## MEETING AGENDA

MARCH 18, 2024, 6:00 PM

CITY COUNCIL REGULAR MEETING

HISTORIC CHURCH BUILDING - 403 N 7TH STREET, SANGER, TEXAS

### CALL THE WORK SESSION TO ORDER AND ESTABLISH A QUORUM

#### DISCUSSION ITEMS

1. A joint discussion with the 4B Development Corporation and the Parks and Recreation / Keep Sanger Beautiful Board of the Downtown Park conceptual drawings presented by MHS Planning and Design.

### OVERVIEW OF ITEMS ON THE REGULAR AGENDA

#### ADJOURN THE WORK SESSION

**The Regular Meeting will begin following the Work Session  
but not earlier than 7:00 p.m.**

### CALL THE REGULAR MEETING TO ORDER AND ESTABLISH A QUORUM

#### INVOCATION AND PLEDGE

#### CITIZENS COMMENTS

*This is an opportunity for citizens to address the Council on any matter. Comments related to public hearings will be heard when the specific hearing begins. Citizens are allowed 3 minutes to speak. Each speaker must complete the Speaker's Form and include the topic(s) to be presented. Citizens who wish to address the Council with regard to matters on the agenda will be received at the time the item is considered. The Council is not allowed to converse, deliberate or take action on any matter presented during citizen input.*

#### REPORTS

*Staff Reports are for discussion only. No action may be taken on items listed under this portion of the agenda.*

2. Annual presentation and overview of the City Secretary's Office.

## CONSENT AGENDA

*All items on the Consent Agenda will be acted upon by one vote without being discussed separately unless requested by a Councilmember to remove the item(s) for additional discussion. Any items removed from the Consent Agenda will be taken up for individual consideration.*

- [3.](#) Consideration and possible action on Resolution #03-05-24 designating April 20, 2024 as the day of the 2024 Sanger City-Wide Garage Sale.
- [4.](#) Consideration and possible action on the minutes from the March 4, 2024, meeting.

## ACTION ITEMS

- [5.](#) Consideration and possible action to enter into additional engineering services with Halff Associates, Inc for the rehabilitation of the Sanger Sports Park Pond in an amount not to exceed \$81,600, and authorize the City Manager to execute said agreement.

## FUTURE AGENDA ITEMS

*The purpose of this item is to allow the Mayor and Councilmembers to bring forward items they wish to discuss at a future meeting, A Councilmember may inquire about a subject for which notice has not been given. A statement of specific factual information or the recitation of existing policy may be given. Any deliberation shall be limited to a proposal to place the subject on an agenda for a subsequent meeting. Items may be placed on a future meeting agenda with a consensus of the Council or at the call of the Mayor.*

## INFORMATIONAL ITEMS

*Information Items are for informational purposes only. No action may be taken on items listed under this portion of the agenda.*

EXHIBIT A  
SCOPE OF WORK  
FOR  
SANGER SPORTS PARK  
POND REHABILITATION

GENERAL DESCRIPTION

Halff was approached by the City of Sanger to provide a scope and fee for the investigation and rehabilitation of a retention pond at the southern end of Sanger Sports Park due to abnormal water level loss.

This scope of work includes the project management, coordination, survey, geotechnical engineering, engineering, bidding, and construction services for the investigation and rehabilitation via a new clay or poly liner of the aforementioned retention pond. A detailed scope of work is provided below:

SCOPE OF ENGINEERING SERVICES

PHASE 1 – PROJECT MANAGEMENT AND COORDINATION

- I. Kickoff Meeting and Site Visit
  - A. Within ten (10) days of notice to proceed, the ENGINEER will setup a kickoff meeting with the CITY to confirm project scope and goals and perform an onsite investigation and site walk.
- II. Design Coordination Meetings
  - A. The ENGINEER shall attend a virtual plan's in hand review meeting to discuss comments and the resolution to said comments after each milestone submittal. For this scope the ENGINEER assumes a meeting will be held after the 60% and 90% milestones for a total of two (2) in-person meetings.
- III. Project Billing
  - A. The ENGINEER will submit invoices as the work progresses but not more frequently than monthly.
- IV. Project Management and Quality Assurance and Quality Control
  - A. The ENGINEER will prepare, implement, and document a formal QA/QC plan in accordance with the Public Works section of the ENGINEER's Quality Assurance/Quality Control Program manual.
  - B. The ENGINEER shall conduct regular coordination meetings with project sub-consultants and include all sub-consultant work in the ENGINEER's QA/QC project program.

PHASE 2 – FIELD DATA COLLECTION

- I. Design Survey
  - A. ENGINEER will conduct a topographic and design survey within the trail limits surrounding the pond up to 4-acres in area.

1. Establish horizontal and vertical control based on Texas Coordinate System of 1983, North Central Zone (4202), North American Datum of 1983 (NAD83) 2011 Adjustment, Epoch 2010.00.
2. Conduct a 25-foot grid using a boat to contour the existing pond within water limits.
3. Topo of all surface features or improvements from edge of trail to pond, including:
  - a) Existing trails, docks, trees greater than 6-inches in caliper diameter, barrier free ramps, and floating docks.
4. Prepare a final topographic drawing in digital format (including contours and break lines) showing the features located in the field, an ASCII coordinate file of the points located in the field, and a hard copy of the coordinates and feature descriptions.

## II. Geotechnical Exploration, Testing, and Reporting

### A. Subsurface Exploration

1. Based on past experience in the vicinity of the project, we anticipate subsurface conditions to consist of alluvial deposits overlying the Duck Creek geological formation.
2. An experienced technician will recon subsurface conditions and obtain representative samples of soils around the existing pond banks. These soils will be bagged, marked, and returned to our laboratory for testing. In addition, experienced drillers and technicians will evaluate subsurface conditions with a total of three (3) sample borings to depths of 25 feet below existing grades.
3. The field personnel will drill the borings using truck-mounted equipment. Cohesive and non-cohesive soil samples will be obtained using 3-inch diameter Shelby tube samplers and 2-inch diameter standard split-spoon samplers, respectively. In addition, rock encountered will be evaluated by use of Texas Department of Transportation (TXDOT) cone penetration tests. A soils logger will extrude the samples in the field, check the samples for consistency with a hand penetrometer, carefully wrap them to preserve their condition, and return them to the laboratory for testing. A log of each boring will be prepared to document field activities and results.
4. Personnel will stake the boring locations using hand-held GPS equipment. Approximate locations of the borings will be shown on the plan of borings.
5. At the completion of drilling operations, boreholes will be backfilled with bentonite and plugged at the surface by hand tamping.

### B. Laboratory Testing

1. Considering the planned facilities, anticipated soil conditions and geology, laboratory tests will be required for classification purposes, and to determine permeability characteristics. The following types of tests are therefore recommended:
  - a) Moisture content and soil identification
  - b) Sieve and hydrometer grain size analysis
  - c) Liquid and plastic limit (Plasticity Index-PI)
  - d) Optimum moisture-density tests
  - e) Falling-head permeability tests on various percentages of soil-bentonite mixtures

- f) Unit weight determination
  - 2. The specific types and quantities of tests will be determined based on geologic conditions encountered in the borings.
- C. Engineering Services
  - 1. An engineering report will be prepared to present the results of the field and laboratory data together with our analyses of the results and recommendations.
  - 2. The report will address:
    - a) General soil conditions and ground-water conditions
    - b) Comments on pond bank materials type, strength, and general permeability characteristics
    - c) Comments on remedial needs, to include recommendations for imported clay liner, or synthetic/poly liner
    - d) Recommendations for bentonite application concentration, as necessary
    - e) Bentonite-soil construction requirements, as necessary
    - f) General comments and recommendations for bank erosion protection
    - g) Earthwork recommendations
  - 3. Up to two hard copies of the report shall be provided.

### PHASE 3 – ENVIRONMENTAL

- I. Desktop Jurisdictional Determination and Memorandum
  - A. ENGINEER will conduct a desktop level jurisdictional analysis and document their findings in a memorandum. Based on initial review the pond was constructed as a retention and amenity pond in an upland area of the Duck Creek banks however cross flow between the pond and Duck Creek during flood events requires evaluation to verify that the Waters of the United States threshold is not met.
  - B. The U.S. Army Corps of Engineers (USACE) regulates, under the authority of Section 404 of the Clean Water Act (Section 404), the placement of fill material into waters of the United States and special aquatic sites that include wetlands. Under Section 404, the USACE utilizes permits to authorize the discharge of dredged and fill material into waters of the United States when the discharge is expected to result in less than adverse impacts to the aquatic environment. Activities that do not qualify for authorization under a nationwide permit are authorized by a specific individual permit. Preparation of a delineation of waters of the United States is the first step in determining what type of permit, if any, will be required for the proposed activity. A preliminary review of the project area support that a 'desktop' study should be sufficient to document the presence/absence of waters of the United States. The exercise will entail a desktop delineation to determine the presence/absence of potential waters of the United States. A summary report including USGS data, aerial imagery, and LiDAR topography data will be prepared describing the methodology and results of the investigation. A field investigation is not proposed at this time. This task does not assume the preparation and submittal of any Section 404 permit documents.

## PHASE 4 – DESIGN

## I. 60% Design

## A. 60% Design

1. The ENGINEER will develop 60% design plans based on the recommendations contained in the geotechnical report and record drawings provided by the City.
2. Plans shall be prepared with the full size set being 22-inch by 34-inch and of an appropriate scale to allow for the reduction and reproduction of a half size 11-inch by 17-inch set.
3. Design shall be in general accordance with City standards and specifications, NCTCOG standards and specifications, TXDOT standards and specifications, where applicable, and good consulting practices for projects off this nature.
4. Design assumes that the proposed pond limits and grading shall generally conform to original design grades with the exception of areas where slopes may need to be modified, at the engineers discretion, to allow for a more stable and/or maintainable configuration given the soil characteristics determined by the project geotechnical report.
5. Due to the proposed grades generally conforming to existing no tree or large landscape element removal is anticipated and therefore no tree removal permit or landscaping services will be necessary.
6. It is assumed that the existing concrete overflow structure shall remain in place and only minor in-place modifications may be necessary to protect or address existing deficiencies.
7. It is assumed that the proposed improvements shall be contained within the existing sidewalk limits and therefore no local drainage calculations or drainage structure design will be necessary.
8. It is assumed that the southern portion of the Sanger Sports Park western parking lot shall be used for access and portions of the southern trail loop may be closed to pedestrian access to allow for the safe flow of construction and pedestrian traffic within the park.
9. The preliminary drawings shall include the following:
  - a) Cover Sheet and Sheet Index
  - b) General Notes and Legend
  - c) Project Layout and Survey Control (100 scale)
  - d) Staging and Haul Plans
  - e) Demolition and Adjustment Plans (20 scale, dual pane if possible)
  - f) Dimension Control Plan (20, dual pane if possible)
  - g) Grading Plans (20 scale, dual pane if possible)
  - h) Grading Sections
  - i) Erosion Control Plan (20 scale. Dual pane if possible)
10. The ENGINEER may submit working drawings depicting elements of concern to the CITY for review and comment to reduce the number of revisions that otherwise could be required.

## B. 60% EOPCC

1. The ENGINEER shall prepare an Engineers Opinion of Probable Construction Cost (EOPCC) with a level of detail commensurate to the status of the design.

## C. 60% Design Submittal

1. The ENGINEER shall provide the CITY with up to three (3) hard copies and one digital copy of the 60% deliverables outlined above.
- II. 90% Design
- A. 90% Design
    1. Incorporate CITY review comments from the 30% milestone submittal.
    2. Advancement of the 30% design plans to a 90% level ready for bid upon addressment of the City's 90% comments.
    3. Incorporate and develop any necessary design details including:
      - a) Consultant Provided Project Specific Details
      - b) City Standard Details
      - c) Agency Standard Details
  - B. 90% EOPCC
    1. The ENGINEER shall submit a 90% EOPCC with the respective updates to bid items, quantities and/or unit prices resulting from changes made between the 30% and 90% milestones.
  - C. 90% Project Manual and Specifications
    1. The ENGINEER shall prepare a 90% Project Manual including Specifications and other construction contract documents provided by the CITY.
  - D. 90% Design Submittal :
    1. The ENGINEER shall provide the CITY with up to three (3) hard copies and one digital copy of the 90% deliverables outlined above.
- III. Signed and Sealed Construction Drawings, OPCC, and Project Manual
- A. The ENGINEER shall revise the drawings, OPCC, and Project Manual based upon comments received from the 90% milestone submittal and deliver a signed and sealed package ready for CITY procurement.
  - B. The ENGINEER shall submit three (3) hard copies and one (1) electronic copy to the CITY for their records.

#### PHASE 5 – BIDDING

- I. Notice to Bidders
  - A. The ENGINEER shall provide a draft copy of the Notice to Bidders (Bid Advertisement) for CITY to use in notifying construction news publications and publishing appropriate legal notice. The ENGINEER shall provide copies of the Notice to Bidders to selected plan rooms. The cost for publication(s) shall be paid for by CITY.
- II. Distribution of Bid Documents
  - A. The CITY will distribute plans, specifications, addendums, and all other bidding documents through the media of their choice.
- III. Plan Holders List
  - A. The plan holders list will be maintained by the CITY and published on the media of their choice.
- IV. Pre-Bid Meeting
  - A. The ENGINEER will conduct a pre-bid conference for the construction project and coordinate responses with CITY. Response to the pre-bid conference questions will be in the form of Addenda issued after the conference.
- V. Bidding Assistance and Addenda

- A. The ENGINEER shall respond to prospective bidder's questions and prepare and issue one (1) addenda to the bid documents if necessary.
- VI. Bid Opening and Recommendation of Award
  - A. The ENGINEER will assist CITY in the opening, tabulation, and analysis of the bids received. The ENGINEER will also review the qualification information provided by the apparent low bidder and present findings to CITY. Based on review of the qualification, references and other bid information the ENGINEER will prepare a low bidder summary letter documenting findings of these review items for the CITY's use in the award of the contract. Pre-qualifications of all prospective bidders and issuing a list of eligible bidders prior to the bid opening are not part of the services provided by ENGINEER.
- VII. Assemble Construction Contract Documents
  - A. The ENGINEER will assist CITY in the preparation of Construction Contract Documents for the construction Contract. After execution of the documents, five (5) 22-inch by 34-inch hard copies and one (1) electronic copy will be assembled and distributed by the ENGINEER.

#### PHASE 6 – CONSTRUCTION

- I. Pre-Construction Meeting
  - A. The ENGINEER will conduct a pre-construction conference for the construction project and coordinate responses with CITY.
- II. Submittals
  - A. The ENGINEER shall review and respond to up to four (4) submittals from the CONTRACTOR.
- III. Request's for Information (RFI)
  - A. The ENGINEER shall review and respond to up to four (5) RFI's from the CONTRACTOR.
- IV. Site Visits
  - A. The ENGINEER shall visit the site up to two (2) times during construction to observe and report on the progress and quality of the executed work. In performing these services the ENGINEER will endeavor to protect the CITY against defects and deficiencies in the work of the CONTRACTOR. However, the ENGINEER cannot guarantee the performance of the CONTRACTOR, nor be responsible for the actual supervision of the construction operations or for the safety measures that the CONTRACTOR takes or should take.
- V. Punch List
  - A. The ENGINEER shall attend a final inspection and assist the CITY in the preparation of a punch list report for the CONTRACTOR to address.
  - B. The ENGINEER shall attend a final punch list verification walk to review whether all items have been satisfactorily addressed.
- VI. Closure
  - A. The ENGINEER shall prepare "record" plans, incorporating all changes and know variations provided by the CONTRACTOR in their red line to provide the CITY with the best possible set of record drawings. The final record drawings shall be furnished in .pdf format on CD. CADD files shall be furnished on CD as well.

## EXCLUSIONS

- I. Other additional services, not included in this contract, will be negotiated with the CITY as needed. Compensation will be based upon a mutually agreed lump sum fee or an hourly rate as described below. Items that are considered additional services include but are not limited to:
  - A. Any services not specifically mentioned herein
  - B. Attendance or preparation for Public Meeting(s)
  - C. Attendance or preparation for City Council Meetings
  - D. Attendance or preparation for Planning and Zoning Meetings
  - E. Landscape architecture and irrigation design
  - F. Resurvey to reflect project scope changes requested by the CITY, required to address changed conditions or change in direction previously approved by the CITY, mandated by changing governmental laws, or necessitated by the County acceptance of substitutions proposed by the CONTRACTOR
  - G. Design for Site Lighting or incidental power connections
  - H. Revisions to plans requested by the CITY after plans are approved
  - I. Permit fees, filing fees, pro-rated fees, impact fees and taxes
  - J. Property acquisition closing services
  - K. Identification, coordination, and/or design of sanitary sewer, water, gas, telephone, or other utility improvements, relocations, or adjustments
  - L. Graphic products except as noted herein
  - M. Design of utilities or other improvements outside of the project boundary
  - N. SWPPP preparation
  - O. Environmental assessments beyond the desktop level jurisdictional assessment provided in the proposed scope.
  - P. Construction staking
  - Q. Material testing or review of material testing information provided by the CONTRACTOR
  - R. Boundary resolution. It is assumed that the property on which the proposed work is being conducted is entirely owned by the CITY and no access or easement exist which may encumber or limit the proposed scope of work.
  - S. Texas Department of Licensing and Regulation Accessibility review, permits, and inspections.
  - T. Aquatic resources relocation plan (ARRP). ENGINEER will prepare a specification for the CONTRACTOR to prepare and execute the ARRP required to drain the pond and conduct any muscle species necessitate by the intermittent crossflow between Duck Creek and the pond.
  - U. Environmental constituents testing. ENGINEER will prepare a specification for the CONTRACTOR to use in the collection and analysis of the existing material to be removed for disposal site determination.

- V. Conditional Letter of Map Revision, Letter of Map Revision, or Floodplain development permits.
- W. Modifications to the pond the original design except as otherwise stated in this scope of services.
- X. Hydraulic modeling, structure design, and/or permitting

SCHEDULE

- I. The scope of services outlined for the above project is based on the schedule provided below. For the purposes of this schedule all days are considered to be working days based upon an assumed 5-day work week.
  - A. Kickoff Meeting 15-working days from Notice to Proceed
  - B. Geotechnical 40-working days from Notice to Proceed
  - C. Design Survey 40-working days from Notice to Proceed
  - D. 30% Design 80-working days from Notice to Proceed
  - E. 90% Design 20-working days from receipt of 30% comments
  - F. Signed and Sealed Design 10-working days from receipt of 90% comments
  - G. Bidding and Construction Services Based upon corridor clearance and City's established letting and construction schedule

TO THE GOVERNING BODY OF THE CITIES IN THE ATMOS TEXAS MUNICIPALITIES COALITION SERVED BY ATMOS ENERGY CORPORATION'S MID-TEX DIVISION

Dear City Official,

Please find enclosed the 2023 Interim Rate Adjustment Application ("IRA") for the incorporated areas of the Atmos Texas Municipalities Coalition ("ATM Cities") served by Atmos Energy Corporation's Mid-Tex Division, (the "Mid-Tex Division" or the "Company").

This filing includes information labeled as follows:

- (a) The ATM Cities Interim Rate Adjustment Application ("IRA Application" Section) and the Annual Earnings Monitoring Report ("EMR Report" Section).
- (b) The Project Report describing the investment projects used by the Company in providing utility service which were both completed and placed in service from January 1, 2023 through December 31, 2023 as well as the investments retired or abandoned from January 1, 2023 through December 31, 2023 ("Project Report" Section). The Project Report also states the cost, need, and customers benefited by the change in investment. A Project Report is also included which states the project by FERC Account and amount.
- (c) The Relocation Project Report providing certain supplemental information about relocation project costs included in the Project Report for the period of January 1, 2023 through December 31, 2023 ("Relocation Project Report" Section).
- (d) The affidavits of Christopher A. Felan and Barbara W. Myers. Mr. Felan's affidavits attest to (i) the method and date on which notice will be given to all customers, and (ii) relocations. Ms. Myers provides an affidavit which verifies that the Mid-Tex Division's books and records are kept in accordance with the rules of the Railroad Commission of Texas and verifies that the schedules enclosed are

summaries of the Mid-Tex Division's books and records related to the invested capital used by the Company in providing utility service ("Affidavits" Section).

The tariffs included in the enclosed package in the section designated "IRA Application" following IRA-3 will be effective on April 23, 2024. These tariffs establish an IRA that will affect the monthly customer charge or meter charge applicable to the ATM Cities. As authorized under Section 104.301 of the Texas Utilities Code, the IRA will recover the difference between the values of invested capital for the Mid-Tex Division's system as of December 31, 2023, and the value of the invested capital for the Mid-Tex Division's system as of December 31, 2022. This investment is used to provide gas services and the IRA will remain in effect until the issuance of a final decision in a rate case that is filed after the implementation of these tariffs. All amounts collected under these tariffs are subject to refund.

The IRA set forth in the tariffs accompanying this filing was calculated by applying the methodologies approved by the Railroad Commission of Texas in GUD No. 10779 and the factors established in the Final Order Finding of Fact Nos. 45 and 46 and Exhibit B. GUD No. 10779 established the latest effective rates for customers within the ATM Cities. Upon approval, the IRA will be added to the customer/meter charges that are effective for customers within the ATM Cities.

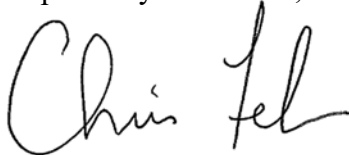

Under Section 104.301, as amended, ATM Cities are provided the opportunity to review the filing and either: (i) take final action before April 23, 2024; or (ii) suspend the effective date of these tariffs for forty-five (45) days after April 23, 2024. The source documentation supporting the new investment is available for review through Atmos Energy's electronic databases. If you wish to schedule an opportunity to review the electronic databases or any hard copy project files related to the new investment, please contact me at 214-206-2568. In addition, the Company has elected to make certain adjustments in this filing. These adjustments are detailed in the Company's IRA schedules. Elective adjustments have been made to remove certain employee expenses identified via a detailed review of every employee expense report for items recorded to capital projects for the Shared Services Division and the Mid-Tex Division. These expenses have been removed to reduce controversy. The Company reserves its right to seek recovery of these expenses in a rate proceeding involving a review of the Company's invested capital through at least December 31, 2023.

Notice of this proceeding will be provided to affected customers in the incorporated areas of the ATM Cities by bill insert or individual mailing within 45 days after the date of this filing in accordance with Section 104.301. The tariffs included in the IRA Application Section of this GRIP filing do not require any action on the part of your city to become effective on April 23, 2024.

In closing, please accept for filing this cover correspondence, the above mentioned tariffs, filing package and enclosures. Please contact me with any questions you may have regarding this filing.

Respectfully Submitted,

## CUSTOMER NOTICE OF INTERIM RATE ADJUSTMENT

Pursuant to Texas Utilities Code Section 104.301, the Mid-Tex Division of Atmos Energy Corporation (the “Company”), filed an application for an Interim Rate Adjustment with the Cities in the Atmos Texas Municipalities Coalition (“ATM Cities”) on February 23, 2024. This proposed Interim Rate Adjustment applies to all customers served by the Company within the ATM Cities incorporated areas of the Mid-Tex Division and provides for the recovery of additional capital investment incurred from January 1, 2023 through December 31, 2023. The request is for capital investment not included in any previous rate case or rates for service and is subject to refund.

The Company proposes to increase the customer/meter charge used to calculate the customer’s monthly bill by the amount listed below. The proposed Interim Rate Adjustment effective date is April 23, 2024. In accordance with Texas Utilities Code Section 104.101, the increase constitutes a major change in the Company’s rates.

**TABLE 1**

<b>Rate Schedule</b>	<b>Current Customer Charge</b>	<b>Proposed 2023 Interim Rate Adjustment</b>	<b>Adjusted Charge</b>	<b>Increase Per Bill</b>
Rate R – Residential Sales	\$ 41.23 per customer per month	\$ 6.73 per customer per month	\$ 47.96 per customer per month	\$ 6.73
Rate C – Commercial Sales	\$ 114.34 per customer per month	\$ 22.32 per customer per month	\$ 136.66 per customer per month	\$ 22.32

Persons with questions or who want more information about this filing may contact the Company at 1-888-286-6700. A copy of the filing will be available for inspection during normal business hours at the Company’s office at 5400 LBJ Freeway, Suite 1800, Dallas, Texas, 75240 or on the Company's website at [www.atmosenergy.com/MTXtariffs](http://www.atmosenergy.com/MTXtariffs) .

Any affected person within an ATM Cities incorporated area may contact his or her city council. Please reference the ATM Cities Interim Rate Adjustment in your written comment or protest.

**AVISO A NUESTROS CLIENTES:  
AJUSTE INTERINO DE TARIFAS**

Conforme a la sección 104.301 del Código de Servicios Públicos de Texas, la División Mid-Tex de Atmos Energy Corporation (la “Compañía”) presentó una solicitud para un ajuste interino de tarifas con las Ciudades en la Coalición Atmos de Municipios Tejas (“ATM Cities”) por sus siglas en inglés) el 23 de febrero del 2024. El ajuste interino de tarifas propuesto aplicará a todos los clientes servidos por la Compañía dentro de las áreas incorporadas de las ATM Cities en la División Mid-Tex de Atmos Energy y provee la recuperación del costo de inversión adicional de capital incurrida desde el 1 de enero, 2023 hasta el 31 de diciembre, 2023. Esta solicitud es por inversión de capital no incluida en cualquier ajuste de tarifas por servicio anterior y está sujeta a reembolso.

La Compañía propone aumentar el cargo de cliente/medidor utilizado para calcular la factura mensual del cliente según indicado en la tabla abajo. La fecha efectiva del Ajuste Interino de Tarifas propuesto es el 23 de abril, 2024. El aumento constituye un cambio mayor en las tarifas de la Compañía, tal como es definido en la sección 104.101 del Código de Servicios Públicos de Texas.

<b>RATE SCHEDULE:</b>	<b>I – INDUSTRIAL SALES</b>	
<b>APPLICABLE TO:</b>	<b>ALL CUSTOMERS IN THE MID-TEX DIVISION IN THE ATMOS TEXAS MUNICIPALITIES COALITION (“ATM”)</b>	
<b>EFFECTIVE DATE:</b>		

**Application**

Applicable to Industrial Customers with a maximum daily usage (MDU) of less than 200 MMBtu per day for all natural gas provided at one Point of Delivery and measured through one meter. Service for Industrial Customers with an MDU equal to or greater than 200 MMBtu per day will be provided at Company’s sole option and will require special contract arrangements between Company and Customer.

**Type of Service**

Where service of the type desired by Customer is not already available at the Point of Delivery, additional charges and special contract arrangements between Company and Customer may be required prior to service being furnished.

**Monthly Rate**

Customer’s monthly bill will be calculated by adding the following Customer and MMBtu charges to the amounts due under the riders listed below:

<b>Charge</b>	<b>Amount</b>
Customer Charge per Meter	\$ 784.00 per month
Interim Rate Adjustment (“IRA”)	\$ 1,708.04 per month <sup>1</sup>
<b>Total Customer Charge</b>	<b>\$ 2,492.04 per month</b>
First 0 MMBtu to 1,500 MMBtu	\$ 0.3312 per MMBtu
Next 3,500 MMBtu	\$ 0.2425 per MMBtu
All MMBtu over 5,000 MMBtu	\$ 0.0520 per MMBtu

Gas Cost Recovery: Plus an amount for gas costs and upstream transportation costs calculated in accordance with Part (a) and Part (b), respectively, of Rider GCR.

Franchise Fee Adjustment: Plus an amount for franchise fees calculated in accordance with Rider FF. Rider FF is only applicable to customers inside the corporate limits of any incorporated municipality.

Tax Adjustment: Plus an amount for tax calculated in accordance with Rider TAX.

Surcharges: Plus an amount for surcharges calculated in accordance with the applicable rider(s).

**Curtailement Overpull Fee**

Upon notification by Company of an event of curtailement or interruption of Customer’s deliveries, Customer will, for each MMBtu delivered in excess of the stated level of curtailement or interruption, pay Company 200% of the midpoint price for the Katy point listed in *Platts Gas Daily* published for the applicable Gas Day in the table entitled “Daily Price Survey.”

<sup>1</sup> 2018 IRA - \$155.80, 2019 IRA - \$261.93, 2020 IRA - \$261.77, 2021 IRA - \$309.07, 2022 IRA - \$306.86, 2023 IRA – \$412.61.

<b>RATE SCHEDULE:</b>	<b>I – INDUSTRIAL SALES</b>	
<b>APPLICABLE TO:</b>	<b>ALL CUSTOMERS IN THE MID-TEX DIVISION IN THE ATMOS TEXAS MUNICIPALITIES COALITION (“ATM”)</b>	
<b>EFFECTIVE DATE:</b>		

**Replacement Index**

In the event the “midpoint” or “common” price for the Katy point listed in *Platts Gas Daily* in the table entitled “Daily Price Survey” is no longer published, Company will calculate the applicable imbalance fees utilizing a daily price index recognized as authoritative by the natural gas industry and most closely approximating the applicable index.

**Agreement**

An Agreement for Gas Service may be required.

**Notice**

Service hereunder and the rates for services provided are subject to the orders of regulatory bodies having jurisdiction and to the Company’s Tariff for Gas Service.

**Special Conditions**

In order to receive service under Rate I, Customer must have the type of meter required by Company. Customer must pay Company all costs associated with the acquisition and installation of the meter.

**Presumption of Plant Protection Level**

For service under this Rate Schedule, plant protection volumes are presumed to be 10% of normal, regular, historical usage as reasonably calculated by the Company in its sole discretion. <b>RATE SCHEDULE:</b>	<b>T – TRANSPORTATION</b>	
<b>APPLICABLE TO:</b>	<b>ALL CUSTOMERS IN THE MID-TEX DIVISION IN THE ATMOS TEXAS MUNICIPALITIES COALITION (“ATM”)</b>	
<b>EFFECTIVE DATE:</b>		

**Application**

Applicable, in the event that Company has entered into a Transportation Agreement, to a customer directly connected to the Atmos Energy Corp., Mid-Tex Division Distribution System (Customer) for the transportation of all natural gas supplied by Customer or Customer’s agent at one Point of Delivery for use in Customer’s facility.

**Type of Service**

Where service of the type desired by Customer is not already available at the Point of Delivery, additional charges and special contract arrangements between Company and Customer may be required prior to service being furnished.

**Monthly Rate**

Customer’s bill will be calculated by adding the following Customer and MMBtu charges to the amounts and quantities due under the riders listed below:

<b>Charge</b>	<b>Amount</b>
Customer Charge per Meter	\$ 784.00 per month
Interim Rate Adjustment (“IRA”)	\$ 1,708.04 per month <sup>1</sup>
<b>Total Customer Charge</b>	<b>\$ 2,492.04 per month</b>
First 0 MMBtu to 1,500 MMBtu	\$ 0.3312 per MMBtu
Next 3,500 MMBtu	\$ 0.2425 per MMBtu
All MMBtu over 5,000 MMBtu	\$ 0.0520 per MMBtu

Upstream Transportation Cost Recovery: Plus an amount for upstream transportation costs in accordance with Part (b) of Rider GCR.

Retention Adjustment: Plus a quantity of gas as calculated in accordance with Rider RA.

Franchise Fee Adjustment: Plus an amount for franchise fees calculated in accordance with Rider FF. Rider FF is only applicable to customers inside the corporate limits of any incorporated municipality.

Tax Adjustment: Plus an amount for tax calculated in accordance with Rider TAX.

Surcharges: Plus an amount for surcharges calculated in accordance with the applicable rider(s).

**Imbalance Fees**

All fees charged to Customer under this Rate Schedule will be charged based on the quantities determined under the applicable Transportation Agreement and quantities will not be aggregated for any Customer with multiple Transportation Agreements for the purposes of such fees.

<sup>1</sup> 2018 IRA - \$155.80, 2019 IRA - \$261.93, 2020 IRA - \$261.77, 2021 IRA – 309.07, 2022 IRA - 306.86, 2023 IRA - \$412.61.

<b>RATE SCHEDULE:</b>	<b>T – TRANSPORTATION</b>	
<b>APPLICABLE TO:</b>	<b>ALL CUSTOMERS IN THE MID-TEX DIVISION IN THE ATMOS TEXAS MUNICIPALITIES COALITION (“ATM”)</b>	
<b>EFFECTIVE DATE:</b>		

**Monthly Imbalance Fees**

Customer shall pay Company the greater of (i) \$0.10 per MMBtu, or (ii) 150% of the difference per MMBtu between the highest and lowest “midpoint” price for the Katy point listed in *Platts Gas Daily* in the table entitled “Daily Price Survey” during such month, for the MMBtu of Customer’s monthly Cumulative Imbalance, as defined in the applicable Transportation Agreement, at the end of each month that exceeds 10% of Customer’s receipt quantities for the month.

**Curtailement Overpull Fee**

Upon notification by Company of an event of curtailement or interruption of Customer’s deliveries, Customer will, for each MMBtu delivered in excess of the stated level of curtailement or interruption, pay Company 200% of the midpoint price for the Katy point listed in *Platts Gas Daily* published for the applicable Gas Day in the table entitled “Daily Price Survey.”

**Replacement Index**

In the event the “midpoint” or “common” price for the Katy point listed in *Platts Gas Daily* in the table entitled “Daily Price Survey” is no longer published, Company will calculate the applicable imbalance fees utilizing a daily price index recognized as authoritative by the natural gas industry and most closely approximating the applicable index.

**Agreement**

A transportation agreement is required.

**Notice**

Service hereunder and the rates for services provided are subject to the orders of regulatory bodies having jurisdiction and to the Company’s Tariff for Gas Service.

**Special Conditions**

In order to receive service under Rate T, customer must have the type of meter required by Company. Customer must pay Company all costs associated with the acquisition and installation of the meter.

**Application**

Applicable, in the event that Company has entered into a Transportation Agreement, to a customer directly connected to the Atmos Energy Corp., Mid-Tex Division Distribution System (Customer) for the transportation of all natural gas supplied by Customer or Customer’s agent at one Point of Delivery for use in Customer’s facility.

**Type of Service**

Where service of the type desired by Customer is not already available at the Point of Delivery, additional charges and special contract arrangements between Company and Customer may be required prior to service being furnished.

**Monthly Rate**

Customer’s bill will be calculated by adding the following Customer and MMBtu charges to the amounts and quantities due under the riders listed below:

<b>Charge</b>	<b>Amount</b>
Customer Charge per Meter	\$ _784.00 per month
Interim Rate Adjustment (“IRA”)	\$ 1,708.04 per month <sup>1</sup>
<b>Total Customer Charge</b>	\$ 2,492.04 per month
First 0 MMBtu to 1,500 MMBtu	\$ 0.3312 per MMBtu
Next 3,500 MMBtu	\$ 0.2425 per MMBtu
All MMBtu over 5,000 MMBtu	\$ 0.0520 per MMBtu

Deleted: 295.43

Deleted: 079.43

Upstream Transportation Cost Recovery: Plus an amount for upstream transportation costs in accordance with Part (b) of Rider GCR.

Retention Adjustment: Plus a quantity of gas as calculated in accordance with Rider RA.

Franchise Fee Adjustment: Plus an amount for franchise fees calculated in accordance with Rider FF. Rider FF is only applicable to customers inside the corporate limits of any incorporated municipality.

Tax Adjustment: Plus an amount for tax calculated in accordance with Rider TAX.

Surcharges: Plus an amount for surcharges calculated in accordance with the applicable rider(s).

**Imbalance Fees**

All fees charged to Customer under this Rate Schedule will be charged based on the quantities determined under the applicable Transportation Agreement and quantities will not be aggregated for any Customer with multiple Transportation Agreements for the purposes of such fees.

<sup>1</sup> 2018 IRA - \$155.80, 2019 IRA - \$261.93, 2020 IRA - \$261.77, 2021 IRA – 309.07, 2022 IRA - 306.86, 2023 IRA - \$412.61.

**Monthly Imbalance Fees**

Customer shall pay Company the greater of (i) \$0.10 per MMBtu, or (ii) 150% of the difference per MMBtu between the highest and lowest “midpoint” price for the Katy point listed in *Platts Gas Daily* in the table entitled “Daily Price Survey” during such month, for the MMBtu of Customer’s monthly Cumulative Imbalance, as defined in the applicable Transportation Agreement, at the end of each month that exceeds 10% of Customer’s receipt quantities for the month.

**Curtailment Overpull Fee**

Upon notification by Company of an event of curtailment or interruption of Customer’s deliveries, Customer will, for each MMBtu delivered in excess of the stated level of curtailment or interruption, pay Company 200% of the midpoint price for the Katy point listed in *Platts Gas Daily* published for the applicable Gas Day in the table entitled “Daily Price Survey.”

**Replacement Index**

In the event the “midpoint” or “common” price for the Katy point listed in *Platts Gas Daily* in the table entitled “Daily Price Survey” is no longer published, Company will calculate the applicable imbalance fees utilizing a daily price index recognized as authoritative by the natural gas industry and most closely approximating the applicable index.

**Agreement**

A transportation agreement is required.

**Notice**

Service hereunder and the rates for services provided are subject to the orders of regulatory bodies having jurisdiction and to the Company’s Tariff for Gas Service.

**Special Conditions**

In order to receive service under Rate T, customer must have the type of meter required by Company. Customer must pay Company all costs associated with the acquisition and installation of the meter.

**AFFIDAVIT OF BARBARA W. MYERS**

Before me, the undersigned authority, on this date personally appeared Barbara W. Myers, known to me to be the person whose name is subscribed below, and being by me first duly sworn, stated upon oath as follows:

1. “My name is Barbara W. Myers. I am Manager, Rates & Regulatory Affairs for Atmos Energy Corporation (the “Company”). I joined the Company on October 1, 2004, when Atmos Energy Corporation acquired the assets of TXU Gas Company. Prior to October 1, 2004, I was Regulatory Accounting Manager and Gas Accounting Manager for TXU Gas Company. I am a certified public accountant in the State of Texas and I have over 35 years of experience in accounting related to natural gas utilities. I am fully competent to make this affidavit, and each statement of fact herein is true of my own personal knowledge.

2. The Company keeps its books and records in accordance with the Rules of the Railroad Commission of Texas, and in accordance with the Federal Energy Regulatory Commission’s (FERC) Uniform System of Accounts (USOA) prescribed for Natural Gas Companies subject to the Provisions of the Natural Gas Act (as amended from time to time) (FERC USOA) for all operating and reporting purposes, unless authorized to depart from such system of accounts by the applicable regulatory authorities.

3. I have reviewed the schedules filed by the Company in this proceeding. These schedules are accurate summaries of the books and records for the period between January 1, 2023 and December 31, 2023.”
