IX. MANAGER'S REPORT

A. February 2026 Manager Report

Town Manager Clint Mack provided an update to the Board of Commissioners, emphasizing that despite a short agenda, the town remains very busy with ongoing projects and operations.

Additional updates included compliance inspections for the new townhouses, installation of municipal trash cans, picnic tables, and bleachers at the reservoir area to support community events. Mack noted the significant time and coordination required for these projects, including weekly meetings to integrate new software and train staff. He concluded by commending the staff for their work and acknowledged that while it is a busy year, the outcomes will greatly benefit the community.

Questions from the Board

Commissioner Gilbert asked Manager Clint Mack for an update on the status of the proposal to convey the old EMS building. Manager Mack explained that the process is currently at the surveying stage; the organization involved has volunteered to complete the survey to redefine the parcel, separating it from the old veterinarian building. Once the survey is complete, the closing documents can be prepared.

Commissioner Gilbert then raised the issue of the lease agreement, pointing out that the original lease had both parties paying a dollar—one for the building and one for the playground—and included a provision for the playground to revert to the town when feasible. With the conveyance expanding the organization's footprint for a new playground, Commissioner Gilbert suggested this would be an ideal time for both parties to return ownership of the playground equipment and end the mutual leases, keeping everything cost-neutral.

Manager Mack agreed to review the lease terms and ensure that any loose ends, particularly regarding the playground lease arrangement, are addressed during the closing process.

Commissioner Gilbert asked Town Manager Clint Mack about the expected completion of the town's audit following the CPA's meeting with the previous auditor in Lexington. Mack responded that there is no exact completion date yet. He noted he recently signed off on an itemized invoice for 28–38 hours of audit work, which is more detailed than previous experiences. The CPA is working on both the prior year and closing out last year's financials to prevent falling further behind.

Mack shared that the previous auditor had already finished an audit and submitted it to the Local Government Commission (LGC), but it was rejected due to issues. The CPA compared records to ensure consistency and found the process informative.

A lingering issue involves reconciling funds from the 2016 and 2018 CDBG and chlorine booster station grants. Mack explained these were closed in financial systems previously, making reconciliation complicated without CPA intervention. He suspects adjustments will be needed to address these gaps and clarified that these were not due to fraud or abuse but rather accounting oversights, such as failing to properly account for reimbursements as both revenue and expenses.

Mack concluded that the main challenge is untangling these old grant accounts, and once resolved, the audit should move forward.
