the initial information and approving proofs quickly.

- ☑ The Client will make available to Municode relevant images, photos, logos, colors, and other branding material as well as an inventory of existing applications, websites, and content at the start of this effort. The Client will create new content copy as needed.
- ☑ The Client will assign a single point of contact for Municode to interact with that will be responsible for coordinating the schedules of other project stakeholders.
- ☑ The Client will review any deliverables requiring formal approval within 5 business days and return all comments/issues at or before those 5 days have elapsed.
- ☑ The Client will assign one person who will act as the "ultimate decision maker" in the case where consensus among the team cannot be reached.
- ☑ The Client must agree to applicable terms of services for Google related services such as Google Analytics and Google Maps to access those features. Municode is not responsible for Google's decisions related to discontinuing services or changing current APIs.

Project Phase Descriptions

Phase 1: Analyze and Confirm Requirements	Deliverables
Website Assessment: Municode will complete an analysis of your current website(s) to assess the existing navigation, features/functions, and quality of content.	⊙ Summary assessment sheet
Organizational Overview Inventory/Survey: Municode will provide an organizational overview document for you to complete as part of this assessment.	⊙ Organization Survey
Website Design Meeting: Municode will conduct a design meeting with a client-defined web advisory team. We recommend the advisory team be limited to a maximum of 6 members. This design meeting will allow the website advisory team to provide input regarding the overall design of the new website, including the site branding as well as high-level site navigation. This team will act as the initial review team for website design concepts. In addition, this team will act as the final review team for the website before it is approved for go-live.	⊙ Website design specification sheet (graphic design and information / navigation design)

Phase 2: Design and Build phase	Deliverables
Design Concept Creation and Approval (Custom Designs): Municode will complete home page design concepts for the Home Page and inner pages. These design concepts will incorporate all the graphical elements as well as the high-level sitemap. We allow for a total of 6 revisions.	⊙ Design concepts ⊙ Finalized design (Sketch, Figma, or Photoshop)
Website Setup, Configure, and Customization: Municode will create a fully functional website that includes the functional elements described in this proposal. As part of the website setup, Municode will finalize any remaining elements to the approved design and navigation.	⊙ Functional beta website with approved design ⊙ Content migration

Phase 3: Migrate Content

Deliverables

Content Finalization and Departmental Acceptance

Municode migrates initial content and your trained staff finalizes prior to go-live. See pricing section for specific number of included pages.

Standard Web Pages: A standard web page is defined as a page that contains a title, body text, and up to a total of 5 links, file attachments, or images. If you require migration of more complex pages, we can provide a custom quote.

Directory pages (Staff Directory, Projects, Commercial/Industrial Properties, Business Directory, Ordinances/Resolutions): Client completes manually or may request a custom quote. For custom quotes, client completes an excel template with directory data and Municode auto-imports directory content.

- Content creation and migration
