Interim Executive Director

**Office of Internal Audit**

Item 1.

February 7, 2022

Dr. Grant Sunada, PHD. MPH  
Executive Director/Health Officer  
San Juan Public Health Department  
735 South 200 West Suite 2  
Blanding, UT 84511-0089

Dear Dr. Sunada,

Subject: SJPHD Sub-recipient Review

The UDOH Office of Internal Audit conducted a review of funds passed through from the Utah Department of Health (UDOH) to San Juan Public Health Department (SJPHD). Our review is a function of our monitoring procedures of SJPHD for expenditures reimbursed during the period January 1 through December 31, 2020. We evaluated the following:

1. Compliance with fiscal terms and conditions of UDOH contracts.
2. Adequacy of internal controls over contract expenditures.
3. Accurate reporting of financial information on Monthly Expenditure Reports.
4. Implementation of approved cost allocation plan.

We conclude that SJPHD is generally compliant with the fiscal terms and conditions of UDOH contracts, has adequate controls in place, and complies with their approved cost allocation plan. Since the review disclosed no reportable findings, no reply from SJPHD is required. We appreciate the assistance provided to us by you and your staff.

Sincerely,  
Keith Swenson  
Auditor IV  
kswenson@utah.gov  
801-538-6646

**Dear Friends of San Juan County,**

After visiting the new Navajo Hogan at Utah State University - Blanding, learning of the symbolism of that structure, and pondering the peoples represented at the Nations of the Four Corners nearby, I thought of the birds that protect our nest here in San Juan County.

Eagles, such as those in this lovely photograph by Tiffany Smith featured in the [SAN JUAN RECORD](#), build strong nests with sturdy sticks that withstand blustery weather that stirs our rugged lands.

THREE EARLY BIRDS making a secure nest with NINE STURDY STICKS came to mind as I anticipated the blustery arrival of the Omicron variant. These Early Birds can help us with two goals in our county:

- A. Keep businesses, clinics, services, churches, and schools thriving and functioning
- B. Prevent hospitalizations and deaths related to COVID-19

We have reached record numbers of documented active cases of COVID-19 in San Juan County (650 on January 25, up from 84 on January 4, 2022), with both repeat and breakthrough infections. This limits our ability to maintain the first goal and we are seeing effects now (such as with some county services).

Local COVID-19 hospitalizations have remained low (average of 2-3 beds occupied per day) so far. With the virus spreading broadly and quickly, we run the risk of shadowing the record levels of daily (new) and total COVID-19 hospitalizations across the rest of the state.

In the face of the current bluster of COVID-19, I recommend keeping our nest thriving and protecting the most vulnerable (see below) like the following **THREE EARLY BIRDS** with **NINE STURDY STICKS**:

## Three Early Birds in San Juan County

Protecting our “nest”

Made up of nine tightly woven “sticks”

### 1. EARLY LAYERS OF PREVENTION, since no one layer is perfect

- **Stay up to date with vaccination**, since it is safe and effective at preventing hospitalization and death
- **Wear a mask**, since we spread the virus in air droplets even without symptoms (Note: Good = Cloth, Better = Surgical, Best = KN95/N95)
- **Spread out**, since the air droplets can only fly so far (~6 feet) when indoors
- **Spread fresh air**, since the virus does not last long in the beautiful air of San Juan County
- **Manage stress and physical health**, to keep our minds and bodies as clear, compassionate, and healthy as possible

### 2. EARLY & TIMELY TESTING

- **Test on day 1-2** if you begin having COVID-19 symptoms (fever, sore throat, runny nose, nausea/vomiting/diarrhea, shortness of breath, or loss of taste or smell) or 5 days after contact with a positive case
- **Stay home** when you feel sick or test positive for COVID-19 for up to 10 days unless your symptoms improve at day 5, then wear a mask for the next 5 days to protect the vulnerable
- **Quarantine** after close contact with someone who is positive for at least 5 days unless you are up-to-date with vaccination or have a negative test by day 5 or later
  - Navajo Nation Guidelines ([link](#))
  - CDC Guidelines ([link](#))

### 3. EARLY & EFFECTIVE TREATMENT (in limited supply)

- **Contact your doctor or health care provider** within the 5 days of symptoms when high risk
  - Visit this [risk score calculator](#) to find out if you might be eligible for treatment with antiviral medications
  - Discuss your risk with your healthcare providers at Blue Mountain Hospital, San Juan Hospital, and/or Utah Navajo Health System in order to receive a prescription for the treatment

The strength of the eagles and the Nations of the Four Corners inspire me as we work together respectfully to keep our county thriving and healthy for all who live and visit here. Thank you so much!

Together in wellness,

Grant

8. Pre-Existing Conditions of Hospitalized Cases in Utah: Image below

9. Wear a mask, since we spread the virus in air droplets even without symptoms:

“To protect yourself and others from COVID-19, CDC continues to recommend that you wear the most protective mask you can that fits well and that you will wear consistently.

Loosely woven cloth products provide the least protection, layered finely woven products offer more protection, well-fitting disposable surgical masks and KN95s offer even more protection, and well-fitting NIOSH-approved respirators (including N95s) offer the highest level of protection.

Whatever product you choose, it should provide a good fit (i.e., fitting closely on the face without any gaps along the edges or around the nose) and be comfortable enough when worn properly (covering your nose and mouth) so that you can keep it on when you need to.”

# Why Cloth Masks Might Not Be Enough as Omicron Spreads

Time it takes to transmit an infectious dose of Covid-19

		PERSON NOT INFECTED IS WEARING			
		Nothing	Cloth mask	Surgical mask	N95
PERSON INFECTED IS WEARING	Nothing	15 min.	20 min.	30 min.	2.5 hours
	Cloth mask	20 min.	27 min.	40 min.	3.3 hours
	Surgical mask	30 min.	40 min.	1 hour	5 hours
	N95	2.5 hours	3.3 hours	5 hours	25 hours

It will take 25 hours for an infectious dose of Covid-19 to transmit between people wearing non-fit-tested N95 respirators. If they're using tightly sealed N95s—where only 1% of particles enter the facepiece—they will have 2,500 hours of protection.

Note: Results published in Spring 2021. The CDC expects the Omicron variant to spread more easily.

## COMMUNITY HEALTH TOURS 2022

### **OBJECTIVES**

- Allow the San Juan County Board of Health, Director, and Staff, and other community leaders and representatives to show each other the following:
  - “What Health & Wellness Is in San Juan County”
  - “What San Juan Public Health Should Become”
- San Juan Public Health Director will dedicate 2-8 hours per month to these tours for the to help make recommendations to the Board on the Vision, Mission, Goals, Objectives, and Activities for San Juan Public Health
- Tours will be discussed, planned, and results will be reported on, during San Juan County Board of Health public meetings

### **CALENDAR**

***What event, when, and who will attend - To be determined by the Board of Health***

- 2021
  - November: San Juan County Prevention and Action Coalition Meeting
- 2022
  - January
  - February
  - March
  - April
  - May
  - June
  - July

- August
- September
- October
- November
- December

**IDEAL LIST**

Feb 2011-12 Smile Kentucky, Volunteer

June 2012 Rural Area Medicine (RAM)  
Pikeville, Kentucky

My 'brief' statement of interest:

I have lived in San Juan County for almost five years and have totally fallen in love with the county, as well as the people. I am currently serving as dental hygienist in Monument Valley, which is a phenomenal opportunity in its own way. Reviewing the 2020 annual report, many of the themes this board reaches are aligned with my priorities. One example is an opportunity I have taken on that excites me is as Oral Health Outreach Coordinator, in which oral health programs and education will be more available.

Although I do not live in Monument Valley or Navajo Mountain, as one of the dental professionals in Monument Valley, I am working with the community on a daily basis. I get to spend about an hour with each patient and discuss more than just the weather; with this unique position, I feel that I could bring new ideas and valuable community feedback.

The shoes that Dr Smith has left are large, if chosen for this position, I will give it my all to serve my community. I understand that I may not be the best person for this position and I urge you to choose the individual intertwined in this community the best. It would be an honor to serve on the San Juan County Board of Health. Thank you for your consideration.

Respectfully,

Malia Collins, RDH  
Dental Hygienist  
Utah Navajo Health Systems, Inc
