

### CITY COUNCIL WORK SESSION AGENDA MONDAY, JULY 10, 2023

### SPRING LAKE PARK CITY HALL, 1301 81ST AVE. NE at 5:35 PM

- 1. CALL TO ORDER
- 2. DISCUSSION ITEMS
  - A. Minnesota GreenStep Cities Discussion (Goodboe-Bisschoff/Moran)
  - B. Hybrid Code Enforcement Approach Discussion (Morris)
  - C. Cannabis Ordinance Update Discussion (Buchholtz)
  - D. Concept Plan Discussion SE Corner of CSAH 10 & Spring Lake Park Road (Buchholtz)
- 3. REPORT
  - A. Council Reports
  - B. Administrator Report
- 4. ADJOURN

### Memorandum

To: Mayor Nelson and Members of the City Council

From: Daniel R. Buchholtz, MMC, Administrator, Clerk/Treasurer

Date: July 6, 2023

Subject: GreenStep Cities participation discussion

Councilmembers Goodboe-Bisschoff and Moran asked that the City Council discuss potential participation in the Minnesota GreenStep City program.

Minnesota GreenStep Cities is a voluntary challenge, assistance and recognition program that provides a framework to help cities achieve their economic, environmental and quality of life goals. This free continuous improvement program, managed by a public-private partnership, is based on 29 best practices. Each best practice can be implemented by completing one or more actions at a 1, 2 or 3-star level, from a list of four to eight actions. These actions are tailored to all Minnesota cities, focus on cost savings and energy use reduction, and encourage civic innovation.

There are a variety of benefits in becoming a GreenStep City.

- Is a continuous improvement pathway for cities to "go green," becoming more sustainable and resilient.
- Will save city staff time in researching proven, cost-effective actions for cutting energy use, decreasing the city's carbon footprint, and accomplishing other sustainability goals that exceed regulatory requirements
- Will save cities money and deliver a stream of multiple environmental, social and financial benefits; will help cities explore how to spend the same amount of money smarter.
- Provides over 4,000 reports on how Minnesota cities are taking action, making it easy to learn from and contact peer cities so as to jump-start actions in your own city.
- Opens up special opportunities for funding and technical assistance, available mostly to GreenStep cities because the GreenStep program focuses on existing GreenStep cities.
- Positions a city to more easily apply for competitive grant and assistance programs.
- Provides leadership and action roles for community members, businesses and institutions so as to stretch limited city funds and strengthen a civic culture of engagement and innovation. Continuously prompts program participants – like an exercise coach would! – to maximize opportunities to accelerate sustainability actions.
- Provides public recognition of the good work being done by Minnesota cities.

Staff has included further information on the program with this memorandum.

If you have any questions, please do not hesitate to contact me at 763-784-6491.

### History and development

During fall 2007, Minnesota's Clean Energy Resource Teams (CERTs) held regional listening sessions around the state to discuss community-based energy opportunities and the state's Next Generation Energy Act of 2007. The idea was raised of creating a sustainable cities program, free to cities, that would challenge, assist and recognize cities that were "green stars." This idea was taken up by the 2008 Legislature, which directed the MPCA, the Division of

Energy Resources at the Minnesota Department of Commerce, and CERTs to recommend actions cities could take on a voluntary basis (see the report to the Minnesota Legislature).

Representatives from dozens of cities, non-profit organizations, the University of MN, businesses and state government agencies provided the outline for what has been developed as the Minnesota GreenStep Cities program, which began in June 2010. As a non-regulatory program, GreenStep learns from Minnesota cities and assistance providers, and continually refines the best practice actions and the resources for taking action. The program also benefits from contact with over fifteen other GreenStep-like programs across the nation, and helped create the national Sustainable States Network in 2015.

The GreenStep Cities Steering Committee adopted this Racial Equity and Inclusion Statement in 2020:

The GreenStep Cities program supports Minnesota communities in building resilient and inclusive communities that meet the needs of Black, Indigenous, people of color and other populations historically harmed by environmental injustice and the disparities that result from exclusionary practices.

### Accomplishments

Learn more about the programs accomplishments and city reflections:

### **Strategic Plans**

- 2020 Strategic Plan (PDF): Includes information and background about the GreenStep Cities program, recent initiatives focused on climate and equity, stakeholder feedback, as well as recommendations, priorities, and strategies for the future of the GreenStep Cities program.
- Green STEP Into the Future Report (and 2-page summary):
   Leveraging the value of sustainability challenge, assistance, and
   recognition programs A report of the GreenStep Cities, Tribal
   Nations, and Schools programs and a discussion on ways to expand
   outreach and impacts.

### **Program Awards**

In May 2012 the GreenStep Cities program received awards in the categories of Sustainable Communities and 2012 Partnership of the Year from the Minnesota organization Environmental Initiative. The awards honor partnerships, inspire other organizations to create similar projects, and encourage collaborative approaches to environmental problem solving. Over 340 attendees at the awards dinner voted among the 15 finalists nominated for the 2012 Partnership of the Year.

In 2016 the Humphrey Institute School of Public Affairs at the University of Minnesota presented GreenStep with a State Government Innovation Award: one of ten awards to recognize state government entities engaged in innovation and service redesign.

### Partner organizations

Of the organizations that created the 2009 report to the Legislature, this working group below meets monthly as the GreenStep Cities steering committee, contributing time and funding to implement the GreenStep Cities program.

Minnesota Pollution Control Agency Rick Patraw, Section Manager, Sustainability and Environmental Assistance Rick.patraw@state.mn.us 651/757-2640

Great Plains Institute
Lola Schoenrich, Vice-President,
Communities

Minnesota Environmental **M** Quality Board **EQB** Representative info.EQB@state.mn.us 651-757-2873

### Program funders

In addition to staff time and funding contributed by the state agencies above to work on the GreenStep program, the partner organizations contribute valuable time and expertise.

### Partner programs

The Minnesota GreenStep Tribal Nations program, launched in 2014 as a pilot program to the GreenStep Cities program, is a free and voluntary statewide best practices framework, community of practice, and recognition program for tribal nations and communities located in Minnesota to reduce environmental impact and costs, and improve health and well-being of tribal members and staff.

The Minnesota GreenStep Schools program, launched in 2020, is a free and voluntary statewide best practices framework, community of practice, and recognition program for public and private K-12 schools and districts to reduce environmental impact and costs, improve health and well-being of students and staff, and provide effective environmental and sustainability education.

### Frequently Asked Questions

# What are the benefits of joining the GreenStep program and implementing its best practices?

The answers to this question will be different for different cities, but here are the key points we have heard from GreenStep cities and around which we have designed the program. The GreenStep program:

- **Is a continuous improvement pathway** for cities to "go green," becoming more sustainable and resilient.
- Will save city staff time in researching proven, cost-effective actions for cutting energy use, decreasing the city's carbon footprint, and accomplishing other sustainability goals that exceed regulatory requirements. Information on and an Advisor for how to complete 170 actions in the best practice groups of buildings, land use, transportation, environment, and economic/community development is continuously updated with Minnesota-specific information.
- **Will save cities** money and deliver a stream of multiple environmental, social and financial benefits; will help cities explore how to spend the same amount of money smarter.
- Is a home-grown, independent program tailored to Minnesota cities and provides maximum flexibility and total control and choice in how to implement a proven best practice.
- **Provides over 4,000 reports** on how Minnesota cities are taking action, making it easy to learn from and contact peer cities so as to jump-start

- actions in your own city.
- Opens up special opportunities for funding and technical assistance, available mostly to GreenStep cities because the GreenStep program focuses on existing GreenStep cities.
- **Positions a city** to more easily apply for competitive grant and assistance programs.
- Maps out how to follow-through on the various commitments cities may have made, such as Tree City USA, the U.S. Mayors Climate Protection Agreement (signed by over 40 Minnesota cities), and on the Minnesota Legislature's aggressive Next Generation Energy Act.
- Provides leadership and action roles for community members, businesses and institutions so as to stretch limited city funds and strengthen a civic culture of engagement and innovation. We encourage cities to use student interns to help enter best practice action reports on the GreenStep web site, and have an intern manual to make this easier.
- **Continuously prompts** program participants like an exercise coach would! to maximize opportunities to accelerate sustainability actions.
- **Provides public recognition** of the good work being done by Minnesota cities.

# What recognition is there for a GreenStep City?

- **Annual peer recognition** at the June conference of the League of Minnesota Cities.
- **Annual \$1,000** LMC/GSC Sustainable City Award.
- Your city's accomplishments will be visible on the GreenStep web site, the most comprehensive web site in Minnesota devoted to city sustainability.
- **Artwork and recognition materials** (logos, sample press releases, road signs).
- Five steps of recognition:

- **Step One**: for cities that have passed a city council resolution to work on implementing best practices of their own choice and at their own pace.
- **Step Two**: for cities that have implemented any 4, 6 or 8 best practices (depending on city Category/city capacity).
- **Step Three**: for cities that have implemented an additional 4, 6 or 8 best practices (depending on city Category) and completed a handful of specific high-impact actions this can take between one and a few years.
- **Step Four**: for cities that report (by May 1st), for the previous calendar year, between 7 and 10 core city performance metrics and 5, 3, or no (depending on city Category) additional metrics of their choice.
- **Step Five**: for cities that report improvement in a minimum number of metrics.

## How does the GreenStep program define sustainability; what's the vision?

Defining the state or condition of sustainability in a city, and the city process of and accomplishments from moving toward greater sustainability - sustainable development - is best done by each city. That said, much has been written about sustainability since the 1980s. For an excellent overview, and a discussion of resilience, see Sustainable Development and Its Discontents (Dernbach & Cheever: 2015). GreenStep suggests, as a starting point, that cities consider the MPCA's page "What makes a community sustainable?" and the definition and policy language adopted by the League of Minnesota Cities (click on the latest policy document and find Sustainable Development under Improving Service Delivery).

The GreenStep program, being based in a state environmental agency, focuses on environmental sustainability but clearly weaves in economic and social issues as well. The city performance metrics of Steps 4 and 5 include a few economic

and social sustainability measures but cities are encouraged to develop measures of their own to fully flesh out measurement in these other two core areas of sustainability.

The program vision of Minnesota GreenStep Cities is that environmental sustainability becomes the norm for all Minnesota cities. By norm we mean an accepted standard or way of thinking and doing things that most people agree with. Norms tend to take hold and spread when 15-20% of the 'target population' adopt them. Depending on how you categorize the 125+ GreenStep cities - by geographic region, size cohorts - GreenStep feels we are making a measurable contribution to making sustainability the norm in Minnesota cities.

# What if my city or Tribal Nation is collaborating with townships, the county or a school district?

The GreenStep Cities program recognizes best practice actions taken by and catalyzed by city government and occurring within city limits. We also want to capture actions taken by collaborating entities - townships, the county, and a school/school district. If your city is working with one or more of these entities, let us know by listing (when you register on the web site) the county, township(s) by name and/or the school/school district with whom you are working to implement best practices that affect territory within and outside of the city proper.

Several Tribal Nations in Minnesota have joined the GreenStep program under a GreenStep Tribal Nations pilot program and are reporting completion of actions within their boundaries, in which are townships, cities and counties. GreenStep actions are generally not a perfect fit for the tribal context, but we welcome Tribes to interpret the actions liberally and to use the web site to report accomplishments.

## What are the city Categories and why have them?

Cities with greater capacity for making civic improvements are able to implement more best practices and more difficult actions, and are thus challenged under the GreenStep program to do so in order to receive the same Step level recognition as lower-capacity cities. City capacity is not tightly tied to city population however: a small city in the Twin Cities metro area for example benefits, by taking no action themselves, from access to existing regional systems such as transit, wastewater, water and storm water that a city with the same population in Greater Minnesota does not. So the GreenStep program has each city complete a simple 10-question spreadsheet to determine their city Category. In general:

- Category C cities have no or only a handful of city buildings and staff
- Category B cities have city buildings and staff, maintain roads, and have a public works and planning/development department
- Category A cities are within a metro area or serve as a regional economic and service center. They are served by regular transit routes and have distinct commercial and industrial areas.

If the spreadsheet classifies your city in a Category that does not seem fair or make sense to you, please contact the GreenStep Cities program coordinator.

# May my city claim credit for best practice actions completed years ago?

Yes. Those actions contributed to greater sustainability in your city and the public should know about them. We think most cities will be pretty close to being recognized at Step Two once they log on to the web site and post information about best practices implemented before they joined GreenStep. The only caveat to claiming credit for previous actions taken is that if the action

is an ongoing action - for example, qualify as a Tree City USA, or purchase 15% of city energy requirements from renewable energy sources, or limit barriers to higher density by code - the city must currently be qualifying for, funding, staffing or keeping in force those actions. GreenStep staff at the MPCA do not routinely check/verify that a city action is indeed ongoing. Rather, we expect that over the years each city will periodically update their previously submitted actions. Readers will know this by then seeing a more recent "Date of last report update."

## Are there different types and difficulty levels of actions?

Actions are of four types, corresponding to the typical tools a city uses to make civic improvements:

- Changes in city policy, ordinances, regulations, incentives
- **Investments** of financial capital or a commitment to funding operating costs
- **Development and staffing** of city assistance programs financial, informational, educational
- **Collaboration** with and leveraging the resources of others, such as business groups, civic groups, schools and the county

Most best practices have actions of all four types and actions that range from easier to more difficult. All actions have three completion levels: good, better, best. Actions completed at a good level tend to be easier, and actions completed at a best level tend to be more difficult (for example, requiring greater investment, requiring measurement, greater political will). But easy and difficult differ among cities: a best-level completion of an action in one city may be easy and in another city it may be more difficult. Overall, GreenStep provides a wide range of actions that are doable for Category B and C cities.

A handful of actions are ones that schools and businesses in your city could take, with or without city involvement but for which a city can claim credit, as these actions represent greater sustainability within your community and should

be known by the public and others wishing to emulate them.

### What do the blue stars mean?

One, two or three blue stars show up in several places on the GreenStep web site. They denote a city's completion of a best practice action at a "good" (1-star) level, "better" (2-star), or "best" (3-star) level. Cities self-report how they have completed an action, and GreenStep Cities staff mark each action (in consultation with the city) as complete at a 1-, 2- or 3-star level. Guidance for what constitutes completion at different star levels is found on the web site by clicking on the text of a best practice action and viewing the Star-level Examples tab. These Examples provide more detail than is included in the action text, and sometimes clarifies that a city need do only one part of an action to have their work marked as complete at a 1, 2 or 3-star level.

The **Star-level Examples** are rarely absolute criteria for achievement of a star level for a particular action a city has completed. This is because this guidance is continually being refined as cities report more actions, and report actions in more creative/unanticipated ways. Cities are encouraged to attempt to complete an action at a 2- or 3-star level, but completion of all actions at a 1-star level is sufficient for cities that are recognized as Step Two and Step Three cities.

The word "Pending" by a city action report means that the GreenStep Cities program staff have not yet read and assigned a completion/star level to the action report. The phrase "Not rated" for an action report means either the action report falls short of a 1-star rating, or for a very few actions, the city report is for an action that has changed (but the old city report under the old action remains) and has been replaced with the current action.

# Why are a handful of specific best practices and specific actions part of Step Three recognition?

Cites are recognized at Step Two upon implementation of any 4, 6 or 8 (depending on their city Category) best practices. Some cities choose to continue implementing best practices - for example, drilling down and focusing on all the actions that relate specifically to city operations - and remain active at Step Two. To be recognized at Step Three, the GreenStep program thinks several diverse best practices are essential to greater sustainability within city limits, and some/all (depending on city Category) of these core, high-impact best practices must be implemented by cities in order to be recognized as a Step Three GreenStep City. Think of them as college distribution requirements that ensure a student rounds out their education. Implementing these best practices will:

- Make your buildings more energy-efficient, healthier, and cheaper to operate
- Make land use regulations legally defensible and publicly supported
- Make moving around the city possible, pleasant, free and healthful without always using a car
- Save money and cut energy use by smarter city purchasing
- **Expand the urban tree canopy**, delivering a stream of multiple financial, environmental and quality of life benefits
- Exceed storm water requirements and mitigate cost liabilities at a cheaper long-term cost
- **Provide community members** with engagement options and a scorecard of city performance
- Increase the city tax base by strengthening local businesses
- Make your community more resilient to a changing climate

Within these high-impact best practices - as is the case for almost all the best practices - cities mostly have a choice as to which specific action or actions to complete in order to claim credit for implementing that best practice. **The** 

### minimum number of best practices (BPs) and actions cities complete in order to be recognized at Step Three are as follows:

- Category A cities: 10 specific BPs; 9 specific actions; 27 actions in total
- Category B cities: 7 specific BPs; 7 specific actions; 18 actions in total
- Category C cities: 4 specific BPs; 4 specific actions; 9 actions in total

## What if my city has done/wants to do an action not on the list?

As cities have reported accomplishments that fit within the 29 best practices but which are not clearly defined in an action, the Star guidance, and sometimes an existing action, has been modified to allow cities to take credit. In a few instances an entirely new action has been created. Feel free to contact the GreenStep coordinator to discuss accomplishments in your city that you think should fit within the exiting actions but don't seem to.

# Who picked the best practice actions and why?

The GreenStep Cities report to the 2009 Legislature lists the dozens of city representatives and topical experts involved in developing the best practices. This input, in addition to review of over a dozen state-level sustainability challenge programs across the U.S., has resulted in what the GreenStep Cites steering committee thinks are truly best practice actions for cities as they strive to meet their sustainability goals. By best practice action we mean an action that is:

- **doable** for most Minnesota cities
- a beneficial stretch for some cities
- **delivers one or more benefits** for which evidence exists

# How does participation in the GreenStep Cities program fit in with my city's existing programs and plans?

The GreenStep program is one of several frameworks and checklists that cities can use to focus on completing specific actions. We anticipate that cities have and will develop specific internal plans and programs that facilitate completion of GreenStep actions. And we know that cities will join other programs, such as Tree City U.S.A., participation in which a city can count as a GreenStep action. Uniquely, the GreenStep web site is an easy way for a city to publicly post, on one State-maintained web site, an ongoing catalogue of actions taken to build a more environmentally sustainable city.

# What if my city's participation in GreenStep pauses for a time?

A GreenStep city has passed a city council resolution to work on implementing best practices of their own choice and at their own pace. It might take a city striving toward Step Three recognition between one and a few years. GreenStep staff try to be in touch with every city every year, and recognize there may be a one or two-year period when a city does not enter any new actions on the GreenStep web site.

If after three years from the time a city joins the program the city has not entered any action data, or if the city has gone three years without entering a new action or editing an existing action, "Inactive" may replace the city's current Step. GreenStep staff will discuss this with the city and see if they can help the

city return to an active status by posting a new or edited action. Should a GreenStep city pass a resolution to quit the GreenStep program, all city information would be removed from the web site.

# Will the best practice actions and program requirements change over time?

Yes, but we have made only small changes over time, mostly in the Star-level Examples of what constitutes completion of an action at a good (1-star), better (2-star) and best (3-star) level. And we continually work to make each action clear enough so that cities easily know to claim one accomplishment under just one best practice action. Based on an annual cycle of feedback from cities, best practice advisors and topical experts and based on changes in technology, financing, regulations, state-wide assistance, and other factors, we think ongoing small changes will be needed to keep the suite of actions and the program requirements current, relevant to cities, and challenging yet doable.

# Can I be certified as a green city, as opposed to being recognized as one?

Yes: the LEED for Cities & Communities program uses the LEED rating system structure and may be most appropriate for the largest Minnesota cities that want to invest money measuring and rigorously certifying their sustainability achievements. It was developed through a partnership between ICLEI USA, the U.S. Green Building Council, and the Center for American Progress.

### Who started GreenStep Cities?

During fall of 2007, Minnesota's Clean Energy Resource Teams (CERTs) held regional listening sessions around the state to discuss community-based energy opportunities and the state's Next Generation Energy Act of 2007. The idea was raised to create a sustainable cities program, free to cities, that would challenge, assist and recognize cities that were "green stars."

In 2008, Governor Tim Pawlenty signed legislation authorizing research into the creation what is today the GreenStep program. In 2009, the State Legislature analyzed the proposal for the GreenStep program and there was bi-partisan agreement that the Minnesota Pollution Control Agency would, working with the League of Minnesota Cities and other partner organizations, take the lead in creating the program for the benefit of Minnesota cities and for energy, greenhouse gas and cost reductions. The legislation and the program report are posted on the GreenStep Cities About page.

Representatives from dozens of cities, non-profit organizations, businesses and state government agencies provided the outline for what has been developed as the Minnesota GreenStep Cities program, which officially began in June 2010.

### Why Cities?

The actions necessary to improve individuals' quality of life and promote environmental stewardship are based at the local level. Cities have the ability and flexibility, through their elected officials, to take swift action that includes public participation. The GreenStep Cities program assists in supporting these actions through technical assistance and peer-to-peer sharing. Because this is a voluntary action program, GreenStep Cities leaves the control at the city-level.

### More questions?

Don't hesitate to contact the GreenStep coordinator through the Contact menu item on the GreenStep web page at https://greenstep.pca.state.mn.us

### The GreenStep 29 best practices

### The GreenStep 29 best practices

- Make planning and tracking easier download this spreadsheet that lists all unique actions approximately 175 for all 29 best practices.
- Cities that implement a minimum number of best practices organized into these five topical areas will be recognized as Step Two and Step Three GreenStep Cities. See What are Step Two and Three Recognition Minimums?
- Cities should claim credit for best practices already implemented. Adding best practices over time will garner additional recognition.
- For each best practice, and depending on city category (A, B or C), a city needs to complete one or more actions from a list associated with the best practice. See What category is my city in?

### **Buildings and Lighting**

[Filter: Show actions related to a topic]

1. Efficient Existing Public Buildings

Benchmark energy and water usage, identify savings opportunities in consultation with state programs, utilities and others to implement cost-effective energy and sustainability improvements.

2. Efficient Existing Private Buildings

Provide incentives for energy, water and sustainability improvements in existing residential, not-for-profit and commercial buildings/building sites.

3. New Green Buildings

Construct new buildings to meet or qualify under a green building framework.

- 4. Efficient Outdoor Lighting and Signals Improve the efficiency and quality of street lighting, traffic signals and outdoor public lighting.
- 5. Building Redevelopment

Create economic and regulatory incentives for redevelopment and repurposing of existing buildings.

### **Land Use**

- 6. Comprehensive, Climate and Energy Plans
  Build public support and legal validity to long-term infrastructural and regulatory strategy.
- 7. Resilient City Growth Increase financial and environmental sustainability by enabling and encouraging walkable housing and retail land use.
- 8. Mixed Uses
  Develop efficient land patterns that generate community health and wealth.
- 9. Efficient Highway- and Auto-Oriented Development Adopt commercial development and design standards for auto-oriented development corridors and clusters.
- 10. Design for Natural Resource Conservation Adopt development ordinances or processes that protect natural systems and valued community assets.

### **Transportation**

11. Living & Complete Streets

Create a network of green complete streets that improves city quality of life, public health, and adds value to surrounding properties.

### 12. Mobility Options

Increase active transportation and alternatives to single-occupancy car travel.

### 13. Efficient City Fleets

Implement a city fleet investment, operations and maintenance plan.

### 14. Demand-Side Travel Planning

Implement Travel Demand Management and Transit-Oriented Design in service of a more walkable city.

### **Environmental Management**

### 15. Sustainable Purchasing

Adopt environmentally preferable purchasing policies and practices to improve health and environmental outcomes.

### 16. Community Forests and Soils

Add city tree and plant cover that conserves topsoils and increases community health, wealth, quality of life.

### 17. Stormwater Management

Minimize the volume of and pollutants in rainwater runoff by maximizing green infrastructure.

#### 18. Parks and Trails

Increase active lifestyles and property values by enhancing the city's green infrastructure.

#### 19. Surface Water

Improve local water bodies to sustain their long-term ecological function and community benefits.

### 20. Efficient Water and Wastewater Systems

Assess and improve city drinking water and wastewater systems and related facilities.

### 21. Septic Systems

Implement an environmentally sound management program for decentralized wastewater treatment systems.

### 22. Sustainable Consumption and Waste

Increase waste prevention, reuse and recycling, moving to a lower-consumption, more cyclical, biological approach to materials management.

### 23. Local Air Quality

Prevent generation of local air contaminants so as to improve community health.

### **Resilient Economic and Community Development**

### 24. Benchmarks and Community Engagement

Adopt outcome measures for GreenStep and other city sustainability efforts, and engage community members in ongoing education, dialogue, and campaigns.

### 25. Green Business Development

Expand a greener, more resilient business sector.

### 26. Renewable Energy

Remove barriers to and encourage installation of renewable energy generation capacity.

#### 27. Local Food

Strengthen local food production and access.

### 28. Business Synergies and EcoDistricts

Network/cluster businesses and design neighborhoods and developments to achieve better energy, social, economic and environmental outcomes in service of a more circular and equitable economy.

29. Climate Adaptation and Community Resilience Plan and prepare for extreme weather, adapt to changing climatic conditions, and foster stronger community connectedness and social and economic vitality.

Code Enforcement Update

Date: 07-05-2023

To: Daniel Buchholtz

From: Walter Morris, Code Enforcement, Fire Inspector, Rental Housing Inspector

Subject: Looking to minimize resident frustrations regarding code enforcement.

Considering the consistent complaints received regarding certain code violations, I'm hopeful that City Council will consider moving toward a more proactive code enforcement model. I have contacted our neighboring cities Code Enforcement Departments to gain a better understanding of how they handle code enforcement. I believe we can make minor changes to our code enforcement that will benefit the majority of our residents.

Our neighbors (Blaine, Fridley, Coon Rapids & Mounds View) provide proactive code enforcement at the discretion of the code enforcement officers in each city. The Cities of Blaine, Fridley and Coon Rapids have full time proactive code enforcement. I don't believe these models work as well nor do they provide the residents of Spring Lake Park with code enforcement that focuses on the true nuisances that are commonly reported.

Mounds View's inspector utilizes a hybrid of both proactive for the more obvious violations (unnecessary clutter/junk, parking on lawns, poorly maintained homes, etc.) while utilizing reactive code enforcement for less-frequently received complaints such as garbage cans left out in public view or in proper storage in rear yards not readily visible from the right-of-way. I also agree with enforcing code on the city block in which a complaint is receive, for example we receive a complaint for the 300-block of Manor, if similar violations are present at other homes on the same block they also receive corrective orders. This helps focus our efforts toward troubled areas and/ or pockets within the City while ensuring that no one resident is being singled out by an upset neighbor.

My proposed solution is to provide our residents with Code Enforcement that better suits their expectations. Proactive code enforcement on the codes attached, while utilizing reactive for all other violations with the precedent of enforcing similar code violations present on the same city block. I believe this will alleviate tensions felt by some residents when they feel the City is intentionally refraining from intervening when we are aware of violations. I also believe the working knowledge that code enforcement will be looking at the block as a whole may deter complaints out of spite or frustration.

This change will allow Code Enforcement to provide as much code enforcement as time allows with the combination roles for Building Official, Fire Marshal, and Code Enforcement Director, Baker along with Firefighter, Code Enforcement, Fire Inspector, and Rental Housing inspector for myself. I understand that we have periods of time in which it may be difficult to spend hours each day providing code enforcement, however, this does allow us to ensure a minimum standard is being upheld throughout the city.

Thank you for your consideration,

Walter Morris

#### These are the most commonly fielded Nuisance complaints received.

Noxious weeds – SLPC: 9.20.020 - All noxious weeds, tall grasses defined as anything over nine inches in height.

Trash and debris / rubbish – SLPC: 9-20.020 - An accumulation trash or debris of any nature of any kind on private property.

Motor vehicle & Recreational Vehicle Parking and registration. SLPC:16.20.120 - All vehicles & recreational vehicles must be parked on the approved driveway and display current registration.

Abandoned Vehicles & property No person shall allow any partially dismantled, non-operating, wrecked, junked, or discarded vehicle to remain on that property longer than 96 hours

Discarding of debris onto public right of way SLPC:9.20.020 - Throwing, Placing of trash, lawn clippings or other material in the streets, alleys, or gutters.

Property Maintenance. IPMC: 2018 - All interior, exterior surfaces along with Mechanical, Plumbing, electrical equipment must be maintained in a proper state of repair.

#### Life safety, and emergency response related codes.

Address numbers & Visibility. MSFC: Sec 505.1 Address numbers and building identification shall contrast with their background. Position as to be plainly Visible and legible from the street as approved by fire inspector. Address numbers shall have a minimum 4-inch-high numbers, with a minimum stroke width of 1/2 inch

Recreational Fire & Wood storage: SBM FD & SLPC:9.20.010 C. Recreational fire pits must be a minimum of 25ft or greater from all combustible structures. All Rec fires must be attended by an adult with means of extinguishment. Fire wood must no closer than 5 ft away from property lines. Fire wood must be stored in neat secure stacks no less than 6 inches off of the ground.

Obstruction intersection / clear view of traffic - SLPC: 9.20.020 All trees, hedges, or other obstructions which prevent people from having a clear view of all traffic approaching intersections.

# Memorandum

To: Mayor Nelson and Members of the City Council

From: John Thames, City Attorney

Date: July 5, 2023

Subject: Cannabis, Edible Cannabinoids and Drug Paraphernalia Ordinance

As the Council is aware, the Minnesota Legislature passed a new law in 2022 which made it legal to sell certain edible cannabinoid products (a.k.a. "lower potency hemp edibles"). In response to this new law, the City of Spring Lake Park passed Ordinance 11.48 "Edible Cannabinoid Products" which created a local licensing framework for vendors who made such sales.

In 2023, the Minnesota Legislature approved Session Law Ch. 63, which expanded both the legalization of the types of THC products and the also the types of THC and Cannabis businesses permitted in the state. The same also established certain registration/licensing frameworks for edible cannabinoid vendors. The Legislature concurrently repealed MN Statute 152.092 ("Possession of Drug Paraphernalia Prohibited") and made certain revisions to MN statute 152.025 ("Controlled Substance Crime in the Fifth Degree"), which excepts from that crime the possession of residual amounts of controlled substances which are found in drug paraphernalia. This exception was expanded to except possession of controlled substances beyond marijuana. (See the relevant portion of the revised law below.)

#### 152.025 Controlled Substance Crime in the Fifth Degree

#### Subd. 2. Possession and other crimes.

A person is guilty of controlled substance crime in the fifth degree and upon conviction may be sentenced as provided in subdivision 4 if:

(1) the person unlawfully possesses one or more mixtures containing a controlled substance classified in Schedule I, II, III, or IV, except a small amount of marijuana or a residual amount of one or more mixtures of controlled substances contained in drug paraphernalia;

Subject to certain limitations, the 2023 laws permit cities to prohibit the public use of cannabis and cannabinoid products and also to prohibit the possession of drug paraphernalia. The City passed a moratorium at its last meeting to temporarily prohibit the operation of cannabis businesses to allow the time for the matter to be studied and for proper regulations to be established. The moratorium does not apply to edible cannabinoid products, which are currently sold pursuant to the City's licensing process.

The state intends to begin registering vendors of edible cannabinoid products this fall. All such vendors must register with the state by October 1, 2023. It is believed that when the state begins to issue registration/licenses to such businesses, that local regulation thereof will be preempted. This will mean that the City of Spring Lake Park's Edible Cannabinoid Licensing framework must cease in favor of the state registration/licensing process. This proposed ordinance will repeal that licensing process and replace it with more basic zoning restrictions as to where such businesses may operate, in compliance with the new law. The Council will need to determine in what zoning districts theses sales should be permitted and whether any restriction on the number of registrations will be imposed.

This proposed ordinance also exercises the City's authority to prohibit public use of cannabis and edible cannabinoids and prohibits the possession of drug paraphernalia within the City. The latter prohibition does not prohibit marijuana paraphernalia, but does prohibit possession of paraphernalia containing residual amounts of controlled substances *other than marijuana*. The passage of this ordinance will allow the maintenance of the status quo for law enforcement to conduct searches based on probable cause as to the possession of illegal controlled substances (e.g. methamphetamines, etc.).<sup>1</sup>

If you have any questions, please don't hesitate to contact me at 763-561-2800. Thank you.

<sup>&</sup>lt;sup>1</sup> Illustratively, in the event of detection of a controlled substance other than marijuana in a vehicle, an otherwise valid search of that vehicle can remain valid even if the search does not yield the discovery of a controlled substance beyond residue within drug paraphernalia.

## SPRING LAKE PARK ORDINANCE XX

**NOW THEREFORE,** be it ordained by the Council of the Spring Lake Park, in the State of Minnesota, as follows:

**SECTION 1:** REPEAL "11.48 EDIBLE CANNABINOID PRODUCTS" of the Spring Lake Park Municipal Code is hereby repealed in its entirety.

**SECTION 2:** <u>ADOPTION</u> "11.50 CANNABIS AND EDIBLE CANNABINOID PRODUCTS, AND DRUG PARAPHERNALIA" of the Spring Lake Park Municipal Code is hereby *added* as follows:

#### ADOPTION

11.50 CANNABIS AND EDIBLE CANNABINOID PRODUCTS, AND DRUG PARAPHERNALIA (Added)

**SECTION 3:** <u>ADOPTION</u> "11.50.010 Purpose And Intent" of the Spring Lake Park Municipal Code is hereby *added* as follows:

### ADOPTION

11.48.010 Purpose And Intent (Added)

In 2022, the Minnesota Legislature adopted M.S. § 151.72, making it legal to sell certain edibles and beverages infused with tetrahydrocannabinol (THC), the cannabis ingredient extracted from hemp. In 2023, the Minnesota Legislature approved 2023 Session Law Ch. 63, expanding both the legalization of types of THC and cannabis products and also the types of THC and Cannabis businesses permitted, and further making certain amendments to existing law related to the possession of drug paraphernalia. The City Council deems it necessary to provide for the regulation of these products in order to protect the public health safety and welfare and to ensure that the products are sold in accordance with State Law.

**SECTION 3:** <u>ADOPTION</u> "11.50.020 Adoption Of State Law By Reference" of the Spring Lake Park Municipal Code is hereby *added* as follows:

#### ADOPTION

11.50.020 Adoption of State Law By Reference (Added)

The provisions of M.S. § 151.72 and M.S. Chapter 342, as each may be amended from time Page 1 to time, are hereby adopted by reference and are made a part of this section as if set out in full.

**SECTION 4:** <u>ADOPTION</u> "11.50.030 Public Use of Cannabis and Edible Cannabinoids Prohibited" of the Spring Lake Park Municipal Code is hereby *added* as follows:

#### ADOPTION

11.50.030 Public Use of Cannabis and Edible Cannabinoids Prohibited (Added)

It is unlawful for any person to use cannabis flower, cannabis products, lower-potency hemp edibles, or hemp-derived consumer products as each is defined by state law, in a public place within the City of Spring Lake Park. For the purposes of this Section, "public place" shall not include:

- (a) A private residence, including the curtilage or yard of the same;
- (b) Private property not generally accessible by the public, unless the person is explicitly prohibited from consuming cannabis products, lower-potency hemp edibles, or hemp-derived consumer products on the property by the owner of the property; or
- (c) The premises of an establishment or event licensed to permit on-site consumption, provided the use complies with the on-site consumption permitted.

Any violation of this Section 11.50.030 shall be a petty misdemeanor.

**SECTION 5:** <u>ADOPTION</u> "11.50.040 Limitations on the Sale of Edible Cannabinoid Products" of the Spring Lake Park Municipal Code is hereby *added* as follows:

#### ADOPTION

11.50.40 Limitations on the Sale of Edible Cannabinoid Products (Added)

Edible Cannabinoid Products, as defined by M.S. § 151.72, which contain no more than 0.3% Tetrahydrocannabinol (commonly known as "THC"), may only be sold by businesses which are registered with the City and the State of Minnesota and licensed, when required by state law. To be eligible to register to sell edible cannabinoid products within the City, an applicant must comply with all of the following:

- (a) Pay the applicable registration fee to the City; and
- (b) Comply with all state and local registration and state licensing requirements; and
- (c) Locate the principal place of business which will conduct the sales within the \_\_\_\_\_ zoning district and, at the time of the application, no more than one other business which does not qualify as a "Cannabis

Business" pursuant to M.S. Chapter 342 is currently registered or licensed to sell edible cannabinoid products within that district; and (d) The sale of edible cannabinoid products outside of the zoning districts or in excess of the applicable registration limitations set forth in Section 11.50.40(c) is prohibited.

The City specifically intends that the requirements of this Section be considered local zoning requirements or regulations for the purposes of compliance with M.S. Chapter 342.

Any person or principal of any business found to be engaging in unlawful commercial activity in violation of this Section shall be guilty of a misdemeanor.

**SECTION 6:** <u>ADOPTION</u> "11.50.050 Possession of Drug Paraphernalia Prohibited" of the Spring Lake Park Municipal Code is hereby *added* as follows:

It is unlawful for any person knowingly or intentionally to use or possess drug paraphernalia. For the purposes of this Section, drug paraphernalia is defined as all equipment, products, and materials of any kind, except those used in conjunction with permitted uses of controlled substances pursuant to state law, which are knowingly or intentionally used primarily in (1) manufacturing a controlled substance other than cannabis flower, cannabis products, lower potency hemp edibles, or hemp-derived consumer products, (2) injecting, ingesting, inhaling, or otherwise introducing into the human body a controlled substance other than cannabis flower, cannabis products, lower potency hemp edibles, or hemp-derived consumer products, or (3) enhancing the effect of a controlled substance other than cannabis flower, cannabis products, lower potency hemp edibles, or hemp-derived consumer products.

"Drug paraphernalia" does not include the possession, manufacture, delivery, or sale of: (1) hypodermic syringes or needles or any instrument or implement which can be adapted for subcutaneous injections; or (2) products that detect the presence of fentanyl or a fentanyl analog in a controlled substance.

Any violation of this Section shall be a petty misdemeanor.

**SECTION 7:** <u>AMENDMENT</u> "11.52.020(A) Criminal History License Background Investigations" of the Spring Lake Park Municipal Code is hereby *amended* as follows, by deleting the stricken language:

#### AMENDMENT

### 11.52.020 Criminal History License Background Investigations

- A. The Police Department is hereby required, as the exclusive entity within the city, to do a criminal history background investigation on the applicants for the following licenses within the city:
  - 1. Peddlers, solicitors and transient merchants;
  - 2. Tobacco or edible cannabinoid products;
  - 3. Intoxicating liquor;
  - 4. Wine and 3.2% malt;
  - 5. Liquor pawnbrokers;
  - 6. Second hand goods;
  - 7. Dealer vehicles for hire;
  - 8. Sauna;
  - 9. Massage services;
  - 10. Sexually oriented business;
  - 11. Lawful gambling premises;
  - 12. Permit bingo hall;
  - 13. Kennel license; and
  - 14. Used car dealership.

**SECTION 8:** The City Fee Schedule is hereby amended to establish the Lower-Potency Hemp Edible Retailer (Sale of Certain Edible Cannabinoids) application fee at \$125/year per retail location, an initial license fee of \$125/year per retail location, and a renewal license fee of \$125/year per retail location.

**SECTION 9:** <u>EFFECTIVE DATE</u> This Ordinance shall be in full force and effect upon approval and publication according to law.

From: Daniel R. Buchholtz, MMC, Administrator, Clerk/Treasurer

Date: July 7, 2023

Subject: Sketch plan for 1780 CSAH 10

The City of Spring Lake Park has received a sketch plan from Vincent Companies for a 100-unit, 55+ age restricted market rate apartment to be located on a 2.66 acre parcel currently occupied by 1780 CSAH 10, 1790 CSAH 10 and 8054 Spring Lake Park Road NE. This proposed project would represent a \$30 million investment in Spring Lake Park.

The properties are surrounded by SBM Station 1 to the northwest, an apartment building, townhome buildings and two duplexes to the west, a single-family home to the south, and Spring Lake Park Auto to the east. The site has adequate sanitary sewer and water infrastructure to accommodate the proposed development.

The sketch plan is included on the next page. It is subject to change as more information is gathered and City Code requirements incorporated, but is being provided for discussion purposes.

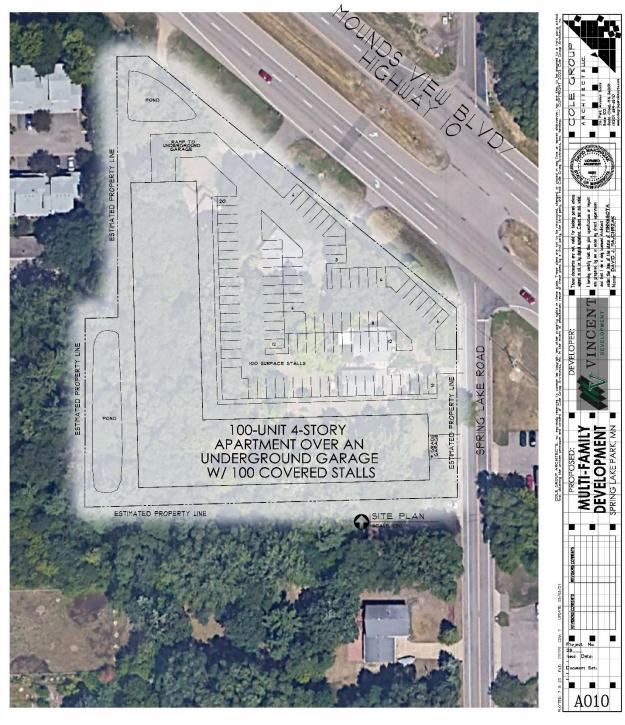

The City has a significant amount of senior housing, but it is all age restricted. This project would fill a gap in the City's housing stock for those seniors who would like to continue living in Spring Lake Park but whose income exceeds the limits set forth by HUD.

I will provide additional details on the proposed project on Monday. I would like to obtain your feedback so I can inform the developer as to the City's appetite for such a project.

Additional information about Vincent Companies can be found at <a href="www.vincentdevelopment.com">www.vincentdevelopment.com</a>. A project similar to this one is currently under construction in Burnsville. Project information on that development can be reviewed at <a href="www.vincentdevelopment.com/project/vincent-burnsville-apartments/">www.vincentdevelopment.com/project/vincent-burnsville-apartments/</a>.

If you have any questions, please do not hesitate to contact me at 763-784-6491.
