Stakeholder Mapping

Defining stakeholders:

"A stakeholder is any person, group, or organization that can make a claim on an organization's attention, resources, or output -- or that is affected by the organization's output." (Bryson)

"A stakeholder is anyone who can throw a wrench into the process and stop it before implementation." (E. Jensen)

• Key internal voices: electeds, employees, boards & commissions

• Key External voices: resource users, friends of/activity groups, residents, business, partners

5

Purpose of stakeholder analysis and mapping is to:

- Enlist key players early on

- Align stakeholders on project goals and plans

- Uncover and address conflicts or concerns

- Be better able to communicate to build understanding

- Anticipate stakeholder questions, concerns, and needs

6

Mapping – Let's do this!

Keep in mind that stakeholders can be internal (e.g., top leadership, team members and department supervisors, etc.) or external:

- Who has the most influence on us?

- Who is most impacted by City services?

- Who controls the resources we need?

- Who has financial stake or interest?

- Who might be an important person/agency/partner but not a central stakeholder?

How does this influence your leadership?
