Evaluate the feasibility of establishing a local housing rehabilitation program to improve housing safety and health conditions for households earning 80% or less of the Median Family Income. Much of the rental housing in Tualatin that is affordable to low and moderate-income households is older, privately owned housing that is not subject to affordability restrictions. This housing may have deferred maintenance issues as a result of a lack of resources to make improvements and pay for repairs (or, in some cases, owner neglect). The City can work with property owners of low-cost unregulated rental housing to support needed repairs without displacing tenants. This could include: ▪ Offer low interest loans and/or grants to property owners for repairs and major rehabilitation, providing they do not displace residents. ▪ Explore reducing regulatory and permitting requirements in the Development Code to identify and reduce challenges for owners seeking to improve older rental housing. ▪ Provide information/technical assistance to smaller property owners regarding state and local resources to support weatherization and healthy housing. ▪ Use the Multi-Unit Property Tax Exemption (Action 4.b) to support rehabilitation, as described in Action 4.b.	Develop a Program

Rationale	Keeping low-cost unregulated housing both habitable and affordable reduces the need for subsidized new construction.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, and low-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Renter ▪ **Potential Benefit:** - **Housing Production (new units):** This strategy is not anticipated to produce new units, but it is intended to preserve and may improve the quality of the City's existing supply of low-cost, regulated rental units. It may also result in improved health and safety for the residents in the existing units. - **Equitable Outcomes:** Improves housing safety and health conditions for households earning 80% or less of the Median Family Income. ▪ **Potential Risk** Most negative impacts would be borne by the property owner to address identified deficiencies. However, property may also have positive impacts, such as an increase in property value and longer-term renters. If the property owner makes substantial changes to the housing, that may increase rents (making it less affordable) or encourage conversion to owner-occupied housing. ▪ **Magnitude:** Low to moderate
Timeline	▪ **Timeline for adoption:** December 31, 2026 ▪ **Implementation to commence:** 2027 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented, as the incentives start to be used.
Implementation Steps	▪ Maintain and enhance the existing list of lower-cost, unregulated rental housing, including property locations, number of units per development, and property owner contact information. ▪ Evaluate programs, technical assistance opportunities, regulatory changes, and other options to support property improvements. This step can include multiple approaches, as noted in the description of this action. ▪ Reach out to property owners (identified in Step 1). Gauge their interest in improving the safety, health, and stability of their property. Determine what kinds of improvements their properties might need and what resources would be most useful to them. ▪ Refine and implement programs, technical assistance

	opportunities, regulatory changes, and other options (identified in Step 2) based on feedback from property owners. ▪ Connect interested property owners to established programs and opportunities. ▪ Seek additional federal funding through the US Department of Housing and Urban Development's (HUD's) Lead Hazard Control and Healthy Homes program.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Community Development Department, City of Tualatin Finance Department, and City of Tualatin Building Division and Engineering Division. ▪ **Partners:** Overlapping taxing districts (if using MUPTE), Washington County Public Housing Authority, and Community Alliance of Tenants (CAT)
Funding or Revenue Implications	Providing low interest loans, grants, or implementing the MUPTE tax exemption will require a funding source to backfill program dollars awarded/loaned. Implementing a new program such as the HUD Lead Hazard Control and Healthy Homes program would take extensive administrative and partner resources to meet federal regulatory requirements, including performance measures.

8.b	Evaluate the Implementation of a Healthy Housing Initiative for Single-Family Housing

Description	Type of Action
Evaluate the development of a Healthy Housing Initiative to address life safety, mold, lead and ventilation issues for single-family housing. A Healthy Housing Initiative could involve proactive inspection of single-family properties to identify issues similar to those mentioned above. In addition, this initiative could include an educational component to provide information on how to prevent these issues from developing and funding to address the issues identified in the inspections. This strategic action could be connected with Strategic Action 3.b, a Healthy Housing Initiative for Multifamily housing.	Implement a Program to Provide Financial Resources

Rationale	To improve older single-family properties in Tualatin that are lower cost, unregulated, and deteriorating. The City needs this housing stock, and it is important that housing stays affordable while ensuring habitable and healthy conditions for residents.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, low-income, and moderate-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Rental or owner ▪ **Potential Benefits:** - **Housing Production (new units):** This action focuses on addressing safety problems in existing housing, not producing new housing. If this action is used to assist 10 to 25 households per year, it may help 60 to 150 households over the 6-year period for the HPS. - **Equitable Outcomes:** Improves health and safety conditions in housing for qualifying households at 80% MFI or below. ▪ **Potential Risk:** Most negative impacts would be borne by the property owner to address identified deficiencies. However, the property owner may experience positive impacts too, such as increased property value and longer-term renters. If the property owner makes substantial changes to the housing, that may increase rents (making it less affordable) or encourage conversion to owner-occupied housing. ▪ **Magnitude:** Moderate to large, depending on the outreach of the program

Timeline	▪ **Timeline for adoption:** December 31, 2024 ▪ **Implementation to commence:** 2025 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented.
Implementation Steps	▪ Evaluate the benefit of establishing a Healthy Housing Initiative with interested stakeholders and the public. Conduct outreach to housing consumers and property owners/managers of older, single-family rental to gauge interest in resources and to identify questions/concerns about a potential inspection program. Consider initial grant research funding source, such as the Robert Wood Johnson Foundation. https://www.rwjf.org/en/how-we-work/grants-and-grant-programs.html ▪ If the initiative is deemed important, draft code language that covers mold, lead, ventilation, and other healthy/safety issues. ▪ Develop an educational component of the program in coordination with the Community Development Department with representation between Planning, Building, and Engineering. ▪ Establish program parameters: How can residents file complaints? How are inspections administered? How are alleged issues communicated to property owners? How are mitigation requests enforced? ▪ Establish source of funds to administer the program. ▪ Discuss topic with City Council at work sessions and in a public hearing if desired. Tualatin City Council may adopt the program and code language via ordinance.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Community Development Department ▪ **Partners:** Washington County Public Housing Authority, Community Alliance of Tenants (CAT), AARP
Funding or Revenue Implications	A source of funds to administer the program may be needed, such as CET funds. Alternatively, some additional staff time may be needed if the program is primarily informational.

Goal 9. Accessible Design and Other Specialized Design: Encourage and support Universal Design, Lifelong Housing Certification, and other similar standards.

We recommend that the City pursue the following goal, which supports the existing Goal 3.2 and Policy 3.2.1 and Goal 3.3 in the Comprehensive Plan:

- Encourage and support Universal Design, Lifelong Housing Certification, and other similar standards.

The strategic actions to evaluate and potentially implement this goal are described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

9.a	Evaluate the Development of Specialized Design Standards and Incentives to Accommodate Special Needs
Description	**Type of Action**
Research and evaluate development of standards in the City's development, building, and municipal codes to increase development of housing accessible for people with disabilities and other populations that need housing with specialized design. Disabilities include those that are visible, such as ambulatory or vision disabilities, and those that are not readily apparent, such as self-care, independent living, or cognitive disabilities. Other conditions may require special accommodations, such as disabling diseases or mental health conditions. Standards to accommodate special needs may include universal design components (e.g., basic accessibility features; security or communication systems; easily traversed floors; remote control features; accessible lavatories, sinks, and counters; accessible bathtubs and showers; variable height counters and accessible work surfaces; and hearing and visual impairment aids). Provide incentives in the Development Code to increase the number of units designed to meet Universal Design, Lifelong Housing Certification, and other similar standards. This strategy could include preapproved plan sets (e.g., single-family detached and attached homes with barrier-free universal design),[34] within the context of the	Develop Code Standards and Develop Incentives

[34] It may be that these types of plan sets become commonly used among different cities in Oregon, not necessarily developed from the ground up for each city.

American with Disabilities Act (ADA) and Federal Housing Administration (FHA) rules. One option could be to use the Oregon Lifelong Housing Certification program,[35] which lists accessibility at different levels of accessible design elements, such as "visitor accessible" (which is basic accessibility for visitors) and "enhanced accessible" (which is accessible for a person in a wheel chair for the central living floor). Consider offering path-of-travel improvements like curb ramps on the adjoining street/sidewalk. In consultation with the Building Department, the City may decrease charges (plan check fee) by 50% for preapproved plans and that the review to approve time would be three days, rather than potentially several weeks.	
Rationale	Provide more options for people to live independently or in a housing setting of their choice.
Anticipated Impact	▪ **Populations served:** Seniors and people with disabilities ▪ **Income:** Standards may apply to All Income Groups; Use of incentives may apply only to income qualifying households ▪ **Housing tenure:** Renter and Owner ▪ **Potential Benefit:** - **Housing Production (new units):** This strategy will not directly result in the production of new units, but it may increase the number of new units that have accessibility features incorporated into the design—or it may increase the number of units remodeled with accessibility features. - **Equitable Outcomes:** Serves people with disabilities, people with special needs, and seniors to provide housing accessibility, many of whom may also be low income. ▪ **Potential Risk:** There should be minimal negative impact if the strategic action is implemented as described above. If the City requires special design standards for all new housing (which is not recommended), that may increase housing development costs and decrease housing affordability. ▪ **Magnitude:** Low

[35] The Rogue Valley Council of Government's Lifelong Housing Certification Project is a "voluntary certification process for evaluating the accessibility and/or adaptability of homes. Developed in partnership with AARP Oregon, the project is designed to help meet the growing market demand for accessible housing in our region and to enable older adults and people with disabilities to age in place safely and independently." Information about this certification program can be found at: https://rvcog.org/home/sds-2/lifelong-housing-program/#:~:text=The%20Lifelong%20Housing%20Certification%20Project,call%20541%2D423%2D1383.

Timeline	▪ **Timeline for adoption:** December 31, 2024 ▪ **Implementation to commence:** 2025 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code.
Implementation Steps	▪ Develop an incentive program and source of funding to increase the number of dwelling units designed accessibly. ▪ Work with developers to gather feedback on program parameters and interest. ▪ Implement program (and potentially a new funding source) through council action.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Community Development Department ▪ **Partners:** Home Builders Association of Metropolitan Portland; Fair Housing Council of Oregon; AARP
Funding or Revenue Implications	Developing preapproved plans may require hiring consultants to develop the plans. Lowering the fee to review the preapproved plans should be commensurate with the lower staff effort to review the plans.

Goal 10. Mixed-Use Housing and Redevelopment: Encourage and support development of mixed-use, mixed-income, and multifamily housing in commercial zones and urban renewal areas for households earning 0-80% of Median Family Income.

We recommend that the City pursue the following goal, which supports the existing Goal 3.2, Goal 3.3, Goal 3.4, and Policy 3.4.1 and Policy 3.4.2 in the Comprehensive Plan:

- Encourage and support development of mixed-use, mixed-income, and multifamily housing in commercial zones and urban renewal areas for households earning 0-80% of Median Family Income.

This goal includes affordable housing (0-60% of Median Family Income) and may include workforce housing (61-80% of Median Family Income). Development of mixed-use housing will likely also result in development of housing affordable above 80% of Median Family Income. The strategic actions to evaluate and potentially implement this goal are described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

10.a Evaluate Redevelopment Opportunities for the Creation of Mixed-Use Development Districts to Support Development of Affordable Housing and Workforce Housing

Description	Type of Action
Identify and evaluate redevelopment opportunities to create mixed-use districts, which could include an area master planning process to guide development. A key finding of the Housing Needs Analysis is that Tualatin has limited land for development of multifamily housing and projects deficits of land to accommodate new housing in the Medium High Density and High Density / High Rise plan designations. The Economic Opportunities Analysis finds that Tualatin has limited land for commercial development. The COVID 19 pandemic has resulted in closure of businesses, which will leave existing buildings with vacant spaces and lessen the pressure for development of new commercial space, at least in the next two to five years. To address the need for more land for multifamily housing development and commercial uses, the City could identify several areas within Tualatin for redevelopment into mixed-use areas, with a mixture of higher-density housing and employment uses such as retail, office, and commercial services. These may be underutilized commercial or industrial areas ripe for mixed-use or mixed-income redevelopment. Two of these areas may already be identified through	Develop a Planning Process and Redevelopment Plans for Mixed-Use Districts

planning for Urban Renewal Districts: District 1 is the Basalt Creek and Southwest Industrial Area and District 2 is the North Study Area, Bridgeport Village, Town Commons, I-5 Corridor, and Tualatin-Sherwood Road. The City has yet to have discussions about funding for affordable housing in these areas. The City could engage the community in developing a vision for redeveloping the selected areas. The planning to implement this vision could be developed through redevelopment plans that show how the property will be redeveloped into a vibrant area with a mixture of uses, connections with Tualatin's automotive and pedestrian/bicycle transportation networks, and a variety of housing types. The redevelopment plans would typically include working with landowners to ensure they are supportive of the plans, as well as incorporating stakeholder and citizen input into the vision for the district and the formation of the redevelopment plans. A key aim would be to ensure equitable funding for affordable housing development to serve households earning 0-60% of Median Family Income and to consider opportunities for workforce housing at 61-80% of Median Family Income in mixed-use districts and urban renewal areas through redevelopment. To ensure that the districts provide opportunities for development of income-restricted affordable housing and consider workforce housing (housing affordable for rent between 61% and 80% of MFI), the City could evaluate opportunities to implement strategic actions such as 1.a (property tax exemption for income-restricted housing), 1.d (planning for Urban Renewal), 1.f (public and other land for affordable housing), 6.a (inclusion of workforce housing in multifamily development), and regulatory actions in Policy 11.	
Rationale	Creating mixed-use districts would provide opportunity for development of new multifamily housing in areas with commercial services and access to some types of jobs.
Anticipated Impact	▪ **Populations served:** Low-income, moderate-income, and high-income residents ▪ **Income:** Inclusive of income-restricted housing development that will serve 0-60% of Median Family Income and workforce housing at 61-80% of Median Family Income. ▪ **Housing tenure:** Renter or Owner ▪ **Potential Impacts:** - **Housing Production (new units):** The amount of housing

	production depends on the size and number of properties that are redeveloped. If this strategy identified 5 acres of land for residential redevelopment over the six-year planning horizon, at 80 units per acre (assuming 4 to 6 story buildings), this strategy could produce between 400 units of housing. Achieving this density will require changes to the Tualatin Development Code to allow this level of density. - **Equitable Outcomes:** Equitable funding for housing development for affordable housing and workforce housing in mixed-use districts and urban renewal areas through redevelopment. ▪ **Potential Risk:** Redevelopment could displace existing residents. Lower-income residents may be most vulnerable to redevelopment and urban renewal, unless housing preservation actions are taken and affordable housing investments are made to offset displacement. ▪ **Magnitude:** Large
Timeline	▪ **Timeline for adoption:** December 31, 2022 ▪ **Implementation to commence:** 2023 ▪ **Time frame of impact:** It would likely be at least 5 to 10 years before there is sufficient revenue in the Urban Renewal District to have enough funds to make significant investment in housing. The strategic action may have impact sooner for redevelopment that does not depend on Urban Renewal.
Implementation Steps	▪ Identify and evaluate areas within Tualatin for redevelopment into mixed-use areas, which may be Urban Renewal District 1 and District 2 and additional areas. ▪ Engage the community in developing a vision for redeveloping the selected areas. ▪ Use available tools, such as Urban Renewal, to support redevelopment of these areas. ▪ Identify opportunities for supporting development of income-restricted affordable housing. Also consider opportunities for workforce housing. Funding for housing affordable in the 61-80% MFI is limited and may be difficult to find. ▪ Identify land to rezone for mixed-use (see Strategic Action 10.b), as part of the redevelopment planning. ▪ Identify infrastructure improvements necessary to support development of the mixed-use district. Incorporate these improvements and costs into the City's capital improvements plan.

	▪ Develop the policies and development standards necessary to support development of a mixed-use district. ▪ Work with the Planning Commission and City Council to adopt the redevelopment plans and begin implementing them.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** City of Tualatin Finance Department, City of Tualatin Engineering and Building Division, and Developers
Funding or Revenue Implications	Developing and implementing plans for mixed-use districts will take substantial staff time and may require hiring consultants. Developing mixed-use district plans will have broader funding implications, especially for infrastructure development.

10.b Evaluate Opportunities for Conversion of Commercial Buildings to Residential Uses

Description	Type of Action
Identify and evaluate opportunities for housing above ground-floor retail, which would require an update to the Development Code to allow more housing above ground-floor retail in commercial areas. Tualatin has several underutilized commercial buildings, such as stores that have closed, that could be appropriate for redevelopment. The City could work with landowners to evaluate opportunities for redeveloping vacant buildings for new housing. The City could consider opportunities to support redevelopment of underutilized commercial buildings as part of developing a mixed-use district and redevelopment in Strategic Action 10.a. Implementing this action may depend, in part, on use of tools such as urban renewal (Strategic Action 1.d) to address infrastructure deficiencies or support development of affordable housing The City could also consider opportunities for conversion of some ground-floor retail to allow housing on the ground floor. This strategic action would be connected closely to Strategic Action 10.a, as a part of developing a mixed-use district and supporting development of income-restricted affordable housing and potentially workforce affordable housing.	Implement a Program

Rationale	Reusing vacant commercial buildings provides additional opportunities for housing, as well as making better use of an unused site.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, and low-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Predominantly renter housing with some opportunities for owner-occupied housing ▪ **Potential Benefit:** - **Housing Production (new units):** One existing building is about 60,500 square feet. Assuming that 75% of the building is used for housing (and the remainder used for shared spaces, like hallways), they may reasonably be converted into 56 units approximately 800 square feet in size or 37 units approximately 1,200 square feet in size. Two other older existing buildings

	that could be converted to housing are in the town center area and just west of town center and include: one at 15,000 square feet and the other 10,000 square feet. Under the same assumptions as above, these buildings together may result in 16 to 24 dwelling units. - **Equitable Outcomes:** Potential to provide housing for all income ranges. ▪ **Potential Risk:** There are likely to be no or minor negative impacts. ▪ **Magnitude:** Low to moderate
Timeline	▪ **Timeline for adoption:** June 30, 2023 ▪ **Implementation to commence:** 2023 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented, but redevelopment will depend on when the building owners move forward.
Implementation Steps	▪ Identify one or more vacant buildings that could be converted to residential uses. ▪ Discuss interest in converting vacant buildings to residential uses with the owners or assess the owners' interest in selling the buildings. ▪ Act as a convener between the owners and potential developers. ▪ Assist with the development process to make it easier for redevelopment to occur. This development may require a rezone from a commercial zone into a mixed-use zone where housing is allowed. ▪ Pursue the appropriate process for permitting the reuse of the building(s)
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Property owners of buildings considered for redevelopment and possibly adjacent/nearby property owners
Funding or Revenue Implications	Developing and implementing plans for conversion of vacant buildings for residential use will require staff time and may require City support for rezoning.

10.c Evaluate Opportunities to Rezone Land for Mixed-Use

Description	Type of Action
Identify and evaluate opportunities to rezone commercial or industrial land for mixed-use that includes employment and residential uses. In development of the mixed-use districts (Strategic Action 10.a), the City could identify opportunities to rezone underutilized land to a mixed-use zone. In addition, the City may identify other opportunities to rezone underutilized land to support mixed-use development in areas not included in the new mixed-use districts.	Make Change to Zoning Map

Rationale	This would help to address Tualatin's limited residential land base and to increase the supply of land that can accommodate residential uses outright.
Anticipated Impact	▪ **Populations served:** Low-income, moderate-income, and high-income residents and households ▪ **Income:** All income levels ▪ **Housing tenure:** Predominantly renter housing with some opportunities for owner-occupied housing ▪ **Potential Benefit:** - **Housing Production (new units):** The amount of housing production depends on the size and number of properties that are redeveloped. If this strategy identified 2 to 5 acres of land for residential redevelopment over the six-year planning horizon, at 80 units per acre (assuming 4 to 6 story buildings), this strategy could produce between 40 and 160 units of housing. Achieving this density will require changes to the Tualatin Development Code to allow this level of density. - **Equitable Outcomes:** Potential to provide mixed-use housing that is inclusive of affordable and workforce housing. ▪ **Potential Risk:** If successfully implemented, rezoning land could displace existing residents. Lower-income residents may be most vulnerable to rezoning, unless housing preservation actions are taken in conjunction with rezoning. ▪ **Magnitude:** Large
Timeline	▪ **Timeline for adoption:** December 31, 2022 ▪ **Implementation to commence:** 2022 ▪ **Time frame of impact:** The strategic action can begin to take effect once land is rezoned.

Implementation Steps	▪ Establish criteria to identify land to rezone for mixed-use (employment and residential) purposes. ▪ Pursue a public process (with public hearings) to implement the zone change.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Property owners of land considered for rezoning as well as adjacent/nearby property owners
Funding or Revenue Implications	This strategy would rely on use of staff time but may also require funds to hire a consultant to comply with the Transportation Planning Rule.

10.d Evaluate Establishing Incentives to Support Mixed-Use Development, such as the Vertical Housing Tax Abatement

Description	Type of Action
Identify, evaluate, and promote potential financial incentives for developers of mixed-use housing. Evaluate feasibility of adopting the Vertical Housing Tax Abatement within urban renewal districts or mixed-use zones. This program would provide a partial exemption of property taxes for multistory, mixed-use developments (residential over commercial space) for 10 years, which reduces operating costs and improves development feasibility. Using this program, a jurisdiction could subsidize mixed-use projects to encourage dense development or redevelopment by providing a partial property tax exemption on the building value for qualified developments. The exemption varies in accordance with the number of residential floors on a mixed-use project with a maximum property tax exemption of 80% of improvement value over 10 years. An additional property tax exemption on the land may be given if some or all of the residential housing is for low-income persons (80% of area median income or below), but this is uncommon. The Vertical Housing Tax Abatement helps to support affordable housing by providing retail opportunities nearer to income-restricted building. There is no tax exemption on the nonresidential component. The exemption is only available within areas designated by the City as a vertical housing development zone. The City must consider the potential for displacement of households within a proposed vertical housing development zone before designating the zone. Once the zone is established, a developer may apply for the Vertical Housing Tax Abatement program for eligible projects.	Adopt a Tax Exemption

Rationale	This tax abatement offers incentives for market-rate, mixed-income, and affordable housing, with greater incentives for affordable/mixed-income housing. It incents higher-density development, as well as mixed-income and mixed-use development.
Anticipated Impact	▪ **Populations served:** All populations potentially ▪ **Income:** Typically over 80% of Median Family Income unless applied to affordable housing (which is unusual)

	▪ **Housing tenure:** Renter ▪ **Potential Benefit:** - **Housing Production (new units):** If this incentive were used for one to two mixed-use apartment buildings at 50 to 150 units each with 25% of units affordable at less than 80% of Median Family Income, this strategy could contribute to development of 50 to 300 units. - **Equitable Outcomes:** Supports mixed-use housing, which may include workforce housing with retail or other uses. ▪ **Potential Risk:** The City and participating taxing districts would forgo property tax income for the duration of the exemption for the buildings where the exemption is granted, reducing revenue for city services and revenue for participating taxing districts. This tax abatement may disproportionately benefit moderate and high-income households, who can afford the rents in mixed-use housing unless affordable housing units are part of the mix. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2023 ▪ **Implementation to commence:** 2024 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented, when property owners begin to apply for the tax exemption.
Implementation Steps	▪ Evaluate the feasibility of and potential locations for establishing a Vertical Housing Tax Abatement Zone. ▪ If considering designating areas within existing or proposed urban renewal districts, consider potential impacts of the tax abatement on urban renewal financial forecasts. ▪ Evaluate likely impacts of the tax exemption on feasibility of desired mixed-use development. ▪ Evaluate impacts of the exemption and the potential resulting development on displacement for vulnerable populations. ▪ Discuss topic with City Council at work sessions and in public hearings. ▪ Notify overlapping taxing districts and offer the opportunity to opt out of having their rate included in the exemption.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** City of Tualatin Finance Department, developers

Funding or Revenue Implications	The Vertical Housing Tax Abatement results in foregone general fund revenues for all overlapping taxing districts (unless they opt out). However, it can still increase tax revenue if new development occurs that would not otherwise, because the commercial portion is taxable immediately and the residential portion is added to the tax rolls when the abatement expires. If applied within an urban renewal district, the tax abatement instead affects the tax increment revenue to the district and does not necessarily directly affect the overlapping taxing districts.

Goal 11. Regulatory and Zoning Changes: Increase housing development opportunities through regulatory and zoning changes to accommodate a diverse range of housing types and price points to meet the housing needs in Tualatin.

We recommend that the City pursue the following goal, which supports the existing Policy 3.1.2, Goal 3.2, Policy 3.2.1, and Goal 3.3 in the Comprehensive Plan:

- Increase housing development opportunities through regulatory and zoning changes to accommodate a diverse range of housing types and price points to meet Tualatin's housing needs as identified in the current adopted Housing Needs Analysis.

The strategic actions to evaluate and potentially implement this goal are described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

11.a Evaluate Updating Density Standards for Multifamily Housing in Medium-Density, High-Density, and Mixed-Use Zones

Description	Type of Action
Evaluate the feasibility of increasing maximum densities—which would require corresponding revisions to other standards, including maximum lot coverage and minimum front setbacks—to create the opportunity for more efficient multifamily development in zones that allow it outright (High Density, High Density High-Rise, Medium Density High, Medium Density Low, and MUCOD (mixed-use zone)). Initial feasibility analysis indicates that existing densities for multifamily are too low to allow for efficient development or redevelopment of the type of housing the zones are intended to allow. At least one of the High Density and/or High Density High-Rise zones, as well as MUCOD, should allow for efficient 4 to 6 story buildings, and at least one zone (e.g. High Density and/or Medium Density High) should allow for efficient 2-3 story apartment buildings. Updates in the Medium Density High and Medium Density Low zones should be informed by changes to comply with HB 2001. One consideration in increasing density could be proximity to transit service and transit stations. Areas closer to transit, particularly high-capacity/high-frequency transit stations, may provide opportunities for increases of density in the Medium-Density, High-Density, and mixed-use zones. Areas near transit or transit stations may be places where density could be increased and parking requirements (in Strategic Action 11.c) could be decreased somewhat.	Adopt Zoning Code Changes

Rationale	Increasing densities and revising zoning standards allows more efficient use of buildable land, which may be particularly effective in areas with access to transit or near to transit stations. Given Tualatin's shortage of buildable land, allowing taller multifamily buildings will provide important opportunities for housing development.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, low-income, moderate-income, and high-income households ▪ **Income:** All income levels ▪ **Housing tenure:** Predominantly renter, possibly some owner units ▪ **Potential Benefit:** - **Housing Production (new units):** Tualatin has 16 acres of High Density and no acres of High Density High-Rise land, according to the Tualatin Housing Needs Analysis. If the City increased densities in these zones (from the current maximum density of 25 units per acre in High Density and 30 dwelling units per acre High Density High-Rise) to at least 80 units per acre (assuming 4 to 6 story buildings), that would allow for an additional 1,280 dwelling units to be built in High Density. If land is re-zoned to High Density High-Rise, that would allow for additional development at these higher densities. - **Equitable Outcomes:** May open up opportunity for development of affordable rental multifamily housing or workforce housing. ▪ **Potential Risk:** Allowing higher-density development may cause concern for some existing residents. ▪ **Magnitude:** Large
Timeline	▪ **Timeline for adoption:** June 30, 2022 ▪ **Implementation to commence:** 2022 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code.
Implementation Steps	▪ Evaluate conceptual feasibility with stakeholders and the public, identifying opportunities to alleviate resident concerns about traffic and parking as well as those associated with allowing taller buildings and denser development. ▪ Evaluate potential transportation and other public utility system impacts of potential changes. ▪ Draft revised zoning standard amendments, providing opportunities for public comment and discussions with planning

	commissioners and city councilors. ▪ Work with Tualatin's Planning Commission and City Council to adopt the revised standards into the Development Code.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Community Development Department ▪ **Partners:** City of Tualatin Public Works Department, area developers, property owners, and adjacent/nearby property owners and residents.
Funding or Revenue Implications	Revising zoning standards would rely on staff time and hiring a consultant to analyze the impacts of density increases on transportation and other public utility systems. For areas near transit or transit stations, Tualatin could apply for one of Metro's Transit-Oriented Development (TOD) grants to implement this strategic action.

11.b Evaluate Opportunities to Rezone Lower-Density Residential Land to Higher Density

Description	Type of Action
Evaluate and identify opportunities to re-zone Residential Low Density and Residential Medium Low-Density residential land for higher-density housing in selected areas. The Tualatin Housing Needs Analysis report showed that Tualatin has very little buildable land in the following zones: Medium High Density, High Density, and High Density High-Rise zones. The report identified a seven acre deficit of land in the Medium High Density zone and a four acre deficit in the High Density High-Rise zone for development through 2040.	Adopt Zoning Code Changes

Rationale	This could help to address Tualatin's limited residential land base and to increase the supply of land that can accommodate residential uses at higher densities.
Anticipated Impact	▪ **Populations served:** Low-income, moderate-income, and high-income residents and households ▪ **Income:** All income levels ▪ **Housing tenure:** Predominantly renter housing with some opportunities for owner-occupied housing ▪ **Potential Benefit:** - **Housing Production (new units):** The amount of housing production depends on the size and number of properties that are rezoned. If this strategy identified 2 to 5 acres of land for residential redevelopment over the six-year planning horizon, at 70 to 150 units per acre (assuming 4 to 6-story buildings), this strategy could produce between 140 and 750 units of housing from land zoned Low Density. - **Equitable Outcomes:** May open up opportunity for development of affordable rental multifamily housing or workforce housing. ▪ **Potential Risk:** Rezoning land could displace existing residents. Lower-income residents may be most vulnerable to rezoning, unless affordable housing preservation actions are taken in conjunction with rezoning. ▪ **Magnitude:** Moderate to large, depending on the amount of land rezoned

Timeline	▪ **Timeline for adoption:** June 30, 2022 ▪ **Implementation to commence:** 2022 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code.
Implementation Steps	▪ Establish criteria to identify land to rezone for higher-density residential uses. ▪ Pursue a public process (with public hearings) to implement the zone changes.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Property owners of land considered for rezoning as well as adjacent/nearby property owners
Funding or Revenue Implications	Revising density standards is a comparatively low-cost strategy, primarily relying on the use of staff time.

11.c Evaluate the Feasibility of Targeted Reductions to Off-Street Parking Requirements

Description	Type of Action
Evaluate the feasibility of providing off-street parking reductions targeted for multifamily and/or affordable housing, particularly in conjunction with nearby transit availability. Current parking ratios for multifamily create an additional potential obstacle to higher-density/efficient development, particularly for affordable housing and zones that are intended for higher-density housing (four or more stories in height). High parking ratios for retail and restaurants may also present an obstacle to mixed-use development. Tualatin could consider allowing reduction of parking requirements near transit and affordable housing with tenants who generally own fewer cars, like seniors. In addition, the City should consider allowing public on-street parking in rights-of-way within a certain radius to count toward off-street parking requirements. This strategic action should be implemented in conjunction with the increases to density in High Density and High Density High-Rise zones, in Strategic Action 11a, because the strategic actions work together to achieve higher densities.	Adopt Zoning Code Changes

Rationale	Reducing parking requirements reduces costs and can allow a development to fit more units on a site, making public resources go further.
Anticipated Impact	▪ **Populations served:** Low-income, moderate-income, and high-income households ▪ **Income**: All income levels ▪ **Housing tenure:** Renter ▪ **Potential Benefit:** - **Housing Production (new units):** This strategy may not produce units in itself. But it may support development of more affordable units, especially in conjunction with Strategic Action 11.a. - **Equitable Outcomes:** Allowing parking reductions may benefit affordable housing developments that will serve a percentage of tenants that do not own cars, such as seniors in some cases. ▪ **Potential Risk:** Reducing off-street parking requirements may

	cause concern for existing residents. For lower-income residents to benefit, this action should be taken in conjunction with development of affordable housing. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2022 ▪ **Implementation to commence:** 2023 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code.
Implementation Steps	▪ Evaluate off-street parking requirements for multifamily housing to identify opportunities for reduction in parking requirements. ▪ Evaluate how potential amendments would affect the type and amount of multifamily housing that would be feasible to build in Tualatin. ▪ Adopt revised parking standards by amending the Development Code.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Development Community
Funding or Revenue Implications	Amending the City's Development Code is a comparatively low-cost strategy, primarily relying on the use of staff time.

11.d Evaluate Updating Code to Allow Small Dwelling Unit Developments

Description	Type of Action
Tualatin should evaluate the potential to update its development, municipal, and building codes to allow small-scale units with affordable housing income limits that are not part of HB 2001. This could be accomplished by allowing land division where small lots or parcels are created below the standard lot/parcel size for dwelling units that are limited in size. Tualatin could consider this in the context of new cottage cluster regulations because of the similar development type. This would involve calculating density differently for the dwelling units due to their limited size. For example: ▪ Dwelling units 600 square feet or smaller: 0.25 of a dwelling unit. ▪ Dwelling units 601 to 1,200 square feet: 0.50 of a dwelling unit. This strategy may result in housing opportunity for households at 60% of MFI or lower. But this strategic action is not expected to result in income-restricted housing on its own. It is more likely to produce housing affordable at 61% to 100% of MFI.	Adopt Zoning Code Changes

Rationale	Provides greater opportunity for development of housing affordable to low and moderate-income households.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, low-income, and moderate-income households ▪ **Income:** 100% of MFI or less. ▪ **Housing tenure:** Renter and owner ▪ **Potential Benefit:** - **Housing Production (new units):** If this strategy resulted in development of one acre for small dwelling units over the six-year planning horizon, at 10 to 15 units per acre, this strategy could produce between 10 and 15 units of housing. This may represent a pilot of this policy. - **Equitable Outcomes:** May produce small number of units of housing that could serve lower-income households. ▪ **Potential Risk:** Allowing smaller units may increase density in existing neighborhoods, with the potential to cause concern for some existing residents.

	▪ **Magnitude:** Low
Timeline	▪ **Timeline for adoption:** December 31, 2024 ▪ **Implementation to commence:** 2024 or early 2025 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code.
Implementation Steps	▪ Revise Tualatin's Development Code to allow these smaller units, including revising the density standards. ▪ Pursue a public process (with public hearings) to implement the zone changes.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Small-scale housing developers and builders, lenders
Funding or Revenue Implications	Amending the City's Development Code is a comparatively low-cost strategy, primarily relying on the use of staff time.

11.e Evaluate Adopting an Expedited Permitting Process for Affordable Rental Housing and Affordable Homeownership

Description	Type of Action
Evaluate adopting an expedited and/or priority review process for review of development proposed for affordable rental housing at 0-60% of Median Family Income and affordable homeownership at 80% of Median Family Income and below. Such a process could consider projects with direct or indirect funding from local, state, or federal government as essential and projects with long-term affordability covenants through tax abatement or inclusionary requirements as high priority. Assigning a designated staff person to shepherd these projects through the development and construction process in order to expedite them is likely to be essential.	Make Development Process Changes

Rationale	Expedited permitting of both land use applications and building permits would help to reduce costs and financial vulnerabilities of development and construction of affordable housing.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, low-income, and moderate-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Renter or Owner ▪ **Potential Benefit:** - **Housing Production (new units):** This action will not directly result in development of more units but may make it easier to develop affordable housing. - **Equitable Outcomes:** Beneficial to affordable housing development, as it can save on costs and construction time. ▪ **Potential Risk:** This strategic action may allow less time for comment on affordable housing development. Expediting permitting processes for affordable housing may result in minor increases in the time needed for the permitting processes of other development. ▪ **Magnitude:** Low to moderate
Timeline	▪ **Timeline for adoption:** June 30, 2023 ▪ **Implementation to commence:** 2023 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code

Implementation Steps	▪ Plan and carry out public engagement to get input on changes in the permitting system. ▪ Pursue public decision-making process to make the changes to the permitting system.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Community Development Department ▪ **Partners:** Local and Regional Development Community
Funding or Revenue Implications	Amending the City's permitting process is a comparatively low-cost strategy, primarily relying on the use of staff time.

11.f Evaluate Providing Additional Engagement and Information to Developers of Affordable Housing

Description	Type of Action
The City could evaluate the establishment of a formalized information source (i.e., an FAQ) or additional engagement opportunities specific to developers of affordable housing. The City informally provides information to small, local developers to help them understand land use permitting processes and to give developers a sense of clarity and certainty about the requirements so they can better provide smaller-scale housing at an affordable level. The City could create a formal process to provide this information to include all housing developers, especially aimed at those that can produce housing affordable at 80% of Median Family Income and below. The City could promote development of this housing through a City program with a variety of venues such as a developers' roundtable hosted by the Mayor, informational sessions with developers, promotion of incentives and funding resources, and more. These activities are intended to engage, inform, and build relationships with developers to attract them to do business in Tualatin.	Develop Processes and Materials

Rationale	Building relationships with developers, providing quality information to them, and offering incentives and networking opportunities to developers and those in the development community are effective ways to support development in Tualatin.
Anticipated Impact	▪ **Populations served:** Extremely low income and very low–income households ▪ **Income:** 0-60% of Median Family Income ▪ **Housing tenure:** Renter or Owner ▪ **Potential Benefit:** - **Housing Production (new units):** This action is aimed at attracting more affordable and workforce housing developers to Tualatin and may generate a fair amount of interest in housing for households at 0-80% of MFI, resulting in more development that would otherwise not have come here. - **Equitable Outcomes:** Cultivating relationships with affordable housing and workforce housing developers to develop equitable housing. ▪ **Potential Risk**: There are likely to be no or minor negative

	impacts. ▪ **Magnitude:** Low to moderate
Timeline	▪ **Timeline for adoption:** June 30, 2022 ▪ **Implementation to commence:** 2022 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code.
Implementation Steps	▪ Prepare materials and presentations intended to engage, inform, and educate developers about housing development in Tualatin and share what we have to offer in Tualatin. ▪ Meet with developers in a series of lively roundtable events to inform and interest them in Tualatin development opportunities and offer new incentives where possible. Gather feedback from the developers and development community. ▪ Continue to develop relationships with the development community and to update materials and presentations as needed.
Lead Agency and Potential Partners	▪ **Lead Agency:** Tualatin Planning Division ▪ **Partners:** Local and Regional Development Community
Funding or Revenue Implications	Developing materials and presentations for roundtable events about Tualatin's housing development opportunities and process may be labor intensive for staff.

Goal 12. Transportation and Public Infrastructure: Plan for and develop transportation and public infrastructure to support affordable housing, workforce housing, mixed-use housing, and mixed-income housing.

We recommend that the City pursue the following goal, which supports the existing Policy 3.1.5, Policy 3.1.6, Policy 3.1.7, and Goal 3.5 in the Comprehensive Plan:

- Plan for and develop transportation and public infrastructure to support affordable housing, workforce housing, and mixed-use housing.

The strategic action to evaluate and potentially implement this goal is described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

12.a Evaluate Ways to Prioritize Capital Improvements Programming for Affordable and Workforce Housing

Description	Type of Action
Evaluate ways to prioritize capital improvements programming (CIP) for affordable housing, workforce housing, and mixed-use housing with a component that includes a specified percentage of units for each of these types of housing. The City could coordinate housing planning, CIP planning, and public facilities planning to ensure projects that support development of needed housing types are prioritized. For example, implementing new sewer master plans or new stormwater plans in areas targeted for future housing expansions. This type of coordinated planning could make it easier to understand infrastructure costs. It would also enable the City and developers to plan for more development capacity in areas ripe for higher-density housing.	Improve CIP Planning Processes

Rationale	The City could prioritize work in a CIP and public facilities planning so that projects that support development of needed housing can be constructed sooner.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, and low-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Renter or Owner ▪ **Potential Benefit:** - **Housing Production (new units):** This strategy alone will not result in additional units, but it will improve coordination and

	commitment to production of housing. - **Equitable Outcomes**: Prioritizing capital improvements programming (CIP) for affordable housing, workforce housing, and mixed-use housing supports equitable housing development. ▪ **Potential Risk:** Funds spent on needed affordable, workforce, and mixed-used housing will be unavailable for other city infrastructure priorities. However, coordinated planning could result in a more integrated and efficient approach to planning for needed housing and infrastructure. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2023 ▪ **Implementation to commence:** 2024 ▪ **Time frame of impact:** The strategic action will begin to have impact with changes to funding of infrastructure to support affordable housing.
Implementation Steps	▪ Identify priority areas for infrastructure investment. ▪ Determine the types of infrastructure funding needs (specific projects and costs) in priority areas. ▪ Update the City's CIP and respective public facility plans by listing needed infrastructure projects in these documents and establishing an implementation schedule for these projects.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** City of Tualatin Public Works Department
Funding or Revenue Implications	Coordinated infrastructure planning is a comparatively low-cost strategy, primarily relying on the use of staff time.

4. Evaluation: Achieving Fair and Equitable Housing Outcomes

This chapter presents an evaluation of the goals and strategic actions for achieving fair and equitable housing outcomes. It also includes a discussion of monitoring the outcomes of Tualatin's HPS.

Evaluation of the Goals and Strategic Actions

OAR 660-008 requires an evaluation of all the HPS for achieving the following types of outcomes. The discussion below provides a brief evaluation of each of the expected outcomes for the goals and strategic actions of the HPS, with a focus on housing opportunities for federal and state protected classes.[36] This is not intended to be an exhaustive evaluation of how each strategic action addresses these outcomes but a high-level overview of the HPS as a whole.

- **Affordable Homeownership.** This criteria focuses on strategic actions that support production of housing affordable for homeownership and includes actions to support development of housing affordable at less than 120% of MFI. Many of the strategic actions in the HPS support development of affordable housing for homeownership through partnerships, fair housing, rehabilitation programs, removing regulatory barriers to development of affordable ownership housing, and capital improvements necessary to support affordable ownership housing. Some of the strategic actions within the HPS that support affordable homeownership include:
  - The strategic actions in Goal 2 are focused on production of affordable housing for homeownership. These strategic actions are intended to work together to identify and remove barriers to homeownership, provide education to residents of Tualatin about homeownership, make regulatory changes that make it easier to develop affordable housing for homeownership, and partner with organizations that build affordable ownership housing.
  - The strategic actions in Goal 5 focus on increasing equity in the City's housing policies. Strategic Action 5.a focuses on identifying funding sources to support the actions within the HPS, including those that support development of affordable ownership housing. Other strategic actions in Goal 5 support Fair Housing goals, which includes development of affordable ownership housing.
  - Strategic Action 8.b supports rehabilitation of single-family housing, which includes ownership housing for households with income below 80% of MFI. Rehabilitation

[36] Federal protected classes are: race, color, national origin, gender, familial status, and disability. Oregon's additional protected classes are: marital status, source of income, sexual orientation, and status as a domestic violence survivor. Under Fair Housing laws, it is illegal to deny access to housing in based on the characteristics of people within these protected classes.

may be necessary to improve housing conditions to allow people to continue to live in their housing.

- Goal 11 includes proposals for regulatory and zoning changes that support development of affordable ownership housing. These changes include allowing for development of small dwelling units, expediting permitting processes for affordable homeownership, and providing additional information to developers of affordable housing to make development in Tualatin easier.
- Strategic Action 12.a is intended to prioritize capital improvements for affordable housing, including ownership housing. Without infrastructure (such as roads, sewer, or water), vacant land cannot be developed for affordable ownership housing at the densities envisioned in the *Tualatin Housing Needs Analysis*.

- **Affordable Rental Housing**. Supporting affordable rental housing includes actions to support production of both income-restricted affordable housing (affordable to households with incomes below 60% of MFI) and privately developed affordable housing (affordable for households with incomes between 61% and 80% of MFI). Strategic actions within the HPS that support affordable rental housing development include:
  - The strategic actions in Goal 1 are focused on production of income-restricted affordable rental housing, with the exception of Strategic Action 1.d, which also includes workforce affordable housing. These strategic actions work together to support production of income-restricted affordable housing through proposal of actions that may reduce development or operational costs (property tax exemptions, changes to systems development charge changes, and identification of public or institutional land at low or no cost), increase funds available to support development of income-restricted affordable housing (a Construction Excise Tax, use of Urban Renewal, and identification of other sources of funding), and potential regulatory changes.
  - The strategic actions in Goals 3 and 4 are focused on preservation of existing affordable housing, both income-restricted and naturally occurring affordable housing.
  - The strategic actions in Goal 5 focus on increasing equity in the City's housing policies. Strategic Action 5.a focuses on identifying funding sources to support the actions within the HPS, including those that support development of affordable rental housing. Other strategic actions in Goal 5 support Fair Housing goals, which includes development of affordable rental housing.
  - The strategic actions in Goal 6 support development of workforce housing, which includes affordable rental housing.
  - Goal 7 supports housing stabilization, which includes strategic actions to provide rental and utility assistance.

- Strategic actions within Goal 10 support mixed-use development and redevelopment, with a focus on development of affordable housing. Given the small amount of vacant land for multifamily development in Tualatin, developing rental housing will require development of mixed-use housing and redevelopment.
- Goal 11 includes proposals for regulatory and zoning changes that support development of affordable rental housing. These changes include allowing for increases in the development of higher-density multifamily housing, upzoning of lower-density land to higher-density zones to increase the amount of land where multifamily housing can be built, potential targeted reductions of off-street parking requirements, expediting permitting processes for affordable rental housing, and providing additional information to developers of affordable housing to make development in Tualatin easier.
- Strategic Action 12.a is intended to prioritize capital improvements for affordable housing, including ownership housing. Without infrastructure (such as roads, sewer, or water), vacant land cannot be developed for affordable rental housing at the densities envisioned in the *Tualatin Housing Needs Analysis*.

- **Housing Stability.** Increasing housing stability includes actions that increase the stability of existing households and preventing displacement by mitigating gentrification resulting from public investments or redevelopment. Strategic actions within the HPS that address housing stability include:
  - Part of increasing housing stability will be preservation of existing housing, rehabilitation of housing, and development of more affordable ownership and rental housing. These items are discussed above.
  - Goal 7 supports housing stabilization, which includes strategic actions to provide rental and utility assistance and identifying housing options and services to address and prevent homelessness.
  - The descriptions of strategic actions under Goal 10 discuss the potential for displacement of existing residents through redevelopment. Through redevelopment planning, the City will need to be careful to avoid displacing existing residents through redevelopment. Urban Renewal District 2 has a mix of uses, including apartment buildings, commercial buildings, and public buildings. As the City plans for redevelopment here, the City will need to take care not to displace existing residents.
- **Housing Options for People Experiencing Homelessness.** Increasing options for people experiencing homelessness includes working with partners and identifying ways to address homelessness and strategic actions that reduce the risk of households becoming homeless (especially for households with income below 30% of MFI). Strategic actions within the HPS that provide options for people experiencing homelessness include:

- Part of providing options for people experiencing homelessness is development of income-restricted affordable housing, which is the focus of Goal 1 (as described above). The strategic actions in Goal 1 are also intended to provide affordable housing options for people at risk of becoming homeless, such as households with incomes below 30% of MFI.
- Strategic Action 7.b is to evaluate development of options for provision of housing and services necessary to address and prevent homelessness.

- **Housing Choice.** Increasing housing choice involves increasing access to housing for communities of color, low-income communities, people with disabilities, and other state and federal protected classes. Increasing housing choice also means increasing access to existing or new housing that is located in neighborhoods with healthy, safe environments and high-quality community amenities, schooling, and employment and business opportunities. Strategic actions within the HPS that increase housing choice include:
  - Increasing housing choice for state and federal protected classes involves preservation of existing housing, rehabilitation of housing, and development of more affordable ownership and rental housing. These items are discussed above.
  - The regulatory changes proposed in Goal 11 also support increases in housing choice for state and federal protected classes through supporting development of additional housing, which may be located in high-opportunity neighborhoods.
  - Strategic Action 5.d addresses housing choice directly through an evaluation of strategies to encourage development of diverse housing types in high-opportunity neighborhoods.
  - Strategic Actions 5.b and 5.c address Fair Housing issues, with the intention of increasing housing choice for state and federal protected classes.
- **Location of Housing.** Diversifying the location of housing requires increasing options for residential development that is compact, in mixed-use neighborhoods, and available to people within state and federal protected classes. This measure is intended, in part, to meet statewide greenhouse gas emission reduction goals. Strategic actions within the HPS that support development of compact, mixed-use neighborhoods include:
  - Goal 10 proposes strategic actions that increase options for development of compact housing in mixed-use neighborhoods. The strategic actions include evaluating opportunities for redevelopment and creation of mixed-use districts, conversion of unused commercial buildings to residential uses, evaluating land to rezone for mixed-use development, and a tax exemption to support mixed-use development.
  - Strategic actions in Goal 11 support diversifying the location of housing through evaluation of actions that increase multifamily development densities, upzone lower-density land, target reductions of off-street parking requirements, and allow smaller dwelling unit development.

- **Fair Housing.** Supporting Fair Housing is accomplished by increasing access to housing for people part of state and federal protected classes, affirmatively furthering fair housing, addressing disparities on access to housing opportunity for underserved communities, and decreasing patterns of segregations or concentrations of poverty. Strategic actions within the HPS that further Fair Housing goals include:
  - Production of affordable rental and homeownership housing, increasing housing stability, identifying housing options for people experiencing homelessness, and increasing housing choice are all part of supporting Fair Housing. These issues are addressed above.
  - The strategic actions in Goal 5 focus on increasing equity in the City's housing policies and Fair Housing. Strategic Action 5.a focuses on identifying funding sources to support the actions within the HPS. Strategic Actions 5.b and 5.c address Fair Housing issues, with the intention of increasing housing choice for state and federal protected classes. Strategic Action 5.d addresses housing choice directly through an evaluation of strategies to encourage development of diverse housing types in high-opportunity neighborhoods.

Taken together, the goals and strategic actions included in Tualatin's Housing Production Strategy are intended to work together to achieve equitable outcomes for all residents of Tualatin, with an emphasis on improving outcomes for historically underserved communities, households with lower income, and people in state and federal protected classes.

Monitoring Outcomes of the HPS

This is Tualatin's first HPS. As a result, the City is required to describe how it will measure the implementation and progress of the HPS. This section focuses on these issues.

Tualatin is required to report progress on implementation of the HPS to DLCD every three years.[37] This report must include:

- **A summary of the actions taken to implement the HPS**. There may be strategic actions that the City has not implemented on the schedule for the first three years of the HPS (i.e., actions expected to be adopted by December 31, 2024). If so, the City needs to provide an explanation of the barriers to implementation and a plan for addressing the need that the strategic action was intended to address. That plan could include identification of other strategic actions in the HPS that will meet the identified need, or it could include development of a new strategic action to meet the need.
- **A reflection of the efficacy of the strategic actions the City has implemented**. This reflection should discuss the outcomes the City is observing from the strategic actions they have implemented to date and could include expectations for future outcomes.

[37] This report is due to DLCD no later than December 31 three years after Tualatin adopts its HPS.

- **A reflection of the efficacy of the strategic actions in the context of the outcomes described above.** The section evaluates the goals and strategic actions in the HPS for expected outcomes such as increasing housing options for affordable homeownership, affordable rental housing, housing stability, housing options for people experiencing homelessness, housing choice, location of housing, and fair housing. The report should describe whether the goals and strategic actions implemented have resulted in the outcomes described above.

In addition, Tualatin is required to report about strategic actions that will not be adopted on the schedule presented in Exhibit 6. The City must notify DLCD that it will be unable to adopt the strategic action within 90 days of the end of the timeline to implement the strategic action. This notice must identify the actions or combinations of actions that the City will take to address the need that the strategic action was intended to address. This could include identification of other strategic actions in the HPS that will meet the identified need, or it could include development of a new strategic action to meet the need.

Tualatin proposes to monitor the impact of the HPS through the following measures. Tualatin staff will conduct a briefing to City Council every two years to discuss implementation of the HPS and the outcomes resulting from the strategic actions in the HPS.

- Number of new regulated affordable units built in Tualatin
- Loss of existing regulated affordable housing units
- Number of regulated affordable housing units that Tualatin contributed funding to, including the sources of funding or tax exemption
- Number of nonregulated affordable housing units that Tualatin contributed funding to, including the sources of funding or tax exemption
- Types of new units built
  - The types should at least include single-family detached, single-family attached, duplexes, triplexes, quadplexes, and multifamily with five or more units.
  - The types could be further disaggregated to include cottage housing, manufactured housing, accessory dwelling units, duplexes, triplexes, quadplexes, residential multifamily with five or more units, and mixed-use multifamily with five or more units.
- Densities of new units built by housing type and zone, considering the difference between the maximum allowed density and the built density
- Location of new units built
- Regulatory changes to allowable density by zone
- Code amendments that are made to remove barriers to development of housing

- Partnerships formed as a result of the HPS, including number of people served by the partnerships
- Changes in the characteristics of Tualatin's population, such as changes in:[38]
  - Median household income
  - Percent of population in communities of color
  - Percent of renters
  - Percent of renter households cost burdened and severely cost burdened
  - Percent of owner households cost burdened and severely cost burdened
- Changes in housing prices, such as:
  - Changes in median rent[39]
  - Changes in median sales price[40]

When Tualatin produces its next HPS in six years, the City will be required to summarize the efficacy of each strategic action included in this HPS. The information resulting from these measures will help Tualatin to summarize the outcomes and efficacy of the strategic actions in this HPS.

[38] The best source of data for these indicators is the US Census' American Community Survey Five-Year Estimate. These estimates naturally have some variation year over year and that variation may not indicate an actual change. The City should look at the change in these indicators over a period of at least 3 years or longer.

[39] The best existing source of data for rent is the US Census' American Community Survey Five-Year Estimate. The City should look at the change in these indicators over a period of at least 3 years or longer. The City may also want to discuss change in rents with knowledgeable stakeholders to get current information about rents.

[40] The US Census' American Community Survey Five-Year Estimate provides data about home values, but that data is not as reliable as other data about home sales. The City may be able to collect data about home sales from a source like Redfin or Zillow. Alternatively, the City may be able to work with a real estate professional who is able to provide median sales price data periodically.

Appendix A: Contextualizing Tualatin's Housing Needs

In 2019, Tualatin completed its Housing Needs Analysis for the 2020-2040 period.[41] The analysis found that Tualatin could not accommodate all of its housing needs on lands designated for residential use. Tualatin had a deficit of land in the Medium High Density and High-Density High-Rise Plan Designations, of seven acres (or 109 dwelling units) and four acres (or 101 dwelling units), respectively. The analysis also found that Tualatin had an unmet need for housing for extremely low income, very low–income, low-income, and moderate-income households—indicating a need for a wider range of housing types for renters and homeowners.

To build on Tualatin's recent planning efforts, including development of the Housing Needs Analysis, the City applied for a grant with the Department of Land Conservation and Development in 2020 to produce a prototype Housing Production Strategy. The Housing Production Strategy will craft policy measures and actions to address Tualatin's housing needs, meet the City's housing goals, and effect positive change in the community.

To contextualize Tualatin's housing needs, this memorandum summarizes relevant data from Tualatin's Housing Needs Analysis, Statewide Regional Housing Needs Analysis,[42] the Washington County Consolidated Plan,[43] and other available sources to describe current and future housing needs in the context of population and market trends in Tualatin. Where appropriate, this memorandum also draws on information gathered through engagement with housing producers and consumers, including underrepresented communities, through recent outreach efforts conducted by the City of Tualatin.

As a part of providing context to better understand Tualatin's housing needs, this memorandum presents information about housing in Tualatin for race, ethnicity, age, disability status, and other characteristics of the community to understand disproportionate housing impacts on different groups.

Data Used in This Analysis

Throughout this analysis, data from multiple well-recognized and reliable data sources were used. One of the key sources for housing and household data is the US Census. This report primarily uses data from two Census sources:[44]

[41] ECONorthwest. (December 2019). City of Tualatin Housing Needs Analysis, Final Report.

[42] ECONorthwest. (August 2020). Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations.

[43] Root Policy Research. (May 15, 2020). Washington County – Beaverton – Hillsboro 2020-2024 Consolidated Plan.

[44] It is worth commenting on the methods used for the American Community Survey. The American Community Survey (ACS) is a national survey that uses continuous measurement methods. It uses a sample of about 3.54 million

- The **Decennial Census**, which is completed every ten years and is a survey of *all* households in the United States. The Decennial Census is considered the best available data for information such as demographics (e.g., number of people, age distribution, or ethnic or racial composition), household characteristics (e.g., household size and composition), and housing occupancy characteristics. As of 2010, the Decennial Census does not collect more detailed household information, such as income, housing costs, housing characteristics, and other important household information. Decennial Census data is available for 2000 and 2010.
- The **American Community Survey (ACS)**, which is completed every year and is a *sample* of households in the United States. The ACS collects detailed information about households, including demographics (e.g., number of people, age distribution, ethnic or racial composition, country of origin, language spoken at home, and educational attainment), household characteristics (e.g., household size and composition), housing characteristics (e.g., type of housing unit, year unit built, or number of bedrooms), housing costs (e.g., rent, mortgage, utility, and insurance), housing value, income, and other characteristics.

This report uses data from the 2013-2017 ACS for Tualatin and comparison areas primarily. Where information is available and relevant, we report information from the 2000 and 2010 Decennial Census. Among other data points noted throughout this analysis, this report also includes data from Oregon's Housing and Community Services Department, the United States Department of Housing and Urban Development, RLIS, Redfin, Costar, the City of Tualatin, and the Washington County Consortia 2020-2024 Consolidated Plan.

households to produce annually updated estimates for the same small areas (census tracts and block groups) formerly surveyed via the Decennial Census long-form sample. It is also important to keep in mind that all ACS data are estimates that are subject to sample variability. This variability is referred to as "sampling error" and is expressed as a band or "margin of error" (MOE) around the estimate.

This report uses Census and ACS data because, despite the inherent methodological limits, they represent the most thorough and accurate data available to assess housing needs. We consider these limitations in making interpretations of the data and have strived not to draw conclusions beyond the quality of the data.

Existing Measures, Policies, or Strategies that Address Tualatin's Housing Needs

This City of Tualatin has the following housing measures (or policies or strategies) currently in place to address Tualatin's housing needs. These measures include:

- Prohibited single-family detached housing in most high-density zones in Tualatin.
- Allowed one or more accessory dwelling units (ADUs) in residential zones per lot.[45]
- Applied density standards uniformly across zones that allow dwelling units on fee simple lots and on multifamily sites.
- Ensured decisions about type and location of housing are data-driven and focused on equitable outcomes instead of the best outcomes for those with the most money and/or privilege.
- Removed open space/common amenity requirements for low-density residential.
- Provided information to small, local developers to help them understand land use permitting processes and to give developers a sense of clarity and certainty about the requirements so they can better provide smaller-scale housing.

Tualatin's existing measures generally focus on land use efficiency (such as allowing development of denser housing types) or measures to reduce development costs (such as removing open space requirements for some housing development). By and large, the types of policies that Tualatin has yet to adopt include policies to support:

- Development of affordable rental housing for households with incomes at or below 60% of Median Family Income (MFI).
- Preservation of affordable housing stock to prevent loss of affordable housing units and displacement of existing residents.
- Development and preservation of affordable housing for homeownership, including rehabilitation of existing housing.
- Expansion of workforce owner and rental housing to increase the jobs-housing balance.
- Increased racial and social equity for housing.
- Prevention and reduction of houselessness.
- Expansion of accessible housing and housing for people with special needs.
- Planning for mixed-use housing and redevelopment.
- Greater availability of diverse housing types through regulatory or zoning changes, including mixed-use housing and redevelopment in commercial areas.

[45] Tualatin's ADU provisions are not yet compliant in regard to HB 2001 off-street parking requirements.

- Planning for and developing transportation and public infrastructure to support affordable housing, workforce housing, and mixed-use housing development.

Summary of Tualatin's Housing Needs

Tualatin's primary housing needs, as described in the remainder of this memorandum, are:

- **Greater housing affordability and availability for renters.** Based on a survey of currently available rental properties in Tualatin, the typical asking rent for a two-bedroom apartment ranged from $1,125 for a one-bedroom unit to more than $2,000 per month for a three-bedroom unit. These costs are affordable to households earning 55% to 98% of the region's MFI (about $45,000 to $80,000). Competition for affordable units is strong and many cannot afford these rents without cost burdening themselves. In the 2013-2017 period, about 56% of Tualatin's renters were cost burdened, with 26% severely cost burdened.[46] Renters, especially those with lower incomes, are at risk of being displaced through increases in rental costs.
- **Greater housing affordability and availability for renters.** Based on a survey of currently available rental properties in Tualatin, the typical asking rent for a two-bedroom apartment was about $1,125 to more than $2,000 per month. These costs are affordable to households earning 55% to 98% of the region's MFI (about $45,000 to $80,000). Competition for affordable units is strong and many cannot afford these rents without cost burdening themselves. In the 2013-2017 period, about 56% of Tualatin's renters were cost burdened or severely cost burdened.
- **Housing diversity.** Tualatin is a relatively young and ethnically diverse city. While Tualatin comprises many families with and without children, the senior population across the region is growing. Tualatin serves as an important employment hub in the Portland Metro area, drawing workers from across the region. These characteristics suggest a need for a wide variety of housing types to meet the needs of a growing and diverse pool of existing and future residents.
- **Government-subsidized, emergency, and supportive housing.** Tualatin has about 604 rent-restricted affordable housing units (accounting for about 5% of Tualatin's housing stock), despite having about 1,753 households experiencing severe housing cost burden in the city. Tualatin's Continuum of Care region has 111 emergency shelter beds, 10 safe haven beds, 119 transitional shelter beds, and 725 permanently supportive housing beds supporting persons experiencing homelessness in the region. However, in 2019, 44% of people experiencing homelessness in the region were unsheltered and about 211

[46] A household is said to be cost burdened if they spend 30% or more of their gross income on housing costs. A household is said to be severely cost burdened if they spend 50% or more of their gross income on housing costs.

students in the Tualatin/Tigard School District experienced homelessness in some form in the 2018-19 school year (many of them doubled-up[47]).

Throughout this analysis, we discuss housing needs for specific populations, such as people of color. The reason for this discussion is that the housing needs of these populations are different from other groups in Tualatin. The Washington County Consolidated Plan describes the issue in the following way:

> "Analyses persistently demonstrate that some population groups, including communities of color and people with disabilities, experience disproportionately high housing cost burdens, are less likely to be homeowners, are disproportionately represented in the criminal justice system, have a school achievement gap and experience other disparities relative to health, wellbeing, wealth, income and life outcomes. In deciding on priorities, the County sought opportunities to address persistent historic imbalances, consider systemic causes and advance a more equitable and fair housing system."[48]

This analysis finds disproportionate housing needs in Tualatin for seniors, people of color, people with one or more disabilities, and people experiencing homelessness.

- **Seniors.** People 65 years of age and older tend to be disproportionally cost burdened compared to the average household—many living on fixed incomes in a region with increasingly growing housing costs.[49] About 62% of people aged 65 years of age and older are rent burdened in the Portland Region. Over the next twenty years, people over 65 years are expected to be the fastest-growing age group. As this group grows, Tualatin will need more housing that is affordable, physically accessible, and has needed services. Seniors will also need improved access to housing without discrimination, especially seniors who are also people of color.
- **People of Color.** About 55% of renter households that identified as Latino and 52% of renter households that identified as a non-Asian person of color were cost burdened in the Portland Region.[50] Latino is the largest ethnic or racial group in Tualatin (16% of the population) and has the lowest median income ($30,761) of any race or ethnicity in Tualatin. Broadly, the housing needs for many people of color in Tualatin include improved access to affordable units, access to housing in locations with "high

[47] "Doubled-up" refers to the sharing of other persons' housing due to loss of housing or economic hardship.

[48] *2020-2024 Consolidated Plan for Washington County and the Cities of Beaverton and Hillsboro, Executive Summary, page 3.*

[49] Some seniors have accumulated wealth, which is not accounted for in this analysis. Information about accumulated wealth is available at the national level but not at the state or city level.

[50] This information is not available on a city-by-city basis from the US Census ACS. This statistic is pulled from a statewide analysis from the report *Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations* by ECONorthwest, August 2020.

opportunity" (such as areas near jobs, transit, services, or high-quality education), and access to housing without discrimination.

- **People with disabilities.** Across the Portland Region, people with one or more disabilities experience dipropionate cost burden. In particular, 53% of renters in the Portland Region with a hearing or vision disability and 65% of renters with a disability other than a hearing or vision-based disability are cost burdened, compared to the average rate of cost burden for all households in the region at 46%. Housing needs of people with disabilities vary by type of disability, but in general, housing needs include a need for improved access to an affordable unit, improved physical access to housing units, access to housing with needed services, and access to housing without discrimination, especially for people with disabilities who are also people of color.
- **People experiencing homelessness.** People experiencing homelessness are disproportionately affected by lack of affordable housing. Three hundred seven people were identified as homeless and unsheltered in Washington County and 44 people were identified in the Tigard/Tualatin area in 2020. Housing needs for people experiencing homelessness vary by reason for homelessness. In Washington County, the primary reason people cited for experiencing homelessness was inability to afford housing. The broad housing needs for this group include needs for emergency assistance (including rent support), permanent supportive housing (including with supportive housing with services), and improved access to an affordable unit.

In addition to these needs, findings from public and stakeholder outreach helped to identify the following specific housing needs, as described later in this memorandum:

- ADA-accessible housing units and housing units developed with universal design components such as basic accessibility features; security or communication systems; easily traversed floors; remote control features; accessible lavatories, sinks, and counters; accessible bathtubs and showers; variable height counters and accessible work surfaces; and hearing and visual impairment aids.
- Wider range of housing types, such as more town homes and row houses, mixed-use development, duplexes, triplexes, cottage clusters, multigenerational housing, accessory dwelling units, and high-rise apartments (structures that are six to eight stories in height).
- Housing in mixed-use neighborhoods with access to transit, jobs, green space, and entertainment.
- Support for seniors to age in place.
- Housing options for households earning $50,000 or less.
- Higher-quality housing.

- Access to housing without discrimination.[51]

Discussions with stakeholders provided input on existing and expected barriers to development of needed housing, includes:

- High cost of land due to limited availability of sites (including larger sizes) that can accommodate new development.
- Increasingly high construction costs and competition for materials and labor.
- Zoning and development constraints, including lot size, height, density, and parking limitations/requirements.
- Competition for national or state grants and loans to subsidize affordable housing development.
- Developer willingness and financial ability to produce "needed" housing.

Overview of Housing Needs in Washington County

The Washington County Consolidated Plan for 2020 to 2024 presents additional information to provide context for Tualatin's housing needs. The groups with special housing needs in Washington County are elderly households, households with disabilities, and households with mental illness and/or substance abuse disorders. The section below presents a summary of the housing need for people in these groups. More information is available in Appendix D of the Washington County Consolidated Plan report.

- **Elderly and frail elderly.** In Washington County, between 8,000 and 20,000 elderly and frail elderly have unaddressed housing needs out of 95,000 individuals in 56,960 households that have at least one person 62 or older. About 21,000 households (38%) have a housing and supportive service need, and 25,000 households earn less than 80% of MFI and are very low income (an increase from the last Consolidated Plan). About 6,000 households in this group are extremely low income, earning less than 30% MFI. The primary concern of seniors who own their own home or live in market-rate rental housing is managing rising costs on fixed incomes. Affordable housing wait lists for seniors may be longer than their life expectancy, especially if they need a ground-floor unit. Moderate income seniors have no options for help. Lack of access to transportation is also a significant challenge for most seniors.

- **Persons with disabilities.** In Washington County, there are 57,605 households that have an individual with a self-care limitation, independent living limitation, and/or physical disability, representing 26%of households in the entire County. Another 18,200

[51] Issues around housing discrimination were additionally identified through the help of focus groups during production of the Washington County Consolidated Plan: Washington County, Beaverton, Hillsboro. (August 2020). *2020-2024 Consolidated Plan for Washington County and the Cities of Beaverton and Hillsboro*, Volume 1.

households have an individual with a cognitive limitation, representing 8% of households in the entire County.

- **Persons with mental illness and/or substance abuse disorders.** In Washington County, many as 40,000 have unaddressed substance abuse in need of treatment. According to the state data base on affordable housing, there are only three developments in Washington County that serve persons with substance abuse; these have a total of 84 beds.
- **Survivors of domestic violence.** In Washington County, there are an estimated 500 to 1000 housing units or supports needed.[52]

Some of the housing priorities in the Washington County Consolidated Plan include:

- Priorities for housing, including:
  - Increase the inventory of deeply affordable rental housing in good condition
  - Increase the inventory of accessible and visitable housing to serve elderly persons and those with disabilities
  - Improve the quality of affordable ownership housing in good condition and with accessibility features
  - Improve access to ownership for low to moderate income households through home buyer assistance programs/products and by helping increase the affordable ownership inventory
- Special needs priorities for elderly and frail; persons with disabilities; persons with mental illness and substance abuse challenges (includes those who are justice involved); adults and youth at risk and experiencing homelessness (including youth leaving the foster system); large families; agricultural workers; extremely low and very low–income households
- Neighborhood and community development priorities to expand transit to better serve persons with disabilities, elderly persons, and those without a car; expand the inventory of facilities servicing people experiencing homelessness; support household stabilization and displacement mitigation; and invest in public infrastructure and facilities that stabilize communities and support a variety of community needs and cultures.
- Public service priorities to fund supportive services and community-serving nonprofits and support educational and outreach activities focused on landlord-tenant and fair housing activities.

[52] *2020-2024 Consolidated Plan for Washington County and the Cities of Beaverton and Hillsboro, Appendix D.*

Demographic and Socioeconomic Characteristics Affecting Tualatin's Housing Needs

This section describes unmet housing needs in Tualatin by age, race and ethnicity, disability, household size and composition, and household income.

Age of People in Tualatin

Population growth is the primary driver of growth in housing. Between 2000 and 2020, Tualatin's population grew by about 4,404 people, with most of the growth occurring in the early 2000s. Over that period, Tualatin grew at a slower rate than Washington County and Oregon.

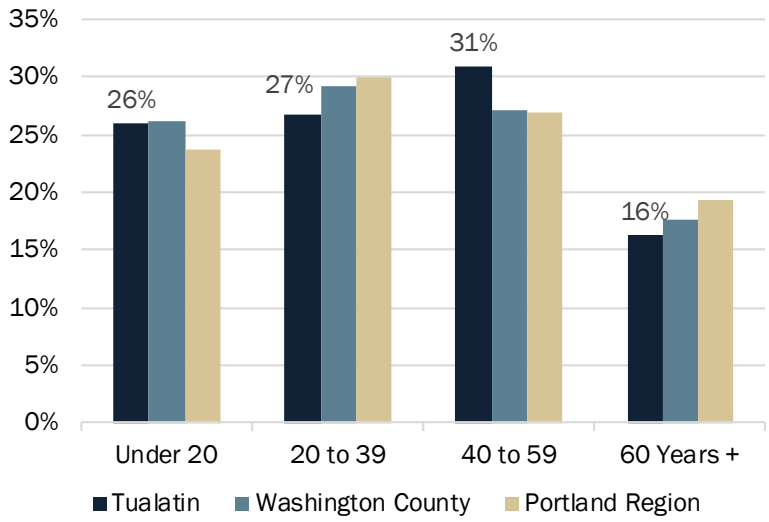
Growth in Tualatin's senior population, as well as other age cohorts, will continue to shape the city's housing needs. Seniors account for 16% of Tualatin's existing population, and Washington County expects to have more than 75,000 more people over 60 years old by 2040 than in 2020.

Growth in the number of seniors will result in demand for housing types specific to seniors, such as small and easy-to-maintain dwellings, assisted-living facilities, or age-restricted developments. Senior households will make a variety of housing choices, including remaining in their homes as long as they are able, downsizing to smaller single-family homes (detached and attached) or multifamily units, moving in with family, or moving into group housing (such as assisted-living facilities or nursing homes) as their health declines.

In the 2013-2017 period, about 16% of Tualatin's residents were over 60 years old.

Tualatin had a slightly smaller share of people over the age of 60 than Washington County and Portland Region.

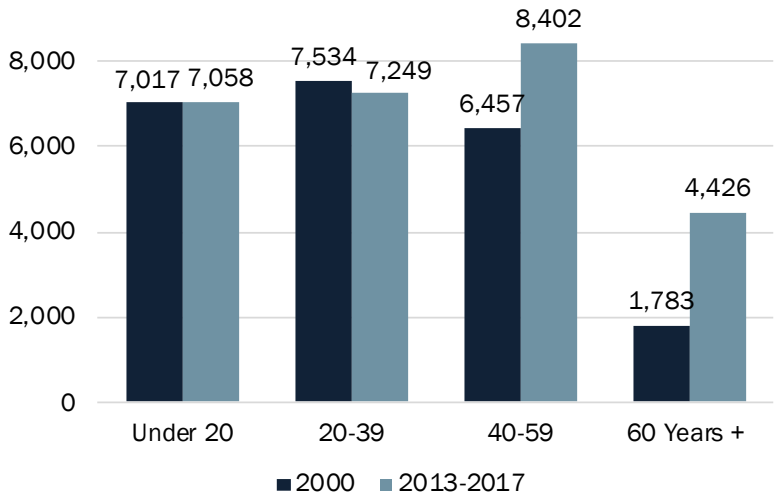
Exhibit 7. Population Distribution by Age, Tualatin, Washington County, and the Portland Region, 2013-2017
Source: US Census Bureau, 2013-2017 ACS, Table B01001.



Between 2000 and 2013-2017, people over 60 years old had the largest increase, adding 2,643 people.

Over the next 20 years (2020 to 2040), the population aged 60 and older in Washington County is forecast to grow by 62% (75,217 people).

Exhibit 8. Population Distribution by Age, Tualatin, 2013-2017
Source: US Census Bureau, 2000 Decennial Census Table P012 and 2013-2017 ACS, Table B01001.



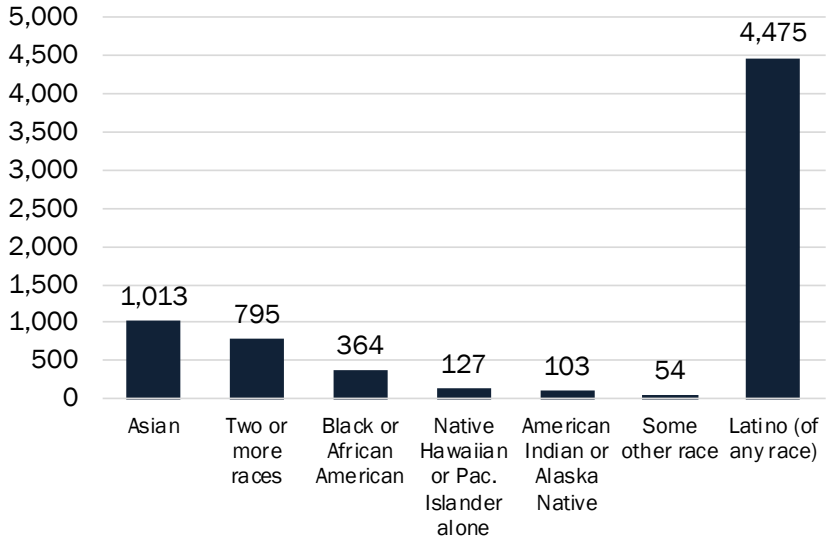
Race and Ethnicity

Understanding race and ethnicity characteristics[53] in Tualatin is important for understanding housing needs because people of color often face discrimination when looking for housing.

About 2,400 people identify as a race other than white in Tualatin. Nearly 4,500 people identify as Latino.

Not shown in the exhibit are the 23,694 people identifying as white in Tualatin.

Exhibit 9. Population by Race/Ethnicity, Tualatin, 2013-2017
Source: US Census Bureau, 2013-2017 ACS, Table B03002.



[53] The US Census Bureau considers race and ethnicity as two distinct concepts. Latino is an ethnicity and not a race, meaning individuals who identify as Latino may be of any race.

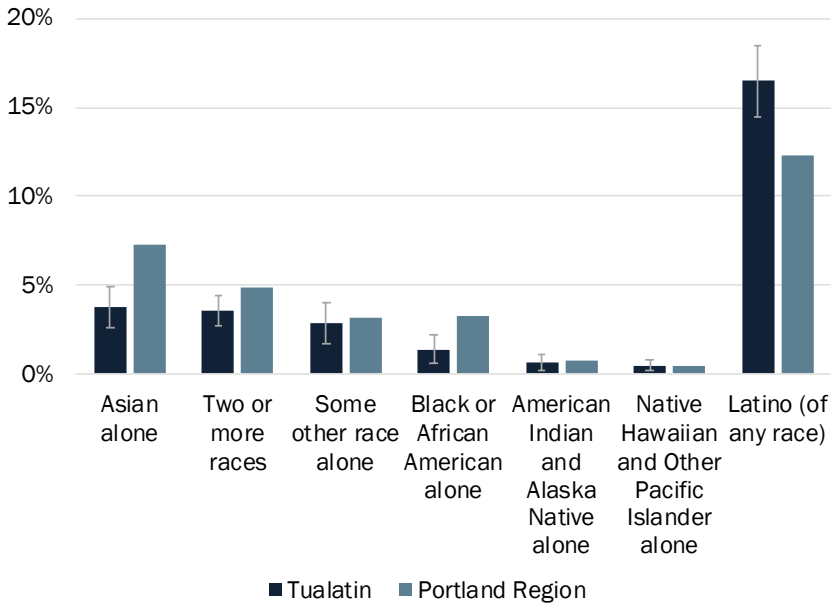
Residents who identify as Latino (of any race) account for 16% of Tualatin's population. The largest racial group in Tualatin is the Asian community, which accounts for 4% of Tualatin's population.

Not shown in this exhibit is about 74% of Tualatin's population and 72% of the Portland Region's population identifying as white.

Exhibit 10. Share of Population by Race and Ethnicity (Percent of Total Population), Tualatin, and the Portland Region, 2013-2017

Source: US Census Bureau, 2013-2017 ACS, Table B03002.

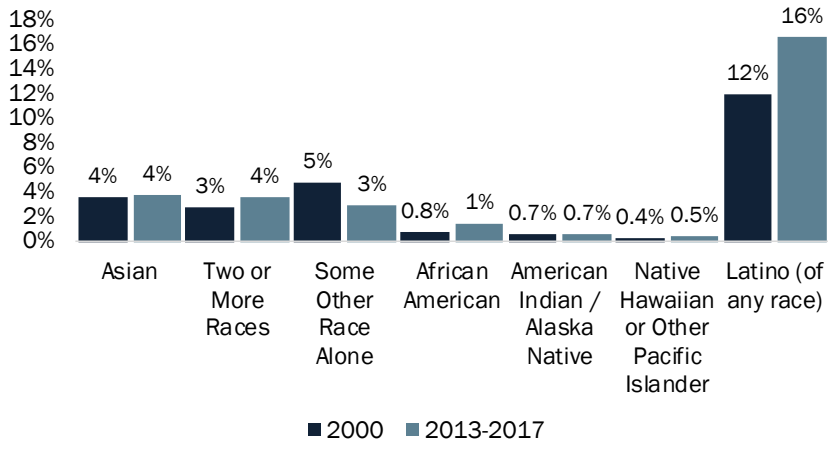
Note: Gray bars denote the potential upper and lower bound of the estimate using the margin of error reported by the Census.



The share of Tualatin's households that identified as Latino (of any race) increased from 2,701 people in 2000 to 4,475 people in 2017, consistent with regional trends.

Exhibit 11. Change in Population by Race/Ethnicity as a Percent of the Total Population, Tualatin, 2000 and 2013-2017

Source: US Census Bureau, 2013-2017 ACS, Table B01001.



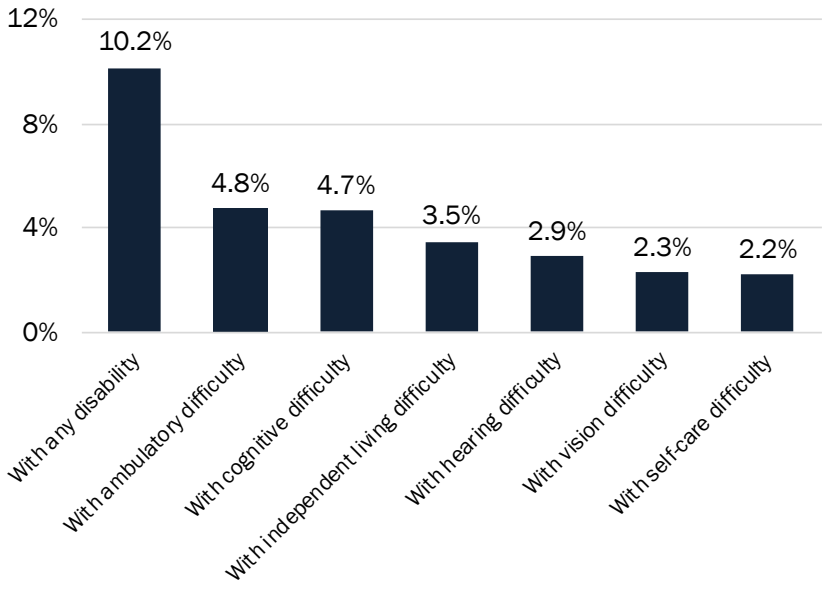
People with One or More Disabilities

People with one or more disabilities have special housing needs because they may need housing that is physically accessible, that meets the needs of people with a cognitive disability, or that has specialized services.

People with disabilities comprise about 10% of Tualatin's population, or 2,800 people.

Exhibit 12. Share of Population with a Disability by Type of Disability, Tualatin, 2013-2017

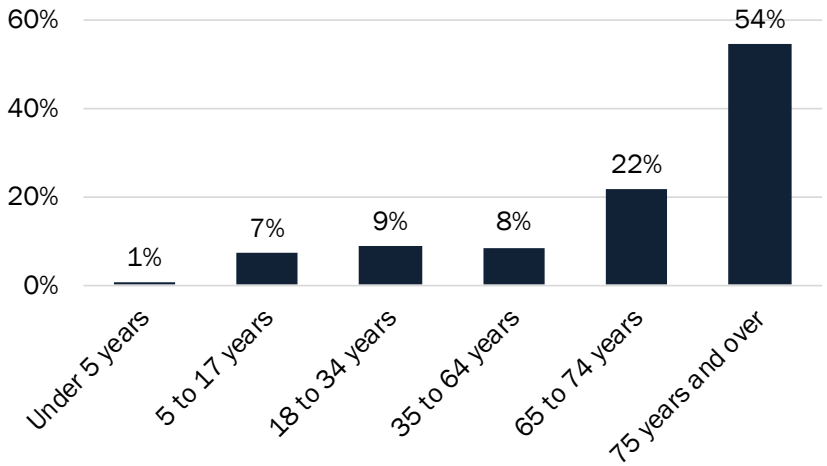
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table S1810. Note that an individual can have more than one disability.



The likelihood of having a disability increases with age. In Tualatin, over half the population that was 75 years and older had one or more disabilities.

Exhibit 13. Share of Population with a Disability by Age Group, Tualatin, 2013-2017

Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table S1810



Household Size and Composition

Housing need varies by household size and composition. The housing needs of a single-person household are different than those of a multigenerational family. Tualatin's households are smaller than Washington County's households.

Tualatin's average household size was smaller than Washington County's and Clackamas County's, but larger than Multnomah County's.

Exhibit 14. Average Household Size, Tualatin, Washington County, Clackamas County, Multnomah County, 2013-2017
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table B25010.

2.49 People
Tualatin

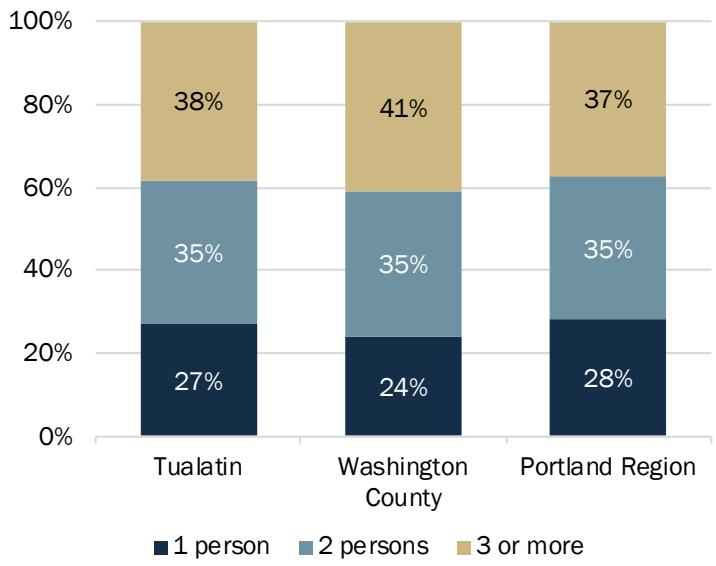
2.66 People
Washington County

2.42 People
Multnomah County

2.58 People
Clackamas County

About 62% of Tualatin's households were 1 or 2-person households, compared to 59% of Washington County's and 63% of the Portland Region's households.

Exhibit 15. Household Size, Tualatin, Washington County, and Portland Region, 2013-2017
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table B25010.

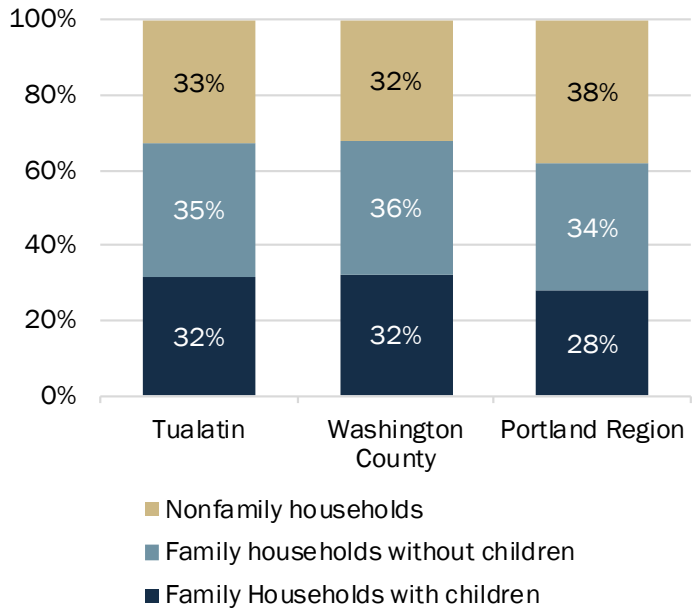


Tualatin had a similar household composition to Washington County. Compared to the Portland Region, Tualatin had a smaller share of nonfamily households and a larger share of family households with children.

About a third of Tualatin's households were nonfamily households (i.e., 1-person households and households composed of roommates).

Exhibit 16. Household Composition, Tualatin, Washington County, and Portland Region, 2013-2017

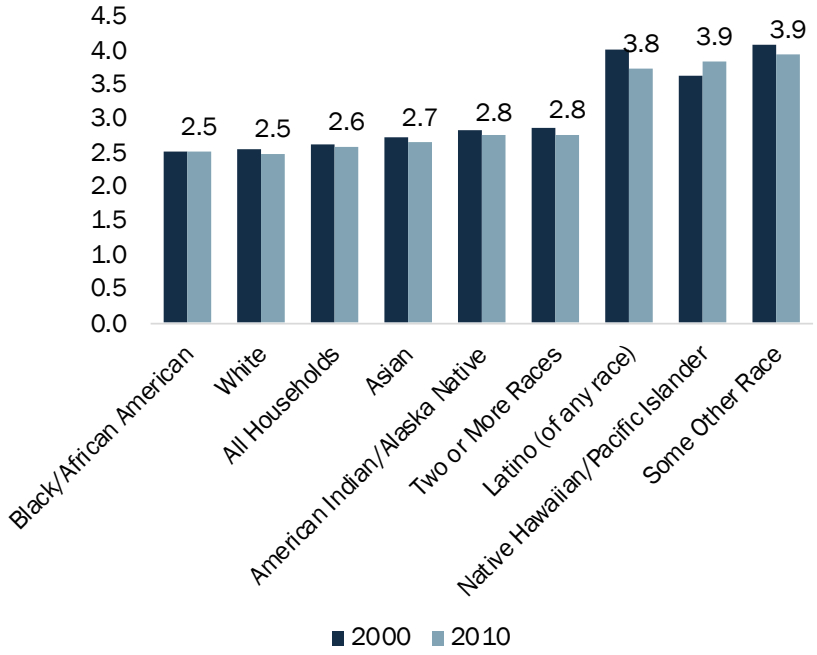
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table DP02.



Tualatin's households that identified as Black/African American and white had smaller household sizes than other racial or ethnic groups.

Exhibit 17. Historical Average Household Size Trends by Race and Ethnicity, Tualatin, 2000 and 2010

Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table B25010.

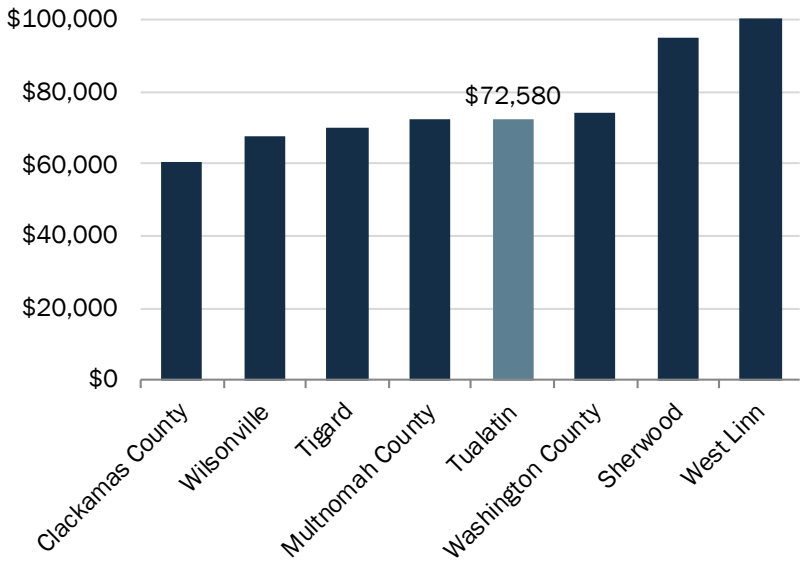


Household Income

Income is one of the key determinants in housing choice and household ability to afford housing. Income for residents living in Tualatin was lower than the Washington County median income and the state's median income.

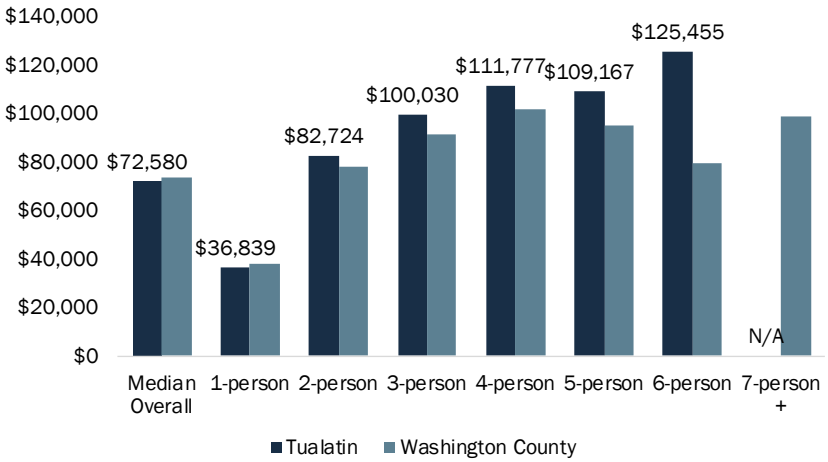
Over the 2013-2017 period, Tualatin's median household income (MHI) was $1,453 below that of Washington County's.

Exhibit 18. Median Household Income, Tualatin, Washington County, and Comparison Regions, 2013-2017
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table B25119.



In Tualatin, household income tends to increase with household size, peaking with households with four to six people.

Exhibit 19. Household Income by Household Size, Tualatin and Washington County, 2013-2017
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table B19019.

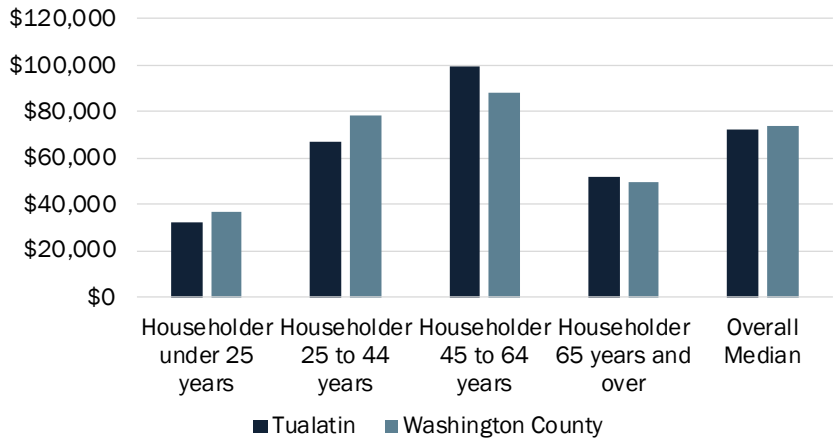


Median household income was comparatively lower for households over 65 years in Tualatin and the county.

In Tualatin, median household income for householders 65 years and older was $57,073, compared to the overall median of $81,118 in the 2014-2018 period.

However, older households may have wealth and savings not reflected in this statistic.

Exhibit 20. Median Household Income by Age, Tualatin, 2013-2017
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table B19049.



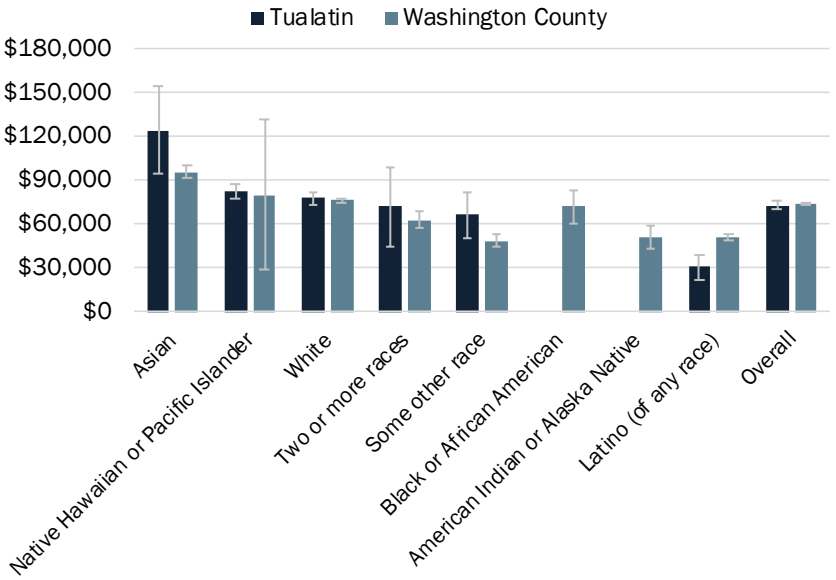
Household income varies among households with different races and ethnicity.

In Tualatin, median household income was proportionately higher for households with an Asian-identifying head of household.

The median household income was proportionately lower than the overall average for households with a head of household identifying as Latino or some other race.

Exhibit 21. Median Household Income by Race and Ethnicity for the Head of Household, Tualatin and Washington County, 2013-2017
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table S1903.

Note: In Tualatin, data was not available for heads of households identifying as Black or African American and as American Indian or Alaska Native.
Gray bars denote the potential upper and lower bound of the estimate using the margin of error reported by the Census.



Housing Market Conditions and Trends

An analysis of housing market conditions and trends in Tualatin provides insight into the functioning of the local housing market. The housing types used in this analysis are consistent with needed housing types as defined in ORS 197.303:

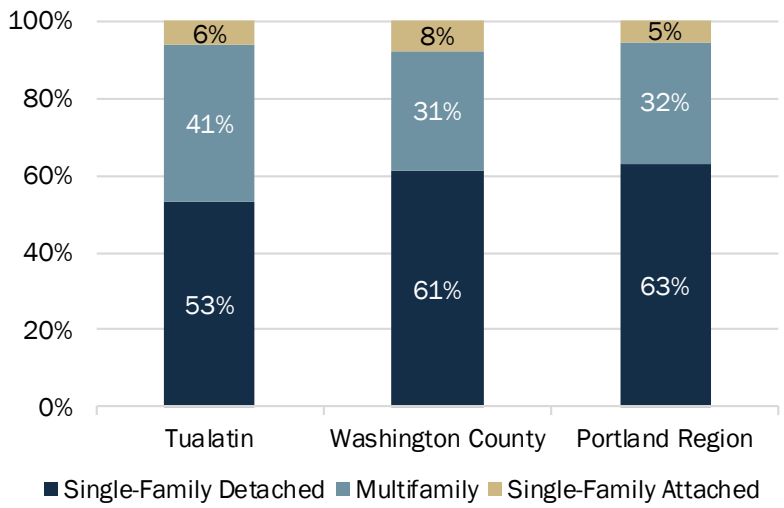
- **Single-family detached** includes single-family detached units, manufactured homes on lots and in mobile home parks, and accessory dwelling units.
- **Single-family attached** is all structures with a common wall where each dwelling unit occupies a separate lot, such as row houses or town houses.
- **Multifamily** is all attached structures (e.g., duplexes, triplexes, quadplexes, and structures with five or more units) other than single-family detached units, manufactured units, or single-family attached units.

Existing Housing Stock

According to the 2013-2017 American Community Survey (ACS) from the US Census, Tualatin had 11,329 dwelling units, an increase of 2,110 dwelling units from 2000. In that time, about 771 units of multifamily housing were built in Tualatin, accounting for 37% of the 2,110 new units over that period.

Tualatin had a smaller share of single-family detached housing and a larger share of multifamily housing than Washington County and the Portland Region.

Exhibit 22. Housing Mix, Tualatin, Washington County, Portland Region, 2013-2017
Source: US Census Bureau, 2013-2017 ACS Table B25024.



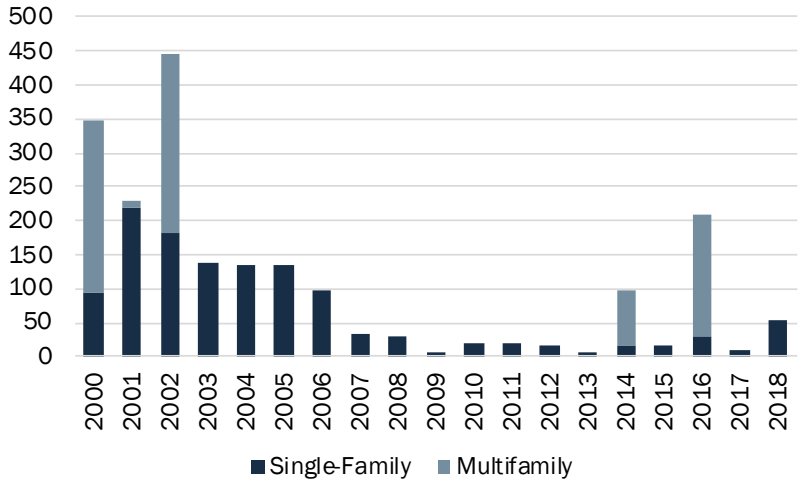
Development of multifamily housing was strong and cyclical in Tualatin.

Between 2000 and 2016, 789 new multifamily units were developed in Tualatin. Between 2000 and 2018, 1,262 new single-family units were developed in Tualatin.

Note: The single-family category includes detached and attached single-family homes. The multifamily category is inclusive of all multifamily types (duplexes to larger units).

Exhibit 23. Units Built by Year and Type of Unit, Tualatin, 2000 to 2016/2018[54]

Source: RLIS (data pulled November 2020).



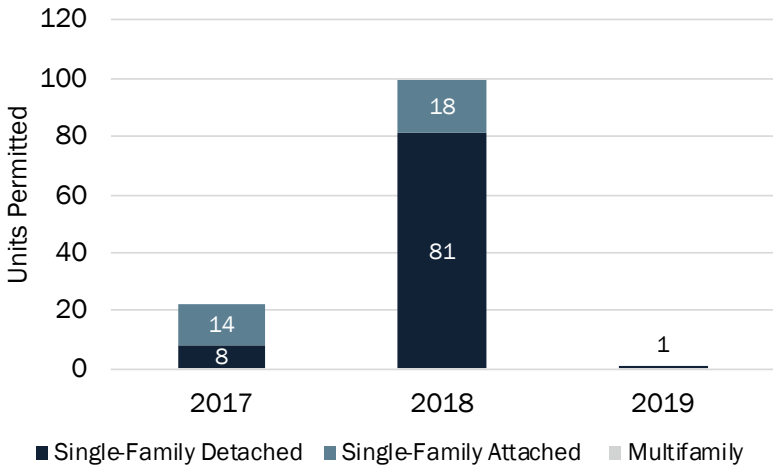
In the last three years, mostly single-family detached housing has been permitted in Tualatin.

In 2019, a 264-unit apartment complex began the permitting process.

Another 116-unit affordable housing apartment complex is currently in process to annex to Tualatin.

Exhibit 24. Units Permitted, Tualatin, 2017, 2018, 2019

Source: City of Tualatin Permit Database.

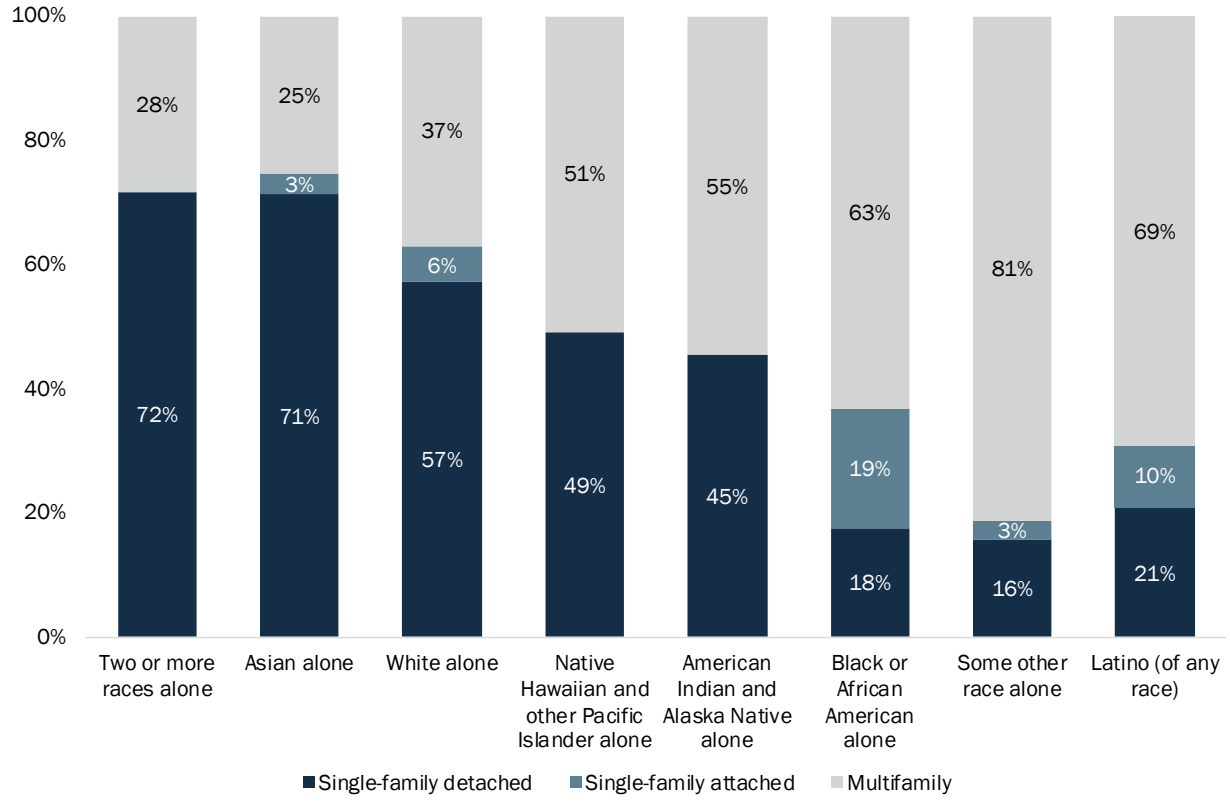


[54] A disclaimer about RLIS data: data for single-family and multifamily units is updated by Metro periodically. In Tualatin, RLIS data for multifamily units represents development through 2016 and the RLIS data for single-family units represents development through 2018.

Exhibit 25 shows that households that identified as Two or More Races or Asian were most likely to live in single-family detached housing (72% and 71%, respectively). The people most likely to live in multifamily housing were Black, at 63% of households; Latinos (of any race), at 70% of households; and people identifying as some other race, at 81% of households.

While this exhibit reflects the types of housing these groups *currently* live in and/or what they can currently afford to live in, it may not reflect their housing preferences.

Exhibit 25. Housing Mix by Race and Ethnicity, Tualatin 2013-2017
Source: US Census Bureau, 2013-2017 ACS Table B25032 B-H, I.

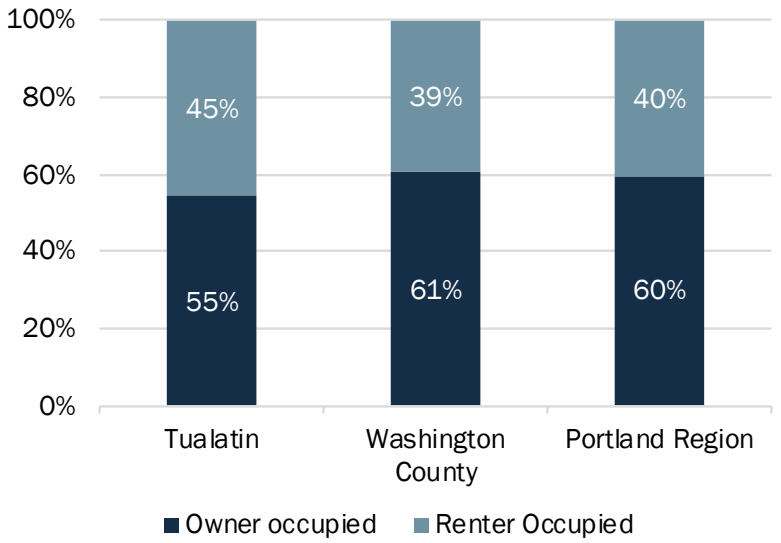


Housing Tenure

Housing tenure describes whether a dwelling is owner or renter-occupied. In 2000 as well as in the 2013-2017 period, 55% of Tualatin's housing stock was owner occupied and 45% was renter occupied.

Tualatin had a lower homeownership rate than Washington County and the Portland Region by 6 percentage points.

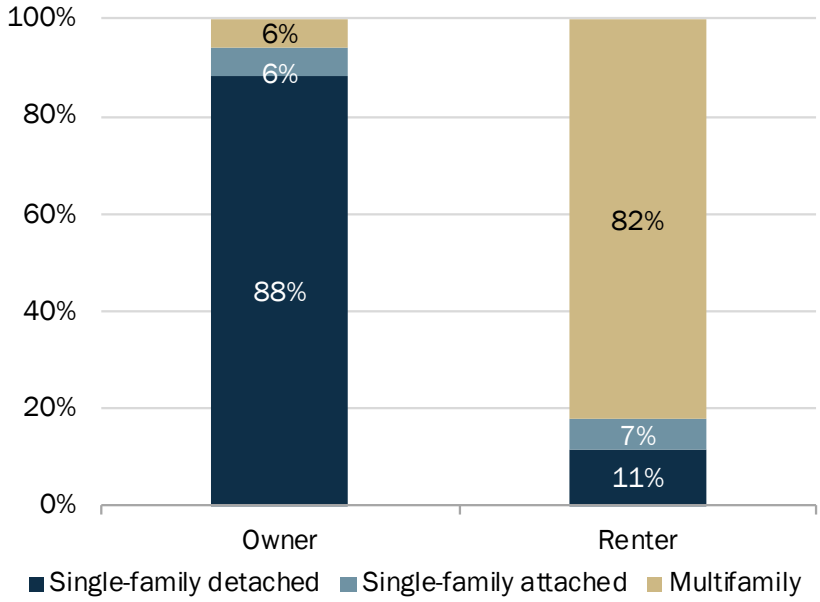
Exhibit 26. Tenure, Occupied Units, Tualatin, Washington County, and Portland Region, 2013-2017
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimates, Table B24003.



Most of Tualatin homeowners (88%) lived in single-family detached housing.

In comparison, most of Tualatin renters (82%) lived in multifamily housing.

Exhibit 27. Housing Units by Type and Tenure, Tualatin, 2013-2017
Source: US Census Bureau, 2013-2017 ACS Table B25032.

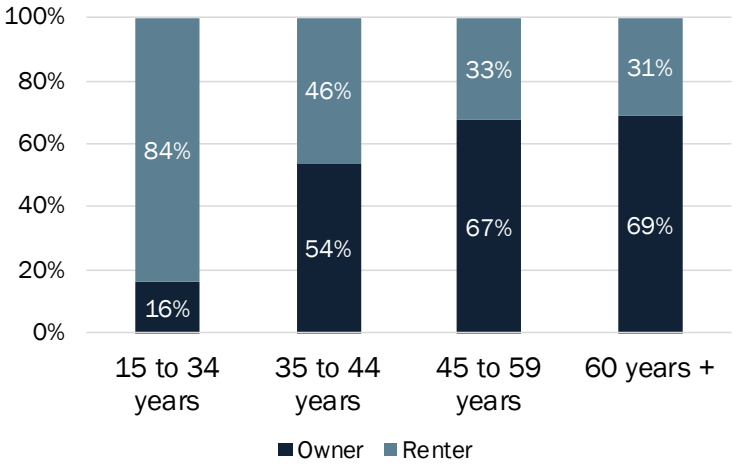


Tualatin's household homeownership rate increases with age.

In Tualatin, nearly 70% of householders over the age of 60 owned their own home.

Exhibit 28. Housing Tenure by Age of the Head of Household, Tualatin, 2013-2017

Source: US Census Bureau, 2013-2017 ACS Table B25007.

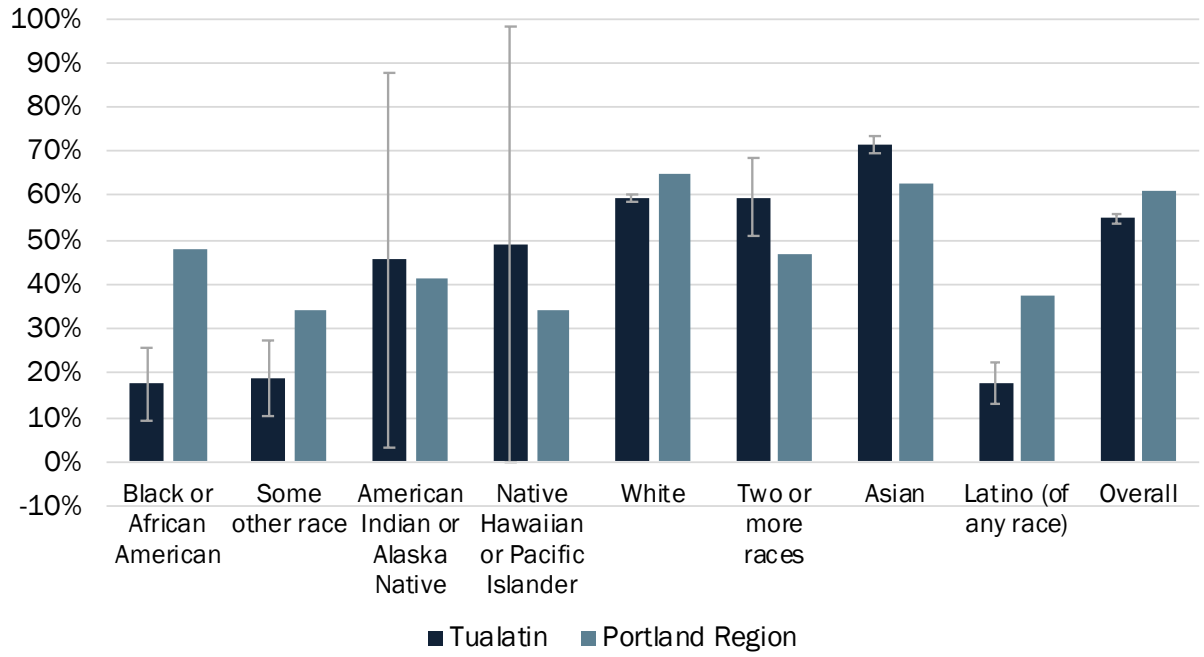


As Exhibit 29 shows, in Tualatin, the homeownership rates were lowest for households with a Black/African American or Latino-identifying head of household.

Exhibit 29. Homeownership Rate by Head of Households' Race and Ethnicity, Tualatin and Washington County, 2013-2017

Source: US Census Bureau, 2013-2017 ACS Table B25003 and B25003 B-I.

Note: Gray bars denote the potential upper and lower bound of the estimate using the margin of error reported by the Census. For American Indian or Alaska Native and Native Hawaiian or Pacific Islander, the margin of error is very large in Tualatin because those populations are so small in Tualatin.



Vacancy Rates

Housing vacancy is a measure of housing that is available to prospective renters and buyers. It is also a measure of unutilized housing stock. The Census defines vacancy as "unoccupied housing units . . . determined by the terms under which the unit may be occupied, e.g., for rent, for sale, or for seasonal use only."

According to the 2013-2017 Census, the vacancy rate in Tualatin was the lowest at 4.3%, compared to 4.8% for Washington County and 5.5% for the Portland Region.

Tualatin's homeowner vacancy rate is lower than its rental and overall vacancy rates.

Exhibit 30. Vacancy Rate by Tenure, Tualatin, 2013-2017
Source: US Census Bureau 2013-2017 ACS Table DP04.

Homeowner	**1.4%** of Total Dwelling Units
Rental	**3.7%** of Total Dwelling Units
Total	**4.3%** of Total Dwelling Units

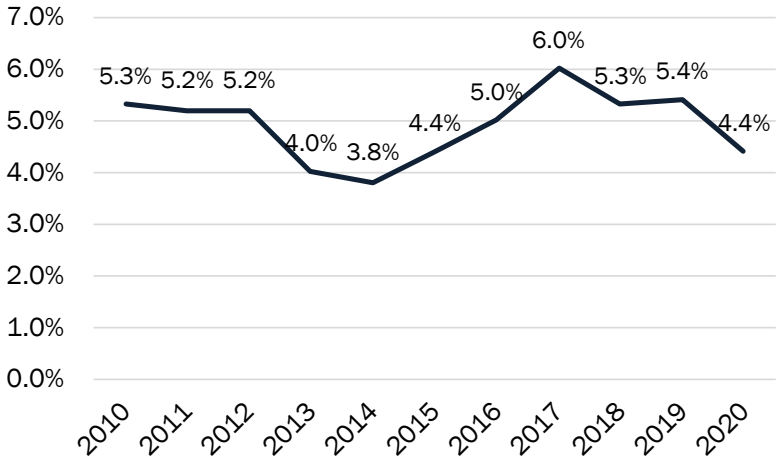
As of 2013-2017, less than half a percent of Tualatin's dwelling units were vacant for seasonal, recreational, or occasional use (e.g., short-term rentals or vacation homes).

Exhibit 31. Vacancy for Seasonal, Recreational, or Occasional Use, Tualatin, 2000 and 2013-2017[55]
Source: US Census Bureau, 2000 Decennial Census SF1 Table H005, 2013-2017 ACS Table B25004.

2000	**43 Units**	**0.5%** of Total Dwelling Units
2013-2017	**44 Units**	**0.4%** of Total Dwelling Units

Tualatin's multifamily vacancy rate was 4.4% in 2020, down from Tualatin's 10-year high of 6.0% in 2017.

Exhibit 32. Average Multifamily Vacancy Rate, Tualatin, 2010–2020
Source: CoStar.



[55] Short-term rentals (commercial lodging) are not an allowed use in Tualatin's residential zones.

Rent-Restricted and Emergency Housing

Governmental agencies offer subsidies to support housing development for extremely low income, very low–income, and low-income households. Tualatin has three rent-restricted housing developments, with 604 subsidized units. These 604 units represented about 5.3% of Tualatin's total housing stock in the 2013-2017 period. In addition to these rent-restricted units, and as of August 5, 2019, households in Tualatin utilized 113 of Washington County Housing Authority's Housing Choice Vouchers.[56]

Manufactured Housing Communities

Manufactured homes provide a source of affordable housing in Tualatin. They provide a form of homeownership that can be made available to low and moderate-income households. Cities are required to plan for manufactured homes—both on lots and in parks. Exhibit 35 shows that Tualatin has two manufactured housing parks, with a total of 178 spaces within its city limits.

People Experiencing Homelessness

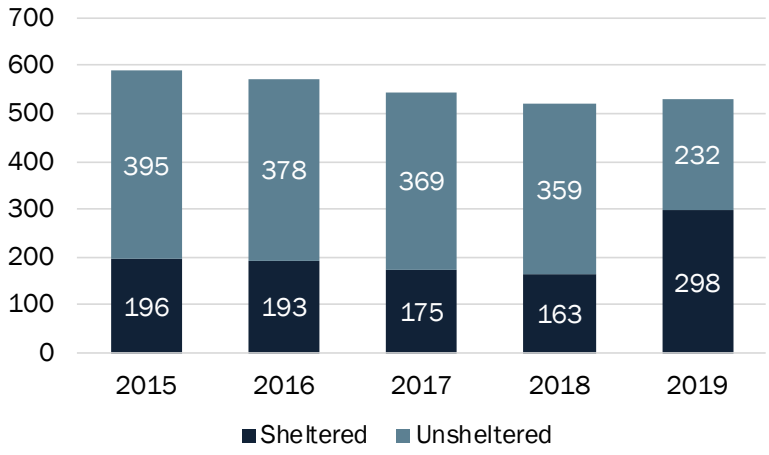
According to HUD's 2019 Homeless Assessment Report, across the United States, people experiencing homelessness increased. People experiencing *unsheltered* homelessness increased across all racial groups, among women and girls, and for people 25 and older. [57] Oregon had the second-highest rate of people experiencing unsheltered homelessness in the United States (64% of total people experiencing homelessness), behind California only. Oregon also had the largest change in homelessness by state (an increase of 1,400 people or 10% change from 2018-2019), again behind California. The following exhibits provide local estimates of homelessness in Tualatin's region.

[57] The US Department of Housing and Urban Development. (2019). The 2019 Annual Homeless Assessment Report (AHAR) to Congress. Office of Community Planning and Development.

In 2019, Tualatin's Continuum of Care (CoC) district counted 530 people experiencing homelessness in their annual Point-in-Time estimate.

In 2019, 44% of the people experiencing homelessness were unsheltered, down from 67% in 2015.

Exhibit 36. Homelessness Estimate (Sheltered and Unsheltered), Hillsboro/Beaverton/Washington County CoC, 2015-2019
Source: Annual Homeless Assessment Report (AHAR) PIT data.



About 44 people were experiencing unsheltered homelessness in the Tigard/Tualatin area in 2020.

Proportioning out these individuals using population, this analysis estimates that about 15 individuals experienced homeless in Tualatin.

Exhibit 37. Unsheltered Homelessness, Washington County and Tualatin/Tigard Area, 2020

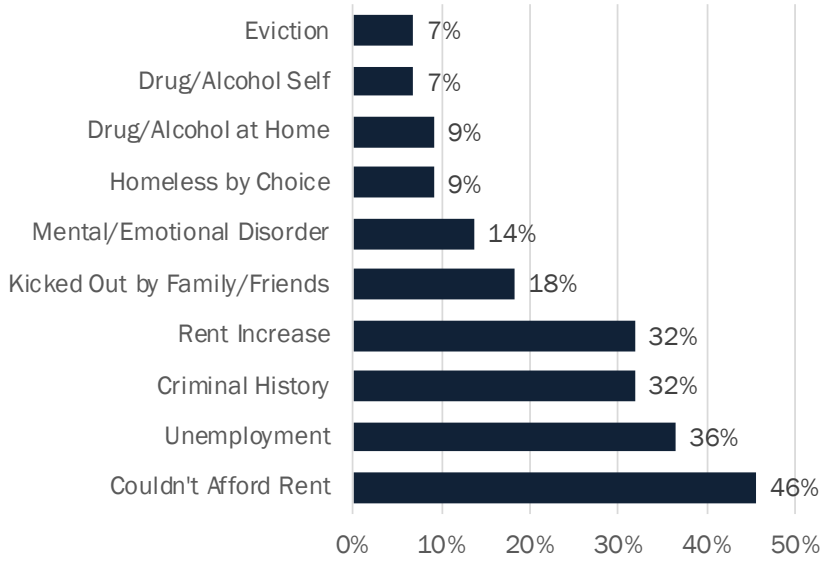
Washington County	**307**[58] Unsheltered People	**33%** Chronic Homeless	**18%** Domestic Violence
Tualatin / Tigard Area	**44** Unsheltered People	**27%** Chronic Homeless	**14%** Domestic Violence
Tualatin	**15** Estimated Unsheltered People	-	-

The primary reason for homelessness in the Tigard/Tualatin area was inability to afford rent.

Exhibit 38. Reason for Unsheltered Homelessness, Tualatin/Tigard Area, 2020

Source: Washington County Department of Housing Services, from the PIT 2020 Tigard Tualatin Presentation. Exhibit remade by ECONorthwest for readability.



[58] The PIT count is a snapshot of individuals experiencing homelessness on a single night in a community. Though the PIT count is not a comprehensive survey, it serves as a measure of homelessness at a given point in time and is used for policy and funding decisions.

From the 2017-18 school year to the 2018-19 school year, student homelessness increased from 207 students to 211 students, resulting in an increase of four students.

Of the 211 students in 2018-19 experiencing homelessness, 36 were unaccompanied youth (17%).

Based on the Oregon's Regional Housing Needs Analysis, Tualatin will need 252 housing units to accommodate people experiencing homelessness in the 2020-2040 period.

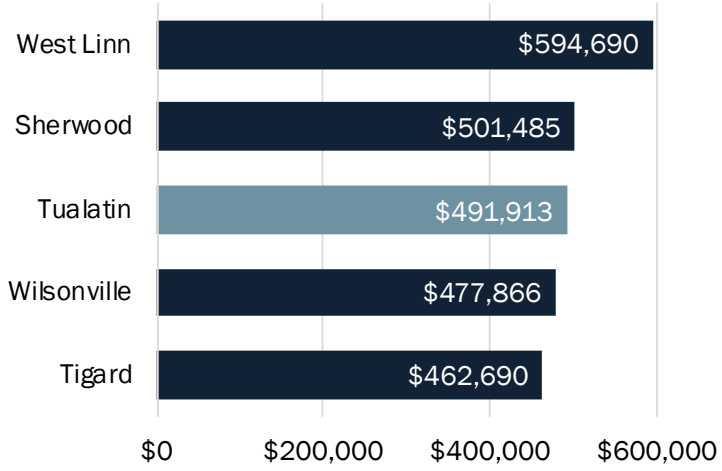
Housing Affordability Considerations

This section describes changes in sales prices, rents, and housing affordability in Tualatin. It uses cities in the region, as well as Washington County and Oregon, as comparisons. Both housing sales prices and rents have increased steadily in Tualatin and the greater region over the last several years.

Housing Costs

In 2020, Tualatin's annual, median home sales price was $491,913, or $102,777 less than West Linn's and $29,223 more than Tigard's median home sales price.

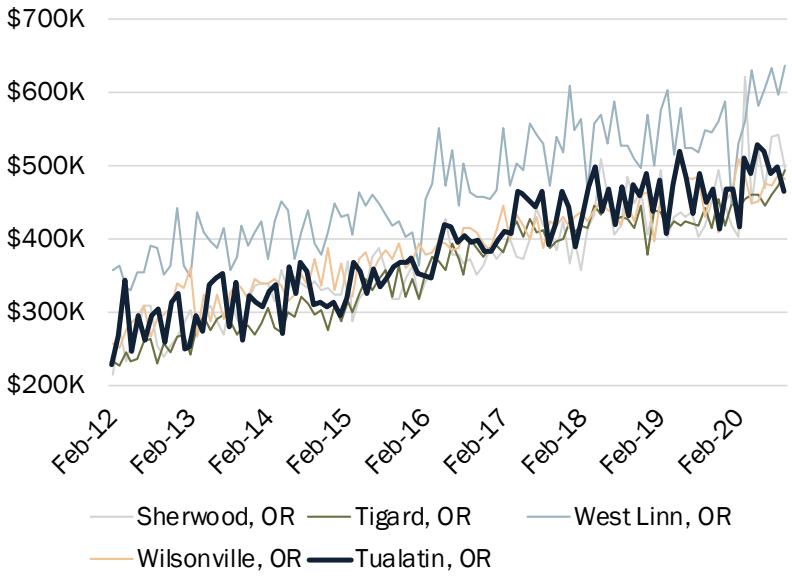
Exhibit 41. Median Home Sales Price, Tualatin and Comparison Cities, 2020 Annual Median
Source: Redfin.



Over the last decade, median home sales prices have marched upward in Tualatin and comparison cities. In 2020, Tualatin's median home sales price was $491,913.

Between February 2012 and 2020, home sales prices increased by $261,913 (114%) in Tualatin, consistent with changes in sales prices in nearby cities.

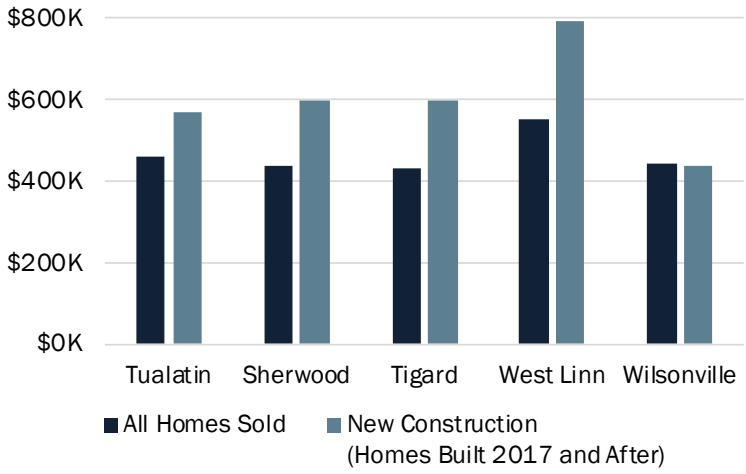
Exhibit 42. Median Sales Price, Single-Family housing, Tualatin and Comparison Cities, February 2012–September 2020
Source: Redfin.



Newly built homes generally have higher prices than existing housing.

In Tualatin, the median sales price of all homes sold since 2017 (including existing housing) was $461,204, compared to $566,900 for new homes sold (i.e., new construction—homes built since 2017).

Exhibit 43. New Construction Price Premium, Tualatin and Comparison Cities, January 2017 through September 2020
Source: Redfin.



Renter Costs

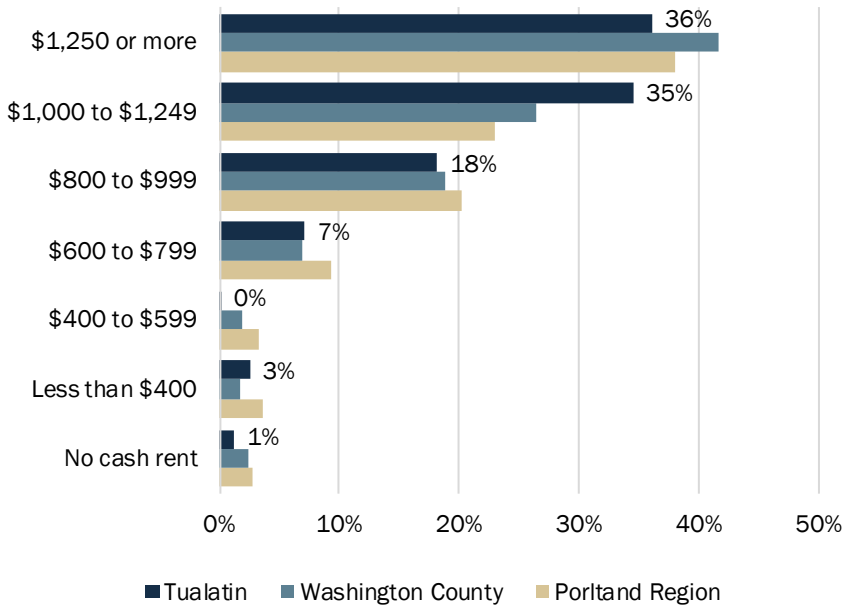
Rental costs are increasing in Tualatin. According to the US Census and ACS, median gross rents in Tualatin increased from $768 in 2000 to $1,154 in the 2013-2017 period.

Most renters in Tualatin paid more than $1,000 per month in rent.

About 36% of Tualatin's renters paid $1,250 or more in gross rent per month, a smaller share than renters across Washington County (42%) and the Portland Region (38%).

Exhibit 44. Gross Rent, Tualatin, Washington County, and Portland Region, 2013-2017

Source: US Census Bureau, 2013-2017 ACS Table B25063.



The average asking rent per unit has increased steadily for all bedroom sizes since 2010.

The asking rent for a 2-bedroom unit in Tualatin increased from $873 in 2010 to $1,334 in 2019, an increase of $461 (53% change).

Exhibit 45. Average Multifamily Asking Rent by Bedroom Size, Tualatin, 2010 through 2019[59]

Source: CoStar.

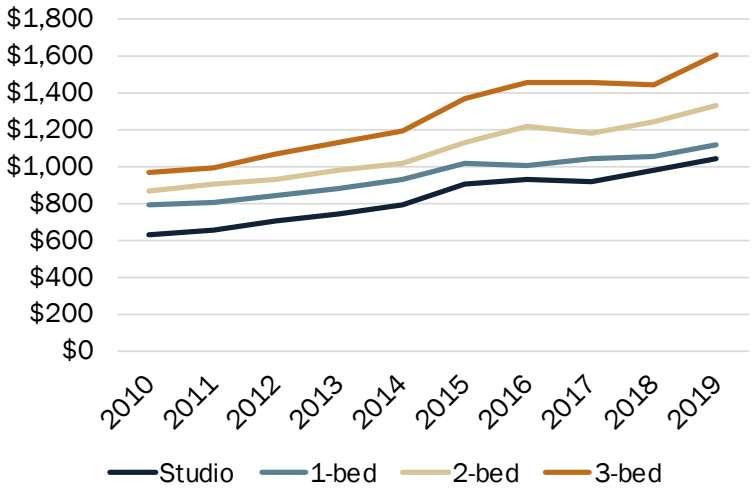


Exhibit 46 presents the findings of an assessment of available rental properties advertised on Apartments.com as of December 2020. The rental costs for these developments likely have

[59] This analysis excludes units with four or more bedrooms, as there is highly limited observations in the CoStar inventory for Tualatin.

higher asking rents compared to all rental housing in Tualatin. This is because Apartments.com (and similar platforms) are more likely to include listings for newer, professionally managed, larger apartment buildings (those typically priced with a premium). Exhibit 46 shows a broader, more complete picture of housing costs for renters in Tualatin than Census or CoStar data alone.

100% MFI	$1,726 – $2,394	$1,726	$2,072	$2,394

Housing Cost Burden

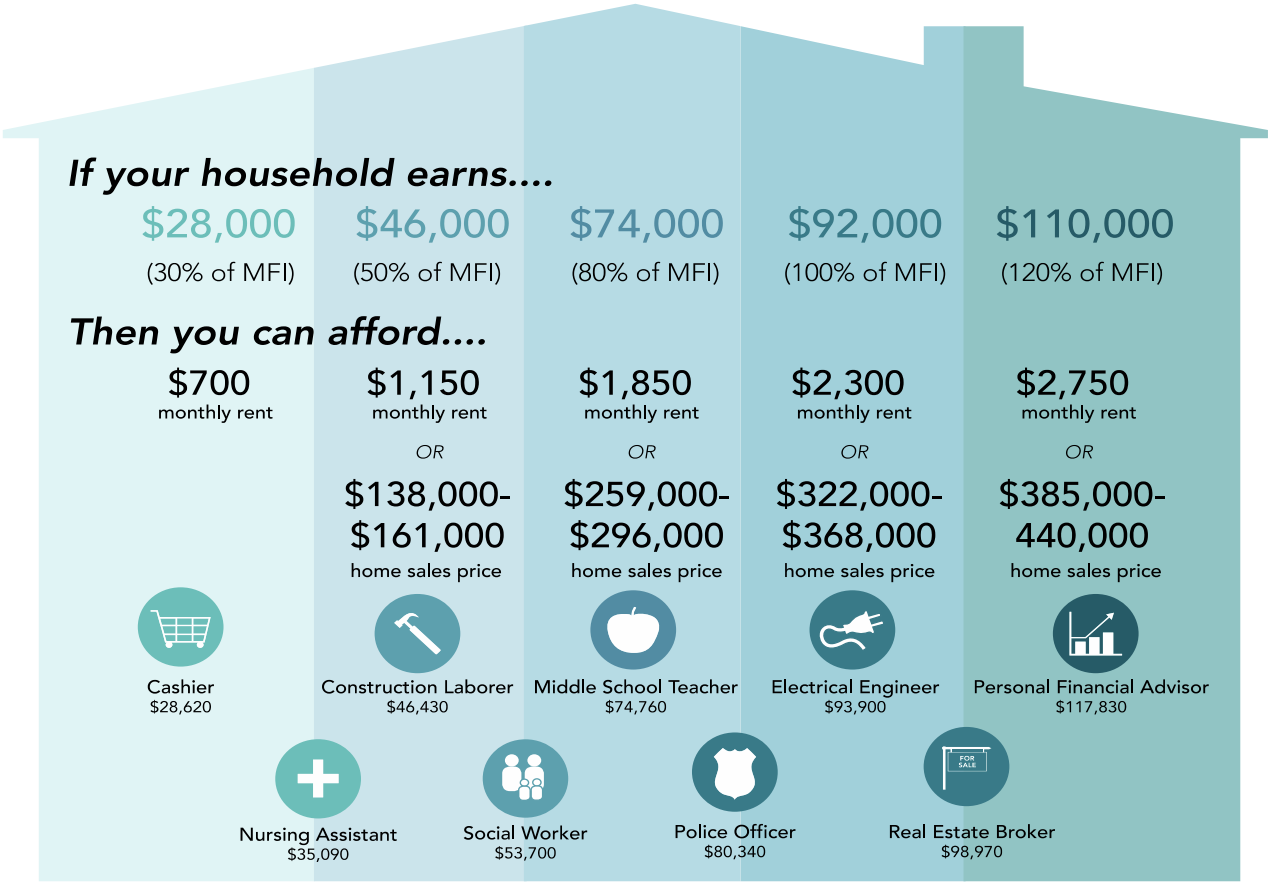
Financially attainable housing costs for households across the income spectrum in Washington County are identified in Exhibit 47. For example, a household earning Median Family Income in Washington County (about $92,000 per year for a family of four) can afford a monthly rent of about $2,300,[60] or a home roughly valued between $322,000 and $368,000, without cost burdening themselves.

A household would need to earn about $140,500 a year (153% of MFI for a family of four) to afford the median sales price of a home in Tualatin ($491,913). A household would need to earn about $58,000 (63% of MFI for a family of four) to afford the rent on a two-bedroom apartment in Tualatin ($1,450).

[60] Note that Median Family Income for the region is different than median household income (MHI) for Tualatin (see Exhibit 18). MFI is determined by HUD for each metropolitan area and nonmetropolitan county. It is adjusted by family size—in that 100% MFI is adjusted for a family of four. MHI is a more general term. MHI includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not.

Exhibit 47. Financially Attainable Housing, by Median Family Income (MFI) for Washington County ($92,000), Tualatin, 2020

Source: US Department of HUD 2020. Note: MFI is Median Family Income for a family of 4.



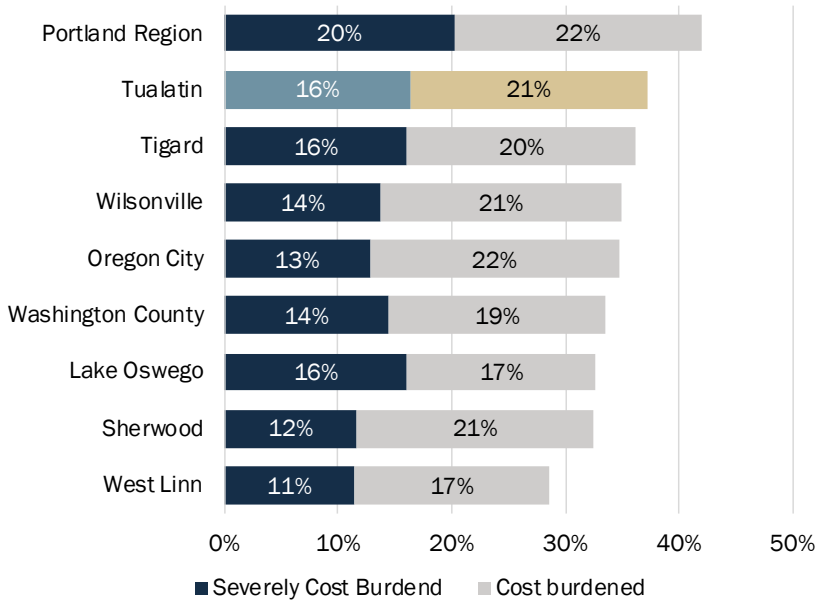
Because the local housing market cannot produce income-restricted, subsidized affordable housing at sufficient levels—and because it cannot often produce moderate-income/workforce housing without subsidy—many households in Tualatin are cost burdened (as Exhibit 48 to Exhibit 51 show). A household is defined by HUD as cost burdened if their housing costs exceed 30% of their gross income.[61] A household that spends 50% or more of their gross income on housing costs is considered to be severely cost burdened by HUD and the State of Oregon.

Overall, about 37% of all households in Tualatin were cost burdened.

In the 2013-2017 period, Tualatin had one of the highest rates of cost-burdened households relative to other comparison areas.

Exhibit 48. Housing Cost Burden, Tualatin, Washington County, and Comparison Areas, 2013-2017

Source: US Census Bureau, 2013-2017 ACS Tables B25091 and B25070.



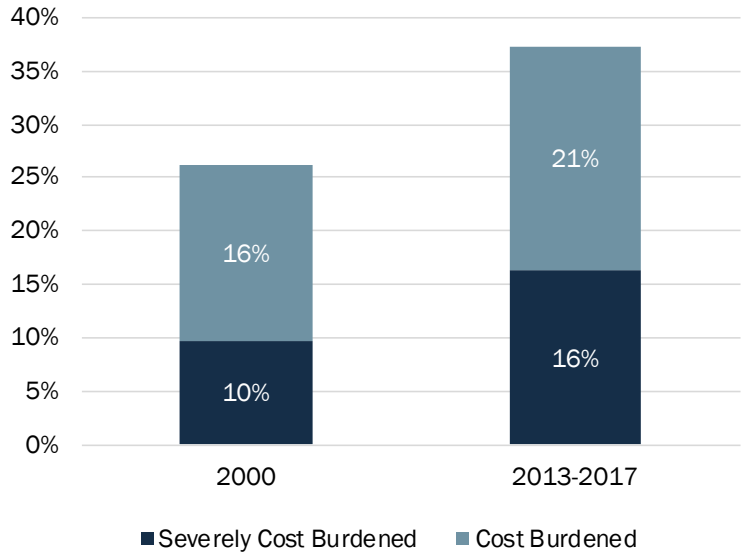
[61] US Department of Housing and Urban Development (HUD). See https://www.huduser.gov/portal/pdredge/pdr_edge_featd_article_092214.html

From 2000 to the 2013-2017 period, the share of cost-burdened and severely cost burdened households in Tualatin grew by 11%.

Tualatin has also experienced a substantial rise in its renters who are severely cost burdened. In the 2014-2018 time period, 27% of Tualatin's renters were severely cost burdened,[62] compared to 26% in the 2013-2017 time period.

Exhibit 49. Change in Housing Cost Burden, Tualatin, 2000 to 2013-2017

Source: US Census Bureau, 2000 Decennial Census, Tables H069 and H094 and 2013-2017 ACS Tables B25091 and B25070.

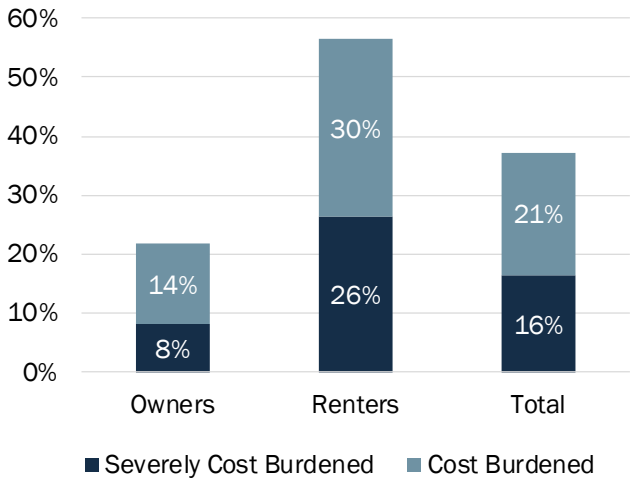


Renters were more likely to be cost burdened than homeowners.

In the 2013-2017 period, about 56% of Tualatin's renters were cost burdened or severely cost burdened, compared to 22% of homeowners.

Exhibit 50. Housing Cost Burden by Tenure, Tualatin, 2013-2017

Source: US Census Bureau, 2013-2017 ACS Tables B25091 and B25070.



[62] Oregon Department of Land Conservation and Development. "Severe Rent Burden in Oregon 2020," 2020.

Nearly all renter households earning less than $35,000 per year were cost burdened.

Most households earning between $35,000 and $50,000 per year were cost burdened.

Exhibit 51. Cost-Burdened Renter Households, by Household Income, Tualatin, 2013-2017

Source: US Census Bureau, 2013-2017 ACS Table B25074.

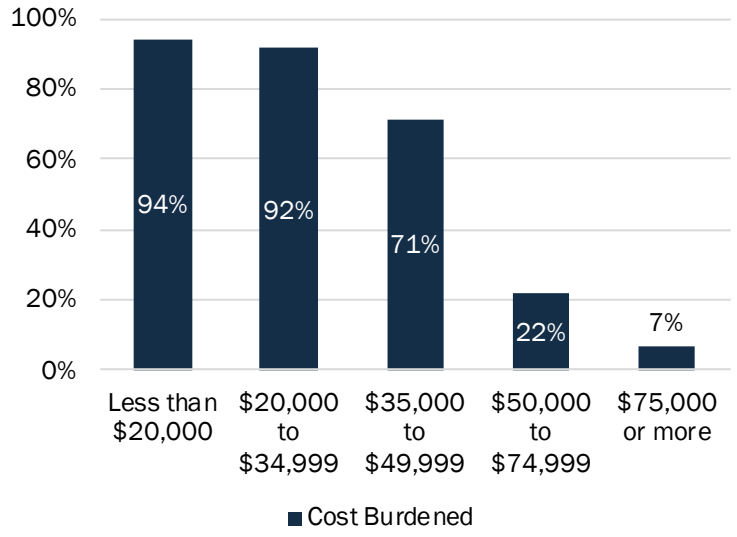


Exhibit 52 through Exhibit 54 present information about cost burden among different populations for the Portland Region. This information is not available on a city-by-city basis and is pulled from a statewide analysis from the report *Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations* by ECONorthwest, August 2020.

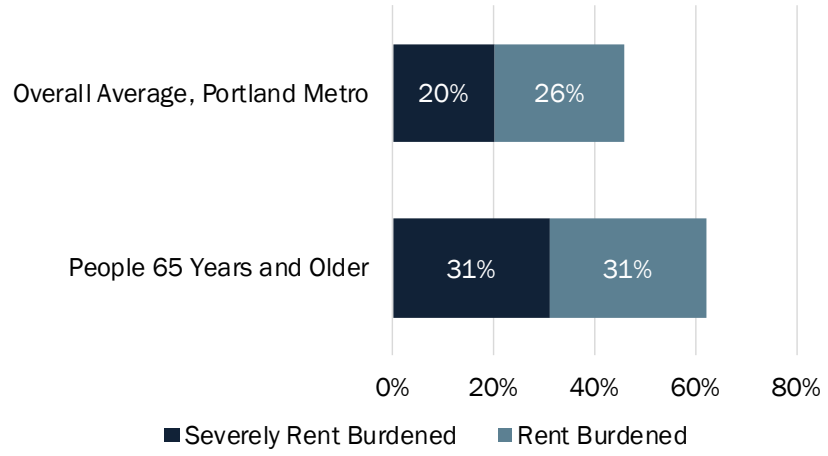
Renters 65 years of age and older are disproportionately cost burdened compared to the Portland Region average.

Over 60% of renters aged 65 and older are cost burdened.

Exhibit 52. Cost-Burdened Renter Households, for People 65 Years of Age and Older, Portland Region, 2018

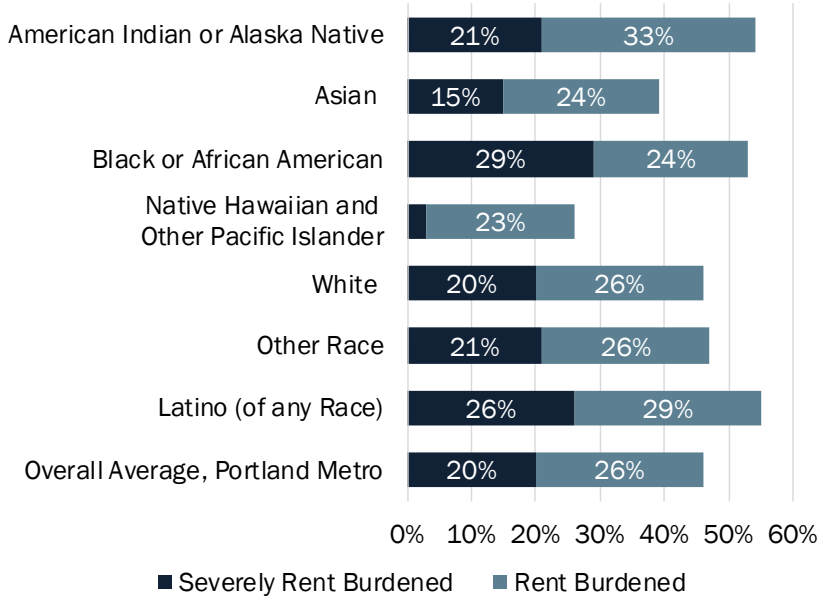
Source: US Census, 2018 ACS 1-Year PUMS Estimates. From the Report *Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations* by ECONorthwest, March 2021.



Compared to the average renter household in the Portland Region, those that identified as American Indian or Alaska Native, Black or African American, and Latino were disproportionately cost burdened.

Exhibit 53. Cost-Burdened Renter Households, by Race and Ethnicity, Portland Region, 2018

Source: US Census, 2018 ACS 1-Year PUMS Estimates. From the Report *Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations* by ECONorthwest, March 2021.



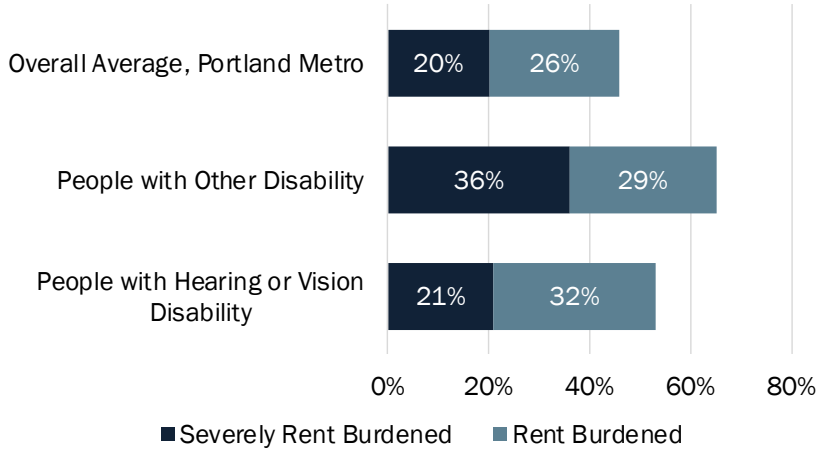
Renters with one or more disabilities in the Portland Region are disproportionately cost burdened.

About 46% of renters in the Portland Region are cost burdened, compared to 53% of renters with a hearing or vision disability and 65% of renters with a disability other than a hearing or vision-based disability in the Portland Region.

Other disabilities include self-care difficulty (having difficulty bathing or dressing), independent living difficulty (having difficulty doing errands alone), ambulatory difficulty (having serious difficulty walking or climbing stairs), and cognitive difficulty (having difficulty remembering, concentrating, or making decisions).

Exhibit 54. Cost-Burdened Renter Households, for People with Disabilities, Portland Region, 2018

Source: US Census, 2018 ACS 1-Year PUMS Estimates. From the Report *Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations* by ECONorthwest, March 2021.

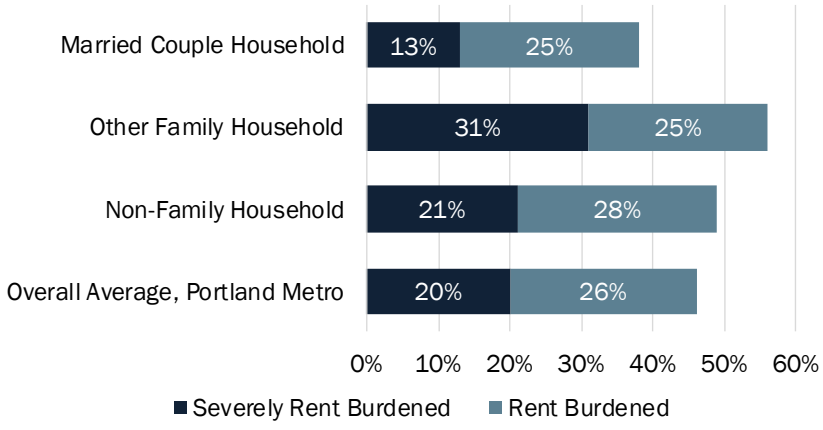


Those designated as "other family household," which includes single-parent households, are disproportionately cost burdened.

About 55% of renters in other family households, such as single-parent households, are cost burdened more frequently than the overall average in the region.

Exhibit 55. Cost-Burdened Renter Households, by Household Type, Portland Region, 2018

Source: US Census, 2018 ACS 1-Year PUMS Estimates. From the Report *Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations* by ECONorthwest, March 2021.



Findings from Outreach and Engagement

The following is a summary of outreach and engagement efforts sponsored by the City of Tualatin in 2018 through 2020. The summary relates to matters of housing—and in particular, housing production. The following synthesizes the key findings of each effort.

- **Individual Interview (April 3, 2019).** As part of Tualatin's 2040 engagement, the City of Tualatin interviewed a person with a physical disability. The interviewee identified several concerns related to accessibility—not only access to housing but access to parking, parks, street crossings, sidewalks, and other amenities. They indicated that people in wheelchairs require doors/entryways with suitable clearance, dwelling units on the first floor or within a structure with an elevator, park spaces without woodchips, sidewalks with space for passing (e.g., sandwich boards or tree root issues can make sidewalks inaccessible). They indicated concern with vision clearance regulations in the code—an important ADA safety and ongoing maintenance issue to evaluate. The interview identified a need to increase Tualatin's supply of affordable housing options, particularly near grocery store options, as well as a need to address mold issues in apartments.[63]
- **Summary of interviews with 15 participants from (April 1 to April 29, 2019) and a group stakeholder interview with Tualatin Aging Task Force (May 13, 2019).** Findings from the following group and individual interviews identified a concern for Tualatin's lack of affordable and workforce housing. Participants showed support for a diversity of housing types to provide more affordable options. Housing types of interest included town homes and row houses, mixed-use development, duplexes, triplexes, and accessory dwelling units. Some participants also showed interest in high-rise apartments (structures that are six to eight stories in height) and concern for large housing types (i.e., McMansions).
- **Technical Advisory Committee Meetings for Tualatin's HNA and EOA.** The City of Tualatin convened a Technical Advisory Committee (TAC) in April 2019 to provide input on the Housing Needs Analysis (HNA), Economic Needs Analysis (EOA), and related strategy documents. The TAC met four times with the last meeting held on September 25, 2019. The TAC focused on the technical approach and methodology for HNA and EOA. The TAC comprised City staff with expertise related to city planning and development code regulation as well as county, regional, and state agencies and experts in the housing and economic development field.

[63] The City of Tualatin has considered implementing a rental housing inspection program within the city, but none have been implemented to date. In general, newer rental housing in Tualatin is quite adequate, suggesting that housing quality may be more of a challenge for older buildings.

The City of Tualatin has, however, received four complaints for mold in 2019. Three complaints were in apartment buildings and one complaint at a rental house. Tualatin has no city ordinance to address mold, and those that submitted complaints were told to contact (or recontact) their property management/property owner, a mold abatement company, and/or legal counsel.

- **Community Advisory Committee Meetings for Tualatin's HNA and EOA.** A 16-member Community Advisory Committee (CAC) was convened by the City of Tualatin in March 2019 to provide policy input on the HNA, EOA, and related strategy documents. The CAC met seven times with the last meeting held on September 26, 2019. The CAC provided input to guide the City's housing and economic policies with a focus on developing strategies and actions that could lead to possible changes to the Comprehensive Plan and Development Code regulations. Desirable housing outcomes brainstormed by the CAC included:
  - Housing/jobs balance
  - Housing planning that is inclusive of all households
  - Variety of housing options
  - Multifamily opportunities
  - Complete neighborhoods - mixed-use
  - Flexible plan designations - universal design standards
  - Livability/walkability
  - Enable small-scale developers
  - Support for aging in place
  - Access to max/transit
  - Renter/homeowner affordability
  - More rental opportunities
  - Housing location and quality
  - Multigenerational housing
  - Flexible zoning standards
  - Think creatively about potential solutions to affordable housing issues
  - Address affordability
- **Pop-up Event and Online Survey (July–August 2019):** In the summer of 2019, the City of Tualatin hosted a pop-event and disseminated an online survey to gather input on housing and non-housing-related concerns. Key findings of these efforts include:
  - Respondents identified three preferred actions to meet affordable housing needs: offer incentives for affordable housing, improve connections to jobs/services to reduce costs, and allow more types of homes. For households making $50,000 and below, rent control and incentives for affordable housing were of great interest. For people of color, allowing more types of homes and obtaining land for new housing were of great interest.
  - Respondents' top three desired choices for new housing types: small homes, town homes, cottage courtyard, in addition to work-from-home (home-business) arrangements. For households making $50,000 and below, small homes and cottage courtyards were of great interest. For people of color, the greatest preference was for home-businesses and small homes.
  - Respondents' top three non-housing priority topics were improving connectivity, increasing and protecting green space, and increasing opportunities for jobs and entertainment. For households making $50,000 and below, the preference was increasing and protecting green space and increasing opportunities for jobs and entertainment. For people of color, it was improving connectivity and increasing opportunities for jobs and entertainment.

- **Under One Roof Luncheon (September 2019).** The City of Tualatin held two severely rent burdened public events. The Under One Roof Luncheon was the first event attended by 40 community members, representing a diverse group of people that included affordable housing residents, housing service providers, and elected officials. The event included a discussion with a panel of housing experts. The experts recommended the following actions for the City of Tualatin to address affordable housing needs: review what land is already in public control, reform the zoning (especially parking and density), and be ready for not-in-my-backyard (NIMBY) concerns. Luncheon participants agreed that affordable housing is a complex issue and a coalition is needed to address these issues. It was determined that the coalition should include housing experts and advocates within the community. The major theme from participant feedback was a desire to achieve greater land use efficiencies, accomplished by improving transportation connectivity or increasing the location of jobs, businesses, services, and green spaces near housing. During the question-and-answer portion of the event, community members commented on housing options and services that could be further explored: housing vouchers, shared/transitional housing, tiny homes, mobile or manufactured homes, and immediate assistance.
- **Our Home, Our Health Event (September 2020).** Our Home, Our Health event was Tualatin's second severely rent burdened event. It included a keynote speaker from the American Association of Retired Persons (AARP) in Oregon on the connection between housing and health and story sharing from two members of Tualatin's Diversity Task Force. Participants expressed concerns for poor quality housing (e.g., conditions that lead to mold) and concerns for the City's lack of affordable housing. Families are working multiple jobs and choosing between housing and food to get by. Participants commented on and shared possible solutions to these issues, which are summarized below:
  - Resolve issues related to legally undocumented persons residing in Tualatin.
  - Solve this problem: making a little too much money to qualify for assistance, yet not being able to survive on what you make.
  - Invite people of color in.
  - Ensure people are able to participate in programs without fear of being reported.
  - Provide local rental assistance.
  - Support new affordable housing.
  - Economically stabilize sites.
  - Implement rent control.
  - Enable shared housing options.
  - Relax regulations to support development of affordable housing.
  - Commit to livability and accessibility.

- Continue to extend eviction moratorium.
- Consider short and long-term solutions.
- Solve for housing instability, which particularly has long-term impacts on children.

Key Terms in the HPS

This appendix presents applicable key terms used in Tualatin's Contextualizing Housing Needs memorandum. Per the Department of Land Conservation and Development, the following key terms will be incorporated into the definitions section of OAR 660-008 (if they are not already):

- **Consumers of Needed Housing:** any person who inhabits or is anticipated to inhabit Needed Housing, as described in the definition of "Needed Housing" in ORS 197.303.
- **Housing Production Strategy Report:** the report cities must adopt within one year of their deadline to complete an updated Housing Capacity Analysis, pursuant to OAR 660-008-0050.
- **Housing Production Strategy:** a specific tool, action, policy, or measure a city will implement to meet the housing needs described in an adopted Housing Capacity Analysis. A Housing Production Strategy is one component of a Housing Production Strategy Report.
- **Needed Housing:** housing types determined to meet the need shown for housing within an urban growth boundary at particular price ranges and rent levels, including (but not limited to) renter and owner-occupied attached and detached single-family housing, multifamily housing, and manufactured homes.
- **Producers of Needed Housing:** developers, builders, service providers, or other persons or entities providing materials and funding needed to build housing. Producers of Needed Housing may include non-profit organizations or public entities.
- **Unmet Housing Needed:** occurs when housing need determined pursuant to ORS 197.296 (3)(b) is greater than the housing capacity (i.e., buildable, residential land is insufficient to accommodate demand for housing).

Appendix B: Construction Excise Tax Analysis

This appendix presents an analysis of a Construction Excise Tax (CET) for Tualatin.

DATE: February 17, 2021
TO: City of Tualatin
FROM: Becky Hewitt, Sadie DiNatale, and Angelica True, ECONorthwest
SUBJECT: Summary of Construction Excise Tax Analysis

The Department of Land Conservation and Development contracted ECONorthwest to develop a Housing Production Strategy (HPS) for the City of Tualatin. This memorandum presents preliminary research for one strategy of the HPS. The findings documented in this memorandum may later become a section or appendix of the final HPS report.

This project is funded by Oregon general fund dollars through the Department of Land Conservation and Development. The contents of this document do not necessarily reflect the views or policies of the State of Oregon.

Construction Excise Tax

The City of Tualatin is considering a range of strategies and actions to meet its housing production goals. One such action is implementation of a Construction Excise Tax (CET). To understand the potential trade-offs of implementing a CET in Tualatin, this memorandum describes what a CET is and how it works. In addition, it summarizes an analysis of the potential revenue impacts of implementing a CET. The final section outlines potential next steps for the City of Tualatin to consider.

How It Works, Fiscal Impacts, Pros and Cons

How It Works

In 2016, the Oregon Legislature passed Senate Bill 1533, which permits cities to adopt a construction excise tax (CET) on the value of new construction projects to raise funds for affordable housing projects. The tax is limited to 1% of the permit value on residential construction with no cap on the rate applied to commercial and industrial construction. A number of cities of various sizes in Oregon have adopted a CET.

Construction Excise Tax: Levies a tax on new construction projects to fund housing programs and/or investments. It can be applied to residential and/or commercial and industrial development.

The allowed uses for CET funding are defined by state statute:

- The City may retain up to 4% of funds to cover administrative costs. The funds remaining must be allocated as follows, depending on whether the CET is on residential or commercial and industrial development:
- For a residential CET:
  - 50% must be used for developer incentives (e.g., permit fee and SDC waivers,[64] tax abatements, or finance-based incentives). The City would have to offer incentives but could cover the costs or foregone revenues with CET funds.
  - 35% may be used flexibly for affordable housing programs, as defined by the jurisdiction.
  - 15% is not available to the city and flows instead to Oregon Housing and Community Services for homeownership programs that provide down payment assistance.
- For a commercial/industrial CET:
  - 50% of the funds must be used for housing-related programs, as defined by the jurisdiction (note that these funds are not necessarily limited to affordable housing).
  - The remaining 50% is unrestricted.

Fiscal Impacts/Who Pays

The source for CET funds is new development. The statute exempts public buildings, regulated affordable housing, places of worship, public and private hospitals, agricultural buildings, nonprofit facilities, long-term care facilities, residential care facilities, and continuing care retirement communities.[65] The City can exempt other types of development if desired.

Pros and Cons

Pros:

- Offers the ability to link industrial or other employment investments, which generate new jobs and demand for new housing, with funding for housing development.
- CET is a flexible funding source, especially for funds derived from commercial/industrial development.
- Program funds can fund administration of the CET as well as staff time needed to administer programs funded by CET.

[64] Note that while these are called "waivers," they are really subsidies, since the fees would still be paid by CET revenues rather than by the developer.

[65] Oregon Revised Statute 320.173

Cons:

- CET increases development costs in an environment where many developers are already seeking relief from system development charges. Depending on the rates imposed, CET could have an impact on feasibility. More research would be necessary to understand the potential magnitude of the impact.
- Where demand is high relative to supply, additional fees on residential development may be passed on to tenants or home buyers through higher housing costs.
- Because CET revenue is development derived, it will fluctuate with market cycles and will not be a steady source of revenue for affordable housing when limited development is occurring.

Summary of CET Analysis for Tualatin

This section summarizes ECONorthwest's CET analysis for Tualatin.

Estimating Revenue Potential

Methodology Overview

There is no statutory cap on the CET rate applied on commercial and industrial construction. Therefore, this analysis assumed a range of potential rates that the City could apply on this development type: 0.3%, 0.5%, 1%, and 2%. The CET rate applied on residential construction is capped at 1%. Therefore, this analysis assumed a range of potential rates that the City could apply on this development type under the 1% threshold: 0.3%, 0.5%, .75%, and 1%.

After establishing a range of rates, the analysis assessed what revenue would look like based on historical building permit values for each respective development type (i.e., commercial and industrial development over the last five years and residential development over the last five years).

Based on the statutory regulations about how the CET funds can be expended, we allocated the projected revenue forecasts as follows:

- **Commercial/Industrial Construction: (1)** 4% to administrative costs, **(2)** 50% of the balance after subtracting administrative costs to housing-related programs (i.e., 48% of the total), and **(3)** 50% of the balance after subtracting administrative costs to an unrestricted use (i.e., 48% of the total).
- **Residential Construction: (1)** 4% administrative costs, **(2)** 15% of the balance after subtracting administrative costs to OHCS (i.e., 14% of the total), **(3)** 35% of the balance after subtracting administrative costs to affordable housing programs (i.e., 34% of the total), and **(4)** 50% of the balance after subtracting administrative costs to developer incentives (i.e., 48% of the total).

Results: Historical Permit Values

One way to estimate CET revenue is a backward-looking analysis. If the City of Tualatin had charged CET fees on recent development that had occurred, how much revenue might have the City collected (assuming the permitting activity had been unchanged as a result of that CET)?

Building permits for residential development and commercial/industrial development in Tualatin fluctuated from year to year over the last five years. Exhibit 56 summarizes annual total permit values for new residential and commercial/industrial construction as well as additions that increase square feet (excluding exempt development) in 2020 dollars.[66] The annual average over the five-year period (2016-2020) for residential development is about **$10m in qualifying permit value** in 2020 dollars. The annual average over the five-year period for commercial and industrial development is about **$41.8m in qualifying permit value** in 2020 dollars.

Exhibit 56. Residential Building Permit and Commercial/Industrial Building Permit Values by Year (2016 to 2020), (in 2020 dollars)
Source: ECONorthwest analysis of City of Tualatin permit data.
Note: The large bump in residential permit valuation in 2018 is primarily due to the City of Tualatin permitting an above-average number of residential developments (101 total permits in 2018, compared to 11, 12, 35, and 37 total permits in other years). The large bump in commercial/industrial valuation in 2020 is predominately due to a new industrial structure permitted on Blake Street with a permit value of $90m (2020$).

Year	Commercial and Industrial Bulilding Permit Valuation (2020$)	Residential Building Permit Valuation (2020$)
2016	$17,166,894	$9,304,128
2017	$11,042,600	$6,270,048
2018	$53,020,643	$32,351,852
2019	$14,918,542	$1,257,071
2020	$112,883,996	$926,520
Annual Average	**$41,806,535**	**$10,021,924**
Total (2016-2020)	**$209,032,675**	**$50,109,618**

Next, the analysis calculated the revenue that the City would have generated if it had a CET in place during the 2016 to 2020 period (assuming the permitting activity had been unchanged as a result of that CET) using the different CET rates listed previously.

Exhibit 57 and Exhibit 58 show potential CET revenue for commercial/industrial development. This analysis shows that under the highest rate tested (2%), the average annual CET revenue over this period would have been about $836,100.

[66] ECONorthwest used the Construction Cost Index published by Engineering News Record to inflate permit values to 2020 dollars.

Exhibit 59 and Exhibit 60 show potential CET revenue for residential development. This analysis shows that under the highest rate tested (1%), the average annual CET revenue over this period would have been about $100,200.

Under either development type, the minimum CET revenue collected in a slow year would have varied little with the different rates, while the maximum collected in a "busy" year would have varied substantially.

Source: ECONorthwest analysis of City of Tualatin permit data.

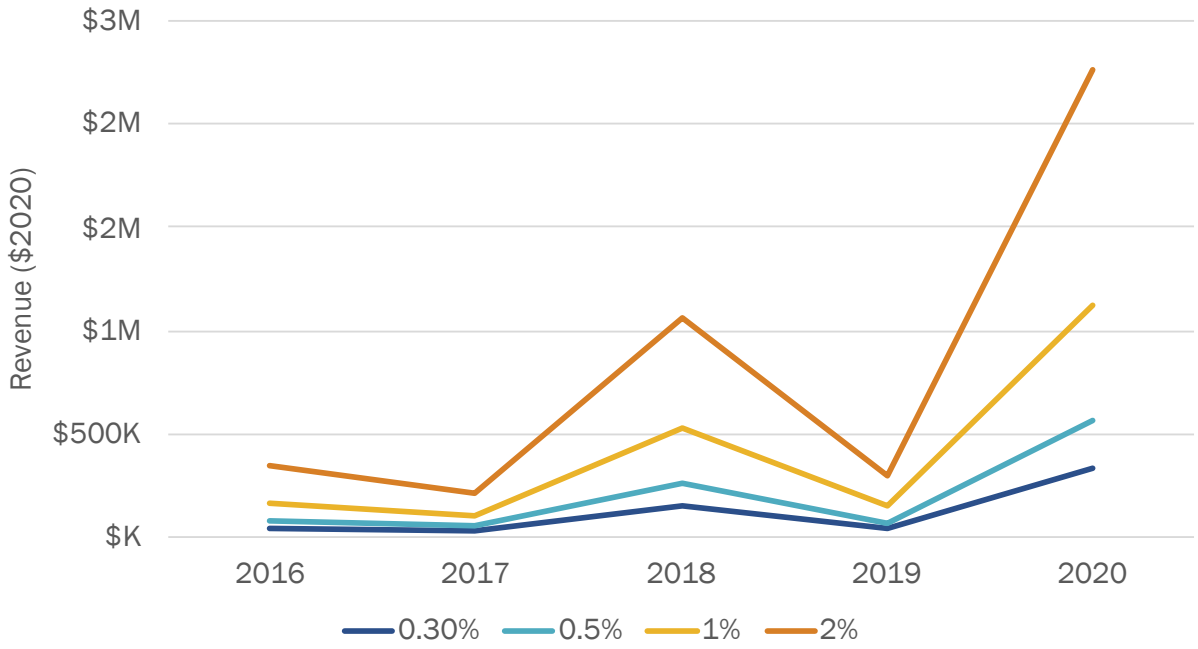

Exhibit 58. Historical Minimum, Maximum, and Average Annual Potential Commercial/Industrial CET Revenue by Rate (2016 to 2020)

Source: ECONorthwest analysis of City of Tualatin permit data.

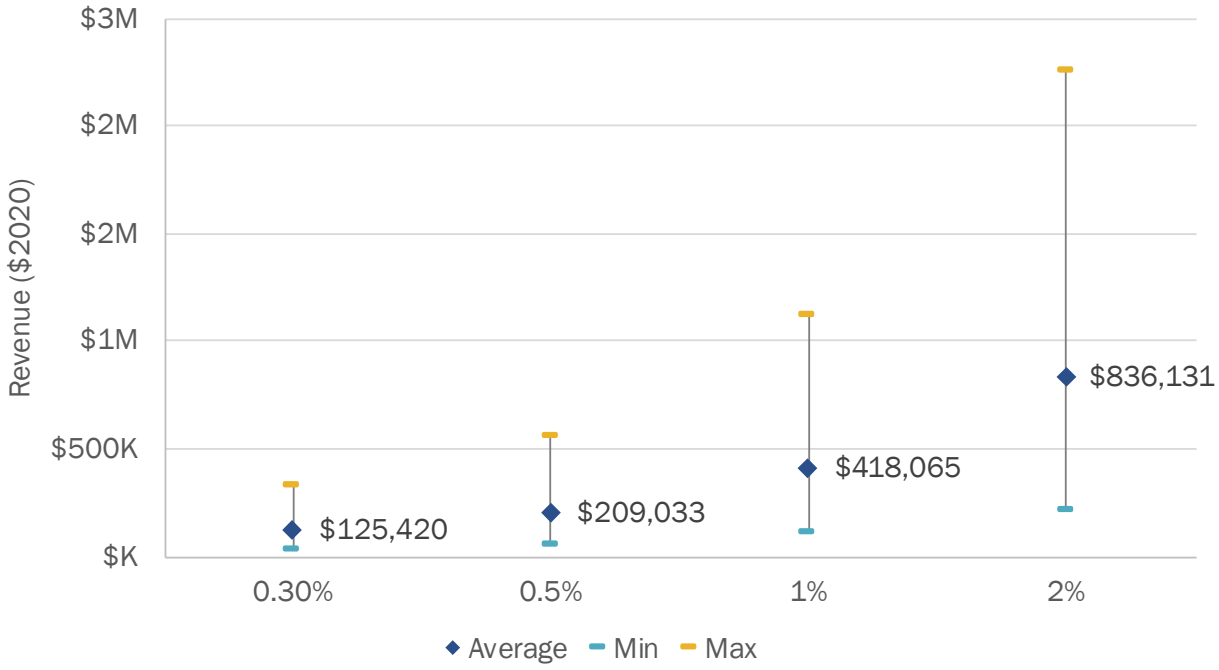

Exhibit 59. Potential Annual Residential CET Revenue by Year and Rate (2016 to 2020)
Source: ECONorthwest analysis of City of Tualatin permit data.

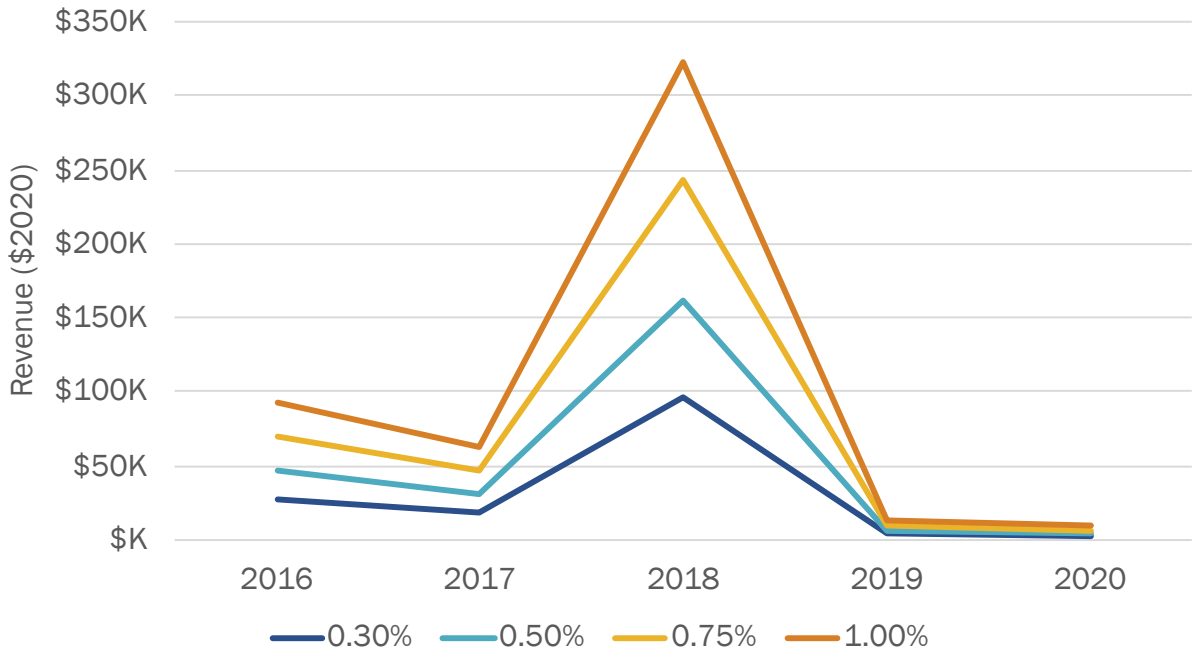

Exhibit 60. Historical Minimum, Maximum, and Average Annual Potential Residential CET Revenue by Rate (2016 to 2020)
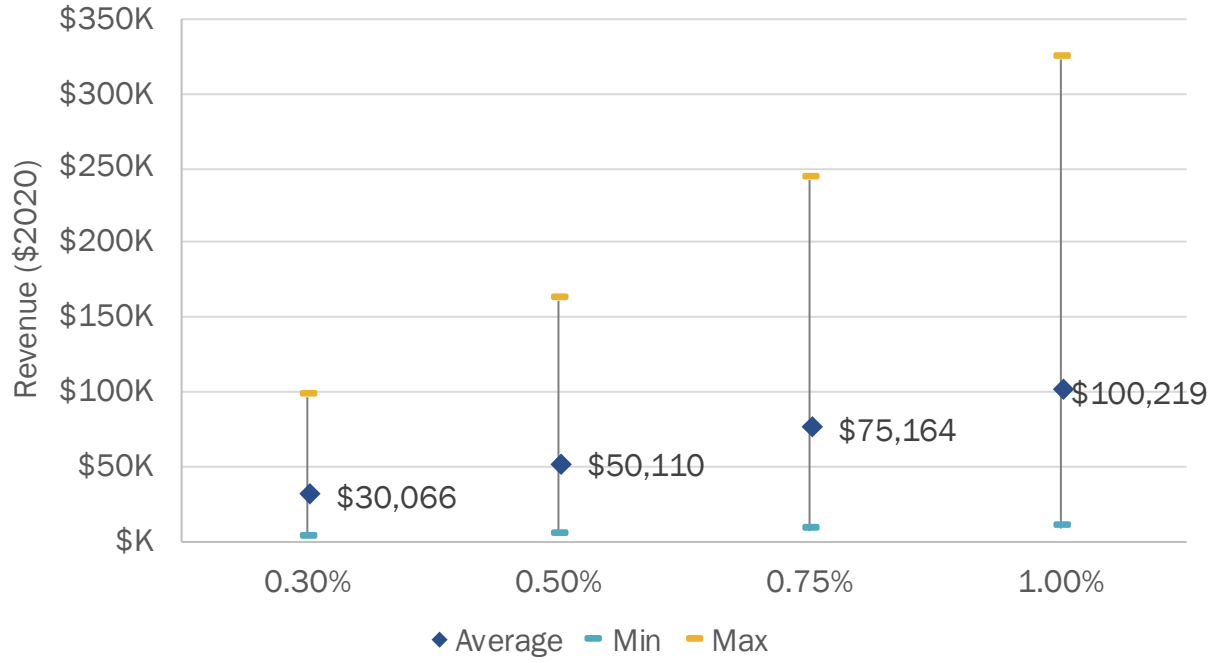
Source: ECONorthwest analysis of City of Tualatin permit data.



Based on the statutory requirements about use of funds, ECONorthwest translated the average annual simulated CET collections between 2016 and 2020 into funds available for each funding category, as shown in Exhibit 61 and Exhibit 62.

Exhibit 61. Hypothetical Total Commercial/Industrial CET Revenue (2016 to 2020) by Rate and Use of Funds
Source: ECONorthwest analysis of City of Tualatin permit data.

	0.30%	0.5%	1%	2%
Unrestricted	$60,201	$100,336	$200,671	$401,343
Housing Programs	$60,201	$100,336	$200,671	$401,343
Admin Costs	$5,017	$8,361	$16,723	$33,445

Exhibit 62. Hypothetical Total Residential CET Revenue (2016 to 2020) by Rate and Use of Funds
Source: ECONorthwest analysis of City of Tualatin permit data.

	0.30%	0.50%	0.75%	1.00%
OHCS	$4,329	$7,216	$10,824	$14,432
Affordable Housing Programs	$10,102	$16,837	$25,255	$33,674
Developer Incentives	$14,432	$24,053	$36,079	$48,105
Admin Costs	$1,203	$2,004	$3,007	$4,009

As shown above, a 0.5% or 1% rate on commercial and industrial development could generate meaningful revenue for programs, especially if the unrestricted portion is also dedicated toward housing programs. Because of the greater flexibility for these revenues, the City could design a flexible program for the revenues, or direct all of the net revenues towards a Housing Trust Fund or similar fund. This ease of use is important, because even with the higher revenue potential of the commercial/industrial CET, a 0.5% to 1% rate would offer little funding for administrative costs.

A CET on residential development would generate relatively little revenue given past trends in residential development, even at the maximum rate (1%). In addition, the administration would be more complex due to needing to separate out revenues toward the spending categories as specified in statute, while the funding available to cover administrative costs would be negligible.

Conclusions and Next Steps

Given the results summarized above, a 0.5% to 1% CET on commercial and industrial development may be worthwhile to consider as it could generate a flexible source of revenue for local housing programs, especially if the City continues to see strong industrial and commercial growth. Imposing a CET on residential development is likely not worth considering unless the City annexes a large amount of vacant residential land where higher-end new housing is expected.

If the City chooses to further evaluate adoption of a CET, it should conduct additional outreach to stakeholders and local businesses to offer an opportunity for discussion and to raise any concerns. The City should also advance conversations about the potential uses of the funds, even though this is flexible and does not necessarily need to be determined prior to adoption. Working with stakeholders to clearly define the program's intended purpose, how the funds (especially the unrestricted portion) would be used, and who would make decisions about the use of funds is likely to help build support for the program. If the City chooses to adopt a CET, it must pass an ordinance or resolution that states the rate and base of the tax. Most communities also identify any further self-imposed restrictions on the use of funds as part of adopting the ordinance. If the ordinance passes, the City must then establish a process to distribute the funds.

Executive Summary

This report presents an economic opportunities analysis (EOA) consistent with the requirements of Statewide Planning Goal 9 and the Goal 9 administrative rule (OAR 660-009). Goal 9 describes the EOA as "an analysis of the community's economic patterns, potentialities, strengths, and deficiencies as they relate to state and national trends" and states that "a principal determinant in planning for major industrial and commercial developments should be the competitive advantage of the region within which the developments would be located."

The primary goals of the EOA are to (1) project the amount of land needed to accommodate the future employment growth within Tualatin between 2020 and 2040, (2) evaluate the existing employment land supply within the City to determine if it is adequate to meet that need, and (3) to fulfill state planning requirements for a twenty-year supply of employment land.

How much buildable employment land does Tualatin currently have?

Exhibit 1 shows commercial and industrial land in Tualatin with development capacity (lands classified vacant or partially vacant). The results show that Tualatin has about 385 unconstrained buildable acres within its city limits and Basalt Creek.

Exhibit 1. Buildable Acres by Plan Designation and Zoning, Tualatin Planning Area, 2019

Source: Metro BLI, ECONorthwest Analysis. Note: The numbers in the table may not sum to the total as a result of rounding.

Generalized Plan Designation	Total buildable acres	Buildable acres on vacant lots	Buildable acres on partially vacant lots
Commercial			
Central Commercial	0	0	0
General Commercial	4	4	0
Medical Commercial	0	0	0
Neighborhood Commercial	0	0	0
Office Commercial	3	3	0
Recreational Commercial	0	0	0
Industrial			
General Manufacturing	99	99	0
Light Manufacturing	29	29	0
Manufacturing Business Park	85	85	0
Manufacturing Park	56	56	0
Mixed-Use Commercial Overlay Zone			
General Commercial	0	0	0
Central Tualatin Overlay Zone			
Central Commercial	0	0	0
General Commercial	0	0	0
Office Commercial	0	0	0
General Manufacturing	0	0	0
Light Manufacturing	0	0	0
Basalt Creek Planning Area			
Manufacturing Park	105	35	70
Neighborhood Commercial	4	4	0
Total	**385**	**314**	**70**

How much growth is Tualatin planning for?

Goal 9 requires that cities provide for an adequate supply of commercial and industrial sites consistent with plan policies. To meet this requirement, Tualatin needs an estimate of the amount of commercial and industrial land that will be needed over the 2020–2040 planning period. Exhibit 2 presents the forecast of employment growth by land use type in Tualatin from 2020 to 2040.

Tualatin's employment base was 40,478 employees in 2020. The forecast shows that by 2040, Tualatin will have 53,332 employees, an increase of 12,854 jobs over the planning period.

Exhibit 2. Forecast of Employment Growth by Land Use Type, Tualatin Planning Area, 2020–2040

Source: ECONorthwest. Note: The shaded percentages denote an assumption about the future share of employment (as a percent of total) by land use type. It assumes that the share of employment by land use type will remain the same.

Land Use Type	2020		2040		Change
	Employment	% of Total	Employment	% of Total	2020 to 2040
Industrial	18,218	45%	24,004	45%	5,786
Retail Commercial	3,050	8%	4,018	8%	968
Office & Commercial Services	18,382	45%	24,219	45%	5,837
Government	829	2%	1,092	2%	263
Total	**40,478**	**100%**	**53,332**	**100%**	**12,854**

Tualatin will accommodate new government employees (263 employees) in Institutional Plan Designations. Therefore, the estimate of new employees (between 2020 and 2040) that will require commercial and industrial lands is 12,591 employees.

How much land will be required for employment?

The forecast for land needed to accommodate employment growth in Tualatin shows that the growth of 12,591 new employees will result in demand for about 677 gross acres of commercial and industrial employment lands.

Does Tualatin have enough land to accommodate employment growth?

Exhibit 3 shows that Tualatin has a deficit of suitable employment land to accommodate demand for commercial and industrial employment in the Tualatin Planning Area.

Exhibit 3. Comparison of the Capacity of Land with Employment Land Demand by Land Use Type, Tualatin Planning Area, 2020—2040

Source: ECONorthwest. Note: Employment demand requires an additional 42 gross acres on land in Residential Plan Designations and one gross acre on land in an institutional (public) Plan Designation.

General Plan Designation	Land Supply (Suitable Gross Acres)	Land Demand (Gross Acres)	Land Sufficiency (Deficit)
Industrial	374	448	(74)
Commercial (incl Retail and Office)	11	186	(175)

What types of business does Tualatin want to attract?

An analysis of growth industries in Tualatin should address two main questions: (1) Which industries are most likely to be attracted to Tualatin? and (2) Which industries best meet Tualatin's economic development goals? The selection of target industries is based on Tualatin's goals for economic development; economic conditions in Tualatin, Washington County, and the Portland Metro Region; and the city's competitive advantages.

Given the current employment base, which is composed of small and midsized businesses, it is reasonable to assume that much of the city's business growth will come from small and midsized businesses. This growth will either come from businesses already in Tualatin or new businesses that start or relocate to Tualatin from within the Portland Region or from outside of the region.

The industries identified as having potential for growth in Tualatin are:

- **Manufacturing.** Tualatin's manufacturing sector accounts for 27% of the city's employment base. A few examples of Tualatin's potential growth industries in manufacturing are:
  - *Advanced manufacturing.* This industry is an internally preferred grouping of five independent traded clusters: (1) Downstream Metal Products, (2) Lighting and Electrical Equipment, (3) Metalworking Technology, (4) Production Technology and Heavy Machinery, and (5) Upstream Metal Manufacturing.
  - *Food processing and manufacturing.* The Bureau of Labor Statistics describes this industry cluster as one that takes livestock and agricultural products (raw food materials) and transforms them into products for intermediate or final consumption (sold to wholesalers or retailers for distribution). Tualatin's food

processing and manufacturing cluster is its fastest growing industry (projected to grow 64% from 2017 to 2028).

  - *Plastics.* Wages in the plastics industry cluster (comprising establishments that manufacture plastic materials and other plastic components/products) grew 14 % from 2012 to 2017. As the fourth most concentrated cluster in Tualatin (with an LQ of 5.21), this industry presents objective growth potential for lower-skilled workers.

- **Information technology and analytical systems.** This industry cluster includes establishments that work in computers, software, audio visual equipment, laboratory instruments, and medical apparatus development (e.g., standard and precision electronics like circuit boards and semiconductors).
- **Business services.** Business services establishments including corporate headquarters and other professional services (e.g., consulting, back office services, financial services/legal services, facilities support, computer services, etc.). In Tualatin, this industry is expected to see the largest growth in total jobs, and it had the largest growth in average wage.

What are the key conclusions from the EOA?

The conclusions about commercial and industrial land sufficiency in Tualatin are:

- **Tualatin has a deficit of land to accommodate new employment growth.** Tualatin has a deficit of about 74 acres of land in industrial Plan Designations and 175 acres of employment in commercial Plan Designations to accommodate employment. Tualatin will need to consider policies to increase the efficiency of employment land use within the City, such as policies to encourage denser employment development and redevelopment that results in higher-density development.
- **Tualatin has substantial redevelopment potential.** A majority of redevelopable lots are in industrial areas. For example, change of use (and redevelopment) of the gravel pit in the southwest area of the Manufacturing Business Park presents substantial redevelopment opportunities. The six tax lots in the gravel pit comprise 181 acres with about 47 constrained acres, mostly due to steep slopes and wetlands. When mining ceases in the gravel pit, which may or may not occur in the twenty-year planning period, the gravel pit may be redevelopable and available for new employment uses.
- **Tualatin's primary comparative advantages for economic development are its location along the I-5 corridor and proximity to urban and cultural amenities/services in the Portland Region, making Tualatin an attractive place for businesses to locate.** Tualatin has advantages through its access to the regional labor market and the region's growing labor force comprising diverse skill sets.
- **Tualatin will need to address transportation capacity issues to accommodate growth, particularly along regional connectors (roads and avenues).** Traffic congestion is a substantial issue in Tualatin and surrounding areas, making it difficult to commute to

Tualatin from other cities within the Portland Region and within Tualatin. Stakeholders are concerned that additional employment growth will make congestion substantially worse.

What are the key recommendations of the EOA?

Following are a summary of ECONorthwest's recommendations to Tualatin based on the analysis and conclusions in this report. The *Tualatin Economic Development Strategy* memorandum presents the full list of recommendations for Tualatin.

- **Ensure that Tualatin has enough land to accommodate expected employment growth and that land has infrastructure to support employment growth.** Tualatin should identify opportunities to support mixed-use development (especially development that includes commercial and residential uses) to accommodate employment growth, especially commercial employment growth. The City should identify opportunities to make more efficient use of employment land, such as limiting development of businesses that have large land requirements and have little employment (such as distribution). In addition, the City should work with landowners to get key employment sites certified as "shovel ready" to speed the development process.
- **Identify opportunities for redevelopment, especially mixed-use redevelopment.** The City has a substantial deficit of industrial and commercial land. The City may be able to address some or most of this deficit within the existing planning area (without a UGB expansion). To do so, the City should identify districts for redevelopment, such as mixed-use development. This planning includes revising the Tualatin Town Center Plan to focus on opportunities to support redevelopment, identify tools to support redevelopment, and identify areas appropriate for more intense industrial uses (e.g., redevelopment of the gravel pit in the southwest area of the city once mining activity has ceased).
- **Grow jobs and businesses in Tualatin by supporting business retention, growth, and attraction.** The first step in growing jobs and businesses in Tualatin is revising the economic development strategy, including developing a clear vision for economic development in Tualatin and creating an action plan to implement the vision. The revised strategy can build on the *Tualatin Economic Development Strategy* produced as part of this analysis, but the revised strategy should include a detailed action plan to implement the newly developed vision for economic development. In revising the strategy, the City should identify partnerships and incentive programs to grow, retain, and attract businesses and to support entrepreneurial businesses in Tualatin.
- **Ensure that the City connects planning for economic development with other community planning.** Throughout the project, stakeholders emphasized the need to coordinate economic development planning with housing, transportation planning, and other community planning. Updates to the Tualatin Transportation System Plan should be coordinated with planning for employment and business growth. A key approach to accommodating new commercial development is redevelopment that results in mixed-

use districts, providing opportunities for more housing affordable to people working at businesses in Tualatin and living closer to work (thus reducing transportation issues). In addition, stakeholders would like to see incorporation of services needed to meet daily needs of residents of neighborhoods without driving.

The *Tualatin Economic Development Strategy* memorandum presents more details about each of these topics and recommendations for specific actions to implement these recommendations.

1. Introduction

This report presents an economic opportunities analysis (EOA) for the City of Tualatin. The purpose of an EOA is to develop information as a basis for policies that capitalize on Tualatin opportunities and help address the City's challenges. The EOA includes technical analysis to address a range of questions that Tualatin faces in managing its commercial and industrial land. For example, the EOA includes an employment forecast that describes how much growth Tualatin should plan for over the 2020–2040 period and identifies the amount and type of employment land necessary to accommodate growth in Tualatin over that period. The EOA also includes an inventory of commercial and industrial land within Tualatin's Planning Area to provide information about the amount of land available to accommodate employment growth.

This EOA complies with the requirements of Statewide Planning Goal 9, the Goal 9 administrative rules (OAR 660 Division 9), and the court decisions that have interpreted them. Goal 9 requires cities to state objectives for economic development (OAR 660-009-0020[1][a]) and to identify the characteristics of sites needed to accommodate industrial and other employment uses (OAR 660-009-0025[1]) over the twenty-year planning period. This approach could be characterized as a *site-based* approach that projects land need based on the forecast for employment growth, the City's economic development objectives, and the specific needs of target industries.

Background

Tualatin last evaluated economic trends in a 2014 update to the City's Economic Development Strategic Plan. Around that same time, Greater Portland Inc. completed a five-year economic development strategy for the Portland Region (Greater Portland 2020), which defined emerging industry clusters and policies for economic development in the region. In 2018, Tualatin also completed a concept plan for the Basalt Creek Planning Area, which allocated substantial land as a Manufacturing Park and was expected to accommodate 1,897 new jobs.

The purpose of this project was to develop a factual base to provide the City with information about current economic conditions. This factual basis provides information necessary for updating the City's Economic Development Comprehensive Plan policies. This report identifies opportunities to meet the City's economic development objectives and develop comprehensive plan policies and implementation strategies that capitalize on the City's comparative advantages and address areas of economic weakness.

The EOA provides information that the City can use to identify and capitalize on its economic opportunities. It also provides information essential to addressing the City's challenges in managing economic development, such as a lack of commercial sites to support growth of businesses that require office space and a lack of policy direction to address these issues, as well as underutilized industrial and commercial land.

The EOA draws on information from numerous data sources, such as the Oregon Employment Department, U.S. Bureau of Economic Analysis, U.S. Bureau of Labor Statistics, and the U.S. Census.

Framework for an Economic Opportunities Analysis

The content of this report is designed to meet the requirements of Oregon Statewide Planning Goal 9 and the administrative rule that implements Goal 9 (OAR 660-009). The analysis in this report is designed to conform to the requirements for an economic opportunities analysis (EOA) in OAR 660-009 as follows.

1. *Economic Opportunities Analysis (OAR 660-009-0015)*. The EOA requires communities to (1) identify the major categories of industrial or other employment uses that could reasonably be expected to locate or expand in the planning area based on information about national, state, regional, county, or local trends; (2) identify the number of sites by type reasonably expected to be needed to accommodate projected employment growth based on the site characteristics typical of expected uses; (3) include an inventory of vacant and developed lands within the planning area designated for industrial or other employment use; and (4) estimate the types and amounts of industrial and other employment uses likely to occur in the planning area. Local governments are also encouraged to assess community economic development potential through a visioning or some other public input-based process in conjunction with state agencies.

2. *Industrial and commercial development policies (OAR 660-009-0020)*. Cities are required to develop commercial and industrial development policies based on the EOA. Local comprehensive plans must state the overall objectives for economic development in the planning area and identify categories or particular types of industrial and other employment uses desired by the community. Local comprehensive plans must also include policies that commit the city or county to designate an adequate number of employment sites of suitable sizes, types, and locations. The plan must also include policies to provide necessary public facilities and transportation facilities for the planning area. Tualatin's draft economic development policies will be in the Tualatin Economic Development Strategy memorandum, which will accompany this report.

3. *Designation of lands for industrial and commercial uses (OAR 660-009-0025).* Cities and counties must adopt measures to implement policies adopted pursuant to OAR 660-009-0020. Appropriate implementation measures include amendments to plan and zone map designations, land use regulations, public facility plans, and transportation system plans. More specifically, plans must identify the approximate number, acreage, and characteristics of sites needed to accommodate industrial and other employment uses to implement plan policies and must designate serviceable land suitable to meet identified site needs.

Organization of this Report

This report is organized as follows:

- **Chapter 2.** Factors Affecting Future Economic Growth summarizes historic economic trends that affect current and future economic conditions in Tualatin as well as Tualatin's competitive advantages for economic development.
- **Chapter 3.** Employment Growth and Site Needs presents a forecast for employment growth in Tualatin and describes the City's target industries and site needs for potential growth in industries.
- **Chapter 4.** Buildable Lands Inventory presents a summary of the inventory of employment lands.
- **Chapter 5.** Land Sufficiency and Conclusions compares the supply of land demand for buildable lands and presents key concluding recommendations for Tualatin.

This report also includes two appendices:

- **Appendix A.** National, State, and Regional and Local Trends
- **Appendix B.** Buildable Lands Inventory Methodology

2. Factors Affecting Future Economic Growth

Tualatin exists as part of the economy of the Portland Region. While Portland is the economic center of the region, providing urban amenities (such as stores, medical services, or personal financial services) to residents, Tualatin also provides similar amenities to its residents and visitors.

This chapter describes the factors affecting economic growth in Tualatin within the context of national and regional economic trends. The analysis presents the City's competitive advantages for growing and attracting businesses, which forms the basis for identifying potential growth industries in Tualatin.

Factors that Affect Economic Development[1]

The fundamental purpose of Goal 9 is to make sure that a local government plans for economic development. The planning literature provides many definitions of economic development, both broad and narrow. Broadly,

> Economic development is the process of improving a community's well-being through job creation, business growth, and income growth (factors that are typical and reasonable focus of economic development policy), as well as through improvements to the wider social and natural environment that strengthen the economy.[2]

That definition acknowledges that a community's wellbeing depends in part on narrower measures of economic wellbeing (e.g., jobs and income) and on other aspects of quality of life (e.g., the social and natural environment). In practice, cities and regions trying to prepare an economic development strategy typically use a narrower definition of economic development; they take it to mean business development, job growth, and job opportunity. The assumptions are that:

- Business and job growth are contributors to and are consistent with economic development, increased income, and increased economic welfare. From the municipal point of view, investment and resulting increases in property tax are important outcomes of economic development.
- The evaluation of trade-offs and balancing of policies to decide whether such growth is likely to lead to overall gains in well-being (on average and across all citizens and

[1] The information in this section is based on previous Goal 9 studies conducted by ECONorthwest and the following publication: *An Economic Development Toolbox: Strategies and Methods*, Terry Moore, Stuart Meck, and James Ebenhoh, American Planning Association, Planning Advisory Service Report Number 541, October 2006.

[2] *An Economic Development Toolbox: Strategies and Methods*, Terry Moore, Stuart Meck, and James Ebenhoh, American Planning Association, Planning Advisory Service Report Number 541, October 2006.

businesses in a jurisdiction, and all aspects of well-being) is something that decision makers do after an economic strategy has been presented to them for consideration.

That logic is consistent with the tenet of the Oregon Land Use Planning program: all goals matter, no goal dominates, and the challenge is to find a balance of conservation and development that is acceptable to a local government and state. Goal 9 does not dominate, but it legitimizes and requires that a local government focus on the narrower view of economic development that focuses on economic variables.

In that context, a major part of local economic development policy is about local support for business development and job growth; that growth comes from the creation of new firms, the expansion of existing firms, and the relocation or retention of existing firms. Specifically, new small businesses are accounting for a larger share of the job growth in the United States.[3] This shift toward a focus on entrepreneurship, innovation, and small businesses presents additional options for local support for economic development beyond firm attraction and retention. Thus, a key question for economic development policy is, *What are the factors that influence business and job growth, and what is the relative importance of each?* This document addresses that question in depth.

What factors matter?

Why do firms locate where they do? There is no single answer—different firms choose their locations for different reasons. Key determinants of a location decision are a firm's *factors of production*. For example, a firm that spends a large portion of total costs on unskilled labor will be drawn to locations where labor is relatively inexpensive. A firm with large energy demands will give more weight to locations where energy is relatively inexpensive. In general, firms choose locations they believe will allow them to maximize net revenues—if demand for goods and services are held roughly constant, then revenue maximization is approximated by cost minimization.

The typical categories that economists use to describe a firm's production function are:

- **Labor.** Labor is often the most important factor of production. Other things equal, firms look at productivity—labor output per dollar. Productivity can decrease if certain types of labor are in short supply, which increases the costs by requiring either more pay to acquire the labor that is available, the recruiting of labor from other areas, or the use of the less productive labor that is available locally.
- **Land.** Demand for land depends on the type of firm. Manufacturing firms need more space and tend to prefer suburban locations where land is relatively less expensive and

[3] According to the 2018 Small Business Profile from the U.S. Small Business Office of Advocacy, small businesses account for over 99 percent of total businesses in the United States, and their employees account for nearly 50% of American workers. https://www.sba.gov/sites/default/files/advocacy/2018-Small-Business-Profiles-US.pdf

less difficult to develop. Warehousing and distribution firms need to locate close to interstate highways.

- **Local infrastructure.** An important role of government is to increase economic capacity by improving quality and efficiency of infrastructure and facilities, such as roads, bridges, water and sewer systems, airport and cargo facilities, energy systems, and telecommunications.
- **Access to markets.** Though part of infrastructure, transportation merits special attention. Firms need to move their product (either goods or services) to the market, and they rely on access to different modes of transportation to do this.
- **Materials.** Firms producing goods, and even firms producing services, need various materials to develop products that they can sell. Some firms need natural resources (i.e., raw lumber) and others may need intermediate materials (i.e., dimensioned lumber).
- **Entrepreneurship**. This input to production may be thought of as good management, or even more broadly as a spirit of innovation, optimism, and ambition that distinguishes one firm from another even though most of their other factor inputs may be quite similar. Entrepreneurial activity, even when unsuccessful, can offer information about the local market that other entrepreneurs can use in starting a new firm. Entrepreneurs are typically willing to take on more risk in uncertain markets, and a strengthened entrepreneurial environment can help to reduce that risk and uncertainty. [4] Entrepreneurs also tend to have more mobility than larger firms and are more likely to locate in areas with a strong entrepreneurial environment.[5] To some degree, local governments can promote the high quality of life in an area to attract entrepreneurs, in addition to adopting regulations with minimal barriers—or at least, clear guidelines—for new small businesses.

The supply, cost, and quality of any of these factors obviously depends on market factors such as conditions of supply and demand locally, nationally, and even globally. But they also depend on public policy. In general, public policy can affect these factors of production through:

- **Regulation.** Regulations protect the health and safety of a community and help maintain the quality of life. Overly burdensome regulations, however, can be disincentives for businesses to locate in a community. Simplified bureaucracies and straightforward regulations can reduce the burden on businesses and help them react quickly in a competitive marketplace.
- **Taxes**. Firms tend to seek locations where they can optimize their after-tax profits. Tax rates are not a primary location factor—they matter only after businesses have made decisions based on labor, transportation, raw materials, and capital costs. The costs of these production factors are usually similar within a region. Therefore, differences in tax

[4] Tessa Conroy and Stephan Weiler. "Local and Social: Entrepreneurs, Information Network Effects, and Economic Growth" (2017). https://redi.colostate.edu/wp-content/uploads/sites/50/2017/05/gender_gia_Jun2017-2.pdf

[5] Emil E. Malizia and Edward J. Feser. *Understanding Local Economic Development. (*1999).

levels across communities within a region are more important in the location decision than are differences in tax levels between regions.

- **Financial incentives**. Governments can offer firms incentives to encourage growth. Most types of financial incentives have had little significant effect on firm location between regions. For manufacturing industries with significant equipment costs, however, property or investment tax credit or abatement incentives can play a significant role in location decisions. Incentives are more effective at redirecting growth within a region than they are at providing a competitive advantage between regions.

This discussion may make it appear that a location decision is based entirely on a straightforward accounting of costs, with the best location being the one with the lowest level of overall costs. Studies of economic development, however, have shown that location decisions depend on a variety of other factors that indirectly affect costs of production. These indirect factors include agglomerative economies (also known as industry clusters), quality of life, and innovative capacity.

- **Industry clusters**. Firms with similar business activities can realize operational savings when they congregate in a single location or region. Clustering can reduce costs by creating economies of scale for suppliers. For this reason, firms tend to locate in areas where there is already a presence of other firms engaged in similar or related activities.
- **Quality of life.** A community that features many quality amenities, such as access to recreational opportunities, culture, low crime, good schools, affordable housing, and a clean environment can attract people simply because it is a nice place to be. A region's quality of life can attract skilled workers, and if the amenities lure enough potential workers to the region, the excess labor supply pushes their wages down so that firms in the region can find skilled labor for a relatively low cost. The characteristics of local communities can affect the distribution of economic development within a region, with different communities appealing to different types of workers and business owners. Sometimes location decisions by business owners are based on an emotional or historical attachment to a place or set of amenities, without much regard for the cost of other factors of production.
- **Innovative capacity.** Increasing evidence suggests that a culture promoting innovation, creativity, flexibility, and adaptability is essential to keeping U.S. cities economically vital and internationally competitive. Innovation is particularly important in industries that require an educated workforce. High-tech companies need to have access to new ideas typically associated with a university or research institute. In addition to innovations in research and development within firms or research institutions, firms may also draw on the innovative capacity of entrepreneurs in an area. These entrepreneurs may be former employees of the larger firm or businesses that relocated to an area because of the proximity to an industry cluster. Strong networks and communication between firms, research institutions, and entrepreneurs are key

components to leveraging innovative capacity in an area.[6] Local governments are well-equipped to help foster these networks through supporting economic development tools such as small business assistance centers or incubation centers. Government can also be a key part of a community's innovative culture through the provision of services and regulation of development and business activities that are responsive to the changing needs of business.

How important are these factors?

To understand how changes in public policies affect local job growth, economists have attempted to identify the importance for firms of different locational factors. They have used statistical models, surveys, and case studies to examine detailed data on the key factors that enter the business location decision.

Economic theory says that firms locate where they can reduce the costs of their factors of production (assuming demand for products and any other factors are held constant). Firms locate in regions where they have access to inputs that meet their quality standards, at a relatively low cost. Because firms are different, the relative importance of different factors of production varies both across industries and, more importantly, across firms.

No empirical analysis can completely quantify firm location factors because numerous methodological problems make any analysis difficult. For example, some would argue simplistically that firms would prefer locating in a region with a low tax rate to reduce tax expenses. However, the real issue is the value provided by the community for the taxes collected. Because taxes fund public infrastructure that firms need, such as roads, water, and sewer systems, regions with low tax rates may end up with poor infrastructure, making it less attractive to firms. When competing jurisdictions have roughly comparable public services (type, cost, and quality) and quality of life, then tax rates (and tax breaks) can make a difference.

Further complicating any analysis is the fact that many researchers have used public expenditures as a proxy for infrastructure quality. But large expenditures on roads do not necessarily equal a quality road system. It is possible that the money has been spent ineffectively and the road system is in poor condition.

An important aspect of this discussion is that the business function at a location matters more than a firm's industry. A single company may have offices spread across cities with headquarters located in a cosmopolitan metropolitan area, the research and development divisions located near a concentration of universities, the back office in a suburban location, and manufacturing and distribution located in areas with cheap land and good interstate access.

The location decisions of businesses are primarily based on the availability and cost of labor, transportation, raw materials, and capital. The availability and cost of these production factors are usually similar within a region. Most economic development strategies available to local

[6] Nancey Green Leigh and Edward Blakely. *Planning Local Economic Development: Theory and Practice.* 2013.

governments, however, only indirectly affect the cost of these primary location factors. Local governments can most easily affect tax rates, public services, and regulatory policies. Economists generally agree that these factors do affect economic development, but the effects on economic development are modest. Thus, most of the strategies available to local governments have only a modest effect on the level and type of economic development in the community.

Local governments can provide support for new and existing small businesses through policies and programs that support entrepreneurship and innovation. The National League of Cities suggests strategies for local governments, including strong leadership from elected officials; better communication with entrepreneurs, especially regarding the regulatory environment for businesses in the community; and partnerships with colleges, universities, small business development centers, mentorship programs, community groups, businesses groups, and financial institutions.[7]

Local governments in Oregon also play a central role in the provision of buildable land through the inclusion of lands in the Urban Growth Boundary, through the determination of plan designations and zoning, and through the provision of public services. Obviously, businesses need buildable land to locate or expand in a community. Providing buildable land alone is not sufficient to guarantee economic development in a community—market conditions must create demand for this land, and local factors of production must be favorable for business activity. In the context of expected economic growth and the perception of a constrained land supply in Tualatin, the provision of buildable land has the potential to strongly influence the level and type of economic development in the City. The provision of buildable land is one of the most direct ways that Tualatin can affect the level and type of economic development in the community.

Summary of the Effect of National, State, and Regional Trends on Economic Development in Tualatin

This section presents a summary and the implications of national, state, and regional economic trends on economic growth in Tualatin, which are presented in Appendix A. Employment growth in Tualatin is closely related to trends that affect economic growth in Washington County and the broader Portland region.

- **Recovery from the national recession.** Incomes grew faster in Washington County than Oregon since 2001, and the unemployment rate in Washington County was lower than the statewide average.
    - The unemployment rate in Washington County has declined since the recession, consistent with trends in the United States and Oregon. In 2018, the unemployment rate was 3.5% in Washington County, 4.2% in Oregon, and 3.9% in the United States. Comparatively, in 2009, unemployment was 9.5% in Washington County, 11.3% in Oregon, and 9.3% in the United States. As of 2018, the unemployment rate for Washington County is similar to its rate in 2000.
    - Employment has increased in Washington County since 2001, with a gain of about 66,799 employees between 2001 and 2018. The largest increases were in professional/business services and health care/social assistance, while the largest decreases were in wholesale trade and information. Tualatin accounts for about 11% of employment in Washington County.

- **Growth in manufacturing and healthcare / social assistance sectors.** Employment in manufacturing and the healthcare / social assistance sectors accounted for about 37% of employment in Tualatin in 2017. In 2007, employment in these industries accounted for about 36% of employment in Tualatin, an increase of about 3,299 employees between 2007 and 2017. Employment in both of these sectors support above average wages.

  In Washington County, employment in manufacturing and the healthcare / social assistance sectors accounted for 23% of employment in 2017, down from 24% in 2007. While the overall share of employment decreased, total employment increased by about 9,809 employees between 2007 and 2017.

- **Availability of trained and skilled labor.** Availability of labor depends, in part, on population growth and in-migration. Tualatin's population increased by 4,344 people between 2000 and the 2013–2017 period, at an average growth rate of 1.0%. In comparison, Oregon's population also grew at an average rate of 1.0%, between 2000 and 2017, with 66% of population coming from in-migration.

  The current labor force participation rate is another important consideration in the availability of labor. The labor force in any market consists of the adult population (16 and over) who are working or actively seeking work. The labor force includes both the employed and unemployed. Children, retirees, students, and people who are not actively seeking work are not considered part of the labor force. According to the 2013–

2017 American Community Survey, Tualatin had about 15,643 people in its labor force and Washington County had over 310,400. The labor force participation rate in Tualatin (73%) was higher than Washington County (69%) and the Portland Region (68%) in the 2013–2017 period. A higher concentration of older residents in an area or a mismatch of the types of jobs available in an area and the types of skills of the labor force can contribute to low labor force participation rates.

Businesses in Tualatin draw employees from across Washington County as well as Multnomah and Clackamas Counties. Relative to Washington County and the Portland Region, Tualatin residents have a slightly higher level of educational attainment.

- **Aging of the population.** Tualatin has a smaller percentage of residents 60 years and older relative to Washington County and the Portland Region. Tualatin's median age, which was 31.9 in 2000, increased to 38.2 by the 2013–2017 period. In comparison, Washington County's median age was 36.4 in the 2013–2017 period.

  Washington County's population is expected to continue to age, with people 60 years and older forecast to grow from 20% of the population in 2020 to 24% of the population in 2040, consistent with Statewide trends. Tualatin may continue to attract midlife and older workers over the planning period. People in this age group may provide sources of skilled labor, as people continue to work until later in life. These skilled workers may provide opportunities to support business growth in Tualatin.

- **Increases in racial and ethnic diversity.** Overall, the nation and Oregon are becoming more racially and ethnically diverse. Between 2000 and 2013–2017, the Latinx population in Oregon increased from 8% to 13%, and the Latinx population in Tualatin increased from 12% to 16% in that same time. Growth in the Latinx community will continue to drive economic development in Oregon. The share of Oregon's non-Caucasian population increased from 13% to 15% and stayed static in Tualatin at 13%. Tualatin is less racially diverse but more ethnically diverse than Oregon.

- **Importance of small businesses in Oregon's economy.** Small business, those with 100 or fewer employees, account for 66% of private-sector employment in Oregon. The average size for a private business in Tualatin is 18 employees per business, compared to the State average of 11 employees per private business. Businesses with five or fewer employees in Tualatin account for 64% of private employment, and businesses with fewer than 20 employees account for 89% of private employment. Only 3% of private businesses in Tualatin have more than 100 employees, accounting for 39% of the jobs in Tualatin.

- **Increases in energy prices.** In 2018, lower energy prices decreased the costs of commuting. Over the long-term, if energy prices increase, these higher prices will likely affect the mode of commuting before affecting workers' willingness to commute. For example, commuters may choose to purchase a more energy-efficient car or carpool. Very large increases in energy prices may affect workers' willingness to commute, especially workers living the furthest from Tualatin or workers with lower-paying jobs. In addition, very large increases in energy prices may make shipping freight long

distances less economically feasible, resulting in a slowdown or reversal of offshore manufacturing, especially of large, bulky goods.

- **Increases in remote workers.** Working from home has increased in Oregon in both urban and rural areas. Firms that allow workers to work remotely cover a variety of industries, allowing their employees to continue working for that firm but enjoy the quality of life and amenities of the location that the workers prefer to live. While data on remote workers is difficult to obtain, about 6% of workers in Tualatin reported that they worked from home in the 2013–2017 period (according to Census data), up from 4.6% in 2000. In comparison, 6.0% of workers in Washington County worked from home in 2013–2017.

Employment Trends in Tualatin, Clackamas County, and Washington County

The economy of the nation changed substantially between 1980 and 2018. These changes affected the composition of Oregon's economy, including Tualatin's economy. At the national level, the most striking change was the shift from manufacturing employment to service-sector employment. The most important shift in Oregon during this period was the shift from a timber-based economy to a more diverse economy, with the greatest employment in services.

This section focuses on changes in the economy in Clackamas and Washington County since 2001 and in Tualatin since 2007.

Exhibit 4 shows covered employment in Washington County for 2001 and 2018.[8] Employment increased by 66,799 jobs, at an average annual growth rate (AAGR) of 1.5% over this period. The sectors with the largest increases in numbers of employees were professional and businesses services, healthcare and social assistance, and accommodation and food services. The average annual wage for employment in Washington County in 2018 was about $70,308.

[8] Covered employment includes employees covered by unemployment insurance. Examples of workers not included in covered employment are sole proprietors, some types of contractors (often referred to as "1099 employees"), or some railroad workers. Covered employment data is from the Oregon Employment Department.

[9] The following sectors were combined due to confidentiality of QCEW data: utilities, transportation, and warehousing; manufacturing and wholesale trade; finance and insurance, real estate and rental and leasing; health care and social assistance and private education; arts, entertainment, and recreation and accommodation and food services.

Exhibit 9 shows the employment and average pay per employee for sectors in Tualatin. Average pay for all employees ($57,283) is shown as a light brown line across the graph, and average pay for individual sectors are shown as short red lines. The exhibit shows that Tualatin's retail, administrative/waste management, and accommodations/food service sectors have below-average wages. The highest wages are in manufacturing (Exhibit 10).

Exhibit 9. Covered Employment and Average Pay by Sector, Tualatin, 2017

Source: Oregon Employment Department, Quarterly Census of Employment and Wages, 2017.

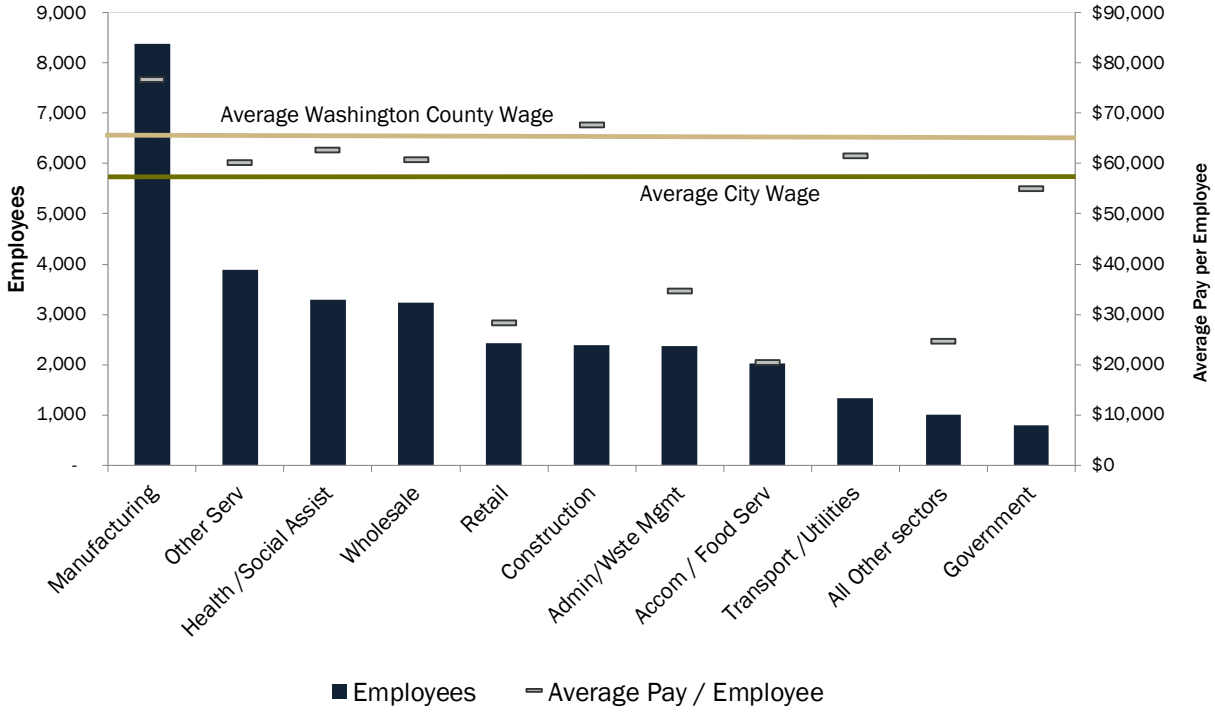

Exhibit 10. Covered Employment and Average Pay by Manufacturing Sub-Sector, Tualatin, 2017

Source: Oregon Employment Department, Quarterly Census of Employment and Wages, 2017.

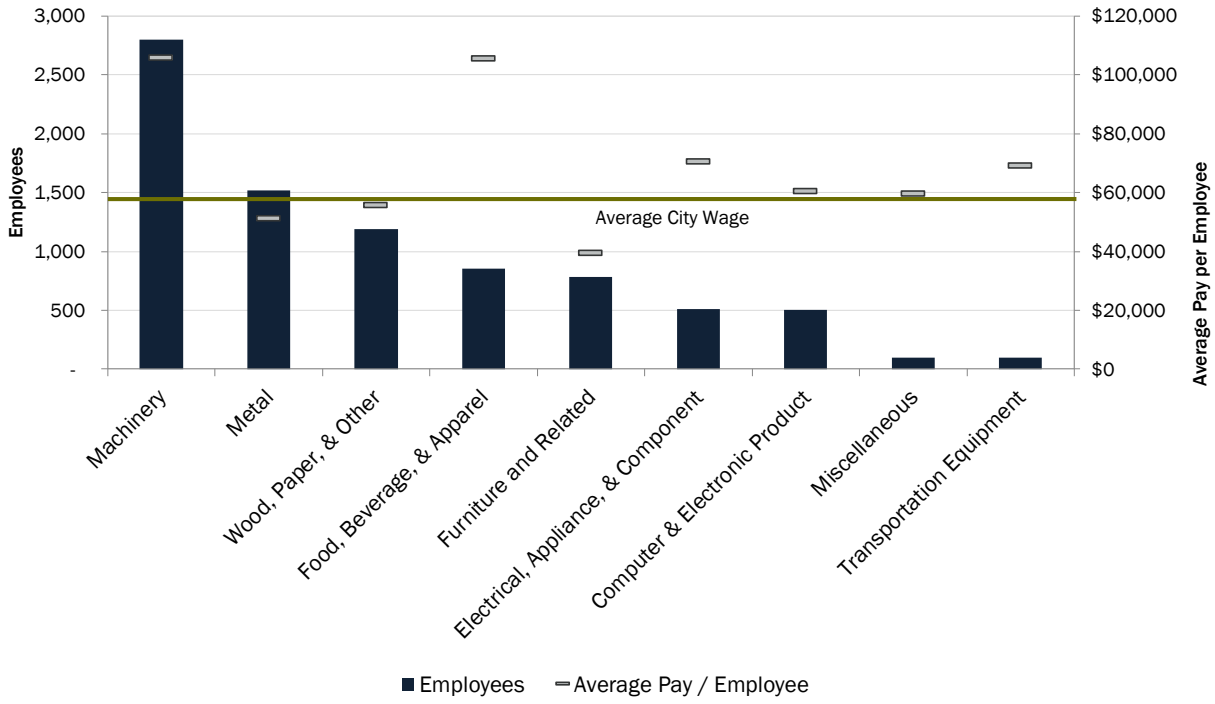

Exhibit 11 shows that employment in Tualatin grew by nearly 7,800 employees between 2007 and 2017 at an average annual growth rate of 2.9%. All sectors grew in employment, with three exceptions: (1) agriculture, forestry, and mining; (2) finance and insurance, and (3) private education services. The sectors with the largest growth were manufacturing, health care and social assistance, and administrative support/waste management and remediation services.

Outlook for Growth in Washington County

Exhibit 12 shows the Oregon Employment Department's forecast for employment growth by industry for the Portland Region (Clackamas, Multnomah, and Washington Counties) over the 2017–2027 period. Employment in the region is forecast to grow at an average annual growth rate of 1.2%.

The sectors that will lead employment in the region for the 10-year period are: professional and business services (adding 28,100 jobs); private education and health services (adding 27,300 jobs); trade, transportation, and utilities (adding 21,400); and leisure and hospitality (adding 13,800 jobs). In sum, these sectors are expected to add 90,600 new jobs or about 74% of employment growth in the Portland Region. As of 2017, Washington County accounts for about 36% of employment in these three counties (the Portland Region), and Tualatin accounts for about 10% of the County's employment.

Exhibit 12. Regional Employment Projections, Portland Region (Clackamas, Multnomah, and Washington County), 2017 and 2027

Infrastructure Capacity

This section outlines details about Tualatin's infrastructure capacity (including water, wastewater, stormwater, and transportation and transit infrastructure). Findings derive from an interview conducted with the Tualatin Public Works Department.

Water

Tualatin purchases its water from the City of Portland. Tualatin's water system, which extends past Bridgeport Village, is City-owned (and water becomes City-owned once it enters city limits). Its water supply derives from the Bull Run Watershed and Columbia South Shore Well Field. In the summer months, Tualatin uses about 10m gallons of water per day, and in the winter months, Tualatin uses about 4.4m gallons of water per day. The maximum water delivery to Tualatin is 14.1m gallons per day. Tualatin's 10-year water contract expires in 2026.

While Tualatin is closer to capacity in the summer, its water system currently accommodates all existing needs. From an economic development perspective, however, some types of businesses that use significant amounts of water (i.e., 1m gallons of water per day) may not locate in Tualatin because of the available water in the city. For example, Business Oregon was pursuing potential sites for a business looking to locate somewhere in the Greater Portland area—where they could access about 2m gallons of water per day. Tualatin turned this opportunity down.

Currently, Tualatin is helping to pay for a water treatment plant (expected delivery is 2026) that serves the Portland region. In addition, Tualatin is updating its Water Master Plan (expected delivery is summer 2019), developing its Water Emergency Supply Plan (expected delivery is fall 2019), and developing its Water Supply Strategy (expected delivery spring 2020).

On the horizon, Tualatin does not have big plans to expand its system per its Water Master Plan update. Core strategic priorities, per its Water Supply Strategy, are to find ways to access water from other water supplies. The City's water systems are in good repair. The most significant upgrade to water infrastructure is in Basalt Creek, which may need an additional reservoir depending on how fast the sub-area builds out.

Wastewater

Tualatin's wastewater collection system is serviced by Clean Water Services. Clean Water Services treats the wastewater and manages several of Tualatin's pump stations, which are City-owned. Its effluent discharge is typically 2.4m gallons per day (dry peak) and 4 million gallons per day (wet peak). While Tualatin has some issues with inflow to manhole lids, it does not have significant issues with infiltration.

Tualatin is not concerned about its water treatment capacity, as Clean Water Services is continuously improving and expanding its facilities. It is likely that as Basalt Creek grows, however, Tualatin will need to replace its piping and add five new pump stations. Despite growing population and jobs, Tualatin is not concerned with future wastewater capacity.

Tualatin recently finished an update to their Sewer Master Plan (which went to council in August 2019).

Stormwater

Tualatin staff do not think that stormwater management or treatment is a barrier to supporting new business growth. As new development occurs, developers are required to address stormwater issues on a property by property basis.

Transportation Services

This analysis looked at connections and capacity to I-5, regional connectors, and local roadways. Transportation access is both a significant advantage for economic development (because Tualatin is located directly on I-5) and a significant disadvantage because of increasing congestion on I-5 and other major roads.

- **Connection and capacity to I-5.** ODOT finished an auxiliary lanes project last year, which made a notable difference in easing capacity and reducing congestion (particularly from Carmen to Nyberg and the 205 on-ramps). I-5's (regional) pinch points are the Rose Quarter and Boones Bridge. Generally speaking, congestion issues around I-5 are less about Tualatin's interchanges and ramps and more about regional conditions on I-5.
- **Regional connector roads.** Over the last decade and longer, major roads connecting Tualatin to nearby cities have become increasingly congested. Major regional connectors include Tualatin Sherwood Road, Boones Ferry Road N-S, Hwy 99 W, Borland Road E-W, and 124th Avenue. The following provides more information:
    - *Tualatin Sherwood Road.* Washington County plans to complete a road widening project in 2023. The project will widen Tualatin Sherwood Road from three lanes to five lanes. It will include bicycle facilities.
    - *124th Avenue.* New improvements on this road are currently being underused. The City's long-term plan is to implement more signage to direct vehicles onto this currently underutilized roadway (offsetting traffic on other roadways). This road was built with three lanes but was planned for five lanes, allowing for future expansions of the road. Because few people know about (or use) this road, not much traffic exists. It is likely that as this road becomes more used, traffic pressure on Boones Ferry and Tualatin Sherwood Road will be relieved somewhat.
    - *Boones Ferry Road N–S.* Despite congestion near Tualatin Sherwood Road, the City has no plans for expansion at this time.
    - *Highway 99 W.* As this connector is located toward the north portion of Tualatin, this connector is not as extensive of an issue for traffic within the City of Tualatin. The City is, however, looking to develop a funding plan to improve Sherwood through King City and Tigard.

- *65th Avenue.* Running north to south, this road is becoming a bypass to get around 205 and I-5. While it is not considered a regional connector, it is a road likely to be looked at in the next Transportation System Plan update.
- *Mary Borland Road.* Tualatin recently took possession of Borland Road from Washington County. From Lake Oswego to Stafford, the City plans to make pavement improvements and conduct maintenance to make it a more pleasant place to drive. While there are no current plans for expansion, the City will likely address this piece of the network in their next Transportation System Plan update.

- **Local roadways.** Tualatin's road network is well-built and fairly new. As new development occurs, developers will be required to pay for transportation improvements that will support upgrading local and other roads. Tualatin is working to complete a cyclist pathway across I-5 and is working to increase multimodal pathways to T-S road (developed as part of the T-S Road widening project; expected delivery 2023). A $20 million general obligation bond passed last year to implement transportation capital projects to improve safety and relieve congestion at key intersections and locations.

Transit

Tualatin has three Tri-Met bus routes that serve the community (the 76, 96, and 97 routes) and the WES commuter rail that connects Tualatin to Beaverton. In addition, Ride Connection, which is funded through a Tri-met grant, offers two fixed, on-call lines that serve the business community on a regular schedule. Development of a 12-mile TriMet MAX line (the Southwest Corridor) between southwest Portland and Bridgeport Village in Tualatin is also on the horizon. To date, the City has not participated in discussions about implementing a local transit agency.

Tualatin's Strengths, Weaknesses, Opportunities, and Threats

OAR 660-009-0015(4) requires that cities conduct an assessment of community economic development potential, as part of the EOA. This assessment considers market factors, infrastructure and public facility availability and access, labor, proximity to suppliers and other necessary business services, regulations, and access to job training. The local factors that form Tualatin's competitive advantage are summarized in the subsections below.

Strengths

- **Location.** Tualatin is located in Washington County, about 13 miles south of Portland and about 36 miles north of Salem, along the I-5 corridor. Tualatin is located about midway between Hillsboro and Gresham. Other nearby and relatively large cities include Tigard, Lake Oswego, and Wilsonville. These locational aspects allow both goods and workers to move in and out of Tualatin relatively efficiently. Tualatin's location is an advantage, especially for freight transportation and households composed of workers that commute to different cities for work.

  Due to Tualatin's prime location along the I-5 corridor, about 93% of employees who work in Tualatin commute into Tualatin from other areas. This reality is advantageous for Tualatin, as they can attract workers (at a range of skill sets) from around the region.

- **Availability of transportation.** All firms are heavily dependent upon surface transportation for efficient movement of goods, customers, and workers. Access to an adequate highway and arterial roadway network is needed for all industries. Close proximity to a highway or arterial roadway is critical for firms that generate a large volume of truck or auto trips and firms that rely on visibility from passing traffic to help generate business.

  Businesses and residents in Tualatin have access to a variety of modes of transportation: automotive (I-5, 99W, and local roads), commuter train (West Side Express Service [WES]), light rail (Metropolitan Area Express [MAX] connection to WES at Lombard); bus (TriMet lines 76, 96, and 97), and air (Portland International Airport and Hillsboro Airport). These options provide options for residents and workers in Tualatin to commute in and out of the city, though traffic congestion is a growing concern. Additionally, Tualatin's easy access to I-5 is an advantage for attracting many types of businesses, such as warehouse and distribution or manufacturers that need close access to I-5 for heavy freight

- **Quality of life.** Tualatin residents' value the City's many urban services and amenities available to residents while maintaining a small-town character. Tualatin residents and workers have access to numerous local businesses, a high-quality school system, access to retail shopping opportunities, and an expansive parks system (which includes 90 park sites, 60 miles of trails, and 1,500 acres of natural area). Tualatin also provides access to medical care services through the Kaiser Permanente Tualatin Medical Office, Legacy Meridian Park Medical Center, Providence Bridgeport, and other medical and dental

offices. Tualatin is also a relatively safe community; in 2018, criminal citations, traffic citations, total arrests, and traffic crashes (activities) each amounted to less than 0.1 activity per capita.[10]

- **Support for local businesses.** Successful local economic development is often a result of effective collaboration among governments, business owners, and community members. To support new and existing small businesses in Tualatin, the City and Chamber of Commerce have developed a small business toolkit. The toolkit helps business owners with permitting their business in Tualatin.[11]
- **Existing businesses.** Tualatin has several key sectors (e.g., manufacturing, health care, social assistance), which present key opportunities for the creation of local clusters. These sectors may build off of regional clusters on the westside of the metro region. Tualatin also has many small businesses in a range of industries, including those listed above. Tualatin's existing businesses provide a base to build upon and expand.
- **Access to workers.** Tualatin pulls workers from across the Portland metropolitan area. The types of jobs available at businesses in Tualatin range from highly skilled professional and technical service jobs to service-sector jobs, such as retail services. These jobs require a range of educational background or specialized training.
- **Access to education and training.** Tualatin is also close to higher education facilities, including Clackamas Community College in Wilsonville, Portland Community College (Sylvania), Portland State University, Lewis and Clark, Oregon Institute of Technology, and Reed College. Businesses in Tualatin are able to attract workers from these schools.
- **Infrastructure capacity.** Tualatin has plans for expansion of water, wastewater, and stormwater systems to meet business needs as the city grows. The City recently updated its plans (and planning is ongoing) to address growing demands in the Basalt Creek subarea.

Weaknesses

- **Traffic congestion**. Tualatin's location along the I-5 corridor within the southern part of the Portland region results in significant congestion within the city, particularly during peak travel hours. Addressing these congestion issues will require addressing regional congestion issues on I-5, as well as expansion of connector roads with neighboring cities, as described in the section above. Part of the resolution of traffic congestion issues is increases in public transit and expansion of bicycling and pedestrian facilities.
- **Limited access to transit**. Tualatin residents and commuters have access to TriMet bus lines 76, 96, and 97; the WES commuter rail line; and the Tualatin Shuttle operated by

[10] City of Tualatin. (2018). Tualatin Police Annual Report. https://www.tualatinoregon.gov/sites/default/files/fileattachments/police/page/4885/2018_annual_report.pdf

[11] Tualatin's Small Business Toolkit: www.tualatinoregon.gov/sites/default/files/fileattachments/economic_development/page/4725/small_business_toolkit_final_draft_webpdf.pdf

Ride Connection. These alternative modes of transportation are important but do not meet the scale of the community's public transportation needs. More public transit routes that are more convenient and accessible is desired by the community to reduce congestion and to allow employees to get to work more efficiently.

- **Commuting trends**. While employee commuting trends in Tualatin have their advantages (ability to attract a workforce from across the region), they also present disadvantages. As Tualatin's population grows and as employment in Tualatin grows, it is likely that the number of employees commuting in and out of Tualatin will grow too. Commuting increases road congestion, and with limited access to transit to alleviate this problem, Tualatin's transportation infrastructure will become overloaded.
- **Affordable housing for workers.** A significant concern among Tualatin leaders and community members is the lack of affordable and available housing for people who work at businesses in Tualatin. The cost of housing does not align with the existing salaries of the workforce, which may prevent households from living and working in Tualatin.
- **Need for Replacement Workers.** The population across the region is aging, prompting a need for replacement workers. As workers in Tualatin retire, the need for skilled, educated workers will increase. This trend is consistent with workforce issues common to Oregon's cities.
- **Downtown area that looks dated and has limited draw for residents and visitors**. A perception that Tualatin lacks urban design standards, architectural variety, and amenities in close proximity has resulted in many community members feeling that Tualatin looks dated. Specifically, community members note a need for a refined downtown center to draw visitors to Tualatin from I-5. Potential improvements to the physical appearance of the built environment in the city include increases to allowed building heights in specific areas, more mixed-use development, and improved connectivity to increase walkability.
- **Availability of high-wage jobs.** The average wage in Tualatin is $57,283, while the average wage in Washington County is $70,308. The largest sector of employment in Tualatin is in manufacturing industries, which pay higher-than-average wages. Tualatin also has many service-sector jobs, which tend to provide lower-than-average wages. Tualatin's location and cluster of manufacturing industries may help to attract more businesses with high wages, which may allow more workers in Tualatin to afford to also live in the city.
- **Retention of businesses.** Tualatin's Business Outreach Survey uncovered several issues that may make keeping businesses in Tualatin difficult. Issues include a poor perception of public safety (issues around the interstate and rail line and the perception of rising crime), the lack of transportation and freight access, inconvenient public transit,

perceived slowness on part of the City to modify the Development Code,[12] and lack of incentives for development. In addition, businesses cited a mismatch between business needs and workforce skill sets.

Opportunities

- **Public transportation.** Tualatin may work with Tri-Met to expand public transportation to promote connectivity, reduce reliance on cars, and reduce congestion, and to encourage alternative modes of transportation. While local jurisdictions are not mandated to offer transit services, public transit is essential to the households that need it to access services or to get to work. Connections to the Southwest Corridor transit line will be key to connecting Tualatin within the Portland region. Local transit will be necessary to allow riders to get from the Southwest Corridor station to employment centers in Tualatin.
- **Improvements to regional connectors.** Regional transportation corridors, connecting Tualatin to nearby cities, are congested. Plans for road expansions, as well as road expansions completed in the recent past, may improve existing conditions and support further growth.
- **Redevelopment and infill development.** Community members noted the lack of a downtown center of Tualatin to draw visitors. Along with improvements to the physical appearance and urban form of commercial areas in Tualatin, the City can continue to attract small businesses to locate in Tualatin, especially those that would attract visitors and residents to a core area. One potential area for this type of development would be the redevelopment of the Tualatin Commons, to create a more pedestrian-oriented center.
- **Small business retention and growth.** Issues with business retention have created vacant storefronts. The City could develop and promote initiatives that encourage use of currently vacant storefronts through continued support for small businesses and entrepreneurs.

Threats

- **Environmental and climate change risks.** Environmental factors, including climate change, can threaten the success of a variety of industries that rely on key infrastructure that may not be adapted to growing environmental pressures (e.g., flooding, seismic hazards, or powerful storms). The risk of these natural hazards is likely to increase as a result of climate change.[13] Forest fires and urban heat islands also cause poor air quality, which can decrease quality of life for residents and impact their health.
- **Potential for decline in the State and national economies.** Changes in the State and national economies are beyond local control and directly affect Tualatin's economy.

[12] Tualatin updated its Development Code in 2018 through a project known as the Tualatin Development Code Improvement Project (TDCIP) Phase 1.

[13] Oregon Climate Change Research Institute. *Fourth Oregon Climate Assessment Report*. January 2019.

National recessions generally have a greater effect on Oregon, with higher job losses and longer recovery periods than the national average.

Summary of Tualatin's Competitive and Comparative Advantages

The prior sections presented Tualatin's strengths, weaknesses, opportunities, and threats for economic development. Based on this, Tualatin's competitive and comparative advantages are:

- **Location.** Tualatin is located along a major transportation corridor (the I-5 corridor) and is 13 miles from downtown Portland. While Tualatin is not an especially large city, it is in close proximity to all of the urban amenities and services one would expect in a large metropolitan area. Residents of Tualatin have access to cultural activities such as concerts and events (like the West Coast Giant Pumpkin Regatta) at the Tualatin Commons and museums, markets, and concert halls in Portland. Residents also have access to outdoor recreational activities such as many park amenities offered by the City and the Tualatin River National Wildlife Refuge in Sherwood. These locational aspects are attractive to businesses who prioritize quality of life for their employees.

  Additionally, most of Tualatin's workers commute to the city from other areas. Businesses that need access to or want to attract customers across the Portland Region may locate in Tualatin. Tualatin's location will impact the area's future economic development.

- **Regional Labor Market.** The availability of labor is critical for economic development. Availability of labor depends not only on the number of workers available but the quality, skills, and experience of available workers. Businesses in Tualatin have access to workers in Tualatin and from neighboring communities. Businesses need access to reliable skilled workers, both with and without higher education. The multitude of higher education institutions located in and around the Portland Metro area means that Tualatin has sufficient access to skilled workers.

- **Existing Businesses.** Tualatin's existing businesses provide an opportunity for development of new businesses within the city. The existing business base is an advantage for economic development in numerous ways—as a source of future economic expansion, for attracting skilled workers, and for provision of goods and services to other businesses in Tualatin.

- **Ongoing Planning Projects.** The City is revising its Comprehensive Plan (the Tualatin 2040 process), which will result in ongoing planning work that is necessary to support economic growth. This work may include revisions to the City's economic development strategy, additional planning for housing to provide more opportunities for workers to live in Tualatin, updating the Transportation System Plan, ongoing planning for transit services, area planning for redevelopment that may result from this EOA and the housing needs analysis project, and other ongoing planning projects.

Target Industries

The characteristics of Tualatin will affect the types of businesses most likely to locate in the city. Tualatin's attributes that may attract firms are Tualatin's access to industrial land, access to workers, and its location along the I-5 corridor.

Tualatin's industry concentrations with a potential competitive advantage are defined in Exhibit 13. Tualatin has categorized its existing businesses into four main categories based on the analysis of location quotients (i.e., highly specialized industries), differential shift (i.e., competitive advantage compared to the national level), and critical concentration (i.e., at least five establishments in a defined cluster). These four categories are Growing Base, Emerging Clusters, Mature Clusters, and Transformation Clusters. Exhibit 13 and Exhibit 14 list the specific industries by each category.

Exhibit 13. Concentration of Industries and Employment, Tualatin, 2017

Source: City of Tualatin, Economic Development Department using data from EMSI and Oregon Department of Employment (QECW data).
Note: Not pictured is Food Processing and Manufacturing, with an LQ of 2.73 and DS 142%. Automotive is also not displayed, with an LQ of 0.51 and DS of -62%.

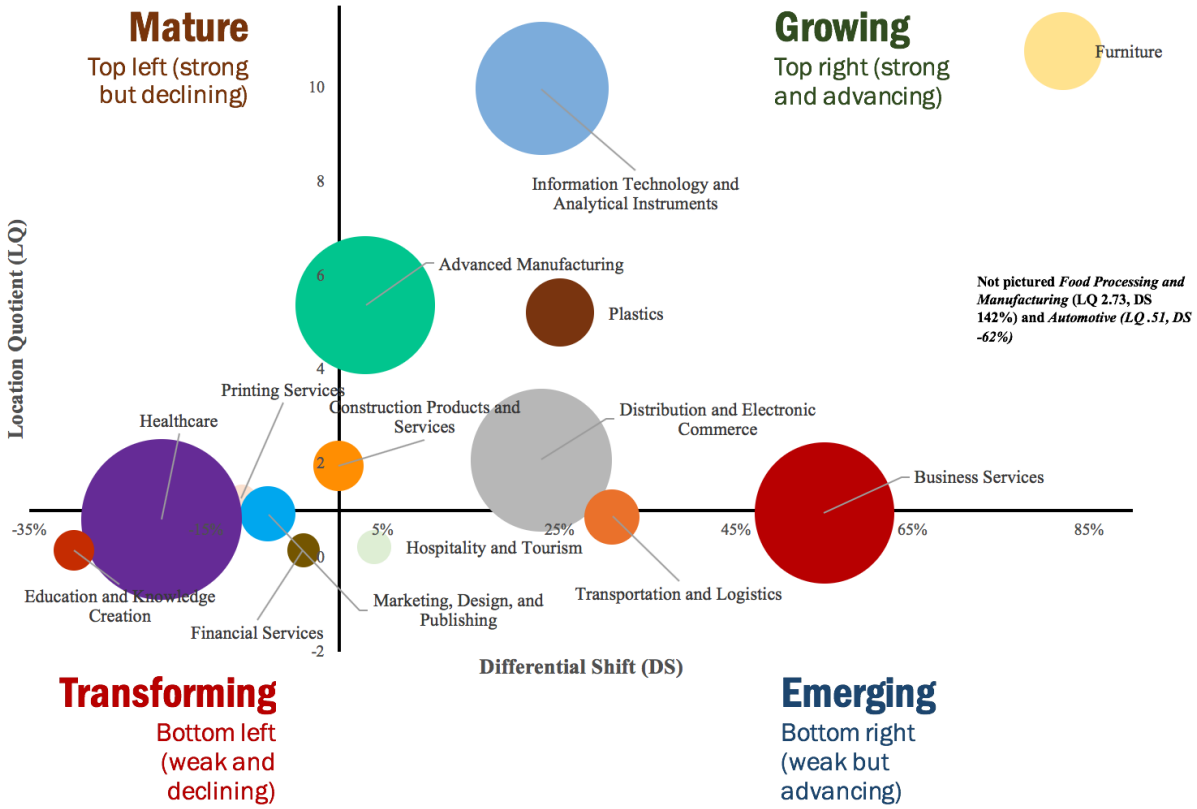

Exhibit 14. Industries Ranked Based on Differential Shift and Location Quotient
Source: City of Tualatin, Economic Development department using EMSI data (2018).

Rank	Cluster	Location Quotient (LQ)	Cluster Employment, 2017	Number of Establishments, 2016	Differential Shift (DS)
GROWING BASE					
1	Food Processing and Manufacturing	2.73	564	6	142%
2	Furniture	10.79	776	6	82%
3	Plastics	5.21	587	10	25%
4	Information Technology and Analytical Instruments	9.99	2,270	37	23%
5	Distribution and Electronic Commerce	2.08	2,535	193	23%
6	Advanced Manufacturing	5.38	2,433	46	3%
EMERGING CLUSTERS					
7	Business Services	0.96	2,506	131	55%
8	Transportation and Logistics	0.88	378	16	31%
9	Hospitality and Tourism	0.22	144	8	4%
MATURE CLUSTERS					
10	Construction Products and Services	1.96	331	7	-0.4%
11	Printing Services	1.26	110	11	-11%
TRANSFORMATION CLUSTERS					
12	Financial Services	0.17	141	35	-4%
13	Marketing, Design, and Publishing	0.93	385	28	-8%
14	Healthcare	0.82	3,279	153	-20%
15	Education and Knowledge Creation	0.16	199	16	-30%

The potential growth industries in Tualatin will draw from existing industry concentration in the City, Washington County, and the Portland Region, along with the City's economic development policies that align with changing or emerging industries and result in employment growth in Tualatin. Tualatin may also have opportunities for employment growth in industries without a concentration of employment or a high location quotient.

Potential Growth Industries

An analysis of growth industries in Tualatin should address two main questions: (1) Which industries are most likely to be attracted to Tualatin? and (2) Which industries best meet Tualatin's economic development goals? The selection of target industries is based on Tualatin's goals for economic development, economic conditions in Tualatin and Washington County, and the City's competitive advantages.

Given the current employment base, which is composed of small and mid-sized businesses, it is reasonable to assume that much of the city's business growth will come from small and mid-sized businesses. This growth will either come from businesses already in Tualatin or new businesses that start or relocate to Tualatin from within the Portland Region or from outside of the region.

The industries identified as having potential for growth in Tualatin are outlined below. This section primarily draws from the City of Tualatin's cluster analysis and reports developed for the Portland Region.

- **Manufacturing.** Tualatin's manufacturing sector accounts for 27% of the city's employment base. Greater Portland, Inc. (GPI) described Portland as a hot spot for manufacturing growth for key sub-clusters (footwear, apparel, knives, and sporting; machinery; and medical devices).[14] Tualatin's potential growth industries in manufacturing are:
    - *Advanced manufacturing.* This industry is an internally preferred grouping of five independent traded clusters: (1) downstream metal products, (2) lighting and electrical equipment, (3) metalworking technology, (4) production technology and heavy machinery, and (5) upstream metal manufacturing. In a report by the U.S. Subcommittee on Advanced Manufacturing, this industry is challenged by "a shortage of Americans with the science, technology, engineering, and mathematics knowledge and technical skills needed for advanced manufacturing jobs."[15] Tualatin has a larger share of highly educated residents compared to Washington County and the Portland Region, alleviating some concerns related to not having sufficient levels of skilled workers.

      Greater Portland Global (GPG), in its latest Investment Plan,[16] states that "[t]he region is rich with firms in legacy industries such as metals manufacturing and wood processing that use advanced processes and possess a highly skilled labor pool, [motor vehicle manufacturing, and computers and electronics]." While GPG indicates that there is "a limited economic development role to play,"

[14] Greater Portland, Inc. (n.d.). Regional Trends in Greater Portland's Target Clusters. Greater Portland 2020.

[15] The United States Subcommittee on Advanced Manufacturing. *Strategy for American Leadership in Advanced Manufacturing*. Office of the President, Committee on Technology of the National Science and Technology Council.

[16] Greater Portland Global. (n.d.). *Global Trade and Investment Plan.* Global Cities Initiative, A Joint Project of Brookings and JPMorgan Chase.

Tualatin has substantial access to labor talent and may continue to support expansions of existing advanced metals manufacturing, family-owned operations, and wood products manufacturing.

- *Food processing and manufacturing.* The Bureau of Labor Statistics describes this industry cluster as one that takes livestock and agricultural products (raw food materials) and transforms them into products for intermediate or final consumption (sold to wholesalers or retailers for distribution). Tualatin's food processing and manufacturing cluster is its fastest growing industry (projected to grow 64% from 2017 to 2028). GPG cites the region's food processing sector as an established sector, requiring support in the form of industrial lands readiness and continued recruitment.
- *Furniture.* The furniture industry cluster comprises establishments that manufacture furniture, cabinets, shelving, and manufactured homes using products made of wood, metal, plastic, or textiles. While the furniture cluster provides the lowest annual wage of $38,911 per year (almost $19,000 less than the city average), it is the most concentrated cluster in Tualatin (with an LQ of 10.79).
- *Plastics.* Wages in the plastics industry cluster (comprising establishments that manufacture plastic materials and other plastic components/products) grew 14% from 2012 to 2017. As the fourth most concentrated cluster in Tualatin (with an LQ of 5.21), this industry presents objective growth potential for lower-skilled workers.
- *Consumer products.* Per a 2019 discussion with GPI, the consumer products sector was described as an important industry target for Oregon, particularly for food and beverage products but also apparel, outdoor wear, and footwear, as well as health and beauty products, home accessories, and pet products. Consumer products consists of convenience, shopping, specialty, or unsought products (e.g., final goods). BuiltOregon, purposed to make Oregon the leader in consumer product innovation and development, launched the United States first nonprofit consumer product accelerator in Oregon. Tualatin may support efforts to connect consumer product businesses with BuiltOregon to encourage growth in its manufacturing target industries (e.g., advanced manufacturing, food processing, furniture manufacturing, etc.).

- **Information technology and analytical systems.** This industry cluster comprises establishments that work in computers, software, audio visual equipment, laboratory instruments, and medical apparatus development (e.g., standard and precision electronics like circuit boards and semiconductors). As of 2017, employees working in this industry cluster maintain an average wage of $109,832 (about $52,000 above the city's average)—representing the highest average-waged industry in Tualatin. Tualatin's information technology and analytical system industry has, however, grown slower (17%) than the nation.

- **Business services.** Business services establishments, including corporate headquarters and other professional services (e.g., consulting, back office services, financial services/legal services, facilities support, computer services, etc.). In Tualatin, this industry is expected to see the largest growth in total jobs and had the largest growth in average wage.

3. Employment Growth and Site Needs

Goal 9 requires cities to prepare an estimate of the amount of commercial and industrial land that will be needed over a 20-year planning period. The estimate of employment land need and site characteristics for Tualatin is based on expected employment growth and the types of firms that are likely to locate in Tualatin over the 20-year period. This section presents an employment forecast and analysis of target industries that build from recent economic trends.

Forecast of Employment Growth and Commercial and Industrial Land Demand

Demand for industrial and non-retail commercial land will be driven by the expansion and relocation of existing businesses and by the growth of new businesses in Tualatin. This employment land demand is driven by local growth independent of broader economic opportunities, including the growth of target industries.

The employment projections in this section build off of Tualatin's existing employment base, assuming future growth is similar to the Portland Region's long-term historical employment growth rates. The employment forecast does not take into account a major change in employment that could result from the location (or relocation) of one or more large employers in the community during the planning period. Such a major change in the community's employment would exceed the growth anticipated by the city's employment forecast and its implied land needs (for employment, housing, parks, and other uses). Major economic events, such as the successful recruitment of a very large employer, are difficult to include in a study of this nature. The implications, however, are relatively predictable—more demand for land (of all types) and public services.

Projecting demand for industrial and non-retail commercial land has four major steps:

1. **Establish base employment for the projection.** We start with the estimate of covered employment in Tualatin presented in Exhibit 8. Covered employment does not include all workers, so we adjust covered employment to reflect total employment in the city.
2. **Project total employment.** The projection of total employment considers forecasts and factors that may affect employment growth in Tualatin over the 20-year planning period.
3. **Allocate employment.** This step involves allocating types of employment to different land use types.
4. **Estimate land demand.** This step estimates general employment land demand based on employment growth and assumptions about future employment densities.

The remainder of this section follows this outline to estimate employment growth and commercial and industrial land demand for Tualatin.

Employment Base for Projection

The purpose of the employment projection is to model future employment land need for general employment growth. The forecast of employment growth in Tualatin starts with a base of employment growth on which to build the forecast.

Exhibit 15 shows ECONorthwest's estimate of total employment in Tualatin in 2017. Tualatin had an estimated 38,838 total employees in 2017.

To develop the figures, ECONorthwest started with estimated covered employment in Tualatin using confidential Quarterly Census of Employment and Wages (QCEW) data provided by the Oregon Employment Department. Based on this information, Tualatin had about 31,102 covered employees in 2017.

Covered employment, however, does not include all workers in an economy. Most notably, covered employment does not include sole proprietors. Analysis of data shows that covered employment reported by the Oregon Employment Department for Washington County is only about 77% of total employment reported by the U.S. Department of Commerce.[17] We evaluated this ratio for each industrial sector for Washington County and used the resulting ratios to determine the number of noncovered employees. This allowed us to determine the total employment in Tualatin.

[17] **Covered employment** includes employees covered by unemployment insurance. Examples of workers not included in covered employment are sole proprietors, some types of contractors (often referred to as "1099 employees"), or some railroad workers. Covered employment data is from the Oregon Employment Department.

Total employment includes all workers based on date from the U.S. Department of Commerce. Total employment includes all covered employees, plus sole proprietors and other noncovered workers.

Exhibit 15. Estimated Total Employment by Sector, Tualatin Planning Area, 2017
Source: 2017 covered employment from confidential Quarterly Census of Employment and Wage (QCEW) data provided by the Oregon Employment Department.

Sector	Covered Employment	Estimated Total Employment	Covered % of Total
Agriculture, Forestry, & Mining	162	162	100%
Construction	2,384	3,018	79%
Manufacturing	8,371	8,761	96%
Wholesale Trade	3,235	3,805	85%
Retail Trade	2,429	2,926	83%
Transportation, Warehousing & Utilities	1,337	1,734	77%
Information	195	235	83%
Finance & Insurance	380	675	56%
Real Estate, Rental, & Leasing	294	1,175	25%
Professional &Technical Services	1,044	1,821	57%
Management of Companies	789	827	95%
Admin. & Support / Waste Mgmt & Remediation Serv.	2,366	2,942	80%
Private Education Services	296	552	54%
Health Care & Social Assistance	3,291	4,019	82%
Arts, Entertainment, & Recreation	846	1,658	51%
Accommodation & Food Services	2,017	2,201	92%
Other Services	879	1,532	57%
Government	787	795	99%
Total Non-Farm Employment	**31,102**	**38,838**	**77%**

Exhibit 16 shows that industrial employment (i.e., manufacturing, warehousing, or construction) is predominantly located in Industrial Plan Designations, with small amounts of employment located in commercial Plan Designations (such as contractors and delivery or transportation logistics services) and in residential Plan Designations (such as contractors, plumbers, electricians, contractors, and delivery or transportation logistics services).

In contrast, about one-fifth of commercial employment (i.e., retail, health care, financial services, and other commercial uses) are located in industrial Plan Designations (such as gas stations, auto body shops, storage facilities, and professional or technical-service businesses) and 12% are located in residential Plan Designations (such as financial institutions, property management or real estate offices, cafes, restaurants, and professional or technical-service businesses).

In the future, it is reasonable to expect that employment in Tualatin will continue to mix within existing Plan Designations, with substantial amounts of commercial employment locating in industrial and residential Plan Designations. Existing commercial and industrial employment in residential Plan Designations (Exhibit 16) consists of construction businesses, some wholesale and retail, as well as financial and real estate businesses.

Exhibit 16. Location of Employment by Plan Designation, Tualatin Planning Area, 2017

Source: Bureau of Labor Statistics, Quarterly Census of Employment and Wage, summarized by ECONorthwest. Note: Data is organized by 2-digit NAICS and only includes employment at businesses with private ownership.

General Plan Designation	Industrial employment		Commercial employment		Total	
	Employees	Percent	Employees	Percent	Employees	Percent
Industrial	13,985	94%	3,090	20%	17,075	56%
Commercial	547	4%	10,352	67%	10,899	36%

Employment Projection

The employment forecast covers the 2020–2040 period, requiring an estimate of total employment for Tualatin in 2020. Tualatin does not have an existing employment forecast, and there is no required method for employment forecasting. OAR 660-024-0040(9) sets out some optional "safe harbors" that allow a city to determine employment land need.

ECONorthwest modeled four scenarios of employment growth. The employment growth assumption and basis for the scenarios are outlined below and in Exhibit 17:

- **Metro's Household Growth Rate for Tualatin:** The growth rate of 0.44% based on Tualatin's household growth forecast for the 2020–2040 period. This rate is consistent with the household forecast used in Tualatin's Housing Needs Analysis (2020–2040). Use of this growth rate is consistent with the safe harbor in OAR 660-024-0040(9)(a).
- **OED's Employment Growth Rate for the Tri-County Region:** The growth rate of 1.2% based on Oregon Employment Departments' (OEDs') forecast for employment growth for the Portland Region (Clackamas County, Multnomah County, and Washington County). Use of this growth rate is consistent with the safe harbor in OAR 660-024-0040(9)(a).
- **Metro's Employment Growth Rate for Tualatin:** The growth rate of 1.4% based on Metro's employment forecast for Tualatin for the 2015–2040 period.
- **Tualatin's Historic Employment Growth Rate:** The growth rate of 2.9% based on Tualatin's employment growth for the 2007–2017 period.

Exhibit 17. Employment Growth Scenarios, Tualatin Planning Area, 2020–2040

Source: (1) Metro's *2040 Household Distributed Forecast*, July 12, 2016. Metro's 2040 TAZ Forecast for households, November 6, 2015. Calculations by ECONorthwest. (2) State of Oregon Employment Department, Employment Projections by Industry, 2017–2027. (3) Metro's 2040 Employment Distributed Forecast, July 12, 2016. (4) Bureau of Labor Statistics, Quarterly Census of Employment and Wage, 2007 and 2017. Note: "HH" is household and "Emp." is employment.

Year	Total Emplyment Scenarios			
	Metro's HH Growth for Tualatin	OED's Emp. Growth for Tri-County Region	Metro's Emp. Growth for Tualatin	Historic Emp. Growth for Tualatin
2020	39,355	40,252	40,478	42,339
2040	42,985	51,089	53,332	75,272
Change 2020 to 2040				
Employees	3,630	10,837	12,854	32,933
Percent	9%	27%	32%	78%
AAGR	0.44%	1.20%	1.39%	2.92%

Tualatin is assuming that the City will grow at the rate forecast by Metro, 1.4% average annual growth rate. This assumption is based on the fact that Tualatin grew at a substantially faster rate over the 2007–2017 period (2.9% average annual growth rate), as well as Tualatin's key comparative advantages, such as the city's location along I-5 and its land base of industrial land.

Exhibit 18 shows employment growth for Tualatin between 2020 and 2040, based on the assumption that the City will grow at an average annual growth rate of 1.4%. Tualatin will have 53,332 employees by 2040, which is an increase of 12,854 employees (32%) between 2020 and 2040.

Tualatin is forecast to have 12,854 new employees over the 20-year period.

Exhibit 18. Forecast of Employment Growth, Tualatin Planning Area, 2020–2040

Source: ECONorthwest.

Year	Total Employment
2020	40,478
2040	53,332
Change in Employees (2020 to 2040)	
Employees	12,854
Percent	32%
AAGR	1.39%

Allocate Employment to Different Land Use Types

The next step in forecasting employment is to allocate future employment to broad categories of land use. Firms wanting to expand or locate in Tualatin will look for a variety of site characteristics, depending on the industry and specific circumstances. We grouped employment into four broad categories of land use based on North American Industrial Classification System (NAICS): industrial, retail commercial, office and commercial services, and government.

Exhibit 19 shows the expected share of employment by land use type in 2020 and the forecast of employment growth by land use type in 2040 in Tualatin. For each land use type, we assumed that the share of total employment will stay the same.

Exhibit 19. Forecast of Employment Growth by Land Use Type, Tualatin Planning Area, 2020–2040

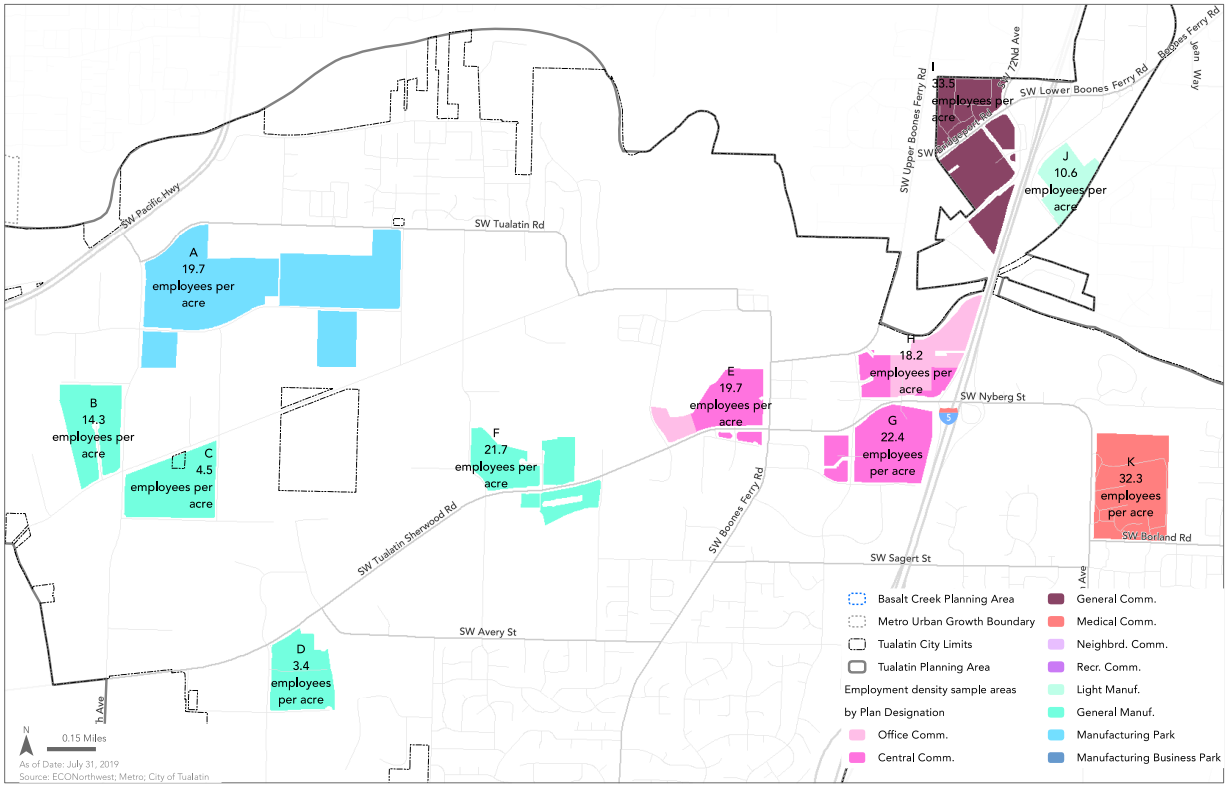
Source: ECONorthwest. Note: The shaded percentages denote an assumption about the future share of employment (as a percent of total) by land use type. It assumes that the share of employment by land use type will remain the same.

Land Use Type	2020		2040		Change
	Employment	% of Total	Employment	% of Total	2020 to 2040
Industrial	18,218	45%	24,004	45%	5,786
Retail Commercial	3,050	8%	4,018	8%	968
Office & Commercial Services	18,382	45%	24,219	45%	5,837
Government	829	2%	1,092	2%	263
Total	**40,478**	**100%**	**53,332**	**100%**	**12,854**

Estimate of Demand for Commercial and Industrial Land

Converting from employment growth to land need (in acres) requires assumptions about future employment densities. Employees per acre is a measure of employment density based on the ratio of the number of employees per acre of employment land that is developed for employment uses. Exhibit 20 displays sample sites that informed ECONorthwest's analysis of employment densities for businesses and sites in Tualatin based on existing employment. Results of the employment density analysis are summarized in Exhibit 21.

Exhibit 20. Employment Densities in Tualatin, Tualatin Sample Sites, 2019
Source: Bureau of Labor Statistics, Quarterly Census of Employment and Wage, 2017; analysis by ECONorthwest.



Based on a sampling of sites in Tualatin, industrial areas average about 15 employees per acre (EPA) and commercial areas average about 27 EPA.

Exhibit 21. Summary of Employment Average Employment Densities, Tualatin Planning Area, 2018

Source: Bureau of Labor Statistics, Quarterly Census of Employment and Wage; summarized by ECONorthwest. Note1: Area names (A through K) correspond to areas mapped in Exhibit 20. Note2: "EPA" is employees per acre.

Land Use Type/ Area Name on Map	Type of Use	Average density (EPA)
Industrial		15
A	Manufacturing Park	20
B	General Manufacturing	14
C	General Manufacturing	5
D	General Manufacturing	3
F	General Manufacturing	22
J	Light Manufacturing	11
Commercial and Retail		27
E	Office/Central Commercial	20
G	Central Commercial	22
H	Office/Central Commercial	18
I	General Commercial	34
K	Medical Commercial	32

Exhibit 22 shows demand for vacant (including partially vacant) land in Tualatin over the 20-year period. ECONorthwest uses two assumptions in Exhibit 22: (1) employment density and (2) net-to-gross conversion factor.

- **Employment density.** Exhibit 22 displays the density assumptions as net employees per acre (EPA) for use in the analysis of employment land demand. It assumes industrial will have an average of 15 EPA, retail commercial will have an average of 25 EPA, and office commercial will have an average of 40 EPA.

  These employment densities are consistent with Tualatin's historic densities and employment densities in Oregon cities of a similar size as Tualatin. Some types of employment will have higher employment densities (e.g., a multistory office building), and some will have lower employment densities (e.g., a convenience store with a large parking lot).

  This analysis assumes 15 EPA for industrial uses, as it is consistent with the EPA weighted average of industrial sample sites. This analysis assumes 25 EPA for retail, as it is consistent with the weighted average of sample site G, H, and I. This analysis assumes 40 EPA for office based on the assumption that Tualatin will encourage more two and three-story office buildings over the 20-year planning period (meaning we assume a higher employment density than historical).

- **Conversion from net-to-gross acres**. The data about employment density is in *net* acres, which does not include land for public right-of-way. Future land need for employment should include land in tax lots needed for employment plus land needed for public right-of-way. One way to estimate the amount of land needed for employment, including public right-of-way, is to convert from *net* to *gross* acres based on assumptions about the amount of land needed for public right-of-way.[18] A net-to-gross conversion is expressed as a percentage of gross acres that are in public right-of-way.

  Based on empirical evaluation of Tualatin's existing net-to-gross ratios, ECONorthwest uses a net-to-gross conversion factor of 9% for industrial and 27% for commercial.

Using these assumptions, the forecast for growth is 12,854 new employees. Exhibit 22 displays and accounts for 12,591 new employees, as government employees (263 employees) were deducted from the analysis of land demand. Tualatin will accommodate new government employees in institutional Plan Designations. The 12,591 new employees will result in the following demand for employment land: 424 gross acres of industrial land, 53 gross acres of retail commercial land, and 200 gross acres of office and commercial services land.

Exhibit 22. Demand for Land to Accommodate Employment Growth, Tualatin Planning Area, 2020–2040

Source: ECONorthwest.

Land Use Type	New Emp. on Vacant Land	Employees per Acre (Net Acres)	Land Demand (Net Acres)	Land Demand (Gross Acres)
Industrial	5,786	15	386	424
Retail Commercial	968	25	39	53
Office & Commercial Services	5,837	40	146	200
Total	**12,591**	**-**	**570**	**677**

Exhibit 23 shows land demand by general Plan Designation based on the existing distribution of employment in Exhibit 16. For example, Exhibit 23 assumes that 94% of growth in industrial employment (demand for 424 acres shown in Exhibit 22) will occur in industrial Plan Designations, with 4% in commercial Plan Designations and 3% in residential Plan Designations.

[18] OAR 660-024-0010(6) uses the following definition of net buildable acre. "Net Buildable Acre" consists of 43,560 square feet of residentially designated buildable land after excluding future rights-of-way for streets and roads. While the administrative rule does not include a definition of a gross buildable acre, using the definition above, a gross buildable acre will include areas used for rights-of-way for streets and roads. Areas used for rights-of-way are considered unbuildable.

Exhibit 23. Demand for Land to Accommodate Employment Growth by Generalized Plan Designation, Tualatin Planning Area, 2020–2040
Source: ECONorthwest.

Land Use Type	General Plan Designation				Total (Acre)
	Industrial	Commercial	Residential	Institutional	
Industrial	397	16	11	-	424
Retail, Office, & Com Services	51	170	31	1	253
Total (Acres)	**448**	**186**	**42**	**1**	**677**

Site Needs for Potential Growth Industries

OAR 660-009-0015(2) requires the EOA to "identify the number of sites by type reasonably expected to be needed to accommodate the expected [20-year] employment growth based on the site characteristics typical of expected uses." The Goal 9 rule does not specify how jurisdictions conduct and organize this analysis.

The rule, OAR 660-009-0015(2), does state that "[i]ndustrial or other employment uses with compatible site characteristics may be grouped together into common site categories." The rule suggests, but does not require, that the city "examine existing firms in the planning area to identify the types of sites that may be needed." For example, site types can be described by (1) plan designation (e.g., heavy or light industrial), (2) general size categories that are defined locally (e.g., small, medium, or large sites), or (3) industry or use (e.g., manufacturing sites or distribution sites). For purposes of the EOA, Tualatin groups its future employment uses into categories based on their need for land with a particular plan designation (i.e., industrial or commercial) and by their need for sites of a particular size.

Based on the forecast of employment growth in Exhibit 19 and the average business size of business in Tualatin in 2017 (using analysis of Quarterly Census of Employment and Wage data), employment growth in Tualatin will require:

- **Industrial** employment will grow by 5,785 employees, with 5,785 employees requiring buildable land. The average site of industrial employers in Tualatin in 2017 was 26 employees per business. At that average size, Tualatin will need 223 industrial sites. Exhibit 29 (in Chapter 4) shows that Tualatin has 697 sites for industrial development (with a total of 374 buildable acres of land). The majority of these sites (626 sites) are smaller than 0.5 acres. Tualatin has seven industrial sites between 10 and 20 acres and 2 industrial sites larger than 20 acres. These sites provide a range of sizes that may be needed by future industrial businesses in Tualatin.
- **Commercial** employment will grow by 6,805 employees, with 6,805 employees requiring buildable land. The average site of commercial employers in Tualatin in 2017 was 13 employees per business. At that average size, Tualatin will need 511 commercial sites. Exhibit 29 (in Chapter 4) shows that Tualatin has 149 sites for commercial development (with a total of 10.5 buildable acres of land). The majority of these sites (143 sites) are smaller than 0.5 acres. Tualatin has four commercial sites between 0.5 and 1 acre, one

commercial site between 1 and 2 acres, and one commercial site between 2 and 5 acres. Limited available sites will affect commercial development in Tualatin.

The potential growth industries described in the prior section are a mixture of business sizes, from small businesses to larger businesses. For the most part, Tualatin's potential growth industries need relatively flat sites, especially for industrial or manufacturing businesses with access to arterial roads to connect with I-5 or key employment centers in Beaverton, Hillsboro, and Portland.

Manufacturing and other industrial businesses that are likely to locate in Tualatin will have a range of space needs:

- **Small-scale manufacturing spaces.** Businesses would be located in an industrial building with many other users.
- **Space in flex-service buildings.** These businesses may locate in a building that includes other industrial businesses, as well as commercial businesses that prefer to locate in flex space buildings. Per a 2019 discussion with GPI, we find that vacancy rates in flex-service buildings are exceptionally low compared to more traditional employment spaces.
- **Mid-sized manufacturing**. Businesses would be located potentially in a building with a few other businesses. Between 2015 and 2019, Greater Portland Inc. (GPI) reported manufacturing projects in its pipeline that requested an average square footage between 35,000 square feet (approximately two to four-acre sites) and 118,000 square feet (approximately eight to 10-acre sites).[19] Average space needs (per square foot) have increased each year, between 2015 and 2019.

Retail, office, and commercial service businesses have a range of space needs ranging from:

- **Small- or mid-sized space**. Between 2015 and 2019, on average, GPI reported office projects seeking sites that range from about 14,045 square feet to about 39,000.
- **Space in a building dominated by one firm or in a building with many other businesses**. Some commercial employment will locate in a newly constructed building with other commercial businesses of all types. This could potentially be with other commercial (or light industrial) uses in the building. Other businesses may require or desire their own space.
- **Land for construction of a building designed for the firm.** However, in the case where the business needs to build a building, they are typically seeking existing space rather than land to build a new facility.

[19] Greater Portland Inc. (May 2019). "Almost Mid-Year Pipeline Analysis."

Overall, of the businesses included in GPI's 2019 pipeline analysis—both office and manufacturing projects consistently requested existing space over "greenfield" space for their facility. In 2019, about 33% requested either greenfield space, up from 21% in 2017.

4. Buildable Lands Inventory

This chapter provides a summary of the commercial and industrial buildable lands inventory (BLI) for the Tualatin Planning Area. The buildable lands inventory analysis complies with Statewide Planning Goal 9 policies that govern planning for employment uses. The detailed methodology used to complete the buildable lands inventory completed is presented in Appendix B.

The analysis established the employment land base (parcels or portions of parcels with appropriate zoning), classified parcels by buildable status, identified/deducted environmental constraints, and summarized total buildable area by Plan Designation.

Definitions

ECONorthwest developed the buildable lands inventory with a tax lot database from Metro Regional Land Information Systems (RLIS). Maps produced for the buildable lands inventory used a combination of GIS data based on the Metro BLI for the 2018 Urban Growth Report, adopted maps, and used visual verification to verify the accuracy of Metro data. The tax lot database is current as of 2016, accounting for changes and development updates through April 2019. The inventory builds from the database to estimate buildable land per Plan Designations that allow employment uses. The following definitions were used to identify buildable land for inclusion in the inventory:

- *Vacant land.* Tax lots designated as vacant by Metro based on the following criteria: (1) fully vacant based on Metro aerial photo; (2) tax lots with less than 2,000 square feet developed and the developed area is less than 10% of lot; and (3) lots 95% or more vacant from GIS vacant land inventory.
- *Partially vacant land.* Tax lots located on land designated for employment uses but have an existing single-family structure. These lots are assumed to likely develop with an employment use within the planning period.
- *Potentially redevelopable land.* Lots determined to have redevelopment capacity based on Metro's threshold price methodology. This method identifies lots that meet size and price thresholds based on location in the Metro UGB and Plan Designation. The methods use property value thresholds where it is economically viable for a lot to redevelop. For example, if the unconstrained area of tax lot in a central commercial Plan Designation is greater than 0.249 acres, and the real market value per square foot is below $12, then the unconstrained acreage is considered as potentially redevelopable.
- *Public or exempt land.* Lands in public or semi-public ownership are considered unavailable for commercial or industrial development. This includes lands in federal, state, county, or city ownership as well as lands owned by churches and

other semi-public organizations and properties with conservation easements. These lands are identified using Metro's definitions and categories.

- *Developed land*. Lands not classified as vacant, partially vacant, or public/exempt are considered developed. Developed land includes lots with redevelopment capacity, which are also included in BLI. The capacity of developed but redevelopable lots is based on Metro's estimates.

Development Constraints

Consistent with state guidance on buildable lands inventories, ECONorthwest deducted the following constraints from the buildable lands inventory and classified those portions of tax lots that fall within the following areas as constrained, unbuildable land:

- *Lands within floodplains*. Flood insurance rate maps from the Federal Emergency Management Agency (FEMA) were used to identify lands in floodways and 100-year floodplains, as well as lands identified in Metro's Title 3 Stream and Floodplain Protection Plan.
- *Land within natural resource protection areas*. The Locally Significant Wetlands shapefile was used to identify areas within wetlands. Riparian corridors and other natural resource areas identified in Tualatin's Natural Resource Protection Overlay District were all considered undevelopable. These areas are consistent with chapter 72 of the City's Development Code.
- *Land with slopes over 15%*. Lands with slopes over 15% are considered unsuitable for commercial or industrial development.

Buildable Lands Inventory Results

Land Base

Exhibit 24 shows commercial and industrial land in Tualatin by classification (development status). The results show that the Tualatin Planning Area has 2,731 total acres in commercial or industrial Plan Designations. Of these 2,731 acres, about 1,534 acres (56%) are classified as developed or public (or exempt) and do not have development capacity, about 683 acres (25%) are on lots classified as potentially redevelopable, and the remaining 514 acres (19%) are vacant or partially vacant and have development capacity (not including development constraints).

Vacant Buildable Land

Exhibit 26 shows buildable acres (e.g., acres in tax lots after constraints are deducted) for vacant and partially vacant land by Plan Designation. Of Tualatin's 385 unconstrained buildable commercial or industrial acres, about 82% of the land is in tax lots classified as vacant, and 18% is in tax lots classified as partially vacant. About 28% of Tualatin's buildable commercial and industrial land is located in the Basalt Creek Planning Area.

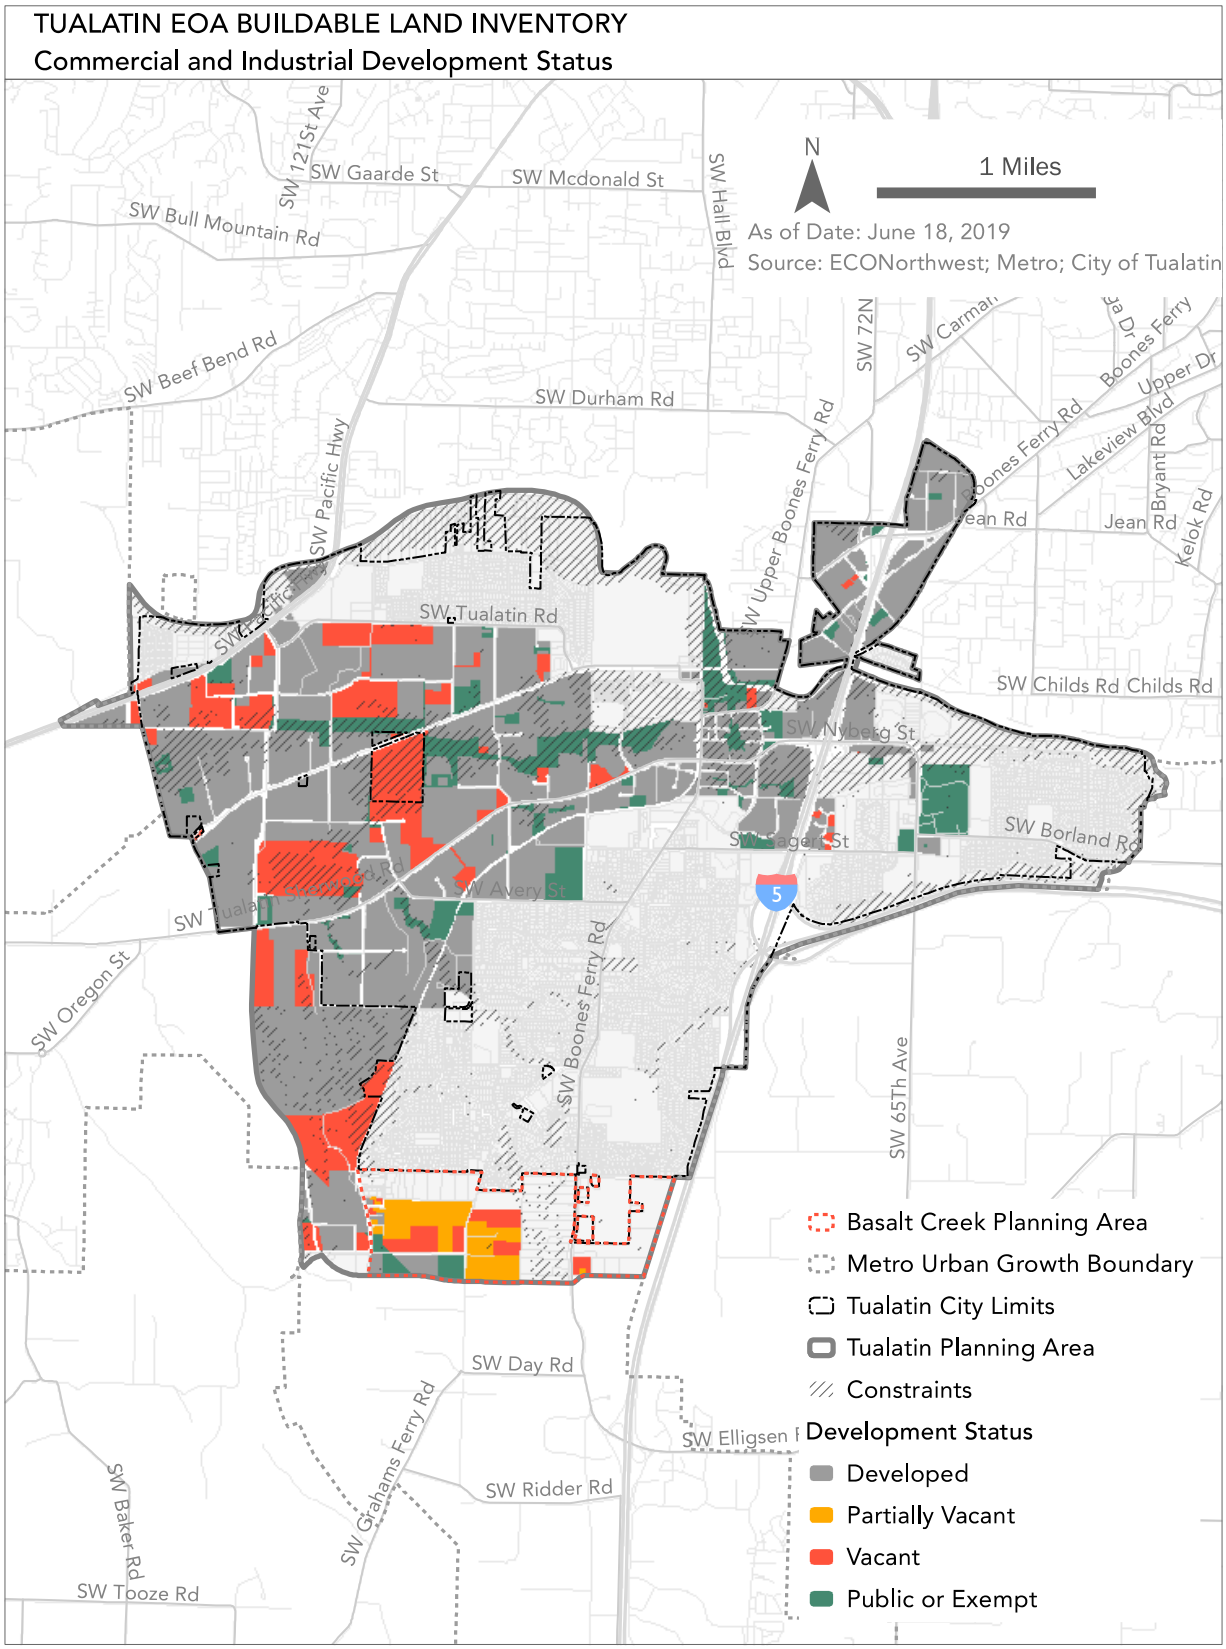

Exhibit 28. Unconstrained Vacant and Partially Vacant Commercial and Industrial Land, Tualatin Planning Area, 2019

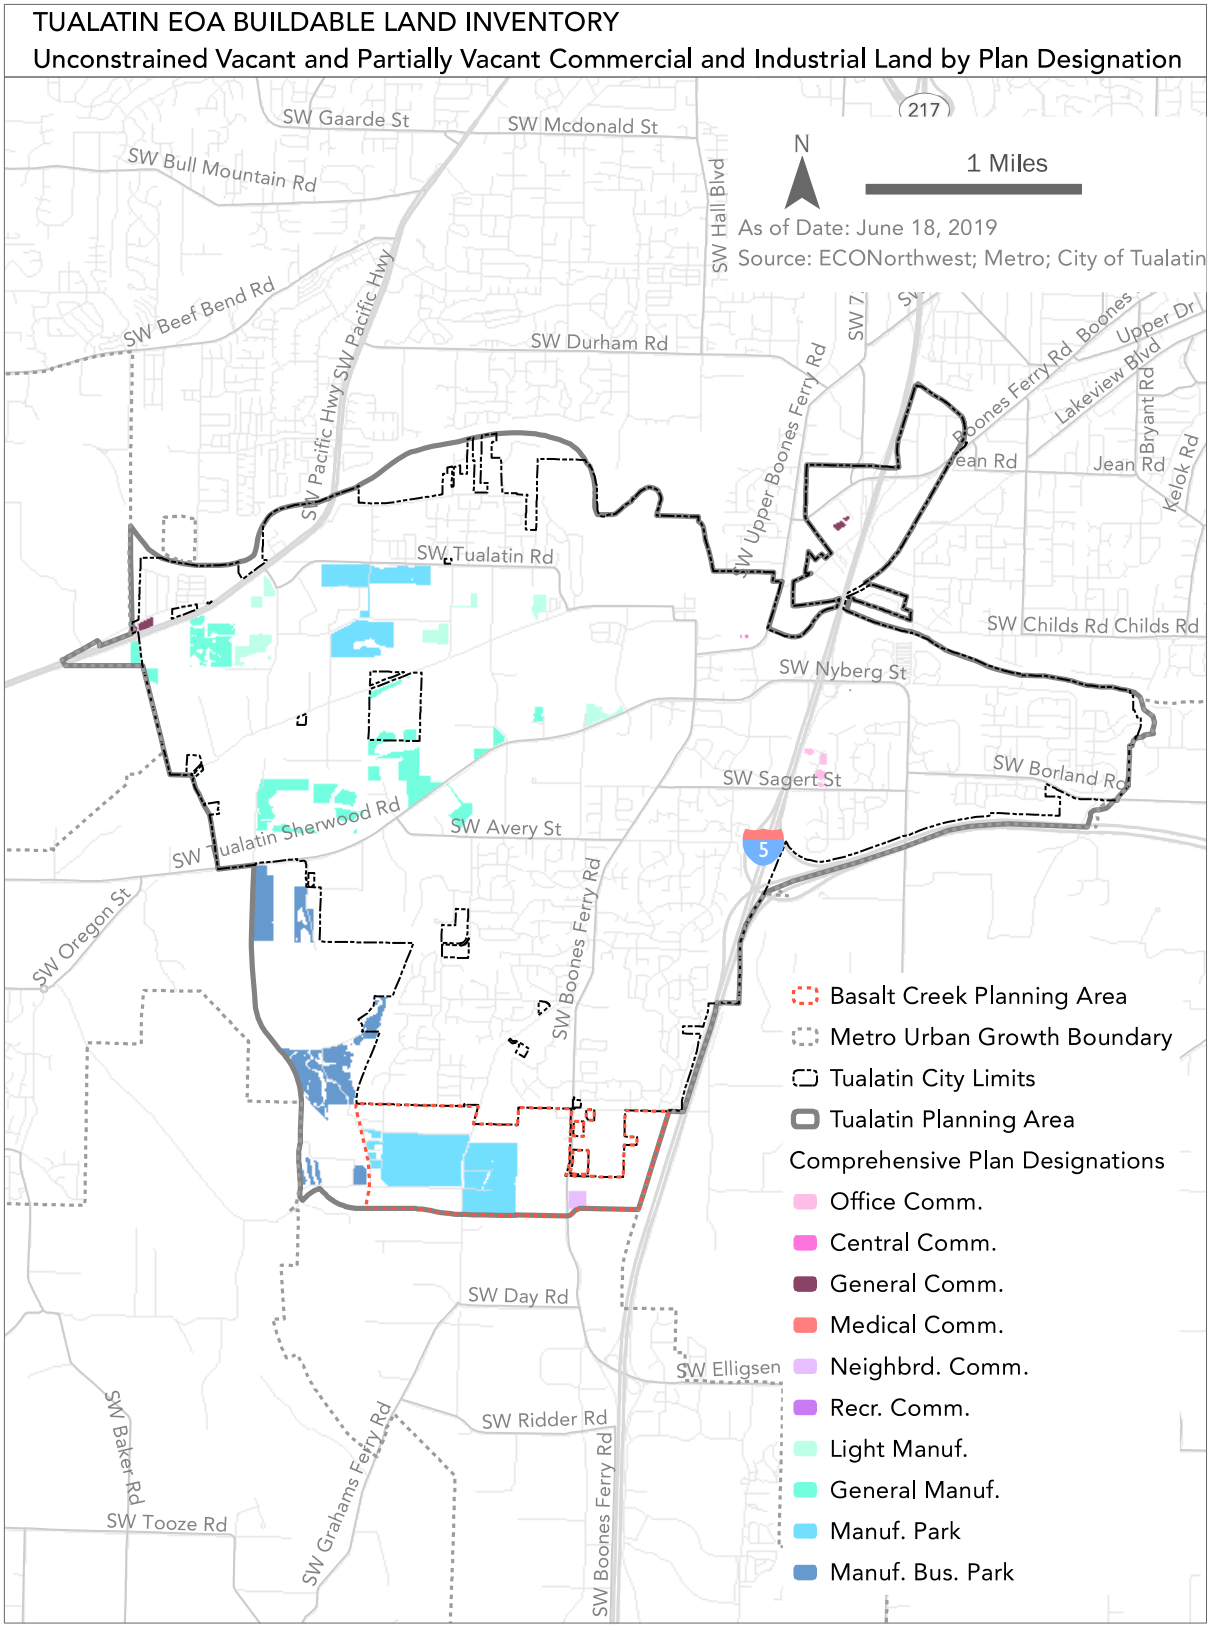

Exhibit 29 shows the size of lots by Plan Designations for buildable employment land. Tualatin has:

- 24 lots that are smaller than 0.5 acres (with 4.7 acres of land),
- 9 lots between 0.5 and 1 acres (6.3 acres of land),
- 13 lots between 1 and 2 acres (19.6 acres of land),
- 35 lots between 2 and 5 acres in size (132 acres of land),
- 11 lots between 5 and 10 acres in size (81 acres of land),
- 7 lots between 10 and 20 acres in size (95.5 acres of land), and
- 2 lots 20 acres or more in size (45.3 acres of land).

Redevelopment Potential

Over the 20-year study period a portion of developed lots are likely to redevelop within new buildings. To account for the development capacity on these developed lots, Metro identifies a subset of developed lots as "redevelopable." Metro has created two "filters" to identify lots with the potential to redevelop.

- **Threshold Method.** This method identifies lots that meet size and price thresholds based on location in the Metro UGB and Plan Designation. The method uses property value thresholds where it is economically viable for a lot to redevelop. For example, if the *unconstrained* area of a tax lot in a central commercial Plan Designation is greater than 0.249 acres, and the real market value per square foot is below $12, then the unconstrained acreage is considered as potentially redevelopable.[20]
- **Historic Probability Method.** This method determines the probably of a lot redeveloped based on a statistical analysis of lots that historically redeveloped within the region. The probability for each lot is multiplied by the total zoned capacity of the lot to determine the likely future capacity.

For the Tualatin BLI, ECONorthwest proposes to use redevelopable acreage identified based on the threshold method, a recommendation that is based on discussion with Metro staff. Exhibit 30Exhibit 11 shows the estimate of potentially redevelopable acreage by Plan Designation.

Basalt Creek Planning Area	
Manufacturing Park	15
Neighborhood Commercial	0
Total	**297**

The analysis of redevelopment in Exhibit 30Exhibit 11 is based on analysis of existing land values (i.e., the threshold method). In considering likely commercial and industrial redevelopment that may occur over the next 20 years, stakeholders discussed the possibility of change of use (and redevelopment) of the gravel pit in the southwest area of the city, zoned Manufacturing Business Park. This area is classified as "committed" in the buildable lands inventory. The six tax lots in the gravel pit are a total size of 181 acres with about 47 constrained acres, mostly due to steep slopes and wetlands. When mining ceases in the gravel pit, which may or may not occur in the 20-year planning period, the gravel pit may be redevelopable and available for new employment uses.

5. Land Sufficiency and Conclusions

This chapter presents conclusions about Tualatin's employment land sufficiency for the 2020–2040 period. The chapter then concludes with a discussion about Tualatin's land base and its ability to accommodate growth over the next 20 years, as well as recommendations for the City to consider, ensuring it meets its economic growth needs throughout the planning period.

Land Sufficiency

Exhibit 31 shows commercial and industrial land sufficiency within the Tualatin Planning Area. It shows:

- **Capacity of Land** (supply) within the Tualatin Planning Area (see Exhibit 26). Exhibit 31 shows that Tualatin has 374 gross acres of industrial land and 11 gross acres of commercial land.
- **Demand for Commercial and Industrial Land** in the Tualatin Planning Area (see Exhibit 22 and Exhibit 23). Exhibit 31 shows Tualatin will need a total of 448 gross acres for industrial uses and 186 gross acres for commercial uses (including retail and office) over the 2020–2040 period.

Exhibit 31 shows that Tualatin has:

- A 74-acre deficit of industrial land in the Tualatin Planning Area.
- A 175-acre deficit of commercial land (including retail and office) in the Tualatin Planning Area.

Exhibit 31. Comparison of the Capacity of Land with Employment Land Demand by Land Use Type, Tualatin Planning Area, 2020–2040

Source: ECONorthwest. Note: Employment demand requires an additional 42 gross acres on land in residential Plan Designations and one gross acre on land in an institutional (public) Plan Designation.

General Plan Designation	Land Supply (Suitable Gross Acres)	Land Demand (Gross Acres)	Land Sufficiency (Deficit)
Industrial	374	448	(74)
Commercial (incl Retail and Office)	11	186	(175)

Conclusions and Recommendations

The conclusions about commercial and industrial land sufficiency in Tualatin are:

- **Tualatin is expected to have job growth in commercial and industrial sectors over the 20-year period.** Tualatin is forecast to grow by about 12,591 new employees (excluding new government employees) over the 2020–2040 period, with about 5,800 new industrial employees and 6,800 new employees in retail, office, and commercial services, with the remaining employees in government.
- **Tualatin has a deficit of land to accommodate new employment growth.** Tualatin has a deficit of about 74 acres of land in industrial Plan Designations and 175 acres of employment in commercial Plan Designations to accommodate employment. Tualatin will need to consider policies to increase the efficiency of employment land use within the city, such as policies to encourage denser employment development and redevelopment that results in higher-density development.
- **Tualatin has substantial redevelopment potential.** A majority of redevelopable lots are in industrial areas. For example, change of use (and redevelopment) of the gravel pit in the southwest area of the Manufacturing Business Park presents substantial redevelopment opportunities. The six tax lots in the gravel pit are a total size of 181 acres with about 47 constrained acres, mostly due to steep slopes and wetlands. When mining ceases in the gravel pit, which may or may not occur in the 20-year planning period, the gravel pit may be redevelopable and available for new employment uses.
- **Tualatin's primary comparative advantages for economic development are its location along the I-5 corridor and proximity to urban and cultural amenities/services in the Portland Region, making Tualatin an attractive place for businesses to locate.** Tualatin has advantages through its access to the regional labor market and the region's growing labor force comprising diverse skill sets.
- **Tualatin will need to address transportation capacity issues to accommodate growth, particularly along regional connectors (roads and avenues).** Traffic congestion is a substantial issue in Tualatin and surrounding areas, making it difficult to commute to Tualatin from other cities within the Portland Region and within Tualatin. Stakeholders are concerned that additional employment growth will make congestion substantially worse.
- **New employment will require additional urban infrastructure.** Growth in Basalt Creek will prompt the need for new pipes, pump stations, and potentially another reservoir to accommodate water and wastewater capacity demands in the sub-area. If Tualatin wishes to accommodate businesses that are more water-intensive, Tualatin will need to look to new or additional water supplies.

Following is a summary of ECONorthwest's recommendations to Tualatin based on the analysis and conclusions in this report. The *Tualatin Economic Development Strategy* memorandum presents the full list of recommendations for Tualatin.

- **Ensure that Tualatin has enough land to accommodate expected employment growth and that land has infrastructure to support employment growth.** Tualatin should identify opportunities to support mixed-use development (especially development that includes commercial and residential uses) to accommodate employment growth, especially commercial employment growth. The City should identify opportunities to make more efficient use of employment land, such as limiting development of businesses that have large land requirements and little employment (such as distribution). In addition, the City should work with landowners to get key employment sites certified as "shovel ready" to speed the development process.
- **Identify opportunities for redevelopment, especially mixed-use redevelopment.** The City has a substantial deficit of industrial and commercial land. The City may be able to address some or most of this deficit within the existing planning area (without a UGB expansion). To do so, the City should identify districts for redevelopment, such as mixed-use development. This planning includes revising the Tualatin Town Center Plan to focus on opportunities to support redevelopment, identify tools to support redevelopment, and identify areas appropriate for more intense industrial uses (e.g., redevelopment of the gravel pit in the southwest area of the city once mining activity has ceased).
- **Grow jobs and businesses in Tualatin by supporting business retention, growth, and attraction.** The first step in growing jobs and businesses in Tualatin is revising the economic development strategy, including developing a clear vision for economic development in Tualatin, and creating an action plan to implement the vision. The revised strategy can build on the *Tualatin Economic Development Strategy* produced as part of this analysis, but the revised strategy should include a detailed action plan to implement the newly developed vision for economic development. In revising the strategy, the City should identify partnerships and incentive programs to grow, retain, and attract businesses as well as support entrepreneurial businesses in Tualatin.
- **Ensure that the City connects planning for economic development with other community planning.** Throughout the project, stakeholders emphasized the need to coordinate economic development planning with housing, transportation planning, and other community planning. Updates to the Tualatin Transportation System Plan should be coordinated with planning for employment and business growth. A key approach to accommodating new commercial development is redevelopment that results in mixed-use districts, providing opportunities for more housing affordable to people working at businesses in Tualatin and living closer to work (thus reducing transportation issues). In addition, stakeholders would like to see the incorporation of services needed to meet daily needs of residents of neighborhoods without driving.

The *Tualatin Economic Development Strategy* memorandum presents more details about each of these topics and recommendations for specific actions to implement these recommendations.

Appendix A. National, State, and Regional and Local Trends

National Trends

Economic development in Tualatin over the next 20 years will occur in the context of long-run national trends. The most important of these trends include:

- **Economic growth will continue at a moderate pace**. Analysis from the Congressional Budget Office (CBO) predicts real GDP to grow by 3.1% in 2018 and 2.4% in 2019, while settling just under 2% growth for the rest of the decade (through 2028), assuming current laws remain intact.[21]

  The unemployment rate is expected to decrease to 3.6% by the end of 2018 and fall to 3.4% in 2019. Thereafter, the CBO predicts the unemployment rate will rise to 3.8% in 2020 and approach 4.8% through the end of the forecast period (2028).[22]

  As demand for labor increases and market competition for workers pushes the growth of hourly wage compensation, the CBO projects that "the increase in labor compensation, [will dampen] demand for labor, slowing employment growth and, by 2020, diminishing the positive employment gaps."[23]

- **The aging of the Baby Boomer generation accompanied by increases in life expectancy.** As the Baby Boomer generation continues to retire, the number of Social Security recipients is expected to increase from 61 million in 2017 to over 86 million in 2035, a 41% increase. However, due to lower-birth rate replacement generations, the number of covered workers is only expected to increase 9% over the same time period, from 174 million to almost 190 million in 2035. Currently, there are 35 Social Security beneficiaries per 100 covered workers in 2014, but by 2035, there will be 46 beneficiaries per 100 covered workers. This will increase the percent of the federal budget dedicated to Social Security and Medicare.[24]

  Baby Boomers are expecting to work longer than previous generations. An increasing proportion of people in their early- to mid-50s expect to work full-time after age 65. In 2004, about 40% of these workers expect to work full-time after age 65, compared with

[22] *Ibid*.

[23] *Ibid*.

[24] The Board of Trustees, Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds, 2015, the *2018 Annual Report of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds*, June 5, 2018. Retrieved from: https://www.ssa.gov/oact/tr/2018/tr2018.pdf.

about 30% in 1992.[25] This trend can be seen in Oregon, where the share of workers 65 years and older grew from 2.9% of the workforce in 2000 to 4.1% of the workforce in 2010. In 2017, this share reached 5.5%, or a 90% increase over the 2000–2017 period. Over the same seventeen-year period, workers 45 to 64 years increased by about 7%.[26]

- **The population identifying as Latinx will continue to grow and be an important driver in the economy.** The U.S. Census projects that by about 2040, the Latinx population will account for one-quarter of the nation's population. The share of Latinx population in the western United States is likely to be higher. The Latinx population currently accounts for about 16% of Tualatin's population. In addition, the Latinx population is generally younger than the U.S. average, with many Latinx individuals belonging to the Millennial generation.
- **Need for replacement workers.** The need for workers to replace retiring Baby Boomers will outpace job growth. According to the Bureau of Labor Statistics, total employment in the United States will grow by about 11.5 million jobs over 2016 to 2026. Annually, they estimate there will be 18.7 million occupational openings over the same period. This exhibits the need for employees over the next decade, as the quantity of openings per year is large relative to expected employment growth. About 71% of annual job openings are in occupations that do not require postsecondary education.[27]
- **The importance of education as a determinant of wages and household income.** According to the Bureau of Labor Statistics, a majority of the fastest growing occupations will require an academic degree, and on average, they will yield higher incomes than occupations that do not require an academic degree. The fastest-growing occupations requiring an academic degree will be registered nurses, software developers, general and operations managers, accountants and auditors, market research analysts and marketing specialists, and management analysts. Occupations that do not require an academic degree (e.g., retail salespeople, food preparation workers, and home care aides) will grow, accounting for approximately 71% of all new jobs by 2026. These occupations typically have lower pay than occupations requiring an academic degree.[28]

  The national median income for people over the age of 25 in 2017 was about $47,164. Workers without a high school diploma earned $20,124 less than the median income, and workers with a high school diploma earned $10,140 less than the median income. Workers with some college earned $6,916 less than median income, and workers with a bachelor's degree earned $13,832 more than median. Workers in Oregon experience the

[28] "Occupational Employment Projections to 2016–2026," Bureau of Labor Statistics, 2018.

same patterns as the nation, but pay is generally lower in Oregon than the national average.[29]

- **Increases in labor productivity.** Productivity, as measured by output per hour of labor input, increased in most sectors between 2000 and 2010, peaking in 2007. However, productivity increases were interrupted by the recession. After productivity decreases from 2007 to 2009, many industries saw large productivity increases from 2009 to 2010. Industries with the fastest productivity growth were information technology–related industries. These include wireless telecommunications carriers, computer and peripheral equipment manufacturing, electronics and appliance stores, and commercial equipment manufacturing wholesalers.[30]

  Since the end of the recession (or 2010), labor productivity has increased across a handful of large sectors but has also decreased in others. In wholesale trade, productivity—measured in output per hour—increased by 19% over 2009 to 2017. Retail trade gained even more productivity over this period at 25%. Food services, however, have remained stagnant since 2009, fluctuating over the nine-year period and shrinking by 0.01% over this time frame. Additionally, the Bureau of Labor Statistics reports that multifactor productivity in manufacturing has been slowing down 0.3% per year over the 2004–2016 period. Much of this, they note, is due to slowdown in semiconductors, other electrical component manufacturing, and computer and peripheral equipment manufacturing.[31]

- **The importance of entrepreneurship and growth in small businesses.** According to the 2018 Small Business Profile from the US Small Business Office of Advocacy, small businesses account for over 99% of total businesses in the United States, and their employees account for nearly 50% of American workers.[32] The National League of Cities suggests ways that local governments can attract entrepreneurs and increase the number of small businesses, including strong leadership from elected officials; better communication with entrepreneurs, especially about the regulatory environment for businesses in the community; and partnerships with colleges, universities, small business development centers, mentorship programs, community groups, businesses groups, and financial institutions.[33]

- **Increases in automation across sectors.** Automation is a long-running trend in employment, with increases in automation (and corresponding increases in productivity) over the last century and longer. The pace of automation is increasing, and the types of jobs likely to be automated over the next 20 years (or longer) is broadening. Lower-paying jobs are more likely to be automated, with potential for automation of more than 80% of jobs paying less than $20 per hour over the next 20 years. About 30% of jobs paying $20 to $40 per hour and 4% of jobs paying $40 or more are at risk of being automated over the next 20 years.[34]

  Low- to middle-skilled jobs that require interpersonal interaction, flexibility, adaptability, and problem solving will likely persist into the future, as will occupations in technologically lagging sectors (e.g., production of restaurant meals, cleaning services, hair care, security/protective services, and personal fitness).[35] This includes occupations such as recreational therapists; first-line supervisors of mechanics, installers, and repairers; emergency management directors; mental health and substance abuse social workers; audiologists; occupational therapists; orthotists and prosthetists; health-care social workers; oral and maxillofacial surgeons; and first-line supervisors of firefighting and prevention workers. Occupations in the service and agricultural or manufacturing industry are most at risk of automation because of the manual-task nature of the work.[36,37,38] This includes occupations such as telemarketers; title examiners, abstractors, and searchers; hand sewers; mathematical technicians; insurance underwriters; watch repairers; cargo and freight agents; tax preparers; photographic process workers and processing machine operators; and accounts clerks.[39]

- **Consolidation of Retail.** Historical shift in retail businesses, starting in the early 1960s, was the movement from one-off mom-and-pop shops toward superstores and the clustering of retail into centers or hubs. Notably, we still see this trend persist. For example, in 1997, the 50 largest retail firms accounted for about 26% of retail sales, and by 2007, they accounted for about 33%.[40] The more recent shift began in the late 1990s, where technological advances have provided consumers with the option to buy goods through e-commerce channels. The trend toward e-commerce has become increasingly

preferential to Millennials and Generation Xers, who are easier to reach online and are more responsive to digital ads than older generations.[41] Since 2000, e-commerce sales have grown from 0.9% to 6.4% (2014) and are forecast to reach 12% by 2020. It is reasonable to expect this trend to continue. With it has come closures of retail stores. By 2027, for example, an estimated 15% of about 1,050 U.S. malls in smaller markets will close, impacting local employment levels, local government revenue streams (tax dollars), and neighborhood character.

While it is unclear what impact e-commerce will have on employment and brick-and-mortar retail, it seems probable that e-commerce sales will continue to grow, shifting business away from some types of retail. Over the next decades, communities must begin considering how to redevelop and reuse retail buildings in shopping centers, along corridors, and in urban centers.

The types of retail and related services that remain will likely be sales of goods that people prefer to purchase in person or that are difficult to ship and return (e.g., large furniture), specialty goods, groceries and personal goods that maybe needed immediately, restaurants, and experiences (e.g., entertainment or social experiences).

- **The importance of high-quality natural resources.** The relationship between natural resources and local economies has changed as the economy has shifted away from resource extraction. High-quality natural resources continue to be important in some states, especially in the western United States. Increases in the population and in household incomes, plus changes in tastes and preferences, have dramatically increased demand for outdoor recreation, scenic vistas, clean water, and other resource-related amenities. Such amenities contribute to a region's quality of life and play an important role in attracting both households and firms.[42]
- **Continued increase in demand for energy.** Energy prices are forecast to increase over the planning period. While energy use per capita is expected to decrease through 2050, total energy consumption will increase with rising population. Energy consumption is expected to grow primarily from industrial (0.9%) and, to a lesser extent, commercial users (0.4%). Residential consumption is forecast to stagnate (0.0%), and transportation will slightly decrease (-0.1%). This decrease in energy consumption for transportation is primarily due to increased federal standards and increased technology for energy efficiency in vehicles. Going forward through the projection period, potential changes in federal laws (such as decreases in car emissions) leave energy demand somewhat uncertain.

[42] For a more thorough discussion of relevant research, see Power, T.M. and R.N. Barrett. 2001. *Post-Cowboy Economics: Pay and Prosperity in the New American West*. Island Press, and Kim, K.-K., D.W. Marcouiller, and S.C. Deller. 2005. "Natural Amenities and Rural Development: Understanding Spatial and Distributional Attributes." *Growth and Change* 36 (2): 273–297.

Energy consumption by type of fuel is expected to change over the planning period. In 2050, the United States will be continuing to shift from crude oil toward natural gas and renewables. For example, from 2017 to 2050, the Energy Information Administration projects that the United States' overall energy consumption will average a 0.4% annual growth rate, while consumption of renewable sources will grow by 1.4% per year. With increases in energy efficiency, strong domestic production of energy, and relatively flat demand for energy by some industries, the United States will be able to be a net exporter of energy over the 2017–2050 period. Demand for electricity is expected to increase, albeit slowly, over the 2017–2050 period as the population grows and economic activity increases.[43]

- **Impact of rising energy prices on commuting patterns.** As energy prices increase over the planning period, energy consumption for transportation will decrease. These increasing energy prices may decrease willingness to commute long distances, though with expected increases in fuel economy, it could be that people commute further while consuming less energy.[44] Over 2019 to 2035, the U.S. Energy Information Administration estimates that the decline in transportation energy consumption, a result of increasing fuel economy, will more than offset the total growth in vehicle miles traveled (VMT). VMT for passenger vehicles is forecast to increase through 2050.
- **Potential impacts of global climate change.** The consensus among the scientific community that global climate change is occurring expounds important ecological, social, and economic consequences over the next decades and beyond.[45] Extensive research shows that Oregon and other western states already have experienced noticeable changes in climate and predicts that more change will occur in the future.[46]

  In the Pacific Northwest, climate change is likely to (1) increase average annual temperatures, (2) increase the number and duration of heat waves, (3) increase the amount of precipitation falling as rain during the year, (4) increase the intensity of rainfall events, (5) increase sea level, (6) increase wildfire frequency, and (7) increase

forest vulnerability to tree disease.[47] These changes are also likely to reduce winter snowpack and shift the timing of spring runoff earlier in the year.[48]

These anticipated changes point toward some of the ways that climate change is likely to impact ecological systems and the goods and services they provide. There is considerable uncertainty about how long it would take for some of the impacts to materialize and the magnitude of the associated economic consequences. Assuming climate change proceeds as today's models predict, however, some of the potential economic impacts of climate change in the Pacific Northwest will likely include:[49]

- *Potential impact on agriculture and forestry.* Climate change may impact Oregon's agriculture through changes in growing season, temperature ranges, and water availability.[50] Climate change may impact Oregon's forestry through an increase in wildfires, a decrease in the rate of tree growth, a change in the mix of tree species, and increases in diseases and pests that damage trees.[51]
- *Potential impact on tourism and recreation.* Impacts on tourism and recreation may range from (1) decreases in snow-based recreation if snow-pack in the Cascades decreases, (2) negative impacts to tourism along the Oregon Coast as a result of damage and beach erosion from rising sea levels,[52] (3) negative impacts on availability of summer river recreation (e.g., river rafting or sports fishing) as a result of lower summer river flows, and (4) negative impacts on the availability of water for domestic and business uses.

[49] The issue of global climate change is complex, and there is a substantial amount of uncertainty about climate change. This discussion is not intended to describe all potential impacts of climate change but to present a few ways that climate change may impact the economy of cities in Oregon and the Pacific Northwest.

[50] "The Economic Impacts of Climate Change in Oregon: A Preliminary Assessment," Climate Leadership Initiative, Institute for Sustainable Environment, University of Oregon, October 2005.

Short-term national trends will also affect economic growth in the region, but these trends are difficult to predict. At times, these trends may run counter to the long-term trends described above. A recent example is the downturn in economic activity in 2008 and 2009 following declines in the housing market and the mortgage banking crisis. The result of the economic downturn was decreases in employment related to the housing market, such as construction and real estate. As these industries recover, they will continue to play a significant role in the national, state, and local economy over the long run. This report takes a long-run perspective on economic conditions (as the Goal 9 requirements intend) and does not attempt to predict the impacts of short-run national business cycles on employment or economic activity.

State Trends

Short-Term Trends

According to the Oregon Office of Economic Analysis (OEA), the Oregon economy "continues to hit the sweet spot."[53] They also report, "job gains are enough to match population growth and absorb the workers coming back into the labor market. Wages are rising faster than in the typical state, as are household incomes."[54] Though they note recent growth is slower than growth experienced several years ago.

Wages in Oregon continue to remain below the national average, but they are at their highest since the early 1980s. The OEA reports that new Oregon Employment Department research "shows that median hourly wage increases for Oregon workers since 2014 has been 3.1 percent annually for the past three years."[55] These wage increases are "substantially stronger for the Oregonians who have been continually employed over the last three years."[56]

By the end of 2018, the OEA forecasts 41,700 jobs will be added to Oregon's economy. This is an approximate 2.2% annual growth in total nonfarm employment relative to 2017 levels.[57] The leisure and hospitality, construction, professional and business services, and health services industries are forecast to account for well over half of the total job growth in Oregon for 2018. Oregon continues to have an advantage in job growth compared to other states, due to its industrial sector and in-migration flow of young workers in search of jobs.

The housing market continues to recover as Oregon's economy improves. Oregon is seeing an increase in household formation rates, which is good for the housing market, as this will "help drive up demand for new houses."[58] Though younger Oregonians are tending to live at home

[53] Office of Economic Analysis. Oregon Economic and Revenue Forecast, September 2018. Vol. XXXVIII, No. 3, page 2.

[55] *Ibid*, page 5.

[56] *Ibid*, page 5.

[57] *Ibid*, page 13.

[58] *Ibid*, page 13.

with their parents longer, the aging Millennial generation (from their early 20s to mid-to-late 30s) and the state's increase in migration will drive demand for homes in the coming years. Housing starts in 2018 are on track to just under 22,000 units annually. This is "driven in large part by a decline in multifamily permit activity."[59] Through 2020, the OEA forecasts moderate to strong housing growth. Beyond this time frame, the OEA forecasts an average growth of 24,000 units per year to satisfy the demand for Oregon's growing population and to make up for the under development of housing post-recession.[60]

The Oregon Index of Leading Indicators (OILI) has grown quite rapidly since January 2017. The leading indicators showing improvement are consumer sentiment, industrial production, initial claims, the manufacturing purchasing managers index (PMI), new incorporations, semiconductor billings, and withholdings. The indicators that are slowing include air freight and the Oregon Dollar Index, and the indicators not improving include help wanted ads and housing permits.[61]

Oregon's economic health is dependent on the export market. The value of Oregon exports in 2017 was $21.9 billion. The countries that Oregon exports the most to are China (18% of total Oregon exports), Canada (11%), Malaysia (11%), South Korea (9%), Japan (8%), and Vietnam (7%).[62] With straining trade relations overseas, specifically with China, Oregon exports are left potentially vulnerable, as China is a top destination for Oregon exports.[63] An economic slowdown across many parts of Asia will have a spillover effect on the Oregon economy. Furthermore, with the United States' withdrawal from the Trans-Pacific Partnership in January 2017, it is unclear how much Pacific Northwest trade will be impacted in the years to come.

Long-Term Trends

State, regional, and local trends will also affect economic development in Tualatin over the next 20 years. The most important of these trends includes continued in-migration from other states, distribution of population and employment across the state, and change in the types of industries in Oregon.

- **Continued in-migration from other states.** Oregon will continue to experience in-migration (more people moving to Oregon than from Oregon) from other states, especially California and Washington. From 1990 to 2017, Oregon's population increased by about 1.3 million, 66% of which was from people moving into Oregon (net migration). The average annual increase in population from net migration over the same time period was just over 33,200. During the early to mid-1990s, Oregon's net migration

[59] *Ibid*, page 13.

[60] *Ibid*, page 13.

[61] *Ibid*, page 10.

[62] U.S. Census Bureau. State Exports from Oregon, 2014–2017. Retrieved from: https://www.census.gov/foreign-trade/statistics/state/data/or.html.

[63] Office of Economic Analysis. Oregon Economic and Revenue Forecast, September 2018. Vol. XXXVIII, No. 3, page 14.

was highest, reaching over 60,000 in 1991, with another smaller peak of almost 42,100 in 2006. In 2017, net migration reached just over 56,800 persons. Oregon has not seen negative net migration since the early to mid-1980s.[64] Oregon's population has continued to get more ethnically and racially diverse, with Latinx populations growing from 8% of the population in 2000 to 13% of the population in 2013–2017. The nonwhite population grew from 13% of the population to 15% of the population over the same period. The share of Latinx population increased in Tualatin from 2000 to 2013–2017 while the share of the nonwhite population stayed the same.

- **Forecast of job growth.** Total nonfarm employment is expected to increase from 1.91 million in 2018 to just over 1.99 million in 2022, an increase of 80,000 jobs. The industries with the largest growth are forecast to be professional and business services, health services, and retail, accounting for 61% of employment growth.[65]
- **Continued importance of manufacturing to Oregon's economy.** Oregon's exports totaled $19.4 billion in 2008, nearly doubling since 2000, and reached almost $22 billion in 2017. The majority of Oregon exports go to countries along the Pacific Rim, with China, Canada, Malaysia, South Korea, and Japan as top destinations. Oregon's largest exports are tied to high-tech and mining industries, as well as agricultural products.[66] Manufacturing employment is concentrated in five counties in the Willamette Valley or Portland area: Washington, Multnomah, Lane, Clackamas, and Marion Counties.[67]
- **Shift in manufacturing from natural resource-based to high-tech and other manufacturing industries.** Since 1970, Oregon has been transitioning away from reliance on traditional resource-extraction industries. A significant indicator of this transition is the shift within Oregon's manufacturing sector, with a decline in the level of employment in the lumber and wood products industry and the concurrent growth of employment in other manufacturing industries, such as high-tech manufacturing (industrial machinery, electronic equipment, and instruments), transportation equipment manufacturing, and printing and publishing.[68]
- **Income.** Oregon's income and wages are below that of a typical state. However, mainly due to the wage growth over the last two to three years, Oregon wages are at their highest point relative to other states since the recession in the early 1980s. In 2017, the

[64] Portland State University Population Research Center. 2017 Annual Population Report Tables. April 2017. Retrieved from: https://www.pdx.edu/prc/population-reports-estimates.

[65] Office of Economic Analysis. Oregon Economic and Revenue Forecast, September 2018. Vol. XXXVIII, No. 3, page 38.

[66] U.S. Census Bureau. State Exports from Oregon, 2014-2017. Retrieved from: https://www.census.gov/foreign-trade/statistics/state/data/or.html.

[67] Oregon Employment Department. *Employment and Wages by Industry (QCEW)*. 2017 Geographic Profile, Manufacturing (31–33). Retrieved from: qualityinfo.org.

[68] Although Oregon's economy has diversified since the 1970s, natural resource-based manufacturing accounts for about 38% of employment in manufacturing in Oregon in 2017, with the most employment in food manufacturing (nearly 30,000) and wood product manufacturing (nearly 23,000) (QCEW).

average annual wage in Oregon was $51,117 and the median household income was $60,212 (compared to national average wages of $53,621 in 2017 and the national household income of $60,336).[69] Total personal income (all classes of income minus Social Security contributions and adjusted for inflation) in Oregon is expected to increase by 22%, from $202.2 billion in 2018 to $247.5 billion in 2022.[70] Per capita income is expected to increase by 16% over the same time period, from $48,000 (thousands of dollars) in 2018 to $55,800 in 2022 (in nominal dollars).[71]

- **Small businesses continue to account for a large share of employment in Oregon**. While small firms played a large part in Oregon's expansion between 2003 and 2007, they also suffered disproportionately in the recession and its aftermath (64% of the net jobs lost between 2008 and 2010 was from small businesses).

  In 2017 small businesses (those with 100 or fewer employees) accounted for 95% of all businesses and 66% of all private-sector employment in Oregon. Said differently, most businesses in Oregon are small (in fact, 78% of all businesses have fewer than 10 employees), but the largest share of Oregon's employers work for large businesses.

  The average annualized payroll per employee for small businesses was $37,149 in 2015, which is considerably less than that for large businesses ($54,329) and the statewide average for all businesses ($47,278).[72] Younger workers are important to continue growth of small businesses across the nation. More than one-third of Millennials (those born between 1980 and 1999) are self-employed, with approximately one-half to two-thirds interested in becoming an entrepreneur. Furthermore, in 2011, about 160,000 start-up companies were created each month; 29% of these companies were founded by people between 20 and 34 years of age.[73]

- **Entrepreneurship in Oregon.** The creation of new businesses is vital to Oregon's economy, as their formations generate new jobs and advance new ideas and innovations into markets. They also can produce more efficient products and services to better serve local communities. According to the Kauffman Index, Oregon ranked thirteenth in the country in 2017 for its start-up activity, a measurement comprised of three statistics: rate

[69] Average annual wages are for "all industries," which includes private and public employers. Oregon Quarterly Census of Employment and Wages, 2017. Retrieved from: https://www.qualityinfo.org; Bureau of Labor Statistics, Quarterly Census of Employment and Wages, 2017; Total, U.S. Census American Community Survey 1-Year Estimates, 2017, Table B19013.

[73] Cooper, Rich, Michael Hendrix, Andrea Bitely. (2012). "The Millennial Generation Research Review." Washington, DC: The National Chamber Foundation. Retrieved from: https://www.uschamberfoundation.org/sites/default/files/article/foundation/MillennialGeneration.pdf.

of new entrepreneurs, opportunity share of new entrepreneurs, and start-up density.[74] This ranking is higher than its 2016 position at spot fifteen. Oregon's rate of new entrepreneurs (the percent of adults that became an entrepreneur in a given month) was in steady decline post-recession, but since 2013, it has gradually recovered to about 0.34% in 2016. This rate is still well below Oregon's pre-recession peak of 0.43% in 2000, but its recent growth broadly exhibits that business ownership and formation is increasing.

Moreover, in 2018, the Oregon Office of Economic Analysis reported that new business applications in Oregon are increasing. They do, however, simultaneously note that start-up businesses "are a smaller share of all firms than in the past."[75] Though this measurement of economic activity does not constitute a full understanding of how well entrepreneurship is performing, it does provide an encouraging signal.

Regional and Local Trends

Throughout this section, Tualatin is compared to Washington County, the Portland region, and the State of Oregon. These comparisons provide context for changes in Tualatin's socioeconomic characteristics.

Availability of Labor

A skilled and educated populace can attract well-paying businesses and employers and spur the benefits that follow from a growing economy. Key trends that will affect the workforce in Tualatin over the next 20 years include growth in its overall population, growth in the senior population, and commuting trends.

Growing Population

Population growth in Oregon tends to follow economic cycles. Oregon's population grew from about 2.8 million people in 1990 to 4.0 million people in the 2013–2017 period, an increase of almost 1.2 million people, at an average annual rate of 1.3%. Oregon's growth rate slowed to 1.0% annual growth between 2000 and 2017.

Tualatin's population increased over the 1990 to 2013–2017 period, by 12,122 residents. Washington County's population also grew over the same time, by 260,517 residents, at a similar rate of growth as Tualatin.

Portland Region	1,174,291	1,444,219	1,641,036	1,760,492	586,201	50%	1.5%
Washington County	311,554	445,342	529,710	572,071	260,517	84%	2.3%
Tualatin	15,013	22,791	26,054	27,135	12,122	81%	2.2%

Age Distribution

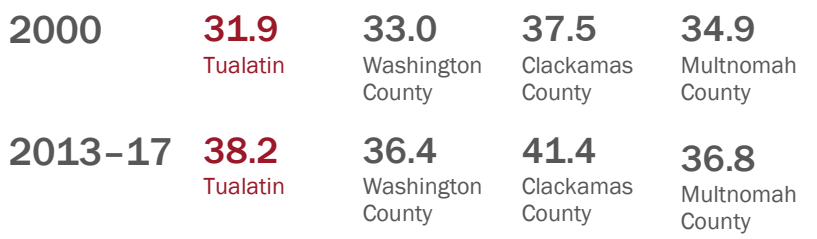
The number of people aged 65 and older in the United States is expected to increase by nearly three-quarters by 2050, while the number of people under age 65 will only grow by 16%. The economic effects of this demographic change include the slowing of labor force growth, the need for workers to replace retirees, and the aging of the workforce for seniors that continue working after age 65, as well as an increase in the demand for health-care services and an increase in the percent of the federal budget dedicated to Social Security and Medicare.[76]

Between 2000 and the 2013–2017 period, Tualatin grew older on average (6.3 years).

This increase suggests Tualatin attracted more workers in their later adult lives.

Exhibit 33. Median Age, Tualatin, Washington County, Clackamas County, Multnomah County, 2000 to 2013–2017

Source: U.S. Census Bureau, 2000 Decennial Census, Table P013; American Community Survey 2013–2017 5-year estimates, Table B01002.



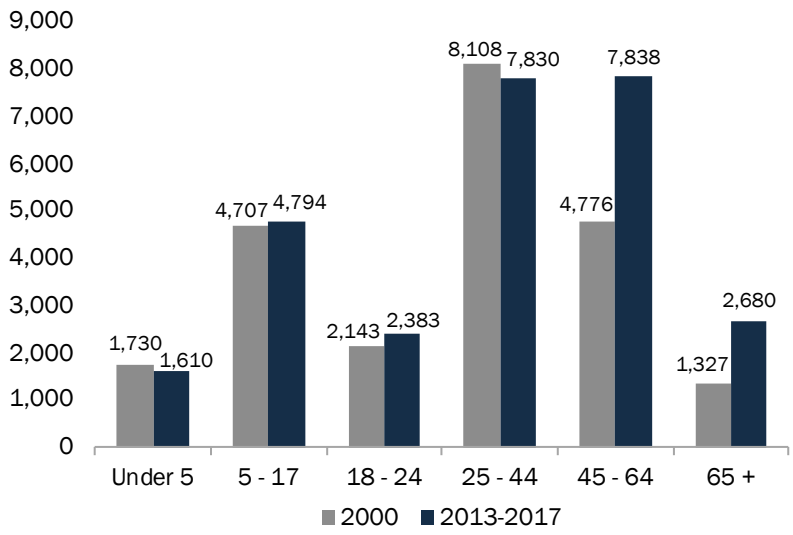
[76] The Board of Trustees, Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds, 2017, the *2017 Annual Report of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds*, July 13, 2017. *The Budget and Economic Outlook: Fiscal Years 2018 to 2028*, April 2018.

Over 2000 to 2013–2017, Tualatin's largest population increase was for those between 45 and 64 years of age.

This age group grew by 3,062 people between 2000 and 2013–2017.

Exhibit 34. Population Change by Age Group, Tualatin, 2000 and 2013–2017

Source: U.S. Census Bureau, 2000 Summary File; American Community Survey, 2013–2017, 5-year estimates, Table B01001.

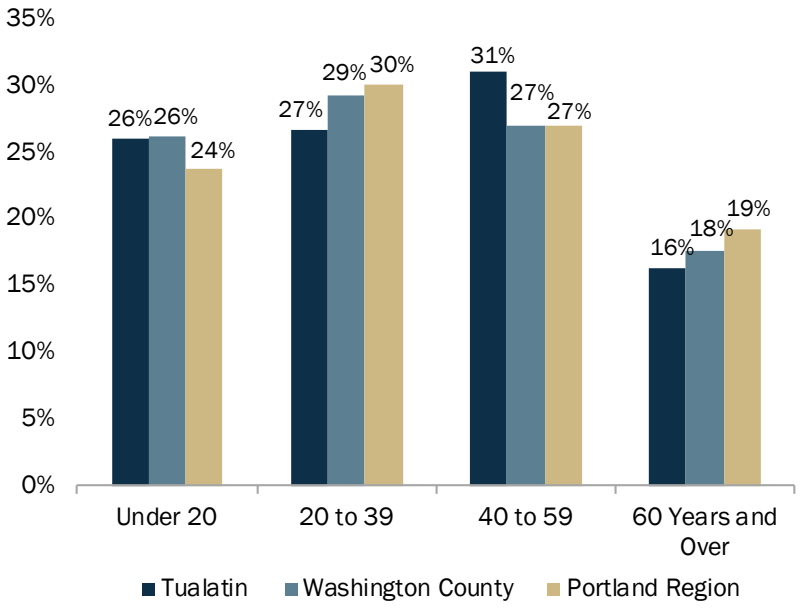


Compared to Washington County and the Portland Region, Tualatin had a slightly larger proportion of adults aged 40 to 59.

During the 2013–2017 period, 58% of Tualatin residents were between 20 and 59 years of age.

Exhibit 35. Population Distribution by Age, Tualatin, Washington County, Portland Region, 2013–2017

Source: U.S. Census Bureau, American Community Survey, 2013–2017 5-year estimate, Table B01001.



From 2020 to 2040, the share of residents 60 years and older in Washington County is forecast to grow while other age cohorts are forecast to decline proportionately.

Exhibit 36. Population Growth by Age Group, Washington County, 2020 and 2040

Income

Income and wages affect business decisions for locating in a city. Areas with higher wages may be less attractive for industries that rely on low-wage workers. In the 2013–2017 period, Tualatin's median household income ($72,580) was similar to Washington County's median ($74,033). In 2017 (inflation adjusted to 2018 $), average wages at businesses in Tualatin ($58,429) were below the County's average ($70,310, 2018).

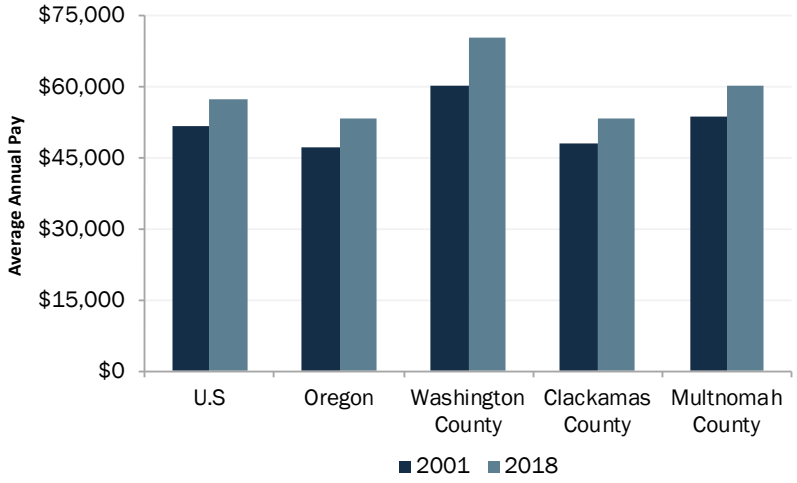
Adjusting for inflation, between 2000 and 2018, Washington County's average wages increased, as did the average wages of other counties in the Portland region, Oregon, and the nation. When adjusted for inflation, average annual wages grew by 17% in Washington County and 13% in Oregon.

From 2000 to 2018, average annual wages increased in Washington County, as did the average wages of other counties in the Portland Region, Oregon, and the nation.

In 2018, the average annual wage was $70,310 in Washington County, compared to 53,058 in Oregon.

Exhibit 37. Average Annual Wage (Inflation-Adjusted 2018 $), Covered Employment, Washington County, Clackamas County, Multnomah County, Oregon, U.S., 2001 to 2018,

Source: Bureau of Labor Statistics, Quarterly Census of Employment and Wages.



Over the 2013–2017 period, the median household income (MHI) in Tualatin was below Washington County's MHI, comparable to Multnomah County's MHI and above Clackamas County's MHI.

Exhibit 38. Median Household Income (MHI),[77] 2013–2017

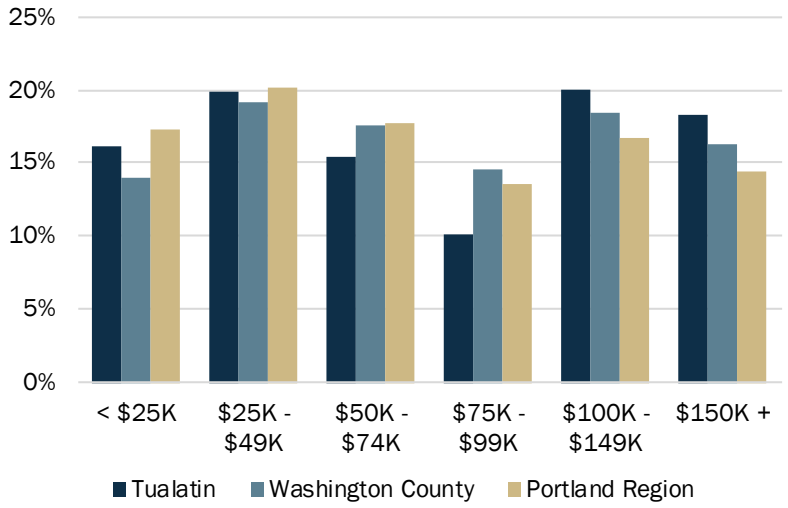
$95,656 Tualatin	**$85,993** Washington County
$87,858 Clackamas County	**$76,557** Multnomah County

During the 2013–2017 period, 48% of Tualatin households earned over $75,000 annually, comparable to Washington County.

Exhibit 40. Household Income by Income Group, Tualatin, Washington County, Portland Region, 2013–2017

Source: U.S. Census Bureau, American Community Survey 2013–2017 5-year estimates, Table B19001.



[78] The Census calculated family income based on the income of the head of household, as identified in the response to the Census forms, and income of all individuals 15 years old and over in the household who are related to the head of household by birth, marriage, or adoption.

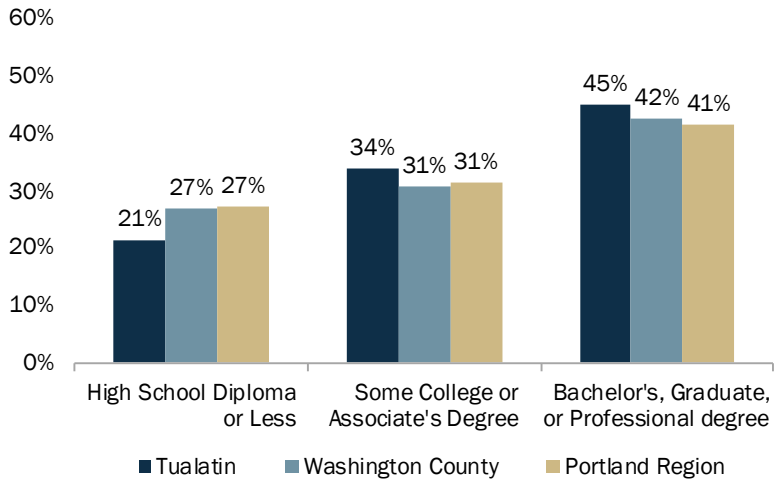
Educational Attainment

The availability of trained, educated workers affects the quality of labor in a community. Educational attainment is an important labor force factor because firms need to be able to find educated workers.

The share of residents, 25 years and older, with a bachelor's degree (or higher) is slightly larger in Tualatin than Washington County and the Portland Region.

Exhibit 41. Educational Attainment for the Population 25 Years and Over, Tualatin, Washington County, and the Portland Region, 2013–2017

Source: U.S. Census Bureau, American Community Survey 2013–2017 5-year estimates, Table B15003.



Race and Ethnicity

Tualatin, like Oregon overall, is becoming more ethnically diverse (while racial diversity has remained about the same). The Latinx community increased in Tualatin between 2000 and 2013–2017, from 12% of the total population to 16%. The non-Caucasian share of the population stayed the same,[79] from 2000 to 2013–2017 at 13% of the population. The Latinx community in Washington County also increased from 11% to 16%, while the non-Caucasian population increased from 18% to 23% between 2000 and 2013–2017.

Exhibit 42 and Exhibit 43 show the change in the share of Latinx and non-Caucasian populations in Tualatin, compared to Washington County and the Portland Region, between 2000 and 2013–2017.

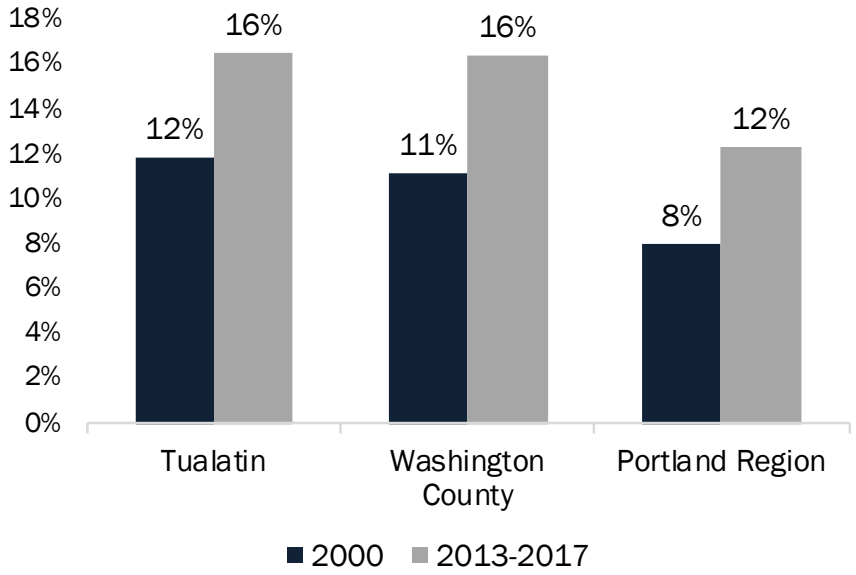
[79] The non-Caucasian population is defined as the share of the population that identifies as another race other than "white alone" according to Census definitions.

Tualatin's Latinx population increased between 2000 and 2013–2017 from 12% to 16%.

Tualatin and Washington County are more ethnically diverse than the Portland Region.

Exhibit 42. Latinx Population as a Percent of the Total Population, Tualatin, Washington County, and Oregon, 2000 and 2013–2017

Source: U.S. Census Bureau, 2000 Decennial Census Table P008, 2013–2017 ACS Table B03002.

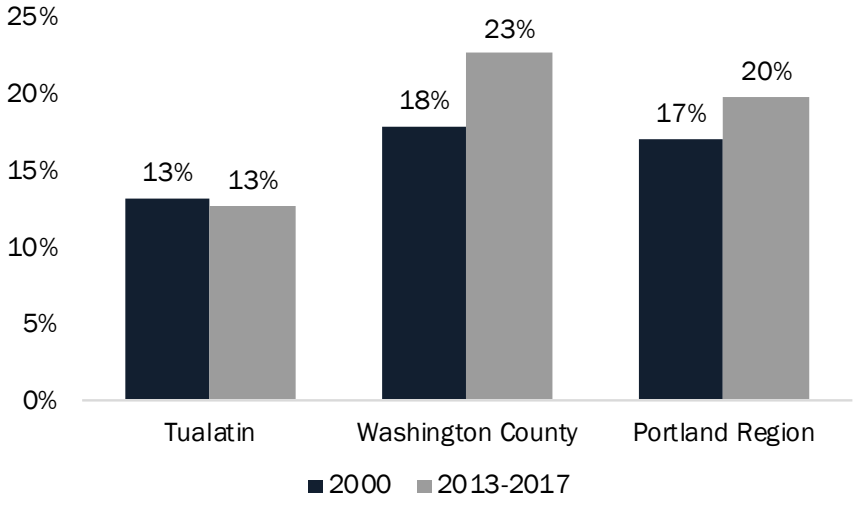


The non-Caucasian population in Tualatin stayed the same (at 13%) between 2000 and 2013–2017.

Tualatin is less racially diverse than Washington County and the Portland Region.

Exhibit 43. Non-Caucasian Population as a Percent of the Total Population, Tualatin, Washington County, and Oregon, 2000 and 2013–2017

Source: U.S. Census Bureau, 2000 Decennial Census Table P007, 2013–2017 ACS Table B02001.



Labor Force Participation and Unemployment

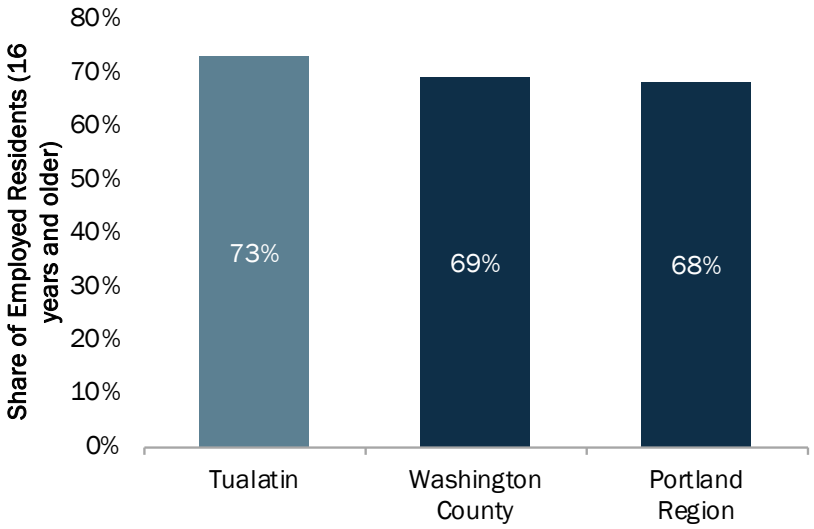
The current labor force participation rate is an important consideration in the availability of labor. The labor force in any market consists of the adult population (16 and over) who are working or actively seeking work. The labor force includes both the employed and unemployed. Children, retirees, students, and people who are not actively seeking work are not considered part of the labor force. According to the 2013–2017 American Community Survey, Washington County had more than 310,426 people in its labor force and Tualatin had 15,643 people in its labor force.

In 2017, the Oregon Office of Economic Analysis reported that 64% of job vacancies were difficult to fill. The most common reason for difficulty in filling jobs included a lack of applications (30% of employers' difficulties), lack of qualified candidates (17%), unfavorable working conditions (14%), a lack of soft skills (11%), and a lack of work experience (9%).[80] These statistics indicate a mismatch between the types of jobs that employers are demanding and the skills that potential employees can provide.

Tualatin has a higher labor participation rate than Washington County and the Portland Region.

Exhibit 44. Labor Force Participation Rate, Tualatin, Washington County, Portland Region, 2013–2017

Source: U.S. Census Bureau, American Community Survey 2013–2017 5-year estimates, Table B23001.

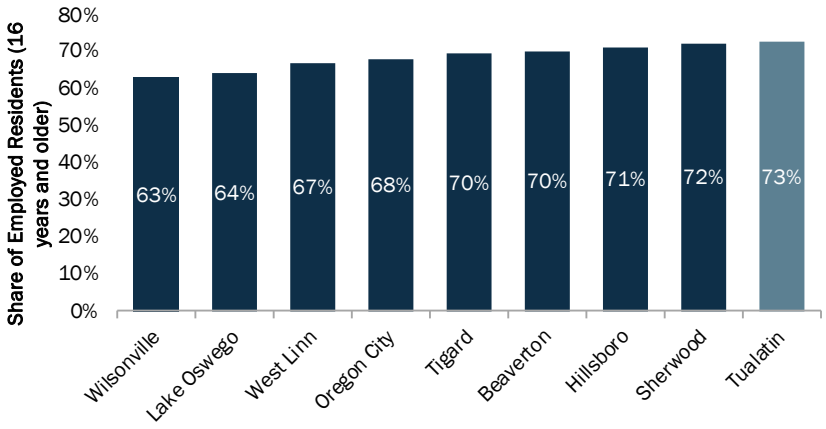


[80] *Oregon's Current Workforce Gaps: Difficult-to-fill Job Openings, Oregon Job Vacancy Survey*, Oregon Employment Department, June 2018.

Compared to neighboring cities, Tualatin has the highest labor force participation rate.

Exhibit 45. Labor Force Participation Rate, Tualatin and comparison cities, 2013–2017

Source: U.S. Census Bureau, American Community Survey 2013–2017 5-year estimates, Table B23001.

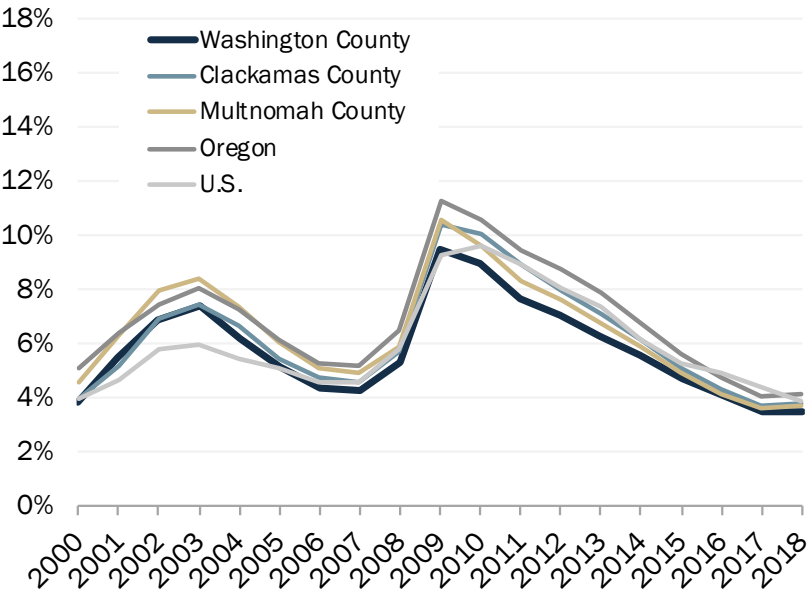


Alongside other counties in the Portland Region, Oregon, and the U.S., the unemployment rate in Washington County has declined since the Great Recession.

In general, Washington County's unemployment rate is below that of other regions.

Exhibit 46. Unemployment Rate, Washington County, Clackamas County, Multnomah County, Oregon, U.S., 2000–2018

Source: Bureau of Labor Statistics, Local Area Unemployment Statistics and Labor Force Statistics.



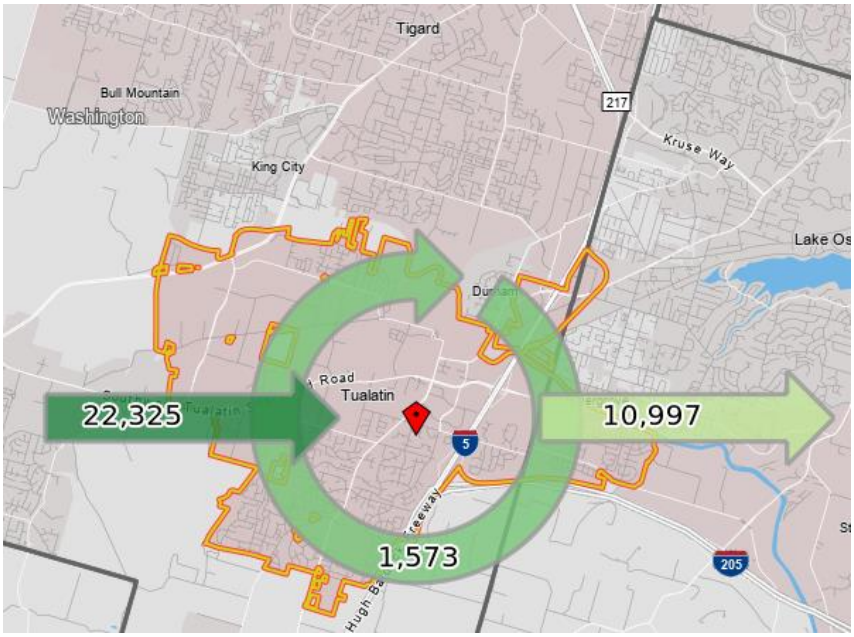
Commuting Patterns

Commuting plays an important role in Tualatin's economy because employers in these areas are able to access workers living in cities across Washington County and the broader Portland Region.

Exhibit 47 shows commuting flows of employees. Of the employees who work in Tualatin (about 23,898 persons), 93% commute into Tualatin from other areas. Of the employees who live in Tualatin (about 12,570 persons), 87% of people commute out of Tualatin to work in other areas.

Tualatin is part of an interconnected regional economy.
More than 22,000 people commute into Tualatin for work, and nearly 11,000 people living in Tualatin commute out of the city for work.

Exhibit 47. Commuting Flows, Tualatin, 2015
Source: U.S. Census Bureau, Census on the Map.



About 7% of people who work at businesses located in Tualatin also live in Tualatin.
The remainder commute from Portland and other parts of the Region.

Exhibit 48. Places Where Workers at Businesses in Tualatin Live, 2015

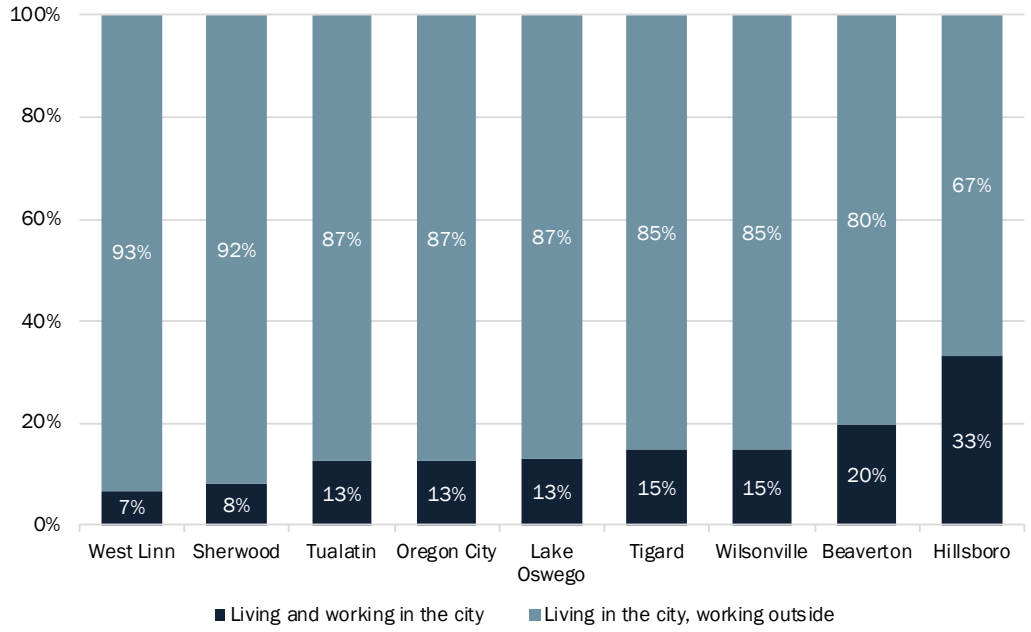

Exhibit 51. Commuting Patterns of Employees Working in Respective Communities, Tualatin and Comparison Cities in the Portland Region, 2015

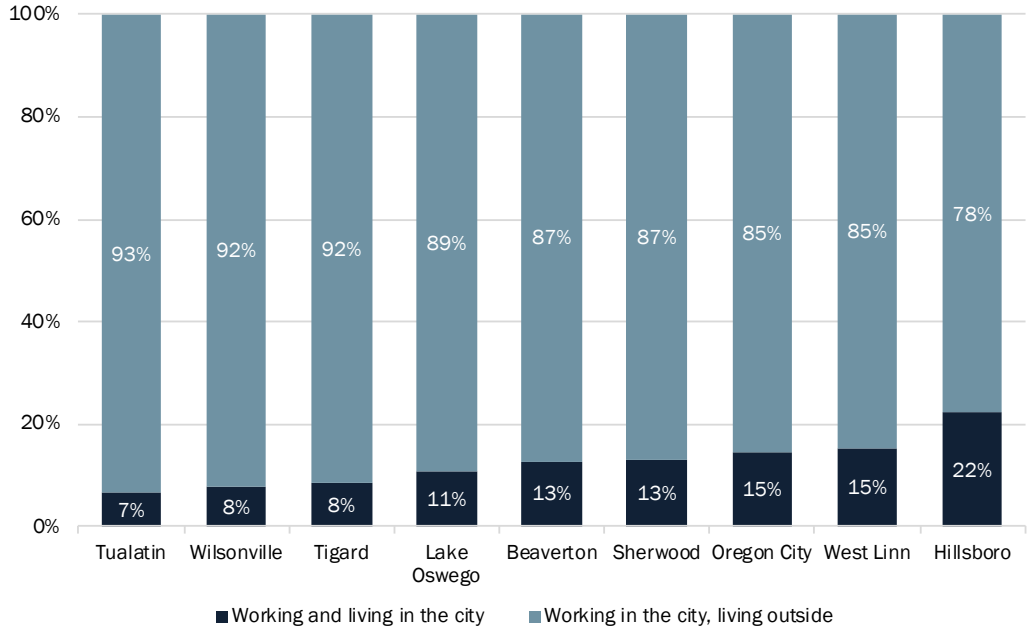
Source: U.S. Census Bureau, Census On the Map.



During the 2013–2017 period, about 34% of Tualatin residents had a commute of less than 15 minutes, compared to 26% of residents in Washington County and 22% of residents in the Portland Region.

Most of Tualatin residents (68%) have a commute time that takes less than 30 minutes.

2013–2017:	6.8%

Tourism in the Portland Region and Washington County

Longwoods International provides regional statistics on travel. The following information is from Longwoods International's 2017 Regional Visitor Report for the Portland Region.[81] Broadly, travelers to the Portland Region accounted for:

- 10.9 million overnight trips in 2017, or 32% of all Oregon overnight travel that year.
- The primary market areas for travelers over 2016 and 2017 were Oregon, Washington, and California: 28% of the visitors to the Portland Region came from Oregon, 26% came from Washington, and 20% came from California.
- About 48% of visitors stayed two or fewer nights over 2016 and 2017 in the Portland Region, 37% stayed three to six nights, and 15% stayed 7 or more nights. The average nights spent in the Portland Region were four days.
- The average per person expenditures on overnight trips in 2017 ranged from $16 on transportation at destination to $66 per night on lodging.
- About 63% of visits to the Portland Region over 2016 and 2017 were via personally owned automobiles, 22% were by rental car, and 18% were via an online taxi service (such as Lyft or Uber).
- Over 2016 and 2017, visitors tended to be younger- or middle-aged adults, with the average age being about 43.7. Those aged 25 to 44 comprised 43% of overnight visits, 30% were between 45 and 64, and 14% were 65 or older. About 66% of visitors graduated college or completed a post-graduate education. Additionally, 35% of visitors earned less than $50,000 in household income, 41% earned between $50,000 and $99,999, and 24% earned more than $100,000. The average household income for Portland Region visitors was about $70,440.

Washington County's direct travel spending increased 103% from 2000 to 2017.

The Portland Region's direct travel spending increased by 89% over the same period.

1,190 jobs Arts, Entertainment, and Recreation

290 jobs Ground Tran.

Appendix B. Buildable Lands Inventory

Oregon Administrative Rules provide guidance on conducting employment land BLIs:

OAR 660-009-0005:

(1) "Developed Land" means non-vacant land that is likely to be redeveloped during the planning period.

(2) "Development Constraints" means factors that temporarily or permanently limit or prevent the use of land for economic development. Development constraints include, but are not limited to, wetlands, environmentally sensitive areas such as habitat, environmental contamination, slope, topography, infrastructure deficiencies, parcel fragmentation, or natural hazard areas.

(11) "Site Characteristics" means the attributes of a site necessary for a particular industrial or other employment use to operate. Site characteristics include, but are not limited to, a minimum acreage or site configuration including shape and topography, visibility, specific types or levels of public facilities, services or energy infrastructure, or proximity to a particular transportation or freight facility such as rail, marine ports and airports, multimodal freight or transshipment facilities, and major transportation routes.

(12) "Suitable" means serviceable land designated for industrial or other employment use that provides, or can be expected to provide the appropriate site characteristics for the proposed use.

(13) "Total Land Supply" means the supply of land estimated to be adequate to accommodate industrial and other employment uses for a 20-year planning period. Total land supply includes the short-term supply of land as well as the remaining supply of lands considered suitable and serviceable for the industrial or other employment uses identified in a comprehensive plan. Total land supply includes both vacant and developed land.

(14) "Vacant Land" means a lot or parcel:

(a) Equal to or larger than one half-acre not currently containing permanent buildings or improvements; or

(b) Equal to or larger than five acres where less than one half-acre is occupied by permanent buildings or improvements.

Unlike with residential lands, the rules for employment lands include the concept of "suitability," which can be affected by factors other than the physical attributes of land. (See OAR 660-009-0005 [11] and [12] above.) The BLI methods do not fully address the suitability factors, rather, they more narrowly assess whether a parcel is buildable based solely on attributes of the land.

The methods used for conducting the Tualatin commercial and industrial BLI is consistent with Oregon statutes. However, the methods used for inventorying land within the city are based on the BLI completed by Metro for the 2018 Urban Growth Report (UGR). Metro is required to complete a BLI for land within the regional UGB every six years, and the agency updated the BLI (based on 2016 data) in January 2018. The methods used for inventorying Tualatin lands attempt to be consistent with Metro's results while also accounting for new development since 2016 and other local conditions, such as unique environmental constraints.

Overview of the Methodology

The BLI for Tualatin is based on the data and methods used by Metro. In addition, ECONorthwest's approach updated Metro's results to account for new development (the Metro 2018 UGR is based on 2016 data) and other potential local conditions, such as unique environmental constraints.

Study Area

The BLI for Tualatin includes all commercial and industrial land designated in the Comprehensive Plans within city limits and designated planning areas (referred to as Tualatin Planning Area). ECONorthwest used Metro's BLI, which used the 2016 RLIS tax lot database, as the basis for the BLI. We worked with City staff to identify new developments or changes since 2016 to reflect Tualatin's commercial and industrial land base in 2019.

Inventory Steps

The BLI consisted of several steps:

1. Generating UGB "land base"
2. Classifying land by development status
3. Identifying constraints
4. Verifying inventory results
5. Tabulating and mapping results

Step 1: Generate "Land Base"

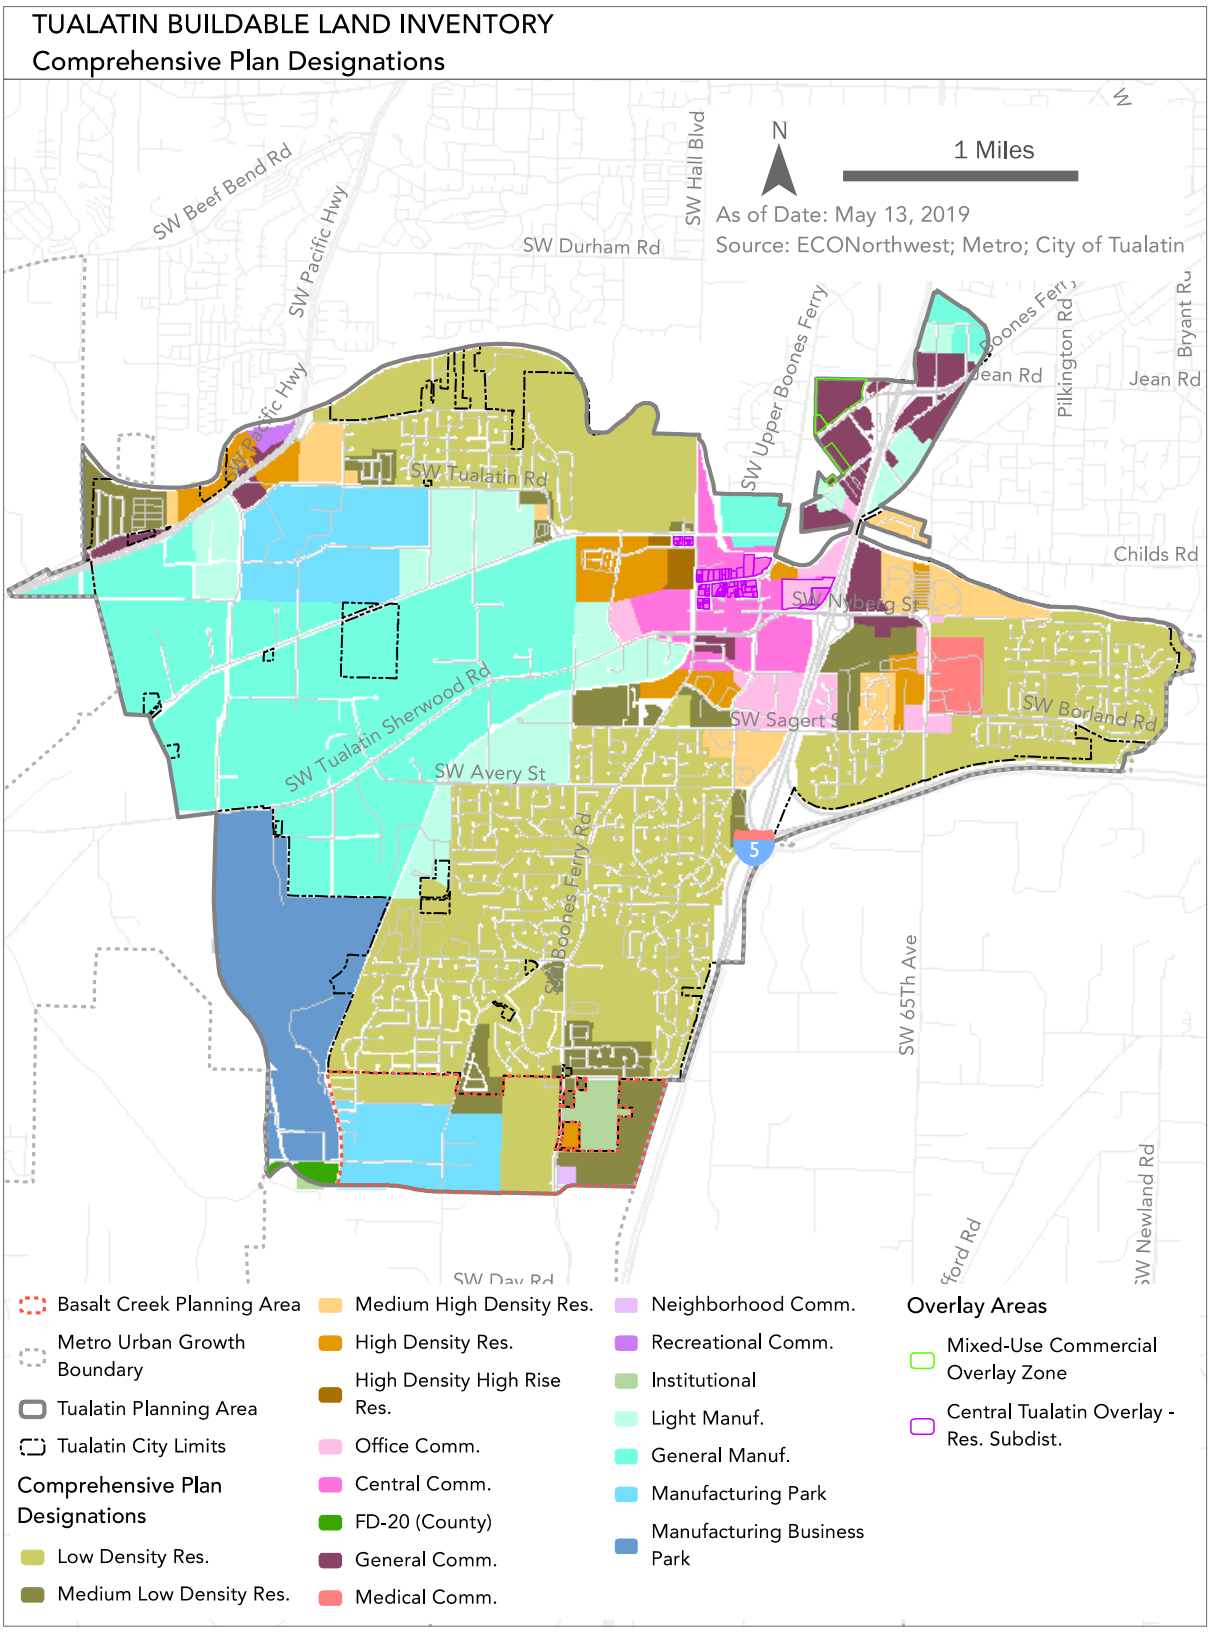
Per Goal 9, this involves selecting all of the tax lots with employment plan designations. Based on information provided by City staff, ECONorthwest included the following Plan Designations in the BLI:

- Office Commercial
- Central Commercial
- General Commercial
- Medical Commercial
- Neighborhood Commercial
- Recreational Commercial

- Light Manufacturing
- General Manufacturing
- Manufacturing Park
- Manufacturing Business Park

Exhibit 58 shows Comprehensive Plan designations for the City of Tualatin.

Exhibit 58. Comprehensive Plan Designations, Tualatin Planning Area, 2019



Step 2: Classify Lands

In this step, ECONorthwest classified each tax lot with a plan designation that allows employment uses into one of four mutually exclusive categories based on development status:

- Vacant
- Partially Vacant
- Potentially Redevelopable
- Public or Exempt
- Developed

ECONorthwest used the classification determined through Metro's model: vacant, ignore, and developed. In addition, ECONorthwest included a new classification for partially vacant and potentially redevelopable lots. The definitions for each classification are listed below.

Development Status	Definition	Statutory Authority
Vacant	Tax lots designated as vacant by Metro based on the following criteria: 1) Fully vacant based on Metro aerial photo 2) Tax lots with less than 2,000 square feet developed AND developed area is less than 10% of lot 3) Lots 95% or more vacant from GIS vacant land inventory	OAR 660-009-005(14)
Partially Vacant	Lots with an existing single-family dwelling but have been redesignated for commercial or industrial use (e.g., lots in the Basalt Creek Planning Area). These lots are assumed to redevelop in the planning period.	No statutory definition
Potentially Redevelopable	Lots determined to have redevelopment capacity based on Metro's Threshold Price methodology.	No statutory definition
Ignore (Public or Exempt uses)	Lots in public or semi-public ownership are considered unavailable for commercial or industrial development. This includes lands in Federal, State, County, or City ownership, as well as lands owned by churches and other semi-public organizations and properties with conservation easements. These lands are identified using the Metro's definitions and categories.	No statutory definition
Developed	Lots not classified as vacant, potentially redevelopable, or public/exempt are considered developed. Developed land includes lots with redevelopment capacity, which are also included in BLI. The capacity of developed but redevelopable lots is based on Metro's estimates.	OAR 660-009-005(1)

Step 3: Identify Constraints

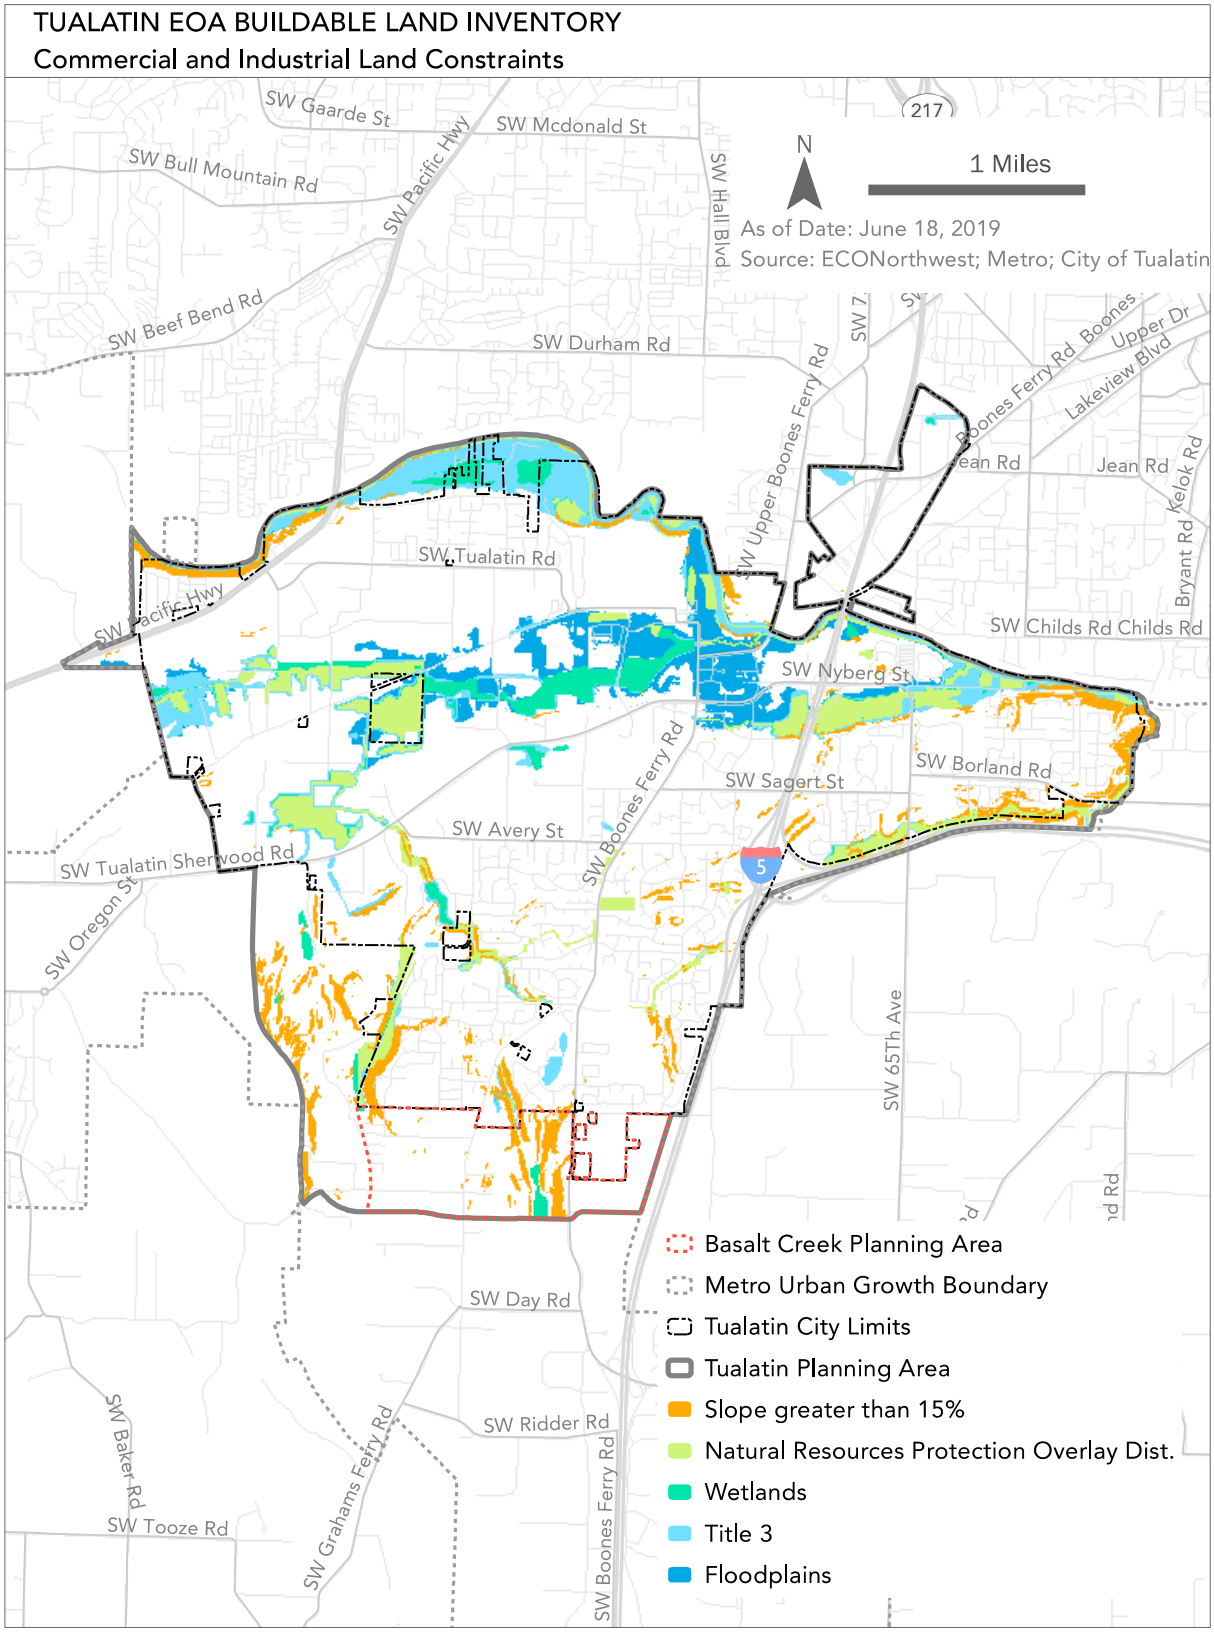
Consistent with OAR 660-008-0005(2) guidance on buildable lands inventories, ECONorthwest deducted certain lands with development constraints from vacant lands. We used some of the constraints established in Metro's methodology with modifications to fit local considerations in Tualatin. These constraints are summarized in the table below.

Constraint	Statutory Authority	Threshold
Goal 5 Natural Resource Constraints		
Natural Resources Protection Overlay District	OAR 660-008-0005(2)	Areas in the NRPOD
Riparian Corridors	OAR 660-015-0000(5)	Areas protected by the Stream and Floodplain Plan
Wetlands	OAR 660-008-0005(2)	Areas in wetlands
Natural Hazard Constraints		
100-Year Floodplain	OAR 660-008-0005(2	Lands within FEMA FIRM 100-year floodplain
Steep Slopes	OAR 660-008-0005(2	Slopes greater than 15%

The lack of access to water, sewer, power, road or other key infrastructure cannot be considered a prohibitive constraint unless it is an extreme condition. This is because tax lots that are currently unserviced could potentially become serviced over the 20-year planning period.

Exhibit 59 maps the development constraints used for the commercial and industrial BLI.

Exhibit 59. Development Constraints, Tualatin Planning Area, 2019



Step 4: Verification

ECONorthwest used a multi-step verification process. The first verification step included a "rapid visual assessment" of land classifications using GIS and recent aerial photos. The rapid visual assessment involved reviewing classifications overlaid on recent aerial photographs to verify uses on the ground. ECONorthwest reviewed all tax lots included in the inventory using the rapid visual assessment methodology. The second round of verification involved City staff verifying the rapid visual assessment output. ECONorthwest amended the BLI based on City staff review and comments, particularly related to vacant land developed since 2016.

Step 5: Tabulation and Mapping

The results are presented in tabular and map format. The Tualatin Commercial and Industrial BLI includes all employment land designated in the Comprehensive Plan within the Tualatin Planning Area. From a practical perspective, this means that ECONorthwest inventoried all lands within tax lots identified by Metro that fall within the Tualatin Planning Area. The inventory then builds from the tax lot–level database to estimates of buildable land by plan designation.

Attachments: Notice of Hearing PMA 23-0001 & PTA 23-0001.pdf

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to Council at the public hearing. The public hearing will be held on May 22, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

Subject: City of Wilsonville Comments on Norwood Multi-family Plan Amendments PMA-0001 & PTA23-0001

Thank you for the opportunity to comment on this proposal. As the jurisdictional neighbor to the south the City of Wilsonville is interested in how the proposal impacts downstream infrastructure systems, particularly streets and stormwater. Please see below and attached. Feel free to reach out to discuss further.

- The proposal does not provide sufficient analysis of the Level of Service impact at City of Wilsonville-owned intersection at SW Boones Ferry Road/SW Day Road. The traffic report should be updated throughout to compare to the City of Wilsonville LOS D standard at this intersection. Analysis by DKS Associated (see attached) states it appears reasonable that 45-50% of project-generated traffic will travel through Wilsonville, including this intersection.

- As the Basalt Creek Parkway Extension has not secured funding, the TRP analysis should also include analysis of study intersections without the Basalt Creek Parkway construction. The intersection of SW Boones Ferry Road/SW 95th Avenue should be added to the analysis.

- The documentation should provide an updated analysis of the total planned trip generation in the Basalt Creek planning area under Tualatin's jurisdiction compared to previous trip caps agreed to between Tualatin and Wilsonville during the Basalt Creek concept planning.

- The submitted lacks sufficient information on stormwater to determine any downstream impact on City of Wilsonville stormwater system.

DKS DKSASSOCIATES.COM

MEMORANDUM

DATE: April 25, 2023

TO: Amy Pepper | City of Wilsonville

FROM: Scott Mansur, PE, PTOE | DKS Associates
Jenna Bogert, PE | DKS Associates

SUBJECT: Tualatin Norwood Apartments TIA Review Project #21123-020

DKS Associates has reviewed the traffic impact analysis (TIA) for the proposed SW Norwood Apartments prepared by Lancaster Mobley.[1] The proposed development is located east of SW Boones Ferry Road and south of Norwood Road in Tualatin, Oregon. The proposed project includes a 276-unit apartment development which will require the rezoning of two parcels, totaling 9.2 acres. Below are comments compiled by DKS regarding the TIA and the Transportation Planning Rule evaluation.

TIA REVIEW COMMENTS

1. **Trip Generation and Trip Distribution:** The trip generation and distribution assumptions for the development appear to be reasonable with 45%-50% of project-generated traffic traveling through Wilsonville city limits.
2. **Basalt Creek Parkway Extension Analysis:** The 2026 volumes and volume shifting assumptions at SW Boones Ferry Road/SW Day Road appear reasonable for the Basalt Creek Parkway Extension analysis scenarios. The 2026 volumes at SW Boones Ferry Road/SW Basalt Creek Parkway appear generally consistent with the Basalt Creek Extension Traffic Analysis (2020).
3. **City of Wilsonville Operating Standard:** The intersection of SW Boones Ferry Road/SW Day Road is under City of Wilsonville jurisdiction and all intersection operations should be compared to the City's LOS D standard throughout the entirety of the report.
4. **TPR Analysis:** The 2040 TPR analysis assumes that the Basalt Creek Parkway Extension is constructed for both the current zoning scenario and proposed zoning scenario. However, the project does not have secured funding as mentioned on Page 11 of the report and therefore, the TPR analysis should also include analysis of the study intersections without the Basalt Creek Parkway Extension project and identify any necessary mitigations. The study intersections in the TPR analysis should also include the intersection of SW Boones Ferry Road/SW 95th Avenue as it will have an increase in traffic due to the proposed zone change that is similar to the increase in traffic at SW Boones Ferry Road/SW Ibach Street, which is already included in the analysis.

Please let us know if you have any questions. Thank you!

Subject: RE: City of Wilsonville Comments on Norwood Multi-family Plan Amendments PMA-0001 & PTA23-0001

Madeleine and Steve

Please see requested Conditions below from the City of Wilsonville regarding future evaluations.

Tapman Creek has significant capacity constraints as it flows south of Day Road, which have been studied by the City of Wilsonville. To assure that these conditions are not exacerbated, the Development on the rezoned land shall provide a downstream analysis in consultation with the City of Wilsonville, in addition to the City of Tualatin and Clean Water Services.

If the I-5/Elligsen interchange traffic impact is studied per ODOT request, SW Boones Ferry Road and SW 95th Avenue should also be analyzed.

Thanks. Let me know any questions.

[This email originated outside of the City of Wilsonville]

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to Council at the public hearing. The public hearing will be held on May 22, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

Subject: City of Wilsonville Comments on Norwood Multi-family Plan Amendments PMA-0001 & PTA23-0001

Thank you for the opportunity to comment on this proposal. As the jurisdictional neighbor to the south the City of Wilsonville is interested in how the proposal impacts downstream infrastructure systems, particularly streets and stormwater. Please see below and attached. Feel free to reach out to discuss further.

- The proposal does not provide sufficient analysis of the Level of Service impact at City of Wilsonville-owned intersection at SW Boones Ferry Road/SW Day Road. The traffic report should be updated throughout to compare to the City of Wilsonville LOS D standard at this intersection. Analysis by DKS Associated (see attached) states it appears reasonable that 45-50% of project-generated traffic will travel through Wilsonville, including this intersection.

- As the Basalt Creek Parkway Extension has not secured funding, the TRP analysis should also include analysis of study intersections without the Basalt Creek Parkway construction. The intersection of SW Boones Ferry Road/SW 95th Avenue should be added to the analysis.

- The documentation should provide an updated analysis of the total planned trip generation in the Basalt Creek planning area under Tualatin's jurisdiction compared to previous trip caps agreed to between Tualatin and Wilsonville during the Basalt Creek concept planning.

- The submitted lacks sufficient information on stormwater to determine any downstream impact on City of Wilsonville stormwater system.

ODOT Response

Project Name: Norwood Multi-Family Map and Text Amendment	**Applicant:** Lee Novak
Jurisdiction: City of Tualatin	**Jurisdiction Case #:** PMA 23-0001, PTA 23-0001
Site Address: 9300 SW Norwood Rd and 23370 SW Boones Ferry Rd	**State Highway:** I-5

The site of this proposed land use action is in the vicinity of I-5. ODOT has permitting authority for this facility and an interest in ensuring that this proposed land use is compatible with its safe and efficient operation. A Traffic Impact Analysis (TIA) was prepared by Lancaster Mobley for the proposed map and text amendment dated February 2nd, 2023. ODOT was not contacted during the scoping process and State highway facilities are not included within the study area.

COMMENTS/FINDINGS

The applicant proposes a map amendment from RML and IN to the RH-HR Zone for a 9.2 acre site located in the southeast quadrant of the SW Norwood Rd/Boones Fry Rd intersection. The property is located just west of the recently approved Autumn Sunrise Subdivision (500 residential lots and two commercial lots) adjacent to I-5. A text amendment is also proposed to remove locational factors from RH-HR purpose statement.

The TIA submitted by Lancaster Mobley dated September 20, 2021 with the Autumn Sunrise Subdivision application, showed that the new development would contribute traffic volume to the I-5 southbound off ramp at the Elligsen Rd interchange. Therefore, ODOT has determined that the proposed plan amendment and subsequent development will likely add traffic to the I-5 interchange at Elligsen Rd.

The 2018 RTP project (11489) proposes to construct a second right-turn lane on the southbound off-ramp. Since the project is on the RTP financially constrained project list, it can be assumed to be in place for the purposes of this plan amendment. The RTP project acknowledges that "conditions are currently congested" and suggests that the time period for the improvement is 2028-2040. Funding for the project has not been committed to date.

Since we anticipate that future development of the site will contributes traffic volumes to the I-5 southbound off-ramp, ODOT recommends that the future development be required to prepare a TIA that includes the I-5 interchange at Elligsen Rd. ODOT intents to recommend that the future development of this site contribute its proportionate share of its contribution to interchange improvements. This recommendation is consistent with ODOT comments submitted for the Autumn Sunrise Subdivision dated October 28, 2021.

Memorandum

To: **Steve Koper, City of Tualatin**

Copy: **Lee Novak, Vista Residential Partners**

From: **Jennifer Danziger, PE**

Date: **May 24, 2023**

Subject: **Response to Agency Comments on Norwood Multi-family Plan Amendments PMA-0001 & PTA23-0001**

Introduction

This memorandum addresses the traffic comments on the Norwood Multi-family Plan Amendments PMA-0001 & PTA23-0001. Comments were received from the City of Wilsonville and the Oregon Department of Transportation regarding the Transportation Impact Analysis (TIA) dated February 2, 2023. The TIA also includes a Transportation Planning Rule (TPR) analysis for the proposed zone change.

City of Wilsonville Comments

The following comments were received from Daniel Pauly, City of Wilsonville, on May 3, 2023.

- The proposal does not provide sufficient analysis of the Level of Service impact at City of Wilsonville-owned intersection at SW Boones Ferry Road/SW Day Road. The traffic report should be updated throughout to compare to the City of Wilsonville LOS D standard at this intersection. Analysis by DKS Associated (see attached) states it appears reasonable that 45-50% of project-generated traffic will travel through Wilsonville, including this intersection.

Response: As shown in Table 1, the intersection is anticipated to meet the City of Wilsonville standard of LOS under all conditions in both the TIA analysis (Table 9) and the TPR analysis (Table 13).

Table 1: Comparison of Operations to Wilsonville Performance Threshold

Intersection & Scenario	Performance Standard	Morning Peak Hour			Evening Peak Hour		
		LOS	Delay (s)	V/C	LOS	Delay (s)	V/C
TIA Table 9 – SW Boones Ferry Road & SW Day Road							
2022 Existing	LOS D	C	31	0.49	C	34	0.60
2026 Background		C	31	0.58	C	34	0.67
2026 Background w/ BCPE		C	24	0.74	C	25	0.73
2026 Buildout		C	31	0.60	C	33	0.68
2026 Buildout w/ BCPE		C	24	0.74	C	24	0.75

Table 1: Comparison of Operations to Wilsonville Performance Threshold

Intersection & Scenario	Performance Standard	Morning Peak Hour			Evening Peak Hour		
		LOS	Delay (s)	V/C	LOS	Delay (s)	V/C
TIA Table 13 – SW Boones Ferry Road & SW Day Road							
Existing Zoning	LOS D	B	18	0.78	B	18	0.84
Proposed Zoning		B	18	0.77	B	18	0.84

- As the Basalt Creek Parkway Extension has not secured funding, the TRP analysis should also include analysis of study intersections without the Basalt Creek Parkway construction. *(Second half of this comment is listed separately.)*

Response: A TPR analysis examines how a proposed zone change might require modifications to an adopted Transportation System Plan (TSP) to accommodate additional traffic demand. The long-term year analysis is performed on the financially-constrained transportation network identified in the TSP. The financially-constrained network includes projects that can reasonably be expected to be funded in the next 20 years even if the specific funding sources are not identified or secured at the time of adoption.

While the Basalt Creek Parkway Extension does not have secured funding at this time, it is identified as Project 11470 in the 2018 Regional Transportation Plan (RTP) and listed in the financially-constrained project list with construction anticipated between 2018 and 2027. Therefore, it is appropriate to assume the project in the TPR analysis.

We also note that the short-term TIA analysis considered the system without the Basalt Creek Parkway Extension because it does not have secure funding at this time. However, at the request of the reviewing agencies, the analysis also included a scenario with the Extension. The results are similar at most intersections and do not affect the conclusions of the study.

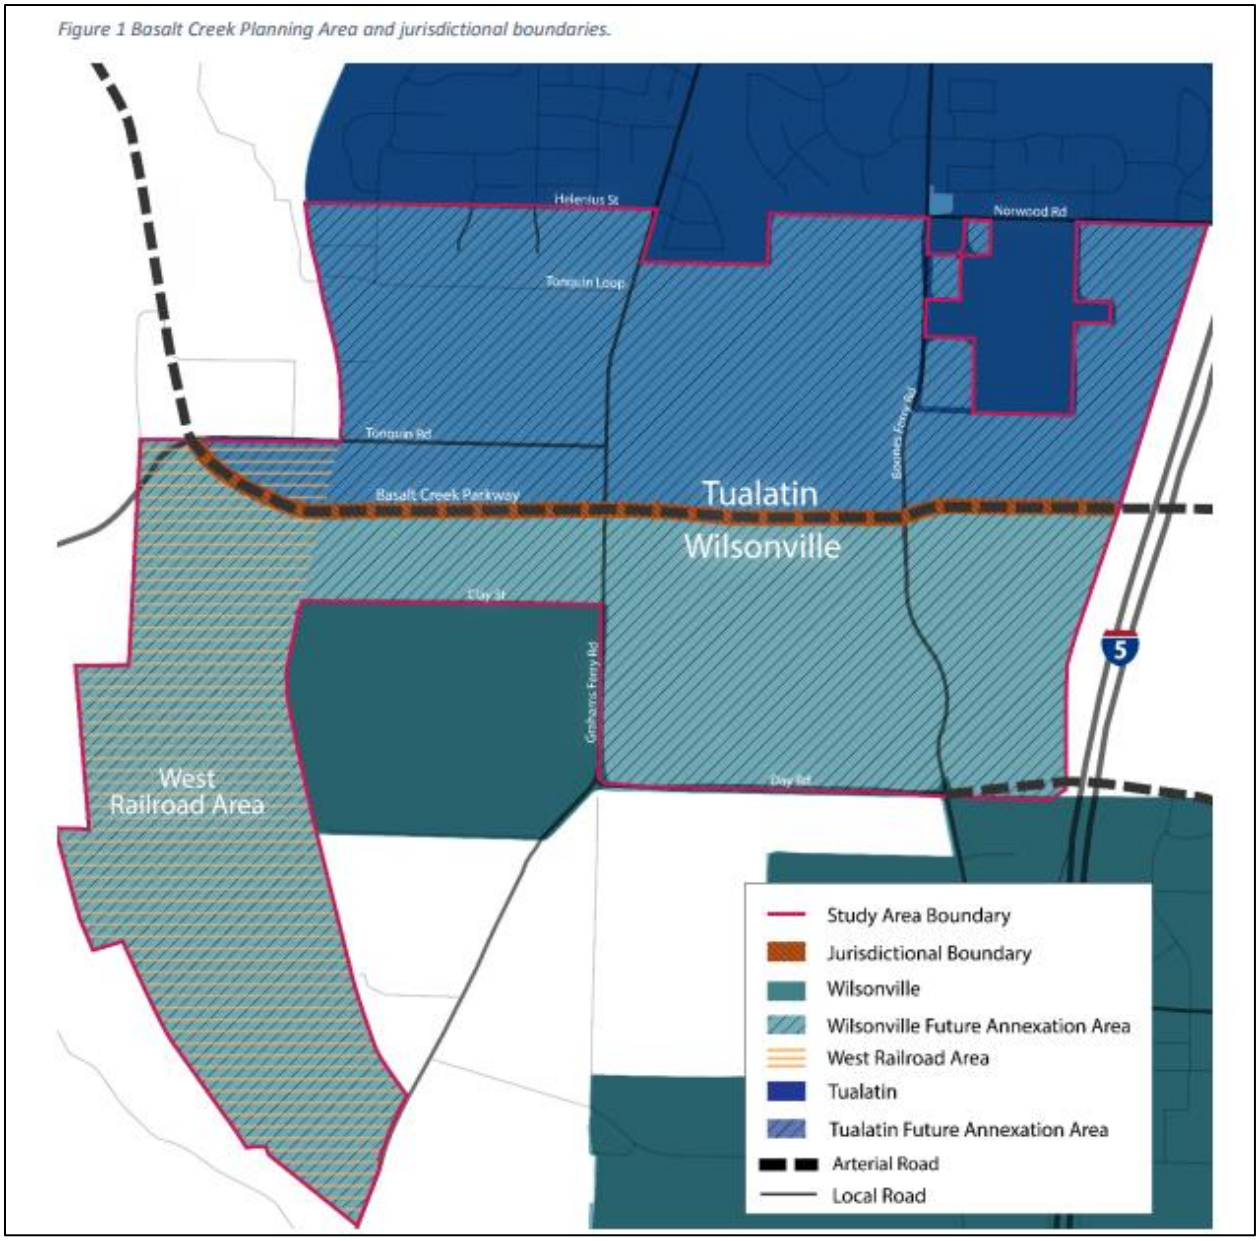
- The intersection of SW Boones Ferry Road/SW 95th Avenue should be added to the analysis.

Response: The TIA study area was scoped with the City of Tualatin and Washington County. On SW Boones Ferry Road south of SW Day Road, the site was estimated to add less than 2 percent increase in daily traffic and fewer than 50 trips during the peak hours. Since this segment of roadway is under ODOT jurisdiction and these volumes fall below the thresholds for additional study by ODOT, the intersection of SW Boones Ferry Road & SW Day Road was recommended and approved by the reviewing agencies as the southernmost intersection in the study area.

- The documentation should provide an updated analysis of the total planned trip generation in the Basalt Creek planning area under Tualatin's jurisdiction compared to previous trip caps agreed to between Tualatin and Wilsonville during the Basalt Creek concept planning.

Response: The Basalt Creek planning area only includes the 1-acre portion of the Norwood Apartments site that is currently zoned Medium Low Density Residential (RML). The remainder of the site, which is zoned Institutional (IN) lies outside the planning area, as shown in Figure 1 from the Basalt Creek Concept Plan.

Figure 1 Basalt Creek Planning Area and jurisdictional boundaries.



The TPR analysis assumed the maximum density under both the existing and proposed zoning. For the existing Medium Low Density Residential (RML) zoning, maximum density is 25 attached homes for the 1-acre parcel. For the proposed High Density/High Rise Residential (RH-HR) zoning, maximum density is 30 apartments for the 1-acre parcel.

As shown in Table 2, the net increase in trip generation for the 1-acre portion of the site with the proposed zone change in the Basalt Creek planning area is 1 evening peak hour trip and 22 daily trips.

Table 2: Basalt Creek Planning Area – Trip Generation Comparison for TPR

ITE Code	Intensity	Morning Peak Hour			Evening Peak Hour			Daily Trips
		In	Out	Total	In	Out	Total	
EXISTING ZONING (1 ACRE RML)								
215 - Single-Family Attached Housing	25 DU	4	8	12	8	6	14	180
PROPOSED ZONING (1 ACRE RH-HR)								
220 - Multifamily Housing (Low-Rise)	30 DU	3	9	12	9	6	15	202
NET TRIP DIFFERENCE								
Proposed - Existing (Attached)		-1	1	0	1	0	1	22

The original Basalt Creek Concept Plan Adopted August 13, 2018, by the City of Tualatin included an estimated 1,111 PM peak hour trips for lands under Tualatin jurisdiction by the year 2035. The proposed zone change would have a negligible effect on the trip forecasts.

A supplemental transportation analysis conducted in 2019 evaluated the year 2040 conditions with even more employment growth in the planning area for both Tualatin and Wilsonville; however, the study only summarized the land use assumptions and not the trip estimates. With five more years of growth, the trip estimates would be even higher than the year 2035 estimate. Again, the proposed zone change would have a negligible effect on the forecasts.

In conclusion, the proposal does not significantly change the land use assumptions or potential traffic generation in the Basalt Creek planning area.

ODOT Comments/Findings

The following comments/findings were received from Marah Danielson and Avi Tayar, ODOT, on May 8, 2023. Only those that require a response are listed below.

- The TIA submitted by Lancaster Mobley dated September 20, 2021 with the Autumn Sunrise Subdivision application, showed that the new development would contribute traffic volume to the I-5 southbound off ramp at the Elligsen Rd interchange. Therefore, ODOT has determined that the proposed plan amendment and subsequent development will likely add traffic to the I-5 interchange at Elligsen Rd.

Response: The TIA study area was scoped with the City of Tualatin and Washington County. Based on the approved trip assignment, the volumes at intersections south of SW Day Road, including the I-5 Elligsen interchange ramps would fall below the ODOT thresholds for an impact study. The recommended study area was approved by the reviewing agencies.

With the approved trip distribution, 35 percent of the traffic is anticipated to pass through the I-5 southbound ramp intersection with SW Elligsen Road with 10 percent assumed to travel to/from the south on I-5, 15 percent assumed to travel to/from the north on I-5, and 10 percent assumed to travel to/from the east on SW Elligsen Road. Based on this distribution, the project is estimated to add 29 trips through the signal in the morning with

4 trips on the southbound ramp, and 43 trips through the signal in the evening with 13 trips on the southbound ramp. As noted above, these volumes are less than 2 percent of the 2,500 to 3,000 vehicles per hour that travel through the intersection during the peak hours.

- Since we anticipate that future development of the site will contributes traffic volumes to the I-5 southbound off- ramp, ODOT recommends that the future development be required to prepare a TIA that includes the I-5 interchange at Elligsen Rd. ODOT intents to recommend that the future development of this site contribute its proportionate share of its contribution to interchange improvements. This recommendation is consistent with ODOT comments submitted for the Autumn Sunrise Subdivision dated October 28, 2021.

Response: Currently, there is no mechanism in place to collect a proportionate share contribution to future improvements on the southbound ramp. This ramp carries traffic traveling to/from destinations in two counties and at least two cities. Unless ODOT creates an intergovernmental agreement with each of these jurisdictions, it is not clear how funding for the project could be collected from development.

A similar comment was received for the Autumn Sunrise Subdivision, which was approved without a condition related to the southbound off-ramp.

Project Name: Norwood Multi-Family Plan Amendments (PMA-0001 & PTA23-0001)
AKS Job No.: **8723**
Project Site: 9300 SW Norwood Road, Tualatin, OR 97062

Subject: **Stormwater Downstream Impacts for City of Wilsonville**

This memorandum is in response to comments on the stormwater analysis associated with the Norwood Multi-Family Plan Amendments (PMA-0001 & PTA23-0001) received from City of Wilsonville staff. Please see below for additional information regarding the applicable stormwater standards for the subject development per City of Tualatin and Clean Water Services design standards. Also, please note that the approval of the Plan Text Amendment and Plan Map Amendment applications does not include approval of any site improvements, and any improvements would be reviewed as part of subsequent land use processes.

As noted in the previously provided utility capacity analysis, this development will be required to comply with water quality (Section 4.04), water quantity (Section 4.02), and hydromodification (Section 4.03) requirements per CWS Design Standards R&O 19-5 (as amended by R&O 19-22). A combination of surface LIDA facilities and proprietary underground systems will be used to treat and detain water in accordance with these requirements. Therefore, overall release rates from the subject site and accompanying public improvements will be less than or equal to the existing condition.

Flows from this development will be conveyed via an existing outfall and drainageway to Tapman Creek to the west. This project will be required to assess the downstream conveyance system per CWS R&O 19-5 Section 2.04.2.m.3 and do a hydromodification assessment CWS R&O 19-5 Section 2.04.2.m.4. In addition, per conversations with City staff, a site assessment in conjunction with City and CWS staff will be required to assess the potential for erosion downstream of the site. Additional information regarding these processes will be provided in subsequent reports as required by land use and permitting processes.

Subject: Byrom CIO Executive Committee Statement: No on PTA23-0001 and PMA23-0001

Hello Planning Commission and City Council Members,

The leadership of the Byrom CIO met recently and discussed the proposed text and map amendments: PTA23-0001 and PMA23-0001. **The Executive Boards of the Byrom CIO agreed that these proposed text and map amendments are NOT in the best interests of the current and future residents of Tualatin, and therefore should not be recommended for approval.**

Reasons to not approve the proposed text and map amendments:
1. The rationale to remove the restriction on residential high rises and enable them to be built anywhere in Tualatin is rooted in a concern for lack of affordable housing. It is important to note that the proposed apartments have been described by the builder as "class A, luxury apartments." These are not low income or subsidized housing. Additionally, studies have recommended that the city of Tualatin should add about 1000 housing units by 2040. Based on current construction and approvals in the city, about 1200 units will already be added to housing inventory, well above the 2040 target. There is not a need to rush to build more housing units.

2. Traffic - South Boones Ferry Road already has significant development planned: light industrial development, the Autumn Sunrise housing development, and the Plambeck Gardens subsidized housing

community. Traffic studies complete to date have never examined the cumulative impact of all of the proposed development projects, and some of the studies that have been completed identify that Boones Ferry will fail, and already is failing to effectively manage traffic, especially during peak hours. Adding the 286 housing units specific to the Norwood high rise apartment project would only further worsen traffic. South Tualatin is heavily car dependent. There is inadequate public transit, and there are no stores, restaurants, or places of employment for miles, requiring all new and current residents to drive, creating a recipe for gridlock on Boones Ferry Road.

3. **Most significantly, the proposed text and map amendments do not meet Tualatin Development Code Approval Criteria, specifically the following items:**
TDC 33.070 (5) (A) - Granting the amendment is in the public interest. - As representatives of all of the Tualatin CIOs representing residents of the city, we identify that the proposed amendments are not in the public interest.
TDC 33.070 (5) (B) - The public interest is best protected by granting the amendment at this time. Given the approved and in development housing units that have yet to be occupied and that these units are well in excess of the anticipated need of the city by 2040, it is not critical or necessary to change the restriction on residential high rises at this time.Furthermore, public interest would be harmed by granting the amendments, as traffic will worsen on Boones Ferry, adversely impacting quality of life.
TDC 33.070 (5) (C) - The proposed amendment is in conformity with the goals and policies of the Tualatin Comprehensive Plan. The comprehensive plan does not call for building residential high rises outside of the downtown area, and the area for the proposed Norwood high rise is specifically left as undeveloped on the maps associated with the comprehensive plan. Per the Tualatin 2040 Comprehensive plan, high density residential/ high rise zone is specifically supposed to be in areas with the greatest access to amenities. The site at Norwood Rd has no access to amenities. See the description copied from the 2040 developmental plan.

High-Density Residential/High-Rise Planning District (RH-HR)
This district supports a wide range of housing types at the greatest density of household living in areas with the greatest access to amenities.

34

Due to the above factors, the leadership of the Byrom CIO do not support the proposed text amendment and map amendments. Alternatively, CIO leadership would be happy to consult regarding other changes that could be more beneficial to current and future residents of Tualatin. CIO leadership would gladly participate in conversations regarding alternative development of the site at Norwood Road, particularly development options that minimally impact traffic and increase livability of the community.

Sincerely,

Tim Neary

Subject: Concern with application PTA 23-0001

Hi Madeleine,

I am concerned that the application is still incomplete, as those involved with the project did not make any known attempts to contact any of the executive committee members of the Byrom CIO.

This is in violation of TDC 32.140 criterion h:
A statement as to whether any City-recognized Citizen Involvement Organizations (CIOs) whose boundaries include, or are adjacent to, the subject property were contacted in advance of filing the application and, if so, a summary of the contact. The summary must include the date when contact was made, the form of the contact and who it was with (e.g. phone conversation with neighborhood association chairperson, meeting with land use committee, presentation at neighborhood association meeting), and the result.

I have CC'ed the other Byrom CIO board members, who can also confirm that they have not been contacted regarding this project.

Thank you Madeleine!

As a community member, I would appreciate it if planning department procedure changed and posted materials publicly as soon as possible, even if that includes a clear indicator that the application is not yet complete and moving forward. The goal in this change would be to create a greater degree of equality for project applicants and community members, as applicants likely put significant time and effort, at their own pace, to put their materials together, whereas delays in a proposed change drastically limits community members' time to research the project and its impact from their perspective.

Hi Madeleine,

Are there public comment opportunities related to PTA23-0001 beyond the public hearing?

I am concerned as the submitted public meeting summary as written does not capture the significant neighborhood opposition to the project.

Additionally, could you provide insight as to why it took over a month after application submission to make the text revision application public?

Thank you,

Tim Neary, Byrom CIO President

Subject: Comment for Planning Commission re: DO NOT APPROVE PTA23-0001 and PMA23-0001

Hello Planning Commission, Planning Staff, and City Council:

The proposed text and map amendments will be harmful to the community if approved.

The proposed text amendment is particularly problematic in that it removes the restriction for residential high rises to be built anywhere in the city. This is not consistent with the context of most of Tualatin, and based on approval criteria, should not be approved.

The proposed map amendment is similarly problematic, in that approving the building of high rise residential housing is not in context with the community, and there are precedents that the construction of high rise apartments will adversely impact neighboring home values.
Please see below as I will speak to each point for consideration of approval as outlined by the TDC.

TDC 33.070(5) *Approval Criteria.*

a. Granting the amendment is in the public interest.
   Comment: Hundreds of residents have expressed opposition, as well as leadership of all of the Tualatin Residential CIOs. The message from the residents of Tualatin is clear, these amendments are not supported by the people, and are not in the public interest.

(b) The public interest is best protected by granting the amendment at this time.

Comment: Given the approved and in development housing units that have yet to be occupied and that these units are well in excess of the anticipated need of the city by 2040, it is not critical or necessary to change the restriction on residential high rises at this time.Furthermore, public interest would be harmed by granting the amendments, as traffic will worsen on Boones Ferry, adversely impacting quality of life.

(c) The proposed amendment is in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan.

Comment: The comprehensive plan does not call for building residential high rises outside of the downtown area, and the area for the proposed Norwood high rise is specifically left as undeveloped on the maps associated with the comprehensive plan. Per the Tualatin 2040 Comprehensive plan, high density residential/ high rise zone is specifically supposed to be in areas with the greatest access to amenities. The site at Norwood Rd has no access to amenities. See the description copied from the 2040 developmental plan.

High-Density Residential/High-Rise Planning District (RH-HR)
This district supports a wide range of housing types at the greatest density of household living in areas with the greatest access to amenities.

34 TUALATIN 2040

(d)The following factors were consciously considered:

(i)The various characteristics of the areas in the City;

The Norwood apartments project is not in context with the neighborhood and would not match the characteristics of the community.

(ii) The suitability of the areas for particular land uses and improvements in the areas;

The area is not suitable for use as a residential high rise due to the poor traffic infrastructure, inadequate parking plan, lack of access to amenities, and lack of support by public transportation.

(iii) Trends in land improvement and development;

There are no trends of building high rise apartments in any other areas of Tualatin, including presently in the only approved area in downtown. High rise apartment projects should focus on the area where zoning is already approved before considering expanding the zoning area.

(iv) Property values;

There are precedents that construction of a high rise apartment complex is associated with negative impacts on nearby single family home property values:

1. **St. Charles County v. Breeze Park Senior Living Communities, LLC: In this case, the construction of a high-rise senior living complex was found to have a negative impact on the property values of neighboring single-family homes. The court ruled that the high-rise complex, which obstructed the view and privacy of the neighboring homes, caused a reduction in property values, and awarded compensation to the affected homeowners.**
2. **Murr v. Wisconsin: In this case, the construction of a high-rise condominium complex was found to have diminished the value of a neighboring single-family home. The court determined that the high-rise complex, which restricted the development potential and**

use of the neighboring property, resulted in a "taking" of property rights without just compensation.

3. **Hobart v. Hobart West Group: In this case, the construction of a high-rise residential building was associated with a decrease in property values of nearby single-family homes. The court found that the high-rise building obstructed views, created noise and traffic, and resulted in a loss of privacy for the neighboring homeowners, leading to a reduction in property values.**

(v) The needs of economic enterprises and the future development of the area; needed right-of-way and access for and to particular sites in the area;
As the 2040 comprehensive plan, which includes economic development of the Basalt Creek Planning area, does not include the Norwood property, there is no support for the creation of the Norwood high rise apartments having been factored into consideration of economic enterprises and other future development.

(vi) Natural resources of the City and the protection and conservation of said resources;
A forest was destroyed to build Autumn Sunrise, and what remains of the forest is on the proposed land for development. The city has provided no evidence that protection and conservation of natural resources was considered in the proposed map amendment. The proposed text amendment could have far reaching impact on natural resources throughout the city if it enables remaining natural land to be developed as high rise apartments.

(vii) Prospective requirements for the development of natural resources in the City;

(viii) The public need for healthful, safe, esthetic surroundings and conditions; and
South Tualatin has already experienced a drastic reduction in healthful, safe, aesthetic surroundings. A view of a forest is replaced by a field of mud and two looming water tower eye sores. On dry days, construction dust covers the adjacent neighborhoods. Road noise is much louder, and wind blows harder with the trees gone, resulting in many residential fences along Norwood being blown over and homeowners being saddled with repair costs. Removing the remaining forest would further reduce the healthful, aesthetic surroundings of South Tualatin.

(ix) Proof of change in a neighborhood or area, or a mistake in the Plan Text or Plan Map for the property under consideration are additional relevant factors to consider.

(e) If the amendment involves residential uses, then the appropriate school district or districts must be able to reasonably accommodate additional residential capacity by means determined by any affected school district.
Comment: The Sherwood school district commented the ability to accommodate additional students; however TTSD was not contacted to identify how they could accommodate students that may petition to enroll in TTSD so they would not have to travel to Sherwood district schools. There is also no assurance that school district boundary lines will remain in place into the future, so TTSD should also be consulted should boundary lines change.

(f) Granting the amendment is consistent with the applicable State of Oregon Planning Goals and applicable Oregon Administrative Rules, including compliance with the Transportation Planning Rule TPR (OAR 660-012-0060).
Comment: The increased population would overburden Norwood and Boones Ferry Roads. There is already inadequate public transportation. The proposed apartments are not consistent with the Transportation Planning Rule.

(g) Granting the amendment is consistent with the Metropolitan Service District's Urban Growth Management Functional Plan.
Comment: The proposed Norwood apartments, and the building of any high rise in Tualatin, is not needed given at this time or in the foreseeable future given Tualatin's forecasted housing needs as outlined in the 2040 comprehensive plan. Most significantly, the proposed Norwood Apartments are contradictory to the

Metropolitan Service District's Urban Growth Management Functional Plan, specifically Title 12: Protection of Residential Neighborhoods, and Title 13: Nature In Neighborhoods.

(h) Granting the amendment is consistent with Level of Service F for the p.m. peak hour and E for the one-half hour before and after the p.m. peak hour for the Town Center 2040 Design Type (Comprehensive Plan Map 10-4), and E/E for the rest of the 2040 Design Types in the City's planning area.

Comment: This project integrated data from Autumn Sunrise to complete the traffic study, however this study gathered data during the pandemic when driving patterns were drastically different. Additionally, Traffic impact from the Norwood apartments project was not comprehensively considered with the impact of Plambeck Gardens and industrial development in the Basalt Creek Planning area. It is probable that if a comprehensive study were completed, significant failures on both Boones Ferry and Norwood Road would be observed.

(i) Granting the amendment is consistent with the objectives and policies regarding potable water, sanitary sewer, and surface water management pursuant to applicable goals and policies in the Tualatin Comprehensive Plan, water management issues are adequately addressed during development or redevelopment anticipated to follow the granting of a plan amendment.

(j)The applicant has entered into a development agreement. This criterion applies only to an amendment specific to property within the Urban Planning Area (UPA), also known as the Planning Area Boundary (PAB), as defined in both the Urban Growth Management Agreement (UGMA) with Clackamas County and the Urban Planning Area Agreement (UPAA) with Washington County.

As you can see, the proposed text and map amendments do not meet many of the approval criteria s outlined in Tualatin Development Code, and therefore cannot be approved.

As a final note, neighbors have become aware that Horizon Christian School has launched an e-mail campaign. **Please note, many, if not most Horizon members do not live in Tualatin and do not have a vested interest in our town and community.** Please be aware that the motivation for this campaign is **not focused on community benefit**, but rather focused on the church raising capital to build a new sanctuary. As evidence of this, here is a screen grab from the page instructing Horizon members to write the city:

---

from those of us in support of this project as well.

To send an email, **simply click the button below**, it will open a new email on your device that will include a letter to the Planning Commission and their email address already populated. Then just **add your name, address, and phone number at the end of the email** and send it **no later than Friday, April 14.** You may add personal comments if desired.

Thanks for your help with this important effort that we believe will help us secure a new sanctuary for Horizon and bring new residents to our area!

Blessings,

Pastor Stan

Subject: Re: Comment for Planning Commission re: DO NOT APPROVE PTA23-0001 and PMA23-0001

Hello Madeleine,

I wanted to amend my previous comment, as I could not find support for one of the sources that was relayed to me about the potential for negative impact on property values. I could not verify the Hobart v. Hobart West Group case. That said, the construction of an apartment complex could adversely impact nearby home values by creating oversupply in the market in the short term. With over a thousand units aimed to be available in Tualatin in the coming years, it is a recipe to create at least a short term oversupply of housing. It is also possible that the creation and visibility of an apartment complex could impact the resale values of nearby family homes, as up until a year ago all homes with backyards on Norwood had picturesque forest views behind their homes..

It is important that the city council and planning commission are aware that the burden to demonstrate that property values were adequately considered falls to the developer. The developer should need to demonstrate with adequate support, reference, and precedent that their plan will minimize impact to property values, to only provide a statement that such values were considered. The city council must be aware that they decide how to interpret that property values were 'adequately considered.'

Subject: Byrom CIO Statement and Evidence in Opposition of PTA 23-0001 and PMA 23-0001

Hello Madeleine,

Please add the statement from the Byrom CIO to the packet of evidence for city council to consider in their deliberations.

Council Members,

The Byrom CIO is submitting the following document as evidence that the PTA and PMA do not meet approval criteria.

Please review the attached document in full. In particular, please be aware that there is a false narrative of urgency to create additional housing. Based on housing market research, Tualatin has more vacancies, in terms of overall quantity and percentage compared to all of our neighboring cities: Lake Oswego, Tigard, Sherwood, and Wilsonville. This does not include the 941 additional units that have been approved but have not yet hit the market. There is not a rush to grant the PTA, and there are more thoughtful ways for the city to create higher density housing while adhering to the 2040 master plan and Metro's Urban Growth Management Functional Plan which emphasizes development of mixed use spaces and walkable communities. The Byrom CIO Board would be happy to discuss alternative solutions with council members.

Byrom CIO Statement IN OPPOSITION of the Proposed Text and Map Amendments

The proposed text and map amendments cannot be approved as they do not meet all the criteria required for approval.

It is important to note that the approval criteria are not supported by additional clarifications elsewhere in city code. Any additional guidance received from other parties, including city staff, are based on opinion and are not supported by code.

It is also critical to note that as you review the packet, you will see city staff 'findings' from the planning commission meeting on these amendments. These findings are highly subjective and impacted by bias. On May 12, planning staff met with CIO leaders. The city staff were asked for any internal guidance they use on how findings are formulated, and were unable to produce any additional clarifications. This limits the objectivity of city staff findings, so statements labelled as such should be interpreted with caution.

Opposition to Evidence in Record Supporting PTA and PMA

Tualatin's 2019 Housing Needs Analysis:
Proponents of the PTA and PMA highlight that the housing needs analysis identifies the need for 4 acres of RH-HR zoned property in the city. There are multiple sites around the city that, if rezoned, meet the definition of RH-HR zone being of highest density **with the greatest access to amenities**, unlike the site proposed in the PMA. The PTA cannot be approved as the city has too much diversity in access to amenities, and the proposed change the definition to remove RH-HR location restrictions would result in great disparity of RH-HR sites meeting criteria of 'greatest access to amenities.

The site proposed in the PMA will not meet criteria for RH-HR development because it is located in an area that cannot be described as having the greatest access to amenities. This is evidenced by: 1) limited access to public transportation compared to the current RH-HR zone, 2) over 1 mile away from any store, grocery, or restaurant whereas the current RH-HR zone has these amenities within it, 3) limited access to public space as the nearest park to the PMA site is Ibach park which is 1 mile away, whereas current RH-HR zone has park space within it, 4) limited access to medical services at 2.4 miles away from Legacy Meridian Park Hospital, compared to 1 mile from the current RH-HR zone, 5) access to police services with the nearest police station 3.3 miles from the PMA site, compared to being less than 0.25 miles from the current RH-HR zone, and 6) access to municipal services such as the library, which is 3.5 miles from the PMA site, whereas the library is within the current RH-HR zone.

A specific note on limited access to public transportation: Per trimet.org, the 96 bus which operates along Boones Ferry Road and would service the PMA site, does not provide weekend or holiday service, and during weekdays service runs only between 6:04 AM and 9:33 AM, and weekday evenings from 3:55PM to 8:35PM. Intervals between stop times vary drastically, from a minimum of 25 minutes, to a maximum of 1 hour and 47 minutes between stops. This is drastically different compared to public transportation access available at current RH-HR zoned properties in the downtown Tualatin area. Per Trimet.org timetables available on 5/28/2023, the downtown Tualatin RH-HR zones are serviced by the following public transit options: The 97 bus, the 76 bus, the 96 bus, and the WES Commuter Rail. The downtown RH-HR zones are serviced by Trimet 7 days a week, from 6:29 AM to 9:46 PM continuously, with stops about every 20 minutes.

Alternatively, there are significant sites that could be developed as RH-HR that provide the same greatest access to amenities as the current RH-HR zone. These sites are:

1) 15 Acre Undeveloped Lot at: 6031 SW Borland Rd
2) 4.63 Acre Undeveloped Lot at: 6001 SW Borland Rd
3) 7.6 Acre Undeveloped Lot at: 10700 SW Tualatin- Sherwood Rd
4) 2.22 Acre Undeveloped Lot at: 20300 SW 65th Ave
5) The combined undeveloped lots totalling approximately 6.5 acres at: 19951 SW 72nd Ave, 19912 SW 72nd Ave, 19862 SW 72nd Ave, and 19940 SW 72nd Ave, 19740 SW 72nd Ave, and 19788 SW 72nd Ave
6) 2.34 Acre undeveloped lot at 18614 SW Boones Ferry Rd
7) The approximately 2+ acre site at 19100 SW Boones Ferry Rd, the site of the hardware store that burned down.
8) The approximately 3+ acre site of the vacant supermarket. No evidence has been put forth that the present owners have been approached about development of the property.
9) The approximately 4+ acre undeveloped site at 9255 SW Tualatin Rd
10) 15.85 undeveloped Acres at 11500 SW Leveton Dr.
11) The approximately 3+ acre undeveloped site at the corner of SW 95 Place and SW Tualatin-Sherwood Rd.
12) The 5+undeveloped farmland property at 19999 SW 95th Ave, which may be a TTSD owned property

As you can see, **the above sites conservatively total over 54 acres of alternative RH-HR development sites.** The vast majority of these sites are level and undeveloped, resulting in likely similar overhead development costs at the proposed PMA site. It is important to note that this list is not exhaustive; this is a limited number of example sites that could be rezoned that are able to provide access to the greatest amount of amenities to a degree that is far superior to that of the PMA site. Any combination of the development of the alternative sites would far exceed the housing needs analysis requirement of 4 additional acres of RH-HR development development.

2021 Tualatin's Housing Production Strategy

The proponents also argue that their project meets the needs of Tualatin's Housing Production Strategy, identifying limited participants willing to develop available land, and that increasing supply overall improves housing affordability. This is an assumption put forth by the developers that is not supported by evidence, and in fact may reflect the developers having a more foolhardy approach towards risk. There is no evidence in the record that all present owners of the above, more appropriate RH-HR potential sites, are unwilling or unable to develop their properties. It is the burden of the applicants to prove that all potential alternative sites are unable to be developed for this argument to have merit.

Additionally, the argument could be made that no other developers are planning to develop property presently due to current market factors. Per review of City of Tualatin approved housing projects, 941 housing units have been approved for development, of which 496 are multi-family units. These units becoming available in a short period of time may flood the local market with inventory in a relatively short period, lowering prices developers can charge, thus making now not an ideal time for development. The current prime interest rate is 8.25%, making borrowing for development more costly than any other point in time in the past 17 years. The most recent times the prime interest rate was at 8.25% or higher was in June 2006, and prior to that February 2001. Other developers may be more risk averse and may choose to wait until approved inventory is built and filled, and for interest rates to fall. The applicant's argument regarding lack of willing developers is more likely due to

other developers not wanting to take on the degree of risk associated with developing property in the present environment. Indeed, developing in the current environment could be construed as foolhardy, and could create risk for a permanently incomplete and derelict project due to lack of funding.

Furthermore, the 2019 Housing Production Strategy similarly identified a city deficit of 84 detached single family homes and 25 attached single family homes. The PMA site could alternatively be developed as it is currently zoned to meet this aspect of the Housing Production Strategy, rendering the need for the proposed PTA moot.

The proposed text amendment is particularly problematic in that it removes the restriction for residential high rises to be built anywhere in the city. This is not consistent with the context of most of Tualatin, and based on approval criteria, should not be approved.
The proposed map amendment is similarly problematic, in that approving the building of high rise residential housing is not in context with the community, and there are precedents that the construction of high rise apartments will adversely impact neighboring home values.
Please see below as I will speak to each point for consideration of approval as outlined by the TDC.

Consideration of the Approval Criteria

It is up to the city council to interpret and decide on the meaning behind each of the approval criteria. City staff may offer insight regarding how to interpret the criteria, however, the criteria ultimately are as they are written, and it is up to the council to decide appropriately how the criteria were meant to be interpreted.

Approval Criteria per TDC 33.070

One of the core approval criteria is that granting the Amendment is timely. There is no critical need to approve the amendment at this time. The applicants make the case that there is urgent need for additional housing, citing a general housing crisis. The evidence demonstrates that the city of Tualatin has already done excellent work in creating additional housing inventory. Currently, 941 housing units have already been approved and are in various stages of development. The applicants have not demonstrated that approved units already approved would fail to adequately meet immediate housing needs.

According to current housing market trend data available at Rate.com as of 5/28/2023, Tualatin's present rental vacancy rate is 3.7% of 11,329 units, indicating that presently there are approximately 419 available units in Tualatin. Following is a breakdown of how Tualatin's rental vacancies compare to that of neighboring cities:

City	Rental Housing Vacancy Rate (%)	Available Units (as of 5/28/2023)
Tualatin	3.7	419
Wilsonville	3.0	304

Sherwood	1.9	172
Lake Oswego	1.8	207
Tigard	1.4	296

Based on the above data, Tualatin has over 30% more vacant rental units available compared to any other nearby city. **The data is clear, Tualatin has more inventory and is in much less of a 'housing crisis' compared to adjacent cities.** Tualatin has more availability, and more time to consider best approaches to address housing solutions in comparison to neighboring municipalities. It is also important to note that this does not include the 941 approved units that have yet to be built. **When the approved units enter the market, Tualatin could have over 1000 more available units compared to any adjacent city.**

Given the vast amount of already approved projects, there is no need for the city to rush to immediately approve additional housing projects. As the new housing inventory becomes available over time, the city will have significant opportunity to more thoughtfully evaluate if proposed changes to the RH-HR zone would be beneficial.

The council is specifically encouraged to integrate all of the following as elements of an alternative planned text amendment to the RH-HR zone definition:

1. comparatively more limited geographical expansion of the RH-HR zone, such as outward by an additional 0.5 miles outward from present RH-HR zones.

2. Refined language regarding the term 'greatest access to amenities,' such as: RH-HR zoned properties must be within reasonable walking distance (1.5 miles) of all of the following amenities: full service grocery store, gas station, restaurant, a public transit stop with pick up and drop off intervals no greater than every 20 minutes between 7AM and 7PM.

3. A city wide reduced height restriction for future RH-HR zones outside of the downtown area not to exceed 50 ft

4. Any RH-HR zoned structure must be at least 500 ft away from any RML zoned structure to ensure resident privacy.

(a) **Granting the amendment is in the public interest.**

Comment: The reading of this criterion seems to suggest that the public would need to be in support of the amendments.

The residents and leadership of the Byrom CIO do not believe that the PTA and PMA are in the public interest, in that creation of RH-HR zones without 'the greatest access to amenities' creates additional burden on residents of new RH-HR developments far from amenities. Building RH-HR projects are not in keeping with the character of all elements of Tualatin, and therefore the residents and the CIO believe that more restrictive language regarding where the RH-HR zone can be used in the city should remain. The PMA site in particular is vastly different from the surrounding neighborhood and not in keeping in the surrounding neighborhood environment. Particularly, even if present foliage is kept, the upper floors of the proposed 4 story development would easily be able to see into the yards and homes of single family homes that back up to Norwood road. This is a significant loss of privacy that is not in the public interest.

Hundreds of residents have expressed opposition to the PTA and PMA. Leaders from all of the Tualatin Residential CIOs have expressed opposition in particular to the PTA. The message from the residents of Tualatin is clear, these amendments are not supported by the people, and are not in the public interest.

(b) The public interest is best protected by granting the amendment at this time.

Comment: The reading of this criterion indicates that community members' interests are protected by granting the amendment, or that granting the amendment would maintain or improve the quality of life of current and new residents.

As previously stated, quality of life of residents of the proposed project at the PMA site, or any future RH-HR site resulting from the expanded definition in the PTA, would be objectively worse than residents of current RH-HR zones. Building RH-HR zoned properties in areas that do not have the greatest access to amenities would be inferior to present RH-HR zones, as it would prove burdensome for the high concentration of residents to need to travel for work and any necessities. Residents in RH-HR sites that are not close to the highest concentration of amenities would have a markedly inferior quality of life compared to those who live in current RH-HR zones.

Homes presently along Norwood Rd across from the PMA site, as well as any other single family homes in Tualatin adjacent to a future RH-HR zoned property developed to maximum height as proposed by the PTA, would experience a significant loss of privacy in their homes and yards. Given the approved and in development housing units that have yet to be occupied and that these units are well in excess of the anticipated need of the city by 2040, it is not critical or necessary to change the restriction on residential high rises at this time. Furthermore, public interest would be harmed by granting the amendments, as traffic will worsen on Boones Ferry, adversely impacting quality of life.

(c) The proposed amendment is in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan.

Comment: Interpretation: Logically, the intention of having a comprehensive development plan would be to have foresight for how the community is to be developed, and then to follow that plan accordingly for the time period in which it was intended. It stands to reason that interpretation of this criteria would require the applicant to provide significant justification as far as how the proposed applications meet the plan, or significant justification as to why the plan is inadequate and needs to be revised.

The Tualatin Comprehensive Plan does not make any mention of building residential high rises outside of the downtown area, and the PMA site is specifically left as undeveloped on all of the maps associated with the comprehensive plan. The applicant makes no claim as to the inadequacies of the 2040 Tualatin Comprehensive Plan to justify the addition of their development project. All concept plans for Southwest Tualatin, Northwest Tualatin, and Basalt Creek Development areas do not have plans for integration of the RH-HR zone, and the past approved 2005 Tualatin downtown concept plans for development of RH-HR zones or mixed use zones have not been explored. To approve the PTA and PMA, the council would be ignoring all the time and resources put into existing city concept plans, negating the purpose of conducting such plans and studies.

The residents of Tualatin desire for the city to be developed by a unified, intentional, long term plan that is followed. City staff's messaging to residents has been that this is the purpose of the 2040 Comprehensive Plan. If this is true, the council should follow the plan which does not include the PMA and PTA.

Additionally, per the Tualatin 2040 Comprehensive plan, high density residential/ high rise zone is specifically supposed to be in areas with the greatest access to amenities. The site at Norwood Rd has no access to amenities compared with the current downtown RH-HR zones. See the description copied from the 2040 developmental plan:

High-Density Residential/High-Rise Planning District (RH-HR)
This district supports a wide range of housing types at the greatest density of household living in areas with the greatest access to amenities.

Furthermore, per the Tualatin 2040 plan, the developed property is unnecessary. The plan already established a goal for for 20 year housing supply, which existing development has already been approved to surpass the 2040 goal, as already cited in this document. Policy 3.1.2 of the Tualatin 2040 plan already established a plan for multifamily zoning districts, which DID NOT include the PMA site.

(d)The following factors were consciously considered: Interpretation: The Tualatin Development Code is not clear on who must consciously consider the following factors. Given that this is a quasi-judicial review, it would be most cautious to interpret this as applying to both, the developer, and the city council in their deliberations on the proposed amendment. The developer should demonstrate that these factors were considered, but as the city council is weighing if the amendment is in the best interests of the city of Tualatin, the city should also consciously consider these factors in their decision making. If the developer only had to demonstrate consideration of these factors, and it is a matter of yes or no if the developer did so, then the procedure would not be a quasi-judicial review. The intention of the quasi- judicial review is for the city council to decide what is in the city's best interests. The council is encouraged to read this as "the council considered how the following factors would be enhanced, unimpacted, or worsened by the proposal, and that the impacts on these factors influence final decisions on approval:

(i)The various characteristics of the areas in the City; Interpretation: The city council is encouraged to read this as that there is precedence that the proposed amendment would be similar, if not the same, as existing structure and zoning combinations in the local area of Tualatin impacted by the amendment, as well as in the whole of the city. That the amendments would not drastically alter the characteristics of a neighborhood, or the city as a whole.

The Norwood apartments project as pertaining to the PMA is not in context with the neighborhood and would not match the characteristics of the community. The next nearest quasi residential structure of similar height is Marquis assisted living, a shorter, 3 story structure located 1.9 miles from the proposed development site at SW Boones Ferry and SW Sagert. The approved, though as of yet not constructed Plambeck Garden apartments, will be over 1000 feet from the nearest RML zoned structure. Creating a 50 foot, 4 story structure within less than 500 feet of single family homes, as proposed in the PMA, is without precedent in the Byrom CIO community, and no abutment of an RH-HR zone within 500 feet of RML single family structures as proposed by the PMA exists anywhere else in Tualatin. The PMA is not in keeping with the characteristics of the city.

It is important to note that the property could be developed to accommodate multi family structures to the maximum density allowed in the current RML zoning, without requiring a zone change. An additional alternative is that the applicant repeal the PTA application and apply for a PMA to high density residential zone. The maximum structure density of 25 units per acre is near the applicant proposed density, but with

more stringent structure requirements that are in keeping with the Byrom neighborhood characteristics. The reduced structure height of the RH zone to 35 feet would also limit adjacent RML neighbor concerns about privacy.

(ii) The suitability of the areas for particular land uses and improvements in the areas; Interpretation: The council is encouraged to consider this guideline in terms of all aspects of suitability for land use, including the physical aspects of the site for the proposed use, as well as if the proposed zone change in regards to the PMA meets the full definition of the zone.

Regarding the PMA, the area is not suitable for use as a residential high rise due to factors already outlined in this document, including lack of access to amenities, and lack of support by public transportation. Regarding the PTA, the city of Tualatin has distinct areas with distinct characteristics which are reflected most commonly by land use zones. Zones vary, and transitions from one area of housing density to another are not abrupt, but rather fade across multiple zones from high to low density. If the PTA is approved, it could enable RH-HR zones to be created on any available land, creating very abrupt density transitions. These abrupt transitions are avoided in city planning as it causes neighborhoods to not have a cohesive character, in addition to the privacy concerns of having 50 foot buildings adjacent to single level homes. A review of the current Tualatin residential zoning map, accessed 5/28/2023 at tualatinoregon.gov reflects that no RH-HR zone is directly adjacent to a RL or RML zone. All RH-HR zones are instead adjacent to commercial, industrial, high density, or medium high density housing. In examining additional high density residential zones, over 95% of the boundaries are adjacent to commercial, industrial, or medium high density housing, and are never directly adjacent to low density housing zones. Precedence based on the current zoning map does not support placement of an RH-HR zone adjacent to an RML zone.

(iii) Trends in land improvement and development;
Interpretation: The city looks at existing trends for precedence of similar changes occurring in other jurisdictions. While the state and metro encourage cities to increase the available housing supply, the city of Tualatin has already done a great deal to improve housing supply. As already stated, Tualatin has over 30% more rental vacancies than any of the surrounding metro cities, without including the 941 approved units that have yet to be built. There are no trends of building high rise apartments in any other areas of Tualatin, including presently in the only approved area in downtown. High rise apartment projects should focus on the area where zoning is already approved before considering expanding the zoning area.

(iv) Property values;
Interpretation: The city council should consider if the development could adversely impact existing home property values, and if so, encourage modification to the amendment to minimize property value impact. The construction of an apartment complex could adversely impact nearby home values by creating oversupply in the market in the short term. With over a thousand units aimed to be available in Tualatin in the coming years, it is a recipe to create at least a short term oversupply of housing. It is probable that the creation and visibility of a 50 foot high apartment complex will impact the resale values of nearby family homes, as up until a year ago all homes with backyards on Norwood had picturesque forest views behind their homes. This is particularly the case for the homes along Norwood that will experience significant privacy loss from dozens of windows and balconies with view of the rears of their homes and yards.

The PTA could be amended to minimize impact to property values by adding a stipulation that any RH-HR zoned structure be at least 1000 feet from any structure zoned RML or RL, and require planting of a tall planting screen of trees if the RH-HR structure is within 1500 feet of an RML or RL zoned structure.

It is important that the city council and planning commission are aware that the burden to demonstrate that property values were adequately considered falls to the developer. The developer should need to demonstrate with adequate support, reference, and precedent that their plan will minimize impact to property values. It is not adequate proof to only provide a statement that such values were considered. The city council must be aware that they decide how to interpret that property values were 'adequately considered.'

(v) The needs of economic enterprises and the future development of the area; needed right-of-way and access for and to particular sites in the area;
As the 2040 comprehensive plan, which includes economic development of the Basalt Creek Planning area, does not include the Norwood property, there is no support for the creation of the Norwood high rise apartments having been factored into consideration of economic enterprises and other future development. Furthermore, the 2040 plan, metro guidance documents, and various Tualatin concept plans identify the need to further explore mixed use zoning options. Mixed use zoning vastly improves quality of life in urban areas as well as attracts businesses and reduces reliance on vehicles for basic needs. The needs of economic enterprises and the general good of the city could be enhanced by considering mixed use commercial and medium high density housing zone creation.

(vi) Natural resources of the City and the protection and conservation of said resources;
A forest was destroyed to build Autumn Sunrise, and what remains of the forest is on the proposed land for development. The city has provided no evidence that protection and conservation of natural resources was considered in the proposed map amendment. The proposed text amendment could have far reaching impact on natural resources throughout the city if it enables remaining natural land to be developed as high rise apartments.

(vii) Prospective requirements for the development of natural resources in the City; Interpretation: The council should consider what are the city's requirements for development of natural resources. It is an important component of Tualatin's identity that Tualatin is a Tree City. Given the destruction of large swaths of forest in Tualatin, the council should consider how further approval of development at the expense of natural resources is impacting the city's identity as a Tree City.

(viii) The public need for healthful, safe, esthetic surroundings and conditions; and
South Tualatin has already experienced a drastic reduction in healthful, safe, aesthetic surroundings. A view of a forest is replaced by a field of mud and two looming water tower eye sores. On dry days, construction dust covers the adjacent neighborhoods. Road noise is much louder, and wind blows harder with the trees gone, resulting in many residential fences along Norwood being blown over and homeowners being saddled with repair costs. Removing the remaining forest would further reduce the healthful, aesthetic surroundings of South Tualatin.

(ix) Proof of change in a neighborhood or area, or a mistake in the Plan Text or Plan Map for the property under consideration are additional relevant factors to consider.

The neighborhood south of Norwood Rd is changing in that it is becoming developed from farmland. It is an overextension to state that any development that is occurring is enough rationale to develop a property in the area to the highest density standard that the city has available.

(e) If the amendment involves residential uses, then the appropriate school district or districts must be able to reasonably accommodate additional residential capacity by means determined by any affected school district.

Interpretation: The criterion indicates that *any* potentially impacted school district be contracted to ensure that the schools can accommodate additional students. The Sherwood school district commented that they do have the ability to accommodate additional students; however TTSD was not contacted to identify how they could accommodate students that may petition to enroll in TTSD so they would not have to travel the drastically further distances to Sherwood district schools. TTSD schools at all levels, elementary (Byrom Elementary - 1.2 miles away), middle school (Hazelbrook - 4.1 miles away), and high school (Tualatin High School - 0.5 miles away), are in much greater proximity to the PMA site compared to all Sherwood district schools (Hawks View Elementary - 5.3 miles away; Sherwood Middle School - 5.8 miles away; Sherwood High School - 5.8 miles away) , therefore it is reasonable to expect that some increased volume would impact TTSD schools. There is also no assurance that school district boundary lines will remain in place into the future, so TTSD should also be consulted should boundary lines change.

(f) Granting the amendment is consistent with the applicable State of Oregon Planning Goals and applicable Oregon Administrative Rules, including compliance with the Transportation Planning Rule TPR (OAR 660-012-0060).

There are significant methodological concerns with the submitted traffic studies. Traffic studies occurred during the pandemic emergency, during which uncharacteristically low traffic volumes occurred, skewing results. Traffic studies also failed to account for all proposed development projects impacting lower Boones Ferry Rd near Norwood Rd, including all residential projects as well as increased traffic from proposed light industrial traffic related to the Basalt Creek Concept Plan. To adequately consider traffic factors, a new study should be conducted based on current traffic patterns, and comprehensively include all approved and proposed projects for housing south of Norwood Road and any development that is part of the Basalt Creek Concept Plan.

(g) Granting the amendment is consistent with the Metropolitan Service District's Urban Growth Management Functional Plan.

The spirit of the Metropolitan Service District’s Urban Growth Management functional plan is to develop efficient, mixed use, walkable, transit friendly urban communities (3.07.620(c - d)). The proposed map and text amendments do not serve ANY of these goals. Most significantly, the proposed Norwood Apartments are contradictory to the Metropolitan Service District's Urban Growth Management Functional Plan, specifically Title 12: Protection of Residential Neighborhoods, and Title 13: Nature In Neighborhoods. It is worth noting that the proposed luxury apartments do not qualify as affordable housing, and do not count to Tualatin’s voluntary affordable housing production goals outlined in Title 7.

According to Title 11: Planning for New Urban Areas, plans for development within the urban growth boundary should contribute to mixed use, walkable, transit friendly communities. The proposed apartment complex does not meet any of the above criteria, and the proposed text amendment change would not further future

development of residential high rise in line with these goals. Tualatin should create a mixed use zone with specific criteria separate from the high density high rise criteria.

(h) Granting the amendment is consistent with Level of Service F for the p.m. peak hour and E for the one-half hour before and after the p.m. peak hour for the Town Center 2040 Design Type (Comprehensive Plan Map 10-4), and E/E for the rest of the 2040 Design Types in the City's planning area.

Again, there are significant methodological concerns with the submitted traffic studies. Traffic studies occurred during the pandemic emergency, during which uncharacteristically low traffic volumes occurred, skewing results. Traffic studies also failed to account for all proposed development projects impacting lower Boones Ferry Rd near Norwood Rd, including all residential projects as well as increased traffic from proposed light industrial traffic related to the Basalt Creek Concept Plan.This project integrated data from Autumn Sunrise to complete the traffic study, however this study gathered data during the pandemic when driving patterns were drastically different. Additionally, Traffic impact from the Norwood apartments project was not comprehensively considered with the impact of Plambeck Gardens and industrial development in the Basalt Creek Planning area. It is probable that if a comprehensive study were completed, significant failures on both Boones Ferry and Norwood Road would be observed.

For all of the above reasons, the city cannot approve the proposed map and text amendments: PMA23-0001, and PTA23-0001.

Thank you, and you are welcome to contact the Byrom CIO Executive Board for further information.

Good Morning,

Thank you for your email. Your comments and attachments have been received and will be added to the public record which will be presented to Council at the public hearing. The public hearing has been continued from its original date (May 22, 2023) and will be heard by Tualatin City Council on June 12, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

Subject: Inter CIO Statement for hearing on PTA 23-0001 and PMA 23-0001

Hi Madeleine,

Please see the attached and add it to the packet and the documents to be included in the report from city staff.

May 28, 2023

To The Tualatin City Council

Re: Joint Residential CIO Executive Board Member Statement on PTA 23-0001 and PMA 23-0001

The leadership of all Tualatin CIOs met recently and discussed the proposed text and map amendments: PTA23-0001 and PMA23-0001. **The Executive Board members of the Tualatin CIOs identified below agreed that these proposed text and map amendments are NOT in the best interests of the current and future residents of Tualatin, and therefore should not be recommended for approval.**

Reasons to not approve the proposed text and map amendments:
1. The rationale to remove the restriction on residential high rises and enable them to be built anywhere in Tualatin is rooted in a concern for lack of affordable housing. It is important to note that the proposed apartments have been described by the builder as "class A, luxury apartments." These are not low income or subsidized housing. Additionally, studies have recommended that the city of Tualatin should add about 1000 housing units by 2040. Based on current construction and approvals in the city, about 1200 units will already be added to housing inventory, well above the 2040 target. There is not a need to rush to build more housing units.

2. Traffic - South Boones Ferry Road already has significant development planned: light industrial development, the Autumn Sunrise housing development, and the Plambeck Gardens subsidized housing community. Traffic studies complete to date have never examined the cumulative impact of all of the proposed development projects, and some of the studies that have been completed identify that Boones Ferry will fail, and already is failing to effectively manage traffic, especially during peak hours. Adding the 286 housing units specific to the Norwood high rise apartment project would only further worsen traffic. South Tualatin is heavily car dependent. There is inadequate public transit, and there are no stores, restaurants, or places of employment for miles, requiring all new and current residents to drive, creating a recipe for gridlock on Boones Ferry Road.

3. **Most significantly, the proposed text and map amendments do not meet Tualatin Development Code Approval Criteria, specifically the following items:**
TDC 33.070 (5) (A) - Granting the amendment is in the public interest. - As representatives of all of the Tualatin CIOs representing residents of the city, we identify that the proposed amendments are not in the public interest.
TDC 33.070 (5) (B) - The public interest is best protected by granting the amendment at this time. Given the approved and in development housing units that have yet to be occupied and that these units are well in excess of the anticipated need of the city by 2040, it is not critical or necessary to change the restriction on residential high rises at this time.Furthermore, public interest would be harmed by granting the amendments, as traffic will worsen on Boones Ferry, adversely impacting quality of life.

TDC 33.070 (5) (C) - The proposed amendment is in conformity with the goals and policies of the Tualatin Comprehensive Plan. The comprehensive plan does not call for building residential high rises outside of the downtown area, and the area for the proposed Norwood high rise is specifically left as undeveloped on the maps associated with the comprehensive plan. Per the Tualatin 2040 Comprehensive plan, high density residential/ high rise zone is specifically supposed to be in areas with the greatest access to amenities. The site at Norwood Rd has no access to amenities. See the description copied from the 2040 developmental plan.

High-Density Residential/High-Rise Planning District (RH-HR)
This district supports a wide range of housing types at the greatest density of household living in areas with the greatest access to amenities.

34 TUALATIN 2040

Due to the above factors, the leadership of all of the Tualatin CIOs do not support the proposed text amendment and map amendments. Alternatively, CIO leadership would be happy to consult regarding other changes that could be more beneficial to current and future residents of Tualatin. CIO leadership would gladly participate in conversations regarding alternative development of the site at Norwood Road, particularly development options that minimally impact traffic and increase livability of the community.

Vista Residential Partners/Horizon Community Church Plan Amendments Planning Commission Public Hearing
Planning Commissioner R.S.Hledik notes 4/20/23

-The current plan designations of the 9.2 acre site allow expansion of institutional buildings such as churches, schools, government offices and community recreation centers and swimming pools on 8.2 acres zoned Institutional (IN) as well as construction of a maximum of 25 dwelling units on 1.0 acre zoned Medium Low Density Residential (RML).

-The proposed plan map amendment for High Density-High Rise Residential (RH-HR) zoning would eliminate expansion of institutional uses and instead would allow construction of up to 276 dwelling units on the entire 9.2 acres ... more than 10 times the current allowed amount of housing.

-The requested plan text amendment would remove the "locational factors" criteria from the city development code. This would allow the relocation of high density-high rise residential zoning from the only area in the city that is currently designated for such development, i.e., a portion of the Central Urban Renewal area. For the proposed amendment, the zone would be applied to property located at the southern periphery of the city. The change would also allow other areas of the city to be considered for high density-high rise residential use.

-Additionally, the amendments would fulfill a shortfall of 4 acres of high density-high rise land as identified in the city's Housing Needs Analysis:

- -This is because the central city location has been determined to be unbuildable.
- -The proposal would also more than double the amount of high density-high rise land needed to meet the city's identified need for this housing type.

-A number of Findings suggests that approval of the amendments would generally contribute to achieving the city's goals, including 8% overall residential density with a housing mix consisting of 45% of affordable multifamily housing. It should be noted, however, that the multifamily housing proposed in the amendments is not intended to be "regulated affordable housing" or housing for households that are "cost burdened", i.e., households that spend a disproportionate amount of their income on rent or mortgages.

-A number of other Findings suggests that the amendments satisfy other criteria required by the state planning goals and administrative rules, Metro urban growth management requirements, and Tualatin comprehensive plan and development code standards.

-Missing from the Findings is adequate justification as to how the proposed amendments comply with Goal 3.1 of the Tualatin Comprehensive Plan.

-Goal 3.1 requires the city to "designate a 20-year land supply along with urban services planned to support the housing types and densities identified in the Housing Needs Analysis" (emphasis added). The current Housing Needs Analysis identifies a deficit of only 4 acres for high density-high rise residential land. The proposed amendments would add 9.2 acres to the supply – or more than twice as much as is needed. This would result in an unsubstantiated surplus of 5.2 acres of land for this purpose.

- Since the land in the city center is not suitable for high density-high rise residential development, and because a considerable amount of residential development has been approved in recent months, and because the city code has been changed to comply with a state mandate to allow multifamily dwellings in zones that were formerly reserved solely for single family homes, it may be time to update the Housing Needs Analysis.

-But until new data is obtained and evaluated we do not have a clear understanding as to how the city's housing mix and acreage allocation calculations may need to be adjusted. Rather than relying upon generalized

assumptions about future population growth, we are obliged to justify land use decisions according to the housing types and densities that are tabulated in the current Housing Needs Analysis. The proposal to add 9.2 acres of high density-high rise residential land, i.e., 5.2 acres more than just the 4 acres identified in the needs analysis, is not consistent with Goal 3.1. Therefore, without further justification in the Findings, the proposed level of development is not appropriate and does not satisfy the criteria necessary for approval of the amendments.

-Also absent from the Findings is adequate justification as to how the proposed amendments comply with the criteria of Chapter 10 of the Tualatin Comprehensive Plan regarding the objective of the High Density Residential/High Rise Planning District (RH-HR).

-Chapter 10 states that the objective of the High Density Residential/High Rise Planning District (RH-HR) is to "support a wide range of housing types at the greatest density of household living in areas with the greatest access to amenities"(emphasis added).

-Of all the city's residential zones, the High Density Residential/High Rise zone provides 'the greatest density of household living" by requiring a density of 26 to 30 dwelling units per acre. By comparison, the city's other High Density Residential (RH) zone allows a maximum of only 25 units per acre.

-Even without reviewing legislative history, it is self-evident as to why land in the Central Urban Renewal area was originally zoned for high density-high rise residential development. This location is in close proximity and has convenient access to a significant number of amenities. Included among the many amenities are a wide range of existing employment opportunities, a variety of established office services and retail stores and restaurants, city hall, the police department and municipal court, the library, a major city park and community center, and access to transit bus stops and a commuter rail station. Many of these amenities are within walking distance of the zoned area, making this central city location initially appropriate for the highest level of residential density. The amount and types of amenities available in close proximity to each other also provide reasonable examples and set expectations and a standard for determining where, or even whether, other "areas with greatest access to amenities" exist in the city.

-In contrast, the Findings for the proposed 9.2 acre plan amendment indicate that this site is near the Basalt Creek development area which offers only a limited number of amenities in close proximity to the site, specifically "public transportation bus lines, future goods and services, and employment areas". When compared to the fairly high standard established by the currently zoned high density-high rise land in the city center, the significantly fewer amenities found near the proposed amendment site do not justify the area as having "the greatest access to amenities". Therefore, without further justification in the Findings, designating the 9.2 acre site for the highest level of residential density available in the city's planning districts is not appropriate and does not satisfy the objective criteria of Chapter 10 necessary for approval of the amendments.

-The Findings as presented do not justify the following:

1) **The proposed addition of a surplus of 5.2 acres of high density-high rise residential land in excess of the 4 acre deficit identified by the Housing Needs Analysis, and**
2) **The proposed application of the high density-high rise residential plan designation to 9.2 acres which would allow the highest level of residential density to be developed in a location at the city's southern periphery that is not in an area with "greatest access to amenities".**

-Due to the lack of Findings, the proposed amendments do not conform with requirements of the Tualatin Comprehensive Plan Goal 3.1 and Chapter 10.

-Therefore, criteria for approval of the proposed plan map and text amendments are not satisfied at this time.

Subject: No on rezoning for high-rises on Norwood

City Council,

I agree with the planning commission recommendation to deny the amendments to allow high-density high-rises on Norwood. The negative impact on existing residents and infrastructure would be too great, and the area is not prepared for and would not well support such high-density housing.

High-rise apartments belong in downtown Tualatin.

Please vote no on.

Thank you.

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: PMA 23-0001 Med to high density

Hello,

I'd like to go on record that changing the med to high density apartment building is not a good idea.

Even without the new horrible development going in, the traffic is a nightmare. I can't go into Wilsonville or Tualatin after 4:00pm on most days due to traffic backup. Some nights the line of cars going towards I-5 ramp is past the high school.

The city has ruined Tualatin with this new development off Norwood. I've been a resident for 29 years and never expected this. Unfortunately Tualatin will no longer be my forever home.

Thanks, Alisa

I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Consider the needs of the entire City.

This entire situation (deforestation, destruction of roadway and future development) is making this 29 year resident put up a for sale sign. I no longer value living in the city of Tualatin.
Thank you all for being strong leaders for the community!

Subject: No to High Rise in Tualatin

Unfortunately I'm not sure how much longer I'll be a Tualatin resident. It will be 30 years in July, but with the current construction projects happening along Norwood, life in Tualatin has been destroyed. What I thought would be my forever home is now a nightmare.

I regularly volunteer on City events and both my daughters participated in YAC while they attended Tualatin high school and I've always been very proud to be a resident of the city.

It's disgusting to now have to drive down Lower Boones Ferry road and see even more destruction happening. Three more old homes are being destroyed to make room for an unbearable neighborhood development which will further impact the transportation and lifestyle in Tualatin. I can't even go into downtown Tualatin on Friday afternoon due to traffic. And if I need to go into Wilsonville, the time of day also needs to be taken into account as to if I'll be able to get onto Lower Boones ferry from Norwood or if traffic will be backed up for blocks on 65th turning onto Elligsen.

I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area.

Subject: Mysterious flyers we received regarding "high rise" apartments in "downtown Tualatin"

Hi. My wife and I are newcomers, having moved here only about 2 ½ years ago so we had no knowledge of the history of this project until flyers were taped to the front doors of every house in our neighborhood (Martinazzi Woods) over the weekend. My initial reaction was, and is, suspicion since no group or individuals are identified as sponsors of this drive, which asks everyone to send you personally a pre-written statement of opposition. There is, of course no contact information....I imagine you're aware.... We're both older (early and mid-70s) and chose Tualatin for affordability and greater proximity to our two kids, who are in L.A. and New York.

We drove out to the area in question last night and noticed, of course, that there is already a subdivision under construction and abundant vacant land surrounding the church. We were also struck by the term "high rise," since even the revised permissible height would not be a "high rise" in any conventional meaning of the term. The density of the proposed project is high in terms of housing units, but in terms of the available land, it doesn't strike us as excessive. I am assuming that the 236 units proposed would be market rate (meaning tenants who are employed but needing affordable rents) or low income. If that correct? I didn't read the entire Planning file, but nothing jumped off the page at me that addresses that question.

We both worked careers in Los Angeles and I was a reporter for 26 years, including at the L.A. Times. We moved to Kauai in 2002 and I got back into the news business working in a hyper-local market because of a need for accurate information in an island environment. I had never planned to return to journalism. In both of those capacities, but especially on Kauai, I covered housing shortage/crisis issues intensively and the crisis is real on all of the islands, regardless of the tourism/paradise stereotype. I saw many of the same opposition schemes when it came to adding affordable housing near high end luxury homes.

I'm not sure what to make of this Tualatin controversy, though my gut tells me that, at its base, it's about socioeconomic, or even racial, opposition. My wife and I want to take a position, but it's not entirely clear what that should be. The mysteriously anonymous leaflet campaign that relies on hyperbolic descriptors represents a number of red flags to me. I've actually thought about writing something about it, though it's not at all clear for whom. Would you be comfortable talking about this? Thanks.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. Horizon Community Church is a refuge in the midst of so much anxiety for so many families. I am certain it will be so for the potential additional families that this project would bring into our community.

The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.
Please support and approve the Map and Text Amendments.

Thank you,

Ana Bautista

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Andrew Malm

Mr. Mayor and Council Members,

Tualatin is our home. It was, is and should continue to be what we moved here for. A beautiful, balanced community with good schools, parks and sense of place. The consideration of high density housing in multi story buildings outside of the core changes all that. Consider what our community is and what is should continue to be. Buildings and density of this type in the proposed area is a mistake we cannot recover from. Please consider the future of our community when voting NO on the proposed code changes.

I say NO to PTA23-001 and PMA 23-001applications as these are not in the best interest of the public and these applications are not appropriate for the area. These types of structures and density belong downtown ONLY where infrastructure can support them and those who live there. Please consider the needs of all.

Respectfully,
Mr. Andy Clarke
Ibach Park

I agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community. For now I am requesting City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.

Thank you,

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

Subject: Please do the right thing for Tualatin tax payers and residents

Hello and thank you for allowing me to submit my comments,

I have lived in or near Tualatin since 1978, with a child attending School in the Tualatin School district – our family shares the City's desire to offer affordable housing, address big picture objectives and hopes our elected officials make logical decisions which represent their Constituents values and work within the existing building codes Neighbors of Norwood bought into – please stop the PTA23-0001 and PMA23-0001 applications.

This all started when the City approved the Plambeck apartment project (also on Norwood), in which developers requested to bypass the city zoning for height restrictions. It's mind boggling why this request was ever approved & set into motion a precedent & slippery slope which is unfolding recklessly and a money grab from non-local developers guised as building "affordable housing" when in fact – they are salivating at the opportunity to build high end apartments and townhomes in the suburbs (openly advertising as such), which were never designated for such developments. There are designated areas for such projects readily available, it's just that these developers can't command high end prices in these designated areas – this is a money grab – not "affordable housing".

The original proposal the City approved on the Plambeck apartments on Norwood was good, it met the City's broader planning objectives for affordable housing, was within City codes, Aesthetically appealing and not detrimental to neighborhoods property rights. But later the developers said "the property was difficult to develop due to challenging topography", therefore requested a "variance" to increase to 4 stories (2 stories about the zoning laws)…

That "argument" has been proven false – all anyone has to do is look at the Lennar new home development on Norwood (adjacent to this project) – I walked the cleared land before improvements – the topography revealed tremendous up & down elevation changes no different than what the adjacent Plambeck original development plan faced. While I'm no

fan of Lennar and how they managed to remove their promised “tree preservation zone” (which is a whole other issue which should never have occurred) Lennar validated the ability to work within those parameters and within the existing building codes! The Plambeck developers whom purchased that property knew the topography before they bought it, they just wanted to change the rules & the City obliged (ref. attached visual how the Plabeck project changed from the original proposal).

It's simply wrong what was allowed to be approved and now appears to be leading to continuous like projects being approved! These developments are not benefitting those in need of affordable housing, only adding to an already extremely congested traffic area (trying to bypass I-5 rush hours) – all you have to do is drive down boones ferry road in the late afternoons – it backs up from the north Wilsonville I-5 exit all the way to Tualatin High School!

These projects only benefit developers bottom line, not the neighbors of Norwood. We can hire lawyers and fight the email campaigns for those lobbying for zoning changes and high rises in neighborhoods (including the community church whom wants to profit from selling their property and of course developers), but it's time to our elected officials to represent the residents of Tualatin & not big business, non-local money grabbing developers!

Sincerely concerned neighbor,

Arthur Robert Taylor; 22675 SW Vermillion Drive, Tualatin

What was proposed and Tualatin agreed to annex the property into Tualatin & all this project to move forward

- **Meets zoning criteria**
- **Aesthetically appealing**
- **Not detrimental to other property owners & rights**
- **Achieves objective of providing affordable housing**
- **HARD TO ARGUE SUCH A PROJECT**

What the local community & neighbors is going to get?

- **None of the above, except "Affordable housing"**

Table 43-3 Development Standards in the RH Zone

STANDARD	REQUIREMENT	PROPOSAL
Structure Height	35 feet	54 feet

Subject: Planning has heard the tax payers of Tualatin

Hello and thank you for allowing me to submit my comments,

I hope the Tualatin City Council will follow Planning's recommendation to adhere to established zoning standards (specifically height limits) in our neighborhoods.

I have lived in or near Tualatin since 1978, with a child attending School in the Tualatin School district – our family shares the City's desire to offer affordable housing, address big picture objectives and hopes our elected officials make logical decisions which represent their Constituents values and work within the existing building codes Neighbors of Norwood bought into – please stop the PTA23-0001 and PMA23-0001 applications.

This all started when the City approved the Plambeck apartment project (also on Norwood), in which developers requested to bypass the city zoning for height restrictions. It's mind boggling why this request was ever approved & set into motion a precedent & slippery slope which is unfolding recklessly and a money grab from non-local developers guised as building "affordable housing" when in fact – they are salivating at the opportunity to build high end apartments and townhomes in the suburbs (openly advertising as such), which were never designated for such developments. There are designated areas for such projects readily available, it's just that these developers can't command high end prices in these designated areas – this is a money grab – not "affordable housing".

The original proposal the City approved on the Plambeck apartments on Norwood was good, it met the City's broader planning objectives for affordable housing, was within City codes, Aesthetically appealing and not detrimental to

neighborhoods property rights. But later the developers said "the property was difficult to develop due to challenging topography", therefore requested a "variance" to increase to 4 stories (2 stories about the zoning laws)…

That "argument" has been proven false – all anyone has to do is look at the Lennar new home development on Norwood (adjacent to this project) – I walked the cleared land before improvements – the topography revealed tremendous up & down elevation changes no different than what the adjacent Plambeck original development plan faced. While I'm no fan of Lennar and how they managed to remove their promised "tree preservation zone" (which is a whole other issue which should never have occurred) Lennar validated the ability to work within those parameters and within the existing building codes! The Plambeck developers whom purchased that property knew the topography before they bought it, they just wanted to change the rules & the City obliged (ref. attached visual how the Plabeck project changed from the original proposal).

It's simply wrong what was allowed to be approved and has lead to developers pushing for more projects to be approved via either "exceptions" or outright changing the zoning standards! These developments are not benefitting those in need of affordable housing, only adding to an already extremely congested traffic area (trying to bypass I-5 rush hours) – all you have to do is drive down Boones Ferry road in the late afternoons – it backs up from the north Wilsonville I-5 exit all the way to Tualatin High School!

These projects only benefit developers bottom line, not the neighbors of Norwood. We can hire lawyers and fight the email campaigns lobbying for zoning changes and high rises in neighborhoods (including the community church whom wants to profit from selling their property and of course developers).

Please do the right thing, and represent the residents of Tualatin and not big business, non-local money grabbing developers!

Sincerely concerned neighbor,

Arthur Robert Taylor; 22675 SW Vermillion Drive, Tualatin

High-rise buildings do not belong in the residential areas of our city.
Please keep them inside the current zoned areas.
Please do not change the high-density zones at this time.
Sincerely,
Arva Bartos

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the curren code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

To the Tualatin Planning Board:

Please listen with compassion and concern to your community members when we ask you to say NO to PTA23-0001 and PMA23-0001 applications. These are not in the best interest of the citizens of Tualatin and are not appropriate for this area. A high-rise belongs in downtown Tualatin ONLY where infrastructure can support it. Consider the needs of the entire City.
Thank you for listening and considering the impact that your actions have on thousands of your neighbors. We depend on you to do the right thing.

Subject: Subject: No to PTA23-0001 and PMA23-0001

I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Consider the needs of the entire City.
I also ask that you consider the proven impacts of putting apartments directly next to an established neighborhood, including the 500 additional vehicles it will add to Boones Ferry and crime.

Given AKS's failure to implement promised forestry buffer zones on their previous development on the Autumn Sunrise Development on Norwood Road between 89th and Vermillion, it is my opinion that we should not grant them any more leeway for any more development. Period. Autumn Sunrise is now a barren moonscape that allows us the privilege of seeing hearing and smelling Interstate 5 and the two unsightly water tanks and unrestricted damaging winds. We miss greatly what we had when there was a beautiful forest, sound and smog barrier and windbreak. We wonder if they ever really meant to preserve ANY trees. AKS appears to be a logging company, first and foremost.

In addition, I object to their plan beyond this annexation and partition to **create an apartment complex directly next to and established single-home neighborhood**. Doing so will have a

negative effect on home values and increase likelihood of crime in what has been a relatively crime-free area. This effect is documented (see attached letter below)

Some in this neighborhood say "No Hi-Rise on Norwood". I will go further to say "No APARTMENTS, PERIOD on NORWOOD". I do not object to apartments, just their placement, especially as when the Basalt Creek development was being drawn up, ***we were told by the Tualatin City government that any multi-family homes in the residential development areas would be placed far to the south, along the proposed Basalt Creek Parkway extension***. Taking the city at its word, many of us quit being concerned and stopped watching. While we "weren't looking" over time, the apartment location has creeped northward on development maps until it is now planned directly next to our neighborhood. The City government should be held to its original plan to restrict the placement of any multi-family developments away from existing single family homes.

If the city will put the Apartments back on the southern edge of the development, I don't care if they are Hi-Rise or not. Build a skyscraper down there if you want.

This new area in question is a beautiful wooded oasis that *needs to be preserved and enhanced as a park,* not as a yet another bulldozed apartment complex and parking lot and mass contributor to more gridlock on Boones's Fwy.

(Note: the planned park along Boone's Fwy is NOT an acceptable substitute, as it is not realistically within walking distance.

Please reject these applications .

Brent Beebe
8895 SW Stono Drive
Tualatin, OR 97062

Attachment of email sent to the City Council of Tualatin For consideration at the April 11 City Council Meeting, 7:00 PM

Honorable Mayor and Councillors,

When Tualatin was working on the Basalt Creek extension of the City limits, **we were told, and shown maps that stated that there would be ONLY single family homes next to our neighborhood, and that any apartment complexes would be near the Basalt Creek parkway extension.** See Figure 1.

Figure 1. From https://www.tualatinoregon.gov/sites/default/files/fileattachments/planning/meeting/19061/agenda_packet_1-19.17_updated.pdf

Scenario Prog

- Dec 2014 Joint Council meeting
- Basalt Creek Parkway jurisdictional boundary
- Tualatin Council feedback: Need more housing

I am not generally opposed to apartments (having been an apartment dweller for some time in my earlier years), but it **would be better if they were constructed further south below NEW constructed neighborhoods just above the basalt parkway proposed extension to I5 as shown in Figure 1.** Building there**,** *the acceptance of the Apartment complex would be baked into the purchase of new nearby homes*. New houses built around it would be already valued appropriately, and buyers would go in with eyes open. It might also encourage more lower priced owned homes to be built around it, where there is no opportunity for that now.

It is not apartments themselves I am opposed to, **but the intended location next to an established neighborhood of single family owned homes.** It has been my experience that apartments have a chilling effect on property values on the adjacent established neighborhood, and will increase crime in the area, where there is almost none now.

There are several websites that contain studies of the effect of apartments next to established neighborhoods. There were two studies that I read in depth. The first one was conducted by Mark Obrinsky and Debra Stein in March 2007 entitled "***Overcoming Opposition*** to

Multifamily Rental Housing". As one might expect from the paper title, the aim of the paper was not to enlighten, but to influence using facts that suited the stated goal of overcoming resistance to rental multifamily rental housing.

The second study was "**Rental Housing and Crime**: The Role of Property Ownership and Management" by Terance J. Rephann Regional Economist at the Center for Economic and Policy Studies Weldon Cooper Center for Public Service, University of Virginia. This second study **statistically shows that multifamily rentals actually do correlate to an increase in crime in nearby previously established neighborhoods.**

Most of the other studies I found were by contracting interests, with predictable findings.

One pro-apartment argument is that because of the number of families at a single location, of course there would be more crime per-capita. However, one just has to **look at the crime map of Tualatin (see Figure 2) supplied by the Tualatin Police department to readily see that the vast majority of crimes, I might venture to speculate 90-95% in Tualatin crime occurs in Multifamily rental locations.** *As you may also notice on the same map, the area south of Tualatin High school had **one** dot.*

Figure 2 - Crime Map of Tualatin (as of date 4/11/2022).

If increased density is the goal, I would not be opposed to a zoning change for **family** owned condominiums (but not speculators for rentals), as there is an inverse relationship between home ownership and criminal activity in a neighborhood.

I don't know how far along AKS is with their zoning petition, but would like to stop it if possible, unless a change is made to Condominiums instead of Apartments.

In closing, I would like to reiterate that building multifamily rental units next to an established neighborhood causes property value loss on neighbors in established neighborhoods through no fault or control of their own.

Thank you for your time and best regards.

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Brian and Aleisha Pieri

Dear City of Tualatin, City Council, the Planning Department, and Ms. Nelzon,
I am a long-time resident of Tualatin (bought my house in 2008) and have paid property taxes faithfully every year despite increases, worked in Tualatin, shopped and spent money locally, and am very upset at the idea of rezoning the land behind my house into high-density high-rise and building apartment buildings right behind my neighborhood..

This doesn't belong here in Tualatin. I would not have bought here where I did had I known there would be such a callous disregard for our natural resources.

I heartily **oppose the partition and text amendment applications** because they open the door to decision after decision by the City culminating in the approval of the high-density high-rise literally right behind my fence.

You already have Autumn Sunrise and CPAH Plambeck Apartments. Can't you stop there?

We're not downtown Portland - this is a semi-rural suburban area that cannot support the traffic from even the influx of homes from Autumn Sunrise - let alone high-density residences on the corner. Traffic studies are out of date. **They don't take into account current traffic levels** in the surrounding areas, multiple feeder streets to this area and the crash data from there, and the lack of entry/exit to this small corner on SW Norwood Dr.

Please say NO to these applications.

Thank you,
Carly

To the City Planning Commission, Ms. Lombos, and Tualatin City Council,

I am writing concerning the procedure for Plan Map and Text Amendment (PMA 23-0001 & PTA 23-0001) and the Tualatin City Planning Commission meeting scheduled for April 20th, 2023.

Please clarify the following at your earliest opportunity:

1) Per TDC Section 32.020 (3)," Where one land use application is dependent on the approval of another land use application, the land use application upon which the other is dependent must be processed first." The Plan Map Amendment (PMA 23-0001) requesting zone change to RH-HR ***cannot proceed without removing the location factors from the TDC Section 44.100*** as requested by the Plan Text Amendment (PTA 23-0001). ***Therefore, these Amendments cannot be reviewed nor decided upon at the same time according to the City of Tualatin's own TDC Chapter 32: Development Review Procedures.***

2) The community has been notified on multiple occasions that this is a Quasi-judicial review or Type IV-A procedure, limiting the council's ability to attend CIO meetings to prevent ex parte. However, a type IV-A quasi-judicial hearing requires "**written notice of a public hearing**" per TDC Section 32.240 (3) – Type IV-A Procedure.

There has not been written notice of a public hearing for the Planning Commission meeting on 4/20/2023, where these Amendments are being reviewed to make a recommendation to the City Council.*

In summary, the adherence to the city's TDC Chapter 32: Development Review Procedures requires these amendments to be considered separately and **with adequate public notice**. In addition, TDC 32.010 (3) states," Questions regarding the appropriate procedure will be resolved in favor of the review type **providing the widest notice and opportunity to participate."** We ask the city of Tualatin to follow its written procedures in considering these applications.

3) If the Planning Commission chooses to move forward with considering both applications at the same time in the April 20 meeting, not adhering the City of Tualatin's written procedures ***and*** not providing adequate public notice, then I am **restating my opposition** to **both applications** The Text Amendment is not in context for changing land zoning to RH-HR outside of Tualatin's Central Urban Renewal District, and subsequently, the Plan Map Amendment to RH-HR is not in context for SW Norwood Rd. Adequate infrastructure does not exist to support either amendment, and RH-HR should be restricted to Tualatin Central Urban Renewal District ONLY.

* Per the posted Planning Commission meeting agenda action items:
"The Planning Commission is asked to make a recommendation to the City Council on a request for a Plan Map Amendment (PMA) from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR) located on a 9.2-acre site at 23370 SW Boones Ferry Road. The Planning Commission is asked to make a recommendation to the City Council on a request for a Plan Text Amendment (PTA) that would remove the locational factors from the High-Density High Rise (RH-HR) purpose statement in Tualatin Development Code Section 44.100 and revise Table 44-3 to limit the structure height to 4 stories or 50 feet in the RH-HR zoning district south of Norwood Road, which would be applicable to the subject site."

Thank you,
Carly Cais

Subject: City Council should NOT consider Plan Map and Text Amendment (PMA 23-0001 & PTA 23-0001) at the May 22 Meeting

Dear City Council,
I am writing concerning the procedure for Plan Map and Text Amendment (PMA 23-0001 & PTA 23-0001) and the Tualatin City Council meeting scheduled for May 22, 2023.

Per TDC Section 32.020 (3)," Where one land use application is dependent on the approval of another land use application, **the land use application upon which the other is dependent must be processed first.**" The Plan Map Amendment (PMA 23-0001) requesting zone change to RH-HR cannot proceed without removing the location factors from the TDC Section 44.100 as requested by the Plan Text Amendment (PTA 23-0001). Therefore, **these Amendments cannot be reviewed nor decided upon at the same time** according to the City of Tualatin's own TDC Chapter 32: Development Review Procedures.

The adherence to the city's TDC Chapter 32: Development Review Procedures requires these amendments to be considered **separately** and with adequate public notice. In addition, TDC 32.010 (3) states," Questions regarding the appropriate procedure will be resolved in favor of the review type providing the widest notice and opportunity to participate." I ask the city of Tualatin to **follow its written procedures** in considering these applications.

If City Council chooses to move forward with considering both applications at the same time in the May 22 meeting, not adhering to the City of Tualatin's written procedures and not providing adequate public notice for PTA 23-0001, then I am restating my opposition to both applications.

The Text Amendment is not in context for changing land zoning to RH-HR outside of Tualatin's Central Urban Renewal District, and subsequently, the Plan Map Amendment to RH-HR is not in context for SW Norwood Rd. Adequate infrastructure does not exist to support either amendment, and RH-HR should be restricted to Tualatin Central Urban Renewal District ONLY due to lack of amenities and available space for parking and emergency vehicles outside the District.

Furthermore, allowing RH-HR building outside of the Central Urban Renewal District, before the downtown area is fully built out, undermines Tualatin's Planning goals and adds to an already unbearable traffic situation with SW Boones Ferry Rd. and the conduits to I-5.

I respectfully ask City Council to vote against both applications, and allow infrastructure build to catch up with the rampant development that has happened in recent years to this City.

Sincerely,
Carly Cais

Subject: NO to PTA and PMA23-0001 Applications: Community of Tualatin arguments against

Dear Madeleine,

Please accept the submission of the following arguments, case studies, and examples, against the PTA and PMA23-0001 applications. As a community and concerned citizens we are submitting these arguments against the legal points the applicant has raised in favor of the PTA and PMA.
The applicant failed to consciously consider the characteristics of the city from their analysis and they do not have the burden of proof to support these applications.

Please confirm these attached documents will be included in the meeting packet for Council. If you have issues downloading the attachments please let me know and I will submit them to you in a different way.

Thank you!

Exhibit B - Tualatin Housing Production Analysi...

Exhibit C - Viable Alternate RH-HR Sites.pdf

Exhibit D - Example Construction Types in Flood...

Exhibit E - Commisioner Hlediks Hearing Notes 0...

Exhibit F - 2019 Housing Needs Analysis.pdf

May 28th, 2023

PTA 23-0001 and PMA 23-0001 applications should be rejected for failing to meet the following criteria:

The application:

1. Application Summary:

With its proposed Plan Text Amendment (PTA) and Plan Map Amendment (PMA), the applicant is proposing to convert 9.2 acres on the periphery of town to the High Density High Rise (RH-HR) zoning designation. Currently, such zoning is limited to the downtown core and is limited to 4 acres. Thus, the applicant is proposing to more than double the amount of RH-HR acreage and relocate it from the City's downtown core to a single site on the periphery of town. This is not a minor change. If approved, this would result in an extreme change to the City's current map and comprehensive plan that would negatively impact not only the Norwood site in question and its vicinity, but the entire city.

2. Criteria Requiring Substantial Evidence

Under TDC 33.070, for the application to be granted, it must be (a) in the public interest, (b) timely, and (c) in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan. The applicant also must have the burden of proof to meet these criteria. As shown below, there is substantial evidence that applicant has not satisfied the criteria under TDC 33.070 and the other criteria in the application.

3. Failure of Criteria

a. Proposed PTA and PMA are Not in the Public Interest

Based upon substantial evidence, the proposed PTA and PMA, and the extreme changes they propose, are clearly not in the public interest. Increasing the RH-HR total area from 4 to 9.2 acres, moving it to the periphery of the City, and opening up the rest of Tualatin to further RH-HR applications is not supported by the comprehensive plan or the 2019 Housing Needs Analysis (HNA), and is therefore clearly not in the public interest.

i. The Applicant's Economic Study should not be allowed to subvert the findings of the 2019 Housing Needs Analysis

The applicant's proposals attempt to subvert the findings and recommendations of the HNA by submitting its own economic analysis regarding housing needs. However, the applicant's own analysis is neither free from bias (it was privately commissioned and narrowly tailored to support the applicant's specific applications) nor is it comprehensive (the HNA is 114 pages, vs the applicant's private analysis, which is 16 pages). Additionally, and perhaps most importantly, no open deliberative process or public input was involved in the applicant's private study, unlike the HNA commissioned by the City. For these reasons, and given the extreme zoning proposed by the applicant and the substantial deviation from the HNA proposed by the applicant, the application is clearly not in the public interest. To serve the public interest, if the City desires to explore updating

the HNA, a new HNA should be commissioned *before* making any drastic changes to the comprehensive plan and before ignoring the findings of the HNA.

ii. Other Potentially Viable Sites Should be Explored for RH-HR zoning before moving over twice the acreage needed to the Norwood Site

Along these lines, there are other viable sites which should be explored first before approving the extreme zoning in the PTA and PMA, including but not limited to the following: (a) the vacant gravel lot adjacent to the WES rail line (walkable to many amenities, unlike Norwood); (b) the vacant lots near the Community Warehouse and also very close to the WES rail line (also walkable to many amenities, unlike Norwood) ; and (c) the approximately 4 acres of bare land near the Grand Hotel in Bridgeport (also walkable to many amenities, unlike Norwood). The city has also deemed the central urban renewal district as viable by identifying a city goal to establish the 18970 Catalyst Project which early renderings depict as a high-rise building downton. Maps and additional viable sites are identified in Exhibit C.

In addition, as Chair Bill Beers of the Planning Commission discussed in the meeting of April 20, 2023, not just bare land, but redevelopment should also be considered by the City. It is therefore in the strong public interest for the City to conduct outreach to all owners in the downtown core for possible redevelopment, including mixed use, such as the long vacant Haggen's building next to the WES line, before granting the extreme zone changes in the application. With the right outreach, a mixed use redevelopment could be established that appropriately puts the RH-HR designation at such a key location, and meets a number of goals and policies of the Comprehensive Plan vis-à-vis the close proximity to high value amenities, including rail transportation and walkable commercial, the public library, etc.

There has been an assertion by the planning department that the gravel lot and the former True Value Hardware vacant lots across from Haggen's are "constrained," and therefore not a viable option for the RH-HR zoning designation. This has been used as justification for moving the RH-HR zone to the periphery at Norwood, and anywhere else in town. While these vacant lots may be in a floodplain, that does not make them unbuildable. A parking garage could easily be put on the ground floor, with up to five stories above. A simple look at what has been built in this area makes the answer obvious. The building with Mashita Teriyaki is a perfect example (see 18810 SW Boones Ferry Road). It was built in this flood plain by simply elevating the floor. The building next to it (to the south) also has an elevated floor and parking on the bottom (see 18840 SW Boones Ferry Road). Therefore, it is absolutely feasible and reasonable to expect development in this particular floodplain, with standard mitigation such as raising the floor or putting the parking garage on the bottom floor, and these two buildings are perfect examples (See Exhibit D - Construction Types in Floodplain Areas). There are all sorts of other developments like this along Boones Ferry. And for this reason, it is absolutely reasonable, and in the public interest, to expect the high density high rise zone to remain in the downtown core, and move to these adjacent vacant lots.

b. Proposed PTA and PMA are not Timely

The HNA sets a specific target of adding 1,014 new housing units by year 2039, with the target of 45% being multi-family units. Since the HNA, the following new housing units have been approved:

- Alden Apartments – 45 town homes
- Plambeck Gardens – 116 multi family affordable housing
- Tualatin Height Apartments zone change – 116 more units
- Autumn Sunrise, 407 housing units, some single family, some attached
- Nyberg Tualatin Apartments, 264 multi-family units

*See Exhibit B for a complete analysis of housing units approved in Tualatin

That is an additional 941 units, creating a mixture of 53% of these new units being multi-family. In other words, in less than 4 years (out of 20), Tualatin has reached 92 % of its goal with total housing units, and 49% of the total goal with multi-family units. Tualatin is way ahead of schedule in meeting its housing needs for 2040. The progress made in this regard over the last four years has been significant and well beyond the goals set by the HNA. There is absolutely no need, at this time, to rush through an extreme zone change that ignores the HNA and the goals of the Comprehensive Plan. Thus, the application is not timely. Furthermore, when considering the vacant 19 acres adjacent to Meridian Park Hospital, it becomes evident, while still not ideal, there exists a significant opportunity to enhance its potential by implementing a lower-level zone change to multifamily usage. This adjustment would serve as a transition area adjacent to the hospital, allowing for easier access and it is more local to essential amenities. Additionally, with all the undeveloped residential land adjacent to the Basalt Creek Area, there is 16 years left to decide on more housing to come on line per the HNA, which would be directly adjacent to the immediate proximity to the industrial zone (BCE) and could possibly use WES rail if Trimet was engaged for a new station. This location would also be a more reasonable location for this density off of 124th (Basalt Creek Parkway) and more appropriate versus Norwood Rd when developed.

As a side note, we acknowledge that the City Planning Department believes that only 545 residential units have been added since the HNA. While this issue (545 total units vs. 940 total units) is certainly not dispositive in favor of the applicant, we take significant issue with the 545 figure. In particular, this figure is based on the argument that the 264 multi-family units known as the Nyberg Tualatin Apartments, which are still under construction, should not be counted. To resolve this difference, it is important to read the HNA to determine if those 264 units, from that particular parcel, were counted as part of existing inventory in the HNA, or vacant land was part of the buildable land inventory, with future construction of units to count toward the goal of 1,014 . It has to be one or the other: either part of existing inventory or not. When you read the HNA, it becomes very clear that those 264 units were not counted as part of the existing inventory. Instead, the land which those units are being built on, was specifically identified as part of Tualatin's "Buildable Land Inventory" (BLI) (see pages 7-8 of the HNA). In addition the applicant has even stated that 80% of the HNA has been met and 800 units of housing has been approved in Tualatin within the same time frame, even though these figures exclude outright entitled units.

In particular, the land in question is specifically included in the Buildable Land Inventory as "vacant" (see Exhibit 8 from the HNA; copy attached as Exhibit B here).

The land in question was also identified as part of the BLI with a zoning designation of High Density Residential (see Exhibit 9 from the HNA; copy attached as Exhibit F).

This makes sense, as final architectural approval for this project did not happen until December of 2019.

The bottom line is these 264 units were not included in Tualatin's existing inventory, and the land was included in the building land inventory, meaning that these units, when finally approved (which happened in December, 4th 2019), count toward reaching the goal of 1,014 units.

c. Proposed PTA and PMA are not in conformity with applicable goals and policies of the Tualatin Comprehensive Plan – School District

If the proposed development is approved, children living in the new 276 apartment units would be part of the Sherwood School District, even though they are a short walk from Tualatin High School and Byrom Elementary School. This would mean that the children would be bused or driven significant distances to and from all Sherwood schools, as the chart below illustrates.

Grade Level	Distance to Grade School; Mode of Transportation	Distance to Middle School	Distance to High School
To Sherwood School District	6 miles; Bus or car	6 miles; Bus or car	7.7 miles; Bus or car
To Tualatin School District	Byrom Elementary; Approximately 1 mile; walk or bike	Hazelbrook Middle School 4 miles; bus or car	Tualatin High School; Less than 1 mile; walk or bike

These additional school bus trips, along with trips by parents driving children to and from school, are against the comprehensive plan goals relating to transportation, and clearly not in the public interest. Instead of walking to school, which is healthy exercise for children, children will be bused or driven, resulting in a bigger carbon footprint, less exercise, and also less sleep (sleep is an important factor for both parents and children). Not to mention the additional cost of busing. Also note that the additional cross town bus trips required by this school district may not be addressed in the Traffic Impact Analysis in total daily trip counts generated by the Norwood developments. For these reasons, there is substantial evidence that the application is not in conformity with the goals and policies of the Tualatin Comprehensive Plan.

d. Proposed PTA and PMA are not in conformity with applicable goals and policies of the Tualatin Comprehensive Plan – Walkable Amenities

On April 20, 2023,the Tualatin Planning Commission voted 5-1 to recommend denial of both the PTA and PMA to the City Council. The decision was based on deliberations that included:

- Comprehensive Plan Goal 3.1 (20-year land supply consistent with needs identified in HNA) was not met because the proposed map amendment would create a surplus of RH-HR zoning (i.e. the deficit is 4 acres and 9.2 acres is proposed); and

- The proposed text and map amendments would not be consistent with the objectives of Comprehensive Plan Chapter 10 for the RH-HR that the district "support housing at the greatest density of household living in areas with the greatest access to amenities."

As noted above, the Norwood site is not located within walking distance of any amenities. Mass transit, grocery, libraries, rail lines, restaurants or retail are within walking distance. Not even the applicable public schools at any grade level are within walking distance. There is only one bus stop (TriMet). However, we understand that this particular line has limited runs and is set to be canceled (See Exhibit B). Under any reasonable review of the application, the applicant fails to meet goals and plans of the Comprehensive Plan in this regard. Clearly the Norwood site does not pair the "greatest density" with the "greatest access to amenities." In fact, it fails miserably in this regard. As indicated above, there are a number of other sites that can do this, including those bare lots in the downtown core, along with other redevelopment opportunities.

In addition, we submit for the record the written notes of Tualatin Planning Commissioner Randall Hledik, which outlines in detail the applicant's failure to meet a number of code criteria, including proximity to amenities. A copy of Commissioner Hledik's notes is attached as Exhibit E.

Also see additional case studies, examples and arguments against these applications in Exhibit A.

Conclusion:

For these reasons, we submit that there is ample evidence that the PTA and PMA are not in the public interest, do not meet all the code criteria, and that therefore, the Mayor and the City Commissioners agree with the recommendation of the Planning Commission and reject the applications.

Thank you,

Concerned Community of Tualatin

Per TDC 33.070 the PTA and PMA applications for Norwood Rd should be denied based on the following criteria within the following provided exhibits.

TDC 33.070

Granting the amendment is **not** the public interest

- Granting the amendment is **not** timely
- The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

  The proposed text and map amendments would **not** be consistent with the objectives of Comprehensive Plan Chapter 10 for the RH-HR that the district "support housing at the greatest density of household living in areas with the greatest access to amenities."
- The following factors were **not** consciously considered:
- Various characteristics of the areas of the City;
  - Natural resources
  - The amendment does **not** meet Statewide planning goals and Oregon administrative rules including the Transportation Planning Rule

    (b) In urban areas with a population greater than 25,000 persons, coordinated land use and transportation plans are intended to improve livability and accessibility by promoting the provision of transit service and more efficient performance of existing transportation facilities through transportation system management and demand management measures.
  - The amendment does **not** meets relevant Metro functional plan criteria

    Title 13 (Sections 3.07.1310 – 3.07.1370) – Nature in Neighborhoods

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely

Applicant traffic study does not account for I-5/Elligsen Interchange. ODOT was not contacted regarding impacts and time period for improvement of this interchange 2028-2040.

What Traffic? - YouTube

Modeled Traffic study does represent actual conditions

The site of this proposed land use action is in the vicinity of I-5. ODOT has permitting authority for this facility and an interest in ensuring that this proposed land use is compatible with its safe and efficient operation. A Traffic Impact Analysis (TIA) was prepared by Lancaster Mobley for the proposed map and text amendment dated February 2nd, 2023. ODOT was not contacted during the scoping process and State highway facilities are not included within the study area.

COMMENTS/FINDINGS

The applicant proposes a map amendment from RML and IN to the RH-HR Zone for a 9.2 acre site located in the southeast quadrant of the SW Norwood Rd/Boones Fry Rd intersection. The property is located just west of the recently approved Autumn Sunrise Subdivision (500 residential lots and two commercial lots) adjacent to I-5. A text amendment is also proposed to remove locational factors from RH-HR purpose statement.

The TIA submitted by Lancaster Mobley dated September 20, 2021 with the Autumn Sunrise Subdivision application, showed that the new development would contribute traffic volume to the I-5 southbound off ramp at the Elligsen Rd interchange. Therefore, ODOT has determined that the proposed plan amendment and subsequent development will likely add traffic to the I-5 interchange at Elligsen Rd.

The 2018 RTP project (11489) proposes to construct a second right-turn lane on the southbound off-ramp. Since the project is on the RTP financially constrained project list, it can be assumed to be in place for the purposes of this plan amendment. The RTP project acknowledges that "conditions are currently congested" and suggests that the time period for the improvement is 2028-2040. Funding for the project has not been committed to date.

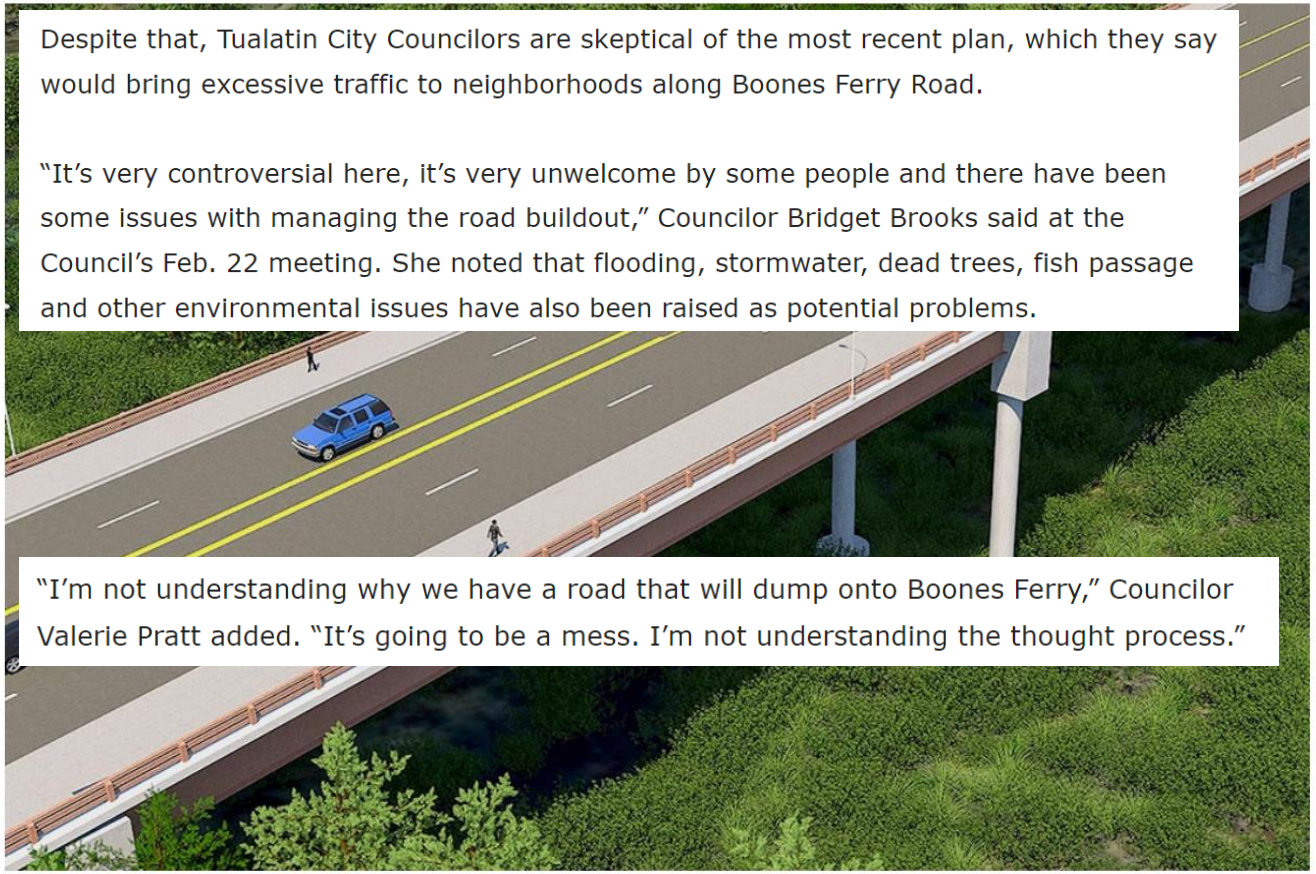
TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely, Granting this amendment does not protect natural resources.

Case Study -Lack of current road infrastructure with future Basalt Creek Parkway project- Councilor Pratt and Brooks statements…"It is going to be a mess…"



Despite that, Tualatin City Councilors are skeptical of the most recent plan, which they say would bring excessive traffic to neighborhoods along Boones Ferry Road.

"It's very controversial here, it's very unwelcome by some people and there have been some issues with managing the road buildout," Councilor Bridget Brooks said at the Council's Feb. 22 meeting. She noted that flooding, stormwater, dead trees, fish passage and other environmental issues have also been raised as potential problems.

"I'm not understanding why we have a road that will dump onto Boones Ferry," Councilor Valerie Pratt added. "It's going to be a mess. I'm not understanding the thought process."

The Basalt Creek Parkway would connect Grahams Ferry Road with Boones Ferry Road using a 700-foot long bridge over Basalt Creek. Critics of the $31 million plan say it would have an adverse impact on stormwater runoff and fish passage, as well as on traffic. (COURTESY/WASHINGTON COUNTY)

- Tualatin Life April 21st, 2021 article identifying excessive traffic to the neighborhoods along Boones Ferry Rd.
- Councilor Bridget Brooks, "…there have been some issues with managing road buildout…".
- Councilor Valerie Pratt, "I'm not understanding why we have a road that will dump onto Boones Ferry, It's going to be a mess…".
- Traffic studies form Autumn Sunrise and Plambeck apartments and other developments are only local studies for the developments. It does not have a systemic approach to traffic.
- With the addition of 516 new units and other developments already approved adding an additional 276 apartments will further burden current strained infrastructure.

Basalt Creek Parkway Plan Raises Questions - Tualatin Life

TDC 33.070 Granting the amendment is **not** timely.

Lack of educational institutional infrastructure and planning per TTSD maps. The PMA removes Institutional zones need for possible district expansion.

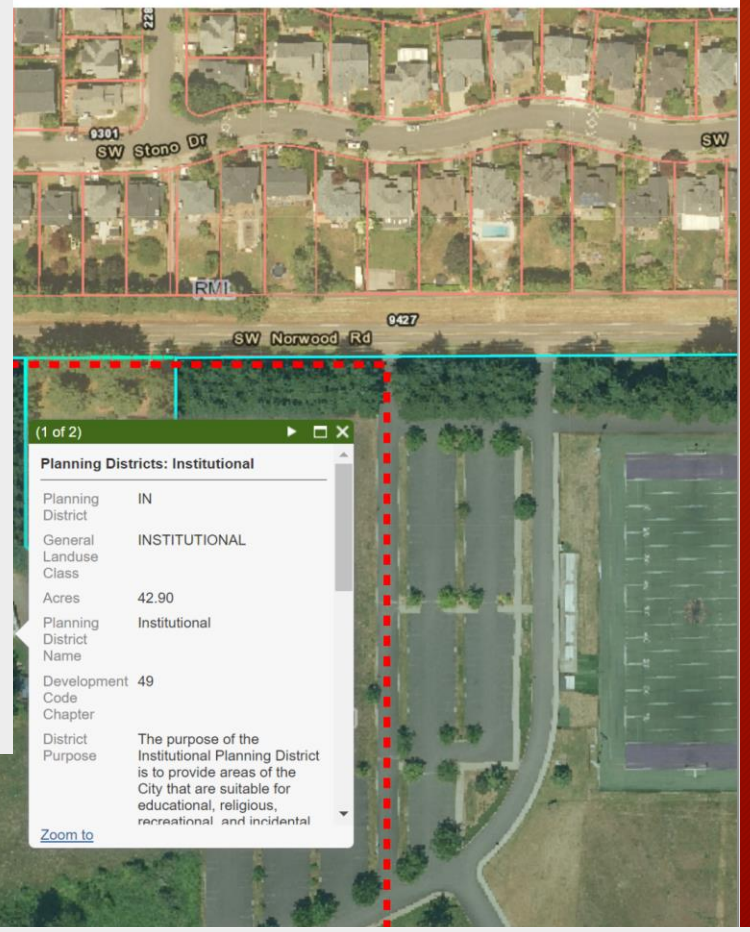
Addition of Autumn Sunrise and Plambeck Apartments 516 homes/condos to school districts plus the affects of Text Amendment RH-HR multifamily addition:

The adjacent neighborhood of Victoria Woods petitioned to be part of the Tualatin-Tigard School District. This neighborhood is within 0.25 miles of Tualatin High School and 0.5 miles from Byrom Elementary. The Sherwood school district closest elementary school is approximately 6 miles from the proposed RH-HR zone which is the designated district for all these developments. As such the residents of Autumn Sunrise, Plambeck apartments and this proposed RH-HR development could also petition to be in the TTSD which are within 0.5 miles from the site location. This cross town trip generation is also not accounted for in the traffic studies and will overburden TTSD.



Removal of existing Institutional zone with no relocation planned.

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. Granting this amendment does **not** protect natural resources, Granting the amendment is not consistent with the objectives and policies regarding potable water, sanitary sewer, and surface water management pursuant to applicable goals and policies in the Tualatin Comprehensive Plan.

Current failing conditions of existing storm water system, during Boones Ferry.

Documentation Of The Failure Of The Existing Stormwater System Along SW Boones Ferry Road

Video-Upstream Stormwater Flooding Property2015

Video-Stormwater Flooding Around Home

The volume, the velocity and the color of the stormwater should be noted.

These photos taken during this flooding event provide a glimpse of the amount of stormwater collected in the stormwater system and allowed to flow downstream, as well as the amount of soil/sediment displacement caused by the flow of the stormwater.

- Location of storm water failure at: 23677 SW Boones Ferry Road Tualatin Oregon 97062
- Currently the city is considering comprehensive plan amendments for 2023 Water Master Plan PTA/PMA23-002 and updating the city comprehensive plan and development code.
- As such since current storm water collection conditions are failing on Boones Ferry, adding additional development in this area will exacerbate the issue. Consider the public interest and timeliness of the RH-HR plan and text amendments should not be approved until the comprehensive plan and improvements are made and are inline with the comprehensive plan and HNA.

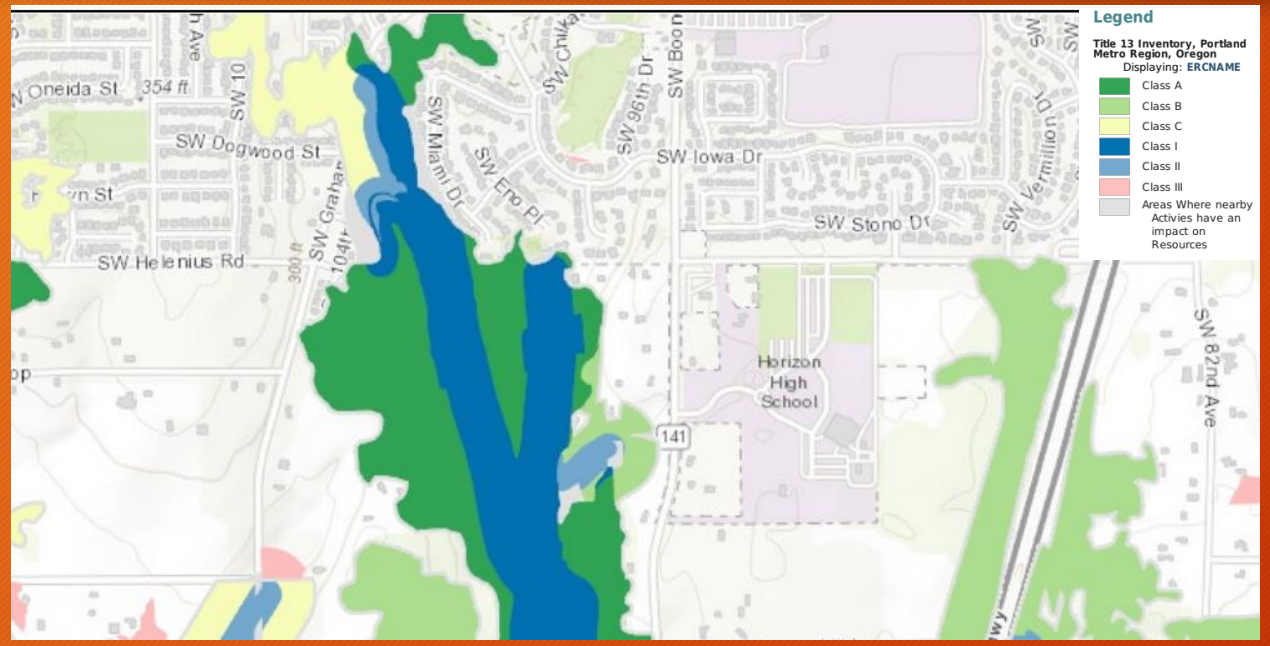
Washington County has ordered a stay for all residential construction within UGBs until new regulation is available October, 2024 to address protections in SNRs



MAP Shows the proposed RH-HR zone is adjacent areas have impact on resources. Existing wetland habitat is missing from Tualatin's SNR map and must be coordinated with Washington County

Metro Title#13
https://databasin.org/datasets/afdbf390255549418f26855af59b2f79/

https://www.washingtoncountyor.gov/current-planning/development-prohibited-some-snr-areas.

The stay applies to residential land division and development applications that would impact mapped Wildlife Habitat areas.

The stay stems from a petition filed with LCDC, asking LCDC to direct the County to update its development standards for housing to be clear and objective, in compliance with a statutory provision (ORS 197.307, as amended by 2017 legislation) designed to increase housing development. **Under the ruling from the state Land Use Board of Appeals (LUBA), the county is undergoing a full Goal 5 process to address protection of Significant Natural Resources (SNR), which will take about 18 months.**

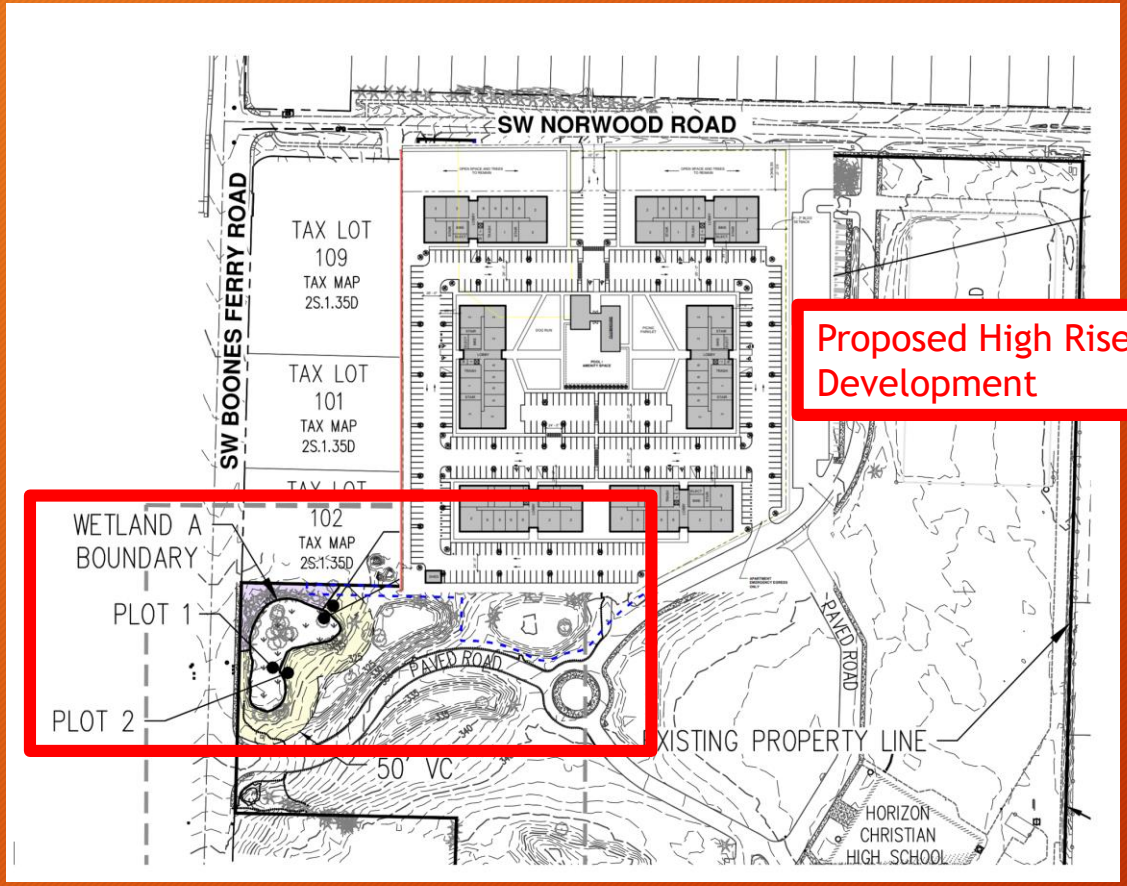
State law requires that the cities and the County adopt consistent and coordinated comprehensive plans. **As a result, the cities and the County must consider one another's planning efforts in the development and implementation of their respective plans.**

TDC Natural Resources Protection Overlay Map 72-1 lists the following, "There may be unmapped wetlands and natural areas subject to regulation", further illustrating the lack of specific details of SNR, especially in coordination with county, Metro, state and federal planning resources.

clean_water_services_spl.pdf (tualatinoregon.gov)

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. Granting this amendment does **not** protect natural resources

The proposed RH-HR site is adjacent to a sensitive area and requires protection.



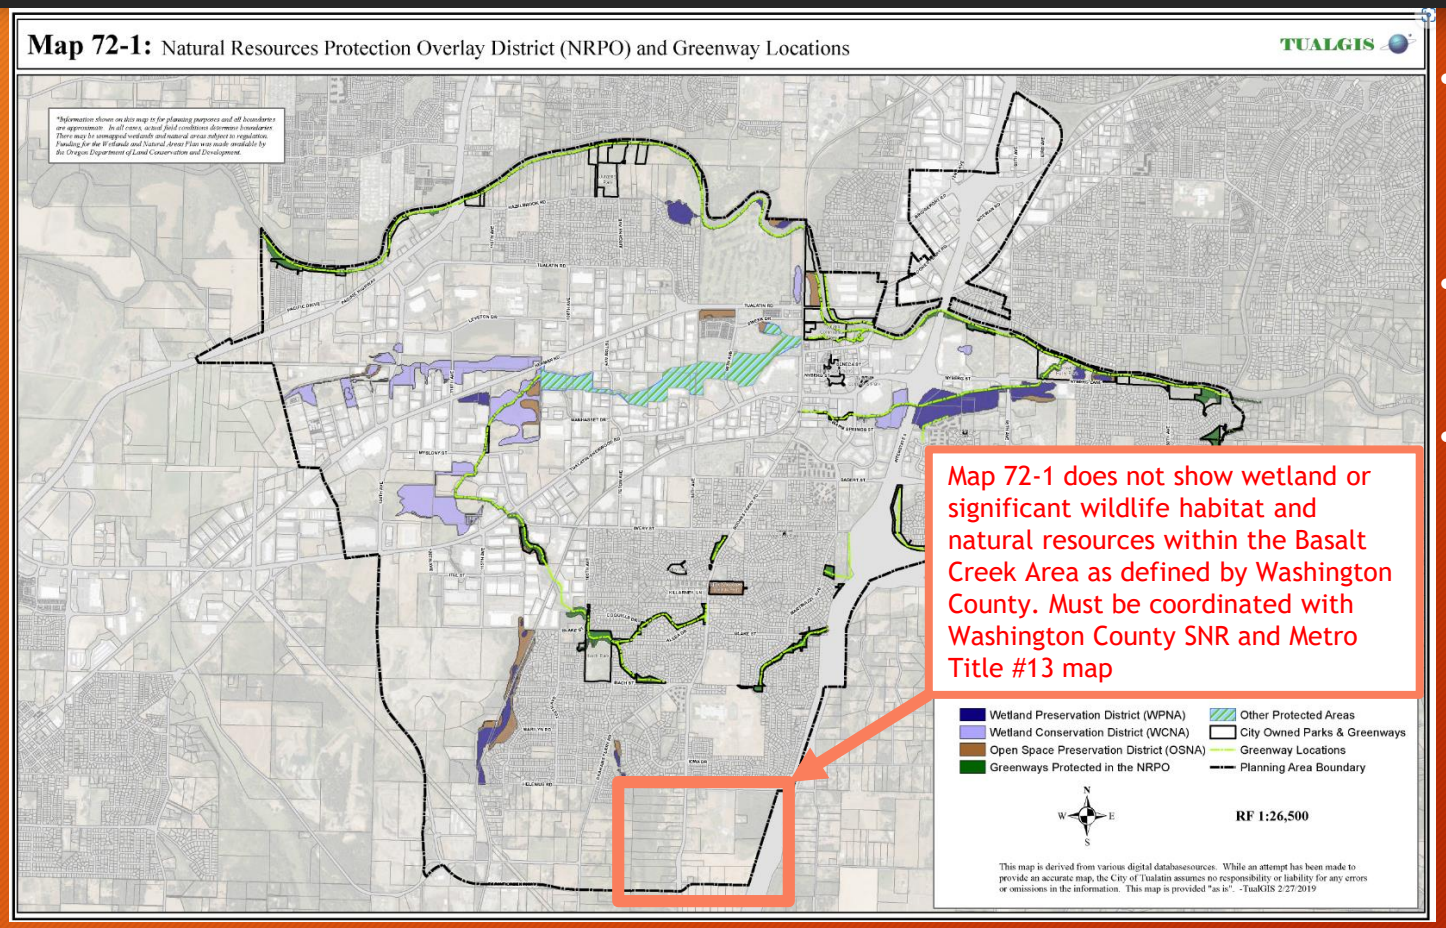
- Tree and wildlife habitat will be removed for the proposed RH-HR development which is adjacent to a “sensitive area.”
- This area is not shown on TDC’s Natural Resources Protection Overlay Map 72-1
- The stay would apply to this site location since it is within 200ft of a wetland habitat.

High-Rise units adjacent to wetland sensitive area, construction will have an impact.

clean_water_services_spl.pdf (tualatinoregon.gov)

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. Granting this amendment does **not** protect natural resources

The proposed RH-HR site is adjacent to a sensitive area and Washington County's Stay would apply to this area.

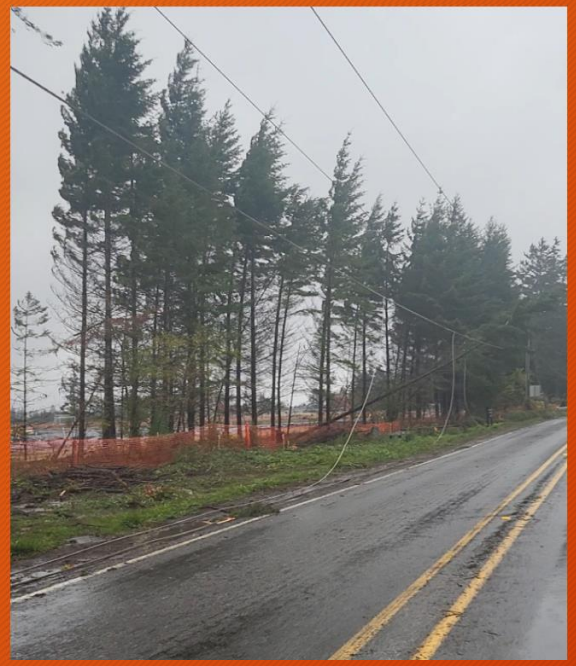


- Tree and wildlife habitat will be removed for the proposed RH-HR development which is adjacent to a "sensitive area."
- This area is not shown on TDC's Natural Resources Protection Overlay Map 72-1
- The stay would apply to this residential development and RH-HR zone change.

High-Rise units adjacent to wetland sensitive area, construction will have an impact.
Map72-1.png (5100×3300) (usgovcloudapi.net)

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. Granting this amendment does **not** protect natural resources

Trees must be removed for the proposed adjacent RH-HR zone. Time is needed for current projects to be completed and for the environment to be rehabilitated.



After image developer harvest

Before SAT image from Google

- Three power outages occurred on November 4th, 2022 due to over harvesting trees on Norwood. 1400 customers lost power. Adequate buffer of trees was not provided causing weaker trees to fall during rain fall. Now all trees have to be removed.
- Removal of wildlife habitat has caused mice and rat infestations around existing neighborhoods of Norwood. This also caused health issues due to dust storms during summer months of construction.

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

RH-HR plan goes against the Basalt Creek Master Plan and Ordinance No. 1418-19. Does not recognize a RH-HR zone of any planned acreage.

Exhibit 2 to
Ordinance No. 1418-19

Development Types

Table 3 Summary of Development Types Identified for Basalt Creek Planning Area by Jurisdiction

Jurisdiction	Land Use Designation	Buildable Acreage	Households		Employment	
			Count	Density per Gross Acre	Count (jobs)	Jobs per Gross Acre
Tualatin	High Density Residential	3.36	67	19.9	-	-
	Medium-Low Density Residential	59.83	374	6.3	-	-
	Low Density Residential	24.83	134	5.4	-	-
	Neighborhood Commercial	2.89	-	-	33	11.3
	Manufacturing Park	92.95	-	-	1,897	20.4
	Functionally Unbuildable	10.37	-	-	-	-
	Tualatin Subtotal	**194.23**	**575**		**1,929**	
Wilsonville	Craft Industrial	1.25	6	4.8	27	21.7
	Light Industrial District	35.30	-	-	581	16.5
	High Tech Employment District	94.47	-	-	1,916	20.3
	Functionally Unbuildable	5.62	-	-	-	-
	Wilsonville Subtotal	**136.64**	**6**		**2,524**	
Total		**330.87**	**581**		**4,453**	

- Exhibit 2 shows no plan for a high density high rise zone (RH-HR).
- High Density area was exceeded by approximately 1.22 acres (Currently 4.66 acres)
- Basalt Creek Master plan is an agreed upon document with Sherwood, Wilsonville, and Metro. Adding a change because a developer request must be agreed upon for modification to this plan.

exhibit_2_-_basalt_creek_concept_plan.pdf (tualatinoregon.gov)

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

The Housing Need Analysis, Current approved units from 2019 to 2023.

- **Tualatin will plan for more single-family attached and multifamily dwelling units in the future to meet the City's housing needs.** Historically, about 53% of Tualatin's housing was single-family detached. New housing in Tualatin is forecast to be 40% single-family detached, 15% single-family attached, and 45% multifamily.

What are the Key Findings of the Housing Needs Analysis?

The key findings of the Tualatin's Housing Needs Analysis are that:

- **Tualatin is planning for 1,014 new dwelling units.** The growth of 1,014 households will result in demand for 1,014 new dwelling units over the 20-year planning period, averaging 51 new dwelling units annually.

hna.pdf (tualatinoregon.gov)
https://www.tualatinoregon.gov/projects

Within 4 years the City has already met 92% of with approved and entitled units of a 20 year plan. 16 years remain to provide the additional 74 units.

- Alden Apartments, 45 townhome addition RMH
- Plambeck Garden Apartments, 116 units, RH
- Tualatin Height Apartments zone change, 116 more units, RMH.
- Autumn Sunrise, 400 mixed family, RML.
- Nyberg Tualatin Apartments, 264 units, RH

Total additional multifamily units: **496** units
Total single family units: **445**
Total approved units: **941** within the first three years

53% of all new units entitled and approved are multifamily exceeding the housing needs analysis ratios. This is without the addition of the proposed RH-HR zone on Norwood which would add 276 more multifamily units. Ratio would increase to **75%** with this text and plan amendment.

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

The Housing Need Analysis, 20 year plan. In the first four years 940 single family and multifamily units have been approved.

What are the Key Findings of the Housing Needs Analysis?

The key findings of the Tualatin's Housing Needs Analysis are that:

- **Tualatin is planning for 1,014 new dwelling units.** The growth of 1,014 households will result in demand for 1,014 new dwelling units over the 20-year planning period, averaging 51 new dwelling units annually.

Exhibit 3. Buildable acres in vacant and partially vacant tax lots by Plan Designation, Tualatin Planning Area, 2018

Source: Metro BLI, ECONorthwest Analysis. *Note: The numbers in the table may not sum to the total as a result of rounding.*

Generalized Plan Designation	Total buildable acres	Buildable acres on vacant lots	Buildable acres on partially vacant lots
Residential			
Low Density Residential	79	11	68
Medium Low Density Residential	1	0	1
Medium High Density Residential	1	1	0
High Density High Rise Residential	0	0	0
High Density Residential	12	12	0
Commercial			
Mixed-Use Commercial Overlay Zone	0	0	0
Central Tualatin Overlay Zone	0	0	0
Basalt Creek Planning Area			
Low Density Residential	76	2	74
Medium Low Density Residential	69	49	20
High Density Residential	5	0	5
Neighborhood Commercial	0	0	0
Total	**244**	**75**	**168**

hna.pdf (tualatinoregon.gov)

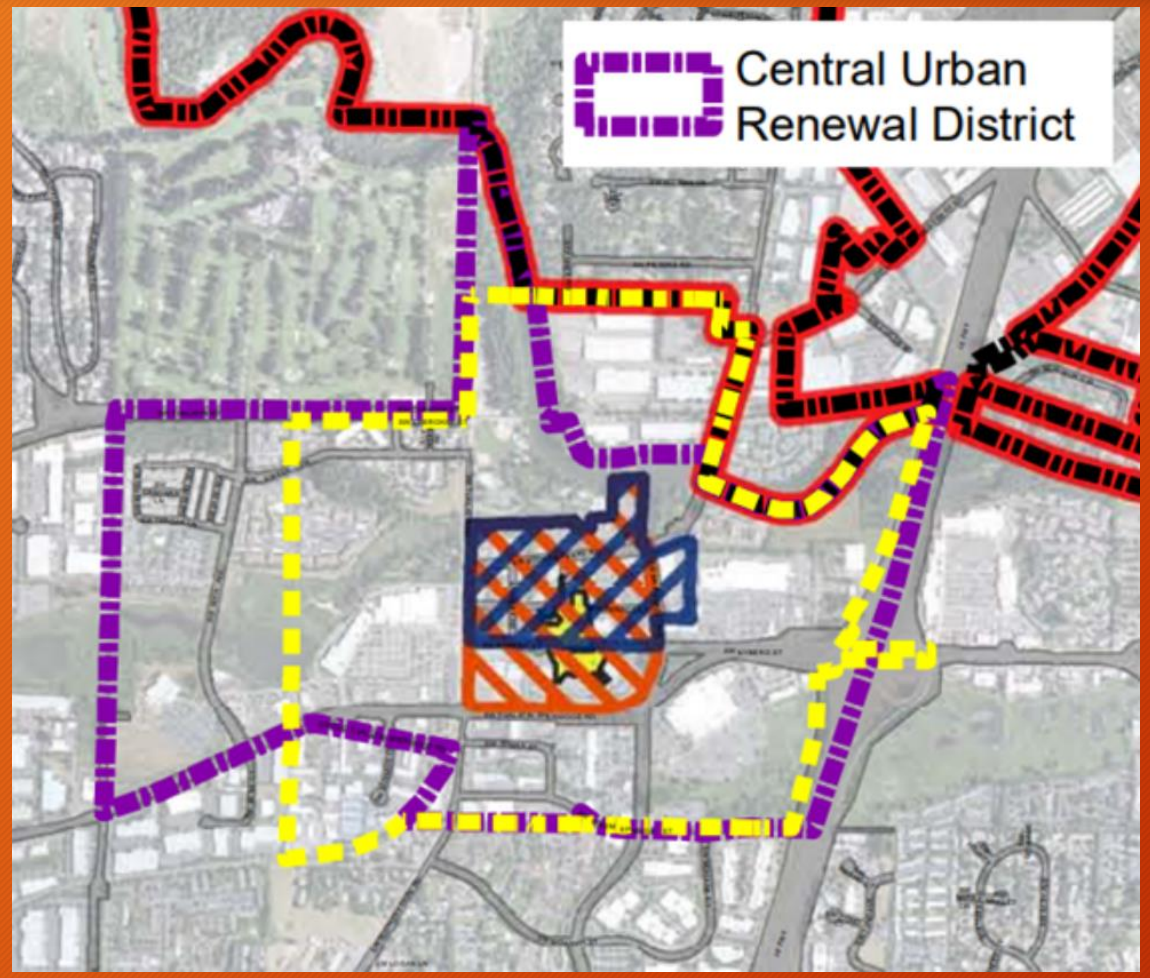
- **Since December 2019 941 units have been approved by the city. That is a 92% of the 1014 units planned by 2040.**
- The rate of growth far exceeds the capacity of available infrastructure.
  - The city does not understand the systemic impact of 941 units in a three year span. Time is needed to adjust to the new residential load.
- Basalt Creek plan has no mention of RH-HR zone

HB2001: **Transition Likely Gradual**
While the law allows more housing types, DLCD expects the transformation of housing choices to be gradual.

- Current growth outpaces available supporting infrastructure

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

RH-HR zone text amendment will allow other developers to follow suit. The central urban renewal district is far from fully developed.



Current TDC code language: High-rises are reserved for the core only:

TDC 44.100. - Purpose. The purpose of the High-Density High Rise (RH-HR) zone is to provide areas of the City within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club that are suitable for high density apartment or condominium towers.

Next slides shows example properties that could be developed for a HR in downtown Tualatin..

Nowhere in the current zoning district maps is an RH-HR zone located next to a RL and RML zones.

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

Current viable properties for sale that could be zoned RH-HR adjacent to the core of Tualatin. These areas are walking distance to amenities such as central city transit.

Current Commercial that has been unoccupied for 8 years (Haggen's) does not seem viable as CC could rezone to CC/RH-HR adjacent to an outright RH-HR zone.

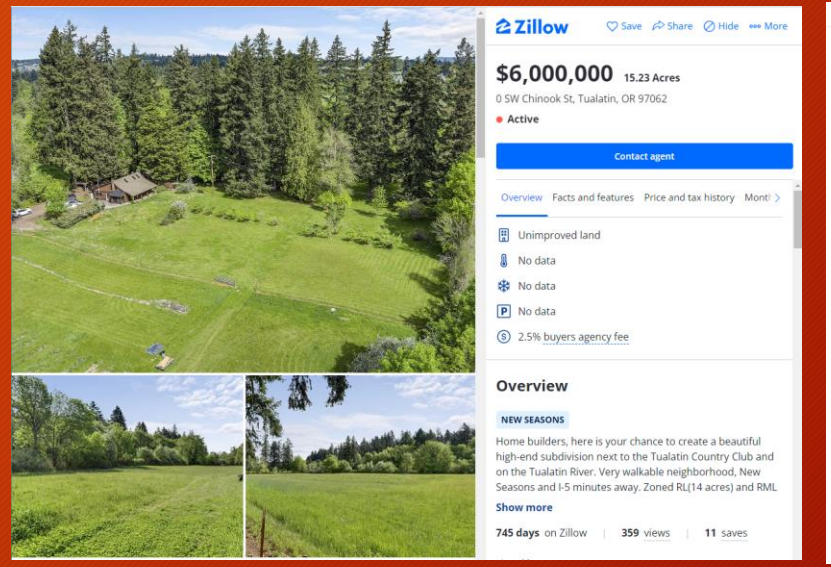
Land currently for sale in the core. Refer to the provided Exhibit C for additional properties.

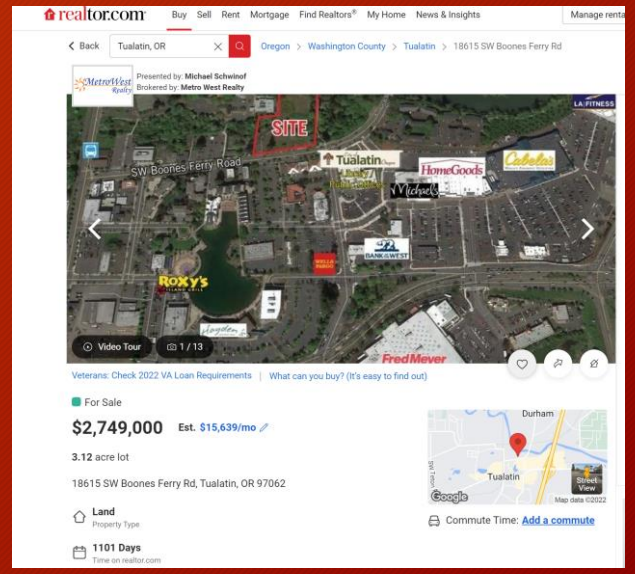
15.23 acres- for sale available in the core of Tualatin

0 SW Chinook St, Tualatin, OR 97062 | MLS #21383176 | Zillow

3.21 acres- for sale available in the core of Tualatin

18615 SW Boones Ferry Rd, Tualatin, OR 97062 | MLS# 19079549 | Redfin





TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

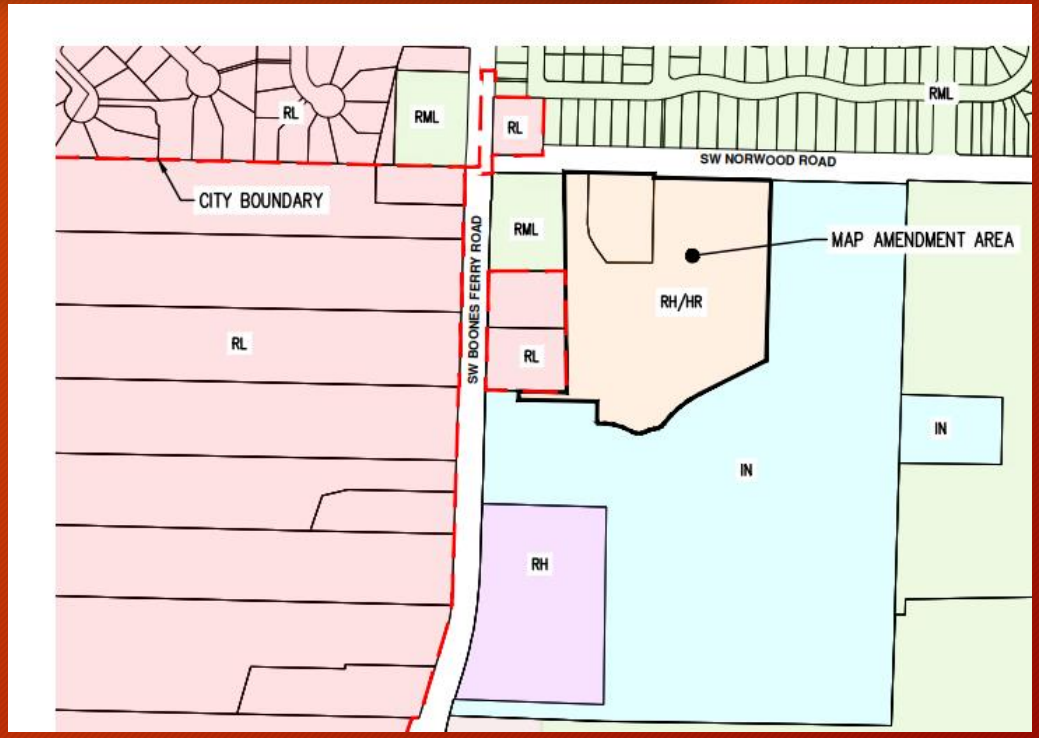
Text and Plan Amendment does not serve the City's or Public Interests and is not in context.

CHAPTER 44 HIGH DENSITY HIGH RISE ZONE (RH-HR)

TDC 44.100. Purpose.

The purpose of the High Density High Rise (RH-HR) zone is to provide areas of the City ~~within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club~~ that are suitable for high density apartment or condominium~~s towers~~.

Nowhere in the current zoning district map of any area in Tualatin is an RH-HR zone located next to a RL and RML zones. This text amendment also negates Tualatin Core Opportunity Investment Area and is not in the City's best interest. The development is not in context of the surrounding designated land use zones.



proposed_development_code.pdf (tualatinoregon.gov)

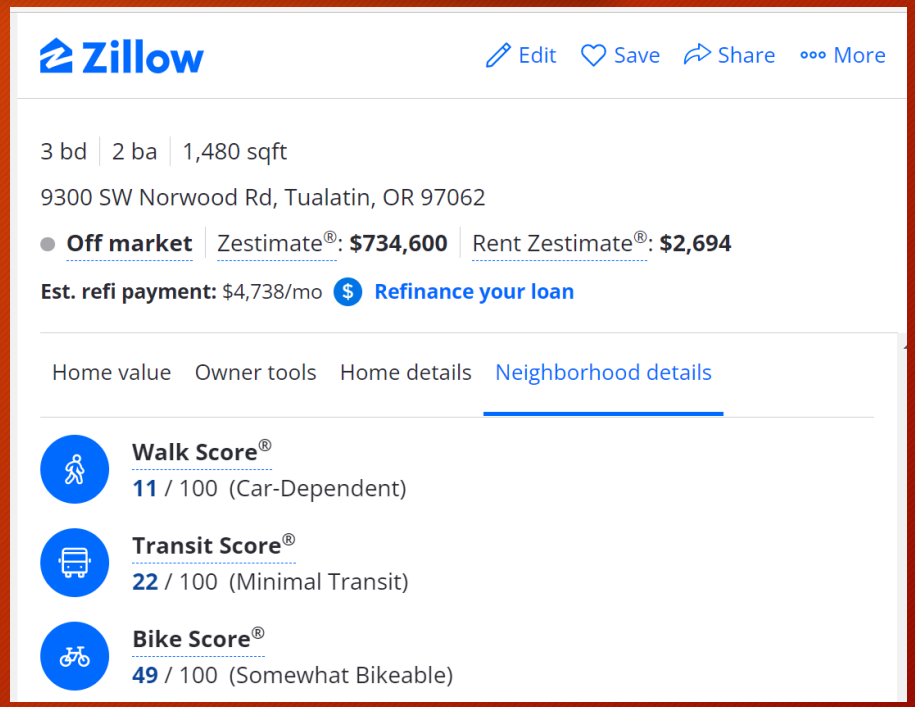
existing_and_proposed_zoning_maps.pdf (tualatinoregon.gov)

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

The Housing Need Analysis, Demographics indicate the need for walkable areas, with access to services. Norwood Rd has neither…

- **Tualatin will plan for more single-family attached and multifamily dwelling units in the future to meet the City's housing needs.** Historically, about 53% of Tualatin's housing was single-family detached. New housing in Tualatin is forecast to be 40% single-family detached, 15% single-family attached, and 45% multifamily.
    - The factors driving the shift in types of housing needed in Tualatin include changes in demographics and decreases in housing affordability. The aging of senior populations and the household formation of young adults will drive demand for renter- and owner-occupied housing, such as small single-family detached housing, townhouses, duplexes, and apartments / condominiums. Both groups may prefer housing in walkable neighborhoods, with access to services.

hna.pdf (tualatinoregon.gov)



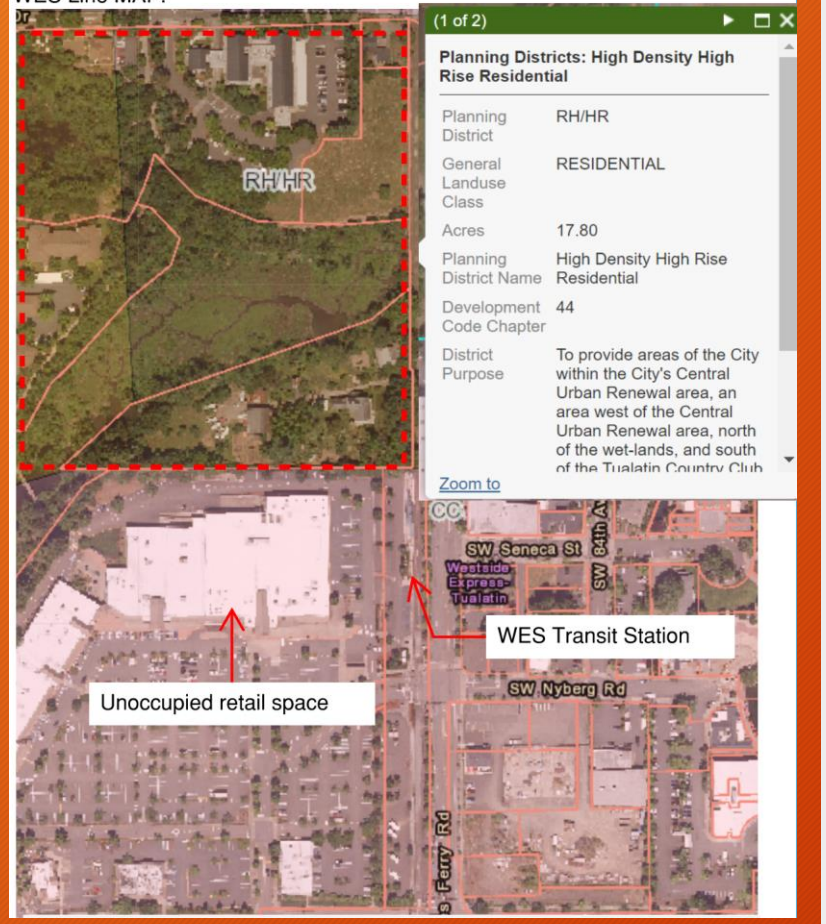
9300 SW Norwood Rd, Tualatin, OR 97062 | Zillow

- Per the housing need analysis demographics indicate, *"Both groups may prefer housing in walkable neighborhoods, with access to services."*
- *Zillow walking score from proposed RH-HR zone on Norwood is 11/100. Transit Score is 22/100*
- *No local services are present with the area off of Norwood Rd.*

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

Location of unused Existing RH-HR zone downtown Tualatin next to existing public transportation and retail zones.

Exhibit C -Existing RH-HR zone undeveloped by Westside Transit Station and WES Line MAP.



- Better use of Existing RH-HR zones, planning and infrastructure.
- Utilizes Existing WES transit more efficiently for commuting.
- Directly supports the Basalt Creek Employment center
- Spreads population burdens of districting over multiple schools
- Mimics Portland, Clackamas, etc. HR zones near central public transit stations.

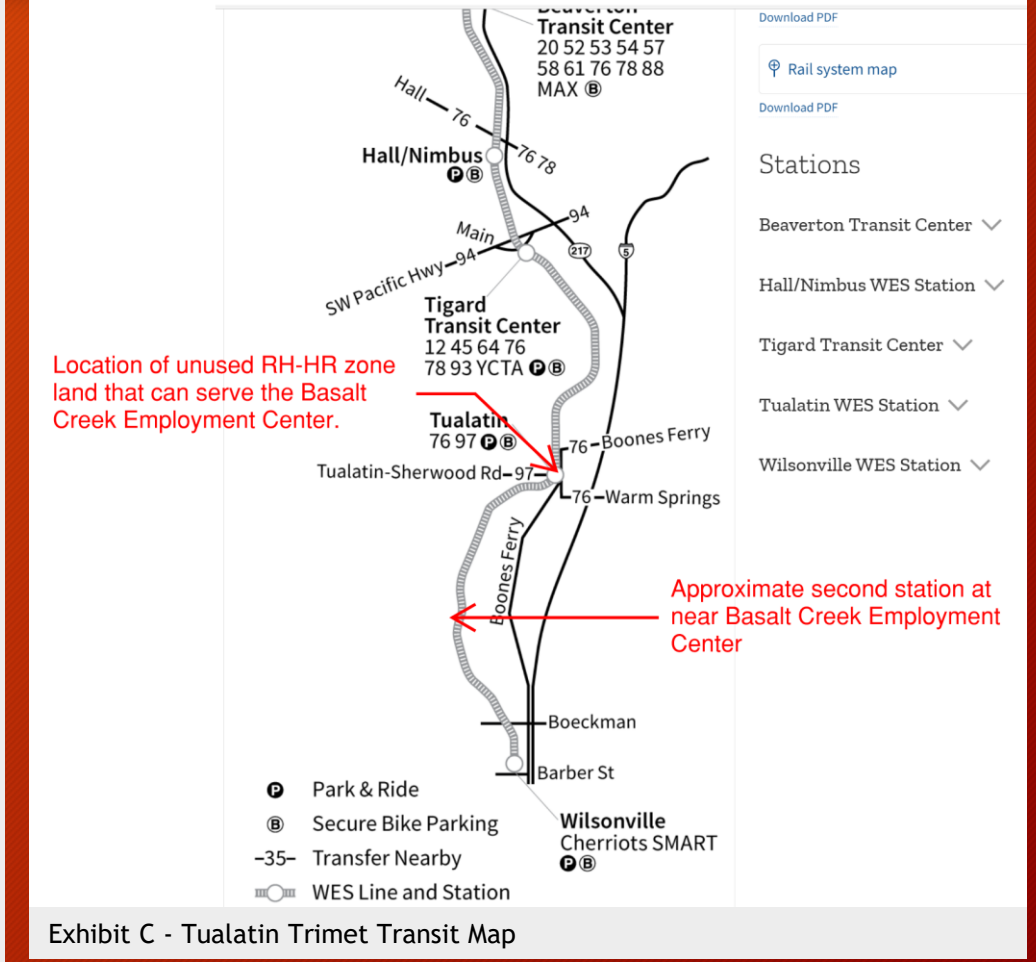


Exhibit C - Tualatin Trimet Transit Map

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

The City has documented viable property for Tualatin's core opportunity investment area in the 18970 Catalyst Project. An RH-HR on Norwood is in direct conflict with this plan as the core is outright zoned for RH-HR development.

COMMUNITY IDENTITY

18970 CATALYST PROJECT

PLAN EFFORT VALUES & PRIORITIES

WHY THIS AREA?

1. Focus on keeping future redevelopment **near major transportation** modes.
2. **Enhance current employment lands** by increasing capacity.
3. **Prepare** for major regional transportation projects.
4. Remedy areas that are prone to **environmental issues**, i.e. flooding.
5. Enhance existing **connectivity**, or provide new connectivity.
6. Fund major infrastructure projects to prepare for **future growth**, leverage area for needs.
7. Based on previous **community needs and desires.**

PLAN EFFORT VALUES & PRIORITIES

VALUES

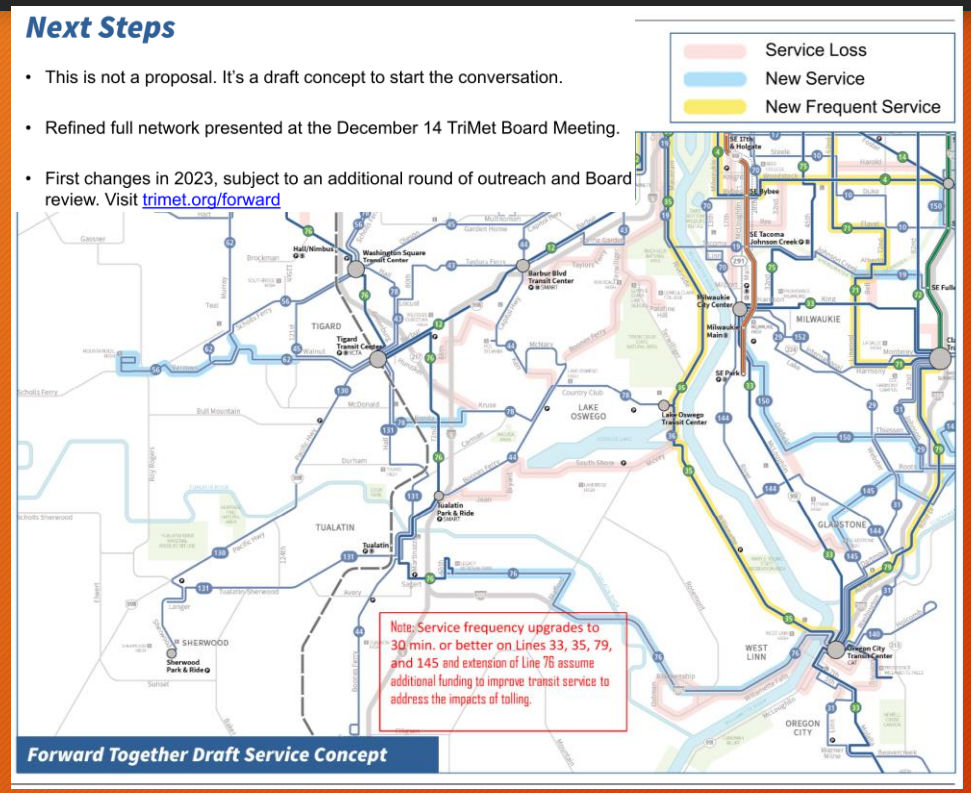
1. More housing
2. Leave no existing business behind
3. Enhance connectivity
4. Foster, create, enhance, and promote identity
5. Maintain and grow existing employment lands
6. Economic prosperity for ALL.

PRIORITIES

MEET-Packet-d1d5f98350ce45338622a703817067fd.pdf (usgovcloudapi.net)

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan, The amendment does **not** meet Statewide planning goals and Oregon administrative rules including the Transportation Planning Rule. The amendment does **not** meet relevant Metro functional plan criteria.

Utilizing existing WES Transit in the core of Tualatin is inline with TRIMET's vision of increased ridership with current available transit infrastructure. Public bus transit near Norwood will be discontinued.

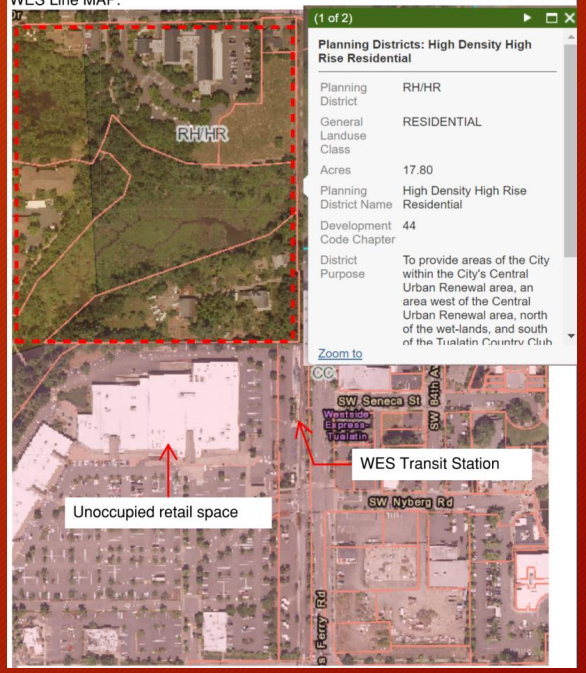


Trimet is trying to increase ridership since COVID. Based on these findings there will be limited public transit available on Norwood Rd with loss of line 96. Line 44 is in the draft concept stage and will not be available for the foreseeable future. Until line 44 is serviceable the PTA and PMA applications are not timely for this location when WES is available in the CORE near an outright RH-HR zoned area.

Assistant Director of Planning, Steve Koper's statement, "…work with the DLCD and partners to find a solution to our traffic issues."

planning period. Director Koper stated there is a lot of employment in our city that passes through traffic in relationship to I-5, which gives us a unique position relative to other cities. He stated it will be best for the City to work with DLCD and partners to find a solution to our traffic issues.

Exhibit C -Existing RH-HR zone undeveloped by Westside Transit Station and WES Line MAP.



MEET-Packet-d1d5f98350ce45338622a703817067fd.pdf (usgovcloudapi.net)

Per TDC 33.070 the PTA and PMA applications for Norwood Rd should be denied based on the following criteria

TDC 33.070. - Plan Amendments.
SHARE LINK TO SECTIONPRINT SECTIONDOWNLOAD (DOCX) OF SECTIONSEMAIL SECTIONCOMPARE VERSIONS

(1) *Purpose.* To provide processes for the review of proposed amendments to the Zone Standards of the Tualatin Development Code and to the Text or the Plan Map of the Tualatin Comprehensive Plan.

(2) *Applicability.* Quasi-judicial amendments may be initiated by the City Council, the City staff, or by a property owner or person authorized in writing by the property owner. Legislative amendments may only be initiated by the City Council.

(3) *Procedure Type.*

(a) Map or text amendment applications which are quasi-judicial in nature (e.g. for a specific property or a limited number of properties) is subject to Type IV-A Review in accordance with TDC Chapter 32.

(b) Map or text amendment applications which are legislative in nature are subject to Type IV-B Review in accordance with TDC Chapter 32.

(4) *Specific Submittal Requirements.* An application for a plan map or text amendment must comply with the general submittal requirements in TDC 32.140 (Application Submittal).

(5) *Approval Criteria.*

(a) Granting the amendment is in the public interest. **Based on the evidence provided in this document a plan and text amendment is not in the public's interest.**

(b) The public interest is best protected by granting the amendment at this time. **The public interest is not protected, as the proposed amendment will exacerbate current failing infrastructure gaps as defined in this document.**

(c) The proposed amendment is in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan. **The proposed amendment does not comply with Tualatin Core opportunity plan or comprehensive plan documents.**

(d) The following factors were consciously considered:

(i) The various characteristics of the areas in the City; **RH-HR zone is reserved for the central core of Tualatin within the current text. The characteristics of the area on Norwood are RL and RML homes adjacent to the site. The plan and text amendment is also in direct conflict with Tualatin's Core Opportunity Plan.**

(ii) The suitability of the areas for particular land uses and improvements in the areas;

(iii) Trends in land improvement and development;

(iv)

Per TDC 33.070 the PTA and PMA applications for Norwood Rd should be denied based on the following criteria

Property values;

(v)

The needs of economic enterprises and the future development of the area; needed right-of-way and access for and to particular sites in the area;

(vi)

Natural resources of the City and the protection and conservation of said resources; **Due to the site being adjacent to what Clean Water Services defines as a "Sensitive Area" and Washington County's stay regarding SNRs; development cannot continue until revision of the Tualatin's SNR map and the development code identifying natural wildlife habitat that is missing from map 72-1. With current conditions these applications do not meet this criteria and they are not timely until these areas are evaluated and documented by Tualatin.**

(vii)

Prospective requirements for the development of natural resources in the City;

(viii)

The public need for healthful, safe, esthetic surroundings and conditions; and

(ix)

Proof of change in a neighborhood or area, or a mistake in the Plan Text or Plan Map for the property under consideration are additional relevant factors to consider.

(e)

If the amendment involves residential uses, then the appropriate school district or districts must be able to reasonably accommodate additional residential capacity by means determined by any affected school district.

(f)

Granting the amendment is consistent with the applicable State of Oregon Planning Goals and applicable Oregon Administrative Rules, including compliance with the Transportation Planning Rule TPR (OAR 660-012-0060).

(g)

Granting the amendment is consistent with the Metropolitan Service District's Urban Growth Management Functional Plan.

(h)

Granting the amendment is consistent with Level of Service F for the p.m. peak hour and E for the one-half hour before and after the p.m. peak hour for the Town Center 2040 Design Type (Comprehensive Plan Map 10-4), and E/E for the rest of the 2040 Design Types in the City's planning area.

(i)

Granting the amendment is consistent with the objectives and policies regarding potable water, sanitary sewer, and surface water management pursuant to applicable goals and policies in the Tualatin Comprehensive Plan, water management issues are adequately addressed during development or redevelopment anticipated to follow the granting of a plan amendment. **Tualatin Comprehensive plan does not adequately address current developments. Tualatin is currently reviewing a PTA and PMA for the water district comprehensive plan. These applications do not meet this criteria as stated until Tualatin adequately addresses current water management issues and these applications are no timely.**

(j)

The applicant has entered into a development agreement. This criterion applies only to an amendment specific to property within the Urban Planning Area (UPA), also known as the Planning Area Boundary (PAB), as defined in both the Urban Growth Management Agreement (UGMA) with Clackamas County and the Urban Planning Area Agreement (UPAA) with Washington County.

Conclusion – RH-HR plan amendment change on Norwood Rd should be denied as indicated by the planning commission vision, ordinances, and public's interest.

1) A RH-HR, plan and text amendment change on Norwood Rd from Institutional and RML is not compliant with the Basalt Creek Master Plan

2) A RH-HR plan and text amendment change on Norwood Rd is in violation of Ordinance 1418-19 for development land use types allowed in the Basalt Creek Master Plan and must be reviewed with other government bodies.

3) A RH-HR plan and text amendment change is not in the public nor City's interest. Removing restrictions to where a RH-HR zone is located will not allow the Tualatin's Core Opportunity initiative to develop

4) A RH-HR, plan and text amendment change on Norwood Rd doesn't allow for sufficient infrastructure support for the new and current residents based on the 20 year plan and is not timely.

5) 92% of units indicated in the HNA and comprehensive plan was met within 4 years of the 20 year plan. Tualatin has 16 years to evaluated the additional (74) units of housing needed per the HNA (1014). These applications are not timely.

6) The Tualatin Planning Commission voted 5-1 to recommend denial of both the plan text and plan map amendments to City Council

Per Tualatin Development Code (33.070), the plan and text amendment to add 9.2 acres for a RH-HR zone on Norwood Rd should be denied.

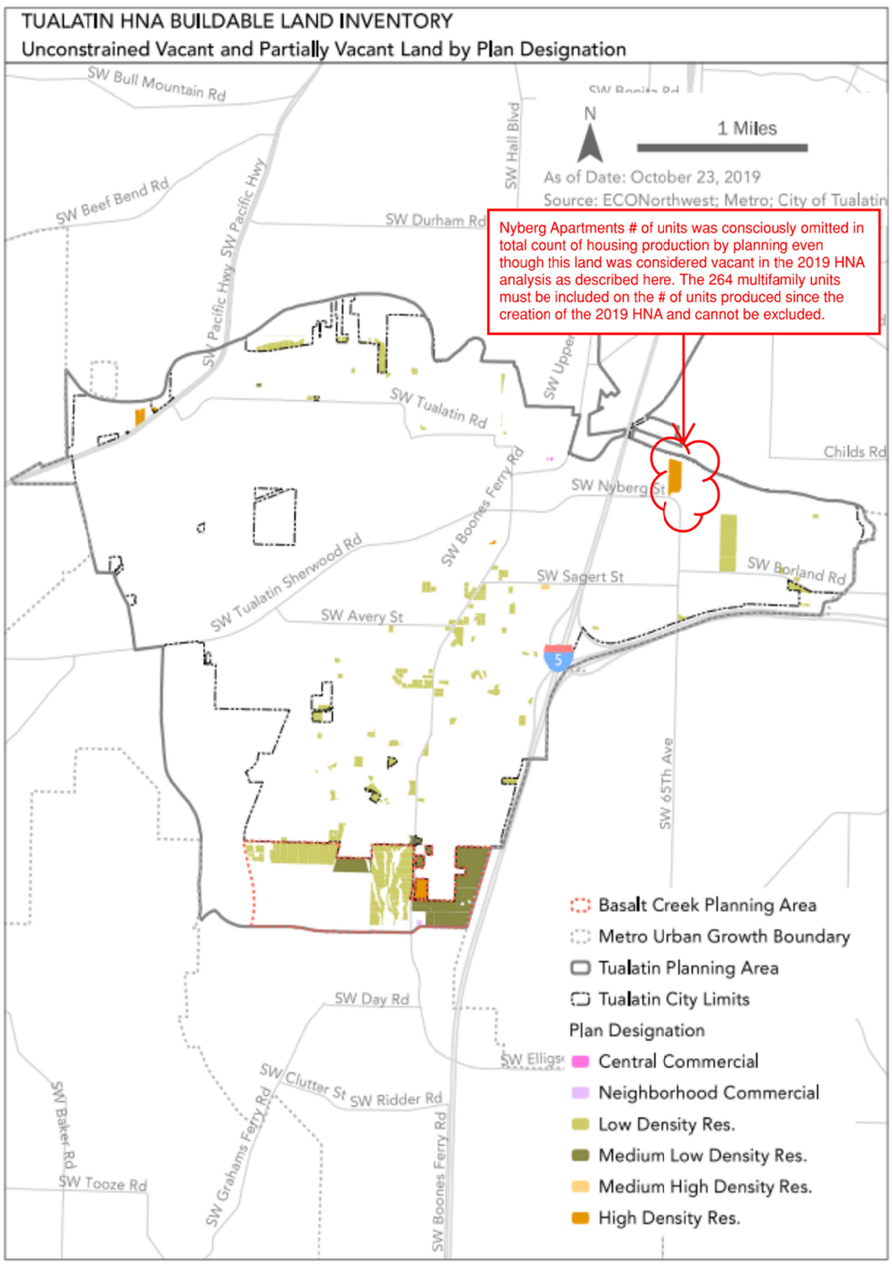
Nyberg Apartments** (Commons on the Tualatin River)	Multi-family	**December, 4th, 2019***	264	0	https://www.tualatinoregon.gov/planning/ar18-0007-tualatin-apartments
Total approved current and planned housing units	N/A	As of Today	941	0	**Units and housing production approved between December 2019 - Today****

***Final decision for this development was December 4th, 2019 per the Architectural Review Board's process for requests to appeal and this development fall under time frame of the HNA for inclusion as signed by Patrick Gaynor, Acting Chair of the Architectural Review Board at that time. NOTE: These units were specifically NOT included in the existing housing inventory of the 2019 Housing Needs Analysis. In fact, under Exhibits 9 in the HNA, this land is shown as "VACANT." See pages 11 and 12 in the HNA. Therefore, the additional 264 units are clearly new units which count toward the overall goal of 1,014 units. There is no basis to exclude the new units, which are still under construction, as counting toward the goal of 1,014 units.**

**** The applicant has also indicated with verbal and written testimony that Tualatin has produced a minimum of 800 units of housing since the December 2019 HNA, and that 80% of housing needs have been met within the first 4 year of the 20-year plan. Here, it is important to note that, within its 800 count, the applicant correctly includes the 264 new units of the Nyberg Apartments currently under construction. The applicant excludes the Tualatin Heights Apartments, which zone change was approved on February 22, 2022, and thus it is fully entitled. Only architectural review remains. Because the Tualatin Heights Apartments are fully entitled, architectural review should not be used to exclude those 116 units from counting toward the goal of 1,014 units.**

Exhibit 9. Unconstrained Vacant and Partially Vacant Residential Land, Tualatin Planning Area, 2019



Findings and Analysis based on the 2019 HNA and OAR 660-007 current and planned Tualatin housing production (pg.80)

https://mccmeetingspublic.blob.core.usgovcloudapi.net/tualtnor-meet-5d3fca29f6c44734b07f10f05aaa5c3c/ITEM-Attachment-001-a936ee56156b45ef96f29db253fb32f2.pdf

HNA unit type and requirement per Exhibit 88*	# Unit type approved	% of type of housing per category (1014)	surplus/deficit (units)-based on HNA ratios	Comments
Total new single family detached (HNA defines this category to 40%)	**322**	**31.76%**	**-84**	Current ratio indicates 31.7% of new approved housing is single-family detached. Per the HNA Tualatin is anticipating adding 1014 units of housing by 2040, Tualatin is not complying with this ratio. In order to maintain this ratio an additional 84 units of single family detached homes would be needed by 2040 before approving additional multifamily units.
Total new housing that is single family attached (HNA defines this category to 15%)	**127**	**13.60%**	**-25**	Current ratio indicates 12.5% of new approved housing is single-family attached. Per the HNA Tualatin is anticipating adding 1014 units of housing by 2040, Tualatin is not complying with this ratio. In order to maintain this ratio an additional 25 units of single family detached homes would be needed by 2040 before approving additional multifamily units.
Total new housing that is Multifamily (HNA defines this category to 45%)	**496**	**48.92%**	**91**	Current ratio indicates 49% of new approved housing is multifamily. Per the HNA Tualatin is anticipating adding 1014 units of housing by 2040, Tualatin is not complying with this ratio. In order to maintain the HNA ratio Tualatin must first reduce the production of multifamily housing and add additional units of single family attached and detached homes before any other multi-family housing units are to be considered.
Total units with zone changes (HNA defines this to 1014 units by 2040)	**941**	**92.80%**	**203 unit surplus with the proposed RH-HR zone for within the year 2023** **1217 units would far exceed the 1014 units needed by 2040 over the 20 year plan**	Current housing production complies with 93% of the housing needs analysis and is inline with the housing production strategies of the HNA even though this was achieved in a 4 year period. Additional analysis indicates to maintain forecasted demand (including city limits and the Basalt Creek, There will be a deficit of (109) single family detached and attached units. It is recommended at this time that the current land use category of RML be maintained as this will provide the deficient identified in this analysis and maintain city wide housing production needs and forecasts until 2040 as prescribed by the HNA.

* Exhibit 88. Forecast of demand for new dwelling units, Tualatin Planning Area (pg. 80)

ITEM-Attachment-001-a936ee56156b45ef96f29db253fb32f2.pdf (usgovcloudapi.net)

Exhibit 88. Forecast of demand for new dwelling units, Tualatin Planning Area (city limits and Basalt Creek), 2020 to 2040

Source: Calculations by ECONorthwest. Note: DU is dwelling unit.

Variable	Mix of New Dwelling Units (2020-2040) Scenario 1	Scenario 2	Scenario 3	Scenario 4
Needed new dwelling units (2020-2040)	1,014	1,014	1,014	1,014
Dwelling units by structure type				
Single-family detached				
Percent single-family detached DU	50%	45%	35%	40%
***equals* Total new single-family detached DU**	507	456	355	406
Single-family attached				
Percent single-family attached DU	9%	10%	15%	15%
***equals* Total new single-family attached DU**	91	102	152	152
Multifamily				
Percent multifamily	41%	45%	50%	45%
Total new multifamily	416	456	507	456
equals Total new dwelling units (2020-2040)	**1,014**	**1,014**	**1,014**	**1,014**

Exhibit 89 shows the final forecast for housing growth in the Tualatin city limits during the 2020 to 2040 period. The projection is based on the following assumptions:

- Tualatin's official forecast for population growth shows that the city will add 1,014 households over the 20-year period. Exhibit 89 shows Metro's forecast for growth of 1,014 new dwelling units over the 20-year planning period.
- The assumptions about the mix of housing in Exhibit 89 are consistent with the requirements of OAR 660-007[52]:
  - **About 40% of new housing will be single-family detached**, a category which includes manufactured housing. In 2013-2017, 53% of Tualatin's housing was single-family detached.
  - **Nearly 15% of new housing will be single-family attached.** In 2013-2017, 6% of Tualatin's housing was single-family attached.
  - **About 45% of new housing will be multifamily**. In 2013-2017, 41% of Tualatin's housing was multifamily.

OAR 660-007 also specifies the mix and density of new residential construction for cities within the Metro Urban Growth Boundary (UGB):

OAR 660-007-0035 sets specific density targets for cities in the Metro UGB. Tualatin's average density target is eight dwelling units per net buildable acre.[3]

- **Demand shift from renting to owning.** After years of decline, the national homeownership rate increased from a 50-year low of 62.9% in 2016 (Q2) to 63.7% in 2017 (Q2). Trends suggest homeownership among householders aged 65 and older have remained strong and homeownership rates among young adults have begun stabilizing after years of decline.
- **Tualatin will need to meet the requirements of House Bill 2001.** The Legislature passed House Bill 2001 in the 2019 Legislative session. The bill requires cities within the Metro UGB to allow "middle" housing types in low-density residential zones. The bill defines middle housing types as: duplexes, triplexes, quadplexes, cottage clusters, and townhouses. To comply with House Bill 2001, Tualatin will need to:
  - Allow cottage cluster as a housing type in the Residential Low Density zone. Tualatin may want to allow cottage cluster housing in the Medium-Low Density and Medium-High Density zones. Tualatin will also need to include development standards in the Tualatin Development Code.
  - Allow duplexes, townhouses, and multifamily housing as a permitted use in the Residential Low Density zone.

Summary of Findings:

The 2019 Housing Needs Analysis (HNA) outlines a requirement of 1014 housing units by 2040. This includes a diverse range of housing options detailed in Exhibit 88, which forecasts the demand for new dwelling units in Tualatin per OAR 660-007.

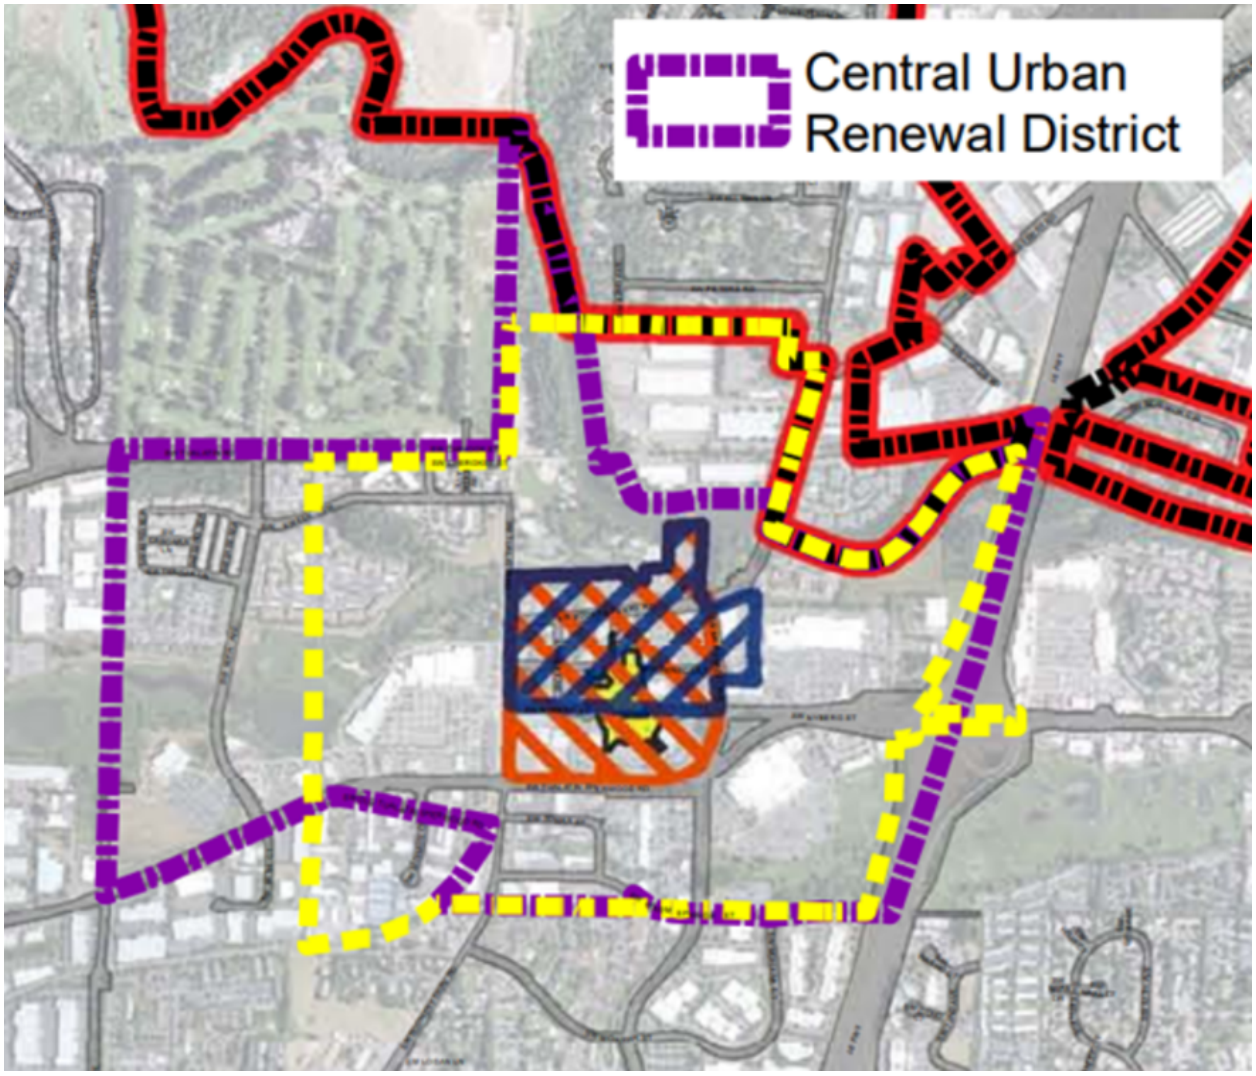
An examination of Tualatin's current housing production strategies reveals the approval of 941 housing units including entitled zone changes have been approved within a four-year period. Considering these figures and the diverse housing needs, Tualatin currently faces a shortage of 84 single-family detached homes and 25 single-family attached homes, resulting in a total deficit of 109 units needed to meet the HNA forecasts. The fulfillment of this deficit would result in a total of 1050 housing units, aligning with the HNA's projection for 2040. Consequently, any new proposed housing developments can be evaluated within the 16-year timeframe specified by the HNA and Tualatin's comprehensive 20-year plan.

Therefore, the proposed plan and text amendment should prioritize the provision of single-family attached and detached homes, as stipulated by the HNA diverse need for housing.

Based on this analysis of the proposed development in respect to the HNA, it is not recommended to approve additional multifamily housing units until the criteria set by the HNA, as defined by OAR660-07, are met. Until the 2019 HNA undergoes revision, it remains the basis for determining Tualatin's housing needs and comprehensive plan.

Exhibit C - Viable and outright RH-HR zoned sites for development that consciously consider the characteristics of the City

The following locations are potential sites in the core of Tualatin near outright RH-HR zoned areas near local amenities such as mass transit. For reference the map below indicates the Central Urban Renewal District where RH-HR is currently outright zoned. Tualain has also deemed this area as a core opportunity investment area and is a prime area for high-density high-rise development.



SIte A - 8515 SW Tualatin-Sherwood Rd, Tualatin, OR 97062

This existing CC building has been vacant for approximately 8 years and is currently for lease. This property sits adjacent to central WES transit station Trimet bus station, and Smart Ride bus system. As it currently stands it could be assumed this property is not viable for CC use, due to the duration that it has been unoccupied. The site sits, flat, with ample parking would be ideal for a high rise development as well.

SIte B - 19100 SW Boones Ferry Rd and proximity properties R534050, Tualatin, OR 97062

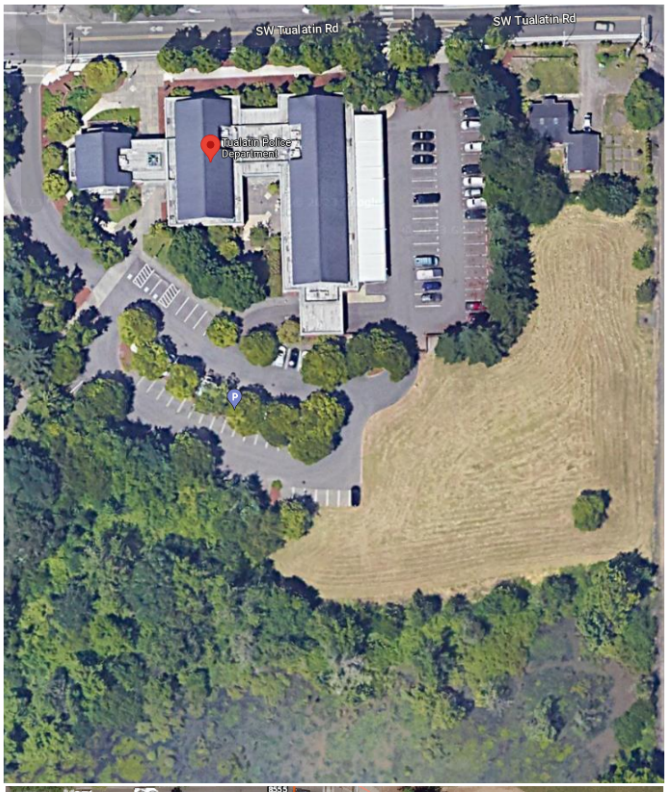
This site is an existing CC similar to Site A that has been vacant for an extended period of time and is currently for lease. Like Site A the site is next to many amenities including mass transit. The site is flat and shares the characteristics of being a suitable site for a high density high rise development which is also adjacent to outright RH-HR zoned areas.

Site C - 18970 SW Boones Ferry Rd, Tualatin, OR 97062

This CC site is the location for the Tualatin 18970 Catalyst project. Based on the core opportunity investment plan, this site has been deemed viable for use by the city of Tualatin. Current building rendered elevations show the building type to be a high-rise based on TDC code definition in Chapter 44. This site would require a lot consolidation with the adjacent two properties, 8470 and 8465, but considered viable for a RH-HR zone and is also adjacent to the outright RH-HR zoned areas.

Site D - 8650 SW Tualatin Rd, Tualatin, OR 97062

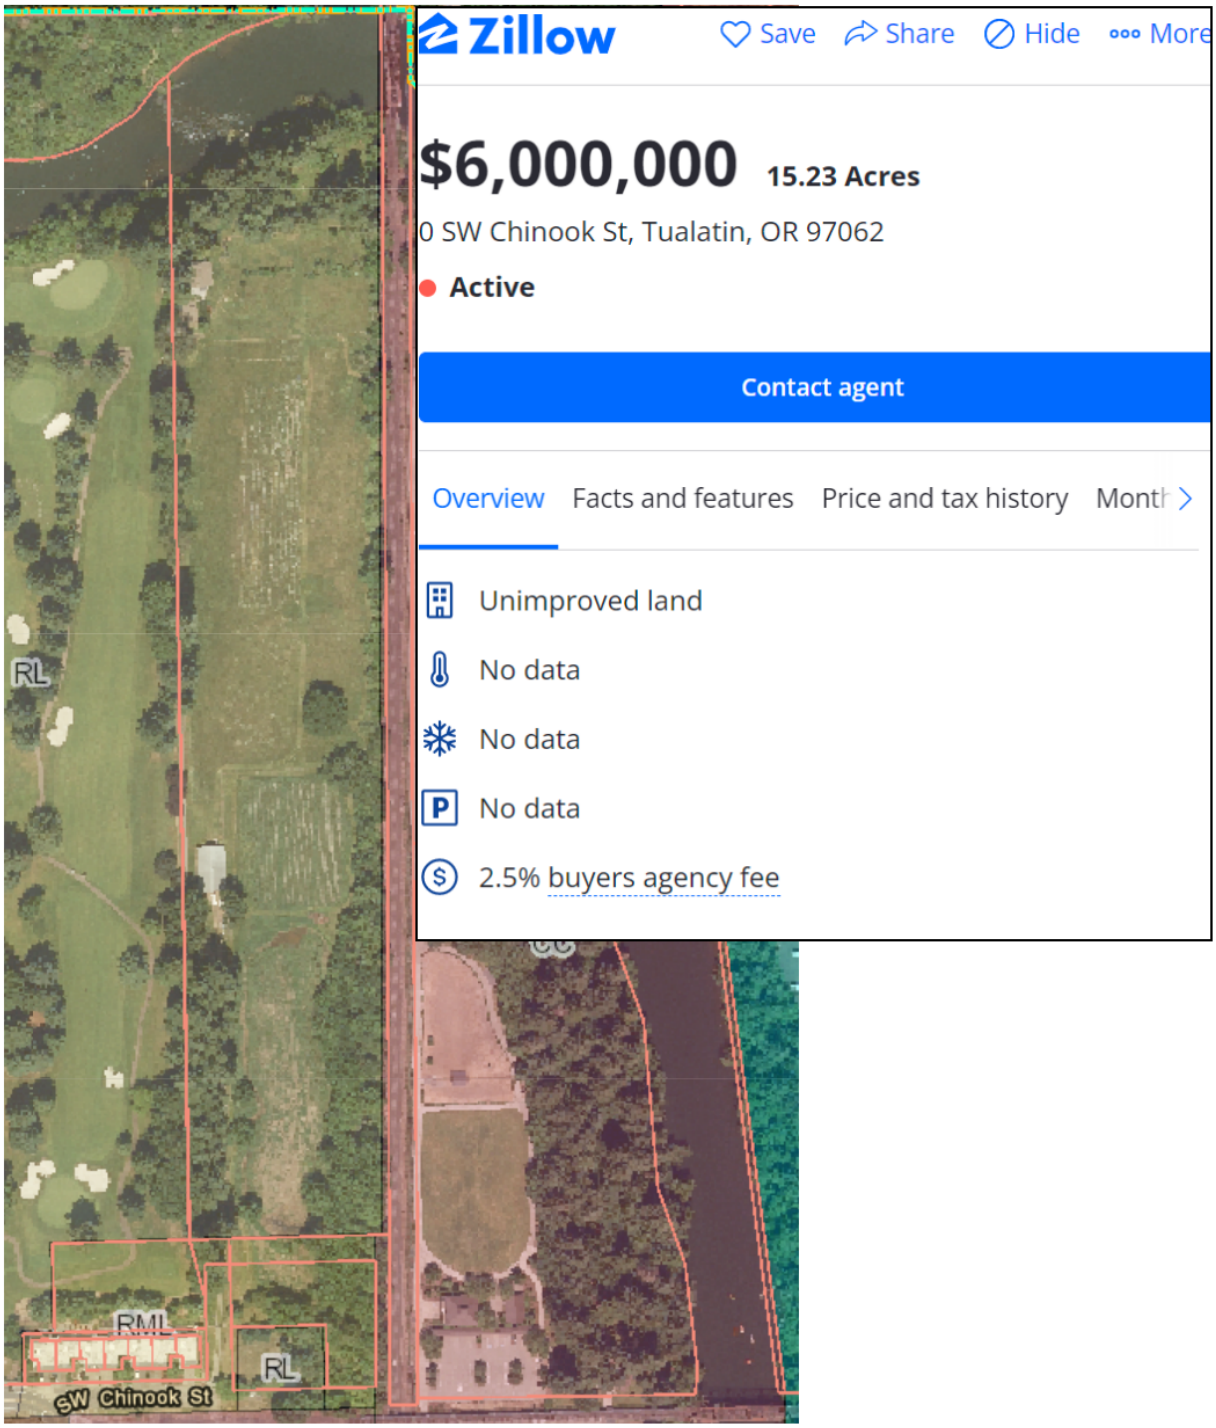
Currently this property is zoned outright RH-HR is the current location of Tualatin's Police Department, however, a portion of this land is undeveloped. The undeveloped portion could be used for a RH-HR development. This property is adjacent to Tualatin Community Park and a prime location for RH-HR development as the City originally deemed suitable for this type of density.



Site E - 0 SW Chinook St, Tualatin 97062

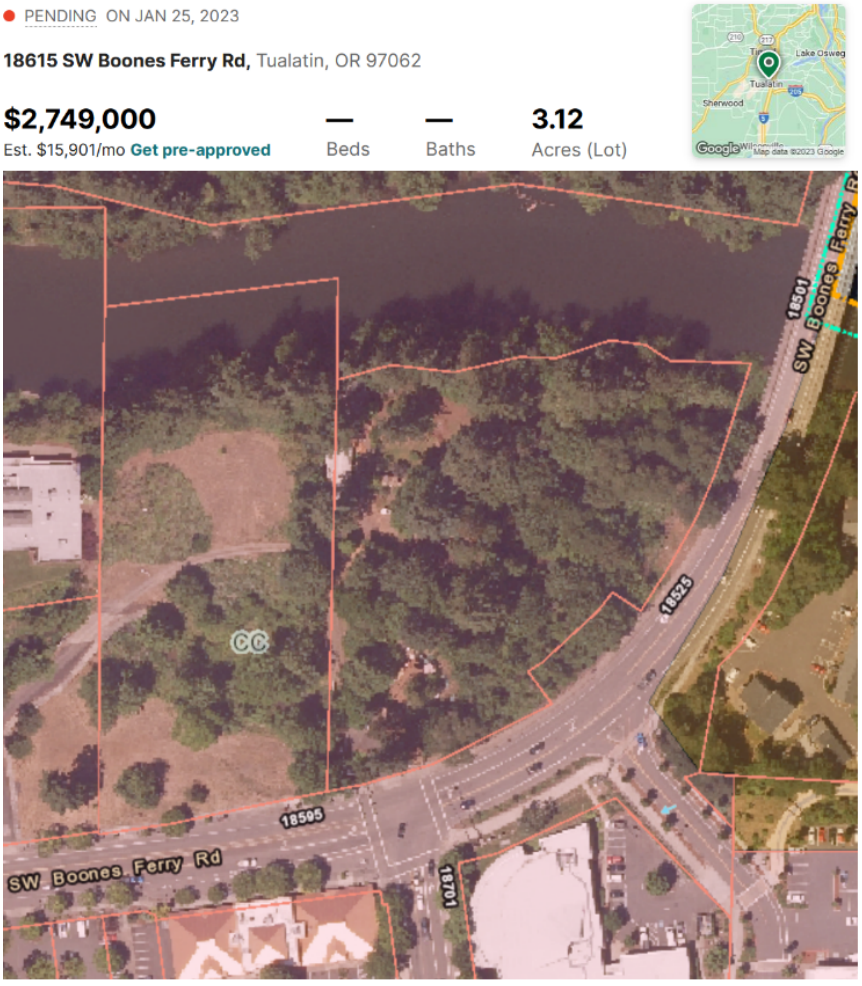
Currently this 15.23 acre property sits adjacent to Tualatin Country Club, Tualatin Community Park and outright RH-HR zoned areas adjacent to the Central Urban District . This property is currently for sale. The location factors alone make an extremely desirable location for a high-rise development. The lower acreage of the property could be rezoned to RH-HR.

[0 SW Chinook St, Tualatin, OR 97062 | MLS #21383176 | Zillow]



Site F - 18645 SW Boones Ferry Rd, Tualatin, OR 97062

Currently this site is zone CC, sits near many amenities and is in the central urban renewal district near outright RH-HR zone area. It is also adjacent to existing apartments and would be in context for the area. This property is currently pending, but would be a viable prime location for a waterfront RH-HR development near many amenities downtown Tualatin.



SITE G - Existing Tualatin Meadows, Hedges Creek Apartments and Adjacent Areas to Existing RH-HR outright zone and Tualatin Greens Condominiums (RH-HR).

Current site locations for these apartment developments are adjacent to the outright RH-HR zone in the central urban renewal district, near many amenities. Like the Tualatin Heights Apartments reasonable zone change from RML to RHH, these properties would fit a reasonable zone change criteria from RH to RH-HR. If both Tualatin Meadows and Hedges Creek Apartments were allowed a zone change increase; up to an estimated 28 possible acres could be rezoned in this manner. Tualatin Greens Condominiums is a high-rise, high-density development which would be congruent development. There is also an available unbuilt site as indicated by the expansion area. This area would also consciously consider the characteristics of the city, by locating additional high-density high-rise residential in the core of Tualatin as well as other adjacent high-density high-rise developments.

Site H - 17997 SW Lower Boones Ferry Rd and adjacent lots near the Grand hotel.

The site has three parcels that are considered Mix Use Commercial (MUC) and could be rezoned to RH-HR. The site could accommodate this type of residential or mix use commercial and residential. An example of this would be something similar to Eddyline at Bridgeport Apartments. This site does not reside directly in the central urban renewal district, it does however sit near Trimet mass transit Park and Ride Station, Bridgeport Shopping Center and many other amenities making this site a prime location for a high-rise, high-density development. A RH-HR development located here would also be in congruent with adjacent developments.

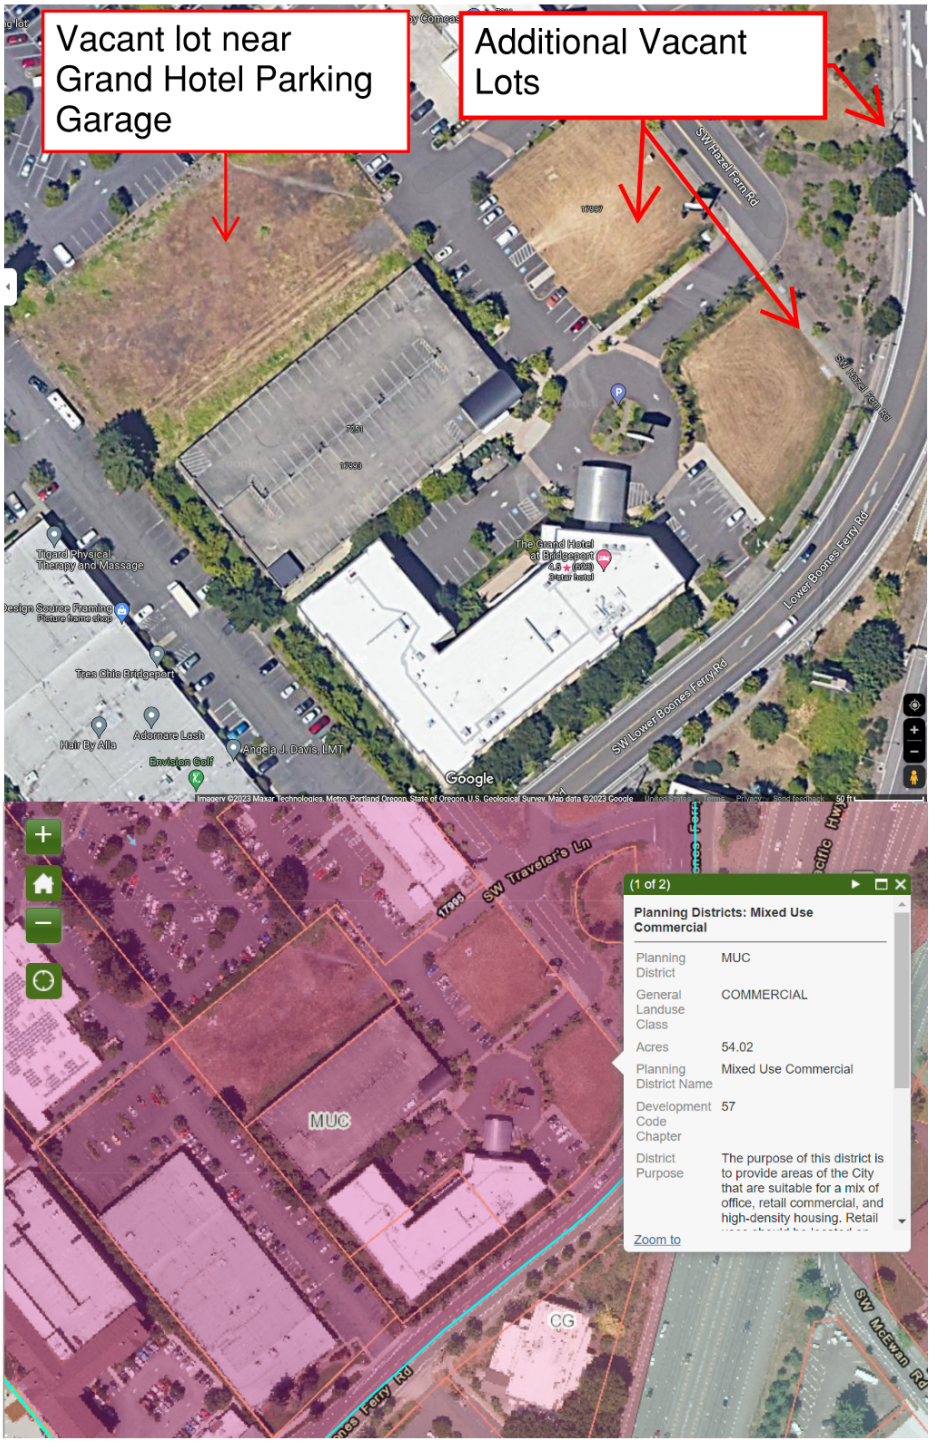


Exhibit D - Example Building Foundations in Floodplain Areas

Opposition has noted that sites located downtown have constraints however, this does not mean these properties are unbuildable and in fact these conditions can be mitigated by certain building construction methods. Two examples of construction means and methods are building with a raised slab foundation or locating an open parking garage on the first floor of the building. Chapter 44 of Tualatin Development Code indicates RH-HR buildings can be built up to six stories.

The following examples depict construction types and current existing buildings in Tualatin's Central Urban Renewal district that use these two foundation methods.

References in this document are provided by The Office of Energy Efficiency and Renewable Energy:

Flood-Resistant Raised-Slab Foundations | Building America Solution Center (pnnl.gov)

Example A: Flood Resistant Raised-Slab Foundations:

"Per IRC 2021 Section 322, raised-slab floors constructed in flood hazard areas (including A zones and Coastal A zones) should have the slab elevated to at least 12 inches above the BFE. Electrical components such as switches, sockets, circuit breakers, and wiring should also be elevated at least 12 inches above the BFE in order to reduce damage to the electrical system and the chance of fire from short circuits. Plumbing, heating, ventilation, and cooling equipment, including duct work, should also be installed 12 inches or more above the BFE to prevent damage."

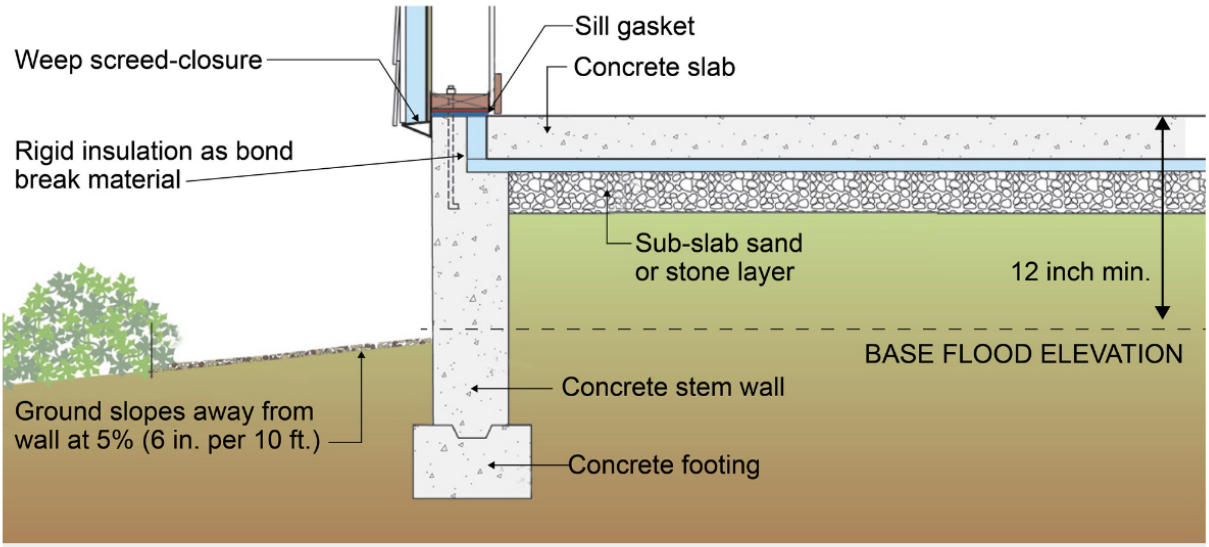

Figure 6. This raised-slab poured concrete foundation includes flood-resistant features such as a sloped grade, capillary break under the slab (gravel or sand), vapor retarder under the slab (rigid insulation), and capillary break at the top of the foundation wall (Source: Adapted from Building Science Corporation 2022).

Two more recently constructed buildings in Tualatin's central urban renewal district use this construction type as a means of mitigation. These buildings include **18810 SW Boones Ferry Rd** and **18840 SW Boones Ferry Rd.** Reviewing the two elevations below you notice a raised slab which is designed to be above the floodplain.

18810 SW Boones Ferry Rd raised slab construction:

18840 SW Boones Ferry Rd raised slab construction:

Example B: Flood Resistant Raised-Slab Foundations with Parking:
The second method for mitigation similar to a raised slab foundation is locating a non-enclosed parking area on the first floor of the building. Level 1 of the structure would essentially clear the flood plain level. **Villas on The Lake** provide an example of this construction type. Since most high-density high-rise buildings are built in central city locations, a parking area below the building is well suited for this type of residential development.

18847 SW 84th St raised slab construction with parking:

A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: No to proposed plan and text amendments PTA 23-0001 and PMA 23-0001

Dear Ms. Nelson, Mayor Bubenik, and members of Tualatin City Council,

Please include this email in the public comment to the above proposed plan text amendments PTA 23-0001 and PMA 23-0001. I strongly recommend to the City Council to vote no on both.

Although increasing density is a worthy goal, these amendments, as written, are a serious error. The current Tualatin Development code simple restriction of high-rise residential construction to the downtown area ensures walking distance access for high-rise residents to grocery stores, banks, medical services, restaurants, and nearby transit service. Amending the code to allow it anywhere in Tualatin without regard to those services must be rejected. Requiring these services within walking distance must be included. Our development code is the only restriction to bad development. There is no doubt in my mind that if these amendments are approved, nearby neighborhoods, traffic volume, and poor quality of life would result.

Please vote no.

Cathy Holland

Subject: Comments opposing plan text and plan map amendments - June 12, 2023 Hearing

Dear Ms. Nelson and Tualatin City Council Members,

I oppose the following Plan Text Amendment and the Plan Map Amendment. Please include my comments in your record for the rescheduled June 12, 2023, hearing.

A Plan Text Amendment PTA 23-0001: The proposal requests to remove locational factors from the High-Density High Rise (RH-HR) purpose statement in Tualatin Development Code Section 44.100 and revise Table 44-3 to limit the structure height to 4 stories or 50 feet in the RH-HR zoning district south of Norwood Road, which would be applicable to the subject site.

A Plan Map Amendment PMA 23-0001: The proposal requests the zone change from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR) for property located on a 9.2-acre site at 23370 SW Boones Ferry Road (Tax Lot: 2S135D000106).

The City Council should vote against both of these Amendments.

Why?

Plan Text Amendment PTA 23-001 removes the locational factors from the High-Density High Rise (RH-HR) without adding the protections to ensure existing neighborhoods.

The existing language states: The purpose of the High Density High Rise (RH-HR) zone is to provide areas of the City within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club that are suitable for high density apartment or condominiums towers.

This simple deletion "provide areas of the City within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club" meets the spirit of potential new regulations without including the protections to existing neighborhoods, addresses traffic patterns, parking issues, livability, and service requirements. As edited, it almost assures all walkability goals are overlooked.

The City Council should vote no. The City Council should send this back to staff to find language that protects the neighborhoods, addresses traffic patterns, parking issues, livability, and service requirements.

The City Council also should vote no on Plan Text Map Amendment PMA 23-001. The application is flawed and misleading. Flaws include a suggestion that this site would contribute towards meeting a deficit of RH-HR. It completely overlooks existing Central Urban Renewal vacant or underused property which could more than meet any deficit, if it exists. These properties have the advantage of nearby services such as shopping, restaurants, and transit service. Possible sites include vacant property located in the core business area, in the Bridgeport area. This is simply good planning to site RH-HR near these services to reduce reliance on cars.

The application also overlooks or doesn't include the recently approved Tualatin Heights designation. This approved, future project should have been included in the analysis, If it had been, then there would be no deficit offset.

There is another reason to vote no: The current zoning of Institutional is an employment zone. Not just an employment zone, but a high wage employment zone. The original application and zoning promised

high paying jobs (administrator, teachers, and professionals). Even if the owner has maxed out their development plan for their own use, there are many, many other options which could only develop this proposed area. Other possible uses include PCC campus, technology training schools, Clackamas Community College campus, and other institutional uses.

Please listen to your residents and vote no. These are flawed amendments and should not be approved.

Cathy Holland

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: 4/20 meeting information

Hello,

I am writing this letter to have it included as information for consideration by the City Planning Commission and City planners. This is in regards to the upcoming meeting on 4/20 of whether or not to recommend the proposed plan text amendment and other proposals regarding the High Rise on Norwood Rd.

I, along with many others members of our community have looked at this from many angles and tried our best to understand the cities decision making process. When looking at this project there are a couple things that stick out very clearly. First of all any opinion submitted by a member of Horizon Christian Church that is not a resident of Tualatin should not be accepted. This should be a Tualatin resident discussion only.

As I have looked at and tried to make sense of the city development code, along with talks with staff in the planning department, the decision on whether to approve building proposals are very complicated and not as cut and dry as looking at our comprehensive plan or the Housing Needs Analysis. While I have been told that the HNA is more of a floor than a ceiling for development it still seems to me that the amount of current and proposed development is more than excessive in the first 3 years of a 20 year plan. While everyone in the planning department and on the commission have certain criteria to meet for projects what I have not seen are arguably the two most important questions to ask. 1. Is this project good for our city and how will it benefit our current residents quality of life. 2. Is this project good for our city and how does it benefit future residents. Well if you as a planning group do nothing more than just look at these two questions and truly ask yourselves who does this project benefit, the answer to both questions is an overwhelming NO. This project in NO way will benefit current residents. In fact it will have a very strong negative impact on all of us. Traffic is already a major issue and only going to get worse with the additional 1,000+ cars coming from the Autumn Sunrise development. Plus add in additional traffic from people trying to avoid future tolls on I5. With the city currently not planning any changes to Boones Ferry to help with traffic things are only going to get much worse. Property values will also go down and nobody wants to see their homes take a big financial loss. Putting more people farther from resources like Fire, Food and transportation is only going to put further strain on our resources and impact current and future residents. Bringing more people into an already taxed infrastructure will is not a great quality of life for future residents of this proposed complex or our city in general. So I again ask you to start by considering current and future residents and their quality of life.

If that is not enough the proposed text amendment will just give more developers the opportunity to build more high rise structures anywhere in Tualatin. There is a reason that the city code has limited these structures to the downtown area. It is beneficial to build them downtown because they are located closer to emergency resources, transportation and food. Lets keep them downtown and not let the developers run the game. If we are not careful approving these proposals could send a message to all developers that the city of Tualatin is fair game and can be developed anyway that they want so long as they get all the right paperwork in and boxes checked on applications.

This is your chance to stand up to big developers that do not have to stick around and deal with the impact of their developments on our community. We the residents still have to live here and live with these choices. I hope that you all recommend to not pass these proposals and stand up for our city and our people.

Thank you for your consideration,

Subject: Comments regarding proposed Vista development

Good morning,

For the record I would like to have these comments added to the official record and provided to the Tualatin City council for their consideration.

I am writing in regards to the proposed plan text amendment PTA23-0001 and proposed Map amendment PMA23-0001. These two proposals are not in the best interest of the immediate community or the city of Tualatin in general. I am strongly AGAINST both amendments.

I know there are a lot of important questions to ask and answer in regards to these proposals and that the city has a lot of information to sort through to get to a decision. But there are so many more reasons to say NO to these amendments than there are to say yes.

1. The city has many city codes already in place and at times to the regular person it seems that some of these codes and processes are not being followed in the order that they are written. Elected officials of the past have worked hard to create these codes in an effort to help protect many of the things that make Tualatin great. So if any developer can come in and just have the city codes changed to whatever benefits them, then what is the point of having any of these codes at all. They are there for a reason.

2. We as a city spent a lot of time and money to come up with a 20 year comprehensive plan and housing needs analysis. According to these items, Tualatin is only projected to need 1,000 new housing units over the next 20 years. While I have been told that this number is just a floor rather than a ceiling, we are still already at that 1,000 unit number in the first 3years of the 20 year plan before you even included the proposed Vista project. So at this point there is no need to race to push this project through. We could put a hold on it, come up with a better solution and still meet our housing needs.

3. Traffic is a major issue in tualatin and the entire surrounding area. Boones Ferry gets very backed up at various times of the day. Things will not be getting any better as Autumn Sunrise adds its 1,000 additional cars to this bottleneck area. Luis if you add in increasing traffic from more people moving to Wilsonville and Canby the problem is not going to

go away. Currently the city of Tualatin has NO plan for improving Boones Ferry Rd.. This is just mind boggling to me that we have a current traffic issue and rather than solve that problem first we are going to add more traffic and make it worse and then do a traffic study. This is backwards and archaic thinking. All you have to do is watch the Autumn Sunrise development go in to realize how it should be done. They are not buying the homes before the infrastructure. We as a city need to make solving the traffic and improving infrastructure before we just build, build, build.

4. Adding this additional high density complex is irresponsible. It puts two many people too far from resources. There is not adequate mass transit. Tri met has limited service and is looking at reducing it. It is a longer trip to grocery stores. But most importantly it is a longer distance from emergency resources. If we continue to grid lock the city emergency services will not be able to reach this part of town. This not only affects the proposed residents of Vista but all the residents in the surrounding area.

5. While it appears the city planning developers appear to be on the side of this development, it did go before the city planning commission and was voted down. So now you have the city's own planning commission and a large portion of the population saying this is not good.

6. With all the questions being asked two of the most important ones do not even show up in any of the cities processes, codes or information. Those two questions are simply, is this good for current residents and is this good for future residents. You can safely answer NO to both questions .

This project is bad for so many reasons. Just look at the way AKS is currently operating out of control at Autumn Sunrise. They are causing all kinds of problems with the trees and roads. These are not people to be trusted and they do not have to stick around and deal with their mess. If these amendments are passed developers will have the ability to build high rise developments anywhere in town. If we do not stand up to these developers Tualatin will be run over as a town that they can do whatever they want.

The surrounding community is clearly not behind this project and what it represents to Tualatin future. The Church will not meet with the community and even you, our own city council has been told to not meet with us. Please do not let the developers and lawyers dictate what happens to our city. Please step up and recognize that your people are very decided on this project and that it cannot pass as it is currently proposed. There is nothing wrong with saying NO, listening to your people and working on a better solution that helps the church get its money, protects the current quality of life and adds to the livability for the future.

Thanks for your consideration,

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Charles Redwing

A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to Council at the public hearing. The public hearing will be held on May 22, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

A Notice of Decision shall be provided to anyone submitting written comments. As a comment participant, you will receive a Notice of Decision when the decision is made – do you have a preferred mailing address you would like the notice sent?

Dear Planning Department;

I am writing to you in opposition to the plan and text amendment applications PTA23-0001 and PMA23-0001. I also agree with the 383 pages of comments from citizens of Tualatin in opposition to a high-rise on Norwood Rd especially regarding the proposed text amendment (attached). These applications are not in the public's interest nor in context for the area.

Dear Mayor and City Council;

Please also discern the attached testimony provided by members of Horizon Community Church that are in opposition to these developments as these members actually live in Tualatin.

Again, I hope you understand the ramifications of this text amendment change. It will be detrimental to Tualatin's future if approved. These applications completely disregard community input or involvement.

Thanks,

-Chris McReynolds

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without

relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,
Abbi Bertalotto

Lindsey Hagerman
Office Coordinator

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a homeowner in SW Skokomish Ln for three years, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available. The current area and local infrastructure in general does not conform to this level of zoning especially with the new Autumn Sunrise development of approximately 500 new homes and condos.

The three areas of concern are traffic, removal of local institutional zoned areas for future development and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall these properties arebetter suited for this type of zoning with local transit, retail and similar residential development, which could serve the Basalt Creek master plan more locally.

Issue one regarding traffic:

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though the Autumn Sunrise development plans to introduce a stoplight at the

intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5. See Exhibit A in attached document "Norwood Woods and Community for Smart Zoning Practices.pdf".

Issue two regarding institutional infrastructure:

The Tualatin public school system is already dealing with classrooms at capacity, especially the localEdward Byrom Elementary school, where many families' children I know attend. With the addition of the Autumn Sunrise development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone. See Exhibit B in attached document "Norwood Woods and Community for Smart Zoning Practices.pdf" for more detail.

Issue three regarding existing RH-HR zones:

As stated, properties 8412, 8514, and 8538 near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, and easily accessible public transportation. Seeing how fast Autumn Sunrise is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan.

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part

of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

See Exhibit C in attached document "Norwood Woods and Community for Smart Zoning Practices.pdf" for more details on a

Norwood Woods and Community for Smart Zoning Pr...

proposed alternate plan.

I, and fellow residents of Norwood Wood's community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near

Norwood Rd does not fit these requirements and will strain our available infrastructure. As AKS Engineering and Forestry applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning Division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin.

Sincerely,

Alejandro Cruz

Subject: Partition on Norwood opposition

Alisa Bear
8525 SW Maricopa drive
Tualatin

Hello, I've been a resident in Tualatin for 29 years and thought I'd keep this home for life. Well everything changed in April of 2022. With the deforestation and destruction of the lot on Norwood. Everyday I'm impacted by huge boulders on the road, deep grooves in the road and construction noise and traffic delays. It's only going to get worse with the planned apartment complex which I also oppose. Traffic is backed up to high school on some evenings.

Saying no to high rise apartment complex and new laughable, affordable homes.

Will be moving out of Tualatin since no one has taken into consideration the impact this is having on neighborhood.

Subject: Pending Partition and Annexation Decisions Partition # PAR-(22)-0002 Annexation # ANN 22-0003

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments in against both these land use decisions.

While I have no issue with affordable housing, I do have concerns about traffic and the already overcrowding we have going on. Living off of Boones Ferry, I can tell you it is very hard to get through the area during parts of the day. Part of that is that we have limited roads, with heavy traffic leading to the highway and the bottle neck near McDonalds on Boones and Tualatin-Sherwood. The rest of the traffic being commuters trying to bypass I-5 traffic down through Boones Ferry. The constant noise, speed racing, and traffic on Boones is already unbearable during the day.

Low income housing means many homes/apts within a small area. That may seem harmless, but consider the amount of additional traffic it will create. Our roads just can't handle any more at this time.

Please consider my argument against this project.

Warm Regards,
8678 SW Logan Lane

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Anthony Wedin

PS. Please Do something about 65th Ave and Ellingsen Rd. Put in a turn about or something to ease traffic congestion there.

Subject:	Please hear the voice of your constituents - don't change zoning in our neighborhood
Follow Up Flag:	Follow up
Flag Status:	Flagged

I oppose the request for yet another zoning change request in our neighborhood (Norwood Rd. Partition case ile 22-0002). The continued applications of greedy developers masking their for profit higher end developments as "affordable housing" which they expect the City will grant them requests to change existing zoning laws. Please don't let another mistake be made in our neighborhood! The bordering Plambeck apartment developers request to bypass the city zoning codes for height restrictions should never have been approved and we fear this is leading to a slippery slope which thousands of your constituents are already very upset about. I ask your help to do the right thing and not change our neighborhood into a series of hi-rise structures and further pack already jammed streets (not the "quality of life" we have & continue to pay our property taxes for).

We are already crushed with traffic in our neighborhood, this development is not consistent with mandates to reduce houselessness. If the City is serious about that mandate – then developers should meet the mandate objectives (affordable) and within the many properties already zoned for such developments.

We are not "nimby's", we just expect our neighborhood to be what it is in regard to the zoning which exists and what we bought into. Nor are we against "affordable housing"… The original Plambeck proposal was good, it met broader planning objectives for affordable housing, was within City codes, Aesthetically appealing and not detrimental to neighborhoods property rights. However, Plambeck developers pleaded a case saying "the property was difficult to develop due to challenging topography", therefore requested a "variance" to increase to 4 stories (2 stories above the zoning laws), which was then granted.

Why was that land purchased in the first place if they thought it was too challenging? Is it because they knew the they could change the zoning if they asked? Reality is the original 2 story plan which was within existing code, could have been built. Simply look at the adjacent Lennar development on Norwood - before the clearing & leveling - you could see just how up & down the topography is on this land and within the existing building codes! It cost more to level it out, but they did.

Reflecting also on the Lennar project, frankly, has been a debacle. The lack of oversight of their thinning out the tree preservation zone along Norwood last spring, to the point that the remaining trees were unstable and after just typical late fall winds (they call "storm"), the "preservation area has been deemed to now have to go – Lennar culled roughly 30 large trees that were in that so called "tree preservation area" in the late spring, it's no doubt the reason for this result. Did they get permission to do that? Why is it that the same such buffer to the west has existed for decades, that not even a branch fell from that buffer during what Lennar phrased as "a storm". Resulting in another slap in the face of our community!

In closing, for the projects which are currently in review, please hear the voices of concerned tax payers and consider our quality of life and perspectives. We ask you to please reflect on what is already happening to our community and not grant variances and permit further high rise projects that are not within the codes that existed when developers purchased such property and cause detriment to our neighboring property and community.

Sincerely,

Arthur Taylor

Subject:	No high-rise on Norwood Norwood for Smart Zoning

Dear Planning Department & City Council Members,

Please deny the zoning that would allow a high-rise development of 276 units along SW Norwood Road. As a realtor, you may think that I would gain from more housing, but the community sure would not. Like printing more dollars devalues the dollar, so will adding all these new homes to Tualatin. Not to mention the ridiculous traffic congestion it will obviously create. Adding all these new homes will make areas impacted by traffic congestion less desirable to homeowners and buyers and lower quality of life for Tualatin residents. If you currently own a home anywhere near these projects, you'd be very unhappy with your location, that once was desirable.
I'm a local Realtor with 22 plus years of experience in what affects home values and desirability. Building these projects will absolutely do that.
Again, please deny these projects.
Sincerely and for the sake of Tualatin,
Ben Richardson

Madeleine Nelson
Planning Division
City of Tualatin

CC: Sherilyn Lombos, Tualatin City Councilors, and Mayor Bubenik

I am writing regarding PAR 22-0002. As a 12 resident of Tualatin I have concerns with the application for partition. Specifically, I am concerned about the foundation it sets for the ultimate annexation, rezoning, sale, and development of the proposed "Parcel 1."

On any given day during ahernoon rush hour, SW Boones Ferry Road is considerably congested from the I-5 interchange, through the southern Tualatin city limits at the corner of Norwood Road, and down as far as SW Avery Street. I am aware of plans to introduce a traffic signal at the intersection of SW Norwood Road and SW Boones Ferry Road as well as a widening of roadway and walkways (with no additional lanes) on SW Norwood Road. However, there has not been sufficient evidence provided to support the claim that these changes will appropriately mitigate the current traffic concerns, let alone the natural increase in traffic that will come with the Autumn Sunrise subdivision. The possible addition of even more units, residents, and vehicles for which PAR 22-0002 lays the groundwork, will only **exacerbate the existing traffic problems all of which disrupt schedules, impede first responder access, and increase carbon-emissions.**

It has been suggested that development of the proposed Parcel 1 will provide needed housing opportunities in our community. I understand the need for and strongly support any initiative to provide accessible-priced and low-income housing throughout Tualatin. However, based on the information provided at the neighborhood/developer meeting on October 25, 2022, the proposed housing type and market rate for rent for the units that will be built if PAR 22-0002 is allowed **will not address an affordable housing need in our community.** What's more, the type of development being proposed is better suited to the area near the Westside

transit station on SW Boones Ferry Road, as it is better situated and proximate to support infrastructure such as grocery stores, government facilities, retail, and transit.

As I am sure you are already aware, PAR 22-0002 lays a framework for future development that is strongly opposed by the Norwood Heights and surrounding neighborhood communities in the Byrom CIO. While some growing pains are expected and necessary as we expand our city limits at the edges of the urban growth boundary, I believe that the ultimate development of the proposed Parcel 1 only serves to **put a strain on our available infrastructure but also on our community relations.**

I urge you **not to approve PAR 22-0002 or any related annexation or zoning changes** to the proposed parcels.

With thanks and respect for your service and time,

Beth Dittman

Subject: NORWOOD FOR SMART ZONING

Before I start my "official" email, I'd like to say how terrible sad I am every time I drive on Norwood Road. What a disaster!!!

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Bonnie Ford

Madeline,

Per your mailed notices, as a resident near the partition applications areas "SW Norwood Road Partition" File No. PAR 22-0002 by AKS Engineering and Forestry LLC, I wish to state my objections in writing to both of these proposals.

Given AKS's failure to implement promised forestry buffer zones on their previous development on the Autumn Sunrise Development on Norwood Road between 89th and Vermillion, it is my opinion that we should not grant them any more leeway for any more development. Period. Autumn Sunrise is now a barren moonscape that allows us the privilege of seeing hearing and smelling Interstate 5 and the two unsightly water tanks and unrestricted damaging winds. We miss greatly what we had when there was a beautiful forest, sound and smog barrier and windbreak. We wonder if they ever really meant to preserve ANY trees. AKS appears to be a logging company, first and foremost.

This new area in question is a beautiful wooded oasis that needs to be preserved and enhanced as a park, not as a yet another bulldozed apartment complex and parking lot and mass contributor to more gridlock on Boones's Fwy.

In addition, I object to their plan beyond this annexation and partition to create an apartment complex directly next to and established single-home neighborhood. Doing so will have a negative effect on home values and increase likelihood of crime in what has been a relatively crime-free area. This effect is documented (see attached letter below)

Some in this neighborhood say "No Hi-Rise on Norwood". I will go further to say "No APARTMENTS, PERIOD on NORWOOD". I do not object to apartments, just their placement, especially as when the Basalt Creek development was being drawn up, we were told by the Tualatin City government that any multi-family homes in the residential development areas would be placed far to the south, along the proposed Basalt Creek Parkway extension. Taking the city at its word, many of us quit being concerned and stopped watching. While we "weren't looking" over time, the apartment location has creeped northward on development maps until it is now planned directly next to our neighborhood. The City government should be held to its original plan to restrict the placement of any multi-family developments away from existing single family homes.

If the city will put the Apartments back on the southern edge of the development, I don't care if they are Hi-Rise or not. Build a skyscraper down there if you want.

If stopping the Annexation and Partition will cause the City to return to its original plan, then I am against the annexation and Partition.

As long as AKS is the developer, I am against the plan.

However, if the same property can be made into a Park area within walking distance of our homes, where we are sorely lacking any park facilities, then I would be in favor of both annexation and Partition, (provided that AKS is not the developer.- I do not trust them with the trees). (Note: the planned park along Boone's Fwy is NOT an acceptable substitute, as it is not realistically within walking distance.

Please reject these applications until more suitable plans are made that consider existing homeowners and not just AKS and Lennar Stockholders.

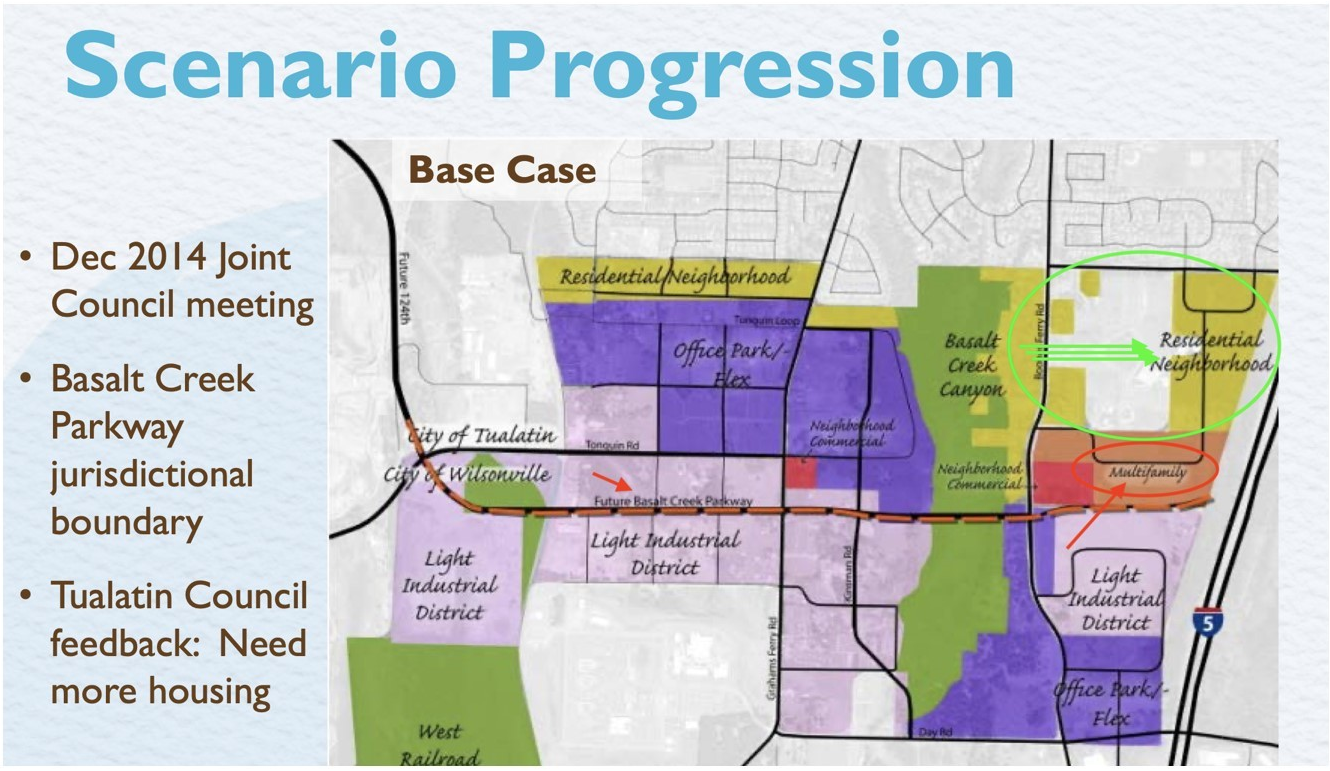
Attachment of email sent to the City Council of Tualatin For consideration at the April 11 City Council Meeting, 7:00 PM

Honorable Mayor and Councillors,

I would like to register my opposition to the zoning change to 10 acres alongside Norwood and Boones Ferry Roads as requested by AKS Engineering and Forestry. (See Figure 3, at bottom).

When Tualatin was working on the Basalt Creek extension of the City limits, we were told, and shown maps that stated that there would be ONLY single family homes next to our neighborhood, and that any apartment complexes would be near the Basalt Creek parkway extension. See Figure 1.

Figure 1. From https://www.tualatinoregon.gov/sites/default/files/fileattachments/planning/meeting/19061/agenda_packet_1-19.17_updated.pdf



I am not generally opposed to apartments (having been an apartment dweller for some time in my earlier years), but it would be better if they were constructed further south below NEW constructed neighborhoods just above the basalt parkway proposed extension to I5 as shown in Figure 1. Building there, the acceptance of the Apartment complex would be baked into the purchase of new nearby homes. New houses built around it would be already valued appropriately, and buyers would go in with eyes open. It might also encourage more lower priced owned homes to be built around it, where there is no opportunity for that now.

It is not apartments themselves I am opposed to, but the intended location next to an established neighborhood of single family owned homes. It has been my experience that apartments have a chilling effect on property values on the adjacent established neighborhood, and will increase crime in the area, where there is almost none now.

There are several websites that contain studies of the effect of apartments next to established neighborhoods. There were two studies that I read in depth. The first one was conducted by Mark Obrinsky and Debra Stein in March 2007 entitled "Overcoming Opposition to Multifamily Rental Housing". As one might expect from the paper title, the aim of the paper was not to enlighten, but to influence using facts that suited the stated goal of overcoming resistance to rental multifamily rental housing.

The second study was "Rental Housing and Crime: The Role of Property Ownership and Management" by Terance J. Rephann Regional Economist at the Center for Economic and Policy Studies Weldon Cooper Center for Public Service, University of Virginia. This second study statistically shows that multifamily rentals actually do correlate to an increase in crime in nearby previously established neighborhoods.

Most of the other studies I found were by contracting interests, with predictable findings.

One pro-apartment argument is that because of the number of families at a single location, of course there would be more crime per-capita. However, one just has to look at the crime map of Tualatin (see Figure 2) supplied by the Tualatin Police department to readily see that the vast majority of crimes, I might venture to speculate 90-95% in Tualatin crime occurs in Multifamily rental locations. As you may also notice on the same map, the area south of Tualatin High school had one dot.

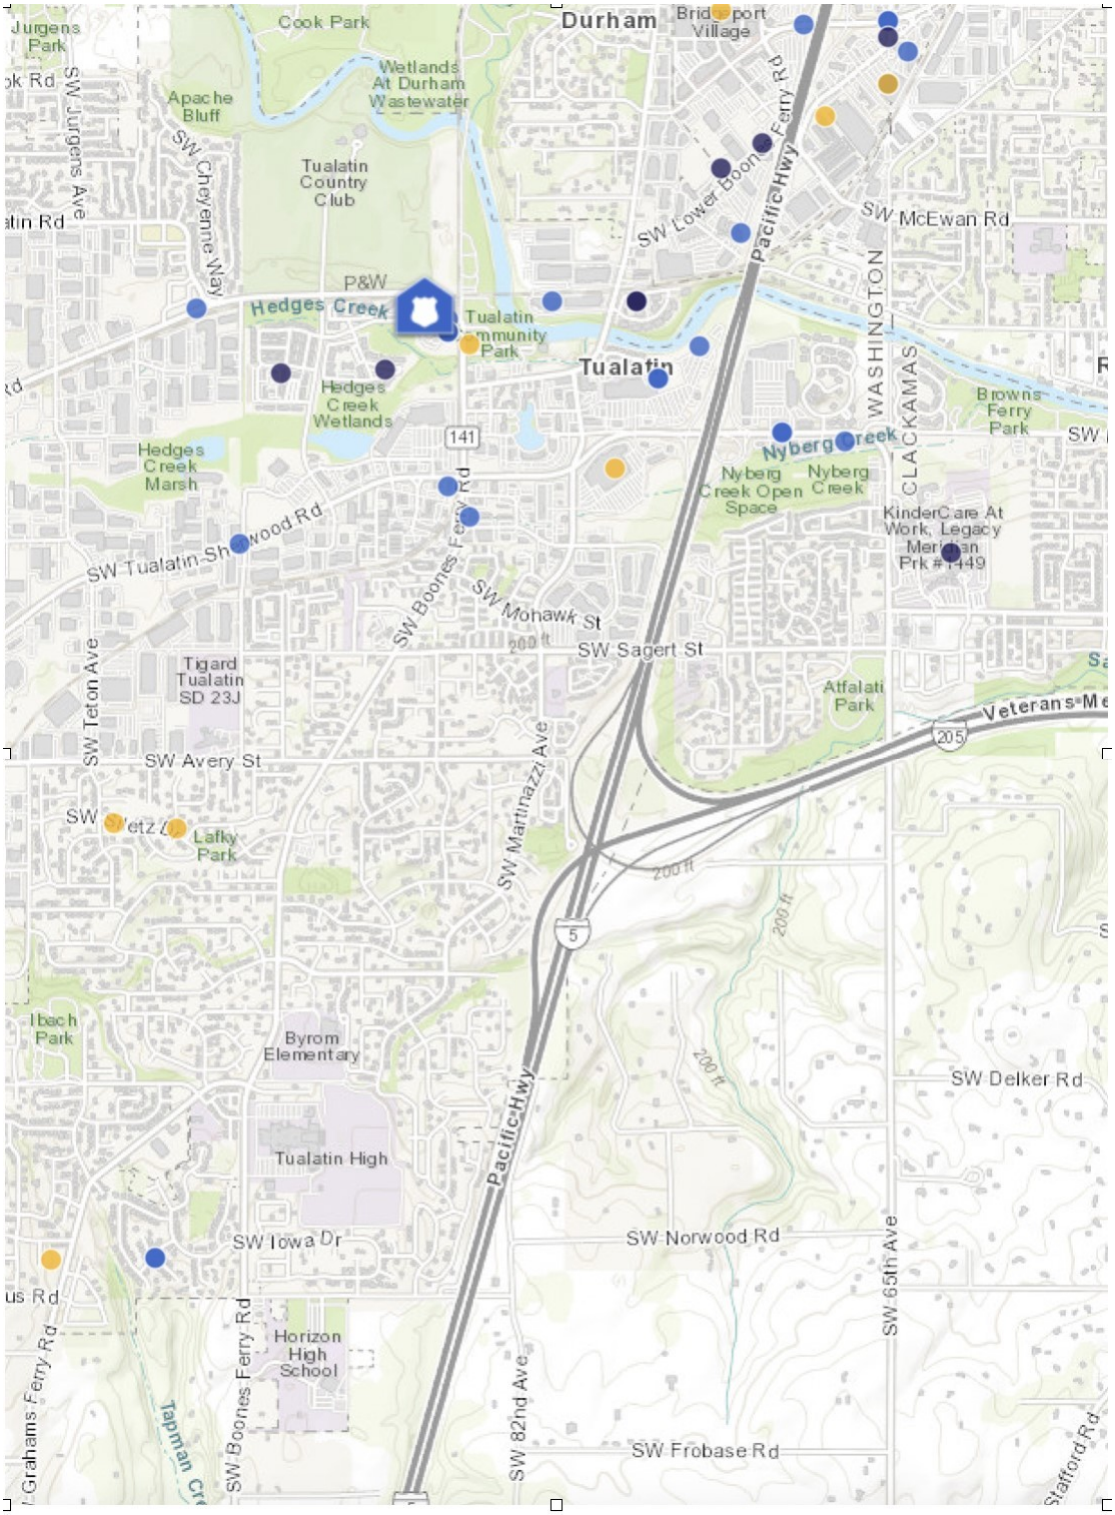


Figure 2 - Crime Map of Tualatin (as of date 4/11/2022).

If increased density is the goal, I would not be opposed to a zoning change for family owned condominiums (but not speculators for rentals), as there is an inverse relationship between home ownership and criminal activity in a neighborhood.

I don't know how far along AKS is with their zoning petition, but would like to stop it if possible, unless a change is made to Condominiums instead of Apartments.

In closing, I would like to reiterate that building multifamily rental units next to an established neighborhood causes property value loss on neighbors in established neighborhoods through no fault or control of their own.

Thank you for your time and best regards.

Re:Letter of Oppostion to rezoning allowing Apartment construction next to an established neighborhoodrr

Honorable Mayor and Councillors,

I would like to register my opposition to the zoning change to 10 acres alongside Norwood and Boones Ferry Roads as requested by AKS Engineering and Forestry that would allow construction of a multi story apartment complex. (See the proposed location in the map in Figure 3, at the end of this message).

When Tualatin was working on the Basalt Creek extension of the City limits, in multiple meetings, we were told, and shown maps that stated that there would be ONLY single family homes next to our neighborhood, and that any apartment complexes would be further south near the Basalt Creek parkway extension. See Figure 1.

Figure 1. From https://www.tualatinoregon.gov/sites/default/files/fileattachments/planning/meeting/19061/agenda_packet_1-19.17_updated.pdf

Scenario

- Dec 2014 Joint Council meeting
- Basalt Creek Parkway jurisdictional boundary
- Tualatin Council

It is not apartments themselves I am opposed to, but the intended location next to an established neighborhood of single family owned homes. It has been my experience that apartments have a chilling effect on property values on the adjacent established neighborhood, and will increase crime in the area, where there is almost none now.

There are several websites that contain studies of the effect of apartments next to established neighborhoods. There were two studies that I read in depth. The first one was conducted by Mark Obrinsky and Debra Stein in March 2007 entitled "Overcoming Opposition to Multifamily Rental Housing". Hello,

I oppose the rezoning of the Norwood area site for high rise apartments

I am not generally opposed to new housing opportunities for people, but this particular site seems inappropriate for such a development, from an infrastructure perspective. It doesn't appear there are plans to scale transport & commercial infrastructure to accommodate this development, and so I would support its development elsewhere closer to the center of Tualatin. Prior to living in Norwood, we lived in an apartment closer to the city center where such housing styles make more sense.

Thanks,
Brian Glass

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also

adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. Subject:	Attn Madeleine Nelson - I Oppose the Partition Application

Dear Ms. Nelson,
I am a long-time resident of Tualatin (bought my house in 2008) and have paid property taxes faithfully every year despite increases, worked in Tualatin, shopped and spent money locally, and am very upset at the idea of rezoning the land behind my house into high-density high-rise and building apartment buildings right behind my neighborhood..

This doesn't belong here in Tualatin. I would not have bought here where I did had I known there would be such a callous disregard for our natural resources.

I heartily oppose the partition application because it opens the door to decision after decision by the City, culminating in the approval of the high-density high-rise literally right behind my fence.

You already have Autumn Sunrise. Can't you stop there?

We're not downtown Portland - this is a semi-rural suburban area that cannot support the traffic from even the influx of homes from Autumn Sunrise - let alone high-density residences on the corner. Traffic studies are out of date. They don't take into account current traffic levels in the surrounding areas, and the lack of entry/exit to this small corner on SW Norwood Dr.

Please do not let this partition go through.

Please retain the little natural forest we have left - which are mature trees, providing necessary noise buffer from I-205 and carbon sequestration, that have been standing for over 30 years.

Shouldn't "Tree City USA" comply with Biden's Executive Order 14072: “Strengthening the Nation’s Forests, Communities and Local Economies” - that cities should consult with state, local, Tribal and territorial governments as well as the private sector, nonprofit organizations, unions, and the scientific community to pursue science-based, sustainable forest and land management?

Can the City prove that this has been done?
What is sustainable about cutting down the entire forest and building high-rise apartments?

Please stand with the residents and stop this partition from happening.

Thank you,
Carly

Subject:	November 2022 = a great month for Blackout Bubenik and the proposed High-Density High Rise Apartments on SW Norwood

Dear Mayor Bubenik,
Four times this morning, between 2:10am and 5am, we experienced power surges from trees falling on the power lines along SW Norwood Rd.
We lost power 3 times throughout ONE day last month at the first big wind storm that came through here, for the same reason. I lost 8 productive hours of work that Friday since I couldn't connect to the internet and I work from home.
This morning I was woken up FOUR times by four separate power surges, where things powered up and then flickered and shut off afterwards, from 2:10 am to just after 5am. Each time, backup battery kicks on for our ADT system and Ziply internet, which causes loud beeps when the power supply is disrupted. Really fun getting up on each occasion to have to reset the whole system due to surges, I love going into a day with less than 4 hours of sleep....

This is intolerable to have Lennar Homes be so cavalier with our last remaining tree border along Norwood Rd. We as residents requested a pittance of a compromise for the horrendous development that is Autumn Sunrise: just a small buffer zone of trees. Lennar took FAR MORE than they agreed to - and you yourself said at the council meeting on 11/28/22 that it was not the council's plan for that many trees to be removed!

We have no recourse now and just have to sit back and have Lennar take the last remaining poor trees down, deal with frequent power outages that literally prevent me earning a living, and put up with this silly plan for a "meandering sidewalk" and "landscaping" in place of a forest that was agreed to as part of the compromise. Where are the forest replanting plans for that area? Why, there are none! We asked for FOREST not a meandering sidewalk. It's insulting and creates more development instead of preserving and replanting ecology critical to the area.

Perhaps you've heard of the 4/22/22 Presidential Executive Order 14072? “Strengthening the Nation’s Forests, Communities and Local Economies.” The order reiterates the Administration’s policy regarding consultation with state, local, Tribal and territorial governments as well as the private sector, nonprofit organizations, unions, and the scientific community to:
pursue science-based, sustainable forest and land management.

This is not science-based, sustainable, or good land management.

And we as residents have to suffer because of poor planning and 0 forest management - and a Mayor going along with all of this.

How do you want to be remembered?

To us here on Stono Drive - you are now "Blackout Bubenik" because it's clear you don't care about what we have to deal with to accommodate these callous, negligent developers and the coming impact of Autumn Sunrise in our backyards.

We're asking for a reasonable compromise.

Leave the last part of the forest on Norwood - just like how Norwoodsaysno.org lays out. We're asking for an even smaller pittance of a pittance - even call it Bubenik Gardens if you want - but leave the forest where it belongs and please STOP re-zoning into high-density living that the area can clearly not support.

They can't even get the power lines to work right for a few weeks.

How many more problems are going to arise because of this - and how will we all see you, Mayor Bubenik because of it?

Sincerely,
Carly J. Cais
SW Stono Drive, Tualatin resident since 2008

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Céline Roy and Patrick Champagne

Subject:	Norwood Partition application

Good morning Madeline,

My name is Chad Fribley and I live at 9005 Sw Stono Dr.. Currently I am the Byrom CIO Land Use Officer.

I am writing to you to get on record and express my voice AGAINST the proposed Norwood Partition Application. I, along with many neighbors, are strongly against this project. The City of Tualatin currently has a big traffic issue throughout town but especially in this area. Current development of Autumn sunrise is only going to make problems worse. The position of the city to sit back and wait for the development to finish before makes any improvements to infrastructure, roads and emergency services is not the least bit appropriate. While I have been told that this is how the city has always worked that does not mean that this is how we need to proceed into the future. It is not hard to see the existing problems and project that another 1200 cars are not going to help the situation get better. So looking to develop at such a. Rapid rate without improving road capacity and services is not wise at all.

The other issue with this proposed Partition and future apartment project is the way the developers are trying to get the language changed as it relates to the entire city and not just this project. This to even a casual observer opens the doors to all kinds of potential problems in the future.

I really feel that the city needs to take a hard pause on development projects right now, fix the existing problems and get a better plan for handling all this expansion before any more projects move forward.

In the end we are just asking that you not approve this application, come up with better plans to fix current problems and give serious thought to what best benefits the quality of life for current and future residents.

Thanks,
Chad Fribley

Dear Tualatin Planning Department Members, Planning Commission, City Council Members, and Mayor Frank Bubenik;

I understand Council is currently receiving training on land use laws and procedures from the planning department. I hope with this training you also understand the significant differences in land use categories allowed in Tualatin. The applicant is first trying to change the Tualatin Development Code to allow the RH-HR zone outside the central urban renewal district making a permanent change to the code (text amendment). In doing so they are also trying to apply the highest density zoning (30 units/acre) in an area surrounded by low and low medium density housing (RL, RML) (plan amendment). The Tualatin zoning map shows, there is no place in Tualatin where a RH-HR zone is adjacent to low and medium low housing. That is why RH-HR was originally designated to the core of Tualatin and called a high-rise. These applications are an obvious play at maximizing profit for both the seller and the buyer at the expense of the community.

I mention these facts because allowing small incremental passes and variances to developers has also created a slippery slope for Tualatin and the Citizens. Developers are starting to see they can get away with whatever they want in Tualatin. The word on the street is that Tualatin approves everything. I want to remind you again, you have almost approved 1000 new housing units in Tualatin and you are in line with the 2019 Housing Need Analysis (HNA). As this developer tries to convince you that Tualatin needs more housing, you have already done your duty. Approving this development will also put the Tualatin's Core Opportunity Initiative in severe jeopardy. A high-rise on Norwood Rd is not in the Public’s or the City’s best interest.

Also, in general HB2001 goal was to provide equitable middle housing with a variety of options. The key word is "equitable" in my statement as individuals in my opinion are seeking something they can own, rather than paying for rent their entire life.

As you ponder your decision today regarding the annexation application, ANN22-0003 (applied by a corporation), please read this article by a local resident. This is how the community perceives your past decisions that has created what we are dealing with today.

Norwood Road Zoning Change

BY BOB TAYLOR

This all started when the City approved the Plambeck apartment project, where developers requested to bypass the city zoning for height restrictions. It's mind-boggling why this request was ever approved and set into motion a precedent that is unfolding recklessly. A money grab from non-local developers guised as building "affordable housing," when in fact, they are salivating at the opportunity to build high-end apartments and townhomes in the suburbs (openly advertising as such), which were never designated for such developments. They are asking the City to change zoning to expand the area for such developments, when the designated area already has plenty of lands available for these developments. These developers can't command high-end prices in these designated areas – this is a money grab – not "affordable housing."

They are requesting a change in the language of current zoning – specifically "CHAPTER 44 HIGH-DENSITY HIGH RISE ZONE (RH-HR) TDC 44.100" as follows:

The purpose of the High-Density High Rise (RH-HR) zone is to provide areas of the City that are suitable for high-density apartments or condominiums.

The original proposal the City approved on the Plambeck apartments on Norwood was good. It met the City's broader planning objectives for affordable housing, was within City codes, aesthetically appealing, and not detrimental to neighborhoods' property rights. But later, the developers said, "the property was difficult to develop due to challenging topography," and requested a "variance" to increase to 4 stories (2 stories about the zoning laws). That "argument" has been proven false. All anyone has to do is look at the Lennar new home development on Norwood (adjacent to this project) – I walked the cleared land before improvements – the topography revealed tremendous up & down elevation changes no different than what the adjacent Plambeck original development plan faced. While I'm no fan of Lennar and how they removed their promised "tree preservation zone" (a whole other issue that should never have occurred), Lennar validated the ability to work within those parameters and the existing building codes. The Plambeck developers who purchased the property knew the topography before they bought it, they just wanted to change the rules & the City obliged.

It's simply wrong that this project was approved and what appears to be leading to similar projects being approved. These developments are not benefitting those in need of affordable housing. They only add to an already extremely congested traffic area (trying to bypass I-5 rush hours) while benefitting developer's bottom line at the expense of neighbors of Norwood. We can hire lawyers, but it's time to ask our elected officials to represent the residents of Tualatin – not the non-local, money-grabbing developers!

Bob Taylor has lived in the Tualatin area since 1978.

Article is also attached.

Thanks,

-Chris McReynolds

Dear Tualatin Planning Department Members, Planning Commission, City Council Members, and Mayor Frank Bubenik;

I hope the city is parsing out testimony for the partition and annexation applications as residents that do not even live in Tualatin are commenting. I also wanted to fill in the blanks regarding this generic letter from Horizon Community Church that you may be receiving.

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments in support of both these land use decisions.

As a resident of Tualatin and a member of Horizon Community Church, these two decisions are very important to the future plans for our church and the greater community within the City of Tualatin too.

While these decisions do not approve of any specific future projects for these properties,

The application sent on 1/9/2023 by AKS Engineering and Forestry LLC on behalf of Horizon Community Church, Norwood Horizon Holdings LLC and Vista Residential Partners LLC is to apply a RH-HR (high-rise) zone. This changes the land use zoning on Norwood from Institutional and RL (lowest residential density per TDC) to the highest land use zone category in Tualatin (RH-HR). That is a 500% increase in density.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents.

Tualatin has already approved 891 housing units that have not even been completed yet.

1. 407 single family and multifamily homes (Autumn Sunrise)
2. 114 affordable apartments (Plambeck Apartments)
3. 256 apartments (Commons on the River)
4. 114 apartments (Tualatin Heights, RMH zone change)

5. 45 townhomes (Alden apartments, under review. Not included in the total)

Many in our family and friends in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

With the variety of housing units already approved, I would think individuals would be able to find something affordable. 54% of the projects the City has already approved are multifamily units.

Please approve these two land use applications.

If you approve these applications, this will indicate that tax revenue is more important to the City than the residents and community…the City has no plan for infrastructure upgrades...and you are also ok with clear cutting another three acres of trees…Say no to a high-rise on Norwood Rd.

ADD NAME, ADDRESS AND PHONE NUMBER

RH-HR application is attached.

Sincerely,

Chris McReynolds

Dear Tualatin Planning Department Members, Planning Commission, City Council Members, and Mayor Frank Bubenik;

We are trying to respectfully follow the city's process with land use changes, but there seems to be little oversight or defined process. There is a new neighborhood developers sign on Norwood Rd with no information associated. We hope the city is being transparent with the public regarding this project.

Consider this a public records request. I will also fill out a formal request:

1. The deadline to provide written comments for the annexation application since there is none listed on the notice the public received.
2. The decision on the partition application
3. The plan/text application documents
4. The documents and agenda associated with this new neighborhood development meeting on 2/21/2023

Subject:	Re: No High Rise Zone on Norwood

Dear Tualatin Planning Department Members, Planning Commission, City Council Members, and Mayor Frank Bubenik;

I will let this proposed text amendment speak for itself submitted by AKS Engineering and Forestry LLC, on the behalf of Horizon Community Church, Norwood Horizon Holdings LLC, and Vista Residential Partners LLC. Again, a developer is trying to remove restrictions in Tualatin Development Code to build what they want with little regard to the residents…

CHAPTER 44 HIGH DENSITY HIGH RISE ZONE (RH-HR)

TDC 44.100. Purpose.

The purpose of the High Density High Rise (RH-HR) zone is to provide areas of the City ~~within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club~~ that are suitable for high density apartment or condominium~~s towers~~.

application_form_narrative.pdf (tualatinoregon.gov)

As I have said in the past, codes have a purpose to protect the residents, the environment and the city. It is ok to say no... Do not let developers run our city. Say no to a high-rise on Norwood Rd. We are more than tax revenue…

Subject:	Norwood for Smart Zoning Practices
Attachments:	1875_001 (1).pdf

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a homeowner in Tualatin Woods of ten years, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new Autumn Sunrise development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall these properties are better suited for this type of zoning with local transit, child care, retail and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though the Autumn Sunrise development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5. See Exhibit A.

Issue two regarding institutional infrastructure;

The Tualatin public school system is already dealing with classrooms at capacity, especially the local Edward Byrom Elementary school, where my children and many other families' children I know attend. With the addition of the Autumn Sunrise development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area

once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone. Seen Exhibit B for more detail.

Issue three regarding existing RH-HR zones;

As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, child care and easily accessible public transportation. Seeing how fast Autumn Sunrise is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies;

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

See Exhibit C for more details on a proposed alternate plan.

I, and fellow residents of Tualatin Wood's community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As AKS Engineering and Forestry applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

Link below provides the exhibits for reference regarding our concerns.

Norwood Woods and Community for Smart Zoning Pr...

Sincerely,

Chris McReynolds

Subject:	No High Rise Zone on Norwood

Dear Tualatin Planning Department Members, Planning Commission, City Council Members, and Mayor Frank Bubenik;

It is extremely poor planning to perform a traffic study on Boones Ferry after the Basalt creek residential zones are built out. This is proof that the city has no plan to provide proper infrastructure, especially when the current Autumn Sunrise and Plambeck traffic studies indicate a failed study. It is also a waste of taxpayers dollars as we already know our road infrastructure is lacking with the current residential load, through 2026. Even more reasons to say no to the text amendment change to RH-HR for tax lot 106, 108 and annexation of Washington county. This is also proof that the city is failing to uphold the requirements of housing choices bill 2001.

“They (Cities) are also able to make sure that new housing is built with adequate infrastructure such as water, sewer, and roads. Cities are required to provide supporting infrastructure and the law directs DLCD to help cities figure out how to address their infrastructure gaps.”

Sincerely,

Chris McReynolds

Traffic_Fail.jpg

SUMMARY **AND RECOMMENDATIONS**

The traffic study tor the Plainbeck Gardens development containing 11G aftordable housing apartment units has been prepared to determine the potential impacts at several study intersections along SW Boones Ferry Road. Development of the site is expected to generate a net of 612 daily trips, 4 I AM peak hour trips, and 49 PM peak hour trips.

The tratfic analysis has determined the following results.

- The intersection sight distance standard (450 feet) on SW Boones Ferry Road at the proposed Street H' approach is met in both directions.
- The capacity analysis determined that the Iowa Drive intersection on SW Boones Ferry Road is failing. The stop controlled intersection currently operates LOS 'F in the peak hours and will continue to fail though the year 2026 total traffic scenario. The condition can be mitigated it a traffic signal is insta Illed. As the signal warrant is not met, the crash history is very low (crash rate = 0.22 MEV/year), and tra ffic associated Plambeck Gardens will not be distributed on the Iowa Drive approaches installing a traffic signa1 is not recommend in conjunction with the proposed development.
- The Norwood Road stop controlled intersection will experience failing conditions (LOS 'F) in the year 2026 background and total traffic scenarios. To mitigate the situation will require the installation of a traffic signal. The peak hour signal warrant is met in the year 2026 background and total traffic scenarios. The crash rate of 0.19 crashes/MEV is well below the threshold rate of 1.0 MEV/year. Installation of a signal is not recommended in conjunction with the proposed development as the signal warrant is met due to the background traffic conditions and Plambeck Gardens will distribute only two trips in the worst case AM peak hour on the westbound approach.
- According to the analysis it will be necessary to provide a right turn lane and curb return radius for northbound traffic making a right turn trom SW Boones Ferry Road onto Street 'H'. The safety considerations include the roadway approach volume, number of right turns, and vehicular travel speeds along SW Boones Ferry Road. The turn lane will be built as part of the Autumn Sunrise Subdivision development.
- Review of the intersection crash data furnished by ODOT documented that none of the study intersections experienced a rate greater 0.22 MEV/year and therefore no safety improvements are recommended at the existing locations.
- The Street 'H' approach at SW Boone s Ferry Road will need to be controlled with a stop sign and stop bar pavement marking as part of the Autumn Sunrise Development.

- The site's access occurring at Street H' on SW Boones Ferry Road will be built in conjunction with the Autumn Sunrise Subdivision development project.
- No other intersection improvements are recommended on SW Boones Ferry Road in conjunction with the Plambeck Gardens development at the study intersections including Dav Road, Norwood Road, and Iowa Drive.

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments in support of both these land use decisions.

Please consider the heavy traffic around the Norwood and Grahams Ferry. I am a member of Horizon but I do not want to have the apartment complex to be built. I would consider leaving my neighborhood and out of Tualatin if this plan is approved.

My family and I moved Tualatin and specifically to this area for having less congestion.
Now with the new housing development and pending apartment the congestion and quietness of our neighborhood will be ruined.

Please don't approve these two land use applications.

Thank you for your time .

Respectfully,

Cliff Ingram

Subject:	Objections to SW Norwood Road Partition" File No. PAR 22-000

Attn: Madeleine Nelson

As another concerned Tualatin resident residing near the partition applications areas for "SW Norwood Road Partition" File No. PAR 22-0002, I wish to state my strong objections for the record regarding both proposals for the following reasons:

1. As previously mentioned many, many times, the traffic on Boones Ferry is already very heavy, ridiculously so. There are times of the day the back up heading south starts from north of the high school all the way to the I-5 south bound onramp. On days like this you can not get onto Boones Ferry. If there are cars ahead of you waiting to try to get onto Boones Ferry to go south, it doesn't matter if you want to head north into Tualatin, you will be waiting until the south bound cars can squeeze onto Boones Ferry to get to the front of the line to turn and go into Tualatin. Sadly, this is before adding the hundreds and hundreds of additional cars from the Autumn tract house development currently being worked on off Norwood, nor does it include the other massive tract house development they are also putting in just south on Boones Ferry. That will also add hundreds and hundreds more cars. And then there is the traffic soon to be dumped onto Boones Ferry Road from the Balsat Parkway that will dead-end onto Boones Ferry Road leaving those cars to travel Boones Ferry to continue on to their final destination. There is also mention with the proposed 205 tolls, that people will be going through Tualatin in the attempt to dodge the tolls. The LAST thing we need is zoning changes allowing massive high density high rise building in residential Tualatin areas, as proposed for Norwood adding more traffic to our overloaded neighborhood streets.

As previosly conveyed to you by other concerned citizens, There are many beautiful amenities and parks in our lovely downtown Tualatin as well as services and available land. This is exactly why builders of high-density housing build in urban areas. This planned development will not only make everyone in the surrounding neighborhoods unhappy, it will also not make the tenants happy. As also previously stated, this is a poor "plan" that has not been thought through and literally makes no sense.

Thank you,

Cynthia Ray

Subject: Norwood for Smart Zoning

Attention Madeleine Nelson

Dear Tualatin Planning Department Members, City Council Members, Madeleine Nelson and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoningwith local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;

The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any

additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;

As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and

RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Cynthia Ray

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Subject: Please don't break the promise.

Dear Ms. Lombos:

My wife and I built our "forever home" on 89th Place for a reason. The community was beautiful and livable. We planted our lives in this community, raised our family here, planted three cherry trees in the backyard, one for each of our sons. Our holiday get togethers are often here. Our sons and their families visit our home for big events. Grandkids swing on the swings we hung from those now-mature cherry trees. Our heritage is here, our lives and our memories, and we hope, our future.

Re-zoning the area south of Norwood to RH-HR will fully destroy the livability of our community. We didn't build our forever home next to high-rise apartments, because no one would ever choose to do that. With a massive increase in residents living along Norwood Rd, all roads in the area will become impassable most of the day. Our ability to get to downtown Tualatin will become severely constrained, and we already know how bad traffic can get on Boonesferry Rd, today. There will be a jump in crime in our community.

The council may have the legal right to re-zone the area, but it surely does not have the moral right.

We live in a democracy, and We, the Citizens of Tualatin who have built our homes and our lives in Tualatin don't want to see such large developments wreck the livability of our community. If we had known that the City of Tualatin would adopt an "anything goes" development policy, many of us would never have moved here. But we did move here. We invested here. We paid our taxes and built our fine schools, parks, and roads. We honored each other and our community with continuous improvement bonds. With our dollars we paid for a very fine community, supported Tualatin in every way imaginable, but the city seems intent on dishonoring our citizenship and investments by allowing the construction of high-rise, high-density housing nearly in middle of single-family neighborhoods.

Zoning rules are truly a pact, a promise, defining for investors (in the case, Tualatin homeowners) what they can build in an area. By re-zoning land to allow high-rise apartment construction immediately next door to existing neighborhoods that were built under current zoning laws, the city will be tearing up that pact in favor of corporations and their tax revenues, rather than the people who already invested their lives here. A decision to re-zone would be profoundly immoral and incredibly unfair to the families who have made Tualatin their home. Please, don't break our pact.

Sincerely,
Dan Cobb

Subject:	Comment regarding PAR 22-0002.

Dear Ms. Nelson:

Per the TDC rules to approve a partition, the proposed application does not meet criteria and cannot be approved:

Per TDC 36.115 (1), the proposed use must be consistent with the land use zone. - The applicant identifies intention to build high rise high density multifamily apartment homes, not consistent with the present land use zone: RML. The city would first need to approve different zoning before the partition application is approved.

The application does not meet criteria TDC 36.115(2)b: the plan is not consistent with residential design standards, which are defined as those for single family homes, townhomes, duplex, triplex and quadplexes. (TDC 73A.100).

Most significantly, the proposal in the application is in violation of TDC36.010, in that the proposal is not consistent with the provisions of the Tualatin Comprehensive Plan, Tualatin Community Map, and capital improvement plans. These plans make no reference of permitting high density high rise outside of the downtown development zone. Furthermore, the proposal identified in the partition plan violate the following Tualatin Comprehensive Plan Policies and Goals: POLICY 2.1.1 Encourage structures be planned in ways that relate to the site and surrounding context. A high rise high density apartment is not 'in context' with institutional use zoning and RML zoning.

The proposed development involves removal of a forest, in violation of the following elements of the Tualatin Comprehensive Plan: GOAL 2.2 Promote the preservation and establishment of trees throughout the city, in order to protect and enhance the aesthetic character of Tualatin, protect and improve air and water quality, provide noise and visual screening, and protect habitat for wildlife. Even if a tree barrier is left, the destruction of a few acres of forest destroys significant wildlife habitat that would not be adequately replaced by a tree barrier strip. POLICY 2.2.1 Require the establishment and protection of street trees. POLICY 2.2.2 Promote the protection and establishment of trees during the development process. As this proposal involves AKS engineering, which has demonstrated disregard for these provisions in the Tualatin Comprehensive Plan through their work on the Autumn Sunrise subdivision, AKS cannot be trusted to adhere to these policies.

The proposed development described in the application is for multifamily housing on Norwood road, which is not serviced by public transportation. This is in violation of the Tualatin Comprehensive Plan: POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

Please respect the people who have made Tualatin their home, based on the promises codified by the documents referenced above.

Sincerely
Dan Cobb – Tualatin resident for 28 years.

Subject:	Opposed to multifamily, high rise complex off Norwood

My name is Danny , Burns, I've lived in Tualatin for over 10 years. I'm a born and raised Oregonian.
I live on Quinault Lane, which is one block north of the proposed multi family, high-rise complex in discussion here

Not only with this complex exponentially increase the traffic on Norwood, which is a two-lane road. It will also increase the traffic throughout the neighborhood.
This neighborhood so close to Tualatin high school in the elementary school is loaded with children. Ranging from elementary age to high school age.
There is no doubt cars will be taking shortcuts through the neighborhood to get into that climb Plex, increasing the probability of a traject accident taking place.
Also, there are no doubt, will be a rise in crime, car theft in vandalism I hate to be "that guy", We must also consider the wildlife that will be forced out of its current habitat

Oh, there's a small pack of coyotes that live there not to mention other smaller creatures.
The construction will also push rats and mice out of that area and into the neighborhood.
Feel free to check with a pet inspector, Tualatin is one of the most densely populated rat habitats in the Portland metro area.
Trust me, I know I've dealt with the issue

Please please please do everything you can to convey this message and concern I have as well as everyone in our neighborhood has

Sincerely, Danny Burns

Subject:	No high-rise on Norwood! We agree with Norwood for Smart Zoning

We agree with Norwood for Smart Zoning. A high-rise on SW Norwood Rd. is not in the public's best interest. We live next door to Councilor Sacco on Martinazzi Avenue and are very concerned about the increased traffic and drivers "cutting through" via Vermillion and Martinazzi while trying to avoid traffic congestion on Boones Ferry Rd.
David and Judi Wick
—-
Dear Assistant Community Development Director, Steve Koper;

We hope that you had an enjoyable, restful vacation, and you are refreshed with a clear mind.

We also understand that the planning department may be understaffed as there are many land use projects in the works.

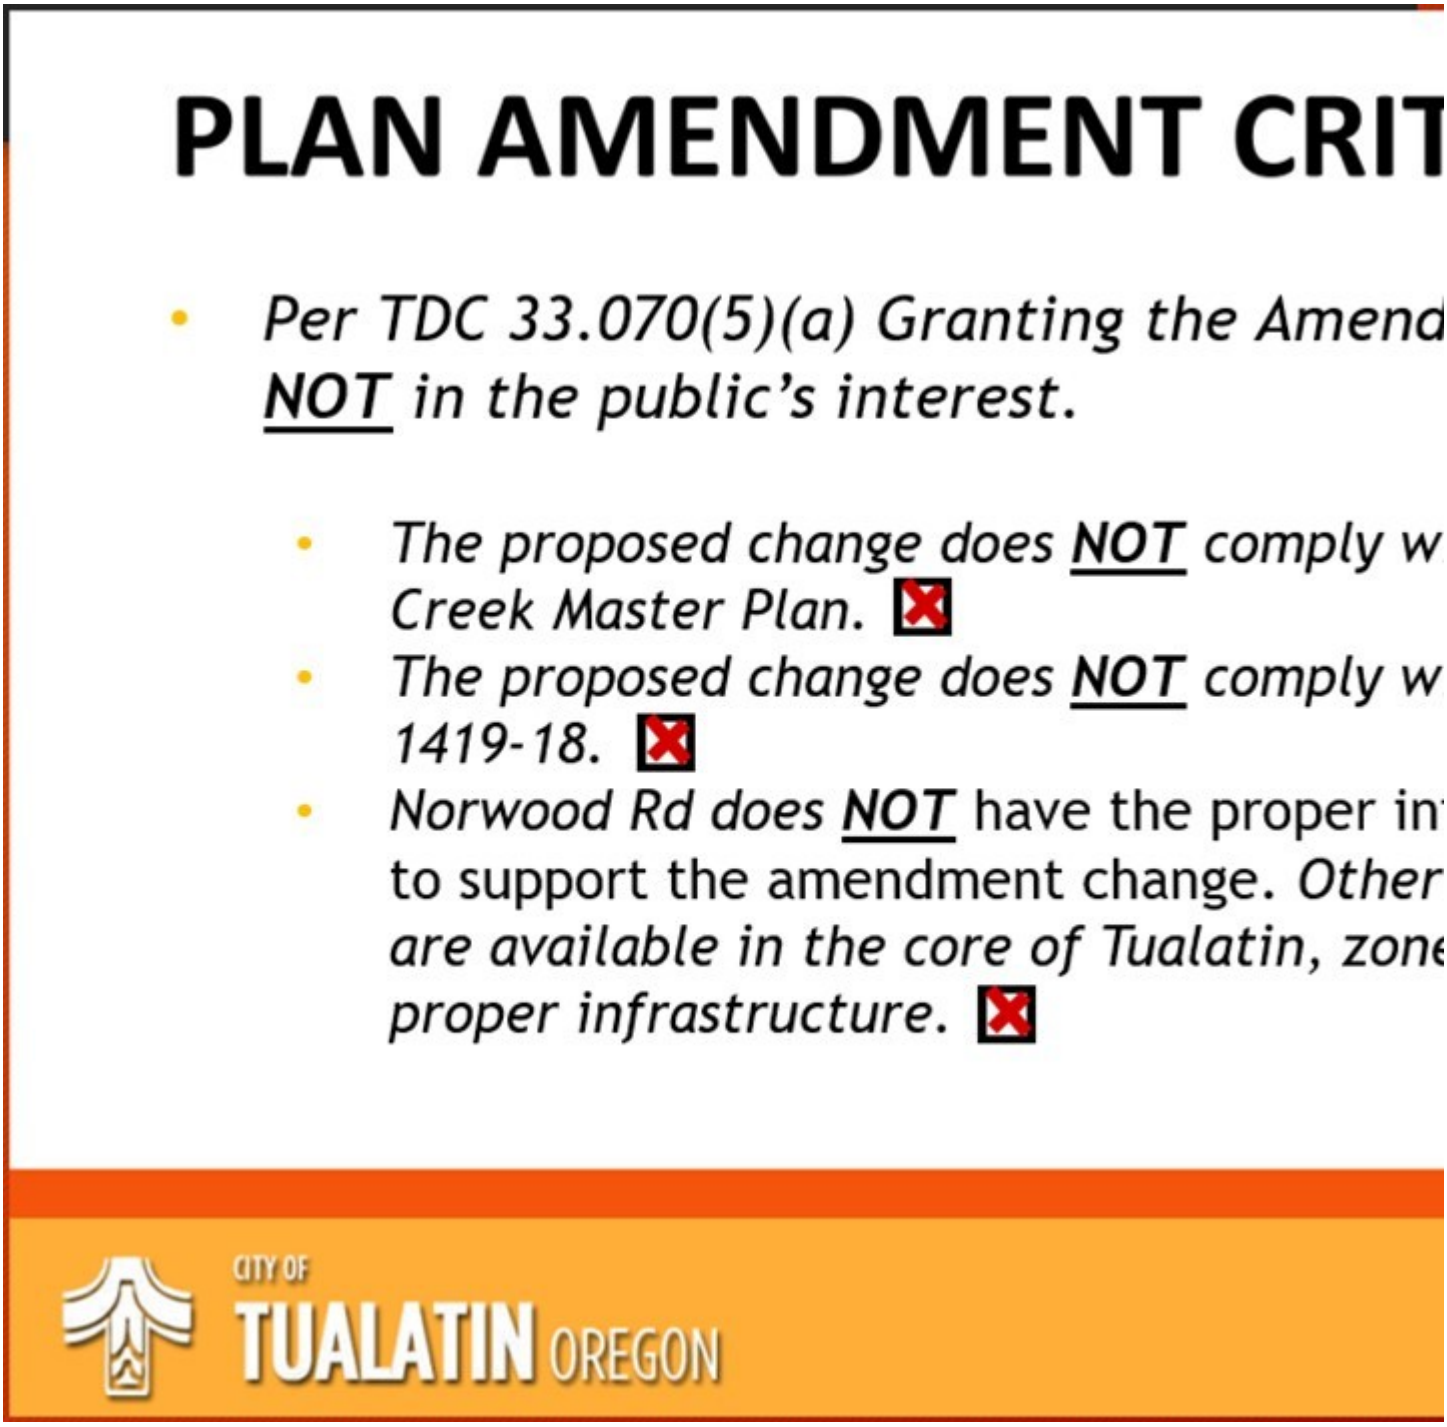
In the meantime, the residents of Tualatin thought it would be helpful to assist you in preparing your presentation to council, regarding the proposed RH-HR plan amendment change on SW Norwood Rd.

If it is not already clear, this proposed change is not in the best interests of the public. Feel free to copy this image below and insert it in your presentation when it's ready.

We have at least 20 more reasons why this plan amendment change is a bad idea, but it was hard for us to summarize in a single slide as done for the Tualatin Heights apartment's plan amendment change.

For that specific project, as a reminder, it was recommended that the housing density increase 35% within the same area.

It is not in the public's interest to approve an RH-HR zone off of Norwood Rd.



We also wanted to remind you about all those residents that were extremely concerned about parking and traffic who currently live around Tualatin Heights. We also want to refresh your memory regarding the statements you made discussing traffic problems in Tualatin.

From the Tualatin's Transportation System Plan Update:

"Director Koper stated there is a lot of employment in our city that passes through traffic in relationship to I-5, which gives us a unique position relative to other cities. He stated it will be best for the City to work with DLCD and partners to find a solution to our traffic issues."

We also hope you work together with the DLCD and the public works department to develop a comprehensive traffic plan that provides new road construction instead of just "meandering sidewalks" and bike lanes on Boones Ferry. We also hope

the city would spend our bond tax dollars more wisely when looking at new land use projects, especially with the drastic escalation of housing projects in Tualatin.

If the city's plan is to put infrastructure upgrades onto the private sector (developer), to save money, the result usually ends up hurting the city and the residents for decades to come. Developers usually find the lowest cost solution to appease local jurisdictions within their project boundary. Their focus is to develop the land they purchased at minimal costs and turn a profit. This also causes a lack of uniformity within each development, with very little possibility of a course correction for the city in the future.

We also do not think it is a coincidence that AKS Engineering and Forestry's office is located near Tualatin's planning department.

When you review the partition, annexation, and plan amendment application with AKS, please also indicate to them, there is other buildable land within Tualatin if they just took the time to look. A simple five-minute search on Zillow found three plots currently for sale. We would also suggest that AKS inform their client of these properties that are very suitable for a high-rise development within the core. Overall, it seems like their client is more interested in profit than really helping our community…

Again, Mr. Koper and Council, say no to a high-rise on SW Norwood Rd.

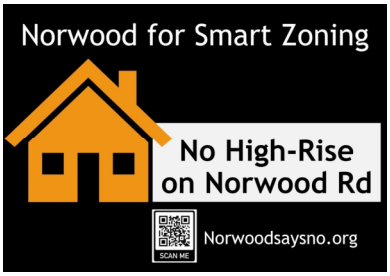
Commit to building a central Norwood Park like we explain on our website and try to rectify the Autumn Sunrise debacle.

If housing is truly needed, keep the current zoning as RL or RML.

Have a Happy New Year,

Norwood for Smart Zoning

--



Together Let's Make Tualatin a Great City!

Subject: SW Norwood Rd Partition Application

Dear Ms. Nelson,

As residents of Tualatin since 2016 we are opposed to the proposed partition application and request that you deny the request by AKS Engineering and Forestry, LLC. From our home at 22390 SW Martinazzi Ave we access Norwood Rd daily and have been very disappointed in how AKS Engineering is handling the Autumn Sunrise development. The proposed addition of high rise high density multifamily apartment homes would add to the already overwhelming amount of traffic onto Norwood Rd and Boones Ferry Rd. This congestion will bring many more drivers through our neighborhood adversely affecting the safety of pedestrians and homeowners.

Thank you in advance for reviewing and taking into consideration the information below, and denying the application by AKS Engineering and Forestry, LLC.

Sincerely,
David and Judi Wick

Per the TDC rules to approve a partition, the proposed application does not meet criteria and cannot be approved:

Per TDC 36.115 (1), THE PROPOSED USE MUST BE CONSISTENT WITH LAND USE ZONE. - The applicant identifies intention to build high rise high density multifamily apartment homes, NOT CONSISTENT with the present land use zone: RML. The city would first need to approve different zoning before the partition application is approved.

The application does not meet criteria TDC 36.115(2)b: the plan is not consistent with residential design standards, which are defined as those for SINGLE FAMILY HOMES, TOWNHOMES, DUPLEXES, TRIPLEXES, AND QUADPLEXES. (TDC 73A.100).

Most significantly, the proposal in the application IN VIOLATION OF of TDC36.010, in that the proposal is not consistent with the provisions of the Tualatin Comprehensive Plan, Tualatin Community Map, and capital improvement plans. These plans make no reference of permitting high density high rise outside of the downtown development zone. Furthermore, the proposal identified in the partition plan violate the following Tualatin Comprehensive Plan Policies and Goals: POLICY 2.1.1 Encourage structures be planned in ways that relate to the site AND SURROUNDING CONTEXT. A high rise high density apartment is NOT 'in context' with institutional use zoning and RML zoning.

The proposed development involves removal of a forest, in violation of the following elements of the Tualatin Comprehensive Plan: GOAL 2.2 Promote the preservation and establishment of trees throughout the city, in order to protect and enhance the aesthetic character of Tualatin, protect and improve air and water quality, provide noise and visual screening, and protect habitat for wildlife. Even if a tree barrier is left, the destruction of a few acres of forest destroys significant wildlife habitat that would not be adequately replaced by a tree barrier

strip. POLICY 2.2.1 Require the establishment and protection of street trees. POLICY 2.2.2 Promote the protection and establishment of trees during the development process. As this proposal involves AKS engineering, which has demonstrated disregard for these provisions in the Tualatin Comprehensive Plan through their work on the Autumn Sunrise subdivision, AKS cannot be trusted to adhere to these policies.

Subject: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on

current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning

alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

David Tully

Subject:	Attn Madeleine Nelson - I Oppose the Partition Application

Ms Nelson and Mr Bubenik,

In response to the proposed Partition 22-0002 (which I strongly oppose and hope officials will), I am sharing an email exchange between me, TVFR staff and your Ken Froescher and Bryan Lavigne after a treacherous event on Nov 30, 2022. I share it because I believe the project happening on Norwood (directly behind me) has been poorly overseen by the City of Tualatin and that the builder Lennart is grossly irresponsible (specifically in forest removal). It details a second round of wind and fiery power outage due to the removal of the trees that once protected my neighborhood from weather. The remaining trees were cut since then AND we've sustained yet another wind storm in January that damaged many fences and took down trees on the North side of Norwood.

The project has drastically changed our environment. As a newer resident of Tualatin (Dec/2017) I am greatly saddened about my decision to purchase property here - because of the project and because Tualatin seems to welcome extreme growth. We bought this house for the privacy and forest buffer, the view and the quiet neighborhood. The past year, while working from a home office, was filled with stress, grief and anxiety due to heavy equipment noise, chainsaw activity. My backyard, garden is no longer quiet. I actually see car lights on I-5 now, 2 water towers, a cell phone tower, the lights of Horizon Christian's stadium and the entire school. I also hear the noise of I-5 like never before, and no longer enjoy the peace of my back yard. We had grime on our furniture, our plants, cars and well, everything all year long from the disruption. Our roofing project (Mar/April) resulted in some wood repair. We did have new siding painted, but were advised to put off painting the entire house until the project is complete.

I know our future holds more cars, noise and disruption. I know new housing is extreme in terms of density. And I know we need more housing. I am asking the City, it's officials and staff to slow down your approvals, vet sensible projects and think/work outside the box instead of saying 'yes' to everything. In the 5 years I've lived here I've seen thousands upon thousands of square' of commercial property built along Tualatin Sherwood Hwy, but near our downtown, no changes to vacant land and properties. Why not build housing near the transit! Cut down on cars! Use existing resources, rather than leveling swaths of green space. Empty grocery store, empty lots - better place for high density housing.

Please do not approve Par 22-0002. Make the builder improve the neighorhood and keep a balance. Use the space for a park for the thousands of new residents. Keep Tualatin attractive. Allow some garden space. Keep the spirit of community and good health. Pay attention to your existing community members.

This is the email sent to your compliance people. i share it so you are aware of the effects of a poorly managed project:

All,

I was given your contact information by TVFR after calling them about an incident during the November 29-30 storm. Power in my neighborhood was knocked out at about 2:20am on

November 30th during the sustained high winds. Our house was lit up with bright light and what sounded like an explosion directly behind us. A tree, blown by the wind that is no longer buffered by the forest that was formerly there, fell onto power lines and caught fire. Fiery debris from the tree blew into our yard and against our house, and we continued to hear explosive electrical sounds and see flashes from the accident and smell the smoke in our home. My next door neighbor called 911 about fiery debris blowing into their yard as well. I wonder what might have happened if rain hadn't been dampening our area all day.

This was a repeat of the November 4th afternoon outage resulting from high winds, when a tree from the same area fell on the same lines resulting in power losses on and off during the day, and for 4-5 hours that evening. Members of our HOA were in communication with the city about this risk on November 4th, and the HOA members were informed that those matchstick-like trees near the power line were going to be cut down. As neighbors and witnesses to this project, we have wondered since the removal of the majority of trees, why those were ever left standing. The weather comes from the direction that would blow them right onto the power lines.

As I left our neighborhood this morning, several of these trees which are remnants of the logging project (at the new Autumn Sunrise subdivision) are still leaning toward the power lines.

When will they be removed and why weren't they removed before storm season arrived?

Can the City of Tualatin better monitor this large project? We want to feel safe in our homes and the outages seem totally preventable. Any information would be appreciated.

I did hear back from both Bryan and Ken. I am hopeful you are listening to the many objections to the ongoing negative changes in Tualatin. We already have much to figure out about how to live comfortably with our new surroundings, the high wind effects, noise and traffic that we did not ask for.

Respectfully,
Debbie Burchfiel

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. Subject:	No high rise in Autumn Sunrise area Until traffic studies prove Boones Ferry Rd. Upgraded to high traffic capabilities.

Sent from Samsung Galaxy smartphone.

There should be no high density residential development in all of Tualatin until the roads are capable of handling the expected traffic flow!

Specifically to that, the proposed zoning change to Multi-Family High Rise off Norwood Rd. should be denied!

Boones Ferry Road is presently in gridlock between N. Wilsonville and Grahams Ferry Rd WITHOUT any homes being built in Autumn Sunrise subdivision. A high density development in that gridlocked area would be catastrophic to traffic flow!

Residents are currently unable to exit SW Iowa St. during the heavy traffic flow both North and Southbound in the afternoons.

With the expected additional traffic on Boones Ferry Road from Autumn Sunrise and other future nearby developments, and the lack of any reliable mass transit on BFR, it will cause massive gridlock in South Tualatin.

I am the Land use Officer for nearby Ibach CIO, and our residents feel their #1 concern is poor traffic flow in Tualatin.

The proposed land use changes to property on Norwood Road will guarantee certain gridlock, decrease of property values and residents leaving our community.

There are much better areas in Tualatin that will fit higher density zoning.

Please vote NO to this zoning change request.

Sincerely,
Ed Casey

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik,

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone.

I'm concerned about this impact on the natural areas surrounding us, environmental impact for my 3 daughters, as well as the traffic and issues this will cause getting my girls to and from school. My hope is that another solution can be found that protects our forests and reduces the need for significant additional infrastructure, such as allowing for zoning in spaces that already have the infrastructure available.

As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

Subject:	Additional Apartments in new development south of Norwood Rd.

Good Afternoon,

I'm reaching out to voice my concern along with those in my community about the proposal to build additional apartments to the south of Norwood between I-5 and SW Boones Ferry.

I understood and supported the need for additional housing in Tualatin with the Autumn Sunrise development but am incredibly concerned about these new additional apartments for many reasons.

Concern #1: Traffic. It is evident that the Autumn Sunrise traffic study did not consider additional high density apartments. At minimum, another study needs to be done, though it makes me wonder how aware you are of the massive traffic issues that occur most days around school arrival and dismissal and, more importantly, at evening rush hour when at times it is impossible to get from Norwood down to the I-5 on-ramp in less than 15 minutes.

Concern #2: Crime and Safety. Statistically higher crime occurs in areas of greater housing density. The proposed location of high density apartments is more than twice the difference from the police station as other high density residential areas in the city. A crime and public safety study must be completed to ensure that current public safety officers can respond to incidents in a timely manner and have adequate resources for increased safety concerns on the south edge of town.

Concern #3: Infrastructure. The Norwood Heights neighborhood regularly experiences power outages with mild wind events. Neighbors don't have any information that supports the electrical grid can support Autumn Sunrise, let alone new apartments.

Concern #4: Schools. As the parent of a child (soon to be two children) at Byrom and the husband of an educator in the district, where are these kids going to go to school and how are you going to manage the influx of children/families into the district? I'm concerned that this is an afterthought and that Byrom and Hazelbrook, the lone middle school in Tualatin, will become overwhelmed with the additional high density apartments in addition to the new development.

I would like to reiterate that while I was sad to lose the natural area south of Norwood, I understood the need to provide more housing for families in our community or interested in moving to it. I feel as though this new high density apartment proposal is too much and not within the best interest of current residents and the city as a whole.

Please speak to the residents of Tualatin to address these concerns and communicate how you will evaluate more sensible sites for high density housing.

Thank you,

Fletcher Johnson
Norwood Heights Resident

Subject:	Title of email: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

As a resident of Tualatin over 20 years, I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

AKS Engineering & Forestry, LLC does not have any planning for proper infrastructure to the city of Tualatin, which would give a heavy burden to the city to deal with in the coming years. Also, the contractors and developers mentioned that the future project on Norwood road would be a high end apartment complex, which is definitely not affordable housing to the community. As a resident of Norwood neighborhood for more than 10 years, I ask the City Council and staff to consider not to approve the SW Norwood Road Partition application.

Sincerely,

Florence Lee
8822 SW Stono Dr.
Tualatin, OR 97062

Subject:	Debacle on Norwood

Dear Tualatin City Administration,

Each day that I walk by the Lennar development on Norwood I see a scar on the City of Tualatin. I also see the total abdication of responsibility of the mayor, city council, and city administration. It did not have to be this way. It is my understanding that the City approved the development with a 60 foot buffer zone from the development to Norwood. This would be similar to the buffer zone in front of the Horizon church and school. This buffer zone would be adequate for the development. However, as we can now see, there is not ONE tree where the buffer zone should be.

The developer, apparently with approval from the city, has destroyed the "tree preservation zone" and left a vast open sore to replace what should be an extremely limited buffer zone to a development that is totally out of character of the surrounding neighborhood. I understand the need for additional housing with the growth of the area, but a responsible and concerned city government would not have approved this development with total disdain for the neighborhood and the resulting nightmare that will be Boones Ferry Road, Norwood and the adjacent streets like Pinto Drive where I live.

I believe that this project should be halted until and unless this developer complies to replant native trees in the buffer zone. A compromise of a "meandering sidewalk" with a few shrubs thrown in is not acceptable.

Sincerely,

GARY L. DOMINICK
22467 SW Pinto Drive

Subject: Tonight's meeting

Dear City Council,

Tonight I went to a meeting and the same developers who tricked us last year on Zoom were there in person! Last year they told us that there would be a 200 foot setback of trees between I5 and the new development and they got us to agree to medium density and now they want to buy more land for ultra high density and you can see the trucks on I5 straight through from Boones Ferry. These people are not honest, they are opportunistic developers and I feel that you, the City Council, is allowing this kind of railroading to happen to your constituents and our citizens.

Does everyone on the City Council live in the north end of town? Surely at least one of you can tell the others about the traffic problem we are currently having on Boones Ferry Rd. and the first 500 units haven't been built yet, and the same trickster developers want to add another 275! This is a disaster for our town.

I hope that you are standing up for us against these big companies and their rude lawyers. I know to follow the money. I know Horizon will make a lot of dough and nobody from Horizon had the guts to attend the meeting. Did you? Was our City council even there to hear us? There were about 100 people there trying to say "no" but none of our elected leaders were there or if they were, they didn't say anything.

I have lost trust in you and the developers. This has not been done well. There is no need to say words like "transparency." It is crystal clear that this new development idea is bad for the neighborhood and bad for Tualatin (it seems that Sherwood would get the taxes and we would get the headaches) and yet you are allowing it to be done to us. There doesn't seem to be a part of the process that citizens can say no and be heard-no vote, nothing.

You let us down last time, please don't do it again. Please do not change the zoning where Horizon is now to allow this high density development. Please.

Gillian Stratton

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

Dear City Council Members,

Please do not allow the development of the high rise apartments on Norwood and Boones Ferry Rd. Data projects an increase in crime with statistical support and that location is close to schools. If we need affordable housing in Tualatin, why not put it near the train and bus line rather than next to a school? The indicators are there for something bad to happen in our neighborhood if this development goes through, and you are in a position to help it be avoided. I'm asking you to use your position to protect our children.

Additionally, I live on Iowa Dr. behind the high school. I am a public school teacher in West Linn. I already leave my house before 7 to avoid the traffic jam that is Boones Ferry Rd. Please come and watch what happens to that area from say, 5-6pm. You can avoid making it worse for our neighborhood and I'm asking you to use your position to protect our life styles.

Thank you for reading this,

Gillian Stratton

Title of email: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from 1-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to

traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of 1-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

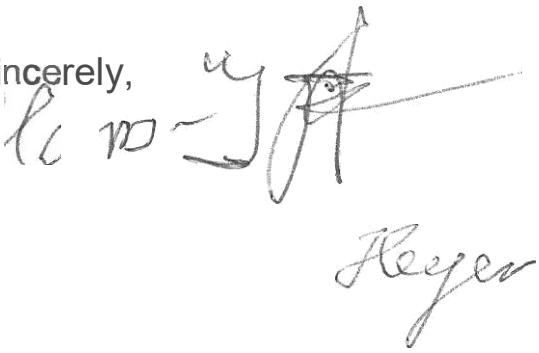
POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban

services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,



Madeleine Nelson

Subject:	Proposed High Rise, High Density Development at Norwood and Boones Ferry

Dear Mayor Frank and Tualatin City Council Members,

On the evening of Monday, October 24, 2022, I sat through a presentation by AKS Engineering and Vista Residential Partners at the Tualatin Community Library regarding their plans to file applications to develop the land at SW Norwood Road and SW Boones Ferry Road. They informed us that the proposal will include the following three parts: 1.) annexation, 2.) partition, and 3.) map & text amendment in an effort to change the existing zoning to that of high density high rise for additional apartments.

I am writing in opposition to this Proposed Development. I acknowledge growth and development is necessary within the urban growth boundary, but high density high rise does not seem appropriate for this property.

First, please seriously consider the traffic capacity of Boones Ferry Road. There is already a high density residential development (Autumn Sunrise) coming in across Norwood and the impact on that alone will be significant. For those of us who are a part of this community, it simply is not acceptable to those of us who live in the surrounding neighborhoods. Traffic already diverts through our neighborhood during peak hours. These neighborhood streets will be overrun with traffic avoiding an already over-congested Boones Ferry Road. Imagine the increase after Autumn Sunrise and the 116 units of multifamily next to it, are built and occupied.

Alternatively, you could allow a rezone for neighborhood commercial, which is allowed under the Basalt Creek Plan (high rise is not). Day care, restaurant, small retail, an essentially walkable and central mixed use for the surrounding neighborhoods, would be more welcome. It would be healthy and perhaps would decrease some traffic. Or better yet, given there was almost no green space required of the Autumn Sunrise development, a park would be suitable and welcome in that space. The nearest park is Ibach. A walkable park from Norwood Heights, Autumn Sunrise, and Hedges Creek would be central, valuable and appropriate, and would counterbalance the impact of Autumn Sunrise's high density.

High rise zoning should be limited to downtown, and adjacent to rail. By far the most logical place for that type of high density, high rise, would be the former Haggen's. A mixed use town center would be appropriate and attractive at that location. At Norwood, that type of density and high rise makes no sense.

As stewards of Tualatin, you have an obligation to consider the impacts of this type of development on our community's livability. Housing is very important to Oregon and our community but we need to do it in a thoughtful, deliberative manner that first and foremost does no harm to existing neighbors. I respectfully ask that you keep the zoning as-is, medium residential.

Thank you for your consideration of this matter throughout this process.

Regards,
Heidi Augee
8905 SW Iowa Drive

Subject: SW Norwood Rd and Partition

To whom it may concern,

I object to the partition and future development of a highrise which is not in the best interest of the city nor the residents of Tualatin. Tualatin is in no way prepared nor will benefit from high density housing. The disregard and destruction of mature native trees is shameful to a city that claims to be the city of trees. Our city is being steam rolled by zelus developers without regard to the drastic effects it will have on the livability of Tualatin.

Rest assured land value will not decrease if time, patience and diligence are taken in the planning and growth of our city. Families primarily move to Tualatin for the community of people, not for the immediate industry.

Our schools are not prepared for this growth, our roads are not prepared for this growth, and surrounding neighborhoods will bear the brunt of it's impact.

My hope is that our voted in mayor, city commissioners, and the professionals our city employs will take deep consideration in listening to their neighbors and fellow residents in planning a community that we continue to be proud of and choose to stay in for generations.

Growth is inevitable but we can do better.

Thank you ,

Holly Stuart

19 years-Tualatin Resident

Per the TDC rules to approve a partition, the proposed application does not meet criteria and cannot be approved:

Per TDC 36.115 (1), THE PROPOSED USE MUST BE CONSISTENT WITH LAND USE ZONE. - The applicant identifies an intention to build high rise high density multifamily apartment homes, NOT CONSISTENT with the present land use zone: RML. The city would first need to approve different zoning before the partition application is approved.

The application does not meet criteria TDC 36.115(2)b: the plan is not consistent with residential design standards, which are defined as those for SINGLE FAMILY HOMES, TOWNHOMES, DUPLEXES, TRIPLEXES, AND QUADPLEXES. (TDC 73A.100).

Most significantly, the proposal in the application IN VIOLATION OF of TDC36.010, in that the proposal is not consistent with the provisions of the Tualatin Comprehensive Plan, Tualatin Community Map, and capital improvement plans. These plans make no reference to permitting high density high rise outside of the downtown development zone. Furthermore, the proposal identified in the partition plan violates the following Tualatin Comprehensive Plan Policies and Goals: POLICY 2.1.1 Encourage structures be planned in ways that relate to the site AND SURROUNDING CONTEXT. A high rise high density apartment is NOT 'in context' with institutional use zoning and RML zoning.

The proposed development involves removal of a forest, in violation of the following elements of the Tualatin Comprehensive Plan: GOAL 2.2 Promote the preservation and establishment of trees throughout the city, in order to protect and enhance the aesthetic character of Tualatin, protect and improve air and water quality, provide noise and visual screening, and protect habitat for wildlife. Even if a tree barrier is left, the destruction of a few acres of forest destroys significant wildlife habitat that would not be adequately replaced by a tree barrier strip. POLICY 2.2.1 Require the establishment and protection of street trees. POLICY 2.2.2 Promote the protection and establishment of trees during the development process. As this proposal involves AKS engineering, which has demonstrated disregard for these provisions in the Tualatin Comprehensive Plan through their work on the Autumn Sunrise subdivision, AKS cannot be trusted to adhere to these policies.

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;
I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Subject:	Pending Partition and Annexation Decisions Partition # PAR-(22)-0002 Annexation # ANN 22-0003

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments in decline of both these land use decisions.

As a resident of Tualatin and a member of Horizon Community Church, I am concerned about having a low income or apartment complex so close to the school.

Please decline these two land use applications.

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

Dear Tualatin City Manager,

I STRONGLY agree with Norwood for Smart Zoning (see email below). A high-rise on Norwood Road is a terrible plan and NOT in the best interest of the public.

I live on SW Boones Ferry Rd. and the traffic implications alone of this plan make it a non starter. Please reconsider.

Jackie

Remember 2 emails ago - where we shared about new signs posted on SW Norwood Rd?

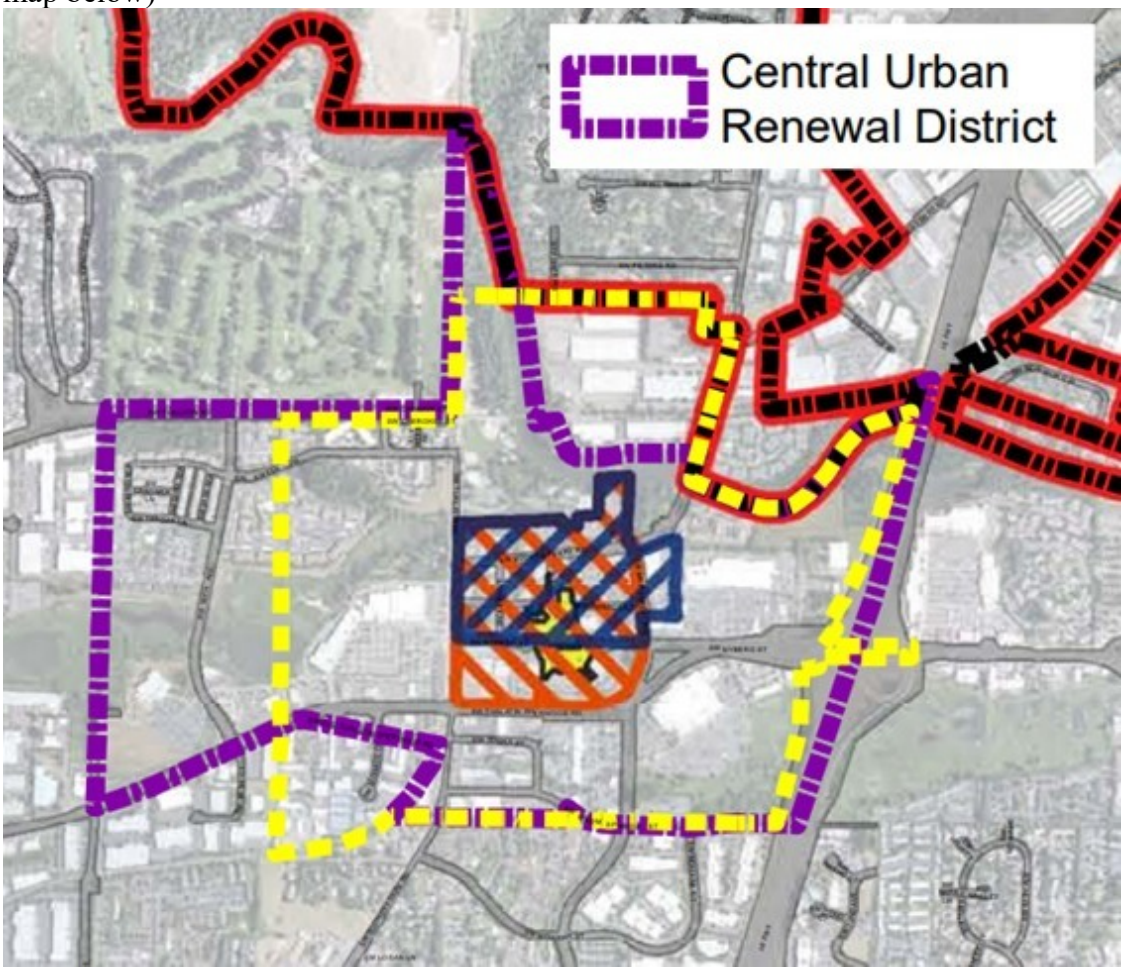
Currently the city is reviewing those applications associated with those signs and right now, the city could stop this whole arduous process from even happening. Also, right now, the public cannot interject directly due to the city code bylaws however, we can express our concern to the decision maker, City Manager, Sherilyn Lambos.

A little more detail…In the partition application, AKS Engineering & Forestry and Vista Multi-Family Residential Partners clearly indicate they will request to change the language in the Tualatin Development Code (TDC) in the future applications they will submit.

Here is what AKS wrote, "Text Amendment to the Tualatin Development Code (TDC) will also be submitted that modifies the TDC's RH-HR language to allow the zoning district to be applied elsewhere in the City."

What do all these words mean? If this code language is changed a high-rise can really be located anywhere in the city, in any district and not just where it is supposed to be in downtown Tualatin.

The current TDC code language states that High-rises are reserved for the core only. This is the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club that are suitable for high density apartment or condominium towers. (see map below)



As we all know, the core of Tualatin has a lot of development to be done, before high-rises should even be considered outside the core. No developer, city, or entity should even be thinking about jamming a high-rise next your home…

A few more facts…

If this process continues it will allow ANY future developer to continue this practice and request the highest density zoning for any project in ANY area in Tualatin.

Along Norwood the change in density would increases housing density by 300-500% from our current zoning.

The City of Tualatin has known about this plan since July 2022, and has not impeded this process…

Here is the petition stating these intentions:
[PAR22-0002 - 23370 SW Boones Ferry Road Partition | The City of Tualatin Oregon Official Website]

What to do...

Developers (and tax revenue) should not be more important to the city than the current residents!

Subject:	No high-rise on Norwood -- Norwood for Smart Zoning

Dear Mr. Mayor and Councilors,

I am a homeowner on SW Boones Ferry Rd. just south of Greenhill Lane. While I am NOT a resident of the City of Tualatin (we are in unincorporated Wash. Co.) my neighbors and I are directly impacted by the gridlock nearly every weekday of cars leaving Tualatin trying to get to I-5.

Here is a recent video I shot from my driveway.

The residential developments planned for SW Norwood Rd. will only exacerbate the traffic, as you know. If the connector bridge comes through as planned, all bets are off. None of these projects make sense.

When the current councilors were new to office, there was a clear voice of reason coming from City Hall regarding the bridge and traffic. I hope you're still questioning and pushing back on the decisions made years ago that no longer make sense for this area.

Thank you for having the courage to stand up and say no to development that will harm our community. It is hoped you can work with Wilsonville and Washington County to devise a plan and solution that makes sense for TODAY, not 20 years ago.

Thank you.

Jackie

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

Please read the attached letter concerning the partitioning and annexing requests received by the City of Tualatin.

Thank you,
Ken and Jan Perry
Stono Drive

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing to express my concerns about the latest proposal received by AKS for the partitioning on Horizon property and the annexation of the acre property on Norwood Road for the purpose of building high-rise apartment buildings on Norwood Road.

The proposal is concerning for so many reasons that many of us in the Bryom CIO Neighborhood have expressed. But what is literally the most concerning on this proposal, is the following from their proposal:

"A Text Amendment to the Tualatin Development Code (TDC) will also be submitted that modifies the TDC's RH-HR language to allow the zoning district to be applied elsewhere in the City. I t appears this request has been made (see below)."

Map and Text Amendment

In conjunction with the Partition and Annexation applications, a Plan Map Amendment will be submitted to the City that will apply the High-Density High Rise (RH-HR) zoning district to the new ±9.2-acre site on SW Norwood Road (this ±9.2-acre site combines Parcel 2 of the subject Partition Application and adjacent Tax Lot 108, as described above). Currently, the RH-HR zoning district is defined as a specific area within the City's Central Urban Renewal Area. A Text Amendment to the Tualatin Development Code (TDC) will also be submitted that modifies the TDC's RH-HR language to allow the zoning district to be applied elsewhere in the City.

This is an attempt on the part of AKS to remove trees and build high-rise apartments everywhere in Tualatin. What AKS has demonstrated thus far:

- They have no regard for the environment. They will say anything to get their plans approved and then they will do exactly what they want once the approval is in place, regardless of whether they've met their commitments/promises. This is what is required (see below). Unfortunately, they have proven that they will not follow through.
  The layout, size, and dimensions of the parcels within the Tentative Partition Plan take into account the topography and vegetation of the site, such that the least disruption of the site, topography, and vegetation will occur from the reasonable development of the parcels.
- They have no concern for the community when it comes to the amount of traffic these endless building projects are placing on our roads. The traffic study concerning Alden Apartments read, from 220 added residences, it would only put 16 more trips on the road during morning rush hour and 18 trips during pm rush hour. This is beyond reason! Are we to believe that all these people are not working? That they're just staying home all day? These estimates can't be correct. But even it were (and more, given the two developments), that's too many to put on an already overcrowded road with no solution in sight.

- **Table 1: Vehicle Trip Generation Estimates**

Land Use	ITE Code	Size (Units)	Daily Trips	Weekday AM Peak Hour			Weekday PM Peak Hour		
				Total	In	Out	Total	In	Out
Existing Use									
Apartments	220	15	101	6	1	5	8	5	3
Proposed Use									
Townhomes	215	45	324	22	7	15	26	15	11
Net New Trips (Proposed – Existing)			**223**	**16**	**6**	**10**	**18**	**10**	**8**

- As shown in Table 1, the proposed redevelopment is expected to result in a net increase of 223 daily trips, including 16 trips (6 inbound, 10 outbound) during the AM peak hour and 18 trips (10 inbound, 8 outbound) during the PM peak hour.

Tualatin will be unrecognizable and impossible to navigate if you continue to approve such egregious plans and changes. Please, listen to the members of the community that you've pledged to support! Stop this madness! Say "No!" to this amendment. Say "No!" to the request for a change of zoning for this land. Say "No!" to the request for a high-rise apartment complex on Norwood Road. Please, do the right thing for the community!

Thanks for listening.

Attached is my first letter concerning the latest AKS proposal. I will continue to send to you the letters I've been sending to the city council.

Please read this letter and consider what is being stated here. We are directly impacted by the decisions that are made by the Mayor and the Tualatin City Council. We should have a voice.

Thanks in advance for your consideration.

Ken and Jan Perry
Norwood for Smart Zoning

To MNelson@tualatin.gov,

I am writing to express my concerns about the latest proposal received for the partitioning on Horizon property and the annexation of the property on Norwood Road for the purpose of building high-rise apartment buildings on Norwood Road.

The proposal is concerning for so many reasons that many of us in the Bryom CIO Neighborhood have expressed to the City Council. But what is literally the most concerning on this proposal, is the following:

> "A Text Amendment to the Tualatin Development Code (TDC) will also be submitted that modifies the TDC's RH-HR language to allow the zoning district to be applied elsewhere in the City. I t appears this request has been made (see below)."

This appears to be an attempt on the part of AKS and the builder to continue to remove all of the trees and build high-rise apartments everywhere in Tualatin. What AKS has demonstrated thus far:

- They have no regard for the environment. They will say anything to get their plans approved and then will do exactly what they want once the approval is in place, regardless of whether they've met the commitments/promises. Unfortunately, they clearly proved this with the Autumn Sunrise development. Below is text in the document. We have seen just the opposite so far with Autumn Sunrise and cannot believe that they will do what it says, or is right, in the future.

> The layout, size, and dimensions of the parcels within the Tentative Partition Plan take into account the topography and vegetation of the site, such that the least disruption of the site, topography, and vegetation will occur from the reasonable development of the parcels.

- They have shown no concern for the community when it comes to the amount of traffic these endless building projects are placing on our roads. The traffic study concerning Alden Apartments read, from 220 added residences, it would only put 16 more trips on the road during morning rush hour and 18 trips during pm rush hour. This is beyond reason! Are we to believe that all these people are not working? That they're just staying home all day? These estimates can't be correct. Even if they were (and more, given the two developments here), that's too many more cars to put on an already overcrowded road (SW Boones Ferry) with no solution in sight.

Tualatin will be unrecognizable and impossible to navigate if such egregious plans and changes are approved. We, the citizens of Tualatin, are saying "No!" to this ridiculous proposal for a change in wording AND to the proposed apartments that will sit on this land. We are trusting our City leaders to listen to our voice of concern and reason. The City Council needs to say "No!" to the wording change and the partition request.

Thank you,
Ken and Jan Perry

Subject:	Norwood For Smart Zoning Reponse to latest partition and annexation proposals
Attachments:	Norwood Says No letter 01182023.docx

Attached is a letter expressing my concerns about taking recommendations from AKS Engineering and (DE)Forestry. They have shown us, in the neighborhood, that their work cannot be trusted.

Thanks, Ken and Jan Perry, 8885 SW Stono Dr, Tualatin, OR 97062.

Planning Division, Attn: Madeleine Nelson,

Per your mailed notices, as a resident near the partition applications areas "SW Norwood Road Partition" File No. PAR 22-0002 by AKS Engineering and Forestry LLC, I wish to state my objections in writing to both of these proposals for the following reason:

We have zero trust in AKS, and any developer working with AKS. We are asking that these changes for the 8 ½ acres on Norwood Drive be soundly rejected. Nothing AKS says can be trusted as, clearly, they will say whatever they need to get an approval and then do whatever they want. Here is clear evidence:

What a tree preservation buffer should look like:

- This buffer has been here for years. The larger limbs are cut back to ensure no power lines are impacted. This is beautiful and natural. Exactly how the Tree Preservation Zone should have looked like for Autumn Sunrise.

What the Tree Preservation Zone at Autumn Sunrise actually looked like:

- You can't look at these trees and not wonder when they will fall on the power lines. Please look at the comparison to an actual tree buffer. This is a flagrant disregard for the City of Tualatin's wishes and directive. And, of course, many of the trees did fall.

Where we are now:

- Why are we here? What we've been told is that an Aborist decided the trees in the Tree Preservation Zone were dangerous. Question: Is this the same Arborist who determined for AKS and Lennar which trees should be kept for this zone? Can we see the results of the study showing which trees needed to be kept and which of the trees were **actually** kept? And who provided that determination?
- Two days following the dead and dying trees falling on power lines, Lennar had a rendering of a new plan for this buffer. Question: Are we supposed to believe that this was not the original plan that Lennar wanted to go with? That they did not intentionally keep trees that could be counted on to fall on power lines and, therefore, lead the City of Tualatin, and PGE, to determine they all needed removed?
- AKS cannot be trusted to advise on what should be done with the trees in **any** new development.

- The City of Tualatin should be irate that Lennar and AKS went directly against the explicit requirement to maintain a Tree Preservation Zone requires action on the part of the City.
- For every project the City of Tualatin engages in with AKS, a neutral Arborist must be hired to ensure they do not pull another stunt like this one. We would also like to see a legitimate Environmental specialist assess the impact of removing trees in this area, so close to a freeway (for future development).
- We all would love for the City of Tualatin to no longer use AKS, or their recommendations, and find a more competent engineering company to advise the council. Or to refuse to work with any developer who is using AKS.

Thanks for listening,
Ken and Jan Perry
8885 SW Stono Drive.
Tualatin, OR 97062

P.S.

It's been stated that we all live in a neighborhood that was once a forest. This is what it looks like to develop a neighborhood while respecting the environment and the trees that have stood for hundreds of years. This is our neighborhood (next page):

Madeleine,

Attached is a letter to you and the City Council concerning the request for partitioning and annexation.

Thank you for considering our feedback.

Ken and Jan Perry
Stono Drive

Planning Division, Attn: Madeleine Nelson,

Per your mailed notices, as a resident near the partition applications areas "SW Norwood Road Partition" File No. PAR 22-0002 by AKS Engineering and Forestry LLC, I wish to state my objections in writing to both of these proposals for the following reason:

As has been stated several times, the potential development of another 276 residences on Norwood Rd. will cause even more cars to back up on SW Boones Ferry Rd. This after adding the already approved Autumn Sunrise. We've calculated over 2000 more trips up and down SW Boones Ferry Road each weekday.

What I hear from the City Council, AKS and the developer is "That's really not our problem." They cite that Wilsonville is part of the solution and, of course, ODOT. What I hear them saying is, the system is broken. We can't address our traffic issues (actually, the city of Tualatin's issues) because it's just too hard. There are too many parts and pieces.

We are suggesting that the City of Tualatin works with ODOT and Wilsonville to address this very real problem. Agencies and governing bodies should be able to work together to address this already untenable issue affecting both Wilsonville and Tualatin (as well as the freeway issues, which are a big part of the problem). All that has been done has served to exacerbated the problem with no clear solution (and adding a traffic light will not solve the problem, by the way).

It sounds like AKS and all traffic studies have washed their hands of anything having to do with Boones Ferry Rd. No more homes should be built, or added, until this issue is addressed. I think this may be the most disappointing part of this situation, that there has been no effort at all to work together on a problem that everyone acknowledges exists. I'd love to see the City of Tualatin be the ones who solve this problem and bring the parties together to make this happen.

As for the apartments proposed for Norwood Rd. (clearly the purpose of the request for annexation and partitioning): This small two-lane road cannot handle this added traffic. I envision the people of the apartment complex being unable to turn left onto Norwood due to traffic. This will lead to them turning right and likely cutting through our neighborhood. This will also need to be addressed with Autumn Sunrise added traffic and the temptation for them to go speeding through our neighborhood

to avoid the Boones Ferry traffic. This will be a very clear hazard for all of us living in the surrounding neighborhood.

I know the city leaders have pledged to protect the safety and quality of life of the people of Tualatin. We have placed our trust in them. I know they can find a way to work together with the other entities to address this issue. Even without these new neighborhoods and the proposed apartment complex, this needs to be addressed. The right thing to do is to say no to the partition and annexation requests. Anything else will only make things worse for everyone in Tualatin.

Thank you for considering our feedback.

Madeleine,

Attached in an email concerning the request for partitioning and annexation. There are some really good reasons why high rise/high density housing is built in urban areas. Building them in suburban areas makes no sense and shows a lack of planning.

Thank you for considering our feedback in this matter.

Jan and Ken Perry
8885 SW Stono Dr, Tualatin, OR 97062

Planning Division, Attn: Madeleine Nelson,

Per your mailed notices, as a resident near the partition applications areas “SW Norwood Road Partition” File No. PAR 22-0002 by AKS Engineering and Forestry LLC, I wish to state my objections in writing to both proposals for the following reasons:

- **Increased traffic:** When populations are concentrated, traffic congestion is a given. **Public transportation and walkability of neighborhoods becomes increasingly important**. The traditional model of developers being required to provide a set number of parking spaces per anticipated user encourages more cars on the road, leading to more traffic issues. With no walkable services near these apartments, and 276 units, it will require people to use their cars causing a big increase of traffic on Norwood Road and SW Boones Ferry Rd.

- **Lack of services:** Traffic and suburban sprawl are already straining our resources. The most logical plan is in-fill urban centers with high density developments. This provides the renters access to critical services. Walkability is the key to high rise/high density housing location.

- **Lack of green spaces:** Amenities like parks and other green spaces don’t in themselves provide income to developers and must be planned in high density developments to provide improved quality of life for would-be residents. There are many beautiful amenities and parks in our lovely downtown Tualatin. This is exactly why builders of high-density housing build in urban areas.

This planned development will not only make everyone in the surrounding neighborhoods unhappy, it will also not make the tenants happy. This is a poor plan (or a complete lack of a plan) and literally makes no sense.

Thank you for considering our input,
Ken and Jan Perry

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.
The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,
Ken and Jan Perry, Stono Drive, Tualatin

Subject:	Norwood for Smart Zoning, Council meeting follow up

Thank you for listening to our concerns at the meeting on 11/28. The few people who attended and spoke represent a very small percentage of the number of people who are legitimately concerned about upcoming proposed zoning changes on Norwood.

I wanted to reiterate what I said at the meeting. The concern I have about the trees is a real threat to our quality of life. There have been arguments saying our neighborhoods were once forests like existed prior to Autumn Sunrise. I beg to differ. The other neighborhoods in our area have retained as many large, 100-year-old trees as possible. However, the Autumn Sunrise development cut down every tree, with the exception of the scraggly, dying trees that they claimed would be a tree buffer. No attempt was made to retain any trees in the development.

Concerning the buffer, this was a diabolical, well executed plan to get rid of all the trees. This was not an unfortunate accident! Not by a long shot. It is amazing to me that one week after three trees fell on electrical lines, the development had a new plan all sketched out and sent to our mailboxes. We had a very small yard project and the plans took at least a month. This was all a part of their original plan to get around the tree buffer.

And if they had an arborist who advised them on the trees, then he/she should be fired. The ones that were kept were absolutely dying and weak! It didn't take an arborist to determine that.

I'm say all of this to explain why we do not trust AKS. We do not trust developers and we have a very low level of trust in all of you right now. You are complicit in the actions to remove all the trees (no tree retention requirements or plan) and the approval of higher density zoning (producing yet more green-house gasses without the help of the absorbing trees). If there was an environmental study, by a true conservation agency, I'd love to see it. If none was done, then it's not too late to have one done on all future projects and to assess current already approved plans for new developments.

Please help us to trust you again. Show us that you care about this community, the air we breathe, the roads we travel on and our quality of life. Do the right thing. When you receive the proposal for the HD/HR zoning change, give a resounding "NO!" Show us that you care about your constituents. We really do want to trust and support you.

Thanks,

Jan and Ken Perry

Subject:	Norwood for Smart Zoning

To the Mayor and Tualatin City Council,

Me again! I am writing on behalf of Norwood for Smart Zoning with a focus on the existing community near this HR/HD zoning change being proposed by AKS.

Imagine living in a neighborhood where you paid good money for your home and you have done so surrounded by trees. You then learn that the City Council has approved a huge, high-density neighborhood and all the trees will be gone.

This changes everything for your neighborhood and for the market price of your home. The approved neighborhood will have some apartment complexes and higher-density homes but the price of the homes will reflect this fact. This is how it should work as it impacts home prices in that new neighborhood. But this is also having an impact on existing neighborhoods and home owners.

For us who are living in long standing surrounding neighborhoods, adding a high-rise apartment complex has an even more profound impact. It causes our home prices to drop for many reasons.

- Regardless of what you may think or say, we know that apartments bring a higher level of crime. My husband is former law enforcement. It could not be more clear to him based on experience that neighborhoods with apartment complexes have higher rates of crime. (Please refer to an earlier email sent to you by Brent Bebee showing crime rates in neighborhoods with apartments.)
- The impact to the traffic, which I've previously noted, is another negative impact to our home values. (Please refer to my earlier email on traffic impacts.)
- The aesthetics of the neighborhood as you drive to your home also has an impact. Where tall evergreens once stood you now have the eye sore of a 4-7 story imposing apartment building. This is not what someone wants to see when looking for a home in a safe and quiet neighborhood.

The answer to this 8 ½ acres: A park

We don't have nearly enough parks in our area. Well, to be accurate, none. Although we know there is a park possibly being planned a half mile plus from here, that is not good enough. (The location of the park in the current plans won't be near any of the neighborhoods.)
This entire area has no park. You continue to raise money for parks (a recent bond measure was just approved) and we continue to only wish that we could have one near us.

This property would be perfect for a park. You cannot ethically continue to build homes without also providing a comprehensive plan that includes parks and open space. Doing so is how cities become concrete jungles with no plan and no open space that no one wants to live in. I've lived in areas where this has happened, and the cities have become low-income, low-quality communities. Do you want that for Tualatin?

We would like for you to consider putting together a comprehensive plan for Tualatin that includes parks and open spaces. This is so critical for the quality of life of those living here. This is what you were elected to do. Please show us you care about all of Tualatin and preserving this lovely community and quality oflife.

Thank you,
Ken and Jan Perry, Stono Drive

Subject:	Norwood for Smart Zoning

To the Mayor and City Council of Tualatin

I sent a message to AKS last week asking that they reach out to the neighboring community to discuss the plan following their completely failed approach at a Tree Preservation Zone. The neighborhood would like large, native trees and a sufficient buffer, as promised.

Needless to say, I have heard nothing back from them. They clearly don't care about this community or about the importance of being wise in how you blend a community in with an existing environment. They continue to take trees down next to the freeway. This is the worst possible action to take when you are near a greenhouse gas producing roadway.

My request is that you do not trust AKS as they will say anything to get approved and then fail to deliver on their promises and do whatever they want. They have continued to prove that they cannot be trusted. Please say "No!" to any of their proposals. We don't need more of what they have given us with Autumn Sunrise.

Please stand up for your constituents and communities. Please just say "No!" And please say no to HD/HR zoning changes that would remove all the remaining trees.

Thank you,
Ken and Jan Perry, Stono Drive

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

I agree with Norwood for Smart Zoning. A high-rise on SW Norwood Rd. is not in the public's best interest.
—-
Dear Assistant Community Development Director, Steve Koper;

We hope that you had an enjoyable, restful vacation, and you are refreshed with a clear mind.

We also understand that the planning department may be understaffed as there are many land use projects in the works.

In the meantime, the residents of Tualatin thought it would be helpful to assist you in preparing your presentation to council, regarding the proposed RH-HR plan amendment change on SW Norwood Rd.

If it is not already clear, this proposed change is not in the best interests of the public. Feel free to copy this image below and insert it in your presentation when it's ready.

We have at least 20 more reasons why this plan amendment change is a bad idea, but it was hard for us to summarize in a single slide as done for the Tualatin Heights apartment's plan amendment change.

For that specific project, as a reminder, it was recommended that the housing density increase 35% within the same area.

<u>It is not in the public's interest to approve an RH-HR zone off of Norwood Rd.</u>

Subject:	Neighborhood feedback: Proposed Apartments at Norwood and Boones Ferry

I hope you will listen to my perspective on the development (high rise apartments) being proposed on Norwood. My husband and I live on Stono Drive and will be directly impacted by your decision.

I have been walking around this area for 3 years. This was a beautiful area with tall evergreens and an amazing ecosystem of animals and birds. I watched the birds (hawks and eagles) as they fed their young and then pushed them out of the nest to fly on their own.

I've also watched as that ecosystem was destroyed to build high density housing. Not a single tree was spared. I watched as the hawks and eagles flew in circles above the devastation which was formerly their home. It was heartbreaking. And my husband has been taking food for the squirrels who lost their homes and food source.

Those beautiful birds have relocated, many of them finding homes in the trees that you are now wanting to remove for high rise apartments. I hear lots of talk of respecting and caring for the environment, but those words seem very empty right now. This is not a little sacrificing of trees to provide some additional housing. This is just complete and total destruction of an environment in order to provide tax money for the city of Tualatin. A city once known as the City of Trees.

In addition to the impact to the ecosystem, there will be an enormous impact to the surrounding roads. The I5 freeway is already totally exposed, adding to the amount of exhaust fumes for the neighborhood. Without the shade from the trees, our temperatures have already risen.

Additionally, this and the Lennar development will pour thousands of additional cars onto our already overloaded roads. If you are driving East on Boones Ferry Road any time after 3 pm, you will encounter up to a five mile backup of cars heading to I5. We've been told no improvements to the roads are necessary. Really? This is a nightmare.

From what I understand, there are other areas already zoned for high density/high rise development. Why are you destroying this area when other land is available for similar housing without causing the destruction this will cause? And why do you zone land only to quickly turn your back on that plan and change the zoning? The only answer must be money.

Please consider the environment as well as the issues the added traffic will create for this area. It's not too late to do the right thing. Please do the right thing.

Subject:	Follow up from Tuesday's meeting with Developers/AKS

I am writing following the meeting held last night, 10/25, at the Tualatin Library with AKS and LSW.

I took from that meeting the following:

- First, those presenting were doing their job in providing information about their plans with this development. AKS just wants to be paid. LWS just wants to build and make money. That's their goal. We all get it.
- They don't care about the neighborhood. In their words, they care about utilities, water and sewer. Period.
- What they don't have is any analysis on the impact to the environment. And the impact to the ecosystem here. That is totally not on their radar. The idling cars will add to our unhealthy air while we have fewer trees to provide much needed oxygen. And the wildlife that were displaced by the Lennar development will be displaced again. All remaining trees will be removed. Getting an analysis of how this will environmentally impact our city is imperative.
- AKS admits that Boones Ferry is a failed road but is adbacating any responsibility to address it. They cited ODOT as responsible for addressing issues. And that they are unlikely to do anything quickly, if at all. Who will do anything about the worsening traffic. This development, with 276 additional apartments, will only exacerbate the already awful traffic on Boones Ferry.
- Pouring 500 additional cars onto Norwood (in addition to cars from Autumn Sunrise) is just ridiculous. AKS says they have no choice but to have the apartment exit onto Norwood. It is not a road capable of handling this additional traffic. It will be a nightmare.

Nothing about his plan makes any sense whatsoever. Please put yourselves in our shoes and consider what you will be doing, not just to us who already live here, but to all of the people who would be moving into this complex. It will be the same nightmare for all of us.

Our next steps will be to attend the City Council meeting in large numbers and make sure you are unable to ignore our serious and valid concerns.

You will be hearing more from me and our neighbors as we fight for what's right in our city.

Subject:	Traffic on Norwood Dr.

Re: Traffic Concerns

Thanks to the city council who approved the Autumn Sunrise project, we will have a significant increase of cars on Norwood drive. This alone will cause a traffic issue.

Now AKS is suggesting that Norwood drive will be able to handle another 200-500 cars from the 276 apartments. This entire plan is just wishful thinking and no thinking whatsoever about those of us who live in the adjacent and surrounding neighborhoods.

As people find it too difficult to get through the Norwood-Boones Ferry light, where do you think they will go? Unfortunately, they will fly through our neighborhood making our roads filled with cars and introducing danger for children and residents who live there. My question: Are you planning to limit our neighborhood (Stono, Vermillion, Iowa, Martinazzi) to local traffic only? Will there be speed bumps added? How will you protect us from the traffic issues your decisions have created?

If you put a light at Norwood and Boones Ferry, it is likely that, given all the added cars, this will become a large back up of cars trying to pull onto an already overloaded road. It is unlikely that the people leaving the apartment complex will be able to turn left onto Norwood going North to Boones Ferry. It will be a frustration to them and everyone else driving

down Norwood. And again, they will seek out another option which likely will be streets in our neighborhood.

This entire project is going to be a nightmare to us who already live here as well as to all of the new residents. Not a fair proposition for anyone.

A park would be a much better option. Or anything fitting the designation of "institutional" would be an improvement on this plan. Please take a moment and put yourselves in our shoes (and cars). This is not the right place in Tualatin to add this large complex.

Thanks for listening,
Jan Perry

Subject:	Norwood Says No!

Me again…power outages

The Autumn Sunrise development promised a tree buffer on Norwood. They took out all the healthy trees (I guess to sell) and left the weakest trees. They then began to trench next to the trees for the utilities to be laid and weakened the ground even more.

So we sat in the dark last night because the electricity was out again after a third tree fell on the power lines. Two other trees fell yesterday, one at approximately 9 am and another at 2:25 pm. The third tree caused an approximate 4-hour outage.

This is the poorest run and planned project I've ever seen. There has been no concern whatsoever for the environment and the quality of the trees that were retained. Yes, it was windy. But the development has greatly exacerbated this situation. Anyone should have foreseen what would happen when leaving weak and dying trees so near utility lines and the impact of the trenching prior to a predicted wind and rain event.

So, I'm sure you can understand why we are so adamantly opposed to yet another development planned on Norwood. Please stop! We have had enough. Norwood Says No!

Thanks for listening,
Jan Perry

Subject:	Norwood for Smart Zoning

I am copying in a letter that I agree with 100%. But I am also adding my own personal thoughts about the recent loss of power.

On November 14, 2022, We received a letter from Lennar "re: Tree Removal and Replanting along SW Norwood Road within Autumn Sunrise" The letter said (paragraph 3), "As a result of the damage from the storm, the remaining trees within the Autumn Sunrise open space tracts along SW Norwood Road have been deemed by the arborists at both PGE and AKS Engineering to be hazardous and present a danger to the public...Therefore, given the above and having consulted with City staff, the trees are planned to be removed this week under the emergency provision of the Tualatin Development Code Section 33.110.(6)"

It is November 30, two weeks after we received this letter. These weak and sickly trees were NOT removed. I guess what they meant was, "we'll wait until they fall one by one on the power lines and then remove them"?

What you need to keep in mind is, there are people in this neighborhood who rely on medical equipment to sleep at night and to not die. My husband is one of them. He sleeps with a C-Pap machine. Without it, he stops breathing, on average, 27 times an hour. I'm fairly certain he is not the only person who woke up last night gasping for air! Fortunately, we have invested in some battery backups for just such occasions. This was critical for him to know he could still safely sleep if the power went out. It's good for one night only and then needs to be recharged. It's also difficult to get back to sleep after waking in a panic. Needless to say, we had very little sleep last night.

Someone needs to be held accountable for promising one thing and then failing to follow through. Will you be doing that? Will PGE charge Lennar for the times they have had to come out and restore power due to their negligence? Please! A message must be sent. This development, which none of us wanted, cannot continue to distrupt our lives! We are asking that you stand up for your community. It's what you were elected to do.

...jan perry, Stono Drive

Dear Mayor 'Blackout' Frank Bubenik,

I understand it seems legacy is important to you since around 2021-2022, during the mid-peak of COVID, you changed term limits for extending a council member's term in office if the person was going to run for mayor. This directly affected you at the time. Five Council members, including you, decided that it was easier to put this on a ballot versus people petitioning it first as the city's bylaws instructed, citing public safety because of COVID. I bring this up to you now because this seems directly related to how you are forming your legacy for the future.

To elaborate, today your legacy will be known by thousands as Mayor 'Blackout' Frank. The reason I say this is because at 2:40am this morning, thousands of people for the fourth time in the last month lost power due to weakened trees falling on power lines from the Autumn Sunrise development. My three-year-old daughter, scared, woke me up in the middle of the night because of loud crashing noises echoing throughout the neighborhood, caused by the faulted power lines. During the council meeting on 11/28/22 you indicated it was not the council's plan for that many trees to be removed. Unfortunately, that is not an excuse as the city now owns the plan. Council voted in favor of the plan unanimously, 7-0. The planning director recommended the plan, and the planning commission envisioned the plan, who, by the way, was selected by council as well. The caveat to all of this is it could have all been avoided if the planning commission's plan was followed. You see, the commission indicated that 59 acres of land would be dedicated to RML zoning per Ordinance 1418-19 or 59.83 acres to be exact. The current Autumn Sunrise development that council and you unanimously approved, was for 62 acres and 407 homes. Those approximate two acres in excess, could have easily been placed as a reserve buffer along Norwood, instead of jamming as many houses on that plot of land. Heaven forbid reducing the number of homes being built to 390, instead of 407…

I leave you with what you want your legacy to be. Today, thousands will have a different idea of what youmight want your legacy to be perceived as in the end. I suggest saving the last part of Norwood forest and reserve it for Norwood Park and Community Gardens, as the website norwoodsaysno.org is saying to do.

Council, say no to the text amendment change for a high-rise on Norwood Rd.

On Wed, Dec 7, 2022 at 1:36 PM Jan Perry <jrperry.perry11@gmail.com> wrote:

To the Mayor and Tualatin City Council,

Hello again. And, again with the trees. This is a big concern for not just me but many of the neighborhoods and residents of Tualatin.

What a tree preservation buffer should look like:

- This buffer has been here for years. The larger limbs are cut back to ensure no power lines are impacted. This is beautiful and natural. Exactly how the Tree Preservation Zone should have looked like for Autumn Sunrise.

What the Tree Preservation Zone at Autumn Sunrise actually looked like:

- You can't look at these trees and not wonder when they will fall on the power lines. Please look at the comparison to an actual tree buffer. This is a flagrant disregard for the City of Tualatin's wishes and directive.

Where we are now:

- Why are we here? What we've been told is that an Arborist decided the trees in the Tree Preservation Zone were dangerous. Question: Is this the same Arborist who determined for AKS and

Lennar which trees should be kept for this zone? Can we see the results of the study showing which trees needed to be kept and which of the trees were actually kept? And who provided that determination?

- Two days following the dead and dying trees falling on power lines, Lennar had a rendering of a new plan for this buffer. Question: Are we supposed to believe that this was not the original plan that Lennar wanted to go with? That they did not intentionally keep trees that could be counted on the fall on power lines and, therefore, lead the City of Tualatin, and PGE, to determine they all needed removed?

I say this to make the following points:

- AKS cannot be trusted to advise on what should be done with the trees in a new development. If they are using their own Arborist, he/she needs to be fired.
- The City of Tualatin should be irate that Lennar and AKS conspired to remove all these trees. The fact that they went directly against the explicit requirement to maintain a Tree Preservation Zone requires action on the part of the City.
- For every project the City of Tualatin engages in with AKS, a neutral Arborist must be hired to ensure they do not pull another stunt like this one. We would also like to see a legitimate Environmental specialist assess the impact of removing trees in this area, so close to a freeway (for any future developments).
- We all would love for the City of Tualatin to no longer use AKS, or their recommendations, and find a more competent engineering company to advise the council. Or to refuse to work with any developer who is using AKS.
- Because we have zero trust in AKS, and any developer working with AKS, we ask that you reject the proposal for a zoning change to HR/HD for the 8 ½ acres on Norwood Drive. Nothing they say can be trusted as, clearly, they will say whatever they need to get an approval and then do whatever they want.

P.S.

It's been stated that we all live in a neighborhood that was once a forest. This is what it looks like to develop a neighborhood while respecting the environment and the trees that have stood for hundreds of years. This is our neighborhood!

Thank you for your consideration in this matter.

Subject: Annexation/proposed highrise on Norwood

Norwood road is currently a broken up mess. Daily we can't get out of our neighborhood to go east to 65th due to constant construction which appears from a new sign posting will continue til MAY!

Tualatin has already lost control of the current developer and the destruction he made of all the trees. The buffer zone is gone after losing those trees in a storm due to their destroyed root systems from removing acres of trees. This caused 2 day long power outages for our neighborhood from the first 2 winter storms.

We now have to look at the ugly water towers that used to be camouflaged by the trees and acres of land that will house hundreds of home equaling hundreds of cars pouring out onto Norwood.

Tualation decision makers having totally degradated our neighborhood. This is supposed to be the city of trees but you let developers clear cut acres of trees.

Now u want to open up more land on Norwood to another out of state developer who has only $ signs on their minds. They don't care anything about Tualation residents and their neighborhood.This means more clear cutting and cars on Norwood and more months of construction. And more degradation of our neighborhood.

If they want to build a high rise the perfect place is that deplorable corner on Tualation Sherwood and Boones Ferry. Residents of that high-rise would put people downtown walking to restaurants, shopping, grocery stores, mass transit and Tualatin Community park. It would enhance the look of downtown Tualation not add to the continual ruin of Norwood road and our neighborhood.

And while they r putting a high-rise on that corner of Tualation Sherwood they can go over to the long vacated Haden grocery store and build another highrise there. This would really add walking customers to the surrounding areas not more cars on our roads.

Subject:	Norwood High Rise Apartments Development

Greetings;

My wife and I attended the community/developer meeting last night.

Takeaways:

1. We have not one but 2 developments set to go in around Horizon Community Church--one a 500-unit subdivision with a mix of residential dwellings (presently underway), and the other a proposed 276-unit high-rise apartment development. Both, once completed, will add between 1,500-2,500 additional residents to a 38-acre area and as many additional vehicles contributing to the traffic congestion that is already bad at times. This number represents a 10% increase to our city's population on a disproportionately tiny piece of land
2. Other than the proposed aesthetic improvements to Norwood and to the access road to the south of the development, there will be zero additional lanes added to accommodate this huge influx of traffic
3. These apartments are Class A units that, while providing additional needed housing, will not satisfy affordable housing metrics, and there are no other apartment complexes within 1 mile as all the surrounding area is medium to low density residential

Questions:

1. What happens if the City of Sherwood decides to redraw the school district lines so that the area south of Norwood and east of Boones Ferry goes back into the Tualatin school district, effectively forcing the kids of all these households under construction presently and proposed into Byrom, Hazelbrook and TuHS?
2. Just a few years ago, we witnessed the 'improvements' made to Boones Ferry south of Norwood which made aesthetic and safety improvements but added zero lanes to accommodate the growing population. Why weren't lanes added at that time?

Input:

If you listened intently to the voices at that meeting, there was not a single NIMBY in the audience. My impression from the questions asked and input given was that we are for development of additional apartment complexes--both affordable and Class A--but we are not in support of locating them where they will erode the quality of life for Tualatin residents by contributing significantly to traffic congestion with no plans for adding lanes to accommodate the additional traffic or plans for further development of amenities like stores or expansion of schools.

I realize this matter has another side to it--tax revenue--which is always the case with proposed residential development. It can be very tempting to succumb to it as a city evaluating development options but there are other areas in Tualatin where a development of this kind would be appropriate. How about buying the old

Haggen's from the developer and rezoning it and the surrounding parking lot as high density residential? The WES commuter rail is right there, it's in downtown Tualatin with all its amenities and stores and it would offer quick freeway access. Or, how about rezoning some of the light industrial west of town with access to Tualatin-Sherwood road and its existing 4 lanes?

My family and I are very supportive of the development of additional housing; particularly as long as it's done in the appropriate area, but we don't have any desire to be another Beaverton or Hillsboro. Quality of life, a small population and access to the freeway were all major contributing factors in our decision to move here as a family 16 years ago. We will fight this development with everything we've got because it is inappropriate at its proposed location without adding traffic lanes to support the additional population growth. I would urge you not to give in to the temptation of the additional tax revenue of this issue because I (and I would suspect many people like me) are going to be paying attention to how you vote in the matter, and we will do our best to vote you out of office if you support it.

Sincerely,

Jason Bennett

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

Hello. My family and I have lived in Tualatin for 12 years and we are extremely concerned about a high-rise on Norwood. Traffic is already terrible and this will make it so much worse.

I agree with Norwood for Smart Zoning. A high-rise on SW Norwood Rd. is not in the public's best interest.

—-

Dear Assistant Community Development Director, Steve Koper;

We hope that you had an enjoyable, restful vacation, and you are refreshed with a clear mind.

We also understand that the planning department may be understaffed as there are many land use projects in the works.

In the meantime, the residents of Tualatin thought it would be helpful to assist you in preparing your presentation to council, regarding the proposed RH-HR plan amendment change on SW Norwood Rd.

If it is not already clear, this proposed change is not in the best interests of the public. Feel free to copy this image below and insert it in your presentation when it's ready.

We have at least 20 more reasons why this plan amendment change is a bad idea, but it was hard for us to summarize in a single slide as done for the Tualatin Heights apartment's plan amendment change.

For that specific project, as a reminder, it was recommended that the housing density increase 35% within the same area.

It is not in the public's interest to approve an RH-HR zone off of Norwood Rd.

We also wanted to remind you about all those residents that were extremely concerned about parking and traffic who currently live around Tualatin Heights. We also want to refresh your memory regarding the statements you made discussing traffic problems in Tualatin.

From the Tualatin's Transportation System Plan Update:

“Director Koper stated there is a lot of employment in our city that passes through traffic in relationship to I-5, which gives us a unique position relative to other cities. He stated it will be best for the City to work with DLCD and partners to find a solution to our traffic issues.”

We also hope you work together with the DLCD and the public works department to develop a comprehensive traffic plan that provides new road construction instead of just “meandering sidewalks” and bike lanes on Boones Ferry. We also hope the city would spend our bond tax dollars more wisely when looking at new land use projects, especially with the drastic escalation of housing projects in Tualatin.

If the city’s plan is to put infrastructure upgrades onto the private sector (developer), to save money, the result usually ends up hurting the city and the residents for decades to come. Developers usually find the lowest cost solution to appease local jurisdictions within their project boundary. Their focus is to develop the land they purchased at minimal costs and turn a profit. This also causes a lack of uniformity within each development, with very little possibility of a course correction for the city in the future.

We also do not think it is a coincidence that AKS engineering and Forestry’s office is located near Tualatin’s planning department.

When you review the partition, annexation, and plan amendment application with AKS, please also indicate to them, there is other buildable land within Tualatin if they just took the time to look. A simple five-minute search on Zillow found three plots currently for sale. We would also suggest that AKS inform their client of these properties that are very suitable for a high-rise development within the core. Overall, it seems like their client is more interested in profit than really helping our community…

Again, Mr. Koper and Council, say no to a high-rise on SW Norwood Rd.

Commit to building a central Norwood Park like we explain on our website and try to rectify the Autumn Sunrise debacle.

If housing is truly needed, keep the current zoning as RL or RML.

Have a Happy New Year,

Madeleine Nelson

Subject:	Proposed High rise development

To Whom it may concern:
I firmly believe the further development of the property along Norwood ave and Boones Ferry Rd creates mor issues than it will solve, chiefly among them is the increased traffic and resulting longer gridlock along those roads, traffic diverting through neighborhoods to try to avoid gridlock and the dangers that will bring with it, also since the city has determined that more affordable housing is needed, the proposed class A high rise will bring none of that it will only serve to raise rental prices in an already tight market.
thank you for your time
Jim Stuart
Tualatin resident and for 19 years

Per the TDC rules to approve a partition, the proposed application does not meet criteria and cannot be approved:

Per TDC 36.115 (1), THE PROPOSED USE MUST BE CONSISTENT WITH LAND USE ZONE. - The applicant identifies an intention to build high rise high density multifamily apartment homes, NOT CONSISTENT with the present land use zone: RML. The city would first need to approve different zoning before the partition application is approved.

The application does not meet criteria TDC 36.115(2)b: the plan is not consistent with residential design standards, which are defined as those for SINGLE FAMILY HOMES, TOWNHOMES, DUPLEXES, TRIPLEXES, AND QUADPLEXES. (TDC 73A.100).

Most significantly, the proposal in the application IN VIOLATION OF of TDC36.010, in that the proposal is not consistent with the provisions of the Tualatin Comprehensive Plan, Tualatin Community Map, and capital improvement plans. These plans make no reference to permitting high density high rise outside of the downtown development zone. Furthermore, the proposal identified in the partition plan violates the following Tualatin Comprehensive Plan Policies and Goals: POLICY 2.1.1 Encourage structures be planned in ways that relate to the site AND SURROUNDING CONTEXT. A high rise high density apartment is NOT 'in context' with institutional use zoning and RML zoning.

The proposed development involves removal of a forest, in violation of the following elements of the Tualatin Comprehensive Plan: GOAL 2.2 Promote the preservation and establishment of trees throughout the city, in order to protect and enhance the aesthetic character of Tualatin, protect and improve air and water quality, provide noise and visual screening, and protect habitat for wildlife. Even if a tree barrier is left, the destruction of a few acres of forest destroys significant wildlife habitat that would not be adequately replaced by a tree barrier strip. POLICY 2.2.1 Require the establishment and protection of street trees. POLICY 2.2.2 Promote the protection and establishment of trees during the development process. As this proposal involves AKS engineering, which has demonstrated disregard for these provisions in the Tualatin Comprehensive Plan through their work on the Autumn Sunrise subdivision, AKS cannot be trusted to adhere to these policies.

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

Dear Assistant Community Development Director, Steve Koper;

We hope that you had an enjoyable, restful vacation, and you are refreshed and ready to serve the best interests of our community!

We also understand that the planning department may be understaffed as there are many land use projects in the works.

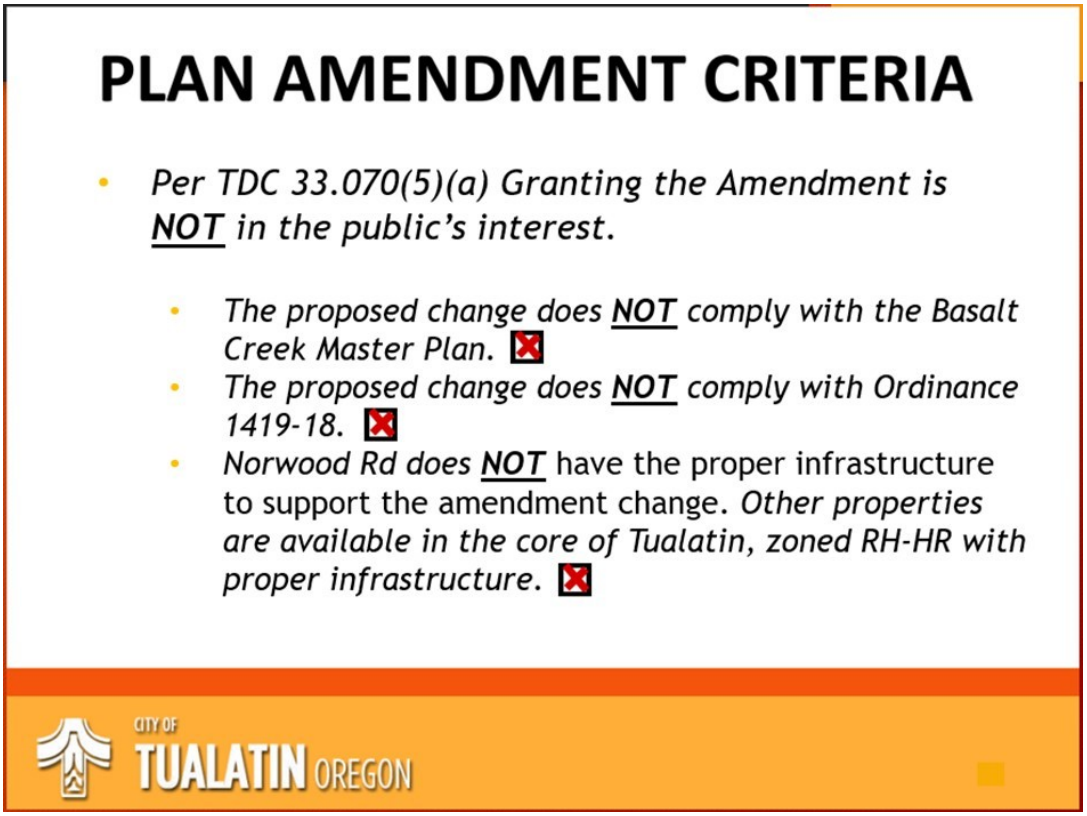
In the meantime, the residents of Tualatin thought it would be helpful to assist you in preparing your presentation to council, regarding the proposed RH-HR plan amendment change on SW Norwood Rd.

If it is not already clear, this proposed change is not in the best interests of the public. Feel free to copy this image below and insert it in your presentation when it's ready.

We have many more reasons why this plan amendment change is a bad idea, but it was hard for us to summarize in a single slide as was done for the Tualatin Heights apartment's plan amendment change.

For that specific project, as a reminder, it was recommended that the housing density increase 35% within the same area.

It is not in the public's interest to approve an RH-HR zone off of Norwood Rd.



We also look forward to you making the Norwood developer's application available to the public as soon as possible.

Thank you,

Joel Augee

Subject:	Attn Madeleine Nelson - I Oppose the Partition Application

Ms. Nelson,

Please be advised that I oppose the partition application. The intended use by the developer -- high rise, high density -- is totally inappropriate for this area, and is a massive overreach. The burden on traffic and infrastructure is inappropriate and would be harmful to existing residents, especially given the unknown impact of Autumn Sunrise and Pambeck Gardens.

At a minimum, I urge you to deny approval until the known impacts of those two developments is fully understood, meaning they are built out and we understand the impact on traffic and schools.

Most folks here would not be opposed to the partition if the development remained at current density, which is low to medium residential.

Thank you for your consideration of my input.

Joel Augee, concerned neighbor

Subject:	Proposed High Rise, High Density Development at Norwood and Boones Ferry

Dear Mayor Frank Bubenik, Tualatin City Council Members (cc Tualatin Planning Department Members),

I attended and listened to the presentation last night at the Tualatin Community Library by AKS Engineering and Vista Residential Partners regarding their plans to file multiple applications to develop the land at SW Norwood Rd. and SW Boones Ferry Road as high density high rise (the "Proposed Development").

As a resident in the Norwood Heights neighborhood, I am writing in opposition to the Proposed Development and ask that as stewards of Tualatin, you do the same. Consider the following:

1. High density high rise is absolutely not appropriate for this property. The impact it would have on those who live here, coming on the heels of the high density residential development known as Autumn Sunrise, is not acceptable to those of us who live in the surrounding neighborhoods. The side streets (Iowa Drive, Martinazzi, etc.) will be overrun with traffic avoiding an already over-congested Boones Ferry at peak hours. Imagine the increase after Autumn Sunrise and the 116 units of multifamily next to it, are built and occupied. There is no additional capacity for high rise apartments in this area.
2. You are stewards of Tualatin. The interests of those who live here matter and must be part of the equation. We have lived here for years, we pay taxes, we are volunteers, coaches … we are the community. We daily experience the functioning of our neighborhood, and we acutely understand and appreciate the impacts of new development. The representative of AKS said she took only into consideration the City's housing needs, and that the high rise zoning designation is necessary because of the housing crisis. She did not take into account the impact to and needs of existing neighbors. We take strong issue with this, and this is where you come in. No amount of "housing crisis" justifies allowing this concentrated, high rise density and the resulting impacts to Tualatin's livability. The housing crisis is absolutely not a justification to turn Tualatin into Portland-style density. If we wanted Portland style density we would have selected Portland to raise our families. Instead, we chose the lifestyle of Tualatin. Saying that the housing crisis means that high rise apartments are necessary here, without balancing the interest of those who live here, is simply a fallacy. How much would you degrade the Tualatin lifestyle in the name of more units? As stewards of Tualatin, you have the right, and a moral obligation, to consider the impacts on the community, and say no to excessive, harmful density. Keep the zoning as-is, medium residential.
3. A more appropriate use for this property would be a park. There was almost zero green space required of Autumn Sunrise. Every single interior tree was cut. The nearest park is Ibach. A walkable park from Norwood Heights, Autumn Sunrise, and Hedges Creek would be central, valuable and appropriate, and would counterbalance the impact of Autumn Sunrise's high density.
4. Alternatively, you could allow a rezone for neighborhood commercial, which is allowed under the Basalt Creek Plan (high rise is not). Day care, restaurant, small retail, an essentially walkable and central mixed use for the surrounding neighborhoods, would be welcome by many of the neighbors. That is what this area of Tualatin is sorely missing. It would be healthy and it would decrease car trips. Alternatively, keeping the "neighborhood commercial" tract all the way to the south, where it is currently located in the Basalt Creek Plan (along the future Basalt Creek extension), makes little sense, as it would be on the periphery of the neighborhoods and not central.

5. High rise zoning should be limited to downtown, and adjacent to rail. By far the most logical place for that type of high density, high rise, would be the former Haggen's. A mixed use town center would be appropriate and attractive at that location. At Norwood, that type of density and high rise makes no sense.

Thank you for your continued consideration of these very important matters,

Joel Augee
8905 SW Iowa Drive

Subject:	No high-rise on Norwood! Long Term Expansion of the Urban Growth Boundary is the Answer

To Tualatin City Council,

I am writing to reiterate my strong opposition to the pending application for high density, high rise zoning of the 8.2 acres along Norwood Road, and share some thoughts on what you can do as stewards for this community.

The developer's engineers, at the community meeting, scolded us and told us that we need this high density to solve the housing crisis, that it is necessary because of Oregon's land use laws. That is simply false. Do not believe that false narrative. We do not need to harm our livability for this crisis. This crisis was caused by the lack of long term planning, and in particular, lack of reasonable expansion of the urban growth boundary over time. In short, it was caused by long term neglect. If you want to solve it, this requires a long term effort and commitment to do so, through smart planning. These problems were not created in an instant, and cannot be solved by knee jerk reactions. I suggest that you need key goals to guide you in your long term planning, to do it in a smart and reasonable way, and that the #1 goal should be not to harm your current citizens (note: I am not saying no impact, but I am saying no harm), and this means, not changing the nature of our density. Tualatin (and other cities) CAN expand the urban growth boundary AND NOT increase density. I suggest this should be the long term, reasonable goal and approach, as it is best and fair for all. So please, work on long term planning that preserves livability by maintaining, and not destroying, current, reasonable density. For example, if housing is the primary need, then consider changing some of the zone in Basalt Creek to medium/low density residential (from industrial).

Jamming a high rise apartment complex, with all the traffic impacts that it will entail, on top of the new subdivision (Autumn Sunrise) and the upcoming new apartment complex (Plambeck Gardens) is not responsible or reasonable, and as stewards of our community, I ask that you reject it. Frankly, this is not even a close call or a tough decision. Since the 2019 housing study, we have already met approximately 80% of the City's new housing needs for the next 20 years! There is no need to panic, no need to jam a high density, high rise apartment complex in our neighborhood. Frankly, the idea of changing zoning to high density, high rise is a massive overreach, and a clear attempt to capitalize on the fear of the moment regarding housing. After it is built, what can be done then if it is a big mistake? Think about that question .... what can be done? Will the developer remain somehow accountable? We know the answer. The residents will be stuck with 100% of the impacts, while the developer leaves with 100% of its profits. This is nothing against developers per se .... we need them, we should be grateful for good development, and we need smart development, to reasonably grow our City. But when a developer proposes an obvious over-reach, we also need to say no to the zone change, and demand smart zoning.

Again, please think big picture. Expand the urban growth boundary reasonably and preserve our density and livability in the process. Do not jam high density into our neighborhoods. That is not the nature of Tualatin, nobody would win, and it would create a whole host of new and expensive problems, both seen and unforeseen, leaving only the residents to endure the fallout.

So what about the location in question? Use it as a park -- that would be really welcome. There is almost zero green space required of Autumn Sunrise (and in this way, you can make up for that planning disaster). An important note on that, and community trust: We have no confidence in the planner after he has allowed the strip of trees to remain along Norwood, repeatedly knocking out our power at least 10 times. That trust was lost a long time ago. And now the trees are gone too. It is a failure and a joke from a planning perspective. Look, it isn't rocket science -- an arborist should have been required to determine whether it is wise to keep shallow rooted trees along power lines after you remove the protective forest. I hear that the plan was for the developer to put the power lines under ground at a later point in time, AFTER the forest was removed. Brilliant! But how about reversing that sequence? How about putting the lines underground FIRST, and THEN cutting down the forest. I think if you asked a 5th grader which was the proper sequence, you would have gotten a better answer. If we felt the City of Tualatin cared about our neighborhood, and our livability, that obvious sequence would have been a condition for Autumn Sunrise. Apparently it wasn't.

Say no to high density high rise. If the developer wants to keep the current zoning, that is fine, although we think a park makes far more sense. Absent a park, neighborhood commercial would be smart zoning and would be welcome by many. Lastly, again, keep the zoning the same and do not increase density. Homes and duplexes could be built in the proposed location at the same density as surrounding neighborhoods.

Thanks,

Joel Augee, concerned citizen near Norwood Road

To: Madeleine Nelson
Subject: Norwood Developments

Hello Madeleine,

First, thank you for serving the public. I can empathize that it's a very tough occupation where everyone seems to bark and complain without offering solutions.

I wanted to share some concerns and possible solutions that I have about the Norwood HR/rezoning effort being put on the table. We (my wife and two small kiddos 7 Ellie & 3 Clark) live at 9345 SW Stono Dr, and our house faces the south - right across the street from where this project is located. I'll include a screenshot as well.

We're very concerned about the impact of traffic around the intersection of Boones Ferry and Norwood. I'm cognizant of the traffic light going in there, which is fine, but hundreds more vehicles along these single lane roads doesn't add up to safety. Couple that with the already halfway through Autumn Sunrise (Plambeck Gardens as well), and it's a tidal wave that we can see coming - and preemptively do something about.

This parcel of land would serve better as a community gathering place or park, where kids and families of all abilities can enjoy. A splash-pad, a ADA play structure, a sand pit, an outdoor stage/auditorium for arts. Just a few suggestions for the acreage. Even a small market, coffee shop, or other small family-forward establishment

would be a better improvement for this spot of land. This is also potentially important due to Lennar Homes developers not saving some space for a future park for Autumn Sunrise either!

I understand that Horizon Christian wants to sell this *donated land* so they can build an auditorium. But at what cost to the adjacent neighborhoods? Collectively, Norwood, Victoria Woods, 65th Communities and more are staring at these rapidly implemented projects with very wary eyes. I'm also curious to know how much the Church in question financially helps the city of Tualatin in general. The Church has disregarded their neighbors after a few of us have asked them for a more positive community-forward solution.

We encourage having more housing because people need places to live - and more affordable places at that. We don't think that a semi-luxury high rise condominium is a smart decision for the sleepy intersection and surrounding family-oriented neighborhoods. A much better alternative spot for housing would be the area around the WES station. Right next to transit, not in a food desert, bicycle friendly, and many other close by amenities.

The retail space just sits, unoccupied, because the owner isn't helping/improving the city of Tualatin and they haven't done anything to the space in a very long time. Is there a way to talk with the landowner and persuade them to improve the area or have that be zoned for HR Residential instead? Make much more sense in many ways.

We moved from NE Portland down here for my work in Tualatin and the safety of our kiddos. We LOVE it here. Our neighborhood and our immediate community are wonderful. With these 2-3 projects developing or coming soon, it seems just so out-of-place to put a 7 story high-rise in a maximum 2 story area - with no walkable food options among others.

Please represent us, the current constituents of South Tualatin, in opposing this rezoning effort. Value smart growth instead of a permanent high-density project - for everyone currently living here.

If you have any questions, please let me know.

Many Thanks for your time,

Jon Wong

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Julia Olson

Madeleine Nelson

Subject:	Proposed text amendment in Partition Application: par22-0002-23370

Hello,

The current text amendment proposal can catastrophically alter the future of development in our city.

Please consider the consequences of approving the proposed text amendment in Partition Application: par22-0002-23370! If approved, developers could create high-density high-rise apartments anywhere in Tualatin. This is a lazy text revision that opens all of Tualatin up to potential high-rise development.

High-density high-rise apartments in Basalt Creek are not beneficial to current or new residents. Traffic will already be severely worsened with existing developments and will be further exacerbated by more high-density housing in an area of town where all residents have to be car dependent.

Instead of allowing space to be zoned high density high rise, instead consider allowing areas outside of downtown to be rezoned to mixed use residential/ commercial. If properties are constructed in the basalt creek area that have ground floor stores, restaurants, or groceries, residents in the area are less car dependent. A mixed use residential commercial zoning definition could also include a more appropriate height cap when properties are being developed outside of the downtown urban renewal area, such as a hard limit of 4 stories for mixed use commercial residential property.

A more ideal use of this property for Horizon, developers, current residents and new residents, are buildings with ground floor commercial space, with a lower number of residential units. This increases walkability and provides local options where residents do not have to drive 2 miles or more for any goods or services. South Tualatin needs more commercial opportunities and community gathering space. This property could be developed in a way that meets community needs, and still enables Horizon and developers to profit.

Following is a quote from the application highlighting that the text amendment request is to enable RH-HR to be built anywhere in the city:

"In conjunction with the Partition and Annexation applications, a Plan Map Amendment will be submitted to the City that will apply the High-Density High Rise (RH-HR) zoning district to the new ±9.2-acre site on SW Norwood Road (this ±9.2-acre site combines Parcel 2 of the subject Partition Application and adjacent Tax Lot 108, as described above). Currently, the RH-HR zoning district is defined as a specific area within the City's Central Urban Renewal Area. A Text Amendment to the Tualatin Development Code (TDC) will also be submitted that modifies the TDC's RH-HR language to allow the zoning district to be applied elsewhere in the City.

Allowing RH-HR zoning to be applied anywhere in the city would be disastrous to Tualatin. A more appropriate text amendment would add a specific site or parcel to the current definition of

limiting the code to the City's Central Urban Renewal Area, so the text revision does not create a carte blanche for high rises to be built all over the city!

The Byrom CIO does wants to see development to the South be enhance the quality of life for current and future residents and businesses. Please consider the negative impacts of only enabling more high-density housing in an area where residents must drive for all basic needs!

Julie Heironimus
Byrom CIO Interim Vice President

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning A high-rise on SW Norwood Rd. is not in the public's best interest

Dear Steve Koper and council,

We hope that you had an enjoyable, restful vacation, and you are refreshed with a clear mind.

We also understand that the planning department may be understaffed as there are many land use projects in the works.

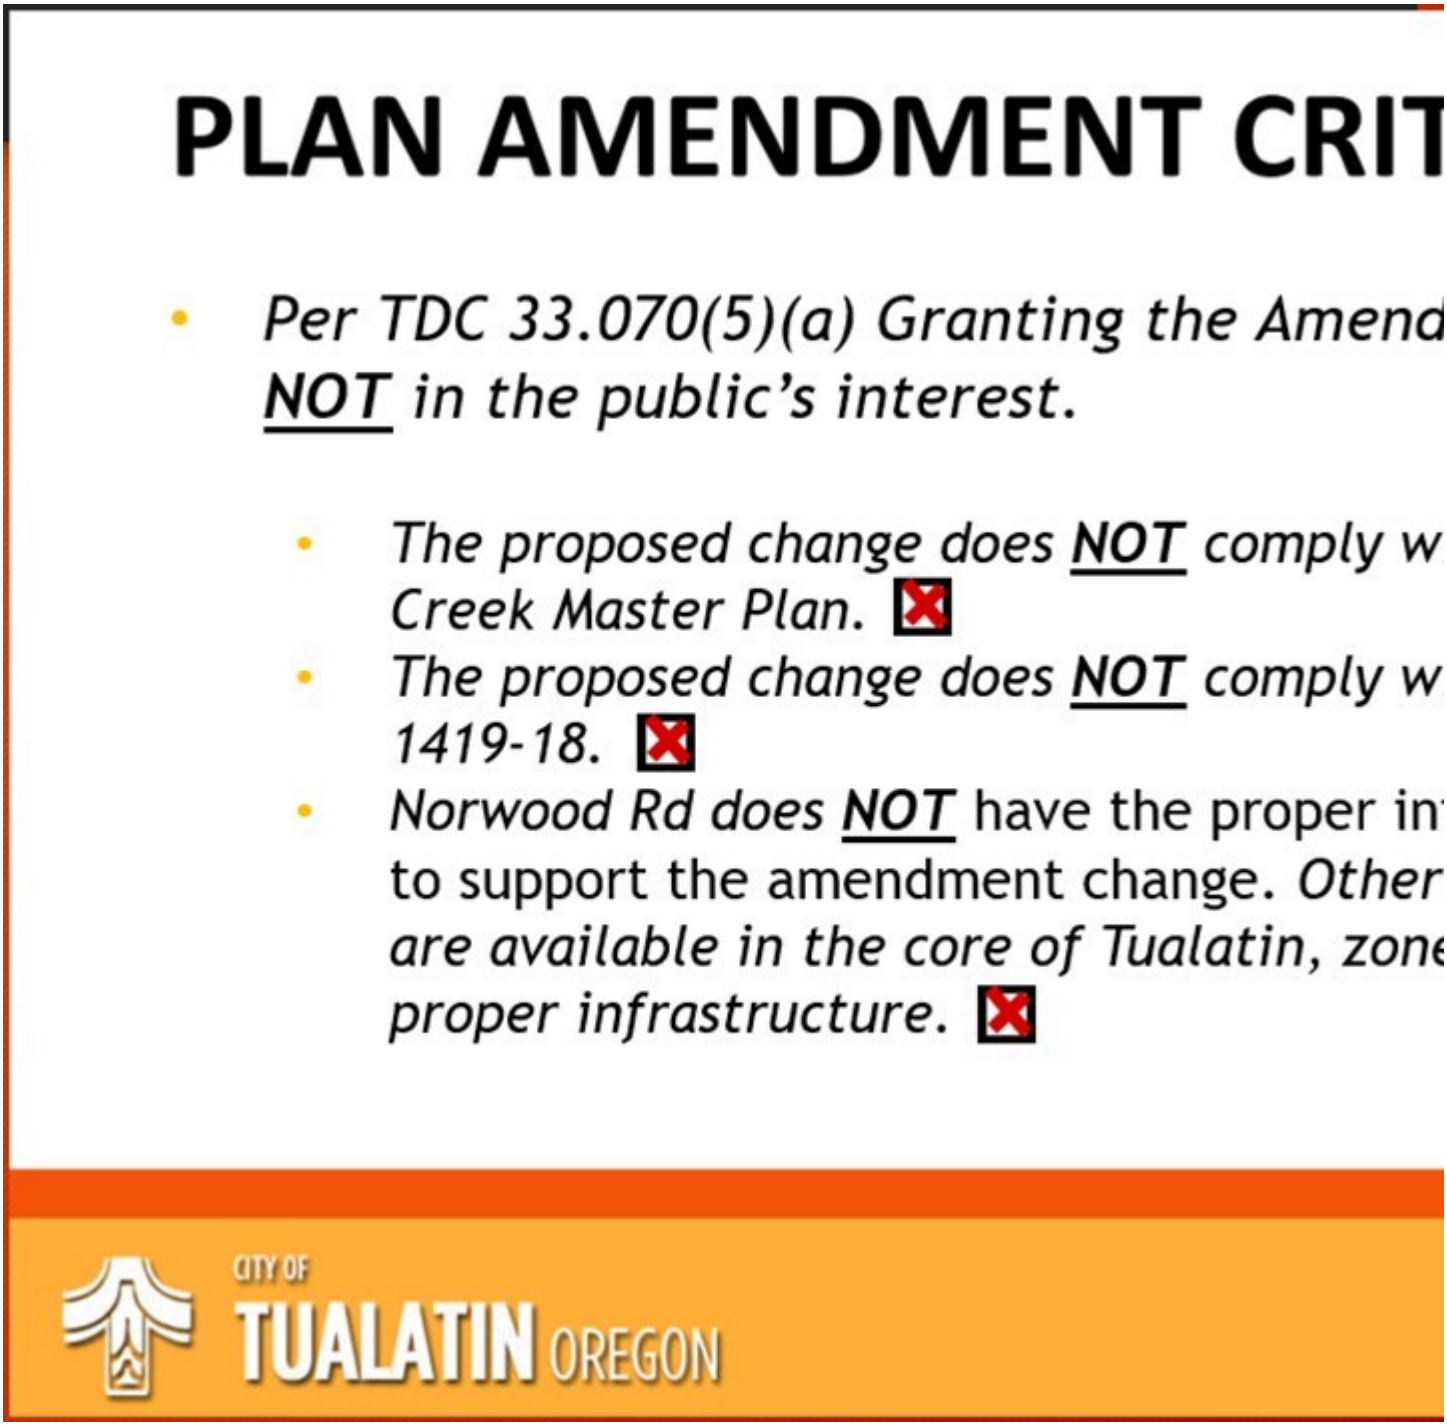
In the meantime, the residents of Tualatin thought it would be helpful to assist you in preparing your presentation to council, regarding the proposed RH-HR plan amendment change on SW Norwood Rd.

If it is not already clear, this proposed change is not in the best interests of the public. Feel free to copy this image below and insert it in your presentation when it's ready.

We have at least 20 more reasons why this plan amendment change is a bad idea, but it was hard for us to summarize in a single slide as done for the Tualatin Heights apartment's plan amendment change.

For that specific project, as a reminder, it was recommended that the housing density increase 35% within the same area.

It is not in the public's interest to approve an RH-HR zone off of Norwood Rd.



We also wanted to remind you about all those residents that were extremely concerned about parking and traffic who currently live around Tualatin Heights. We also want to refresh your memory regarding the statements you made discussing traffic problems in Tualatin.

From the Tualatin's Transportation System Plan Update:

"Director Koper stated there is a lot of employment in our city that passes through traffic in relationship to I-5, which gives us a unique position relative to other cities. He stated it will be best for the City to work with DLCD and partners to find a solution to our traffic issues."

We also hope you work together with the DLCD and the public works department to develop a comprehensive traffic plan that provides new road construction instead of just "meandering sidewalks" and bike lanes on Boones Ferry. We also hope the city would spend our bond tax dollars more wisely when looking at new land use projects, especially with the drastic escalation of housing projects in Tualatin.

If the city's plan is to put infrastructure upgrades onto the private sector (developer), to save money, the result usually ends up hurting the city and the residents for decades to come. Developers usually find the lowest cost solution to appease local jurisdictions within their project boundary. Their focus is to develop the land they purchased at minimal costs and turn a profit. This also causes a lack of uniformity within each development, with very little possibility of a course correction for the city in the future.

We also do not think it is a coincidence that AKS engineering and Forestry's office is located near Tualatin's planning department.

When you review the partition, annexation, and plan amendment application with AKS, please also indicate to them, there is other buildable land within Tualatin if they just took the time to look. A simple five-minute search on Zillow found three plots currently for sale. We would also suggest that AKS inform their client of these properties that are very suitable for a high-rise development within the core. Overall, it seems like their client is more interested in profit than really helping our community…

Again, Mr. Koper and Council, say no to a high-rise on SW Norwood Rd.

Commit to building a central Norwood Park like we explain on our website and try to rectify the Autumn Sunrise debacle.

If housing is truly needed, keep the current zoning as RL or RML.

Have a Happy New Year,

Norwood for Smart Zoning
--

Thank you.

Subject: “SW Norwood Road Partition” File No. PAR22-0002 OPPOSITION

Follow Up Flag: Follow up
Flag Status: Flagged

Planning Division
Attn: Madeline Nelson
mnelson@tualatin.gov

Dear Ms. Nelson,

I wish to state my objections in writing to “SW Norwood Road Partition” File No. PAR22-0002. The planned high-density high-rise is not a smart choice for this location. Here’s why:

- increased traffic congestion in one small area
- the City's lack of planning to accommodate the immediate increase in traffic
- zoning changes to a suburban residential area before the Tualatin Central Urban Renewal District is built up make no sense
- lack of a coordinated Basalt Creek master plan amongst the various developers and the City
- Class A high-density high-rise apartments do not meet the Governor's mandate for effectively reducing houselessness
- Tualatin residents' have opposed developments in this area for months but the City has allowed them to move forward regardless
- This partition opens the door to high-rises ANYWHERE in the City!

We have zero trust in AKS, and any developer working with AKS. We are asking that these changes for the 8 ½ acres on Norwood Drive be soundly rejected. Nothing AKS says can be trusted as, clearly, they will say whatever they need to get an approval and then do whatever they want.

Let's do the right thing for the city of Tualatin residents! Let's not let developers from out of state and AKS dictate our future!

I oppose "SW Norwood Partition" File No. PAR22-0002!

Julie Heironimus

As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind. Preserve Tualatin's livability!

Subject: Power outage on Norwood Road

Hello, With today's power outage on Norwood due to a tree falling on a power line once again it made me wonder about what infrastructure improvements have been proposed for the new Autumn Sunrise development. This would be an ideal time to bury those power lines on Norwood. Routinely half of our neighborhood to the north loses their power anytime there is a storm. Please consider this much needed improvement. Thank you. Julie Heironimus 22710 SW 90th Pl, Tualatin OR 97062

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

Hello city representatives,

I would like to express my opposition to the high rise-zoning proposal by AKS Engineering & Forestry.

It is clear that our infrastructure on Norwood does not have the capacity to accommodate the amount of traffic congestion this proposal will create. It is simply not fair to the residents who live here, especially when there are other, smarter options for this type of "vision" in downtown Tualatin. Old Haggen's parking lot is a perfect place for this type of project - mixed use commercial/residential in downtown Tualatin, close to public transit. Traffic is already a nightmare. People who live in southern neighboring cities are utilizing Boones Ferry as a thoroughfare and traffic byTualatin Highschool has already become a safety concern. Vehicles speed through the school zone every day and often show no regard for students attempting to cross the street. Peak traffic hours are already over capacity along Norwood and Boones Ferry - this is prior to the further vehicular congestion Autumn Sunrise development will bring. Adding High Rise apartments on Norwood is just not well thought out.

I hope you consider the mentioned concerns. thank you,

Junior Carbajal

Subject: Concern for new development

Follow Up Flag: Follow up
Flag Status: Flagged

Hello There,

I am writing you to express my concern regarding the possible zoning change for the property that Horizon Community Church currently owns. We live in Victoria Woods and as it is we can barely get out of our neighborhood. If we are turning left it can take up to 5 minutes to get out. I understand there is nothing that we can do about the Autumn Sunrise development as the work has already started. However, I do not think it is right of the City of Tualatin to rezone these properties to high density housing. Adding an additional 300-400 residences on top of the Autumn Sunrise development is not going to work unless the City and County plan to upgrade the infrastructure of Boones Ferry Rd. At 5pm traffic is backed up from North Wilsonville past Tualatin High School. Its already a nightmare. I cannot imagine how unsafe it will be if an additional 300-400 residences (apartments) are added to this part of town.

My family is part of the Horizon Church community. My kids attend school there. They have not been forthcoming with the information that they have sent out to their congregation. And I think it is extremely unfair that they have asked their "community" to submit emails to the city in support of the zoning change. These are not people who reside in the community or on this side of town. This benefity Horizon financially and does not benefit the neighbors one bit. If anything this will bring down our property values and add more crime to the area.

Tualatin is already so hard to get to and it is my fear that business will not want to move into Tualatin if we continue to grow and create more traffic and less traffic revisions. Approving this change really demolishes the safety as well as community feel of this part of town. We are begging you as neighbors to this property to not change the current zoning. We will already be impacted tremendously by the Autumn Sunrise development. And would appreciate it if our voices are heard and taken into consideration. I am begging you to listen to the residents of Tualatin and not the congregation of the church. They do not have to deal with the daily traffic, crime, and development.

Our address is 22545 SW Miami Drive

Thank you very much,

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I have lived in Tualatin for the past 7 years and I have stayed here because it still has a small town feel nestled in the forest. I own two properties here and am very invested in the future of this little oasis. I am saddened at every tree felled as we learn so much about the importance of the age and maturity of the woodlands to our lives. It would be a tragic to lose old growth forest, of all things. While I'm not sure that downtown is the place for a highrise either, citing traffic and future plans of Tualatin's own to revitalize the area, and proximity to the park and woods along the river, it seems like there are definitely opportunities that don't sacrifice our precious, unreplaceable, non-renewable old growth forest. Thank you for your attention to the concerns from the community in keeping Tualatin the City of Trees.

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Liberty Wright

Subject: Rezoning in Tualatin near Norwood

Attn: Madeleine Nelson

Hi,

My name is Linda Kennedy and I am a long time resident of over 40 years and have lived in 2 different neighborhoods in Tualatin. I want to make sure that the neighborhoods stay safe and enjoy the livability that we have enjoyed for so many years. Please hear those who have spoken so well and done so much work to bring up essential information that points out how bad traffic and commuting issues will get if high density zones are allowed on Norwood and Boones Ferry roads. Put the 4 story apartments downtown closer to adequate transportation areas.

Thank you for listening and considering our Neighborhood.

Linda Kennedy

Subject: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

My husband and I are long time residents of this fine city (since 1981) and have purchased two homes here and raised our three children here. We have seen many changes and improvements, but the high density re-zoning on the south side of Norwood Road just does not help our city!

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. Subject: high rise zoning notice

Hi,
I am writing to say I appose the approval of the high rise that is proposed at the corner of Norwood and Boones Ferry road. Why would this be changed from a low rise to a high rise? The Lennar development has already shown how many trees were lost that were not part of the project and all the power outages. The Lennar development is not bringing any road improvements and the 500 homes are going to drastically increase traffic on Boones Ferry Road and 65th that will even be worse if a high rise goes in. It changes the landscape and livability in Tualatin. I understand the need for more housing by the location of the proposed high rise is not a good location. A low rise would fit in much better given the overall landscape of that area and protect what little farm land there is behind horizon. Seems like this is a bate and switch buy getting a low rise approved and now pushing for a high rise.

Subject:	Re: Proposed Partition on Norwood (PAR 22-0002)

Hello,

First, thank you for your work for our city. I know that it's often difficult to find solutions that work well for all parties involved and can be exhausting and frustrating to hear from unhappy people routinely. My husband and I have been residents here since 2007 and just finally were able to buy our first house in the Dakota Hills neighborhood (near Norwood) February 2022. We love this city and our neighborhood and while I understand and accept that growth and change is necessary and can even be good, I really believe the plan to annex, rezone, sell and develop the proposed Parcel 1 is not in the best interest of our city or community and the partition request should NOT be approved.

My primary concern is that I don't believe that the roads in the area can safely handle the significant increase in traffic that a high density multifamily apartment complex will bring (especially since we have yet to see how the traffic will be impacted by the new Autumn Sunrise neighborhood). I believe the congestion the extra traffic will create will significantly impede the response times of emergency vehicles. Additionally, the walkability from this location is not safe for residents to be able to get to grocery stores, work or other places, and while I understand there are plans in place to address some of the traffic/walkability needs (a traffic light at Norwood and Boones Ferry) I do not believe this will be sufficient and I do believe we will see traffic accidents due to the high density of additional vehicles on the road and pedestrians in the area.

While I understand the need for more affordable housing (and absolutely agree with it) I do not believe this will meet the goals for providing affordable housing. In my experience as a property manager, units in buildings such as these are rarely rented at affordable rates (unless they are designated as affordable housing through a HUD or similar program). And because they tend to be owned by investors there are typically significant rent increases annually which leads to significant turnover and ultimately does not meet the goal of the city to maintain healthy community relationships. To help address the affordable housing need I would love to see our city work with some place like Washington County Housing Department or similar and look into options to provide actual affordable housing instead of more high cost apartments. The folks who will be able to move into this type of apartment are not likely to be the folks who are in need of affordable housing as most rents for such apartments start close to $1,900/month or more these days. That's as much as, if not more, than many people's monthly mortgage payment and is certainly not affordable.

Finally, there are a number of areas in which the proposed partition does not meet city criteria and therefore it should not be approved. Please see below for more details.

Per the TDC rules to approve a partition, the proposed application <u>does not meet criteria and cannot be approved:</u>

Per TDC 36.115 (1), THE PROPOSED USE MUST BE CONSISTENT WITH LAND USE ZONE. - The applicant identifies intention to build high rise high density multifamily apartment homes, NOT CONSISTENT with the present land use zone: RML. The city would first need to approve different zoning before the partition application is approved.

The application does not meet criteria TDC 36.115(2)b: the plan is not consistent with residential design standards, which are defined as those for SINGLE FAMILY HOMES, TOWNHOMES, DUPLEXES, TRIPLEXES, AND QUADPLEXES. (TDC 73A.100).

Most significantly, the proposal in the application IN VIOLATION OF of TDC36.010, in that the proposal is not consistent with the provisions of the Tualatin Comprehensive Plan, Tualatin Community Map, and capital

improvement plans. These plans make no reference of permitting high density high rise outside of the downtown development zone. Furthermore, the proposal identified in the partition plan violate the following Tualatin Comprehensive Plan Policies and Goals: POLICY 2.1.1 Encourage structures be planned in ways that relate to the site AND SURROUNDING CONTEXT. A high rise high density apartment is NOT 'in context' with institutional use zoning and RML zoning.

The proposed development involves removal of a forest, in violation of the following elements of the Tualatin Comprehensive Plan: GOAL 2.2 Promote the preservation and establishment of trees throughout the city, in order to protect and enhance the aesthetic character of Tualatin, protect and improve air and water quality, provide noise and visual screening, and protect habitat for wildlife. Even if a tree barrier is left, the destruction of a few acres of forest destroys significant wildlife habitat that would not be adequately replaced by a tree barrier strip. POLICY 2.2.1 Require the establishment and protection of street trees. POLICY 2.2.2 Promote the protection and establishment of trees during the development process. As this proposal involves AKS engineering, which has demonstrated disregard for these provisions in the Tualatin Comprehensive Plan through their work on the Autumn Sunrise subdivision, AKS cannot be trusted to adhere to these policies.

Thank you for your time and attention to these concerns! Your work is appreciated.

Best,

Liz Rockwood

Subject: Attn Madeleine Nelson - I Oppose the Partition Application

From: Maria Lathrop
9265 SW Iowa DR. Tualatin

I strongly oppose the partition. This area of Tualatin does not have the infrastructure to support this many new dwellings. Traffic is already so backed up on Boones Ferry. We hardly have any parks that serve this area of Tualatin. Before any developments are made the city of Tualatin needs to improve current conditions. We are really falling behind other cities in terms of livability. Please do not make it worse.

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik,
I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

I have lived in Tualatin for over twenty years. I would like to stay a lot longer but am very concerned about this develpment and how it will effect the quality of life here.

Thank you.

Madeleine Nelson

Subject: SW Norwood Rd. Partition 22-0002

Hi Madeleine,

I am writing in opposition of the sw Norwood rd partition.

I live near Norwood rd. and we have an immense amount of development going on near our Tualatin community with Autumn Sunrise and Plambeck Gardens. We do not have the infrastructure to support this extreme amount of growth in such a short time. Our roads, public transit, emergency services, and community spaces cannot support the growth. On top of the development already occurring, there is now another development being pushed through increasing our population even more.

One of the big reasons I enjoy living in Tualatin is because of the beautiful trees. Many of the gorgeous trees have been removed and the once beautiful forest off Norwood is gone. The trees that are left and the open space left is now being petitioned to be a high rise.

When I purchased my home in Tualatin, I did not expect to be living near extremely dense housing and a high rise. The parks are already heavily used and the new development has very little open space for the residents.

Please preserve some of what I enjoy about living in Tualatin and do not allow this partition to occur.

Sincerely,

Marissa

Subject:	Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the

Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,
Matt Majewski

Subject:	no high rise on norwood

My husband and I are strongly opposed to the idea of allowing a high rise apartment complex to be built on Norwood. I have read the input from Mr. Cobb and agree with his understanding of why this should not be allowed. We also feel that the city government has not done adequate planning for any type of new housing in this area. From what we have leaned there are no plans for additional police. We moved into our house on Stono 25 years ago. I can remember a patrol car driving through the neighborhood several times a week. I have not seen that type of community policing in years. Traffic is also a problem and we do not hear any type of planning from the city government about how traffic management, I watched a video and read a letter from the mayor. I believe they were both from 2021. I understood him to say he wanted all the available land in Tualatin filled with housing because he wanted a "vibrant and diverse community." You do not get a vibrant and diverse community just by building houses. We would as the city government to stop the growth and plan for this current community to be vibrant and diverse.

Michael and Sherie Ostrowski

9370 SW Stono Dr

Tualatin

Per the TDC rules to approve a partition, the proposed application does not meet criteria and cannot be approved:

Per TDC 36.115 (1), THE PROPSOED USE MUST BE CONSISTE WITH LAND USE ZONE. - The applicant identifies intention to build high rise high density multifamily apartment homes, NOT CONSISTENT with the present land use zone: RML. The city would first need to approve different zoning before the partition application is approved.

The application does not meet criteria TDC 36.115(2)b: the plan is not consistent with residential design standards, which are defined as those for SINGLE FAMILY HOMES, TOWNHOMES, DUPLEXES, TRIPLEXES, AND QUADPLEXES. (TDC 73A.100).

Most significantly, the proposal in the application IN VIOLATION OF of TDC36.010, in that the proposal is not consistent with the provisions of the Tualatin Comprehensive Plan, Tualatin Community Map, and capital improvement plans. These plans make no reference of permitting high density high rise outside of the downtown development zone. Furthermore, the proposal identified in the partition plan violate the following Tualatin Comprehensive Plan Policies and Goals: POLICY 2.1.1 Encourage structures be planned in ways that relate to the site AND SURROUNDING CONTEXT. A high rise high density apartment is NOT 'in context' with institutional use zoning and RML zoning.

The proposed development involves removal of a forest, in violation of the following elements of the Tualatin Comprehensive Plan: GOAL 2.2 Promote the preservation and establishment of trees throughout the city, in order to protect and enhance the aesthetic character of Tualatin, protect and improve air and water quality, provide noise and visual screening, and protect habitat for wildlife. Even if a tree barrier is left, the destruction of a few acres of forest destroys significant wildlife habitat that would not be adequately replaced by a tree barrier strip. POLICY 2.2.1 Require the establishment and protection of street trees. POLICY 2.2.2 Promote the protection and establishment of trees during the development process. As this proposal involves AKS engineering, which has demonstrated disregard for these provisions in the Tualatin Comprehensive Plan through their work on the Autumn Sunrise subdivision, AKS cannot be trusted to adhere to these policies.

Subject:	Planning Division, Attn: Madeleine Nelson

Hello my name is Michaela Zacher and my family and I have been living in our home, located at 9325 SW Quinault Lane, Tualatin, for over a decade now. I want to state my objections in writing as opposition to the partition application areas "SW Norwood Road Partition" File No. PAR 22-0002 by AKS Engineering and Forestry LLC.

A high-density high-rise is not a smart choice for the location. Below are only SOME of the reasons I'm objecting to both of these proposals:

- A high-rise apartment building will have a negative impact on my neighborhood's property values. Never in my career, have I seen a high density high-rise next to a single dwelling property, increase its property value the same way a detached home surrounded by other detached homes would. An apartment building will, however, create a less desirable location for a buyer looking to purchase a single dwelling home in Tualatin.
- Lack of city planning to accommodate a significant increase in traffic
- Zoning changes to a suburban residential area before the Tualatin Central Urban Renewal District is built up makes no sense
- Lack of a coordinated Basalt Creek master plan amongst the various developers and the City
- Class A high-density high-rise apartments do not meet the Governor's mandate for effectively reducing houselessness
- There are designated areas in Tualatin that are already zoned for this kind of development. Why are these areas not being utilized???
- Tualatin residents' have opposed developments in this area for months, but the City has allowed them to move forward regardless. It's time to take matters into the residents' hands! We can no longer rely on the City to make choices for us.
- <u>This partition opens the door to high-rises ANYWHERE in the City!</u>

We know that this partition is <u>just a step in the process</u> and if the City does not oppose, it opens the door for AKS and other developers to proceed through this process of re-zoning.

Thank You,

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone

change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Michaela Zacher

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

My husband and I are against a change in zoning to allow high rise apartments to go in on Norwood. We feel there is sufficient new apartment complexes on Nyberg and sufficient new housing with the Autumn Sunset mega development. We feel there is not enough planning regarding infrastructure, especially police and traffic control. We would like to see a moratorium on new building until these two large projects have been around for a few years.

Madeline Nelson,

My name is Patricia Galver and I live at 22995 SW Vermillion Drive in Tualatin. I am the corner house at the intersection of Norwood and Vermillion and the Autumn Sunrise project is 2 lanes of traffic away from my house, which means every window of my house looks into this project. I received the blue post card with details of the apartment complex project and I don't believe it should proceed. I am living through an incredible mess here and not one house has been built yet. No one seems to have any oversight over this project and no one seems to care with what we are putting up with up here. I have addressed several people, including the mayor and the city council several times and the project manager. Currently, I have tried to get in contact with the Lennar project manager and the Tualatin manager and haven't heard from either.

Firstly, the noise is incredible-I am thinking of hiring a sound specialist to check the decibel levels-no one in the city can seem to respond to this level of noise. Several people who have come to my house have had to yell at my front door and say "How can you stand this?". It goes on 6-8 hours a day.

Secondly, my house has turned into the spare parking lot for the project. Since day 1, I have had as many as 3 trucks/cars each day parking there, but no where else on the street-I have many photos to back this up. The mayor told me this wasn't supposed to happen- but I'm the one who has to be Karen and several workers have been incredibly obnoxious about it. I had one worker who had his Malamute dog in his truck and at lunchtime, he was eating lunch on the tailgate with his dog running around my front yard. I'm tired of no one backing the community up.

Thirdly, where are the trees? This was promised at all the talks pre-project, that they would preserve as many as possible. Oops, we took them all down. I know they paid a big fine-where did that go? I have no shade in my yard and we now have a wind tunnel that comes down the hill and right into our houses. From my living room, I now have a view of every car on the freeway, and the noise is so bad, it's almost impossible to use our front bedroom. I hear freeway noise 24 hours a day. I didn't buy a house on the freeway, but I have one now. There are only 2 houses that actually look into this site, mine is one. My front yard and the whole side of my house face the project. I also have a new view of the water towers and the high school.

Fourthly there has been minimal oversight here, and when there is a problem, no one wants to address it-I've heard lots of "man-splaining " but none solves the problem, we're just supposed to suck it up. Traffic issues haven't been addressed, tree issues haven't been addressed, no one has ever asked the residents how things are going, what issues need to be addressed. For example-when we had all the wind/rain after Christmas, there were 3 trees behind my fence that were badly leaning-2 were on the edge of the street, beyond the sidewalk on Norwood. They were pushing the tree behind my fence so that it was falling over. I called the city-they looked at it but it wasn't "their" tree. They gave me the county's number-because it wasn't in the street yet or on a power line, they weren't going to do anything. By the next day they were leaning so badly, that I paid to have them taken down at my expense-ridiculous. I have a window on the construction side of my house that has separated the frame from the glass which was noted. My neighbor directly across from me also has a new broken window on the same side of his house and both started when they were using the huge rolling machines, which also caused my house to shudder and my floors to vibrate-no one cares. On the Wednesday morning before Thanksgiving, I had a Porta-Potty delivered to the front of my house-couldn't find anyone in the city of Tualatin who was working that day. Finally found 4 sub-contractors working along the freeway side and they made phone calls for me to find out where it was supposed to go. Luckily they were very kind and used their front loader to move it back across the street. Of course-no apologies from anyone. I've had rodents who chewed up

my car's hose and wiring harness that was 500$ to fix-while there isn't a direct correlation, it's a big coincidence.

And lastly, if you build that project, that is the last green spot on the block. There is no park/trail up here. Ibach Park is almost 1.5 miles away and lots of old/broken equipment there for little ones. There;s no place to go sit in a park on a bench; Little Woodrose is also about 1.5 miles away. We have 2 high schools within a mile of us and traffic is abominable. I know that I pay for parks/trails in my taxes and there are neither here and it needs to be more than a swing, a slide and a picnic bench because it seems like you're trying to appeal to families with Autumn Sunrise. In just the 5 years I've been here, there are too many changes being made to increase population, with little support for infrastructure, and needs. You can't squish 600 plus new residences into the same area. I'm so disappointed with what's going on that I hate where I live now-we didn't get a voice in increasing housing density, we didn't get a voice in housing zoning, and the city does not listen to the people who live here. Maybe it's time to pay more attention to the residents who are already paying taxes. I'm already looking at moving-we're taking at multiple years of construction in the same area

Sorry for such a negative response, but the last 7-8 months have been hell-the noise, the dirt, the traffic, the rodents, and we're all on our own up here. And the message to residents is basically, sorry, you have to suck it up. This is not the place for a high rise of more than 250 units. Boones Ferry and Norwood need a traffic signal already. Lots of teenage drivers and rushing parents due to 2 high schools in the area. You're destroying the last stand of old trees, so we might as well pull down the Tualatin Woods sign on our subdivision because they don't exist anymore. The sadder part is that there seems to be a disconnect between the city and its residents.

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,
Paul M Peterson

Subject: Please do not approve the SW Norwood Partition

Dear Ms Nelson

I am writing in opposition to the planned SW Norwood partition.

I have lived in the Norwood neighborhood for 28 years and use Norwood Road to access Boones Ferry Road several times a week. I am already nervous about how the Autumn Sunrise development will affect traffic in that neighborhood—adding a whole high rise on top of that will surely cause terrible daily traffic congestion, especially without major improvements to the surrounding roads.

Please consider the needs of the existing and new residents of this neighborhood and deny the partition until a comprehensive traffic mitigation can be implemented.

Thank you

Penny Harper

Subject: Norwood Against ANN22-0003 - 9300 SW Norwood Road Annexation

Hello Distinguished Planning Commission Members and Council members,

I write to you to request your support of the local community in Tualatin, over the interest of out of state developers. I oppose this annexation, not because I am against development in my community, but because I am concerned about the proposed development by Vista.

We know that Vista intends to rezone to High Rise density, and this annexation is a step toward that rezoning.

I question the ultimate premise that this land must be high density in order to provide sufficient housing for the area. Vista has built several townhome communities nationwide that would meet the RML density zoning the land current is zoned for. Why has that not been pursued as an option?

I believe there is a tremendous opportunity for the community to partner with our local leaders to achieve housing developments that meet the needs of current and future inhabitants. This application by Vista is not that opportunity.

Thank you for considering my opposition to this annexation application.

Best regards,

Rachel Neill

Subject:	Attn Madeleine Nelson - I Oppose the Partition Application

Hello,

I oppose the proposed application as the City has not completed due diligence in evaluating the immediate increase in traffic congestion zoning changes in addition to the matter that zoning changes to a suburban residential area before the Tualatin Central Urban Renewal District is built up are not logical.

I appreciate your careful consideration to the local residents of Tualatin concerns regarding this matter.

Subject:	Pending Partition and Annexation Decisions Partition # PAR-(22)-0002 Annexation # ANN 22-0003

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my additional comments against both of these land use decisions.

As a resident of Tualatin and a member of Horizon Community Church, these two decisions are very important to the future plans for our church and the greater community within the City of Tualatin.

High density housing is not supported by the current infrastructure in this community.

I am not in support of Horizon's partnership with Vista to rezone this land partition into High density dwellings. It is concerning to me that the church is not working with the local residents to determine a solution that works for the both the church and community needs.

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments against of both these land use decisions.

As a resident of Tualatin and a member of Horizon Community Church, these two decisions are not just important to the plans for the church but have a tremendous impact on the the community of Tualatin, which the church is failing to recognize.

While these decisions do not approve of any specific future projects for these properties, I would like to state my concern that Horizon's message that this land use application will lead to affordable housing for our region is misleading to the public. Vista residential partners is seeking to build class A residential structures, which are not affordable housing, but considered a high rent opportunity. In addition, they are seeking to have this property rezoned as high density housing.

There are currently over 500 residential single-family homes and town houses being built in the Autumn Sunrise development. There will also be an additional 100 apartments in the Plannbeck apartments development. The Norwood infrastructure cannot support a high density housing development, in addition to all which is being added.

Horizon Church is under contract with Vista residential services, an out-of-state developer with no ties or investment to supporting our local community. There are numerous lawsuits against Vista residential services in other states, due to their lack of ethical and responsible building. This is something that we as Oregonians and Tualatin residents take very seriously, and should be carefully considered be our elected officials.

Please do not approve these two land use applications.

Attachments:	City Council Letter_NorwoodSaysNo.pdf

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

Thank you for your ongoing service to our Tualatin community. I appreciate your continuous efforts to protect and preserve the livability and safety of the place we call home.

Please see the attached letter with my concerns about the proposed Text Amendment change in the Norwood area.

Kindest regards,
Rachel Neill, MSN, RN

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106 and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin and speaking on behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure generally do not conform to this level of zoning, especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at Norwood and Boones Ferry intersection, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles, according to Google maps and personal

experience. The addition of RH-HR zones only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of the current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrollment rates and children returning to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and are prime locations for this type of development. There is a vacant retail space where Haagen's grocery store was, existing retail, grocery stores, and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add the RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside

rail transit, a station can be built at the Basalt Creek Employment Center, giving access to a downtown high-rise. Utilizing WES commuter rail would also not directly impact vehicular traffic besides crossings and utilize existing taxpayer public transit more efficiently. Also, adding another RH-HR zone near the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home-based businesses and occupations in all residential zones, subject to regulations to minimize impact on housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present or compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services to support residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower-income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, fellow residents and I strongly urge the Tualatin Planning division not to approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I encourage you to think of our city holistically with the entire community in mind.

Hello,

I attend Horizon Christian Church, and my kids attend Horizon Middle School and Horizon High School. I also live here in Tualatin on Boones Ferry Rd. I am against having a high rise apartment complex on the above listed property due to traffic concerns and the look and feel it gives this section of Tualatin.

I do not feel that the opinion of those who attend Horizon Church but do not reside here in Tualatin should impact the approval of this annexation, as this is not where they live.

Thank you,
Rebecca Kimmel

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Rebecca Kimmel

Subject: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail

space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

Subject:	We are Not Nimby's please hear the voice of your constituents

Was a precedent set when the Plambeck apartment developers request to bypass the city zoning codes for height restrictions was approved? We fear this is leading to a slippery slope which thousands of your constituents are very upset about, and hope you will help to do the right thing and not change our neighborhood into a series of hi-rise structures and further pack already jammed streets (not the "quality of life" we have & continue to pay our property taxes for).

We are not "nimby's", we just expect our neighborhood to be what it is in regard to the zoning which exists and what we bought into. Nor are we against "affordable housing"… The original Plambeck proposal was good, it met broader planning objectives for affordable housing, was within City codes, Aesthetically appealing and not detrimental to neighborhoods property rights. However, Plambeck developers pleaded a case saying "the property was difficult to develop due to challenging topography", therefore requested a "variance" to increase to 4 stories (2 stories above the zoning laws), which was then granted.

Why was that land purchased in the first place if they thought it was too challenging? Is it because they knew the they could change the zoning if they asked? Reality is the original 2 story plan which was within existing code, could have been built. Simply look at the adjacent Lennar development on Norwood - before the clearing & leveling - you could see just how up & down the topography is on this land and within the existing building codes! It cost more to level it out, but they did.

Reflecting also on the Lennar project, frankly, has been a debacle. The lack of oversight of their thinning out the tree preservation zone along Norwood last spring, to the point that the remaining trees were unstable and after just typical late fall winds (they call "storm"), the "preservation area has been deemed to now have to go – Lennar culled roughly 30 large trees that were in that so called "tree preservation area" in the late spring, it's no doubt the reason for this result. Did they get permission to do that? Why is it that the same such buffer to the west has existed for decades, that not even a branch fell from that buffer during what Lennar phrased as "a storm". Resulting in another slap in the face of our community!

In closing, for the projects which are currently in review, please hear the voices of concerned tax payers and consider our quality of life and perspectives. We ask you to please reflect on what is already happening to our community and not grant variances and permit further high rise projects that are not within the codes that existed when developers purchased such property and cause detriment to our neighboring property and community.

Sincerely,

Robert Taylor

Subject:	Pending Partition and Annexation Decisions Partition # PAR-(22)-0002 Annexation # ANN 22-0003

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments against the land use.

As a resident of Tualatin, and someone that lives across the stream the property, we do NOT support high-rise buildings of any kind being built on that property.

Thank you,
Ron & Rebecca Kimmel

Subject: Norwood Rd Annexation

I am writing this to you and the city council to look at the long range ramifications of starting with this request for the property on Norwood Rd to be annexed into the City of Tualatin.

Normally, an annexation has to do with an individual's property to be able to make use of all the benefits of the city they are wanting to be annexed into for the purposes of attending their schools, using their utilities, police, fire dept., etc. This particular annexation is for the purpose of a developer to be able to rezone the property to build apartments/high rise for their profit.

Please understand that the citizens you represent are very much against this proposal. There are so many housing projects taking place on Norwood and Boonesferry Rd. that another one is not justified or needed.

Sincerely,
Rose Toler

Subject: Annexation on 9300 SW Norwood Road

I am writing in the hopes that you will not approve the annexation on Norwood Road that is coming up for a decision.

Ordinarily, I would not be against it; however, this is just the first step in requesting that the city rezone the property for high-rises. This area is already inundated with the 521 units of single family and multifamily housing units that are already being built on the corner of SW Norwood and Boones Ferry Road.

The current TDC code language states that High-rises are reserved for the core only. This is the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club that are suitable for high density apartment or condominium towers.

The last thing we need is additional housing for high rises in an area that will already be overburdened with traffic.

Thank you for your consideration,

Rose Toler

Subject: Norwood Road Partition - PAR 22-0002 -- (part of Tax Lot 106 & 108 - Norwood Road proposed development???)

This appears to be part of Tax Lot 106 & 108 - Norwood Road proposed development. Am I correct?

The application for the planned Type II Partition is from the same developer (AKS) that wants to build a 4-story in the same area - a 4-story that residents have continually & strongly objected to. We chose to live here because we liked what the community represented and how it was laid out. We trusted the city to be as concerned about all these new developments as we are. We do not expect the city to add more issues & negatively to already existing/unsolved problems.

Will there be enough water and/or water pressure to serve all the many proposed new buildings? Will the city build an additional reservoir for drinking water, washing machines, cooking, watering lawns, washing cars, etc. Approving more buildings would seriously impact all of Tualatin except that as of now, the city is installing larger water pipes to take the water away from current residents & new residents in the new developments. It seems the city plans to alleviate or eliminate the impact on water usage - by making sure residents in other areas of the city gets enough water. In the process it will affect and/or impact nearby established residents next to the new developments. That causes more problems for some of us - other residents of the city will benefit - I believe solutions should be fair to all residents.

How does your proposed development plan to address traffic & parking issues.? Parking by students at Tualatin school already crowds neighboring streets. Boones Ferry has a traffic back up from the I5 Freeway, past Norwood Road and beyond during to-and-from work and school start & stop hours. Do you propose to widen Boones Ferry again??? How many traffic lights will we need?

The already large, partially completed development near the water reservoirs will severely stress sewer systems in the area. How do you propose to add all the developments' sewage without more impact to already existing neighborhoods?"

*** Note: The more developments we put in this area, the more infrastructures we will need and the more unhappy Tualatin residents/ Tax Payers we will have. . It will impact not just the already established tax-paying residents near Norwood but most of Tualatin's citizens in a number of ways.

Traffic, water & sewer issues are #1 issues. BUT, there are more issues: We are experiencing more electrical outages with electric out longer and longer hours (spoiled food sometimes even, and NO heat). We also are experiencing more noise from the freeway since all our beautiful old growth trees were cut down to allow for the larger development now being built. Our climate seems to be already changing because of the changes. Tall condos, and other developments will not only block sun & alter wind patterns but contribute negatively to the (once) beautiful area we live(d) in. Their plan for a "buffer" of trees between their development and the residents across Norwood is

laughable. The first partially completed new development has descimated the old growth trees next to Norwood Road and the freeway.
One can easily see that the old growth trees along Norwood to Boones Ferry are marked for removal.

There will be a need for more police , fire personnel & equipment. Current staffing would not be adequate. What about 911 services???

Most families have more than 1 car. Additional families moving close by will need parking round the clock. Will established residents and their guests be able to park in front of their own house? Congestion and traffic to our neighborhood streets will increase as people attempt to find better ways to travel in and out of our city.

PLEASE..... RE-ZONE AREAS THAT ARE NOT SO CONGESTED!!! Do not allow more changes until we have resolved the problems that clearly exist and will continue to grow.

Please consider what this is doing to many of the city's tax payers. Consider what all this lower priced housing will do to the values of our houses and the neighborhood. There is other land that could be rezoned for some of these developments that would not impact already established resident tax payers!!

Sincerely,
S Bell, long time Iowa Drive resident

Subject:	Modification of Tax Lot 106 & 108 - Norwood Rood proposed development

I attended the meeting on Oct 25 at the Library. There were at least 50 Tualatin citizens there to speak against the proposed development. It was a very rainy night or there probably would have been more. The developer did not even have the courtesy to have a microphone there to present their proposal so all could hear!

.... Here is an excerpt of a memo I sent when another developer expressed interest in developing in the area of Norwood Road & Boones Ferry. Please, take the time to read it.

"It is my understanding that the reservoir near Horizon Church & near your planned development, supplies a big % of the city's water. The area has a very large housing development being built in that area - there is already concern there will not be enough water and/or water pressure to serve so many new buildings. Are there plans to build an additional reservoir? Water is not only used for drinking, but for washing machines, cooking, watering lawns, washing cars, etc. Additional development, I believe, would seriously impact all of Tualatin and its existing reservoirs. How does the company plan to alleviate or eliminate the impact on water usage?

Since the already planned and approved large high-density will cause parking problems as well as traffic problems, How does your proposed development plan to address traffic and parking issues.? Parking by students at Tualatin school already crowds neighboring streets. Boones Ferry has a traffic back up from the I5 Freeway, past Norwood Road and beyond during to-and-from work hours. The road has already been widened. Do you propose to widen it even further?

Also, the already large, planned development will severely stress sewer systems in the area. How do you propose to add the development's sewage without more impact to already existing neighborhoods?"

*** Note: I believe the more development we put in this area, the more infrastructure we will need and the more unhappy Tualatin residents/tax payers.. It will impact not just the already established tax-paying residents near Norwood but most of Tualatin's citizens in a number of ways.

Traffic, water & sewer issues are #1 issues, but there are more: We are experiencing more electrical outages with electric out longer and longer hours (spoiled food sometimes even, and NO heat). We also are experiencing more noise from the freeway since all our beautiful trees were cut down to allow for the larger development now being built. Our climate seems to be already changing because of the changes. Tall condos will not only block sun & alter wind patterns but contribute negatively to the (once) beautiful area we live(d) in. Their plan for a "buffer" of trees between their development and the residents across Norwood is a joke if their "buffer" is like the "buffer" in the development already being built. -- Drive over and take a look for yourselves.

What about the need for more police and fire personnel & equipment?? Surely, the current staffing would not be adequate. What about 911 services???

Where will people park? Most families have more than 1 car. As stated, school children already use some of our residential parking. Additional families moving close by will need parking at night as well as during the days. Will established residents and their guests be able to park in front of their own house? Congestion and traffic to our neighborhood streets will increase as people attempt to find better ways to travel in and out of our city.

PLEASE.....

IF THERE IS A NEED FOR MORE DEVELOPMENT, THEN RE-ZONE AREAS THAT ARE NOT SO CONGESTED!!!

To: Madeleine Nelson; Frank Bubenik
Subject: Norwood/Boones Ferry project comment

Hello Madeleine and Mayor Bubenik:

I'm writing this email to express my opposition to the proposed development on Norwood and Boones Ferry. Can you tell me what traffic revision plans the city has to accommodate all of the new residents that Autumn Woods alone will be bringing in? I've seen the email campaign from Horizon encouraging its congregation to email the city in support of this. As a resident of Victoria Woods, I've experienced the traffic get increasingly heavier year over year and it seems there is no planned solution to lighten it. Depending on the time of day, I can be forced to wait for several minutes before its safe to pull on out of VW. Even more of a concern is the speed at which cars travel coming down Boones Ferry. I've got four kids who cross Boones Ferry and it is truly frightening because cars don't stop and are at in increased speed coming down the hill. I've experienced it multiple times when trying to cross the street as well. The pedestrian crosswalk was a start but there needs to be something better. I cant imagine thousands of extra cars being forced to use Boones Ferry Road and Norwood each day with the proposed high density housing project. Please consider the residents immediately impacted by this proposal and what it means to us. These new projects will only make it worse, traffic congestion wise and safety wise. I believe the increased traffic will be a deterrent to non-Tualatin residents to visit our great city and support our local businesses. I ask that this project NOT be approved.

I look forward to your response.

Respectfully,
Sara Gregory

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Shane Hanzlik MD

I'm letting you or whoever know that I'm totally against city of Tualatin rezoning so they can put in high rise apartments off of Norwood Rd. I moved to this city 20 years ago because it was quite and rural. Now whoever is in charge of the zoning should know that this isn't right. Just like the high density housing that is also occurring on Norwood. They were suppose to leave a buffer of trees along the road. But instead they clear cut them and lied by saying the wind blew them down. Is this what Tualatin is coming to? It's totally disgusting. Sincerely, Steve Carns

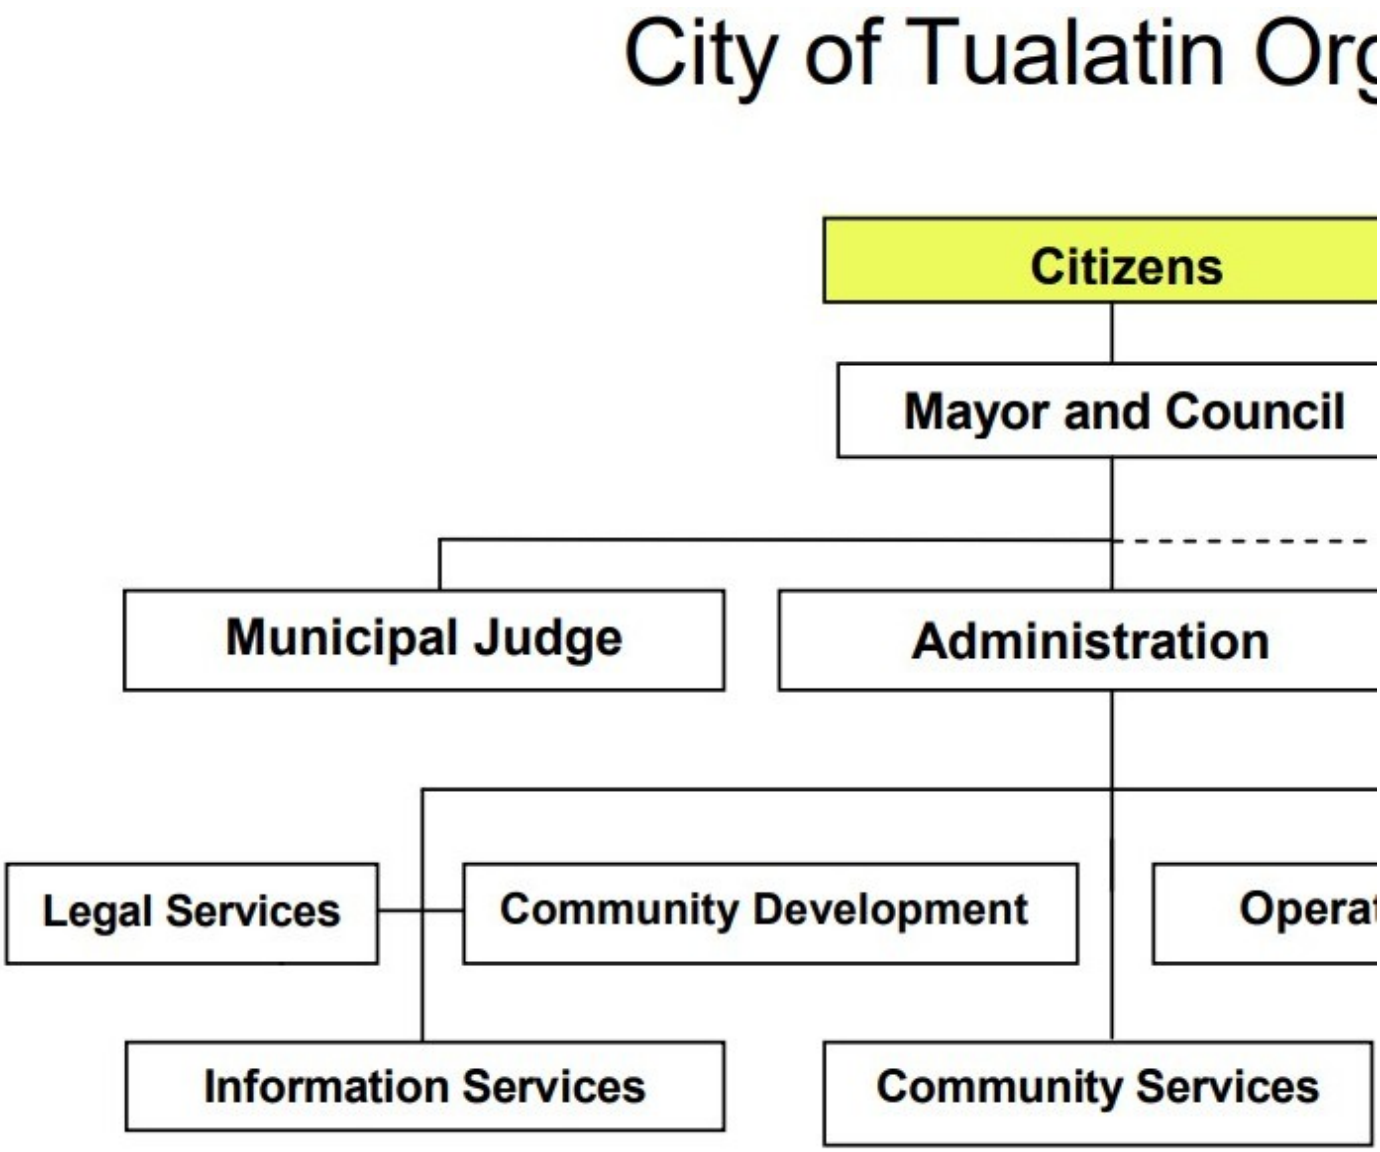
Subject: Norwood Against ANN22-0003 - 9300 SW Norwood Road Annexation



*The Citizen Advisory Committees include the Tualatin Library Advi
Committee, Tualatin Arts Advisory Committee, Tualatin Planning C
Architectural Review Board, Tualatin Urban Renewal Advisory Co
Tualatin Tomorrow Advisory Committee, and Transportation Task

Tualatin Planning Commission meeting on 1/19/23. The meeting agenda: discuss a significant zone change that would allow heavy manufacturing behind residents' homes on Boones Ferry Rd.(Tualatin City Council will also be discussing this issue on 2/27/23).

You know what happened? The developer brought an attorney to the meeting. It seemed to attendees that the developer was implying they would file a lawsuit if they didn't get their way.

At the same meeting a resident had concerns and questions regarding the zone change, and they accidentally spoke out of turn.They were quickly silenced by one planning commissioner.
Thankfully the Chair let this person speak, but at the end of the meeting when the Commission was supposed to deliberate on a recommendation to council, the developerspoke out of turn to sway the commission one more time.

It wasn't enough that the developer received more than half an hour for their presentation earlier, it was that they had so much clout to basically walk all over the process. And they were not silenced by any planning commissioner and were allowed to speak out of turn.

We hope you see the issue here…
From our perspective it seems as if Council has forgotten who is really in charge of the city.

It is supposed to be the citizens, not developers.

A high-rise is not a smart choice on SW Norwood Rd when this type of development is supposed to be in the core of Tualatin.

Kind regards,
Susan Pitt

Dear Assistant Community Development Director, Steve Koper;

We hope that you had an enjoyable, restful vacation, and you are refreshed with a clear mind.

We also understand that the planning department may be understaffed as there are many land use projects in the works.

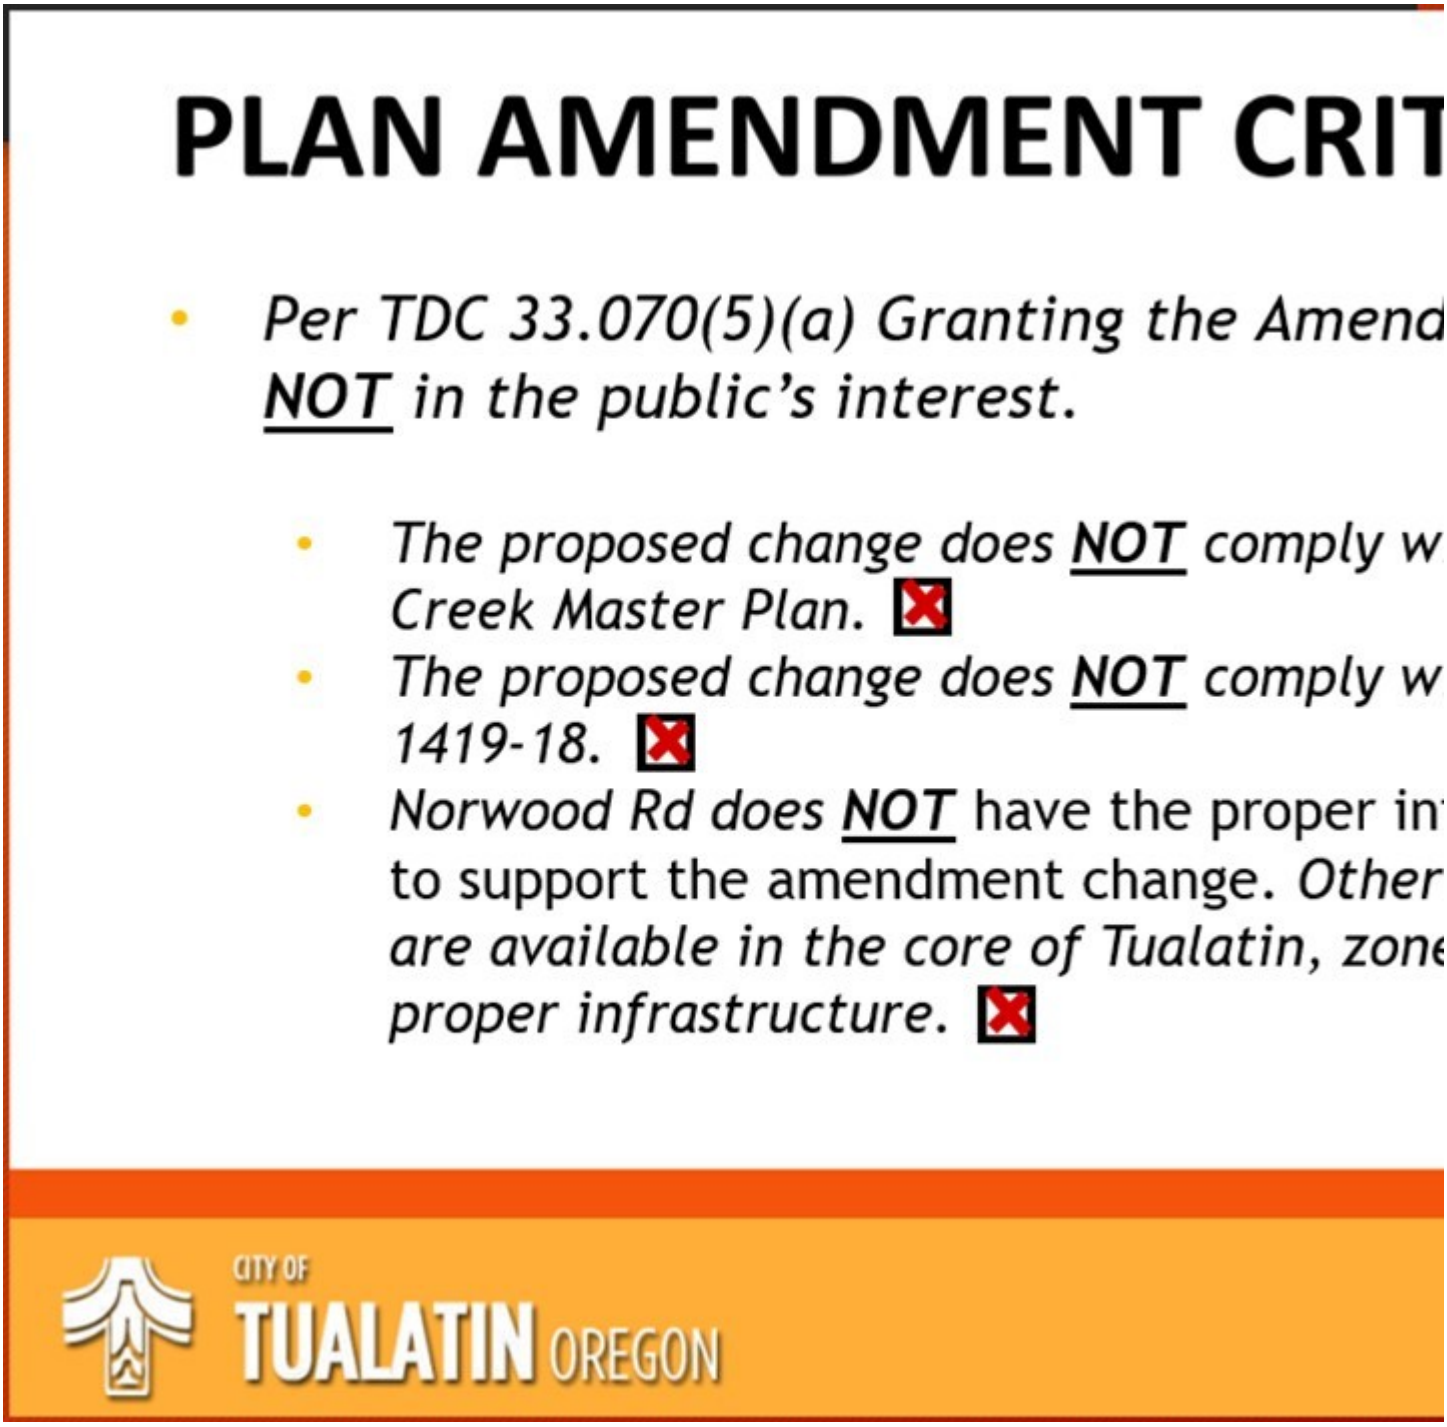
In the meantime, the residents of Tualatin thought it would be helpful to assist you in preparing your presentation to council, regarding the proposed RH-HR plan amendment change on SW Norwood Rd.

If it is not already clear, this proposed change is not in the best interests of the public. Feel free to copy this image below and insert it in your presentation when it's ready.

We have at least 20 more reasons why this plan amendment change is a bad idea, but it was hard for us to summarize in a single slide as done for the Tualatin Heights apartment's plan amendment change.

For that specific project, as a reminder, it was recommended that the housing density increase 35% within the same area.

It is not in the public's interest to approve an RH-HR zone off of Norwood Rd.



We also wanted to remind you about all those residents that were extremely concerned about parking and traffic who currently live around Tualatin Heights. We also want to refresh your memory regarding the statements you made discussing traffic problems in Tualatin.

From the Tualatin's Transportation System Plan Update:

"Director Koper stated there is a lot of employment in our city that passes through traffic in relationship to I-5, which gives us a unique position relative to other cities. He stated it will be best for the City to work with DLCD and partners to find a solution to our traffic issues."

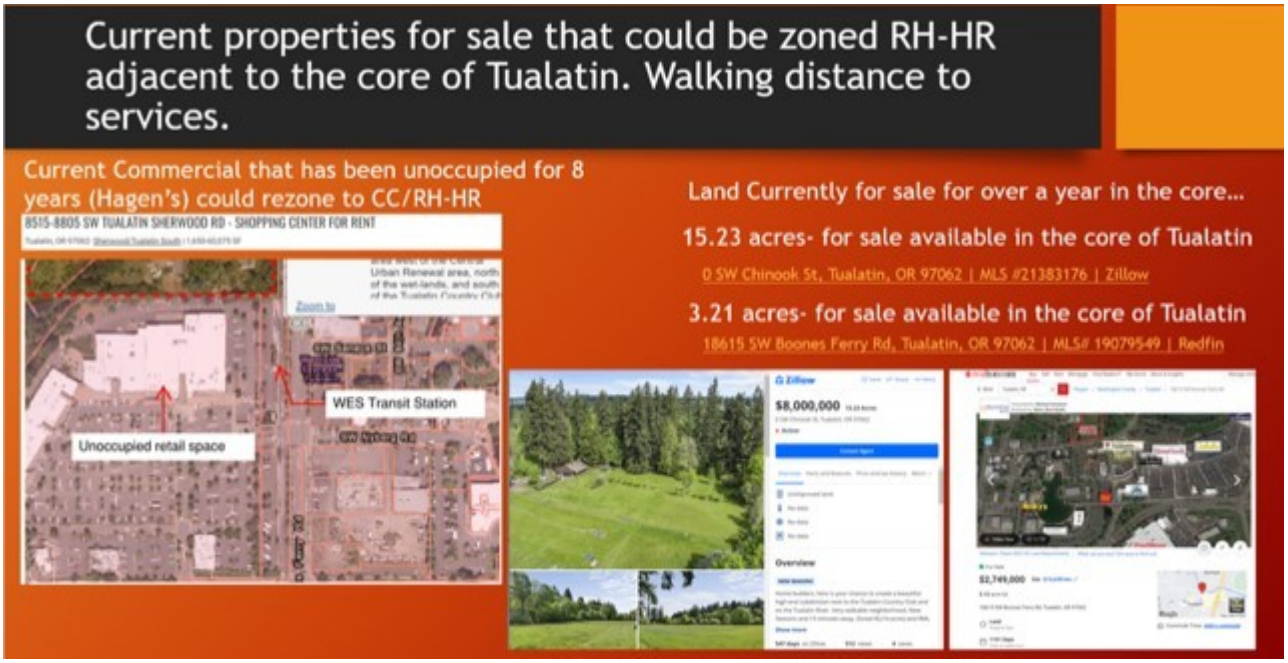
We also hope you work together with the DLCD and the public works department to develop a comprehensive traffic plan that provides new road construction instead of just "meandering sidewalks" and bike lanes on

Boones Ferry. We also hope the city would spend our bond tax dollars more wisely when looking at new land use projects, especially with the drastic escalation of housing projects in Tualatin.

If the city's plan is to put infrastructure upgrades onto the private sector (developer), to save money, the result usually ends up hurting the city and the residents for decades to come. Developers usually find the lowest cost solution to appease local jurisdictions within their project boundary. Their focus is to develop the land they purchased at minimal costs and turn a profit. This also causes a lack of uniformity within each development, with very little possibility of a course correction for the city in the future.

We also do not think it is a coincidence that AKS engineering and Forestry's office is located near Tualatin's planning department.

When you review the partition, annexation, and plan amendment application with AKS, please also indicate to them, there is other buildable land within Tualatin if they just took the time to look. A simple five-minute search on Zillow found three plots currently for sale. We would also suggest that AKS inform their client of these properties that are very suitable for a high-rise development within the core. Overall, it seems like their client is more interested in profit than really helping our community…



Again, Mr. Koper and Council, say no to a high-rise on SW Norwood Rd.

Commit to building a central Norwood Park like we explain on our website and try to rectify the Autumn Sunrise debacle.

If housing is truly needed, keep the current zoning as RL or RML.

Have a Happy New Year,

Susan Pitt
8883 SW Iowa Drive

Subject: Attn Madeleine Nelson - I Oppose the Partition Application

Ms. Nelson,

I would like to go on record as being opposed to the high rise proposed for Norwood.

It is clear that the traffic on Boones Ferry is already an issue, and adding more residences PRIOR to solving the already-existent problem is irresponsible.

We have already, sadly, seen the beautiful trees removed in the Lennar development and feel the City blindly allowed this to occur.

Does the City care? Why can't things be done in proper order? First solve the existing traffic issues before adding so many more cars to our neighborhood streets.

There are other issues as well, as you surely are aware. I, as well as my neighbors, will be attending all future meetings to voice our concerns regarding this proposed development.

Kind regards,
Susan Pitt

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;

The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

Subject: Procedural Concern RE: Proposed Ordinance No. 1472-23
To: Frank Bubenik <fbubenik@tualatin.gov>,Maria Reyes <mreyes@tualatin.gov>,Christen Sacco <csacco@tualatin.gov>,Bridget Brooks <bbrooks@tualatin.gov>,Cyndy Hillier <chillier@tualatin.gov>,Octavio Gonzalez <ogonzalez@tualatin.gov>,Valerie Pratt <vpratt@tualatin.gov>
Cc:

Hello,

I am writing as I observed that the City Council Meeting scheduled for 2/27/22 is planning to address the annexation of the property on 9300 SW Norwood Road, identified on the agenda as Ordinance No. 1472-23 and in the planning Department as ANN22-0003.

As per TDC 32.020, Procedures for Review of Multiple Applications identifies, the applications with the highest numbered procedure type will be processed first, and the application on which others are dependent will be processed first. I am wondering, why then is the annexation decision being considered before the text amendment decision, which also requires a type IV-A review? Per TDC 32.020 (3), Am I to understand that the text amendment is dependent on the annexation? Logically, it seems the opposite, as the developers would not

wish to move forward with annexation if their text amendment application is not approved. It seems to be the case that the annexation is dependent on the text amendment, as the annexation clearly identifies a plan for residential high rise construction. It seems that failure to consider the text amendment first could expose the city to avoidable appeal and/or legal review, regardless of outcome, as approving or denying the annexation first would imply consent or disapproval of the general project, including the text amendment, and the other related applications.

Please note, this is a question regarding procedure which seems contradictory to the TDC, not communication regarding the opinions on the project as a whole, and as such I would greatly appreciate a response to facilitate my understanding.

Thank you!
Tim Neary
Byrom CIO President

TDC Section 32.020 – Procedures for Review of Multiple Applications. Multiple applications processed individually require the filing of separate applications for each land use action. Each application will be separately reviewed according to the applicable procedure type and processed sequentially as follows: (1) Applications with the highest numbered procedure type must be processed first; (2) Applications specifically referenced elsewhere in the TDC as to the particular order must be processed in that order; and (3) Where one land use application is dependent on the approval of another land use application, the land use application upon which the other is dependent must be processed first (e.g., a conditional use permit is subject to prior approval before architectural review).

Subject:	URGENT: Do not allow high rises to be built anywhere in Tualatin!

Hello,

The current text amendment proposal can catastrophically alter the future of development in our city.

Please consider the consequences of approving the proposed text amendment in Partition Application: par22-0002-23370! If approved, developers could create high density high rise apartments anywhere in Tualatin. This is a lazy text revision that opens all of Tualatin up to potential high rise development.

High density high rise apartments in Basalt Creek are not beneficial to current or new residents. Traffic will already be severely worsened with existing developments, and will be further exacerbated by more high density housing in an area of town where all residents have to be car dependent.

Instead of allowing space to be zoned high density high rise, instead consider allowing areas outside of downtown to be rezoned to mixed use residential/ commercial. If properties are constructed in the basalt creek area that have ground floor stores, restaurants, or groceries, residents in the area are less car dependent. A mixed use residential commercial zoning definition could also include a more appropriate height cap when properties are being developed outside of the downtown urban renewal area, such as a hard limit of 4 stories for mixed use commercial residential property.

A more ideal use of this property for Horizon, developers, current residents and new residents, are buildings with ground floor commercial space, with a lower number of residential units. This increases walkability, and provides local options where residents do not have to drive 2 miles or more for any goods or services. South Tualatin needs more commercial opportunities and community gathering space. This property could be developed in a way that meets community needs, and still enables Horizon and developers to profit.

Following is a quote from the application highlighting that the text amendment request is to enable RH-HR to be built anywhere in the city:

"In conjunction with the Partition and Annexation applications, a Plan Map Amendment will be submitted to the City that will apply the High-Density High Rise (RH-HR) zoning district to the new ±9.2-acre site on SW Norwood Road (this ±9.2-acre site combines Parcel 2 of the subject Partition Application and adjacent Tax Lot 108, as described above). Currently, the RH-HR zoning district is defined as a specific area within the City's Central Urban Renewal Area. A Text Amendment to the Tualatin Development Code (TDC) will also be submitted that modifies the TDC's RH-HR language to allow the zoning district to be applied elsewhere in the City.

Allowing RH-HR zoning to be applied anywhere in the city would be disastrous to Tualatin. A more appropriate text amendment would add a specific site or parcel to the current definition of limiting the code to

the City's Central Urban Renewal Area, so the text revision does not create a carte blanche for high rises to be built all over the city!

The Byrom CIO does wants to see development to the South be enhance the quality of life for current and future residents and businesses. Please consider the negative impacts of only enabling more high density housing in an area where residents must drive for all basic needs!

Subject:	Recommend Denial of Partition application: PAR22-0002
Attachments:	20221025_183829.jpg; 20221025_184733.jpg

Hello,

I encourage the planning division to deny partition application PAR22-0002.

I encourage the application to be denied as the application materials includes statement of intention that is beyond the scope of the partition decision, and the intended use of the partition is not consistent with present Tualatin Development Codes. Approval of a partition application that includes content of intention for future development that is in violation of Tualatin Development Code could be construed as the city giving approval for the proposed, illegal, development plan in addition to the plan to create the partition itself.

The partition application references intent to create a "multifamily housing development." At the developer meeting and in subsequent communications and materials, the applicants clearly identified intent to create a 'multifamily housing development' that is consistent with the definition of residential high density high rise. The application materials for the partition identify a plan to rezone the land as RML, however this is not consistent with the use plan portrayed to residents at the developer meeting. The application does not specify how the applicant defines "multifamily housing development," and given the information presented at the developer meeting, this must be interpreted as an intention to develop property to be zoned as a residential high density high rise. The developer meeting specifically disclosed plans to build a "276 unit, 4 story 'class A' apartment complex," consistent with a residential high density high rise definition. See attached images from the developer meeting. Given this evidence, the applicant's term, "multifamily development" must be construed as "a 276 unit, 4 story 'class A' apartment complex."

Specifically, the partition application includes the language in the attached memo: "This letter is to serve the purpose of Horizon Community Church, authorizing Ken Allen, of Norwood Horizon Holdings, LLC as our official representative as pertaining to matters of land use and development of the proposed multifamily land approval process with the City of Tualatin." This statement is beyond the partition decision itself, and should more appropriately read as "This letter is to serve the purpose of Horizon Community Church, authorizing Ken Allen, of Norwood Horizon Holdings, LLC as our official representative as pertaining to matters related to this partition application." This revised statement would not indicate that the city is approving the ongoing plan for multi family development housing, and is focused solely on the presented partition plan. Including this language cannot be approved, as presently the city does not allow for a multi family housing complex to be developed on this property. Furthermore, the partition application identifies the partition area will be zones medium to low density residential, inconsistent with a multi family housing development.

Additionally, the Executive Summary includes a statement of intent to create multifamily housing. Executive Summary: Vista Residential Partners (Applicant) is submitting this Partition application for the Horizon Community Church and Christian School site. The Partition application is the first of several applications needed to create a new parcel for future multifamily residential dwellings within the Basalt Creek Planning Area of the City of Tualatin. The following is an outline of the anticipated applications." Again, based on the

zoning plan of the partition and current city zoning restrictions, it is not possible to build a multi family development on the proposed lot.

The city has not yet completed any action to enable the proposed lot to be zoned to enable a multifamily development. A multifamily development is consistent with a residential high density high rise zoning classification. This partition application should be denied, and should be resubmitted by the applicant ONLY AFTER the city identifies that a multifamily development is able to be built in the proposed area.

According to Tualatin Development Code, TDC 44.100, "The purpose of the High Density High Rise (RH-HR) zone is to provide areas of the City within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club that are suitable for high density apartment or condominium towers." Presently, High density High Rise zoning is not permitted on or near the proposed partition. Approving the application identifying the intention to create multifamily development consistent with the definition of high density high rise zoning cannot be done as it violates present city development code.

In summary, the applicant uses the term, "multifamily development" to mean a 276 unit, 4 story apartment complex, which is not consistent with the zoning requested in the partition application, and is not permitted under current Tualatin Development codes. As such, the partition application should be denied since it cannot be developed as intended.

Subject: Comment re: PAR 22-0002

Per the TDC rules to approve a partition, the proposed application does not meet criteria and cannot be approved:

Per TDC 36.115 (1), the proposed use must be consistent with the land use zone. - The applicant identifies intention to build high rise high density multifamily apartment homes, not consistent with the present land use zone: RML. The city would first need to approve different zoning before the partition application is approved.

The application does not meet criteria TDC 36.115(2)b: the plan is not consistent with residential design standards, which are defined as those for single family homes, townhomes, duplex, triplex and quadplexes. (TDC 73A.100).

Most significantly, the proposal in the application is in violation of TDC36.010, in that the proposal is not consistent with the provisions of the Tualatin Comprehensive Plan, Tualatin Community Map, and capital improvement plans. These plans make no reference of permitting high density high rise outside of the downtown development zone. Furthermore, the proposal identified in the partition plan violate the following Tualatin Comprehensive Plan Policies and Goals: POLICY 2.1.1 Encourage structures be planned in ways that relate to the site and surrounding context. A high rise high density apartment is not 'in context' with institutional use zoning and RML zoning.
The proposed development involves removal of a forest, in violation of the following elements of the Tualatin Comprehensive Plan: GOAL 2.2 Promote the preservation and establishment of trees throughout the city, in order to protect and enhance the aesthetic character of Tualatin, protect and improve air and water quality, provide noise and visual screening, and protect habitat for wildlife. Even if a tree barrier is left, the destruction of a few acres of forest destroys significant wildlife habitat that would not be adequately replaced by a tree barrier strip. POLICY 2.2.1 Require the establishment and protection of street trees. POLICY 2.2.2 Promote the protection and establishment of trees during the development process. As this proposal involves AKS engineering, which has demonstrated disregard for these provisions in the Tualatin Comprehensive Plan through their work on the Autumn Sunrise subdivision, AKS cannot be trusted to adhere to these policies.

The proposed development described in the application is for multifamily housing on Norwood road, which is not serviced by public transportation. This is in violation of the Tualatin Comprehensive Plan: POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

The partition application should be rejected, and resubmitted by the applicants with an aim to meet this provision of the Tualatin Comprehensive Plan, ONLY after approval for the area to be zoned as mixed-use commercial has been granted: POLICY 3.4.2 MIXED-USE COMMERCIAL. Support the application of mixed-use commercial designations in areas of Tualatin that are suitable for a mix of office, retail commercial, and high density housing.

The city should re-evaluate standards for building apartment homes outside of the downtown development area, as it is unreasonable to apply downtown Tualatin standards to developments on the edge of town. Mixed use commercial space would benefit current and new residents by creating retail, dining, and/or grocery

opportunities without needing to drive to the next nearest retail centers, which are over 2 miles away.A review of the mixed use commercial zone desgination should occur, to limit structure height and stories when outside of the downtown development zone.

Subject:	No Rezoning of tax lots 106, 108 to RMH from RML

Hello,

I apologize for including so many of you in this message, I am not well versed in all the roles of city government, and as this is of great importance to myself and my neighbors, I believe it more important to overcommunicate than risk not being heard.

The neighborhoods in the south of Tualatin have been informed and engaged in the planning of the Autmn Sunrise development under the current plans to develop the area as low-medium residential, to include development of multi-family dwellings such as townhomes, duplexes, and triplexes.

The proposal to rezone the properties to medium- high residential amounts to a "bait and switch" of these neighbors. Increased density would further strain infrastructure, including traffic, police, fire, water, sewer, and electrical.

An argument has been made that increasing higher density housing is a goal of the city. If that were true, then why initially approve the lots as RML? As others have pointed out, there is RMH land available for development at and around the site of the former Hagen's grocery store. Rezoning unused commercial property closer to the WES station and other municipal resources makes more sense than creating a higher density pocket on the outskirts of town.

If rezoning is even to be considered, all impact studies need to be recompleted and all recommended infrastructure adjustments made, including environmental impact studies, traffic studies, crime studies, and utility use studies. These studies must also include the limits of what Tualatin and Washington county can do to accommodate increased density, and what the impact is when Clackamas County roads and infrastructure remain unchanged.

Mayor Bubenik, City Councillors, Tualatin Planning Commission, please go with the plans as originally made, please do not allow your neighbors to be misled by developers. Do not allow tax lots 106 and 108 south of Norwood Rd and East of Boones Ferry Rd to be rezoned as medium high residential, keep these lots zoned as medium low residential.

Thank you,

Tim Neary
Tualatin Resident of Norwood Heights

Subject:	No Apartments South of Norwood

Hello City Officials,

Thus far I have not heard of any comment from the city on the proposal to build additional apartments south of Norwood between I5 and SW Boones Ferry.

I request a response from the City to the following concerns about the proposal to rezone the area and build apartments, myself and other Tualatin residents are very concerned about the impact on the community.

Concern: Traffic. The traffic study for the Autumn Sunrise development did not consider additional high density apartments. At minimum, a traffic impact study needs to be completed again factoring in the increased density.

Concern: Crime and Safety. Statistically, higher crime occurs in areas of greater housing density. The proposed location of the high density apartments is more than twice the difference from the police station as other high density residential areas in the city. A crime and public safety study must be completed to ensure that current public safety officers can respond to incidents in a timely manner and have adequate resources for increased safety concerns on the south edge of town.

Concern: Infrastructure. The Norwood Heights neighborhood regularly experiences power outages with mild wind events. Neighbors don't have any information that supports the electrical grid can support Autumn Sunrise, let alone nee apartments.

Overall, although Tualatin needs more high density housing options, it does not make sense to locate high density apartments so far away from police stations, transportation hubs, and other public resources near the center of town when already zoned property is close to the town center.

Please speak to the residents of Tualatin to address these concerns, and communicate how you will evaluate more sensible sites for high density housing.

Thank you,

Tim Neary
Norwood Heights Resident

Subject:	Norwood Apartments Plan - The 5x Win by including commercial space!

Hello,

You are all already aware of the concerns neighbors have about an additional 276 unit apartment complex being built on Norwood.

The Issue: The biggest concern tends to be about traffic. 500+ homes in Autumn Sunrise and another 276 apartments here would require everyone, plus the existing neighborhoods, to be car dependent for everything. As the plan is for higher end apartments, it is unlikely that any of this income bracket will be interested in using public transportation.

The Solution: Everyone wins if the proposed apartment land is instead zoned as combination commercial and medium - high density residential. This would reduce the number of apartments, while enhancing the quality of life for new and old neighbors.
We have seen this solution work in Mercato Grove in Lake Oswego! Although existing plans propose a small commercial space, such as Plaid Pantry, this is not adequate nor enriching for the proposed number of residents. The addition of ground floor commercial space provides restaurant, shop, and potentially high end grocery opportunities that would make the community more walkable and less car dependent. Having local retail and restaurant options benefits both existing neighbors and new ones at the proposed apartment site and Autumn Sunrise, and fits well with existing plans for the Basalt Creek Development and Parks plan.

Given the number of units, it may even be worthwhile for the city to implement an auxillary police station at one of the commercial spaces, given that Autumn Sunrise and the apartments could increase the city's population by 20% in a small area that is furthest from existing police.

This plan could be even further enhanced by improved traffic solutions, such as a second southbound lane on Boones Ferry, or creating an I5 onramp at Norwood.

Stakeholders:
Horizon Christian: They are still able to sell their land, their needs are met.

Developers: They can still create a profitable series of structures. Their needs are met.

Existing neighbors: They benefit from a more walkable neighborhood, have an improved quality of life. New and old neighbors alike have options where they don't have to drive for shops, restaurants, and possibly groceries. If further traffic interventions occur, their needs are met.

New Neighbors: Improved quality of life by having walkable shops and restaurants and improved traffic. Their needs are met.

The City of Tualatin: More businesses in the city create additional revenue, the creation of a quality restaurant and shopping space fits with the vision of the city. Additional housing units are created. In the recent meeting, the developers attempt to make a case that this site is the only opportunity to add apartments in the city. This is not correct, especially if land can be rezoned. There are over 20 acres of undeveloped lots in the city currently zoned RML, and existing vacant commercial properties, such as the Hagen's grocery site could be rezoned for additonal housing. The city has plenty of solutions for additional housing development The needs of the city are met.

Subject:	Norwood (Tualatin) Smart Zoning ... instead

To
Tualatin Planning Department
City Council, and
Mayor;

cc: Pamplin Media Group; Willamette Week

I appreciate the opportunity to support fellow homeowners concerned about the Norwood-Boones Ferry Road development proposal. As a Tualatin homeowner and long-time resident previously involved in the unsuccessful attempt to halt overdevelopment of the Tualatin Heights apartment complex on SW Sagert Street because of justifiable concerns regarding tenants blocking our parking in adjacent streets in front of our homes, I have to also voice my concerns.

I watched with dismay as the Tualatin Heights process proceeded, merely appeasing homeworkers with developer-paid bogus parking studies and highly restrictive time limits during meetings (homeowners received five minutes or less during one hour meetings to voice their concerns). The end result was a rubber-stamp process which I could see coming.

It is necessary to once again support the Norwood area homeowners in their efforts to oppose this latest development, and to demand that they receive equal time during ALL meetings to voice their concerns and/or objections and present their case with the same reception that the developer receives.

Sincerely,
TimG
Tualatin

Following is the NorwoodSaysNo website form letter. I attach it in agreement with everything stated within:

"I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

* Issue one - traffic:

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

* Issue two - infrastructure:

The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

* Issue three - existing RH-HR zones:

As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies"

Subject: Norwood For Smart Zoning

I know that you have received the letter listed below from many of our Tualatin residents stating their concerns regarding the massive development of Autumn Sunrise and the proposed multi-store apartment complex on SW Norwood Rd. and SW Boones Ferry Rd.

My wife and I have owned a home near Ibach Park for the last 27 years in a development known a Hedges Creek. When we first moved hear there was no Tualatin High School, no Ibach Park and minimal housing development in the area. But now over the years things have blossomed and changed to the point where certain things like the infrastructure have not kept pace with the increase in our population. Boones Ferry Rd. is now becoming the new SW Tualatin Sherwood Rd. where the traffic crawls at a snails pace at certain parts of the day, and this will only become far worse with the increase in the population of the new additional developments. The infrastructure should come first with residential and business additions to follow, not the other way around.

There are times in the morning and afternoon at and near the high school that it takes me nearly 10 minutes to get onto Boones Ferry Rd. from my home which is only approximately five blocks west of the school.

And what about the over crowding of the schools due to the new increased population of students? Their education will be compromised to a lower standard. And will teachers flee their profession due to the increase in classroom sizes?

These things along with many other issues must be considered before moving ahead with anymore development.

Please listen to, and consider the request of your people listed below. After all, we elected you to represent us, the people of Tualatin, not big money and over crowded development!

Thank you,
Vern & Teri Boomer

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local

infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;

The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;

As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative

of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,
Vern and Teri Boomer

Subject:	Opposed Partition and Annexation Decisions Partition # PAR-(22)-0002 Annexation # ANN 22-0003

Dear Tualatin City Council and Staffs,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, I strongly opposed these land use decisions.

As a resident of Tualatin, these two decisions are very important to the future plans for the greater community within the City of Tualatin too.

I would like to express my sincere concern about the public safety/security in this community while ten percent of Tualatin people suddenly living across the street as follows:

1. Would you increase police force patrolling this area?
2. Would you extend the width of Norwood road, Boones Ferry road so as to facilitate the large flow rate of car traffic?
3. Would you consider how bad the traffic will be clogged between Sherwood and Tualatin during daily school bus timing?
4. Would you consider the existing water tanks sufficient to supply needs for emergency use?

Please do not approve these two land use applications! Thank you so much for your time and consideration!

Wai Yam

Subject: Norwood

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing about my concerns about the Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone.

My backyard backs directly to Norwood road, so we are massively affected by all the new and upcoming changes happening in our neighborhood. At this very moment in time, traffic is a literal nightmare going from Norwood to Boones Ferry Road. So I am already greatly concerned with the new development and how much strain this is going to put on our already cramped situation. Now high rise apartments? Absolutely cannot happen where plans are being made. Clearly the people attempting this build don't care about our city, or have ever attempted to leave this south side of Tualatin for I5.

It's a bit maddening that there are much more appropriate alternative options available in downtown Tualatin. The Norwood area infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and

personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where

compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin.

City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

Sincerely,

Zack & Kendra Nell

Subject: Concern for new development

Follow Up Flag: Follow up
Flag Status: Flagged

Hello There,

I am writing you to express my concern regarding the possible zoning change for the property that Horizon Community Church currently owns. We live in Victoria Woods and as it is we can barely get out of our neighborhood. If we are turning left it can take up to 5 minutes to get out. I understand there is nothing that we can do about the Autumn Sunrise development as the work has already started. However, I do not think it is right of the City of Tualatin to rezone these properties to high density housing. Adding an additional 300-400 residences on top of the Autumn Sunrise development is not going to work unless the City and County plan to upgrade the infrastructure of Boones Ferry Rd. At 5pm traffic is backed up from North Wilsonville past Tualatin High School. Its already a nightmare. I cannot imagine how unsafe it will be if an additional 300-400 residences (apartments) are added to this part of town.

My family is part of the Horizon Church community. My kids attend school there. They have not been forthcoming with the information that they have sent out to their congregation. And I think it is extremely unfair that they have asked their "community" to submit emails to the city in support of the zoning change. These are not people who reside in the community or on this side of town. This benefity Horizon financially and does not benefit the neighbors one bit. If anything this will bring down our property values and add more crime to the area.

Tualatin is already so hard to get to and it is my fear that business will not want to move into Tualatin if we continue to grow and create more traffic and less traffic revisions. Approving this change really demolishes the safety as well as community feel of this part of town. We are begging you as neighbors to this property to not change the current zoning. We will already be impacted tremendously by the Autumn Sunrise development. And would appreciate it if our voices are heard and taken into consideration. I am begging you to listen to the residents of Tualatin and not the congregation of the church. They do not have to deal with the daily traffic, crime, and development.

Our address is 22545 SW Miami Drive

Thank you very much,

Madeleine Nelson

Subject: Pending Partition and Annexation Decisions Partition # PAR-(22)-0002 Annexation # ANN 22-0003

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments in I DO NOT support of both these land use decisions.

Please consider the heavy traffic around the Norwood and Grahams Ferry. The new community behind Horizon is going to bring more than enough traffic. I am a member of Horizon but I do not want to have the apartment complex to be built. I would consider leaving my neighborhood and out of Tualatin if this plan is approved.

My family and I moved Tualatin and specifically to this area for having less congestion.
Now with the new housing development and pending apartment the congestion and quietness of our neighborhood will be ruined.

Please don't approve these two land use applications.

Thank you for your time.

Respectfully,

Cliff Ingram

Hello,

I attend Horizon Christian Church, and my kids attend Horizon Middle School and Horizon High School. I also live here in Tualatin on Boones Ferry Rd. I am against having a high rise apartment complex on the above listed property due to traffic concerns and the look and feel it gives this section of Tualatin.

I do not feel that the opinion of those who attend Horizon Church but do not reside here in Tualatin should impact the approval of this annexation, as this is not where they live.

Thank you,
Rebecca Kimmel

Dear Madeleine,

Please accept the submission of the following arguments, case studies, and examples, against the PTA and PMA23-0001 applications. The applicant failed to consciously consider the characteristics of the city from their analysis and they do not have the burden of proof to support these applications.

Please confirm these attached documents will be included in the meeting packet for Council. If you have issues downloading the attachments please let me know and I will submit them to you in a different way.

May 28th, 2023

PTA 23-0001 and PMA 23-0001 applications should be rejected for failing to meet the following criteria:

The application:

1. Application Summary:

With its proposed Plan Text Amendment (PTA) and Plan Map Amendment (PMA), the applicant is proposing to convert 9.2 acres on the periphery of town to the High Density High Rise (RH-HR) zoning designation. Currently, such zoning is limited to the downtown core and is limited to 4 acres. Thus, the applicant is proposing to more than double the amount of RH-HR acreage and relocate it from the City's downtown core to a single site on the periphery of town. This is not a minor change. If approved, this would result in an extreme change to the City's current map and comprehensive plan that would negatively impact not only the Norwood site in question and its vicinity, but the entire city.

2. Criteria Requiring Substantial Evidence

Under TDC 33.070, for the application to be granted, it must be (a) in the public interest, (b) timely, and (c) in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan. The applicant also must have the burden of proof to meet these criteria. As shown below, there is substantial evidence that applicant has not satisfied the criteria under TDC 33.070 and the other criteria in the application.

3. Failure of Criteria

a. Proposed PTA and PMA are Not in the Public Interest

Based upon substantial evidence, the proposed PTA and PMA, and the extreme changes they propose, are clearly not in the public interest. Increasing the RH-HR total area from 4 to 9.2 acres, moving it to the periphery of the City, and opening up the rest of Tualatin to further RH-HR applications is not supported by the comprehensive plan or the 2019 Housing Needs Analysis (HNA), and is therefore clearly not in the public interest.

i. The Applicant's Economic Study should not be allowed to subvert the findings of the 2019 Housing Needs Analysis

The applicant's proposals attempt to subvert the findings and recommendations of the HNA by submitting its own economic analysis regarding housing needs. However, the applicant's own analysis is neither free from bias (it was privately commissioned and narrowly tailored to support the applicant's specific applications) nor is it comprehensive (the HNA is 114 pages, vs the applicant's private analysis, which is 16 pages). Additionally, and perhaps most importantly, no open deliberative process or public input was involved in the applicant's private study, unlike the HNA commissioned by the City. For these reasons, and given the extreme zoning proposed by the applicant and the substantial deviation from the HNA proposed by the applicant, the application is clearly not in the public interest. To serve the public interest, if the City desires to explore updating

the HNA, a new HNA should be commissioned *before* making any drastic changes to the comprehensive plan and before ignoring the findings of the HNA.

ii. Other Potentially Viable Sites Should be Explored for RH-HR zoning before moving over twice the acreage needed to the Norwood Site

Along these lines, there are other viable sites which should be explored first before approving the extreme zoning in the PTA and PMA, including but not limited to the following: (a) the vacant gravel lot adjacent to the WES rail line (walkable to many amenities, unlike Norwood); (b) the vacant lots near the Community Warehouse and also very close to the WES rail line (also walkable to many amenities, unlike Norwood) ; and (c) the approximately 4 acres of bare land near the Grand Hotel in Bridgeport (also walkable to many amenities, unlike Norwood). The city has also deemed the central urban renewal district as viable by identifying a city goal to establish the 18970 Catalyst Project which early renderings depict as a high-rise building downton. Maps and additional viable sites are identified in Exhibit C.

In addition, as Chair Bill Beers of the Planning Commission discussed in the meeting of April 20, 2023, not just bare land, but redevelopment should also be considered by the City. It is therefore in the strong public interest for the City to conduct outreach to all owners in the downtown core for possible redevelopment, including mixed use, such as the long vacant Haggen's building next to the WES line, before granting the extreme zone changes in the application. With the right outreach, a mixed use redevelopment could be established that appropriately puts the RH-HR designation at such a key location, and meets a number of goals and policies of the Comprehensive Plan vis-à-vis the close proximity to high value amenities, including rail transportation and walkable commercial, the public library, etc.

There has been an assertion by the planning department that the gravel lot and the former True Value Hardware vacant lots across from Haggen's are "constrained," and therefore not a viable option for the RH-HR zoning designation. This has been used as justification for moving the RH-HR zone to the periphery at Norwood, and anywhere else in town. While these vacant lots may be in a floodplain, that does not make them unbuildable. A parking garage could easily be put on the ground floor, with up to five stories above. A simple look at what has been built in this area makes the answer obvious. The building with Mashita Teriyaki is a perfect example (see 18810 SW Boones Ferry Road). It was built in this flood plain by simply elevating the floor. The building next to it (to the south) also has an elevated floor and parking on the bottom (see 18840 SW Boones Ferry Road). Therefore, it is absolutely feasible and reasonable to expect development in this particular floodplain, with standard mitigation such as raising the floor or putting the parking garage on the bottom floor, and these two buildings are perfect examples (See Exhibit D - Construction Types in Floodplain Areas). There are all sorts of other developments like this along Boones Ferry. And for this reason, it is absolutely reasonable, and in the public interest, to expect the high density high rise zone to remain in the downtown core, and move to these adjacent vacant lots.

b. Proposed PTA and PMA are not Timely

The HNA sets a specific target of adding 1,014 new housing units by year 2039, with the target of 45% being multi-family units. Since the HNA, the following new housing units have been approved:

- Alden Apartments – 45 town homes
- Plambeck Gardens – 116 multi family affordable housing
- Tualatin Height Apartments zone change – 116 more units
- Autumn Sunrise, 407 housing units, some single family, some attached
- Nyberg Tualatin Apartments, 264 multi-family units

*See Exhibit B for a complete analysis of housing units approved in Tualatin

That is an additional 941 units, creating a mixture of 53% of these new units being multi-family. In other words, in less than 4 years (out of 20), Tualatin has reached 92 % of its goal with total housing units, and 49% of the total goal with multi-family units. Tualatin is way ahead of schedule in meeting its housing needs for 2040. The progress made in this regard over the last four years has been significant and well beyond the goals set by the HNA. There is absolutely no need, at this time, to rush through an extreme zone change that ignores the HNA and the goals of the Comprehensive Plan. Thus, the application is not timely. Furthermore, when considering the vacant 19 acres adjacent to Meridian Park Hospital, it becomes evident, while still not ideal, there exists a significant opportunity to enhance its potential by implementing a lower-level zone change to multifamily usage. This adjustment would serve as a transition area adjacent to the hospital, allowing for easier access and it is more local to essential amenities. Additionally, with all the undeveloped residential land adjacent to the Basalt Creek Area, there is 16 years left to decide on more housing to come on line per the HNA, which would be directly adjacent to the immediate proximity to the industrial zone (BCE) and could possibly use WES rail if Trimet was engaged for a new station. This location would also be a more reasonable location for this density off of 124th (Basalt Creek Parkway) and more appropriate versus Norwood Rd when developed.

As a side note, we acknowledge that the City Planning Department believes that only 545 residential units have been added since the HNA. While this issue (545 total units vs. 940 total units) is certainly not dispositive in favor of the applicant, we take significant issue with the 545 figure. In particular, this figure is based on the argument that the 264 multi-family units known as the Nyberg Tualatin Apartments, which are still under construction, should not be counted. To resolve this difference, it is important to read the HNA to determine if those 264 units, from that particular parcel, were counted as part of existing inventory in the HNA, or vacant land was part of the buildable land inventory, with future construction of units to count toward the goal of 1,014 . It has to be one or the other: either part of existing inventory or not. When you read the HNA, it becomes very clear that those 264 units were not counted as part of the existing inventory. Instead, the land which those units are being built on, was specifically identified as part of Tualatin's "Buildable Land Inventory" (BLI) (see pages 7-8 of the HNA). In addition the applicant has even stated that 80% of the HNA has been met and 800 units of housing has been approved in Tualatin within the same time frame, even though these figures exclude outright entitled units.

In particular, the land in question is specifically included in the Buildable Land Inventory as "vacant" (see Exhibit 8 from the HNA; copy attached as Exhibit B here).

The land in question was also identified as part of the BLI with a zoning designation of High Density Residential (see Exhibit 9 from the HNA; copy attached as Exhibit F).

This makes sense, as final architectural approval for this project did not happen until December of 2019.

The bottom line is these 264 units were not included in Tualatin's existing inventory, and the land was included in the building land inventory, meaning that these units, when finally approved (which happened in December, 4th 2019), count toward reaching the goal of 1,014 units.

c. Proposed PTA and PMA are not in conformity with applicable goals and policies of the Tualatin Comprehensive Plan – School District

If the proposed development is approved, children living in the new 276 apartment units would be part of the Sherwood School District, even though they are a short walk from Tualatin High School and Byrom Elementary School. This would mean that the children would be bused or driven significant distances to and from all Sherwood schools, as the chart below illustrates.

Grade Level	Distance to Grade School; Mode of Transportation	Distance to Middle School	Distance to High School
To Sherwood School District	6 miles; Bus or car	6 miles; Bus or car	7.7 miles; Bus or car
To Tualatin School District	Byrom Elementary; Approximately 1 mile; walk or bike	Hazelbrook Middle School 4 miles; bus or car	Tualatin High School; Less than 1 mile; walk or bike

These additional school bus trips, along with trips by parents driving children to and from school, are against the comprehensive plan goals relating to transportation, and clearly not in the public interest. Instead of walking to school, which is healthy exercise for children, children will be bused or driven, resulting in a bigger carbon footprint, less exercise, and also less sleep (sleep is an important factor for both parents and children). Not to mention the additional cost of busing. Also note that the additional cross town bus trips required by this school district may not be addressed in the Traffic Impact Analysis in total daily trip counts generated by the Norwood developments. For these reasons, there is substantial evidence that the application is not in conformity with the goals and policies of the Tualatin Comprehensive Plan.

d. Proposed PTA and PMA are not in conformity with applicable goals and policies of the Tualatin Comprehensive Plan – Walkable Amenities

On April 20, 2023,the Tualatin Planning Commission voted 5-1 to recommend denial of both the PTA and PMA to the City Council. The decision was based on deliberations that included:

- Comprehensive Plan Goal 3.1 (20-year land supply consistent with needs identified in HNA) was not met because the proposed map amendment would create a surplus of RH-HR zoning (i.e. the deficit is 4 acres and 9.2 acres is proposed); and

- The proposed text and map amendments would not be consistent with the objectives of Comprehensive Plan Chapter 10 for the RH-HR that the district "support housing at the greatest density of household living in areas with the greatest access to amenities."

As noted above, the Norwood site is not located within walking distance of any amenities. Mass transit, grocery, libraries, rail lines, restaurants or retail are within walking distance. Not even the applicable public schools at any grade level are within walking distance. There is only one bus stop (TriMet). However, we understand that this particular line has limited runs and is set to be canceled (See Exhibit B). Under any reasonable review of the application, the applicant fails to meet goals and plans of the Comprehensive Plan in this regard. Clearly the Norwood site does not pair the "greatest density" with the "greatest access to amenities." In fact, it fails miserably in this regard. As indicated above, there are a number of other sites that can do this, including those bare lots in the downtown core, along with other redevelopment opportunities.

In addition, we submit for the record the written notes of Tualatin Planning Commissioner Randall Hledik, which outlines in detail the applicant's failure to meet a number of code criteria, including proximity to amenities. A copy of Commissioner Hledik's notes is attached as Exhibit E.

Also see additional case studies, examples and arguments against these applications in Exhibit A.

Conclusion:

For these reasons, we submit that there is ample evidence that the PTA and PMA are not in the public interest, do not meet all the code criteria, and that therefore, the Mayor and the City Commissioners agree with the recommendation of the Planning Commission and reject the applications.

Thank you,

Concerned Community of Tualatin

Per TDC 33.070 the PTA and PMA applications for Norwood Rd should be denied based on the following criteria within the following provided exhibits.

TDC 33.070

Granting the amendment is **not** the public interest

- Granting the amendment is **not** timely
- The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

  The proposed text and map amendments would **not** be consistent with the objectives of Comprehensive Plan Chapter 10 for the RH-HR that the district "support housing at the greatest density of household living in areas with the greatest access to amenities."
- The following factors were **not** consciously considered:
- Various characteristics of the areas of the City;
  - Natural resources
  - The amendment does **not** meet Statewide planning goals and Oregon administrative rules including the Transportation Planning Rule

    (b) In urban areas with a population greater than 25,000 persons, coordinated land use and transportation plans are intended to improve livability and accessibility by promoting the provision of transit service and more efficient performance of existing transportation facilities through transportation system management and demand management measures.
  - The amendment does **not** meets relevant Metro functional plan criteria

    Title 13 (Sections 3.07.1310 – 3.07.1370) – Nature in Neighborhoods

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely

Applicant traffic study does not account for I-5/Elligsen Interchange. ODOT was not contacted regarding impacts and time period for improvement of this interchange 2028-2040.

What Traffic? - YouTube

Modeled Traffic study does represent actual conditions

The site of this proposed land use action is in the vicinity of I-5. ODOT has permitting authority for this facility and an interest in ensuring that this proposed land use is compatible with its safe and efficient operation. A Traffic Impact Analysis (TIA) was prepared by Lancaster Mobley for the proposed map and text amendment dated February 2nd, 2023. ODOT was not contacted during the scoping process and State highway facilities are not included within the study area.

COMMENTS/FINDINGS

The applicant proposes a map amendment from RML and IN to the RH-HR Zone for a 9.2 acre site located in the southeast quadrant of the SW Norwood Rd/Boones Fry Rd intersection. The property is located just west of the recently approved Autumn Sunrise Subdivision (500 residential lots and two commercial lots) adjacent to I-5. A text amendment is also proposed to remove locational factors from RH-HR purpose statement.

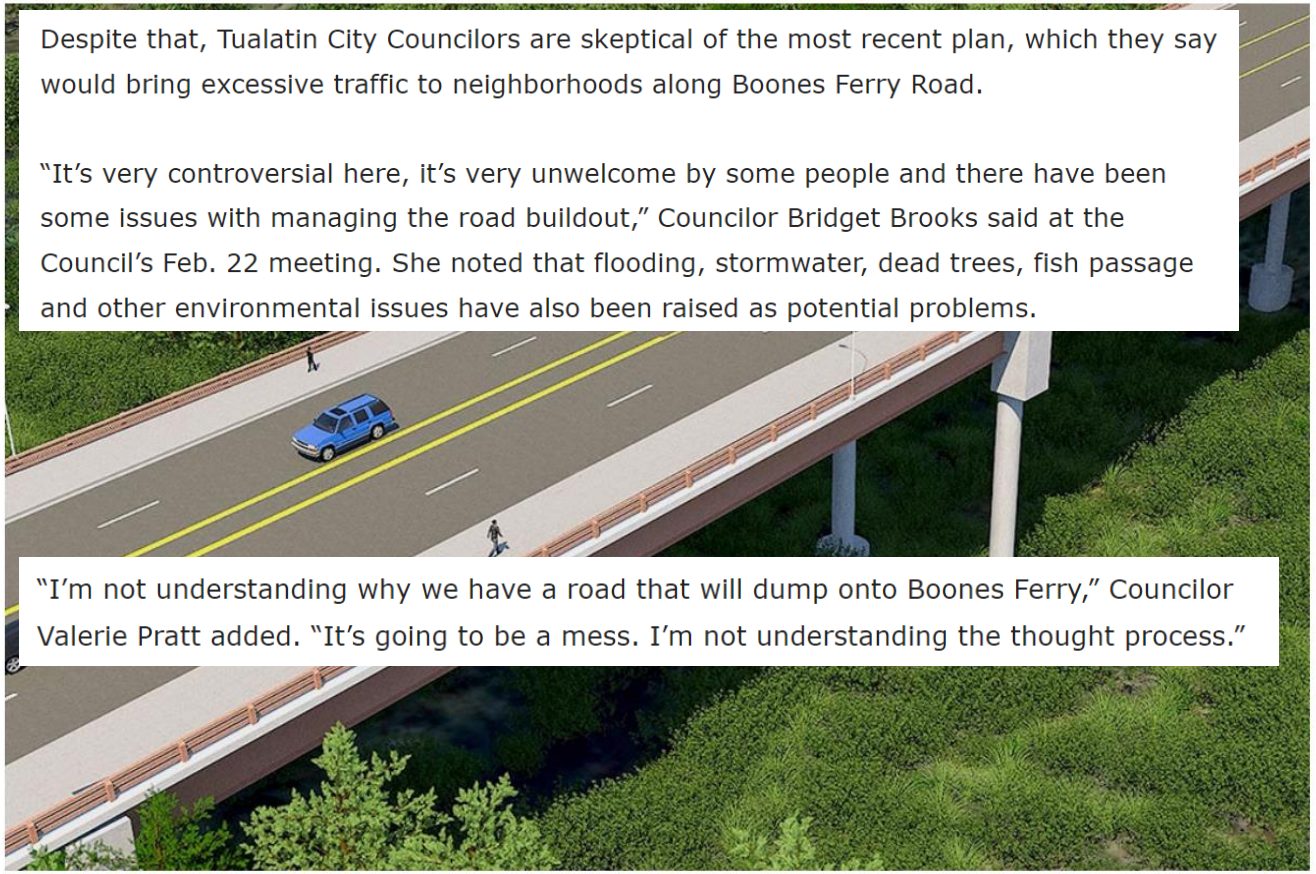
The TIA submitted by Lancaster Mobley dated September 20, 2021 with the Autumn Sunrise Subdivision application, showed that the new development would contribute traffic volume to the I-5 southbound off ramp at the Elligsen Rd interchange. Therefore, ODOT has determined that the proposed plan amendment and subsequent development will likely add traffic to the I-5 interchange at Elligsen Rd.

The 2018 RTP project (11489) proposes to construct a second right-turn lane on the southbound off-ramp. Since the project is on the RTP financially constrained project list, it can be assumed to be in place for the purposes of this plan amendment. The RTP project acknowledges that "conditions are currently congested" and suggests that the time period for the improvement is 2028-2040. Funding for the project has not been committed to date.

ITEM-Attachment-001-357f05551f664fe6b661ed032cef1a3c.pdf (usgovcloudapi.net)

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely, Granting this amendment does not protect natural resources.

Case Study -Lack of current road infrastructure with future Basalt Creek Parkway project- Councilor Pratt and Brooks statements…"It is going to be a mess…"



Despite that, Tualatin City Councilors are skeptical of the most recent plan, which they say would bring excessive traffic to neighborhoods along Boones Ferry Road.

"It's very controversial here, it's very unwelcome by some people and there have been some issues with managing the road buildout," Councilor Bridget Brooks said at the Council's Feb. 22 meeting. She noted that flooding, stormwater, dead trees, fish passage and other environmental issues have also been raised as potential problems.

"I'm not understanding why we have a road that will dump onto Boones Ferry," Councilor Valerie Pratt added. "It's going to be a mess. I'm not understanding the thought process."

The Basalt Creek Parkway would connect Grahams Ferry Road with Boones Ferry Road using a 700-foot long bridge over Basalt Creek. Critics of the $31 million plan say it would have an adverse impact on stormwater runoff and fish passage, as well as on traffic. (COURTESY/WASHINGTON COUNTY)

- Tualatin Life April 21st, 2021 article identifying excessive traffic to the neighborhoods along Boones Ferry Rd.
- Councilor Bridget Brooks, "…there have been some issues with managing road buildout…".
- Councilor Valerie Pratt, "I'm not understanding why we have a road that will dump onto Boones Ferry, It's going to be a mess…".
- Traffic studies form Autumn Sunrise and Plambeck apartments and other developments are only local studies for the developments. It does not have a systemic approach to traffic.
- With the addition of 516 new units and other developments already approved adding an additional 276 apartments will further burden current strained infrastructure.

Basalt Creek Parkway Plan Raises Questions - Tualatin Life

TDC 33.070 Granting the amendment is **not** timely.

Lack of educational institutional infrastructure and planning per TTSD maps. The PMA removes Institutional zones need for possible district expansion.

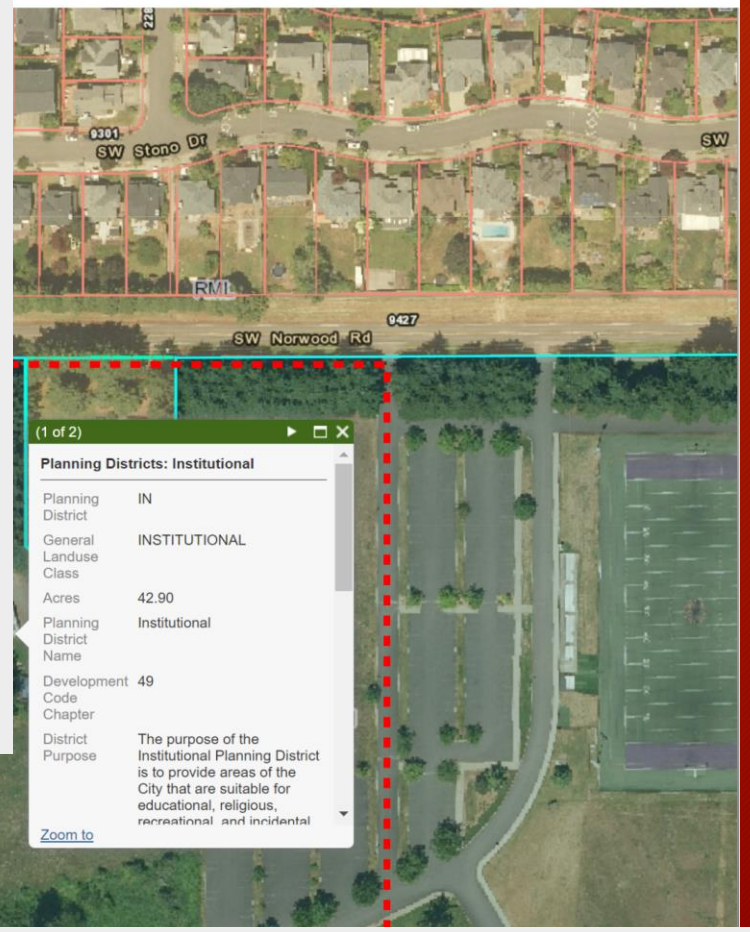
Addition of Autumn Sunrise and Plambeck Apartments 516 homes/condos to school districts plus the affects of Text Amendment RH-HR multifamily addition:

The adjacent neighborhood of Victoria Woods petitioned to be part of the Tualatin-Tigard School District. This neighborhood is within 0.25 miles of Tualatin High School and 0.5 miles from Byrom Elementary. The Sherwood school district closest elementary school is approximately 6 miles from the proposed RH-HR zone which is the designated district for all these developments. As such the residents of Autumn Sunrise, Plambeck apartments and this proposed RH-HR development could also petition to be in the TTSD which are within 0.5 miles from the site location. This cross town trip generation is also not accounted for in the traffic studies and will overburden TTSD.



Removal of existing Institutional zone with no relocation planned.

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. Granting this amendment does **not** protect natural resources, Granting the amendment is not consistent with the objectives and policies regarding potable water, sanitary sewer, and surface water management pursuant to applicable goals and policies in the Tualatin Comprehensive Plan.

Current failing conditions of existing storm water system, during Boones Ferry.

Documentation Of The Failure Of The Existing Stormwater System Along SW Boones Ferry Road

Video-Upstream Stormwater Flooding Property2015

Video-Stormwater Flooding Around Home

The volume, the velocity and the color of the stormwater should be noted.

These photos taken during this flooding event provide a glimpse of the amount of stormwater collected in the stormwater system and allowed to flow downstream, as well as the amount of soil/sediment displacement caused by the flow of the stormwater.

- Location of storm water failure at: 23677 SW Boones Ferry Road Tualatin Oregon 97062
- Currently the city is considering comprehensive plan amendments for 2023 Water Master Plan PTA/PMA23-002 and updating the city comprehensive plan and development code.
- As such since current storm water collection conditions are failing on Boones Ferry, adding additional development in this area will exacerbate the issue. Consider the public interest and timeliness of the RH-HR plan and text amendments should not be approved until the comprehensive plan and improvements are made and are inline with the comprehensive plan and HNA.

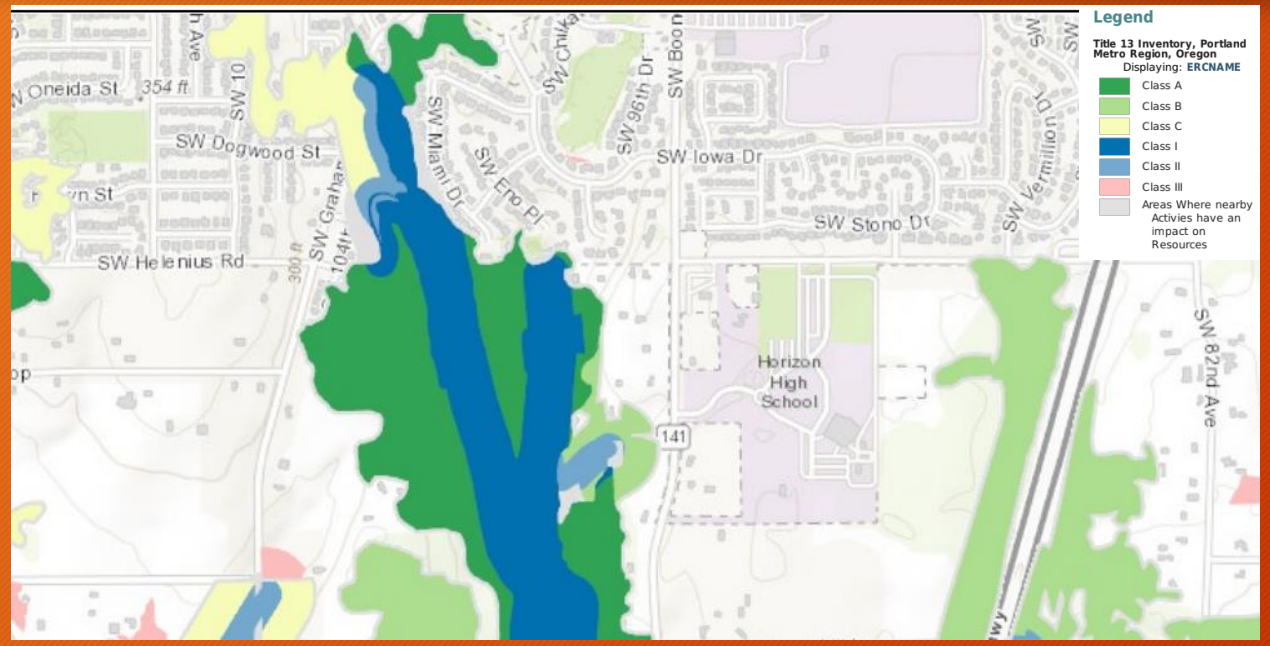
TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. Granting this amendment does **not** protect natural resources. Granting the amendment does **not** meets relevant Metro functional plan criteria

Washington County has ordered a stay for all residential construction within UGBs until new regulation is available October, 2024 to address protections in SNRs



MAP Shows the proposed RH-HR zone is adjacent areas have impact on resources. Existing wetland habitat is missing from Tualatin's SNR map and must be coordinated with Washington County

Metro Title#13
https://databasin.org/datasets/afdbf390255549418f26855af59b2f79/

https://www.washingtoncountyor.gov/current-planning/development-prohibited-some-snr-areas.

The stay applies to residential land division and development applications that would impact mapped Wildlife Habitat areas.

The stay stems from a petition filed with LCDC, asking LCDC to direct the County to update its development standards for housing to be clear and objective, in compliance with a statutory provision (ORS 197.307, as amended by 2017 legislation) designed to increase housing development. **Under the ruling from the state Land Use Board of Appeals (LUBA), the county is undergoing a full Goal 5 process to address protection of Significant Natural Resources (SNR), which will take about 18 months.**

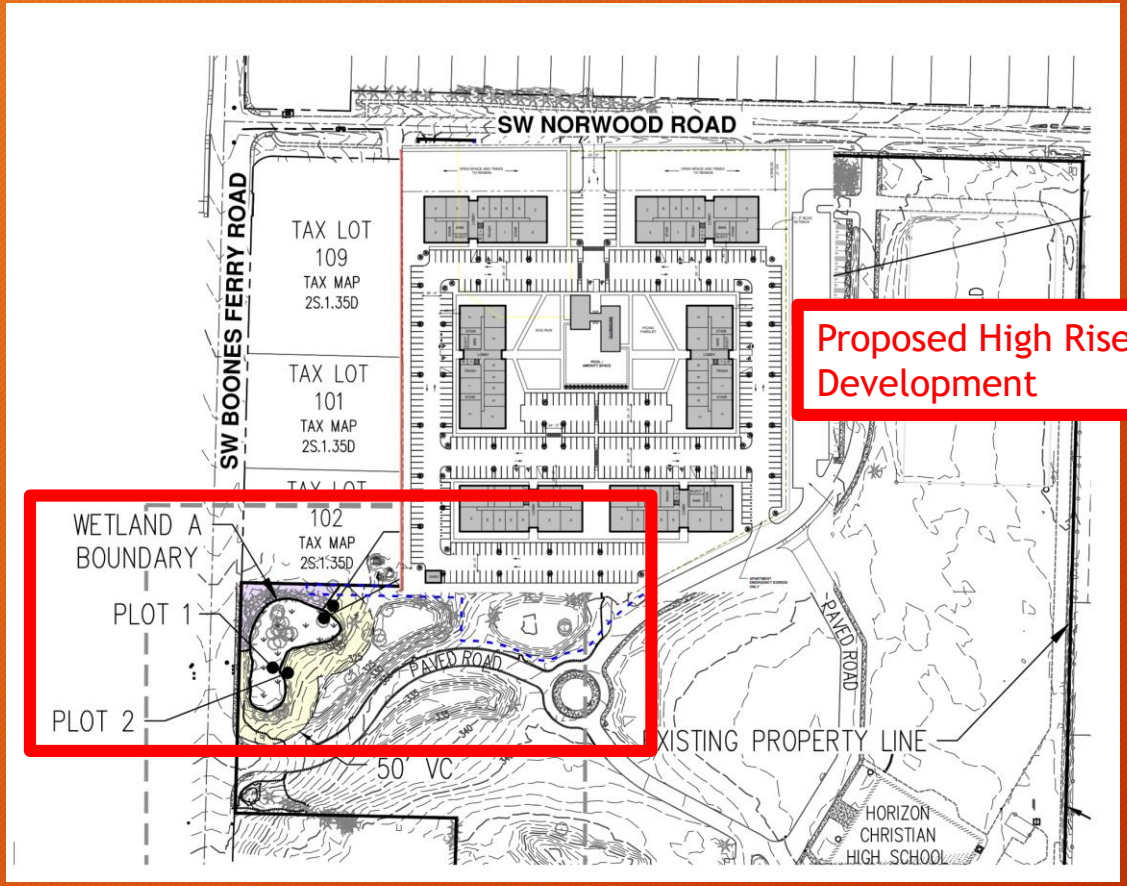
State law requires that the cities and the County adopt consistent and coordinated comprehensive plans. **As a result, the cities and the County must consider one another's planning efforts in the development and implementation of their respective plans.**

TDC Natural Resources Protection Overlay Map 72-1 lists the following, "There may be unmapped wetlands and natural areas subject to regulation", further illustrating the lack of specific details of SNR, especially in coordination with county, Metro, state and federal planning resources.

clean_water_services_spl.pdf (tualatinoregon.gov)

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. Granting this amendment does **not** protect natural resources

The proposed RH-HR site is adjacent to a sensitive area and requires protection.



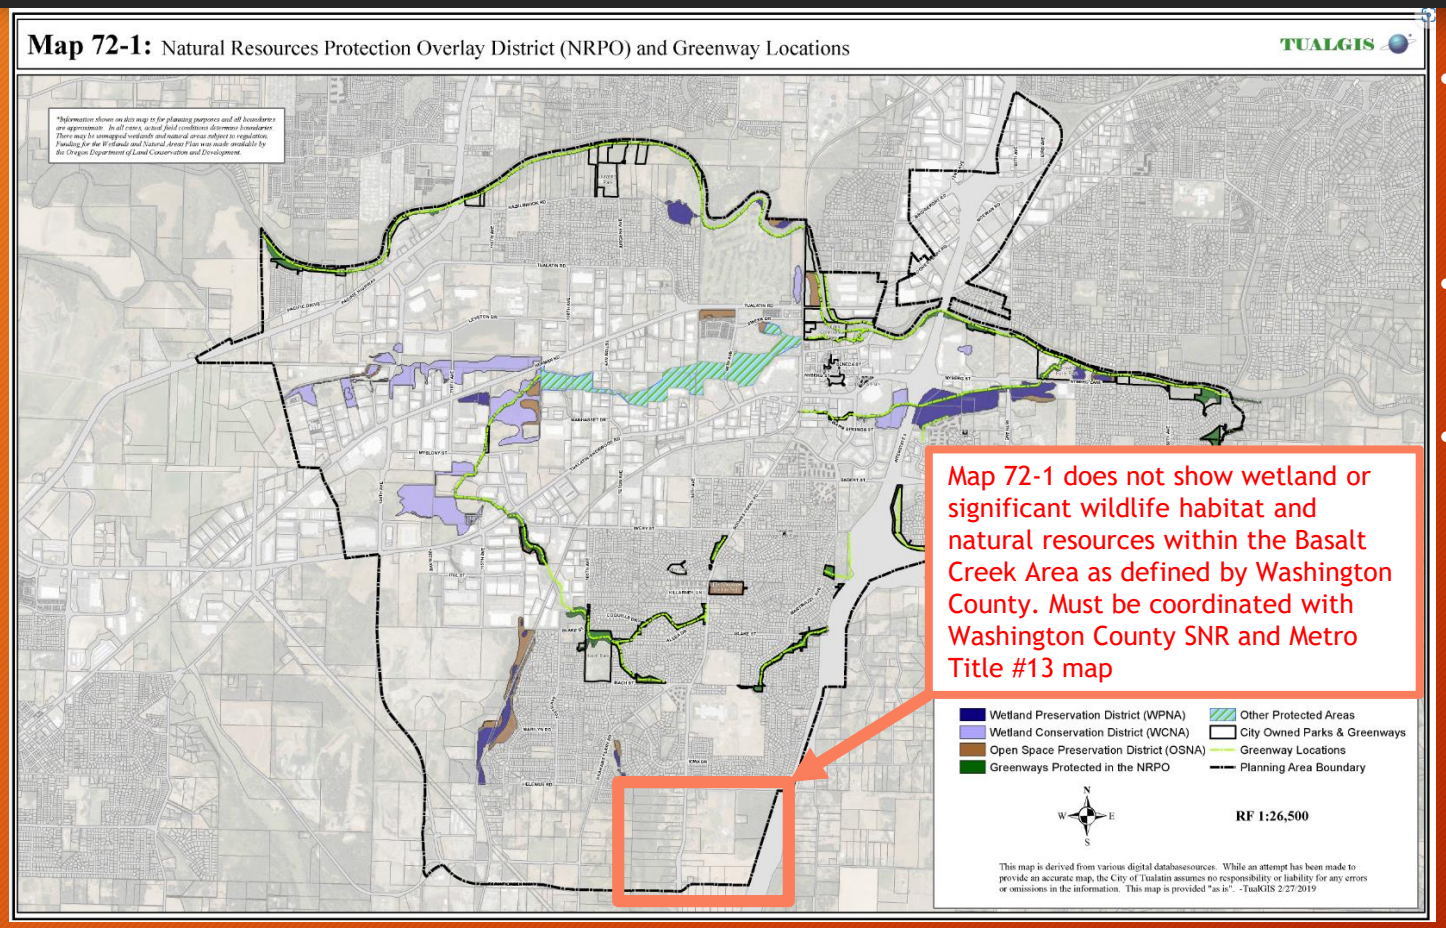
- Tree and wildlife habitat will be removed for the proposed RH-HR development which is adjacent to a “sensitive area.”
- This area is not shown on TDC’s Natural Resources Protection Overlay Map 72-1
- The stay would apply to this site location since it is within 200ft of a wetland habitat.

High-Rise units adjacent to wetland sensitive area, construction will have an impact.

clean_water_services_spl.pdf (tualatinoregon.gov)

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. Granting this amendment does **not** protect natural resources

The proposed RH-HR site is adjacent to a sensitive area and Washington County's Stay would apply to this area.

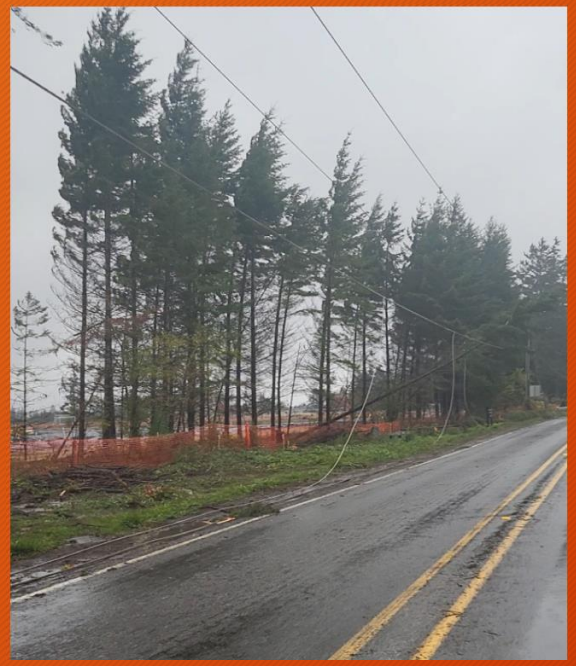


- Tree and wildlife habitat will be removed for the proposed RH-HR development which is adjacent to a "sensitive area."
- This area is not shown on TDC's Natural Resources Protection Overlay Map 72-1
- The stay would apply to this residential development and RH-HR zone change.

High-Rise units adjacent to wetland sensitive area, construction will have an impact.
Map72-1.png (5100×3300) (usgovcloudapi.net)

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. Granting this amendment does **not** protect natural resources

Trees must be removed for the proposed adjacent RH-HR zone. Time is needed for current projects to be completed and for the environment to be rehabilitated.



After image developer harvest

Before SAT image from Google

- Three power outages occurred on November 4th, 2022 due to over harvesting trees on Norwood. 1400 customers lost power. Adequate buffer of trees was not provided causing weaker trees to fall during rain fall. Now all trees have to be removed.
- Removal of wildlife habitat has caused mice and rat infestations around existing neighborhoods of Norwood. This also caused health issues due to dust storms during summer months of construction.

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

RH-HR plan goes against the Basalt Creek Master Plan and Ordinance No. 1418-19. Does not recognize a RH-HR zone of any planned acreage.

Exhibit 2 to
Ordinance No. 1418-19

Development Types

Table 3 Summary of Development Types Identified for Basalt Creek Planning Area by Jurisdiction

Jurisdiction	Land Use Designation	Buildable Acreage	Households		Employment	
			Count	Density per Gross Acre	Count (jobs)	Jobs per Gross Acre
Tualatin	High Density Residential	3.36	67	19.9	-	-
	Medium-Low Density Residential	59.83	374	6.3	-	-
	Low Density Residential	24.83	134	5.4	-	-
	Neighborhood Commercial	2.89	-	-	33	11.3
	Manufacturing Park	92.95	-	-	1,897	20.4
	Functionally Unbuildable	10.37	-	-	-	-
	Tualatin Subtotal	**194.23**	**575**		**1,929**	
Wilsonville	Craft Industrial	1.25	6	4.8	27	21.7
	Light Industrial District	35.30	-	-	581	16.5
	High Tech Employment District	94.47	-	-	1,916	20.3
	Functionally Unbuildable	5.62	-	-	-	-
	Wilsonville Subtotal	**136.64**	**6**		**2,524**	
Total		**330.87**	**581**		**4,453**	

- Exhibit 2 shows no plan for a high density high rise zone (RH-HR).
- High Density area was exceeded by approximately 1.22 acres (Currently 4.66 acres)
- Basalt Creek Master plan is an agreed upon document with Sherwood, Wilsonville, and Metro. Adding a change because a developer request must be agreed upon for modification to this plan.

exhibit_2_-_basalt_creek_concept_plan.pdf (tualatinoregon.gov)

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

The Housing Need Analysis, Current approved units from 2019 to 2023.

- **Tualatin will plan for more single-family attached and multifamily dwelling units in the future to meet the City's housing needs.** Historically, about 53% of Tualatin's housing was single-family detached. New housing in Tualatin is forecast to be 40% single-family detached, 15% single-family attached, and 45% multifamily.

What are the Key Findings of the Housing Needs Analysis?

The key findings of the Tualatin's Housing Needs Analysis are that:

- **Tualatin is planning for 1,014 new dwelling units.** The growth of 1,014 households will result in demand for 1,014 new dwelling units over the 20-year planning period, averaging 51 new dwelling units annually.

hna.pdf (tualatinoregon.gov)
https://www.tualatinoregon.gov/projects

Within 4 years the City has already met 92% of with approved and entitled units of a 20 year plan. 16 years remain to provide the additional 74 units.

- Alden Apartments, 45 townhome addition RMH
- Plambeck Garden Apartments, 116 units, RH
- Tualatin Height Apartments zone change, 116 more units, RMH.
- Autumn Sunrise, 400 mixed family, RML.
- Nyberg Tualatin Apartments, 264 units, RH

Total additional multifamily units: **496** units
Total single family units: **445**
Total approved units: **941** within the first three years

53% of all new units entitled and approved are multifamily exceeding the housing needs analysis ratios. This is without the addition of the proposed RH-HR zone on Norwood which would add 276 more multifamily units. Ratio would increase to **75%** with this text and plan amendment.

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

The Housing Need Analysis, 20 year plan. In the first four years 940 single family and multifamily units have been approved.

What are the Key Findings of the Housing Needs Analysis?

The key findings of the Tualatin's Housing Needs Analysis are that:

- **Tualatin is planning for 1,014 new dwelling units.** The growth of 1,014 households will result in demand for 1,014 new dwelling units over the 20-year planning period, averaging 51 new dwelling units annually.

Exhibit 3. Buildable acres in vacant and partially vacant tax lots by Plan Designation, Tualatin Planning Area, 2018

Source: Metro BLI, ECONorthwest Analysis. *Note: The numbers in the table may not sum to the total as a result of rounding.*

Generalized Plan Designation	Total buildable acres	Buildable acres on vacant lots	Buildable acres on partially vacant lots
Residential			
Low Density Residential	79	11	68
Medium Low Density Residential	1	0	1
Medium High Density Residential	1	1	0
High Density High Rise Residential	0	0	0
High Density Residential	12	12	0
Commercial			
Mixed-Use Commercial Overlay Zone	0	0	0
Central Tualatin Overlay Zone	0	0	0
Basalt Creek Planning Area			
Low Density Residential	76	2	74
Medium Low Density Residential	69	49	20
High Density Residential	5	0	5
Neighborhood Commercial	0	0	0
Total	**244**	**75**	**168**

hna.pdf (tualatinoregon.gov)

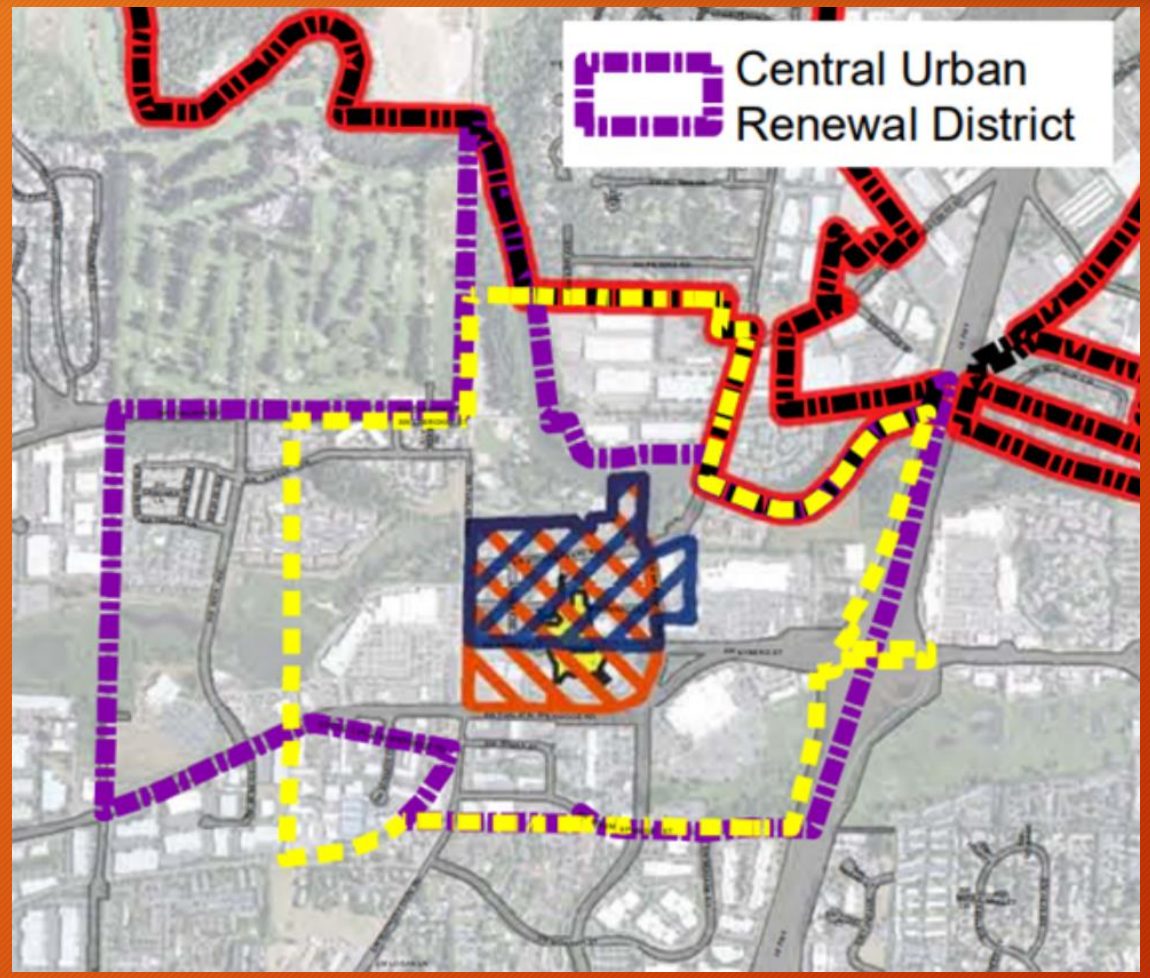
- **Since December 2019 941 units have been approved by the city. That is a 92% of the 1014 units planned by 2040.**
- The rate of growth far exceeds the capacity of available infrastructure.
  - The city does not understand the systemic impact of 941 units in a three year span. Time is needed to adjust to the new residential load.
- Basalt Creek plan has no mention of RH-HR zone

HB2001: **Transition Likely Gradual**
While the law allows more housing types, DLCD expects the transformation of housing choices to be gradual.

- Current growth outpaces available supporting infrastructure

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

RH-HR zone text amendment will allow other developers to follow suit. The central urban renewal district is far from fully developed.



Current TDC code language: High-rises are reserved for the core only:

TDC 44.100. - Purpose. The purpose of the High-Density High Rise (RH-HR) zone is to provide areas of the City within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club that are suitable for high density apartment or condominium towers.

Next slides shows example properties that could be developed for a HR in downtown Tualatin..

Nowhere in the current zoning district maps is an RH-HR zone located next to a RL and RML zones.

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

Current viable properties for sale that could be zoned RH-HR adjacent to the core of Tualatin. These areas are walking distance to amenities such as central city transit.

Current Commercial that has been unoccupied for 8 years (Haggen's) does not seem viable as CC could rezone to CC/RH-HR adjacent to an outright RH-HR zone.

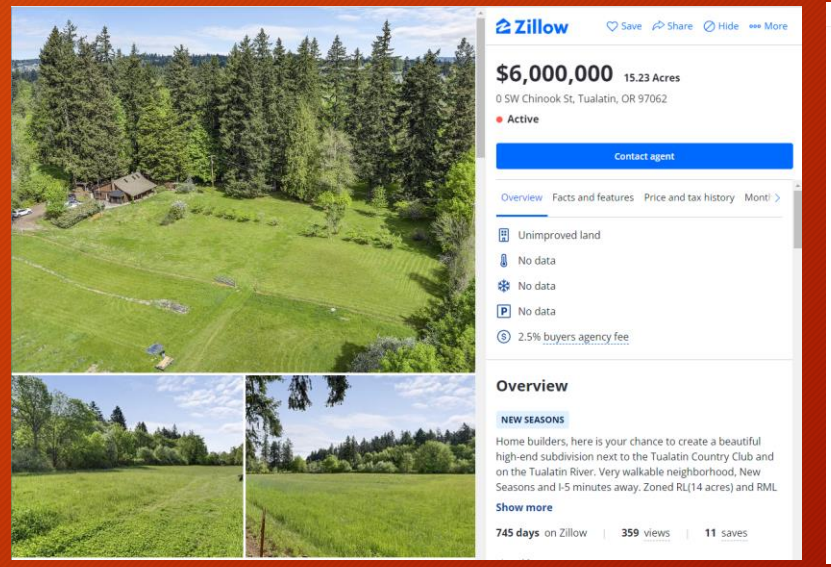
Land currently for sale in the core. Refer to the provided Exhibit C for additional properties.

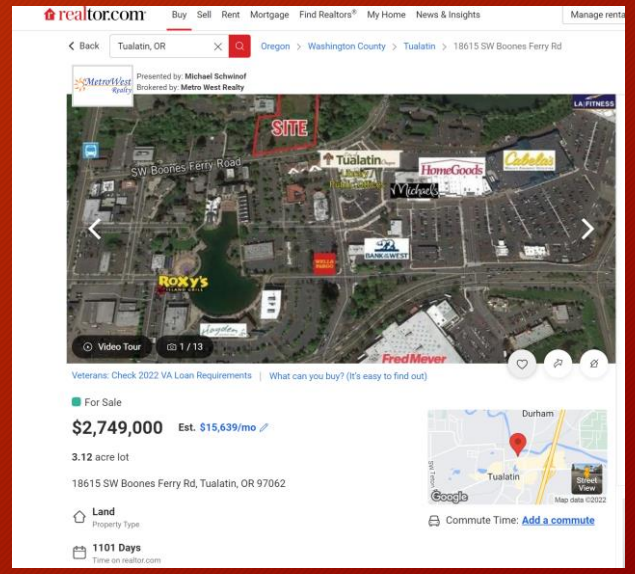
15.23 acres- for sale available in the core of Tualatin

0 SW Chinook St, Tualatin, OR 97062 | MLS #21383176 | Zillow

3.21 acres- for sale available in the core of Tualatin

18615 SW Boones Ferry Rd, Tualatin, OR 97062 | MLS# 19079549 | Redfin





TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

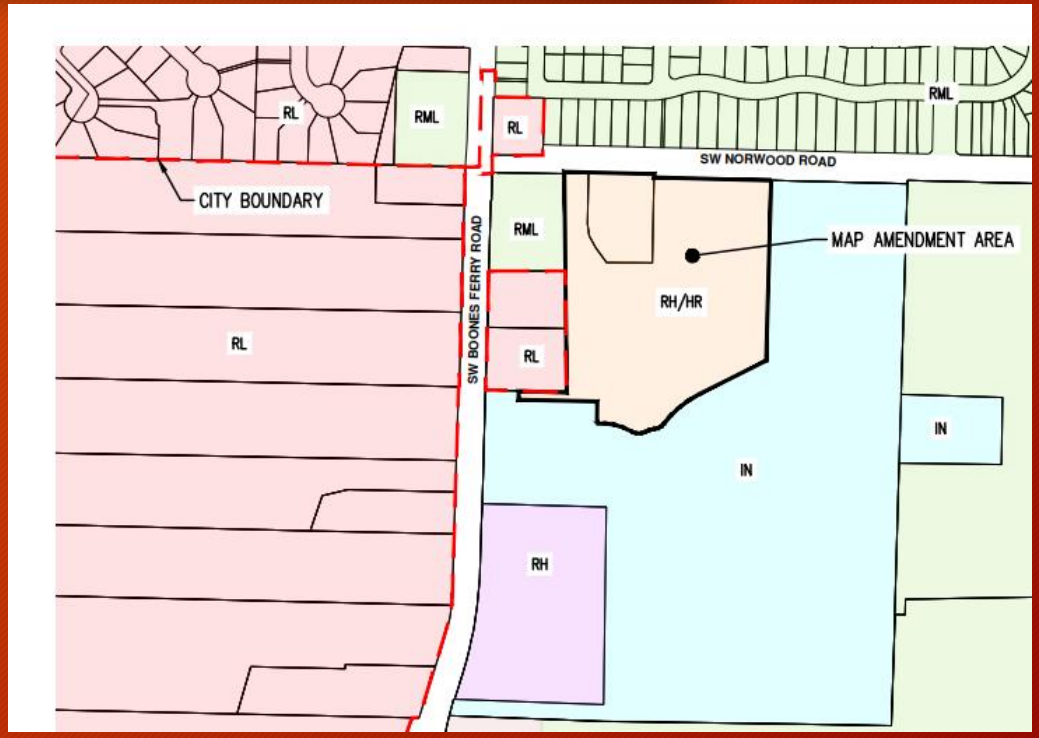
Text and Plan Amendment does not serve the City's or Public Interests and is not in context.

CHAPTER 44 HIGH DENSITY HIGH RISE ZONE (RH-HR)

TDC 44.100. Purpose.

The purpose of the High Density High Rise (RH-HR) zone is to provide areas of the City ~~within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club~~ that are suitable for high density apartment or condominium~~s towers~~.

Nowhere in the current zoning district map of any area in Tualatin is an RH-HR zone located next to a RL and RML zones. This text amendment also negates Tualatin Core Opportunity Investment Area and is not in the City's best interest. The development is not in context of the surrounding designated land use zones.



proposed_development_code.pdf (tualatinoregon.gov)

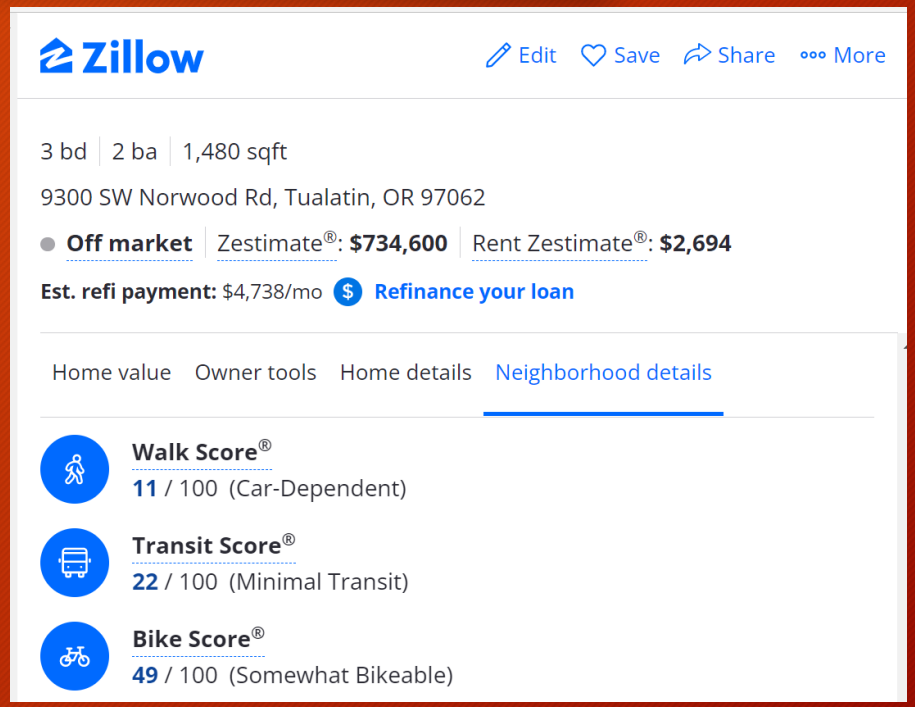
existing_and_proposed_zoning_maps.pdf (tualatinoregon.gov)

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

The Housing Need Analysis, Demographics indicate the need for walkable areas, with access to services. Norwood Rd has neither…

- **Tualatin will plan for more single-family attached and multifamily dwelling units in the future to meet the City's housing needs.** Historically, about 53% of Tualatin's housing was single-family detached. New housing in Tualatin is forecast to be 40% single-family detached, 15% single-family attached, and 45% multifamily.
    - The factors driving the shift in types of housing needed in Tualatin include changes in demographics and decreases in housing affordability. The aging of senior populations and the household formation of young adults will drive demand for renter- and owner-occupied housing, such as small single-family detached housing, townhouses, duplexes, and apartments / condominiums. Both groups may prefer housing in walkable neighborhoods, with access to services.

hna.pdf (tualatinoregon.gov)



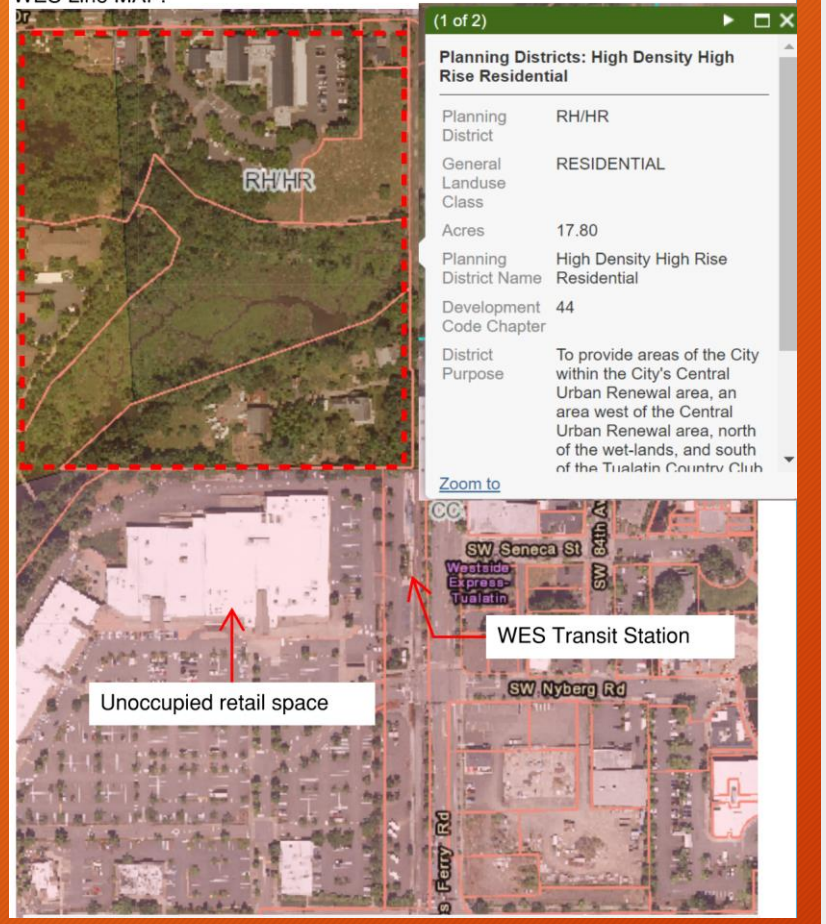
9300 SW Norwood Rd, Tualatin, OR 97062 | Zillow

- Per the housing need analysis demographics indicate, *"Both groups may prefer housing in walkable neighborhoods, with access to services."*
- *Zillow walking score from proposed RH-HR zone on Norwood is 11/100. Transit Score is 22/100*
- *No local services are present with the area off of Norwood Rd.*

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

Location of unused Existing RH-HR zone downtown Tualatin next to existing public transportation and retail zones.

Exhibit C -Existing RH-HR zone undeveloped by Westside Transit Station and WES Line MAP.



- Better use of Existing RH-HR zones, planning and infrastructure.
- Utilizes Existing WES transit more efficiently for commuting.
- Directly supports the Basalt Creek Employment center
- Spreads population burdens of districting over multiple schools
- Mimics Portland, Clackamas, etc. HR zones near central public transit stations.

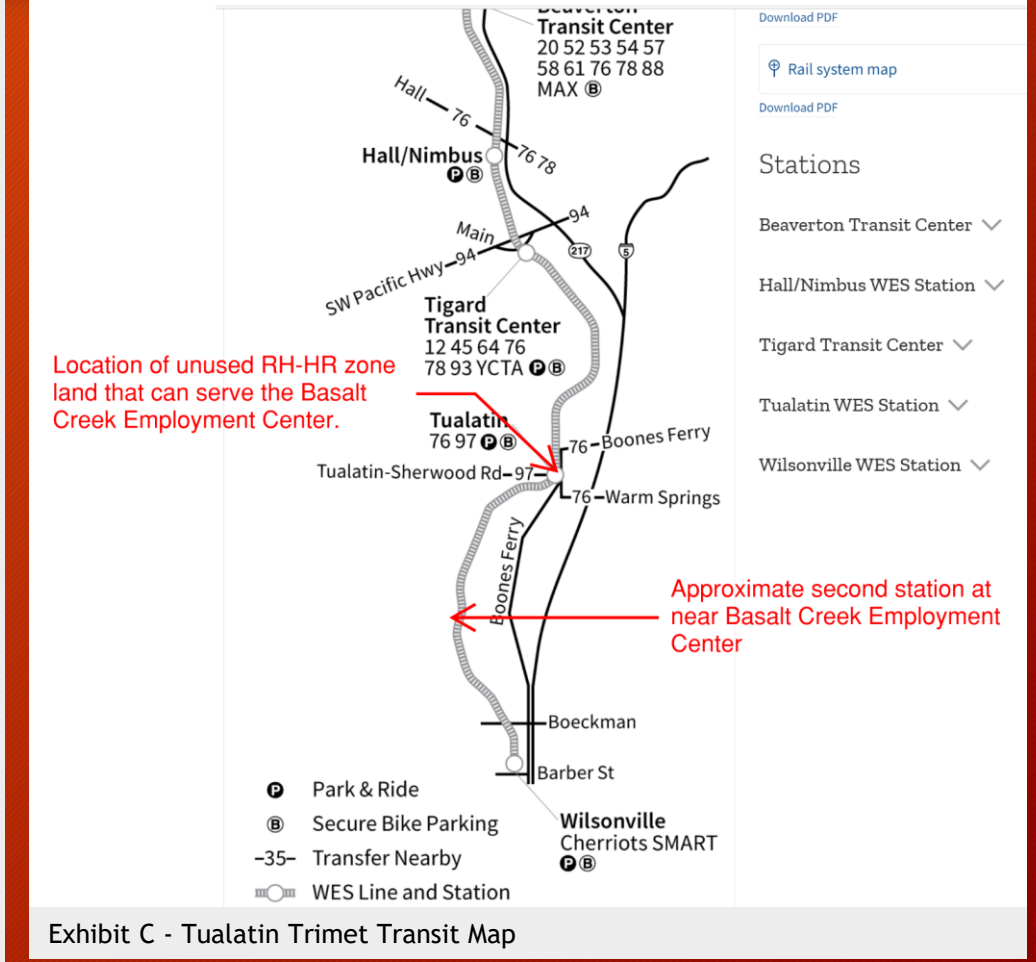


Exhibit C - Tualatin Trimet Transit Map

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan

The City has documented viable property for Tualatin's core opportunity investment area in the 18970 Catalyst Project. An RH-HR on Norwood is in direct conflict with this plan as the core is outright zoned for RH-HR development.

COMMUNITY IDENTITY

18970 CATALYST PROJECT

PLAN EFFORT VALUES & PRIORITIES

WHY THIS AREA?

1. Focus on keeping future redevelopment **near major transportation** modes.
2. **Enhance current employment lands** by increasing capacity.
3. **Prepare** for major regional transportation projects.
4. Remedy areas that are prone to **environmental issues**, i.e. flooding.
5. Enhance existing **connectivity**, or provide new connectivity.
6. Fund major infrastructure projects to prepare for **future growth**, leverage area for needs.
7. Based on previous **community needs and desires.**

PLAN EFFORT VALUES & PRIORITIES

VALUES

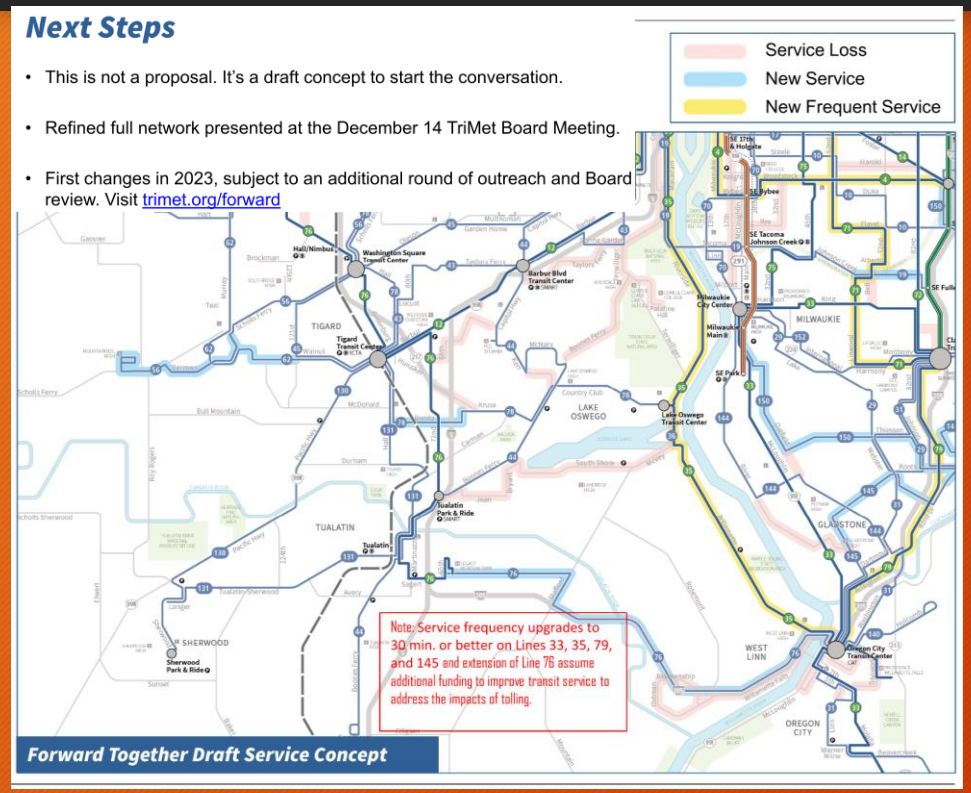
1. More housing
2. Leave no existing business behind
3. Enhance connectivity
4. Foster, create, enhance, and promote identity
5. Maintain and grow existing employment lands
6. Economic prosperity for ALL.

PRIORITIES

MEET-Packet-d1d5f98350ce45338622a703817067fd.pdf (usgovcloudapi.net)

TDC 33.070 Granting the amendment is **not** the public interest, Granting the amendment is **not** timely. The amendment is **not** in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan, The amendment does **not** meet Statewide planning goals and Oregon administrative rules including the Transportation Planning Rule. The amendment does **not** meet relevant Metro functional plan criteria.

Utilizing existing WES Transit in the core of Tualatin is inline with TRIMET's vision of increased ridership with current available transit infrastructure. Public bus transit near Norwood will be discontinued.

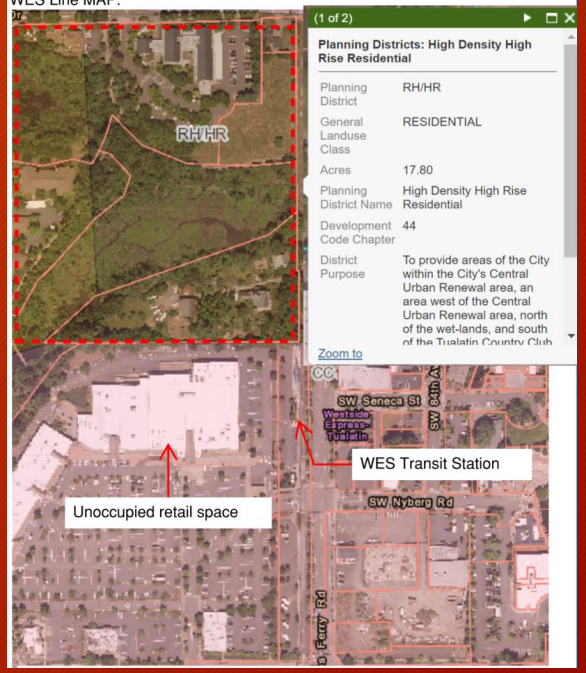


Trimet is trying to increase ridership since COVID. Based on these findings there will be limited public transit available on Norwood Rd with loss of line 96. Line 44 is in the draft concept stage and will not be available for the foreseeable future. Until line 44 is serviceable the PTA and PMA applications are not timely for this location when WES is available in the CORE near an outright RH-HR zoned area.

Assistant Director of Planning, Steve Koper's statement, "…work with the DLCD and partners to find a solution to our traffic issues."

planning period. Director Koper stated there is a lot of employment in our city that passes through traffic in relationship to I-5, which gives us a unique position relative to other cities. He stated it will be best for the City to work with DLCD and partners to find a solution to our traffic issues.

Exhibit C -Existing RH-HR zone undeveloped by Westside Transit Station and WES Line MAP.



MEET-Packet-d1d5f98350ce45338622a703817067fd.pdf (usgovcloudapi.net)

Per TDC 33.070 the PTA and PMA applications for Norwood Rd should be denied based on the following criteria

TDC 33.070. - Plan Amendments.
SHARE LINK TO SECTIONPRINT SECTIONDOWNLOAD (DOCX) OF SECTIONSEMAIL SECTIONCOMPARE VERSIONS

(1) *Purpose.* To provide processes for the review of proposed amendments to the Zone Standards of the Tualatin Development Code and to the Text or the Plan Map of the Tualatin Comprehensive Plan.

(2) *Applicability.* Quasi-judicial amendments may be initiated by the City Council, the City staff, or by a property owner or person authorized in writing by the property owner. Legislative amendments may only be initiated by the City Council.

(3) *Procedure Type.*

(a) Map or text amendment applications which are quasi-judicial in nature (e.g. for a specific property or a limited number of properties) is subject to Type IV-A Review in accordance with TDC Chapter 32.

(b) Map or text amendment applications which are legislative in nature are subject to Type IV-B Review in accordance with TDC Chapter 32.

(4) *Specific Submittal Requirements.* An application for a plan map or text amendment must comply with the general submittal requirements in TDC 32.140 (Application Submittal).

(5) *Approval Criteria.*

(a) Granting the amendment is in the public interest. **Based on the evidence provided in this document a plan and text amendment is not in the public's interest.**

(b) The public interest is best protected by granting the amendment at this time. **The public interest is not protected, as the proposed amendment will exacerbate current failing infrastructure gaps as defined in this document.**

(c) The proposed amendment is in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan. **The proposed amendment does not comply with Tualatin Core opportunity plan or comprehensive plan documents.**

(d) The following factors were consciously considered:

(i) The various characteristics of the areas in the City; **RH-HR zone is reserved for the central core of Tualatin within the current text. The characteristics of the area on Norwood are RL and RML homes adjacent to the site. The plan and text amendment is also in direct conflict with Tualatin's Core Opportunity Plan.**

(ii) The suitability of the areas for particular land uses and improvements in the areas;

(iii) Trends in land improvement and development;

(iv)

Per TDC 33.070 the PTA and PMA applications for Norwood Rd should be denied based on the following criteria

Property values;

(v)

The needs of economic enterprises and the future development of the area; needed right-of-way and access for and to particular sites in the area;

(vi)

Natural resources of the City and the protection and conservation of said resources; **Due to the site being adjacent to what Clean Water Services defines as a "Sensitive Area" and Washington County's stay regarding SNRs; development cannot continue until revision of the Tualatin's SNR map and the development code identifying natural wildlife habitat that is missing from map 72-1. With current conditions these applications do not meet this criteria and they are not timely until these areas are evaluated and documented by Tualatin.**

(vii)

Prospective requirements for the development of natural resources in the City;

(viii)

The public need for healthful, safe, esthetic surroundings and conditions; and

(ix)

Proof of change in a neighborhood or area, or a mistake in the Plan Text or Plan Map for the property under consideration are additional relevant factors to consider.

(e)

If the amendment involves residential uses, then the appropriate school district or districts must be able to reasonably accommodate additional residential capacity by means determined by any affected school district.

(f)

Granting the amendment is consistent with the applicable State of Oregon Planning Goals and applicable Oregon Administrative Rules, including compliance with the Transportation Planning Rule TPR (OAR 660-012-0060).

(g)

Granting the amendment is consistent with the Metropolitan Service District's Urban Growth Management Functional Plan.

(h)

Granting the amendment is consistent with Level of Service F for the p.m. peak hour and E for the one-half hour before and after the p.m. peak hour for the Town Center 2040 Design Type (Comprehensive Plan Map 10-4), and E/E for the rest of the 2040 Design Types in the City's planning area.

(i)

Granting the amendment is consistent with the objectives and policies regarding potable water, sanitary sewer, and surface water management pursuant to applicable goals and policies in the Tualatin Comprehensive Plan, water management issues are adequately addressed during development or redevelopment anticipated to follow the granting of a plan amendment. **Tualatin Comprehensive plan does not adequately address current developments. Tualatin is currently reviewing a PTA and PMA for the water district comprehensive plan. These applications do not meet this criteria as stated until Tualatin adequately addresses current water management issues and these applications are no timely.**

(j)

The applicant has entered into a development agreement. This criterion applies only to an amendment specific to property within the Urban Planning Area (UPA), also known as the Planning Area Boundary (PAB), as defined in both the Urban Growth Management Agreement (UGMA) with Clackamas County and the Urban Planning Area Agreement (UPAA) with Washington County.

Conclusion – RH-HR plan amendment change on Norwood Rd should be denied as indicated by the planning commission vision, ordinances, and public's interest.

1) A RH-HR, plan and text amendment change on Norwood Rd from Institutional and RML is not compliant with the Basalt Creek Master Plan

2) A RH-HR plan and text amendment change on Norwood Rd is in violation of Ordinance 1418-19 for development land use types allowed in the Basalt Creek Master Plan and must be reviewed with other government bodies.

3) A RH-HR plan and text amendment change is not in the public nor City's interest. Removing restrictions to where a RH-HR zone is located will not allow the Tualatin's Core Opportunity initiative to develop

4) A RH-HR, plan and text amendment change on Norwood Rd doesn't allow for sufficient infrastructure support for the new and current residents based on the 20 year plan and is not timely.

5) 92% of units indicated in the HNA and comprehensive plan was met within 4 years of the 20 year plan. Tualatin has 16 years to evaluated the additional (74) units of housing needed per the HNA (1014). These applications are not timely.

6) The Tualatin Planning Commission voted 5-1 to recommend denial of both the plan text and plan map amendments to City Council

Per Tualatin Development Code (33.070), the plan and text amendment to add 9.2 acres for a RH-HR zone on Norwood Rd should be denied.

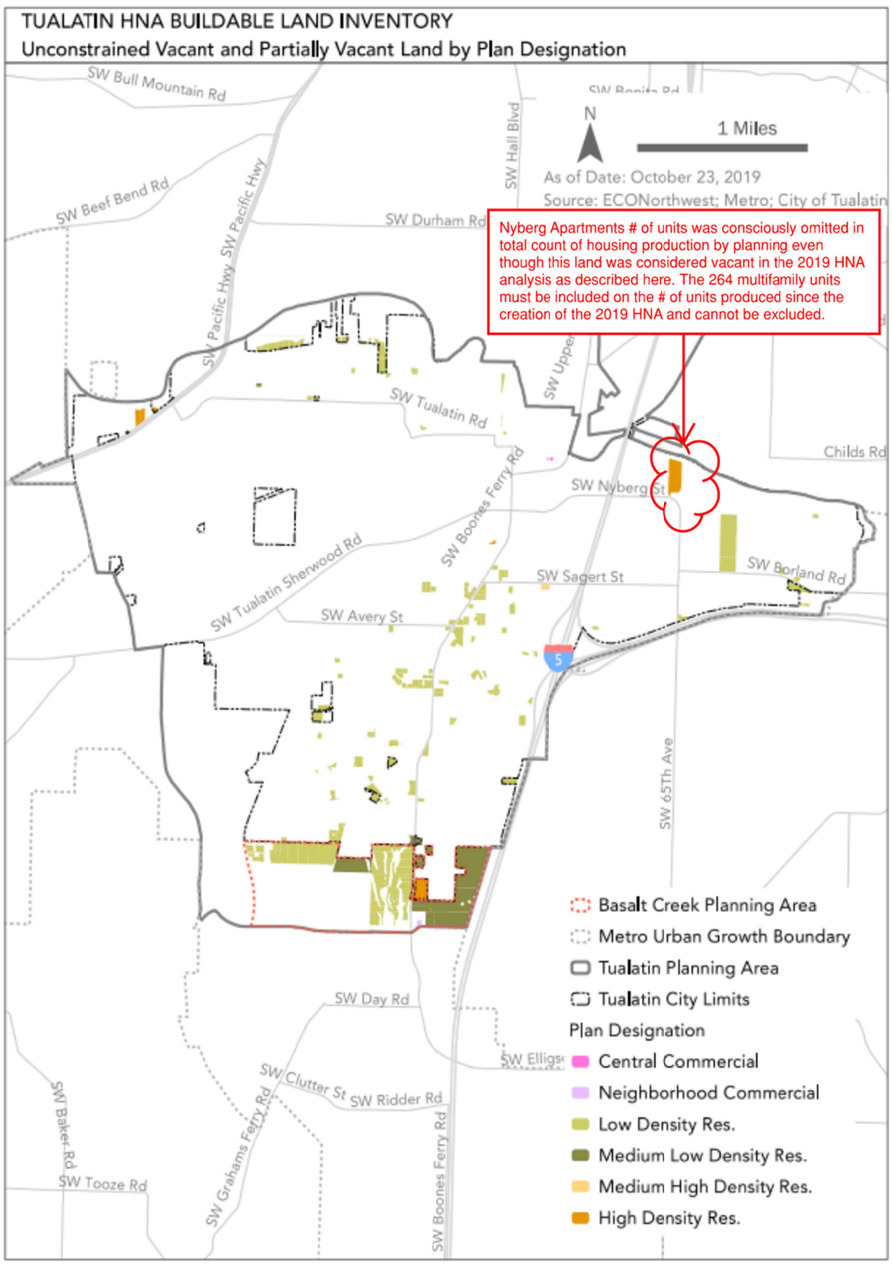
Nyberg Apartments** (Commons on the Tualatin River)	Multi-family	**December, 4th, 2019***	264	0	https://www.tualatinoregon.gov/planning/ar18-0007-tualatin-apartments
Total approved current and planned housing units	N/A	As of Today	941	0	**Units and housing production approved between December 2019 - Today****

***Final decision for this development was December 4th, 2019 per the Architectural Review Board's process for requests to appeal and this development fall under time frame of the HNA for inclusion as signed by Patrick Gaynor, Acting Chair of the Architectural Review Board at that time. NOTE: These units were specifically NOT included in the existing housing inventory of the 2019 Housing Needs Analysis. In fact, under Exhibits 9 in the HNA, this land is shown as "VACANT." See pages 11 and 12 in the HNA. Therefore, the additional 264 units are clearly new units which count toward the overall goal of 1,014 units. There is no basis to exclude the new units, which are still under construction, as counting toward the goal of 1,014 units.**

**** The applicant has also indicated with verbal and written testimony that Tualatin has produced a minimum of 800 units of housing since the December 2019 HNA, and that 80% of housing needs have been met within the first 4 year of the 20-year plan. Here, it is important to note that, within its 800 count, the applicant correctly includes the 264 new units of the Nyberg Apartments currently under construction. The applicant excludes the Tualatin Heights Apartments, which zone change was approved on February 22, 2022, and thus it is fully entitled. Only architectural review remains. Because the Tualatin Heights Apartments are fully entitled, architectural review should not be used to exclude those 116 units from counting toward the goal of 1,014 units.**

Exhibit 9. Unconstrained Vacant and Partially Vacant Residential Land, Tualatin Planning Area, 2019



Findings and Analysis based on the 2019 HNA and OAR 660-007 current and planned Tualatin housing production (pg.80)

https://mccmeetingspublic.blob.core.usgovcloudapi.net/tualtnor-meet-5d3fca29f6c44734b07f10f05aaa5c3c/ITEM-Attachment-001-a936ee56156b45ef96f29db253fb32f2.pdf

HNA unit type and requirement per Exhibit 88*	# Unit type approved	% of type of housing per category (1014)	surplus/deficit (units)-based on HNA ratios	Comments
Total new single family detached (HNA defines this category to 40%)	**322**	**31.76%**	**-84**	Current ratio indicates 31.7% of new approved housing is single-family detached. Per the HNA Tualatin is anticipating adding 1014 units of housing by 2040, Tualatin is not complying with this ratio. In order to maintain this ratio an additional 84 units of single family detached homes would be needed by 2040 before approving additional multifamily units.
Total new housing that is single family attached (HNA defines this category to 15%)	**127**	**13.60%**	**-25**	Current ratio indicates 12.5% of new approved housing is single-family attached. Per the HNA Tualatin is anticipating adding 1014 units of housing by 2040, Tualatin is not complying with this ratio. In order to maintain this ratio an additional 25 units of single family detached homes would be needed by 2040 before approving additional multifamily units.
Total new housing that is Multifamily (HNA defines this category to 45%)	**496**	**48.92%**	**91**	Current ratio indicates 49% of new approved housing is multifamily. Per the HNA Tualatin is anticipating adding 1014 units of housing by 2040, Tualatin is not complying with this ratio. In order to maintain the HNA ratio Tualatin must first reduce the production of multifamily housing and add additional units of single family attached and detached homes before any other multi-family housing units are to be considered.
Total units with zone changes (HNA defines this to 1014 units by 2040)	**941**	**92.80%**	**203 unit surplus with the proposed RH-HR zone for within the year 2023** **1217 units would far exceed the 1014 units needed by 2040 over the 20 year plan**	Current housing production complies with 93% of the housing needs analysis and is inline with the housing production strategies of the HNA even though this was achieved in a 4 year period. Additional analysis indicates to maintain forecasted demand (including city limits and the Basalt Creek, There will be a deficit of (109) single family detached and attached units. It is recommended at this time that the current land use category of RML be maintained as this will provide the deficient identified in this analysis and maintain city wide housing production needs and forecasts until 2040 as prescribed by the HNA.

* Exhibit 88. Forecast of demand for new dwelling units, Tualatin Planning Area (pg. 80)

Single-family attached				
Percent single-family attached DU	9%	10%	15%	15%
***equals* Total new single-family attached DU**	91	102	152	152
Multifamily				
Percent multifamily	41%	45%	50%	45%
Total new multifamily	416	456	507	456
equals Total new dwelling units (2020-2040)	**1,014**	**1,014**	**1,014**	**1,014**

Exhibit 89 shows the final forecast for housing growth in the Tualatin city limits during the 2020 to 2040 period. The projection is based on the following assumptions:

- Tualatin's official forecast for population growth shows that the city will add 1,014 households over the 20-year period. Exhibit 89 shows Metro's forecast for growth of 1,014 new dwelling units over the 20-year planning period.
- The assumptions about the mix of housing in Exhibit 89 are consistent with the requirements of OAR 660-007[52]:
  - **About 40% of new housing will be single-family detached**, a category which includes manufactured housing. In 2013-2017, 53% of Tualatin's housing was single-family detached.
  - **Nearly 15% of new housing will be single-family attached.** In 2013-2017, 6% of Tualatin's housing was single-family attached.
  - **About 45% of new housing will be multifamily**. In 2013-2017, 41% of Tualatin's housing was multifamily.

OAR 660-007 also specifies the mix and density of new residential construction for cities within the Metro Urban Growth Boundary (UGB):

OAR 660-007-0035 sets specific density targets for cities in the Metro UGB. Tualatin's average density target is eight dwelling units per net buildable acre.[3]

- **Demand shift from renting to owning.** After years of decline, the national homeownership rate increased from a 50-year low of 62.9% in 2016 (Q2) to 63.7% in 2017 (Q2). Trends suggest homeownership among householders aged 65 and older have remained strong and homeownership rates among young adults have begun stabilizing after years of decline.
- **Tualatin will need to meet the requirements of House Bill 2001.** The Legislature passed House Bill 2001 in the 2019 Legislative session. The bill requires cities within the Metro UGB to allow "middle" housing types in low-density residential zones. The bill defines middle housing types as: duplexes, triplexes, quadplexes, cottage clusters, and townhouses. To comply with House Bill 2001, Tualatin will need to:
  - Allow cottage cluster as a housing type in the Residential Low Density zone. Tualatin may want to allow cottage cluster housing in the Medium-Low Density and Medium-High Density zones. Tualatin will also need to include development standards in the Tualatin Development Code.
  - Allow duplexes, townhouses, and multifamily housing as a permitted use in the Residential Low Density zone.

Summary of Findings:

The 2019 Housing Needs Analysis (HNA) outlines a requirement of 1014 housing units by 2040. This includes a diverse range of housing options detailed in Exhibit 88, which forecasts the demand for new dwelling units in Tualatin per OAR 660-007.

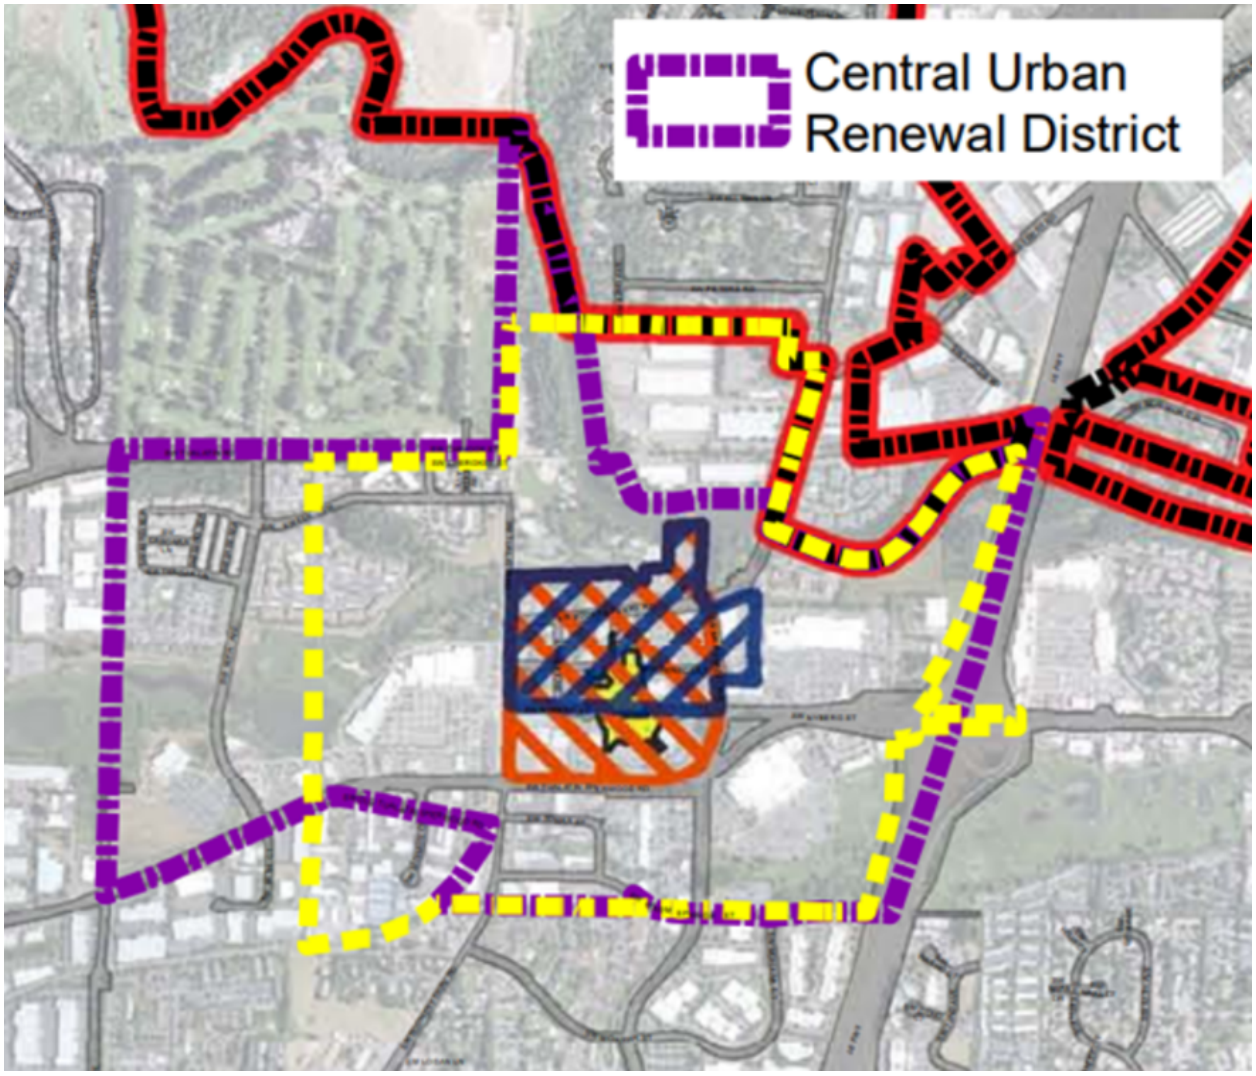
An examination of Tualatin's current housing production strategies reveals the approval of 941 housing units including entitled zone changes have been approved within a four-year period. Considering these figures and the diverse housing needs, Tualatin currently faces a shortage of 84 single-family detached homes and 25 single-family attached homes, resulting in a total deficit of 109 units needed to meet the HNA forecasts. The fulfillment of this deficit would result in a total of 1050 housing units, aligning with the HNA's projection for 2040. Consequently, any new proposed housing developments can be evaluated within the 16-year timeframe specified by the HNA and Tualatin's comprehensive 20-year plan.

Therefore, the proposed plan and text amendment should prioritize the provision of single-family attached and detached homes, as stipulated by the HNA diverse need for housing.

Based on this analysis of the proposed development in respect to the HNA, it is not recommended to approve additional multifamily housing units until the criteria set by the HNA, as defined by OAR660-07, are met. Until the 2019 HNA undergoes revision, it remains the basis for determining Tualatin's housing needs and comprehensive plan.

Exhibit C - Viable and outright RH-HR zoned sites for development that consciously consider the characteristics of the City

The following locations are potential sites in the core of Tualatin near outright RH-HR zoned areas near local amenities such as mass transit. For reference the map below indicates the Central Urban Renewal District where RH-HR is currently outright zoned. Tualain has also deemed this area as a core opportunity investment area and is a prime area for high-density high-rise development.



SIte A - 8515 SW Tualatin-Sherwood Rd, Tualatin, OR 97062

This existing CC building has been vacant for approximately 8 years and is currently for lease. This property sits adjacent to central WES transit station Trimet bus station, and Smart Ride bus system. As it currently stands it could be assumed this property is not viable for CC use, due to the duration that it has been unoccupied. The site sits, flat, with ample parking would be ideal for a high rise development as well.

SIte B - 19100 SW Boones Ferry Rd and proximity properties R534050, Tualatin, OR 97062

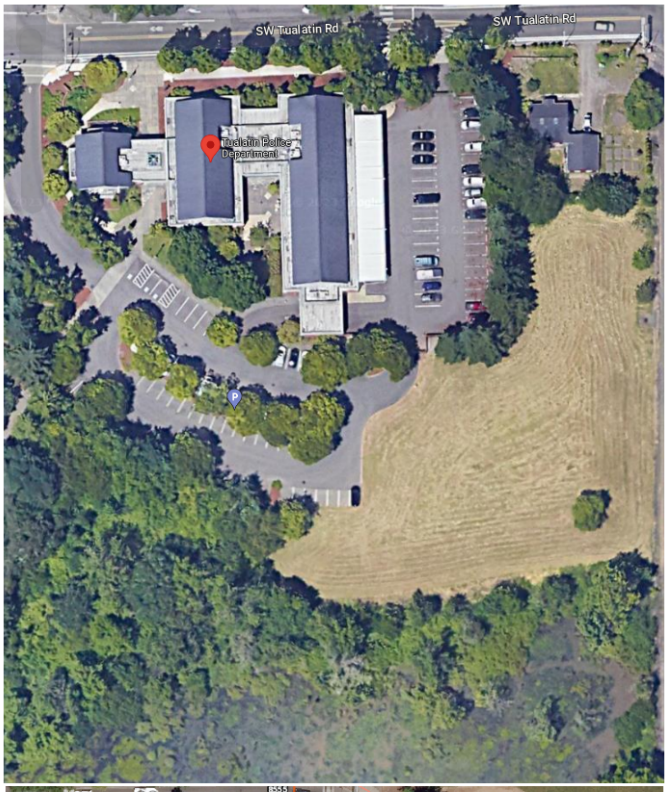
This site is an existing CC similar to Site A that has been vacant for an extended period of time and is currently for lease. Like Site A the site is next to many amenities including mass transit. The site is flat and shares the characteristics of being a suitable site for a high density high rise development which is also adjacent to outright RH-HR zoned areas.

Site C - 18970 SW Boones Ferry Rd, Tualatin, OR 97062

This CC site is the location for the Tualatin 18970 Catalyst project. Based on the core opportunity investment plan, this site has been deemed viable for use by the city of Tualatin. Current building rendered elevations show the building type to be a high-rise based on TDC code definition in Chapter 44. This site would require a lot consolidation with the adjacent two properties, 8470 and 8465, but considered viable for a RH-HR zone and is also adjacent to the outright RH-HR zoned areas.

Site D - 8650 SW Tualatin Rd, Tualatin, OR 97062

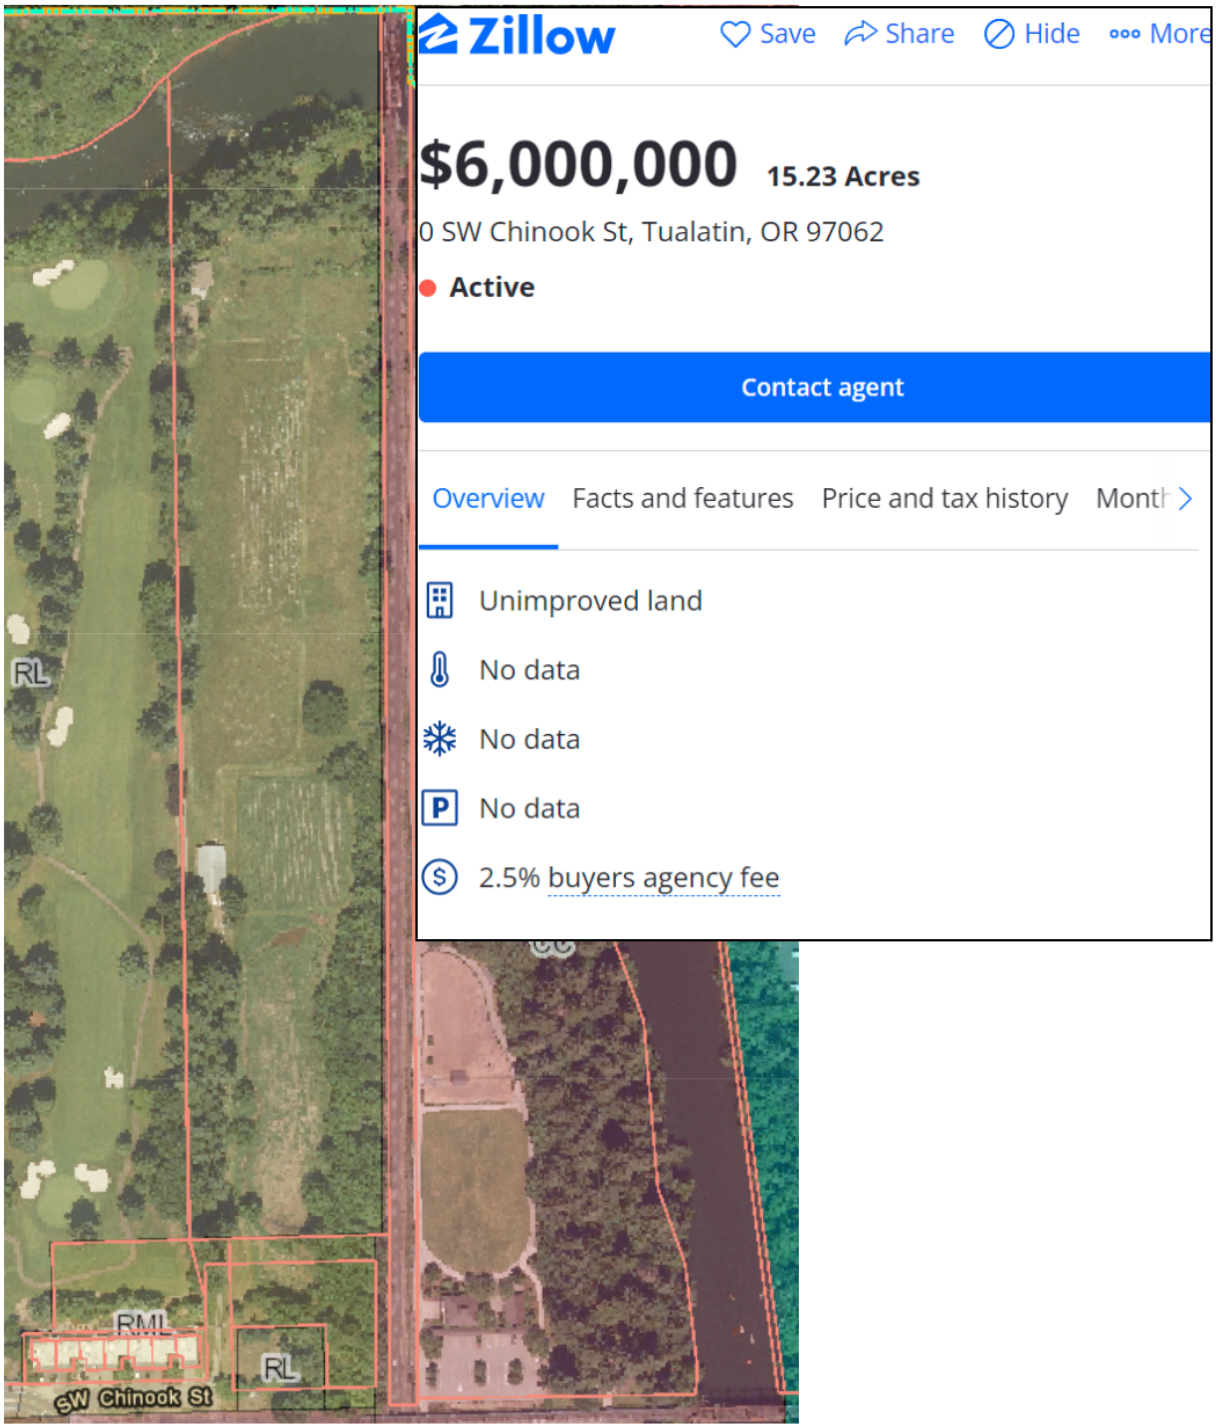
Currently this property is zoned outright RH-HR is the current location of Tualatin's Police Department, however, a portion of this land is undeveloped. The undeveloped portion could be used for a RH-HR development. This property is adjacent to Tualatin Community Park and a prime location for RH-HR development as the City originally deemed suitable for this type of density.



Site E - 0 SW Chinook St, Tualatin 97062

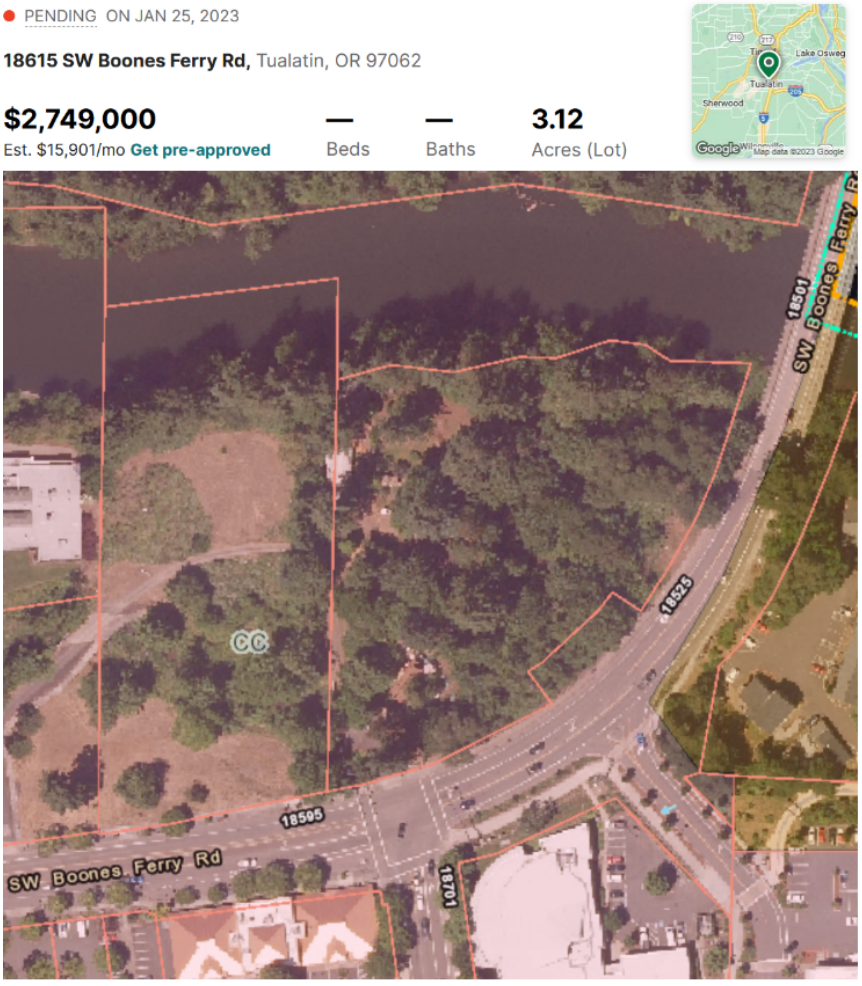
Currently this 15.23 acre property sits adjacent to Tualatin Country Club, Tualatin Community Park and outright RH-HR zoned areas adjacent to the Central Urban District . This property is currently for sale. The location factors alone make an extremely desirable location for a high-rise development. The lower acreage of the property could be rezoned to RH-HR.

[0 SW Chinook St, Tualatin, OR 97062 | MLS #21383176 | Zillow]



Site F - 18645 SW Boones Ferry Rd, Tualatin, OR 97062

Currently this site is zone CC, sits near many amenities and is in the central urban renewal district near outright RH-HR zone area. It is also adjacent to existing apartments and would be in context for the area. This property is currently pending, but would be a viable prime location for a waterfront RH-HR development near many amenities downtown Tualatin.



SITE G - Existing Tualatin Meadows, Hedges Creek Apartments and Adjacent Areas to Existing RH-HR outright zone and Tualatin Greens Condominiums (RH-HR).

Current site locations for these apartment developments are adjacent to the outright RH-HR zone in the central urban renewal district, near many amenities. Like the Tualatin Heights Apartments reasonable zone change from RML to RHH, these properties would fit a reasonable zone change criteria from RH to RH-HR. If both Tualatin Meadows and Hedges Creek Apartments were allowed a zone change increase; up to an estimated 28 possible acres could be rezoned in this manner. Tualatin Greens Condominiums is a high-rise, high-density development which would be congruent development. There is also an available unbuilt site as indicated by the expansion area. This area would also consciously consider the characteristics of the city, by locating additional high-density high-rise residential in the core of Tualatin as well as other adjacent high-density high-rise developments.

Site H - 17997 SW Lower Boones Ferry Rd and adjacent lots near the Grand hotel.

The site has three parcels that are considered Mix Use Commercial (MUC) and could be rezoned to RH-HR. The site could accommodate this type of residential or mix use commercial and residential. An example of this would be something similar to Eddyline at Bridgeport Apartments. This site does not reside directly in the central urban renewal district, it does however sit near Trimet mass transit Park and Ride Station, Bridgeport Shopping Center and many other amenities making this site a prime location for a high-rise, high-density development. A RH-HR development located here would also be in congruent with adjacent developments.

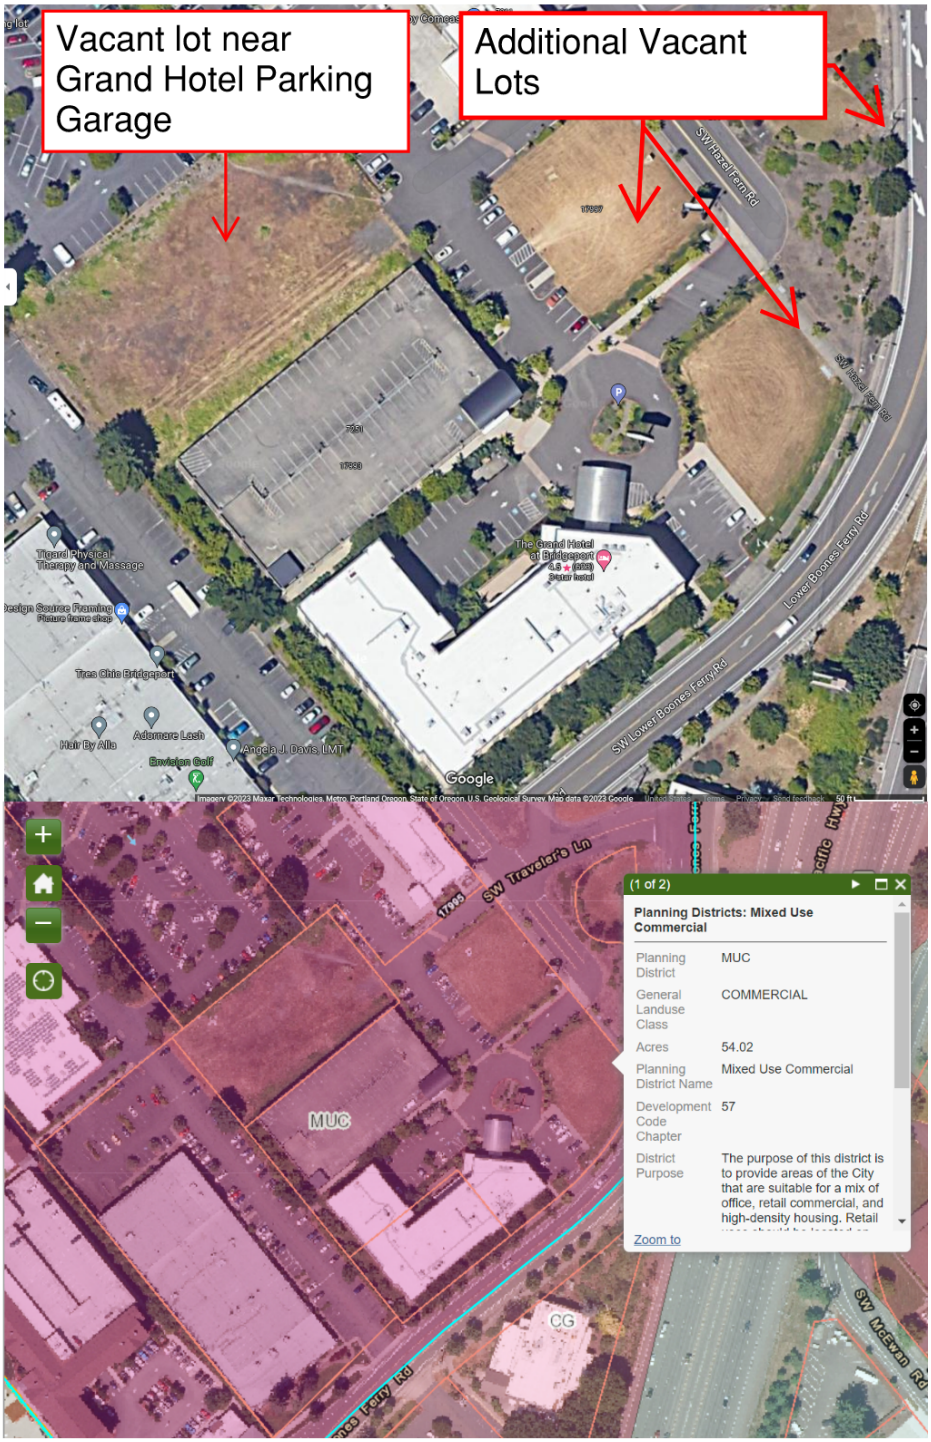


Exhibit D - Example Building Foundations in Floodplain Areas

Opposition has noted that sites located downtown have constraints however, this does not mean these properties are unbuildable and in fact these conditions can be mitigated by certain building construction methods. Two examples of construction means and methods are building with a raised slab foundation or locating an open parking garage on the first floor of the building. Chapter 44 of Tualatin Development Code indicates RH-HR buildings can be built up to six stories.

The following examples depict construction types and current existing buildings in Tualatin's Central Urban Renewal district that use these two foundation methods.

References in this document are provided by The Office of Energy Efficiency and Renewable Energy:

Flood-Resistant Raised-Slab Foundations | Building America Solution Center (pnnl.gov)

Example A: Flood Resistant Raised-Slab Foundations:

"Per IRC 2021 Section 322, raised-slab floors constructed in flood hazard areas (including A zones and Coastal A zones) should have the slab elevated to at least 12 inches above the BFE. Electrical components such as switches, sockets, circuit breakers, and wiring should also be elevated at least 12 inches above the BFE in order to reduce damage to the electrical system and the chance of fire from short circuits. Plumbing, heating, ventilation, and cooling equipment, including duct work, should also be installed 12 inches or more above the BFE to prevent damage."

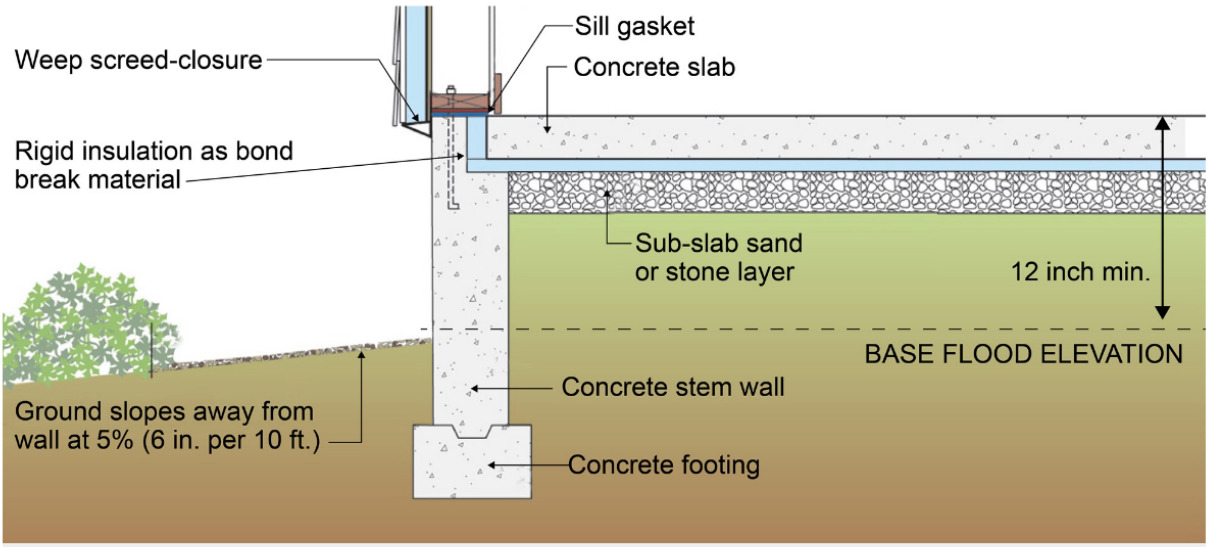

Figure 6. This raised-slab poured concrete foundation includes flood-resistant features such as a sloped grade, capillary break under the slab (gravel or sand), vapor retarder under the slab (rigid insulation), and capillary break at the top of the foundation wall (Source: Adapted from Building Science Corporation 2022).

Two more recently constructed buildings in Tualatin's central urban renewal district use this construction type as a means of mitigation. These buildings include **18810 SW Boones Ferry Rd** and **18840 SW Boones Ferry Rd.** Reviewing the two elevations below you notice a raised slab which is designed to be above the floodplain.

18810 SW Boones Ferry Rd raised slab construction:

18840 SW Boones Ferry Rd raised slab construction:

Example B: Flood Resistant Raised-Slab Foundations with Parking:
The second method for mitigation similar to a raised slab foundation is locating a non-enclosed parking area on the first floor of the building. Level 1 of the structure would essentially clear the flood plain level. **Villas on The Lake** provide an example of this construction type. Since most high-density high-rise buildings are built in central city locations, a parking area below the building is well suited for this type of residential development.

18847 SW 84th St raised slab construction with parking:

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to Council at the public hearing. The public hearing has been continued from its original date (May 22, 2023) and will be heard by Tualatin City Council on June 12, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

Subject: Code change allowing High Rise Density

To Mayor Frank and City Council
I ask you to say NO to the PTA23-0001 and PMA23-001 applications. These applications are not in the best interest of the residents and not appropriate for our community. High rise housing is inappropriate to this area. Adding so many housing units at one time could overwhelm existing services, require additional bus service, clog roads, and require a new elementary school to be built. A 4+ story building would stand out as a monument to someone's ideal, but isn't a good fit for Tualatin. Would 'Livability' still be a description we can proudly apply to our town?
Slow the rollout of high rise housing in Tualatin

Subject: High rise

Please, please, please don't let this high rise be built off Norwood and Boonesferry road. It will only make traffic uncontrollable and unbearable. I have lived in Tualatin since 1980 and I can't believe how much Tualatin keeps changing, and not always for the better.

You can make a difference in making Tualatin a livable and breathable city. We have many neighbors who are opposed to this project. It is enough seeing our beautiful forest disappear, now we are in danger of too many people being put on such a small piece of land.

Thanks for your consideration.
Christy

Good Afternoon,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to the Planning Commission and Council at the public hearing. The public hearing will be held on May 22, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

A Notice of Decision shall be provided to anyone submitting written comments. As a comment participant, you will receive a Notice of Decision when the decision is made – do you have a preferred mailing address you would like the notice sent?

Subject: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Clint Owens

Thank you for your timely response.

I will reiterate that as a real estate agent I long for more and more affordable housing so that more can be welcomed into the community. However, by attempting to solve the affordable housing issue, which impacts people who do not already live in Tualatin, we will in the process be creating a much larger problem for the people who already live in Tualatin.

High rise high density does NOT belong on Norwood Road! It belongs in the "city core" area where there is access BY WALKING or public transportation to necessary services and shopping.

The Boones Ferry and 72nd roads are already beyond overloaded/jammed packed, and have been for a LONG time!!

The commuters; truck route traffic, people getting from 99 to I -5 and back, north bound traffic getting off of I-5 at the south Wilsonville off ramp, and those going south getting off I-5 by at least Carmen Drive both trying to bypass the parking lot on what is laughingly called the I-5 freeway, all find their way to our already overloaded Tualatin Sherwood Highway, Boones Ferry and 72nd, not to mention cutting through inside our neighborhoods.

The poor people who actually reside here, the people you represent, half the time can't even get out of their neighborhoods during commute times!! You have to always hope you don't require any emergency services as the chances of them getting to you to help is pretty slim.

We don't even have the thousands of additional vehicles which will soon be added from the council's last approved developments, the one already going in off of Norwood in the clearcut area and the one off of Boones Ferry south of Norwood. Oh and then there is the Basalt Bypass that will soon dump into Boones Ferry.

And yet, here we are, MORE development approval applications AND a code change to add even more housing is being requested. If that code change is allowed, fingers crossed your neighbor doesn't decide to sell their home to one of these "developers" so they can replace what was your neighbors home with a 4 story high rise high density housing unit.

Our neighborhood off of Norwood is becoming nothing more than a strip of housing sandwiched between major roads with all the traffic, noise, pollution and smell. We do NOT need any more additional vehicles on these roads. And of course there is the issue if the Norwood highrise/high density housing units are approved, Tualatin will be making yet another heat island, to be added to the huge heat island made from the city allowing the clear cut of one of the few remaining areas of ACRES of old growth trees for the Norwood tract housing developments. All at a time when climate change is such a huge issue?????

Sadly this is not how I expected this city to develope.

Yes, we all knew that development would come. We just expected to to be done in a well thought out, environmentally conscious/friendly way with the health, livability and respect for Tualatin residents in mind. Sad that we were once a Tree City USA city. That is now a bad joke.

I spent the last 19 years after moving to Tualatin commuting each week to downtown Portland. I felt the hours stuck in commute traffic was worth it, as I was living in a beautiful woodsy area, the place I would retire to. Sure wish I had all of those hours back that I wasted sitting in traffic, the money I spent to make this home my retirement home, AND that I had listened to my parents regarding where I should have moved...

According to information from a prior city council meeting we are at 80% of the additional housing needed. Give it a rest and figure out how to take care of the EXISTING traffic mess, AND then the traffic issues being caused by the additional tract housing on Norwood and tract housing WITH apartments on Boones Ferry NY Green hill... BEFORE any more housing is approved.

Thank you
Cynthia Ray

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: Norwood Area Proposed Zone Change Comment

Hello.

My name is Dan Unrein. I am a 30+ year resident / home owner on Frobase Road.

I have a Tualatin mailing address and Zipcode although the property is under Washington County jurisdiction.

Many years ago Washington County sent a notification to property owners with Frobase Road “connections” that the County was going to revert the road from a very badly in need of repair asphalt surface to a “gravel” surface.

One of my then neighbors took up the cause to prevent this reversion. (The dust from the traffic would have been outrageous!)

After quite a process my neighbor was able to get the County and the neighbors to agree on a “private” road improvement bond to pave Frobase Road with asphalt. This re-pavement project was funded by an assessment on each property on Frobase Road.

(I know the assessment calculation was quite involved – and I never knew if the properties on the south side of Frobase were accessed – they are in Clackamas County!)

Here is why Frobase Road residents need consideration in your Rezoning Decision.

Washington County would only make the road so wide!

There can be no center dividing line for two way traffic.

There can be no white reflective stripes on the outside edges to help with identifying the edges on the dark nights, especially with a heavy fog setting on the area. (Multiple personal thrills associated with this over the years!)

There can be no speed limit signs and no speed limit set.

Without any of the typical street aids, two way traffic on Frobase is and always has been an accident waiting to happen. It is a driver's choice about where the edge of the road is and how comfortable they are at "feeling" for the edge of the road.

The saying they "took their half out of the middle" applies way too often, especially with drivers just discovering the new found shortcut!

Frobase Road is strategically located for traffic to leave the congestion of Boones Ferry Road, SW 65th, Stafford Road via 205 exit and try another route – even if it only makes the driver feel better because they are moving! The congestion can be on both ends of Frobase Road.

Boones Ferry Road on one end and SW 65th on the other end on a Friday afternoon is a no win situation for all parties.

Thank you for your consideration.

Dan

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Danette Ramirez

Subject: Proposed Map and Text Amendments for Vista Residential Partners, Horizon Church

Dear Tualatin City Planning Commission,

Regarding the land use decisions for the proposed apartment development at 23370 SW Boones Ferry Road, please accept my comments below:

Residents in the area deserve to enjoy the benefits afforded to everyone in Tualatin resulting from rational zoning rules. Zoning rules exist for several important reasons, and this property should not be rezoned to the HIGHEST POSSIBLE DENSITY to allow a 276-unit, six-building, four-story complex to be built immediately across the street from a neighborhood of single-family homes. If this is approved, our quality of life will suffer greatly, and out property values will suffer as well.

This is especially true given that over 500 new residences have been already approved for construction within yards of this location. The resulting increase in traffic coming from roughly 900 additional households will turn the Norwood Rd – Boonesferry Rd intersection into the worst-rated intersection. Even with a traffic light, delays and backups at this intersection will be severe. This is also compounded greatly by Tualatin High School and Byrom Elementary located so close by.

This plot of land could be used to build duplexes and other multi-family units, without having to go to such high density. This would help address the housing need without so severely impacting the quality of life and property values for neighboring homeowners.

I respectfully request that the wishes of the many neighbors, who would be so severely impacted by this project, be honored. Please do NOT support the proposed Plan Map Amendment (PMA) from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR) at 23370 SW Boones Ferry Road.

Thank you kindly,

Daniel Cobb

Dear Madeleine,

My personal Information.

Danny and Joni O'Neal
22625 SW 94th Terrace
Tualatin, OR 97062
503-692-0908

We live in the adjacent area that will be affected by this project,

We will provide bullet point comments rather than a long narrative.

We will be away from home when the meeting on May 22, 2023 is scheduled.

1. We've lived in Tualatin since July 1995 in the same home.
2. I attended the Byrom CIO meeting on February 28, 2023 expecting to hear Mayor Bubenik and Councilor Reyes comments on this project. Neither were in attendance as they were advised not to by the City legal counsel. I was disappointed that we couldn't hear directly from our cities leaders on this.
3. We've watched Tualatin grow and change, most was good. However the growth we've seen lately is counter to the reason We choose to live here. The traffic is beyond the capabilities of the roads and infer-structure. Just try and enter Boones Ferry from a side street in the morning

hours or afternoon around 4:00 pm. Not an easy task or even safe at times. Now we are faced with more homes on Boones Ferry Road and a high rise muti-family complex on Norwood. We both know that the increased population will put a strain on our already saturated community. We're very disappointed in our City Government's decision to approve these projects, sometimes it seems to be ignoring current zoning regulations and processes to accommodate the developers over the residents. We're not against increasing the availability of homes. We are against the rapid increase and heavy concentration in one area and high rise buildings. It doesn't need to happen all at once and in a already heavily populated area.

4. We loved all of the big beautiful trees that populated our city and Boones Ferry and Norwood Road. They are quickly disappearing at an alarming rate so that developers can build more while ignoring the concerns of Tualatin residents. Didn't we used to claim to be "America's Tree City"? Not true anymore!
5. We cringe now when we drive along Norwood Road at the complete destruction of all the senior trees and foliage. Their removal has ruined a landscape that can't and won't be replaced by the proposed addition of NEW trees and fauna.
6. We understand that there is perceived need for more apartment style residences in Tualatin. However Norwood Road is not the answer to this issue. High Rise apartments will not fit the surrounding home styles and community.
7. Traffic is already a daily problem and will be exacerbated by this project and the additional homes in the Sunrise Development. The recommendation of a traffic control light at Norwood and Boones Ferry will do nothing to reduce the additional traffic that comes with impending approval of these apartments.
8. Property owners will suffer in reduced values of their current homes along the Norwood Rood corridor. That will be no fault of their own but the direct result of government decisions overriding the home owners input into this project.
9. The green-light given the project in the annexing approval for the property in question amounts to a forgone conclusion that the rezoning will follow suit.
10. The developer is a Atlanta based company with no ties or concerns about the affect this high rise will have on the neighborhood or the residents.
11. This property resides in the Sherwood School District and they have stated the district can accommodate the additional students. Memo from Jim Rose of Sherwood to Glen Southerland of AKS engineering. ***How long before the new residents apply for exemption status to enroll their children in Tualatin High School and Byrom Elementary that are actually within walking distance of the new developments? We know we would. We believe that both schools are at capacity or near it.***
12. Vehicular access to this property will require additional egress points. The current recommendation does not meet the 600 foot spacing requirement and requires right of ways on current lots 101 and 102 to provide flow also to lot 109.
13. The removal of existing trees will be the next variance requested much like the Sunrise Development received to remove trees under the guise that they were not healthy.
14. The stated services and amenities by AKS makes several overstated availability. The most glaring is that Tualatin High School and Edward Byrom Elementary school are close by when in fact they received notification from the Sherwood School District that they could accommodate the additional students in their schools. The project is in their district. Also basing park availability on a park that hasn't been properly approved or designed yet.
15. Our concerns are in step with other neighborhood residents in regards to traffic and building heights.The traffic study stated that the traffic light at Norwood and Boones Ferry is required without the apartment project in consideration. So then it adds no real benefit to the additional vehicles associated with this project..As usual developers lay the responsibility for traffic improvements on the city and it will always lag behind the growth experienced with new homes and apartments. The proposed height of 4 stories of 50 feet will still limit the visibility of those residents in homes on the Norwood Road elevation.
16. We completely disagree with this statement by AKS "The proposed code height limitation would reduce the visual impacts of the future site improvements on the surrounding area. Along with the

transportation improvements, the proposed plan map and text amendments consciously consider the characteristics of this and other areas of the City, and this criterion is met." Question: Do any of these people believe that this would be acceptable in their own communities? We don't expect a response would be forth coming.

With the comments we've provided we're completely against the rezoning approval that would give this development the authorization to proceed with the project that would have a negative impact on the city and my community.

Thanks for the opportunity to provide or opinions and comments in this all important process.

9. Property owners will suffer in reduced values of their current homes along the Norwood Rood corridor. That will be no fault of their own but the direct result of government decisions overriding the home owners input into this project.
10. The green-light given the project in the annexing approval for the property in question amounts to a forgone conclusion that the rezoning will follow suit.
11. The developer is a Atlanta based company with no ties or concerns about the affect this high rise will have on the neighborhood or the residents.
12. This property resides in the Sherwood School District and they have stated the district can accommodate the additional students. Memo from Jim Rose of Sherwood to Glen Southerland of AKS engineering. ***How long before the new residents apply for exemption status to enroll their children in Tualatin High School and Byrom Elementary that are actually within walking distance of the new developments? We know we would. We believe that both schools are at capacity or near it.***
13. Vehicular access to this property will require additional egress points. The current recommendation does not meet the 600 foot spacing requirement and requires right of ways on current lots 101 and 102 to provide flow also to lot 109.
14. The removal of existing trees will be the next variance requested much like the Sunrise Development received to remove trees under the guise that they were not healthy.
15. The stated services and amenities by AKS makes several overstated availability. The most glaring is that Tualatin High School and Edward Byrom Elementary school are close by when in fact they received notification from the Sherwood School District that they could accommodate the additional students in their schools. The project is in their district. Also basing park availability on a park that hasn't been properly approved or designed yet.
16. Our concerns are in step with other neighborhood residents in regards to traffic and building heights.The traffic study stated that the traffic light at Norwood and Boones Ferry is required without the apartment project in consideration. So then it adds no real

benefit to the additional vehicles associated with this project..As usual developers lay the responsibility for traffic improvements on the city and it will always lag behind the growth experienced with new homes and apartments. The proposed height of 4 stories of 50 feet will still limit the visibility of those residents in homes on the Norwood Road elevation.

17. We completely disagree with this statement by AKS "The proposed code height limitation would reduce the visual impacts of the future site improvements on the surrounding area. Along with the transportation improvements, the proposed plan map and text amendments consciously consider the characteristics of this and other areas of the City, and this criterion is met." Question: Do any of these people believe that this would be acceptable in their own communities? We don't expect a response would be forth coming.

With the comments we've provided we're completely against the rezoning approval that would give this development the authorization to proceed with the project that would have a negative impact on the city and our community.

Thanks for the opportunity to provide our opinions and comments in this all important process.

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Subject: No to PTA23-0001 and PMA23-0001 Applications

I am opposed to the applications and what they stand to do to our neighborhood and city.
These applications will first of all make my neighborhood and Norwood road worse off then it will be after the homes of Autumn Springs get built and residences are filled. This alone will cause us all huge traffic congestion and issues since no traffic studies were done to comprehend the impact of such a large amount of housing being placed on this two lane Road.

The thought of high rises being placed not only along Norwood Road but also anywhere in our great city sickens me. Is this a developers community or are we a community made up of People that have been in this city and contributed to this city?
We are a community of people that are willing to work together to help make growth decisions for our community that are smart and reasonable.
Not because the church has some financial incentive to sell off property to a developer that can make the money and turn the city council to change its current policies and not represent the people that voted them in the position they have been elected to.

If this were to pass my 16 years in this community will end and I and my family will have no choice but to leave this community we love. I'm certain I am not alone.
I ask that you all really consider these applications very carefully and consider not only what they will do immediately, but the future of Tualatin as we know it.
I have heard a rumor that this council has never seen application that they never liked.
Let's START with these TWO!!

Let’s say NO to these applications!

Sincerely
Dave Tully

Dear Tualatin City Council Members and Mayor Bubenik,
We agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities.
The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community.
We are requesting City Council deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.
Thank you,

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Deanna Cain

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

We already know what decision has been made, some administrator has already been lobbied and received payment in some fashion from the contractor. The rest of this is just wasting time and taxpayers money to make us think we have input, when we really don't.

Subject: Norwood for Smart Zoning - Please Consider the Needs of Your Residents!

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;

The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;

As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of

ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,
Diana Fitts

Madeleine Nelson

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Diana Hoober

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able to remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: Proposed Code Change to Allow High Rise Development in Tualatin

Mayor Bubenik,
I am writing to request that you and the Tualatin City Council soundly reject applications PTA23-0001 and PMA23-0001. High density developments appropriately belong in downtown Tualatin where there is appropriate infrastructure for these types of developments. With the pending construction of the already approved 940 apartments and homes and the potential strain on traffic and services those developments will place on the residents of Tualatin in is imperative that you say, “No” to these applications.

As a resident of Fox Hills I watched old growth trees in our designated “Tree City” be mowed down for the development of a high density apartment complex with little concern for the varied wildlife that called those trees home. For months hawks could be seen circling overhead crying to find their homes. In addition to the displacement of the wildlife there was apparently little or no concern of the impact of the increased traffic to area residents. The traffic study completed for that development was done years before construction began and was horribly out-of-date. Gridlock is also a common occurrence in the area during morning and evening rush hours without the addition of over 200 daily commuters.

Please make the quality of life in Tualatin and respect for homeowners and residents your priority over the desire for profits of developers and do not approve these applications.

Sincerely,
Diane Brown-Hatzi

Re: Amendments for Norwood Developments

We join many others in opposition to the Plan Map Amendment PMA23-0001 and the Plan Text Amendment PTA23-0001.

We do not see evidence that infrastructure impacts have been adequately evaluated, and there are significant concerns with transportation, traffic and safety impacts of already existing developments in the Norwood area.

Among many other concerns, as we age, we worry about traffic impacts on response times for first responders, which are likely to be prolonged.

The proposed amendments must be rejected until the negative impacts on existing residents are more fully assessed.

Sincerely yours,

Kent Spackman

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to the Planning Commission and Council at the public hearing. The public hearing will be held on May 22, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

A Notice of Decision shall be provided to anyone submitting written comments. As a comment participant, you will receive a Notice of Decision when the decision is made – do you have a preferred mailing address you would like the notice sent?

Subject: No to PTA23-0001 and PMA23-0001 Applications

Subject: No to PTA23-0001 and PMA23-0001

I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Consider the needs of the entire City.

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Erica Shafer

Subject: Subject: No to PTA23-0001 and PMA23-0001

We agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community. For now I am requesting City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.

Subject: I say NO to PTA23-0001 and PMA23-0001 Applications

Good Afternoon,

I would like to add my voice to those saying:

High Rises BELONG in Tualatin Central Urban Renewal District ONLY.
High density high rise dwellings are limited to the core of Tualatin for good reason:

- Amenities within walking distance
- Shops and City services
- Mass transit
- Supporting City infrastructure
- Architecture that blends with existing urban environment
- Lighter dedicated parking requirements
- Livability and accessibility within a car-dependent suburb

They make NO SENSE anywhere else in Tualatin, especially on the edge of practically farmland and ON TOP OF ~600 units already approved for construction.

Let's not just make a decision because a developer wants us to. Let's be smart about our future, the future of our kids in the school district, the future of our safety, and the future of our community.

Thank you for time, consideration, and for your forthcoming vote of NO on this matter.

Subject: No code change for high-rise on Norwood

Good Morning Council,

I am writing you this morning to reiterate my support for what the Planning Commission recommended, which is that the text amendment and plan amendment are not in the public's interest and this development is not appropriate for the area on Norwood Rd. A high-rise belongs downtown as the current code allows for numerous reasons that the Planning Commission acknowledged with their recommendation.

Please make the right choice and make sure this high-rise is not allowed to go up on Norwood Road and that the code is not changed to allow high-rises anywhere outside of downtown.

Thank you for your work in helping keep Tualatin a vibrant community!

Cheers,

Fletcher

Subject: Rezoning Tualatin

We say no to PTA23-0091 and PMA23-0001 applications as these are not in the best interest of the public and neighbors near this area. This area will be so congested with the Autumn Sunrise development facing the same arguments for traffic on side streets as the proposed tolls for I5 and I 205. A high rise belongs in downtown Tualatin only where infrastructure can support it. Consider reuse of Haggen's property for these housing needs.

Gary & Marsha Malonson

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

March 24, 2023

Subject: Notice Of Public Hearing, Case File PMA 23-0001 & PTA 23-0001
Norwood Multi Family

Attn: Madeleine Nelson

Upon receipt of the Notice I have given considerable thought to the proposed project. Probably not a good idea as I'm looking out my window at the current project on Norwood including the removal of the forest entirely, the construction on Norwood itself leaving temporary asphalt patches rough and messy.
I can't imagine the amount of traffic this project is going to add to Norwood and surrounding neighborhood streets and collectors. I'm guessing increasing the need for traffic signals and other traffic control. If thats the case I hope it's a requirement for the contractor to pay for those future traffic control projects. And thats just for the project under construction.

The proposed multi level multi family project will only add to the existing traffic and infrastructure problems. Considering this project again in my opinion is self serving and not in the best interest of neighboring residents. I'm guessing you won't receive any favorable comments from all those you sent notice. Most probably will just discard the information thinking it won't matter what they write or they'll say you are going to do what you want anyway. Have seen it before and certain will again.

I am not in favor of this project and request the City Of Tualatin reject the proposal.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

I agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community. For now I am requesting City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.
Thank you,
Glenn & Nancy Reynholds

DATE: 4-19-2023

TO: CITY OF TUALATIN PLANNING COMMISSION
C/O CITY OF TUALATIN PLANNING DEPARTMENT (planning@tualatin.gov)

We request the Planning Department to forward this submission to the individual members of the Planning Commission in a timely manner, that the Commissioners may have time to review prior to their meeting on Thursday.

Cc: City of Tualatin City Council (Collectively and Individually)

FROM: John and Grace Lucini-Residents & Property Owners Basalt Creek Area

RE: CITY OF TUALATIN PLANNING COMMISSION MEETING 4-20-2023
AGENDA ITEM:

The Planning Commission is asked to make a recommendation to the City Council on a request for a Plan Map Amendment (PMA) from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR) located on a 9.2-acre site at 23370 SW Boones Ferry Road

FOR INCLUSION INTO THE PUBLIC RECORD

As residents and property owners in the Basalt Creek Area since 2006, we wish to make a clear statement that we are not against development in the Basalt Creek Area.

As we have commented on multiple occasions, it is our hope and goal that development in the Basalt Creek Area should be planned and implemented in a thoughtful, coordinated, and integrated manner and in spirit and compliance with the protections provided by the Oregon Statewide Land Use Planning Goals.

Relevant to the proposed changes to the City of Tualatin Land Use Designations and Plan Map Amendments include (but not limited to) the following Land Use Planning Goals:

- #1 Citizen Involvement OAR 660-015-0000(1)
- #2 Land Use Planning OAR 660-015-0000(2)
- #5 Protections Natural Resources OAR 660-015-0000(5)
- #6 Air, Water and Land Resources Quality OAR 660-015-0000(6)
- #7 Areas Subject to Natural Hazards OAR 660-015-0000(7)
- #11 Public Facilities and Services OAR 660-015-0000(11)
- #12 Transportation OAR 660-015-0000(12)
- #14 Urbanization OAR 660-015-0000(14)

For many years we have repeatedly presented to the City of Tualatin the need for effective Land Use Planning as part of the urbanization process for the Basalt Creek Area.

We again submit our concerns as to the lack of appropriate or incomplete Land Use Planning for the Basalt Creek Area, and potential negative impacts for local citizens, and property and natural resources/environment from the proposed changes to the City Code and Land Use Designation Map for the Basalt Creek Area.

Due to the City of Tualatin's lack of a Stormwater Management Plan (as mandated by the State of Oregon) Publicly vetted and adopted for the Basalt Creek Area, these proposed changes should not be approved.

Prior to accepting and adopting these proposed changes to the City Code pertaining to Land Use in the Basalt Creek Area and/or make a change to the City Plan Map Amendment relating to the Basalt Creek Area, the City of Tualatin should prove it can ensure the safe and effective provision of the Public Service of Stormwater Management within the Basalt Creek Area- currently and throughout the entire urbanization process- in a timely coordinated, integrated manner; and in conjunction with Washington County, and the City of Wilsonville who have adjacent, overlapping and/or common downstream stormwater management responsibilities.

The public, including Basalt Creek Citizens and property owners, should have the right to review at this time- how the City of Tualatin has planned, documented, and memorialized their stormwater management planning for the Basalt Creek Area in coordination with other local governments who have adjacent, overlapping and/or downstream stormwater management responsibilities.

These currently proposed Code and Land Use changes in land use designations will have a direct impact upon the assessment, calculation, and identification of current and future stormwater management needs. Increased density of housing and removing relatively undeveloped land being replaced by development which has larger buildings, and more impervious surfaces has a direct correlation with increasing stormwater runoff, collection, treatment, and conveyance needs.

Stormwater flow is not bound nor contained by City Limit Lines. Effective stormwater management planning should be a cooperative regional responsibility and goal. This is even more relevant during the multiple years/decades it will take for the full build out of the Basalt Creek Area by the City of Tualatin. In the meantime, the Basalt Creek Area will contain a patchwork of properties under various jurisdictions of both the City of Tualatin and/or Washington County. The impact of Land Use decisions regarding the Basalt Creek Area by the City of Tualatin upstream from these properties may have negative impacts downstream- regardless if the properties have been annexed into the City- or not.

A well written thoughtful Stormwater Management Plan for the Basalt Creek Area is needed to evaluate and address potential adverse stormwater impacts ----which exist today, AND which may occur throughout the entire urbanization process of the Basalt Creek Area to ensure the City will be able to address and mitigate identifiable issues timely and appropriately.

Any future proposed land use actions to be accepted by the City of Tualatin which may impact stormwater management needs in the Basalt Creek Area; or potentially cause negative impacts to citizens, property,; or natural resources which the city is charged to protect- either locally or downstream, should be halted until the city is compliant with all local, state, and federal requirements for stormwater management and the city can ensure the safe effective provision of this public service as needed currently and throughout the entire urbanization process.

It is of importance to realize-the City of Tualatin continues to lack an adopted comprehensive, integrated and coordinated Stormwater Management Plan for the Basalt Creek Area, as required by the State for a municipality of greater than 2500 persons (*OAR 660-011-0010 Land Conservation and Development Department Chapter 660 Division 11 PUBLIC FACILITIES PLANNING*.)

- The City Of Tualatin has had ample knowledge of the need to assess, develop and adopt a Stormwater Management Plan for the Basalt Creek Area as the Basalt Creek Area was brought into the urban growth boundary in 2004 (Metro 04 1040B). It is now 19 years later, and the City of Tualatin continues to lack an adopted Stormwater Management Plan for the Basalt Creek Area

- Since 2016, the City Of Tualatin has made numerous statements of the *intention* to adopt a stormwater management plan for the Basalt Creek Area –none of which have come to fruition.

- The 2019 City of Tualatin's Basalt Creek Comprehensive Plan provided inadequate Stormwater Management information.

- The 2019-2020 City of Tualatin's proposed Stormwater Master Plan (SWMP) Update was adopted by the Tualatin City Council in 2020.

Prior to the adoption of the SWMP Update, the City, the Tualatin Planning Commission, and the City Council had all received our written submissions as to the need for a Stormwater Plan for the Basalt Creek Area, and the inadequate and incomplete information and assessment of Stormwater Management Planning for the Basalt Creek Area within the scope of the document. Our submissions included a review and written comments by our Hydraulic/ Environmental Engineering Consultant who also supported our concerns as to the inadequacies of the proposed SWMP to identify and address stormwater management needs in the Basalt Creek Area within the City's Land Use Planning Jurisdiction.

> It should be noted, during the SWMP Update adoption hearing, a senior City staff member commented a Stormwater Management Plan for the Basalt Creek Area was not necessary, as the City has a relationship with Clean Water Services who review individual development plans for the City.

However, the piecemeal evaluation of individual proposed developments to provide for the provision of Public Services within a greater area is not supported by the State's Land Use Planning Goals and does not provide a Publicly vetted framework and guidance for the development of effective integrated stormwater systems within the entire region for current needs and future development.

- In 2020, the City's SWMP Update was legally challenged due to the lack of inclusion of the Basalt Creek Area within the scope of the newly adopted City's Stormwater Master Plan. The City agreed to rescind the adopted SWMP Update. The members of the City staff made later statements as to their intention to develop and adopt a Stormwater Management Plan for the Basalt Creek Area.

- In 2021, as part of the City of Tualatin SW Industrial and Basalt Creek Area Urban Renewal Bond Task Force, the City stated, "The City of Tualatin intends to complete this project [the assessment and development of a Stormwater Management Plan for the Basalt Creek Area] under the Community Development budget and operation. Currently the City is expected to allocate $100,000 in FY 21-22." As of this date the City has not completed a Stormwater Management Plan for the Basalt Creek Area for Public Review prior to adoption- again failing to fulfill stated intentions for the adoption of this document in a timely manner.

- The City of Tualatin's Stormwater Master Plan which is now currently in force was adopted in 1972, when the Basalt Creek Area was not within the City's Land Use Planning jurisdiction. The City's 1972 SWMP has dated information and does not include the current or future land use designations identified for the Basalt Creek area upon which Stormwater Management Planning needs are determined.

The absence of a thoughtful, clearly written integrated stormwater management plan for the entire Basalt Creek area which meets or exceeds the state's requirements- continually places the city, and local citizens, property, and natural resources in jeopardy of the negative impacts from stormwater flows, erosion, land instability/ landslides, and water quality degradation.

THIS PHOTO TAKEN ON 2-28-2022 IS ONE VISUAL EXAMPLE

OF THE IMPACT OF 3 DAYS OF RAIN AND THE RESULTING DOWNSTREAM STORMWATER IMPACTS ON THE WETLANDS IN THE BASALT CREEK CANYON

- DISCOLORED BROWN STORMWATER DUE TO UPSTREAM EROSION CAN BE SEEN FLOWING FROM THE NORTH (Right side of photo)

DOWN SOUTH INTO THE WETLANDS WITHIN THE CITY OF TUALATIN'S LAND USE PLANNING JURISDICTION AND WITHIN THE WILLAMETTE RIVER BASIN

RAIN IS A CURRENT AND RECURRING EVENT IN OREGON

AND SUPPORTS THE NEED FOR A CURRENT STORMWATER MANAGEMENT PLAN FOR THE BASALT CREEK AREA

WHICH INCLUDES COORDINATED PLANNING & IMPLEMENTATION BY LOCAL GOVERNMENTS

The City of Tualatin has very recently stated, *"The City of Tualatin manages stormwater discharges in accordance with Clean Water Services (CWS) Municipal Separate Storm Sewer System (MS4) permit. The City is one of 12 member cities who operate under CWS's MS4 permit, which established regulations and standards for managing stormwater within the Tualatin River Watershed.*
(City of Tualatin 4-24-2023 City Council Work Session Informational Packet-2024-2028 Capital Improvement Plan Review).
Yet, a large majority of the Basalt Creek Area is located within the Willamette River Watershed- and not within the Tualatin River Watershed.

This 4-24-2023 City Council Work Session Document included a proposed *"Capital Improvement Plan 2023/24 – 2027/28"* for future Capital Improvements to be funded by the City and/or by other outside sources for the next four years. While this budgeting document for the City identified and included Capital Improvements needed within the Basalt Creek Area for improvements to provide for the provision of Public Services of water and sewer, fails to identify ***any*** stormwater project needed within the Basalt Creek Area to ensure the safe timely and effective provision of the Public Service of Stormwater Management in the Basalt Creek Area within the next four years.

The City's proposed *"Capital Improvement Plan 2023/24 – 2027/28"* document does not even include a Stormwater Management Project for the Basalt Creek within the Plan's "Unfunded CIP Projects by Category."

> It is difficult to believe that one of the largest areas identified for growth within the City's Land Use Planning Area with …. With 194 developable acres within the City's Land Use Planning jurisdiction…
> - where the Basalt Creek Concept Plan acknowledged the need for upgrades to the minimally existing stormwater infrastructure would be needed with development
> - where the majority of land has been rural or underdeveloped

- where there are concerns as to the finite carrying capacity of the land to absorb additional stormwater from new development when previously existing stormwater collections basins on undeveloped land are removed due to development
- where the majority of the stormwater in the Basalt Creek Area flows south away from the City of Tualatin's existing infrastructure and into the Willamette River Basin

- where the lands within the Basalt Creek Area contains multiple constraints and limitations including a large deep canyon with wetlands and steep walls some exceeding 25% grade divides the Basalt Creek Area; and includes large formations of basalt rock- which increase the difficulties and costs for construction of stormwater infrastructure within the area.

A Stormwater Management Plan, as identified by the Oregon Department of Environmental Quality, would contain components including necessary assessments, analysis and identification of major projects needed for the Basalt Creek Area currently and in the future.

It is concerning that the City has not adopted a Stormwater Management Plan for the Basalt Creek Area when it is reasonable and likely there are major stormwater management improvements which will be needed within the Basalt Creek Area to address current Stormwater Management needs or the needs for future development resulting from the City's urbanization process. The City continues to lack a mandated document which includes a process for clearly identifying needed major stormwater projects within specific timeframes.

In addition to the issues presented above, there are additional concerns as to the adequacy of Land Use Planning for the Basalt Creek Area by the City of Tualatin which have potential negative impacts to the various and natural resources/environment known to exist within the Basalt Creek Area, and which the City is charged for protecting and conserving by various Regional, State, and/or Federal requirements.

The Basalt Creek Area contains various resources including many listed within the State's Goal #5 Land Use Planning Goal for Natural Resources and Open Spaces and or in Metro Title #13 Maps. Many of these Natural Resources in the Basalt Creek Area can be negatively impacted by mismanaged stormwater flows. However, the City of Tualatin has not provided clear standardized identification as to type, location or condition of these various Natural Resources known to exist in the Basalt Creek Area, yet not clearly memorialized within the City's adopted Natural Resources Maps 72-1 Natural Resources Protection Overlay District (NRPO) Map or 72-3 Significant Natural Resources Map.

The inadequate mapping of various Significant Natural Resources and/or clear identification of areas of Natural Resources areas which are to be protected in the Basalt Creek Area, hampers effective Stormwater Management planning by the City in the Basalt Creek Area.

The concerns as to the incomplete/ inadequate memorialization in the City's Governing Documents of natural resources which are required to be protected or conserved in the Basalt Creek Area are amplified during the review process for proposed development in the Basalt Creek Area, when some of the City of Tualatin's City Codes and/or Erosion Control Requirements cite specific reference to the City's Natural Resources Protection Overlay Map, yet the City's Natural Resources Protection Overlay Map lacks complete accurate information on the various resources requiring protection within the Basalt Creek Area.

There are very reasonable concerns that the City of Tualatin lacks completion or memorialization of major elements necessary for effective Land Use Planning for the Basalt Creek Area. These issues must be resolved prior to allowing future development--- or consideration of changes to the current Land Use Plans and

Governing Documents when fundamental and essential Land Use Planning Documents have not yet been fully developed and memorialized for the Basalt Creek Area.

If the health, safety, and quantity of living for the citizens of the Basalt Creek Area and the health, protection and conservation of various highly valued Natural Resources which currently exist within the Basalt Creek Area- have significance and meaning- then the City should not rush to adopt changes to the Basalt Creek Development Code or Land Use Designations within the Basalt Creek ----

- until the City has full use and power of a fully vetted and Publicly adopted Stormwater Management Plan for the Basalt Creek Area
- to use in effectively evaluating proposed Land Use Actions potential impacts within the Basalt Creek Area and/or downstream.

We realize the City and developers are anxious to propose changes Land Use Maps for the Basalt Creek Area or Code Changes which may initiate and allow more rapid development in the Basalt Creek Area, which will bring development fees more quickly into the City. However, this approach at the expense of thoughtfully planned and implemented development is very short sighted and may lead to long term negative outcomes for the region, and the City.

We appreciate the opportunity to present our concerns regarding the proposed changes to the City Code, and the proposed changes to Land Use Designations within the Basalt Creek Area being presented to the Tualatin Planning Commission on 4-20-2023.

To reduce the redundancy of the concerns we have previously made to the City, the Planning Commission and/or the City Council of Tualatin since 2016 regarding the need for effective Stormwater Management by the City of Tualatin in the Basalt Creek Area, we have included a partial list of our previously written submission. Please let us know if the City should wish us to provide copies.

We respectfully submit our concerns regarding the City adopting changes to the City Code, or changes to the City's Map Plan which may impact the Basalt Creek Area while the City continues to lack a Stormwater Management Plan for the Basalt Creek Area adopted and memorialized within the Public Process.

John and Grace Lucini
23677 SW Boones Ferry Road
Tualatin Oregon 97062

PARTIAL LIST OF WRITTEN SUBMISSIONS TO THE CITY OF TUALATIN, THE TUALATIN PLANNING COMMISSION AND/OR THE TUALATIN CITY COUNCIL

-REGARDING THE NEED FOR THOUGHTFUL EFFECTIVE STORMWATER MANAGEMENT PLANNING BY THE CITY OF TUALATIN FOR THE BASALT CREEK AREA

2016 Notice to the Cities of Tualatin and Wilsonville of Stormwater Flooding of our Basalt Creek Property from upstream stormwaters within the NE portion of the Basalt Creek Area and the need for thoughtful Stormwater Planning including an assessment of the stormwater flooding of our property by Hydraulic/Environmental Engineer Consultant

2016 Email chain with the City of Tualatin Engineer inquiring if the Professional Services Contract the City was executing to Update the City's Stormwater Master Plan, would include the Basalt Creek Area. A positive response including the rational for inclusion of the Basalt Creek Area within the scope of the contract was provided by the City Engineer.

2019 Multiple Citizen Comments submitted to the Tualatin City Council prior to adoption of the Basalt Creek Comprehensive Plan

2019 Citizen Comments submitted to the Tualatin City Council prior to the annexation of the Autumn Sunrise Properties in the Basalt Creek Area

2019-2020 Citizen Comments submitted to the City of Tualatin, the Tualatin Planning Commission, and then to the City of Tualatin City Council regarding the City of Tualatin proposed Stormwater Master Plan Update, including a review and comments supporting our concerns by our Hydraulic/Environmental Engineer Consultant.

2021 Citizen Comments submitted to the Tualatin City Council prior to the annexation of the CPAH property in the Basalt Creek Area

2021 Dissenting Vote Submission to the City of Tualatin City Council, as a member of the City of Tualatin SW Industrial/Basalt Creek Urban Renewal Task Force

2021 Citizen Comments submitted to the Tualatin City Council prior to the Code Variances requested by the CPAH property in the Basalt Creek Area including a review and comments supporting our concerns by our Hydraulic/Environmental Engineer Consultant

2022 Multiple Citizen Comments and emails submitted to the Tualatin City Planning Department after the City had accepted, reviewed, and submitted for hearing the CPAH Architectural Review which included the developers Stormwater Plan for development in the Basalt Creek Area. These emails which we generated were requests for basic standard stormwater management planning information to be provided and which should have been included within a developers Stormwater Plan submitted for Architectural Review- (i.e., to how and where the developer planned to discharge offsite overflow and how and if the developer planned to connect to existing stormwater pipes or to use piping to be constructed in the future).

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to the Planning Commission and Council at the public hearing. The public hearing will be held on May 22, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Heather Kabli

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Holly Schweitz

Subject: No to PTA23-0001 and PMA23-0001 Applications

Dear Madeleine,

As a property owner in Tualatin, I am writing to say NO to the PTA23-0001 and PMA23-0001 Applications.

We have had unprecedented development of building new homes to alleviate the housing crisis here in our City, with almost 1,000 new units underway already in the past 2 years.
This meets 92% of Tualatin's 30-year growth plan.
92% of a 30 year plan - met already!
We also are already in compliance with the 2022 Oregon Housing Needs Analysis - which is what this developer is trying to use to push this code change.
I say NO to development that can't be supported by existing City infrastructure.
I say NO to development that opens the floodgates to high-rises everywhere and anywhere.
I say NO to development that hands our City over to developers to build what they want.
Keep high rises to the core of Tualatin - which has infrastructure, amenities, and provides the necessary quality of life for apartment/condo living.

Sincerely,

Jackie Mathys

24305 SW Boones Ferry Rd.

Subject: Addressing Tualatin Zoning Changes: Traffic, Schools, and Alternative Options

Dear Tualatin Decision Makers,

I've written before but writing again. As a Tualatin resident and rental property owner, I'm writing on behalf of my neighbors and myself to express our concerns about the proposed zoning changes involving Tax Lots 106 and 108. We believe there are more suitable alternatives available in downtown Tualatin that would minimize the negative impact on our community.

Here are our main concerns:

Traffic congestion: The area around SW Boones Ferry Road already experiences significant traffic. Increasing housing density in this area would exacerbate the problem, affecting the quality of life for Tualatin

residents. Although the proposed stoplight at Norwood and Boones Ferry would help, it may not be enough to mitigate the added traffic.

School capacity and public facilities: Our schools are nearing capacity, and further residential development will put a strain on the education system. Additionally, the proposed zoning change would eliminate a space designated for public institutions without providing a suitable alternative location.

Utilizing vacant spaces downtown: There are already properties zoned for high-density residential development near the Westside transit station (8412, 8514, and 8538). These locations are conveniently located near transit, retail, and other amenities, making them a more appropriate choice for new housing.

We appreciate your commitment to the well-being of the Tualatin community and hope you will consider these concerns when making decisions regarding the proposed zoning changes. We believe that focusing development efforts on existing high-density zones in downtown Tualatin would better serve our community.

Thank you for your attention to this matter.

Sincerely,

Jackie Mathys

Subject: Strong opposition to PTA23-0001 and PMA23-0001 proposals

Dear members of the Tualatin Planning Dept.,

I am writing to express my strong opposition to the PTA23-0001 and PMA23-0001 applications. As a long-time property owner and resident of Tualatin, I am extremely concerned that these proposals are not in the best interest of the public and are not suitable for the area in question.

High-rise developments are better suited for downtown Tualatin, where the infrastructure is more capable of supporting increased population density and traffic. By concentrating such developments in the downtown area, we can ensure that the city's growth is sustainable, and our community's unique character is preserved.

I urge the committee to prioritize the needs of the entire city and its residents, and reconsider the approval of the PTA23-0001 and PMA23-

0001 applications. Instead, let us work together to find alternative solutions that are more compatible with our community's values and vision for the future.

Thank you for your time and consideration.

Sincerely,

Jackie Mathys

Hi Madeleine,

Please add my comments to the official record from Thursday's meeting. Attached. Thank you.

Jackie

Jackie Mathys
M: 503-781-2872
jackiemathys@gmail.com

Thank you. My name is Jackie Mathys, and I live with my husband, Steve, at 24305 SW Boones Ferry Rd. We also own a second home at 20310 SW Boones Ferry, both in Tualatin. We have been homeowners in Tualatin since 2005, nearly 20 years.

I'm speaking today to express our strong opposition to the proposed Plan Map Amendment and Plan Text Amendment for the 9.2-acre site located at Norwood Rd. and Boones Ferry Road.

Our community's character is at stake. The proposed change from Medium-Low Density Residential and Institutional to High-Density High Rise would dramatically alter the very essence of our neighborhood. We moved to this area because of its quiet, residential atmosphere. The introduction of high rise buildings in this proposed location would be a jarring, ill-conceived departure from the Tualatin we've loved and valued for almost 20 years.

The increased density and the construction of high-rise buildings also pose a threat to our limited resources and infrastructure. This kind of development would exacerbate the existing daily gridlock and dangerous lane skipping on Boones Ferry to I-5. We personally have a front row seat to this nearly daily traffic jam and it's only gotten worse in the past few years.

Also, the construction of high-rise buildings on this 9.2-acre site means stripping what's left of the stand of trees on Norwood Rd. Our community has a responsibility to preserve our environment and maintain a healthy balance between development and conservation.

I implore the Planning Commission to take our concerns to heart when making a recommendation to the City Council. This proposed Plan Map Amendment and Plan Text Amendment are not just minor changes – they would drastically alter the character of our community, negatively impact our resources and infrastructure, and set a troubling precedent for future development.

We urge the commission to reject these amendments and preserve the integrity of our neighborhood that we've called home for so long.
Thank you.

Subject: A Concerned Homeowner's Perspective on the Proposed High-Rise on SW Norwood Rd.

Dear Tualatin City Council Members,

As a 63-year-old woman approaching retirement, I have been proud to call Tualatin home since 2005. I am writing to express my concern regarding the high-rise development proposed for SW Norwood Rd. I stand with the Planning Commission in believing that a high-rise building is unsuitable for our community.

High-rise structures are more fitting for downtown locations with easy access to mass transit and various amenities. I encourage you to visit the website Norwoodsaysno.org, which illustrates the possibilities of well-planned development if the involved parties, such as Horizon Community Church and Vista Residential Partners, are open to reevaluating their intentions for the property.

As someone who deeply cares for our city's future, I strongly request that the City Council reject these applications for a high-rise and a code change that would impact all of Tualatin. Instead, I implore you to consider a plan that garners the support of our community.

We must not permit developers to amend our development code merely to augment their profits at the expense of our beloved community. I ask that you think of Tualatin as a whole, preserving the qualities that make our city a wonderful place to live, both for current residents and future generations.

Sincerely,

Jackie Mathys

Subject: Maybe this video will convince you

Dear Councilors,

You've had a lot of words coming at you about the Norwood high-rise. If you haven't already, I strongly recommend you watch this video about the traffic on Boones.

You know I live on Boones Ferry between Greenhill Lane and Day Rd. I could have shot this video, but I didn't. I just live this gridlock reality every weekday.

When I heard that the "solution" to traffic will be a light at Norwood and Boones, I laughed. Not because it's funny, but because it's a joke.

Please vote no on PTA23-0001 and PMA23-0001 on May 22. Take a beat, regroup, and listen to your constituents about the future development of Tualatin.

Lennar, AKS and Horizon will be just fine. If this plan goes through Tualatin won't be. Standing up to the developers would be an amazing legacy for you all.

Thank you.

Jackie

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: Re: Recommendation for Adjustments (Adjustment) to the zoning district south of Norwood Road

I object to the proposed "Adjustment" because it will:

1) compound the already overloaded roadway system along SW Norwood Road and Boones Ferry Road;

2) require a new traffic signal at Boones Ferry Road and SW Norwood further compounding travel on a major arterial;

3) overload the capacity of Byrom Elementary school requiring the School District to redraw the attendance boundary forcing some Byrom students to be moved to another school;

4) four story or 50-foot-high apartment buildings are not consistent with the visual image that residents have of the City of Tualatin;

5) any and all improvements needed by any development should be the responseiblty of the developer including roadways, sewer and water infrastructure and parks and recreation features.

6) the air quality in the southern end of the city will adversely impacted by the additional traffic congestion traffic along Boones Ferry Road.

Ms. Nelson:

Have you been to Norwood lately? The housing development has recreated chaos for months. Constant dust on homes and cars last summer and assuming again this spring and summer. Forest lost and ugly water tanks exposed. Now we also have to watch the traffic on I-5…who wants to do that. Nothing good has come from the housing development. It is like looking at a development in IOWA…flat land with no trees…baron. And Norwood is undriveable always dug up and we can't even turn into our street we have to go to Boones Ferry and use Iowa Street to get home. And soon all those new home owners with their vehicles will empty out on Norwood. I imagine soon we will have to endure traffic lights on Norwood. It has ruined a once beautiful neighborhood. Hard to believe a town referred as a City of Trees could agree to this development.

AND IT APPEAR TO JUST BE THE BEGINNING

Now you want to let a high rise go up on Norwood. Do you have a limit as to how many cars you are willing to dump onto Norwood?
Where are all these cars going to be parked. This condensed living leads to more people swamping the neighborhood. Our neighborhood in not suppose to be downtown Tualatin with shops and restaurants and grocery

stores. Downtown Tualatin would be the place for a high rise. Renters could WALK to grocery stores, shops and restaurants. They wouldn't need their cars.

And on top of all these items the developers aren't even Oregonians. Why are you letting people who don't even call Oregon home into Tualatin to destroy this once beautiful city. Money is the answer, only money. Not what is best for Tualatin.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Janet Johnson

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Jim Brauch

Subject: Comments on Case File: PMA 23-0001 & PTA 23-0001-Norwood Multi-Family

Proposed code amendment:

The applicant proposes to amend Section 44.100 of the Code.

The purpose statement currently reads: "The purpose of the High Density High Rise (RH-HR) zone is to provide areas of the City within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club that are suitable for high density apartments or condominium towers." The proposed amendment would remove the restriction to the City's Central Urban Renewal area and "towers" form the current language. In addition a 4-story height limit would be imposed south of SW Norwood Road.

The Central Urban Renewal Area is well served by transit, goods and services and parks; all within walking distance; suitable for residents who may not have access to or choose to limit their reliance on cars.

By contrast, the Norwood site is located in the Basalt Creek Plan area. The applicant's submittal materials refer to employment lands in the area which may not be fully developed for 16 years. There is only one small neighborhood commercial area planned within walking distance of the Norwood site shown on the Basalt Creek Plan map. There are no parks shown on the plan. Transit service to the Norwood site is currently not available on weekends or after 8 pm on weeknights. Residents of a multi-family project in this location will need to rely primarily on a car to access most services.

The City's Central Urban Renewal Area is well suited for High Density High Rise because of the proximity to services and transit. The Norwood site is not due to limited services within close proximity and the fact that a height limit will be required to ensure compatibility with surrounding development.

I respectfully request the city council deny the code amendment and focus High Density High Rise development in areas in closer proximity to services and transit.

Property Comp Plan/Zone Amendment:

Should the council vote to approve the code amendment I have some concerns about the proposed zone change.

How does this comp plan and zone change meet the city's needed housing inventory?

Goal 3.2 HOUSING FOR ALL reads:

"Encourage development and preservation of housing that is affordable for all households in Tualatin"

Page 3 of the applicant's submission refers to the city's housing needs assessment and the fact that half of renter households in our community are cost burdened. There is an identified need for multi-family units but even more, a need for affordable housing units. Changing the zoning on this site doesn't guarantee affordable housing here.

There was also a reference to commutes of 30 minutes into Tualatin for jobs. Is this because housing isn't available or is unaffordable?

Does the traffic analysis consider/include the impact of traffic from the 400+ single family unit Autumn Sunrise development now under construction in addition to this multi family development? Wouldn't peak traffic volumes occur at the same time for both developments – am/pm commuter hours?

Currently transit is limited to a commuter bus line to this site. Does Tri-Met have plans to increase service to this site?

In conclusion, at this time, this site is not well suited for a multi family development as this is not guaranteed to meet the affordable housing needs for our community, is not well served by transit, not close to goods and services, nor current employment opportunities.

Respectfully Submitted,

Jo Aust

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allo the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure mpact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Dear Tualatin Planning Department Members, Planning Commission, City Council Members, and Mayor Frank Bubenik,

Thank you for your time and attentive listening at yesterday's hearing, and your thoughtful comments before the vote. Please know these were much appreciated.

In case you find it useful, below is the transcript from my 3 minute presentation laying the groundwork for our primary objections to the zone change application (FYI, I pulled the complete application from the City's website). I understood you had no choice but to approve the annexation. As we all know, the zone change application, is a much different matter, and with that in mind, I wanted to raise these key points sooner rather than later, so that you all have the time to digest them.

Rest assured, there are even more detailed reasons to reject the applicant's zone change (using the code criteria), but the 3 minute limit prevented me from getting into those details last night. Please know that we will share with you a full rebuttal of the application in the days and weeks to come.

Thank you for your service and all you do. Transcript is below.

TRANSCRIPT

My name is Joel Augee. I live at 8905 SW Iowa Drive. I am here to speak out specifically against the applicant's annexation vis-à-vis its map and text amendment to change the zoning to High Density High Rise.

First, I want to say that I imagine how difficult it must seem, to be in your position. There is a lot being written and said about this proposed development. At the end of the day, though, the decision really isn't difficult. And here is why.

First, let's dispel a myth. The first myth is that we neighbors here are NIMBYS. But is that really the case? After Autumn Sunrise was approved, with nary an objection, and the same with Plambeck Gardens, the result is that we neighbors trusted the City and did not object to these developments. These two developments will result in over 500 housing units (in our back yards), which is over 50% of the City's entire housing needs for the next 20 years, per your own 2019 housing analysis. How in the world does that make us NIMBYS? It doesn't.

Second, let's understand why we neighbors no longer blindly trust the City to "do the right thing" with this application. The Autumn Sunrise approval has been a failure in a number of important regards. There are lessons to be learned. Not a stick of a tree was left in the middle – it is hideous, frankly, and nothing that our neighbor Wilsonville would have allowed. Second, no arborist was required to approve the plan to leave that thin strand of trees along Norwood, trees which ultimately knocked out power so many times that they had to be mowed down. And finally, as we can see by the developer's application here, even before another unit is approved, the traffic of Autumn Sunrise and Plambeck Gardens already requires, by the applicant's own traffic study, a signal at Norwood. A signal which was never required but clearly should have been required. And the developer's solution – let us build 276 more units of HDHR, so you can get your traffic signal. Wow. Really? That is bold.

Next, let's talk about the application. When you read through it, it plays heavily to the "housing crisis," and refers to the City's 2019 Housing Needs Analysis, as it should, but it offers ZERO, and that is the key here, ZERO data on where we currently stand in meeting those housing needs.

Where do we stand in? Since the study, 940 housing units have been approved.

- Alden Apartments – 45 town homes
- Plambeck Gardens – 116 multi family affordable housing
- Tualatin Height Apartments – 116 more units
- Autumn Sunrise, 407 housing units, some single family, some attached
- Nyberg Tualatin Apartments, 256 Units

So with 940 units already approved, that means, that in less than three years into a 20 year goal, you have reached 92% of that goal.

Looking at the facts and the data, your decision is easy. The re-zone application, and its extreme zoning, isn't in the public good. Leave the high density high rise for the city's downtown core where it is appropriate and needed. Please, use common sense, don't rubber stamp another proposal in our back yard, and reject the move to push the highest density, high rise zoning, into a place where it doesn't belong.

Thank you.

Madeleine Nelson

Dear Tualatin Mayor and City Council Members,

I am writing to encourage you to follow the direction of the planning commission's 4-1 recommendation to reject the developer's proposed text and zoning map amendments.

I attended the planning commission hearing on April 20 and also spoke (the text of my remarks is pasted below). I want to say how impressed I was with the planning commission members, especially the 4 who voted against the developer's proposal. I was impressed with the obvious time and careful thought that these 4 commissioners put into their analyses and decisions, and I especially want to recognize commissioner Randall Hledik and the time he put into his review of the application, his insights, and finally his written remarks that he asked to have entered into the record. These remarks, which I encourage all of you to read, clearly showed how the applicant has NOT met the applicable zone code criteria. Among other items, the attempt to move the HD-HR zoning designation outside the City's downtown core clearly and obviously moves it away from important transportation hubs, especially including rail, but also important commercial business concerns, the library, and the park, etc. We here in Norwood think this is common sense, but it is wonderful to have the planning commissioners recognize this.

Other commissioners provided informed and thoughtful remarks, and talked about the obvious traffic impacts here, which will be huge and devastating not only to our neighborhood, but all of Tualatin.

The bottom line is that an extreme zone change is not appropriate here in Norwood, or in any other periphery of Tualatin.

I also want to address one counter-argument that the developer has been making, and that Steve Koper also attempted to make. That is, that the current location of the HD-HR zone map is located within wetlands and non-buildable areas, and so it must be moved to an area with no development, which would include a place like the Norwood Road location. While it may be true that the current map is located, at least in part, in wetland or other non-buildable areas, it absolutely does not follow that the best place to move it is the periphery of town. Frankly, that type of argument feels disingenuous at best.

Clearly, the logical place to move it would be elsewhere in the downtown core area, an area that is appropriate and that needs it. Think of the old Ace Hardware location, or the vacant Hagan's building. There are plenty of incredible redevelopment opportunities for that appropriate zone designation. Further, as planning commission chair Bill Beers said, we don't have to move it only to an area with no development. It could be moved to an area that will be redeveloped. It was so nice to hear that common sense from our planning commission chair and members! However, we are puzzled and alarmed that the employees in the planning department don't appear to even consider these common sense positions. I do not say this lightly. So thank goodness for the objectivity, wisdom and decency of the planning commission members.

Finally, in addition to what should not be built at the Norwood Road location, I want to remind you that there is so much potential here to make Tualatin better, and in this regard, mixed use and green space is critical. I know so many people who would welcome the Neighborhood Commercial zoning here, with a little grocery store and coffee shop, day care, etc., all that could be walkable from both existing and new neighborhoods. Unlike our neighbors in Wilsonville, we have very, very little walkable mixed use here in Tualatin, especially on the periphery. If we are serious about cutting down traffic trips, changing the zoning to Neighborhood Commercial would make all the sense in the world. It also should have been part of the Basalt Creek Master Plan. Per that plan, there is neighborhood commercial, but it is farther south, which makes little sense. The solution is to move it here. It would be such a welcome and obvious solution.

So a huge thank you to the planning commission members, for all their time and effort, and for rejecting extreme zoning that really is just an attempt by the developer and church to maximize density by using the pretext of the "housing crisis," but which would harm the community and infrastructure in the short, medium and long term. Please, see the application for what it is -- extreme zoning, and reject the high density as inappropriate.

Thank you,

Joel Augee
8905 SW Iowa Drive
Tualatin, OR

Text of remarks made to planning commission on April 20, 2023

Good evening, planning commission members. My name is Joel Augee. I live on Iowa Drive and I have been a Tualatin resident since 1998 and Norwood Heights resident since 2003. That said, the concerns here are by not just long term residents, but new residents as well.

Tonight I am here to ask that you each vote to recommend AGAINST the two action items before you, specifically against the applicant's map and text amendment to change the zoning to High Density High Rise.

Frankly, the issues before you are not difficult. The application here contains the most extreme zoning possible – high density high rise – and attempts to remove it from the downtown core, where it is appropriate, to the outskirts, where it is not appropriate, and where it will absolutely overburden the already congested roads of Boones Ferry and Norwood Road. And this is before Autumn Sunrise and Plambeck Gardens have even been built.

As we can see by the developer's application here, even before another unit is approved, the traffic of Autumn Sunrise and Plambeck Gardens already requires, by the applicant's own traffic study, a signal at Norwood. A signal which was never required but clearly should have been required. And the developer's solution – let us build 276 more units of HDHR, so you can get your traffic signal. Wow. So we must agree to this project, to get the signal that we already deserve? Really? That is pretty bold.

So why would the developer push for such an extreme position, with such high density?

Let's look at the developer's application. When you read through it, it plays heavily to the "housing crisis," and refers to the City's 2019 Housing Needs Analysis, as it should, but it offers ZERO, and that is the key here, ZERO data on where we currently stand in meeting those housing needs.

Where do we stand in? Since the study, 940 housing units have been approved.

- Alden Apartments – 45 town homes
- Plambeck Gardens – 116 multi family affordable housing
- Tualatin Height Apartments – 116 more units
- Autumn Sunrise, 407 housing units, some single family, some attached
- Nyberg Tualatin Apartments, 256 Units

So with 940 units already approved, that means, that in less than three years into a 20 year goal, the city of Tualatin has already reached 92% of that goal.

Now is not the time to panic. Now is not time to resort to extreme measures.

Looking at the facts and the data, your decision is easy. The re-zone application, and its extreme zoning, isn't in the public good. Leave the high density high rise for the city's downtown core where it is appropriate and needed. Please, use common sense, don't rubber stamp another proposal in our back yard, and reject the move to push the highest density, high rise zoning, into a place where it doesn't belong.

Thank you.

City of Tualatin Planning Division,

Thank you for the opportunity to comment on the applicant's proposed text amendment (PTA) and plan map amendment (PMA).

Please have these comments inserted into the record for the above-referenced matter.

1. Criteria Requiring Substantial Evidence

Under TDC 33.070, for the application to be granted, it must be (a) in the public interest, (b) timely, and (c) in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan. The applicant has the burden

of proof to meet these criteria. As shown below, there is substantial evidence that applicant has not satisfied the criteria under TDC 33.070 and the other criteria in the application.

2. Failure of Criteria

a. Proposed PTA and PMA are Not in the Public Interest

Based upon substantial evidence, the proposed PTA and PMA, and the extreme changes they propose, are clearly not in the public interest. Increasing the RH-HR total area from 4 to 9.2 acres, moving it to the periphery of the City, and opening up the rest of Tualatin to further RH-HR applications is not supported by the comprehensive plan or the 2019 Housing Needs Analysis (HNA), and is therefore clearly not in the public interest.

i. The Applicant's Economic Study should not be allowed to subvert the findings of the 2019 Housing Needs Analysis

The applicant's proposals attempt to subvert the findings and recommendations of the HNA by submitting its own economic analysis regarding housing needs. However, the applicant's own analysis is neither free from bias (it was privately commissioned and narrowly tailored to support the applicant's specific applications) nor is it comprehensive (the HNA is 114 pages, vs the applicant's private analysis, which is 16 pages). Additionally, and perhaps most importantly, no open deliberative process or public input was involved in the applicant's private study, unlike the HNA commissioned by the City. For these reasons, and given the extreme zoning proposed by the applicant and the substantial deviation from the HNA proposed by the applicant, the application is clearly not in the public interest. To serve the public interest, if the City desires to explore updating the HNA, a new HNA should be commissioned *before* making any drastic changes to the comprehensive plan and before ignoring the findings of the HNA.

ii. Other Potentially Viable Sites Should be Explored for RH-HR zoning before moving over twice the acreage needed to the Norwood Site

Along these lines, there are other viable sites which should be explored first before approving the extreme zoning in the PTA and PMA, including but not limited to the following: (a) the vacant gravel lot adjacent to the WES rail line across Boones Ferry Rd. from Hagen's (walkable to many amenities, unlike Norwood); (b) the vacant lots near the Community Warehouse and also very close to the WES rail line (also walkable to many amenities, unlike Norwood) ; and (c) the approximately 6 acres of bare land near the Grand Hotel in Bridgeport (also walkable to many amenities, unlike Norwood). These sites are not only viable and ready for development, but are located close to amenities, as required by code, and are therefore preferable to the proposed location off Norwood. In is in the strong public's best interest to consider moving the RH-HR zoning to these locations, and not moving such high density zoning to the Norwood location. The City should also consider implementing the its own 18970 Catalyst Project in the downtown core area, and include RH-HR zoning as part of the project.

In addition, as Chair Bill Beers of the Planning Commission discussed in the meeting of April 20, 2023, not just bare land, but redevelopment should also be considered by the City. It is therefore in the strong public interest for the City to conduct outreach to all owners in the downtown core for possible redevelopment, including mixed use, such as the long vacant Hagen's building next to the WES line, before granting the extreme zone changes in the application. With the right outreach, a mixed use redevelopment could be established that appropriately puts the RH-HR designation at such a key location, and meets a number of goals and policies of the Comprehensive Plan vis-à-vis the close proximity to high value amenities, including rail transportation and walkable commercial, the public library, etc.

iii. The "Constrained" Designation is Not Meaningful Barrier to Development in the Downtown Core

There has been an assertion by the planning department that the gravel lot and the former Ace Hardware vacant lots across from Hagen's are "constrained," and therefore not a viable option for the RH-HR zoning designation. This has been used as justification for moving the RH-HR zone to the periphery at Norwood, and anywhere else in town. While these vacant lots may be in a floodplain, that does not in any reasonable analysis make them unbuildable. A parking garage could easily be put on the ground floor, with up to 6 stories above. A simple look at what has been built in this area makes the answer obvious. The building with Mashita Teriyaki is a perfect example (see 18810 SW Boones Ferry Road). It was moved to/built in this flood plain by simply elevating the floor. The building next to it (to the south) also has an elevated floor and parking on the bottom (see 18840 SW Boones Ferry Road). These buildings were recently constructed in the "constrained area" of Tualatin's downtown core. Therefore, it is absolutely feasible and reasonable to expect development in this particular floodplain, with standard mitigation such as raising the floor or putting the parking garage on the bottom floor, and these two buildings are perfect examples. There are all sorts of other developments like this along Boones Ferry, closer to the river. And for this reason, it is absolutely reasonable, and in the public interest, to expect the high density high rise zone to remain in the downtown core, and moved to these adjacent vacant lots.

Thank you for your consideration.

Joel Augee, Tualatin Resident

Subject: EMAIL #2 from Joel Augee -- No on PTA 23-0001 and PMA 23-0001

City of Tualatin Planning Division,

Thank you for the opportunity to comment on the applicant's proposed text amendment (PTA) and plan map amendment (PMA).

Please have these comments inserted into the record for the above-referenced matter.

1. Criteria Requiring Substantial Evidence

Under TDC 33.070, for the application to be granted, it must be (a) in the public interest, (b) timely, and (c) in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan. The applicant has the burden of proof to meet these criteria. As shown below, there is substantial evidence that applicant has not satisfied the criteria under TDC 33.070 and the other criteria in the application.

2. Failure of Criteria

a. Proposed PTA and PMA are Not in the Public Interest

Based upon substantial evidence, the proposed PTA and PMA, and the extreme changes they propose, are clearly not in the public interest. Increasing the RH-HR total area from 4 to 9.2 acres, moving it to the periphery of the City,

and opening up the rest of Tualatin to further RH-HR applications is not supported by the comprehensive plan or the 2019 Housing Needs Analysis (HNA), and is therefore clearly not in the public interest.

b. Proposed PTA and PMA are not Timely

The HNA sets a specific target of adding 1,014 new housing units by year 2039, with target of 45% being multi-family units. Since the HNA, the following new housing units have been approved:

- Alden Apartments – 45 town homes
- Plambeck Gardens – 116 multi family affordable housing
- Tualatin Height Apartments – 116 more units
- Autumn Sunrise, 407 housing units, some single family, some attached
- Nyberg Tualatin Apartments, 264 multi-family units

That is an additional 941 units, creating a mix with 53% being multi-family. In other words, in less than 4 years (out of 20), Tualatin has reached 92 % of its goal with total housing units, and with over 90% of its goal with multi-family units. Tualatin is way ahead of schedule in meeting its housing needs for 2040. The progress made in this regard over the last three years has been significant and well beyond the goals set by the HNA. There is absolutely no need, at this time, to rush through an extreme zone change that ignores the HNA and the goals of the Comprehensive Plan. Thus, the application is not timely. Additionally, with the 19 acres by the Meridian Park hospital of vacant land, currently zoned low density residential, there is more opportunity to do a zone change to multi-family (it does not need to be high rise), and that would be appropriate as a transition area next to the hospital. Additionally, with all the undeveloped residential land adjacent to the Basalt Creek Area, there is plenty of time for more housing units to come on line there, and the proximity to the work and the industrial / warehouse zoning would also make reasonable multi-family density appropriate.

As a side note, I acknowledge that the City Planning Department believes that only 525 residential units have been added since the HNA. While this issue (525 total units vs. 941 total units) is certainly not dispositive in favor of the applicant, we take significant issue with the 525 figure. In particular, this figure is based on the argument that the 264 multi-family units known as the Nyberg Tualatin Apartments, which are still under construction, should not be counted. To resolve this difference, it is important to read the HNA determine if those 264 units, from that particular parcel, were counted as part of <u>existing inventory</u> in the HNA, or vacant land <u>was part of the buildable land inventory, with future construction of units to count toward the goal of 1,014</u> . It has to be one or the other: either part of existing inventory or not. When you read the HNA, it becomes very clear that those 264 units were <u>not</u> counted as part of the existing inventory. Instead, the land which those units are being built on, was specifically identified as part of Tualatin's "Buildable Land Inventory" (BLI). See pages 7-8 of the HNA.

More specifically, the land in question is included in the Buildable Land Inventory as "vacant" (see Exhibit 8 from the HNA).

The land in question was also identified as part of the BLI with a zoning designation of High Density Residential (see Exhibit 9 from the HNA).

This all makes sense -- that the units were not included as part of the HNA – as the final architectural approval for this project did not happen until December of 2019.

The bottom line, is these 264 units were not included in Tualatin's existing inventory, and the land was included in the building land inventory, meaning that these units, when finally approved (which happened in December 2019), count toward reaching the goal of 1,014 units.

Thank you for your consideration.

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to Council at the public hearing. The public hearing has been continued from its original date (May 22, 2023) and will be heard by Tualatin City Council on June 12, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

Subject: EMAIL #3 from Joel Augee -- No on PTA 23-0001 and PMA 23-0001

City of Tualatin Planning Division (cc Tualatin Mayor and City Council),

Thank you for the opportunity to comment on the applicant's proposed text amendment (PTA) and plan map amendment (PMA).

Please have these comments inserted into the record for the above-referenced matter.

1. Criteria Requiring Substantial Evidence

Under TDC 33.070, for the application to be granted, it must be (a) in the public interest, (b) timely, and (c) in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan. The applicant has the burden of proof to meet these criteria. As shown below, there is substantial evidence that applicant has not satisfied the criteria under TDC 33.070 and the other criteria in the application.

2. Failure of Criteria

   a. Proposed PTA and PMA are Not in the Public Interest

Based upon substantial evidence, the proposed PTA and PMA, and the extreme changes they propose, are clearly not in the public interest. Increasing the RH-HR total area from 4 to 9.2 acres, moving it to the periphery of the City, and opening up the rest of Tualatin to further RH-HR applications is not supported by the comprehensive plan or the 2019 Housing Needs Analysis (HNA), and is therefore clearly not in the public interest.

b. Proposed PTA and PMA are not in conformity with applicable goals and policies of the Tualatin Comprehensive Plan – School District

If the proposed development is approved, children living in the new 276 apartment units would be part of the Sherwood School District, even though they are a short walk from Tualatin High School and Byrom Elementary School. This would mean that the children would be bused or driven significant distances to and from all Sherwood schools, as the chart below illustrates.

Grade Level	Distance to Grade School; Mode of Transportation	Distance to Middle School	Distance to High School
Distance To Sherwood School District	6 miles; Bus or car	6 miles; Bus or car	7.7 miles; Bus or car
Distance To Tualatin School District	Byrom Elementary; Approximately 1 mile; walk or bike	Hazelbrook Middle School; 4 miles; bus or car	Tualatin High School; Less than 1 mile; walk or bike

These additional school bus trips, along with trips by parents driving children to and from school, is against the comprehensive plan goals related transportation and public health and clearly not in the public interest. Instead of walking to school, which is healthy exercise for children, the children will be bused or driven, resulting in a bigger carbon footprint, more traffic jams, less exercise, and also less sleep (sleep is an important factor for both the parents and the children), not to mention the substantial additional cost of busing. For these reasons, there is substantial evidence that the application is not in conformity with the goals and policies of the Tualatin Comprehensive Plan.

c. Proposed PTA and PMA are not in conformity with applicable goals and policies of the Tualatin Comprehensive Plan – Walkable Amenities

On April 20, 2023,the Tualatin Planning Commission voted 5-1 to recommend denial of both the PTA and PMA to the City Council. The decision was based on deliberations that included:

- Comprehensive Plan Goal 3.1 (20-year land supply consistent with needs identified in HNA) was not met because the proposed map amendment would create a surplus of RH-HR zoning (i.e. the deficit is 4 acres and 9.2 acres is proposed); and

- The proposed text and map amendments would not be consistent with the objectives of Comprehensive Plan Chapter 10 for the RH-HR that the district "<u>support housing at the greatest density of household living in areas with the greatest access to amenities</u>."

As noted above, the Norwood site is not located within walking distance of any amenities. No parks, libraries, rail lines, restaurants or retail are within walking distance. Not even the applicable public schools at any grade level are within walking distance. There is only one bus stop (Tri Met). However, we understand that this particular line has limited runs and is set to be cancelled. Under any reasonable review of the application, the applicant fails to meet goals and plans of the Comprehensive Plan in this regard. Clearly, under any objective reading of the evidence, the Norwood site does not pair the "greatest density" with the "greatest access to amenities." In fact, it fails miserably in this regard. As indicated above, there are a number of other sites that can do this, including those bare lots in the

downtown core, along with other redevelopment opportunities (these sites have been specifically identified in submissions to the record by the undersigned in Email #1, and also by others objecting to the application).

In addition, I submit for the record the written analysis of Tualatin Planning Commissioner Randall Hledik, which outlines in detail that applicant's failure to meet a number of code criteria, including proximity to amenities. A copy of Commissioner Hlediks' notes are attached to this email.

Conclusion:

For these reasons, I submit that there is ample evidence that the PTA and PMA are not in the public interest, do not meet all the code criteria, and that therefore, the Mayor and the City Commissioners agree with the recommendation of the Planning Commission and deny the applications.

Thank you for your consideration.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Subject: Norwood Expansion

Tualatin Planning members,

Please take the time to read this message. Please do not simply scan through and delete...

I am very concerned about the new development coming to the Norwood/Boones Ferry intersection. As I am sure you are very aware, Tualatin has a LARGE traffic congestion issue. Allowing this development to be built is simply going to overload our already fragile and damaged local infrastructure.

My home is on SW 82nd Ave. and have lived here for several years, now. Before this development was started, SW Boones Ferry Rd. suffered (suffers) from daily commuter build-up from I-5 to various parts of Boones Ferry Rd., sometimes all the way to Tualatin High School. SW Norwood Rd. is often used by commuters who feel they must be moving- they will apparently get home faster. So, they use Norwood Rd., then 82nd Ave, then Frobase to get to 65th. From there, they sit in traffic at Elligsen/65th/Stafford Rd. with no gain to their commute.

My issue isn't that a commuter wants to feel like they're moving. My concern is that when they use 82nd & Frobase to get there, they travel at seriously excessive speeds- I have witnessed cars travelling at speeds in excess of 90 MPH. If you don't believe me, I invite you to park in my driveway for any given weekday (preferably when the weather is nice) from 2:00pm to 4:30pm and observe. I would imagine that you wouldn't have to wait too long before you see someone rushing to get home...in the military, we called that "Hurry up and wait."

This concern is felt by ALL residents on 82nd Ave. This development will only worsen the issue. Although we are a rural neighborhood, we still have small children living on this street. As a matter of fact, the Tualatin High School Track & Field runners practice on these roads. They are simply being put in harm's way. The travel on these roads will be increased. There will most assuredly be more speeding vehicles. These students are already at risk of being hit by a car. Now, they are even more vulnerable as this development in installed.

Additionally, For those of us who live in this area have been dealing with the construction on Norwood, between Boones Ferry and I-5. The construction company responsible for the roadwork should be fired. I invite you to drive YOUR PERSONAL VEHICLE on this portion of the road- IT IS HORRIBLE. The construction company doesn't care- they're being paid. As well, they recently poured the curbs for this portion of the road. If the road is any wider than previous, it is only a few feet. Are they planning on adding a bike lane? Yet another target for all these additional vehicles...

Please DO NOT allow any more construction in this area. I understand that contracts have been written, etc. However, YOU HAVE THE AUTHORITY TO RESTRICT AND REGULATE WHAT IS BEING BUILT IN THIS CITY! DO NOT ALLOW ANY TALL BUILDINGS (nothing more than residential two-story homes) TO BE BUILT HERE! I am sure you have seen what has been happening in Portland, Salem and Eugene...these types of areas have become dumps for those less fortunate (I need not go into how they typically live, nor do I need to remind you of the panhandling, drugs & alcohol, filth, etc.). My family and I are seriously considering leaving Tualatin if this poor management continues...

PLEASE DO THE RIGHT THING AND STOP THE OVER DEVELOPMENT OF TUALATIN. You are all representatives of this once fine city. Please represent us and do the right thing. Don't be blinded by $$$. Keep Tualatin a wonderful city.

Thank you and sincerely,

Jon Klapp, concerned Tualatin resident.

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the curren code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: PTA23-0001 and PMA23-0001 plan and text amendments applications

I vote NO to the proposed plan and text applications PTA23-0001 and PMA23-0001 amendment applications as a resident and voter in Tualatin! Let's build the high-rise apartments in downtown Tualatin as they are currently zoned. Developers should not be able to remove restrictions in the development code to build whatever they want at our expense.

As a resident of Tualatin for over 20 years, sent my kids to TUHS, commuted on I-5 for 45 minutes each day until Covid made my telework job permanent, I have seen many changes here, most of them good. But I have also seen increased traffic, more crime and have major concerns about where we are heading. I have talked to many of my neighbors who thought Tualatin made a great city to retire in but now feel they have to move as our streets become more and more congested. They thought Tualatin made a great city to raises their kids but now are concerned about schools being overcrowded. While I love that Tualatin has many parks (I voted yes on every park amendment) why it did take so long to finally get a park on the south end of town?

I understand that there is a definite need for "affordable" housing everywhere but "market rate" apartment buildings is not the answer. My daughter who lives in Vancouver in a "market rate" 1 bedroom apartment will be paying $1800/month starting this summer, that is higher than my mortgage payment. I support affordable housing like Plambeck Gardens going in south of Norwood, but it was unfortunate that they couldn't build closer to grocery stores and other amenities so people can walk to them.
Tualatin has already approved almost 1,000 apartments and single family homes that are yet to be constructed in the past few years, well ahead of our 20 year growth plan.

I have been going to city council meetings, developer meetings and just recently went to the Planning Commission meeting, heard the testimonies, listened to the presentations and listened to the planning commission members who voted 4 to 1 to NOT recommend the plan map and text amendments citing some of the same concerns Tualatin residents have, especially traffic.

I also read the city's response to the ODOT I-205 Tolling Plan recently in the Tualatin Life newspaper. Their statement how the added traffic thru already congested intersections will impact the safety, livability and economic vitality of Tualatin. I agree! Added traffic from even new development, especially on the south end of town where we already have congestion from I-5 avoidance, will have the same impact!.

Tualatin, we can do better and be smart about future growth in our city!.

Julie Heironimus

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to Council at the public hearing. The public hearing has been continued from its original date (May 22, 2023) and will be heard by Tualatin City Council on June 12, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

Subject: PTA23-0001 and PMA23-0001 plan and text amendments applications

I vote NO to the proposed plan and text applications PTA23-0001 and PMA23-0001 amendment applications as a resident and voter in Tualatin! Let's build the high-rise apartments in downtown Tualatin as they are currently zoned. Developers should not be able to remove restrictions in the development code to build whatever they want at our expense.

As a resident of Tualatin for over 20 years, sent my kids to TUHS, commuted on I-5 for 45 minutes each day until Covid made my telework job permanent, I have seen many changes here, most of them good. But I have also seen increased traffic, more crime and have major concerns about where we are heading. I have talked to many of my neighbors who thought Tualatin made a great city to retire in but now feel they have to move as our streets become more and more congested. They

thought Tualatin made a great city to raises their kids but now are concerned about schools being overcrowded. While I love that Tualatin has many parks (I voted yes on every park amendment) why it did take so long to finally get a park on the south end of town?

I understand that there is a definite need for "affordable" housing everywhere but "market rate" apartment buildings is not the answer. My daughter who lives in Vancouver in a "market rate" 1 bedroom apartment will be paying $1800/month starting this summer, that is higher than my mortgage payment. I support affordable housing like Plambeck Gardens going in south of Norwood, but it was unfortunate that they couldn't build closer to grocery stores and other amenities so people can walk to them.
Tualatin has already approved almost 1,000 apartments and single family homes that are yet to be constructed in the past few years, well ahead of our 20 year growth plan.

I have been going to city council meetings, developer meetings and just recently went to the Planning Commission meeting, heard the testimonies, listened to the presentations and listened to the planning commission members who voted 4 to 1 to NOT recommend the plan map and text amendments citing some of the same concerns Tualatin residents have, especially traffic.

I also read the city's response to the ODOT I-205 Tolling Plan recently in the Tualatin Life newspaper. Their statement how the added traffic thru already congested intersections will impact the safety, livability and economic vitality of Tualatin. I agree! Added traffic from even new development, especially on the south end of town where we already have congestion from I-5 avoidance, will have the same impact!.

Tualatin, we can do better and be smart about future growth in our city!.

Subject: No to zone changes.

I say no to PTA to 3–0001 and PMA 23–0001 applications as these are not in the best interest of the citizens of Tualatin. There are enough approved apartments in Tualatin at this time. The city is exploding at the seams and our roads are too crowded. Some of the worst in the region. These applications are not appropriate for the area. High-rises belong in downtown Tualatin only and not in just any area of our city.

High Rises BELONG in Tualatin Central Urban Renewal District ONLY.

High density high rise dwellings are limited to the core of Tualatin for good reason:

- Amenities within walking distance
- Shops and City services
- Mass transit
- Supporting City infrastructure
- Architecture that blends with existing urban environment
- Lighter dedicated parking requirements
- Livability and accessibility within a car-dependent suburb

They make NO SENSE anywhere else in Tualatin, especially on the edge of practically farmland and ON TOP OF ~600 units already approved for construction.

I agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community. For now I am requesting City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Karen Russell

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Dear Mayor and Council –
Please Vote NO on pta23-0001. This will ruin Tualatin forever! Please do not approve this application. I live in sandalwood condos and as I understand it the alder townhomes are going to be expanded right across from me! Traffic is going to be worse on Martinazzi avenue! Please VOTE NO….
Thank you

I say NO to PTA23–0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A high-rise belongs in downtown Tualatin ONLY where infrastructure can support it. Consider the needs of the entire city.

Subject: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment of further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

As has been stated several times, the potential development of another 276 residences on Norwood Rd. will cause even more cars to back up on SW Boones Ferry Rd. This after adding the already approved Autumn Sunrise. We've calculated over 2000 more trips up and down SW Boones Ferry Road each weekday.

What I hear from the City Council, AKS and the developer is “That’s really not our problem.” They cite that Wilsonville is part of the solution and, of course, ODOT. What I hear them saying is, the system is broken. We can’t address our traffic issues (actually, the city of Tualatin’s issues) because it’s just too hard. There are too many parts and pieces.

We are suggesting that the City of Tualatin works with ODOT and Wilsonville to address this very real problem. Agencies and governing bodies should be able to work together to address this already untenable issue affecting both Wilsonville and Tualatin (as well as the freeway issues, which are a big part of the problem). All that has been done has served to exacerbated the problem with no clear solution (and adding a traffic light will not solve the problem, by the way).

It sounds like AKS and all traffic studies have washed their hands of anything having to do with Boones Ferry Rd. No more homes should be built, or added, until this issue is addressed. I think this may be the most disappointing part of this situation, that there has been no effort at all to work together on a problem that everyone acknowledges exists. I’d love to see the City of Tualatin be the ones who solve this problem and bring the parties together to make this happen.

As for the apartments proposed for Norwood Rd. (clearly the purpose of the request for annexation and partitioning): This small two-lane road cannot handle this added traffic. I envision the people of the apartment complex being unable to turn left onto Norwood due to traffic. This will lead to them turning right and likely cutting through our neighborhood. This will also need to be addressed with Autumn Sunrise added traffic and the temptation for them to go speeding through our neighborhood to avoid the Boones Ferry traffic. This will be a very clear hazard for all of us living in the surrounding neighborhood.

I know the city leaders have pledged to protect the safety and quality of life of the people of Tualatin. We have placed our trust in them. I know they can find a way to work together with the other entities to address this issue. Even without these new neighborhoods and the proposed apartment complex, this needs to be addressed. The right thing to do is to say no to the partition and annexation requests. Anything else will only make things worse for everyone in Tualatin.

Thank you for considering our feedback.

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment of further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

I am opposing this change, specifically, for the following reasons:

- **Increased traffic:** When populations are concentrated, traffic congestion is a given. **Public transportation and walkability of neighborhoods becomes increasingly important**. The traditional model of developers being required to provide a set number of parking spaces per anticipated user encourages more cars on the road, leading to more traffic issues. With no walkable services near

these apartments, and 276 units, it will require people to use their cars causing a big increase of traffic on Norwood Road and SW Boones Ferry Rd.

- **Lack of services:** Traffic and suburban sprawl are already straining our resources. The most logical plan is in-fill urban centers with high density developments. This provides the renters access to critical services. Walkability is the key to high rise/high density housing location.

- **Lack of green spaces:** Amenities like parks and other green spaces don't in themselves provide income to developers and must be planned in high density developments to provide improved quality of life for would-be residents. There are many beautiful amenities and parks in our lovely downtown Tualatin. This is exactly why builders of high-density housing build in urban areas.

This planned development will not only make everyone in the surrounding neighborhoods unhappy, it will also not make the tenants happy. This is a poor plan (or a complete lack of a plan) and literally makes no sense.

Thank you for considering our input,
Ken and Jan Perry

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment of further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

My concern with this, and all projects involving AKS, are the following:

I sent a message to AKS asking that they reach out to the neighboring community to discuss the plan following their completely failed approach at a Tree Preservation Zone. The neighborhood would like large, native trees and a sufficient buffer, as promised.

Needless to say, I have heard nothing back from them. They clearly don't care about this community or about the importance of being wise in how you blend a community in with an existing environment. They continue to take trees down next to the freeway. This is the worst possible action to take when you are near a greenhouse gas producing roadway.

My request is that you do not trust AKS as they will say anything to get approved and then fail to deliver on their promises and do whatever they want. They have continued to prove that they cannot be trusted. Please say "No!" to any of their proposals. We don't need more of what they have given us with Autumn Sunrise.

Please stand up for your constituents and communities. Please just say "No!" And please say no to HD/HR zoning changes that would remove all the remaining trees and build HD/HR apartments anywhere in Tualatin without consideration of appropriate planning and services for these apartment residents and neighboring communities.

Thank you,
Ken and Jan Perry, Stono Drive

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment of further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The proposal is concerning for so many reasons that many of us in the Bryom CIO Neighborhood have expressed to the City Council. But what is literally the most concerning on this proposal, is the following:

This appears to be an attempt on the part of AKS and the builder to continue to remove all of the trees and build high-rise apartments everywhere in Tualatin. What AKS has demonstrated thus far:

- They have no regard for the environment. They will say anything to get their plans approved and then will do exactly what they want once the approval is in place, regardless of whether they've met the commitments/promises. Unfortunately, they clearly proved this with the Autumn Sunrise development. Below is text in the document. We have seen just the opposite so far with Autumn Sunrise and cannot believe that they will do what it says, or is right, in the future.

- They have shown no concern for the community when it comes to the amount of traffic these endless building projects are placing on our roads. The traffic study concerning Alden Apartments read, from 220 added residences, it would only put 16 more trips on the road during morning rush hour and 18 trips during pm rush hour. This is beyond reason! Are we to believe that all these people are not working? That they're just staying home all day? These estimates can't be correct. Even if they were (and more, given the two developments here), that's too many more cars to put on an already overcrowded road (SW Boones Ferry) with no solution in sight.

Tualatin will be unrecognizable and impossible to navigate if such egregious plans and changes are approved. We, the citizens of Tualatin, are saying "No!" to this ridiculous proposal for a change in wording AND to the proposed apartments that will sit on this land. We are trusting our City leaders to listen to our voice of concern and reason. The City Council needs to say "No!" to the wording change and the partition request.

Thank you,
Ken and Jan Perry

Subject: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment of further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

Imagine living in a neighborhood where you paid good money for your home and you have done so surrounded by trees. You then learn that the City Council has approved a huge, high-density neighborhood and all the trees will be gone.

This changes everything for your neighborhood and for the market price of your home. The approved neighborhood will have some apartment complexes and higher-density homes but the price of the homes will reflect this fact. This is how it should work as it impacts home prices in

that **new** neighborhood. But this is all having an impact on existing neighborhoods and home owners.

For us who are living in long standing surrounding neighborhoods, adding a high-rise apartment complex has an even more profound impact. It causes our home prices to drop for many reasons.

- Regardless of what you may think or say, we know that apartments bring a higher level of crime. My husband is former law enforcement. It could not be more clear to him based on experience that neighborhoods with apartment complexes have higher rates of crime. (*Please refer to an earlier email sent to you by Brent Bebee showing crime rates in neighborhoods with apartments.)*
- The impact to the traffic, which I've previously noted, is another negative impact to our home values. *(Please refer to my earlier email on traffic impacts)*
- The esthetics to the neighborhood as you drive to your home also has an impact. Where tall evergreens once stood you now have the eye sore of a 4-7 story imposing apartment building. This is not what someone wants to see when looking for a home in a safe and quiet neighborhood.

The answer to this 8 ½ acres: A park

We don't have nearly enough parks in our area. Well, to be accurate, none. Although we know there is a park possibly being planned a half mile plus from here, that is not good enough. (The location of the park in the current plans won't be near any of the neighborhoods.)
This entire area has no park. You continue to raise money for parks (a recent bond measure was just approved) and we continue to only wish that we could have one near us.

This property would be perfect for a park. You cannot ethically continue to build homes without also providing a comprehensive plan that includes parks and open space. Doing so is how cities become concrete jungles with no plan and no open space that no one wants to live in. I've lived in areas where this has happened, and the cities have become low-income, low-quality communities. Do you want that for Tualatin?

We would like for you to consider putting together a comprehensive plan for Tualatin that includes parks and open spaces. This is so critical for the quality of life of those living here. This is what you were elected to do. Please show us you care about all of Tualatin and preserving this lovely community and our quality of life.

Thank you,
Ken and Jan Perry, Stono Drive

Subject: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment of further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

I have been walking around this area for over 3 years. This was a beautiful area with tall evergreens and an amazing ecosystem of animals and birds. I watched the birds (hawks and eagles) as they fed their young and then pushed them out of the nest to fly on their own.

I've also watched as that ecosystem was destroyed to build high density housing. Not a single tree was spared. I watched as the hawks and eagles flew in circles above the devastation which

was formerly their home. It was heartbreaking. And my husband has been taking food to the squirrels who lost their homes and food source.

Those beautiful birds have relocated, many of them finding homes in the trees that you are now wanting to remove for high rise apartments. I hear lots of talk of respecting and caring for the environment, but those words seem very empty right now. This is not a little sacrificing of trees to provide some additional housing. This is just complete and total destruction of an environment in order to provide tax money for the city of Tualatin. A city once known as the City of Trees.

In addition to the impact to the ecosystem, there will be an enormous impact to the surrounding roads. The I5 freeway is already totally exposed, adding to the amount of exhaust fumes for the neighborhood. Without the shade from the trees, our temperatures have already risen.

Additionally, this and the Lennar development will pour thousands of additional cars onto our already overloaded roads. If you are driving East on Boones Ferry Road any time after 3 pm, you will encounter up to a five mile backup of cars heading to I5. We've been told no improvements to the roads are necessary. Really? This is a nightmare.

From what I understand, there are other areas already zoned for high density/high rise development. Why are you destroying this area when other land is available for similar housing without causing this destruction? And why do you zone land only to quickly turn your back on that plan and change the zoning? The only answer must be money.

Please do the right thing. Please say "No!" to the change in the code that will bring HR/HD apartments to all of the open areas across Tualatin with no consideration to the destruction this will cause.

Subject: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment of further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

A couple of observations as to the track record of the City Council and Tualatin's (lack of) planning:

- The first plan we looked at, published by the development company (2020?), concerning the property just south of I5, included a mix of lower to higher density housing; some single-family dwellings mixed with some duplexes. Although it is extremely sad to see the beautiful trees torn down and the disruption of the many ecosystems and wildlife habitats, the plans seemed not to be too disruptive to the area; somewhat similar to what we have in our current neighborhood.

- The next plan had added even higher density housing as well as apartment buildings incorporated into the area. For those buying in that neighborhood, they would do so with awareness of the apartments and mixed high/low density. It might not be too big of an impact to us in our neighborhood. Although not great (especially given the current traffic on Boones Ferry Road), it was still something we could live with.
- The latest plan seems entirely focused on the highest possible density. Not the two-story apartments, but now 4 story apartments (and a request to change the zoning wording for all of Tualatin). These apartments would be nearer our neighborhood than earlier projected. This new plan is the most intrusive, highest impact to our neighborhood. It literally changes everything for us in the way of home value and safety (see Brent Bebee's earlier letter as it is well stated there).

This prompted a few questions:

- What seems to be driving these changes? Those defining the zoning are good with one plan and then, suddenly, more interested in another plan just to change the plan once again. What is the driver here? Do you consider, at all, the impact to the surrounding neighborhoods? To the roads and environment?
- The purpose of zoning is "to regulate and control land and property markets to ensure complementary uses." The current plan seems to be the opposite of that. It does not consider what is complementary to those living nearby. It is not even a reasonable plan that is taking into consideration the impact not only to the neighborhoods, but also to roads, schools, etc.
- These many changes in plans have created a high level of distrust in, and lack of credibility with, the City Council. Many of us are asking ourselves "what is next?" Will the zoning changes continue until there is no resemblance to the community we love so much?

We, as a community, are trying to be flexible and would welcome the opportunity to provide our ideas and feedback in this process. Are you willing to hear us out? Or is this a done deal?

Thanks for the opportunity to provide this input. I hope it will serve as a starting point for further discussion.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Ken Hawes

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to the Planning Commission and Council at the public hearing. The public hearing will be held on May 22, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

I do not support what is said below. I don't think it's fair that Horizon community church is sending this to their congregation. Most who do not reside within Tualatin City limits.

My children attend Horizon Christian School. And I do not support what horizon is doing. We live at 22545 SW Miami Drive and can barely get out of our neighborhood as it is.

We do not need apartments on this side of town. There is plenty of space downtown for that.

Thank you,
Kristin Giboney
22545 SW Miami Drive

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Thank you,

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allo the highest density land use zone anywhere in Tualatin (RH-HR). Currentl this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure mpact for almost 1,000 new approved homes still to be constructed.

Subject: No to high density in Tualatin

Dear Tualatin City Planning Commission,

Regarding the land use decisions for the proposed apartment development at 23370 SW Boones Ferry Road, please accept my comments below:

Residents in the area deserve to enjoy the benefits afforded to everyone in Tualatin resulting from rational zoning rules. Zoning rules exist for several important reasons, and this property should not be rezoned to the HIGHEST POSSIBLE DENSITY to allow a 276-unit, six-building, four-story complex to be built immediately across the street from a neighborhood of single-family homes. If this is approved, our quality of life will suffer greatly, and out property values will suffer as well.

This is especially true given that over 500 new residences have been already approved for construction within yards of this location. The resulting increase in traffic coming from roughly 900 additional households will turn the Norwood Rd – Boonesferry Rd intersection into the worst-rated intersection. Even with a traffic light, delays and backups at this intersection will be severe. This is also compounded greatly by Tualatin High School and Byrom Elementary located so close by.

This plot of land could be used to build duplexes and other multi-family units, without having to go to such high density. This would help address the housing need without so severely impacting the quality of life and property values for neighboring homeowners.

I respectfully request that the wishes of the many neighbors opposing this project, be honored. Please do NOT support the proposed Plan Map Amendment (PMA) from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR) at 23370 SW Boones Ferry Road.
V
Thank you kindly,
Linda McKean

Subject: Map and Text Amendments concerning Horizon Community Church

I have lived in Tualatin since 2004 and worked here since 2000. My husband and I purchased a home in the year 2004 and enjoy living here in Tualatin. I understand Horizon's mission and appreciate their commitment to the Tualatin and closely surrounding localities. But while I understand progress is always on going, I am not in favor of changing the zoning in the area in question from medium/low density to high density. In that area, there are over 500 new homes already started and if the zoning is changed, there will be that many more homes/apartments/condos that will build adjacent to the Norwood/Boones Ferry intersection. Boones Ferry already has a heavy traffic load and Norwood is also quite heavily travelled. My understanding is that changing the zoning to multiple density will result in taller apartment/condo complexes and also taller office buildings eventually. Having lived in the Bay Area in California, I've seen higher density zoning brings heavier traffic, more crime and less of a personal feel to a town. Please do not do that to Tualatin. Please maintain the current zoning of low to medium density in the area in question.

Thank you for your consideration.

Subject: High-rise

Dear Council,
Traffic is only one of the many reasons why a high-rise **does not** belong on Norwood Rd and should only be located in the urban core. As a resident of Tualatin, I am frustrated the developer did not even contact ODOT regarding the traffic issues Tualatin faces. This really shows the community that this developer is not really thinking about the needs of Tualatin's citizens and is really only focused on maximizing profit. Council, unlike this developer, please think of Tualatin as a whole. As a community, we deserve better than being only thought of as tax revenue.
Thank you,
Lisa Rice

Subject: No to PTA23-0001 and PMA23-0001 Applications

Hello,
I wrote previously about my concerns for safety (traffic related) and environmental concerns in allowing for a high rise in this location of Tualatin. I also do not believe it's in the best interest of our city to allow for high rises to be built anywhere. And finally, although affordable housing is important, unless these are actually low income housing, based on the current market they will certainly not be affordable. In light of all of this and more, I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Consider the needs of the entire City.
Thank you for your serious consideration on this matter.

Ladies and Gentlemen,

As a resident of Tualatin for the past 17 years and a former resident of Portland, I am deeply concerned about the proposal to change the current zoning code. I live in the Byrom neighborhood and its appeal was obvious from the moment my family and I moved here: An abundance of trees, limited traffic, neighbors who care about their property, and a peaceful, lovely atmosphere of a smaller city.

I am concerned that the proposed changes could threaten those qualities. Already, traffic congestion along Boones Ferry Rd. can, at times, line up from Day Road all the way back to Norwood. With the addition of the Autumn Sunrise subdivision, nearly 500 new residences will be added to this area. Add into that 276 apartments from this proposal, and I fear that the livability of this section of Tualatin will be dramatically decreased.

Tualatin is a very special place, and I stand with our citizens who demand a lighter and more considerate approach to growth. To do otherwise is to risk destroying the qualities that make this area so attractive, and so different from the city of Portland, which, sadly, has become everything we abhor about large cities.

I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Please consider the needs of the entire City.

Please don't turn Tualatin into another Portland.

Thank you for your time and attention,

Lorrie Callopy

I agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community. For now I am requesting our City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Lynda McGillvrey

I would like to go on record as being strongly opposed to these proposed changes! It is truly a case of too much too fast. I do not believe the infrastructure is in place to support growth like this. In my mind, high rises belong only in downtown where the zoning reflects the ability to support that many more people, cars, etc.

Thank you,

Subject: Please NO on PTA23-001 and PMA-001

High Rises BELONG in Tualatin Central Urban Renewal District ONLY.

High density high rise dwellings are limited to the core of Tualatin for good reason:

- Amenities within walking distance
- Shops and City services
- Mass transit
- Supporting City infrastructure
- Architecture that blends with existing urban environment
- Lighter dedicated parking requirements
- Livability and accessibility within a car-dependent suburb

They make NO SENSE anywhere else in Tualatin, especially on the edge of practically farmland and ON TOP OF ~600 units already approved for construction.

Sincerely,
Margie Humphrey, CPA

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: Norwood Multi Family

Dear Ms Nelson,

We have been Tualatin residents since 1990. We have lived at our current home on Stono Drive which backs up to Norwood since 1997.

We are adamantly opposed to the zoning change to high density residential for the proposed apartment building. We understand the church wanting to sell this property. However, we would like to see a park or single family residences instead of high rise apartments.

Boones Ferry and Norwood are extremely congested at different times of the day. There are approximately 400 new homes being constructed that will further congest the area. One stoplight isn't going to correct this problem.

Additionally, we do not have the infrastructure to support this high rise building. We are requesting that the Tualatin City Council vote against the proposed plan.

If there is truly a great need for multi family housing, it should be in the downtown core where there is access to public transportation seven days a week and a grocery store within walking distance.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Marlene Redwing

Subject: NO HIGH RISE ON NORWOOD.

I agree with the planning commission, the text amendment and plan amendment are not in the public's interest and this development is not appropriate for the area on Norwood Rd. A high-rise belongs downtown as the current code allows. In addition, Horizon is continuing to push an email campaign and is being even more aggressive.

No high rise belongs in down town Tualatin.

Sincerely

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able to remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Title of email: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local

transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

Sincerely,
Mary Kruchoski

I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Consider the needs of the entire City.

Also, please remove all those stupid scooters from our town. I can't believe the A.D.A. hasn't complained about this horrible idea. They are blocking sidewalks constantly.

Dear Mayor Bubenik;

I say NO to PTA23-0001 and PM23-0001 APPLICATIONS AS THESE ARE NOT INTHE BEST INTEREST OF THE PUBLIC AND THESE APPLICATIONS ARE NOT APPROPRIATE FOR THE AREA.

Also, why is an out of state company coming in to build multiple high rises? Additionally, why were no studies done or plans made for traffic, infrastructure, etc.

Thank you,
Maura Hemann

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Megan Campbell

Hi Mayor Frank Bubenik,

My name is Michael Gallardo and I live in the Riverpark neighborhood in Tualatin.

I am writing because I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Please consider the needs of the entire city.

Thank you for your time and consideration.

Sincerely,
Michael

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: Norwood Re-Zoning - NO GOOD!

Dear Council,

Hello! I am a Tualatin resident in support of *Norwood for Smart Zoning*. There's an annexation meeting tonight and we know this is the first step toward a re-zoning for the proposed high-rise apartment building development on Norwood. Please consider the negative outcomes from this proposal. Allowing this development in an area that isn't designated for this type of living is detrimental to the roads, traffic, trees, existing home property values, the neighbors' views and lack of sound barrier, etc.

Re-writing our zoning laws, means these developers are trying to take power over not only the subject property, but ANY property in Tualatin. DO NOT GIVE DEVELOPERS THE POWER TO DO WHAT THEY WISH IN OUR BELOVED CITY! We the people, should be making these decisions on how we want our city to grow. Giving developers a golden ticket will take our power away.

Before you argue that this will create more housing for Tualatin, consider the areas that are already designated for these types of properties. The development company is not interested in providing homes for the community, they are interested in **profit**. That's it! Because they have investors they need to please, they're not interested in paying market price for property that's already designated for high-rise high-density apartments. They'd rather go after less expensive land, pay their lawyers to re-zone the area and make a larger profit margin for their investors.

Here's a direct quote from Vista Residential Partners website, that proves my point above:

"Vista Residential Partners seeks out multifamily and mixed use development opportunities in target submarkets where the supply and demand dynamics provide the opportunity to maximize investor return.

Commercial real estate has become increasingly competitive, with investment capital from around the world flowing to opportunities more quickly. This makes the ability to identify an attractive mispricing of risk as well as having the ability to quickly close transactions critical in today's market. Vista's proficiency with evaluating and executing these opportunities has proven to be a quantifiable advantage for our investors and our firm."

Remember you're representing us, the citizens of Tualatin, not a national investment company that has no obligation to our city.

Thank You,

Michaela Zacher

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank You,

Michele Leisman

In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: RE: Proposed Map and Text Amendments for Vista Residential Partners
Attachments: Notice of Hearing PMA 23-0001 & PTA 23-0001.pdf

Good Afternoon,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to the Planning Commission and Council at the public hearing. The public hearing will be held on May 22, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

A Notice of Decision shall be provided to anyone submitting written comments. As a comment participant, you will receive a Notice of Decision when the decision is made – do you have a preferred mailing address you would like the notice sent?

Madeleine Nelson

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Mike Muralt

Tigard resident

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Olivia Peterson

Subject: NO to High-rise outside of downtown Tualatin

Mayor Bubnik,

I moved to Tualatin because it has a nice home town feel.

I say NO to PTA24-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area.
A High-Rise south of the Norwood Rd will increase an already bad gridlock on Boones Ferry.
A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it.
Consider the needs of the entire City.

Thank you,
Pam Hahn

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commissioners,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident Tualatin and a member of Horizon Community Church, these two decisions are very important to the future plans for Horizon (and the City of Tualatin, too).

I would like to express concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

I urge you to support and approve the Map and Text Amendments. Thank you for your consideration.

Thank you,

Paul and Vanita Pedersen
19338 SW 55th Ct, Tualatin

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

- **Dear Ms Nelson**

  I am writing in opposition to the planned SW Norwood annexations referenced above.

  I have lived in the Norwood neighborhood for 28 years and use Norwood Road to access Boones Ferry Road several times a week. I am already nervous about how the Autumn Sunrise development will affect traffic in that neighborhood—adding a whole high rise on top of that will surely cause terrible daily traffic congestion, especially without major improvements to the surrounding roads.

  Please consider the needs of the existing and new residents of this neighborhood and deny the annexation until a comprehensive traffic mitigation can be implemented.

  Thank you

  Penny Harper

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments against both the Map and Text Amendments.

As a resident of this community and a former constituent of Horizon “Community” Church and School, I am against rezoning a residential neighborhood to high rise buildings and permanently altering the Tualatin development code to allow for high rise, anywhere in the city of tualatin.

The due diligence to determine appropriate infrastructure as required by state law has not been conducted in order to ensure the proper services to support current and future residents of Tualatin.

Please do not recommend the Map and Text Amendments to City council.

Thank you,

Rachel Neill

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Randy Campbell

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Randy Sapitan

Subject: Opposed to PTA23-0001 and PMA23-0001

We moved to this Tualatin neighborhood 22 years ago and we are opposed to applications PTA23-0001 and PMA23-0001 as these are not in the best interests of our local community.

I don't appreciate having an out-of-state developer, or those working on their behalf, coming in and attempting to gain a rezoning of our neighborhood and put in a high-rise, high-density development.

I am convinced that very few, if any, of those advocating for these applications actually live in this neighborhood. Regardless, this is just not a suitable area for a high-rise. The downtown area is already set for that.

I know growth will happen, but let it be done wisely, not just growth for growth's sake or for profit only.

Additionally, we still don't know what impact the Autumn Wind development will have in our community once it is complete and people have moved in.

When considering growth, please, let's not allow developers to indiscriminately alter the character of our neighborhoods.

Thank you,
Randy Welborn

Hello,
I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. It would change the entire character of our neighborhood and I am concerned it would allow for any other kind of high-rise development.

A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Also, I especially don't appreciate out-of-town developers dictating what and where development will occur.

Please consider the needs of the entire City.

Thank you,
Randy Welborn

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: High rises on Norwood

Dear Mayor Frank Bubenik,

We are very concerned about the possible building of high-rise structures in the new development on Norwood road. Please say no to PTA23-0001 and PMA23-0001.

High-rise structures are fine in the downtown area of Tualatin, but don't belong anywhere in the new development on Norwood. By the number of signs I've seen I believe there are many others who feel this way.

Thank you,
Reed Elwyn

Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin Development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: No to PTA23-0001 and PMA23-0001 Applications

Ladies and Gentlemen,

As a resident of Tualatin for the past 17 years and a former resident of Portland, I am deeply concerned about the proposal to change the current zoning code. I live in the Byrom neighborhood and its appeal was obvious from the moment my family and I moved here: An abundance of trees, limited traffic, neighbors who care about their property, and a generally peaceful atmosphere (even with the freeway just a block from our home.)

I am concerned that the proposed changes could threaten those qualities. Already, traffic congestion along Boones Ferry Rd. can, at times, line up from Day Road all the way back to Norwood. With the addition of the Autumn Sunrise subdivision, nearly 500 new residences will be added to this area. Add into that 276 apartments from this proposal, and I fear that the livability of this section of Tualatin will be dramatically decreased.

Tualatin is a very special place, and I stand with our citizens who demand a lighter and more considerate approach to growth. To do otherwise is to risk destroying the qualities that make this area so attractive, and so different from the city of Portland, which, sadly, has become everything we abhor about large cities.

I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Please consider the needs of the entire City.

Thank you for your time and attention,

Ron Dunevant

Esteemed Members of the Tualatin City Council,
I have written to you previously regarding the proposed change to the zoning of the land south of SW Norwood Road. Again, I ask you to consider the long range ramifications such a change will have on the quality of life that Tualatin offers its residents. Tualatin is a very special place, one that my family and I are grateful to have called home for the past 17 years. While I understand that some growth is necessary, I also believe a more moderate approach is imperative to ensuring that future residents are able to enjoy that same quality of life.
I agree with the Planning Commission that a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community.
For now I am requesting the City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.
Thank you for your time and your service to this community,
Ron Dunevant 21865 SW Mandan Dr, Tualatin, OR 97062 971-678-1454 rondunevant@gmail.com

I am writing this to you and the city council to look at the long range ramifications of changing the zoning on Norwood Rd to build apartments/high rises.

This area is zoned for single family homes. High rises are zoned in Tualatin downtown, where there is plenty of land to build on and where there is better public transportation, and shopping.

Please understand that the citizens you represent are very much against this proposal. There are so many housing projects taking place on Norwood and Boonesferry Rd. that another one is not justified or needed.

Sincerely,
Rose Toler

I have lived in Tualatin for over 30 years. I have watched more and more apartments, condos, high rises be built mainly throughout the downtown area, as that is where they belong. Norwood Rd and Boonesferry Road are not zoned for high rises for good reason. It is an area of duplex and single homes. I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A high-rise belongs in downtown Tualatin ONLY where infrastructure can support it.

Subject: re-zoning

As a resident of Tualatin for over 30 years. I have watched more and more apartments, condos, high rises be built mainly throughout the downtown area, as that is where they belong. Norwood Rd and Boonesferry Road are not zoned for high rises for good reason. It is an area of duplex and single homes. I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A high-rise belongs in downtown Tualatin ONLY where infrastructure can support it and is already zoned for high-rises.
Also, has anyone even given any thought to the impact of all the traffic that this is going to create. South Boonesferry Road is already overwhelmed by the afternoon with traffic. This is just creating further congestion.

I urge you to vote NO this rezoning request. These companies can build the high-rise they want in the areas already zoned for it within Tualatin.

As you can see, I am against rezoning the City of Tualatin in order that high-rises can be built anywhere within the town. We already have a zoning code that allows for high-rises to be built within the city. At this point I do not believe it is necessary to add any other housing in our area. The City of Tualatin has already done an incredible job of increasing housing throughout the city.

The other very serious issue is the traffic. It is one thing to keep adding housing, it is another to keep up the infrastructure to support it. The south end of Tualatin currently has traffic on Boonesferry that starts collecting as early as 2-3 o'clock during the week and worse on Fridays. Adding 3-400 more cars is only going to make it worse. And now you are considering a high-rise in addition to Autumn Sunrise!?!?

What about a park for the "community" that everyone keeps talking about? The 'community' is in need of traffic relief and something for the families that already reside here and the future ones that will be in Autumn Sunrise. My guess is that a park, or playground, etc. would be very beneficial for this area.

Please vote no on the rezoning.

Dear Madeleine Nelson,

Thank so much for your reply. You can send us a email: heyer4414@comcast.net
or send a note to Heyers at 22775 SW Vermillion Dr. Tualatin OR 97062
We have lived in Oregon for more than 50 years and in Tualatin for over 21 years. We love Tualatin and hope we do not get High Rise Buildings,we have enough traffic with the project they are doing already. I can not drive now from Norwood in Boones-Ferry Rd around 4-5 to go Costco. Please think about that, a traffic light will not solve it, would even get worse. Thank you for your dedication and caring.

Rosemarie Heyer

How many units can you put on one acre by law?

There is a big empty field on corner Grahams-Ferry Rd.and Tonquin

There is a building from EX- Frye's Store in Wilsonville , close to shopping and also Transportation.

There is the old Albertson building in Tualatin where the Wes-Station is and shopping center and Red Line Bus around Tualatin.

If you add a 1000 people on Norwood and no park and no Sub Police, this area will get worse with more crime.

Last week our car door got broken when somebody wanted to steal our car and it was locked.

If the builder gets the change they can build not only 4 story high, even up to 7. Nowhere else are 4 story buildings next to single houses here. First they said high end apartments and the Church says now low housing apartments, this is all wrong.

If you live here across the street, you would never approve it, I know.

Thank you for listening and thinking hard to make a decision.

Sincerely

Rosemarie Heyer

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission, As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments. As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too. I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes. Please support and approve the Map and Text Amendments. Dear Mayor Bubenik,
I am writing to express my strong opposition to the applications from a developer from Georgia changing the city building codes. The codes were put in place by our city government to prevent exactly this kind of situation.

These changes are solely for the purpose of maximizing profits for an out of state developer. The proposed building changes are far too dense and would allow for a high rise next to residential homes and over 40 units per acre.
This change ruins plans to concentrate future development downtown. Traffic is already a nightmare the Lower Boones Ferry and Stafford areas and would only get worse. The Norwood area is not prepared for this type of unfettered growth and negatively impact those who live around it.

Don't turn Tualatin into Portland in the name of "progress" or profits. Continue with intelligent, responsible city planning that will not turn our beautiful, forested community into an urban nightmare.

Sincerely,
Sam Bartholomew

Subject: No high rise on Norwood

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local

transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Sandi Hamm

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

I agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community. For now I am requesting City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.
Thank you,
Sara Gregory

Subject: Norwood opposition

Dear Council,
Traffic is only one of the many reasons why a high-rise **does not** belong on Norwood Rd and should only be located in the urban core. As a resident of Tualatin I am frustrated the developer did not even contact ODOT regarding traffic issues Tualatin faces. This really shows the community that this developer is not really thinking about the needs of Tualatin's citizens and is really only focused on maximizing profit. Council, unlike this developer, please think of Tualatin as a whole. As a community we deserve better than being only thought of as tax revenue.
Thank you,
Sara Gregory

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to the Planning Commission and Council at the public hearing. The public hearing will be held on May 22, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

A Notice of Decision shall be provided to anyone submitting written comments. As a comment participant, you will receive a Notice of Decision when the decision is made – do you have a preferred mailing address you would like the notice sent?

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you

Subject: Norwood Project

Good Morning,

I am writing to you about the proposed high rise on Norwood Road. I am 100% against it. A huge apartment complex doesn't belong there. It isn't zoned for it and that alone should be enough to stop it. I feel like the planning department and city council have turned a blind eye to what the citizens of Tualatin want. There is huge opposition to this project and no one at the city level seems to care.

When I replace a water heater at my house I have to get a permit to do it and follow the rules. If I wanted to add a 3 or 4th story to my home I would ultimately be turned down and not able to secure the permits needed. Why then does the developer and Horizon Church not have to follow the same rules that I do? It's not zoned for that and shouldn't be approved. There is no bus service to areas around Tualatin from that location. There is only Tri-met service Monday through Friday. There are no grocery stores etc anywhere around there.

If you approve this type of development on Norwood Road then you will be approving this type of development everywhere in Tualatin. Do you really think this is what the citizens of Tualatin want? Remember we the citizens of Tualatin do not have access to high priced downtown Portland attorneys like the developer or Horizon Church do. We only have our elected officials to represent us. I don't feel that you are doing that at all!

Norwood road is 100% wrong for such a huge complex. The traffic is already awful and at times the traffic line to get through day roads backs up back to Norwood road. There are no plans that I have heard of to help alleviate the traffic issues that will be caused by more traffic. The solution of adding lights will not help this. It will make matters worse.

As a concerned citizen who has lived in Tualatin for over 30 years I am pleading with you to say no to this development and make the developer and Horizon Church follow the rules and zoning that are already in place.

Thank You,

Sherrie Nelson

Hi Sherrie,

Correct, the applicant submitted a request for a continuance of the hearing from May 22 to June 12. We agree that the timing is frustrating and that getting the word out is challenging. The City sent out postcards today to the notice area and we are putting information on our social media platforms, and, we are hoping that folks like you will help get the word out since you've been in the trenches of this for a while.

Subject: Changed Meeting Date

Good Afternoon,

I just heard that the meeting that was being held on May 22nd about the zoning change has been changed to June 12th. I am beyond dismayed, aggravated, and disappointed in the way this process has been handled. I hope that the city council, planning commission, and others involved in this decision can see what an underhanded ploy this is by the applicant to reduce and confuse the number of opposing citizens who would be at the meeting on the 22nd of May.

We, have spent so much time and money passing out over 4,000 flyers. This money was given to us by the citizens of Tualatin that are opposed to the rezoning process. How are we going to let everyone know that the meeting date and time has changed? We aren't a big developer that can afford high priced downtown attorneys or a church with wealthy donors who can bank roll a campaign. We are just ordinary people who work hard for our money and it has now been wasted on all of this. This is beyond frustrating!

I think the majority of citizens in Tualatin are against the rezoning of this parcel of land. I would hope that the city council, mayor, and all involved in this decision would take that into consideration. I also hope that there is some way to help the citizens of Tualatin get the word out about the meeting change.

Sincerely,

Sherrie Nelson

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Sheryl Bunfill

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

I say NO to PTA23-0001 andPMAA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Consider the needs of the entire City.

Hello,

As an owner of properties on Boones Ferry Rd on both sides of this proposal, I can say for certain that this is a really, really bad idea.

Not only do we not need this project, it will make traffic so much worse than it already is. I have had six car accidents on my property south of the project and increased traffic flow will only make this worse. There are already evenings when the traffic backs up as people try to get onto I5. With this additional increase over what's already in the works, traffic will get worse to the point of intolerable.

It makes much more sense to put such a development elsewhere in Tualatin, where car traffic can be mitigated with bus/foot/bike transportation and a multi-story building won't look out of place. I understand that there are times when owners and developers want to push or stretch the boundaries of what is zoned... it's understandable. It's also understandable when elected officials push back with the support of the will of the people to hold firm to the current zoning.

I would expect any elected official to do what's best for their constituents.

Steve Zimmerman

Subject:

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Steven R Hamm

Dear Mayor and Tualatin city council and Planners

I have been a citizen of Tualatin for over thirty years. I have seen many changes over the years, some for the good, many for the worst in regards to the livability of its citizens. Traffic being one such issue, no surprise there I'm sure. The latest attempt to ruin our livability in this fine city is the re-zoning of property to allow High-rise dwellings to be located anywhere in the city. This I am totally against. There is one being purposed on the corner of Norwood and boones ferry road. With a huge neighborhood already being built, having a High rise located on the corner would be a traffic and livability disaster. There other other places in Tualatin like downtown that would be better suited like where the old Hagans store was located. Close to transit and amenities. I say NO to any development that can't be supported by existing city infrastructure as well as city zoning. I say NO to development that opens floodgates to High-rise everywhere. I say NO to development that hands our wonder city of Tualatin over to Developers to ruin our city and lessen our livability. There are better choices out there lets do the right thing by our community and not developers who don't even reside in our state.

Sincerely,
Steve Hamm

Mayor Frank Bubenik, I am a resident of Tualatin since 1994 and moved here because of the city's dedication to preserving open space and controled growth, livability of my neighborhood and the Tree City USA support of trees! When I moved here, there was a study being done to address the traffic and congestion on Tualatin/Sherwood Road and the traffic issues that became apparent at that time, with the growth taking place in the city. To this date, nothing "new" has happened, other than the traffic increasing significantly! Now the Council is considering changes to its restrictions so a high rise can be built by an out of town developer and all the trees removed outside of the city! How on earth does this even make sense, other than profits going to the developer?? Traffic will only get worse with these high rise structures, which are meant for a downtown area, with infrastructure that can be supported, not outside of the center of town. The road leading to this development can not sustain the traffic that will result from this huge project! As a taxpayer and resident of this city, I urge you to vote NO, and No on PTA23-001 and PMA23-001! Our neighborhood will show our support in person on May 22. We are all dumbstruck that this is even being considered by the City.

Respectfully submitted

Subject: me, Susan regarding the land use decisions: For the Record

Tualatin City Planning Commission,

Regarding the land use decisions for the proposed apartment development at 23370 SW Boones Ferry Road, please accept my comments below:

Residents in the area deserve to enjoy the benefits afforded to everyone in Tualatin resulting from rational zoning rules. Zoning rules exist for several important reasons, and this property should not be rezoned to the HIGHEST POSSIBLE DENSITY to allow a 276-unit, six-building, four-story complex to be built immediately across the street from a neighborhood of single-family homes. If this is approved, our quality of life will suffer greatly, and our property values will suffer as well.

This is especially true given that over 500 new residences have been already approved for construction within yards of this location. The resulting increase in traffic coming from roughly 900 additional households will turn the Norwood Rd – Boonesferry Rd intersection into the worst-rated intersection. Even with a traffic light, delays and backups at this intersection will be severe. This is also compounded greatly by Tualatin High School and Byrom Elementary located so close by.

This plot of land could be used to build duplexes and other multi-family units, without having to go to such high density. This would help address the housing need without so severely impacting the quality of life and property values for neighboring homeowners.

I continue to worry about the accidents and the near misses I have witnessed along Boones Ferry Road and Norwood. One accident I witnessed was at the intersection of Boones Ferry and Norwood - a young woman swerved to avoid an oncoming car, She hit a curb and was unconscious. I immediately gave her first aid and called

911 and waited until the EMTs took over. I have also witnessed near misses with children on their bikes on Boones Ferry, some running when crosswalks because cars are speeding and disregard crosswalks.
Please tell me where the nearest crosswalk will be between Boones Ferry and Norwood and Boones Ferry Road and Boones Ferry and Boeckman Road? I feel it is unsafe to pass this decision and explain to the next driver that gets hurt or killed - blood on your hands!

I respectfully request that the wishes of the many neighbors opposing this project be honored. Please do NOT support the proposed Plan Map Amendment (PMA) from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR) at 23370 SW Boones Ferry Road.

Thank you kindly,

Susan Humphrey RN

Tualatin Planning Commission meeting on 1/19/23. The meeting agenda: discuss a significant zone change that would allow heavy manufacturing behind residents' homes on Boones Ferry Rd.(Tualatin City Council will also be discussing this issue on 2/27/23).

You know what happened? The developer ***brought an attorney to the meeting***. It seemed to attendees that the developer was implying they would file a lawsuit if they didn't get their way.

At the same meeting a resident had concerns and questions regarding the zone change, and they accidentally spoke out of turn.They were quickly silenced by one planning commissioner.
Thankfully the Chair let this person speak, but at the end of the meeting when the Commission was supposed to deliberate on a recommendation to council, the ***developer***spoke out of turn to sway the commission one more time.

It wasn't enough that the developer received more than half an hour for their presentation earlier, it was that they had ***so much clout to basically walk all over the process***. And they were not silenced by any planning commissioner and were allowed to speak out of turn.

We hope you see the issue here…
From our perspective it seems as if Council has forgotten who is really in charge of the city.

It is supposed to be **the citizens**, not developers.

A high-rise is not a smart choice on SW Norwood Rd when ***this type of development is supposed to be in the core of Tualatin***.

Kind regards,
Susan Pitt

Subject: No to PTA23-0001 and PMA23-0001 Applications

Good Afternoon.

I wish to state that I strongly oppose altering the City Code as proposed. **Changing the text of the Tualatin Development Code opens the entire city to high rise development anywhere and is not just relative to the proposed high rise apartment building on Norwood,** but goes much further than that. It affects all of Tualatin and the surrounding unincorporated areas, as well as our neighboring cities. It affects all of our community and everyone who lives, works, shops or visits this city.

Tualatin has already done our part to alleviate the housing crisis with almost 1,000 new units already underway here in the past two years. We have already met 92% of the City's 30-year growth plan!

Additionally, we are already in compliance with the 2022 Oregon Housing Needs Analysis. We do not need to do more.

Our existing city infrastructure cannot support this level of growth.

Any new high rises should be built in the core of Tualatin, where infrastructure and amenities provide quality of life for apartment/condo living.

Kind regards,

Susan Pitt

Hello Planning Department,
>
> Increasing the residential density on Norwood Rd. by nearly 500% will most certainly negatively affect the entire area, with markedly increased traffic throughout the neighborhood streets, as well as on Boones Ferry Rd. What improvements are planned to mitigate these issues?
>
> My husband and I stand firmly against allowing a high rise on Norwood Rd. and changing the zoning for the church-owned property currently zoned institutional to high-density residential.
>
> Kind regards,
> Susan Pitt

I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Consider the needs of the entire City.

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to Council at the public hearing. The public hearing has been continued from its original date (May 22, 2023) and will be heard by Tualatin City Council on June 12, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

A Notice of Decision shall be provided to anyone submitting written comments. As a comment participant, you will receive a Notice of Decision when the decision is made – do you have a preferred mailing address you would like the notice sent?

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Terry Swartout

I agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community. For now I am requesting City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.

Thank you,

Subject: Concern with application PTA 23-0001

Hi Madeleine,

I am concerned that the application is still incomplete, as those involved with the project did not make any known attempts to contact any of the executive committee members of the Byrom CIO.

This is in violation of TDC 32.140 criterion h:
A statement as to whether any City-recognized Citizen Involvement Organizations (CIOs) whose boundaries include, or are adjacent to, the subject property were contacted in advance of filing the application and, if so, a summary of the contact. The summary must include the date when contact was made, the form of the contact and who it was with (e.g. phone conversation with neighborhood association chairperson, meeting with land use committee, presentation at neighborhood association meeting), and the result.

I have CC'ed the other Byrom CIO board members, who can also confirm that they have not been contacted regarding this project.

Thank you Madeleine!

As a community member, I would appreciate it if planning department procedure changed and posted materials publicly as soon as possible, even if that includes a clear indicator that the application is not yet complete and moving forward. The goal in this change would be to create a greater degree of equality for project applicants and community members, as applicants likely put significant time and effort, at their own pace, to put their materials together, whereas delays in a proposed change drastically limits community members' time to research the project and its impact from their perspective.

Hi Madeleine,

Are there public comment opportunities related to PTA23-0001 beyond the public hearing?

I am concerned as the submitted public meeting summary as written does not capture the significant neighborhood opposition to the project.

Additionally, could you provide insight as to why it took over a month after application submission to make the text revision application public?

Thank you,

Tim Neary, Byrom CIO President

Subject: Comment for Planning Commission re: DO NOT APPROVE PTA23-0001 and PMA23-0001

Hello Planning Commission, Planning Staff, and City Council:

The proposed text and map amendments will be harmful to the community if approved.

The proposed text amendment is particularly problematic in that it removes the restriction for residential high rises to be built anywhere in the city. This is not consistent with the context of most of Tualatin, and based on approval criteria, should not be approved.

The proposed map amendment is similarly problematic, in that approving the building of high rise residential housing is not in context with the community, and there are precedents that the construction of high rise apartments will adversely impact neighboring home values.
Please see below as I will speak to each point for consideration of approval as outlined by the TDC.

TDC 33.070(5) *Approval Criteria.*

a. Granting the amendment is in the public interest.
   Comment: Hundreds of residents have expressed opposition, as well as leadership of all of the Tualatin Residential CIOs. The message from the residents of Tualatin is clear, these amendments are not supported by the people, and are not in the public interest.

(b) The public interest is best protected by granting the amendment at this time.

Comment: Given the approved and in development housing units that have yet to be occupied and that these units are well in excess of the anticipated need of the city by 2040, it is not critical or necessary to change the restriction on residential high rises at this time.Furthermore, public interest would be harmed by granting the amendments, as traffic will worsen on Boones Ferry, adversely impacting quality of life.

(c) The proposed amendment is in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan.

Comment: The comprehensive plan does not call for building residential high rises outside of the downtown area, and the area for the proposed Norwood high rise is specifically left as undeveloped on the maps associated with the comprehensive plan. Per the Tualatin 2040 Comprehensive plan, high density residential/ high rise zone is specifically supposed to be in areas with the greatest access to amenities. The site at Norwood Rd has no access to amenities. See the description copied from the 2040 developmental plan.

High-Density Residential/High-Rise Planning District (RH-HR)
This district supports a wide range of housing types at the greatest density of household living in areas with the greatest access to amenities.

34 TUALATIN 2040

(d)The following factors were consciously considered:

(i)The various characteristics of the areas in the City;

The Norwood apartments project is not in context with the neighborhood and would not match the characteristics of the community.

(ii) The suitability of the areas for particular land uses and improvements in the areas;

The area is not suitable for use as a residential high rise due to the poor traffic infrastructure, inadequate parking plan, lack of access to amenities, and lack of support by public transportation.

(iii) Trends in land improvement and development;

There are no trends of building high rise apartments in any other areas of Tualatin, including presently in the only approved area in downtown. High rise apartment projects should focus on the area where zoning is already approved before considering expanding the zoning area.

(iv) Property values;

There are precedents that construction of a high rise apartment complex is associated with negative impacts on nearby single family home property values:

1. **St. Charles County v. Breeze Park Senior Living Communities, LLC: In this case, the construction of a high-rise senior living complex was found to have a negative impact on the property values of neighboring single-family homes. The court ruled that the high-rise complex, which obstructed the view and privacy of the neighboring homes, caused a reduction in property values, and awarded compensation to the affected homeowners.**
2. **Murr v. Wisconsin: In this case, the construction of a high-rise condominium complex was found to have diminished the value of a neighboring single-family home. The court determined that the high-rise complex, which restricted the development potential and**

use of the neighboring property, resulted in a "taking" of property rights without just compensation.

3. **Hobart v. Hobart West Group: In this case, the construction of a high-rise residential building was associated with a decrease in property values of nearby single-family homes. The court found that the high-rise building obstructed views, created noise and traffic, and resulted in a loss of privacy for the neighboring homeowners, leading to a reduction in property values.**

(v) The needs of economic enterprises and the future development of the area; needed right-of-way and access for and to particular sites in the area;
As the 2040 comprehensive plan, which includes economic development of the Basalt Creek Planning area, does not include the Norwood property, there is no support for the creation of the Norwood high rise apartments having been factored into consideration of economic enterprises and other future development.

(vi) Natural resources of the City and the protection and conservation of said resources;
A forest was destroyed to build Autumn Sunrise, and what remains of the forest is on the proposed land for development. The city has provided no evidence that protection and conservation of natural resources was considered in the proposed map amendment. The proposed text amendment could have far reaching impact on natural resources throughout the city if it enables remaining natural land to be developed as high rise apartments.

(vii) Prospective requirements for the development of natural resources in the City;

(viii) The public need for healthful, safe, esthetic surroundings and conditions; and
South Tualatin has already experienced a drastic reduction in healthful, safe, aesthetic surroundings. A view of a forest is replaced by a field of mud and two looming water tower eye sores. On dry days, construction dust covers the adjacent neighborhoods. Road noise is much louder, and wind blows harder with the trees gone, resulting in many residential fences along Norwood being blown over and homeowners being saddled with repair costs. Removing the remaining forest would further reduce the healthful, aesthetic surroundings of South Tualatin.

(ix) Proof of change in a neighborhood or area, or a mistake in the Plan Text or Plan Map for the property under consideration are additional relevant factors to consider.

(e) If the amendment involves residential uses, then the appropriate school district or districts must be able to reasonably accommodate additional residential capacity by means determined by any affected school district.
Comment: The Sherwood school district commented the ability to accommodate additional students; however TTSD was not contacted to identify how they could accommodate students that may petition to enroll in TTSD so they would not have to travel to Sherwood district schools. There is also no assurance that school district boundary lines will remain in place into the future, so TTSD should also be consulted should boundary lines change.

(f) Granting the amendment is consistent with the applicable State of Oregon Planning Goals and applicable Oregon Administrative Rules, including compliance with the Transportation Planning Rule TPR (OAR 660-012-0060).
Comment: The increased population would overburden Norwood and Boones Ferry Roads. There is already inadequate public transportation. The proposed apartments are not consistent with the Transportation Planning Rule.

(g) Granting the amendment is consistent with the Metropolitan Service District's Urban Growth Management Functional Plan.
Comment: The proposed Norwood apartments, and the building of any high rise in Tualatin, is not needed given at this time or in the foreseeable future given Tualatin's forecasted housing needs as outlined in the 2040 comprehensive plan. Most significantly, the proposed Norwood Apartments are contradictory to the

Metropolitan Service District's Urban Growth Management Functional Plan, specifically Title 12: Protection of Residential Neighborhoods, and Title 13: Nature In Neighborhoods.

(h) Granting the amendment is consistent with Level of Service F for the p.m. peak hour and E for the one-half hour before and after the p.m. peak hour for the Town Center 2040 Design Type (Comprehensive Plan Map 10-4), and E/E for the rest of the 2040 Design Types in the City's planning area.

Comment: This project integrated data from Autumn Sunrise to complete the traffic study, however this study gathered data during the pandemic when driving patterns were drastically different. Additionally, Traffic impact from the Norwood apartments project was not comprehensively considered with the impact of Plambeck Gardens and industrial development in the Basalt Creek Planning area. It is probable that if a comprehensive study were completed, significant failures on both Boones Ferry and Norwood Road would be observed.

(i) Granting the amendment is consistent with the objectives and policies regarding potable water, sanitary sewer, and surface water management pursuant to applicable goals and policies in the Tualatin Comprehensive Plan, water management issues are adequately addressed during development or redevelopment anticipated to follow the granting of a plan amendment.

(j)The applicant has entered into a development agreement. This criterion applies only to an amendment specific to property within the Urban Planning Area (UPA), also known as the Planning Area Boundary (PAB), as defined in both the Urban Growth Management Agreement (UGMA) with Clackamas County and the Urban Planning Area Agreement (UPAA) with Washington County.

As you can see, the proposed text and map amendments do not meet many of the approval criteria s outlined in Tualatin Development Code, and therefore cannot be approved.

As a final note, neighbors have become aware that Horizon Christian School has launched an e-mail campaign. **Please note, many, if not most Horizon members do not live in Tualatin and do not have a vested interest in our town and community.** Please be aware that the motivation for this campaign is **not focused on community benefit**, but rather focused on the church raising capital to build a new sanctuary. As evidence of this, here is a screen grab from the page instructing Horizon members to write the city:

---

from those of us in support of this project as well.

To send an email, **simply click the button below**, it will open a new email on your device that will include a letter to the Planning Commission and their email address already populated. Then just **add your name, address, and phone number at the end of the email** and send it **no later than Friday, April 14.** You may add personal comments if desired.

Thanks for your help with this important effort that we believe will help us secure a new sanctuary for Horizon and bring new residents to our area!

Blessings,

Pastor Stan

EMAIL THE CITY OF TUALATIN HERE

Email the City of Tualatin Here

For all of the above reasons, the city cannot approve the proposed map and text amendments: PMA23-0001, and PTA23-0001.

Thank you, and you are welcome to contact me for further information.

Subject: Re: Comment for Planning Commission re: DO NOT APPROVE PTA23-0001 and PMA23-0001

Hello Madeleine,

I wanted to amend my previous comment, as I could not find support for one of the sources that was relayed to me about the potential for negative impact on property values. I could not verify the Hobart v. Hobart West Group case. That said, the construction of an apartment complex could adversely impact nearby home values by creating oversupply in the market in the short term. With over a thousand units aimed to be available in Tualatin in the coming years, it is a recipe to create at least a short term oversupply of housing. It is also possible that the creation and visibility of an apartment complex could impact the resale values of nearby family homes, as up until a year ago all homes with backyards on Norwood had picturesque forest views behind their homes..

It is important that the city council and planning commission are aware that the burden to demonstrate that property values were adequately considered falls to the developer. The developer should need to demonstrate with adequate support, reference, and precedent that their plan will minimize impact to property values, to only provide a statement that such values were considered. The city council must be aware that they decide how to interpret that property values were 'adequately considered.'

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: Norwood Growth and Traffic

Dear Mayor and council members,

I have lived in Tualatin for over 25 years in three different homes. I could have moved from Tualatin several times, but I live here because I love it. I live near Ibach Park for reference.
I am writing to you because I feel some of your recent decisions are not in the best interest of the city. I'm not necessarily for or against the Norwood development, but I am strongly against your recent projects around the city. You have continued to spend untold amounts of money on improving sidewalks and crosswalks with little to no consideration for traffic and road improvements. The roads need repaired all over town and some need widened. And yet you continue to spend money on sidewalks that will need to be removed and redone as soon as you realize the traffic issues. This will only get worse with new the new development on Norwood.
Your decisions are not improving the lives of the people of Tualatin. If so, why is the old Haggens store still empty. Why do restaurants continue to go out of business around the commons?
Let's focus on traffic flow that encourages people to shop and eat in Tualatin, not stay out of Tualatin due to traffic!
If you would like an example of road repairs that are needed and have been needed for years, please drive over the freeway headed East and get on I5 Northbound. Just before the ramp is a seam that has developed into a massive pothole. You can't avoid it and it continues to get worse.

Thank you for your time and all the many things you do for our community.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Tom Carlisle

I have lived in Tualatin for over 30 years. I have watched more and more apartments, condos, high rises be built mainly throughout the downtown area, as that is where they belong. Norwood Rd and Boonesferry Road are not zoned for high rises for good reason. It is an area of duplex and single homes. I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A high-rise belongs in downtown Tualatin ONLY where infrastructure can support it.

I know that you have received the letter listed below from many of our Tualatin residents stating their concerns regarding the massive development of Autumn Sunrise and the proposed multi-store apartment complex on SW Norwood Rd. and SW Boones Ferry Rd.

My wife and I have owned a home near Ibach Park for the last 27 years in a development known a Hedges Creek. When we first moved hear there was no Tualatin High School, no Ibach Park and minimal housing development in the area. But now over the years things have blossomed and changed to the point where certain things like the infrastructure have not kept pace with the increase in our population. Boones Ferry Rd. is now becoming the new SW Tualatin Sherwood Rd. where the traffic crawls at a snails pace at certain parts of the day, and this will only become far worse with the increase in the population of the new additional developments. The infrastructure should come first with residential and business additions to follow, not the other way around.

There are times in the morning and afternoon at and near the high school that it takes me nearly 10 minutes to get onto Boones Ferry Rd. from my home which is only approximately five blocks west of the school.

And what about the over crowding of the schools due to the new increased population of students? Their education will be compromised to a lower standard. And will teachers flee their profession due to the increase in classroom sizes?

These things along with many other issues must be considered before moving ahead with anymore development.

Please listen to, and consider the request of your people listed below. After all, we elected you to represent us, the people of Tualatin, not big money and over crowded development!

Thank you,
Vern & Teri Boomer

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;

The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;

As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where

compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,
Vern and Teri Boomer

Madeleine Nelson

Subject: No to PTA23-0001 and PMA23-0001 Applications

Currently high-density high-rise zoning is the ***maximum*** zone density allowed in Tualatin - and it is only reserved for downtown (for good reason: walking amenities and shops, public transportation, less need for parking spaces, adequate infrastructure to support high-density living, and architectural congruent with the downtown skyline).
Please maintain the current high-density, high rise zoning regulations. To allow them to change to the proposed new zoning rules will in time destroy the liability of the city of Tualatin.

Thank you,
Vern & Teri Boomer

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Victoria Soderstrom

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

William E Wilson

Re: Public comment opposing the PMA PTA 23-0001 applications

Dear Mayor and Tualatin City Councilors,

As you contemplate your decision on Monday concerning the PMA PTA 23-0001 applications, I once again urge you to consider some serious concerns regarding traffic congestion and public safety on SW Boones Ferry Rd.

Before reading on, please view this video footage captured in the past week.

The traffic studies that the applicant provided might satisfy the checkboxes of bureaucratic procedure, but they fail to capture the actual experience of residents and commuters who drive this route daily.

SW Boones Ferry, the only major arterial into and out of the area, is already beleaguered by significant traffic congestion, particularly weekday afternoons, as the videos show. The real-life traffic conditions do not just consist of data points on a chart but actual residents, commuters, and visitors who are trapped in a seemingly interminable gridlock. Adding more housing before addressing this pressing issue will not only exacerbate the problem but also diminish the quality of life for those living in the vicinity.

The large vacant field visible in the drone video is earmarked for future Wilsonville industrial development, looms as another factor that will invariably compound the traffic situation. The proposed industrial project is projected to bring an influx of cars and large trucks to an area already straining under the pressure of its current traffic load. The infrastructure as it stands simply cannot accommodate this added strain without significant upgrades or improvements.

The proposed development also falls within the Sherwood School District, not Tualatin. Consequently, we will see even more vehicles—parents and school buses—driving down Boones to Day Rd. to Sherwood, further swelling traffic and pushing our infrastructure beyond its limits.

Beyond these logistic concerns, there is an alarming and very real issue of public safety at play. Impatient drivers, attempting to escape the gridlock, regularly bypass the traffic line by driving down the center turn lane, an action that is not only illegal but also dangerous.

This behavior is clear in this video.

These lane skippers often trigger road rage incidents and create a volatile, hostile environment right in front of residential properties, including mine. It's a distressing testament to the desperate measures drivers are resorting to due to the existing traffic issues.

As you contemplate your decision this Monday, I urge you to take a step back and assess the real-life implications of your decision. Our community looks to you for guidance and protection, not just for now but also for the foreseeable future. Ignoring these current issues while forging ahead with these proposed amendments could have lasting negative effects on our community, its safety, and overall quality of life.

Please vote NO on the proposed text and plan amendments until these traffic and public safety issues are addressed comprehensively.

Sincerely,

Jackie Mathys
24305 SW Boones Ferry Rd.

Tualatin Planning Department
Tualatin City Council
Tualatin Mayor Frank Bubenik
18880 SW Martinazzi Avenue
Tualatin, Oregon 97062

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;

The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any

additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;

As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

Related Issue: Loss of Valuable Urban Forest

With construction of new housing developments proximal to Horizon Christian High School, nearly three dozen acres of mature mixed conifer forest were felled. While very sad to witness, one could rationalize that it was a necessary cost of providing affordable housing. Yet with word of proposed development of a high-rise housing complex at the corner of Norwood and Boones Ferry Road – with subsequent loss of additional mature forest – it is time for Tualatin citizens to say NO. No more. Urban forests are extremely valuable, and yet continue to be undervalued by city planners.

Tualatin's urban forests provide wildlife habitat, wildlife corridors, shade that helps mitigate summer heat (a huge and growing issue with every passing year), and carbon storage. Conservation of carbon sinks (trees and forests, collectively) is of utmost value moving forward. Of course, trees themselves are aesthetically pleasing. At face value this may seen a rather trite statement, yet becomes profound when considered for a minute or two. Mature trees, especially when appearing in contiguous stands, are pleasing to the eye and mind, and are therefore of great psychological value as well. When mature trees are lost, they are lost for good. They cannot be replaced within the span of a human life. So please, consider the value of trees.

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Dave Stemper

MINUTES WERE APPROVED UNANIMOUSLY.

COMMUNICATION FROM CITY STAFF

1. **Presentation on Tualatin's Equitable Funding Action Plan**

Erin Engman, Senior Planner, introduced Beth Goodman consultant with ECONorthwest. Ms. Goodman started her presentation. She explained the past history of Tualatin's recent housing planning. She explained in 2019 Tualatin adopted the Tualatin Housing Needs Analysis. She also noted the Housing Production Strategy adopted in 2021 and this project coordinate together.

Ms. Goodman explained the next step toward affordable, fair, and equitable housing outcomes. She noted following presentation would include actions that could be used to support the

development of housing affordable to moderate-income households. She then spoke about the project's schedule and timeline with primary tasks.

Ms. Goodman went over existing housing conditions when comes to affordability. She explained that 52% of Tualatin's renters are cost-burdened overall. She further noted that 30% of renters who are cost-burdened are considered severely cost-burdened, meaning they spend more than 50% of their income on housing. Ms. Goodman shared several examples of how much house price and rent could be afforded by different income levels. She noted that the examples do not take into account the recent increases in interest rates and the impact that would have on buying a house. She also noted that affordable housing almost always has state or federal subsides.

Ms. Goodman shared a graph of Tualatin's current and future households by income from extremely low to high income. She noted there are 5,000 households that are forecasted to need housing that is more affordable in order to not be cost-burdened.

Ms. Goodman explained how the City of Tualatin can directly influence factors that housing development through public policy, land and infrastructure. She noted that although cities do not typically, they can provide a small amount of capital access, through loan programs. Ms. Goodman then presented the financial tools that Tualatin could consider to increase access to affordable housing, including: A local construction excise tax (CET), urban renewal area revenue, nonprofit low income exemption, multiple unit property tax exemption, system development charge exemption, homeownership assistance, and other tools, including establishing an affordable housing trust fund.

Ms. Goodman noted that there were many other strategies from the 2021 Housing Prodcution Strategy that were not considered in this plan. Ms. Goodman presented information about how a local construction excise tax would work, noting that it would adds revenue.

Ms. Goodman then presented information about how Tualatin could potentially use Urban Renewal Area revenue to fund its housing goals. She explained that Urban Renewal funding is generally used to pay for capital projects that support goals identified in the Urban Renewal Plan. She shared examples such as a new water line, new intersection improvements, land purchases all of which could be used to support development of new affordable housing. Ms. Goodman noted that based on the projections for the downtown Urban Renewal area there could be approximately $2.5 million available to support housing goals.

Chair Beers asked if the $2.5 million would be over the next five years. Steve Koper, Assistant Director Community Development, answered yes, however it would depend on how quickly tax increment is collected in the urban renewal area which is dependent in part on how quickly new development happens in the area.

Ms. Goodman moved onto a discussion of potential equity benefits and challenges of the various available tools. She explained that a Construction Excise Tax has equity benefits in that

it has the potential to provide flexible revenue that can serve low and moderate-income households. She noted the City can choose to focus on programs that have specific equitable outcomes to meet the Cities goals. Ms. Goodman then highlighted some key challenges with a CET being state statute limited as to how the funds can be spent. She also noted that a CET would increase the cost of new market-rate housing units even though it could be used to lower costs for affordable housing. She also noted that Urban Renewal can provide funding for housing for low and moderate-income households, however, the equity challenge would be avoiding concentrating lower-income residents in one area of the city and to a lesser extent the risk of displacing existing residents.

Ms. Goodman moved on to provide information about the nonprofit low income tax exemption. She explained the estimated cost to the city to exempt 100 units over five years would be $90,000. She noted it's not a huge loss due to it being over a longer period of time.

Chair Beers asked for clarification that tax would be exempted and which taxing entity would stand to forgo the most. Ms. Goodman answered that the estimate was based on a previous example from Tigard, and that the top four taxing districts are Tigard-Tualatin School District, Washington County, City of Tualatin, and Tualatin Valley Fire and Rescue.

Commissioner Kuhn asked if the tax exemption would be only on new units. Ms. Goodman answered that that is true for this tax exemption. She noted the next tax exemption (multiple unit property tax exemption) could also be applied to existing development.

Ms. Goodman then moved on to an overview of the property tax exemption multiple unit property exemption. She explained this is a 10-year exemption and the City can decide on where, geographically, it wants to place the exemption and can also place some other conditions on receipt of the exemption. She explained an a private developer or property owner would apply and City Council would decide if they would exempt them or not.

Ms. Goodman moved on to an overview of the system development tax exemption. She explained that Parks and Water system development charges were the only ones examined because they are controlled by the City, in contrast to other system development charges like those for transportation or sewer. Ms. Goodman noted that exempting SDCs means that upfront development fees would be reduced. She noted that while the City could exempt SDCs it would need to provide a source to backfill the forgone revenue. She shared that the estimated cost for exempting 100 units of housing would be $750,000 over 5 years. Ms. Goodman also shared some insights into the equity benefits and challenges of SDC exemptions.

Ms. Goodman then presented information about how a down payment assistance program might work. She shared that this could cost as much as $500,000 due to the fact that homeownership and thus assisting with a down payment is expensive. This action could be layered with other actions for maximum benefit such as a land trust or a land bank. The equity benefits of a down payment assistance program are that it could benefit households who have been historically excluded from homeownership, allowing those households to build

intergenerational wealth through home equity. It also could benefit existing low-income homeowners in Tualatin by ensuring longer-term stability. Lastly, it could help provide resources for disabled residents and seniors to make accessibility improvements.

Some of the challenges of this program include a higher cost per household meaning that it serves relatively fewer people. Households must still meet other requirements such as qualifying for a home loan. The cost per household varies by type of assistance, and limited funding creates questions about who receives assistance.

Ms. Goodman moved on to their recommendations for building equity into the process. She noted if the City establishes revenue sources for affordable housing then it could establish an oversight committee. She explained this committee would oversight and ensure the representation of underrepresented groups. She noted another way to build equity into the process could be through a partnership with nonprofits that provide culturally specific types of support.

Commissioner Hledik asked if 30% of households are cost-burdened in Tualatin. He wanted to know if that meant new construction would need to accommodate these needs. Ms. Goodman answered that 38% of households in Tualatin are cost burdened, but that it needs to be addressed not just through new construction. She noted 30% would need housing affordable to their income level and 15% would need subsidized housing, especially new households.

Commissioner Hledik asked what and who was the developer of the Plambeck Gardens development. Mr. Koper answered that it was a non-profit called Community Partners Affordable Housing (CPAH).

ACTION ITEMS

1. **The Planning Commission is asked to make a recommendation to the City Council on a request for a Plan Map Amendment (PMA) from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR) located on a 9.2-acre site at 23370 SW Boones Ferry Road.**

The Planning Commission is asked to make a recommendation to the City Council on a request for a Plan Text Amendment (PTA) that would remove the locational factors from the High-Density High Rise (RH-HR) purpose statement in Tualatin Development Code Section 44.100 and revise Table 44-3 to limit the structure height to 4 stories or 50 feet in the RH-HR zoning district south of Norwood Road, which would be applicable to the subject site.

STAFF PRESENTATION

Madeleine Nelson, Assistant Planner, presented an overview of the project. She explained AKS Engineering & Forestry LLC applied on behalf of Vista Residential Partners and Property Owner, Horizon Community Church propose two land use applications located on a 9.2-acre site at 23370 SW Boones Ferry Road. A Plan Map Amendment (PMA) would change the existing zoning from Medium Low Density Residential (RML) and Institutional (IN) to High Density High Rise

(RH-HR). She explained any future development would require submittal and approval of an Architectural Review application subject to compliance with design and siting standards applicable to the RH-HR District. A Plan Text Amendment (PTA) would remove the locational factors from the High Density High Rise (RH-HR) purpose statement in Tualatin Development Code Section 44.100. She noted this would revise Table 44-3 to limit structure height to 4 stories or 50 feet in the RH-HR zoning district south of Norwood Road, which would be applicable to the subject site. She shared the proposed zoning map for reference.

Ms. Nelson highlighted the fact that the applicant has agreed to conditions of approval to construct offsite improvements including a new signal at the SW Norwood Rd & SW Boones Ferry Rd prior to occupancy of future site development. Other conditions offered by the applicant include a 60-foot buffer along SW Norwood Rd to preserve trees that do not need to be removed for the future access or public roadway improvements. Lastly, Ms. Nelson noted that the applicant has agreed to limit the height allowed at the subject site to the lesser 4 stories or 50 feet as described in the PTA.

Ms. Nelson then presented the applicable criteria found in TDC 33.070. She noted the highlights of this criteria include a requirement that the proposed amendments be in the public interest. She further noted that the amendments must conform to the goals and policies of Tualatin Community Plan. Ms. Nelson further explained that the Council will be required to consciously consider factors such as development trends, health and safety, natural resources. She also noted requirements that the proposed amendments be consistent with Oregon Statewide Planning Goals and Administrative Rules including compliance with the Transportation Planning Rule TPR (OAR 660-012-0060).

Ms. Nelson presented a summary of the applicant's arguments, which include an explanation that public interest is best protected by granting the amendments at this time due to Tualatin having few vacant lands with the ability to provide housing at the needed density established by the 2019 Housing Needs Analysis (HNA). She further noted that the applicant argued that the amendments would facilitate the opportunity for multifamily housing near an employment area (Basalt Creek Planning Area). Ms. Nelson noted that the applicant argued that there is a 27-acre surplus of RML lands and a 4-acre deficit of RH-HR land, and that the proposed amendments would address this deficit. Lastly, she presented that the applicant has argued that the public interest would be served with the installation of a traffic signal at SW Norwood Road and SW Boones Ferry Road.

Turning specifically to the Plan Text Amendment, Ms. Nelson presented that the applicant argued that the public interest is protected by granting the amendment due to the fact that areas of the city currently zoned RH-HR are constrained by public ownership, lack of direct public access and environmental factors such as the existing wetlands and floodplains. The applicant further argued that the current locational language does not allow the RH-HR zoning to be permitted in a location that is considered buildable, and in effect precludes practical application of the RH-HR zone. Ms. Nelson presented that the applicant argued that the proposed amendment would allow RH-HR to be permitted on other properties with access to

facilities, services, and without the constraints of the wetlands, floodplains and lack of public access

Ms. Nelson then presented the applicant arguments that amendment conforms to a number of goals and policies within the Tualatin Community Plan. The applicant argued that Comprehensive Plan goals and policies serve as the adopted expression of the public interest. Ms. Nelson noted that the applicant has provided arguments that the proposed Map Amendment would satisfy several existing Plan policies and goals. Specifically, Ms. Nelson went over the applicant's argument that the proposed amendments meet Goal 3.1 (Housing Supply) by ensuring that a 20-year land supply is designated and has urban services planned to support the housing types and densities identified in the Housing Needs Analysis. The applicant argued that the amendments provide the 4 acres of RH-HR housing identified in the Housing Needs Analysis. Ms. Nelson spoke about how the applicant argued that the same goals and policies would be applicable to the proposed Text Amendment. She shared the applicant argued that the existence of the locational language does not allow the RH-HR zoning to be permitted in a location that is considered buildable.

Mr. Koper shared some framing around code criteria. He noted the code requires conscious consideration of the characteristics of city, land development trends, health and safety, natural resources. He noted that the applicant's analysis concludes that the proposed amendments would have a significant impact on traffic operations at the SW Boones Ferry Road/SW Norwood Road intersection and that the installation of a traffic signal and westbound left turn lane would mitigate for that significant impact.

Ms. Nelson then shared the applicant's arguments in support of the Plan Map Amendment. The applicant argued that the site is located near public transportation bus lines, future goods and services, and employment areas. The applicant noted that the location is not in an area with known environmental constraints, and would not be in need of environmental protection. The applicant further noted it is located near areas that are experiencing housing development. (Autumn Sunrise Subdivision, Plambeck Gardens Apartment) The applicant noted that the area of the site was near adequate public services and planned improvements to include water, sanitary sewer, storm water and transportation. Ms. Nelson highlighted the applicant's argument that even if the amendments were approved, that any future development would need to go through an Architectural Review and would be required to comply with Tualatin Development Code requirements to address safety, health, and aesthetic factors.

Ms. Nelson shared the applicant's arguments in favor of the Plan Text Amendment, which highlight the locational code criteria by itself is not anticipated to have an impact on the elements listed in the code, and that considerations of those factors would be applicable to future decisions on where to apply the RH-HR zone. Ms. Nelson further explained that the applicant's Plan Text Amendment proposal requests revision of the building height for the development to limit it to the lesser of four stories or 50 feet for future projects on the subject site.

Mr. Koper explained that the applicant has argued that the proposed amendments are consistent with Oregon Statewide Planning Goals and Administrative Rules including compliance with the Transportation Planning Rule TPR (OAR 660-012-0060). He presented information on the applicant's analysis which includes a "reasonable worst-case analysis" which must be performed to show "no significant impact" of the change through the year 2040. He noted the applicant has presented information that under both existing and proposed zoning scenarios the intersection of Boones Ferry Road/Norwood Road does not meet this standard without signalization, however, the applicant's analysis concludes the significant effect is mitigated by the construction of a signal at SW Boones Ferry Road/SW Norwood Road and a separate striped westbound left turn lane.

Commissioner Thompson asked for clarification on whether the applicant's analysis takes into account for traffic trips for future development. Mr. Koper answered the applicant's analysis does take current and future development into account

Commissioner Hledik asked about the peak hours and how does the average daily traffic fit in this criteria. Mr. Koper answered the total average daily trip is generally the hardest to meet, and that with the proposed mitigations the requirements are met.

Ms. Nelson shared that staff has received a large volume of comments both in favor and opposed. She noted the comments are in the packet noted as Exhibit R. She explained the action being asked of the Planning Commission is to make a recommendation to the City Council.

APPLICANT PRESENTATION

Mimi Doukas, with AKS Engineering, presented on behalf of the applicant Vista Residential Partners and started her presentation with an introduction of her team. She explained they applied for the proposed amendments to allow multifamily development (RH-HR Zone) in other locations in the city. She noted they are both necessary to allow for a multifamily project at this site.

Ms. Doukas explained why the applicant choose the particular area of land. She noted the following: little residential land available, easy access to major collector roadways, bus service, proximity to the future park planned, expansion of the southern part of the City, and accessibility to jobs and close to residential projects.

Melissa Slotemaker, with AKS Engineering, explained why the applicant is proposing the RH-HR zone specifically. She shared that there are numerous State, Metro, and City policies that point to the desire to increase multifamily opportunities. She stated the 2019 Tualatin Housing Needs Analysis (HNA) identified a specific deficit of RH-HR zoning for multifamily housing. She spoke about how Tualatin has identified through its Housing Needs Analysis a need for a minimum of 1,014 units and 45% of the city's housing stock. She spoke about how currently there is no buildable RH-HR zoned land. She noted this application is an opportunity to add to the City's inventory of buildable residential land.

Ms. Slotemaker explained that many of the City's housing goals that align with their application. She shared the Comprehensive Plan goals and policies along with some of the strategic actions. She noted how this application meets Tualatin's needs identified in its Housing Needs Analysis and Housing Production Strategy. She noted that Tualatin has a need for greater housing affordability and availability to renters, and additionally for more units of housing for people to be able live and work in Tualatin.

Ms. Slotemaker moved on to address what the applicant team had heard from the community as primary areas of concern, including traffic impacts, building height, tree removal, and lack of public parks. On the topic of traffic impacts, she explained that the applicant's traffic engineer did a full transportation impact analysis that included concurrence of the scope with the Tualatin City Engineer and Transportation Engineering staff from Washington County.

Ms. Slotemaker then addressed the topic of building height by explaining the current RH-HR Zone allows up to 6 stories and a maximum building height of 64 feet. She noted down the current Institutional zone has a 50-foot height maximum, and that the proposed amendments would not increase the allowable height for the majority of the site.

Ms. Slotemaker next addressed tree preservation concerns. She noted the applicant's agreement to provide a condition of approval to require a 60-foot buffer from the original SW Norwood Road right-of-way line. She noted if trees have to be removed applicant commits to replanting. She noted the applicant's arborist Todd Prager and Associates includes a report with additional recommendations.

Commissioner Hledik asked if the map shown of trees were accurate. Ms. Slotemaker answered it is fairly accurate as depicted.

Ms. Slotemaker then addressed concerns of lack of public parks. She noted the City recognizes the need for open space and parks in the Basalt Creek Area. She shared that there are pedestrian connections to a planned City park on the west side of SW Boones Ferry Road and that the proposed signal as part of this application would include a safe pedestrian crossing to facilitate neighborhood access to the planned parks.

Ms. Doukas shared the applicant's commitment to meeting the approval criteria as well as the applicant's commitment to meeting state and local policies as well as demonstrating compliance with transportation system requirements. She noted that this would require making a judgement call as to where the needed housing that Tualatin has identified would be located.

Commissioner Hledik asked how many units would be multifamily that are currently passed land use applications. Ms. Slotemaker answered and said roughly 300 units. Mr. Koper noted it's also in the ballpark of roughly 300. Ms. Doukas noted the Housing Needs Analysis is a helpful reference point, which stated that the City's goal was to have 45% of housing be

multifamily.

Commissioner Kuhn shared her view that there is both an ongoing lack of development land in Tualatin and also constraints specific to this land.

Commissioner Thompson asked how the applicant came to the decision to propose a Text Amendment that would remove the locational limitation for the RH-HR zone and not limit it to a specific property. Ms. Dukas spoke about the challenges of zoning in this area for multifamily. She noted that the density allowed under the RH-HR zone is not as intense as it sounds.

Commissioner Thompson asked why the intersection of SW Iowa and SW Boones Ferry is not on the list of intersections studied in the traffic study. Todd Mobley, of Lancaster-Mobley, answered on behalf of the applicant that the analysis was scoped with the City and County to determine the study intersections. Mr. Mobley noted that trips on SW Boones Ferry were accounted for, but minor street approaches such as SW Iowa are not studied as a specific intersection.

Commissioner Thomason asked if that was the same reason why the I-5 interchange in Wilsonville was not included as a study intersection. Mr. Mobley answered that it was similar and that it was far enough away from the site that the traffic from the site would contribute a relatively small percentage of total trips to that interchange and thus it fell below the minimum required by Washington County to study it further.

Commissioner Thompson asked if Tualatin Heights was a part of the traffic study. Ms. Doukas answered it was a part of the traffic study for 20-year analysis for build-out of Tualatin generally but not specifically due to the fact that the project is too far from this site. Mr. Mobley noted that a daily trip analysis was provided but that intersections have less congestion in the morning versus the evening and therefore the PM peak hour is the main focus of the traffic study.

Chair Beers asked where currently Tualatin has RH-HR zoned and if it can be built on currently. Mr. Koper answered and explained currently where it's zoned and properties currently are and that they were determined to be unbuildable as part of the City's Housing Needs Analysis.

Commissioner Thompson asked if it was taken into account that people living in the development might include students that would walk to the Horizon Christian School. Mr. Mobley stated that the traffic study did not make a specific trip reduction to account for nearby walking trips.

Commissioner Valli noted how the roadways are small to handle additional traffic every day. Ms. Doukas noted that many of the surrounding roadway facilities were in Washington County's jurisdiction and they would be involved in determining the specific intersection improvements and standards for turn lanes. She noted that three lanes will be required from SW Norwood Road to SW Boones Ferry Road and that the applicant will work with Washington

County to ensure that the roadway transition along the subject site would be smooth and maximum tree preservation. She noted that the applicant is aware of the community's sensitivity to tree removal, but the ultimate scope of that removal would be up to Washington County's final determination on frontage improvements for the property.

Commissioner Valli asked about access to the site and noted that there is nearby traffic congestion. Mr. Mobley noted traffic studies did take in account for existing and future traffic volumes. He noted Autumn Sunrise has direct access to SW Boones Ferry to the south and that the traffic study takes the additional traffic from that development on Norwood into account. Ms. Doukas that the development would provide a secondary gated emergency access to the south. She noted having two access points onto SW Norwood Road would actually add the potential for vehicle turning conflicts as opposed to a singular access point. Mr. Mobley noted one access helps with tree perseveration and emergency access. He concurred with Ms. Doukas and noted that their analysis concluded that a single access is sufficient to serve the site.

Chair Beers asked whether or not the current parking standard for multifamily development is a maximum of one vehicle parking space per unit. Mr. Koper stated it is.

Commissioner Kuhn asked if parking location mattered in code. Mr. Koper answered per parking spaces location is not a requirement.

Commissioner Kuhn asked about the impact of the Plan Text Amendment's removal of locational standards for the RH-HR zone. Mr. Koper noted that Tualatin is a one-map combined comprehensive plan map and zoning map system, and therefore because each zone change would require a comprehensive plan amendment which includes a demonstration that the new zone meets applicable standards for the location, it would not make sense to have locational standards for a zone additionally, and that is likely why no other zone other than RH-HR has these standards.

Chair Beers asked if a property owner would have to go through a plan/text map amendment to add more floors or increase the building height for the RH-HR zone. Mr. Koper answered yes a Plan Text amendment.

<u>COMMUNICATION FROM THE PUBLIC</u>

Jackie Mathys shared comments in opposition to the proposed amendments. She noted this proposal would drastically alter the neighborhood, and limit resources and infrastructure. She also shared why she choose to live in Tualatin for twenty years.

Tim Neary shared comments in opposition to the proposed amendments. He noted the proposed height is higher than single-family homes on the other side of SW Norwood Road, and that future residents of an apartment would be able to see into homes. Mr. Neary further commented that he feels that there is a bias in favor of development occurring.

Chad Fribley shared comments in opposition to the proposed amendments. He spoke about

current and future level of Tualatin's traffic, infrastructure, tolls, and emergency services. He noted that there is a need to think about if this is good for here right now.

Scott Olson shared comments in favor of the proposed amendments. He shared comments on the growth of the city and families and the importance of development of the land to Horizon Christian Church. He shared how Horizon would like to continue to provide to the growing community. He shared how hard it is to find housing in the area with rising costs.

Stan Russell shared comments in favor of the proposed amendments. He noted that a number of people that attend the Horizon Church and School give back to the community in a variety of ways. He noted the traffic signal being proposed would improve safety currently, and how hard it is to find housing in the area with rising costs.

John Pries shared comments in favor of the proposed amendments. He noted that Tualatin has grown over the years previously. He shared how he has confidence in the City planning process and was a project manager for Horizon Christian Church.

Deborah Mayes shared comments in favor of the proposed amendments. She noted her family history dating back to WWII, including previous ownership of land that was later developed into housing on the north side of SW Norwood Road. She stated that there has been considerable growth and change to Tualatin over the years and yet there was not careful planning and development like there is today. She noted sometimes difficult choices need to be made.

Armando Juanez shared comments in favor of the proposed amendments. He shared he is one of the lead pastors at Spanish speaking church and Horizon Christian Church has shared a love of serving the community. He shared how he feels about the community with hard workers and the hardships of affordable housing that would be helped by this proposal.

Joel Augee shared comments in opposition to the proposed amendments. He expressed his view that the development is not needed and that the traffic light will not solve traffic issues. He noted 940 units have been approved and the City has already met its housing goals.

Jill Hernandez shared comments in opposition to the proposed amendments. She shared her perspective living on SW Iowa that due to the nearby high school and other traffic, she does not believe that a traffic light will solve the issues.

Lorraine Hager shared comments in opposition to the proposed amendments and noted that she was previously a Tualatin City Councilor. She shared that as a City Councilor, she was part of the Basalt Creek planning and development of the concept plan and that this proposal was not part of the concept plan. She further noted that recent surveys of City residents showed that the biggest complaint is traffic.

Chris McReynolds shared comments in opposition to the proposed amendments. He noted that the proposed development is not low-income housing and shared what would actually be

affordable. He opined that the City is pro-growth and against tree preservation. He shared his opinion that this proposal would not contribute to building sustainable housing in Tualatin for the long run.

Carly Cais shared comments in opposition to the proposed amendments. She shared that there is no requirement to have development now and that it should keep pace with infrastructure and traffic needs and not the pace set by developers. She expressed a desire to hit the brakes on current development and instead look to the unmet needs of the existing community.

PLANNING COMMISSIONER DISCUSSION

Commissioner Thompson shared an example of how much market-rate housing costs and that it is not affordable. She noted that she has friends that are renting in Tualatin for over $3,000 a month. She pointed out that employees in the Basalt Creek area may not be able to afford living in this area. She also shared her concerns that traffic planning for the Basalt Creek area was done very carefully and closely and could be impacted by this added development.

Chair Beers shared his view that traffic models do not necessarily reflect reality, and from his perspective he won't drive near Tualatin High School around the time of school dismissal. He stated a model cannot capture the experience accurately. He shared a desire for more neighborhood commercial in the area and that it would be difficult to recommend approval of additional housing without services and grocery stores nearby.

Commissioner Thompson noted the need for housing but that the location of the zoning should be done mindfully. She noted about there is commuter rail only in a small portion of Tualatin. She also shared her belief that the core area should be the area with a higher density of housing.

Chair Beers reiterated his comments on the need for amenities and that it was hard to think about added units without services.

Commissioner Kuhn shared her family who goes to and works at the high school has had to deal with the challenging traffic. She noted that Tualatin alone can't do anything about it, but needed to be at the table and work with Washington County, ODOT, and Wilsonville. She also shared comments about the challenges of being able to afford to live and work in Tualatin. She concluded that there is a need for community change to happen.

Chair Beers shared his view that the locational restrictions of the RH-HR zone were written for the specific reason of having a hub-area vision for downtown Tualatin.

Commissioner Kuhn agreed with Chair Beers as to how it was written but noted that development has not proven to be feasible downtown due to the challenges for developers. She expressed her view that larger vacant parcels downtown are limited and that it is difficult to develop there as well.

DRAFT

Commissioner Thompson expressed her view that it hasn't been that long since the adoption of the Housing Needs Analysis, and that change and progress will take time.

Commissioner Valli reiterated her view about the traffic challenges on SW Boones Ferry Road and whether it could truly accommodate this additional growth. She also shared her view that this is not affordable housing, there is limited public transportation and traffic issues. She noted that despite the developer's intent there would be a traffic increase on Boones Ferry and I-5.

Commissioner Hledik shared his thoughts on the request. He shared a pre-prepared written statement. He noted the proposed multifamily is not regulated affordable housing or designated to be affordable to cost-burdened renters. He shared his view that that the proposal does not meet Goal 3.1 of the Comprehensive Plan because the Housing Analysis only identifies a deficit of four acres and the applicant proposes to provide 9.2 acres. He shared his belief that until we update the Housing Needs Analysis we don't have enough data to support this proposal. He concluded that Chapter 10 of the Comprehensive Plan was not met in that its purpose for the RH-HR zone suggested that it was intended to support housing types with the greatest access amenities and how this proposed location doesn't have in his view the greatest access to amenities.

Commissioner Valli shared her view that 2040 is a ways away and provides time to build out the area in the future. She feels the current infrastructure of the area does not support the growth rate.

Chair Beers made MOTION for a recommendation to City Council to deny PMA23-0001/PTA23-0001 and add in Commissioner Hledik's comments to the City Council packet. Commissioner Thompson SECONDED the motion.
4 AYE (Beers, Thompson, Hledik, and Valli)
1 NAY (Kuhn)
THE MOTION PASSED 4-1.

ADJOURNMENT

A motion to adjourn was made by Chair Beers and seconded by Commissioner Kuhn.
5 AYE
0 NAY
THE MOTION PASSED UNANIMOUSLY. The Planning Commission meeting was adjourned at 10:30 p.m.

DRAFT
