

PARKS & PUBLIC WORKS COUNCIL COMMITTEE & COMMITTEE OF THE WHOLE HYBRID MEETING Wednesday, September 06, 2023, at 5:00 PM Snoqualmie City Hall, 38624 SE River Street & Zoom

COMMITTEE MEMBERS

Ethan Benson, Chair Bryan Holloway, Councilmember Jolyon Johnson, Councilmember

This meeting will be conducted in person and remotely using teleconferencing technology provided by Zoom.

Join by Telephone: To listen to the meeting via telephone, please call 253.215.8782 and enter Webinar ID 867 8554 3964 and Password 1700050121 if prompted.

Press *9 to raise your hand to speak. Raising your hand signals the meeting moderator that you have a comment. Press *6 to mute and unmute.

Join by Internet: To watch the meeting over the internet via your computer, follow these steps:

- 1) Click this link.
- 2) If the Zoom app is not installed on your computer, you will be prompted to download it.
- 3) If prompted for Webinar ID, enter 867 8554 3964; Enter Password 1700050121
- 4) Please confirm that your audio works prior to participating.

ADJOURNMENT

PARKS & PUBLIC WORKS COUNCIL COMMITTEE & COMMITTEE OF THE WHOLE HYBRID MEETING MINUTES AUGUST 22, 2023

This meeting was conducted in person and remotely using teleconferencing technology provided by Zoom

CALL TO ORDER

Chair Ethan Benson called the meeting to order at 5:00 pm.

Committee Members: Councilmembers Ethan Benson, Bryan Holloway, and Jo Johnson (remote) were present.

Mayor Katherine Ross appeared at 5:02 pm.

City Staff:

Mike Chambless, Interim City Administrator; Deana Dean, City Clerk; Danna McCall, Communications Coordinator; Carson Hornsby, Management Analyst; Patrick Fry, Project Engineer; Jimmie Betts, IT Support; Dylan Gamble, CIP Project Manager; and Janna Walker, Budget Analyst (remote).

Interim City Attorney David Linehan appeared at 5:32 pm.

PRESENTATION - None.

PUBLIC COMMENTS - There was no public comment.

AGENDA APPROVAL – The agenda was approved as presented.

MINUTES

1. The minutes from the August 8, 2023, meeting were approved as presented.

AGENDA BILLS

- 2. AB23-094: Fourth Amendment to the Comprehensive Garbage, Recyclables, and Compostables Collection Agreement with Waste Management. Han Kirkland and Carey McNally from Waste Management and Brian Halverson from King County -Solid Waste Department appeared remotely. This item was introduced by Carson Hornsby, Management Analyst. Presentation provided by Brian Halverson from King County Solid Waste. Committee questions followed, answered by Carey McNally of Waste Management. This matter is approved to move forward at the August 28, 2023, City Council Meeting consent agenda.
- 3. **AB23-108**: Awarding contract for Phase 1 of the Sandy Cove Park Riverbank Restoration Project. Dylan Gamble, CIP Project Manager, spoke to this item. Discussion followed. This matter is approved to move forward at the August 28, 2023, City Council Meeting consent agenda.

4. **AB23-109**: Introduction of the ADA Transition Plan. Patrick Fry, Project Engineer, spoke to this item. Brief discussion followed. This matter is to be heard at the September 6, 2023, Parks & Public Works Committee meeting.

DISCUSSION

- 5. Community Survey Update: Danna McCall, Communications Coordinator, spoke to this item.
- 6. Director Reports: Interim City Administrator Mike Chambless provided an update on the Parkway Project noting grinding is to occur this week and paving next week, weather dependent. Communications will send out a detailed release to the public.

ADJOURNMENT - The meeting was adjourned at 6:01 pm.

Minutes taken by Deana Dean, City Clerk.

Recorded meeting audio is available on the City website after the meeting. Minutes approved at the _____ Parks & Public Works Committee Meeting.

SUMMARY

SUMMARY STATEMENT

This Agenda Bill seeks to introduce the Snoqualmie American with Disabilities Act (ADA) Transition Plan and open for comment. An ADA Transition Plan is a City Adopted document that identifies accessibility barriers, describe methods to remove those barriers, outline a schedule for barrier removal, and identify a public official responsible to implement the plan.

The Snoqualmie specific ADA transition plan focuses on the public right-of-way facilities, specifically on curb ramps and Accessible Pedestrian Signals. Future updates to the plan will include sidewalks, driveway interfaces and parking.

The current DRAFT of the ADA transition plan is open for feedback & public comment until September 25th, 2023.

BACKGROUND

The Americans with Disabilities Act (ADA) of 1990 is a civil rights statute (hereinafter referred to as the Act) that prohibits discrimination against people who have disabilities. There are five separate Titles (sections) of the Act relating to different aspects of potential discrimination. Title II of the Act specifically addresses the subject of making public services and public transportation accessible to those with disabilities. With the advent of the Act, designing and constructing facilities for public use that are not accessible by people with disabilities constitutes discrimination.

The Act applies to all facilities, including both facilities built before and after 1990. As a necessary step to a program access plan to provide accessibility under the ADA, state and local government, public entities or agencies are required to perform self-evaluations of their current facilities, relative the accessibility requirements of the ADA. The agencies are then required to develop a Program Access Plan, which can be called a Transition Plan, to address any deficiencies. The Plan is intended to achieve the following:

- (1) identify physical obstacles that limit the accessibility of facilities to individuals with disabilities,
- (2) describe the methods to be used to make the facilities accessible,
- (3) provide a schedule for making the access modifications, and
- (4) identify the public officials responsible for implementation of the Transition Plan.

The Plan is required to be updated periodically until all accessibility barriers are removed.

NEXT STEPS (FUTURE TASKS)

The Draft Plan is open for public comment until September 25^{th,} 2023. Concluding public comment, City Council will adopt the finalized ADA Transition Plan.

RECOMMENDED ACTION

N/A

City of Snoqualmie

Americans With Disabilities Act (ADA) Transition Plan for the Public Right-of-Way

Snoqualmie, WA

DRAFT August 2023

Prepared by

The Americans with Disabilities Act Notice

In accordance with the requirements of Title II of the Americans with Disabilities Act of 1990 ("ADA"), the City of Snoqualmie will not discriminate against qualified individuals with disabilities on the basis of disability in its services, programs, or activities.

ADA/504 Coordinator

The ADA/504 Coordinator is responsible for responding to grievances, complaints and other alleged ADA discrimination concerns, as well providing materials in alternative formats. Jeff Hamlin, Deputy Director of Parks and Public Works, is the City of Gig Snoqualmie's ADA/504 Coordinator and can be contacted at:

Phone: (425) 831-4919 ext. 3006 Washington Relay System: 7-1-1 E-mail: <u>JHamlin@snoqualmiewa.gov</u> Mail: 38194 SE Mill Pond Road, P.O. Box 987, Snoqualmie, WA 98065

Acknowledgements

The City of Snoqualmie wishes to thank the organizations and individuals who contributed to this project. This was truly a collaborative venture that could not have happened without the input, creativity, and participation of many people. Thank you all.

Snoqualmie City Council

A. Introduction & Legal Requirements

The City of Snoqualmie is committed to removing barriers to accessibility in its public right-ofway facilities. To achieve this end, the City has completed a Public Right-of-Way Americans with Disabilities Act (ADA) Transition Plan.

This introduction summarizes the legal precedent for and the required components of an ADA Self-Evaluation and Transition Plan. It also provides an overview of the scope and organization of the City's Public Right-of-Way ADA Transition Plan with respect to these requirements.

A.1 Legal Precedent

The following federal laws and local Washington State guidelines informed the content and scope of this ADA Self-Evaluation and Transition Plan. See also Washington State Department of Transportation (WSDOT) Local Agency Guidelines Chapter 29 (June 2022).

A.1.1 Section 504 of the Rehabilitation Act (1973)

Section 504 of the Rehabilitation Act of 1973 states that no person with a disability shall be excluded from participation in, denied the benefits of, or be subjected to discrimination under any program or activity that receives Federal funding. This includes both transportation and non-transportation funding.

Section 504 extends to the entire operations of a recipient or subrecipient, regardless of the specific funding source of a particular operation. Section 504 Regulations (49 CFR Part 27.5) define a recipient as any public entity that receives Federal financial assistance from the United States Department of Transportation (USDOT) or its operating administrations either directly or through another recipient. An example of a recipient is WSDOT. An example of a subrecipient is a local agency receiving USDOT funds through WSDOT, for projects/programs/activities administered by the local agency.

A.1.2 American with Disabilities Act (ADA)

The Americans with Disabilities Act of 1990 is a civil rights statute that prohibits discrimination against people who have disabilities. There are five separate Titles, or sections, of the Act that cover different aspects of potential discrimination. These include:

- Title I Employment
- Title II Public Services and Transportation
- Title III Public Accommodations
- Title IV Telecommunications, and
- Title V Miscellaneous

The ADA is mirrored after Section 504 but extends the reach of Federal accessibility laws to include those agencies that are not recipients or subrecipients of Federal funding. Title II (28 CFR Part 35) of the ADA specifically pertains to state and local governments.

The ADA applies to all facilities, including both facilities built before and after 1990. State and local government and public entities or agencies are required to perform self-evaluations of their current facilities relative to the accessibility requirements of the current ADA accessibility standards. The requirements of the ADA apply to all public entities or agencies, no matter the size. The transition plan formal procedures as outlined in 28 C.F.R. section 35.150 only governs those public entities with more than 50 employees.

A.2 Scope of ADA Transition Plan

The Federal requirements for preparing and implementing an ADA Transition Plan are outlined in specific code sections. Certain code sections also identify accessibility requirements for existing facilities, new construction, and alterations of existing facilities. In addition, WSDOT provides local agency guidelines on ADA Transition Plan content. These codes and guidelines utilized in preparing the City's ADA Self-Evaluation and Transition Plan as well as the steps undertaken to engage the public in the process are included for reference in **Appendix A**.

The City is undertaking this Plan in phases. The initial scope of the City's ADA Transition Plan includes curb ramps and accessible pedestrian signals within the City's public right-ofway and select administrative policies and procedures. Other City facilities and infrastructure in public right-of-way, City buildings and park facilities, and City programs, services and activities will be evaluated and added in future Phases of the City's ADA Transition Plan.

A.2.1 Federal ADA Transition Plan Requirements

Under Title II of the ADA, Section 28 CFR Part 35.150 (d) - Transition Plan outlines four requirements of an ADA Transition Plan. For full code text, see **Appendix A**.

- Identify physical obstacles in the public entity's facilities that limit the accessibility of its programs or activities to individuals with disabilities;
- Describe in detail the methods that will be used to make the facilities accessible;
- Specify the schedule for taking the steps necessary to achieve compliance with this section and, if the time period of the transition plan is longer than one (1) year, identify steps that will be taken during each year of the transition period; and
- Indicate the official responsible for implementation of the plan.

A.2.2 Federal Accessibility Requirements for Existing Facilities

Section 28 § 35.150 of Title II of the ADA identifies the accessibility requirements for existing facilities. For full code text, see **Appendix A**.

Of note is section 28 CFR § 35.150 Existing facilities (b) (2) (i) *Safe harbor*. Elements that have not been altered in existing facilities on or after March 15, 2012 and that comply with the corresponding technical and scoping specifications for those elements in either the 1991 Standards or in the Uniform Federal Accessibility Standards (UFAS), Appendix A to 41 CFR part 101-19.6 (July 1, 2002 ed.), 49 FR 31528, app. A (Aug. 7, 1984) are not required to be modified in order to comply with the requirements set forth in the 2010 Standards.

A.2.3 Federal Accessibility Requirements for New Construction or Alterations Section 28 § 35.151 of Title II of the ADA identifies the accessibility requirements for new construction or alterations to existing facilities. For full code text, see **Appendix A**.

Of note is section 28 CFR § 35.151 New Construction and alterations, (b) (4) (ii) (C) *Safe Harbor*. If a public entity has constructed or altered required elements of a path of travel in accordance with the specifications in either the 1991 Standards or the Uniform Federal Accessibility Standards before March 15, 2012, the public entity is not required to retrofit such elements to reflect incremental changes in the 2010 Standards solely because of an alteration to a primary function area served by that path of travel.

A.2.4 Washington State Department of Transportation (WSDOT) Local Agency Guidelines WSDOT's Local Agency Guidelines (LAG) Chapter 29 includes additional ADA Transition Plan items per Section 504 listed below. For full local agency guidelines text, see **Appendix A**.

- Designate an ADA/504 Coordinator
- Maintain Public Notice of ADA Provisions
- Adopt and publish Grievance Procedure
- Adopt an Accessible Pedestrian System (APS) Policy

A.3 Organization of Document

The National Cooperative Highway Research Program (NCHRP) No. 20-7 (232) ADA Transition Plans: *A Guide to Best Practices* (May 2009) report demonstrates how the federal ADA Transition Plan requirements give agencies flexibility on how to format their Transition Plans. The City of Snoqualmie is preparing its Public Right-of-Way Transition Plan in phases across multiple budget years. This first phase of the Transition Plan addresses these components related to accessibility barriers in the City's public right-of-way:

- Administrative Policies and Procedures
- Self-Evaluation and Compliance Activities to Date
- Barrier Prioritization & Removal Recommendations
- Barrier Removal Schedule and Costs
- Barrier Removal Financial Plan and Schedule

The remaining sections address:

- Public Engagement
- Future Actions to Maintain and Achieve Compliance
- Accessibility Guidelines, Standards, and Resources
- Appendices

B. Administrative Policies and Procedures

In 2023, Transportation Solutions, Inc., conducted a self-evaluation inventory of the City's existing ADA-related administrative policies and procedures identified in the WSDOT LAG Manual Chapter 29 Checklist (see **Appendix A**).

B.1 Official Responsible to Implement the ADA Transition Plan

The City has designed Jeff Hamlin, ADA/504 Coordinator/Deputy Director of Parks and Public Works as the official responsible to implement this Plan as part of this ADA Transition Plan; contact information is provided below and available on the City's ADA webpage <u>here</u>:

Jeff Hamlin, ADA Coordinator, Deputy Director of Parks and Public Works P.O. Box 987, Snoqualmie, WA 98065 425-831-4919 x3006 Washington Telecommunication Relay Services: 7-1-1 Email: <u>ADACoordinator@snoqualmiewa.gov</u>

B.2 ADA/504 Coordinator

The City has designated Jeff Hamlin, ADA/504 Coordinator/Deputy Director of Parks Public Works, as part of this ADA Transition Plan; contact information is provided below and available on the City's ADA webpage <u>here</u>.

Jeff Hamlin, ADA Coordinator, Deputy Director of Parks and Public Works P.O. Box 987, Snoqualmie, WA 98065 425-831-4919 x3006 Washington Telecommunication Relay Services: 7-1-1 Email: <u>ADACoordinator@snoqualmiewa.gov</u>

For questions regarding this ADA Transition Plan, the City has designated Patrick Fry as the City's Public Right-of-Way ADA Transition Plan Manager; contact information is provide below and available on the City's ADA Transition Plan webpage <u>here</u>:

Patrick Fry, Public Right-of-Way ADA Transition Plan Manager, Project Engineer P.O. Box 987, Snoqualmie, WA 98065 425-861-4613 Washington Telecommunication Relay Services: 7-1-1 Email: <u>PFry@snoqualmiewa.gov</u>

B.3 Public Notice of ADA Provisions

The notice requirement applies to all state and local governments covered by Title II. The target audience for public notice includes anyone who may potentially interact with the agency and must be accessible to all. An effective notice states the basis of what the ADA requires of the public agency in clear, concise language and should include the name and contact information of the ADA Coordinator. It addresses the public agency's commitment to non-discrimination on the basis of disability and addresses the agency's associated policies regarding employment, effective communication, modifications to policies and procedures, provision of auxiliary aids, scope of the ADA, complaints, and provision of aid/services at no additional cost. The U.S. Department of Justice's ADA Best Practices Tool Kit for Local and State Governments provides a template ADA Notice for use by public agencies.

The City has publicly posted its Public Notice of ADA Provisions as part of this ADA Transition Plan; the public notice is posted on the City's webpage <u>here</u> and is provided in **Appendix C**.

B.4 ADA Grievance Procedure

The City has publicly posted its ADA Grievance Procedure and established an ADA Complaint Record as part of this ADA Transition Plan; the Grievance Procedure is posted on the City's webpage <u>here</u> and is provided in **Appendix D**.

B.5 Accessible Pedestrian Signal (APS) Policy

The City established an APS Policy as part of this ADA Transition Plan; the APS Policy is provided in **Appendix E**.

C. Public Right-of-Way

This chapter describes the City's efforts to address public right-of-way ADA barriers according to the following steps:

- Self-Evaluation and Compliance Activities to Date
- Barrier Prioritization and Removal Recommendations
- Barrier Removal Schedule and Costs
- Barrier Removal Financial Plan and Schedule

This ADA Transition Plan focuses on curb ramps and accessible pedestrian system features. Other public right-of-way facilities, such as sidewalks, driveway interface with sidewalks and accessible parking will be covered in future updates to this ADA Transition Plan.

C.1 Public Right of Way Self-Evaluation and Compliance Activities to Date

In 2023, field evaluations were performed to collect current condition and ADA-compliance information for all curb ramps and accessible pedestrian signal features within City limits. Curb ramps were at signalized intersections, unsignalized intersections, mid-block crossings, and at marked and unmarked crosswalks. Accessible pedestrian pushbuttons and other accessible pedestrian system features were evaluated at all signalized intersections, pedestrian actuated high-intensity activated crosswalk (HAWK) crossings, and at pedestrian actuated rapid rectangular flashing beacon (RRFB) crossings. For inventory documentation, see **Appendix B1**.

The City also has a long-standing practice of upgrading its public right-of-way facilities to current ADA-compliant standards as part of its capital projects, including over 90 curb ramps built to PROWAG standards in the residential neighborhoods east and west of SR 202 in Downtown Snoqualmie:

- Intersections with newly ADA-compliant ramps:
 - Cedar Street/SE Fir Street/Pine Avenue SE 10 ramps
 - SE King Street/Maple Avenue SE/Olmstead Avenue 7 ramps
 - SE King Street/Silva Avenue SE 8 ramps
 - SE River Street/Maple Avenue SE/Doone Avenue SE 3 ramps
 - SE Alpha Street/Euclid Place SE 8 ramps
- Corridors with newly ADA-compliant ramps:
 - SE Newton Street 19 ramps
 - Schusman Avenue SE 18 ramps
 - Meadowbrook Way SE– 18 ramps

C.1.1 Curb Ramp Inventory

In 2023, field evaluations were performed to collect data on the City's existing curb ramp assets. Individual ramps were geo-located with geographic information system (GIS) mapping

software. Collected field attributes included ramp width, presence of a detectable warning surface, ramp type, running slope, cross slope, landing, additional notes, and a photo.

Each ramp was assigned an ADA compliance status of "Yes" (ADA-compliant) or "No" (not ADA-compliant). If one field attribute was not compliant, the curb ramp was assigned a "No" ADA compliance status and is considered an ADA barrier.

Each ramp was also assigned a condition (Fair/Better, Poor, Very Poor, or Missing) and an associated grade (A, B, C or D). The condition and grade provide a more nuanced understanding of the City's existing curb ramp inventory. A curb ramp can be functional (i.e. usable) even if it is not ADA-compliant. The condition and grade are explained further in **Section C.2**.

See collected and assigned attribute data in Table C-1 and Appendix B1.

No	Field	Attribute
1	Curb Ramp ID	Number
		Fair or Better
	Condition	Poor
2	Condition	Very Poor
		Missing (needed but does not exist)
	Ramp Width	60" or greater
	(unobstructed and	48" to > 60"
3	excluding flares,	36" to > 48"
	in inches)	Less than 36"
	DWS (Detectable	Compliant (Truncated Domes with Contrasting Color)
4	DWS (Detectable Warning Surface)	Old Standard (Diamond/Exposed Aggregate)
4	Warning Surrace)	No DWS (Non-Compliant)
		Perpendicular (Triangular wings)
		Parallel
		Combination
5	Ramp Type	Single-Direction Parallel
5		Diagonally-Oriented Parallel
		Blended Transition
		Unknown
	Running slope	Up to or equal to 8.3%
6	Running slope	More than 8.3%
	Cross slope	Up to or equal to 2%
7		More than 2%
	Landing	4 x 4 feet or greater
8	Lanung	Less than 4 x 4 feet
9	Notes	As needed

Table C-1. Curb Ramp Inventory Data Fields and Attributes Collected in 2023

10	Attachments	Photo attached as .jpg
		А
11	11 Grade	В
11		С
		D
12 ADA Compliant	ADA Compliant	Yes
12	ADA Compliant	No

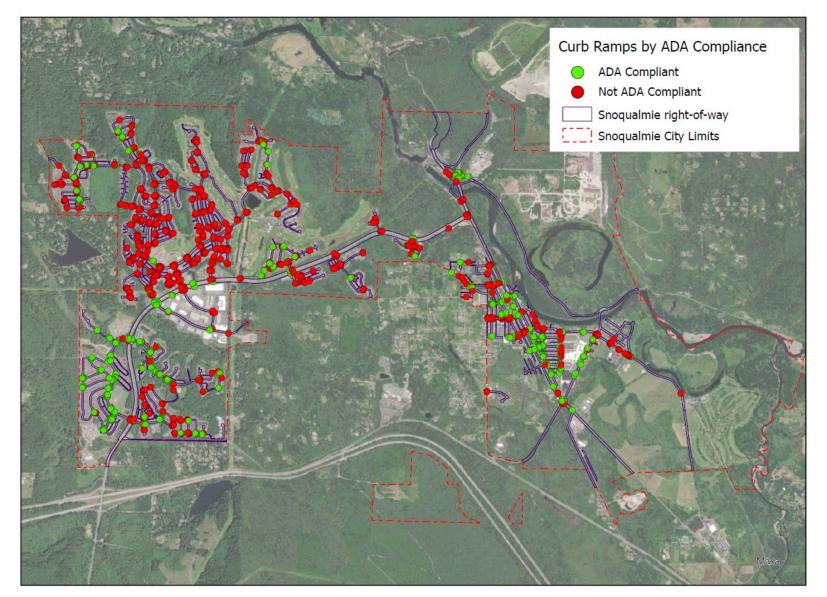

Of the City's total 1,343 ramps, 854 ramps (63.6%) are not ADA-compliant with current 2010 ADA standards. See **Table C-2** and **Figure C-1**.

ADA Compliance	Count	Percentage
Compliant	489	36.4%
Non-Compliant	854	63.6%
Total	1.343	100.0%

Table C-2. Curb Ramp ADA Compliance

Note: There is an additional category of 26 "Other" ramps within the GIS database that are not included in the ADA compliance narrative/tables shown at this time because they are:

- Fourteen (14) locations where a pedestrian access route (PAR) ends but does not have an end barricade (i.e. not an ADA curb ramp barrier but is not ADA compliant for a PAR)
- Eight (8) locations where golf cart crossings include marked pedestrian crossings. The ADA regulations/guidance is not clear whether a detectable warning surface is required in these situations where the intended users are golf carts but pedestrians may also utilize the crossing locations.
- Four (4) locations where pedestrians use the corridor and it is not clear from the ADA standards whether DWS is required but the City could consider DWS.

ADA-Compliant Curb Ramps

36.4% of the curb ramps (489 ramps) in the City of Snoqualmie are ADA-compliant. This is typical for jurisdictions with residential areas built after 2010 (i.e. residential areas on Snoqualmie Ridge). The City of Snoqualmie has recently replaced over 90 curb ramps in downtown Snoqualmie in residential areas east and west of SR 202 to meet 2011 PROWAG standards per the WSDOT Design Manual. (The 2011 PROWAG recommends wider sidewalks and curb ramps as are required by the 2010 ADA Standards).

ADA Curb Ramp Barriers

63.6% of the curb ramps (854 ramps) in the City of Snoqualmie are not compliant with 2010 ADA Standards. Curb ramp barriers can vary in severity and functionality. For example, a curb ramp with a running slope of 10% (more than 8.3% as required by the 2010 ADA Standards) is less severe of a barrier than a location where a curb ramp is missing. The 10% running slope curb ramp is still functional, even though it is technically non-compliant.

210 non-compliant ramps have an "A" grade (Fair/Better) – these make up 15.6% of all inventoried ramps and 25% of non-compliant ramps. These 210 ramps appear to have been built to 2010 ADA Standards but include non-compliant features. These ramps are not Safe Harbor candidates and must be upgraded to current ADA standards when next altered unless they meet maximum extent feasible (MEF) requirements. Given their highly functional condition, they are not considered high-priority for removal, but are nevertheless barriers to be addressed by this ADA Transition Plan.

Safe Harbor for Existing Curb Ramps

Existing non-compliant curb ramps that have not been altered on or after March 15, 2012, and that comply with the corresponding technical and scoping specifications for those elements in either the 1991 Standards or in the Uniform Federal Accessibility Standards (UFAS), Appendix A to 41 CFR part 101-19.6 (July 1, 2002 ed.), 49 FR 31528, app. A (Aug. 7, 1984) are not required to be modified in order to comply with the requirements set forth in the 2010 Standards (see **Section A.2.2** above).

Note: A Safe Harbor attribute was not assigned to each ramp within the curb ramp inventory. However, 472 curb ramps with a "B" grade (Poor) – these make up 35.1% of all inventoried ramps and 55% of non-compliant ramps – are Safe Harbor candidates due to ramp widths between 36 and 48 inches, running slopes slightly more than 8.3%, and/or detectable warning surfaces made with exposed aggregate or a diamond pattern (rather than truncated domes).

If an existing non-compliant curb ramp that meets Safe Harbor is altered, the curb ramp should be upgraded to meet the proposed 2011 PROWAG design guidelines as required by the latest edition of the WSDOT Design Manual.

24

Curb Ramp Barrier Summary

The following corridors stand out for high proportions of very poor or missing ramps.

- Downtown Snoqualmie
 - o SE Fir Street
 - SE Maple Street
 - o SE Northern Street
 - o Schusman Ave SE
 - Meadowbrook Way SE

The following location types stand out for high proportions of very poor or missing ramps or ramp features:

- Missing receiving ramps at midblock and unsignalized intersections.
- Railroad crossings and shared use path crossings without detectable warning surfaces.

These findings are consistent in communities with areas of older infrastructure built before the adoption of right-of-way ADA design standards. Areas in downtown Snoqualmie and older areas of Snoqualmie Ridge with non-compliant ramps due to steep slopes and/or design to ADA standards that pre-date the 2010 ADA Standards may qualify for Safe Harbor.

Some ramps may meet the maximum extent feasible (MEF) requirements. The inventory work completed in 2023 did not include preparation of maximum extent feasible documentation for ramps. Individual ramps may be notated as MEF candidates in the comment field of the GIS inventory provided to City staff.

C.1.2 Accessible Pedestrian Signals

Accessible pedestrian signals (APS) include audio, visual, and vibrotactile features for ADA accessibility, as well as installation location and operational requirements. APS are not addressed in the USDOJ 2010 ADA Standards, but they are addressed in the 2011 PROWAG and MUTCD. Pedestrian actuated signals including high-intensity activated crosswalk (HAWK) beacons and rectangular rapid flashing beacons (RRFBs) are also required to have accessibility features, but these requirements may differ from signalized intersection APS requirements.

In 2023, all signalized intersections, HAWK, and RRFB crossing locations within City of Snoqualmie limits were evaluated for the presence of APS features and ADA-compliance. For a list of the APS, HAWK, and RRFB intersection locations, see **Table C-3 and Figure C-2**.

Individual pushbutton locations were geo-located with geographic information system (GIS) mapping software. Collected field attributes included pushbutton type (APS or non-APS), pushbutton features (directional arrows, height, location, clearance), audible tones/messages, vibrotactile features, pedestrian countdown heads, and a photo. Each pedestrian pushbutton has its own identification number as well as an intersection identification number to allow for

searching by individual pushbuttons or by intersection. For a list of the collected attributes, see **Table C-4**.

Each pushbutton was assigned an ADA compliance status of "Yes" (ADA-compliant) or "No" (not ADA-compliant). If one field attribute was not compliant, the APS pushbutton location was assigned a "No" ADA compliance status and is considered as having an ADA barrier.

Note: APS at signalized intersections and RRFBs along SR 202 are under WSDOT jurisdiction. APS at signalized intersections and HAWK signals along Snoqualmie Parkway are under City of Snoqualmie jurisdiction. For a map of the APS, HAWK, and RRFB locations by ADA compliance, see **Figure C-3**.

TSI Intersection ID	Intersection Type	Cross Street 1	Cross Street 2	Maintaining Jurisdiction
1	Signalized Intersection	Snoqualmie Parkway	SE Jacobia St	City of Snoqualmie
2	Signalized Intersection	Snoqualmie Parkway	SE Swenson Dr	City of Snoqualmie
3	Signalized Intersection	Snoqualmie Parkway	Douglas Ave SE	City of Snoqualmie
4	Signalized Intersection	Snoqualmie Parkway	SE Center Blvd SE	City of Snoqualmie
5	Signalized Intersection	Snoqualmie Parkway	Fairway Ave SE	City of Snoqualmie
6	Signalized Intersection	Snoqualmie Parkway	Better Way SE	City of Snoqualmie
7	Signalized Intersection	Snoqualmie Parkway	Railroad Ave	WSDOT
8	Signalized Intersection	Railroad Ave	Meadowbrook Way SE	WSDOT
9	RRFB	Railroad Ave	SE King St	WSDOT
10	RRFB	Railroad Ave	Mid-Block between SE King St and SE River St	WSDOT
11	RRFB	Railroad Ave	SE River	WSDOT

Table C-3. APS Locations Evaluated in 2023

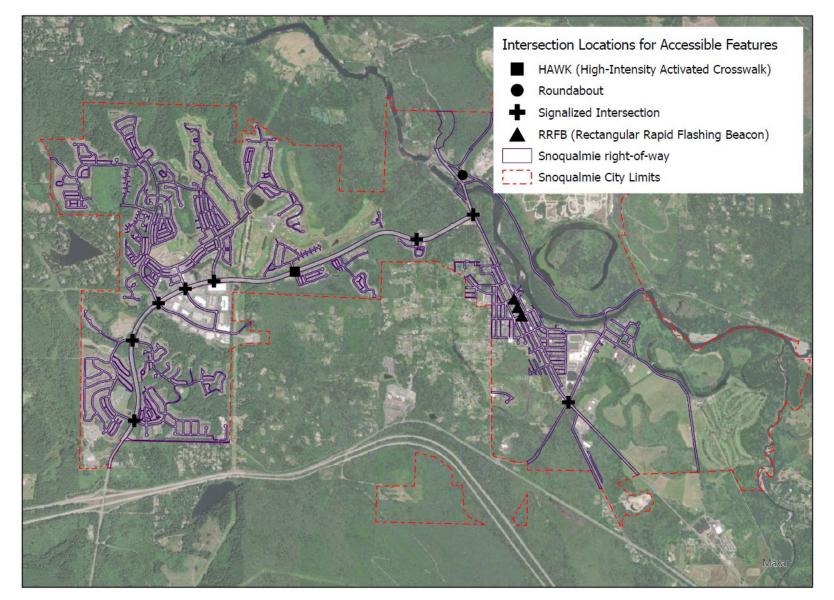

Figure C-2. City of Snoqualmie APS Intersection Locations (2023)

No.	Question	Attribute
1	Are the pushbuttons APS compliant? (only for pushbutton, not entire APS	Yes
1	system)	No
2	Is the directional arrow parallel to crosswalk?	Yes
2		No
3	Is pushbutton height 42 in above pedestrian route surface?	Yes
	is pushbutton height 12 in above pedestnan route surface.	No
4	What is the height of the pushbutton above the pedestrian route surface?	Measurement (inches)
5	Is the pushbutton to curb line between 1.5 to 6 ft?	Yes
		No
6	Is the pushbutton to curb line less than max 10 ft?	Measurement (feet)
7	Is the pushbutton to crosswalk line between 0 to 5 ft?	Yes
/		No (feet)
8	[PROWAG] Is the clear level ground at least 32 in by 54 in?	Measurement (inches)
9	[ADAAG] Is the clear level ground at least 36 in x width of ramp?	Measurement (inches)
10	Is there 4 ft minimum clearance around obstructions?	Measurement (inches)
11	Is there 4 ft minimum continuous pedestrian access route?	Measurement (inches)
12	Is there a 2 x 4 ft Detectable Warning Surface (DWS) 6-8 in from curb line?	Measurement (inches)
13	Is an audible message given to cross (Neto if tone)?	Yes
15	Is an audible message given to cross (Note if tone)?	No
14a-c	If a speech pushbutton information message is used	
14a	is a locator tone provided?	Yes
	· · · · · · · · · · · · · · · · · · ·	No
14b	does the audible information device use vibrotactile or percussive indications?	Yes
		No
14c	does the message say, "Yellow lights are flashing" (RRFBs) and is the message spoken twice?	Varies
14d	What message is spoken?	Varies
15	Is the reach from the pedestrian pushbutton to the face of curb/guardrail 10"	Yes
	max?	No
16	Is there a pedestrian countdown head present?	Yes
10	· · · · ·	No
17	Photo Attachment	.jpg

Table C-4. City of Snoqualmie Collected APS Attribute Data 2023

28

No.	Question	Attribute
18	Notes	Varies
10	Are all fields ADA compliant (pushbutton, location, reach, etc.)	Yes
19	Are an news ADA compliant (pushbutton, location, reach, etc.)	No

APS Inventory Summary

In 2023, sixty-eight (68) pushbutton locations were identified at the following location types:

- Fifty-six (56) accessible pedestrian signal pushbuttons at signalized intersections (APS)
- Ten (10) rectangular rapid flashing beacon pushbuttons (RRFB)
- Two (2) pushbuttons at high-intensity activated crosswalk beacons (HAWK)

Within this inventory, the following ADA-compliance level was identified:

- Forty-nine (49) pushbutton locations had at least one non-ADA-compliant feature
- Nineteen (19) pushbutton locations had all ADA-compliant features

The level of non-compliance at each non-ADA-compliant pushbutton may vary. The following list identifies specific features and their associated level of compliance:

- Sixty (60) pushbuttons have APS features including a directional arrow parallel to the crosswalk and the requisite R10-3e sign.
- Eight (8) pushbuttons are the old style with no APS pushbuttons at the intersection of SR202/Meadowbrook Way (under WSDOT jurisdiction). The pushbutton poles are in ADA-compliant locations.
- Three (3) pushbuttons have directional arrows that are not pointing parallel to the crossing direction.
- All pushbuttons are between 32" and 42" above the pedestrian access route, which is within the allowed range of 15" to 48" above the pedestrian access route.
- Thirty-six (36) pushbutton locations exceed the maximum 10' distance from the pushbutton to the curb.
- Three (3) pushbuttons exceed the maximum 5' distance from the pushbutton to the crosswalk line.
- One (1) pushbutton does not have adequate clear space around the pushbutton.
- Twelve (12) pushbuttons do not provide an audible message.
- Ten (10) pushbuttons do not provide a locator tone.
- Twenty-nine (29) pushbuttons do not provide vibro-tactile or percussive features.
- Twelve (12) pushbuttons do not provide an audible message.
- All pedestrian pushbuttons are within the maximum 10" reach.
- All pedestrian pushbuttons have countdown heads present.

In **Table C-4**, questions 13 and 14a-d are not in the PROWAG or MUTCD but are in federal RRFB requirements. If information was available at APS and HAWK locations, it was provided. For a table of the collected attribute data, see **Appendix B1**.

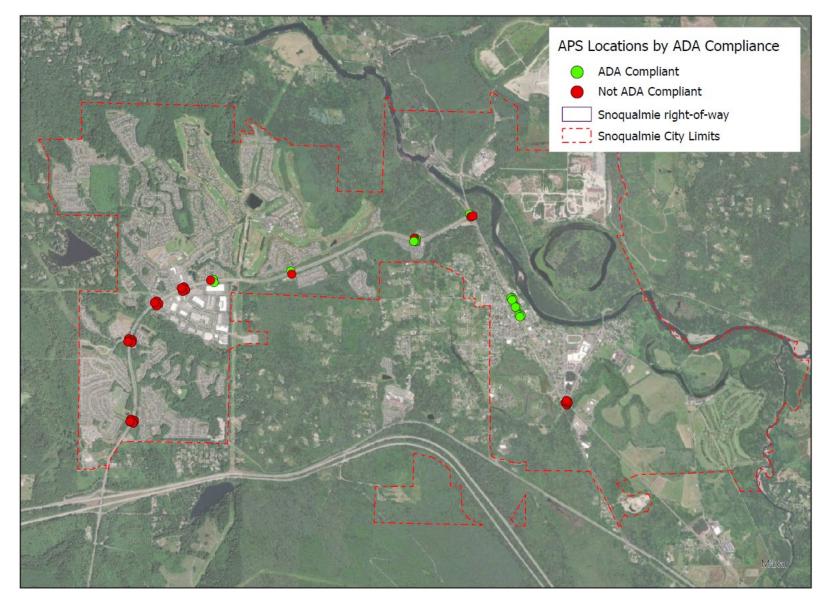

Figure C-3. City of Snoqualmie APS Inventory By ADA Compliance (2023)

APS Policy

At the time of self-evaluation, the City did not have an adopted Accessible Pedestrian Signal (APS) Policy. The City is adopting a 2023 APS Policy as part of this Plan. **See Appendix E**.

C.1.3 Other Public Right-of-Way Barriers

The scope of this ADA Transition Plan does not address the following public right-of-way facility types:

- Sidewalks
- Sidewalk/Driveway Interface
- Accessible Parking

ADA barriers for these facility types will be inventoried at future update of this ADA Transition Plan.

C.2 Public Right of Way Barrier Prioritization & Removal Recommendations

C.2.1 Curb Ramp Barriers

Curb Ramp Barrier Prioritization

The curb ramp grading system below was used to assign a grade and condition to each ramp in the focus area based on the 2023 field review. The curb ramp grading system was developed by the Vermont Department of Transportation (VDOT) and amended for City of Snoqualmie use. See the grading system in **Table C-5**.

Grade	Ramp Width	Detectable Warning Surface	Material Condition
А			Fair or Better Condition
GREEN	48" or greater	Truncated Dome	Limited or tight cracking, faulting (<1/4"), isolated spalling
В		Exposed	Poor Condition
YELLOW	>36"to <48"	Aggregate Surface or Diamond Shape Stamp	Moderate cracking, faulting (1/4"-3/4"), moderate spalling
			Very Poor Condition
C ORANGE	36" or less	No detectable warning surface	Severe cracking, faulting (>3/4"), extensive spalling, no landing
D	A curb ramp is needed but does not exist at the location to access an existing		
RED	sidewalk where it crosses a curb.		

Table C-5. City of Snoqualmie Curb Ramp Grading System

Ramps with a grade (condition) of A (Fair or Better) include ADA-compliant and non-ADA compliant ramps. A-grade ramps that are non-compliant are not Safe Harbor candidates and must be upgraded to current ADA standards when next altered unless they meet maximum extent feasible (MEF) requirements. Ramps with a grade of B (Poor) are usable in their current form but are not ADA-compliant with 2010 ADA standards (they also likely meet Safe Harbor). All ramps with a grade of C (Very Poor), or D (Missing) are not ADA-compliant.

Of the 1,343 ramps documented in this ADA Transition Plan, 63.6% (854 ramps) are not ADAcompliant. Non-compliant ramps with poor or no functionality (grades C or D) are considered higher priority for barrier removal than non-compliant ramps with higher functionality (grades A and B). For a table of the City's curb ramps by grade, condition, and ADA-compliance, see **Table C-6** and **Figure C-4.** For a map of the City's curb ramps by grade and condition, see **Figure C-4.**

Grade	Condition	Count	Percentage Grade	ADA Compliant	Count	Percentage Compliant
А	Fair or Better	699	52.1%	Compliant	489	36.4%
				Non-Compliant	210*	63.6%
В	Poor	472	35.1%	Non-Compliant	472**	
С	Very Poor	83	6.2%		83	
D	Missing	89	6.6%		89	
Total	-	1343	100%	_	1343	100%

Table C-6. City of Snoqualmie Curb Ramp Grade, Condition, and ADA-Compliance Status

* These 210 ramps appear to have been built to 2010 ADA Standards but include non-compliant features. These ramps are not Safe Harbor candidates and must be upgraded to current ADA standards when next altered, unless they meet maximum extent feasible (MEF) requirements.

**These 472 curb ramps with a "B" grade (Poor) – these make up 35.1% of all inventoried ramps and 55% of non-compliant ramps – are Safe Harbor candidates due to ramp widths between 36 and 48 inches, running slopes slightly more than 8.3%, and/or detectable warning surfaces made with exposed aggregate or a diamond pattern (rather than truncated domes).

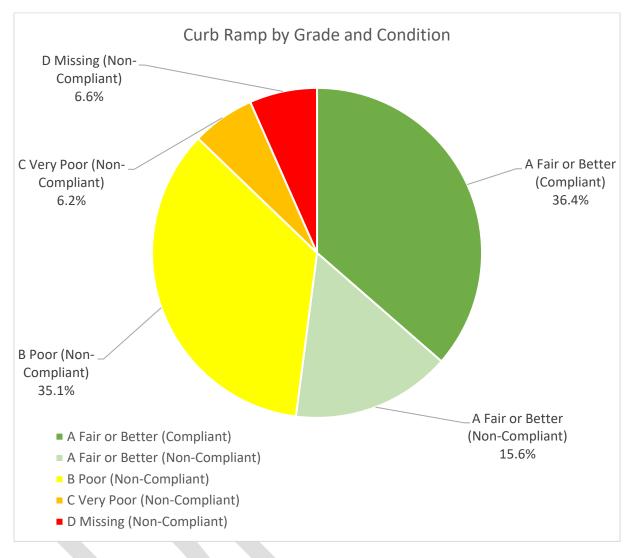

Figure C-4. City of Snoqualmie Curb Ramps by Grade and Condition Percentage

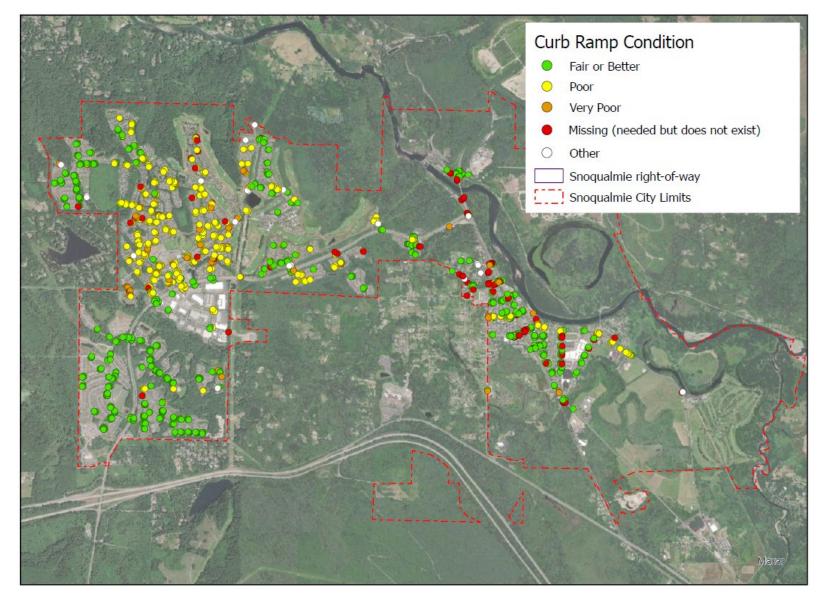

Figure C-5. City of Snoqualmie Curb Ramps by Condition

Note: The map in **Figure C-5** displays the 26 "Other" ramps (shown in white) discussed below **Table C-2** for visual reference. These 26 ramps were excluded from **Tables C-2** and **C-6** and **Figures C-1** and **C-4**. For all collected curb ramp data for graded and "other" curb ramps, see **Appendix B1**.

Curb Ramps in Vicinity of Future Capital Improvement Projects

A number of non-compliant curb ramps will be replaced as part of future CIP and pavement preservation programs. Of the 92 curb ramp barriers within a 100 foot buffer of the City's 2023-2028 Capital Improvement Plan (CIP), at least 63 barriers will be removed in the next 6-year period. See **Figure C-6**.

Snoqualmie Parkway Rehabilitation Project: This summer 2023 project was under construction at the time of development of this ADA Transition Plan and is anticipated to remove the following 63 curb ramp barriers:

- Reconstruct 21 ramps to full ADA-compliance
- Reconstruct 8 ramps to maximum extent feasible (MEF) ADA-compliance
- Remove 4 ramps
- Add detectable warning surface at blended transition
- Note: Existing MEF documentation has been gathered for 29 ramps

These above locations were identified in the City's plan set and associated MEF documentation. The ramp numbers from those sources are provided in parenthesis below and included in the GIS inventory for City staff reference. For more information, see **Appendix B3**:

- SE Jacobia St Intersection: 8 new ADA-compliant ramps (1-8)
- **Swenson Drive Intersection**: 2 ramps at southwest corner will be made fully ADA compliant (9-10)
- Center Blvd Intersection: 8 new ADA-compliant ramps (25-32)
- Fisher Ave Intersection:
 - 1 current MEF ramp in NE corner will be improved to MEF (39)
 - o 1 current MEF ramp in NE corner will be made fully ADA compliant (43)
 - 2 ramps on east side of intersection will be removed (40 and 44)
- Better Way Intersection: 4 ramps will be improved to MEF (45-48)
- Orchard Ave SE Intersection:
 - 1 ramp will be improved to MEF (53)
 - o 2 ramps will be made fully ADA-compliant (54 and 55)
 - 1 blended transition will have detectable warning surface added (no number provided)
- Allman Ave SE Intersection:
 - 2 ramps will be improved to MEF (57 and 58)
 - 2 ramps will be removed (56 and 59)
- Existing MEF Documentation: 29 ramps along the Snoqualmie Parkway Corridor have MEF documentation for ADA compliance (11-24, 33-38, 41-42, 45-50, 52)

Town Center Improvement Project – Phase III - TBD:

• This project has the potential to address 5-12 curb ramp barriers with reconstruction of both pedestrian and street infrastructure between downtown Snoqualmie and Snoqualmie Falls.

Curb Ramp Barrier Removal Recommendations

Curb ramp barriers will be prioritized in accordance with the general prioritization criteria established in **Section A.4**. It is recommended the City:

- Consider removing curb ramp barriers identified by the public through grievances or requests when selecting barriers for removal during annual budgeting activities.
- Consider removing curb ramp barriers with grade of C (Very Poor) or D (Missing) before other curb ramp barriers.
- Consider grouping barriers into corridors or sub-areas to provide for cost effective barrier removal. This could be addressed in a future update of the ADA Transition Plan and is dependent upon financial resources available to the City beyond the CIP.
- Annually monitor the removal of curb ramp barriers in the City's GIS inventory.

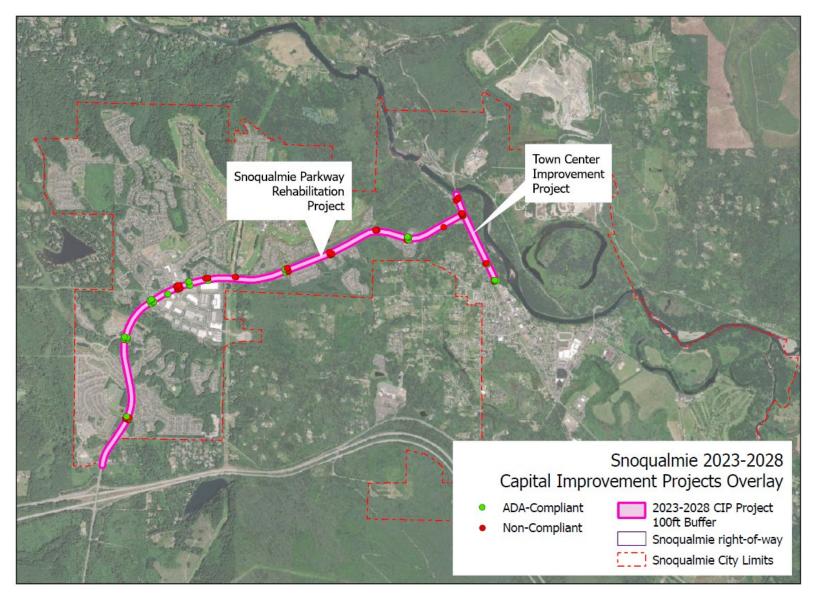

Figure C-6. City of Snoqualmie 2023-2028 CIP Project Buffer

ltem 2.

C.2.2 Accessible Pedestrian Signal (APS) Barriers

APS Barrier Prioritization

ADA upgrades to APS pedestrian signals will be prioritized according to the City's Accessible Pedestrian Signal Policy provided in **Appendix E** and in accordance with the general prioritization criteria established in **Section A.4**.

2023 Snoqualmie Parkway Rehabilitation Project and APS

The 2023 Snoqualmie Parkway Rehabilitation Project includes relocation of twenty-three (23) pedestrian pushbutton poles to ADA-compliant locations connected with ramp alterations along the corridor. The pre-existing pushbuttons and with directional arrows and ADA-compliant signs are being reinstalled at these upgraded pole locations.

APS Barrier Removal Recommendations

It is recommended the City:

- Remove APS barriers consistent with the adopted APS Policy.
- Consider removing APS barriers identified by the public through grievances or requests when selecting high priority barriers for removal during annual budgeting activities.
- Annually monitor the removal of APS barriers in the City's APS/HAWK/RRFB GIS inventory.

C.2.3 Other Public Right-of-Way Barriers

The scope of this ADA Transition Plan does not address barriers of the following public right-ofway facility types:

- Sidewalks
- Sidewalk/Driveway Interface
- Accessible Parking

ADA barriers for these facility types will be addressed at future update of this ADA Transition Plan. It is recommended these barriers be prioritized in accordance with the general prioritization criteria established in **Section A.4**. It is recommended the City:

- Consider removing barriers identified by the public through grievances or requests when selecting high priority barriers for removal during annual budgeting activities.
- Consider grouping barriers into corridors or segments to provide for cost effective barrier removal. This could be addressed at a future update of the ADA Transition Plan and is dependent upon financial resources available to the City beyond the TIP/CFP.
- Annually monitor the removal of barriers in a City GIS inventory.

C.3 Public Right-of-Way Barrier Removal Costs Estimates

C.3.1 Curb Ramp Barriers Cost Estimate

A planning level estimated cost for replacing one (1) curb ramp is \$15,000. See Table C-7.

Unit	Cost (\$2023)
Survey/Map	\$1,600.00
Design	\$1,900.00
Construction Management	\$1,500.00
Construction	\$7,500.00
Subtotal	\$12,500.00
Contingency (15%)	\$2,500.00
Cost (\$) per Curb Ramp	\$15,000.00

Table C-7. Individual ADA-Compliant Curb Ramp Cost Estimates

To estimate the probable program cost to remove all 854 curb ramp barriers, a cost estimate ranges from \$12,500 (85%) to \$17,500 (115%) per barrier has been provided.

In addition to design and construction of the curb ramp itself, additional costs may arise from addressing issues such as relocation of existing utilities, acquisition of new public right-of-way, and other roadway improvements such as curb bulbs and new enclosed drainage. Correcting barriers at blended transitions (near-level transitions between a pedestrian access route and pedestrian crossing) may cost less than estimated if installation of detectable warning surfaces is sufficient to remove barriers to accessibility.

Note regarding Safe Harbor: Grade B (Poor) non-compliant ramps may meet Safe Harbor provisions and potentially reduce the overall program cost estimate. Grade C (Very Poor) non-compliant ramps are not likely to meet Safe Harbor as the lack of a detectable warning system and/or no clear space automatically triggers the C grade. Any ramp location should be re-evaluated for Safe-Harbor and accessibility as part of the survey/design phase of a specific project/request for an upgrade.

Note reading Maximum Extent Feasible: Grade A (Fair/Better) non-compliant ramps may meet Maximum Extent Feasible (MEF) requirements due to steep topography or other factors. Any ramp location should be re-evaluated for MEF accessibility as part of the survey/design phase of a specific project/request for an upgrade. Note: The City has documented MEF ramps along Snoqualmie Parkway in 2023 – see City GIS Inventory in **Appendix B2** and MEF Reports in **Appendix B3**.

To remove and replace all 854 known curb ramp barriers, it would cost an estimated \$10.7 to \$14.9 million. For cost estimates, see **Table C-8**.

Probable Program Cost for Curb Ramp Barriers								
Cost Range LOW MED HIGH								
Cost Percentage (%) of Estimate	85%	100%	115%					
Cost (\$2023) per Ramp	\$12,750	\$15,000	\$17,250					
Total All Curb Ramp Barriers	\$10,675,000	\$12,810,000	\$14,945,000					

Table C-8. Curb Ramp Barrier Removal Program Cost Estimates

C.3.2 Accessible Pedestrian Signal (APS) Cost Estimate

The following cost estimates have been provided for APS facilities in **Table C-9**. Note: These are construction cost estimates.

Accessible Pedestrian Signal (APS) Type	Construction Cost Estimates (\$2023)
Full APS (at signalized intersection for pedestrian pushbutton poles, vibro-tactile pushbuttons, and displays)	\$35,000
Partial APS (at signalized intersection for additional pedestrian pushbutton pole and vibro-tactile pedestrian pushbuttons only)	\$10,000
Full Rapid Rectangular Flashing Beacon (controller, power supply, poles, beacons, signs, with message and locator tone pushbuttons)	\$40,000
Rapid Rectangular Flashing Beacon (per each side of crossing for extension arms, message and locator tone pushbuttons)	\$2,500

To remove known APS barriers, it would cost an estimated \$80,000. See Table C-10.

Table C-10. New Accessible Pedestrian Signals Barrier Removal Program Cost Estimates

Accessible Pedestrian Signal (APS) Type	Cost	Number of Locations	Construction Cost Estimates (\$2023)
[Full APS (at signalized intersection) in coordination with WSDOT]	\$35,000/ intersection	1	[\$35,000]
Partial APS (at intersection for vibro- tactile pedestrian pushbuttons only)	\$10,000/ intersection	8	\$80,000
Total Accessible Pedestrian Signal Program Cost Estimate + [WSDOT]	-	9	\$80,000 +[\$35,000]

Item 2.

C.3.3 Other PROW Barriers Cost Estimates

The Barrier Removal Program cost estimates for sidewalk, sidewalk/driveway interface, and accessible parking will be addressed at a future update of this PROW ADA Transition Plan.

C.3.4 Sidewalk Maintenance

According to <u>Snoqualmie Municipal Code Chapter 12.06.010</u>, it is the duty of the owner to remove snow from the sidewalk.

C.4 Public Right of Way Barrier Removal Financial Plan and Schedule

Future CIP Projects are expected to follow the pattern of the past years to continue incremental ADA barrier removal in the public right-of-way. The CIP for period 2023-2028 calls for \$3.8 million in capital programs and up to \$13.6 million in capital projects that include ADA barrier removal components. The following bullet points identify the programs and associated potential funding sources for each barrier type.

C.4.1 Curb Ramps

- 2023-2028 CIP Americans with Disabilities Act Program includes \$272,000 (approximately \$45,000 annually) to remove barriers including curb ramp upgrades at priority locations to be determined by the ADA Transition Plan. This funding would support replacement or upgrade of approximately 3-5 ramps per year.
- 2023-2028 CIP Streets Resurfacing Program includes \$3.527 million for street resurfacing projects. Approximately 5% (\$31,000 annually) is anticipated to be used for curb ramp upgrades associated with street resurfacing projects. The City upgrades curb ramps with these projects as needed.
- **2023 Snoqualmie Parkway Rehabilitation Project:** Snoqualmie Parkway may undergo a jurisdictional transfer to become part of Highway 18 with ramps remaining under City jurisdiction. As of adoption of this Plan, Snoqualmie Parkway is still under City of Snoqualmie jurisdiction. The summer 2023 rehabilitation project includes:
 - Reconstruction of 21 ramps to full ADA-compliance
 - Reconstruction of 8 ramps to maximum extent feasible (MEF) ADA-compliance
 - Removal of 4 ramps
 - o Addition of 1 detectable warning surface at blended transition
 - MEF documentation for 29 ramps compiled from 2014, 2019 and 2023 year reports.

This curb barrier allocation budget may change due to the City's ability to fund CIP projects, which is subject to annual budget review and reassessment. See **Table C-11**.

Curb Ramp Barrier Removal	Amount
Funding Source	(\$2023)
Total Estimated Curb Ramp Barrier Removal Costs (\$2023)	\$14,950,000
2023-2028 CIP ADA Program (approx. \$45,000 annually)	\$272,000
2023-2028 CIP Street Resurfacing Program (approx. \$31,000 annually)	\$186,000
2023 Snoqualmie Parkway Rehabilitation Project	\$202,000
2029- Remainder Curb Ramp Barrier Costs	\$14,290,000

Table C-11. Curb Ramp Barrier Removal Schedule with Programmed Funding

C.4.2 Accessible Pedestrian Signals

- 2023 Snoqualmie Parkway Rehabilitation Project: this summer 2023 project includes relocation of twenty-three (23) pedestrian pushbutton poles to ADA-compliant locations connected with ramp alterations along the corridor. The pre-existing pushbuttons with directional arrows and ADA-compliant signs are being reinstalled at these upgraded pole locations at a value of \$121,000.
- Accessible Pedestrian Signal (APS) Policy: As part of this ADA Transition Plan, the City has adopted an APS Policy and posted it on its website. The City will address requests for APS according to its APS Policy.

C.4.3 Other Public Right-of-Way Barriers

The City intends to address reported sidewalk, driveway interface with sidewalk, and accessible parking ADA barriers through the listed PROW funding sources in **Table C-12**.

C.4.5 Public Right-of-Way Barrier Removal Schedule Funding Summary

In summary, the City has planned to spend up to \$781,000 in 2023-2028 on barrier removal in the public right-of-way. For a summary table of the planned budget for all ADA barriers, including public right-of-way barriers, see **Table C-12**. For more information, see the most recent City of Snoqualmie budget.

Table C-12. City of Snoqualmie PROW ADA Barrier Removal Funding Framework 2023-2028

Funding Source	202	23 (\$)	20	24 (\$)	2025	5 (\$)	20	026 (\$)	2	027 (\$)	2028 (\$)	(20	Total)23-2028)	Notes
ADA Program	\$	42,000	\$	44,000	\$	45,000	\$	46,000	\$	47,000	\$ 48,000	\$	272,000	This secured funding will support ADA Transition Plan implementation and replace or upgrade approximately 3-5 ramps per year.
Street Resurfacing Program (approx. 5% of \$3.527 million)	\$	31,000	\$	31,000	\$	31,000	\$	31,000	\$	31,000	\$ 31,000	\$	186,000	This secured funding will address curb ramp upgrades associated with street resurfacing projects.
2023 Snoqualmie Parkway Rehabilitation Project	\$	323,000		\$ 0	\$	0		\$ 0		\$ 0	\$ O	\$	323,000	This secured finding reconstructed 21 ramps to full ADA compliance, reconstructed 8 ramps to MEF, removed 4 ramps, and added 1 detectable warning surface at a blended transition. (MEF documentation for 29 ramps is also included). This project also relocated 23 pedestrian pushbutton poles to meet ADA requirements while retaining pre-existing pushbutton/display features.
Town Center Improvement Project – Phase III*		\$0		\$ 0	\$	0		\$ 0		\$0	\$ O		\$0	*Conditional on grant funding and other contributions. This unsecured funding will make improvements to the sidewalk and curb ramps from Northern Street to the State Route 202 bridge.
TOTAL	\$	396,000	\$	75,000	\$	76,000	\$	77,000	\$	78,000	\$ 79,000		\$781,000	See also City of Snoqualmie 2023-2028 CIP budget.

D. Future Actions to Achieve Compliance

D.1 Future Actions Needed

The City is pursuing a phased approach to its Public Right-of-Way ADA Self-Evaluation and Transition Plan. This first phase focused on self-evaluation, barrier prioritization, and initial barrier removal scheduling for curb ramp barriers and accessible pedestrian signals (APS).

The City owns/maintains other public right-of-way facilities that were not part of the first phase and will be evaluated for ADA barriers at a future update to this Public-Right-of-Way ADA Transition Plan. These facilities include:

- Sidewalks;
- Driveway interface with sidewalks;
- and accessible parking.

The City owns/maintains other facility types that will be addressed in the future:

- City buildings with publicly accessible areas;
- City park facilities including building structures, restrooms, and recreational areas;
- City trails;
- and City programs, services, and activities.

Notes: The City addressed the policy and procedure requirements identified in **Section B** as part of this PROW ADA Transition Plan. The City will conduct an internal self-assessment and barrier prioritization for programmatic barriers at a future date. Cost estimates for barrier removal for these outstanding facilities and programming will be included in a future update to the Plan.

D.2 Annual Report of Barriers Removed

To ensure implementation of this ADA Transition Plan, it is recommended that the City incorporate an annual review/update process to track ADA self-evaluation and barrier removal progress. It is recommended that the official responsible for implementation of the ADA Transition Plan coordinate this effort in cooperation with relevant City staff from other departments who are involved with projects that remove ADA barriers.

D.3 Five-Year ADA Transition Plan Update Schedule

This Plan is intended to be reviewed and updated at five year intervals. As the Plan is updated, an updated barrier removal schedule will be identified. With each five-year Plan update, an official public comment period is recommended to continue public engagement. The inventories and cost estimates will be re-analyzed at each five-year Plan update to determine patterns of need as it relates to the complete facility inventory and barrier removal prioritization.

Item 2.

E. Public Engagement

E.1 Public Engagement Strategy

The City's developed the following public engagement strategy to inform interested members of the public of the undertaking of this Plan and to invite participation in the process. This strategy included digital announcements, direct stakeholder engagement with existing contacts within and organizations that provide services to members of the ADA community, and opportunities for the general public to report ADA barriers and comment on the Draft Plan. For documentation of public engagement, see **Appendix F**.

E.1.1 Project Webpage

The project webpage content was launched in May 2023. The project webpage included the following components:

- Project Description
- Schedule
- Public Involvement:
 - Links to online Map-enabled ArcGIS Survey123[®]
 - \circ Link to ADA Workshop Virtual Meeting Information held June 13, 2023
 - o Virtual City Council meeting information
- City staff contacts and other ADA resources
- Documents section for posting the draft version for public comment and final version
- Recent and annual accomplishments section for further tracking of ADA Transition Plan implementation progress

The ADA Transition Plan Project webpage is available at:

https://www.snoqualmiewa.gov/1024/Public-Right-of-Way-ADA-Transition-Plan

E.1.2 Web-Based Publications

The following web-based publications promoted the project, online surveys, and virtual workshop in early June:

- E-News Flash posting on City's website on 6/5.
- E-News Publication to City residents on 6/9
- City of Snoqualmie Twitter[®] on 6/5, 6/13 and 6/20
- City of Snoqualmie Government Facebook[®] newsfeed on 6/5 and 6/20
- NextDoor[®] City agency page on 6/20

E.1.3 Direct Engagement with Local ADA Community Organizations

City staff contacted the following organizations via direct e-mail in late May/early June 2023, to seek out interest in the online survey and public comment opportunities:

- Sno-Valley Senior Center
- Snoqualmie Valley School District
- Social Services
- Empower Youth
- Encompass Northwest (and further email distribution to therapists to share with clients)
- Mt. Si Senior Center

E.1.4 Online Surveys

A 5-7 minute survey was created in consultation with City staff and was hosted on the mapenabled ArcGIS Survey123[®] platform that gave respondents the option to mark barrier locations on a map. The online surveys were activated from June 6 - June 30, 2023.

E.1.5 Virtual Public Workshop

A Virtual Public Workshop was held on June 13, 2023, on the Zoom[®] platform scheduled for 6:00-7:00pm. Project team staff kept the virtual meeting open until 6:15 pm and then ended the meeting due to no public participation. For documentation, see **Appendix F.**

E.1.6 Public Hearing Opportunities

A presentation on the Draft ADA Transition Plan was presented to the City of Snoqualmie City Council at their meeting held MONTH, DAY, 2023, on the ADD[®] platform from #:## - #:##pm. This meeting was promoted on the ADA Transition Plan webpage for public comment.

Presentation materials were provided in accessible formats with alternative text prior to the event. The presentation explained the reasons for and required content of an ADA Transition Plan and the City's approach to self-evaluation and barrier removal implementation focused first on curb ramps and accessible pedestrian signals within the public right-of-way. An open comment opportunity followed each presentation.

E.2 Public Engagement Findings

The virtual platform of online survey, ADA workshop, and City Council meeting provided the public with accessible participation options. The findings are helpful in guiding City staff in the selection and prioritization of barrier removal. For further documentation, see **Appendix F**.

E.2.1 Online Survey Responses

The online ArcGIS Survey123[®] public survey yielded a total of 7 responses. The public survey asked two questions to rank barriers within the public right-of-way:

- Which public right-of-way barriers do you want removed before others?
- Where is most important to remove barriers?

Note: Ranked question scores were calculated using a weighted average score. Higher scores are for more popular choices. Lower scores are for less popular choices. See **Figures E-1** and **E2** and **Tables E-1 and E-2.** For additional documentation, see **Appendix F**.

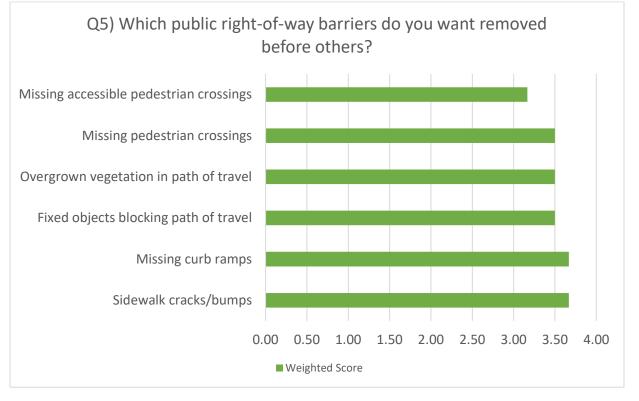

Figure E-1. Most Important Barrier Types for Removal by Rank

2023 ADA Transition Plan for Public Right-of-Way

*Of the 7 survey respondents, 6 completed this question.

Table E-1. Most Important Barrier Types for Removal by Rank

Rank	Barrier Type for Removal	Score*
1	Sidewalk Cracks/Bumps	3.67
2	Missing Curb Ramps	3.67
3	Fixed Objects Blocking Path of Travel	3.50
4	Overgrown Vegetation in Path of Travel	3.50
5	Missing Pedestrian Crossings	3.50
6	Missing Accessible Pedestrian Signals	3.17

*Of the 7 survey respondents, 6 completed this question.

Figure E-2. Most Important Locations for Barrier Removal by Rank

*Of the 7 survey respondents, 5 completed this question.

Rank	Location for Barrier Removal	Score*
1	Grocery Store/Retail Shopping Centers	5.00
2	Schools/Libraries	5.00
3	Senior Care/Elderly Care Facilities	4.80
4	Transit Center/Stops/Routes	3.80
5	Parks/Trails	3.60
6	Local Government Buildings/Post Offices	3.20
7	My Residence	2.60

Table E-2. Most Important Locations for Barrier Removal by Rank

*Of the 7 survey respondents, 5 completed this question.

Narrative Survey Feedback

Beyond the ranking questions, narrative data from the surveys include the following themes:

- Ramps: Request for curb ramps in old town near Silva Ave where they are currently missing.
- Improved Pedestrian Crossings: Requests were made to consider ways to improve ADA accessibility and safety at the following crossings, including the suggestion of RRFBs and/or manual flags:
 - o Snoqualmie Elementary School on Park St at Mountain Ave
 - o Snoqualmie Elementary School on Park St at Centennial Field entrance
 - Park St and Meadowbrook Way
 - Park St and Boalch Ave/Golf Course
- **HAWK Signal**: Request to evaluate full 4-way traffic light at Snoqualmie Parkway and Fisher Ave SE to address safety concerns.
- Sidewalks:
 - Request for painted lines in crosswalks, particularly on or near Center Blvd.
 - Request for improved sidewalks in old town, including Silva Ave close to the Snoqualmie Valley School District administration building.
 - Request for dedicated pedestrian connection between sidewalk along Railroad Ave/SR 202 into Snoqualmie Middle School (pedestrians must use grass or vehicle/bus roadway for non-motorized access).
- Vegetation/Snow Management
 - Request to address low hanging branches on Park St a few feet east Mountain St.
 - Request for sidewalks/ramps to be shoveled during snow events.
- Parks: Opportunity to upgrade playground design at Centennial Field
- Other
 - Suggestion to close Center Blvd to vehicles during the summer months.
 - Lack of an ADA-compliant connection (i.e. stair-only access) to Snoqualmie Valley Trail at Reinig Road (respondent recognized this is a King County facility).

E.2.2 Public Hearing Comments

<mark>#</mark> public hearing comments were received at the City of Snoqualmie's City Council meeting held MONTH DAY, 2023. City Council members provided the following feedback on the Draft Plan:

E.2.3 Draft ADA Transition Plan Public Comments

<mark>#</mark> public comments were received via email on the Draft ADA Transition Plan during the public comment period between MONTH DAY and DAY, 2023.

E.3 Recommendations

It is recommended that the City:

- Consider prioritizing the high ranking barrier types for removal before other barrier types. These include:
 - Sidewalk cracks/bumps
 - Missing curb ramps

- Consider prioritizing barriers near the following high ranking locations before barriers near other locations. These include:
 - Grocery Stores/Retail Shopping Centers
 - Schools/Libraries
- Utilize the City of Snoqualmie ADA Transition Plan project webpage as a tool for future public engagement efforts related to ADA Transition Plan barrier removal progress.
- Utilize a screen-reader friendly survey option to function as a barrier reporting tool for the public to report accessibility barriers, with a mapping feature, if available.

Item 2.

F. Accessibility Regulations, Standards & Guidelines Resources

This ADA Transition Plan is based on the most recent federal and state ADA regulations, standards, and guidelines. The resources are divided into general and barrier specific groups with links to websites. For the WSDOT Local Agency Guidelines Chapter 29 ADA Title II Checklist of requirements for ADA transition plans, see **Appendix A**.

F.1 General Resources

Federal ADA Regulations

- ADA Title II Regulations (28 CFR Part 35)
- ADA Title III Regulations (28 CFR Part 36)

U.S. Access Board Standards

U.S. Access Board DOJ ADA Accessibility Standards (2010)

U.S. Department of Justice Guidelines

• U.S. DOJ ADA Best Practices Tool Kit for State and Local Governments

WSDOT Local Agency Guidelines

Local Agency Guidelines: Chapter 29 Section 504 of the Americans with Disabilities Act

F.2 Barrier-Specific Resources

Curb Ramps, Accessible Pedestrian Signals, Sidewalks, and Pedestrian Access Routes:

- ADA Title II Technical Assistance Manual
- USDOT ADA Standards for Transportation Facilities (2006)
- Public Rights-of-Way Accessibility Guidelines (PROWAG) (2011)
- <u>Public Rights-of-Way Accessibility Guidelines Supplemental Notice on Shared Use Paths</u> (PROWAG) (2013)
- WSDOT Field Guide for Accessible Pedestrian Facilities (2012)

Parking:

- <u>Facility (Off-Street) Accessible Parking (2010 ADA Standards)</u>
- On-Street Accessible Parking (2011 PROWAG)

Americans With Disabilities Act (ADA) Transition Plan for the Public Right-of-Way

Snoqualmie, WA

Draft July 2023

Appendix A Federal and Washington State Regulations

28 CFR Part 35 Documentation

Nondiscrimination on the Basis of Disability in State and Local Government Services Subpart D - Program Accessibility Sections 35.150 - 35.151 Washington Local Agency Guidelines Manual Chapter 29

Prepared by

28 CFR § 35.150 - Existing facilities.

§ 35.150 Existing facilities.

(a) *General.* A <u>public entity</u> shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities. This paragraph does not -

(1) Necessarily require a <u>public entity</u> to make each of its existing facilities accessible to and usable by individuals with disabilities;

(2) Require a <u>public entity</u> to take any action that would threaten or destroy the historic significance of an historic property; or

(3) Require a <u>public entity</u> to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the <u>public</u> <u>entity</u> believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a <u>public entity</u> has the burden of proving that compliance with <u>§ 35.150(a)</u> of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a <u>public entity</u> or his or her designee after considering all resources available for use in the funding and operation of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a <u>public entity</u> shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the <u>public entity</u>.

(b) Methods -

(2)

(i) *Safe harbor.* Elements that have not been altered in existing facilities on or after March 15, 2012 and that comply with the corresponding technical and scoping specifications for

those elements in either the 1991 Standards or in the Uniform Federal Accessibility Standards (UFAS), Appendix A to <u>41 CFR part 101-19</u>.6 (July 1, 2002 ed.), <u>49 FR 31528</u>, app. A (Aug. 7, 1984) are not required to be modified in order to comply with the requirements set forth in the 2010 Standards.

(ii) The safe harbor provided in § 35.150(b)(2)(i) does not apply to those elements in existing facilities that are subject to supplemental requirements (*i.e.*, elements for which there are neither technical nor scoping specifications in the 1991 Standards). Elements in the 2010 Standards not eligible for the element-by-element safe harbor are identified as follows -

- (A) Residential facilities dwelling units, sections 233 and 809.
- (B) Amusement rides, sections 234 and 1002; 206.2.9; 216.12.
- (C) Recreational boating facilities, sections 235 and 1003; 206.2.10.
- (D) Exercise machines and equipment, sections 236 and 1004; 206.2.13.
- (E) Fishing piers and platforms, sections 237 and 1005; 206.2.14.
- (F) Golf facilities, sections 238 and 1006; 206.2.15.
- (G) Miniature golf facilities, sections 239 and 1007; 206.2.16.
- (H) Play areas, sections 240 and 1008; 206.2.17.
- (I) Saunas and steam rooms, sections 241 and 612.
- (J) Swimming pools, wading pools, and spas, sections 242 and 1009.
- (K) Shooting facilities with firing positions, sections 243 and 1010.
- (L) Miscellaneous.
 - (1) Team or player seating, section 221.2.1.4.
 - (2) Accessible route to bowling lanes, section 206.2.11.
 - (3) Accessible route in court sports facilities, section 206.2.12.

(3) Historic preservation programs. In meeting the requirements of § 35.150(a) in <u>historic</u> preservation programs, a <u>public entity</u> shall give priority to methods that provide physical access to individuals with disabilities. In cases where a physical alteration to an historic property is not required because of paragraph (a)(2) or (a)(3) of this section, alternative methods of achieving program accessibility include -

(i) Using audio-visual materials and devices to depict those portions of an historic property that cannot otherwise be made accessible;

(ii) Assigning persons to guide individuals with handicaps into or through portions of <u>historic properties</u> that cannot otherwise be made accessible; or

(iii) Adopting other innovative methods.

(4) *Swimming pools, wading pools, and spas.* The requirements set forth in sections 242 and 1009 of the 2010 Standards shall not apply until January 31, 2013, if a <u>public entity</u> chooses to make structural changes to existing swimming pools, wading pools, or spas built before March 15, 2012, for the sole purpose of complying with the program accessibility requirements set forth in this section.

(c) *Time period for compliance.* Where structural changes in facilities are undertaken to comply with the obligations established under this section, such changes shall be made within three years of January 26, 1992, but in any event as expeditiously as possible.

(d) Transition plan.

(1) In the event that structural changes to facilities will be undertaken to achieve program accessibility, a <u>public entity</u> that employs 50 or more persons shall develop, within six months of January 26, 1992, a transition plan setting forth the steps necessary to complete such changes. A <u>public entity</u> shall provide an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the development of the transition plan by submitting comments. A copy of the transition plan shall be made available for public inspection.

(2) If a <u>public entity</u> has responsibility or authority over streets, roads, or walkways, its transition plan shall include a schedule for providing curb ramps or other sloped areas where pedestrian walks cross curbs, giving priority to walkways serving entities covered by the <u>Act</u>, including <u>State</u> and local government offices and facilities, transportation, places of public accommodation, and employers, followed by walkways serving other areas.

(3) The plan shall, at a minimum -

(i) Identify physical obstacles in the <u>public entity</u>'s facilities that limit the accessibility of its programs or activities to individuals with disabilities;

(ii) Describe in detail the methods that will be used to make the facilities accessible;

(iii) Specify the schedule for taking the steps necessary to achieve compliance with this section and, if the time period of the transition plan is longer than one year, identify steps that will be taken during each year of the transition period; and

(iv) Indicate the official responsible for implementation of the plan.

(4) If a <u>public entity</u> has already complied with the transition plan requirement of a Federal agency regulation implementing section 504 of the <u>Rehabilitation Act of 1973</u>, then the requirements of this paragraph (d) shall apply only to those policies and practices that were not included in the previous transition plan.

(Approved by the Office of Management and Budget under control number 1190-0004) [56 FR 35716, July 26, 1991, as amended by Order No. 1694-93, <u>58 FR 17521</u>, Apr. 5, 1993; AG Order No. 3180-2010, <u>75 FR 56180</u>, Sept. 15, 2010; AG Order 3332-2012, <u>77 FR 30179</u>, May 21, 2012]

28 CFR § 35.151 - New construction and alterations.

§ 35.151 New construction and alterations.

(a) Design and construction.

(1) Each <u>facility</u> or part of a <u>facility</u> constructed by, on behalf of, or for the use of a <u>public</u> <u>entity</u> shall be designed and constructed in such manner that the <u>facility</u> or part of the <u>facility</u> is readily accessible to and usable by individuals with disabilities, if the construction was commenced after January 26, 1992.

(2) Exception for structural impracticability.

(i) Full compliance with the requirements of this section is not required where a <u>public</u> <u>entity</u> can demonstrate that it is structurally impracticable to meet the requirements. Full compliance will be considered structurally impracticable only in those rare circumstances when the unique characteristics of terrain prevent the incorporation of accessibility features.

(ii) If full compliance with this section would be structurally impracticable, compliance with this section is required to the extent that it is not structurally impracticable. In that case, any portion of the <u>facility</u> that can be made accessible shall be made accessible to the extent that it is not structurally impracticable.

(iii) If providing accessibility in conformance with this section to individuals with certain disabilities (*e.g.*, those who use wheelchairs) would be structurally impracticable, accessibility shall nonetheless be ensured to persons with other types of disabilities, (*e.g.*, those who use crutches or who have sight, hearing, or mental impairments) in accordance with this section.

(b) Alterations.

(1) Each <u>facility</u> or part of a <u>facility</u> altered by, on behalf of, or for the use of a <u>public entity</u> in a manner that affects or could affect the usability of the <u>facility</u> or part of the <u>facility</u> shall, to the maximum extent feasible, be altered in such manner that the altered portion of the <u>facility</u> is readily accessible to and usable by individuals with disabilities, if the alteration was commenced after January 26, 1992.

(2) The path of travel requirements of $\frac{535.151(b)(4)}{35.151(b)(4)}$ shall apply only to alterations undertaken solely for purposes other than to meet the program accessibility requirements of $\frac{535.150}{50}$.

(3)

(i) Alterations to <u>historic properties</u> shall comply, to the maximum extent feasible, with the provisions applicable to <u>historic properties</u> in the design standards specified in <u>§ 35.151(c)</u>.

(ii) If it is not feasible to provide physical access to an historic property in a manner that will not threaten or destroy the historic significance of the building or <u>facility</u>, alternative methods of access shall be provided pursuant to the requirements of $\frac{§ 35.150}{5}$.

(4) Path of travel. An alteration that affects or could affect the usability of or access to an area of a <u>facility</u> that contains a primary function shall be made so as to ensure that, to the maximum extent feasible, the path of travel to the altered area and the restrooms, telephones, and drinking fountains serving the altered area are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, unless the cost and scope of such alterations is disproportionate to the cost of the overall alteration.

(i) *Primary function.* A "primary function" is a <u>major</u> activity for which the <u>facility</u> is intended. Areas that contain a primary function include, but are not limited to, the dining area of a cafeteria, the meeting rooms in a conference center, as well as offices and other work areas in which the activities of the <u>public entity</u> using the <u>facility</u> are carried out.

(A) Mechanical rooms, boiler rooms, supply storage rooms, employee lounges or locker rooms, janitorial closets, entrances, and corridors are not areas containing a primary function. Restrooms are not areas containing a primary function unless the provision of restrooms is a primary purpose of the area, *e.g.*, in highway rest stops.

(B) For the purposes of this section, alterations to windows, hardware, controls, electrical outlets, and signage shall not be deemed to be alterations that affect the usability of or access to an area containing a primary function.

(ii) A "path of travel" includes a continuous, unobstructed way of pedestrian passage by means of which the altered area may be approached, entered, and exited, and which connects the altered area with an exterior approach (including sidewalks, streets, and parking areas), an entrance to the <u>facility</u>, and other parts of the <u>facility</u>.

(A) An accessible path of travel may consist of walks and sidewalks, curb ramps and other interior or exterior pedestrian ramps; clear floor paths through lobbies, corridors, rooms, and other improved areas; parking access aisles; elevators and lifts; or a combination of these elements.

(B) For the purposes of this section, the term "path of travel" also includes the restrooms, telephones, and drinking fountains serving the altered area.

(C) *Safe harbor.* If a <u>public entity</u> has constructed or altered required elements of a path of travel in accordance with the specifications in either the 1991 Standards or the Uniform Federal Accessibility Standards before March 15, 2012, the <u>public entity</u> is not required to retrofit such elements to reflect incremental changes in the 2010 Standards solely because of an alteration to a primary function area served by that path of travel.

(iii) Disproportionality.

(A) Alterations made to provide an accessible path of travel to the altered area will be deemed disproportionate to the overall alteration when the cost exceeds 20% of the cost of the alteration to the primary function area.

(B) Costs that may be counted as expenditures required to provide an accessible path of travel may include:

(1) Costs associated with providing an accessible entrance and an accessible route to the altered area, for example, the cost of widening doorways or installing ramps;

(2) Costs associated with making restrooms accessible, such as installing grab bars, enlarging toilet stalls, insulating pipes, or installing accessible faucet controls;

(3) Costs associated with providing accessible telephones, such as relocating the telephone to an accessible height, installing amplification devices, or installing a text telephone (TTY); and

(4) Costs associated with relocating an inaccessible drinking fountain.

(iv) Duty to provide accessible features in the event of disproportionality.

(A) When the cost of alterations necessary to make the path of travel to the altered area fully accessible is disproportionate to the cost of the overall alteration, the path of travel shall be made accessible to the extent that it can be made accessible without incurring disproportionate costs.

(B) In choosing which accessible elements to provide, priority should be given to those elements that will provide the greatest access, in the following order -

(1) An accessible entrance;

(2) An accessible route to the altered area;

(3) At least one accessible restroom for each sex or a single unisex restroom;

(4) Accessible telephones;

(5) Accessible drinking fountains; and

(6) When possible, additional accessible elements such as parking, storage, and alarms.

(v) Series of smaller alterations.

(A) The obligation to provide an accessible path of travel may not be evaded by performing a series of small alterations to the area served by a single path of travel if those alterations could have been performed as a single undertaking.

(B)(1) If an area containing a primary function has been altered without providing an accessible path of travel to that area, and subsequent alterations of that area, or a different area on the same path of travel, are undertaken within three years of the original alteration, the total cost of alterations to the primary function areas on that path of travel during the preceding three year period shall be considered in determining whether the cost of making that path of travel accessible is disproportionate.

(2) Only alterations undertaken on or after March 15, 2011 shall be considered in determining if the cost of providing an accessible path of travel is disproportionate to the overall cost of the alterations.

(c) Accessibility standards and compliance date.

(1) If physical construction or alterations commence after July 26, 1992, but prior to September 15, 2010, then new construction and alterations subject to this section must comply with either UFAS or the 1991 Standards except that the elevator exemption contained at section 4.1.3(5) and section 4.1.6(1)(k) of the 1991 Standards shall not apply. Departures from particular requirements of either standard by the use of other methods shall be permitted when it is clearly evident that equivalent access to the facility or part of the facility is thereby provided.

(2) If physical construction or alterations commence on or after September 15, 2010 and before March 15, 2012, then new construction and alterations subject to this section may comply with one of the following: The 2010 Standards, UFAS, or the 1991 Standards except that the elevator exemption contained at section 4.1.3(5) and section 4.1.6(1)(k) of the 1991 Standards shall not apply. Departures from particular requirements of either standard by the use of other methods shall be permitted when it is clearly evident that equivalent access to the facility or part of the facility is thereby provided.

(3) If physical construction or alterations commence on or after March 15, 2012, then new construction and alterations subject to this section shall comply with the 2010 Standards.

(4) For the purposes of this section, ceremonial groundbreaking or razing of structures prior to site preparation do not commence physical construction or alterations.

(5) Noncomplying new construction and alterations.

(i) Newly constructed or altered facilities or elements covered by <u>§§ 35.151(a)</u> or (b) that were constructed or altered before March 15, 2012, and that do not comply with the 1991 Standards or with UFAS shall before March 15, 2012, be made accessible in accordance with either the 1991 Standards, UFAS, or the 2010 Standards.

(ii) Newly constructed or altered facilities or elements covered by <u>§§ 35.151(a)</u> or (b) that were constructed or altered before March 15, 2012 and that do not comply with the 1991 Standards or with UFAS shall, on or after March 15, 2012, be made accessible in accordance with the 2010 Standards.

Compliance dates for new construction and alterations	Applicable standards
Before September 15, 2010	1991 Standards or UFAS.
On or after September 15, 2010 and before March 15, 2012	1991 Standards, UFAS, or 2010 Standards.
On or after March 15, 2012	2010 Standards.

APPENDIX TO § 35.151(C)

(d) *Scope of coverage.* The 1991 Standards and the 2010 Standards apply to fixed or built-in elements of buildings, structures, site improvements, and pedestrian routes or vehicular ways located on a site. Unless specifically <u>stated</u> otherwise, the advisory notes, appendix notes, and figures contained in the 1991 Standards and the 2010 Standards explain or illustrate the requirements of the rule; they do not establish enforceable requirements.

(e) *Social service center establishments.* Group homes, halfway houses, shelters, or similar social service center establishments that provide either temporary sleeping accommodations or residential dwelling units that are subject to this section shall comply with the provisions of the 2010 Standards applicable to residential facilities, including, but not limited to, the provisions in sections 233 and 809.

(1) In sleeping rooms with more than 25 beds covered by this section, a minimum of 5% of the beds shall have clear floor space complying with <u>section 806.2</u>.3 of the 2010 Standards.

(2) Facilities with more than 50 beds covered by this section that provide common use bathing facilities shall provide at least one roll-in shower with a seat that complies with the relevant provisions of section 608 of the 2010 Standards. Transfer-type showers are not permitted in lieu of a roll-in shower with a seat, and the exceptions in <u>sections 608.3</u> and 608.4 for residential dwelling units are not permitted. When separate shower facilities are provided for men and for women, at least one roll-in shower shall be provided for each group.

(f) Housing at a place of education. Housing at a place of education that is subject to this section shall comply with the provisions of the 2010 Standards applicable to transient lodging, including, but not limited to, the requirements for transient lodging guest rooms in sections 224 and 806 subject to the following exceptions. For the purposes of the application of this section, the term "sleeping room" is intended to be used interchangeably with the term "guest room" as it is used in the transient lodging standards.

(1) Kitchens within housing units containing accessible sleeping rooms with mobility features (including suites and clustered sleeping rooms) or on floors containing accessible sleeping rooms with mobility features shall provide turning spaces that comply with <u>section 809.2</u>.2 of the 2010 Standards and kitchen work surfaces that comply with <u>section 804.3</u> of the 2010 Standards.

(2) Multi-bedroom housing units containing accessible sleeping rooms with mobility features shall have an accessible route throughout the unit in accordance with <u>section 809.2</u> of the 2010 Standards.

(3) Apartments or townhouse facilities that are provided by or on behalf of a place of education, which are leased on a year-round basis exclusively to graduate students or faculty, and do not contain any public use or common use areas available for educational programming, are not subject to the transient lodging standards and shall comply with the requirements for residential facilities in sections 233 and 809 of the 2010 Standards.

(g) Assembly areas. Assembly areas subject to this section shall comply with the provisions of the 2010 Standards applicable to assembly areas, including, but not limited to, sections 221 and 802. In addition, assembly areas shall ensure that -

(1) In stadiums, arenas, and grandstands, <u>wheelchair</u> spaces and companion seats are dispersed to all levels that include seating served by an accessible route;

(2) Assembly areas that are required to horizontally disperse <u>wheelchair</u> spaces and companion seats by <u>section 221.2</u>.3.1 of the 2010 Standards and have seating encircling, in whole or in part, a field of play or performance area shall disperse <u>wheelchair</u> spaces and companion seats around that field of play or performance area;

(3) <u>Wheelchair</u> spaces and companion seats are not located on (or obstructed by) temporary platforms or other movable structures, except that when an entire seating section is placed on temporary platforms or other movable structures in an area where fixed seating is not provided, in order to increase seating for an event, <u>wheelchair</u> spaces and companion seats may be placed in that section. When <u>wheelchair</u> spaces and companion seats are not required to accommodate persons eligible for those spaces and seats, individual, removable seats may be placed in those spaces and seats;

(4) Stadium-style movie theaters shall locate <u>wheelchair</u> spaces and companion seats on a riser or cross-aisle in the stadium section that satisfies at least one of the following criteria -

(i) It is located within the rear 60% of the seats provided in an auditorium; or

(ii) It is located within the area of an auditorium in which the vertical viewing angles (as measured to the top of the screen) are from the 40th to the 100th percentile of vertical viewing angles for all seats as ranked from the seats in the first row (1st percentile) to seats in the back row (100th percentile).

(h) *Medical care facilities.* Medical care facilities that are subject to this section shall comply with the provisions of the 2010 Standards applicable to medical care facilities, including, but not limited to, sections 223 and 805. In addition, medical care facilities that do not specialize in the treatment of conditions that affect mobility shall disperse the accessible patient bedrooms required by <u>section 223.2</u>.1 of the 2010 Standards in a manner that is proportionate by type of medical specialty.

(i) Curb ramps.

(1) Newly constructed or altered streets, roads, and highways must contain curb ramps or other sloped areas at any intersection having curbs or other barriers to entry from a street level pedestrian walkway.

(2) Newly constructed or altered street level pedestrian walkways must contain curb ramps or other sloped areas at intersections to streets, roads, or highways.

(j) Facilities with residential dwelling units for sale to individual owners.

(1) Residential dwelling units designed and constructed or altered by public entities that will be offered for sale to individuals shall comply with the requirements for residential facilities in the 2010 Standards, including sections 233 and 809.

(2) The requirements of paragraph (1) also apply to housing programs that are operated by public entities where design and construction of particular residential dwelling units take place only after a specific buyer has been identified. In such programs, the covered entity must provide the units that comply with the requirements for accessible features to those pre-identified buyers with disabilities who have requested such a unit.

(k) Detention and correctional facilities.

(1) New construction of jails, prisons, and other detention and correctional facilities shall comply with the 2010 Standards except that public entities shall provide accessible mobility features complying with <u>section 807.2</u> of the 2010 Standards for a minimum of 3%, but no fewer than one, of the total number of cells in a <u>facility</u>. Cells with mobility features shall be provided in each classification level.

(2) Alterations to detention and correctional facilities. Alterations to jails, prisons, and other detention and correctional facilities shall comply with the 2010 Standards except that public entities shall provide accessible mobility features complying with section 807.2 of the 2010 Standards for a minimum of 3%, but no fewer than one, of the total number of cells being altered until at least 3%, but no fewer than one, of the total number of cells in a facility shall provide mobility features complying with section 807.2. Altered cells with mobility features shall be provided in each classification level. However, when alterations are made to specific cells, detention and correctional facility operators may satisfy their obligation to provide the required number of cells with mobility features by providing the required mobility features in substitute cells (cells other than those where alterations are originally planned), provided that each substitute cell -

(i) Is located within the same prison site;

(ii) Is integrated with other cells to the maximum extent feasible;

(iii) Has, at a minimum, equal physical access as the altered cells to areas used by inmates or detainees for visitation, dining, recreation, educational programs, medical services, work programs, religious services, and participation in other programs that the <u>facility</u> offers to inmates or detainees; and

(iv) If it is technically infeasible to locate a substitute cell within the same prison site, a substitute cell must be provided at another prison site within the corrections system.

(3) With respect to medical and long-term care facilities in jails, prisons, and other detention and correctional facilities, public entities shall apply the 2010 Standards technical and scoping requirements for those facilities irrespective of whether those facilities are licensed.

29.1 General Discussion

This chapter summarizes the regulations and implementing requirements local agencies shall follow regarding services, programs, and activities in or that affect the public right of way.

Section 504 of the Rehabilitation Act of 1973 (Section 504) states that no person with a disability shall be excluded from participation in, denied the benefits of, or be subjected to discrimination under any program or activity that receives Federal funding. This includes both transportation and non-transportation funding. Transportation funding includes funding from the United States Department of Transportation (USDOT) or the operating administrations under it (Federal Highway Administration, Federal Transit Administration, Federal Railroad Administration, Federal Aviation Administration, Research and Special Programs Administration, National Highway Traffic Safety Administration, or the U.S. Coast Guard).

Section 504 extends to the entire operations of a recipient or subrecipient, regardless of the specific funding source of a particular operation. Section 504 Regulations (49 CFR Part 27.5) define a recipient as any public entity that receives Federal financial assistance from the USDOT or its operating administrations either directly or through another recipient. An example of a recipient is WSDOT an example of a subrecipient is a local agency receiving USDOT funds through WSDOT, for projects/programs/activities administered by the local agency.

All public entities shall follow *the Americans with Disabilities Act of 1990* (ADA), regardless of funding sources. The ADA is mirrored after Section 504 but extends the reach of Federal accessibility laws to include those agencies that are not recipients or subrecipients of Federal funding. Title II (28 CFR Part 35) of the ADA specifically pertains to state and local governments.

The respective Federal funding agency (FHWA) and WSDOT will ensure that local agencies comply with Section 504 and the ADA. For more information about Section 504 and the ADA, please see WSDOT Equal Opportunity ADA website: www.wsdot.wa.gov/ EqualOpportunity/ADA.htm

Local agency public works staff should also refer to Chapter 42 of the Local Agency Guidelines (LAG) for technical information specific to public right-of-way facilities.

29.2 Assurances

Each local agency that receives Federal funding from the USDOT or its operating administrations (such as FHWA) shall submit a written assurance that all of its services, programs, and activities will be conducted in compliance with Section 504 and the ADA. The assurance shall be signed by the Agency Executive, and submitted to each agency (such as WSDOT) administering funds for the USDOT or an operating administration.

Federal aid projects administered through WSDOT require a Local Agency Agreement between the local agency and WSDOT. That agreement may serve as the local agency's assurance of compliance with Section 504 and the ADA as long as it is signed by the Agency Executive and states the following:

In accordance with Section 504 and the ADA, the Agency shall not discriminate on the basis of disability in any of its programs, services, or activities.

29.3 Administrative Requirements

The following list and Appendix 29.11 summarize some of the key requirements of Section 504 and the ADA. Note that when a requirement cites a number of employees, that number is the number of paid permanent, temporary, and contract employees regardless of whether the employees are full or part time.

- Each agency, regardless of the number of employees and funding sources, shall ensure that its services, programs, and activities are accessible to persons with disabilities. Some things this includes are:
 - Transportation and community evacuation elements of emergency management programs/plans
 - Communications. Communications with persons with disabilities shall be as
 effective as communications with other persons. This applies to all forms of
 communications, including information posted on an agency's website (ref. Section
 508 of the Rehabilitation Act and the ADA), emergency services communications,
 pedestrian signal systems, etc.
 - Maintenance of programs and facilities. This includes maintaining accessibility of pedestrian facilities that may be impacted by overgrown vegetation, snow/ice, severe heaving/cracking of surfaces, construction work zones, etc. Pedestrian signals/pushbuttons must also be accessible and maintained in working order.
 - New construction and altered facilities.
- Each agency regardless of the number of employees shall designate at least one person as its ADA/504 Coordinator. The individual designated as the ADA/504 Coordinator is responsible for coordinating ADA/Section 504 compliance throughout the agency. The agency shall provide the name, office address, and telephone number of the ADA/504 Coordinator both internally and externally. This information is required to be posted in areas likely to be viewed by employees and the general public (such as the agency's Web page, etc.).
- Each agency regardless of the number of employees shall adopt and publish grievance/complaint procedures. These procedures shall be posted internally and externally and be made available in alternative formats that address the needs of persons with mobility, visual, and hearing disabilities. This information is required to be posted in areas likely to be viewed by employees and the general public (such as the agency's Web page).

- Each agency, regardless of the number of employees, shall provide public notice of its ADA provisions. This notice shall contain a brief description about how the agency will address ADA accessibility in its employment, communications, policies, and resolution of complaints. This notice shall be placed in locations and/or facilities that are accessible internally and externally and be available in alternative formats that address the needs of persons with mobility, visual, and hearing disabilities. Information placed on the agency's Web page counts as posting externally.
- Each agency, regardless of the number of employees, shall conduct a self-evaluation of its policies, programs, services, and activities to determine whether Section 504/ ADA accessibility requirements are being met. This includes all public right-of-way facilities. See Appendix 29.11. Each agency shall provide an opportunity for interested parties (i.e., persons with disabilities/advocacy groups) to participate in the process.
- Each agency with 50 or more employees shall develop a transition plan (See Section 29.4) when structural modifications, identified through a self-evaluation process, are necessary to achieve program accessibility under the ADA. While Section 504 regulations contain similar requirements, there is no employee threshold and the regulation is not as descriptive as the ADA regulations. Therefore, each agency with fewer than 50 employees that is a recipient or subrecipient of Federal financial assistance shall develop a program access plan. See Section 29.4 for the requirements of these plans.

An agency's self-evaluation and transition plan must cover all of the agency's programs (including facilities), services, and activities. The information contained in this chapter is intended to provide local agency transportation departments (i.e., public works) with guidance/expectations for addressing ADA accessibility requirements associated with public right-of-way facilities.

29.4 Transition Plan, Program Access Plan, and Accessible Pedestrian Signal and Pushbutton Policy

Each agency shall provide an opportunity for interested parties (i.e., persons with disabilities/advocacy groups) to participate in the process to develop a transition plan or program access plan.

FHWA considers transition plans and program access plans to be living documents. The applicable plan should be used in conjunction with the planning and prioritizing of projects, and for monitoring progress on completing modifications. If the time period of the plan is longer than one year, the plan shall identify steps that will be taken during each year of the transition period. FHWA also recommends that the plan be updated annually until all planned modifications have been completed.

Transition Plan

As stated in Section 29.3 of this chapter, agencies with 50 or more employees (ADA), regardless of funding source, shall develop a transition plan when structural modifications are necessary to achieve ADA compliance. Based on the agency's self-evaluation, at a minimum the plan shall:

- Identify the physical obstacles in the public entity's facilities that limit the accessibility
 of its programs or activities to individuals with disabilities, including those within the
 public right of way.
- Describe in detail the methods that will be used to make the facilities accessible.

- Specify the schedule for each facility and/or obstacle to be retrofitted. FHWA recommends that an agency include the estimated cost of each modification as part of the schedule, to assist in the budget and/or Transportation Improvement Program (TIP) preparation.
- Identify the official responsible for implementation of the plan. This is typically the agency's Executive, or the agency's designated ADA/504 Coordinator who has the authority to act on behalf of the agency's Executive.

Program Access Plan

As stated in Section 29.3, agencies with fewer than 50 employees and a recipient of Federal financial assistance are required to develop a program access plan. Similar to a transition plan, agencies shall:

- Identify the physical obstacles in the public entity's facilities that limit the accessibility
 of its programs or activities to individuals with disabilities, including those within the
 public right of way.
- Describe in detail the methods/actions needed to make the facilities accessible.
- Specify a schedule (milestones) of when the agency plans to make the necessary modifications.

Accessible Pedestrian Signal and Pushbutton (APS) Policy

Based on input from the U.S. Department of Justice (DOJ), it is FHWA's policy to require recipients and subrecipients (of FHWA funding) to establish a "reasonable and consistent" policy for installing accessible pedestrian signals and pushbuttons (APS) on all alteration and new construction projects, consistent with the requirements of Title II of the ADA (28 CFR Part 35.151) and Section 504 regulations (49 CFR Part 27.7(c)). This policy should be part of a transition plan, program access plan, or a stand-alone document if a transition plan or program access plan has not yet been completed. FHWA and WSDOT will work with local agencies to ensure that all new and altered pedestrian signal and pushbutton installations are usable by persons with visual disabilities.

29.5 Requirements for New Construction and Alterations in the Public Right of Way

Title II of the ADA requires that new and altered facilities be designed and constructed to be readily accessible to and usable by persons with disabilities.

New Construction

New construction projects address the construction of a new roadway, interchange, or other transportation facility where none existed before. New construction is expected to meet the highest level of ADA accessibility unless it is structurally impracticable to achieve full compliance. Full compliance will be considered structurally impracticable only when, in rare circumstances, the unique characteristics of terrain prevent full compliance.

Alterations

The vast majority of construction projects undertaken by local agency public works/ transportation departments are classified as alterations. An alteration is a change that affects or could affect the usability of a facility or part of a facility. Alterations include reconstruction, major rehabilitation, widening, resurfacing (e.g., asphalt overlays and mill and fill), signal installation and upgrades, and projects of similar scale and effect. Alterations to existing facilities shall meet new construction standards unless it is technically infeasible to do so. If full ADA compliance cannot be achieved in an alteration, the agency shall alter the facility to provide the maximum degree of accessibility possible. The feasibility meant by this standard is physical possibility only. Neither cost nor schedule are factors in determining whether the ADA standards can be met, nor are they factors in determining the feasibility of complying with the standard.

An alteration project shall be planned, designed, and constructed so that the required accessibility improvements occur at the same time as the alteration. If a project involves resurfacing the street, connections between the sidewalk and street crossings (i.e., curb ramps) are considered to be within the scope of the alteration project. Any accessibility issues shall be addressed in conjunction with the resurfacing project, either prior to or at the same time as the resurfacing project. For the requirements for curb ramps during resurfacing projects, see USDOJ-USDOT's Joint Technical Assistance document, dated July 8, 2013 and the Supplement to this document, dated December 1, 2015; and a FHWA recorded webinar from FHWA, dated March 1, 2016.

Safe Harbor for Alterations

Both the Section 504 and ADA requirements contain a "safe harbor" provision. However, there is a difference in the timeline associated with the Section 504 safe harbor provision and the ADA safe harbor provision.

If an agency receives Federal financial assistance from USDOT – either directly or through another USDOT recipient (such as WSDOT), the agency is subject to the 2004 ADA Accessibility Guidelines (2004 ADAAG).

This became effective in 2006 when the USDOT adopted the 2004 ADA Accessibility Guideline (2004 ADAAG) into its Section 504 regulations. This document is known as the 2004 ADA Standards. The 2004 Standards have a "safe harbor" provision for curb ramps. The provision is that if a curb ramps was constructed or altered prior to November 29, 2006, and complies with either the 1991 ADA Standards for Accessible Design (1991 ADA Accessibility Guidelines) or the Uniform Federal Accessibility Standards (UFAS), it does not need to be modified as part of a roadway resurfacing project. If this is not the case, or if the curb ramp is in disrepair then the curb ramp and its detectable warnings (truncated domes) must shall be brought into compliance with the 2004 Standards) at the time of an alternation. As mentioned above in Section 29.1, if an agency receives Federal financial assistance from USDOT – either directly or through another DOT recipient (such as WSDOT), then the agency is subject to the 2004 ADAAG as part of the USDOT Section 504 regulations.

For those agencies who are not a recipient or subrecipient of Federal financial assistance from USDOT, the safe harbor provision in the 2010 ADA Standards for Accessible Design (2010 Standards) applies. Under the 2010 Standards' safe harbor provision, if curb ramps were built or altered (in existing facilities) prior to March 15, 2012 and if they comply with

Item 2.

the 1991 Standards or the UFAS, they do not need to be modified as part of a resurfacing project.

However, if an existing curb ramp does not comply with either the 1991 Standards or the UFAS (including if the curb ramp is in a state of disrepair), then the Safe Harbor provision does not apply and the curb ramp would need to be brought into compliance with the 2010 Standards at the time of roadway alteration.

When curb ramps or abutting sidewalks abutting ramps are altered, they shall be reconstructed to meet the 2010 Standards. For additional curb ramp design guidance, see LAG manual Chapter 42.

Documentation for Structural Impracticability and Maximum Extent Feasible

While ADA/Section 504 regulations do not require documentation of the application of structural impracticability nor maximum extent feasible, both FHWA and the U.S. Access Board recommend that these instances be documented so the agency can support its decisions if challenged at a later date. The documentation of these instances should reveal the standard of care that guided engineering judgments. While careful documentation will not protect an agency against complaint, evidence of the considerations that led to the specific project solution may be persuasive in discussions with stakeholders or in court.

As described in the *Design Manual* M 22-01, WSDOT has a documentation procedure for applications of maximum extent feasible in alteration projects on state routes. If a local agency applies maximum extent feasible to a pedestrian facility located on a state route, it is WSDOT's expectation that the agency follow the WSDOT documentation procedure described in the *Design Manual* M 22-01. The completed documentation should be contained in local agency project files to document the agencies design efforts in complying with the ADA/Section 504 requirements.

If a local agency finds the need to apply maximum extent feasible to a pedestrian facility that is not located on a state route, the WSDOT documentation procedure does not need to be followed. However, it is highly recommended that the agency develop its own documentation protocol for such situations that is consistent with the FHWA and U.S. Access Board recommendations.

29.6 Monitoring and Enforcement

Responsibility for monitoring and enforcement of Section 504 rests with the Federal funding agency (such as FHWA). While USDOJ has the ultimate enforcement authority for ADA compliance, USDOJ has delegated monitoring and enforcement responsibility to several Federal executive agencies including the USDOT and its operating administrations (such as FHWA).

FHWA requires WSDOT to monitor and enforce the compliance with both Section 504 and the ADA of any entity receiving disbursement of either state or Federal funding through WSDOT. FHWA monitors WSDOT and local agency compliance through various means such as process and program reviews, construction inspections, PS&E reviews, and complaint investigations. If noncompliance is found, and the noncompliance is not corrected to FHWA's satisfaction, FHWA may terminate existing Federal funding or refuse to grant future funding.

29.7 Laws

- 29 USC 794 Section 504 of the Rehabilitation Act of 1973 (as amended by the Civil Rights Restoration Act of 1987)
- 42 USC 12111 Americans with Disabilities Act (Title II)

29.8 Regulations

- 28 CFR Part 35 (Title II) "Nondiscrimination on the Basis of Disability in State and Local Government Services"
- 49 CFR Part 27 (Section 504) "Nondiscrimination on the Basis of Disability in Programs or Activities Receiving Federal Financial Assistance"
- 49 CFR Part 37 "Transportation Services for Individuals with Disabilities (ADA)
- 49 CFR Part 38 "Americans with Disabilities Act (ADA) Accessibility Specifications for Transportation Vehicles"

29.9 Resources

- Chapters 1510 and 1515 of the Design Manual M 22-01
- Chapter 42 of this manual

29.10 Appendices

29.11 ADA Title II and Section 504 Regulatory References

Item 2.

ADA Title II and Rehabilitation Act Section 504 Regulatory References	Requirements for agencies with less than 50 employees	Requirements for agencies with 50 or more employees
Programs, Services, and Activities: Ensure that programs, services, and activities are accessible to persons with disabilities. (28 CFR Part 35.150(a) and (c))	✓	✓
ADA/504 Coordinator: Designate at least one responsible employee (ADA/504 Coordinator) and make the name and contact information available internally and externally. (28 CFR Part 35.107(a) and 49 CFR Part 27.13(a))	~	✓
Complaint/Grievance Procedures: Adopt and publish complaint/ grievance procedures. (28 CFR Part 35.107(b) and 49 CFR Part 27.13(b))	✓	✓
Notice of ADA Provisions: Provide a public notice of how the agency will address ADA accessibility in its employment, communications, policies, and resolution of complaints. (28 CFR 35.106)	~	✓
Self-evaluation2: Evaluate all services, policies, and practices for barriers that restrict / limit persons with disabilities from access to services, programs, and activities. (28 CFR Part 35.105(a) and 49 CFR Part 27.11(c)(2)(i) and (v))	~	~
Self-evaluation2: Maintain the completed self-evaluation on file and make it available for public inspection for at least three years following its completion. (28 CFR Part 35.105(c) and 49 CFR Part 27.11(c)(3)(ii):	~	~
Transition Plan2/Program Access Plan: Develop a transition plan or program access plan that outlines the structural modifications that must be made to those services, programs, and activities that are not accessible. (28 CFR Part 35.150(d) and 49 CFR Part 27.11(c)(2)(ii))	✓ program access plan	✓ transition plan (post it on the agency's website)
Accessible Pedestrian Signal and Pushbutton (APS) Policy2: Develop a "reasonable and consistent" policy for installing accessible pedestrian signals and pushbuttons when a transition plan has not yet been completed. (28 CFR Part 35.130 and 35.160a(1) and 49 CFR Part 27.7(c))	~	~

Notes:

¹Employees include paid permanent, temporary, and contract employees regardless of whether the employees are full or part time.

²Complete self-evaluations, and develop transition plans, program access plan and APS policies by engaging persons with disabilities and/or their advocates (28 CFR Parts 35.105 and 35.150 and 49 CFR Part 27.11(c) (2)).

DOJ/DOT Joint Technical Assistance on Title II of the ADA Requirements to Provide Curb Ramps when Streets, Roads, or Highways are Altered through Resurfacing (2013)

Supplement to DOJ/DOT Joint Technical Assistance (2015)

Prepared by

U.S. Department of Justice Civil Rights Division Disability Rights Section

U.S. Department of Transportation **Federal Highway Administration**

Department of Justice/Department of Transportation Joint Technical Assistance¹ on the Title II of the Americans with Disabilities Act Requirements to Provide Curb Ramps when Streets, Roads, or Highways are Altered through Resurfacing

Title II of the Americans with Disabilities Act (ADA) requires that state and local governments ensure that persons with disabilities have access to the pedestrian routes in the public right of way. An important part of this requirement is the obligation whenever streets, roadways, or highways are *altered* to provide curb ramps where street level pedestrian walkways cross curbs.² This requirement is intended to ensure the accessibility and usability of the pedestrian walkway for persons with disabilities.

An alteration is a change that affects or could affect the usability of all or part of a building or facility.³ Alterations of streets, roads, or highways include activities such as reconstruction, rehabilitation, *resurfacing*, widening, and projects of similar scale and effect.⁴ Maintenance activities on streets, roads, or highways, such as filling potholes, are not alterations.

Without curb ramps, sidewalk travel in urban areas can be dangerous, difficult, or even impossible for people who use wheelchairs, scooters, and other mobility devices. Curb ramps allow people with mobility disabilities to gain access to the sidewalks and to pass through center islands in streets. Otherwise, these individuals are forced to travel in streets and roadways and are put in danger or are prevented from reaching their destination; some people with disabilities may simply choose not to take this risk and will not venture out of their homes or communities.

Because resurfacing of streets constitutes an alteration under the ADA, it triggers the obligation to provide curb ramps where pedestrian walkways intersect the resurfaced streets. See <u>Kinney v. Yerusalim</u>, 9 F 3d 1067 (3rd Cir. 1993). This obligation has been discussed in a variety of technical assistance materials published by the Department of Justice beginning in 1994.⁵ Over the past few years, state and local governments have sought further guidance on the scope of the alterations requirement with respect to the provision of curb ramps when streets, roads or highways are being resurfaced. These questions have arisen largely due to the development of a variety of road surface treatments other than traditional road resurfacing, which generally involved the addition of a new layer of asphalt. Public entities have asked the Department of Transportation and the Department of Justice to clarify whether particular road surface treatments fall within the ADA definition of alterations, or whether they should be considered maintenance that would not trigger the obligation to provide curb ramps. This Joint Technical Assistance addresses some of those questions.

Where must curb ramps be provided?

Generally, curb ramps are needed wherever a sidewalk or other pedestrian walkway crosses a curb. Curb ramps must be located to ensure a person with a mobility disability can travel from a sidewalk on one side of the street, over or through any curbs or traffic islands, to the sidewalk on the other side of the street. However, the ADA does not require installation of ramps or curb ramps in the absence of a pedestrian walkway with a prepared surface for pedestrian use. Nor are curb ramps required in the absence of a curb, elevation, or other barrier between the street and the walkway.

When is resurfacing considered to be an alteration?

Resurfacing is an alteration that triggers the requirement to add curb ramps if it involves work on a street or roadway spanning from one intersection to another, and includes overlays of additional material to the road surface, with or without milling. Examples include, but are not limited to the following treatments or their equivalents: addition of a new layer of asphalt, reconstruction, concrete pavement rehabilitation and reconstruction, open-graded surface course, micro-surfacing and thin lift overlays, cape seals, and in-place asphalt recycling.

What kinds of treatments constitute maintenance rather than an alteration?

Treatments that serve solely to seal and protect the road surface, improve friction, and control splash and spray are considered to be maintenance because they do not significantly affect the public's access to or usability of the road. Some examples of the types of treatments that would normally be considered maintenance are: painting or striping lanes, crack filling and sealing, surface sealing, chip seals, slurry seals, fog seals, scrub sealing, joint crack seals, joint repairs, dowel bar retrofit, spot high-friction treatments, diamond grinding, and pavement patching. In some cases, the combination of several maintenance treatments occurring at or near the same time may qualify as an alteration and would trigger the obligation to provide curb ramps.

What if a locality is not resurfacing an entire block, but is resurfacing a crosswalk by itself?

Crosswalks constitute distinct elements of the right-of-way intended to facilitate pedestrian traffic. Regardless of whether there is curb-to-curb resurfacing of the street or roadway in general, resurfacing of a crosswalk also requires the provision of curb ramps at that crosswalk.

<u>1</u> The Department of Justice is the federal agency with responsibility for issuing regulations implementing the requirements of title II of the ADA and for coordinating federal agency compliance activities with respect to those requirements. Title II applies to the programs and activities of state and local governmental entities. The Department of Justice and the Department of Transportation share responsibility for enforcing the requirements of title II of the ADA with respect to the public right of way, including streets, roads, and highways.

<u>2 See</u> 28 CFR 35.151(*i*)(1) (Newly constructed or altered streets, roads, and highways must contain curb ramps or other sloped areas at any intersection having curbs or other barriers to entry from a street level pedestrian walkway) and 35.151(i)(2) (Newly constructed or altered street level pedestrian walkways must contain curb ramps or other sloped areas at intersections to streets, roads, or highways).

<u>3</u> 28 CFR 35.151(b)(1).

4 2010 ADA Accessibility Standards, section 106.5.

<u>5</u> See 1994 Title II Technical Assistance Manual Supplement, Title II TA Guidance: The ADA and City Governments: Common Problems; and ADA Best Practices Tool Kit for State and Local Governments: Chapter 6, Curb Ramps and Pedestrian Crossings under Title II of the ADA, available at <u>ada.gov</u>.

The Americans with Disabilities Act authorizes the Department of Justice (the Department) to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. This document provides informal guidance to assist you in understanding the ADA and the Department's regulations.

This guidance document is not intended to be a final agency action, has no legally binding effect, and may be rescinded or modified in the Department's complete discretion, in accordance with applicable laws. The Department's guidance documents, including this guidance, do not establish legally enforceable responsibilities beyond what is required by the terms of the applicable statutes, regulations, or binding judicial precedent.

U.S. Department of Transportation **Federal Highway Administration**

QUESTIONS & ANSWERS

Supplement to the 2013 DOJ/DOT Joint Technical Assistance on the Title II of the Americans with Disabilities Act Requirements To Provide Curb Ramps when Streets, Roads, or Highways are Altered through Resurfacing

The Department of Justice (DOJ)/Department of Transportation (DOT) <u>Joint Technical Assistance on the Title</u> <u>II of the Americans with Disabilities Act [ADA] Requirements to Provide Curb Ramps when Streets, Roads, or</u> <u>Highways are Altered through Resurfacing</u> (Joint Technical Assistance) was published on July 8, 2013. This document responds to frequently asked questions that the Federal Highway Administration (FHWA) has received since the technical assistance document was published. In order to fully address some questions, the applicable requirements of Section 504 of the Rehabilitation Act of 1973 that apply to public entities receiving Federal funding from DOT, either directly or indirectly, are also discussed. This document is not a standalone document and should be read in conjunction with the <u>2013 Joint Technical Assistance</u>.

Q1: When a pavement treatment is considered an alteration under the ADA and there is a curb ramp at the juncture of the altered road and an existing sidewalk (or other prepared surface for pedestrian use), but the curb ramp does not meet the current ADA Standards, does the curb ramp have to be updated to meet the current ADA Standards at the time of the pavement treatment?

A1: It depends on whether the existing curb ramp meets the appropriate accessibility standard that was in place at the time it was newly constructed or last altered.

When the Department of Justice adopted its revised title II ADA Regulations including the updated ADA Standards for Accessible Design (2010 Standards,¹ as defined in 28 CFR 35.151), it specified that "(e)lements that have not been altered in existing facilities on or after March 15, 2012, and that comply with the corresponding technical and scoping specifications for those elements in either the 1991 Standards or in the Uniform Federal Accessibility Standards (UFAS) ... are not required to be modified in order to comply with the requirements set forth in the 2010 Standards." 28 C.F.R. 35.150(b)(2)(i). As a result of this "safe harbor" provision, if a curb ramp was built or altered prior to March 15, 2012, and complies with the requirements for curb ramps in either the 1991 ADA Standards for Accessible Design (1991 Standards, known prior to 2010 as the 1991 ADA Accessibility Guidelines, or the 1991 ADAAG) or UFAS, it does **not** have to be modified to comply with the requirements in the 2010 Standards. However, if that existing curb ramp did not comply with either the 1991 Standards or UFAS as of March 15, 2012, then the safe harbor does not apply and the curb ramp must be brought into compliance with the requirements of the 2010 Standards concurrent with the road alteration. *See* 28 CFR 35.151(c) and (i).

Note that the requirement in the 1991 Standards to include detectable warnings on curb ramps was suspended for a period between May 12, 1994, and July 26, 1998, and again between December 23, 1998, and July 26, 2001. If a curb ramp was newly constructed or was last altered when the detectable warnings requirement was suspended, and it otherwise meets the 1991 Standards, Title II of the ADA does not require that the curb ramp be modified to add detectable warnings in conjunction with a road resurfacing alteration project. See Question #14 however, for a discussion of the DOT Section 504 requirements, including detectable warnings.

Q2: The Joint Technical Assistance states that "[r]esurfacing is an alteration that triggers the requirement to add curb ramps if it involves work on a street or roadway spanning from one intersection to another, and includes overlays of additional material to the road surface, with or without milling." What constitutes "overlays of additional material to the road surface" with respect to milling, specifically, when a roadway surface is milled and then overlaid at the same height (i.e., no material is added that exceeds the height of what was present before the milling)?

A2: A project that involves milling an existing road, and then overlaying the road with material, regardless of whether it exceeds the height of the road before milling, falls within the definition of "alteration" because it is a change to the road surface that affects or could affect the usability of the pedestrian route (crosswalk). *See Kinney v. Yerusalim*, 9 F.3d 1067 (3rd Cir. 1993). Alterations require the installation of curb ramps if none previously existed, or upgrading of non-compliant curb ramps to meet the applicable standards, where there is an existing pedestrian walkway. *See* also Question 8.

Q3: If a roadway resurfacing alteration project does not span the full width of the road, do I have to put in curb ramps?

A3: It depends on whether the resurfacing work affects a pedestrian crosswalk. If the resurfacing affects the crosswalk, even if it is not the full roadway width, then curb ramps must be provided at both ends of the crosswalk. *See* 28 CFR 35.151(i).

Public entities should not structure the scope of work to avoid ADA obligations to provide curb ramps when resurfacing a roadway. For example, resurfacing only between crosswalks may be regarded as an attempt to circumvent a public entity's obligation under the ADA, and potentially could result in legal challenges.

If curb ramp improvements are needed in the vicinity of an alteration project, it is often cost effective to address such needs as part of the alteration project, thereby advancing the public entity's progress in meeting its obligation to provide program access to its facilities. *See* Question 16 for further discussion.

Q4: When a road alteration project triggers the requirement to install curb ramps, what steps should public (State or local) entities take if they do not own the sidewalk right-of-way needed to install the required curb ramps?

A4: The public entity performing the alteration is ultimately responsible for following and implementing the ADA requirements specified in the regulations implementing title II. At the time an alteration project is scoped, the public entity should identify what ADA requirements apply and whether the public entity owns sufficient right-of-way to make the necessary ADA modifications. If the public entity does not control sufficient

right-of-way, it should seek to acquire the necessary right-of-way. If a complaint is filed, the public entitie Item 2. likely need to show that it made reasonable efforts to obtain access to the necessary right-of-way.

Q5: The Joint Technical Assistance is silent on when it becomes effective. Is there an effective date for when States and local public entities must comply with the requirements discussed in the technical assistance?

A5: The Joint Technical Assistance, as well as this Supplement to it, does not create any new obligations. The obligation to provide curb ramps when roads are altered has been an ongoing obligation under the regulations implementing title II of the ADA (28 CFR 35.151) since the regulation was initially adopted in 1991. This technical assistance was provided to respond to questions that arose largely due to the development of a variety of road surface treatments, other than traditional road resurfacing, which generally involved the addition of a new layer of asphalt. Although the Joint Technical Assistance was issued on July 8, 2013, public entities have had an ongoing obligation to comply with the alterations requirements of title II and should plan to bring curb ramps that are or were part of an alteration into compliance as soon as possible.

Q6: Is the curb ramp installation work required to be a part of the Plans, Specifications and Estimate package for an alteration project or can the curb ramp work be accomplished under a separate contract?

A6: The curb ramp installation work can be contracted separately, but the work must be coordinated such that the curb ramp work is completed prior to, or at the same time as, the completion of the rest of the alteration work. See 28 CFR 35.151(i).

Q7: Is a curb ramp required for a sidewalk that is not made of concrete or asphalt?

A7: The Joint Technical Assistance states that "the ADA does not require installation of ramps or curb ramps in the absence of a pedestrian walkway with a prepared surface for pedestrian use." A "prepared surface for pedestrian use" can be constructed out of numerous materials, including concrete, asphalt, compacted soil, decomposed granite, and other materials. Regardless of the materials used to construct the pedestrian walkway, if the intent of the design was to provide access to pedestrians, then curb ramps must be incorporated where an altered roadway intersects the pedestrian walkway. See 28 CFR 35.151(i).

Q8: If an existing curb ramp is replaced as part of a resurfacing alteration, is there an obligation to address existing obstacles on the adjacent sidewalk at the same time?

A8: No. The Joint Technical Assistance addresses those requirements that are triggered when a public entity alters a roadway where the roadway intersects a street level pedestrian walkway (28 CFR 35.151(i)). Public entities are required to address other barriers on existing sidewalks, such as steep cross slopes or obstructions, as part of their on-going program access and transition plan obligations under title II of the ADA and Section 504 and in response to requests for reasonable modifications under the ADA or reasonable accommodations under Section 504. See 28 CFR 35.105, 35.130(b)(7), and 35.150(d); see also 49 CFR 27.7(e), 27.11(c)(2).

Q9: Several pavement preservation treatment types are not listed in the technical assistance. If the treatment type is not specifically on the list of maintenance treatments, is it an alteration?

A9: New treatments are always being developed and the best practice is for the City or other local pub entity conducting the work, the State transportation agency, and FHWA to work together to come to an agreement on a reasonable determination of whether the unlisted treatment type is an alteration or maintenance and document their decisions. If the new treatment can be deemed to be the equivalent of any of the items listed as alterations, it is a reasonable interpretation that they are in fact alterations and should be treated as such.

Q10: When does a combination of two or more 'maintenance' treatments rise to the level of being an alteration?

A10: The list of the pavement types that are considered maintenance, as stated in the 2013 Joint Technical Assistance document, are Chip Seals, Crack Filling and Sealing, Diamond Grinding, Dowel Bar Retrofit, Fog Seals, Joint Crack Seals, Joint Repairs, Pavement Patching, Scrub Sealing, Slurry Seals, Spot High-Friction Treatments, and Surface Sealing. The combination of two or more maintenance treatments may rise to the level of being an alteration.

The best practice is for the City or other local public entity conducting the work, the State transportation agency, and FHWA to work together to come to an agreement on a reasonable determination, document their policies, and apply that determination consistently in their locality.

Q11: When will utility trench work require compliance with ADA curb ramp requirements?

A11: The answer to this question depends on the scope and location of the utility trench work being done. If the utility trench work is limited to a portion of the pavement, even including a portion of the crosswalk, repaving necessary to cover the trench would typically be considered maintenance and would not require simultaneous installation or upgrading of curb ramps. Public entities should note that the ADA requires maintenance of accessible features, and as such, they must ensure that when the trench is repaved or other road maintenance is performed, the work does not result in a lesser level of accessibility. *See* 28 CFR 35.133(a). If the utility work impacts the curb at a pedestrian street crossing where no curb ramp exists, the work affecting the curb falls within the definition of "alteration," and a curb ramp must be constructed rather than simply replacing the curb. *See* 28 CFR 35.151(b) and 35.151(i).

If a public entity is unsure whether the scope of specific trench work and repair/repaving constitutes an alteration, the best practice is for the public entity to work together with the State transportation agency and the FHWA Division to come to an agreement on how to consistently handle these situations and document their decisions.

Q12: Is full-depth pavement patching considered maintenance?

A12: The answer to this question depends on the scope and location of the pavement patch. If the pavement patch work is limited to a portion of the pavement, even including a portion of the crosswalk, patching the pavement would typically be considered maintenance and would not require simultaneous installation or upgrading of curb ramps. Public entities should note that the ADA requires maintenance of accessible features, and as such, they should ensure that when the pavement is patched or other road maintenance is performed, the work does not result in a lesser level of accessibility. *See* 28 CFR 35.133(a). If the pavement

patching impacts the curb at a pedestrian street crossing where no curb ramp exists, the work affecting *Item 2.* curb falls within the definition of "alteration," and a curb ramp must be constructed rather than simply replacing the curb. *See* 28 CFR 35.151(b) and 35.151(i).

If a public entity is unsure whether the scope of specific full-depth pavement patching constitutes an alteration, the best practice is for the public entity to work together with the State transportation agency and the FHWA Division to come to an agreement on how to consistently handle these situations and document their decisions.

Q13: Do any other requirements apply to road alteration projects undertaken by public entities that receive Federal financial assistance from DOT either directly or indirectly, even if such financial assistance is not used for the specific road alteration project at issue?

A13: Yes, if a public entity receives any Federal financial assistance from DOT whether directly or through another DOT recipient, then the entity must also apply DOT's Section 504 requirements even if the road alteration project at issue does not use Federal funds. *See* 49 CFR 27.3 (applicability of DOT's Section 504 requirements) and 27.5 (definition of "program or activity").

DOT's Section 504 disability nondiscrimination regulations are found at 49 CFR Part 27. These regulations implement Section 504 of the Rehabilitation Act of 1973 (Section 504). In 2006, DOT updated its accessibility standards by adopting the 2004 Americans with Disabilities Act Accessibility Guidelines (2004 ADAAG²) into its Section 504 regulations at 49 CFR 27.3 (referencing 49 CFR Part 37, Appendix A). These requirements replaced the previously applicable ADA Standards for Accessible Design (1991) (formerly known as 1991 ADAAG). At that time, DOT's regulation adopted a modification to Section 406 of the 2004 ADAAG which required the placement of detectable warnings on curb ramps.

The revised DOT Section 504 regulation also provided a "safe harbor" provision (similar to the ADA provision discussed in Question 1) that applies to curb ramps that were newly constructed or altered by entities receiving Federal financial assistance from DOT and that were in compliance with the 1991 ADAAG requirements prior to November 29, 2006. If the "safe harbor" applies, these curb ramps are still considered compliant and do not have to be modified to add detectable warnings unless they are altered after November 29, 2006. The DOT "safe harbor" provision is found at 49 CFR 37.9(c). DOT's Section 504 regulations (49 CFR 27.19(a)) require compliance with 49 CFR Part 37.

The Section 504 safe harbor does not apply, however, if, at the time of the road alteration project, the existing curb ramp does not comply with the 1991 ADAAG and at that time it must be brought into compliance with the current DOT Section 504 requirements (2004 ADAAG) including detectable warnings.

Q14: Does the Section 504 safe harbor apply to curb ramps built in compliance with 1991 ADAAG during the time period when the requirement for detectable warnings was suspended and the roadway is now being resurfaced where it intersects the pedestrian walkway?

A14: If the curb ramps that were built or altered prior to November 29, 2006 were fully compliant with 1991 ADAAG at the time that the detectable warnings requirements were suspended, then the DOT Section 504

safe harbor applies to them and the recipient does not have to add detectable warnings as a result of a *Item 2.* resurfacing project.

Q15: In addition to the obligations triggered by road resurfacing alterations, are there other title II or Section 504 requirements that trigger the obligation to provide curb ramps?

A15: In addition to the obligation to provide curb ramps when roads are resurfaced, both DOJ's title II ADA regulation and DOT's Section 504 regulation (applicable to recipients of DOT Federal financial assistance), require the provision of curb ramps if the sidewalk is installed or altered at the intersection, during new construction, as a means of providing program accessibility, and as a reasonable modification under title II or a reasonable accommodation under Section 504.

New Construction and Alterations

DOJ's title II ADA regulation provides that newly constructed or altered streets, roads, and highways must contain curb ramps or other sloped areas at any intersection having curbs or other barriers to entry from a street level pedestrian walkway. In addition, the regulation provides that newly constructed or altered street level pedestrian walkways must contain curb ramps or other sloped areas at intersections to streets, roads, or highways. *See* 28 CFR 35.151(i). These curb ramps must comply with the 2010 Standards.³

DOT's Section 504 Federally assisted regulation also requires the provision of curb ramps in new construction and alterations. *See* 49 CFR 27.19(a) (requiring recipients of DOT financial assistance to comply with DOJ's ADA regulation at 28 CFR Part 35, including the curb ramp requirements at 28 CFR 35.151(i)); 49 CFR 27.75 (a)(2) (requiring all pedestrian crosswalks constructed with Federal financial assistance to have curb cuts or ramps).

Program Accessibility

Both DOJ's title II ADA regulation and DOT's Section 504 regulation require that public entities/recipients operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities. This obligation, which is known as providing "program accessibility," includes a requirement to evaluate existing facilities in the public right-of-way for barriers to accessibility, including identifying non-existent or non-compliant curb ramps where roads intersect pedestrian access routes (sidewalks or other pedestrian walkways). After completing this self-evaluation, a public entity/recipient must set forth a plan for eliminating such barriers so as to provide overall access for persons with disabilities. *See* 28 CFR 35.150, and 49 CFR 27.11(c).

Since March 15, 2012, the DOJ title II regulation requires the use of the 2010 Standards for structural changes needed to provide program access. However, in accordance with the ADA safe harbor discussed in Question 1, if curb ramps constructed prior to March 15, 2012 already comply with the curb ramp requirements in the 1991 Standards, they need not be modified in accordance with the 2010 Standards in order to provide program access, unless they are altered after March 15, 2012.

Similarly, DOT's Section 504 "safe harbor" allows curb ramps that were newly constructed or altered prior to November 29, 2006, and that meet the 1991 ADAAG to be considered compliant.⁴ Elements not coverged.

under the safe harbor provisions may need to be modified to provide program access and should be incorporated into a program access plan for making such modifications. 49 CFR 27.11(c)(2).

Under Section 504, self-evaluations and transition plans should have been completed by December 29, 1979. Under the ADA, transition plans should have been completed by July 26, 1992, and corrective measures should have been completed by January 26, 1995. While these deadlines have long since passed, entities that did not develop a transition plan prior to those dates should begin immediately to complete their self-evaluation and develop a comprehensive transition plan.

Reasonable Modification /Accommodation

In addition to alteration and program accessibility obligations, public entities may have an obligation under title II and Section 504 to undertake curb ramp construction or alteration as a "reasonable modification/accommodation" in response to a request by, or on behalf of, someone with a disability. Such a request may be made to address a non-compliant curb ramp outside of the schedule provided in the public entity's transition plan. A public entity must appropriately consider such requests as they are made. 28 CFR 35.130(b)(7); 49 CFR 27.7(e).

 $\underline{1}$ The 2010 Standards can be found on DOJ's website at

http://www.ada.gov/2010ADAstandards_index.htm.

2 In 2004, the United States Architectural and Transportation Barriers Board (U.S. Access Board)

published the Americans with Disabilities Act Accessibility Guidelines (2004 ADAAG), which serve as

the basis of the current enforceable ADA standards adopted by both DOT and DOJ.

3 The 2010 Standards include a provision on equivalent facilitation that allows covered entities to use

other designs for curb ramps if such designs provide equal or greater access. *See* section 103 of the <u>2010</u> <u>Standards</u>.

<u>4</u> The DOT "safe harbor" provision is found at 49 CFR 37.9(c). DOT's Section 504 regulations (49 CFR 27.19(a)) require compliance with 49 CFR Part 37.

The Americans with Disabilities Act authorizes the Department of Justice (the Department) to provide technical assistance to individuals and entities that have rights or responsibilities under the Act. This document provides informal guidance to assist you in understanding the ADA and the Department's regulations.

This guidance document is not intended to be a final agency action, has no legally binding effect, and may be rescinded or modified in the Department's complete discretion, in accordance with applicable laws. The Department's guidance documents, including this guidance, do not establish legally enforceable responsibilities beyond what is required by the terms of the applicable statutes, regulations, or binding judicial precedent.

SIGNAL GENERAL NOTES

- ALL WORK SHALL BE IN ACCORDANCE WITH THE WSDOT/APWA STANDARD PLANS, STANDARD SPECIFICATIONS, CITY OF SNOQUALMIE STANDARDS, KING COUNTY TRAFFIC REQUIREMENTS, THESE PLANS, AND SPECIAL PROVISIONS.
- UTILITY LOCATION (DIAL-A-DIG) PRIOR TO CONSTRUCTION SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR. CONFLICTS SHALL BE BROUGHT TO THE ATTENTION OF THE ENGINEER FOR RESOLUTION.
- THE LOCATIONS OF ALL CONDUITS AND JUNCTION BOXES SHOWN ON THE PLANS ARE FOR GRAPHICAL PRESENTATION ONLY AND FINAL LOCATIONS SHALL BE DETERMINED BY THE CONTRACTOR AND VERIFIED BY THE ENGINEER IN THE FIELD.
- ALL NEW JUNCTION BOXES PLACED IN THE SIDEWALKS SHALL HAVE SKID RESISTANT LIDS AND FRAMES. JUNCTION BOXES AND VAULTS SHALL NOT BE PLACED IN ADA CURB RAMPS OR ADA CURB RAMP I ANDINGS
- ALL NEW CONDUIT SHALL BE INSTALLED IN CITY OF SNOQUALMIE RIGHT-OF-WAY
- FOR SIGNAL SYSTEMS COORDINATION WITH THE CITY OF SNOQUALMIE, CONTRACTOR SHALL CONTACT KING COUNTY SIGNAL MAINTENANCE DEPARTMENT REPRESENTATIVE MARK PARRETT AT (206) 396-3763.
- CONTRACTOR SHALL PROTECT SIGNAL CONTROLLER CABINET AND ALL ASSOCIATED CONDUIT/WIRING DURING CONSTRUCTION.
- 8. ALL NEW FOUNDATION LOCATIONS SHALL BE APPROVED BY THE ENGINEER PRIOR TO EXCAVATION.

Appendix A – ADA Compliance Checklists, Ramp Existing Conditions, and Street View Appendix B – Previous MEF Documentation within Project Limits Appendix C – ADA MEF Ramp Existing Condition Plans

INTRODUCTION

The purpose of this document is to provide a record of Americans with Disabilities Act (ADA) accessibility compliance for pedestrian facilities within the Snoqualmie Parkway Rehabilitation Project footprint. The affected pedestrian facilities for this project have been designed to meet accessibility guidelines for pedestrians with disabilities to the maximum extent feasible, given the existing site conditions.

PROJECT DESCRIPTION

The purpose of the project is to grind and inlay the existing travel lanes of Snoqualmie Parkway from SE 99th St to SR 202 (Railroad Ave SE) to extend the life of the travel way while improving the pedestrian facilities. In this case, the overlay is considered an improvement to the roadway crossings and the proposed project improvements necessitate evaluation of the pedestrian access route, curb ramps, pedestrian push buttons and pedestrian signals through the project limits. Improvements include grind and overlay pavement rehabilitation, loop replacements, ADA improvements including ramps and pedestrian push buttons at signalized and non-signalized intersections, channelization; and other related improvements all while keeping Snoqualmie Parkway open and passable to traffic.

EXISTING CONDITIONS

The existing corridor of Snoqualmie Parkway within the project limits is typically a five-lane roadway section, which includes a planted median in the center lane throughout most of the corridor with turn pockets at the intersections. The topography of Snoqualmie Parkway and the cross streets connecting into this arterial are hilly in nature.

ADA COMPLIANCE DESIGN GUIDELINES

The design criteria guidance for ADA compliance for this project is the Revised Draft Guidelines for Accessible Public Rights-of-Way, February 13, 2013 (the 2013 version of the PROWAG). Based on these guidelines, the following determinations have been made for this project:

- Where existing elements are altered, each altered pedestrian element within the limits or scope of the project shall comply with the requirements for new construction to the maximum extent feasible (section R202.3 Alterations).
- The accessibility requirements are to be applied to all areas of a facility within the scope or limits of the planned project (Advisory R201.1 Scope). Specific to this project, where the pedestrian circulation path is not being altered, the pedestrian circulation path is not required to be made compliant i.e., it is not required to be upgraded with this project to meet guidelines.

PEDESTRIAN FACILITIES – COMPLIANCE DETERMINATION

CROSSWALKS

Crosswalk Design and Analysis – PROWAG - R302.6.1

Crosswalk redesign is not included in the project scope. Crosswalks will be replaced in-kind to match existing roadway conditions.

Snoqualmie Parkway Rehabilitation Project Maximum Extent Feasible Documentation for ADA Guidelines Compliance March 2023 KPG Psomas 9SN0010100

CURB RAMPS Curb Ramp Design and Analysis PROWAG - R304

Given that the scope of the project does not include roadway improvements outside of the curb returns, there is limited opportunity to chance the slope of the roadway grades and the associated gutter line and sidewalk slopes. Reducing the existing steep roadway grades would require reconstruction of the roadway and modifications to the roadway profile well beyond the intersection in order to flatten the roadway and gutter slopes to meet the 2013 PROWAG Guidelines. Roadway reconstruction will be a significant effort and is not within the original scope of the project.

The proposed curb ramps have been designed to the maximum extent feasible to meet ADA compliance guidelines and match into the existing site conditions.

SIDEWALKS Sidewalk Design and Analysis - PROWAG - R302

Portions of existing sidewalk segments will be replaced as a result of the project improvements, including the installation of signal conduit under existing sidewalk and areas associated with the proposed curb ramp construction.

All new sidewalks will be constructed with a cross slope of 2% or less. The transition segments between the new and existing sidewalks to match the new sidewalk cross slopes to the existing sidewalk conditions may exceed 2%. The curb return sidewalk areas may also have cross slopes greater than 2%. This is due to the combination of steep existing roadway grades (up to 10%) and existing steep sidewalk running slopes (up to 11.1%). To fully eliminate sidewalk cross slopes greater than 2%, lengths of sidewalk well beyond the project limits would have to be replaced, which is outside of the original project scope. The sidewalk segments have been designed to the maximum extent feasible to meet ADA compliance guidelines.

Pedestrian Push Button (PPB) Clear Space Design and Analysis – PROWAG - R209

References MUTCD 4E.08 through 4E.13 for accessible pedestrian signals and pedestrian pushbuttons.

The PPB criteria for compliance includes level clear space, push button height, maximum distance from curb to push button, location of button within envelope of crosswalk, and audible/vibrotactile indications. Similar to the curb ramp analysis, given the existing topography of the roadway and intersections, full reconstruction of the roadway profile would be necessary to meet the guidelines for level clear space around these existing PPB associated with the curb ramps.

MEF DOCUMENTATION

There are seven signalized intersections and two non-signalized intersections within the grind and overlay limits that were analyzed for current ADA compliance. The existing conditions of each ramp that requires a Maximum Extent feasible (MEF) is documented and noted in the Appendices. Each ramp was assigned a ramp number.

MEF Ramps with Proposed Improvements

The following ramps noted below are proposed for ramp replacement on this Snoqualmie Parkway Rehabilitation project, however there are several ADA components that will remain outside compliance due to surrounding existing conditions of travel lanes and topography of the adjacent sidewalk and Snoqualmie Parkway Rehabilitation Project March 2023 Maximum Extent Feasible Documentation KPG Psomas 9SNO010100

for ADA Guidelines Compliance

pedestrian access route (PAR). The ramp components that do not meet ADA requirements are indicated on the Construction Plans and will be constructed to the maximum extent feasible. See the ADA Compliance Checklist in Appendix A specific for each ramp.

- Better Way SE & Snoqualmie Parkway Ramps #
 - \circ SW 45 & 46
 - $\circ \quad NW-47 \ \& \ 48$

MEF ramps without Proposed Improvements

The following ramps noted below will not be modified with this project. They have ADA components outside compliance due to surrounding existing conditions of travel lanes and topography of the adjacent sidewalk and PAR. These ramps have been included in the City of Snoqualmie ADA Transition Master Plan and will be addressed in the future for modification. For the specific standards that could not be met with this project, see the ADA Compliance Checklist in Appendix A specific for each ramp.

 - o NE−15 & 16
- Better Way SE & Snoqualmie Parkway Ramps #
 - SE 49 & 50
 - NE 52

MEF ramps without Proposed Improvements with Previous MEF Documentation

The following ramps noted below have been documented with the City during the design on separate projects within the current project limits. These ramps will not be modified with this project. These ramps have been included in the City of Snoqualmie ADA Transition Master Plan and will be addressed in the future for modification. For the specific standards that could not be met with this project, see the MEF Documentation in Appendix B specific for each ramp.

SUMMARY

The City of Snoqualmie prioritized the top 33 of 59 ramps within the project limits for ADA revisions by identifying ramps that when modified could be brought to full ADA compliance except for the curb ramp running slope which is dictated by existing roadway grades. The determination for curb ramp replacement for this project also took into consideration the age of the ramp and signalized intersection. There are ramps built within the last 10 years along the Snoqualmie Parkway that have already been analyzed for ADA compliance to the maximum extent feasible following the allowed ADA guidelines and variances at the time.

Providing clear spaces that are level in all directions at all of the ramps within the project limits would require re-grading of the Snoqualmie parkway intersections which is outside the scope of this project. The clear spaces provided meet the PROWAG requirements to the maximum extent feasible, given the existing conditions and the overall scope of the project.

Location: Snoqualmie Parkway and SE Swenson Dr	
Quadrant: Southeast Corner	
Crossing: SE Swenson Dr	

RAMP				
Criteria – 3.04.2	Compliant?			
Running Slope is 8.3% Maximum	□ Yes	⊠ No 9.1% See Comment #1		
Cross Slope is 2% Maximum at Gutter line Bottom of Ramp	□ Yes	⊠ No 7.4% See Comment #1		
Cross Slope is 2% Maximum at Top of Ramp	\Box Yes	⊠ No 9.0% See Comment #1		
Left Flare Slope is 10% Maximum	🛛 Yes	□ No% See Comment #		
Right Flare Slope is 10% Maximum	□ Yes	No 15.5% See Comment #1		
Width is 4.0' Minimum	🛛 Yes	□ No See Comment #		
Detectable Warning Surface Present and Correct Location	🖾 Yes	□ No See Comment #		
Counter Slope of Gutter or Street is 5% Maximum	🛛 Yes	□ No% See Comment #		
Clear Space Provided Beyond Bottom Grade Break ⊠ Dimensions 4.0'x 4.0'Minimum ⊠ Fully within the width of the crosswalk ⊠ Outside Parallel Vehicle Lane (Note: 2% Slope requirement does not apply to this clear space)	⊠ Yes	□ No See Comment #		
Perpendicular Curb is Built to Curb at Right Angles	🛛 Yes	□ No See Comment #		
Ramp is Clear of Obstructions (including access covers)	🛛 Yes	□ No See Comment #		
Grade Breaks are Flush (no vertical discontinuity)	🛛 Yes	□ No See Comment #		

LANDING-TURNING SPACE

Criteria – 204.2.1	Complia	Compliant?		
Turning Space Present?	🛛 Yes	\Box No See Comment #		
Dimensions are 4.0' x 4.0' Min unless Constrained it is 4.0' x 5.0' Min.)	🛛 Yes	\Box No See Comment #		
Cross Slope is 2% Maximum	□ Yes	⊠ No 9.1% See Comment #2		
Running Slope is 2% Maximum	🛛 Yes	□ No% See Comment #		
Turning Space is clear of obstructions (including access covers)	🛛 Yes	\Box No See Comment #		

Snoqualmie Parkway Rehabilitation Project

Maximum Extent Feasible Documentation for ADA Guidelines Compliance Appendix A – RAMP #14

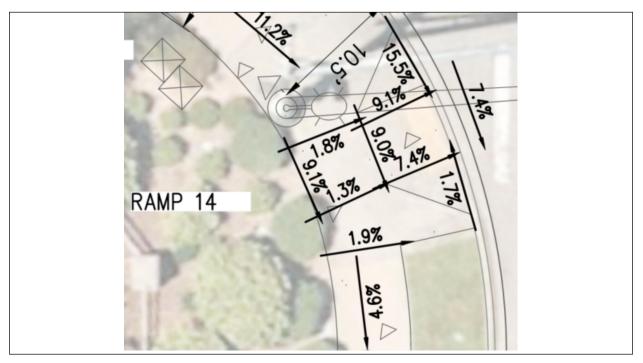

Criteria - 209	Compliant?		
Button Height (36" Min. – 48" Max) (Existing Acceptable) (New 42" Min)	🛛 Yes	🗆 No	See Comment #
Level Clear Space Width 48" Minimum	🛛 Yes	□ No	See Comment #
Level Clear Space Length 48" Minimum	🛛 Yes	□ No	See Comment #
Less than 9" Reach	🛛 Yes	□ No	See Comment #
Distance to Curb, Shoulder, or Pavement 10' Maximum	□ Yes	🖾 No	See Comment #3
Within 5' Crosswalk Envelope	🛛 Yes	□ No	See Comment #
Audible/Vibrotactile Indications (APS)	🛛 Yes	□ No	See Comment #

PEDESTRIAN PUSH BUTTON

Comments/Justification:

- 1. Existing roadway slope exceeds 2.0%, sidewalk and roadway redesign not part of project scope.
- 2. Existing roadway slope exceeds 2.0%, sidewalk and roadway redesign not part of project scope. Minimum 30" width and 48" length is achieved but exceeds 2.0% slope.
- 3. Existing PPB distance exceeds 10' maximum.

INTRODUCTION

The purpose of this documentation is to provide a record of the newly constructed curb ramps, crosswalks, sidewalk repair areas, accessible pedestrian signals and pedestrian push buttons for the City of Snoqualmie Snoqualmie Parkway Intersection Improvements project. Pavement overlay projects are required to include upgrades to affected pedestrian facilities to meet the Americans with Disabilities Act (ADA) requirements and guidelines. The affected pedestrian facilities have been constructed to meet accessibility guidelines by pedestrians with disabilities to the maximum extent feasible, given the existing site conditions.

PROJECT DESCRIPTION

This project includes restoration of two intersections of the Snoqualmie Parkway SE corridor and is funded with federal funds. Select design plan sheets showing project limits and proposed improvements are in Appendix A. The first intersection is Douglas Ave SE and the second intersection is Fairway Ave SE. The restoration work includes grind and overlay of the existing asphalt concrete pavement in the intersections. The project includes upgrading existing curb ramps, where crosswalks will be altered by the pavement overlay, to meet ADA guidelines.

EXISTING CONDITIONS

The existing corridor of Snoqualmie Parkway within the project limits is typically a five lane roadway section, which includes a planted median in the center lane throughout most of the corridor. The project corridor includes two signalized intersections.

ADA DESIGN GUIDELINES

The design and construction guidance for this project is the Revised Draft Guidelines for Accessible Public Rights-of-Way, November 23, 2005 (The 2005 version of the PROWAG), as specified by WSDOT. Based on these guidelines, the following determinations have been made for this project:

- A pavement resurfacing project is classified as an Alteration (Advisory section R202.1 General).
- Where existing elements are altered, each altered pedestrian element within the limits or scope of the project shall comply with the requirements for new construction to the maximum extent feasible (section R202.3 Alterations). For a roadway overlay project, the altered element would be part of the pedestrian circulation path this would specifically be the crosswalk (marked or unmarked) zone, which in turn would include the assessment and potential upgrades to crosswalks, pedestrian refuge islands, and curb ramps adjacent to the crosswalk.
- The accessibility requirements are to be applied to all areas of a facility within the scope or limits of the planned project (Advisory R201.1 Scope). Specific to this project, where the pedestrian circulation path is <u>not</u> being altered because it is outside the overlay limits of the planned project, the pedestrian circulation path is <u>not</u> required to comply i.e. it is not required to be upgraded with this project to meet guidelines.

PEDESTRIAN FACILITIES – ASSESSMENT AND DESIGN

The overlay limits of this project are the intersections of Douglas Ave SE and Fairway Ave SE. In general, this project does not include the overlay of cross streets.

The intent of this overlay project is to keep the overlay limits within the intersection from curb to curb of Douglas Ave SE and Fairway Ave SE. For this project, the City of Snoqualmie has included the replacement of the existing curb ramps that are in the intersections.

Crosswalks

Existing Crosswalk Analysis and Evaluation

The criteria for the cross slope of the crosswalk is 2% maximum where there is yield or stop control, and 5% maximum where there is <u>no</u> yield or stop control (e.g., a signalized intersection). The roadway running grade is also the cross slope of the crosswalk zones, thus the cross slope is generally dictated by the profile grade of the roadway and curb return grading.

The existing crosswalk cross slopes at the applicable intersections range as shown in the table below.

Crossing Location (Cross Street)	Intersection Leg	Existing Cross Slope Range
Douglas Ave SE	North Leg	3.3%** to 2.0%
Douglas Ave SE	East Leg	4.3%** to 7.0%**
Douglas Ave SE	South Leg	6.0%** to 0.0%
Douglas Ave SE	West Leg	1.5% to 3.5%**
Fairway Ave SE	North Leg	8.8%** to 10.3%**
Fairway Ave SE	East Leg	9.8%** to 11.0%**

Table 1: Existing Street Crossings - Cross Slopes

N/A = Not Applicable ** = Non-compliant

The crosswalk locations are shown in the Design Plan Sheets in Appendix A.

The relatively steeper cross slopes of the existing crosswalks are due to the relatively steeper roadway grades of the cross streets and/or to accommodate surface stormwater conveyance. The majority of the existing crosswalk cross slopes meet the 2005 PROWAG guidelines and are compliant, with the exceptions noted in Table I, above.

Crosswalk Design

Because this project is an overlay, the existing cross slopes of the crosswalks will generally remain the same. Reducing the existing relatively steeper grades or re-grading and re-directing surface stormwater would require reconstruction of the roadway and modifications to the roadway profile well beyond the intersections in order to table top the intersection legs in order to meet the 2005 PROWAG guidelines. This type of reconstruction would have been a very significant effort and was not within the original scope of the project.

Curb Ramps

The curb ramps within the project area are summarized below:

12 existing curb ramps within the project area

• 12 curb ramps will be upgraded

The Design Plan Sheets in Appendix A show the curb ramp locations and the project paving limits.

Existing Curb Ramp Analysis and Evaluation

Existing curb ramp features assessed include the slopes and dimensions of ramps and landings, slopes of flares, clear space, and detectable warning materials, placement, and dimensions. Dimensions and slopes were taken in the field using a tape measure and 4-foot smart level, and recorded for each ramp. Multiple slope measurements were taken for each ramp in various spots, and the maximum slope reading was used as the evaluation slope.

The placement of the pedestrian street crossing and the number of ramps serving the crossing was also evaluated. Curb ramps shall connect the pedestrian access route to each pedestrian street crossing within the width of the each crosswalk (2005 PROWAG Section R207 Curb Ramps and Blended Transitions). Typical crosswalk placement at intersections usually results in two curb ramps at each curb return.

Table 2 identifies all curb ramps along the project area that were identified as potential replacements, and summarizes whether or not the curb ramp is being upgraded; and if the proposed curb ramp will be fully compliant to the 2005 PROWAG; or if it has been designed to the maximum extent feasible. Detailed information identifying each curb ramp, design criteria, existing conditions for each curb ramp, status of compliancy or non-compliancy, and the proposed design is provided in Appendix B of this document.

Table 2: Existing Curb Ramp Compliancy and Summary of Proposed Design

Curb Ramp Design

Detailed information identifying each curb ramp, design criteria, existing conditions for each ramp, status of compliancy or non-compliancy, and the proposed design is provided in Appendix B of this document.

Some of the proposed curb ramps have cross slopes of the ramp or landing along the gutter line that are greater than 2% (2% is the maximum allowable cross slope of a ramp to meet accessibility standards) due to existing roadway grades that are steeper than 2%. Given that this is a pavement overlay project, there is limited opportunity to change the slope of the gutter line, and several of the proposed ramps (for perpendicular ramps) and landings (for parallel ramps) will continue to have cross slopes along the gutter line that exceed 2%. Reducing the existing steeper grades would require reconstruction of the roadway and modifications to the roadway profile well beyond the intersections in order to table top some of the intersection legs to meet the 2005 PROWAG guidelines. This type of reconstruction would be a very significant effort and is not within the original scope of the project. The curb ramps have been designed to the maximum extent feasible to fit the existing site conditions.

There are steep roadway grades at the intersection of Snoqualmie Parkway and Fairway Ave. SE. Curb ramps at this intersection have been designed to meet maximum running slope grades. The landings and pedestrian access route will be non-compliant due to the steep grades. With gutter grades ranging from 9.3% to 10.3% the cross slopes on the landings closely mimic the gutter grades in an effort to minimize slopes and the severity of grade breaks along the pedestrian route between the ramps and connections to adjacent sidewalks. The resulting cross slope for the east-west pedestrian access route is 3.5%. This slope is a result of grading limitations of the ramp and the close proximity of the existing right-of-way at the back of walk. Given the existing steep slopes, these areas have been designed towards meeting compliancy to the maximum extent feasible.

Sidewalks

Portions of existing sidewalk segments will be replaced as a result of the various project improvements, or as specified by the City. Segments of sidewalks will be replaced associated with curb ramp reconstruction areas.

The sidewalk segments are shown in the plans in Appendix A. All sidewalk is intended to be constructed with a cross slope of 2% or less, with the exception of new transition segments (roughly 5-feet) which will be used to match the new sidewalk areas to the existing sidewalk cross slopes. Due to the steep slopes on the northeast corner of Fairway Ave SE the cross slopes of the sidewalk exceed the 2% minimum, and given the steep slopes these areas have been designed towards meeting compliancy to the maximum extent feasible.

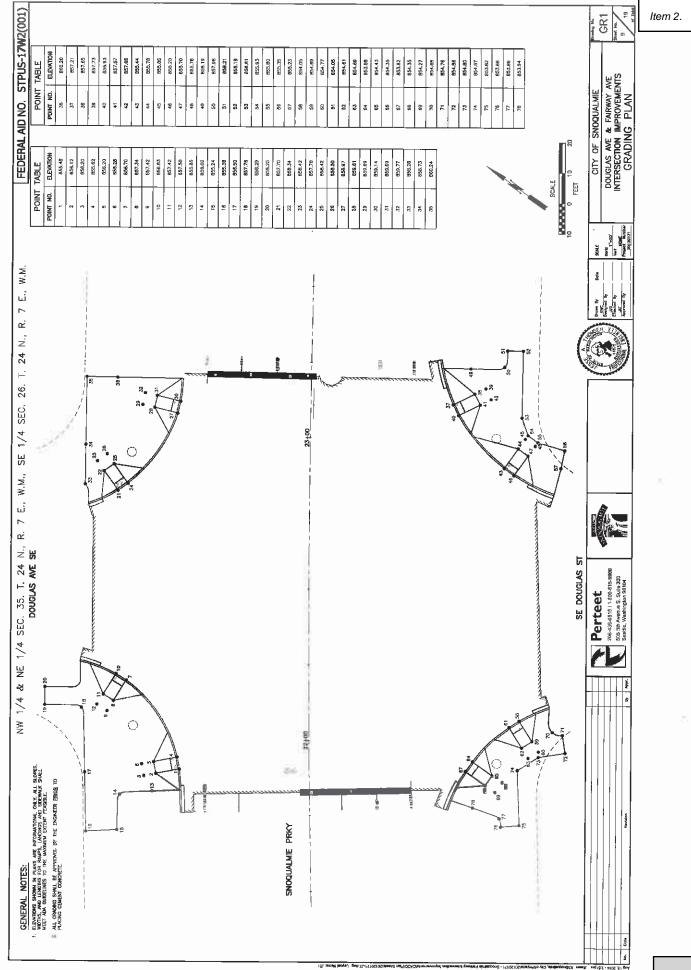

Pedestrian Push Buttons

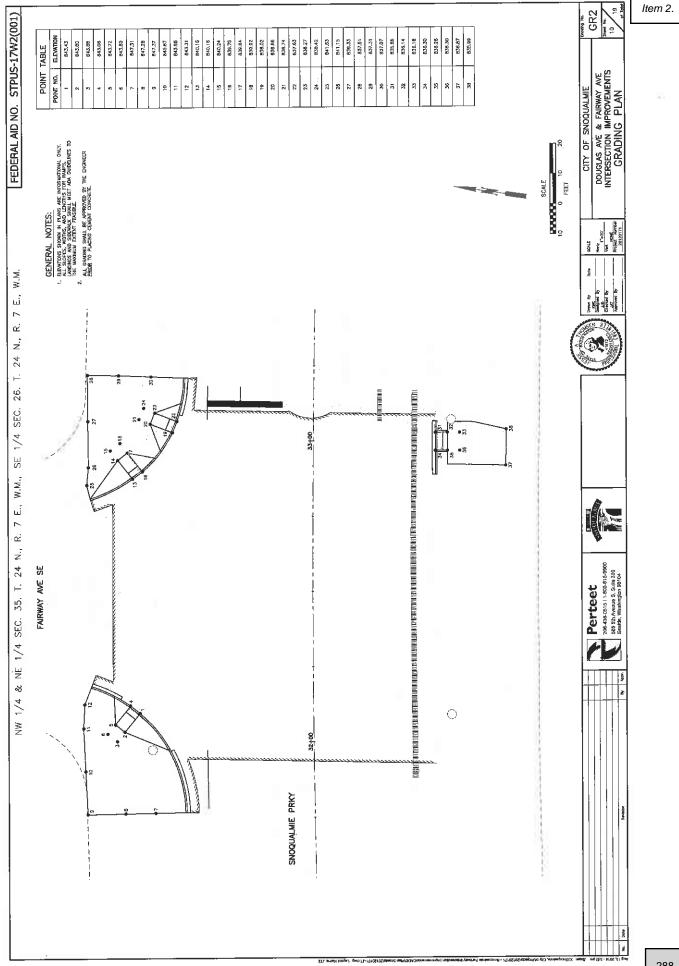

Existing Pedestrian Signal Analysis and Evaluation

Pedestrian push buttons are not being relocated or upgraded to APS as part of this project. While the landings or clear spaces that access the pedestrian push buttons are being altered, access to the buttons will be the same or will be improved. Reconstruction will result in similar access and grades. Grades may vary slightly from existing as a result of grade adjustments to improve curb ramp grading.

LIST OF APPENDICES

Appendix A: ADA Compliance Checklists and Ramp As-Builts

INTRODUCTION

The purpose of this document is to provide a record of Americans with Disabilities Act (ADA) accessibility compliance for pedestrian facilities, for the proposed curb ramps and associated elements for the City of Snoqualmie, Snoqualmie Parkway/Fisher Avenue HAWK Signal project. Where sidewalk will be replaced to install the new signal poles and pedestrian push buttons, it is required to upgrade the affected pedestrian facilities to meet the requirements and guidelines for accessibility associated with the ADA. The affected pedestrian facilities for this project have been designed to meet accessibility guidelines for pedestrians with disabilities to the maximum extent feasible, given the existing site conditions.

PROJECT DESCRIPTION

This project includes the installation of a HAWK signal system and associated pedestrian facility upgrades at the intersection of Snoqualmie Parkway and Fisher Avenue. The curb ramps located at the two corners where the pedestrian push buttons will be installed will be replaced (the northwest and southwest corners). A marked crosswalk and stop bars across Snoqualmie Parkway will also be installed. Design plan sheets showing project limits and proposed improvements are in Appendix A.

EXISTING CONDITIONS

The existing corridor of Snoqualmie Parkway within the project limits is typically a five lane roadway section, which includes a planted median in the center lane throughout most of the corridor. The intersection of Snoqualmie Parkway and Fisher Avenue is currently a non-signalized, two-way stop controlled intersection. The intersection topography is hilly in nature, going downhill along Snoqualmie Parkway from west to east and downhill along Fisher Avenue from north to south.

ADA COMPLIANCE DESIGN GUIDELINES

The design criteria guidance for ADA compliance for this project is the Revised Draft Guidelines for Accessible Public Rights-of-Way, November 23, 2005 (the 2005 version of the PROWAG). Based on these guidelines, the following determinations have been made for this project:

- Where existing elements are altered, each altered pedestrian element within the limits or scope of the project shall comply with the requirements for new construction to the maximum extent feasible (section R202.3 Alterations).
- The accessibility requirements are to be applied to all areas of a facility within the scope or limits of the planned project (Advisory R201.1 Scope). Specific to this project, where the pedestrian circulation path is not being altered, the pedestrian circulation path is not required to be made compliant i.e., it is not required to be upgraded with this project to meet guidelines.

PEDESTRIAN FACILITIES - COMPLIANCE DETERMINATION

The pedestrian facility improvements within the project area include the following:

- One crosswalk will be striped.
- Four existing curb ramps will be replaced.
- Two pedestrian push buttons (PPBs) will be installed.

Crosswalks

Crosswalk Design and Analysis

The criteria for the cross slope of a crosswalk is 2% maximum where there is yield or stop control, and 5% maximum where there is no yield or stop control. The crosswalk being striped as part of this project is across Snoqualmie Parkway which is not yield or stop controlled at the intersection of Fisher Avenue. The roadway running grade is also the cross slope of the crosswalk zones, thus the cross slope is generally dictated by the profile grade of the roadway and curb return grading. The roadway running grade is ranges from 3.6% to 4.6% at the location of the crosswalk, therefore the cross slope of the crosswalk does not exceed 5%. Since Snoqualmie Parkway is not yield or stop controlled at this location, per the 2005 PROWAG, this is a compliant situation.

The 2005 PROWAG states that the pedestrian access route shall be firm, stable, and slip resistant and the crosswalk is considered part of the pedestrian access route. Certain utility lids including drainage catch basin lids are not considered slip resistant. Therefore, if they are located within the pedestrian access route, it is a noncompliant condition. There is a catch basin solid lid located within the proposed crosswalk that is not slip resistant and is therefore non-compliant. The existing stormwater utility system would have to be relocated to move it out of the crosswalk and stormwater utility relocation is not within the original scope of the project. Since stormwater utility relocation is not within the original scope of the existing catch basin. Moving the crosswalk would require removing and replacing a portion of the planted median. As no work within the roadway outside of the curb returns is being completed, replacing the planted median is not within the original scope of the project. The crosswalk was designed to avoid the catch basin to the maximum extent feasible to fit the existing site conditions.

Curb Ramps

Curb Ramp Design and Analysis

It should be noted that there are two non-compliant elements in this project for most of the curb ramps. The ramp portions of the perpendicular ramps have a cross slope at the gutter line that will be greater than 2%. This is due to existing roadway grades that range from 2.8% to 8.3%. The corresponding landing within the curb ramp could be warped to achieve less than a 2% cross slope; however, in three out of the four proposed curb ramps, this would result in a severe grade break between the landing and the adjacent sidewalk since the adjacent sidewalk slopes are approximately 8%-12%. To reduce this severe grade break, three of the four curb ramp landings were designed to have cross slopes of 4%. These will be non-compliant elements of the curb ramps.

Given that the scope of this project does not include roadway improvements outside of the curb returns, there is limited opportunity to change the slope of the roadway grades and the associated gutter line slopes and sidewalk slopes. Reducing the existing steep roadway grades would require reconstruction of the roadway and modifications to the roadway profile well beyond the intersection in order to flatten some of the intersection legs to meet the 2005 PROWAG guidelines. This type of reconstruction would be a very significant effort and is not within the original scope of the project.

The curb ramps have been designed to the maximum extent feasible to meet ADA compliance guidelines and fit the existing site conditions. These, along with other non-compliant elements, are noted in the matrix (Table 1) on the following page.

Table 1. Curb Ramp Non-Compliant Elements and Summary of Justification.

.	Cate• or <mark>y</mark>			Proposed Non- Compliant Elements	Comments/Justification
Location, Direction Type of Ramp	Non-Compliant/ Retrofit to Full Compliance	Non-Compliant/ Retrofit to MEF	Existing Curb Ramp is Compliant		
<i>NW</i> Corner, Southbound Perpendicular Ramp		x		 Ramp cross slope Landing cross slope 	The cross slope of the ramp and landing will be non-compliant, as they will exceed 2%. The slopes are due to the existing grade of the road (6.3% at the gutter).
NW Corner, Eastbound Perpendicular Ramp		x		 Ramp cross slope Landing cross slope Left flare slope 	The cross slope of the ramp and landing will be non-compliant, as they will exceed 2%. The left flare will be non-compliant with a slope of 10.5%. The slopes are due to the existing grade of the road (4.2% at the gutter across the ramp and 7.2% at the gutter across the flare). The left flare has been extended to 15' to minimize the slope but cannot be extended further due to the proximity of the southbound ramp.
SW Corner, Northbound Perpendicular Ramp		x		 Ramp cross slope Landing cross slope 	The cross slope of the ramp and landing will be non-compliant, as they will exceed 2%. The slopes are due to the existing grade of the road (8.3% at the gutter).
SW Corner, Eastbound Perpendicular Ramp		Х		 Ramp cross slope Right flare slope 	The cross slope of the ramp will be noncompliant, as it will exceed 2%. The right flare will be non- compliant with a slope of 10.1%. The slopes are due to the existing grade of the road (2.8% at the gutter across the ramp and 6.8% at the gutter across the flare). The right flare has been extended to 15' to minimize the slope but cannot be extended further due to the proximity of the northbound ramp.

Sidewalks

Sidewalk Design and Analysis

Portions of existing sidewalk segments will be replaced as a result of the project improvements, including the installation of signal conduit under existing sidewalk and areas associated with the curb ramp reconstruction. The sidewalk segments are shown in the plans in Appendix A.

All sidewalk is intended to be constructed with a cross slope of 2% or less. However, there will be transition segments between the new and existing sidewalks which will be used to match the new sidewalk cross slopes to the existing sidewalk cross slopes which may be greater than 2%. In addition to these sidewalk transition areas, the curb return sidewalk areas may also have cross slopes greater than 2%. This is due to the combination of

3

steep gutter slopes (up to 8.3%) and existing steep sidewalk slopes (up to 16.4%). In order to eliminate sidewalk cross slopes greater than 2%, lengths of sidewalk well beyond the project limits would have to be replaced. This type of reconstruction and replacement of sidewalks is not within the original scope of the project. The sidewalk segments have been designed to the maximum extent feasible to meet ADA compliance guidelines and fit the existing site conditions.

Pedestrian Push Buttons

Pedestrian Push Button (PPB) Clear Space Design and Analysis

Two pedestrian push buttons will be installed as part of the HAWK Signal system. These PPBs will be far the northbound and southbound crossing of the west leg of the Snoqualmie Parkway/Fisher Avenue intersection. As such, the PPBs will be placed at the proposed northbound and southbound curb ramps. The curb ramp landings will serve as the access space required for PPBs. However, the two curb ramp landings adjacent to PPBs are noncompliant due to the cross slope (see the Curb Ramps section of this document). All other elements of the PPBs have been designed to full compliance. **The** table below identifies the location of the PPBs and the non-compliant elements.

Table 2 — Pedestrian Push Button Non-Compliant Elements and Summary of Justification

Location, Direction	Proposed Non-Compliant Elements	Comments/justification
NW Corner, Southbound SW Corner, Northbound	 Clear space cross slope Clear space cross slope 	The cross slope of the clear space will be non-compliant as it will exceed 2%. The slope is due to the existing grade of the road. The cross slope of the clear space will be non-compliant as it will exceed 2%. The slope is due to the existing grade of the road.

Grade breaks are flush (No vertical discontinuity)	🛛 Yes	🗆 No	See comment #
No grade breaks on the surface of curb ramps, blended transitions, landings, and gutter areas	X Yes	□ No	See comment #

SW-EB

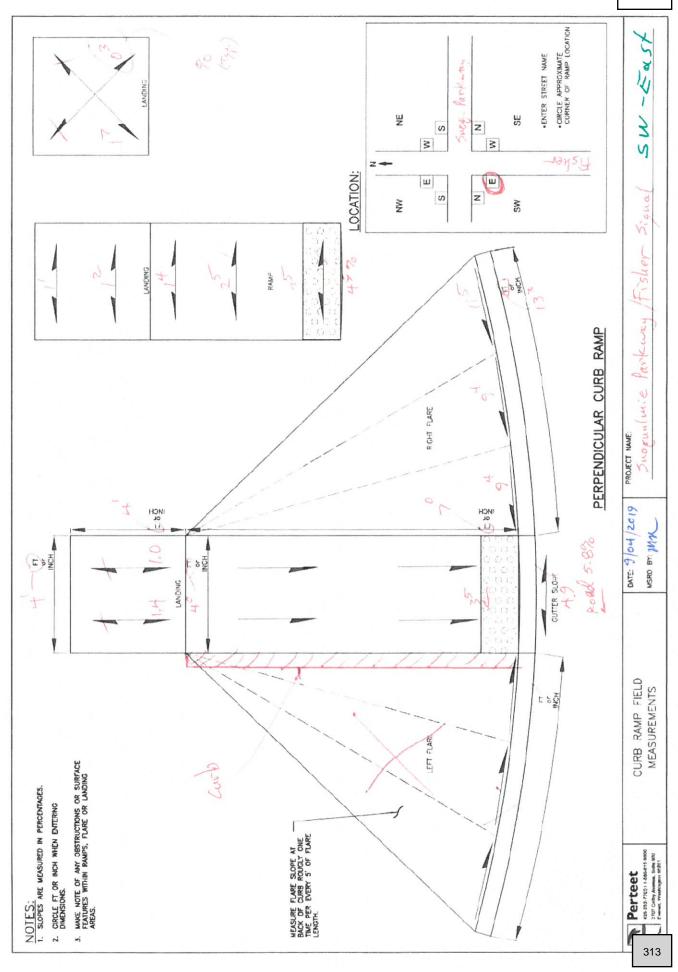

Comments/Justification:

- 1. For roadway crossings that are yield or stop controlled, the slope may not exceed 2%. Because this project is signal retrofit, the existing cross slopes of the crosswalks and gutter line slopes will remain the same as the existing and exceed 2%. Reducing the existing relatively steeper grades would require reconstruction of the roadway and modifications to the roadway profile well beyond the intersections in order to flatten the intersection legs to meet the 2011 PROWAG guidelines. This type of reconstruction would be a very significant effort and is not within the original scope of the project. Therefore, the cross slopes of the ramps will be non-compliant, and the curb ramps have been constructed to meet the ADA compliance guidelines to the maximum extent feasible, while matching into the existing site conditions.
- 2. Has curb no flare.
- 3. The slope of the right flare will be non-compliant as it exceeds 10% (11.5%) at the upper end of the flare. This is due to the gutter line slopes which exceed 2%, and which generally follow the steep grade of the roadway. The flare is on the uphill side and cannot be lengthened to be made compliant within a reasonable length. The flare is not part of the pedestrian access route (PAR), and therefore the non-compliance of the flare slope will be accepted by the City of Snogualmie.

Americans With Disabilities Act (ADA) Transition Plan for the Public Right-of-Way

Snoqualmie, WA Draft July 2023

Appendix C

Public Notice Under the ADA

Prepared by

City of Snoqualmie

Public Notice Under the Americans with Disabilities Act

In accordance with the requirements of title II of the Americans with Disabilities Act of 1990 ("ADA"), the City of Snoqualmie will not discriminate against qualified individuals with disabilities on the basis of disability in its services, programs, or activities.

Employment: The City of Snoqualmie does not discriminate on the basis of disability in its hiring or employment practices and complies with all regulations promulgated by the U.S. Equal Employment Opportunity Commission under title I of the ADA.

Effective Communication: The City of Snoqualmie will generally, upon request, provide appropriate aids and services leading to effective communication for qualified persons with disabilities so they can participate equally City of Snoqualmie programs, services, and activities, including qualified sign language interpreters, documents in Braille, and other ways of making information and communications accessible to people who have speech, hearing, or vision impairments.

Modifications to Policies and Procedures: The City of Snoqualmie will make all reasonable modifications to policies and programs to ensure that people with disabilities have an equal opportunity to enjoy all of its programs, services, and activities. For example, individuals with service animals are welcomed in City of Snoqualmie offices, even where pets are generally prohibited.

Anyone who requires an auxiliary aid or service for effective communication, or a modification of policies or procedures to participate in a program, service, or activity of the City of Snoqualmie should contact the office of Jeff Hamlin, ADA/504 Coordinator, by email at <u>JHamlin@snoqualmiewa.gov</u> or by phone at (425) 831-4919 ext. 3006 (for TTY, dial 7-1-1), as soon as possible but no later than 48 hours before the scheduled event.

The ADA does not require the City of Snoqualmie to take any action that would fundamentally alter the nature of its programs or services, or impose an undue financial or administrative burden.

Complaints that a program, service, or activity of the City of Snoqualmie is not accessible to persons with disabilities should be directed to Jeff Hamlin, ADA/504 Coordinator, by email at JHamlin@snoqualmiewa.gov or by phone at (425) 831-4919 ext. 3006 (for TTY, dial 7-1-1).

The City of Snoqualmie will not place a surcharge on a particular individual with a disability or any group of individuals with disabilities to cover the cost of providing auxiliary aids/services or reasonable modifications of policy, such as retrieving items from locations that are open to the public but are not accessible to persons who use wheelchairs.

Americans With Disabilities Act (ADA) Transition Plan for the Public Right-of-Way

Snoqualmie, WA

Draft July 2023

Appendix D

ADA Grievance Procedure

Grievance and Appeal Forms Grievance Record

Prepared by

City of Snoqualmie

Grievance Procedure under The Americans with Disabilities Act

This Grievance Procedure is established to meet the requirements of the Americans with Disabilities Act of 1990 ("ADA"). It may be used by anyone who wishes to file a complaint alleging discrimination on the basis of disability in the provision of services, activities, programs, or benefits by the City of Snoqualmie. The City of Snoqualmie's Personnel Policy governs employment-related complaints of disability discrimination.

The complaint should be in writing and contain information about the alleged discrimination such as name, address, phone number of complainant and location, date, and description of the problem. Alternative means of filing complaints, such as personal interviews or a tape recording of the complaint, will be made available for persons with disabilities upon request.

The complaint should be submitted by the grievant and/or their designee as soon as possible but no later than 60 calendar days after the alleged violation to:

Jeff Hamlin, ADA/504 Coordinator (425) 831-4919 ext. 3006 TTY: 7-1-1 or 1-800-833-6388 Email: JHamlin@snoqualmiewa.gov

Within 15 calendar days after receipt of the complaint, the ADA/504 Coordinator or their designee will meet with the complainant to discuss the complaint and the possible resolutions. Within 15 calendar days of the meeting, the ADA/504 Coordinator or their designee will respond in writing, and where appropriate, in a format accessible to the complainant, such as large print, Braille, or audio recording. The response will explain the position of the City of Snoqualmie and offer options for substantive resolution of the complaint.

If the response by the ADA/504 Coordinator or their designee does not satisfactorily resolve the issue, the complainant and/or their designee may appeal the decision within 15 calendar days after receipt of the response to the City Administrator or their designee.

Within 15 calendar days after receipt of the appeal, the City Administrator or their designee will meet with the complainant to discuss the complaint and possible resolutions. Within 15 calendar days after the meeting, the City Administrator or their designee will respond in writing, and, where appropriate, in a format accessible to the complainant, with a final resolution of the complaint.

All written complaints received by the ADA/504 Coordinator or their designee, appeals to the City Administrator or their designee, and responses from these two offices will be retained by the City of Snoqualmie for at least three years.

2023 Accessible Pedestrian Signal (APS) Policy

Prepared by

May 1, 2023

CITY OF SNOQUALMIE 38194 SE Mill Pond Road P.O. Box 987 Snoqualmie, WA 98065 Phone (425) 888-8009 Michael Chambless, Director of Parks and Public Works

Policy Regarding Installation of Accessible Pedestrian Signals (APS) and Pushbuttons

Intent: It is the City's intention to be consistent with the most current version of the WSDOT Local Agency Guidelines Chapter 29.4¹ and the Public Right of Way Access Guidelines (PROWAG 2011)² in the provision and location of accessible pedestrian signals and pushbuttons. Further guidance is available in 28 CFR Part 36 and MUTCD section 4E.09.

Purpose: The purpose of this policy is to establish a reasonable and consistent policy for installing APS to ensure that access for persons with disabilities is provided. Note: As of May 2023, all existing signals on State Routes within the City of Snoqualmie are owned, operated, and maintained by WSDOT. All existing traffic signals on City streets are owned by the City of Snoqualmie and maintained under contract by King County.

- A. Installation of New Signals: All new signals are to be constructed with full APS.
- **B.** Modifications to Sidewalks and Curb Ramps at Existing Signals: Coordinate sidewalk and curb ramp work with signal system work so that signal poles with pedestrian equipment meet accessibility requirements for APS pushbuttons to the maximum extent feasible. See WSDOT Design Manual 1510.11 for additional information on pedestrian pushbutton accessibility.

For existing signal systems only, the work required for each signal system location is determined as follows:

- 1. If no sidewalk work, curb ramp work, or signal operational changes are being performed at an existing signal system location, then no APS work is required for that signal system.
- 2. If any ramp is being reconstructed at a signal system location, then only poles with pedestrian pushbuttons serving a crossing served by a ramp that is being reconstructed are required to be made accessible as part of the project. This may require reconstruction of the ramps, landings, or sidewalk areas at both ends of the crossing. The remaining crossings and poles may be addressed if the owning agency wishes to provide funding for the additional work.

¹See WSDOT Local Agency Guidelines M36-63.37 CHAPTER 29 - Section 504 and the Americans with Disabilities Act. Pages 29-4 to 29-6. <u>https://wsdot.wa.gov/engineering-standards/all-manuals-and-standards/manuals/local-agency-guidelines-lag</u>.

²See also United States Access Board. *Proposed Rights of Way Guidelines (2011): Chapter R2: Scoping Requirements*. <u>https://www.access-board.gov/prowag/chapter-r2-scoping-requirements/</u>.

- 3. If APS pushbuttons are not being installed as part of a project, then any revised pole locations shall be designed to meet accessibility requirements with a conventional pushbutton installed and with an APS pushbutton installed, so that the pole does not have to be relocated when the conventional pushbutton is replaced with an APS pushbutton. Typically a location that is accessible with an APS pushbutton installed will be accessible with a conventional pushbutton installed not be replaced.
- 4. Locations where these requirements cannot be fully met shall follow the procedures for maximum extent feasible documentation as previously described.
- **C.** Modifications to Operation of Existing Signals: If changes to the pedestrian phasing of an existing signal as a result of adding or changing vehicle phasing are implemented, then installation of full APS is required, including curb ramps as required. This excludes implementation of phase overlaps for existing phases and implementation of permissive only flashing yellow arrows.

D. Requests for APS from the Public:

- 1. If the request is for an upgrade to APS at an existing traffic signal, the City will consider the request and determine how, if, and/or when it can add the requested APS to the City's ADA Transition Plan, Capital Facilities Plan and budget.
- 2. If the request is for a new signal at a location where no signal exists, the City will consider the request, which may include an engineering study consistent with the MUTCD as determined by the City, to determine how, if, and/or when it can add the requested signal to the City's ADA Transition Plan, Capital Facilities Plan and budget.

• We plan to address questions or comments when you see the following message:

Raise Hand or Respond in Q&A Box

- You may enter questions into the Q&A Box at any time.
- There will be more Q&A time at end.

Agenda

6:00 – 6:10: PART 1 – INTRO

Highlight Americans with Disabilities Act (ADA) Transition Plan purpose

6:10 – 6:50: PART 2 – PUBLIC RIGHT-OF-WAY FACILITIES

- Share findings of existing ADA accessibility barriers
- Listen to your experiences with ADA barriers
- Listen to your preferences for prioritizing ADA barriers for removal
- 6:50 7:00: PART 3 MAKING A PLAN

WHAT BROUGHT YOU HERE TODAY?

Raise Hand or Respond in Q&A Box

PART 1

ADA TRANSITION PLANS 101

What should an ADA Transition Plan do?

- Identify accessibility barriers
- Describe methods used to remove accessibility barriers
- Provide a barrier removal schedule (timeline and \$)
- Identify public official responsible to implement plan

Types of Barriers under Title II (Local & State Governments)

Physical Barriers

- PUBLIC RIGHT-OF-WAY INCLUDED IN THIS PLAN
- City buildings
- City parks
- City paved shared-use trails

Programmatic Barriers

 Public services, programs, and activities – POLICIES AND PROCEDURES INCLUDED IN THIS PLAN

PART 2

PUBLIC RIGHT-OF-WAY (PROW) FACILITIES

PROW Facilities

Facilities Addressed in this ADA Transition Plan

- Curb ramps
- Accessible Pedestrian Signals
 - Pushbuttons at signalized intersections
 - Rectangular Rapid Flashing Beacons (RRFBs) at mid-block crossings
 - HAWK pedestrian-actuated crossings

Facilities to be Addressed at a Future Plan Update

- Sidewalks (including paved shared-use trails)
- Driveway interface with sidewalks
- Accessible Parking

ADA Compliant PROW Physical Features

Curb Ramps

Blended Transitions

11

Accessible Pedestrian Signals

LISTENING SESSION #2

Which public right-of-way barriers are most important for the City to remove first?

Please Raise Hand or Respond in Q&A Box

- Missing curb ramps
- Missing pedestrian crossings
- Missing accessible pedestrian signals (APS)
- Missing sidewalks

- Sidewalk cracks/bumps
- Fixed objects in path of travel
- Overgrown vegetation
- Other?

LISTENING SESSION #3

Where is it most important for the City to remove public right-of-way barriers?

Please Raise Hand or Respond in Q&A Box

- Transit Centers
- Grocery and Retail Stores
- Schools and Libraries
- My Residence
- Senior Center/Care Facilities

- City Buildings and Post Office
- Medical Clinics
- Parks and Trails
- Other?

PART 3

MAKING A PLAN

Personnel/Policies/Procedures

Personnel:

- ADA/504 Coordinator
- Official Responsible to Implement Plan

Policies/Procedures:

- Public ADA Notice
- Accessible Pedestrian Signal (APS) Policy
- ADA Grievance Procedure

How will the City implement the presented information into the PROW ADA Transition Plan?

The Plan will:

- Include public feedback findings in prioritization criteria
- Develop a schedule for barrier removal
- Develop a financial plan to fund barrier removal
- Develop a monitoring tool to track barrier removal:
 - Annual progress reports
 - Schedule for future ADA Transition Plan updates

How will the City prioritize physical barrier removal?

- Proximity to/Part of Planned City Projects
- Accessible Pedestrian Signal Policy
- Proximity to Likely ADA Destinations:
 - Transit Centers, Routes, & Stops
 - Grocery and Retail Stores
 - Schools and Libraries
 - Senior Center/Care Facilities
 - City Buildings and Post Office
 - Medical Clinics/Pharmacies
 - Parks and Trails

- ADA Compliance and Condition
 - Non-compliant and Missing
 - Poorest Condition (B,C,D) before Fair/Better Condition (A)
- Public Feedback
 - Online surveys
 - ADA Public Workshop

Will I have a chance to read and comment on the Draft Plan?

YES!

The Draft ADA Transition Plan will be made available for public comment in summer 2023

<u>https://www.snoqualmiewa.gov/1024/Public-</u> <u>Right-of-Way-ADA-Transition-Plan</u>

Thank you for participating!

2. Public Right-of-Way Barrier Description

The word cloud requires at least 20 answers to show.

Response	Count
There is a major opportunity for increased pedestrian safety and ADA accessibility in general within the Sno qualmie Elementary school zone on Park St. Specifically at Park St. and Mountain Ave as well as Park St. a t Centennial Field Entrance. Ideally something like RRFB crossing buttons/lights and a flashing BlinkerSign product.	1
There are multiple locations within old town with old over grown broken up sidewalks, some that come to mind are along Silva Ave close to the SVSD admin building. There are also a few curbs that don't have ramps to a safe crossing in old town near that area, one that comes to mind is what is pictured above.	1
The Snoqualmie Valley Trail at Reinig Road is inaccessible to users who are unable to ascend stairs. I reco gnize that this is a King County facility, but it's in our community and the lack of an ADA-compliant connectio n precludes a segment of the population from accessing a public recreation facility.	1

7. Is there anything we are overlooking?

The word cloud requires at least 20 answers to show.

Item 2.

Response	Count
This applies to the crosswalks on or near Center Blvd (and really all of Snoqualmie). PAINT LINES IN THE CROSSWALK. All you have to do is sit outside at one of the restaurants a couple of times and watch the car and foot traffic on Center to know that it's very dangerous for pedestrians. Cars don't pay attention to pedestrians and pedestrians don't always pay attention to cars or just cross wherever. If there were actual lines painted it may make drivers more aware that there could be foot traffic and pedestrians may actually use them. It would be even better if Center was closed to vehicles, at least during the summer months. With all the do uble parking, u-turns, etc. it's just an accident waiting to happen, either with another car or a pedestrian. I know if I didn't have the ability to run out of the way of an oncoming vehicle I would not be crossing Center.	t.
There is a major opportunity during the Centennial field playground upgrade to match the inclusivity and AD A accessibility of the playground design and extend it to the crossings in the school zone nearby. There is a meadowbrook resident who has sight impairment and uses a walking stick as well as many elderly in wheel chairs and many young babies in strollers and school age kiddos on bicycles. Any and all increased pedestr an safety measures are welcomed! Even the manual flags to use when crossing have helped. Thank you to Wike Chambless for working on this initiative. Another aspect to be considered is low hanging branches on t he beautiful trees lining the street. There is one in particular on Park Street a few feet past Mountain St. that would hit someone in the head if they didn't see it, especially someone with a sight impairment. Oh, two oth er crossings that could use increased safety: Meadowbrook Way and Park St. four way stop and also Park St. and Boalch Ave/ Golf Course.	i
The H.A.W.K. signal at the intersection of Snoqualmie Parkway and Fisher Ave SE is a barrier due to the da nger it poses. I have seen far too many drivers fly through that intersection when they should have stopped because they are not familiar with H.A.W.K. signals. People leaving Fisher Ave SE also try to take advantag e of the stopped cross traffic by quickly driving out through the crosswalk on Snoqualmie Parkway, which m akes the crosswalk even more hazardous. This makes it even more dangerous for those who have disabiliti es. Originally they city was supposed to put in a full 4 way traffic light and this option still needs to be evalua ted for everyone's safety. I cannot emphasize enough how much of a danger this experimental crosswalk is. In slower speed situations it may work but not on a 40 mph road that people frequently speed on.	
Nothing additional comes to mind. Thank you for starting to address this, we love taking walks around (old) to own where we live with our son who is in a wheelchair, and there are always certain sidewalks we have to a void because they are not safe/comfy for him to navigate. Also, when we get snow, it would be nice for side walks and ramps to be shoveled as well to be able to walk on instead of there being piles of snow and only to he street being cleared.

1. How familiar are you with what counts as an Americans with Disabilities Act (ADA) barrier in the public right-of-way?

Somewhat familiar

2. Public Right-of-Way Barrier Description

At Snoqualmie Middle School, there is no pedestrian connection from the sidewalk along Railroad Ave / SR 202 into the school complex. Pedestrians are required to walk in the bus driveway (or on the grass). Even if there is an adequately-graded path to the ramps connecting the bus loading zone to the building, it is fundamentally unsafe to force pedestrians to use designated vehicle pathways for non-motorized access.

Draft Public Right-of-Way ADA Self-Evaluation and Transition Plan

City of Snoqualmie

Tuesday, August 22, 2023

What should an ADA Transition Plan do?

- 1. Identify accessibility barriers
- 2. Describe methods used to remove accessibility barriers
- 3. Provide a barrier removal schedule (timeline and \$)
- 4. Identify public official responsible to implement plan

How does the City's Public Right-of Way (PROW) ADA Transition Plan meet these requirements?

1. Identifies accessibility barriers in GIS inventories:

- Curb ramps
- Accessible Pedestrian Signals (also reviewed RRFBs and HAWK)
- PROW Facilities to be addressed at a future update:
 - Sidewalks
 - Driveway Interface with Sidewalks
 - Accessible Parking

How does the City's Public Right-of Way (PROW) ADA Transition Plan meet these requirements?

- 2. Describes methods used to remove accessibility barriers
- Prioritization of physical barriers based on:
 - ADA Compliance and Asset Condition (Grades A, B, C, D)
 - Proximity to Capital Improvement Programs/Projects
 - Public Feedback
- Includes Accessible Pedestrian Signal Policy (APS)
- Includes ADA Grievance Procedure

How does the City's Public Right-of Way ADA Transition Plan meet these requirements?

- 3. Provides a barrier removal schedule (timeline and \$)
- Identifies anticipated ADA barrier removal funding totals
 - 2023-2028 Capital Improvement Programs and Projects
 - 2029- onward remainder
- Recommends annual ADA report cards and 5-Year Plan Updates to monitor progress towards barrier removal and re-assess barrier removal funding levels.

2023-2028 PROW ADA Barrier Removal Funding Framework

Funding Source	2023	2024	2025	2026	2027	2028	Total (2023-2028)
ADA Program	\$42,000	\$44,000	\$45,000	\$46,000	\$47,000	\$48,000	\$272,000
Street Resurfacing Program (approx. 5% of \$3.527 million)	\$31,000	\$31,000	\$31,000	\$31,000	\$31,000	\$31,000	\$186,000
2023 Snoqualmie Parkway Rehabilitation Project	\$323,000	\$0	\$0	\$0	\$0	\$0	\$323,000
Town Center Improvement Project – Phase III (conditional on grant funding)	\$0	\$0	\$0	\$0	\$0	\$0	\$0
TOTAL	\$396,000	\$75,000	\$76,000	\$77,000	\$78,000	\$79 ,00 0	\$781,000

How does the City's Public Right-of Way ADA Transition Plan meet these requirements?

- 4. Identify public official responsible to implement plan
- Plan designates Jeff Hamlin, Deputy Director of Parks and Public Works as responsible official (also ADA/504 Coordinator).

Next Steps

- Provide Feedback on Draft Plan by end of Public Comment Period on September 28, 2023.
- Adopt Final Public Right-of-Way ADA Transition Plan when next presented to City Council.
