TUALATIN CITY COUNCIL MEETING

MONDAY, MAY 22, 2023

TUALATIN CITY SERVICES
10699 SW HERMAN ROAD
TUALATIN, OR 97062

Mayor Frank Bubenik
Council President Valerie Pratt
Councilor Maria Reyes
Councilor Bridget Brooks
Councilor Christen Sacco
Councilor Cyndy Hillier
Councilor Octavio Gonzalez

To the extent possible, the public is encouraged to watch the meeting live on local cable channel 28, or on the City's website.

For those wishing to provide comment during the meeting, there is one opportunity on the agenda: Public Comment. Written statements may be sent in advance of the meeting to Deputy City Recorder Nicole Morris up until 4:30 pm on Monday, May 22. These statements will be included in the official meeting record, but not read during the meeting.

For those who would prefer to make verbal comment, there are two ways to do so: either by speaking in person or entering the meeting using the zoom link and writing your name in chat. As always, public comment is limited to three minutes per person.

Phone: +1 669 900 6833

Meeting ID: 861 2129 3664

Work Session

1. ***6:00p – 6:30p, Parks Bond Projects Update.*** Staff will provide an update and status report on the Parks Bond projects and project schedule.

2. ***6:30 p.m. (30 min) – Council Meeting Agenda Review, Communications, and Roundtable.*** Council will review the agenda for the May 22 City Council meeting and brief the Council on issues of mutual interest.

7:00 P.M. CITY COUNCIL MEETING

Call to Order

Pledge of Allegiance

Announcements

1. Introduction of Police Department Therapy Dog Onyx

2. Proclamation Declaring June 2023 as Pride Month in the City of Tualatin

Public Comment

This section of the agenda allows anyone to address the Council regarding any issue not on the agenda, or to request to have an item removed from the consent agenda. The duration for each individual speaking is limited to 3 minutes. Matters requiring further investigation or detailed answers will be referred to City staff for follow-up and report at a future meeting.

Consent Agenda

The Consent Agenda will be enacted with one vote. The Mayor will ask Councilors if there is anyone who wishes to remove any item from the Consent Agenda for discussion and consideration. If you wish to request an item to be removed from the consent agenda you should do so during the Citizen Comment section of the agenda.

1. Consideration of Approval of the Regular Meeting Minutes of May 8, 2023

2. Consideration of Approval of Late Liquor License Renewals for 2023

3. Consideration of **Resolution No. 5695-23** Awarding the Contract for Construction of the Highway 99W: Pony Ridge Neighborhood to 124th Avenue Project

4. Consideration of **Resolution No. 5696-23** Authorizing the Purchase of Right-of-Way and Easements for the Construction of the Boones Ferry Corridor Phase 2 Project

5. Consideration of **Resolution No. 5697-23** Authorizing the City Manager to Execute a Cooperative Improvement Agreement With the Oregon Department of Transportation (ODOT) for the Tualatin-Sherwood Road (Martinazzi to I-5) Project.

6. Consideration of **Resolution 5698-23** Awarding the Bid for the Construction of the 2023 Pavement Maintenance Program

Special Reports

1. Summer Programs Preview

Public Hearings - *Quasi-Judicial*

1. Consideration of the Norwood Road Plan Text Amendment and Plan Map Amendment (PTA 23-0001 and PMA 23-0001)

   The applicant has requested continuance of this item to June 12, 2023. No public testimony will be taken on May 22, 2023; the public will have an opportunity to testify on June 12, 2023.

Items Removed from Consent Agenda

Items removed from the Consent Agenda will be discussed individually at this time. The Mayor may impose a time limit on speakers addressing these issues.

Adjournment

Meeting materials, including agendas, packets, public hearing and public comment guidelines, and Mayor and Councilor bios are available at www.tualatinoregon.gov/council.

Tualatin City Council meets are broadcast live, and recorded, by Tualatin Valley Community Television (TVCTV) Government Access Programming. For more information, contact TVCTV at 503.629.8534 or visit www.tvctv.org/tualatin.

In compliance with the Americans with Disabilities Act, this meeting location is accessible to persons with disabilities. To request accommodations, please contact the City Manager's Office at 503.691.3011 36 hours in advance of the meeting.

CITY OF TUALATIN
Staff Report

TO:	Honorable Mayor and Members of the City Council
THROUGH:	Sherilyn Lombos, City Manager
FROM:	Ross Hoover, Parks and Recreation Director Rich Mueller, Parks Planning and Development Manager
DATE:	May 22, 2023

SUBJECT:
Parks Bond Project Update

EXECUTIVE SUMMARY:
City Council adopted the Parks and Recreation System Plan in 2019. This plan identified the need for parks, trails, recreation facilities, and river access. This planning processes involved extensive public outreach and community engagement. The Parks and Recreation System Plan demonstrated the need to preserve natural areas and provide active recreation to serve community members. Based on City Council Vision and Priorities, a Parks Funding Measure Committee was formed. The committee recommended a Parks Bond and priority projects to include in a voter initiative. Council placed the Parks Bond measure on the November 2022 ballot, which Tualatin voters approved.

Staff will present the status of the Parks Bond projects and project schedule.

QUESTIONS & COMMENTS

Proclamation

Declaring June 2023 to be Pride Month in the City of Tualatin

WHEREAS, the City Council's 2030 Vision is for Tualatin to be an inclusive community that promotes equity, diversity, and access in creating a meaningful quality of life for everyone; and

WHEREAS, Tualatin is a community that includes, values, and welcomes diversity in our community, including diversity of sexual orientation and identity; and

WHEREAS, we recognize, support, and appreciate the invaluable contributions of the members of the LGBTQIA+ community; and

WHEREAS, the month of June is internationally recognized by the LGBTQIA+ community to commemorate the Stonewall Uprising in New York City in response to incessant police harassment and discriminatory laws that have since been declared unconstitutional; and

WHEREAS, many LGBTQIA+ members continue to face harassment and physical violence and LGBTQIA+ members are four times more likely to experience violent victimizations than non-community members; and

WHEREAS, LGBTQIA+ youth are almost five times as likely to have attempted suicide compared to straight cisgender youth, and each episode of LGBTQIA+ victimization, such as physical or verbal harassment or abuse, increases the likelihood of self-harming behavior by 2.5 times on average; and

WHEREAS, we remain steadfast in our dedication to eliminate the prejudices and discrimination faced by members of the LGBTQIA+ community; and

WHEREAS, we seek to amplify the voices of the LGBTQIA+ community, including youth, allies, and student groups such as Tualatin High School's Gay-Straight Alliance and Hazelbrook Middle School's Aqua Club; and

WHEREAS, we believe that the rich diversity of communities in Tualatin is one of our greatest strengths.

NOW THEREFORE, BE IT PROCLAIMED BY THE CITY COUNCIL OF THE CITY OF TUALATIN, OREGON that:

June 2023 is Pride Month in the City of Tualatin. The community is encouraged to respect and honor our diverse community, celebrate, and build a culture of inclusivity and acceptance.

INTRODUCED AND ADOPTED this 22nd day of May, 2023.

OFFICIAL MINUTES OF THE TUALATIN CITY COUNCIL MEETING FOR MAY 08, 2023

Present: Mayor Frank Bubenik, Council President Valerie Pratt, Councilor Bridget Brooks, Councilor Maria Reyes, Councilor Cyndy Hillier, Councilor Christen Sacco, Councilor Octavio Gonzalez

---

Call to Order

Mayor Bubenik called the meeting to order at 7:02 p.m.

Pledge of Allegiance

Announcements

1. Proclamation Declaring May 7-13, 2023 as National Prevention Week in the City of Tualatin

   Councilor Hillier read the proclamation declaring May 7-13, 2023 as National Prevention Week in the City of Tualatin.

   Tualatin High School Leadership, Advocacy, Education, and Prevention (LEAP) Group invited everyone to attend their community event on May 11th.

2. Proclamation Declaring the Week of May 7-13, 2023 as Public Service Recognition Week in the City of Tualatin

   City Manager Lombos made comments regarding Public Service Week.

   Councilor Reyes read the proclamation declaring the week of May 7-13, 2023 as Public Service Recognition week.

3. Proclamation Declaring the Week of May 14-20, 2023 as National Police Week in the City of Tualatin

   Police Chief Greg Pickering made remarks in regards to National Police Week.

   Council President Pratt read the proclamation declaring the week of May 14-20, 2023 as National Police Week in the City of Tualatin.

4. Proclamation Declaring June 2023 as Gun Violence Awareness Month in the City of Tualatin

   Moms Demand Action representative Terri Mills made remarks in regards to Gun Violence Awareness Month.

   Councilor Brooks read the proclamation declaring June 2023 as Gun Violence Awareness Month in the City of Tualatin.

Public Comment

Jesse Thompson announced the Memorial Day Observance and Community Picnic to be held May 29th at 10:45 am at the Lake of the Commons.

Kent Drangsholt, the Garages Taphouse owner, requested to have permission to install pickleball courts on the property.

Eric TwoRivers supported Mr. Drangsholt's request to install pickleball courts.

Consent Agenda

Motion to adopt the consent agenda made by Council President Pratt, Seconded by Councilor Sacco.
Voting Yea: Mayor Bubenik, Council President Pratt, Councilor Brooks, Councilor Reyes, Councilor Hillier, Councilor Sacco, Councilor Gonzalez
MOTION PASSED

1. Consideration of Approval of the Special Work Session of April 12, 2023 and the Work Session and Regular Meeting Minutes of April 24, 2023

2. Consideration of **Resolution No. 5685-23** Adopting the City of Tualatin 2024–2028 Capital Improvement Plan

3. Consideration of **Resolution No. 5689-23** Authorizing the City Manager to Execute a Deed Acquiring Property for Riverfront Parkland

4. Consideration of **Resolution No. 5690-23** Awarding a Contract for Professional Auditing Services

5. Consideration of **Resolution No. 5693-23** Increasing the Construction Contract Authorization Amount for the Boones Ferry Corridor Sidewalk and Bike Lane Improvements Phase 1 Project, Part of the Tualatin Moving Forward Program

6. Consideration of **Resolution No. 5694-23** Creating the Parks Project Fund and Appropriating General Obligation Bond Proceeds in the Fiscal Year 2022/2023 Budget

Special Reports

1. Tualatin Valley Fire and Rescue District 2023 State of the District

   Chief Laura Hitt delivered the Tualatin Valley Fire and Rescue 2023 State of the District address, where she outlined the department's mission to create safer communities through prevention, preparedness, and effective emergency response. She highlighted the department's adoption of a strategic plan to guide their efforts, which includes a focus on recruitment and promotions over the past year.

   Chief Hitt provided an update on the department's bond, which will fund the relocation of an existing fire station, improvements to other stations, upgrades to the training center, replacement of response vehicles, and the purchase of land for future stations. She also shared incident response data for 2022, indicating that Tualatin had 3,930 responses. Chief Hitt highlighted the department's use of new technology, including vehicles that supplement support for Washington County's transportation failures. The department has also been holding risk reduction and

education sessions for the public at 588 events. Chief Hitt announced the board of directors will request a levy replacement in May 2024 to fund firefighters, paramedics, support personnel, and equipment.

Councilor Sacco shared her positive experience attending the community academy last year and inquired about the transport issues and the upcoming agreement with AMR, and if it would affect other private parties. Chief Hitt explained each county is responsible for managing a provider for these services.

Council President Pratt mentioned she would be attending the community academy in the upcoming weeks and asked about the difference between an EMT and Paramedic. Chief Hitt clarified that in order to be a firefighter, one must have an EMS license, and there are different levels of that license.

Council President Pratt also asked about how the public could find out more information about CPR. Chief Hitt shared the department has resources available on their website.

Councilor Reyes asked about the time it takes for someone to become a paramedic. Chief Hitt replied becoming a paramedic typically involves a two-year degree program.

2. Engagement Plan to Gather Feedback on Draft Climate Action Plan

   Management Analyst Maddie Cheek and Deputy Public Works Director Nic Westendorf presented the Community Engagement Plan for the draft Climate Action Plan (CAP). Analyst Cheek explained they will be meeting with each city department to discuss the proposed actions, relevant impacts, and fine-tune language. She also mentioned the next group they will engage with is the business community to gather feedback, share climate actions, and provide information on the online open house. Analyst Cheek shared the upcoming online open house, which will allow community members to provide feedback on the draft CAP and understand the level of community support. She shared staff will return on July 10th to present the draft CAP with potential adoption happening in September.

   Council President Pratt inquired about engaging the Business CIO and city advisory committees. Analyst Cheek responded they can be added to the list.

   Councilor Reyes asked how door-to-door outreach will be conducted. Analyst Cheek explained the process.

   Mayor Bubenik suggested targeting businesses with large fleets and HVAC systems that affect the environment.

   Director Westendorf shared that the city is preparing a grant application for electric vehicle charging stations and will be working with Portland General Electric for the necessary matching funds. Councilor Brooks thanked staff for putting together the grant application.

   Councilor Hillier asked if there is a policy component for the grant application. Director Westendorf stated they will be putting together a draft policy to include with the application.

General Business

1. Consideration of **Ordinance No. 1474-23** Establishing a Core Area Parking District (CAPD) Tax Rate for Fiscal Year 2023/24

Finance Director Don Hudson stated the ordinance tonight will set the new tax rate for next year. He stated the Core Area Parking District Board met and are recommending a 7% tax increase based on the schedule in the municipal code.

Councilor Reyes spoke on behalf of the board. She stated the decision was not taken lightly. Councilor Reyes expressed gratitude for the business community who serve on the board.

Motion for first reading by title only made by Council President Pratt, Seconded by Councilor Brooks.
Voting Yea: Mayor Bubenik, Council President Pratt, Councilor Brooks, Councilor Reyes, Councilor Hillier, Councilor Sacco, Councilor Gonzalez

MOTION PASSED

Motion for second reading by title only made by Council President Pratt, Seconded by Councilor Brooks.
Voting Yea: Mayor Bubenik, Council President Pratt, Councilor Brooks, Councilor Reyes, Councilor Hillier, Councilor Sacco, Councilor Gonzalez

MOTION PASSED

Motion to adopt Ordinance No. 1474-23 establishing a Core Area Parking District (CAPD) Tax Rate for Fiscal Year 2023/24 made by Councilor Reyes, Seconded by Councilor Sacco.
Voting Yea: Mayor Bubenik, Council President Pratt, Councilor Brooks, Councilor Reyes, Councilor Hillier, Councilor Sacco, Councilor Gonzalez
MOTION PASSED

Council Communications

Councilor Sacco stated she attended the Washington County proposed budget meeting. She stated there will be a Pride Celebration on June 3rd, 10 am, at the Tualatin Commons

Councilor Hillier invited everyone to attend the Community Talks event on May 11th at 6pm.

Councilor Reyes stated she attended the Latino Business Network meeting.

Council President Pratt stated she attended the Washington County proposed budget meeting and the C4 meeting.

Mayor Bubenik stated he attended the Metro Mayors Consortium meeting, the Greater Portland Inc Small Cities Consortium meeting, hosted the State of the City event, the Community that Cares kickoff event, the five cities luncheon, the Washington County proposed budget meeting, the Washington County Coordinating Committee meeting, and the Aging Task Force meeting.

Adjournment

Mayor Bubenik adjourned the meeting at 8:48 p.m.

Staff Report

TO:	Honorable Mayor and Members of the City Council
THROUGH:	Sherilyn Lombos, City Manager
FROM:	Nicole Morris, Deputy City Recorder
DATE:	May 22, 2023

SUBJECT:
Consideration of Approval of Late Liquor License Renewals for 2023

RECOMMENDATION:
Staff respectfully recommends the Council approve endorsement of the liquor license renewals for 2023 as listed in Attachment A.

EXECUTIVE SUMMARY:
Annually, the Oregon Liquor Control Commission (OLCC) requires that all liquor licenses are renewed. According to the provisions of City Ordinance No. 680-85, establishing procedures for liquor license applicants, applicants are required to fill out a City application form, from which a review by the Police Department is conducted according to standards and criteria established in the Ordinance. The liquor license renewal applications are in accordance with all ordinances and the Police Department has conducted reviews of the applications.

According to the provisions of Section 5 of Ordinance No. 680-85 a member of Council or the Public may request a public hearing on any of the liquor license renewal requests. If such a public hearing request is made, a hearing will be scheduled and held on the license. It is important that any request for such a hearing include reasons for said hearing.

FINANCIAL IMPLICATIONS:
A renewal fee of $35 has been paid by each applicant.

DATE:	May 22, 2023

SUBJECT:
Consideration of **Resolution No. 5695-23** Awarding the Contract for Construction of the Highway 99W: Pony Ridge Neighborhood to 124th Avenue project.

RECOMMENDATION:
Staff recommends that Council approve the resolution awarding and allowing the City Manager to execute a contract with Brown Contracting, Inc. to construct the Hwy 99W: Pony Ridge Neighborhood to 124th Avenue project in the amount of $663,223.

EXECUTIVE SUMMARY:
This project would improve Highway 99W by constructing a pathway along the northwest side of the highway, connecting 124th Avenue to the Pony Ridge Neighborhood. Major items of work consist of approximately 1,400 lineal feet of pervious concrete walkway, driveway regrading, two ADA compliant curb ramps, storm culvert extensions, block retaining wall, bus stop improvements, and other items.

The construction contract was advertised in the Daily Journal of Commerce on April 21, 2023 and the Business Tribune on April 21, 2023. Two bids were received before the bid period closed on May 9, 2023. Brown Contracting, Inc. submitted the lowest responsible bid for the project in the amount of $663,223.

OUTCOMES OF DECISION:
Adopting the resolution and authorizing contract execution would allow construction of this project to proceed.

FINANCIAL IMPLICATIONS:
Funds for this project are available in the Transportation Project Fund.

ATTACHMENTS:

- Resolution No. 5695-23 Awarding Contract
-

RESOLUTION NO. 5695-23

A RESOLUTION AWARDING A CONTRACT FOR CONSTRUCTION OF THE HIGHWAY 99W: PONY RIDGE NEIGHBORHOOD TO 124TH AVENUE PROJECT

WHEREAS, the above-referenced project was posted on April 21, 2023 in the *Daily Journal of Commerce* and on April 21, 2023 in the *Business Tribune* and the City requested competitive sealed bids as part of its capital improvement program;

WHEREAS, 2 bids were received prior to the close of the bid period on May 9, 2023;

WHEREAS, Brown Contracting, Inc. submitted the lowest responsible bid for the project in the amount of $663,223; and

WHEREAS, there are funds budgeted for this project in the Transportation Fund.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF TUALATIN, OREGON, that:

Section 1. Brown Contracting, Inc. is hereby awarded a contract for the Highway 99W: Pony Ridge Neighborhood to 124th Avenue Project;

Section 2. The City Manager is authorized to execute a contract with Brown Contracting, Inc. in the amount of $663,223;

Section 3. The City Manager, or the City Manager's designee, is authorized to execute Change Orders totaling up to 10% of the original contract amount; and

Section 4. This resolution is effective upon adoption.

Adopted by the City Council this 22nd day of May, 2023.

CITY OF TUALATIN
Staff Report

TO:	Honorable Mayor and Members of the City Council
THROUGH:	Sherilyn Lombos, City Manager
FROM:	Mike McCarthy, City Engineer
DATE:	May 22, 2023

SUBJECT:
Consideration of **Resolution No. 5696-23** Authorizing the Purchase of Right-of-Way and easements for the construction of the Boones Ferry Corridor Phase 2 project.

RECOMMENDATION:
Staff recommends that the Council approve the attached resolution to purchase right-of-way and easements for the Boones Ferry Road Phase 2 project.

EXECUTIVE SUMMARY:
This resolution enables the City Manager to execute legal documents to acquire the property needed to construct and maintain the Boones Ferry Road Phase 2 project.

The majority of the project is to be constructed with existing right-of-way. However, In order to have space for the project, the City needs to acquire right-of-way and easements from four properties. This is the first of these four properties, and it is important to execute the purchase agreements now so that PGE and other utilities can get started with utility relocation that will be necessary into the newly-acquired right-of-way. The project has been designed to minimize the impact to the property and the amount of right-of-way and easements to be acquired.

This resolution authorizes the purchase of right-of-way and easements from property at 8490 SW Warm Springs St located on the southeast corner of the intersection of Boones Ferry Road and Warm Springs St. Acquisition areas are shown on the attached exhibit, and include 2,262sf Right-of-Way, 1,761sf Temporary Construction Easement, and 78sf Public Utility Easement.

The City's offering price of $64,600 was based on appraisal performed by Oregon Valuation Group, Inc. and recommendations from Universal Field Services, Inc., and has been agreed to by each of the property owners.

The project team is working with the owners of three other properties to acquire Right-of-Way and easements from those properties and anticipates bringing those to Council for approval soon, but would like to execute this acquisition now in order for PGE to get started with utility relocation in this area.

OUTCOMES OF DECISION:
Approval of the attached resolution would allow staff to purchase right-of-way and easements for the Boones Ferry Corridor project.

ALTERNATIVES TO RECOMMENDATION:
Council could elect to not approve the attached resolution

FINANCIAL IMPLICATIONS:
The total acquisition cost is $64,600. This amount is budgeted, along with the cost of design and construction of this project, in the Transportation Project Fund (Tualatin Moving Forward program).

ATTACHMENTS:

Resolution 5696-23
Exhibit showing the area to be acquired

RESOLUTION NO. **5696-23**

A RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE DEEDS ACQUIRING PROPERTY FOR THE BOONES FERRY CORRIDOR IMPROVEMENT PROJECT

WHEREAS, in May 2018, Tualatin voters approved a $20 million bond measure to support high priority transportation projects.

WHEREAS, the City identified the need to improve the Boones Ferry Road corridor to include improved sidewalks, bike lanes, curb ramps, traffic signals, and improve access to existing transit stops (hereafter “Project”).

WHEREAS, the City has identified the need to acquire certain properties in order to facilitate the construction of the Boones Ferry Corridor Improvement project; and

WHEREAS, the City has negotiated this property transaction with willing sellers to acquire right-of-way, public utility easements, and temporary construction easements.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF TUALATIN, OREGON, that:

Section 1. The City Manager is authorized to acquire and execute deeds for the following property:

A. Tax Lot 2S124CB02300 – Neff and Cronin Family Trust
- Right-of-Way and Temporary Construction Easement for $64,600

Section 2. The City Manager is hereby authorized to execute any and all documents necessary to acquire property and property interests identified in Section 1.

Section 3. This resolution is effective upon adoption.

INTRODUCED and ADOPTED by the City Council this 22nd day of May, 2023.

CITY OF TUALATIN
Staff Report

TO: Honorable Mayor and Members of the City Council

THROUGH: Sherilyn Lombos, City Manager

FROM: Mike McCarthy, PE, City Engineer

DATE: May 22, 2023

SUBJECT:
Consideration of **Resolution No. 5697-23** Authorizing the City Manager to Execute a Cooperative Improvement Agreement With the Oregon Department of Transportation (ODOT) for the Tualatin-Sherwood Road (Martinazzi to I-5) Project.

RECOMMENDATION:
Staff recommends Council authorize the City Manager to sign the Intergovernmental Agreement Amendment.

EXECUTIVE SUMMARY:

The Tualatin-Sherwood Road (Martinazzi to I-5) project is one of the major projects in the Tualatin Moving Forward Program. It is designed to improve traffic flow and safety and significantly reduce travel time on Eastbound Tualatin-Sherwood Road and Nyberg Street approaching the Interstate 5 interchange. This agreement sets the framework for how the project will be delivered, and responsibilities for maintenance after construction. Terms of the agreement include:

- Upon issuance of a permit, ODOT will allow the City of Tualatin to construct the portion of this project in the area of Right-of-Way under ODOT jurisdiction.
- The City will fund, manage, design, and construct the project in accordance with State standards.
- The City must apply for and receive a permit from ODOT to construct the project.
- Any property or easements acquired by the City for this project must be done so in accordance with ODOT standard procedures.
- The City will require its contractor(s) to meet ODOT requirements for insurance, indemnity, bonding, wage payment, documentation, etc.
- ODOT staff will review the project for conformity with ODOT requirements.
- ODOT requires the City to reimburse ODOT for its staff time and costs for the project.
- ODOT will be responsible for subsequent maintenance of the road surface, curbs, striping, and the retaining wall structure (near the southbound ramp intersection).
- The City will be responsible for graffiti abatement on the retaining wall. Graffiti abatement is typically done by the Police Community Services Officer, who is aware of this requirement.

OUTCOMES OF DECISION:
Authorizing the City Manager to sign the intergovernmental agreement will allow construction of the Tualatin-Sherwood Road (Martinazzi to I-5) project to move forward.

ALTERNATIVES TO RECOMMENDATION:
Council could decide to not authorize signature of this agreement. ODOT would then not allow construction of the portion of the project in ODOT Right-of-Way.

FINANCIAL IMPLICATIONS:
The project cost is budgeted in the Transportation Project Fund.

- Cooperative Improvement Agreement

RESOLUTION NO. 5697-23

A RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A COOPERATIVE IMPROVEMENT AGREEMENT WITH THE OREGON DEPARTMENT OF TRANSPORTATION FOR THE TUALATIN-SHERWOOD ROAD / NYBERG STREET (MARTINAZZI TO INTERSTATE 5) PROJECT

WHEREAS, The Oregon Department of Transportation (ODOT) has jurisdiction over portions of Nyberg Street near the Interstate 5 interchange;

WHEREAS, The City desires to construct the Tualatin-Sherwood Road / Nyberg Street (Martinazzi to Interstate 5) project to improve traffic flow and safety in this area;

WHEREAS, The City and ODOT have developed a Cooperative Improvement Agreement to establish project and ongoing maintenance responsibilities for this project;

WHEREAS, The City finds it necessary and desirable for the continued growth, safety, and welfare of the community for this transportation project to be constructed;

NOW THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF TUALATIN, OREGON, that:

Section 1. The City Manager is authorized to execute a Cooperative Improvement Agreement with the Oregon Department of Transportation for the Tualatin-Sherwood Road / Nyberg Street (Martinazzi to Interstate 5) Project, which is attached as Attachment A, and incorporated by reference.

Section 2. The City Manager is authorized to make administrative modifications to the Cooperative Improvement Agreement to fully implement its intent.

Section 3. This resolution is effective upon adoption.

Adopted by the City Council this 22nd day of May, 2023.

CITY OF TUALATIN, OREGON

COOPERATIVE IMPROVEMENT AGREEMENT
Roadway Improvements
Tualatin-Sherwood Rd: I-5 to Martinazzi Avenue

THIS AGREEMENT is made and entered into by and between the STATE OF OREGON, acting by and through its Department of Transportation, hereinafter referred to as "State" or "ODOT," and the CITY OF TUALATIN, acting by and through its elected officials, hereinafter referred to as "Agency," each herein referred to individually as a "Party" and collectively as the "Parties."

RECITALS

1. Interstate 5 is a part of the state highway system under the jurisdiction and control of the Oregon Transportation Commission (OTC). Southwest Tualatin Sherwood Road/Nyberg Street, from Southwest Martinazzi Avenue to approximately 500 feet west of the southbound I5 on-ramp, is a part of the county Road system under the jurisdiction and control of Washington County. The City is obtaining a permit from the county for the purposes of the project.

2. By the authority granted in Oregon Revised Statutes (ORS) 190.110, 366.572 and 366.576, State may enter into cooperative agreements with counties, cities and units of local governments for the performance of work on certain types of improvement projects with the allocation of costs on terms and conditions mutually agreeable to the contracting parties.

3. State, by ORS 366.220, is vested with complete jurisdiction and control over the roadways of other jurisdictions taken for state highway purposes. By the authority granted by ORS 373.020, the jurisdiction extends from curb to curb, or, if there is no regular established curb, then control extends over such portion of the right of way as may be utilized by State for highway purposes. Responsibility for and jurisdiction over all other portions of a city street remains with the Agency or other responsible agency.

NOW, THEREFORE, the premises being in general as stated in the foregoing Recitals, it is agreed by and between the Parties hereto as follows:

TERMS OF AGREEMENT

1. Agency shall perform certain roadway improvements along SW Tualatin Sherwood Road/Nyberg Street between SW Martinazzi Avenue and the southbound Interstate 5 onramp (the "Project"). Such improvements include updated signage, striping, paving, and lighting, construction of new concrete traffic separators, a retaining wall on the southwest corner of the I-5 southbound ramp, and curbs. The location of the Project is approximately as shown on the sketch map marked Exhibit A, attached hereto and by this reference made a part hereof.

2. The Project will be financed at an estimated cost of $2,000,000 in Agency funds. The total Project cost is subject to change. Agency is responsible for all costs beyond the estimate.

3. This Agreement shall become effective on the date all required signatures are obtained and shall remain in effect for the purpose of ongoing maintenance and power responsibilities for the useful life of the facilities constructed as part of the Project. The useful life is defined as twenty (20) calendar years. The Project shall be completed within ten (10) calendar years following the date of final execution of this Agreement by both Parties.

AGENCY OBLIGATIONS

1. Agency shall upon receipt of a fully executed copy of this Agreement and upon a subsequent letter of request from State, forward to State an advance deposit or irrevocable letter of credit in the amount of $23,000, said amount being equal to the estimated total cost for the work performed by State as further described under State Obligations. Agency agrees to make additional deposits as needed upon request from State and mutually agreed to by both State and Agency.

2. Upon completion of the Project and receipt from State of an itemized statement of the actual total cost of State's participation for the Project, Agency shall pay any amount which, when added to Agency's advance deposit, will equal 100 percent of actual total mutually agreed State costs for the Project. Any portion of said advance deposit which is in excess of the State's total costs will be refunded or released to Agency within ninety (90) days of Project closeout. Agency shall not be liable for costs exceeding $30,000 without first receiving from State a request for additional deposit accompanied by an itemized statement of expenditures and an estimated cost to complete Project and receiving Agency's approval.

3. Agency shall be responsible for graffiti abatement on the newly constructed retaining wall.

4. Agency shall conduct the necessary field surveys, environmental studies, traffic investigations, preliminary engineering and design work required to produce and provide final plans, specifications and cost estimates for the highway Project; identify and obtain all required permits; perform all construction engineering, including all required materials testing and quality documentation; prepare all bid and contract documents; advertise for construction bid proposals; award all contracts; pay all contractor costs, provide technical inspection (other than inspections provided by State under State Obligations), project management services and other necessary functions for sole administration of the construction contract entered into for this Project.

5. Agency shall design and construct the Project in conformance with the current edition of the *ODOT Highway Design Manual* and the *Oregon Standard Specifications for Construction Manual*. Developer understands the Project shall be

designed and constructed to State standards and approved by State prior to advertisement for bid, or construction of Project by Agency.

5. All employers, including Agency, that employ subject workers who work under this Agreement in the State of Oregon shall comply with ORS 656.017 and provide the required Workers' Compensation coverage unless such employers are exempt under ORS 656.126. Employers Liability insurance with coverage limits of not less than $500,000 must be included. Agency shall ensure that each of its contractors complies with these requirements.

6. Agency shall perform the service under this Agreement as an independent contractor and shall be exclusively responsible for all costs and expenses related to its employment of individuals to perform the work under this Agreement including, but not limited to, retirement contributions, workers' compensation, unemployment taxes, and state and federal income tax withholdings.

7. Agency acknowledges and agrees that State, the Oregon Secretary of State's Office, the federal government, and their duly authorized representatives shall have access to the books, documents, papers, and records of Agency which are directly pertinent to the specific Agreement for the purpose of making audit, examination, excerpts, and transcripts for a period of six (6) years after final payment (or completion of Project -- if applicable.) Copies of applicable records shall be made available upon request. Payment for costs of copies is reimbursable by State.

8. Agency shall require its contractor(s) and subcontractor(s) that are not units of local government as defined in ORS 190.003, if any, to indemnify, defend, save and hold harmless the State of Oregon, Oregon Transportation Commission and its members, Department of Transportation and its officers, employees and agents from and against any and all claims, actions, liabilities, damages, losses, or expenses, including attorneys' fees, arising from a tort, as now or hereafter defined in ORS 30.260, caused, or alleged to be caused, in whole or in part, by the negligent or willful acts or omissions of Agency's contractor or any of the officers, agents, employees or subcontractors of the contractor ("Claims"). It is the specific intention of the Parties that the State shall, in all instances, except for Claims arising solely from the negligent or willful acts or omissions of the State, be indemnified by the contractor and subcontractor from and against any and all Claims.

9. Any such indemnification shall also provide that neither the Agency's contractor and subcontractor nor any attorney engaged by Agency's contractor and subcontractor shall defend any claim in the name of the State of Oregon or any agency of the State of Oregon, nor purport to act as legal representative of the State of Oregon or any of its agencies, without the prior written consent of the Oregon Attorney General. The State of Oregon may, at anytime at its election assume its own defense and settlement in the event that it determines that Agency's contractor is prohibited from defending the State of Oregon, or that Agency's contractor is not adequately defending the State of Oregon's interests, or that an important governmental principle is at issue or that it is in the best interests of the State of Oregon to do so.

The State of Oregon reserves all rights to pursue claims it may have against Agency's contractor if the State of Oregon elects to assume its own defense.

10. Agency shall comply with all federal, state, and local laws, regulations, executive orders and ordinances applicable to the work under this Agreement, including, without limitation, the provisions of ORS 279C.505, 279C.515, 279C.520, 279C.530 and 279B.270 incorporated herein by reference and made a part hereof. Without limiting the generality of the foregoing, Agency expressly agrees to comply with (i) Title VI of Civil Rights Act of 1964; (ii) Title V and Section 504 of the Rehabilitation Act of 1973; (iii) the Americans with Disabilities Act of 1990 and ORS 659A.142; (iv) all regulations and administrative rules established pursuant to the foregoing laws; and (v) all other applicable requirements of federal and state civil rights and rehabilitation statutes, rules and regulations.

11. Agency shall construct the Project in accordance with the requirements of ORS 276.071 including the public contracting laws within ORS Chapters 279A, 279B and 279C.

12. If Agency chooses to assign its contracting responsibilities to a consultant or contractor, Agency shall inform the consultant or contractor of the requirements of ORS 276.071, to ensure that the public contracting laws within ORS Chapters 279A, 279B and 279C are followed.

13. Agency or its contractor shall follow the Oregon Locate Laws (ORS 757 and OAR 952).

14. Agency or its consultant shall acquire all necessary rights of way according to the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, ORS Chapter 35 and the State Right of Way Manual. Certification of right of way acquisition work must be made by the Agency (or on behalf of its consultant) doing the work. If Agency acquires the right of way, it shall provide a letter from Agency’s legal counsel certifying that 1) the right of way needed for the Project has been obtained and 2) right of way acquisition has been completed in accordance with the right of way requirements contained in this Agreement. The certification form shall be routed through the State Region 1 Right of Way Office for co-signature and possible audit. If Agency elects to have State perform right of way functions, a separate agreement shall be executed between Agency and State right of way, referencing this Agreement number.

15. Agency shall obtain a permit to "Occupy or Perform Operations upon a State Highway" from assigned State District 2B Project Manager as well as land use permits, building permits, and engineering design review approval from State. Agency agrees to comply with all provisions of said permit(s), and shall require its developers, contractors, subcontractors, or consultants performing such work to comply with such permit and review provisions.

16. Pursuant to the statutory requirements of ORS 279C.380 Agency shall require their contractor to submit a performance bond to Agency for an amount equal to or greater than the estimated cost of the Project.

17. If Agency enters into a construction contract for performance of work on the Project, then Agency will require its contractor to provide the following:

    a. Contractor shall indemnify, defend and hold harmless State from and against all claims, suits, actions, losses, damages, liabilities, costs and expenses of any nature whatsoever resulting from, arising out of, or relating to the activities of Contractor or its officers, employees, subcontractors, or agents under the resulting contract.

    b. Contractor and Agency shall name State as a third party beneficiary of the resulting contract.

    c. Commercial General Liability. Contractor shall obtain, at Contractor's expense, and keep in effect during the term of the resulting contract, Commercial General Liability Insurance covering bodily injury and property damage in a form and with coverages that are satisfactory to State. This insurance will include personal and advertising injury liability, products and completed operations. Coverage may be written in combination with Automobile Liability Insurance (with separate limits). Coverage will be written on an occurrence basis. If written in conjunction with Automobile Liability the combined single limit per occurrence shall not be less than ☒ **$1,000,000** ☐ **$2,000,000** ☐ **$5,000,000** for each job site or location. Each annual aggregate limit shall not be less than ☐ **$1,000,000** ☒ **$2,000,000** ☐ **$4,000,000** ☐ **10,000,000**.

    d. Automobile Liability. Contractor shall obtain, at Contractor's expense, and keep in effect during the term of the resulting contract, Commercial Business Automobile Liability Insurance covering all owned, non-owned, or hired vehicles. This coverage may be written in combination with the Commercial General Liability Insurance (with separate limits). Combined single limit per occurrence will not be less than $1,000,000.

    e. Additional Insured. The liability insurance coverage, except Professional Liability, Errors and Omissions, or Workers' Compensation, if included, required for performance of the resulting contract will include State and its divisions, officers and employees as Additional Insured but only with respect to Contractor's activities to be performed under the resulting contract. Coverage will be primary and non-contributory with any other insurance and self-insurance.

    f. Notice of Cancellation or Change. There shall be no cancellation, material change, potential exhaustion of aggregate limits or non-renewal of insurance coverage(s) without thirty (30) days written notice from Contractor's or its insurer(s) to State. Any failure to comply with the reporting provisions of this clause will constitute a material breach of the resulting contract and will be grounds for immediate termination of the resulting contract and this Agreement.

18. Pursuant to the statutory requirements of ORS 279C.380 Agency shall require their contractor to submit a performance bond to Developer for an amount equal to or greater than the estimated cost of the Project.

19. Agency shall, within ninety (90) calendar days of completion or termination without completion of the Project, provide to State electronic “as constructed” plans for work on state highways in 11 x 17 size in PDF form. If Developer redrafts the plans, done in Computer Aided Design and Drafting (CADD) or Microstation, to get the "as constructed" set, and they follow the most current version of the “Contract Plans Development Guide, Volume 1 Chapter 16” http://www.oregon.gov/State/HWY/ENGSERVICES/docs/dev_guide/vol_1/V1-16.pdf, City shall provide to State a Portable Document Format (PDF) file and a paper copy of the plan set.

20. Agency is responsible for and ensures that all survey monuments recorded with a county and within or adjacent to the highway right of way shall be preserved in accordance with ORS 209.140 and 209.150. Any such monumentation that is damaged or removed during the course of the Project must be replaced in compliance with ORS Chapter 209 stipulations, the State Right of Way Monumentation Policy, and at Agency’s own expense.

21. Agency is also responsible, at its own expense, for replacement of any additional State survey marks or other monumentation not recorded with a county that are damaged or removed during the course of the Project. In the event of such replacement, Agency shall contact State’s Geometronics Unit for replacement procedures.

22. If additional right of way is acquired for state highway right of way purposes as a result of the Project, then a right of way monumentation survey is required as defined in ORS 209.150 and 209.155. Agency agrees to provide such a survey, at its own expense, following ORS Chapter 209 stipulations, State Right of Way Monumentation Policy, and State’s Geometronics Unit review and approval, and to file the legal survey with the appropriate Agency Surveyor's office as required

23. Agency certifies and represents that the individuals signing this Agreement have been authorized to enter into and execute this Agreement on behalf of Agency, under the direction or approval of its governing body, commission, board, officers, members or representatives, and to legally bind Agency.

24. Agency’s Project Manager for this Project is Mike McCarthy, City Engineer, 10699 SW Herman Rd, Tualatin, OR 97062, 503.691.3674, mmccarthy@tualatin.gov, or assigned designee upon individual’s absence. Agency shall notify the other Party in writing of any contact information changes during the term of this Agreement.

STATE OBLIGATIONS

1. State shall, upon execution of this Agreement, forward to Agency a letter of request for an advance deposit or irrevocable letter of credit in the amount of $23,000 for payment of the work performed by State. State shall review the Project plans, perform periodic inspection for internal documentation purposes, and provide technical inspection during and upon completion of the Project. State agrees to not incur costs exceeding $30,000 without first submitting to Agency a request for additional deposit accompanied by an itemized statement of expenditures and an estimated cost to complete State's services for the Project and receiving Agency's approval.

2. Upon completion of the Project, State shall either send to Agency a bill for the amount which, when added to Agency's advance deposit, will equal 100 percent of the total state costs for Project or State will refund to Agency any portion of said advance deposit which is in excess of the total State costs for Project.

3. State shall be responsible for maintenance of the Project improvements, including striping, pavement, the concrete traffic separators, and curbs. State shall be responsible for long term maintenance of the retaining wall but shall not be responsible for graffiti abatement. Agency shall be responsible for graffiti abatement per Agency Obligations Paragraph 3.

4. State grants authority to Agency to enter upon State right of way for the construction of this Project as provided for in miscellaneous permit to be issued by State District 2B Office.

5. State's Project Manager for this Project is Jim Bailey, Senior Permit Specialist, 9200 Lawnfield Rd, Clackamas, OR 97015, 971.673.6216, james.g.bailey@odot.state.or.us, or assigned designee upon individual's absence. State shall notify the other Party in writing of any contact information changes during the term of this Agreement.

GENERAL PROVISIONS

1. This Agreement may be terminated by mutual written consent of both Parties.

2. State may terminate this Agreement effective upon delivery of written notice to Agency, or at such later date as may be established by State, under any of the following conditions:

   a. If Agency fails to provide services called for by this Agreement within the time specified herein or any extension thereof.

   b. If Agency fails to perform any of the other provisions of this Agreement, or so fails to pursue the work as to endanger performance of this Agreement in accordance with its terms, and after receipt of written notice from State fails to

correct such failures within ten (10) days or such longer period as State may authorize.

c. If Agency fails to provide payment of its share of the cost of the Project.

d. If State fails to receive funding, appropriations, limitations or other expenditure authority sufficient to allow State, in the exercise of its reasonable administrative discretion, to continue to make payments for performance of this Agreement.

e. If federal or state laws, regulations or guidelines are modified or interpreted in such a way that either the work under this Agreement is prohibited or State is prohibited from paying for such work from the planned funding source.

3. Any termination of this Agreement shall not prejudice any rights or obligations accrued to the Parties prior to termination.

4. Americans with Disabilities Act Compliance:

a. State Highway: For portions of the Project located on or along the State Highway System or a State-owned facility ("state highway"):

i. Agency shall utilize ODOT standards to assess and ensure Project compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 as amended (together, "ADA"), including ensuring that all sidewalks, curb ramps, and pedestrian-activated signals meet current ODOT Highway Design Manual standards;

ii. Agency shall follow ODOT's processes for design, construction, or alteration of sidewalks, curb ramps, and pedestrian-activated signals, including using the ODOT Highway Design Manual, ODOT Design Exception process, ODOT Standard Drawings, ODOT Construction Specifications, providing a temporary pedestrian accessible route plan and current ODOT Curb Ramp Inspection form;

iii. At Project completion, Agency shall send a completed ODOT Curb Ramp Inspection Form 734-5020 to the address on the form and to State's Project Manager for each curb ramp constructed or altered as part of the Project. The completed form is the documentation required to show that each curb ramp meets ODOT standards and is ADA compliant. ODOT's fillable Curb Ramp Inspection Form and instructions are available at the following address:

https://www.oregon.gov/ODOT/Engineering/Pages/Accessibility.aspx

iv. Agency shall promptly notify ODOT of Project completion and allow ODOT to inspect Project sidewalks, curb ramps, and pedestrian-activated signals located on or along a state highway prior to acceptance of Project by Agency and prior to release of any Agency contractor.

v. Agency shall ensure that temporary pedestrian routes are provided through or around any Project work zone. Any such temporary pedestrian route shall include directional and informational signs, comply with ODOT standards, and include accessibility features equal to or better than the features present in the existing pedestrian facility. Agency shall also ensure that advance notice of any temporary pedestrian route is provided in accessible format to the public, people with disabilities, disability organizations, and ODOT at least 10 days prior to the start of construction.

b. Local Roads: For portions of the Project located on Agency roads or facilities that are not on or along a state highway:

i. Agency shall ensure that the Project, including all sidewalks, curb ramps, and pedestrian-activated signals, is designed, constructed and maintained in compliance with the ADA.

ii. Agency may follow its own processes or may use ODOT's processes for design, construction, or alteration of Project sidewalks, curb ramps, and pedestrian-activated signals, including using the ODOT Highway Design Manual, ODOT Design Exception process, ODOT Standard Drawings, ODOT Construction Specifications, providing a temporary pedestrian accessible route plan and current Curb Ramp Inspection form, available at: https://www.oregon.gov/ODOT/Engineering/Pages/Accessibility.aspx;

Additional ODOT resources are available at the above-identified link. ODOT has made its forms, processes, and resources available for Agency's use and convenience.

iii. Agency assumes sole responsibility for ensuring that the Project complies with the ADA, including when Agency uses ODOT forms and processes. Agency acknowledges and agrees that ODOT is under no obligation to review or approve Project plans or inspect the completed Project to confirm ADA compliance.

iv. Agency shall ensure that temporary pedestrian routes are provided through or around any Project work zone. Any such temporary pedestrian route shall include directional and informational signs and include accessibility features equal to or better than the features present in the existing pedestrian route. Agency shall also ensure that advance notice of any temporary pedestrian route is provided in accessible format to the public, people with disabilities, and disability organizations prior to the start of construction.

c. Agency shall ensure that any portions of the Project under Agency's maintenance jurisdiction are maintained in compliance with the ADA throughout the useful life of the Project. This includes, but is not limited to, Agency ensuring that:

i. Pedestrian access is maintained as required by the ADA,

ii. Any complaints received by Agency identifying sidewalk, curb ramp, or pedestrian-activated signal safety or access issues are promptly evaluated and addressed,

iii. Agency, or abutting property owner, pursuant to local code provisions, performs any repair or removal of obstructions needed to maintain the facility in compliance with the ADA requirements that were in effect at the time the facility was constructed or altered,

iv. Any future alteration work on Project or Project features during the useful life of the Project complies with the ADA requirements in effect at the time the future alteration work is performed, and

v. Applicable permitting and regulatory actions are consistent with ADA requirements.

d. Maintenance obligations in this section shall survive termination of this Agreement

5. If any third party makes any claim or brings any action, suit or proceeding alleging a tort as now or hereafter defined in ORS 30.260 ("Third Party Claim") against State or Agency with respect to which the other Party may have liability, the notified Party must promptly notify the other Party in writing of the Third Party Claim and deliver to the other Party a copy of the claim, process, and all legal pleadings with respect to the Third Party Claim. Each Party is entitled to participate in the defense of a Third Party Claim, and to defend a Third Party Claim with counsel of its own choosing. Receipt by a Party of the notice and copies required in this paragraph and meaningful opportunity for the Party to participate in the investigation, defense and settlement of the Third Party Claim with counsel of its own choosing are conditions precedent to that Party's liability with respect to the Third Party Claim.

6. With respect to a Third Party Claim for which State is jointly liable with Agency (or would be if joined in the Third Party Claim), State shall contribute to the amount of expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred and paid or payable by Agency in such proportion as is appropriate to reflect the relative fault of State on the one hand and of Agency on the other hand in connection with the events which resulted in such expenses, judgments, fines or settlement amounts, as well as any other relevant equitable considerations. The relative fault of State on the one hand and of Agency on the other hand shall be determined by reference to, among other things, the Parties' relative intent, knowledge, access to information and opportunity to correct or prevent the circumstances resulting in such expenses, judgments, fines or settlement amounts. State’s contribution amount in any instance is capped to the same extent it would have been capped under Oregon law, including the Oregon Tort Claims Act, ORS 30.260 to 30.300, if State had sole liability in the proceeding.

7. With respect to a Third Party Claim for which Agency is jointly liable with State (or would be if joined in the Third Party Claim), Agency shall contribute to the amount of expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred and paid or payable by State in such proportion as is appropriate to reflect the relative fault of Agency on the one hand and of State on the other hand in connection with the events which resulted in such expenses, judgments, fines or settlement amounts, as well as any other relevant equitable considerations. The relative fault of Agency on the one hand and of State on the other hand shall be determined by reference to, among other things, the Parties' relative intent, knowledge, access to information and opportunity to correct or prevent the circumstances resulting in such expenses, judgments, fines or settlement amounts. Agency's contribution amount in any instance is capped to the same extent it would have been capped under Oregon law, including the Oregon Tort Claims Act, ORS 30.260 to 30.300, if it had sole liability in the proceeding.

8. The Parties shall attempt in good faith to resolve any dispute arising out of this Agreement. In addition, the Parties may agree to utilize a jointly selected mediator or arbitrator (for non-binding arbitration) to resolve the dispute short of litigation.

9. If Agency fails to maintain facilities in accordance with the terms of this Agreement, State, at its option, may maintain the facility and bill Agency, seek an injunction to enforce the duties and obligations of this Agreement or take any other action allowed by law.

10. This Agreement may be executed in several counterparts (facsimile or otherwise) all of which when taken together shall constitute one agreement binding on all Parties, notwithstanding that all Parties are not signatories to the same counterpart. Each copy of this Agreement so executed shall constitute an original.

11. This Agreement and attached exhibits constitute the entire agreement between the Parties on the subject matter hereof. There are no understandings, agreements, or representations, oral or written, not specified herein regarding this Agreement. No waiver, consent, modification or change of terms of this Agreement shall bind either Party unless in writing and signed by both Parties and all necessary approvals have been obtained. Such waiver, consent, modification or change, if made, shall be effective only in the specific instance and for the specific purpose given. The failure of State to enforce any provision of this Agreement shall not constitute a waiver by State of that or any other provision.

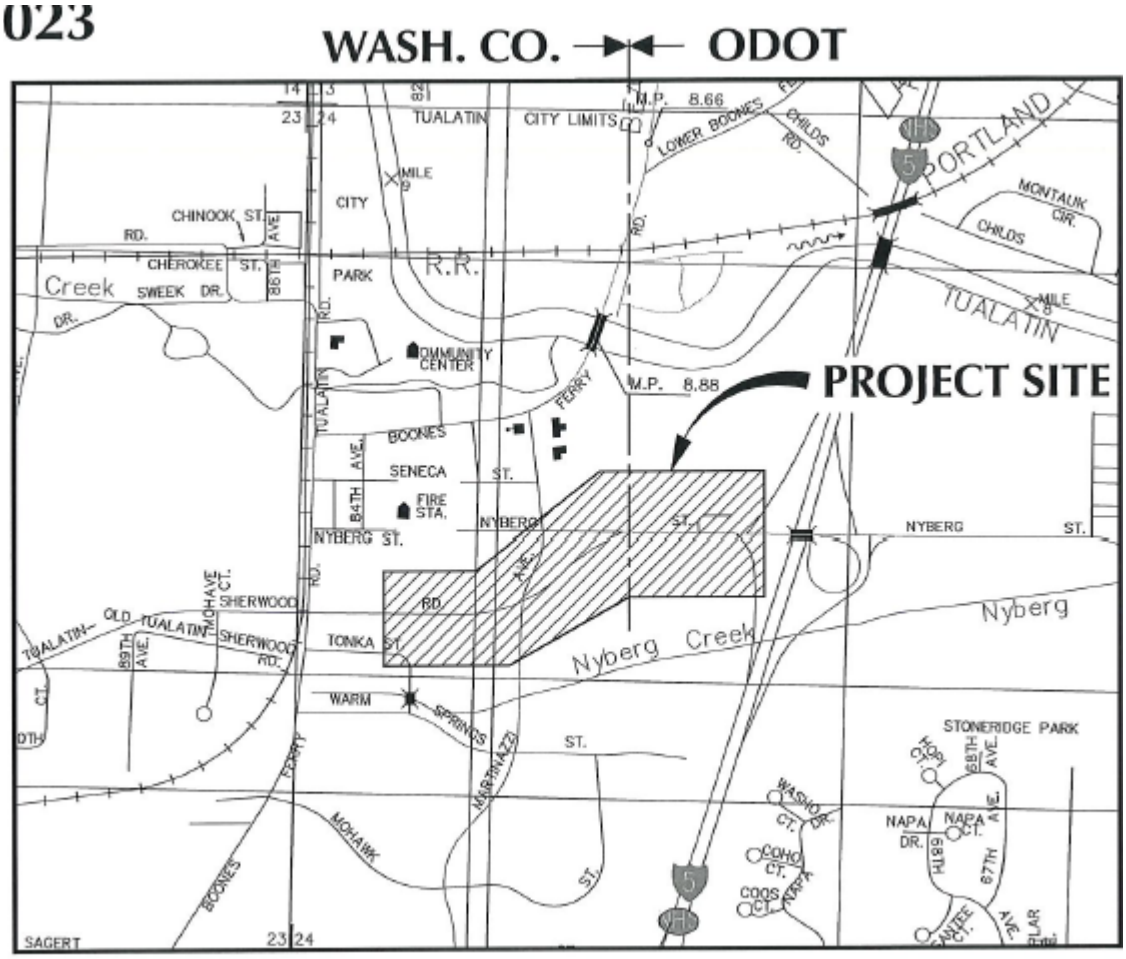
EXHIBIT A – Project Location Map



CITY OF TUALATIN
Staff Report

TO:	Honorable Mayor and Members of the City Council
THROUGH:	Sherilyn Lombos, City Manager
FROM:	Rachel Sykes, Public Works Director
DATE:	May 22, 2023

SUBJECT:
Consideration of Resolution 5698-23 Awarding the Bid for the Construction of the 2023 Pavement Maintenance Program

RECOMMENDATION:
Staff recommends Council approve the resolution to allow the City Manager to execute a contract with Brix Paving Northwest to construct the 2023 Pavement Maintenance Program in the amount of $1,108,632.25.

EXECUTIVE SUMMARY:
The project will overlay a segment of Ibach Street, between 108th Avenue and Graham's Ferry, as well as a segment of Avery Street between Boones Ferry Road and Martinazzi Avenue, as shown on Attachment A. Over 5,000 feet of roadway will be overlaid under the scope of the proposed contract, along with ADA ramp replacements and catch basin retrofits.

The project was advertised in the Daily Journal of Commerce on April 24 and April 26, 2023. The City received 3 bids prior to the close of the bid period on May 9, 2023. Brix Paving was the lowest qualifying bidder for the project for $1,108,632.25

The City consulted with Otak Engineering for design of the project. Otak has reviewed the bids and issued a recommendation to award the project for $1,108,632.25. The Bid Award Recommendation letter can be found in Attachment B.

OUTCOMES OF DECISION:
Adopting Resolution 5698-23 will allow the City to proceed with the 2023 Pavement Maintenance Program as described in the Executive Summary section above and shown on the attached project map.

ALTERNATIVES TO RECOMMENDATION:
The City Council could choose not to adopt Resolution 5698-23 and not proceed with this year's 2023 Pavement Maintenance Program. This is not recommended.

FINANCIAL IMPLICATIONS:
Funds for this project are budgeted in Road Utility Fund.

ATTACHMENTS:

- Attachment A – Project Map

- Attachment B – Bid Award Recommendation from OTAK
- Resolution 5698-23

RESOLUTION NO. 5698-23

RESOLUTION AWARDING THE BID FOR THE CONSTRUCTION OF THE 2023 PAVEMENT MAINTENANCE PROGRAM.

WHEREAS, the Notice of Construction of the 2023 Pavement Maintenance Program was published in the *Daily Journal of Commerce* on April 24 and April 26, 2023;

WHEREAS, 3 proposals were received and publically opened and read on May 9, 2022;

WHEREAS, the procurement complies with the City's public contracting requirements; and

WHEREAS, funds are available for this project in the FY 2023/2024 Road Utility Fund;

NOW THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF TUALATIN, OREGON, that:

Section 1. Brix Paving Northwest was the successful responsible low bidder and is hereby awarded a contract to construct the 2023 Pavement Maintenance Program.

Section 2. The City Manager is authorized to execute a contract with Brix Paving Northwest in the amount of $1,108,632.25.

Section 3. The City Manager or designee is authorized to execute Change Orders totaling up to 10% of the original contract price.

Section 4. This resolution is effective upon adoption.

Adopted by the City Council this 22nd day of May, 2023.

Re: City of Tualatin 2023 Pavement Management Program Bid Award Recommendation – Otak Project No. 21171

Bert:

Bids from 3 contractors were opened on May 9, 2023 at 2:00 PM for the 2023 Pavement Management Program.

The Engineer's Estimate was $1,338,742.39. The lowest bid was $1,108,632.25 submitted by Brix Paving. Brix Paving submitted a complete bid package, including completed Proposal, Proposal Bond Form, First-Tier Subcontractors Disclosure, Resident Bidder Certification, and Non-collusion Affidavit. No bid addendums were issued, so acknowledgement of addendums is not required.

All three bids were reportedly within budget amounts for the project. The Engineer's Estimate was within 17% of the low bid submitted and 3% of the high bid submitted.

We recommend award of the project to Brix Paving.

Sincerely,
Otak, Inc.

Kristen Ballou, PE

CITY OF TUALATIN
Staff Report

TO:	Honorable Mayor and Members of the City Council
THROUGH:	Sherilyn Lombos, City Manager
	Steve Koper, Assistant Community Development Director
FROM:	Madeleine Nelson, Assistant Planner
DATE:	May 22, 2023

SUBJECT:
Consideration of the Norwood Road Plan Text Amendment and Plan Map Amendment (PTA 23-0001 and PMA 23-0001)

EXECUTIVE SUMMARY:
The proposal was submitted by AKS Engineering & Forestry, LLC, on behalf of Vista Residential Partners and Property Owner, Horizon Community Church; the submittal proposes two land use applications – a Plan Text Amendment and a Plan Map Amendment – applicable to a 9.2-acre site at 23370 SW Boones Ferry Road (Tax Lot: 2S135D000106).

Applications Proposed:

Plan Text Amendment:
The applicant, Vista Residential Partners, is requesting approval of a Plan Text Amendment (PTA) that would remove the locational factors from the High-Density High Rise (RH-HR) purpose statement in Tualatin Development Code Section 44.100 and revise Table 44-3 to limit the structure height to 4 stories or 50 feet in the RH-HR zoning district south of Norwood Road, which would be applicable to the subject site.

Plan Map Amendment:
The applicant, Vista Residential Partners, is requesting approval of a Plan Map Amendment (PMA) from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR) located on a 9.2-acre site at 23370 SW Boones Ferry Road.

The applicant's Narrative (Exhibit A) addresses the applicable criteria to the proposal for Comprehensive Plan Amendments. The applicant has also included a Transportation Impact Analysis (Exhibit D), Economic Needs Analysis (Exhibit L) and Utility Capacity Analysis (Exhibit G).

The Findings and Analysis include a review of the proposal and application materials against the applicable criteria and standards, which include: Statewide Planning Goals, Oregon Administrative Rules, Metro Code, and the Tualatin Comprehensive Plan and Development Code. The specific approval criteria for a Plan Amendment are found at Tualatin Development Code (TDC) Section 33.070(5), and include other applicable criteria and standards that must be met.

Summary of Approval Criteria from TDC 33.070(5) (full criteria and findings are included in Attachment B):

(a) Granting the amendment is in the public interest.

- The applicant has cited the Tualatin Comprehensive Plan Chapter 3 goals and policies and 2019 Housing Needs Analysis (HNA) which showed a deficit of 4 acres of RH-HR land (the proposed zoning) and the goal of increasing the supply of multifamily housing. The HNA also showed limited vacant and underdeveloped lands capable of rezoning to address the deficit of RH-HR in order to achieve more multifamily supply. The applicant has also cited Tualatin's Housing Production Strategy which reiterated a lack of supply of multifamily land and noted challenges (costs and complexity) of private sector development limiting willing participants. The applicant highlighted the "significant" role that increasing the overall supply of available housing (including market-rate housing) plays in overall housing affordability.
- Testimony from members of the public has been both in support and against the proposal. Those in favor of the proposal have made similar arguments to the applicant. Those against the proposal have argued that this is not an appropriate location for application of the proposed zoning and thus not in the public interest.
- On April 20, 2023, the Tualatin Planning Commission voted 5-1 to recommend denial of both the plan text and plan map amendments to the City Council. The Tualatin Planning Commission consciously considered if granting the proposed amendments would be in the public interest. The Planning Commission found that the proposed text and map amendments would not be in the best interest of the public. The Planning Commission found the location of the proposed plan map amendment was not in a location to support housing at the greatest density of household living with the greatest access to amenities consistent with the purpose of the RH-HR zone found in Comprehensive Plan Chapter 10.

(b) The public interest is best protected by granting the amendment at this time.

- The applicant has again cited the 2019 Housing Needs Analysis and argued that the public interest is best protected by granting the amendment at this time due to Tualatin having few vacant lands with willing property owners with the ability to provide housing at the needed densities. Citing the 2021 Housing Production Strategy the applicant has argued that allowing for increased density through the plan map amendment could help alleviate households' cost burdens by providing opportunities to add dwelling units to the housing market. Lastly, the applicant has argued that the subject site is unique in that it is primarily institutionally zoned, and is unlike other vacant or redevelopable employment or residential lands, both of which the City has existing deficits. Lastly, the applicant's proposal includes the installation of a traffic signal at SW Norwood Road and SW Boones Ferry Road, which would address ongoing traffic congestion.
- Testimony from members of the public has been both in support and against the proposal. Those in favor of the proposal have made similar arguments to the applicant. Those against the proposal have argued that the City has already approved most of its needed housing to date (545 units approved after the December 2019 HNA of 1,014 needed with no units at a finished stage of construction), and given that the HNA was a 20-year projection of need, granting the amendment is not timely.
- The applicant has rebutted this evidence by providing a supplemental economic analysis (Exhibit L) that argues that the projected need in the HNA understates the actual market demand for housing.

(c) The proposed amendment is in conformity with the applicable objectives of the Tualatin Community Plan.

- The applicant has argued that the Comprehensive Plan goals and policies serve as the adopted expression of the public interest. The applicant has provided evidence that the proposed map amendment would satisfy several existing Plan policies and goals:
    - GOAL 3.1 HOUSING SUPPLY. Ensure that a 20-year land supply is designated and has urban services planned to support the housing types and densities identified in the Housing

Needs Analysis. The HNA reported 4-acres of RH-HR zoning are needed to provide additional housing in the City. The proposed map amendment would provide a ±9.2-acre site to support the housing types and densities identified within the HNA.

- POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit. There are no areas of RH-HR zoning that are considered available for additional housing. The plan map amendment would provide zoning for multi-family development near Trimet Bus Route 96 which is located along SW Boones Ferry Road.
- The applicant provided a memorandum from Johnson Economics (Exhibit L) that stated the subject location is advantageous in terms of site size and configuration, transportation access, and multi-family housing will be in demand and market feasible at this location. The memorandum continued to state that buildable residential sites of this size, and roughly rectangular are rare not just locally but in much of the Metro area. This style of site is well suited for multi-family development, while low-density development can more easily adjust to smaller and more irregular parcels. The Johnson Economics memorandum concluded the subject site and location are well-suited for multi-family housing, and the proposal is likely the "highest and best" economic use for a parcel of this size and configuration.

- As discussed above, public testimony against the application argues that the City has made significant strides in addressing its 20-year housing need. The Planning Commission also found that the proposal would create a surplus of RH-HR zoned land.
- The applicant has rebutted this evidence by providing a supplemental economic analysis (Exhibit L) that argues that the projected need in the HNA understates the actual market demand for housing.

(d) The following factors were consciously considered:

(i) The various characteristics of the areas in the City;
(ii) The suitability of the areas for particular land uses and improvements in the areas;
(iii) Trends in land improvement and development;
(iv) Property values;
(v) The needs of economic enterprises and the future development of the area; needed right-of-way and access for and to particular sites in the area;
(vi) Natural resources of the City and the protection and conservation of said resources;
(vii) Prospective requirements for the development of natural resources in the City;
(viii) The public need for healthful, safe, esthetic surroundings and conditions; and
(ix) Proof of change in a neighborhood or area, or a mistake in the Plan Text or Plan Map for the property under consideration are additional relevant factors to consider.

- The above criterion calls for the various characteristics of the areas in the City to be "consciously considered" but does not provide a standard by which an amendment should be approved or denied. However, the applicant has identified several characteristics of the area relative to the City's plans and goals for housing that it argues makes this location suitable for the type of housing that could be developed under the proposed amendment. Conversely, while there is public testimony that argues that the location is unsuitable, there is not sufficient specificity of the identified factors to support a finding that the characteristics of the areas of the city were not considered.
- Public testimony in favor of the applications largely reiterate the applicant's arguments. Public testimony against the applications argues that the proposed location is not appropriate for the application of the RH-HR zoning due to factors such as traffic and limited public transportation.

(e) If the amendment involves residential uses, then the appropriate school district or districts must be able to reasonably accommodate additional residential capacity by means determined by any affected school district.

- The applicant provided comments from the Sherwood School District included as Exhibit J. Sherwood School District Chief Operations Officer, Jim Rose, provided confirmation that the school district could accommodate any additional students from the future multifamily development on the subject site.

(f) Granting the amendment is consistent with the applicable State of Oregon Planning Goals and applicable Oregon Administrative Rules, including compliance with the Transportation Planning Rule TPR (OAR 660-012-0060).

- The applicant has provided a Transportation Impact Analysis (Exhibit D) which concludes that the proposed amendments are consistent with the above standard with the imposition of a condition of approval requiring the applicant to construct a traffic signal at the SW Boones Ferry Road and SW Norwood Road intersection. The City's Traffic Engineer and Washington County transportation engineering staff have reviewed the applicant's analysis and agreed with its conclusions.
- Public testimony against the application has argued that existing traffic is an issue and that therefore the proposed amendments should not be approved as the future development would create more traffic.
- The applicant has highlighted the fact that this standard requires a comparison of the impact of "worst-case" development that could reasonably be approved in the existing zone and proposed development under the RH-HR zone and that through that lens the proposed amendments meet the standard.

(g) Granting the amendment is consistent with the Metropolitan Service District's Urban Growth Management Functional Plan.

- The applicant has argued the proposed amendments would not adversely impact the City's compliance with Titles 1-14 of the Metro Chapter 3.07, Urban Growth Management Functional Plan.

(h) Granting the amendment is consistent with Level of Service F for the p.m. peak hour and E for the one-half hour before and after the p.m. peak hour for the Town Center 2040 Design Type (TDC Map 10-4), and E/E for the rest of the 2040 Design Types in the City's planning area.

- The attached Transportation Impact Analysis (Exhibit D) concludes that the proposed amendments are consistent with the above standard with the imposition of a condition of approval requiring the applicant to construct a traffic signal at the SW Boones Ferry Road and SW Norwood Road intersection. The City's Traffic Engineer and Washington County transportation engineering staff have reviewed the applicant's analysis and agreed with its conclusions.
- Public testimony against the application has argued that existing traffic is an issue and that therefore the proposed amendments should not be approved.

(i) Granting the amendment is consistent with the objectives and policies regarding potable water, sanitary sewer, and surface water management pursuant to TDC 12.020, water management issues are adequately addressed during development or redevelopment anticipated to follow the granting of a plan amendment.
[…]

- The applicant submitted a Utility Capacity Analysis (Exhibit G) in response to the City's objectives and policies regarding potable water, sanitary sewer, and stormwater management.
- Public testimony has identified stormwater management as a public facility of concern, however full compliance with applicable standards would be ensured through the Architectural Review process, should the amendments be approved.

Housing Need:

In 2019, the City adopted a Housing Needs Analysis (HNA) into its Comprehensive Plan. The following conclusions were part of the 2019 HNA.

Exhibit 4. Comparison of capacity of existing residential land with demand for new dwelling units and land surplus or deficit, Tualatin City Limits and Basalt Creek, 2020 to 2040
Source: Buildable Lands Inventory; Calculations by ECONorthwest. *Note: DU is dwelling unit.*

Residential Plan Designations	Capacity (Dwelling Units)	Demand for New Housing	Remaining Capacity (Supply minus Demand)	Land Surplus or (Deficit) *Gross Acres*
Low Density	523	466	57	10
Medium Low Density	386	71	315	27
Medium High Density	13	122	(109)	(7)
High Density	285	254	31	2
High Density High-Rise	-	101	(101)	(4)

The key findings of the Tualatin's Housing Needs Analysis are that:

- **Tualatin is planning for 1,014 new dwelling units.** The growth of 1,014 households will result in demand for 1,014 new dwelling units over the 20-year planning period, averaging 51 new dwelling units annually.
- **Tualatin will plan for more single-family attached and multifamily dwelling units in the future to meet the City's housing needs.** Historically, about 53% of Tualatin's housing was single-family detached. While 40% of new housing in Tualatin is forecast to be single-family detached, the City will need to provide opportunities for development of new single-family attached (15% of new housing) and multifamily units (45% of new housing).

HOUSING APPROVED IN SINCE ADOPTION OF THE HNA IN DECEMBER 2019

TOTAL APPROVED:	**545**			
TOTAL BUILT:	**0**			

POTENTIAL DECISIONS:
If the Plan Text Amendment application is approved by the Council, then the purpose statement in Tualatin Development Code Section 44.100 and Table 44-3 would be amended to remove the locational factors and limit the structure height to 4 stories or 50 feet in the RH-HR zoning district south of Norwood Road. If the Plan Text Amendment is denied by the Council then the purpose statement in TDC 44.100 and the development standards in Table 44-3 would remain unchanged and the Plan Map Amendment would not be able to be approved.

If the Plan Text Amendment is approved, the Council may consider the Plan Map Amendment, which, if approved, would change the subject property's zoning designation to High-Density High Rise (RH-HR). If the application is denied, the existing zoning would continue to apply.

In sum, the Council may:

- Approve the PTA and PMA;
- Deny the PTA and PMA; or

- Approve the PTA but deny the PMA.

ALTERNATIVES TO A DECISION:
Alternatively, the Council may:

- Continue consideration of the applications to a specified future Council hearing, leaving the hearing and written record open.

- Close the hearing, but leave the written record open for 7 days, allow an additional 7 days for responses but not new evidence, and a final 7 days for applicant rebuttal but not new evidence, and reconvene at a specified future Council hearing to deliberate and reach a decision; or

- Close the hearing and the written record, but continue Council deliberations on the applications to a specified future Council hearing.

I. INTRODUCTION

A. Applicable Criteria

Tualatin Development Code (TDC) Chapters 32 and 33; Tualatin Comprehensive Plan; Applicable Oregon Statewide Planning Goals; Applicable Oregon Administrative Rules including compliance with the Transportation Planning Rule; and Metropolitan Service District's Urban Growth Management Functional Plan.

B. Project Description

AKS Engineering & Forestry, LLC, on behalf of Vista Residential Partners and Property Owner, Horizon Community Church propose two land use applications located on a 9.2-acre site at 23370 SW Boones Ferry Road (Tax Lot: 2S135D000106).

Plan Text Amendment:
The requested Plan Text Amendment (PTA) would remove the locational factors from the High Density High Rise (RH-HR) purpose statement in Tualatin Development Code Section 44.100 and revise Table 44-3 to limit the structure height to 4 stories or 50 feet in the RH-HR zoning district south of Norwood Road, which would be applicable to the subject site.

Plan Map Amendment:
The requested Plan Map Amendment (PMA) would change the existing zoning from Medium Low Density Residential (RML) and Institutional (IN) to High Density High Rise (RH-HR). Future development would require submittal and approval of an Architectural Review application subject to compliance with design and siting standards applicable to the RH-HR District.

C. Site Description and Surrounding Land Use

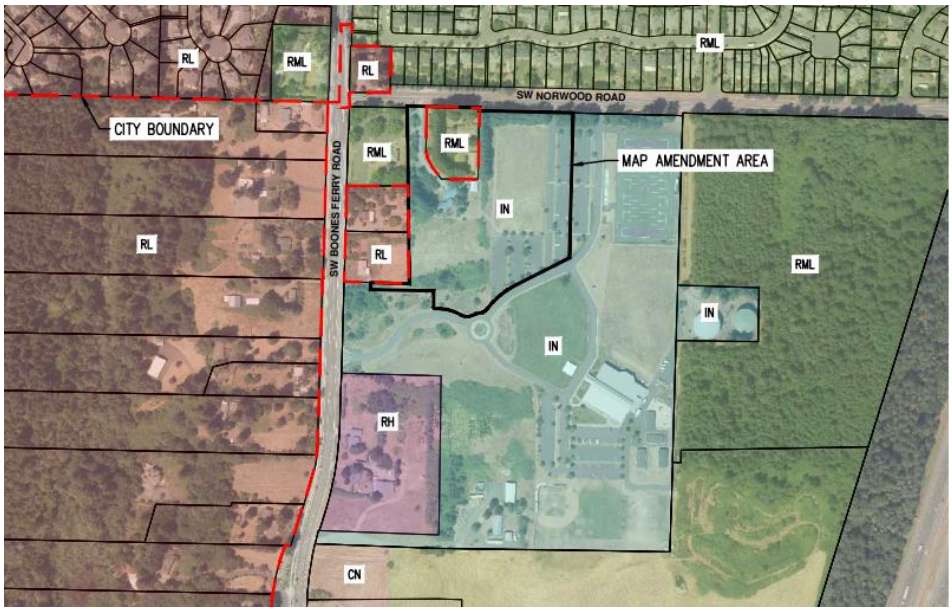

Figure 1 Surrounding Zoning and Land Use

The subject property is a 9.2-acre site located at 23370 SW Boones Ferry Road, which is east of SW Boones Ferry Road and South of SW Norwood Road. The property takes access from existing access

points on SW Boones Ferry and SW Norwood Road. The Horizon Community Church is located on the site with improved sports fields, parking areas, buildings, and access driveways. There are several open and unimproved areas throughout the site. An approximately 60-foot buffer of evergreen trees is located adjacent to SW Norwood road. Stormwater ponds are adjacent to the access driveway from SW Boones Ferry. 1-acre of the property is zoned Medium Low Density Residential (RML) and includes an existing detached single-family home on site. A portion of the site is within the Basalt Creek Planning Area.

D. Previous Land Use Actions

- AR 12-03 – Expired, Approval May of 2012
- AR 15-20 – Expired, Approval in September of 2019

E. Surrounding Uses

Surrounding uses include:

North: Medium Low Density Residential (RML)

- Norwood Heights Subdivision
- Pennington Heights Subdivision
- SW Norwood Road

South: Medium Low Density Residential (RML)/Neighborhood Commercial (CN)

- Autumn Sunrise Subdivision

West: High Density Residential (RH)/Unincorporated Lots with County FD-20 Zoning

- Plambeck Gardens Apartments
- Low Density Residential Properties Zoned County FD-20
- SW Boones Ferry Road

East: Medium Low Density Residential (RML)/Institutional (IN)

- Autumn Sunrise Subdivision
- City-Owned Water Tanks

II. FINDINGS

A: Oregon Statewide Planning Goals

Goal 1 – Citizen Involvement
To develop a citizen involvement program that insures the opportunity for citizens to be involved in all phases of the planning process.

Finding:
The Planning Commission reviewed the proposed amendment at a public meeting on April 20, 2023. The Tualatin Planning Commission voted 5-1 to recommend denial of both the Plan Text and Plan Map Amendments to the City Council. The Planning Commission is the City's acknowledged Committee for Citizen Involvement (CCI), in compliance with Goal 1.

In addition, the City has followed its acknowledged public notice procedures for quasi-judicial Comprehensive Plan Amendments, found in TDC 32.240. The procedures include mailed notice of the City Council hearing to surrounding property owners, publishing notice of the City Council hearing in the Tualatin Times, notice of the hearing to the Department of Land Conservation and Development (Exhibit N) at least 35 days prior to the first hearing, notice to affected government entities, and publicly posting notice of the hearing. Postcard land use application notices were sent to property owners on March 17, 2023 (Exhibit N). The Tualatin Times published the City Council public hearing notice on April 6, 2023 and April 13, 2023 (Exhibit N). The proposed amendment will be considered at a City Council at a public hearing on May 22, 2023.

Goal 2 – Land Use Planning
To establish a land use planning process and policy framework as a basis for all decision and actions related to use of land and to assure an adequate factual base for such decisions and actions.

Finding:
The City of Tualatin's Comprehensive Plan and Development Code provide an acknowledged and established land use planning process and policy framework which serve as the basis for all decisions and actions related to use of land, including requirements to assure that an adequate factual basis is provided for those decisions and actions. The proposed amendment has been processed in accordance with these procedures.

Goal 5 – Open Spaces, Scenic and Historic Area, and Natural Resource
Goal 5 establishes a process for each resource to be inventoried and evaluated. OAR 660-015-0000(5) and OAR 660.023 (Procedures and Requirements for Complying with Goal 5)

Finding:
The proposed amendment does not modify the City's existing open space and natural resources requirements or include any text amendment to the regulations for those Goal 5 resources regulated by Tualatin Development Code Chapter 71 (Wetlands Protection District) and Tualatin Development Code Chapter 72 (Natural Resource Protection Overlay District). All development would be reviewed under the Architectural Review (AR) process to ensure that new construction will be reviewed consistent with these requirements.

Goal 6 – Air, Water and Land Resources Quality

Finding:
The Oregon Department of Environmental Quality (DEQ) regulates air, water and land with Clean Water Act (CWA) Section 401 Water Quality, Water Quality Certificate, State 303(d) listed waters, Hazardous Wastes, Clean Air Act (CAA), and Section 402 NPDES Construction and Stormwater Permits. The Oregon Department of State Lands and the U.S. Army Corps of Engineers regulate jurisdictional wetlands and CWA Section 404 water of the state and the country respectively. Clean Water Services (CWS) coordinates storm water management, water quality and stream enhancement projects throughout the City. Future development would need to comply with national, state and regional regulations and protections for air, water and land resources. Tualatin has an acknowledged Comprehensive Plan that complies with this goal. All future development will be required to be reviewed consistent with these requirements.

Goal 7 – Areas Subject to Natural Disasters and Hazards

Finding:
Tualatin has an acknowledged Comprehensive Plan that complies with this goal. The proposed amendment does not modify the City's natural hazards requirements or existing goals and policies associated with Goal 7 established by the Comprehensive Plan. Future development would be required to be consistent with the applicable requirements of the Tualatin Development Code under Chapters 70 and 72.

Goal 8 – Recreation Needs
To satisfy the recreational needs of the citizens of the state and visitors and, where appropriate, to provide for the siting of necessary recreational facilities including destination resorts.

Finding:
The proposed amendment does not affect policies associated with recreational needs. Any change to the existing recreational facilities will be reviewed as part of an Architectural Review and compliance with the Tualatin Development Code recreational facilities requirements.

Goal 9 – Economy of the State
To provide adequate opportunities throughout the state for a variety of economic activities vital to the health, welfare, and prosperity of Oregon's citizens.

Finding:
The proposed amendment does not affect policies, lands, or opportunities associated with Goal 9 established by the Comprehensive Plan. There are no impacts on the inventory of commercial and industrial lands with the submission of this amendment. The major employment areas of the City are protected.

Goal 10 – Housing
To provide for the housing needs of citizens of the state.

Finding:
The proposed plan map amendment would change the zoning designation of the subject site from Medium Low Density Residential (RML) and Institutional (IN) to High Density High Rise (RH-HR). This change would allow a maximum of 30 units per acre for household living uses. Tualatin's 2019 Housing Needs Analysis (Exhibit O) identified a deficit of land zoned RH-HR as opposed to a surplus of land zoned

RML and IN.
The text amendment, as proposed, is consistent with OAR 660-007 (the Metropolitan Housing Rule) which is used by cities such as Tualatin that are within the Portland Metropolitan UGB to demonstrate compliance with Goal 10. Additional findings addressing OAR 660-007 are found below.

Goal 11 – Public Facilities and Services

Finding:
Land within the City of Tualatin is adequately served by public facilities and services. The amendment would encourage compact development and the use of existing services and facilities. The proposed amendment does not affect policies related to public facilities and services including water, sewer, and emergency services. Public facilities are addresses in Tualatin Development Code Chapter 33.070(5)(f)(h)(i), additional materials addressing this standard are provided in Exhibit D, E, F, G and H.

Goal 12 – Transportation

Finding:
The requirements of Goal 12 are addressed by compliance with Oregon Administrative Rule (OAR) Section 660-012-0060, also known as the Transportation Planning Rule or TPR. The proposed amendment's compliance with the TPR is addressed below under the applicable OAR Section.

Goal 13 – Energy

Findings:
The proposed amendment does not include any changes that are related to or intended to impact Tualatin's land use regulations pertaining to energy consumption.

Goal 14 – Urbanization

Finding:
The subject property is within the Urban Growth Boundary. The proposal does not contain any proposed modification to the Urban Growth Boundary or development outside of the Urban Growth Boundary.

OAR Chapter 660 Division 7 (Metropolitan Housing)
[…]
660-007-0045
Computation of Buildable Lands

(1) The local buildable lands inventory must document the amount of buildable land in each residential plan designation.

(2) The Buildable Land Inventory (BLI): The mix and density standards of OAR 660-007-0030, 660-007-0035 and 660-007-0037 apply to land in a buildable land inventory required by OAR 660-007-0010, as modified herein. Except as provided below, the buildable land inventory at each jurisdiction's choice shall either be based on land in a residential plan/zone designation within the jurisdiction at the time of periodic review or based on the jurisdiction BLI at the time of acknowledgment as updated. Each jurisdiction must include in its computations all plan and/or zone changes involving residential land which that jurisdiction made since acknowledgment. A jurisdiction need not include plan and/or zone changes made by another jurisdiction before annexation to a city. The adjustment of the BLI at the time of acknowledgment shall:

(a) Include changes in zoning ordinances or zoning designations on residential planned land if allowed densities are changed;

(b) Include changes in planning or zoning designations either to or from residential use. A city shall include changes to annexed or incorporated land if the city changed type or density or the plan/zone designation after annexation or incorporation;

(c) The county and one or more cities affected by annexations or incorporations may consolidate buildable land inventories. A single calculation of mix and density may be prepared. Jurisdictions which consolidate their buildable lands inventories shall conduct their periodic review simultaneously;

(d) A new density standard shall be calculated when annexation, incorporation or consolidation results in mixing two or more density standards (OAR 660-007-0035). The calculation shall be made as follows:

(A)

(i) BLI Acres x 6 Units/Acre = Num. of Units;

(ii) BLI Acres x 8 Units/Acre = Num. of Units;

(iii) BLI Acres x 10 Units/Acre = Num. of Units;

(iv) Total Acres (TA) - Total Units (TU).

(B) Total units divided by Total Acres = New Density Standard;

(C) Example:

(i) Cities A and B have 100 acres and a 6-unit-per-acre standard: (100 x 6 = 600 units); City B has 300 acres and a 10-unit-per-acre standard: (300 x 10 = 3000 units); County has 200 acres and an 8-unit-per-acre standard: (200 x 08 = 1600 units); Total acres = 600 - Total Units = 5200.

(ii) 5200 units divided by 600 acres = 8.66 units per acre standard.

(3) Mix and Density Calculation: The housing units allowed by the plan/zone designations at periodic review, except as modified by section (2) of this rule, shall be used to calculate the mix and density. The number of units allowed by the plan/zone designations at the time of development shall be used for developed residential land.

660-007-0050
Regional Coordination
(1) At each periodic review of the Metro UGB, Metro shall review the findings for the UGB. They shall determine whether the buildable land within the UGB satisfies housing needs by type and density for the region's long-range population and housing projections.
(2) Metro shall ensure that needed housing is provided for on a regional basis through coordinated comprehensive plans.

660-007-0060
Applicability
(1) The new construction mix and minimum residential density standards of OAR 660-007-0030 through 660-007-0037 shall be applicable at each periodic review. During each periodic review local government shall prepare findings regarding the cumulative effects of all plan and zone changes affecting residential use. The jurisdiction's buildable lands inventory (updated pursuant to OAR 660-007-0045) shall be a supporting document to the local jurisdiction's periodic review order.
(2) For plan and land use regulation amendments which are subject to OAR 660, Division 18, the local jurisdiction shall either:
(a) Demonstrate through findings that the mix and density standards in this Division are met by the amendment; or
(b) Make a commitment through the findings associated with the amendment that the jurisdiction will comply with provisions of this Division for mix or density through subsequent plan amendments.

Finding:
In 2019, the City of Tualatin completed a Housing Needs Analysis (HNA) which included a computation of the City's residential buildable lands inventory (BLI)(Exhibit O). The BLI analysis complied with statewide planning Goal 10 policies that govern planning for residential uses. Consistent with these sections, the detailed methodology used to complete the buildable lands inventory is presented in Appendix A of the HNA (Exhibit O).

OAR 660 Division 12 (Transportation Planning)
OAR 660-012-0060
Plan and Land Use Regulation Amendments
(1) If an amendment to a functional plan, an acknowledged comprehensive plan, or a land use regulation (including a zoning map) would significantly affect an existing or planned transportation facility, then the local government must put in place measures as provided in section (2) of this rule, unless the amendment is allowed under section (3), (9) or (10) of this rule. A plan or land use regulation amendment significantly affects a transportation facility if it would:
(a) Change the functional classification of an existing or planned transportation facility (exclusive of correction of map errors in an adopted plan);
(b) Change standards implementing a functional classification system; or
(c) Result in any of the effects listed in paragraphs (A) through (C) of this subsection based on projected conditions measured at the end of the planning period identified in the adopted TSP. As part of evaluating projected conditions, the amount of traffic projected to be generated within the area of the amendment may be reduced if the amendment includes an enforceable, ongoing requirement that would demonstrably limit traffic generation, including, but not limited to, transportation demand management. This reduction may diminish or completely eliminate

the significant effect of the amendment.

(A) Types or levels of travel or access that are inconsistent with the functional classification of an existing or planned transportation facility;

(B) Degrade the performance of an existing or planned transportation facility such that it would not meet the performance standards identified in the TSP or comprehensive plan; or

(C) Degrade the performance of an existing or planned transportation facility that is otherwise projected to not meet the performance standards identified in the TSP or comprehensive plan.

(2) If a local government determines that there would be a significant effect, then the local government must ensure that allowed land uses are consistent with the identified function, capacity, and performance standards of the facility measured at the end of the planning period identified in the adopted TSP through one or a combination of the remedies listed in (a) through (e) below, unless the amendment meets the balancing test in subsection (2)(e) of this section or qualifies for partial mitigation in section (11) of this rule. A local government using subsection (2)(e), section (3), section (10) or section (11) to approve an amendment recognizes that additional motor vehicle traffic congestion may result and that other facility providers would not be expected to provide additional capacity for motor vehicles in response to this congestion.

(a) Adopting measures that demonstrate allowed land uses are consistent with the planned function, capacity, and performance standards of the transportation facility.

(b) Amending the TSP or comprehensive plan to provide transportation facilities, improvements or services adequate to support the proposed land uses consistent with the requirements of this division; such amendments shall include a funding plan or mechanism consistent with section (4) or include an amendment to the transportation finance plan so that the facility, improvement, or service will be provided by the end of the planning period.

(c) Amending the TSP to modify the planned function, capacity or performance standards of the transportation facility.

(d) Providing other measures as a condition of development or through a development agreement or similar funding method, including, but not limited to, transportation system management measures or minor transportation improvements. Local governments shall, as part of the amendment, specify when measures or improvements provided pursuant to this subsection will be provided.

(e) Providing improvements that would benefit modes other than the significantly affected mode, improvements to facilities other than the significantly affected facility, or improvements at other locations, if:

(A) The provider of the significantly affected facility provides a written statement that the system-wide benefits are sufficient to balance the significant effect, even though the improvements would not result in consistency for all performance standards;

(B) The providers of facilities being improved at other locations provide written statements of approval; and

(C) The local jurisdictions where facilities are being improved provide written statements of approval.

(3) Notwithstanding sections (1) and (2) of this rule, a local government may approve an amendment that would significantly affect an existing transportation facility without assuring that the allowed land uses are consistent with the function, capacity and performance standards of the facility where:

(a) In the absence of the amendment, planned transportation facilities, improvements and services as set forth in section (4) of this rule would not be adequate to achieve consistency with

the identified function, capacity or performance standard for that facility by the end of the planning period identified in the adopted TSP;

(b) Development resulting from the amendment will, at a minimum, mitigate the impacts of the amendment in a manner that avoids further degradation to the performance of the facility by the time of the development through one or a combination of transportation improvements or measures;

[…]

(4) Determinations under sections (1)–(3) of this rule shall be coordinated with affected transportation facility and service providers and other affected local governments.

(a) In determining whether an amendment has a significant effect on an existing or planned transportation facility under subsection (1)(c) of this rule, local governments shall rely on existing transportation facilities and services and on the planned transportation facilities, improvements and services set forth in subsections (b) and (c) below.

(b) Outside of interstate interchange areas, the following are considered planned facilities, improvements and services:

(A) Transportation facilities, improvements or services that are funded for construction or implementation in the Statewide Transportation Improvement Program or a locally or regionally adopted transportation improvement program or capital improvement plan or program of a transportation service provider.

(B) Transportation facilities, improvements or services that are authorized in a local transportation system plan and for which a funding plan or mechanism is in place or approved. These include, but are not limited to, transportation facilities, improvements or services for which: transportation systems development charge revenues are being collected; a local improvement district or reimbursement district has been established or will be established prior to development; a development agreement has been adopted; or conditions of approval to fund the improvement have been adopted.

(C) Transportation facilities, improvements or services in a metropolitan planning organization (MPO) area that are part of the area's federally-approved, financially constrained regional transportation system plan.

(D) Improvements to state highways that are included as planned improvements in a regional or local transportation system plan or comprehensive plan when ODOT provides a written statement that the improvements are reasonably likely to be provided by the end of the planning period.

(E) Improvements to regional and local roads, streets or other transportation facilities or services that are included as planned improvements in a regional or local transportation system plan or comprehensive plan when the local government(s) or transportation service provider(s) responsible for the facility, improvement or service provides a written statement that the facility, improvement or service is reasonably likely to be provided by the end of the planning period.

(c) Within interstate interchange areas, the improvements included in (b)(A)–(C) are considered planned facilities, improvements and services, except where:

(A) ODOT provides a written statement that the proposed funding and timing of mitigation measures are sufficient to avoid a significant adverse impact on the Interstate Highway system, then local governments may also rely on the improvements identified in paragraphs (b)(D) and (E) of this section; or

(B) There is an adopted interchange area management plan, then local governments may also rely on the improvements identified in that plan and which are also identified in paragraphs (b)(D) and (E) of this section.

(d) As used in this section and section (3):

(A) Planned interchange means new interchanges and relocation of existing interchanges that are authorized in an adopted transportation system plan or comprehensive plan;

(B) Interstate highway means Interstates 5, 82, 84, 105, 205 and 405; and

(C) Interstate interchange area means:

(i) Property within one-quarter mile of the ramp terminal intersection of an existing or planned interchange on an Interstate Highway; or

(ii) The interchange area as defined in the Interchange Area Management Plan adopted as an amendment to the Oregon Highway Plan.

(e) For purposes of this section, a written statement provided pursuant to paragraphs (b)(D), (b)(E) or (c)(A) provided by ODOT, a local government or transportation facility provider, as appropriate, shall be conclusive in determining whether a transportation facility, improvement or service is a planned transportation facility, improvement or service. In the absence of a written statement, a local government can only rely upon planned transportation facilities, improvements and services identified in paragraphs (b)(A)–(C) to determine whether there is a significant effect that requires application of the remedies in section (2).

[…]

Finding:

The applicant proposed an amendment to the Comprehensive Plan and Zoning Map designation of the subject property as Tualatin is a single-map Comprehensive Plan/Zoning Map jurisdiction. The proposed plan amendment would increase the maximum density from 25 units per acre (townhouses) under the current Medium Low Density Residential (RML) zoning to a maximum of 30 units per acre (household living uses) under the High Density High Rise Zone (RH-HR).

The applicant provided a review of Oregon's Transportation Planning Rule (TPR) (OAR 660-012-0060) and a trip generation analysis by Lancaster Mobley included in Exhibit D. The review identified the proposed amendment would impact an existing transportation facility. Specifically, the applicant identified the intersection of SW Norwood Road and SW Boones Ferry Road as failing. Staff note that the applicant's TPR analysis, which was reviewed and concurred by DKS Associates, indicated that this intersection would ultimately fail, with or without the proposed plan map amendment, unless a traffic signal is installed at the intersection of SW Norwood Road and SW Boones Ferry Road. The applicant's analysis stated all study intersections show operational results that meet standards under all analysis scenarios except the intersection of SW Norwood Road and SW Boones Ferry Road if it remains unsignalized.

On behalf of the City of Tualatin, DKS Associates evaluated the applicant's TPR analysis and mitigation recommendation (Exhibit E). DKS Associates agreed with the applicant's TPR analysis findings and that the construction of a traffic signal would be an adequate mitigation measure to address the failing intersection of SW Boones Ferry Rd and SW Norwood Road. DKS Associates also stated the intersection should include a separate striped westbound left turn lane for safety reasons, consistent with the functional classification. It is recommended the westbound left turn run on a separate phase to protect the pedestrians on the south crosswalk, which is directly adjacent to a transit stop. A leading pedestrian interval could also be used and a northbound right turn overlap could be implemented to shorten the right turn queue length.

The application of the reasonable worst-case analysis must be performed to show no significant impact of the zone change per the Transportation Planning Rule. The trip generation comparison for the zone change shows the reasonable worst-case build-out of the two subject parcels under both the existing and proposed zoning. Overall the trip generation comparison shows a decrease of 157 trips in the AM peak hour due to

less contributing school traffic and an increase of 60 trips in the PM peak hour. There is an increase of 636 daily trips which is over the 450 trip threshold set by ODOT which requires operational analysis to determine if there are significant impacts from this zone change.

Operations analysis was performed for the existing and proposed zoning scenarios under year 2040 conditions. The study intersections generally performed slightly better in the AM peak hour and the same or slightly worse in the PM peak hour under the proposed zoning. Under both zoning scenarios, the intersection of Boones Ferry Road/Norwood Road would fail without signalization. This triggers OAR 660-012-0060 section (1)(c)(C). With signalization, the intersection performs at LOS B and v/c ratio 0.73 under the proposed zoning. Thus, with the proposed mitigation of signalization, the analysis concluded the significant effect due to the proposed zoning change is mitigated per OAR 660-012-0660(2)(d).

C: Metro Chapter 3.07, Urban Growth Management Functional Plan

The following Chapters and Titles of Metro Code are applicable to the proposed amendments: Chapter 3.07, Urban Growth Management Functional Plan

Finding:
Metro's Urban Growth Management Functional Plan is established in Metro Code as Section 3.07. The following Functional Plan sections are applicable to the proposed plan and map amendments:

Title 1 – Housing Capacity: requires a city or county to maintain or increase its housing capacity.

- *The proposed amendment would create a High Density High Rise (RH-HR) zone that permits multi-family housing at 26-30 units an acre from the current zoning of Medium Low Density (RML) and Institutional (IN). Page 3 of the applicant's narrative cited Tualatin's Housing Needs Analysis (HNA) and stated there is a surplus in Low Density Residential (RL), Medium Low Density Residential (RML), and High Density Residential (RH) designations in the City of Tualatin. As there are currently no buildable acres of RH-HR lands, a deficit of 101 dwelling units is shown. After the proposed plan map amendment, there would still be a surplus of RML land and there would no longer be a deficit of RH-HR land. The applicant stated the proposed amendment does not seek to adjust minimum or maximum densities or uses required by the RH-HR zone. The proposed map and plan text amendment changes also do not decrease housing supply, density, or capacity within the City of Tualatin.*

Title 2 – Regional Parking Policy: repealed.

Title 3 – Water Quality and Flood Management: protects Water Quality and Flood Management Areas.

- *Water Quality and Flood Management are addressed in Tualatin Development Code Chapters 70, 71, and 74. No amendments are proposed to these chapters. No physical development is proposed with this application for the plan map and text amendment. The subject site would be further examined for natural resources with future development of the site through an Architectural Review. Future development of the site would need to comply with local, regional, state, and federal requirements for the protection of air, water, and land resources.*

Title 4 – Industrial and Other Employment Areas: promotes "clustering" of industries that operate more productively and efficiently when in proximity to each other.

- *The site is currently zoned to allow Medium Low Density (RML) and Institutional (IN) uses. While the area was previously designated by Metro as an Industrial Area (Title 4, Industrial and Other Employment Areas map), the proposed map and text amendments do not diminish the industrial or commercial capacities of the City because the area was not zoned for industrial or commercial uses by the City of Tualatin.*

Title 5 - Neighbor Cities and Rural Reserves: repealed

Title 6 – Centers, Corridors, Station Communities and Main Streets: enhancements of these areas as principal centers of urban life via actions and investments.

- *The subject site has not been identified as a Regional Center, Town Center, Station Community or Main Street.*

Title 7 – Housing Choice: implements policies regarding establishment of voluntary affordable housing production goals to be adopted by local governments.

- *The proposed plan map amendment would permit multi-family housing at 26-30 units an acre. Page 29 of the applicant's narrative stated the amendments do not prohibit regulated affordable housing on the project site, but the project does not plan to utilize or provide affordable housing. The amendments will allow for the development of multifamily dwelling units, which provide additional housing choices; choices that are more affordable than detached single-family housing. The applicant cites Tualatin's Housing Needs Analysis recommendation that the City provide all types of housing, including market-rate multifamily housing.*

Title 8 – Compliance Procedures: ensures all cities & counties are equitably held to the same standards.

- *The City of Tualatin continues to partner with Metro to comply with the Functional Plan. Amendments were shared and posted with DLCD on March 20, 2023 – 63 days before the scheduled hearing.*

Title 9 – Performance Measures: *repealed.*

Title 10 – Functional Plan Definitions.

Title 11 – Planning for New Urban Areas: guides planning of areas brought into the UGB.

- *The proposed High Density High Rise (RH-HR) zone subject site is not on land eligible for annexation into the City of Tualatin; therefore amendments do not affect planning areas outside of the UGB.*

Title 12 – Protection of Residential Neighborhoods: **protects existing residential neighborhoods from pollution, noise, crime, and provides adequate levels of public services.**

- *The site of the proposed plan map amendment would be adequately serviced by existing and proposed infrastructure and services. Infrastructure and public services will be discussed in greater detail in TDC 33.070(5)(i).*
- *The proposed text amendment would limit the height of structures on the subject site to 50 feet or four stories to make the aesthetic of the site compatible with surrounding uses. The applicant has proposed a 60-foot landscape buffer along SW Norwood Rd for additional screening.*

Title 13 – Nature in Neighborhoods: conserves, protects and restores a continuous ecologically viable streamside corridor system integrated with upland wildlife habitat and the urban landscape.

- *Protection of natural resources are addressed in Chapter 72 of the Tualatin Development Code. In addition, sites are reviewed for the presence of natural resources and are reviewed by Clean Water Services at the time of development. No physical development is proposed with this application for the plan map and text amendment. The subject site would be further examined for natural resources with future development of the site through an Architectural Review. Future development of the site would need to comply with local, regional, state, and federal requirements for the protection of air, water, and land resources. No amendments to this chapter are proposed under this application.*

Title 14 – Urban Growth Boundary: prescribes criteria and procedures for amendments to the UGB.

- *No amendments are proposed to the UGB under this application.*

D: Tualatin Comprehensive Plan

Chapter 1 – Community Involvement:
POLICY 1.1.3. Conduct the planning process with adequate input and feedback from citizens in each affected neighborhood.

Finding:
The applicant provided evidence that an in-person Neighborhood/Developer Meeting was held on October 25, 2022, that discussed the proposed plan map and text amendments (Exhibit J). The meeting was held and noticed in accordance with TDC 32.120. As a land use application requiring a Type IV-A procedure, an advisory recommendation was sought before the Tualatin Planning Commission prior to the City Council meeting. On April 20, 2023, the Tualatin Planning Commission voted 5-1 to recommend denial of both the Plan Text and Plan Map Amendments. City staff issued public notice and request for comment in accordance with the noticing procedures outlined in TDC 32.240 and included as Exhibit N.

Chapter 3 – Housing & Residential Growth:
GOAL 3.1 HOUSING SUPPLY. Ensure that a 20-year land supply is designated and has urban services planned to support the housing types and densities identified in the Housing Needs Analysis.

Finding:
Plan Map Amendment: *Tualatin's 2019 Housing Needs Analysis (HNA) identified a deficit of land designated for housing in the High Density High Rise (RH-HR) residential comprehensive plan designations. The HNA reported 4 acres of RH-HR zoning are needed to provide additional housing in the City. There are existing properties identified for RH-HR zoning on the City's Comprehensive Map. The current RH-HR area is generally located south of SW Tualatin Road and is constrained by public ownership, lack of direct public access and environmental factors such as the existing wetlands and floodplains. The HNA has considered the land to be unbuildable and is not considered available for additional housing. The proposed map amendment would provide a ±9.2-acre site to support the housing types and densities identified within the HNA. The HNA forecasts that multifamily units will provide 45 percent (456 dwelling units) of the 1,014 dwellings that are needed in Tualatin between 2020 and 2040.*

Page 8 of the applicant's narrative (Exhibit A) provided information from the Tualatin Housing Production Strategy (HPS) that presented a housing strategy for the implementation of Tualatin's HNA. The applicant's narrative highlighted HPS Actions 1.2 "Evaluate opportunities to rezone land to provide additional opportunities for multifamily housing development", 5.1 "Identify districts within Tualatin with opportunities for redevelopment for housing and employment uses" and 5.2 "Support redevelopment of underutilized commercial buildings for housing". The applicant stated the proposed plan map amendment aligns with the cited actions of the HPS.

The applicant supplied a memorandum from Johnson Economics, LLC (Exhibit L) that concluded the housing need forecasted in the 2019 HNA for 1,014 units is understated for a 20-year timeframe. From the data supplied on page 11 of the Johnson Economics memorandum, the local demand is outpacing the HNA forecast. The memorandum highlighted the summary of actions of the 2019 Tualatin Housing Strategy (Exhibit P) that are applicable to the proposed zone change application, Strategy 1 "Ensure an adequate supply of land is available and serviceable", Recommendation 1.2b "Evaluate opportunities to re-zone Residential Low Density and Residential Medium Low Density residential land for higher-density housing",

Strategy 3 "Support development and preservation of housing that is affordable for all households" and Action 3.2 "Develop policies to support development of housing affordable to people who have income between 60% and 120% of MFI ($48,900 to $98,000 for a household of four in Washington County) and live and work in Tualatin". The memorandum reported the adopted strategies identified are supportive of rezoning residential lands to allow greater housing density. Action 3.2 also encouraged the development of market rate rental housing which is typically affordable to middle-income households, and having higher density supplies would supply more units for these households.

The Johnson Economics memorandum included additional key findings from the 2021 Tualatin Housing Production Strategy (Exhibit P) that are applicable to the proposed zone change application such as, "Tualatin needs increased housing diversity", "Tualatin needs greater housing affordability and availability to renters" and "Housing is needed for people who live and work in Tualatin". The Johnson Economics memorandum also identified barriers to the development of needed housing within the City of Tualatin as identified in the HPS. One barrier cited was land for housing and quoted, "Scarcity of vacant land, especially for multifamily development is one of Tualatin's primary barriers to development of needed housing". The other barrier mentioned was the complexity and expense of redevelopment. The provided memorandum listed the following goal and strategic actions adopted with the HPS that would be addressed in the proposed map amendment; Goal 11 "Increase housing development opportunities through regulatory and zone changes to accommodate a diverse range of housing types and price points to meet the housing needs in Tualatin", Action 11a " Evaluate updating density standards for multifamily housing in medium-density, high-density, and mixed use zones", and Action 11b "Evaluate opportunities to rezone lower-density residential land to higher density". The Johnson Economics memorandum concluded the findings of the HNA and HPA are supportive of rezoning lower density residential land and encouraging housing opportunities for households at middle income, many of whom are typically served by market-rate rental apartments.

On April 20, 2023, the Tualatin Planning Commission voted 5-1 to recommend denial of both the plan text and plan map amendments to the City Council. The Planning Commission found that Comprehensive Plan Goal 3.1 was not met due to the plan map amendment creating a surplus of RH-HR zoned lands. The HNA identified a deficit of 4 acres of RH-HR zoning and the proposed plan map amendment would provide 9.2 acres of RH-HR land resulting in a surplus. There is no language provided in the Tualatin Comprehensive Plan or Tualatin Development Code that states the creation of a surplus of zoned land for an identified need is a criteria of approval or denial for a plan map amendment.

***Plan Text Amendment:** The proposed text amendment would remove the zoning district locational language from the purpose statement of Chapter 44 of the Tualatin Development Code. The existence of the locational language does not allow the RH-HR zoning to be permitted in a location that is considered buildable. The text amendment would allow RH-HR to be permitted on other properties with access to facilities, services, and without the constraints of the wetlands, floodplains and lack of public access.*

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

Finding:

***Plan Map Amendment:** OAR 660-007 requires that Tualatin provide the opportunity for the development of housing at an overall average density of eight dwelling units per net acre. The High Density High Rise (RH-HR) zoning requires a density between 26 and 30 dwelling units per acre for household living uses. The proposed plan map amendment would increase the City's residential land supply and contribute to the minimum target density provisions.*

Plan Text Amendment: *The proposed text amendment would remove the zoning district locational language from the purpose statement of Chapter 44 of the Tualatin Development Code. The existence of the locational language does not allow the RH-HR zoning to be permitted in a location that is considered buildable. The text amendment would allow RH-HR to be permitted on other properties with access to facilities, services, and without the constraints of the wetlands, floodplains and lack of public access.*

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

Finding:
Plan Map Amendment: *Page 10 of the applicant's narrative (Exhibit A) cited Tualatin's Housing Needs Analysis, which stated there are no areas of High Density High Rise (RH-HR) zoning that are considered available for additional housing. The plan map amendment would provide zoning for multi-family development near Trimet Bus Route 96 which is located along SW Boones Ferry Road.*

Plan Text Amendment: *The proposed text amendment would remove the zoning district's locational language from the purpose statement of Chapter 44 of the Tualatin Development Code. The removal of this language would allow the City to apply the RH-HR zoning for multifamily development beyond the locational limits of the current code. This would include other sites that could be zoned for multi-family development and also adjacent to transit that are outside of the current permitted locations.*

GOAL 3.2 HOUSING FOR ALL. Encourage development and preservation of housing that is affordable for all households in Tualatin.

Finding:
Plan Map Amendment: *Page 10 of the applicant's narrative (Exhibit A) cited Tualatin's 2019 Housing Needs Analysis which identified the need for a higher percentage of multifamily dwelling units (45% of new housing) to meet the demographics of the City and to increase housing affordability. The applicant stated that for rent apartments are an affordable alternative to buying a home and that without an additional supply of residential rental units the demand would continue to raise rents and make renting less affordable in Tualatin. The plan map amendment would permit a density of 26-30 units per acre for multi-family housing.*

The applicant provided a memorandum from Johnson Economics (Exhibit L) that stated the rental housing market in Tualatin is strong and supportive of the continued development of market-rate rental supply. The memorandum reported that average rents have climbed steadily over the past decade while the vacancy rate has fallen resulting in a tight supply of available units, increasing rent levels, and less choice for renters among properties. Johnson Economics concluded that the new housing supply would help to alleviate rent increases and help renter households remain in the community.

Plan Text Amendment*: The proposed text amendment would remove the zoning district locational language from the purpose statement of Chapter 44 of the Tualatin Development Code. The existence of the locational language does not allow the RH-HR zoning to be permitted in a location that is considered buildable. The text amendment would allow RH-HR to be permitted on other properties with access to facilities, services, and without the constraints of the wetlands, floodplains and lack of public access.*

POLICY 3.2.1 HOUSING TYPE DIVERSITY. Support development of townhomes, duplexes, triplexes,

quadplexes, cottages, courtyard housing, accessory dwelling units, single story unites, senior housing, and extended family and multi-generational housing in all residential zoning districts.

Finding:
Page 11 of the applicant's narrative (Exhibit A) stated the proposed plan map and text amendment would increase the supply of renter occupied housing and the diversity of housing types within the City of Tualatin by allowing the construction of apartment housing.

Plan Map Amendment: *The proposed plan map amendment would change the subject site zoning from Institutional (IN) and Medium Low Density Residential (RML) to High Density High Rise (RH-HR). The proposed map amendment could allow for the construction of up to 276 housing units on the ±9.2-acre site,*

Plan Text Amendment: *The plan text amendment would allow the City to apply the RH-HR zoning for multifamily development on properties without the constraints of the current available land inventory for RH-HR lands such as wetland habitats and floodplains.*

GOAL 3.5 HOUSING AND TRANSPORTATION. Encourage development and redevelopment in Tualatin that supports all modes of transportation, including walking, biking and mass transit.

GOAL 3.7 RESIDENTIAL GROWTH AND THE ENVIRONMENT. Plan for housing and residential growth to minimize and mitigate for environmental impacts.

Finding:
Plan Map Amendment: *The location of the proposed plan map amendment is near the intersection of SW Boones Ferry Road, SW Norwood Road, and the future extension of the Basalt Creek Parkway. The subject site is near Trimet Bus Route 96 which is located along SW Boones Ferry Road. The submitted narrative from the applicant implied that future increased residential, commercial, and industrial growth in the area could lead to expanded levels of service along the route. On page 12 of the submitted narrative, the applicant provided additional figures in response to Goal 3.7 (Exhibit A). The figures depicted the existing High Density High Rise (RH-HR) zoned lands in the City of Tualatin. The figures included an overlay that showed the land constraints of the existing RH-HR zoned areas. The applicant stated the existing RH-HR lands within the City have been classified as largely unbuildable due to wetland habitats and floodplains. Other nearby residential lands to the amendment subject site such as that west of SW Boones Ferry Road, are also significantly impacted by historic buildings, wetland, riparian, and upland habitats. In comparison, the applicant noted that the proposed subject site does not feature any identified upland or riparian habitats. The plan map amendment would provide zoning for multi-family development on land free from historic buildings, wetland, riparian, and upland habitats.*

Plan Text Amendment: *The plan text amendment would allow the City to apply the RH-HR zoning for multifamily development on properties that meet the above criterion without the constraints of the current available land inventory for RH-HR lands such as wetland habitats and floodplains.*

POLICY 3.7.1 ENVIRONMENTAL PROTECTION. Housing and residential growth policies will be evaluated for consistency with the environmental protection goals and policies of Chapter 7 (Parks, Open Space, and the Environment).

Finding:
Further review of the site would be conducted through the Architectural Review process to meet the

environmental protection goals and policies of Chapter 7. Chapters 71 and 72 of the Tualatin Development Code address any Wetland Protection Districts and Natural Resource Overlay Districts. Any development will be reviewed under the Architectural Review (AR) process to ensure that new construction would be consistent with these requirements.

Chapter 10 – Land Use Designations and Zoning:
Planning District Objectives

RESIDENTIAL PLANNING DISTRICTS:
Medium Low Density Residential Planning District (RML)
This district supports household living uses with a variety of housing types at moderately low densities. This district is primarily oriented toward middle housing types including attached dwellings, multi-family development, and manufactured dwelling parks.

High Density Residential/High-Rise Planning District (RH-HR)
This district supports a wide range of housing types at the greatest density of household living in areas with the greatest access to amenities.

OTHER PLANNING DISTRICTS:
Institutional Planning District (IN)
The purpose of this district is to provide an environment exclusively for, and conducive to, the development and operation of religious institutions, schools, public parks, and related uses, in a manner that is harmonious with adjacent and nearby residential, commercial, or manufacturing planning districts and uses.
The district is intended to accommodate large-scale campus-style developments, owned and operated by governmental or nonprofit entities, consisting of multiple structures or facilities, which may serve multiple purposes and provide multiple services to the community.
Permitted and conditional uses shall be developed and operated in a manner that promotes and protects the health, safety, and general welfare of all adjacent and nearby planning districts and uses. Additionally, conditional uses shall be allowed provided that the use is developed and operated in a manner that is consistent with the intent of the planning district, and that promotes and protects the health, safety, and general welfare of all adjacent and nearby planning districts and uses.
The district may be applied to land that is able to accommodate large-scale campus-style development and operation of religious institutions, schools, public parks, and related uses, as follows:
- **Contiguous land one and one-half acre in size or greater;**
- **Access to a collector or arterial street;**
- **Adequate public facilities are available to the property.**

Finding:
Plan Map Amendment: *The proposed amendment would rezone the subject site to High Density High Rise (RH-HR) from the current zoning of Institutional (IN) and Medium Low Density Residential (RML). On page 14 of the narrative, the applicant stated the removal of the ±8.2-acres of Institutional land will not compromise the ability of the Horizon Church and School to optimize the use of their land and the services they provide. The applicant cited the 2019 Housing Needs Analysis and Economic Opportunities Analysis which identified the surplus of existing RML and IN zoning in the City of Tualatin. The applicant's narrative also provided additional background information regarding the subject site. Prior to annexation to the City of Tualatin, Washington County approved a Master Plan in 2006 for the church and school property. The church has determined that their needs and the realization of the Master Plan can be met on a more*

compact portion of their property. This provides the opportunity to rezone and develop the remainder of the property with multifamily housing. The proposed plan map amendment would change the zoning designation of the subject site from Medium Low Density Residential (RML) and Institutional (IN) to High Density High Rise (RH-HR). This change would allow a maximum of 30 units per acre for household living uses. Tualatin's 2019 Housing Needs Analysis identified a deficit of land zoned RH-HR as opposed to a surplus of land zoned RML and IN.

The High Density High Rise planning district is intended to support a wide range of housing types at the greatest density of household living in areas with the greatest access to amenities. The Comprehensive Plan does not define what qualifies as an amenity. The subject site is located near a variety of existing schools and other institutional uses, the site of a future City park, future employment opportunities in the Basalt Creek Planning Area and Trimet bus route 96 that runs along SW Boones Ferry Road.

On April 20, 2023, the Tualatin Planning Commission voted 5-1 to recommend denial of both the plan text and plan map amendments to the City Council. The Planning Commission found that the proposed text and map amendments would not be consistent with the objectives of Comprehensive Plan Chapter 10 for the High Density High Rise Planning District. The Planning Commission found the location of the proposed plan map amendment was not in a location to support housing at the greatest density of household living with the greatest access to amenities.

***Plan Text Amendment:** The proposed text amendment would remove the zoning district locational language from the purpose statement of Chapter 44 of the Tualatin Development Code. The existence of the locational language does not allow the RH-HR zoning to be permitted in a location that is considered buildable. The text amendment would allow RH-HR to be permitted on other properties with access to facilities, services, and without the constraints of the wetlands, floodplains and lack of public access.*

E: Tualatin Development Code

Chapter 32: Procedures

TDC 32.010. - Purpose and Applicability.

(2) Applicability of Review Procedures. All land use and development permit applications and decisions, will be made by using the procedures contained in this Chapter. The procedure "type" assigned to each application governs the decision-making process for that permit or application. There are five types of permit/application procedures as described in subsections (a) through (e) below. Table 32-1 lists the City's land use and development applications and corresponding review procedure(s).

> **(d)Type IV-A Procedure (Quasi-Judicial Review—City Council Public Hearing). Type IV-A procedure is used when the standards and criteria require discretion, interpretation, or policy or legal judgment and is the procedure used for site-specific land use actions initiated by an applicant. Type IV-A decisions are made by the City Council and require public notice and a public hearing. Appeals of Type IV-A decisions are heard by the Land Use Board of Appeals (LUBA).**

(3) Determination of Review Type. Unless specified in Table 32-1, the City Manager will determine whether a permit or application is processed as Type I, II, III, IV-A or IV-B based on the descriptions above. Questions regarding the appropriate procedure will be resolved in favor of the review type providing the widest notice and opportunity to participate. An applicant may choose to elevate a Type I or II application to a higher numbered review type, provided the applicant pays the appropriate fee for the selected review type.

Table 32-1—Applications Types and Review Procedures

Application/Action	Procedure Type	Decision Body*	Appeal Body*	Pre-Application Conference Required	Neighborhood/ Developer Mtg Required	Applicable Code Chapter
Plan Amendments						
• Map or Text Amendments for a specific property	IV-A	CC	LUBA	Yes	Yes	TDC 33.070

*** City Council (CC); Planning Commission (PC); Architectural Review Board (ARB); City Manager or designee (CM); Land Use Board of Appeals (LUBA).**

Finding:

The proposed plan map and plan text amendment applications are subject to the Type IV-A procedures according to Table 32-1. Both applications have been processed according to the applicable code for Type IV-A procedures. Any future development or construction will be reviewed under a separate land use application.

TDC 32.030. - Time to Process Applications.

(1)Time Limit—120-day Rule. The City must take final action on all Type II, Type III, and Type IV-A land use applications, as provided by ORS 227.178, including resolution of all local appeals, within 120 days after the application has been deemed complete under TDC 32.160, unless the applicant provides written request or consent to an extension in compliance with ORS 227.178. (Note: The 120-day rule does not apply to Type IV-B (Legislative Land Use) decisions.)

(3)Time Periods. "Days" means calendar days unless otherwise specified. In computing time periods prescribed or allowed by this Chapter, the day of the act or event from which the designated period of time begins is not included. The last day of the period is included, unless it is a Saturday, Sunday, or a legal holiday, in which case the period runs until the end of the next day that is not on a weekend or City recognized legal holiday.

Finding:

The proposed plan map amendment and plan text amendments are an amendment to the City's Comprehensive Plan and Tualatin Development Code, the 120-day rule portion of ORS 227.178 is not applicable.

TDC 32.110. - Pre-Application Conference.

(1) Purpose of Pre-Application Conferences. Pre-application conferences are intended to familiarize applicants with the requirements of the TDC; to provide applicants with an opportunity discuss proposed projects in detail with City staff; and to identify approval criteria, standards, and procedures prior to filing a land use application. The pre-application conference is intended to be a tool to assist applicants in navigating the land use process, but is not intended to be an exhaustive review that identifies or resolves all potential issues, and does not bind or preclude the City from enforcing any applicable regulations or from applying regulations in a manner differently than may have been indicated at the time of the pre-application conference.

(2) When Mandatory. Pre-application conferences are mandatory for all land use actions identified as requiring a pre-application conference in Table 32-1. An applicant may voluntarily request a pre-application conference for any land use action even if it is not required.

(3) Timing of Pre-Application Conference. A pre-application conference must be held with City staff before an applicant submits an application and before an applicant conducts a Neighborhood/Developer meeting.

(4) Application Requirements for Pre-Application Conference.

(a) Application Form. Pre-application conference requests must be made on forms provided by the City Manager.

[…]

Finding:

A Pre-Application meeting is mandatory for plan map and text amendment applications. The applicant participated in a Pre-Application meeting on July 13, 2022, and submitted their application approximately six months later on January 11, 2023.

TDC 32.120. - Neighborhood/Developer Meetings.

(1) Purpose. The purpose of this meeting is to provide a means for the applicant and surrounding property owners to meet to review a development proposal and identify issues regarding the proposal so they can be considered prior to the application submittal. The meeting is intended to allow the developer and neighbors to share information and concerns regarding the project. The applicant may

consider whether to incorporate solutions to these issues prior to application submittal.
(2) When Mandatory. Neighborhood/developer meetings are mandatory for all land use actions identified in Table 32-1 as requiring a neighborhood/developer meeting. An applicant may voluntarily conduct a neighborhood/developer meeting even if it is not required and may conduct more than one neighborhood/developer meeting at their election.
(3) Timing. A neighborhood/developer meeting must be held after a pre-application meeting with City staff, but before submittal of an application.
(4) Time and Location. Required neighborhood/developer meetings must be held within the city limits of the City of Tualatin at the following times:
(a) If scheduled on a weekday, the meeting must begin no earlier than 6:00 p.m.
(b) If scheduled on a weekend, the meeting must begin between 10:00 a.m. and 6:00 p.m.
(5) Notice Requirements.
(a) The applicant must provide notice of the meeting at least 14 calendar days and no more than 28 calendar days before the meeting. The notice must be by first class mail providing the date, time, and location of the meeting, as well as a brief description of the proposal and its location. The applicant must keep a copy of the notice to be submitted with their land use application.
(b) The applicant must mail notice of a neighborhood/developer meeting to the following persons:
(i) All property owners within 1,000 feet measured from the boundaries of the subject property;
(ii) All property owners within a platted residential subdivision that is located within 1,000 feet of the boundaries of the subject property. The notice area includes the entire subdivision and not just those lots within 1,000 feet. If the residential subdivision is one of two or more individually platted phases sharing a single subdivision name, the notice area need not include the additional phases; and
(iii) All designated representatives of recognized Citizen Involvement Organizations as established in TMC Chapter 11-9.
(c) The City will provide the applicant with labels for mailing for a fee.
(d) Failure of a property owner to receive notice does not invalidate the neighborhood/developer meeting proceedings.
(6) Neighborhood/Developer Sign Posting Requirements. The applicant must provide and post on the subject property, at least 14 calendar days before the meeting. The sign must conform to the design and placement standards established by the City for signs notifying the public of land use actions in TDC 32.150.
(7)Neighborhood/Developer Meeting Requirements. The applicant must have a sign-in sheet for all attendees to provide their name, address, telephone number, and email address and keep a copy of the sign-in sheet to provide with their land use application. The applicant must prepare meeting notes identifying the persons attending, those commenting and the substance of the comments expressed, and the major points that were discussed. The applicant must keep a copy of the meeting notes for submittal with their land use application.

Finding:
The applicant provided evidence that a Neighborhood/Developer Meeting was held on October 25, 2022 that discussed the proposed plan map and plan text amendments. The applicant provided documentation of sign posting and notification in compliance with Section 32.120 in Exhibit J.

Section 32.130 – Initiation of Applications.

(1) Type I, Type II, Type III, and Type IV-A Applications. Type I, Type II, Type III, and Type IV-A applications may be submitted by one or more of the following persons:

(a) The owner of the subject property;

(b) The contract purchaser of the subject property, when the application is accompanied by proof of the purchaser's status as such and by the seller's written consent;

(c) A lessee in possession of the property, when the application is accompanied by the owners' written consent; or

(d) The agent of any of the foregoing, when the application is duly authorized in writing by a person authorized to submit an application by paragraphs (a), (b) or (c) of this subsection, and accompanied by proof of the agent's authority.

[…]

Finding:

The applicant has provided a title report, included as Exhibit J, showing Horizon Community Church and 9300 SW Norwood Road OR LLC to be the current owners of the subject site. The applications have been submitted by the property owners and contract purchasers of all properties affected by the proposed plan map and text amendments.

Section 32.140 – Application Submittal.

(1) Submittal Requirements. Land use applications must be submitted on forms provided by the City. A land use application may not be accepted in partial submittals. All information supplied on the application form and accompanying the application must be complete and correct as to the applicable facts. Unless otherwise specified, all of the following must be submitted to initiate completeness review under TDC 32.160:

(a) A completed application form. The application form must contain, at a minimum, the following information:

(i) The names and addresses of the applicant(s), the owner(s) of the subject property, and any authorized representative(s) thereof;

(ii) The address or location of the subject property and its assessor's map and tax lot number;

(iii) The size of the subject property;

(iv) The comprehensive plan designation and zoning of the subject property;

(v) The type of application(s);

(vi) A brief description of the proposal; and

(vii) Signatures of the applicant(s), owner(s) of the subject property, and/or the duly authorized representative(s) thereof authorizing the filing of the application(s).

(b) A written statement addressing each applicable approval criterion and standard;

(c) Any additional information required under the TDC for the specific land use action sought;

(d) Payment of the applicable application fee(s) pursuant to the most recently adopted fee schedule;

(e) Recorded deed/land sales contract with legal description.

(f) A preliminary title report or other proof of ownership.

(g) For those applications requiring a neighborhood/developer meeting:

(i) The mailing list for the notice;

(ii) A copy of the notice;

(iii) An affidavit of the mailing and posting;

(iv) The original sign-in sheet of participants; and

(v) The meeting notes described in TDC 32.120(7).

(h) A statement as to whether any City-recognized Citizen Involvement Organizations (CIOs) whose boundaries include, or are adjacent to, the subject property were contacted in advance of filing the application and, if so, a summary of the contact. The summary must include the date when contact was made, the form of the contact and who it was with (e.g. phone conversation with neighborhood association chairperson, meeting with land use committee, presentation at neighborhood association meeting), and the result;

(i) Any additional information, as determined by the City Manager, that may be required by another provision, or for any other permit elsewhere, in the TDC, and any other information that may be required to adequately review and analyze the proposed development plan as to its conformance to the applicable criteria;

(2) Application Intake. Each application, when received, must be date-stamped with the date the application was received by the City, and designated with a receipt number and a notation of the staff person who received the application.

(3) Administrative Standards for Applications. The City Manager is authorized to establish administrative standards for application forms and submittals, including but not limited to plan details, information detail and specificity, number of copies, scale, and the form of submittal

Finding:

The applicant submitted an application for PMA23-0001 and PTA23-0001 on January 11, 2023. The application was deemed complete on February 10, 2023. The general land use submittal requirements were included with the application.

Section 32.150 - Sign Posting.

(1) When Signs Posted. Signs in conformance with these standards must be posted as follows:

(a) Signs providing notice of an upcoming neighborhood/developer meeting must be posted prior to a required neighborhood/developer meeting in accordance with Section 32.120(6); and

(b) Signs providing notice of a pending land use application must be posted after land use application has been submitted for Type II, III and IV-A applications.

(2) Sign Design Requirements. The applicant must provide and post a sign(s) that conforms to the following standards:

(a) Waterproof sign materials;

(b) Sign face must be no less than eighteen (18) inches by twenty-four (24) inches (18" x 24"); and

(c) Sign text must be at least two (2) inch font.

(3) On-site Placement. The applicant must place one sign on their property along each public street frontage of the subject property. (Example: If a property adjoins four public streets, the applicant must place a sign at each of those public street frontages for a total of four signs). The applicant cannot place the sign within public right of way.

(4) Removal. If a sign providing notice of a pending land use application disappears prior to the final decision date of the subject land use application, the applicant must replace the sign within fortyeight (48) hours of discovery of the disappearance or of receipt of notice from the City of its disappearance, whichever occurs first. The applicant must remove the sign no later than fourteen (14) days after:

(a) The meeting date, in the case of signs providing notice of an upcoming neighborhood/developer meeting; or

(b) The City makes a final decision on the subject land use application, in the case of signs providing notice of a pending land use application.

Finding:
The applicant provided certification, included as Exhibit J, that signs for the plan map and text amendment applications in conformance with Section 32.150 were placed on site.

Section 32.160 – Completeness Review.
(1) Duration. Except as otherwise provided under ORS 227.178, the City Manager must review an application for completeness within 30 days of its receipt.
(2) Considerations. Determination of completeness will be based upon receipt of the information required under TDC 32.140 and will not be based on opinions as to quality or accuracy. Applications that do not respond to relevant code requirements or standards can be deemed incomplete. A determination that an application is complete indicates only that the application is ready for review on its merits, not that the City will make a favorable decision on the application.
(3) Complete Applications. If an application is determined to be complete, review of the application will commence.
(4) Incomplete Applications. If an application is determined to be incomplete, the City Manager must provide written notice to the applicant identifying the specific information that is missing and allowing the applicant the opportunity to submit the missing information. An application which has been determined to be incomplete must be deemed complete for purposes of this section upon receipt of:
(a) All of the missing information;
(b) Some of the missing information and written notice from the applicant that no other information will be provided; or
(c) Written notice from the applicant that none of the missing information will be provided.
(5) Vesting. If an application was complete at the time it was first submitted, or if the applicant submits additional required information within 180 days of the date the application was first submitted, approval or denial of the application must be based upon the standards and criteria that were in effect at the time the application was first submitted.
(6) Void Applications. An application is void if the application has been on file with the City for more than 180 days and the applicant has not provided the missing information or otherwise responded, as provided in subsection (4) of this section.
[…]

Finding:
The applicant submitted an application for PMA23-0001 and PTA 23-0001 on January 11, 2023. The applications were deemed complete on February 10, 2023.

TDC 32.240. - Type IV-A Procedure (Quasi-Judicial Review—City Council Public Hearing).
Type IV-A decisions are quasi-judicial decisions made by the City Council after a public hearing. A hearing under these procedures provides a forum to apply standards to a specific set of facts to determine whether the facts conform to the applicable criteria and the resulting determination will directly affect only a small number of identifiable persons. Except as otherwise provided, the procedures set out in this section must be followed when the subject matter of the evidentiary hearing would result in a quasi-judicial decision. City Council decisions may be appealed to the state Land Use Board of Appeals pursuant to ORS 197.805—197.860.
(1) *Submittal Requirements.* Type IV-A applications must include the submittal information required by TDC 32.140(1).
(2) *Determination of Completeness.* After receiving an application for filing, the City Manager will review the application will for completeness in accordance with TDC 32.160.
(3) Written Notice of Public Hearing—Type IV-A. Once the application has been deemed complete, the

City must mail by regular first class mail Notice of a Public Hearing to the following individuals and agencies no fewer than 20 days before the hearing.

(a) Recipients:

(i) The applicant and, the owners of the subject property;

(ii) All property owners within 1,000 feet measured from the boundaries of the subject property;

(iii) All property owners within a platted residential subdivision that is located within 1,000 feet of the boundaries of the subject property. The notice area includes the entire subdivision and not just those lots within 1,000 feet. If the residential subdivision is one of two or more individually platted phases sharing a single subdivision name, the notice area need not include the additional phases;

(iv) All recognized neighborhood associations within 1,000 feet from the boundaries of the subject property;

(v) All designated representatives of recognized Citizen Involvement Organizations as established in TMC Chapter 11-9;

(vi) Any person who submits a written request to receive a notice;

(vii) Any governmental agency that is entitled to notice under an intergovernmental agreement entered into with the City and any other affected agencies, including but not limited to: school districts; fire district; where the project either adjoins or directly affects a state highway, the Oregon Department of Transportation; and where the project site would access a County road or otherwise be subject to review by the County, then the County; and Clean Water Services; Tri Met; and, ODOT Rail Division and the railroad company if a railroad-highway grade crossing provides or will provide the only access to the subject property. The failure of another agency to respond with written comments on a pending application does not invalidate an action or permit approval made by the City under this Code;

(viii) Utility companies (as applicable); and,

(ix) Members of the City Council.

(b) The Notice of a Public Hearing, at a minimum, must contain all of the following information:

(i) The names of the applicant(s), any representative(s) thereof, and the owner(s) of the subject property;

(ii) The street address if assigned, if no street address has been assigned then Township, Range, Section, Tax Lot or Tax Lot ID;

(iii) The type of application and a concise description of the nature of the land use action;

(iv) A list of the approval criteria by TDC section for the decision and other ordinances or regulations that apply to the application at issue;

(v)Brief summary of the local decision making process for the land use decision being made and a general explanation of the requirements for submission of testimony and the procedure for conduct of hearings;

(vi) The date, time and location of the hearing;

(vii) Disclosure statement indicating that if any person fails to address the relevant approval criteria with enough detail, he or she may not be able to appeal to the Land Use Board of Appeals on that issue, and that only comments on the relevant approval criteria are considered relevant evidence;

(viii) The name of a City representative to contact and the telephone number where additional information may be obtained;

(ix) Statement that the application and all documents and evidence submitted to the City are in the public record and available for review, and that copies can be obtained at a

reasonable cost from the City; and

(x) Statement that a copy of the staff report will be available for inspection at no cost at least seven days prior to the hearing and will be provided at reasonable cost.

(c) Failure of a person or agency to receive a notice, does not invalidate any proceeding in connection with the application, provided the City can demonstrate by affidavit that required notice was given.

(4) Additional Notice Requirements for Certain Type IV-A Application Types. The following additional notice requirements apply to Type IV-A Hearings where the City Council will be considering the application or removal of a Historic Landmark Designation or a Plan Text or Map Amendment for a particular property or discrete set of properties.

(a) The City Manager will notify in writing the Oregon Department of Land Conservation and Development (DLCD) in accordance with the minimum number of days required by ORS Chapter 197.

(b) At least 14 calendar days before the scheduled City Council public hearing date, public notice must be provided by publication in a newspaper of general circulation in the City.

(c) At least 14 calendar days before the scheduled City Council public hearing date, public notice must be posted in two public and conspicuous places within the City.

Finding:

The first evidentiary public hearing before the City Council will be held on May 22, 2023 and will follow the Quasi-Judicial review process. After submittal and completeness review as required by this section, a notice of public hearing for Type IV-A application for PMA23-0001 and PTA23-0001 was mailed by city staff on March 17, 2023, and contained the information required by this section, as attached in Exhibit N The Oregon Department of Land Conservation was notified prior to the 35-day notice period on March 20, 2023, attached in Exhibit N. Public notice has been provided in the Tualatin Times during the weeks of April 6, 2023 and April 13, 2023, attached in Exhibit N. Public notice was posted in two public places within the City on March 17, 2023, attached as Exhibit N. Public comments have been received and included in Exhibit R.

(5) Conduct of the Hearing—Type IV-A.

The Mayor (or Mayor Pro Tem) must follow the order of proceedings set forth below. These procedures are intended to provide all interested persons a reasonable opportunity to participate in the hearing process and to provide for a full and impartial hearing on the application before the body. Questions concerning the propriety or the conduct of a hearing will be addressed to the chair with a request for a ruling. Rulings from the Mayor must, to the extent possible, carry out the stated intention of these procedures. A ruling given by the Mayor on such question may be modified or reversed by a majority of those members of the decision body present and eligible to vote on the application before the body. The procedures to be followed by the Mayor in the conduct of the hearing are as follows:

(a) At the commencement of the hearing, the Mayor (or designee) must state to those in attendance all of the following information and instructions:

(i) The applicable approval criteria by Code Chapter that apply to the application;

(ii) Testimony and evidence must concern the approval criteria described in the staff report, or other criteria in the comprehensive plan or land use regulations that the person testifying believes to apply to the decision;

(iii) Failure to raise an issue with sufficient detail to give the City Council and the parties an opportunity to respond to the issue, may preclude appeal to the state Land Use Board of Appeals on that issue;

(iv) At the conclusion of the initial evidentiary hearing, the City Council must deliberate and make a decision based on the facts and arguments in the public record; and

(v) Any participant may ask the City Council for an opportunity to present additional relevant evidence or testimony that is within the scope of the hearing; if the City Council grants the request, it will schedule a date to continue the hearing as provided in TDC 32.240(5)(e), or leave the record open for additional written evidence or testimony as provided TDC 32.240(5)(f).

(b) The public is entitled to an impartial decision body as free from potential conflicts of interest and pre-hearing ex parte (outside the hearing) contacts as reasonably possible. Where questions related to ex parte contact are concerned, members of the City Council must follow the guidance for disclosure of ex parte contacts contained in ORS 227.180. Where a real conflict of interest arises, that member or members of the City Council must not participate in the hearing, except where state law provides otherwise. Where the appearance of a conflict of interest is likely, that member or members of the City Council must individually disclose their relationship to the applicant in the public hearing and state whether they are capable of rendering a fair and impartial decision. If they are unable to render a fair and impartial decision, they must be excused from the proceedings.

(c) Presenting and receiving evidence.

(i) The City Council may set reasonable time limits for oral presentations and may limit or exclude cumulative, repetitious, irrelevant, or personally derogatory testimony or evidence;

(ii) No oral testimony will be accepted after the close of the public hearing. Written testimony may be received after the close of the public hearing only as provided by this section; and

(iii) Members of the City Council may visit the property and the surrounding area, and may use information obtained during the site visit to support their decision, if the information relied upon is disclosed at the beginning of the hearing and an opportunity is provided to dispute the evidence.

(d) The City Council, in making its decision, must consider only facts and arguments in the public hearing record; except that it may take notice of facts not in the hearing record (e.g., local, state, or federal regulations; previous City decisions; case law; staff reports). Upon announcing its intention to take notice of such facts in its deliberations, it must allow persons who previously participated in the hearing to request the hearing record be reopened, as necessary, to present evidence concerning the newly presented facts.

(e) If the City Council decides to continue the hearing, the hearing must be continued to a date that is at least seven days after the date of the first evidentiary hearing (e.g., next regularly scheduled meeting). An opportunity must be provided at the continued hearing for persons to present and respond to new written evidence and oral testimony. If new written evidence is submitted at the continued hearing, any person may request, before the conclusion of the hearing, that the record be left open for at least seven days, so that he or she can submit additional written evidence or arguments in response to the new written evidence. In the interest of time, after the close of the hearing, the decision body may limit additional testimony to arguments and not accept additional evidence.

(f) If the City Council leaves the record open for additional written testimony, the record must be left open for at least seven days after the hearing. Any participant may ask the decision body in writing for an opportunity to respond to new evidence (i.e., information not disclosed during the public hearing) submitted when the record was left open. If such a request is filed, the decision body must reopen the record, as follows:

(i) When the record is reopened to admit new evidence or arguments (testimony), any person may raise new issues that relate to that new evidence or testimony;
(ii) An extension of the hearing or record granted pursuant to this section is subject to the limitations of TDC 32.030(1) (ORS 227.178—120-day rule), unless the applicant waives his or her right to a final decision being made within 120 days of filing a complete application; and
(iii) If requested by the applicant, the City Council must grant the applicant at least seven days after the record is closed to all other persons to submit final written arguments, but not evidence, provided the applicant may expressly waive this right.

(6) Notice of Adoption of a Type IV-A Decision. Notice of Adoption must be provided to the property owner, applicant, and any person who provided testimony at the hearing or in writing. The Type IV-A Notice of Adoption must contain all of the following information:

(a) A description of the applicant's proposal and the City's decision on the proposal, which may be a summary, provided it references the specifics of the proposal and conditions of approval in the public record;
(b) The address or other geographic description of the property proposed for development, including a map of the property in relation to the surrounding area;
(c) A statement a statement that a copy of the decision and complete case file, including findings, conclusions, and conditions of approval, if any, is available for review and how copies can be obtained;
(d) The date the decision becomes final; and
(e)The notice must include an explanation of rights to appeal a City Council decisions to the state Land Use Board of Appeals pursuant to ORS 197.805—197.860.

(7) Effective Date of a Type IV-A Decision.

(a) The written order is the final decision on the application.
(b) The date of the order is the date it is mailed by the Mayor (or designee) certifying its approval by the decision body.
(c) Appeal of a IV-A City Council decision is to the State Land Use Board of Appeals pursuant to ORS 197.805—197.860.

Finding:
The City Council hearing will be conducted according to these requirements. Notice of Adoption of a Type IV-A Decision and any appeal will follow the requirements of this section.

Chapter 33: Applications and Approval Criteria

Section 33.070 Plan Amendments

(1) Purpose. To establish a process for the review of proposed amendments to the Zone Standards of the Tualatin Development Code and to the Text or the Plan Map of the Tualatin Comprehensive Plan.

(2) Applicability. Quasi-judicial amendments may be initiated by the City Council, the City staff, or by a property owner or person authorized in writing by the property owner. Legislative amendments may only be initiated by the City Council.

(3) Procedure Type.

(a) Map or text amendment applications which are quasi-judicial in nature (e.g. for a specific property or a limited number of properties) is subject to Type IV-A Review in accordance with TDC Chapter 32.

(4) Specific Submittal Requirements. An application for a plan map or text amendment must comply with the general submittal requirements in TDC 32.140 (Application Submittal).

Finding:
The proposed plan map and text amendments are quasi-judicial in nature and has been processed according to the Type IV-A procedures discussed above.

(5) Approval Criteria.
(a) Granting the amendment is in the public interest.

Finding:
Plan Map Amendment: *Page 21 of the applicant's provided narrative stated the proposed map amendment serves the public interest by accommodating the housing, employment and transportation needs of the community as identified in the goals and policies of the Comprehensive Plan. The applicant cited the City's most recent Housing Needs Analysis (HNA) conducted in 2019 stating the lack of vacant units and continued demand for housing will drive the need to provide additional multifamily housing, which is expected to be 45% of Tualatin's future housing stock. Providing housing of various densities and levels of affordability are key housing needs addressed in Tualatin's HNA. From the HNA, the applicant cites that nearly 93% of the 23,800 people who work in Tualatin commute from outside of the city. A recommendation of the HNA was to provide housing closer to workplaces and thereby reducing transportation issues associated with long commutes. The submitted narrative references Tualatin's Basalt Creek Planning Area which is located near the subject site. The applicant stated the industrial lands and anticipated employment capacity would not be affected by the proposed zoning change from the current IN and RML zoning to RH-HR zoning, and that the plan map amendment would provide additional housing near the anticipated employment zone.*

The applicant provided information pertaining to utility and transportation infrastructure for the plan map and text amendments outlined in the Transportation Impact Analysis located in Exhibit D and the Utility Capacity Analysis located in Exhibit G. The applicant proposed the addition of a traffic signal at the SW Norwood Road and SW Boones Ferry Road intersection to mitigate existing traffic impacts and the future impact of development on the subject site. Transportation and utilities in relation to the proposed amendments are further addressed in Section B: Oregon Administrative Rules and TDC 33.070(5)(f)(h)(i).

The proposed plan map amendment would change the subject site zoning from Institutional (IN) and Medium Low Density Residential (RML) to High Density High Rise (RH-HR). The proposed map amendment could allow for the construction of up to 276 housing units on the ±9.2-acre site, and would provide additional multifamily housing opportunities near an anticipated employment zone.

Comprehensive Plan goals and policies serve as the adopted expression of the public interest. As identified in Section D, above, the applicant has provided evidence that the proposed Map Amendment would satisfy several existing Plan policies and goals, and therefore the change would be in the public interest. Although the record includes testimony (Exhibit R) indicating that the public interest would be served by denial of the Plan Map Amendment and/or that approval of the Plan Map Amendment would not be in the public interest, said testimony does not identify specific Comprehensive Plan goals and policies that would not be satisfied by the Amendment or would conflict with approval of the Amendment.

On April 20, 2023, the Tualatin Planning Commission voted 5-1 to recommend denial of both the plan text and plan map amendments to the City Council. The Tualatin Planning Commission consciously considered if granting the proposed amendments would be in the public interest. The Planning Commission found that the proposed text and map amendments would not be in the best interest of the public. The Planning Commission found the location of the proposed plan map amendment was not in a location to support

housing at the greatest density of household living with the greatest access to amenities.

Plan Text Amendment: *There are existing properties identified for RH-HR zoning on the City's Comprehensive Map. The current RH-HR area is generally located south of SW Tualatin Road and is constrained by public ownership, lack of direct public access and environmental factors such as the existing wetlands and floodplains. The HNA has considered the land to be unbuildable and is not considered available for additional housing. The proposed text amendment would remove the zoning district locational language from the purpose statement of Chapter 44 of the Tualatin Development Code. The existence of the locational language does not allow the RH-HR zoning to be permitted in a location that is considered buildable, and in effect precludes practical application of the RH-HR zone. The text amendment would allow RH-HR to be permitted on other properties with access to facilities, services, and without the constraints of the wetlands, floodplains and lack of public access.*

Public comments (Exhibit R) have been received in opposition amendments that noted concerns over the protection of public interest, none of said comments identify what Plan goals and policies would be inconsistent with removal of the locational criteria for the RH-HR zone.

(b) The public interest is best protected by granting the amendment at this time.

Finding:

Plan Map Amendment*: Page 22 of the narrative submitted by the applicant stated the public interest is best protected by granting the amendment at this time due to Tualatin having few vacant lands with the ability to provide housing at the needed density established by the 2019 Housing Needs Analysis (HNA). The narrative continued to reference the HNA by stating the City would be challenged over the next 20 years to provide housing of all types, including market-rate multi-family housing. The applicant mentioned that allowing for increased density through the plan map amendment could help alleviate households' cost burdens by providing opportunities to add dwelling units to the housing market. The proposed plan map amendment would change the subject site zoning from Institutional (IN) and Medium Low Density Residential (RML) to High Density High Rise (RH-HR). The applicant stated the conversion of IN land to residential zoning protects the public interest by preserving employment lands in commercial and industrial zoning areas. The narrative referenced the Tualatin Economic Opportunities Analysis (Exhibit Q) that was completed in 2019, which found there is low demand for land zoned IN in comparison to industrial, commercial, and residential zoning. The applicant went on to say, the City's HNA determined that the City has a 27-acre surplus of RML lands and a deficit of RH-HR lands. The conversion of RML lands to RH-HR specifically help address a previously identified, and thus already existing, deficient of land for needed housing. Despite the fact that there are other housing developments in various stages of approval and construction that will help meet the City's housing need, none are located or proposed to be located in the RH-RH zone. In addition, the applicant's proposal includes the installation of a traffic signal at SW Norwood Road and SW Boones Ferry Road.*

Plan Text Amendment*: The proposed text amendment intends to limit the height of future buildings on the subject site to four stories or 50 feet (Exhibit C). The applicant has also proposed a 60-foot landscape buffer along SW Norwood Rd for additional screening. The narrative stated this would protect the public interest by ensuring compatibility with the surrounding aesthetics of neighborhoods and existing nearby structures.*

Public comments (Exhibit R) have been received in opposition to the proposed plan map and text amendments that noted concerns over the protection of public interest, although they have not been identified with sufficient specificity to support a finding that this criterion is not met.

The removal of the locational restriction which in effect creates no developable lands zoned RH-HR is preexisting, and creates a deficit of lands identified in the HNA, which the proposed amendment would address.

(c) The proposed amendment is in conformity with the applicable objectives of the Tualatin Community Plan.

Finding:
As discussed above in Section D, the Plan Map amendment – application of the RH-HR zone to the subject property – has been identified by the applicant as being consistent with several existing goals and policies of the Comprehensive Plan. The Plan Map amendment also meets the same applicable goals and policies of the Plan in that it allows for the application of the RH-HR zone in a location that is considered buildable.

(d) The following factors were consciously considered:
(i) The various characteristics of the areas in the City;

Finding:
Plan Map Amendment: *Page 22 of the applicant's narrative addressed the various characteristics of the area of the subject property. The site is located near public transportation bus lines, future goods and services, and employment areas. The site is in an area of growth and in close proximity to the Basalt Creek Employment Area which is expected to provide up to 2,300 jobs in the next 16 years. The subject site location would provide housing opportunities closer to future local workplaces in the Basalt Creek area. The applicant stated the subject site would allow for the provision of housing in a relatively undeveloped greenfield area without the reduction of housing stock or displacement of current residents. The proposed plan map amendment is not in an area with known environmental constraints, and would not be in need of environmental protection. The applicant provided a Transportation Impact Analysis including a Transportation Planning Rule analysis attached in Exhibit D. The report found that a traffic signal at the intersection of SW Norwood Road and SW Boones Ferry Road would be necessary even without the proposed apartment project due to the current conditions. With the addition of the traffic signal, the proposed zoning could be accommodated by the surrounding transportation network and frontage improvements.*

The applicant provided a memorandum from Johnson Economics (Exhibit L) that stated the subject location is advantageous in terms of site size and configuration, transportation access, multi-family housing will be in demand and market feasible at this location. The memorandum continued to state buildable residential sites of this size, and roughly rectangular are rare not just locally but in much of the Metro area. This style of site is well suited for multi-family development, while low density development can more easily adjust to smaller and more irregular parcels. The Johnson Economics memorandum concluded the subject site and location are well-suited for multi-family housing, and the proposal is likely the "highest and best" economic use for a parcel of this size and configuration.

It is worth noting that the above criterion calls for the various characteristics of the areas in the City to be "consciously considered" but does not provide a standard by which an amendment should be approved or denied. However, the applicant has identified several characteristics of the area relative to the City's plans and goals for housing that it argues makes this location suitable for the type of housing that could be developed under the proposed amendment. Conversely, while there is public testimony that argues that the

location is unsuitable, there is not sufficient specificity of the identified factors so as to support a finding that the characteristics of the areas of the city were not considered.

Plan Text Amendment: *The proposed text amendment would allow the application of High Density High Rise (RH-HR) zone to an area that meets the above factors and is not in a floodplain. The proposed text amendment requests to limit the height of future buildings on the subject site to four stories or 50 feet (Exhibit C). The proposed height limitation would reduce the visual impacts and characteristics of the future site improvements in surrounding areas.*

(ii) The suitability of the areas for particular land uses and improvements in the areas;

Finding:

Plan Map Amendment: *Within the submitted narrative (Exhibit A), the applicant addressed the suitability of this particular geographic area on page 23 for the proposed land use which would be multi-family residential units. The applicant provided a Utility Capacity Analysis included as Exhibit G to address the proposed plan map amendment. The applicant noted nearby service and planned improvements to include water, sanitary sewer, stormwater, transportation and public transit. The services and improvements are reviewed in greater detail in Section 33.070(5)(i).*

Similar to the previous finding, it is worth noting that the above criterion calls for the suitability of the areas for particular land uses and improvements in the areas to be "consciously considered" but does not provide a standard by which an amendment should be approved or denied. However, the applicant has identified several characteristics of the area relative to the City's goals for land uses and public improvements that it argues makes this location suitable for the type of housing that could be developed under the proposed amendment. Conversely, while there is public testimony that argues that the location is unsuitable, there is not sufficient specificity of the identified factors so as to support a finding that the characteristics of the areas of the city were not considered.

Plan Text Amendment*: The proposed text amendment would allow the application of High Density High Rise (RH-HR) zone to an area that meets the above factors and is not in a floodplain. The locational factors of the current development code do not allow for a suitable area for RH-HR land uses. The proposed text amendment requests to limit the height of future buildings on the subject site to four stories or 50 feet (Exhibit C). The proposed height limitation would reduce the visual impacts and characteristics of the future site improvements in surrounding areas. The applicant provided a Utility Capacity Analysis included as Exhibit G to address the proposed plan text amendment. The applicant noted nearby service and planned improvements to include water, sanitary sewer, stormwater, transportation and public transit. The services and improvements are reviewed in greater detail in Section 33.070(5)(i).*

(iii) Trends in land improvement and development;

Finding:

Plan Map Amendment: *The applicant's narrative (Exhibit A) cited the City's Housing Needs Analysis identified need for diverse housing choices and additional multifamily dwelling units on page 24. The surrounding areas are also experiencing housing development. The Autumn Sunrise subdivision is under development to the east of the subject site. Plambeck Gardens Apartments has completed the land use process to construct a 116 unit multi-family development southwest of the subject site. The applicant supplied a memorandum from Johnson Economics (Exhibit L) that compared the proposed project to the*

recently approved Plambeck Gardens apartments. The memorandum stated the proposed multi-family development would be very similar in form and density to Plambeck Gardens which is located roughly 500 feet to the south of the site. The applicant stated the proposed plan map amendment would provide additional housing opportunities in an area of the City currently experiencing growth. The applicant cited the City's most recent Housing Needs Analysis (HNA) conducted in 2019 stating the lack of vacant units and continued demand for housing will drive the need to provide additional multifamily housing, which is expected to be 45% of Tualatin's future housing stock. Providing housing of various densities and levels of affordability are key housing needs addressed in Tualatin's HNA.

Plan Text Amendment: *The proposed text amendment would remove the zoning district locational language from the purpose statement of Chapter 44 of the Tualatin Development Code. The existence of the locational language does not allow the High Density High Rise (RH-HR) zoning to be permitted in a location that is considered buildable. The text amendment would allow RH-HR to be permitted on other properties with access to facilities, services, and without the constraints of the wetlands, floodplains and lack of public access.*

(iv) Property values;

Finding:
The applicant submitted a memorandum from Johnson Economics (Exhibit L) that stated the subject development is unlikely to have negative impacts on the property values of the surrounding properties. Page 9 of the memorandum also provided studies that have demonstrated that multifamily housing does not have an impact on the value of neighboring properties, and in many cases increased the value of adjacent homes.

Public comments (Exhibit R) have been received that note concerns over the property value of homes declining in the surrounding neighborhoods due to the proposed plan map and text amendments and future site development. Although property values were consciously considered, there is not sufficiently specific evidence that identifies material impact to property values from the proposed plan map and text amendments.

(v) The needs of economic enterprises and the future development of the area; needed right-of-way and access for and to particular sites in the area;

Finding:
Plan Map Amendment*: Page 25 of the submitted narrative stated that providing multifamily residential zoning in the proposed area relieves pressure to rezone other non-residential lands for the purpose of housing. The narrative added that an employment center with nearby residences could create an attractive environment for companies relocating to the Basalt Creek Planning Area. The subject site would be close to future employment centers and would provide the opportunity for employees to live nearer to their workplace. The applicant stated a future right-of-way dedication along SW Norwood Road would be provided to meet the short-term and long-term transportation improvement needs identified by the City and Washington County. Any future development would be reviewed through the Architectural Review process to address specific right-of-way and access needs for the site development.*

Plan Text Amendment: *The proposed text amendment would remove the zoning district locational language from the purpose statement of Chapter 44 of the Tualatin Development Code. The existence of the locational language does not allow the RH-HR zoning to be permitted in a location that is considered*

buildable. The text amendment would allow RH-HR to be permitted on other properties with access to facilities, services, and without the constraints of the wetlands, floodplains and lack of public access.

(vi) Natural resources of the City and the protection and conservation of said resources;
(vii) Prospective requirements for the development of natural resources in the City;

Finding:
There are no mapped natural resources on the site affected by the plan map and text amendment. No physical development is proposed with this application for the plan map and text amendment. The subject site would be further examined for natural resources with future development of the site. Future development of the site would need to comply with local, regional, state, and federal requirements for the protection of air, water, and land resources.

Public comments (Exhibit R) have been received in reference to the loss of trees along SW Norwood Road due to nearby development. Concerns have been raised regarding the habitats of local animals and birds. However, none of these features are listed as natural resources of the City.

(viii) The public need for healthful, safe, esthetic surroundings and conditions;

Finding:
Plan Map Amendment: *The proposed plan map amendment would change the subject site zoning and development standards from Institutional (IN) and Medium Low Density Residential (RML) to High Density High Rise (RH-HR). The proposed map amendment could allow for the construction of up to 276 housing units on the ±9.2-acre site. The applicant supplied a memorandum from Johnson Economics (Exhibit L) that stated the proposed multi-family development is compatible with neighboring uses. The memorandum provided the existing high school on the subject site produces traffic, noise, and other activity expected of an active daytime use. Multi-family development is often used as a buffer between active daytime uses, such as a school or commercial use, and neighboring low density residential. Multi-family zoning is a common "step down" land use between higher activity land uses, and low activity neighborhoods.*

The applicant provided an Arborist Report conducted by Todd Prager & Associates, LLC (Exhibit XXX) that concluded adjustments to the preliminary design for the Norwood Multi-Family project have maximized tree preservation near Norwood Road. The report started preserving the 60-foot-wide buffer of Douglas-fir south of Norwood Road is compatible with the proposed road improvements and site plan at this stage of the planning process. Construction impacts and tree preservation measures would be further reviewed through the Architectural Review process.

Plan Text Amendment: *The removal of the locational criteria by itself is not anticipated to have an impact on the elements listed above, considerations of these factors would be applicable on where to apply the zone. The applicant's text amendment proposal (Exhibit C) requests to revise the height limitation of development to four stories or 50 feet for future projects on the subject site. The applicant proposed a 60-foot buffer of vegetation to remain along SW Norwood Road to create a visual barrier to the site on page 4 of the narrative. The applicant stated these measures will make the future development of the site compatible with the existing neighborhoods.*

Public comments (Exhibit R) have been received that have concerns about higher crime rates around apartment developments. Comments have also been received that multi-story developments would

look out of place in the area. This criterion asks that the decision-maker "consciously consider" the public need for healthful, safe, esthetic surroundings and conditions but does not identify which could or would be sufficient to support a finding of denial; it is worth noting that application of future development standards would be applied to address these impacts.

(ix) Proof of change in a neighborhood or area, or a mistake in the Plan Text or Plan Map for the property under consideration are additional factors to consider.

Finding:
Page 26 of the applicant's narrative noted the Basalt Creek Planning Area south of SW Norwood Road is an area planned for future growth within the Cities of Tualatin and Wilsonville. The concept plan for the area includes lands planned for residential, neighborhood commercial, and industrial uses. Housing developments are underway on the Autumn Sunrise Subdivision located east of the subject site and the Plambeck Gardens Apartments located to the southwest of the subject site. The City of Tualatin has purchased ±14 acres of land in the vicinity of the project for the purpose of providing public parks. The parks are intended to provide amenities to existing and future residents in this area of the City. The applicant stated there was no mistake in the plan text or map for the property under consideration, however, the Housing Needs Analysis has identified that the City has a deficit of High Density High Rise (RH-HR) lands with no buildable acres available due to constraints.

(e) If the amendment involves residential uses, then the appropriate school district or districts must be able to reasonably accommodate additional residential capacity by means determined by any affected school district.

Finding:
The applicant provided comments from the Sherwood School District included as Exhibit J. Sherwood School District Chief Operations Officer, Jim Rose, provided confirmation that the school district could accommodate any additional students from the future multifamily development on the subject site.

The applicant provided an additional memorandum "Supplemental Information on School Capacity" dated April 19, 2023 found in Exhibit M. The memorandum stated, ORS 195.110 dictates the rules regarding school capacity. ORS 195.110(12) states that a development moratorium cannot be based on school capacity. Under ORS 195.110(13), a city can deny an application for residential development based on lack of school capacity if three requirements are met: 1) the issue is raised by the school district; 2) the lack of school capacity is based on a school facility plan formally adopted under the statute and incorporated in the comp plan; and 3) the city has considered options to address school capacity. The memorandum also stated, the Sherwood School District has not raised the issue of lack of school capacity. Additionally, the Sherwood School District has over 2,500 students, which means it qualifies as a "large school district." The City of Tualatin is therefore required to include as an element of its Comprehensive Plan a school facility plan per ORS 195.110(2). Tualatin does not have a school facility plan included within the Comprehensive Plan. Instead, there is a general policy related to coordination (see Policy 5.1.7). Therefore, pursuant to ORS 195.110(13), the City cannot deny the application based on lack of school capacity. TDC 33.070.5.e is not an independent basis for denial because it does not satisfy the standards in ORS 195.110.

City staff provided an email notice of public hearing and request for comment that was sent to the

Sherwood School District on March 17, 2023 included in Exhibit N. As of the date of writing this report, the City of Tualatin has not received any response from the school district.

Public comments (Exhibit R) have been received that express concerns of overcrowding in the surrounding Tigard-Tualatin Schools.

(f) Granting the amendment is consistent with the applicable State of Oregon Planning Goals and applicable Oregon Administrative Rules, including compliance with the Transportation Planning Rule TPR (OAR 660-012-0060).

Finding:

The applicant provided a review of Oregon's Transportation Planning Rule (TPR) (OAR 660-012-0060) and a trip generation analysis by Lancaster Mobley included in Exhibit D. This standard was previously addressed in Section B. Oregon Administrative Rules.

On behalf of the City of Tualatin, DKS Associates conducted a review of the applicant's Transportation Impact Analysis and Transportation Planning Rule analysis (Exhibit E). The development is proposed on existing Medium Low Density Residential (RML) and Institutional (IN) zoned land. The development proposes to change the zoning to High Density High Rise (RH-HR), a reasonable worst-case analysis must be performed to show no significant impact of the zone change per the Transportation Planning Rule. Operations analysis was performed for the existing and proposed zoning scenarios under year 2040 conditions. The study intersections generally performed slightly better in the AM peak hour and the same or slightly worse in the PM peak hour under the proposed zoning. Under both zoning scenarios the intersection of Boones Ferry Road/Norwood Road would fail without signalization. This triggers OAR 660-012-0060 section (1)(c)(C). With signalization the intersection performs at LOS B and v/c ratio 0.73 under the proposed zoning. Thus, with the proposed mitigation of signalization, the analysis concludes the significant effect due to the proposed zoning change is mitigated per OAR 660-012-0660(2)(d). The proposed mitigation of a signal at Boones Ferry Road/Norwood Road should include a separate striped westbound left turn lane for safety reasons, consistent with the functional classification. It is recommended the westbound left turn run on a separate phase to protect the pedestrians on the south crosswalk, which is directly adjacent to a transit stop. A leading pedestrian interval could also be used and a northbound right turn overlap could be implemented to shorten the right turn queue length.

The review from DKS Associates concluded that the benefit to the public of the proposed plan map amendment would be the requirement of the development to install a new traffic signal as mitigation at SW Norwood Rd and SW Boones Ferry Rd. The signal would decrease existing delays at the intersection and increase safety with the existing crash risks. The installation of the traffic signal would create a safer, protected crossing for pedestrians to access the nearby transit stop and the future proposed park to the west.

Public comments (Exhibit R) have been received that express concerns over the validity of the traffic studies and crash data. Comments have been received that say SW Norwood Road and SW Boones Ferry Road cannot handle additional traffic. Comments have been received that question the potential of individuals being able to turn left onto SW Norwood Road from the proposed development. Comments have stated that they believe people will cut through the existing neighborhoods to avoid traffic. Comments are concerned about traffic accidents in the area. Some comments express that the proposed traffic signal will not help the situation.

(g) Granting the amendment is consistent with the Metropolitan Service District's Urban Growth Management Functional Plan.

Finding:
The proposed amendment would not adversely impact the City's compliance with Titles 1-14 of the Metro Chapter 3.07, Urban Growth Management Functional Plan as discussed in Section C of these findings

(h) Granting the amendment is consistent with Level of Service F for the p.m. peak hour and E for the one-half hour before and after the p.m. peak hour for the Town Center 2040 Design Type (TDC Map 10-4), and E/E for the rest of the 2040 Design Types in the City's planning area.

Finding:
Plan Map Amendment: *The subject site is outside of the Town Center Design Type area. The applicant submitted a Transportation Planning Rule Review and a trip generation analysis provided in Exhibit D. The Level of Service in relation to the proposed changes is expected to meet the City standards. Operations analysis was performed for the existing and proposed zoning scenarios under year 2040 conditions. The study intersections generally performed slightly better in the AM peak hour and the same or slightly worse in the PM peak hour under the proposed zoning. Under both zoning scenarios the intersection of Boones Ferry Road/Norwood Road would fail without signalization. This triggers OAR 660-012-0060 section (1)(c)(C). With signalization the intersection performs at LOS B and v/c ratio 0.73 under the proposed zoning. Thus, with the proposed mitigation of signalization, the analysis concludes the significant effect due to the proposed zoning change is mitigated per OAR 660-012-0660(2)(d). The proposed plan map amendment and plan text amendment will not alter the transportation needs of the affected parcels in Tualatin's Transportation System Plan.*

Plan Text Amendment: *The criterion is not applicable to the proposed plan text amendment.*

Public comments (Exhibit R) have been received that express concerns over traffic increases and congestion as a result of the proposed plan map and text amendments. There is not specific evidence to indicate the overall level of service would be degraded as a result of the amendments.

(i) Granting the amendment is consistent with the objectives and policies regarding potable water, sanitary sewer, and surface water management pursuant to TDC 12.020, water management issues are adequately addressed during development or redevelopment anticipated to follow the granting of a plan amendment.
[…]

Finding:
The applicant submitted a Utility Capacity Analysis (Exhibit G) in response to the City's objectives and policies regarding potable water, sanitary sewer, and stormwater management.

Water: *Water service for the subject site will tie into existing public water mains within SW Norwood Road. Per the 9300 SW Norwood – Water System Capacity Analysis, dated September 11, 2022, from Brian Ginter, PE of Murraysmith, Inc. included as part of Exhibit H, "adequate water service for domestic use and fire suppression is available" for the proposed development.*

Sanitary Sewer: *An 8-inch gravity sanitary sewer line will be constructed north of the proposed site within the SW Norwood Road and SW Boones Ferry Road rights-of-way. This line is planned to lead to*

an existing sanitary sewer line within SW Boones Ferry Road north of its intersection with SW Norwood Road. Adequate capacity is available to serve the proposed increase in residential density

Stormwater: *A new connection to an existing stormwater main within SW Boones Ferry Road is planned. Using a combination of an existing on-site stormwater pond and new underground detention facilities, CWS water quality and hydromodification requirements can be met that ensure release rates for the site will be less than or equal to those currently observed.*

Chapter 41: Medium Low Density Residential Zone (RML)

Section 41.000 Purpose

The purpose of this zone is to provide household living uses with a variety of housing types at moderately low densities. This district is primarily oriented toward middle housing types including attached dwellings, multi-family development, and manufactured dwelling parks.

Finding:

In the submitted narrative, the applicant cited Tualatin's Housing Needs Analysis which identified a surplus of 27-acres of Medium Low Density Residential (RML) designated land.

Plan Map Amendment: *The proposed plan map amendment would reduce the quantity of RML lands by approximately one acre.*

Plan Text Amendment: *The proposed text amendment does not reference or affect the RML district.*

Chapter 44: High Density High Rise Zone (RH-HR)

Section 44.100 Purpose.

The purpose of the High Density High Rise (RH-HR) zone is to provide areas of the City within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club that are suitable for high density apartment or condominium towers.

Finding:

The purpose statement of the High Density High Rise (RH-HR) zoning district restricts the zoning designation to Tualatin's Central Urban Renewal Area.

Plan Map Amendment: *The proposed text amendment would be applicable to the ±9.2-acre site that is currently zoned Medium Low Density Residential (RML) and Institutional (IN). The applicant has identified a surplus of both of these zoning types in Tualatin's Housing Needs Analysis (HNA) and Economic Opportunities Analysis, while there is an existing deficient in buildable RH-HR lands.*

Plan Text Amendment*: The draft plan text amendment language is included in Exhibit C. The proposed text amendment would remove the locational restrictions from the purpose statement, as well as, the statement to only provide residences in "towers". The proposed plan text amendment would impose a four story or 50 foot height limitation for the area south of SW Norwood Road, which is applicable to the subject site. The existence of the locational language does not allow the RH-HR zoning to be permitted in a location that is considered buildable. The text amendment would allow RH-HR to be permitted on other properties with access to facilities, services, and without the constraints of the wetlands, floodplains and lack of public access.*

Section 44.300 Development Standards.

Development standards in the RH-HR zone are listed in Table 44-3. Additional standards may apply to some uses and situations, see TDC 44.310.

Table 44-3
Development Standards in the RH-HR Zone

STANDARD	REQUIREMENT	LIMITATIONS AND CODE REFERENCES
MAXIMUM DENSITY		
Household Living Uses	Maximum: 30 units per acre Minimum: 26 units per acre	
Retirement Housing or Congregate Care Facility	45 units per acre	
Nursing Facility	45 units per acre	
Group Living Uses	30 units per acre	Does not apply to Nursing Facility or Congregate Care Facility.
MINIMUM LOT SIZE		
Multi-Family Structure		
• Development on Less than One Acre	10,000 square feet	For up to two units, plus an additional 1,198 square feet for each unit exceeding two.
• Development on More than One Acre	1,452 square feet per unit	
Multi-Family Structure under Condominium Ownership	20,000 square feet	Limited to the primary condominium lot.
All Other Permitted Uses	10,000 square feet	
Conditional Uses	20,000 square feet	
Infrastructure and Utilities Uses	—	As determined through the Subdivision, Partition, or Lot Line Adjustment process.
MINIMUM AVERAGE LOT WIDTH		
Townhouses (Rowhouses)	14 feet	
Multi-Family Structure	75 feet	May be 40 feet on a cul-de-sac street.
Multi-Family Structure under Condominium Ownership	75 feet	Limited to the primary condominium lot. Minimum lot width at street is 40 feet.
All Other Permitted Uses	75 feet	
Conditional Uses	100 feet	Minimum lot width at street is 40 feet.
Flag Lots	—	Must be sufficient to comply with minimum access requirements of TDC 73C.
MINIMUM SETBACKS		
Front Setback		Minimum setback to a garage door must be 20 feet.
• 1 story structure	20 feet	
• 1.5 story structure	25 feet	
• 2 story structure	30 feet	
• 2.5 story structure	35 feet	
• Over 2.5 story structure	—	As determined through Architectural Review process. No setback must be required which is greater than the height of the structure.
Side and Rear Setback		Where living spaces face a side yard, the minimum setback must be 10 feet.

• 1 story structure	5 feet	
• 1.5 story structure	7 feet	
• 2 story structure	10 feet	
• 2.5 story structure	12 feet	
• Over 2.5 story structure	—	As determined through Architectural Review process. No setback must be required which is greater than the height of the structure.
Corner Lots	—	On corner lots, the setback is the same as the front yard setback on any side facing a street other than an alley.
Minimum Distance Between Buildings within One Development	10 feet	
Parking and Vehicle Circulation Areas	10 feet	
Conditional Uses	—	As determined through Architectural Review process. No minimum setback must be greater than 50 feet.
Any Yard Adjacent to a Wetland Protected Area	100 feet	As defined in TDC Chapter 71.
Any Yard Area Adjacent to Basalt Creek Parkway	50 feet	
STRUCTURE HEIGHT		
Minimum Height, Multi-Family and Condominium Developments	4 stories	
Maximum Height	64 feet	If structure does not include underground parking, maximum height is 5 stories. If the first story includes underground parking, maximum height is 6 stories. Regardless of the number of stories, structure height must not exceed 64 feet.

Finding:

Plan Map Amendment: *The proposed text amendment would be applicable to the ±9.2-acre site that is currently zoned Medium Low Density Residential (RML) and Institutional (IN). The applicant has identified a surplus of both of these zoning types in Tualatin's Housing Needs Analysis (HNA) and Economic Opportunities Analysis, while there is an existing deficient in buildable RH-HR lands.*

Plan Text Amendment: *The proposed text amendment would modify the development standards of TDC 44.300 to place a 4-story height limitation or 50-foot maximum on structures in the High Density High Rise (RH-HR) zoning district in areas south of SW Norwood Road. The described area would be applicable to the subject site. Due to the development constraints of the areas currently zoned RH-HR that are available within the City's core areas, properties that may be designated for this zoning may be proximate to lower density zoning. The subject site is generally surrounded by Medium Low Density Residential (RML) and Institutional (IN) uses. The proposed plan text amendment would limit the height of buildings to four stories or 50 feet to remain compatible with the adjacent residential and*

institutional uses.

PLAN AMENDMENTS

Plan Map Amendments provide for the review of proposed amendments to the standards of the Community Plan Map of the Tualatin Community Plan as described in TDC 33.070.

Plan Text Amendments provide for the review of proposed amendments to the standards of the Tualatin Development Code as described in TDC 33.070.

PROCEDURE Amendments to the Zone Standards of the Tualatin Development Code and to the Plan Text or the Plan Map of Tualatin Comprehensive Plan are a Type IV-A quasi-judicial decision made by Tualatin City Council after a public hearing and a recommendation from the Tualatin Planning Commission.

PRIOR TO APPLICATION SUBMITTAL

- ✔ Attend a Pre-Application Meeting (TDC 32.110)
- ✔ Notice and host a Neighborhood/Developer Meeting (TDC 32.120)

Following submittal of the application, the applicant must post a sign on the subject property to provide notice of the pending land use application.

SUBMITTAL REQUIREMENTS

Please submit all materials electronically through the following link: https://permits.ci.tualatin.or.us/eTrakit/
Details regarding submittal requirements are listed in TDC 32.140(1) and 33.070.

GENERAL:
- ✔ Land Use Application
- ✔ Narrative addressing all criteria
- ✔ Title Report
- ✔ Fee

PUBLIC NOTICE:
- ✔ Documentation for Neighborhood Developer Meeting, including notice and mailing list, affidavit of mailing notice, certification of sign posting, participant sign in sheet and meeting notes
- ☐ Certification of Sign Posting for Pending Land Use Application — To be provided after submittal.

ADDITIONAL DOCUMENTS AS APPLICABLE, SUCH AS:
- ✔ Transportation Impact Analysis
- ✔ Transportation Planning Rule (TPR) Analysis
- ✔ School District Approval

APPROVAL CRITERIA

The applicant's plans and narrative must work together to demonstrate that all applicable criteria are met.

Tualatin Development Code:
- Chapter 33.070 Plan Amendments
- Applicable sections of the Tualatin Community Plan (Chapters 1-30)

Proposed Land Use District:	High-Density High-Rise Residential (RH-HR)

I. Executive Summary

Vista Residential Partners (Applicant) is pleased to submit this plan map and text amendment application to the City of Tualatin. Horizon Community Church is selling a portion of their property south of SW Norwood Road and east of SW Boones Ferry Road. This plan map and text amendment will change the zoning of this land (as well as an adjacent one acre of land) to allow an apartment use and limit the height of the future buildings to 4 stories. The site is currently zoned Institutional (IN) and Medium-Low Density Residential (RML). A portion of the subject site is within the Basalt Creek Planning Area which has been the focus of years of planning effort between the City of Tualatin, the City of Wilsonville, Washington County, and Metro and is currently under various stages of development.

Housing Need

There is a well-known need for housing within the City of Tualatin, as well as within the region and state. As part of *Tualatin 2040* (a visioning process the City underwent in 2019 to identify updates needed to the City's Comprehensive Plan and Development Code), stakeholders identified housing affordability and the need for a wider variety of housing types (other than single-family homes) as two of the highest policy priorities. The City produced a *Housing Needs Analysis* (HNA), and *Housing Production Strategy* (HPS) to support the Tualatin 2040 project. The HNA evaluated and recommended various ways to meet the overall housing need within the City, recognizing the extent of the housing crisis and the need for a multi-faceted approach to find solutions. The HPS built on the HNA recommendations and established goals and strategic actions related to the identified housing needs in the City.

The City's Housing Needs Analysis states that Tualatin's housing market is strongly impacted by the regional housing market and nearly 93% of the 23,800 people who work in Tualatin commute from outside of the city. The US Census Bureau's 2021 American Community Survey estimates that ±43.1 percent of those employed in Tualatin spend greater than 30 minutes traveling to work. Allowing additional housing opportunities to be constructed near these centers of employment would allow more people to live near their work and reduce the number and length of time vehicles were on the road. The lack of vacant units and continued demand for housing drives the need to provide additional multifamily housing, which is expected to be 45% of Tualatin's future housing stock.

The analysis also determined that Tualatin is challenged to provide new multifamily housing over the next 20 years due to limited land supply of appropriately zoned property. In order to solve this problem, the HNA and HPS recommendations include:

- looking for opportunities to add residentially zoned land for multifamily development,
- adding density to existing residentially zoned land,
- accommodating a higher percentage of apartment units in the City than has historically been built, and
- locating housing near employment centers.

Approval of this map and text amendment application will implement the Tualatin 2040 policies and the specific HNA and HPS recommendations above. This application will allow apartments to be built on a site that currently only allows institutional uses (churches or recreational uses) and detached or attached homes and is located in an area of the City slated for future growth including a significant employment district.

Multifamily Land Deficit

The HNA outlines the numbers and types of housing units Tualatin should plan for within the 20-year planning period. This analysis found that Tualatin has a deficit of lands available for higher density multifamily housing and will need to provide a greater number of multifamily homes. As further discussed on page 28 of this narrative, the City of Tualatin currently has no buildable acres of High-Density High-Rise Residential (RH-HR) and a deficit of 4 acres was identified. Medium Low-Density (RML) zoning, by contrast, has a land surplus of 27 acres within the City. Lower density zoning with capacity does not have the potential to provide the same types of multifamily housing opportunities as higher density zoning districts where those uses are permitted.

Simply stated, rezoning lower density land as RH-HR is a solution to the City's housing deficit that the City has adopted as part of the HNA. One challenge with using the RH-HR zone to partially address the City's housing deficit is the current text of the RH-HR zoning district restricts the possibility of providing higher density housing within the City of Tualatin by confining the location of RH-HR zoning to a specific area of the City – one which has already been identified as having no significant buildable acreage. The text amendment portion of this application seeks to remove the locational restriction from the text of the RH-HR zoning district, allowing the City to meet the specific goals and recommendations of its adopted plans.

The HNA also states that over half of renter households in the City are cost burdened and that the City will be challenged over the next 20 years to provide housing of all types, including market-rate multifamily housing. Allowing for increased density can help alleviate households' cost burdens by providing opportunities to add dwelling units to the housing market. This application provides additional land for future apartments and fulfills a need identified in the HNA to help alleviate households' cost burden.

Current market information for the Sherwood/Tualatin area, included as Exhibit J to this application package, supports the conclusions found by the Housing Needs Analysis. The current multifamily market within Tualatin has experienced a 70 percent increase in rent in the past decade. Conversely, rents within the Metro area had a cumulative increase of only 48.7 percent in the past decade. Tualatin rents increased 6.2 percent over the past year. The number of units to be built in the foreseeable future are forecast to have little effect on these overall trends, with Commons on the Tualatin expected to deliver ±260 units in 2023 and those units expected to be absorbed within the year. Tualatin also sees ±8.75 percent higher average rents than the average rents within the Portland Metro area. The Plambeck Garden Apartment project, an affordable housing development approved in 2022 south of the site along SW Boones Ferry Road, will provide essential affordable housing to the neighborhood. Allowing market rate apartments at this SW Norwood Road site will further fill a need within the City to provide additional housing stock that fits between income restricted affordable housing and single family homes.

This site is appropriate for a multifamily use with easy access to higher classified streets (SW Norwood Road, a Major Collector, and SW Boones Ferry Road, a Major Arterial), bus service along SW Boones Ferry Road, accessibility to future jobs on the industrial lands to the south and west, and compatibility with the adjacent church and school uses. Infrastructure improvements in the surrounding area are in various stages of planning, funding and construction, with road, water, sewer, stormwater, and other improvements in progress and available to the site. Development of the site will contribute to infrastructure and solve an existing traffic capacity problem by providing a traffic signal at SW Norwood and Boones Ferry Road.

Transportation

The future apartment project will gain access onto SW Norwood Road. A Transportation Impact Analysis (TIA) including a Transportation Planning Rule analysis (Exhibit H) has been prepared to address the impacts of this plan map and text amendment with the future project in mind. The study, completed by Jennifer Danziger, PE, Senior Transportation Engineer at Lancaster Mobley, determined that the proposed zoning and project could be accommodated by the surrounding planned transportation network.

The TIA determined that when only background growth is considered (i.e., the project is not constructed) the intersection of SW Norwood Road and SW Boones Ferry Road is projected to need a signal, but a signal is not currently planned or funded. Further, under a reasonable worst case development scenario with the existing zoning (not the proposed zoning), the intersection is eventually projected to fail. However, if the project installs a signal at that intersection, then the existing near-term and long-term problem is solved. The project's traffic is mitigated so that the street network performance standards are met and the zone change will not require any additional mitigation or change in classification.

As directed by City and County transportation staff, the study used a more conservative approach to the traffic counts (using higher trip numbers than the Institute of Transportation Engineers Trip Generation Manual, 10th Edition, requires for a similar apartment project). Even with the assumed higher number of trips, the study found that a future apartment project will create a minor impact on the transportation system which will be mitigated by the recommended traffic signal at the SW Norwood Road and SW Boones Ferry Road intersection.

Conditions of Approval

The Applicant is willing to agree to conditions of approval that would require the following:

- Off-site improvements as recommended in the TIA, including the signal at the SW Norwood Road and SW Boones Ferry Road prior to occupancy of future site development.
- A 60-foot buffer along SW Norwood Road to preserve trees that do not need to be removed for the future access or public roadway improvements.
- Limit the height allowed at this site. The RH-HR zone allows a 64-foot maximum height. The text amendment portion of this application, as further detailed in Exhibit B, includes a height limit of 4 stories or 50 feet, whichever is less, on property south of SW Norwood Road.

Associated Land Use Applications

Several applications are needed in order to prepare the site for multifamily housing. The following is an outline of the various applications and their sequencing:

Partition (previously submitted, under review)

The existing Horizon Community Church and Christian School campus is located on a ±38-acre lot (Tax Lot 106 of Washington County Assessor's Map 2S135D). The partition application was submitted to the City in November 2022 to divide the existing lot into two parcels, resulting in a ±30-acre parcel for the school and church campus (Parcel 1) and an ±8.2-acre parcel planned for future multifamily housing (Parcel 2).

Annexation (previously submitted, under review)

Tax Lot 108 is an adjacent ±1.0-acre lot. An annexation application to the City of Tualatin for Tax Lot 108 was submitted concurrent with the partition application to the City in November. This annexed

lot is planned to be combined with the ±8.2-acre parcel (Parcel 2) to create a ±9.2-acre site for future multifamily housing (see Lot Consolidation, below).

Map and Text Amendment (current application)

Associated with the partition and annexation applications, this plan map and text amendment application is submitted to the City to apply the High-Density High-Rise (RH-HR) zoning district to the new ±9.2-acre site on SW Norwood Road (this ±9.2-acre site combines Parcel 2 of the partition application and adjacent Tax Lot 108, as described above). Currently, the RH-HR zoning district is restricted to a specific area within the City's Central Urban Renewal Area (URA). A text amendment to the Tualatin Development Code (TDC) is included that modifies the TDC's RH-HR language to allow the zoning district to be applied elsewhere in the City.

The text amendment also limits the maximum height of buildings to four stories south of SW Norwood Road in order to provide appropriate building massing in the Basalt Creek Planning Area. The proposed four-story height limitation to the RH-HR is significant, and results in the "High-Density High-Rise" name of the zone to be a misnomer because a four-story building is not a high-rise. (The term "high-rise" is subjective and depends on the context of the community. For example, in a denser urban area, a building would need to be at least 9 stories tall to be considered a "high-rise".) It is also worth noting that the Institutional (IN) zone allows up to 50-foot tall buildings; therefore, the proposed height limit of 4 stories or 50 feet is consistent with the existing zoning on the majority of the site.

Lot Consolidation (future application)

After annexation and partition approval, a lot consolidation application will be submitted to combine the ±1.0-acre annexed site with the ±8.2-acre parcel (Parcel 2) from the partition. This ±9.2-acre site is the same area subject to the map and text amendment and will be the subject of a future architectural review (AR) application.

Architectural Review (future application)

The future use of the ±9.2-acre site is anticipated to be multifamily housing. Planned improvements will require review and approval through the architectural review process with the Architectural Review Board acting as the decision-making body.

As described above, this plan map and text amendment application follows the partition and annexation applications. The area applicable to this application is shown in Figure 1 below.

This application satisfies the applicable approval criteria for map and text amendments outlined within the Tualatin Development Code (TDC) and Tualatin Comprehensive Plan and includes the City application forms and written materials necessary for the City to review and determine compliance with the applicable approval criteria. The evidence is substantial and supports approval of the application.

II. Site Description/Setting

The subject site is ±9.2 acres in size and is comprised of two tax lots on the south side of SW Norwood Road ±290 feet east of SW Boones Ferry Road. Tax Lot 108 is located within the Portland Metropolitan Urban Growth Boundary (UGB) and Basalt Creek Planning Area and will be designated RML upon its annexation. The larger portion of the site proposed for a plan map amendment is currently annexed, is not included within the Basalt Creek Planning Area, and is zoned Institutional (Tax Lot 106). This portion

of the site is currently part of the Horizon Christian Church and School campus. There are two existing detached single-family homes and parking areas on the subject site.

Figure 1: Existing Zoning of Site

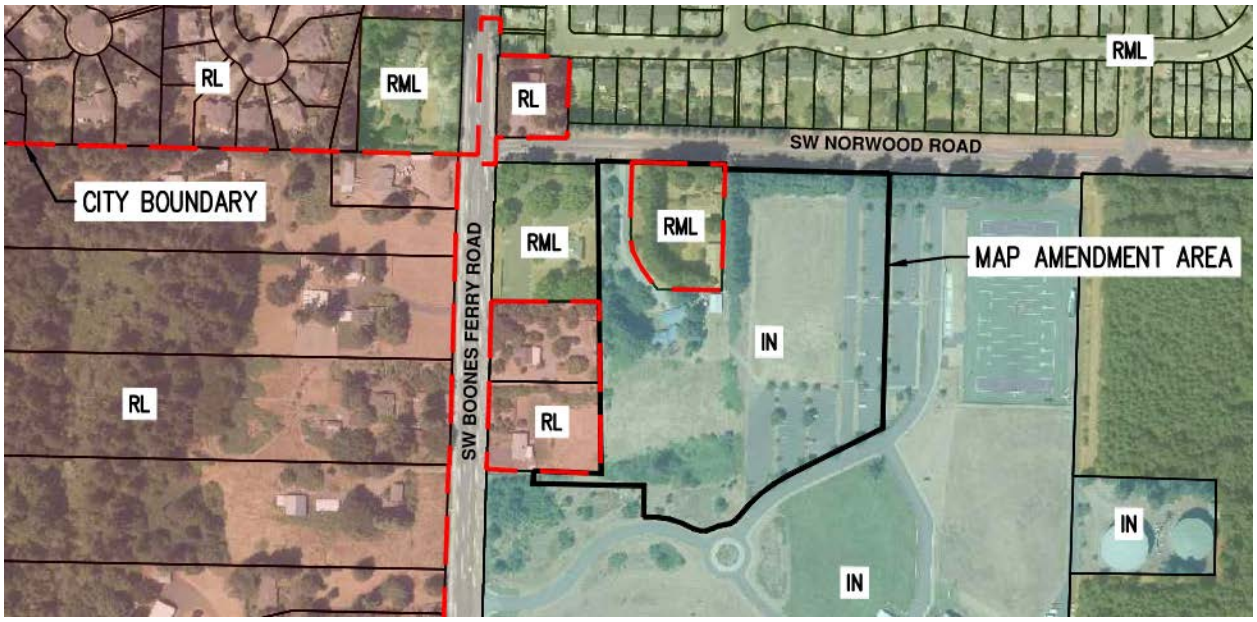

Figure 2: Proposed Plan Map Changes

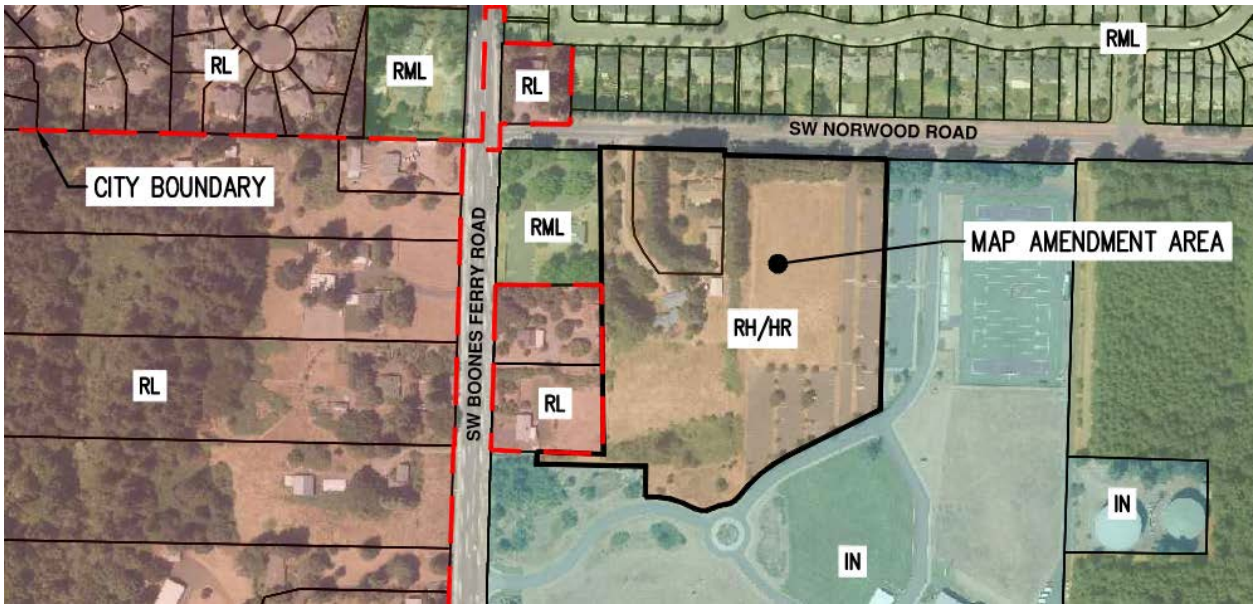

Adjacent uses include the following:

North: SW Norwood Road and Norwood Heights residential subdivision, zoned Medium-Low Density Residential (RML).

East: Horizon Community Church and Horizon Christian School campus (Tax Lot 106) with church and school buildings, sports fields, parking areas, and stormwater facilities zoned Institutional (IN). City-owned water tanks zoned IN. Autumn Sunrise residential subdivision zoned RML.

South: Horizon Community Church and Horizon Christian School campus (Tax Lot 106) with church and school buildings, sports fields, parking areas, and stormwater facilities. Zoned Institutional (IN). Autumn Sunrise residential subdivision zoned RML and Neighborhood Commercial (CN).

West: The Tualatin Hills Christian Church site is located west at the southeast corner of SW Boones Ferry Road and SW Norwood Road (zoned RML). Unincorporated low-density residential properties are located on the east and west sides of SW Boones Ferry Road (with County Zoning of FD-20).

Additionally, the site is close to a number of services and amenities such as:

- TriMet bus route 96-Tualatin/I-5 providing service between Commerce Circle and the Portland City Center with connections to Wilsonville's SMART transit system and TriMet Westside Express Service (WES) commuter rail
- Pedestrian and bicycle facilities, including existing and future facilities along SW Norwood Road
- Future park lands along Basalt Creek on the west side of SW Boones Ferry Road
- Ibach Park
- Employment areas within the Basalt Creek Planning Area
- Wilsonville and the SW Elligsen Road/I-5 interchange
- Tualatin High School
- Edward Byrom Elementary School

III. Applicable Review Criteria

TUALATIN COMPREHENSIVE PLAN 2040

CHAPTER 1 – COMMUNITY INVOLVEMENT

GOAL 1.1

Implement community involvement practices in line with Statewide Planning Goal 1.

Policy 1.1.3

Conduct the planning process with adequate input and feedback from citizens in each affected neighborhood.

Response: An in-person Neighborhood/Developer Meeting was held on October 25, 2022 at the Tualatin Public Library where feedback was received from citizens in the affected neighborhood. The meeting was held and noticed in accordance with the City's neighborhood meeting requirements outlined in the Tualatin Development Code.

As a land use application requiring a Type IV-A procedure, a Planning Commission meeting and City Council public hearing will be required. These meetings will provide an opportunity for the public to comment on the application.

CHAPTER 3 – HOUSING

GOAL 3.1 HOUSING SUPPLY.

Ensure that a 20-year land supply is designated and has urban services planned to support the housing types and densities identified in the Housing Needs Analysis.

Response: The City's HNA found that approximately 4 acres of RH-HR zoning are needed to provide additional multifamily housing in the City. Where RH-HR areas are currently designated within the City, they are considered unbuildable by the HNA – meaning that they are not considered available for additional housing. The current RH-HR area is generally located south of SW Tualatin Road around the Tualatin Police Department and is largely owned by the City of Tualatin. It is unlikely that these lands, because of their public ownership and environmental constraints, would be available for residential development. Additionally, only a small portion of the currently designated area is unbuilt or unencumbered by wetlands, floodplains, and historic buildings.

The proposed map amendment provides a ±9.2-acre site to support the housing types and densities identified within the HNA. The HNA forecasts that multifamily units will provide 45 percent (456 dwelling units) of the 1,014 dwellings that are needed in Tualatin between 2020 and 2040.

The one-acre residential property (Tax Lot 106) is within the Basalt Creek Concept Plan area and, upon annexation to the City of Tualatin, will be zoned Residential Medium Low (RML). An additional 8.2-acre portion, following finalization of the proposed partition of Tax Lot 108 (Horizon Site), is currently zoned Institutional (IN). IN areas are generally designated where existing public or semi-public facilities already exist and were not considered as part of any land supply analysis. Meaning, the 8.2 acres of IN-zoned land have not been included in residential or employment land inventories.

The *Tualatin Housing Strategy Memorandum*, cited by the *City of Tualatin Housing Needs Analysis* (December 2019), presents a list of recommendations, and calls for the City to look for opportunities to re-zone lands to higher density residential. While Actions 1.2, 5.1, and 5.2 (excerpted and annotated below) don't specifically list IN zoned lands, the recommendations clearly call for the City to identify opportunities for redevelopment and rezoning that would accommodate the City's housing needs. During the process of creating the HNA, ECONorthwest and the City's Community Advisory Committee (CAC) identified Actions 1.2 and 5.1 as high priorities to provide needed housing for the City.

Strategies, Actions, and Recommendations	Priority
Strategy 1: Ensure an adequate supply of land that is available and serviceable.	
Action 1.1. Evaluate opportunities to increase development densities within Tualatin's existing zones by modifying the Development Code. ▪ **Recommendation 1.1a:** Evaluate increasing densities in the Residential High and Residential High Density / High Rise residential designations by allowing buildings that are five to eight stories tall. ▪ **Recommendation 1.1b:** Conduct an audit of the City's Development Code to identify barriers to residential development (e.g., lot size, setbacks, and lot coverage ratio) and identify alternatives for lowering or eliminating the barriers. ▪ **Recommendation 1.1c:** Evaluate off-street parking requirements for multifamily housing to identify opportunities for reduction in parking requirements, especially for housing developed for groups who have fewer cars. ▪ **Recommendation 1.1d:** Adopt a Planned Unit Development (PUD) ordinance to allow flexibility in both development standards and housing types.	High
Action 1.2. Evaluate opportunities to rezone land to provide additional opportunities for multifamily housing development. ▪ **Recommendation 1.2a:** Identify opportunities to rezone industrial or commercial land for mixed-use that includes employment and residential uses. ▪ **Recommendation 1.2b:** Evaluate opportunities to re-zone Residential Low Density and Residential Medium Low Density residential land for higher-density housing. ▪ **Recommendation 1.2c:** Evaluate merging High Density zone and the High Density / High Rise zone into one zone and evaluate increasing the maximum density and maximum height limit allowed.	High
Action 1.3. Plan for infrastructure development to support residential development, consistent with Strategy 3. ▪ **Recommendation 1.3a:** Identify opportunities to increase coordination between transportation planning and residential growth to manage congestion from growth. ▪ **Recommendation 1.3b:** Identify opportunities to increase transit service.	Medium
Action 1.4. Plan for long-term development in Tualatin through 2040 and beyond. ▪ **Recommendation 1.4a:** Actively work with Metro staff on upcoming Regional Growth Management reports. Coordinate Tualatin's planning with regional plans. ▪ **Recommendation 1.4b:** Develop and implement a system to monitor the supply of residential land every two years. ▪ **Recommendation 1.4c:** Reevaluate Tualatin's housing needs and land sufficiency on a schedule tied to the Metro Growth Management cycle. ▪ **Recommendation 1.4d:** When needed in the future, work with Metro on potential expansion of the Metro UGB to include the Stafford area.	High

Strategies, Actions, and Recommendations	Priority
Action 3.8. Ensure that Tualatin has sufficient staff capacity to implement the housing program priorities set by the City Council. ▪ **Recommendation 3.8a:** Determine whether the City will need to add staff to implement the policies in the housing strategy.	Low
Strategy 4: Identify funding tools to support residential development.	
Action 4.1. Evaluate opportunities to use leveraged funds from the Metro Housing Bond to support development of affordable housing. ▪ **Recommendation 4.1a:** Evaluate opportunities, such as housing development incentives (in Strategy 3), to use leveraged funding from the Metro Housing Bond to support the development of affordable housing.	High
Action 4.2. Evaluate establishing an urban renewal district. ▪ **Recommendation 4.2a:** Continue the evaluation of establishing a new urban renewal district and consider including urban renewal projects that support development of multifamily housing affordable for households earning less than 60% of MFI.	High
Action 4.3. Evaluate implementation of a construction excise tax. ▪ **Recommendation 4.3a:** Evaluate implementation of a CET, starting with an analysis of the financial capacity of a CET.	Medium
Strategy 5: Identify redevelopment opportunities.	
Action 5.1. Identify districts within Tualatin with opportunities for redevelopment for housing and employment uses. ▪ **Recommendation 5.1a:** Identify opportunities for redevelopment of mixed-use districts and initiate an area planning process to guide redevelopment.	High
Action 5.2. Support redevelopment of underutilized commercial buildings for housing. ▪ **Recommendation 5.2a:** Identify underutilized commercial areas that are ripe for redevelopment and work with landowners and developers to support redevelopment.	Medium
Strategy 6: Ensure there are connections between planning for housing and other community planning.	
Action 6.1. Ensure that updates to the Transportation System Plan are coordinated with planning for residential growth. ▪ **Recommendation 6.1a:** Evaluate opportunities to decrease dependence on automotive transportation in areas planned for housing. ▪ **Recommendation 6.1b:** Evaluate opportunities to expand transit and improve transportation connectivity in Tualatin, particularly from the future Southwest Corridor station in Bridgeport to the Tualatin's Town Center. ▪ **Recommendation 6.1c:** Evaluate opportunities for planning transit-oriented development. ▪ **Recommendation 6.1d:** Develop a bicycle and pedestrian plan for Tualatin to increase connectivity within Tualatin.	High
Action 6.2. Coordinate planning for economic development planning with housing planning. ▪ **Recommendation 6.2a:** Ensure the City includes housing planning for housing that is affordable to people who work at businesses in Tualatin.	Medium
Action 6.3. Develop a design and planning framework for "ten-minute neighborhoods" that include a mixture of uses. ▪ **Recommendation 6.3a:** Develop a framework for mixed-use neighborhoods that includes the elements that residents need for day-to-day life.	Low
Action 6.4. Support sustainable development practices. ▪ **Recommendation 6.4a:** Evaluate sustainable building practices, including certifications, to determine whether the City should offer incentives for certification or require certification of new buildings as sustainable.	Low

Amendment of the City's RH-HR zoning district locational language will allow the City to apply RH-HR zoning beyond the limited area to where it is currently restricted, accomplishing the housing supply goal of the City's HNA. The provision of additional lands for this purpose helps the City meet its 20-year land supply needs. The proposal satisfies this goal.

POLICY 3.1.1 DENSITY.

Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

Response: High-Density High-Rise Residential (RH-HR) zoning is a critical part of the provision of appropriate residential densities within the City of Tualatin. The district requires density between 26 and 30 dwelling units per acre, and per the City's HNA, accounts for only one percent of the total residential acreage within the City. The residential densities of the City's various zoning districts are combined to provide the City's overall target density of 8.0 dwelling units per acre, on average. According to the HNA, the City is below the target density of 8.0 dwelling units per acre. This map amendment will contribute to the City's overall residential land supply and will help the City to better meet the minimum target density provisions. The proposal complies with this policy.

POLICY 3.1.2 ZONING FOR MULTIFAMILY.

Provide zoning for multifamily development, which may be located in areas adjacent to transit.

Response: According to the City's Housing Needs Analysis, no areas of RH-HR zoning are vacant or partially vacant, meaning that they are not considered available for additional housing. This creates a two-fold problem – an identified need of 110 housing units will remain unmet because of the 4-acre land supply deficit, but the current plan text includes locational restrictions that limit the ability to apply this zoning within other areas of the City. The proposed amendments will remove the locational requirements within the TDC and allow for this site to be redesignated as RH-HR, allowing the City to meet its multifamily development housing needs. The subject site is also in close proximity to TriMet bus route 96 along SW Boones Ferry Road. Therefore, this policy to provide zoning for multifamily housing adjacent to transit is met.

GOAL 3.2 HOUSING FOR ALL.

Encourage development and preservation of housing that is affordable for all households in Tualatin.

Response: The proposed zoning changes will allow for the development of needed housing within Tualatin. The HNA identified the need for a higher percentage of multifamily dwelling units (45% of new housing) in order to meet the changing demographics and increasing housing affordability (*Housing Needs Analysis*, Page XI). In the current real estate market, it is difficult for many families, and especially first-time homeowners, to buy a home. For rent apartment homes are an affordable alternative to buying and provide housing options for households that might not be able to or want to buy a home in today's market. Without additional supply of residential units, demand will continue to drive rents up significantly making renting less affordable. This application helps meets the goal of providing housing for all.

POLICY 3.2.1 HOUSING TYPE DIVERSITY.

Support development of townhomes, duplexes, triplexes, quadplexes, cottages, courtyard housing, accessory dwelling units, single story units, senior housing, and extended family and multi-generational housing in all residential zoning districts.

Response: The City implemented Development Code updates in 2021 to comply with statewide "middle housing" mandates and to allow for more housing diversity within single-family residential districts. However, changes to allow additional multifamily residential development were not included in the Development Code updates. The proposed map amendment will allow for the construction of apartment housing that will increase the supply of renter occupied housing and the diversity of housing types within the City.

GOAL 3.5 HOUSING AND TRANSPORTATION.

Encourage development and redevelopment in Tualatin that supports all modes of transportation, including walking, biking, and mass transit.

GOAL 3.7 RESIDENTIAL GROWTH AND THE ENVIRONMENT.

Plan for housing and residential growth to minimize and mitigate for environmental impacts.

Response: Compact growth within a city is more transit-supportive, has a smaller environmental impact, and allows for more efficient use of infrastructure. As most of Tualatin's available residential buildable lands (88 acres) are within the Basalt Creek Planning Area, and there are no acres of available RH-HR lands within the rest of the City, rezoning is the only option to make RH-HR lands available to meet the City's future housing needs.

The location of proposed new RH-HR lands is near the intersection of SW Boones Ferry Road, SW Norwood Road, and the future extension of Basalt Creek Parkway allowing for greater pedestrian and bicycle connections to Tualatin and beyond. Transit options are currently available near the project site and increased residential, commercial, and industrial growth nearby may lead to increased levels of service along this route in the future.

The location of the project site accomplishes the goal of minimizing environmental impacts. The site does not feature any identified upland or riparian habitat, in contrast with existing RH-HR lands within the City (pictured below as Figure 3) which have been classified as largely unbuildable due to wetland habitats and floodplain. Other nearby residential lands, such as those west of SW Boones Ferry Road, are also significantly impacted by historic buildings, wetland, riparian, and upland habitats (Figure 4 below). Figure 4 demonstrates the location of the proposed map amendment. These goals are met.

Figure 3: Existing RH-HR Zoning and Residential Land Constraints

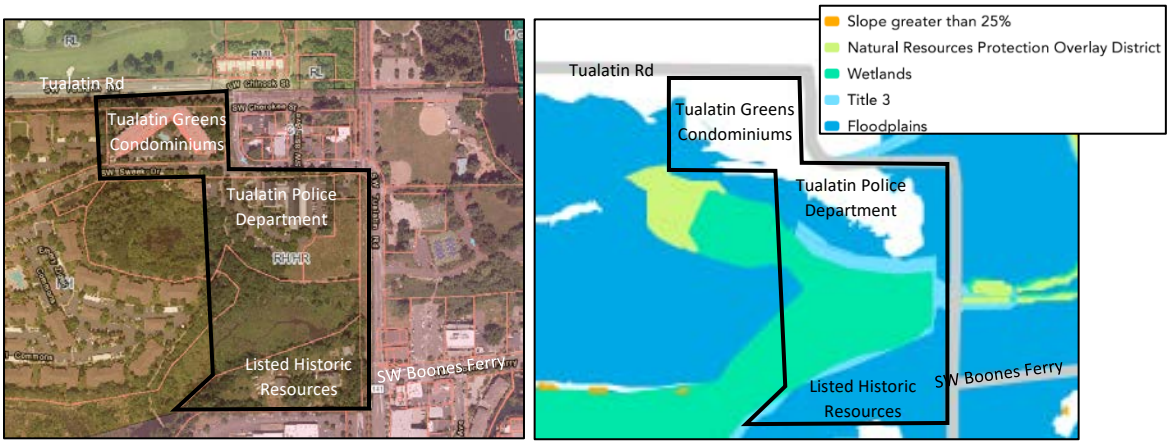

Figure 4: Project Site Residential Land Constraints

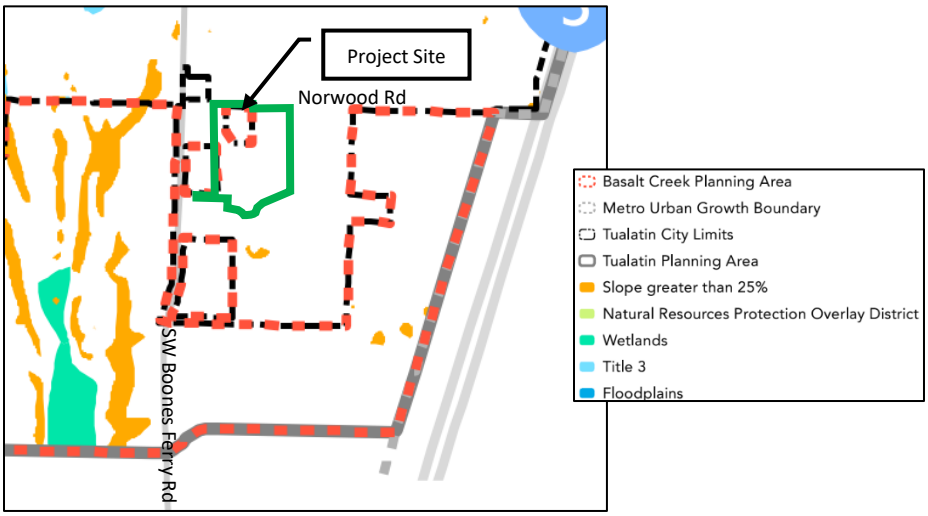


CHAPTER 7 – PARKS, OPEN SPACE & ENVIRONMENT

GOAL 7.1

Identify and protect significant natural resources that promote a healthy environment and natural landscape that improves livability, and to provide recreational and educational opportunities.

POLICY 7.1.1

Protect significant natural resources that provide fish and wildlife habitat, scenic values, water quality improvements, storm-water management benefits, and flood control.

GOAL 7.2

Balance natural resource protection with growth and development needs.

Response: The project area is located where it will not infringe on natural resource areas. Removing the locational requirement of the RH-HR zoning and rezoning this area will allow for needed growth and development while still protecting natural resources within the City. While not considered a natural resource area, there are existing trees on the subject site along SW Norwood Road. As detailed in the Executive Summary, the applicant is willing

to commit to a 60-foot tree preservation area. Due to access needs to the site and the widening requirements of SW Norwood Road, not all of the trees will be preserved, but a substantial number can be. These provisions are met.

CHAPTER 10 – LAND USE DESIGNATIONS & ZONING

PLAN MAP BACKGROUND

PLANNING DISTRICT BOUNDARIES.

The boundaries between planning districts, as portrayed on the Plan Map, are intended to follow property lines (or extensions thereof), roadways, or natural features such as creeks. Where such definition was not possible, the Map is drawn to scale and district boundaries can be determined by using this scale. It should be noted that property lines shown on the Plan Map were derived from County Assessor's Maps and are therefore relatively accurate. Consequently, the planning districts shown on the Plan shall be considered zoning districts, as normally termed. This eliminates the need for two sets of maps and simplifies the understanding of what land uses may be allowed on an individual property.

Response: The proposed map amendment follows the property lines created by a proposed partition of one of the subject lots. A future application will consolidate the recently annexed property and the parcel created through the partition of the Horizon Community Church campus (Parcel 2). The intent of the plan map district boundaries has been met.

PLANNING DISTRICT OBJECTIVES

RESIDENTIAL PLANNING DISTRICTS:

Medium-Low Density Residential Planning District (RML)

This district supports household living uses with a variety of housing types at moderately low densities. This district is primarily oriented toward middle housing types including attached dwellings, multi-family development, and manufactured dwelling parks.

High-Density Residential/High-Rise Planning District (RH-HR)

This district supports a wide range of housing types at the greatest density of household living in areas with the greatest access to amenities.

OTHER PLANNING DISTRICTS:

Institutional Planning District (IN)

The purpose of this district is to provide an environment exclusively for, and conducive to, the development and operation of religious institutions, schools, public parks, and related uses, in a manner that is harmonious with adjacent and nearby residential, commercial, or manufacturing planning districts and uses.

The district is intended to accommodate large-scale campus style developments, owned and operated by governmental or nonprofit entities, consisting of multiple structures or facilities, which may serve multiple purposes and provide multiple services to the community.

Permitted and conditional uses shall be developed and operated in a manner that promotes and protects the health, safety, and general welfare of all adjacent and nearby planning districts and uses. Additionally, conditional uses shall be allowed provided that the use is developed and operated in a manner that is consistent with the intent of the planning district, and that

promotes and protects the health, safety, and general welfare of all adjacent and nearby planning districts and uses.

The district may be applied to land that is able to accommodate large-scale campus-style development and operation of religious institutions, schools, public parks, and related uses, as follows:

- Contiguous land one and one-half acre in size or greater;
- Access to a collector or arterial street;
- Adequate public facilities are available to the property.

Response: The project site is proposed to be rezoned to High-Density High-Rise Residential (RH-HR) from its current zoning of Institutional (IN) and Medium-Low Residential (RML). The removal of ±8.2-acres of IN land will not compromise the ability of the Horizon Church and School to optimize the use of their land and services they provide. And as previously discussed in this narrative, the HNA identified a surplus of RML zoning within the City and rezoning to RH-HR will meet numerous City goals and policies.

Prior to annexation to the City of Tualatin, Washington County approved a Master Plan in 2006 for the church and school property. The church has determined that their needs and the realization of the Master Plan can be met on a more compact portion of their property. This provides the opportunity to rezone and develop the remainder of the property with needed multifamily housing, making the current IN designation unnecessary. The proposed changes do not bring the remaining Institutional-zoned property out of compliance with the Tualatin Comprehensive Plan or previous land use approvals nor prevent its use in a manner that satisfies the purpose of the Institutional district.

Therefore, this application for a plan map and text amendment complies with the intent of the applicable planning districts.

TUALATIN DEVELOPMENT CODE

CHAPTER 32 – PROCEDURES

TDC 32.010. – Purpose and Applicability

(1) *Purpose.* The purpose of this Chapter is to establish standard procedures for the review and processing of land use applications and legislative land use proposals, as well as ministerial actions. This Chapter is intended to enable the City, the applicant, and the public, where applicable, to reasonably review applications and participate in the local decision-making process in a timely and effective way. Table 32-1 provides a key for determining the review procedure and the decision-making body for particular applications.

(2) *Applicability of Review Procedures.* All land use and development permit applications and decisions, will be made by using the procedures contained in this Chapter. The procedure "type" assigned to each application governs the decision-making process for that permit or application. There are five types of permit/application procedures as described in subsections (a) through (e) below. Table 32-1 lists the City's land use and development applications and corresponding review procedure(s).

(d) Type IV-A Procedure (Quasi-Judicial Review—City Council Public Hearing). Type IV-A procedure is used when the standards and criteria require discretion, interpretation, or policy or legal judgment and is the

procedure used for site-specific land use actions initiated by an applicant. Type IV-A decisions are made by the City Council and require public notice and a public hearing. Appeals of Type IV-A decisions are heard by the Land Use Board of Appeals (LUBA).

Table 32-1 – Application Types and Review Procedures

Application/ Action	Procedure Type	Decision Body*	Appeal Body*	Pre-Application Conference Required	Neighborhood/ Developer Mtg Required	Applicable Code Chapter
Plan Amendments						
• Map or Text Amendments for a specific property	IV-A	CC	LUBA	Yes	Yes	TDC 33.070

Response: This application is for plan map and text amendments that affect two parcels to be owned by the applicant. The requested action affects a limited number of properties and will require public notice and a public hearing before the City Council.

TDC 32.110. – Pre-Application Conference.

(1) *Purpose of Pre-Application Conferences.* Pre-application conferences are intended to familiarize applicants with the requirements of the TDC; to provide applicants with an opportunity discuss proposed projects in detail with City staff; and to identify approval criteria, standards, and procedures prior to filing a land use application. The pre-application conference is intended to be a tool to assist applicants in navigating the land use process, but is not intended to be an exhaustive review that identifies or resolves all potential issues, and does not bind or preclude the City from enforcing any applicable regulations or from applying regulations in a manner differently than may have been indicated at the time of the pre-application conference.

(2) *When Mandatory.* Pre-application conferences are mandatory for all land use actions identified as requiring a pre-application conference in Table 32-1. An applicant may voluntarily request a pre-application conference for any land use action even if it is not required.

(3) *Timing of Pre-Application Conference.* A pre-application conference must be held with City staff before an applicant submits an application and before an applicant conducts a Neighborhood/Developer meeting.

Response: A pre-application conference was held with City of Tualatin staff to discuss the overall project and this specific redesignation of residential lands and required text amendment. The required pre-application conference was held with City of Tualatin Staff on July 13, 2022, prior to the application submittal date.

(4) *Application Requirements for Pre-Application Conference.*

(a) *Application Form.* Pre-application conference requests must be made on forms provided by the City Manager.

(b) *Submittal Requirements.* Pre-application conference requests must include:

(i) A completed application form;

(ii) Payment of the application fee;

(iii) The information required, if any, for the specific pre-application conference sought; and

(iv) Any additional information the applicant deems necessary to demonstrate the nature and scope of the proposal in sufficient detail to allow City staff to review and comment.

(5) *Scheduling of Pre-Application Conference.* Upon receipt of a complete application, the City Manager will schedule the pre-application conference. The City Manager will coordinate the involvement of city departments, as appropriate, in the pre-application conference. Pre-application conferences are not open to the general public.

(6) *Validity Period for Mandatory Pre-Application Conferences; Follow-Up Conferences.* A follow-up conference is required for those mandatory pre-application conferences that have previously been held when:

(a) An application relating to the proposed development that was the subject of the pre-application conference has not been submitted within six months of the pre-application conference;

(b) The proposed use, layout, and/or design of the proposal have significantly changed; or

(c) The owner and/or developer of a project changes after the pre-application conference and prior to application submittal.

Response: A pre-application conference to discuss the application was held on July 13, 2022. The conference followed the above procedures and is valid for six months (until January 13, 2023). These criteria are met.

TDC 32.120. - Neighborhood/Developer Meetings.

(1) *Purpose.* The purpose of this meeting is to provide a means for the applicant and surrounding property owners to meet to review a development proposal and identify issues regarding the proposal so they can be considered prior to the application submittal. The meeting is intended to allow the developer and neighbors to share information and concerns regarding the project. The applicant may consider whether to incorporate solutions to these issues prior to application submittal.

(2) *When Mandatory.* Neighborhood/developer meetings are mandatory for all land use actions identified in Table 32-1 as requiring a neighborhood/developer meeting. An applicant may voluntarily conduct a neighborhood/developer meeting even if it is not required and may conduct more than one neighborhood/developer meeting at their election.

(3) *Timing.* A neighborhood/developer meeting must be held after a pre-application meeting with City staff, but before submittal of an application.

(4) *Time and Location.* Required neighborhood/developer meetings must be held within the city limits of the City of Tualatin at the following times:

(a) If scheduled on a weekday, the meeting must begin no earlier than 6:00 p.m.

(b) If scheduled on a weekend, the meeting must begin between 10:00 a.m. and 6:00 p.m.

(5) *Notice Requirements.*

(a) The applicant must provide notice of the meeting at least 14 calendar days and no more than 28 calendar days before the meeting. The notice must be by first class mail providing the date, time, and location of the meeting, as well as a brief description of the proposal and its location. The applicant must keep a copy of the notice to be submitted with their land use application.

(b) The applicant must mail notice of a neighborhood/developer meeting to the following persons:

(i) All property owners within 1,000 feet measured from the boundaries of the subject property;

(ii) All property owners within a platted residential subdivision that is located within 1,000 feet of the boundaries of the subject property. The notice area includes the entire subdivision and not just those lots within 1,000 feet. If the residential subdivision is one of two or more individually platted phases sharing a single subdivision name, the notice area need not include the additional phases; and

(iii) All designated representatives of recognized Citizen Involvement Organizations as established in TMC Chapter 11-9.

(c) The City will provide the applicant with labels for mailing for a fee.

(d) Failure of a property owner to receive notice does not invalidate the neighborhood/developer meeting proceedings.

(6) *Neighborhood/Developer Sign Posting Requirements.* The applicant must provide and post on the subject property, at least 14 calendar days before the meeting. The sign must conform to the design and placement standards established by the City for signs notifying the public of land use actions in TDC 32.150.

(7) *Neighborhood/Developer Meeting Requirements.* The applicant must have a sign-in sheet for all attendees to provide their name, address, telephone number, and email address and keep a copy of the sign-in sheet to provide with their land use application. The applicant must prepare meeting notes identifying the persons attending, those commenting and the substance of the comments expressed, and the major points that were discussed. The applicant must keep a copy of the meeting notes for submittal with their land use application.

Response: A Neighborhood/Developer Meeting is required for this type of application, and one was held in-person on October 25, 2022 at the Tualatin Public Library. The required information is provided in Exhibit E. These requirements are met.

TDC 32.130. - Initiation of Applications.

(1) *Type I, Type II, Type III, and Type IV-A Applications.* Type I, Type II, Type III, and Type IV-A applications may be submitted by one or more of the following persons:

(a) The owner of the subject property;

(b) The contract purchaser of the subject property, when the application is accompanied by proof of the purchaser's status as such and by the seller's written consent;

(c) A lessee in possession of the property, when the application is accompanied by the owners' written consent; or

(d) The agent of any of the foregoing, when the application is duly authorized in writing by a person authorized to submit an application by paragraphs (a), (b) or (c) of this subsection, and accompanied by proof of the agent's authority.

(2) *Type IV-A or B Applications.* Type IV-A or B applications may be initiated by the City.

Response: This application has been submitted by the property owners and contract purchaser of all properties affected by the proposed map and text amendment. The applicable criteria are met.

TDC 32.140. - Application Submittal.

(1) **Submittal Requirements. Land use applications must be submitted on forms provided by the City. A land use application may not be accepted in partial submittals. All information supplied on the application form and accompanying the application must be complete and correct as to the applicable facts. Unless otherwise specified, all of the following must be submitted to initiate completeness review under TDC 32.160:**

(a) **A completed application form. The application form must contain, at a minimum, the following information:**

(i) **The names and addresses of the applicant(s), the owner(s) of the subject property, and any authorized representative(s) thereof;**

(ii) **The address or location of the subject property and its assessor's map and tax lot number;**

(iii) **The size of the subject property;**

(iv) **The comprehensive plan designation and zoning of the subject property;**

(v) **The type of application(s);(vi)A brief description of the proposal; and**

(vii) **Signatures of the applicant(s), owner(s) of the subject property, and/or the duly authorized representative(s) thereof authorizing the filing of the application(s).**

(b) **A written statement addressing each applicable approval criterion and standard;**

(c) **Any additional information required under the TDC for the specific land use action sought;**

(d) **Payment of the applicable application fee(s) pursuant to the most recently adopted fee schedule;**

(e) **Recorded deed/land sales contract with legal description.**

(f) **A preliminary title report or other proof of ownership.**

(g) **For those applications requiring a neighborhood/developer meeting:**

(i) **The mailing list for the notice;**

(ii) **A copy of the notice;**

(iii) **An affidavit of the mailing and posting;**

(iv) **The original sign-in sheet of participants; and**

(v) **The meeting notes described in TDC 32.120(7).**

(h) **A statement as to whether any City-recognized Citizen Involvement Organizations (CIOs) whose boundaries include, or are adjacent to, the subject property were contacted in advance of filing the application and, if so, a summary of the contact. The summary must include the date when contact was made, the form of the contact and who it was with (e.g. phone conversation with neighborhood association chairperson, meeting with land use committee, presentation at neighborhood association meeting), and the result;**

(i) **Any additional information, as determined by the City Manager, that may be required by another provision, or for any other permit elsewhere, in the TDC, and any other information that may be required to adequately review and analyze the proposed development plan as to its conformance to the applicable criteria;**

(2) Application Intake. Each application, when received, must be date-stamped with the date the application was received by the City, and designated with a receipt number and a notation of the staff person who received the application.

(3) Administrative Standards for Applications. The City Manager is authorized to establish administrative standards for application forms and submittals, including but not limited to plan details, information detail and specificity, number of copies, scale, and the form of submittal.

Response: Required information, city forms, and this narrative have been submitted to the City of Tualatin for approval. These criteria are met.

TDC 32.150. - Sign Posting.

(1) When Signs Posted. Signs in conformance with these standards must be posted as follows:

(a) Signs providing notice of an upcoming neighborhood/developer meeting must be posted prior to a required neighborhood/developer meeting in accordance with Section 32.120(6); and

(b) Signs providing notice of a pending land use application must be posted after land use application has been submitted for Type II, III and IV-A applications.

(2) Sign Design Requirements. The applicant must provide and post a sign(s) that conforms to the following standards:

(a) Waterproof sign materials;

(b) Sign face must be no less than 18 inches by 24 inches (18" x 24"); and

(c) Sign text must be at least two inch font.

(3) On-site Placement. The applicant must place one sign on their property along each public street frontage of the subject property. (Example: If a property adjoins four public streets, the applicant must place a sign at each of those public street frontages for a total of four signs.) The applicant cannot place the sign within public right-of-way.

(4) Removal. If a sign providing notice of a pending land use application disappears prior to the final decision date of the subject land use application, the applicant must replace the sign within 40-eight (48) hours of discovery of the disappearance or of receipt of notice from the City of its disappearance, whichever occurs first. The applicant must remove the sign no later than 14 days after:

(a) The meeting date, in the case of signs providing notice of an upcoming neighborhood/developer meeting; or

(b) The City makes a final decision on the subject land use application, in the case of signs providing notice of a pending land use application.

Response: Signs duly notifying the public of the pending land use application will be posted in accordance with the above provisions. Signs for the Neighborhood/Developer Meeting were posted in accordance with TDC 32.120(6). Signage providing notice of the pending land use application hearing will be posted when applicable. The applicable criteria have been or will be met.

TDC 32.230. - Type III Procedure (Quasi-Judicial Review—Public Hearing).

Type III decisions involve the use of discretion and judgment and are made by the Planning Commission or Architectural Review Board after a public hearing with an opportunity for appeal to the City Council. The decision body for each application type is specified in Table 32-1. A hearing under these procedures provides a forum to apply standards to a specific set of facts to determine whether the facts conform to the applicable criteria and the resulting determination will directly affect only a small number of identifiable persons.

(1) Submittal Requirements. Type III applications must include the submittal information required by TDC 32.140(1).

[…]

Response: The application includes the applicable information listed within TDC 32.140(1). This criterion is met.

CHAPTER 33 – APPLICATIONS AND APPROVAL CRITERIA

TDC 33.070. – Plan Amendments.

(1) *Purpose.* To provide processes for the review of proposed amendments to the Zone Standards of the Tualatin Development Code and to the Text or the Plan Map of the Tualatin Comprehensive Plan.

Response: The applicant is applying for a plan map amendment in order to provide opportunities for multifamily housing.

The applicant has also applied for plan text amendments in order to remove location restrictions related to the placement of RH-HR zoning and limit the height to four stories south of SW Norwood Road. Current TDC language restricts this zoning to a ±17.8-acre area on SW Tualatin Road largely encumbered with wetlands, floodplain, other obstacles to development and allows building to be up to 64 feet in height.

The required materials have been attached to this narrative as exhibits, providing justification for these plan map and text amendment requests.

(2) *Applicability.* Quasi-judicial amendments may be initiated by the City Council, the City staff, or by a property owner or person authorized in writing by the property owner. Legislative amendments may only be initiated by the City Council.

Response: A pre-application conference with City of Tualatin staff has identified this application for plan map and text amendments, with a limited scope affecting a small number of properties, as requiring a quasi-judicial process. The application is subject to a Type IV-A review in accordance with TDC 32.010. This application has been submitted by the property owner and their authorized representatives. This criterion is met.

(3) *Procedure Type.*

(a) Map or text amendment applications which are quasi-judicial in nature (e.g. for a specific property or a limited number of properties) is subject to Type IV-A Review in accordance with TDC Chapter 32.

(b) Map or text amendment applications which are legislative in nature are subject to Type IV-B Review in accordance with TDC Chapter 32.

Response: This application affects a limited number of properties and is therefore quasi-judicial in nature and subject to a Type IV-A Review in accordance with the procedures outlined within TDC Chapter 32.

(4) *Specific Submittal Requirements.* **An application for a plan map or text amendment must comply with the general submittal requirements in TDC 32.140 (Application Submittal).**

Response: The applicant has submitted the required materials in accordance with TDC 32.140. These specific materials were outlined previously within this application. This criterion is met.

(5) *Approval Criteria.*

(a) **Granting the amendment is in the public interest.**

Response: Providing housing, especially those types identified by the City as specifically needed in Tualatin, are important to reaching the City's goals of offering residents various densities and levels of affordability. Additionally, Metro requires at least 50% of new residential units within the City of Tualatin to be either multifamily or attached single family units. The proposed map amendment could allow for the construction of up to 276 housing units on the ±9.2-acre site. The public interest is served through providing an opportunity for housing and helping the City meet both identified goals of the Tualatin Comprehensive Plan and regional Metro housing requirements.

The City's Housing Needs Analysis states that Tualatin's housing market is strongly impacted by the regional housing market and nearly 93% of the 23,800 people who work in Tualatin commute from outside of the city. The US Census Bureau's 2021 American Community Survey estimates that ±43.1 percent of those employed in Tualatin spend greater than 30 minutes traveling to work. Allowing additional housing opportunities to be constructed near these centers of employment would have an impact in the number and length of time vehicles were on the road. The lack of vacant units and continued demand for housing will drive the need to provide additional multifamily housing, which is expected to be 45% of Tualatin's future housing stock. The analysis also determined that Tualatin would be challenged to provide multifamily housing over the next 20 years.

A key recommendation of the Housing Needs Analysis is providing housing closer to workplaces and thereby reducing transportation issues associated with long commutes. The Basalt Creek Planning Area is expected to provide up to 2,300 jobs over the next 16 years. Because the lands proposed for map amendment are surplus Institutional and residential lands, the industrial and employment capacity within the Basalt Creek Planning Area is preserved. Amending other districts within the Basalt Creek Planning Area would either reduce employment capacity or require locating higher density housing further away from transportation facilities and amenities.

Another key component of this application is the provision of utility and transportation infrastructure, as outlined in the TIA (Exhibit H) and the Utility Capacity Analysis (Exhibit I). The addition of the traffic signal at the SW Norwood Road and SW Boones Ferry Road intersection will mitigate for existing traffic impacts as well as the minor impact of the future apartment project on the site.

The proposed map and text amendments serve the public interest by accommodating the housing, employment, utility, and transportation needs of the community. Therefore, the amendments benefit the public and the applications satisfy this criterion.

(b) The public interest is best protected by granting the amendment at this time.

Response: Since the City has few vacant lands and no ability to provide housing at the needed density established by the HNA on existing buildable lands, approval of these amendments at this time is needed and is in the best interest of the public. Additionally, the City's Housing Needs Analysis states that over half of renter households in the City are cost burdened. Allowing for increased density can help alleviate households' cost burdens by providing opportunities to add dwelling units to the housing market. The City's HNA also states that the City will be challenged over the next 20 years to provide housing of all types, including market-rate multifamily housing. The public interest is served and protected through meeting public needs for housing.

The provision of the traffic signal protects the public interest by solving an existing problem and mitigating future impacts of additional traffic from future improvements to the site. The text amendment to limit the height of buildings at the site to 4-stories also protects the public interest by ensuring compatibility with surrounding neighborhoods.

The conversion of IN zoned land to residential zoning also protects the public interest by preserving employment lands in commercial and industrial zoned areas. According to the *Tualatin Economic Opportunities Analysis* completed in 2019, there is little demand for institutionally zoned land in the City when compared to industrial, commercial, or residential designations.

This criterion is met.

(c) The proposed amendment is in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan.

Response: Conformance with the applicable goals and policies of the Tualatin Comprehensive Plan have been reviewed and responses provided previously within this application. This criterion is satisfied.

(d) The following factors were consciously considered:

(i) The various characteristics of the areas in the City;

Response: The characteristics of the proposed location were considered. The subject site is located near transportation options, goods and services, and employment areas. As previously stated, the City lacks the buildable lands necessary to provide housing to meet its projected residential growth. Other available areas do not have the necessary level of services, access to employment centers and transportation, or amenities that are or will be available in this location. The site is in an area of future growth and in close proximity to the Basalt Creek employment area which is expected to provide up to 2,300 jobs in the next 16 years.

Many other lands, 86 percent of the total acres with residential comprehensive plan designations, are also considered "developed" per Metro Regional Services (Metro) definitions and must be redeveloped to accommodate any changes to housing or additional housing in the future. Redevelopment requires consideration of the project site and surroundings and can be costly in comparison to development of a vacant site. This application allows for the provision of housing in a relatively undeveloped greenfield area

without the possible reduction in housing stock or displacement of current residents that may occur with the redevelopment of a developed site.

Neighbors attending the Neighborhood/Developer Meeting expressed concerns related mainly with traffic and building height. As part of this application, the Applicant has provided a Transportation Impact Analysis including a Transportation Planning Rule analysis (Exhibit H). The report, completed by Jennifer Danziger, PE, Senior Transportation Engineer at Lancaster Mobley, studied the existing and background conditions of the transportation network. The report concluded that the traffic signal at the intersection of SW Norwood Road and SW Boones Ferry Road is required even without the apartment project being built. However, with the addition of the signal, the proposed zoning and project could be accommodated by the surrounding planned transportation network, frontage improvements, and traffic signal. The recommended improvements will allow the street network performance standards to be met without any additional mitigation or change in classification.

Concern about the height of the buildings has been addressed by the proposed text amendment which would limit the height of the RH-HR zone to four stories within areas south of SW Norwood Road (Exhibit B). (See discussion in the Executive Summary about the text amendment for height.) The proposed code height limitation would reduce the visual impacts of the future site improvements on the surrounding area. Along with the required transportation improvements, the proposed plan map and text amendments consciously consider the characteristics of this and other areas of the City, and this criterion is met.

(ii) The suitability of the areas for particular land uses and improvements in the areas;

Response: The site proposed for the map amendment is a future growth area of the City, near transportation options, a neighborhood commercial area, parks, schools, and employment centers, and is a suitable location for multifamily development. Planned improvements and infrastructure that is anticipated to be the responsibility of the project will accommodate development in the area. Nearby service and planned improvements include:

Water: Water service for the subject site will tie into existing public water mains within SW Norwood Road. Per the *9300 SW Norwood – Water System Capacity Analysis*, dated September 11, 2022, from Brian Ginter, PE of Murraysmith, Inc. included as part of Exhibit I, "adequate water service for domestic use and fire suppression is available" for the proposed development.

Sanitary Sewer: An 8-inch gravity sanitary sewer line will be constructed north of the proposed site within the SW Norwood Road and SW Boones Ferry Road rights-of-way. This line is planned to lead to an existing sanitary sewer line within SW Boones Ferry Road north of its intersection with SW Norwood Road. Adequate capacity is available to serve the proposed increase in residential density.

Stormwater: A new connection to an existing stormwater main within SW Boones Ferry Road is planned. Using a combination of an existing on-site stormwater pond and new underground detention facilities, CWS water quality and hydromodification requirements can be met that ensure release rates for the site will be less than or equal to those currently observed.

Transportation: As previously discussed and detailed within the TIA (Exhibit H), a signal at the intersection of SW Norwood Road and SW Boones Ferry Road is warranted without any changes to the subject site. With the addition of a signal and other improvements to the transportation network surrounding the site, there is adequate capacity for the proposed development. Additionally, as described in the Executive Summary above, a bus stop for TriMet route 96 is within 350 feet of the site providing service to Portland City Center and connections to Wilsonville's SMART transit system and TriMet Westside Express Service (WES) commuter rail. Capacity of the surrounding network is adequate, and the proposed project does not require additional measures of mitigation.

Emergency and School Services: The project site is served by the Tualatin Police Department and is within the Sherwood School and Tualatin Valley Fire and Rescue (TVF&R) Districts. Correspondence with the Sherwood School District is included as Exhibit G which states that capacity for additional students is available within Sherwood schools. Compliance with TVF&R standards and service requirements can be provided and will be reviewed with future applications for architectural review related to site design and layout.

Further analysis of current and proposed utilities is available within Exhibit I. The proposal is consistent with the City's Master Plans and the area is suitable for this type of development. This criterion is satisfied.

(iii) Trends in land improvement and development;

Response: As outlined in the Executive Summary, the state, region, and City are in the midst of a housing emergency. State and regional policies are addressing the shortages of all types of housing. The City's HNA identified a need for diverse housing choices and additional multifamily dwelling units. Future development of this and surrounding sites was considered when creating this plan map and text amendment proposal. A portion of the area of the map change is part of the Basalt Creek Planning Area which has been the focus of years of planning effort between the City of Tualatin, City of Wilsonville, Washington County, and Metro and is currently under various stages of development.

To the east, Phase 1 of the Autumn Sunrise Subdivision is under development. To the southwest, Plambeck Garden Apartments has received land use approval and is likely to begin construction soon. The City has purchased lands west of SW Boones Ferry Road for the purpose of providing public parklands. Areas of industrial employment to the south and west are readying for development and existing facilities are growing. Infrastructure improvements are in various stages of progress, with road, water, sewer, stormwater, and other improvements completed or scheduled in conjunction with this growth.

This application provides a significant opportunity for the City to provide needed housing within an area of future growth of the City. The proposed zoning would allow an appropriate use and one the City and region are in dire need of at a suitable site. This criterion is met.

(iv) Property values;

Response: The proposed amendments include a height limitation for future projects on the site. The future site plan will also propose a buffer of existing vegetation along SW Norwood Road, creating a visual barrier to the site. These measures will make the future development of the site compatible with the nearby homes. We are unaware of data that supports a conclusion that mitigated multifamily development negatively impacts property values of the surrounding area. The proposed rezone of the site increases the value of the church's excess land. The effects of the proposed amendments on property values were consciously considered and this criterion is met.

(v) The needs of economic enterprises and the future development of the area; needed right-of-way and access for and to particular sites in the area;

Response: The plan map and text amendment are necessary to provide additional needed housing within the City of Tualatin. Providing multifamily residential zoning in the proposed area relieves pressure to rezone other non-residential lands for the purpose of housing. Supplying this area relatively close to future employment centers provides the opportunity for employees to live nearer to their work. An employment center with nearby residences creates an attractive environment for companies relocating to the Basalt Creek Planning Area.

A future right-of-way dedication along SW Norwood Road will be provided to meet the short term and long-term transportation improvement needs identified by the City and County. A future architectural review application will address the specific right-of-way and access needs for the site development and ensure a thoughtfully designed project. This criterion is met.

(vi) Natural resources of the City and the protection and conservation of said resources;

Response: There are no mapped natural resources on the site affected by the plan map and text amendment. The site is largely vacant and underdeveloped with single-family residences and a parking lot. Vegetation is largely concentrated in the area adjacent to SW Norwood Road and surrounding Tax Lot 108. A wetland is located on the Horizon church and school site southwest of the plan map amendment area. This wetland was delineated and reviewed with the partition application submitted in November 2022. No physical development is proposed with this application for plan map and text amendment. The site will be further examined for natural resources, with any resources delineated, appropriately protected, and any impacts to resources mitigated with future development of the site. Future development of the site will need to comply with local, regional, state, and federal requirements for the protection of air, water, and land resources. This criterion is met.

(vii) Prospective requirements for the development of natural resources in the City;

Response: There are no mapped natural resources on the site affected by the plan map and text amendment. The site is largely vacant and underdeveloped with single-family residences and a parking lot. Vegetation is largely concentrated in the area adjacent to SW Norwood Road and surrounding Tax Lot 108.

No physical development is proposed with this application for plan map and text amendment, and future development of the site will need to comply with local, regional, state, and federal requirements for the protection of air, water, and land resources. The site will be examined for natural resources, with any resources delineated, appropriately protected, and any impacts to resources mitigated with future development of the site. This criterion is met.

(viii) The public need for healthful, safe, esthetic surroundings and conditions; and

Response: This application helps satisfy the public need for housing in an appropriate location that considers the specific site conditions. The 2019 *Housing Needs Analysis* forecasted demand for 101 dwelling units of new housing between 2020 and 2040 within the RH-HR zoning district. Per the analysis and as explained previously, new housing opportunities for RH-HR do not exist within Tualatin, leaving a deficiency of at least 101 dwelling units.

The Basalt Creek Planning Area is projected to provide around 2,300 new jobs per the *Basalt Creek Concept Plan* adopted by the City in 2018. This job growth is expected to drive the need for additional housing units in Tualatin, especially in areas close to the centers of future employment, such as the proposed amendment area. The subject site is one of the closest residential areas in proximity to the burgeoning employment areas and would be highly desirable to employees of businesses in the area.

Key findings of the 2019 HNA are that Tualatin must "plan for more single-family attached and multifamily dwelling units in the future to meet the City's housing needs" and that multifamily housing will account for 45 percent of future housing in the City. Another finding of the HNA states that the City could not "accommodate all of its housing needs" without employing strategies such as "by re-zoning land, increasing densities allowed in Plan Designations with deficits, or by accommodating housing in Plan Designations with surpluses." Approving this request will serve the purposes of the plans outlined within this narrative as well as meet the public need for efficient and safe future development of the area.

The provisions of the TDC address safety, health, and aesthetic factors that will be adequately considered as part of future applications for architectural design review.

The application complies with this criterion.

(ix) Proof of change in a neighborhood or area, or a mistake in the Plan Text or Plan Map for the property under consideration are additional relevant factors to consider.

Response: The Basalt Creek Planning Area south of SW Norwood Road is an area planned for future growth within the Cities of Tualatin and Wilsonville. The concept plan for this area includes lands planned for residential, neighborhood commercial, and industrial uses. The first stages of development in this area are currently underway with the approvals of the Autumn Sunrise Subdivision and Plambeck Gardens Apartments. The City has recently purchased ±14 acres of land in the vicinity of the project, at 23465 and 23515 SW Boones Ferry Road, for the purpose of providing public parks. These parks are planned to provide amenities for existing and future residents in this area of the City. This map and text amendment to allow for future residential uses is compatible and appropriate for the neighborhood as the planned growth occurs.

While there was no mistake in the plan text or map for the property under consideration, the HNA has identified that the City has a deficit of RH-HR lands and this narrative demonstrates that no buildable acres are available due to constraints. This application complies with this criterion.

(e) If the amendment involves residential uses, then the appropriate school district or districts must be able to reasonably accommodate additional residential capacity by means determined by any affected school district.

Response: The proposed plan map and text amendment will modify zoning code text, re-zone a portion of the Basalt Creek Planning Area, and increase residential densities in the area. The proposed site is located within the Sherwood School District; therefore, the school district's input was sought as part of this application. Those comments are included as part of Exhibit G. Sherwood School District's Chief Operations Officer, Jim Rose, provided confirmation that the district could accommodate any additional students from future multifamily development on the site. This criterion is met.

(f) Granting the amendment is consistent with the applicable State of Oregon Planning Goals and applicable Oregon Administrative Rules, including compliance with the Transportation Planning Rule TPR (OAR 660-012-0060).

Response: The proposed amendments are consistent with Oregon Statewide Planning Goal 1 – Citizen Involvement and Goal 2 – Land Use Planning and the applicable Oregon Administrative Rules. This proposal complies by satisfying the citizen involvement criteria of the TDC. The plan and map amendments are compliant with Goal 2 because the amendments satisfy the City's established land use planning processes and procedures.

By rezoning IN land to allow for housing, both Statewide Planning Goals 9 and 10 are met. The purpose of Goal 9 – Economic Development, is to make sure cities have enough land available to realize economic growth and development opportunities. There are no impacts to the inventory of commercial and industrial zoned lands with this application and major employment areas of the City are protected.

The amendments are compliant with Oregon Statewide Goal 10 (OAR 660-015-0000(10)) as they consider the City's *Housing Needs Analysis*, help address the City's deficit of housing by providing appropriate types and amounts of land for housing, provide an appropriate location currently undergoing development, and consider the carrying capacity of the City's natural resources.

The text amendment, as proposed, is consistent with OAR 660-007 (the Metropolitan Housing Rule), as it does not propose to change aspects of the type or density of housing within the RH-HR zoning district.

The proposal will allow the construction of needed housing and the efficient use of lands within the City of Tualatin. A review of Oregon's Transportation Planning Rule (OAR 660-012-0060) and trip generation analysis have been provided by a traffic engineer (Exhibit H). Based on this analysis, the proposed map amendment was found to meet the TPR criteria, and the transportation system was found to have the capacity to accommodate the proposed changes. This criterion has been met.

(g) Granting the amendment is consistent with the Metropolitan Service District's Urban Growth Management Functional Plan.

Response: Metro's *Urban Growth Management Functional Plan* is established in Metro Code as Section 3.07. The following Functional Plan sections are applicable to the proposed plan and map amendments:

Title 1: Housing Capacity: Title 1 requires that a City maintain or increase its housing capacity. The City's HNA established the need for housing. Specifically, it identified a deficit of lands available for high-density multifamily housing and medium high-density residential. (See below.)

Exhibit 4. Comparison of capacity of existing residential land with demand for new dwelling units and land surplus or deficit, Tualatin City Limits and Basalt Creek, 2020 to 2040
Source: Buildable Lands Inventory; Calculations by ECONorthwest. *Note: DU is dwelling unit.*

Residential Plan Designations	Capacity (Dwelling Units)	Demand for New Housing	Remaining Capacity (Supply minus Demand)	Land Surplus or (Deficit) Gross Acres
Low Density	523	466	57	10
Medium Low Density	386	71	315	27
Medium High Density	13	122	(109)	(7)
High Density	285	254	31	2
High Density High-Rise	-	101	(101)	(4)

As shown above, the Medium High-Density (RMH) and High-Density High-Rise (RH-HR) designations are deficient in future housing capacity, while there is a surplus in Low Density (RL), Medium Low Density (RML), and High-Density (RH) designations. A surplus of 315 dwelling units was calculated for the City's RML districts. As there are currently no buildable acres of RH-HR lands, a deficit of 101 dwelling units is shown. After the proposed plan map amendments, there will still be a surplus of RML land and there will no longer be a deficit of RH-HR land.

The proposed amendment does not seek to adjust minimum or maximum densities or uses required by the RH-HR zone. The proposed map and plan text amendment changes also do not decrease housing supply, density, or capacity within the City of Tualatin.

Title 4: Industrial and Other Employment Areas: This portion of the Functional Plan protects the supply of industrial and employment lands within cities. The site is currently

zoned to allow Medium-Low Residential and Institutional uses. While the area was previously designated by Metro as an Industrial Area (Title 4, Industrial and Other Employment Areas map), the proposed map amendment does not diminish the industrial or commercial capacities of the City because the area was not zoned for industrial or commercial uses by the City of Tualatin.

Title 7: Housing Choice: Title 7 establishes voluntary affordable housing production goals for local governments. The amendments do not prohibit regulated affordable housing on the project site, but the project plan does not plan to utilize or provide affordable housing. The amendments, however, will allow for the development of multifamily dwelling units, which provides additional housing choices; choices that are more affordable than detached single family housing. The City's HNA recommends that the City provide all types of housing, including market rate multifamily housing.

The increased density and change in established zoning will allow for the construction of needed multifamily dwelling units while not diminishing the City's ability to provide other deficient housing types or commercial and industrial lands.

This criterion is met and the application is consistent with the applicable sections of Metro Code Chapter 3.07.

(h) Granting the amendment is consistent with Level of Service F for the p.m. peak hour and E for the one-half hour before and after the p.m. peak hour for the Town Center 2040 Design Type (Comprehensive Plan Map 10-4), and E/E for the rest of the 2040 Design Types in the City's planning area.

Response: A Transportation Planning Rule review and trip generation analysis has been provided by a traffic engineer (Exhibit H). The Level of Service following the proposed changes is expected to meet the City's standards. The proposed plan map amendment and plan text amendment will not alter the transportation needs of the affected parcels in the City's Transportation System Plan. This criterion is met.

(i) Granting the amendment is consistent with the objectives and policies regarding potable water, sanitary sewer, and surface water management pursuant to applicable goals and policies in the Tualatin Comprehensive Plan, water management issues are adequately addressed during development or redevelopment anticipated to follow the granting of a plan amendment.

Response: The proposed plan map and text amendments are consistent with the City's objectives and policies regarding potable water, sanitary sewer, and stormwater management. This analysis is further detailed within Exhibit I – Utility Capacity Analysis and above in the response to TDC 33.070.(5)(d)(ii). This criterion is met.

(j) The applicant has entered into a development agreement. This criterion applies only to an amendment specific to property within the Urban Planning Area (UPA), also known as the Planning Area Boundary (PAB), as defined in both the Urban Growth Management Agreement (UGMA) with Clackamas County and the Urban Planning Area Agreement (UPAA) with Washington County.

Response: The Applicant has not entered into a development agreement nor is the site within the Urban Planning Area. This standard does not apply.

CHAPTER 41 – MEDIUM LOW DENSITY RESIDENTIAL ZONE (RML)

TDC 41.100 - Purpose

The purpose of this zone is to provide household living uses with a variety of housing types at moderately low densities. This district is primarily oriented toward middle housing types including attached dwellings, multi-family development, and manufactured dwelling parks.

Response: As detailed in the HNA, there is currently a surplus of approximately 27 acres of RML designated land. The proposed changes to the plan map will reduce the quantity of RML lands by approximately one acre or up to 25 dwelling units. The proposed text changes do not affect the RML district. After the approval of this application, sufficient RML land will continue to be available and the purpose of this district is not impacted.

CHAPTER 44 – HIGH DENSITY HIGH RISE ZONE (RH-HR)

TDC 44.100. - Purpose.

The purpose of the High Density High Rise (RH-HR) zone is to provide areas of the City within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club that are suitable for high density apartment or condominium towers.

Response: As previously mentioned, the purpose statement of the High-Density High-Rise (RH-HR) zoning district restricts the zone to the City's Central Urban Renewal area. The proposed text amendment would remove this restriction as well as the suggestion that the zone would only provide residences in "towers." The proposed amendments would also impose a 4-story height limitation south of SW Norwood Road to allow for increased compatibility between future multifamily structures and existing neighborhoods. Please see Exhibit B for the planned text changes.

The proposed changes would allow the City to meet its expected future needs for higher density housing.

TDC 44.200. - Use Categories.

(1) ***Use Categories.*** **Table 44-1 lists use categories Permitted Outright (P) or Conditionally Permitted (C) in the RH-HR zone. Use categories may also be designated as Limited (L) and subject to the limitations listed in Table 44-1 and restrictions identified in TDC 44.210. Limitations may restrict the specific type of use, location, size, or other characteristics of the use category. Use categories which are not listed are prohibited within the zone, except for uses which are found by the City Manager or appointee to be of a similar character and to meet the purpose of this zone, as provided in TDC 31.070.**

(2) ***Overlay Zones.*** **Additional uses may be allowed in a particular overlay zone. See the overlay zone Chapters for additional uses.**

[…]

Response: The applicant has proposed the removal of the locational restriction contained within the Purpose section of the code (Exhibit B). The uses allowed within the zoning district by Table 44-1 have not been proposed to change as part of this application.

[…]

TDC 44.220. - Housing Types.

Table 44-2 lists Housing Types permitted in the RH-HR zone. Housing types may be Permitted Outright (P), Conditionally Permitted (C), or Not Permitted (N) in the RH-HR zone.

[…]

Response: The contents of Table 44-2 have not been proposed to change as part of this application.

TDC 44.300. - Development Standards.

Development standards in the RH-HR zone are listed in Table 44-3. Additional standards may apply to some uses and situations, see TDC 44.310.

Table 44-3
Development Standards in the RH-HR Zone

STANDARD	REQUIREMENT	LIMITATIONS AND CODE REFERENCES
MAXIMUM DENSITY		
Household Living Uses	Maximum: 30 units per acre Minimum: 26 units per acre	
Retirement Housing or Congregate Care Facility	45 units per acre	
Nursing Facility	45 units per acre	
Group Living Uses	30 units per acre	Does not apply to Nursing Facility or Congregate Care Facility.
MINIMUM LOT SIZE		
Multi-Family Structure		
• Development on Less than One Acre	10,000 square feet	For up to two units, plus an additional 1,198 square feet for each unit exceeding two.
• Development on More than One Acre	1,452 square feet per unit	
Multi-Family Structure under Condominium Ownership	20,000 square feet	Limited to the primary condominium lot.
All Other Permitted Uses	10,000 square feet	
Conditional Uses	20,000 square feet	
Infrastructure and Utilities Uses	—	As determined through the Subdivision, Partition, or Lot Line Adjustment process.
MINIMUM AVERAGE LOT WIDTH		
Townhouses (Rowhouses)	14 feet	
Multi-Family Structure	75 feet	May be 40 feet on a cul-de-sac street.
Multi-Family Structure under Condominium Ownership	75 feet	Limited to the primary condominium lot. Minimum lot width at street is 40 feet.
All Other Permitted Uses	75 feet	
Conditional Uses	100 feet	Minimum lot width at street is 40 feet.
Flag Lots	—	Must be sufficient to comply with minimum access requirements of TDC 73C.
MINIMUM SETBACKS		
Front Setback		Minimum setback to a garage door must be 20 feet.
• 1 story structure	20 feet	
• 1.5 story structure	25 feet	
• 2 story structure	30 feet	
• 2.5 story structure	35 feet	

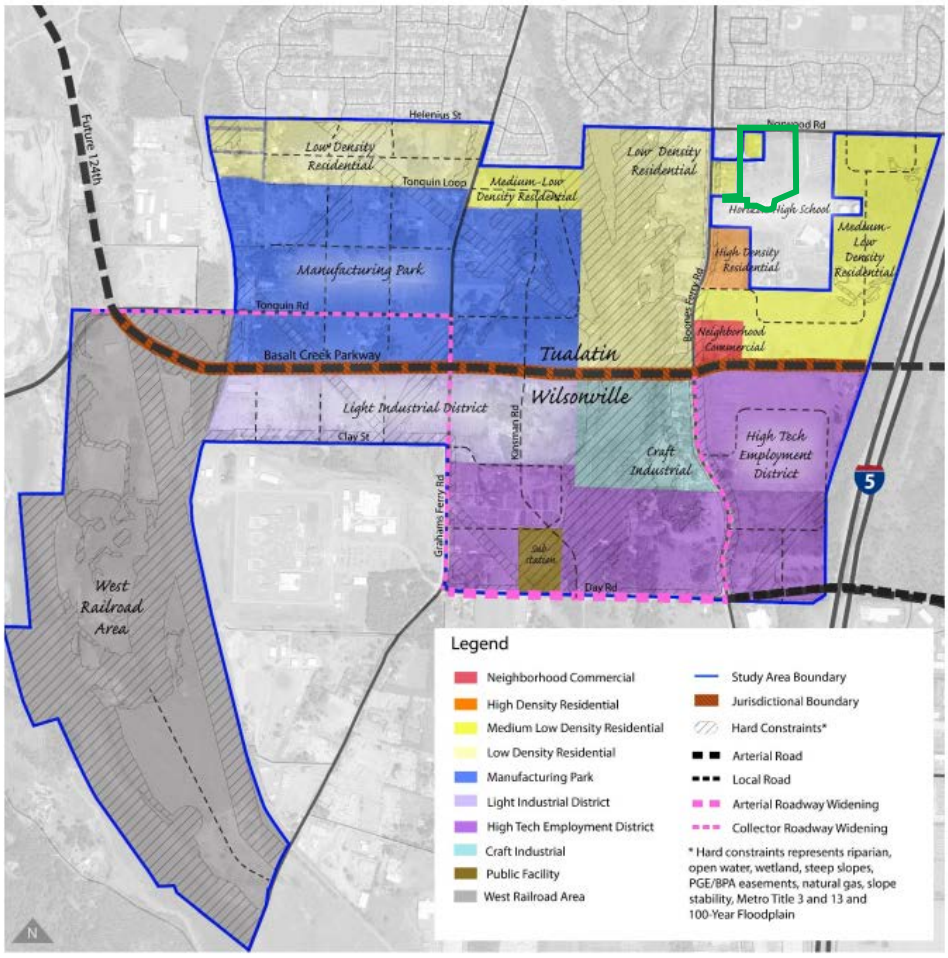
• Over 2.5 story structure	—	As determined through Architectural Review process. No setback must be required which is greater than the height of the structure.
Side and Rear Setback		Where living spaces face a side yard, the minimum setback must be 10 feet.
• 1 story structure	5 feet	
• 1.5 story structure	7 feet	
• 2 story structure	10 feet	
• 2.5 story structure	12 feet	
• Over 2.5 story structure	—	As determined through Architectural Review process. No setback must be required which is greater than the height of the structure.
Corner Lots	—	On corner lots, the setback is the same as the front yard setback on any side facing a street other than an alley.
Minimum Distance Between Buildings within One Development	10 feet	
Parking and Vehicle Circulation Areas	10 feet	
Conditional Uses	—	As determined through Architectural Review process. No minimum setback must be greater than 50 feet.
Any Yard Adjacent to a Wetland Protected Area	100 feet	As defined in TDC Chapter 71.
Any Yard Area Adjacent to Basalt Creek Parkway	50 feet	
STRUCTURE HEIGHT		
Minimum Height, Multi-Family and Condominium Developments	4 stories	
Maximum Height	64 feet	If structure does not include underground parking, maximum height is 5 stories. If the first story includes underground parking, maximum height is 6 stories. Regardless of the number of stories, structure height must not exceed 64 feet.
MAXIMUM LOT COVERAGE		
All Uses	45%	

Response: The proposed text amendment would modify the development standards of TDC 44.300 to place a 4-story height limitation on structures in the RH-HR zoning district in areas south of SW Norwood Road. Because there are no buildable RH-HR-zoned properties available within the City's core areas, properties which may be designated for this zoning may be proximate to lower density zoning. This site is generally surrounded by medium-density residential and institutional uses. The proposed code provision limits the height of buildings to 4-stories to remain compatible with the adjacent residential and institutional uses.

[…]

BASALT CREEK CONCEPT PLAN

Figure 8 Basalt Creek Land Use Concept Map



Response: The Basalt Creek Concept Plan was included in the Comprehensive Plan Update in 2019. The Basalt Creek Planning Area, shown above outlined in blue, includes a one-acre portion of the ±9.2-acre site. (The site is outlined in green.) The one-acre area is designated Medium Low Residential (RML) and is currently used for a single-family detached home. This area conforms with the applicable sections of the Basalt Creek Concept Plan, reviewed herein.

Concept Plan for Basalt Creek

Development Types

Table 3 Summary of Development Types Identified for Basalt Creek Planning Area by Jurisdiction

Jurisdiction	Land Use Designation	Buildable Acreage	Households		Employment	
			Count	Density per Gross Acre	Count (jobs)	Jobs per Gross Acre
Tualatin	High Density Residential	3.36	67	19.9	-	-
	Medium-Low Density Residential	59.83	374	6.3	-	-
	Low Density Residential	24.83	134	5.4	-	-
	Neighborhood Commercial	2.89	-	-	33	11.3
	Manufacturing Park	92.95	-	-	1,897	20.4
	Functionally Unbuildable	10.37	-	-	-	-
	Tualatin Subtotal	**194.23**	**575**		**1,929**	

Tualatin

Housing. Most of the remaining land north of the proposed Basalt Creek Parkway (beyond employment land) is allocated to a mix of residential uses at varying densities. The Concept Plan organizes residential land uses into two general areas that are intended to have easy access to services and be connected to parks, schools, and natural areas.

1. The plan focuses the lowest density housing (a mixture of low-density and medium-low density) along the northern portion of the Planning Area and low density along the west side of Boone's Ferry Road, adjacent to existing neighborhoods of Tualatin. This land is expected to accommodate 134 new households.

2. The eastern portion of the Tualatin future annexation area is anticipated to be a mixture of high and medium-low density residential; the land immediately east of Boones Ferry Rd is intended for high density housing; The remainder of the land east and south of Horizon School is planned for medium-low density residential. This eastern subarea is expected to accommodate 407 new housing units in Tualatin. This land is near the intersection between Boones Ferry Road and the new Basalt Creek Parkway.

Response: As the site represents a small portion of the area accounted for within the Basalt Creek Concept Plan, the proposed map and text amendment does not signify a substantial change in the number of dwelling units which will be provided within the Basalt Creek Planning Area. With its current RML designation, Table 3 above assumed the site would

accommodate 6.3 dwelling units per gross acre. (It is worth noting that since the adoption of the Basalt Creek Concept Plan in 2019, middle housing code was adopted by the City in 2021 which now allows up to 25 townhome units per net acre in the RML zone.)

The City's *Housing Needs Analysis* determined that the City has a 27-acre surplus of RML lands and a deficit of High Density High Rise Residential lands. The conversion of RML lands to RH-HR lands can help remedy these projected deficits in housing types and densities. The area of the proposed RH-HR lands is east of SW Boones Ferry Road as described under (2) above and is consistent and compatible with the planned uses within the Basalt Creek Concept Plan.

The proposal does not contradict the identified policies of the Basalt Creek Concept Plan.

IV. Conclusion

The required findings have been made and this written narrative and accompanying documentation demonstrate that the application is consistent with the applicable provisions of the Tualatin Development Code and the Tualatin Comprehensive Plan. The evidence in the record is substantial and supports approval of the application. Therefore, the Applicant respectfully requests that the City approve this application.

CHAPTER 44 HIGH DENSITY HIGH RISE ZONE (RH-HR)

TDC 44.100. Purpose.

The purpose of the High Density High Rise (RH-HR) zone is to provide areas of the City ~~within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club~~ that are suitable for high density apartment or condominium~~s towers~~.

TDC 44.200. Use Categories.

(1) *Use Categories.* Table 44-1 lists use categories Permitted Outright (P) or Conditionally Permitted (C) in the RH-HR zone. Use categories may also be designated as Limited (L) and subject to the limitations listed in Table 44-1 and restrictions identified in TDC 44.210. Limitations may restrict the specific type of use, location, size, or other characteristics of the use category. Use categories which are not listed are prohibited within the zone, except for uses which are found by the City Manager or appointee to be of a similar character and to meet the purpose of this zone, as provided in TDC 31.070.

(2) *Overlay Zones.* Additional uses may be allowed in a particular overlay zone. See the overlay zone Chapters for additional uses.

Table 44-1
Use Categories in the RH-HR Zone

USE CATEGORY	STATUS	LIMITATIONS AND CODE REFERENCES
RESIDENTIAL USE CATEGORIES		
Household Living	P/C	Permitted housing types subject to TDC 44.220.
Residential Accessory Uses	P (L)	Permitted uses limited to Family Day Care subject to ORS 329A.440.
Group Living	P/C (L)	Permitted uses limited to: • Residential Home; • Residential Facility; and • Nursing Facility Conditional uses limited to Congregate Care Facility subject to TDC 34.400.
COMMERCIAL USE CATEGORIES		
Agriculture	C (L)	Subject to TDC 44.210(1).
Durable Goods Sales	C (L)	Conditional uses limited to retail nurseries.
Retail Sales and Service	C (L)	Conditional uses limited to Child Day Care Center.
INSTITUTIONAL USE CATEGORIES		
Assembly Facilities	C (L)	Conditional uses limited to places of religious worship. See TDC 34.800 Religious uses and ORS 227.500 pertaining to activities customarily associated with the practices of religious activity.
Community Services	C	
Medical Center	C (L)	Conditional uses limited to a hospital.

Schools	C	—
INFRASTRUCTURE AND UTILITIES USE CATEGORIES		
Basic Utilities	P/C (L)	Permitted uses limited to water or sewage pump stations and pressure reading stations. Conditional uses limited to water reservoirs, with a maximum height of 75 feet.
Greenways and Natural Areas	P	—
Parks and Open Areas	P/C (L)	Permitted uses limited to public park or playground. Conditional uses limited to golf course or country club with golf course.
Public Safety Facilities	C (L)	Conditional uses limited to fire stations.
Transportation Facilities	P	—
Wireless Communication Facilities	P/C (L)	Subject to TDC 44.210(2). Maximum height and minimum setbacks subject to TDC Chapter 73F.

TDC 44.210. Additional Limitations on Uses.

(1) *Agricultural Uses.* The following agricultural uses are allowed with a conditional use permit within areas designated on Comprehensive Plan Map 10-6:

(a) *Conditional Use of Agricultural Animals.* Raising of agricultural animals, limited to cattle, horses and sheep. The City Council may limit the number of animals to be allowed on a specific parcel of property; and

(b) *Agricultural structures such as barns, stables, sheds, but excluding feed lots.* Feed lots are prohibited.

(2) *Wireless Communication Facilities.* Wireless Communication Facilities may be permitted uses or conditional uses, depending on the nature of the use.

(a) *Permitted Uses.* The following uses are permitted outright:

(i) Wireless Communication Facility Attached, provided the facility is not mounted on a single-family dwelling or its accessory structures; and

(ii) Wireless Communication Facility, provided the facility is located within 300 feet of the centerline of Interstate 5.

(b) *Conditional Uses.* All other detached wireless communication facilities may be allowed with a conditional use permit.

(Ord. No. 1450-20 , § 22, 12-14-20)

TDC 44.220. Housing Types.

Table 44-2 lists Housing Types permitted in the RH-HR zone. Housing types may be Permitted Outright (P), Conditionally Permitted (C), or Not Permitted (N) in the RH-HR zone.

Table 44-2
Housing Types in the RH-HR Zone

HOUSING TYPE	STATUS	LIMITATIONS AND CODE REFERENCES
Single-Family Dwelling	N	
Accessory Dwelling Unit	N	
Duplex Townhouse (or Rowhouse)	P	See definition in TDC 31.060.
Multi-Family Structure	P	See definition in TDC 31.060.
Manufacturing Dwelling	N	
Manufactured Dwelling Park	N	
Retirement Housing Facility	C	Subject to TDC 34.400.
Residential Home	P	See definition in TDC 31.060.

TDC 44.300. Development Standards.

Development standards in the RH-HR zone are listed in Table 44-3. Additional standards may apply to some uses and situations, see TDC 44.310.

Table 44-3
Development Standards in the RH-HR Zone

STANDARD	REQUIREMENT	LIMITATIONS AND CODE REFERENCES
MAXIMUM DENSITY		
Household Living Uses	Maximum: 30 units per acre Minimum: 26 units per acre	
Retirement Housing or Congregate Care Facility	45 units per acre	
Nursing Facility	45 units per acre	
Group Living Uses	30 units per acre	Does not apply to Nursing Facility or Congregate Care Facility.
MINIMUM LOT SIZE		
Multi-Family Structure		
• Development on Less than One Acre	10,000 square feet	For up to two units, plus an additional 1,198 square feet for each unit exceeding two.
• Development on More than One Acre	1,452 square feet per unit	
Multi-Family Structure under Condominium Ownership	20,000 square feet	Limited to the primary condominium lot.
All Other Permitted Uses	10,000 square feet	
Conditional Uses	20,000 square feet	
Infrastructure and Utilities Uses	—	As determined through the Subdivision, Partition, or Lot Line Adjustment process.
MINIMUM AVERAGE LOT WIDTH		
Townhouses (Rowhouses)	14 feet	
Multi-Family Structure	75 feet	May be 40 feet on a cul-de-sac street.
Multi-Family Structure under Condominium Ownership	75 feet	Limited to the primary condominium lot. Minimum lot width at street is 40 feet.

All Other Permitted Uses	75 feet	
Conditional Uses	100 feet	Minimum lot width at street is 40 feet.
Flag Lots	—	Must be sufficient to comply with minimum access requirements of TDC 73C.
MINIMUM SETBACKS		
Front Setback		Minimum setback to a garage door must be 20 feet.
• 1 story structure	20 feet	
• 1.5 story structure	25 feet	
• 2 story structure	30 feet	
• 2.5 story structure	35 feet	
• Over 2.5 story structure	—	As determined through Architectural Review process. No setback must be required which is greater than the height of the structure.
Side and Rear Setback		Where living spaces face a side yard, the minimum setback must be 10 feet.
• 1 story structure	5 feet	
• 1.5 story structure	7 feet	
• 2 story structure	10 feet	
• 2.5 story structure	12 feet	
• Over 2.5 story structure	—	As determined through Architectural Review process. No setback must be required which is greater than the height of the structure.
Corner Lots	—	On corner lots, the setback is the same as the front yard setback on any side facing a street other than an alley.
Minimum Distance Between Buildings within One Development	10 feet	
Parking and Vehicle Circulation Areas	10 feet	
Conditional Uses	—	As determined through Architectural Review process. No minimum setback must be greater than 50 feet.
Any Yard Adjacent to a Wetland Protected Area	100 feet	As defined in TDC Chapter 71.
Any Yard Area Adjacent to Basalt Creek Parkway	50 feet	
STRUCTURE HEIGHT		
Minimum Height, Multi-Family and Condominium Developments	4 stories	
Maximum Height	64 feet	South of SW Norwood Road, structure height is limited to 4 stories or 50 feet, whichever is less. If structure does not include underground parking, maximum height is 5 stories. If the first story includes underground parking, maximum height is 6 stories. Regardless of the number of stories, structure height must not exceed 64 feet.

MAXIMUM LOT COVERAGE		
All Uses	45%	

(Ord. No. 1450-20 , § 23, 12-14-20)

TDC 44.310. Projections Into Required Yards.

The following architectural features may project into a required front or rear yard setback area not more than three feet, and into a required side yard not more than two feet: cornices, eaves, canopies, decks, sun-shades, gutters, chimneys, flues, belt courses, leaders, sills, pilasters, lintels, ornamental features, and other similar architectural features.

TDC 44.320. Density Bonus or Setback Reduction for Developments Adjacent to Greenways and Natural Areas.

To preserve natural areas and habitat for fish and wildlife, the decision-making authority may provide a density bonus or setback reduction for developments that are adjacent to Greenways or Natural Areas that dedicate land for conservation or public recreational purposes, in accordance with the following standards:

(1) *Density Bonus.* The lot(s) may be developed to the same number of dwelling units that would be permitted in the RH-HR zone if none of the land area in the Greenway or Natural Area lots were in a conservation or protection area.

(2) *Setback Reduction.* All permitted uses may be allowed a reduction of up to 35 percent of the front, side or rear yard setbacks, as determined through the Architectural Review process, if as a result the buildings are farther away from fish and wildlife habitat areas. Setback areas that abut property lines in the RL zone are not eligible for the setback reduction.

(3) *Location of Greenway or Natural Area Lot.* A portion of the parcel must be located wholly in one of the following conservation or protection areas:

  (a) Natural Resource Protection Overlay (NRPO) District (TDC Chapter 72); or

  (b) Clean Water Services Vegetated Corridor.

(4) *Ownership of Greenway or Natural Area Lot.* The ownership of each Greenway or Natural Area Lot must be one of the following.

  (a) Dedicated to the City at the City's option;

  (b) Dedicated in a manner approved by the City to a non-profit conservation organization; or

  (c) Retained in private ownership.

(5) *Ownership Considerations.* The decision-making authority must consider, but not limited to, the following factors when determining the appropriate ownership of the Greenway or Natural Area Lot:

  (a) Does the Park and Recreation Master Plan designate the lot for a greenway, pedestrian or bike path, public park, recreation, overlook or interpretive facility, or other public facility;

  (b) Does the lot include one or more designated Heritage Trees, or one or more significant trees;

  (c) Does the lot provide a significant view or esthetic element, or does it include a unique or intrinsically valuable element;

  (d) Does the lot connect publicly owned or publicly accessible properties;

(e) Does the lot abut an existing park, greenway, natural area or other public facility;

(f) Does the lot provide a public benefit or serve a public need;

(g) Does the lot contain environmental hazards;

(h) Geologic stability of the lot; and

(i) Future maintenance costs for the lot.

Executive Summary

As summarized in the key findings below, the proposed Norwood Apartments project will create a minor impact on the transportation system, which will be mitigated by the recommended traffic signal at the intersection of SW Boones Ferry Road & Norwood Road. The traffic signal is warranted under background conditions without the proposed project, and the long-term analysis of the reasonable worst case scenario traffic analysis of the existing zone concludes that the SW Boones Ferry Road & SW Norwood Road intersection will fail without a signal. However, if the project installs a signal at that intersection, then the existing near-term and long-term problem is solved. The project's traffic is mitigated so that the street network performance standards are met and the zone change will not require any additional mitigation or change in classification.

Overview

1. The proposed Norwood Apartments project includes the development of a 276-unit apartment complex on a site located south of SW Norwood Road and east of SW Boones Ferry Road in Tualatin, Oregon. The project site consists of two lots (Tax Lot 2S135D 000108 and a portion of Tax Lot 2S135D 000106) with an approximate total of 9.2 acres.
2. The application will require rezoning the site from Institutional (IN) and Medium Low Density Residential (RML) to High Density-High Rise Residential (RH-HR).
3. The site will take access from SW Norwood Road. An emergency access connection to the Horizon School circulation network is also provided.

Proposed Zone Change Findings

4. To understand the potential impacts of the requested zone change, the reasonable worst-case land uses under existing and proposed zoning were compared. Under existing zoning, the residentially-zoned land was assumed to redevelop to its maximum density with 25 attached homes while the institutionally-zoned land was assumed to develop with a 250-student private school. The proposed development of 276 apartments is the maximum density under the proposed zoning.
5. The existing zoning would likely generate a greater number of trips during the morning peak hour, when congestion associated with schools is most prevalent. However, the proposed zoning could generate a greater number of trips in the evening peak hour; thus, a TPR analysis was performed.
6. A comparison of long-term operations with the existing and proposed zoning shows that the proposed zoning would have a significant effect that can be mitigated with a traffic signal at the intersection of SW Boones Ferry Road & SW Norwood Road, to be installed by the applicant at the time of development. This proposal is consistent with the mitigation recommended to address the impacts of the proposed development in the TIA.

Traffic Impact Analysis Findings

7. The Norwood Apartments project could be characterized as two different land use categories, low-rise multifamily housing or mid-rise multifamily. This analysis uses the more conservative (e.g., assumes a higher level of traffic) land use category, low-rise multifamily housing, as requested by the City of Tualatin. The trip generation calculations show that the proposed Norwood Apartments development is estimated to

generate a net increase of 107 trips during the morning peak hour, 137 trips during the evening peak hour, and 1,826 daily trips during the average weekday.

8. In general, impacts from the proposed project are expected to be minor. All study intersections show operational results that meet standards under all analysis scenarios except for the intersection of SW Boones Ferry Road & SW Norwood Road if it remains unsignalized. However, with the recommended signal installation, this intersection will be improved to meet agency standards.

9. In general, changes in 95th percentile queuing between the year background and buildout conditions are anticipated to be small, one vehicle or two vehicles. As with the operational findings, one intersection is anticipated to have significant growth in queues: SW Boones Ferry Road & SW Norwood Road. However, with the recommended signal installation, queueing will be consistently improved.

10. A traffic signal is recommended at the intersection of SW Boones Ferry Road & SW Norwood Road. With a signal but no widening on SW Norwood Road, the overall intersection v/c ratio will meet the City mobility standard of LOS D and the County mobility target of 0.90. On the westbound approach, delays will be shorter than background conditions without the proposed project and recommended traffic signal. The queuing analysis shows that even with five years of additional growth, the 95th percentile queues on the shared westbound approach will not extend to the first driveway on SW Norwood Road. Therefore, widening SW Norwood Road to include a westbound right-turn lane or widening SW Boones Ferry Road to lengthen the northbound right-turn lane should not occur until the adjacent parcels redevelop.

11. Traffic signal warrants are met under both background and buildout conditions at the intersection of SW Boones Ferry Road & SW Norwood Road. Installing a traffic signal at the intersection of SW Boones Ferry Road & SW Norwood Road is a recommended mitigation measure.

12. Traffic signal warrants are not met at the site access intersection with SW Norwood Road or at the unsignalized intersection of SW Norwood Road & SW 82nd Avenue.

13. Left-turn lane warrants are not met at the proposed site access intersection on SW Norwood Road for either peak hour under the 2026 buildout scenario for any analysis period.

14. At the proposed site accesses on SW Norwood Road, dense foliage restricts existing sight lines; however, preliminary assessment or horizontal and vertical curvature indicate that the 500-foot sight distance requirement is expected to be satisfied.

15. On SW Norwood Road, the minimum access spacing standard of 100 feet will be met with construction of the proposed site access.

16. Based on a review of the most recent five years of available crash data, no significant trends or crash patterns were identified at any of the study intersections. Accordingly, no safety mitigation is recommended per the crash data analysis.

Project Description

Introduction

The proposed Norwood Apartments project includes the development of a 276-unit apartment complex on a site located south of SW Norwood Road and east of SW Boones Ferry Road in Tualatin, Oregon. The application will require rezoning the site from Institutional (IN) and Medium Low Density Residential (RML) to High Density/High Rise Residential (RH-HR). The site will take all access from SW Norwood Road.

The purposes of this study are to determine whether the transportation system within the vicinity of the site is capable of safely and efficiently supporting the proposed development, to determine any mitigation that may be necessary to do so, and to demonstrate compliance with the Transportation Planning Rule (TPR).

Based on prior scoping coordination with the City of Tualatin and Washington County, the report includes safety and capacity analyses at 6 intersections:

1. SW Boones Ferry Road & SW Ibach Street
2. SW Boones Ferry Road & SW Norwood Road
3. Site Access & SW Norwood Road (future intersection)
4. SW 82nd Avenue & SW Norwood Road
5. SW Boones Ferry Road & Basalt Creek Parkway Extension (future intersection)
6. SW Boones Ferry Road & SW Day Road

Detailed information on traffic counts, trip generation calculations, safety analyses, and level of service calculations are included in the appendix to this report.

Location Description

The project site consists of tax lots 2S135D 000108 and 2S135D 000106. Lot 108 includes a 1.0-acre parcel located at 9300 SW Norwood Road and is currently occupied by one single-family home. The lot is currently outside the City of Tualatin with a Washington County zoning designation of FD-20; once annexed, the lot will be zoned Medium Low Density Residential (RML).

Lot 106 includes an 8.2-acre portion of the parcel located at 23370 SW Boones Ferry Road, which is part of the Horizon Christian School property. The portion of this lot to be redeveloped is currently zoned Institutional (IN) and is occupied by one single-family home. It is also developed with a parking lot with approximately 120 striped spaces. Both parcels are proposed for rezoning to High Density/High Rise Residential (RH-HR).

The proposed Norwood Apartments development includes the development of six 4-story buildings totaling 276 apartments on the site. Future access to the site will be provided via one new driveway along SW Norwood Road. An emergency access connection to the Horizon School circulation network is also provided.

A site plan is included in Appendix A and the site location is shown in Figure 1 with the project site outlined in yellow.

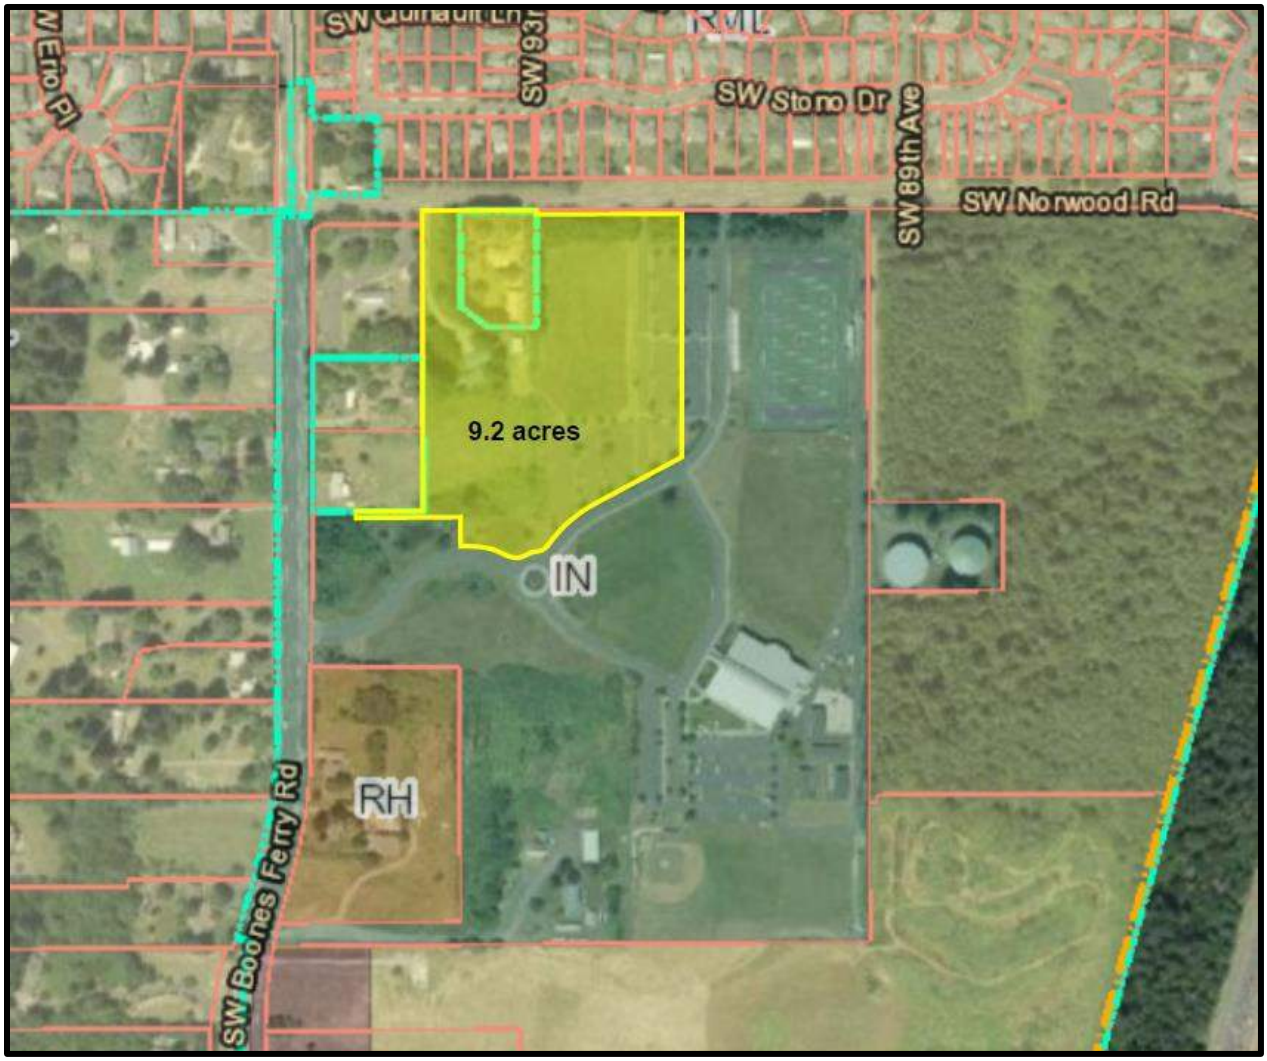

Figure 1: Project Location (Source: City of Tualatin Interactive Zoning Map)

Vicinity Streets

Five roadways within the study area are expected to be impacted by the proposed development. The characteristics of these roadways are summarized in Table 1.

Study Intersections

Through coordination with the City of Tualatin and Washington County, six study intersections were identified for evaluation. The existing characteristics of these intersections are summarized in Table 2. A vicinity map showing the project site, vicinity streets, and study intersection configurations is shown in Figure 2.

Table 1: Roadway Characteristics

Street Name	Jurisdiction	Functional Classification	Posted Speed	Curbs & Sidewalks	On-Street Parking	Bicycle Facilities
SW Boones Ferry Road	City of Tualatin / Washington County	Major Arterial / Arterial	35 / 45 mph[1]	Partial Both Sides	None	Bike Lanes
SW 82nd Avenue	Washington County	Major Collector	45 mph	None	None	None
SW Ibach Street / Court	City of Tualatin	Major Collector / Local	35 / 25 mph	Both Sides	None	Bike Lanes
SW Norwood Road	Washington County	Collector (Major Collector[2])	45 mph	Both Sides	None	None
SW Day Road	City of Wilsonville	Major Arterial	40 mph	South Side	None	Bike Lanes

Notes:
1. Speed increases from 35 mph to 45 mph south of SW Norwood Road.
2. City of Tualatin Classification.

Table 2: Vicinity Intersection Descriptions

Intersection		Geometry	Traffic Control	Phasing/Stopped Approaches
1	SW Boones Ferry Road & SW Ibach Street/SW Ibach Court	Four-Legged	Signalized	Protected NB Left/ Permitted EB/WB/SB Left
2	SW Boones Ferry Road & SW Norwood Road	Three-Legged	Stop-Controlled	WB Stop-Controlled
3	Site Access & SW Norwood Road (future intersection)	Three-Legged	Stop-Controlled	NB Stop-Controlled
4	SW 82nd Avenue & SW Norwood Road	Three-Legged	Stop-Controlled	NB/SB Stop-Controlled Except SB Free Right

Public Transit

The project is located near one transit line that has stops within less than a one-quarter mile walking/biking distance of the site.

Route 96 – Tualatin/I-5 provides weekday rush-hour service between Commerce Circle and the Mohawk Park & Ride in Tualatin, and regular service between Mohawk Park & Ride and Portland City Center. Weekday service is scheduled from approximately 5:15 AM to 9:10 PM with headways of approximately 30 to 60 minutes. There is currently no weekend or holiday service. The nearest bus stops to the site are currently located just south of the intersection of SW Boones Ferry Road at SW Norwood Road.

Site Trips

The proposed development consists of six 4-story buildings totaling 276 apartments. All access will be taken from SW Norwood Road.

Trip Generation

To estimate the number of trips that will be generated by the proposed development, trip rates from the *Trip Generation Manual*[1] were used. Rates from land use code 210, *Single-Family Detached Housing*, were used to estimate existing site trip generation based on the number of dwelling units. City staff requested land use code 220, *Multifamily Housing (Low-Rise)*[2] be used to estimate the proposed trip generation of the 276 apartment units; therefore, this assumption was used in the trip estimates presented in Table 3.

As shown in Table 3, the trip generation calculations as requested by the City show that the proposed Norwood Apartments development is estimated to generate a net increase of 107 trips during the morning peak hour, 137 trips during the evening peak hour, and 1,826 daily trips during the average weekday. Detailed calculation worksheets are provided in Appendix A.

Table 3: Trip Generation Summary

ITE Code – Land Use	Intensity (DU)	Morning Peak Hour			Evening Peak Hour			Weekday Trips
		In	Out	Total	In	Out	Total	
Existing								
210 - Single-Family Detached Housing	-2	0	-1	-1	-1	-1	-2	-18
Propose								
220 - Multifamily Housing (Low-Rise)	276	26	82	108	88	51	139	1,844
Net New Trips		26	81	107	87	50	137	1,826

Trip Distribution

The directional distribution of site trips to/from the project site was assumed to be the same as the distribution used for other approved projects in the area. That trip distribution was estimated based on the locations of likely trip destinations, locations of major transportation facilities in the site vicinity, and a select zone analysis using Metro's Regional Travel Demand Forecasting Model. An additional consideration was Google Maps estimated travel times along various routes to/from the site.

[1] Institute of Transportation Engineers (ITE), *Trip Generation Manual*, 10th Edition, 2017.

[2] As the proposed apartments will be four stories, ITE guidance suggests that the appropriate land use code for the development is 221, *Multifamily Housing (Mid-Rise),* which includes data for apartment complexes ranging from four to 10 stories. Trip rates for this land use are generally lower during the evening peak and over the course of the day than those for land use code 220, *Multifamily Housing (Low-Rise)*, which includes data for apartment complexes ranging from one to three stories. Using the low-rise multifamily housing option provides a more conservative estimate of trip generation.

The initial distribution, prior to the construction of the Basalt Creek Parkway Extension, is summarize below:

- Approximately 40 percent of site trips will travel to/from the north on SW Boones Ferry Road
    - Approximately 3 percent will travel to/from uses south of SW Ibach Road
    - Approximately 5 percent will travel to/from SW Ibach Road
    - Approximately 32 percent will travel to/from areas north of SW Ibach Road
- Approximately 45 percent of site trips will travel to/from the south on SW Boones Ferry Road
    - Approximately 10 percent will travel to/from SW Day Road
    - Approximately 35 percent will travel to/from areas south of SW Day Road
- Approximately 15 percent of site trips will travel to/from the east on SW Norwood Road

The anticipated project trip distribution and assignment of site trips generated during the morning and evening peak hours is provided in Figure 3.

Basalt Creek Parkway Extension

Washington County is currently engineering the extension of the Basalt Creek Parkway eastward from SW Grahams Ferry Road to SW Boones Ferry Road at a connection just south of SW Greenhill Lane. Although funding for construction has not been secured yet, both city and county staff requested an analysis of the study area with the extension. The following changes in trip distribution with the Basalt Creek Parkway Extension anticipated are:

- Shift five (5) percent of project trips heading north on SW Boones Ferry Road (continuing onto SW Ibach Street and SW Avery Street) to the Basalt Creek Parkway Extension.
- Shift eight (8) percent of project trips heading south on SW Boones Ferry Road (continuing onto SW Day Road) to the Basalt Creek Parkway Extension.

These changes are not anticipated to change the project study area. The resulting project trip distribution and assignment of site trips generated during the morning and evening peak hours with the Basalt Creek Parkway Extension is provided in Figure 4.

Traffic Volumes

Existing Conditions

Traffic counts were conducted at the study intersections on Thursday, October 20th, 2022, from 7:00 AM to 9:00 AM and from 4:00 PM to 6:00 PM. Additionally, a 12-hour count (7:00 AM to 7:00 PM) from September 29, 2021, was obtained for the intersection of SW Boones Ferry Road & SW Norwood Road. Counts were collected while school was in session, and no COVID-19 adjustments were used as traffic volumes have largely stabilized.

The year 2022 data was summarized for each intersection's respective morning and evening peak hours. At the intersection of SW Boones Ferry Road & SW Norwood Road, peak hour data was also summarized for the year 2021. During the morning peak hour, the year 2021 peak hour counts were lower than the 2022 peak hour counts; therefore, only the 2022 count data were used. During the evening peak hour, the year 2021 peak hour counts were higher for some but not all turning movements; therefore, an average of the two traffic counts was used. Additionally, the through volumes on SW Boones Ferry Road at SW Ibach Road and SW Day Road were also increased to reflect the higher demand.

Figure 5 shows the existing traffic volumes at the study intersections during the morning and evening peak hours.

Background Conditions

To provide analysis of the impact of the proposed development on the nearby transportation facilities, an estimate of future traffic volumes is required. Two components were included in the background traffic estimates: 1) general growth and 2) growth associated with planned developments.

For the background growth, a short-term annual growth rate of two percent per year was applied to the year 2022 existing traffic volumes. This growth rate is generally consistent with historical growth rates on study area roadways although conservatively higher than trends on SW Boones Ferry Road.

Two projects were assumed for the in-process development. The affordable housing development known as Plambeck Gardens is planned to be constructed to the south of the project site along SW Boones Ferry Road. The buildout year for this project was assumed to be 2025. The Autumn Sunrise housing development is planned to be constructed east and south of the project site, taking access via SW Boones Ferry Road and SW Norwood Road. The buildout year for this project was assumed to be 2026. Therefore, trip assignment associated with both nearby developments were included in the 2026 background year scenario. Detailed project trip information for both planned developments can be found in Appendix B.

Figure 6 shows the projected year 2026 background traffic volumes at the study intersections during the morning and evening peak hours.

Background Year 2026 with Basalt Creek Parkway Extension

Washington County is currently engineering the extension of the Basalt Creek Parkway eastward from SW Grahams Ferry Road to SW Boones Ferry Road at a connection just south of SW Greenhill Lane. Engineering is under way but construction is contingent on securing funding for the project.

Since funding and the construction timeline are indefinite, this project was not assumed as part of the base transportation network. However, an analysis scenario with the planned project has been developed to understand how it might change traffic operations with the proposed project. A County study for[3] this phase of the Basalt Creek Parkway project was provided for the new intersection created by the extension to SW Boones Ferry Road for the year 2023. Although the projections did not address other study area intersections, year 2015 base year and year 2040 future year model forecasts were also obtained from Washington County and Metro.

To develop background volumes for a year 2026 background condition, the following assumptions were made:

- The year 2023 forecast volumes for the intersection of SW Boones Ferry Road and the Basalt Creek Parkway Extension were compared with the existing year 2022 volumes on SW Boones Ferry Road. Since the volumes were comparable, the forecasts were assumed as year 2022 volumes for the new intersection.
- Increases in traffic volumes on SW Boones Ferry Road due to the Basalt Creek Parkway Extension were added to through movements at the intersections north and south of the new intersection.
- Based on the model forecasts, the following traffic shifts were assumed to estimate study area traffic with completion of the extension:
    - 50 percent of the northbound traffic currently turning left from SW Boones Ferry Road to SW Day Road will continue traveling northward and turn left on the Basalt Creek Parkway Extension.
    - 50 percent of the eastbound traffic currently turning right from SW Day Road to SW Boones Ferry Road will travel along the Basalt Creek Parkway Extension and turn right on SW Boones Ferry Road at the new intersection.
    - 50 percent of the southbound traffic currently turning right from SW Boones Ferry Road to SW Day Road will turn on the Basalt Creek Parkway Extension instead of continuing south to SW Day Road.
    - 50 percent of the eastbound traffic currently turning left from SW Day Road to SW Boones Ferry Road will travel along the Basalt Creek Parkway Extension and turn left onto SW Boones Ferry Road at the new intersection.
    - 25 percent of the eastbound traffic currently turning left from SW Ibach Road to SW Boones Ferry Road will have diverted to the Basalt Creek Parkway Extension.
    - 25 percent of the southbound traffic currently turning right from SW Boones Ferry Road to SW Ibach Road will have diverted to the Basalt Creek Parkway Extension.
- Once year 2022 traffic volumes were developed to reflect the Basalt Creek Parkway Extension, an annual growth rate of 2 percent per year was applied and the in-process traffic was added.

Figure 7 shows the projected year 2026 background traffic volumes at the study intersections during the morning and evening peak hours with the Basalt Creek Parkway Extension in place.

[3] DKS Associates, "Washington County Basalt Creek Extension – Traffic Analysis Memorandum," January 16, 2020.

Buildout Conditions

The project is proposed to be occupied by the year 2026, so 2026 is used as the buildout year. Peak hour trips calculated to be generated by the proposed development, as described earlier within the *Site Trips* section, were added to the projected year 2026 background traffic volumes to obtain the expected 2026 site buildout volumes.

Figure 8 shows the projected year 2026 buildout traffic volumes at the study intersections during the morning and evening peak hours and Figure 9 shows the projected year 2026 buildout traffic volumes at the study intersections during the morning and evening peak hours with the Basalt Creek Parkway Extension in place.

Safety Analysis

Crash History Review

Using data obtained from ODOT's Crash Data System, a review of approximately five years of the most recent available crash history (January 2016 through December 2020) was performed at the study intersections. The crash data was evaluated based on the number of crashes, the type of collisions, and the severity of the collisions. Crash severity is based on injuries sustained by people involved in the crash, and includes five categories:

- Property Damage Only (PDO)
- Possible Injury (Injury C)
- Non-Incapacitating Injury (Injury B)
- Incapacitating Injury (Injury A)
- Fatality or Fatal Injury

Crash rates provide the ability to compare safety risks at different intersections by accounting for both the number of crashes that have occurred during the study period and the number of vehicles that typically travel through the intersection. Crash rates were calculated using the common assumption that traffic counted during the evening peak period represents approximately 10 percent of the annual average daily traffic (ADT) at the intersection.

Table 4 provides a summary of crash types while Table 5 summarizes crash severities and crash rates for each of the study intersections. Detailed ODOT crash reports are included in Appendix C.

Table 4: Crash Type Summary

Intersection		Crash Type								Total Crashes
		Rear End	Turning	Fixed Object	Angle	Bicycle	Head On	Ped Involved	Sideswipe	
1	SW Boones Ferry Road & SW Ibach Street/Court	6	1	1	0	0	0	1	0	9
2	SW Boones Ferry Road & SW Norwood Road	2	4	1	0	0	0	0	0	7
4	SW 82nd Avenue & SW Norwood Road	0	0	0	0	0	0	0	0	0
6	SW Boones Ferry Road & SW Day Road	21	4	1	0	0	1	0	2	29

Table 5: Crash Severity and Rate Summary

Intersection		Crash Severity					Total Crashes	PHV	Crash Rate	90th % Rate
		PDO	C	B	A	Fatal				
1	SW Boones Ferry Road & SW Ibach Street/Court	3	5	1	0	0	9	1,950	0.25	0.860
2	SW Boones Ferry Road & SW Norwood Road	6	1	0	0	0	7	1,333	0.29	0.293
4	SW 82nd Avenue & SW Norwood Road	0	0	0	0	0	0	250	0.00	0.408
6	SW Boones Ferry Road & SW Day Road	16	11	1	1	0	29	2,213	0.72	0.860

PHF = Peak Hour Volume

Crash Severity

None of the crashes reported in the five-year analysis period resulted in a fatality but one of the crashes resulted in an incapacitating injury (Injury A):

- A fixed object collision reported at the intersection of SW Boones Ferry Road at SW Day Road resulted in one incapacitating injury (Injury A). The crash involved a single eastbound vehicle on a rainy day with the driver at fault for driving improperly.

Pedestrian Collisions

One of the reported crashes involved a pedestrian:

- A pedestrian walking southbound in the west crosswalk was reportedly struck by a northbound vehicle making a left turn onto SW Ibach Street. The pedestrian sustained possible injuries (Injury C) and the driver was reported at fault for failing to yield right of way to a pedestrian crossing in a marked crosswalk.

ODOT 90th Percentile Crash Rates

Intersection crash rates were compared to the published statewide 90th percentile crash rates within ODOT's Analysis Procedures Manual (APM). According to Exhibit 4-1: Intersection Crash Rates per MEV by Land Type and Traffic Control in the APM, intersections which experience crash rates in excess of 90th percentile crash rates should be "flagged for further analysis".

None of the intersections in the study area were calculated to have crash rates that exceed the 90th percentile crash rates for the intersection type.

ODOT Safety Priority Index System

According to the ODOT TransGIS website, none of the study area intersections were listed in the worst 15 percent of ODOT's 2019 Safety Priority Index System (SPIS) list.

Washington County Safety Priority Index System

One of the study area intersections is listed in the Washington County 2015-2017 SPIS List. The intersection of SW Boones Ferry Road & SW Day Road is ranked 323 of 365 based on 11 crashes over a three-year period. The crash analysis shows that most (65 percent) crashes were rear-end collisions and the severity was generally low.

Conclusion

Based on a review of the most recent five years of available crash data, no significant trends or crash patterns were identified at any of the study intersections. Accordingly, no safety mitigation is recommended per the crash data analysis.

Sight Distance

SW Norwood Road is under Washington County jurisdiction, so intersection sight distance (ISD) was measured and evaluated in accordance with Washington County Community Development Code (CDC) Section 501-8.5.F. Sight distance measurements were made from an entering driver's eye height of 3.5 feet above the roadway surface 15 feet behind the curb line/edge of pavement of the intersecting street to the position of an oncoming vehicle in the major-street traffic lane 4.25 feet above the roadway.

At the proposed site access on SW Norwood Road, the posted speed is 45 mph. Assuming a travel speed 5 mph over the posted speed results in an intersection sight distance requirement of 500 feet.

Due to foliage along the roadside, accurate sight distance measurements cannot be taken along the future roadway frontage. SW Norwood Road is straight and horizontal curvature is not anticipated to be an issue. The elevation profiles show that vertical curvature is unlikely to be an issue as well. Based on this preliminary assessment, the 500-foot sight distance requirement is expected to be satisfied at the proposed site access on SW Norwood Road.

Access Spacing

Site access will be taken from SW Norwood Road, which is under Washington County jurisdiction. The county access requirements are shown in CDC Section 501-8.5B. For SW Norwood Road with a collector classification, the access spacing standard is 100 feet measured between the edge of travel lanes or easements on both sides of the roadway.

One access on SW Norwood Road is proposed with the development. Measured consistently with the CDC, the access is planned approximately 540 feet east of SW Boones Ferry Road, 298 feet east of the existing driveway serving the Tualatin Hills Christian Church, and 376 feet west of an existing driveway serving the Horizon Christian School. There are no accesses on the north side of SW Norwood Road between SW Boones Ferry Road and SW 89th Avenue. Thus, the proposed site access will meet the Washington County access spacing standard of 100 feet as shown in the CDC Section 501-8.5B.

Left-Turn Lane Warrants

Left-turn lanes are not present on SW Norwood Road; therefore, left-turn lane warrants were examined at the proposed site access on SW Norwood Road using the methodology outlined in the National Cooperative Highway Research Program Report (NCHRP) 457, published by the Transportation Research Board in 2001. These turn-lane warrants are evaluated based on the number of left-turning vehicles, the number of advancing and opposing vehicles, and the roadway travel speed. The results are summarized in Table 6 for year 2026 conditions with full buildout of the proposed development, both with and without the Basalt Creek Parkway Extension. Detailed information on the warrant analysis is included in Appendix C.

Table 6: Summary of Left-Turn Lane Warrant Evaluation

Intersection & Scenario	Warrant Met?	
	Morning Peak	Evening Peak
3. Site Access & SW Norwood Road (westbound)		
2026 Buildout – No BCP Extension	No	No
2026 Buildout –With BCP Extension	No	No

BCP = Basalt Creek Parkway

As shown in Table 6, left-turn lane warrants are not met at the proposed site access intersection for either peak hour under the 2026 buildout scenario for any analysis period.

Traffic Signal Warrants

Preliminary Signal Warrants

Preliminary traffic signal warrants were examined at the unsignalized study area intersections to determine whether the installation of a new traffic signal will be warranted at these intersections upon completion of the proposed development.

At all three intersections, the speed assumed for the evaluation was 45 mph. The posted speed on SW Norwood Road is 45 mph. The posted speed on SW Boones Ferry Road changes from 45 mph south of the intersection with SW Norwood Road to 35 mph north of the intersection. A speed study conducted on SW Boones Ferry Road south of SW Norwood Road shows that the 85th percentile speed is 45 mph in both directions (see Appendix B). While drivers may be traveling slower north of the intersection, they are still likely to be traveling at a speed near 40 mph as they approach SW Norwood Road. Both the City of Tualatin and Washington County confirmed that using the 70 percent warrant thresholds for speeds of 40 mph or greater is appropriate.

The results are summarized in Table 7 for year 2026 conditions with full buildout of the proposed development, both with and without the Basalt Creek Parkway Extension. Detailed information on the warrant analysis is included in Appendix C.

Table 7: Summary of Preliminary Traffic Signal Warrant Evaluation

Intersection & Scenario	Warrant Met?	
	Based on Morning Peak	Based on Evening Peak
2. SW Boones Ferry Road & SW Norwood Road (Shared Lane – 50% Right-Turn Discount)		
2026 Buildout – No BCP Extension	Yes	Yes
2026 Buildout – With BCP Extension	Yes	Yes
2. SW Boones Ferry Road & SW Norwood Road (Separate Left- and Right-Turn Lanes)		
2026 Buildout – No BCP Extension	No	No
2026 Buildout – With BCP Extension	Yes	No
3. Site Access & SW Norwood Road		
2026 Buildout – No BCP Extension	No	No
2026 Buildout – With BCP Extension	No	No
4. SW 82nd Avenue & SW Norwood Road		
2026 Buildout – No BCP Extension	No	No
2026 Buildout – With BCP Extension	No	No

BCP = Basalt Creek Parkway

As shown in Table 7, preliminary traffic signal warrants are met at the SW Boones Ferry Road & SW Norwood Road intersection both with and without the Basalt Creek Parkway Extension with a shared westbound approach lane on SW Norwood Road. If separate left- and right-turn lanes are provided on SW Norwood Road, the preliminary warrant is met based on morning peak hour volumes. No warrants are met at the other two intersections evaluated.

Detailed Warrant Analysis

Since the preliminary warrants are met at the intersection of SW Boones Ferry Road & SW Norwood Road, a more detailed warrant analysis was conducted to better understand the circumstances that would warrant a traffic signal.

Using the 12-hour count as the basis of the evaluation, future volume forecasts were developed by growing the hourly volumes by 2 percent per year and adding the in-process traffic for the background condition and site-generated traffic for the buildout condition. The "Hourly Distribution of Entering and Exiting Vehicle Trips by Land Use" from the ITE *Trip Generation Manual* were used to estimate the hourly volumes for the in-process and site-generated trips based on the daily volume estimates. To account for the effects of the Basalt Creek Parkway Extension, through traffic volumes on SW Boones Ferry Road were increased by 5 percent in each direction.

The results of the detailed evaluation are summarized in Table 8 for two scenarios, one where a shared westbound approach lane is maintained and a second where a separate right-turn lane is added. As noted previously, at the request of City staff, land use code 220, *Multifamily (Low-Rise)*, was used rather than 221,

Multifamily (Mid-Rise), because it has higher trip rates and presents a more conservative assessment of project impacts. Detailed analyses are included in Appendix C.

Table 8: Detailed Signal Warrant Evaluation

Condition	Warrant Met?		
	8-Hour	4-Hour	Peak Hour
2. SW Boones Ferry Road & SW Norwood Road (Shared Lane – 50% Right-Turn Discount)			
2026 Background – No BCP Extension	Yes	Yes	Yes
2026 Background – With BCP Extension	Yes	Yes	Yes
2026 Buildout – No BCP Extension	Yes	Yes	Yes
2026 Buildout – With BCP Extension	Yes	Yes	Yes
2. SW Boones Ferry Road & SW Norwood Road (Separate Left- and Right-Turn Lanes)			
2026 Background – No BCP Extension	No	No	No
2026 Background – With BCP Extension	No	No	No
2026 Buildout – No BCP Extension	Yes	Yes	Yes
2026 Buildout – With BCP Extension	Yes	Yes	Yes

As shown in Table 8, with a shared westbound approach lane and a 50 percent right-turn discount to account for the ease of making right turns compared with left turns, all of the warrants are met under both background and buildout conditions with either land use category.

If a separate westbound right-turn lane is added, which requires acquiring right-of-way from the property on the north side of the street, the warrant results varied. The background condition would not meet any signal warrants but the buildout condition would meet the warrants with the conservative land use assumptions.[4]

Since the signal warrants are met for the buildout conditions with the shared westbound lane, a traffic signal is recommended as mitigation.

[4] Under these conditions, the assumption of land use category is shown to make a difference in the results. Using trip rates for low-rise apartments, as requested by the City, generates volumes that would meet the warrants while using trip rates for mid-rise apartments generates volumes that would not meet the warrants if a separate right-turn lane were to be provided.

Operational Analysis

The operations of the transportation were evaluated for the morning and evening peak hours for existing conditions and the future scenarios without and with the proposed development presented in this TIS.

Intersection Capacity Analysis

A capacity and delay analysis were conducted for each of the study intersections per the signalized and unsignalized intersection analysis methodologies in the *Highway Capacity Manual* (HCM)[5]. Intersections are generally evaluated based on the average control delay experienced by vehicles and are assigned a grade according to their operation. The level of service (LOS) of an intersection can range from LOS A, which indicates very little, or no delay experienced by vehicles, to LOS F, which indicates a high degree of congestion and delay. The volume-to-capacity (v/c) ratio is a measure that compares the traffic volumes (demand) against the available capacity of an intersection.

The analysis was performed using the Synchro (version 11) software which applies the HCM6 methodologies to all study intersections.

Performance Standards

The following agency performance standards are applicable in the study area:

- The City of Tualatin requires intersections to operate at a minimum LOS D and LOS E for signalized and unsignalized intersections, respectively.
- Washington County has a mobility target of 0.90 but a v/c ratio of 0.99 or less is acceptable.

Assumptions for Basalt Creek Parkway Extension

The Basalt Creek Parkway Extension will create a new intersection along SW Boones Ferry Road. The geometry for the intersection and the traffic control were assumed to be the same as was used for the Opening Year Minimum Build 2023 scenario. Note, volumes differ because of additional background growth and in-process traffic from developments constructed after year 2023. The peak hour factor also differs based on more recent traffic counts.

Delay & Capacity Analysis

The LOS, delay, and v/c results of the capacity analysis are shown in Table 9 for the morning and evening peak hours and five scenarios. No changes to existing intersection configurations are assumed in this analysis except for those specifically associated with the Basalt Creek Parkway Extension project; recommended mitigation is discussed separately, after potential project impacts have been identified. Detailed calculations as well as tables showing the relationship between delay and LOS are included in Appendix D.

[5] Transportation Research Board, *Highway Capacity Manual 6th Edition*, 2016.

Table 9: Capacity Analysis Summary

Intersection & Scenario	Performance Standard	Morning Peak Hour			Evening Peak Hour		
		LOS	Delay (s)	V/C	LOS	Delay (s)	V/C

BCPE = Basalt Creek Parkway Extension
Locations that do not meet standards are BOLDED.

In general, impacts from the proposed project are expected to be minor. All study intersections show operational results that meet standards under all analysis scenarios except for the intersection of SW Boones Ferry Road & SW Norwood Road. This intersection exceeds operational standards during the year 2026 buildout scenario with the Basalt Creek Parkway Extension in place during the morning peak hour.

To address these impacts, we recommend installing a traffic signal at the intersection of SW Boones Ferry Road & SW Norwood Road to mitigate the operational impacts of the project. The benefits of the recommended signal are described in the section of this report titled *Mitigation Analysis*.

Queuing Analysis

An analysis of projected queuing was conducted for the study intersections. The 95th percentile queue lengths were estimated based on the same Synchro/SimTraffic simulations used for the delay calculations. The 95th percentile queue is a statistical measurement which indicates there is a 5 percent chance that the queue may exceed this length during the analysis period; however, given this is a probability, the 95th percentile queue length may theoretically never be met or observed in the field.

No changes to existing intersection configurations are assumed in this analysis except for those specifically associated with the Basalt Creek Parkway Extension project; recommended mitigation is discussed separately, after potential project impacts have been identified. All queues more than 5 feet longer than a multiple of 25 were rounded up. Those that were 5 feet or less were rounded down since 5 feet is equivalent to the space between queued vehicles.

The 95th percentile queue lengths reported in the simulation are presented for the three concepts in Table 10 for the morning and evening peak hours. Detailed queuing analysis reports are included in Appendix D.

BCPE = Basalt Creek Parkway Extension
BOLDED results show projected queues which exceed current available storage

In general, changes in 95th percentile queuing between the year background and buildout conditions are anticipated to be small, one vehicle or two vehicles. One intersection is anticipated to have significant growth in queues: SW Boones Ferry Road & SW Norwood Road. Buildout conditions show queuing on the westbound approach fluctuates considerably from simulation to simulation but is sometimes expected to extend past the first driveway under build conditions.

To address these impacts, we recommend installing a traffic signal at the intersection of SW Boones Ferry Road & SW Norwood Road to mitigate the operational impacts of the project. The benefits of the recommended signal are described in the section of this report titled *Mitigation Analysis*.

Mitigation Analysis

The intersection of SW Boones Ferry Road & SW Norwood Road is expected to exceed mobility targets under one buildout scenario. Both the preliminary and detailed signal warrant analysis show that a signal is warranted at the intersection with a westbound shared-lane approach. The operational results and 95th percentile queues for the 2026 buildout condition with these mitigation options are summarized in Table 11. Detailed analysis and queuing reports are included in Appendix D.

Table 11: SW Boones Ferry Road & SW Norwood Road with Signal and No Widening

Measure	Condition/ Potential Improvement			
	2026 Buildout		2026 Buildout w/ BCPE[1]

Notes:

1. *BCPE = Basalt Creek Parkway Extension*
2. *Storage lengths reflect the distance to the closest driveway.*

BOLDED results show projected queues which exceed current available storage

Findings

The results of the operational analysis show that installing a traffic signal at the intersection, as warranted, will result in an overall intersection v/c ratio that would meet the City mobility standard of LOS D and the County mobility target of 0.90. On the westbound approach, delays will be shorter than background conditions without the project.

The queuing analysis with the recommended signal shows that the 95th percentile queues on the shared westbound approach will not extend to the first driveway on SW Norwood Road. Furthermore, analysis (see Appendix D) shows that with five years of additional growth, in 2031, westbound queues will still not extend to the first driveway on SW Norwood Road. These results support a conclusion a separate right-turn is not needed to accommodate the proposed development.

The queuing analysis shows that, when the intersection is signalized, the northbound queues in the through lane will sometimes block access to the northbound right-turn lane; however, the northbound right-turn is not necessary to meet operational thresholds. Queues for the northbound through lane will extend past the first driveway on the west side of SW Boones Ferry Road, which currently serves a single-family residence.

Recommendations

Based on these findings, a traffic signal is recommended at the intersection of SW Boones Ferry Road & SW Norwood Road but no additional travel lanes are needed to accommodate the proposed development. Therefore, widening SW Norwood Road to include a westbound right-turn lane or widening SW Boones Ferry Road to lengthen the northbound right-turn lane should not occur until the adjacent parcels redevelop.

Transportation Planning Rule

The Transportation Planning Rule (TPR) is in place to ensure that the transportation system can support possible increases in traffic intensity that could result from changes to adopted plans and land-use regulations.

The Norwood Apartments project proposes a zone change for a 9.2-acre parcel of land in Tualatin. The 9.2-acre site consists of Tax Lot 2S135D 000108, which is 1.0 acres and will be zoned Medium Low Density Residential (RML) upon annexation and 8.2 acres of Tax Lot 2S135D 000106, which is currently zone Institutional (IN). The site is proposed for rezoning to High Density/High Rise Residential (RH-HR).

The TPR requires an analysis of a reasonable worst-case development scenario of the site under existing and proposed zoning. If trip generation under the proposed zoning is greater than it would be under the existing zoning, then operational analysis is necessary to demonstrate that the change in zoning can be accommodated or mitigation will be necessary.

Trip Generation

The assumptions and potential development scenarios are described below.

Existing Zoning Assumptions

The Tualatin Development Code (TDC) describes allowed uses under RML zoning in Chapter 41 and the IN zoning in Chapter 49. In considering development scenarios for the TPR analysis, only permitted uses in the zone were considered.

Medium Low Density Residential (RML)

For Lot 108 with the RML zoning, residential development is the only permitted use that will generate significant traffic. TDC Table 41-3 describes the permitted densities for different types of residential development which range from 10 to 25 units per acre. For a reasonable worst-case analysis scenario, the site was assumed accommodate 25 townhomes, the maximum density that could be achieved.

Institutional (IN)

For Lot 106 with the IN zoning, allowed uses include assembly facilities (limited to places of religious worship), community services (limited to public facilities such as community recreation buildings or indoor aquatic centers), schools, and government offices. Allowed infrastructure uses include government-owned parks, sports fields, and tennis courts. Since the adjacent site to the west already includes a church and the remainder of the parcel will include a sanctuary/place of assembly, another church was not considered a reasonable option. Neither was a government office, which tend to be centrally located within a community. Although a community recreation center could be sited at this location, other nearby facilities make another recreation center at this location unlikely; therefore, a private school was selected for the reasonable worst-case analysis:

For a potential school use on the 8.2-acre site, the density of 31 students per acre from the annexation analysis was used. Based on this rate, a school accommodating approximately 250 students could be developed. For a reasonable worst-case analysis scenario, a private school offering kindergarten through 8th grade was assumed.

Proposed Zoning Assumptions

For the proposed RH-HR zoning, residential development is the only permitted use that will generate significant traffic. TDC Table 44-3 describes the permitted densities for different types of residential development. At the maximum density of 30 units/acre, the site could accommodate 276 apartments. Land use code 220, *Multifamily Housing (Low-Rise)* was used to estimate the reasonable worst case, which is consistent the proposed development.[6]

Trip Generation Comparison

To estimate trips that will be generated by the redevelopment, trip rates from the *Trip Generation Manual* were used based on the number of dwelling units (DU) or the number of students. The land use assumptions and trip generation estimates are summarized in Table 12.

Table 12: Trip Generation Comparison of Existing and Proposed Zoning

Option- Land Use (Code)	Intensity	Morning Peak Hour			Evening Peak Hour			Weekday Trips
		In	Out	Total	In	Out	Total	
Existing Zoning								
Lot 108 (1 Acre): RML Zoning (After Annexation)								
Single-Family Attached Housing (LUC 215)	25 DU	4	8	12	8	6	14	180
Lot 106 (8.2 Acres): IN Zoning								
Private School: K-8 (LUC 530)	250 Students	142	111	253	30	35	65	1,028
Combined Lots 106 & 108 (9.2 Acres) Worst Case								
Townhouses + K-8 School		146	119	265	38	41	79	1,208
Proposed Zoning								
Lots 106 & 108 (9.2 Acres): RH-HR Zoning								
Multifamily Housing: Low-Rise (221)	276 DU	26	82	108	88	51	139	1,844
Net Change with Proposed Zoning		-120	-37	-157	50	10	60	636

As shown in Table 12, the reasonable worst-case scenarios under the existing zoning would likely generate a greater number of trips during the morning peak hour, when congestion associated with schools is most prevalent. However, the proposed zoning could generate a greater number of trips in the evening peak hour. Therefore, a long-range assessment of peak hour conditions is needed for the TPR evaluation. Although the proposed zoning would only generate more traffic than existing zoning in the evening peak hour, the morning peak hour conditions were also evaluated.

[6] As explained in a prior footnote, the four-story project qualifies as ITE land use code is 221, *Multifamily Housing (Mid-Rise),* which includes trip rates that are generally lower during the evening peak and over the course of the day than those for land use code 220, *Multifamily Housing (Low-Rise).* Using the low-rise multifamily housing option provides a more conservative estimate of trip generation.

Future Traffic Volumes

For a TPR analysis, the forecasts should be based on "projected conditions measured at the end of the planning period identified in the adopted TSP." Although the current Tualatin TSP has a forecast year of 2035, it was amended to include the Basalt Creek Concept Plan, which has a forecast year of 2040. Therefore, the future year for the TPR analysis was assumed to be 2040.

To estimate future 2040 volumes, two sources of data were reviewed. One is the year 2040 regional travel demand model forecasts obtained from Washington County and Metro. The other was the "Washington County Basalt Creek Extension – Traffic Analysis Memorandum," dated January 16, 2020. After careful review of the various forecasts, a simple growth rate was used to estimate volumes in the study area.[7]

The long-term growth rates that best matched the future link forecasts from the other planning efforts were 0.5 percent per year for through traffic on SW Boones Ferry Road and 2.0 percent per year for all other movements. These growth rates were applied to the 2026 background condition volumes with the Basalt Creek Parkway Extension to estimate the 2040 existing zoning scenario.

The traffic generated by each zoning scenario was then added to the background growth to estimate the 2040 zoning scenario volumes. The resulting peak hour volumes are shown in Figure 10 for the existing zoning and Figure 11 for the proposed zoning.

Operational Analysis

For the 2040 future operations, the following traffic control and lane configuration changes were assumed:

- The current lane configurations on SW Boones Ferry Road at the intersections with SW Norwood Road and SW Ibach Street were assumed. The TSP assumes that SW Boones Ferry Road will generally remain two to three lanes north of SW Norwood Road.
- The intersection of SW Boones Ferry Road & SW Norwood Road was assumed to be unsignalized since the adopted Tualatin TSP does not identify a signal at the intersection.
- To accommodate the long-term demand under the 2040 existing scenario, SW Boones Ferry Road was assumed to be widened to a five-lane section ending north of the Basalt Creek Parkway Extension. This assumption is consistent with the long-term build configuration presented in the January 16, 2020, memorandum for Basalt Creek Parkway Extension and the Washington County TSP. Specific intersection configurations are consistent with assumptions in these documents.

The resulting evening peak hour analysis for the 2040 existing zoning scenario and the 2040 proposed zoning scenario is summarized in Table 13.

[7] The growth rate method was selected because forecasting model-based methods were producing future volumes that were lower than 2026 buildout volumes for several critical movements in the study area.

Proposed Zoning		B	19	0.88	C	25	0.87
6. SW Boones Ferry Road & SW Day Road							
Existing Zoning	0.99	B	18	0.78	B	18	0.84
Proposed Zoning		B	18	0.77	B	18	0.84

Locations that do not meet standards are BOLDED.

As shown in Table 13, changes in operations at all intersections will be the same or minimally better during the morning and the same or minimally worse during the evening with the proposed zoning. With either zoning scenario, all intersections will continue to meet agency standards except for intersection of SW Boones Ferry Road & SW Norwood Road. This intersection will operate at LOS F for under both the existing zoning and proposed zoning scenarios if it were to remain unsignalized. In the morning peak hour, conditions would be worse under existing zoning. In the evening peak hour, conditions would be worse with the proposed zoning.

Since the proposed zoning would worsen conditions during the evening peak hour, mitigation at the intersection of SW Boones Ferry Road & SW Norwood Road will be necessary. A traffic signal is proposed to mitigate the impact. As shown in Table 14, the signal would improve operations to meet standards.

Table 14: Year 2040 Peak Hour Capacity Analysis with Mitigation

1. SW Boones Ferry Road & SW Norwood Road							
Existing Zoning	0.99 LOS D	B	18	0.71	B	14	0.69
Proposed Zoning		B	15	0.67	B	13	0.73

TPR Findings

The applicable elements of the TPR are each quoted directly in italics below, with responses following.

660-012-0060

(1) If an amendment to a functional plan, an acknowledged comprehensive plan, or a land use regulation (including a zoning map) would significantly affect an existing or planned transportation facility, then the local government must put in place measures as provided in section (2) of this rule, unless the amendment is allowed under section (3), (9) or (10) of this rule. A plan or land use regulation amendment significantly affects a transportation facility if it would:

(a) Change the functional classification of an existing or planned transportation facility (exclusive of correction of map errors in an adopted plan);

Response: Subsection (a) is not triggered because the functional classification of an existing or planned transportation facility is not changed by the proposal.

(b) Change standards implementing a functional classification system; or

Response: Subsection (b) is not triggered because the standards for implementing a functional classification system are not changed by the proposal.

(c) Result in any of the effects listed in paragraphs (A) through (C) of this subsection. If a local government is evaluating a performance standard based on projected levels of motor vehicle traffic, then the results must be based on projected conditions measured at the end of the planning period identified in the adopted TSP. As part of evaluating projected conditions, the amount of traffic projected to be generated within the area of the amendment may be reduced if the amendment includes an enforceable, ongoing requirement that would demonstrably limit traffic generation, including, but not limited to, transportation demand management. This reduction may diminish or completely eliminate the significant effect of the amendment.

(A) Types or levels of travel or access that are inconsistent with the functional classification of an existing or planned transportation facility;

(B) Degrade the performance of an existing or planned transportation facility such that it would not meet the performance standards identified in the TSP or comprehensive plan; or

(C) Degrade the performance of an existing or planned transportation facility that is otherwise projected to not meet the performance standards identified in the TSP or comprehensive plan.

Response: Subsection (c) would be triggered by the proposed zone change. The operational analysis with the proposed zoning would further degrade an intersection that would be performing below agency standards under existing zoning; the SW Boones Ferry Road & Norwood Road intersection, as summarized in Table 13. Therefore, the proposed zoning would have a significant effect. To address the effect, a traffic signal is proposed at the intersection of SW Boones Ferry Road & SW Norwood Road as mitigation. This proposal is consistent with the mitigation recommended to address the impacts of the proposed development in the TIA.

(2) If a local government determines that there would be a significant effect, then the local government must ensure that allowed land uses are consistent with the performance standards of the facility measured or projected at the end of the planning period identified in the adopted TSP through one or a combination of the remedies listed in subsections (a) through (e) below, unless the amendment meets the balancing test in subsection (e) or qualifies for partial mitigation in section (11) of this rule. A local government using subsection (e), section (3), section (10) or section (11) to approve an amendment recognizes that additional motor vehicle traffic congestion may result and that other facility providers would not be expected to provide additional capacity for motor vehicles in response to this congestion.

(a) Adopting measures that demonstrate allowed land uses are consistent with the performance standards of the transportation facility.

Response: This action is not recommended.

(b) Amending the TSP or comprehensive plan to provide transportation facilities, improvements, or services adequate to support the proposed land uses consistent with the requirements of this division. Such amendments shall include a funding plan or mechanism consistent with section (4) or include an amendment to the transportation finance plan so that the facility, improvement, or service will be provided by the end of the planning period.

Response: The City of Tualatin has indicated that they will be adding a traffic signal at the intersection of SW Boones Ferry Road & SW Norwood Road as an element of the TSP. The addition is anticipated to occur with an update to the TSP scheduled for adoption in 2024. Funding of this improvement is anticipated to come from Transportation System Development Charges. However, this future amendment of the TSP is not relied upon in this application to comply with the TPR. Instead, a traffic signal will be installed at the intersection of SW Boones Ferry Road & SW Norwood Road at the time of development as mitigation, as provided in OAR 660-12-0660(2)(d).

(c) Amending the TSP to modify the performance standards of the transportation facility.

Response: This action is not recommended.

(d) Providing other measures as a condition of development or through a development agreement or similar funding method, including, but not limited to, transportation system management measures or minor transportation improvements. Local governments shall, as part of the amendment, specify when measures or improvements provided pursuant to this subsection will be provided.

Response: A condition of approval that requires the installation of a traffic signal at the intersection of SW Boones Ferry Road & SW Norwood Road at the time of development will mitigate the impact of the rezone , and as shown in Table 14, the intersection will be consistent with performance standards at the end of the planning period.

(e) *Providing improvements that would benefit modes other than the significantly affected mode, improvements to facilities other than the significantly affected facility, or improvements at other locations, if:*

(A) *The provider of the significantly affected facility provides a written statement that the system-wide benefits are sufficient to balance the significant effect, even though the improvements would not result in consistency for all performance standards;*

(B) *The providers of facilities being improved at other locations provide written statements of approval; and*

(C) *The local jurisdictions where facilities are being improved provide written statements of approval.*

Response: This action is not recommended.

Conclusion

Based on this comparison of reasonable worst case trip generation, the proposed zoning would have a significant effect that can be mitigated with a traffic signal at the intersection of SW Boones Ferry Road & SW Norwood Road. Accordingly, we recommend a condition of approval requiring installation of a traffic signal at SW Boones Ferry Road & SW Norwood Road at the time of development. This proposal is consistent with the mitigation recommended to address the impacts of the proposed development in the TIA.

Conclusions

Proposed Zone Change Findings

- To understand the potential impacts of the requested zone change, the reasonable worst-case land uses under existing and proposed zoning were compared. Under existing zoning, the residentially-zoned land was assumed to redevelop to its maximum density with 25 attached homes while the institutionally-zoned land was assumed to develop with a 250-student private school. The proposed development of 276 apartments is the maximum density under the proposed zoning.
- The existing zoning would likely generate a greater number of trips during the morning peak hour, when congestion associated with schools is most prevalent. However, the proposed zoning could generate a greater number of trips in the evening peak hour; thus, a TPR analysis was performed.
- A comparison of long-term operations with the existing and proposed zoning shows that the proposed zoning would have a significant effect that can be mitigated with a traffic signal at the intersection of SW Boones Ferry Road & SW Norwood Road, to be installed by the applicant at the time of development. This proposal is consistent with the mitigation recommended to address the impacts of the proposed development in the TIA.

Traffic Impact Analysis Findings

- The Norwood Apartments project could be characterized as two different land use categories, low-rise multifamily housing or mid-rise multifamily. This analysis uses the more conservative (e.g., assumes a higher level of traffic) land use category, low-rise multifamily housing, as requested by the City of Tualatin. The trip generation calculations show that the proposed Norwood Apartments development is estimated to generate a net increase of 107 trips during the morning peak hour, 137 trips during the evening peak hour, and 1,826 daily trips during the average weekday.
- In general, impacts from the proposed project are expected to be minor. All study intersections show operational results that meet standards under all analysis scenarios except for the intersection of SW Boones Ferry Road & SW Norwood Road if it remains unsignalized. However, with the recommended signal installation, this intersection will be improved to meet agency standards.
- In general, changes in 95th percentile queuing between the year background and buildout conditions are anticipated to be small, one vehicle or two vehicles. As with the operational findings, one intersection is anticipated to have significant growth in queues: SW Boones Ferry Road & SW Norwood Road. However, with the recommended signal installation, queueing will be consistently improved.
- A traffic signal is recommended at the intersection of SW Boones Ferry Road & SW Norwood Road. With a signal but no widening on SW Norwood Road, the overall intersection v/c ratio will meet the City mobility standard of LOS D and the County mobility target of 0.90. On the westbound approach, delays will be shorter than background conditions without the proposed project and recommended traffic signal. The queuing analysis shows that even with five years of additional growth, the 95th percentile queues on the shared westbound approach will not extend to the first driveway on SW Norwood Road. Therefore, widening SW Norwood Road to include a westbound right-turn lane or widening SW Boones Ferry Road to lengthen the northbound right-turn lane should not occur until the adjacent parcels redevelop.

- Traffic signal warrants are met under both background and buildout conditions at the intersection of SW Boones Ferry Road & SW Norwood Road. Installing a traffic signal at the intersection of SW Boones Ferry Road & SW Norwood Road is a recommended mitigation measure.
- Traffic signal warrants are not met at the site access intersection with SW Norwood Road or at the unsignalized intersection of SW Norwood Road & SW 82nd Avenue.
- Left-turn lane warrants are not met at the proposed site access intersection on SW Norwood Road for either peak hour under the 2026 buildout scenario for any analysis period.
- At the proposed site accesses on SW Norwood Road, dense foliage restricts existing sight lines; however, preliminary assessment or horizontal and vertical curvature indicate that the 500-foot sight distance requirement is expected to be satisfied.
- On SW Norwood Road, the minimum access spacing standard of 100 feet will be met with construction of the proposed site access.
- Based on a review of the most recent five years of available crash data, no significant trends or crash patterns were identified at any of the study intersections. Accordingly, no safety mitigation is recommended per the crash data analysis.

Site Trips

The proposed development includes the construction of 320 detached home lots and 80 attached home lots. A supplemental memorandum addressing potential development of the commercial parcels abutting SW Boones Ferry Road is included in Appendix E. This memorandum includes trip generation for several potential commercial development scenarios of different intensities.

Trip Generation

To estimate trips that will be generated by the redevelopment, trip equations from the *Trip Generation Manual*[1] were used based on the number of dwelling units (DU). Land Use 210 – *Single-Family Detach Housing* was applied to the 320 detached units in the site while Land Use 220 – *Multifamily Housing (Low-Rise)* was applied to the 80 attached units.

As shown in Table 3, the trip generation calculations show that the proposed Autumn Sunrise Subdivision is estimated to generate 271 trips during the morning peak hour, 358 trips during the evening peak hour, and 3,596 daily trips during the average weekday.

Table 3: Trip Generation Summary

ITE Code	Intensity (DU)	Morning Peak Hour			Evening Peak Hour			Daily Trips
		In	Out	Total	In	Out	Total	
Single-Family Detached Housing	320	58	174	232	195	115	310	3,032
Multifamily Housing (Low-Rise)	80	9	30	39	30	18	48	564
Total	400	67	204	271	225	133	358	3,596

Note: Trip equations were applied for these land uses.

Table 4 presents the number and type of housing units and the trip generation by phase of development. With Phases 1 and 2, all site access will be taken from SW Norwood Road. The site access to SW Boones Ferry Road will be constructed with the completion of Phase 3. Phase 1 is expected to be constructed in year 2023 with each phase completed the subsequent year. Full buildout would occur in year 2026.

[1] Institute of Transportation Engineers (ITE), *Trip Generation Manual*, 10th Edition, 2017.

Table 4: Trip Generation by Phase

Phase	Intensity (DU)			Morning Peak Hour			Evening Peak Hour			Daily Trips
	Single	Multi	Total	In	Out	Total	In	Out	Total	
1	85	24	109 (27%)	18	55	73	61	36	97	975
2	41	14	55 (14%)	9	28	37	30	18	48	487
3	91	42	133 (33%)	21	65	86	71	42	113	1,158
4	103	0	103 (26%)	19	56	75	63	37	100	976
Subtotal (1-2)	*126*	*38*	*164 (41%)*	*27*	*83*	*110*	*91*	*54*	*145*	*1,462*
Subtotal (1-3)	*217*	*80*	*297 (74%)*	*48*	*148*	*196*	*162*	*96*	*258*	*2,620*
Total (1-4)	320	80	400	67	204	271	225	133	358	3,596

Table 1 Trip Generation Summary

ITE Land Use	Dwelling Units (#)	Weekday						
		ADT	AM Peak Hour			PM Peak Hour		
			Total	Enter	Exit	Total	Enter	Exit
Mid-Rise Housing (#221)	116							
Generation Rate [1]		5.44	0.36	26%	74%	0.44	61%	39%
Site Trips		**631**	**42**	11	31	**51**	31	20

[1] Source: *Trip Generation*, 10th Edition, ITE, 2017, average rates.

Two existing homes are located on the property site and will be demolished in conjunction with the proposed development. Trip credits totaling 19 daily trips, one AM trip, and two PM trips will result in a net trip generation of 612 daily trips, 41 AM peak hour trips, and 49 PM peak hour trips for Plambeck Gardens.

The Plambeck Gardens trip distribution was based on the existing count data and engineering judgment. This information is presented on Figure 4. The corresponding trip assignments are presented on Figure 5 for the AM & PM peak hours.

CAPACITY ANALYSIS

Capacity analyses were performed to determine the levels of service for the weekday peak hours. Synchro v11.1 software was used to determine the approach delays and level of service for the study intersections. The program is based on the Highway Capacity Manual (6^{th} edition) methodology. Table 2 summarizes the analysis results for the year 2021 existing traffic and for the year 2026 background and total traffic scenarios. Copies of the capacity analysis summaries are included in the appendix.

Disclaimer: The information contained in this report is compiled from individual driver and police crash reports submitted to the Oregon Department of Transportation as required in ORS 811.720. The Crash Analysis and Reporting Unit is committed to providing the highest quality crash data to customers. However, because submittal of crash report forms is the responsibility of the individual driver, the Crash Analysis and Reporting Unit can not guarantee that all qualifying crashes are represented nor can assurances be made that all details pertaining to a single crash are accurate. Note: Legislative changes to DMV's vehicle crash reporting requirement, effective 01/01/2004, may result in fewer property damage only crashes being eligible for inclusion in the Statewide Crash Data File.

Disclaimer: The information contained in this report is compiled from individual driver and police crash reports submitted to the Oregon Department of Transportation as required in ORS 811.720. The Crash Analysis and Reporting Unit is committed to providing the highest quality crash data to customers. However, because submittal of crash report forms is the responsibility of the individual driver, the Crash Analysis and Reporting Unit can not guarantee that all qualifying crashes are represented nor can assurances be made that all details pertaining to a single crash are accurate. Note: Legislative changes to DMV's vehicle crash reporting requirement, effective 01/01/2004, may result in fewer property damage only crashes being eligible for inclusion in the Statewide Crash Data File.

Stopping Sight Distance

Travel Speed	50	mph
Reaction Time	2.5	seconds
Acceleration	11.2	ft/sec^2
Grade (percent)	0.00%	

SSD 425 feet

Reaction Distance

Travel Speed	50	mph
Travel Speed	73.5	fps
Reaction Time	2.5	seconds

Reaction Distance 183.8 feet

Braking Distance

Travel Speed	50	mph
Acceleration	11.2	ft/sec^2
Grade (percent)	0.00%	

Braking Distance 239.6 feet

Note: If grades are less than 3%, no adjustment is needed.

Intersection Sight Distance

	Left Turn Looking Left		*Left Turn Looking Right*		*Right Turn Looking Left*	
Approach Speed	50	mph	50	mph	50	mph
Number of Lanes	2	lanes	2	lanes		
Vehicle Type (P/S/C)	P	Passenger Car	P	Passenger Car	P	Passenger Car
Extra Crossing Lanes	0		0			
Time Gap	7.5	seconds	7.5	seconds	6.5	seconds
Intersection Sight Distance	555	feet	555	feet	480	feet
Washington County	**500**	**feet**	**500**	**feet**	**500**	**feet**

Notes:

1) For Approach speed, use the design speed of the roadway (typically 85th percentile speed).
2) For Time Gap, use 7.5 seconds for passenger cars, 9.5 seconds for single-unit trucks, and 11.5 seconds for combination trucks.
3) The above values are for 2-lane highways without medians and grades of 3 percent or less.
4) For grades in excess of 3 percent on the minor street, add .2 seconds for each percent grade.
5) For additional lanes, add 0.5 seconds per lane for passenger cars and 0.7 seconds per lane for trucks.

Left-Turn Lane Warrant Analysis

Project: 22172 - Norwood Apartments
Intersection: Site Access on Norwood
Date: 2/2/2023
Scenario: 2026 Buildout - AM Peak Hour - No BCP Extension

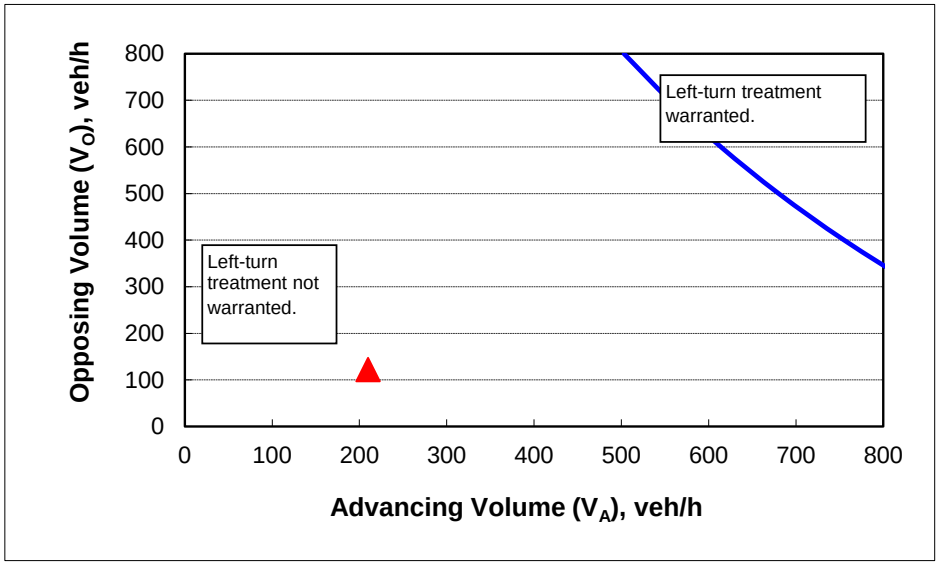
2-lane roadway (English)

INPUT

Variable	Value
85th percentile speed, mph:	45
Percent of left-turns in advancing volume (V_A), %:	2%
Left turns in advancing volume (V_A), veh/h:	4
Advancing volume (V_A), veh/h:	210
Opposing volume (V_O), veh/h:	122

OUTPUT

Variable	Value
Limiting advancing volume (V_A), veh/h:	1028
Guidance for determining the need for a major-road left-turn bay:	
Left-turn treatment NOT warranted.	



CALIBRATION CONSTANTS

Variable	Value
Average time for making left-turn, s:	3.0
Critical headway, s:	5.0
Average time for left-turn vehicle to clear the advancing lane, s:	1.9

Left-Turn Lane Warrant Analysis

Project: 22172 - Norwood Apartments
Intersection: Site Access on Norwood
Date: 2/2/2023
Scenario: 2026 Buildout - PM Peak Hour - No BCP Extension

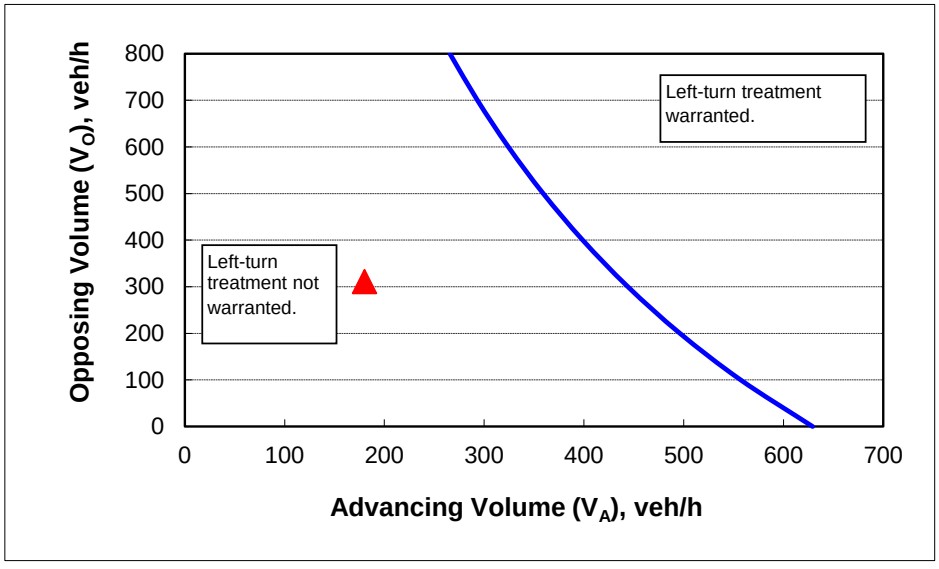
2-lane roadway (English)

INPUT

Variable	Value
85th percentile speed, mph:	45
Percent of left-turns in advancing volume (V_A), %:	7%
Left turns in advancing volume (V_A), veh/h:	13
Advancing volume (V_A), veh/h:	180
Opposing volume (V_O), veh/h:	311

OUTPUT

Variable	Value
Limiting advancing volume (V_A), veh/h:	439
Guidance for determining the need for a major-road left-turn bay:	
Left-turn treatment NOT warranted.	



CALIBRATION CONSTANTS

Variable	Value
Average time for making left-turn, s:	3.0
Critical headway, s:	5.0
Average time for left-turn vehicle to clear the advancing lane, s:	1.9

Left-Turn Lane Warrant Analysis

Project: 22172 - Norwood Apartments
Intersection: Site Access on Norwood
Date: 2/2/2023
Scenario: 2026 Buildout - AM Peak Hour - With BCP Extension

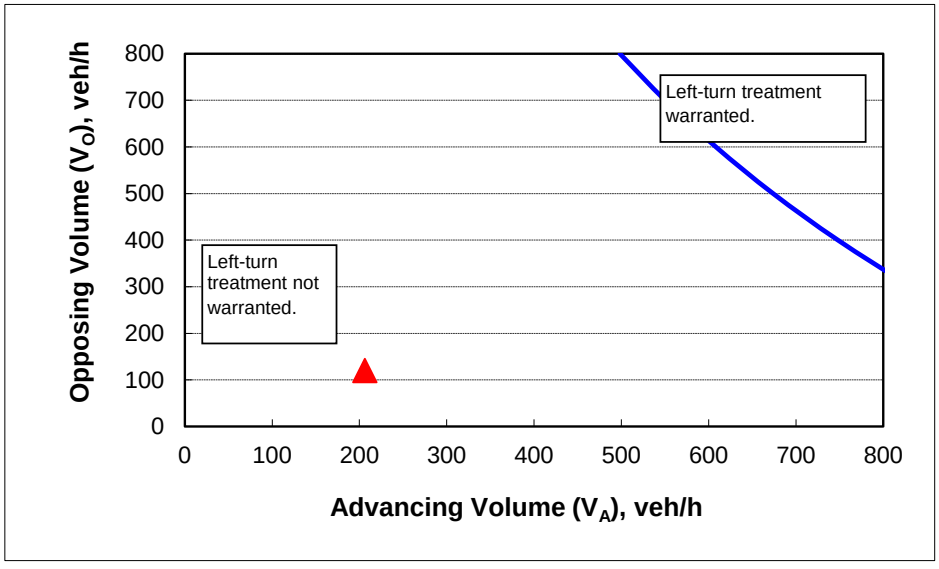
2-lane roadway (English)

INPUT

Variable	Value
85th percentile speed, mph:	45
Percent of left-turns in advancing volume (V_A), %:	2%
Left turns in advancing volume (V_A), veh/h:	4
Advancing volume (V_A), veh/h:	206
Opposing volume (V_O), veh/h:	120

OUTPUT

Variable	Value
Limiting advancing volume (V_A), veh/h:	1021
Guidance for determining the need for a major-road left-turn bay:	
Left-turn treatment NOT warranted.	



CALIBRATION CONSTANTS

Variable	Value
Average time for making left-turn, s:	3.0
Critical headway, s:	5.0
Average time for left-turn vehicle to clear the advancing lane, s:	1.9

Note: The major street has a speed which exceeds 40 mph, therefore these minimum volumes are 70 percent of the regular requirements

Warrant Requirements:
Major Street Lanes: 1
Minor Street Lanes: 1

CONDITION A-1 - Stopped Delay
Cannot be evaluated based on volumes alone. Condition met if traffic on one minor-street approach (one direction only) controlled by STOP sign equals or exceeds: 4 vehicle-hours for a one-lane approach or 5 vehicle-hours for a two-lane approach.

CONDITION A-2 - Minor Street Volume
Minimum Volume on Higher Minor Street Approach: 100

CONDITION A-3 - Total Approach Volume
Minimum Volume of Total Approaches: 650

CONDITION B - Plot of Minor Street Volume (high vol approach) vs. Major Street Volume (Both approaches)

ARE CONDITIONS A-2 AND A-3 OF SIGNAL WARRANT 3 MET? **YES** *Stopped Delay Needs to be Checked*
Note: All 3 subsections of Condition A must be met to warrant signal.

IS CONDITION B OF SIGNAL WARRANT 3 MET? **YES**

Note: Signal Warrant 3 is met if either Condition A or Condition B is met.

Note: The major street has a speed which exceeds 40 mph, therefore these minimum volumes are 70 percent of the regular requirements

Warrant Requirements:

Major Street Lanes: 1
Minor Street Lanes: 1

CONDITION A - Minimum Vehicular Volume

Minimum Volume on Combined Major Street Approaches: 350
Minimum Volume on Higher Minor Street Approach: 105

CONDITION B - Interruption of Continuous Traffic

Minimum Volume on Combined Major Street Approaches: 525
Minimum Volume on Higher Minor Street Approach: 53

IS CONDITION A OF SIGNAL WARRANT 1 MET? NO
IS CONDITION B OF SIGNAL WARRANT 1 MET? YES
IS COMBINATION OF A OR B MET? YES
IS 80% OF CONDITION A AND CONDITION B MET? NO

Note: Signal Warrant 1 is met if either Condition A or Condition B is met.

WARRANT 2, FOUR HOUR VEHICULAR VOLUME

	MAJOR			MINOR			Calculated	
	NB	SB	Total	EB	WB	Max	Threshold	
4:00 PM	751	834	1,585	0	90	90	60	Y
5:00 PM	737	751	1,488	0	138	138	60	Y

2:00 PM	420	498	918	0	82	82	89	N	N

Note: The major street has a speed which exceeds 40 mph, therefore these minimum volumes are 70 percent of the regular requirements

Warrant Requirements:
Major Street Lanes: 1
Minor Street Lanes: 1

CONDITION A-1 - Stopped Delay
Cannot be evaluated based on volumes alone. Condition met if traffic on one minor-street approach (one direction only) controlled by STOP sign equals or exceeds: 4 vehicle-hours for a one-lane approach or 5 vehicle-hours for a two-lane approach.

CONDITION A-2 - Minor Street Volume
Minimum Volume on Higher Minor Street Approach: 100

CONDITION A-3 - Total Approach Volume
Minimum Volume of Total Approaches: 650

CONDITION B - Plot of Minor Street Volume (high vol approach) vs. Major Street Volume (Both approaches)

ARE CONDITIONS A-2 AND A-3 OF SIGNAL WARRANT 3 MET? **YES** *Stopped Delay Needs to be Checked*
Note: All 3 subsections of Condition A must be met to warrant signal.

IS CONDITION B OF SIGNAL WARRANT 3 MET? **YES**

Note: Signal Warrant 3 is met if either Condition A or Condition B is met.

12:00 PM	376	381	757	0	56	56	60	N

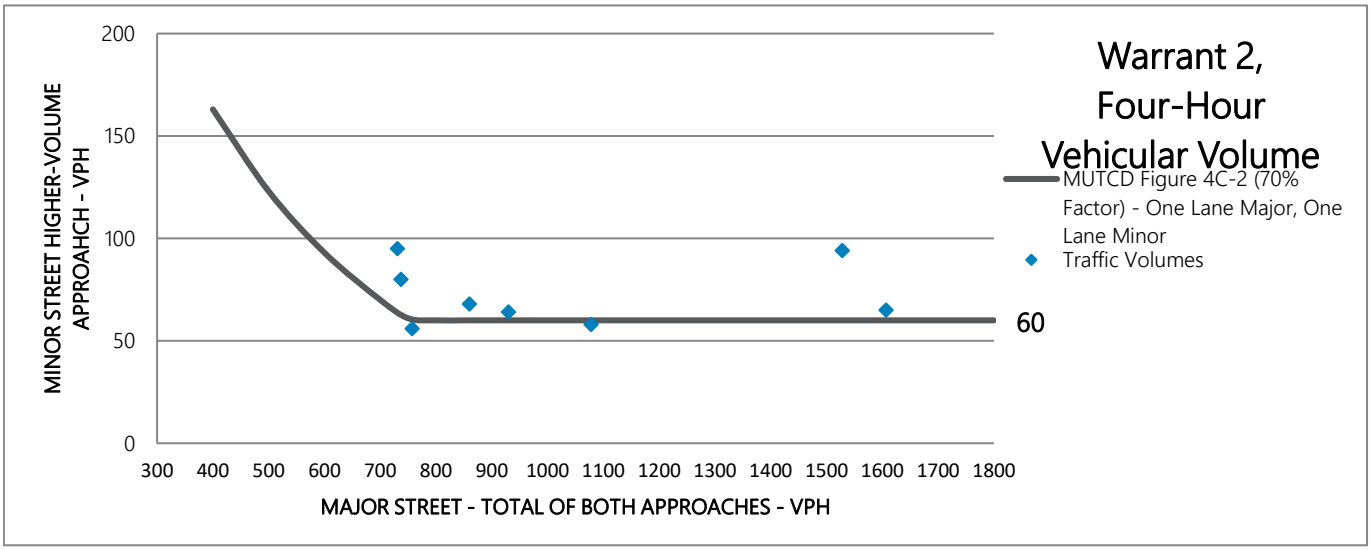
Note: The major street has a speed which exceeds 40 mph, therefore these minimum volumes are 70 percent of the regular requirements

Warrant Requirements:

Major Street Lanes: 1

Minor Street Lanes: 1

IS SIGNAL WARRANT 2 MET? YES



WARRANT 3, PEAK HOUR VEHICULAR VOLUME

	MAJOR			MINOR			Calculated		
	NB	SB	Total	EB	WB	Max	Threshold (B	A-2&3	B
4:00 PM	765	842	1,607	0	65	65	75	N	N
5:00 PM	759	769	1,528	0	94	94	75	N	Y
3:00 PM	381	697	1,078	0	58	58	75	N	N
2:00 PM	428	502	930	0	64	64	87	N	N

Note: The major street has a speed which exceeds 40 mph, therefore these minimum volumes are 70 percent of the regular requirements

Warrant Requirements:
Major Street Lanes: 1
Minor Street Lanes: 1

CONDITION A-1 - Stopped Delay
Cannot be evaluated based on volumes alone. Condition met if traffic on one minor-street approach (one direction only) controlled by STOP sign equals or exceeds: 4 vehicle-hours for a one-lane approach or 5 vehicle-hours for a two-lane approach.

CONDITION A-2 - Minor Street Volume
Minimum Volume on Higher Minor Street Approach: 100

CONDITION A-3 - Total Approach Volume
Minimum Volume of Total Approaches: 650

CONDITION B - Plot of Minor Street Volume (high vol approach) vs. Major Street Volume (Both approaches)

ARE CONDITIONS A-2 AND A-3 OF SIGNAL WARRANT 3 MET? NO
Note: All 3 subsections of Condition A must be met to warrant signal.

IS CONDITION B OF SIGNAL WARRANT 3 MET? YES

Note: Signal Warrant 3 is met if either Condition A or Condition B is met.

Queuing Reports

Level of Service Definitions

Level of service is used to describe the quality of traffic flow. Levels of service A to C are considered good, and rural roads are usually designed for level of service C. Urban streets and signalized intersections are typically designed for level of service D. Level of service E is considered to be the limit of acceptable delay. For unsignalized intersections, level of service E is generally considered acceptable. Here is a more complete description of levels of service:

- *Level of service A:* Very low delay at intersections, with all traffic signal cycles clearing and no vehicles waiting through more than one signal cycle. On highways, low volume and high speeds, with speeds not restricted by other vehicles.
- *Level of service B:* Operating speeds beginning to be affected by other traffic; short traffic delays at intersections. Higher average intersection delay than for level of service A resulting from more vehicles stopping.
- *Level of service C:* Operating speeds and maneuverability closely controlled by other traffic; higher delays at intersections than for level of service B due to a significant number of vehicles stopping. Not all signal cycles clear the waiting vehicles. This is the recommended design standard for rural highways.
- *Level of service D:* Tolerable operating speeds; long traffic delays occur at intersections. The influence of congestion is noticeable. At traffic signals many vehicles stop, and the proportion of vehicles not stopping declines. The number of signal cycle failures, for which vehicles must wait through more than one signal cycle, are noticeable. This is typically the design level for urban signalized intersections.
- *Level of service E:* Restricted speeds, very long traffic delays at traffic signals, and traffic volumes near capacity. Flow is unstable so that any interruption, no matter how minor, will cause queues to form and service to deteriorate to level of service F. Traffic signal cycle failures are frequent occurrences. For unsignalized intersections, level of service E or better is generally considered acceptable.
- *Level of service F:* Extreme delays, resulting in long queues which may interfere with other traffic movements. There may be stoppages of long duration, and speeds may drop to zero. There may be frequent signal cycle failures. Level of service F will typically result when vehicle arrival rates are greater than capacity. It is considered unacceptable by most drivers.

Level of Service Criteria
For Signalized Intersections

Level of Service (LOS)	Control Delay per Vehicle (Seconds)
A	<10
B	10-20
C	20-35
D	35-55
E	55-80
F	>80

Level of Service Criteria
For Unsignalized Intersections

Level of Service (LOS)	Control Delay per Vehicle (Seconds)
A	<10
B	10-15
C	15-25
D	25-35
E	35-50
F	>50

Intersection Summary	
HCM 6th Ctrl Delay	33.5
HCM 6th LOS	C

Notes

User approved pedestrian interval to be less than phase max green.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

2026 Background Conditions
No Basalt Creek Parkway Extension

Notes

User approved pedestrian interval to be less than phase max green.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

HCM 6th Ctrl Delay		24.4
HCM 6th LOS		C

Notes

User approved pedestrian interval to be less than phase max green.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

HCM 6th LOS	C

Notes

User approved pedestrian interval to be less than phase max green.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

HCM 6th Ctrl Delay	19.3
HCM 6th LOS	B

Notes

User approved pedestrian interval to be less than phase max green.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

REQUEST: Norwood Apartments Transportation Review

TASK NO: Tualatin On-Call Task 5 (P#21208-009)

REVIEWER: Amanda Deering, PE, DKS Associates

DKS Associates has reviewed the transportation impact study (TIS) for the proposed Norwood Apartments residential development[1]. The proposed project is located south of Norwood Road and east of Boones Ferry Road in Tualatin, Oregon. The general comments are based on a review of the TIS analysis.

TIS REVIEW

Key comments and issues related to the proposed project include:

- Overall, all required topics are covered in the TIS and look technically sufficient.
- This proposed development proposes to have its primary access on Norwood Road. The access location would meet the Washington County access spacing standard according to the site plan provided.
- Existing volumes were based on counts collected in 2022. No adjustments were made to these volumes since it is assumed volumes have returned to a consistent level post the impacts of the COVID-19 pandemic.
- The development is proposing to build 276 multifamily units. The apartment building is designed to have four floors which would qualify for the mid-rise multifamily rate in ITE, however to be more conservative and assume more trips would be added the low-rise multifamily rate was used (LUC 220).
- There are two existing single-family homes on part of the development parcel that will be demolished. Accounting for those trip credits, the development will generate 107 AM peak hour trips, 137 PM peak hour trips, and 1,826 daily trips.
    - Trip generation provided in the TIS cites the ITE Trip Generation Manual 10th edition. The most current edition is the 11th edition (September 2021). However, a comparison of rates shows the same trip generation for LUC 220.

[1] Norwood Apartments Transportation Impact Analysis, Lancaster Mobley, February 2023.

- Trip distribution provided in the TIS is based on patterns used for the adjacent approved developments (Autumn Sunrise and Plambeck Gardens).
  - The TIS shows 45% to the south, 15% to the east and 40% to the north
- Note that future build volumes include two scenarios: one with the completion of the Basalt Creek Parkway (BCP) extension project and one without. It is assumed that 13 percent of project trips will be shifted from the north and south to use the extension when it is complete. This analysis of the extension shows some intersections will have slightly less delay and some will have slightly more delay, depending on how travelers reroute.
- A review of the most recent five years of ODOT collision data (2016-2020) was performed for the study intersections. The Boones Ferry Road/Norwood Road intersection has an observed crash rate at the 90th percentile rate for the state. While it doesn't exceed the rate, it does have the potential to become a safety issue. The predominant crash type at this intersection was turning.
- Highway capacity manual (HCM) operations were performed using the 6th edition methodology. The build year analyzed was 2026. All study intersections operate within mobility standards except for Boones Ferry Road/Norwood Road under the 2026 buildout with BCP scenario. Implementing a traffic signal would mitigate this issue.
  - Additionally queuing analysis was performed for the build year scenarios. The westbound 95th percentile queue at Boones Ferry Road/Norwood Road would extend to 325 feet under the 2026 buildout PM peak hour scenario. This queue length could be mitigated with a signal so no nearby driveways are blocked.
- Traffic signal warrants (both preliminary and MUTCD peak hour) show that a traffic signal at Boones Ferry Road/Norwood Road would be met. In this case the preferred configuration of the signal is to have separate left and right turn lanes in the westbound direction. Under this assumption the detailed 8-hour, 4-hour, and peak hour warrants would be met under the 2026 build conditions with or without the BCP extension.
  - Norwood Road is classified as a collector per Washington County which has a 2 or 3 lane cross-section as needed. Note right-of-way may need to be acquired for the left turn lane at the intersection.
- The site plan shows appropriate frontage improvements and on-site pedestrian connectivity via sidewalks and crossings.
- The total number of parking spaces provided on site is not noted. This will have to be reviewed with application review. In the future, it is recommended to address parking standards and whether the number provided meets standard in the TIS.
- The proposed mitigation of a signal at Boones Ferry Road/Norwood Road should include a separate striped westbound left turn lane for safety reasons, consistent with the functional classification. It is recommended the westbound left turn run on a separate phase to protect the pedestrians on the south crosswalk, which is directly adjacent to a transit stop. A leading pedestrian interval could also be used and a northbound right turn overlap could be implemented to shorten the right turn queue length.
  - The turn pocket storage at the intersection should be based on the 2040 build scenario Synchro analysis. For the westbound left turn pocket this would be approximately 150 feet

and for the northbound right turn pocket this would extend the existing turn lane storage to 200 feet assuming no right turn overlap.[2]

TPR REVIEW

This section reviews the Transportation Planning Rule (TPR) analysis.

- The development is proposed on two parcels with the existing zoning medium low density residential (RML) and institutional (IN). Since the development proposes to change the land use to high density/high rise residential (RH-HR), a reasonable worst-case analysis must be performed to show no significant impact of the zone change per the Transportation Planning Rule.
- The trip generation comparison for the zone change shows the reasonable worst case build out of the two subject parcels under both the existing and proposed zoning.
  - For the existing zone this includes 25 dwelling units of single-family housing (attached, LUC 215). Per the City, this is a higher assumption than could be built here. The applicant should change this to 15 single family attached dwelling units. The institutional zone assumes building a K-8 private school[3]. This would complement the adjacent use of private high school in the parcel to the east. This seems reasonable. It is unlikely that a higher use such as a community college would be built on this small parcel.
  - For the proposed zoning, multi-family housing low rise is used, as discussed in the TIS.
  - Overall the trip generation comparison shows a decrease of 157 trips in the AM peak hour due to less contributing school traffic and an increase of 60 trips in the PM peak hour. There is an increase of 636 daily trips which is over the 450 trip threshold set by ODOT which requires operational analysis to determine if there are significant impacts from this zone change.
- Operations analysis was performed for the existing and proposed zoning scenarios under year 2040 conditions. The study intersections generally performed slightly better in the AM peak hour and the same or slightly worse in the PM peak hour under the proposed zoning. Under both zoning scenarios the intersection of Boones Ferry Road/Norwood Road would fail without signalization. This triggers OAR 660-012-0060 section (1)(c)(C). With signalization the intersection performs at LOS B and v/c ratio 0.73 under the proposed zoning. Thus, with the proposed mitigation of signalization, the analysis concludes the significant effect due to the proposed zoning change is mitigated per OAR 660-012-0660(2)(d).
- The benefit to the public of this zone change is that it will require the development to build a new signal as mitigation which would decrease existing delays at the intersection and increase safety at an intersection with existing crash risks. It will create a safer, protected crossing for pedestrians to access the nearby transit stop and the future park to the west. Additionally, it will allow for more housing to be built to address some of the housing needs in Tualatin.

---

[2] Note that this analysis assumes a shared westbound left and right turn lane. The City may request the applicant to update this analysis to reflect the separated westbound left turn lane and to reflect year 2040. This is from the year 2031 reports in the appendix.

[3] Note this land use (LUC 530) has a small sample size and should be used with caution. However it does yield a more conservative trip rate than public elementary school.

CITY OF TUALATIN
Engineering Division

Engineering Division Memo for
PMA & PTA23-0001 Norwood Multi Family
April 20, 2023

Planning Division,

Please have the applicant submit Engineering exhibits with a professional engineers stamp and signature for the packet.

Please incorporate the following Engineering Division considerations.

II. CONDITIONS OF APPROVAL

Based on the Findings and Conclusions presented herein **approval** subject to the following conditions:

PRIOR TO ISSUANCE OF CERTIFICATE OF OCCUPANCY AND/OR CERTIFICATE OF COMPLETION:

A1. The applicant must complete all public improvements as shown on approved permit plans. All improvements must also be accepted by the City in accordance with Tualatin Development Code (TDC) 74.120. These include:

1. Signalization of the SW Boones Ferry Road and SW Norwood Road intersection; and,
2. Separate westbound right and left turn lanes on SW Norwood Road for the SW Boones Ferry Road intersection within existing or, if needed, additional right-of-way dedicated by the applicant; and,
3. Increase northbound SW Boones Ferry Road right turn lane storage at the intersection of SW Norwood Road to 200 feet or as modified by the City Engineer based on final Traffic Analysis within existing or, if needed, additional right-of-way dedicated by the applicant.

III. FINDINGS

[ENGINEERING FINDINGS]

(i) Granting the amendment is consistent with the objectives and policies regarding potable water, sanitary sewer, and surface water management pursuant to applicable goals and policies in the Tualatin

Comprehensive Plan, water management issues are adequately addressed during development or redevelopment anticipated to follow the granting of a plan amendment.

Finding:

The proposed plan map and text amendments are consistent with the City's objectives and policies regarding public sanitary sewer, and stormwater, and water system availability. Submitted analysis is further detailed within the applicant's submitted Exhibit I – Utility Capacity Analysis.

Sanitary Sewer

The submitted materials show gravity sanitary sewer service for future development on this site. Extension of the existing public system within SW Boones Ferry Road north of SW Norwood Road could extend south to SW Norwood Road then east to the site. The capacity evaluation shows availability within existing lines matching diameters identified within the Sanitary Sewer Master Plan.

Stormwater

The submitted materials show the site includes areas to construct private onsite stormwater facilities. The site is shown to be able to provide gravity flow to existing public lines within SW Boones Ferry Road.

Water

Murraysmith provided the City a Water System Capacity Analysis memorandum for 9300 SW NORWOOD RD dated September 11, 2022 in response to application HWM22-0001. The memorandum states:

> *… proposed developments in the vicinity (SB21-0001, Autumn Sunrise subdivision and the AR22-0001, Community Partners for Affordable Housing – Plambeck Gardens), have already defined water service availability and required water system improvements.*
>
> *With the completion of the following planned improvements, a combination of City capital improvement projects and developer-constructed improvements, adequate water service for domestic and fire suppression is available at the proposed development.*
>
> - *An 18-inch diameter B-level water line in SW Boones Ferry Road (to SW Norwood Road) being designed by AKS Engineering as a City Capital Improvement Project (CIP). The line extends east on SW Norwood Road to the B Level Reservoir/C Level Pump Station site.*
> - *SB21-0001, Autumn Sunrise subdivision development will upsize additional lines for the C-level, either by adding a new line across the SW Norwood Road frontage of the Autumn Sunrise subdivision development or upsizing the internal lines (following the street layout).*
> - *AR22-0001, Plambeck Gardens development is required by issued land use conditions of approvals to extend a 12-inch diameter C-level water line down SW Boones Ferry Road, from SW Norwood Road to their south property line.*
> - *SB21-0001, Autumn Sunrise subdivision development will be installing upsized C-level lines from Norwood Road, through the development, out to SW Boones Ferry Road via SW Salinan Street, and then north to connect to the line AR22-0001, Plambeck Gardens development will be installing in SW Boones ferry Road.*
>
> *If the proposed development at 9300 SW Norwood Road occurs prior to the completion of these improvements, it may impact the availability of water service.*

Future development will be conditioned to obtain permits meeting applicable codes. For public sanitary sewer, stormwater, and water system availability this standard is met.

(5) Approval Criteria.

(f) Granting the amendment is consistent with the applicable State of Oregon Planning Goals and applicable Oregon Administrative Rules, including compliance with the Transportation Planning Rule TPR (OAR 660-012-0060).

(g) Granting the amendment is consistent with Level of Service F for the p.m. peak hour and E for the one-half hour before and after the p.m. peak hour for the Town Center 2040 Design Type (Comprehensive Plan Map 10-4), and E/E for the rest of the 2040 Design Types in the City's planning area.

(i) Granting the amendment is consistent with the objectives and policies regarding potable water, sanitary sewer, and surface water management pursuant to applicable goals and policies in the Tualatin Comprehensive Plan, water management issues are adequately addressed during development or redevelopment anticipated to follow the granting of a plan amendment.

Finding:

The applicant submitted a Transportation Impact Analysis prepared by Lancaster Mobley with recommended improvements identified in the executive summary:

> As summarized in the key findings below, the proposed Norwood Multi-Family project will create a minor impact on the transportation system, which will be mitigated by the recommended traffic signal at the intersection of SW Boones Ferry Road & SW Norwood Road. The traffic signal is warranted under background conditions without the proposed project, and the long-term analysis of the reasonable worst case scenario traffic analysis of the existing zone concludes that the SW Boones Ferry Road & SW Norwood Road intersection will fail without a signal. However, if the project installs a signal at that intersection, then the existing near-term and long-term problem is addressed. The project's traffic is mitigated so that the street network performance standards are met and the zone change will not require any additional mitigation or change in classification.
>
> Washington County staff have indicated that the amount of traffic generated by developments allowed the proposed amendment would not meet Washington County thresholds for requiring mitigation along SW Boones Ferry Road (a Washington County Road) south of the subject property.

City staff have reviewed the subject analysis and have determined that it meets the requirements above.

The SW Norwood Road approach to SW Boones Ferry Road will have separate right and left turn lanes in order to properly and safely operate for traffic flow and traffic and pedestrian safety. This is to allow for a pedestrian phase for crossing SW Boones Ferry Road with a corresponding red arrow for traffic turning from SW Norwood Road while still allowing non-conflicting traffic to turn right from the right turn lane.

No additional right-of-way is expected to be needed to construct separate right and left turn lanes on the SW Norwood Road approach. Some minor roadway curvature may need to be introduced for the roadway to remain within the existing right-of-way, but this could have a beneficial traffic calming effect at this location. Adequacy of right-of-way will be confirmed within future permit plans.

Note: Right-of-way dedication will be required along SW Norwood Road in conjunction with future development.

With Condition of Approval A1, this standard is met.

December 16, 2022

City of Tualatin - Engineering Department
18880 SW Martinazzi Ave
Tualatin, OR 97062

Subject: **Norwood Multi-Family Utility Capacity Analysis**

The purpose of this letter is to assess the capacity of the existing sanitary sewer, stormwater, and water systems following the development of the subject site. The proposed development is located southeast of the intersection of SW Norwood Road and SW Boones Ferry Road and consists of existing institutional (Horizon Church) and single-family residential properties. Assumed frontage improvements in this analysis are per conversations with City staff and the Pre-Application Meeting Summary provided by City staff.

Analysis of the sanitary sewer system consisted of a review of the City's InfoSWMM sanitary sewer model for the Martinazzi Basin and the City's 2019 Sanitary Sewer Master Plan (SSMP). Analysis of the downstream stormwater system consisted of an assessment of predeveloped and post-developed conditions in the storm main downstream of the subject. Last, the analysis of the existing water system consisted of coordination with City staff on a hydraulic model to assess the serviceability of the site.

Sanitary Sewer System

For the purpose of analyzing the Norwood Multi-Family private sanitary sewer system, wastewater flows were determined by utilizing the West Yost Associates *South Tualatin Sewer Study,* dated September 2010. Per the South Tualatin Sewer Study, the wastewater unit flow factor of 200 gpd per dwelling unit was used in the sewer capacity analysis. Peak wet weather flow (PWWF) was calculated by multiplying average dry weather flow by a 2.2 peaking factor and adding an Inflow and Infiltration (I&I) factor of 4,000 gpd per acre (gpad). Last, the pipe capacity was determined by Manning's equation and verified with the values from the City's InfoSWMM model.

The InfoSWMM model was originally prepared by Jacobs Engineering as part of the City's 2019 Sanitary Sewer Master Plan (SSMP). This model was then provided to AKS to analyze the downstream sanitary system impacts for the neighboring Autumn Sunrise Subdivision, including the scenarios and existing flows and capacities shown in Exhibit A. For the subject development, the Martinazzi Basin (East of SW Boones Ferry Road, North of SW Norwood Road, and West of I-5) was analyzed to determine whether the existing downstream sanitary system had sufficient capacity to convey the net increase in flow for this multi-family development.

Per the attached Figures 1 & 2, the subject site will extend a public sanitary sewer main line in SW Boones Ferry Road, to the site upstream of conduit #98435 in the InfoSWMM model and 2019 SSMP. The subbasin downstream of this line was analyzed until the line size increased from 8" to 12", located downstream of conduit #1706. This is the same point where the southwestern portion of the Martinazzi Basin converges with the southeastern portion, which includes the neighboring Autumn Sunrise subdivision development and Horizon Church.

Excluding the existing scenario, the resulting PWWF was added to the modeled flows for each scenario in the City's InfoSWMM model. The remaining pipe capacity was determined for each conduit to assess the overall capacity of the system post-development. Per the summary in the attached Exhibit A, each conduit

has sufficient capacity in the 2025, 2035, and Full Build-Out scenarios to convey the increase in flow from the subject development.

Water System

Per the Water System Capacity Analysis memorandum prepared by Murraysmith, upon completion of the planned city noted capital improvement projects and developer-constructed improvements, adequate water service for domestic and fire suppression will be available for this project. Refer to the memorandum in the attached Exhibit B for additional information.

Stormwater System

Per the attached Figure 3, the proposed development will connect to the existing 18" public stormwater main in SW Boones Ferry Road via a new public storm manhole. Per Figure 4, the contributing basins for this analysis include portions of SW Boones Ferry Road, portions of SW Norwood Road, and the subject site. The subject site will utilize a combination of an existing on-site stormwater pond and a new detention facility to satisfy water quantity and hydromodification requirements. Additionally, as part of the anticipated frontage improvements to SW Norwood Road, new public facilities will be implemented to detain stormwater in accordance with CWS water quantity and hydromodification requirements.

The attached HydroCAD report in Exhibit C analyzes the existing storm system's capacity post-development. However, the site will be required to satisfy water quantity and hydromodification requirements per Clean Water Services (CWS) standards. Since the release from the subject site and SW Norwood Road following anticipated frontage improvements will be required to be less than or equal to the predeveloped condition, the predeveloped condition was used in this analysis. Additionally, a lower curve number for redeveloped impervious area will be used in the predeveloped analysis per CWS standards, therefore post-developed release rates will be less than the rates in the provided calculations. Per the attached HydroCAD report, the existing stormwater system downstream of the site will have sufficient capacity to convey runoff from the proposed development in accordance with CWS standards.

Sincerely,

AKS ENGINEERING & FORESTRY, LLC

Memorandum

Date:	September 11, 2022
Project:	20-2737, On-Call Water System Analysis
To:	Ms. Kim McMillan, PE – Community Development Director Mr. Tony Doran – Engineering Associate City of Tualatin
From:	Brian Ginter, PE
Re:	9300 SW Norwood – Water System Capacity Analysis

Introduction

As requested, this memorandum has been prepared to present the findings of our analysis of the water service to the proposed multi-family development located at 9300 SW Norwood Road, southeast of the intersection of Boones Ferry Road and Norwood Road. This memorandum presents the findings of this analysis for the City's use in determining the water system improvements necessary to meet fire flow and pressure requirements.

Analysis and Conclusions

Murraysmith performed a review of the water service requirements associated with this development, and confirmed that the proposed multi-family develop does not require further analysis since prior analyses of proposed developments in the vicinity (Autumn Sunrise Subdivision and the Community Partners for Affordable Housing – Plambeck Gardens), have already defined water service availability and required water system improvements.

With the completion of the following planned improvements, a combination of City capital improvement projects and developer-constructed improvements, adequate water service for domestic and fire suppression is available at the proposed development.

- An 18-inch diameter B-level water line in Boones Ferry Road (to Norwood) being designed by AKS as a City CIP. The line extends east on Norwood to the B Level Reservoir/C Level Pump Station site.
- Lennar will upsize additional lines for the C-level, either by adding a new line across the Norwood frontage of the Autumn Sunrise development or upsizing the internal lines (following the street layout).

- CPAH is required by COAs to extend a 12-inch diameter C-level water line down Boones Ferry Road, from Norwood Road to their south property line.
- Autumn Sunrise will be installing upsized C-level lines from Norwood Road, through the development, out to BFR via Mahogany/Salinan, and then north to connect to the line CPAH will be installing in BFR.

If the proposed development at 9300 SW Norwood Road occurs prior to the completion of these improvements, it may impact the availability of water service.

From: **Jennifer Danziger**

Date: **January 30, 2023**

Subject: **Norwood Apartments – Conceptual Future Access on SW Boones Ferry Road**

Introduction

The proposed Norwood Apartments project includes the development of a 276-unit apartment complex on a site located south of SW Norwood Road and east of SW Boones Ferry Road in Tualatin, Oregon. The project site consists of tax map 2S135D lots 108 and 106. Lot 108 includes a 1.0-acre parcel located at 9300 SW Norwood Road and is currently occupied by one single-family home that currently takes access from SW Norwood Road. Lot 106 includes an 8.2-acre portion of the parcel located at 23370 SW Boones Ferry Road, which is part of the Horizon Christian School property, which has existing accesses on both SW Norwood Road and SW Boones Ferry Road.

Future access to the site will be provided via one new driveway along SW Norwood Road. An emergency access connection to the Horizon School circulation network will be provided. The site location is shown in Figure 1: Project Location (Source: City of Tualatin Interactive Zoning Map) with the project site outlined in yellow.

Figure 1: Project Location (Source: City of Tualatin Interactive Zoning Map)

Adjacent Properties

The proposed development abuts three parcels (tax map 2S135D lots 101, 102, and 109) with frontage along SW Boones Ferry Road. These parcels are outlined in red on Figure 1. Two of these parcels, Tax Lots 101 and 102, currently have direct access on SW Boones Ferry Road while Tax Lot 109 has direct access on SW Norwood Road.

Future Access Concept

SW Boones Ferry Road is an arterial in Washington County. Per CDC Section 501-8.5B, the access spacing on an arterial is 600 feet and direct access shall be from collectors or other arterial streets.

With the potential redevelopment of these properties at some time in the future, private access to SW Boones Ferry Road will not be permitted and alternative access will be required. Taking access through the proposed Norwood Apartments development is not appropriate as the internal network is designed to accommodate parking and circulation, not through traffic from other development. Connecting to the Horizon School Access Road would involve traversing the water quality facilities serving the school property. Therefore, Exhibit A illustrates a preliminary site access concept to demonstrate how future access could be provided for these three parcels.

The exhibit shows a local street access developed along the property line between Tax Lots 101 and 102 that would connect with SW Boones Ferry Road approximately 523 feet south of SW Norwood Road and 443 feet north of the Horizon School access. It is not possible to meet the 600-foot spacing requirement while the Horizon School has an access on SW Boones Ferry Road but this location is likely to be beyond any queuing that would occur with future signalization of the SW Boones Ferry Road & SW Norwood Road intersection, thus no conflict exists. This concept would also allow for a north-south connection that could serve Tax Lot 109 as well.

STATUTORY QUITCLAIM DEED

Horizon Community Church, an Oregon nonprofit corporation who acquired title as Grace Community Church of the Assemblies of God, Inc., an Oregon non-profit corporation, Grantor, releases and quitclaims to **Horizon Community Church, an Oregon nonprofit corporation** , all rights and interest in and to the following described real property:

LEGAL DESCRIPTION: Real property in the County of Washington, State of Oregon, described as follows:

See Exhibit "A" attached hereto and made part hereof.

The true consideration for this conveyance is **$0.00.** (Here comply with requirements of ORS 93.030)

BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON TRANSFERRING FEE TITLE SHOULD INQUIRE ABOUT THE PERSON'S RIGHTS, IF ANY, UNDER ORS 195.300, 195.301 AND 195.305 TO 195.336 AND SECTIONS 5 TO 11, CHAPTER 424, OREGON LAWS 2007, SECTIONS 2 TO 9 AND 17, CHAPTER 855, OREGON LAWS 2009, AND SECTIONS 2 TO 7, CHAPTER 8, OREGON LAWS 2010. THIS INSTRUMENT DOES NOT ALLOW USE OF THE PROPERTY DESCRIBED IN THIS INSTRUMENT IN VIOLATION OF APPLICABLE LAND USE LAWS AND REGULATIONS. BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON ACQUIRING FEE TITLE TO THE PROPERTY SHOULD CHECK WITH THE APPROPRIATE CITY OR COUNTY PLANNING DEPARTMENT TO VERIFY THAT THE UNIT OF LAND BEING TRANSFERRED IS A LAWFULLY ESTABLISHED LOT OR PARCEL, AS DEFINED IN ORS 92.010 OR 215.010, TO VERIFY THE APPROVED USES OF THE LOT OR PARCEL, TO DETERMINE ANY LIMITS ON LAWSUITS AGAINST FARMING OR FOREST PRACTICES, AS DEFINED IN ORS 30.930, AND TO INQUIRE ABOUT THE RIGHTS OF NEIGHBORING PROPERTY OWNERS, IF ANY, UNDER ORS 195.300, 195.301 AND 195.305 TO 195.336 AND SECTIONS 5 TO 11, CHAPTER 424, OREGON LAWS 2007, SECTIONS 2 TO 9 AND 17, CHAPTER 855, OREGON LAWS 2009, AND SECTIONS 2 TO 7, CHAPTER 8, OREGON LAWS 2010.

Dated this 24 day of September, 2015.

Horizon Community Church, an Oregon nonprofit corporation who acquired title as Grace Community Church of the Assemblies of God, Inc., an Oregon non-profit corporation

After recording return to: 9300 SW Norwood Road OR LLC c/o Vista Acquisitions, LLC 2964 Peachtree Road, Suite 585 Atlanta, Georgia 30305 **Until a change is requested, all tax statements shall be sent to Grantee at the following address:** 9300 SW Norwood Road OR LLC c/o Vista Acquisitions, LLC 2964 Peachtree Road, Suite 585 Atlanta, Georgia 30305	**This space reserved for recorder's use.**

SPECIAL WARRANTY DEED

NORWOOD HORIZON HOLDINGS LLC, a Delaware limited liability company ("**Grantor**") conveys and specially warrants to **9300 SW NORWOOD ROAD OR LLC**, a Georgia limited liability company ("**Grantee**") the real property in Washington County, Oregon, more particularly described on Exhibit A attached hereto and by this reference incorporated herein (the "**Property**"), free of encumbrances created or suffered by the Grantor, except for those encumbrances set forth on Exhibit B, attached hereto and by this reference incorporated herein.

The true consideration for this conveyance in terms of dollars is $1,000,000.00.

BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON TRANSFERRING FEE TITLE SHOULD INQUIRE ABOUT THE PERSON'S RIGHTS, IF ANY, UNDER ORS 195.300, 195.301 AND 195.305 TO 195.336 AND SECTIONS 5 TO 11, CHAPTER 424, OREGON LAWS 2007, SECTIONS 2 TO 9 AND 17, CHAPTER 855, OREGON LAWS 2009, AND SECTIONS 2 TO 7, CHAPTER 8, OREGON LAWS 2010. THIS INSTRUMENT DOES NOT ALLOW USE OF THE PROPERTY DESCRIBED IN THIS INSTRUMENT IN VIOLATION OF APPLICABLE LAND USE LAWS AND REGULATIONS. BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON ACQUIRING FEE TITLE TO THE PROPERTY SHOULD CHECK WITH THE APPROPRIATE CITY OR COUNTY PLANNING DEPARTMENT TO VERIFY THAT THE UNIT OF LAND BEING TRANSFERRED IS A LAWFULLY ESTABLISHED LOT OR PARCEL, AS DEFINED IN ORS 92.010 OR 215.010, TO VERIFY THE APPROVED USES OF THE LOT OR PARCEL, TO DETERMINE ANY LIMITS ON LAWSUITS AGAINST FARMING OR FOREST PRACTICES, AS DEFINED IN ORS 30.930, AND TO INQUIRE ABOUT THE RIGHTS OF NEIGHBORING PROPERTY OWNERS, IF ANY, UNDER ORS 195.300, 195.301 AND 195.305 TO 195.336 AND SECTIONS 5 TO 11, CHAPTER 424, OREGON LAWS 2007, SECTIONS 2 TO 9 AND 17, CHAPTER 855, OREGON LAWS 2009, AND SECTIONS 2 TO 7, CHAPTER 8, OREGON LAWS 2010.

RE: Norwood Multi-Family - Annexation, Partition, and Map/Text Amendment

October 3, 2022

RE: Neighborhood Review Meeting
Annexation, Map & Text Amendment, and Partition Applications

Dear Property Owner/Neighbor:

AKS Engineering & Forestry, LLC, is holding a neighborhood meeting regarding two properties on the south side of SW Norwood Road and east of SW Boones Ferry Road in Tualatin, Oregon: the Horizon Christian School property (Tax Lot 106 of Washington County Assessor's Map 2S1135D) that is currently in the City of Tualatin and zoned Institutional (IN), and a one-acre lot (Tax Lot 108 of Washington County Assessor's Map 2S1135D) that is currently outside the Tualatin city limits and has Washington County zoning of Future Development 20-acre (FD-20). A map of the location is shown on the back of this letter. The project involves annexing Tax Lot 108 into the City of Tualatin, partitioning the school site (Tax Lot 106) into two lots, and amending the Tualatin Plan Map to apply the High Density High Rise (RH-HR) zone to ±9.2 acres of property along SW Norwood Road for future multi-family development. A Text Amendment to modify where the RH-HR zone can be applied will also be submitted.

The purpose of this meeting is to provide a forum for surrounding property owners/residents to review and discuss the project before applications are submitted to the City. This meeting will give you the opportunity to share any special information about the property involved. We will attempt to answer questions that may be relevant to meeting development standards consistent with the City of Tualatin Development Code. This neighborhood meeting is scheduled for:

October 25, at 6:30 p.m.
Tualatin Public Library- 18878 SW Martinazzi Avenue, Tualatin, OR 97062

Please note that this meeting will be an informational meeting on preliminary plans. These plans may be altered prior to submittal of applications to the City. Depending upon the type of land use action required, you may receive official notice from the City of Tualatin requesting that you participate with written comments and/or you may have the opportunity to attend a public hearing.

I look forward to discussing this project with you. If you have questions but will be unable to attend, please feel free to contact me at 503-563-6151 or by email at slotemakerm@aks-eng.com.

Sincerely,
AKS ENGINEERING & FORESTRY, LLC

Hello Byrom CIO Representatives,

I am pleased to invite you to participate in a Neighborhood/Developer meeting on **October 25, 2022 at 6:30 pm at the Tualatin Library** to discuss planned land use applications at the Horizon church and school site, and an adjacent one-acre lot on SW Norwood Road that will be annexed to the City. The meeting provides an opportunity for us to discuss the planned applications with surrounding property owners and the Byrom CIO before the application is submitted to the City.

Attached is the letter that was mailed out to the neighborhood with more information. Feel free to contact me if you are unable to attend the meeting or if you have any specific questions about the project and process.

Sincerely,
Melissa Slotemaker

Melissa Slotemaker, AICP
Land Use Planner

Neighborhood Meeting Summary: Norwood Multi-family Annexation, Partition, and Map/Text Amendment Applications

Meeting Date: October 25, 2022
Time: 6:30 PM
Location: Tualatin Public Library, 18878 SW Martinazzi Avenue, Tualatin, OR 97062

The following serves as a summary of the Neighborhood Meeting process. On October 3, 2022, property owners within 1000 feet of the proposed development site were sent notification of the planned Norwood Multi-family applications. This notification included the project location, project details, and the neighborhood meeting date, time, and location. The Byrom CIO and City staff were also emailed the meeting information. Signs with the neighborhood meeting information were also posted on the subject site on October 3, 2022.

On October 25, 2022, Mimi Doukas and Melissa Slotemaker from AKS Engineering & Forestry, LLC and Lee Novak from Vista Residential Partners were the meeting presenters. Other members of the Applicant's project team also attended the meeting and were available to answer questions. The meeting began with Mimi Doukas and Lee Novak providing introductory remarks. Melissa Slotemaker then presented an overview of the Norwood Multi-family project, the site area, expected roadway improvements, and the planned land use applications. She then provided details on the City's review process and opportunities for public input.

Following the presentation, attendees were given the opportunity to ask questions. The following topics were discussed:

Transportation

- Existing traffic issues on SW Boones Ferry Road and the impact of new development
- Anticipated roadway improvements along SW Norwood Road and SW Boones Ferry Road and how those would help roadway capacity
- Traffic signal at SW Norwood and SW Boones Ferry Road and when that would be constructed
- Mitigation in progress for Autumn Sunrise development
- The long-term plans for expansion of SW Norwood Road and if the City would take property for roadway
- If the developer would need to construct street improvements/mitigation
- Concerns about increase in traffic, especially on SW Norwood Road and if the project would route traffic north through Tualatin Woods

Zone Change/Future Project

- The density of the proposed project and whether the RH-HR district is appropriate
- The nature and purpose of the Institutional zoning district and the effects on the Horizon Church & School
- Height of the proposed project and whether the buildings would be taller than 4 stories
- The Basalt Creek Concept Plan and the type of residential development originally expected
- Other sites which could be used for apartments

Miscellaneous

- How the site was selected, expected rent, and market needs
- The need for housing equity and affordable housing
- How the project will affect schools in the area and if the Sherwood School District would bus children to Sherwood
- The land use process, how to submit testimony, and who the makes the decision

The meeting concluded at approximately 8:05 pm.

Sincerely,
AKS ENGINEERING & FORESTRY, LLC

EXTERNAL EMAIL: This email originated from outside AKS Engineering & Forestry.

Hi Glen,

The Sherwood School District can accommodate the additional students from the proposed complex.

Please let me know if you have any questions or need any additional information.

Thanks.

Jim

>
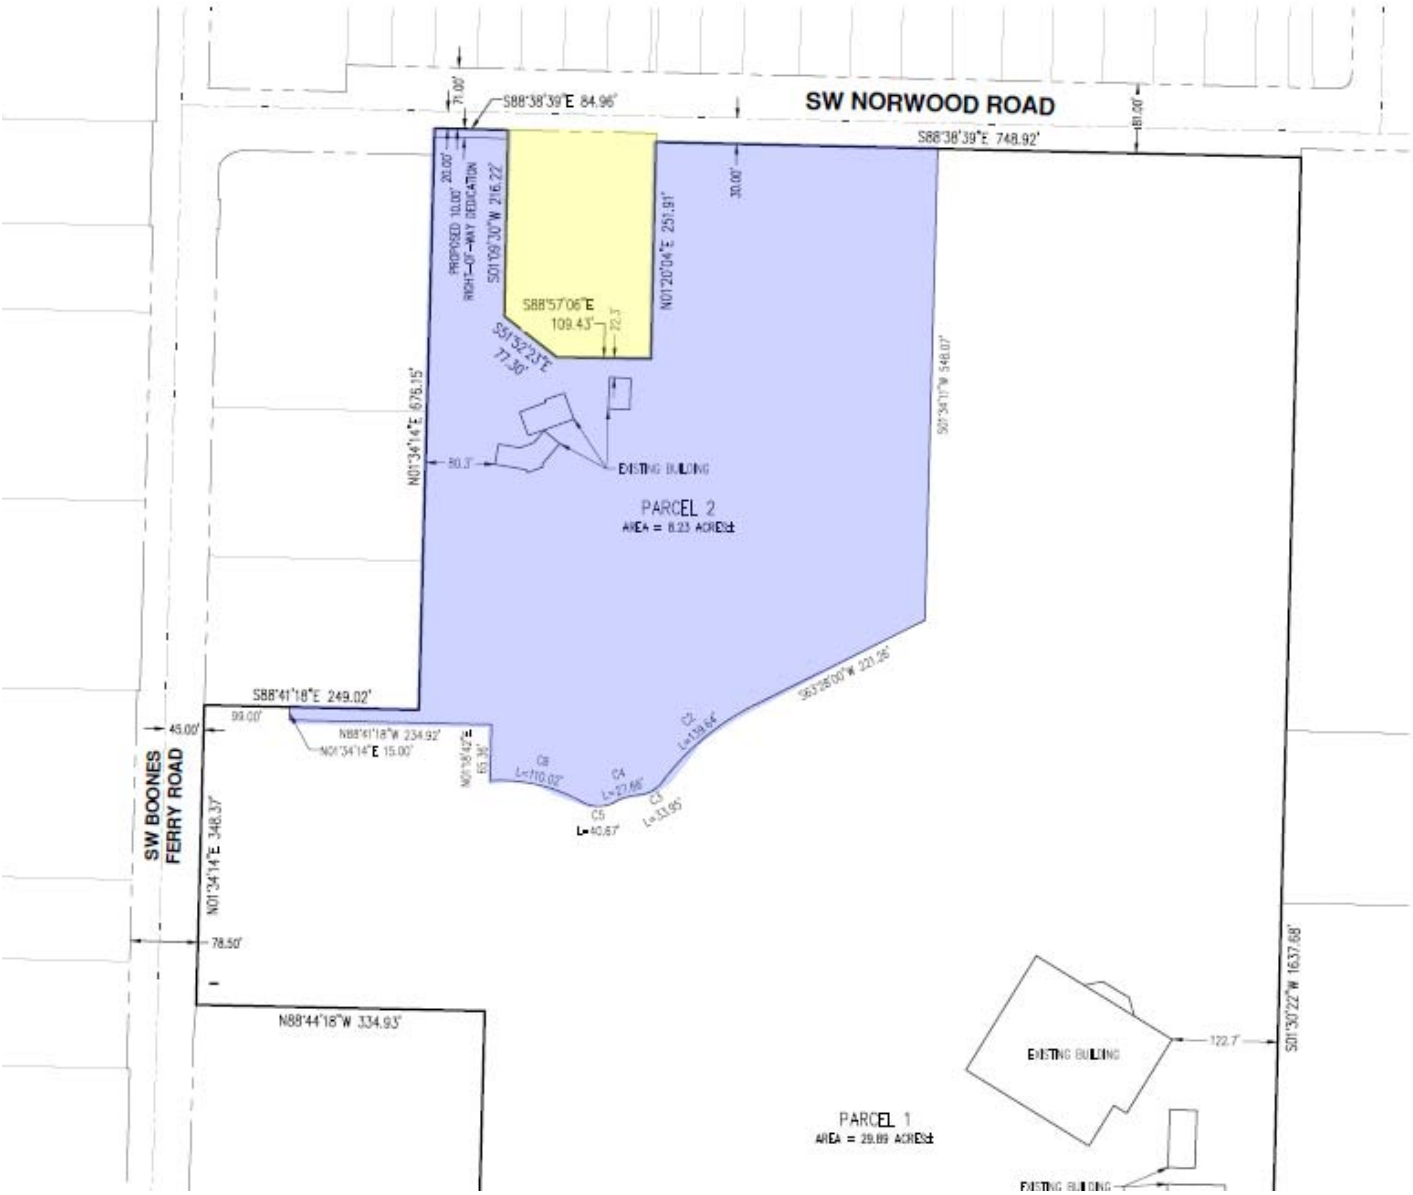
> We are currently working on several applications for two properties within the City of Tualatin, including an annexation and plan and map amendment, and culminating in an architectural review application for a multifamily development.

The area is south of SW Norwood Road in Tualatin, east of SW Boones Ferry Road, and currently has the address of 9300 SW Norwood Road. I've included a map showing the property below to help provide context.

The first application for this project involved an annexation of approximately 1 acre of residential land (shown in yellow below) within the Basalt Creek Area. Once annexed, it would be zoned Medium Low Residential (RML).

A zoning text amendment application would propose to allow High Density High Rise zoning within the Basalt Creek Planning Area, which includes this project site. The area does not currently have this zoning designated and the text of the zone specifies where it can be applied (Central Tualatin). Those restrictions are proposed to be changed to allow the higher density zoning in this area.

That application would also re-zone the annexed property (in yellow) and the area shown below in blue from Medium Low Residential (RML) to High Density High Rise Zone (RH-HR). The blue area is currently zoned Institutional and is currently part of the Horizon Community Church and School campus.



A future application is planned to involve a multifamily project with approximately 276 dwelling units.

Does the School District have capacity to accommodate the number of additional students expected as part of this development? Does the School District have any other comments regarding the proposed zone change?

There are obviously quite a few facets to what's being proposed, so please feel free to contact me with any questions you may have. If there is any other information that would be helpful or you'd like to have a call to discuss, please let me know.

Thank you!

MEMORANDUM

DATE: April 12, 2023

TO: Lee Novak (Vista Residential)

FROM: Christine Johnson, ISA Certified Arborist® PN-8730A
Todd Prager, RCA #597, ISA Board Certified Arborist®

RE: Tree Inventory and Preliminary Assessment for Road Improvements associated with the Norwood Multi-Family Project in Tualatin

---

Summary

Planning for the Norwood Multi-Family Project in Tualatin is underway. An existing buffer of mature Douglas-fir (*Pseudotsuga menziesii*) will be impacted by the proposed road improvements associated with development. Our firm was asked to inventory a 60-foot-wide strip south of Norwood Road and provide preliminary tree preservation recommendations. One hundred and ninety-nine (199) trees were inventoried. Successful tree preservation will require retention and protection of exterior trees, tree protection fencing, routing of utilities outside or boring underneath the tree protection zone when possible, and routine tree risk assessments if certain trees are removed. The site plan was altered in order to maximize tree preservation of the existing tree grove south of Norwood Road.

Background

The Norwood Multi-family Project is located southeast of the intersection of Boones Ferry Road and Norwood Road. An 8-foot-wide public utility easement (PUE) is proposed south of Norwood Road. Sidewalks exist along Norwood Road adjacent to the eastern portion of tax lot 106. No sidewalk is present along Norwood Road adjacent to tax lot 108 and the western portion of tax lot 106.

Assignment

The assignment asked of our firm was as follows:

1. Inventory an existing buffer of trees within a 60-foot-wide strip south of Norwood Road on tax lots 106 and 108.
2. Provide initial tree preservation recommendations to the project team.

Observations

Our firm visited the site on March 17 and March 20, 2023, and inventoried 199 trees within the designated area from Norwood Road to 60 feet south of Norwood Road. The existing conditions map with tree locations is provided in Attachment 1 and the preliminary grading exhibit with tree locations is provided in Attachment 2. The following information was recorded for each tree:

tree number, common name, scientific name, DBH (diameter at breast height, 4.5 feet above ground level), average canopy radius, health condition, structural condition, and pertinent comments. (Attachment 3) Tree numbers in the inventory in Attachment 3 correspond to tree numbers shown on Attachments 1 and 2. Photographs of the trees adjacent to tax lot 106 are provided in Attachment 4.

Discussion and Recommendations

The buffer of Douglas-fir trees are growing relatively close to one another. Exterior trees are healthy and have either good or fair structure (i.e., one sided crown, self-corrected phototropic lean). Interior trees are generally less healthy (i.e., thin foliage) and have fair to very poor structure (i.e, suppressed, narrow crowns, high crowns). This is typical of a buffer or grove of trees. That said, it will be extremely important to preserve exterior trees since their removal would negatively impact the health and stability of interior trees.

To preserve a 60-foot-wide buffer from Norwood Road going south from construction impacts, the following tree preservation measures are recommended:

1. **Buildings, hardscape, and grade changes.** Proposed buildings, hardscape, and grade changes will need to be located to allow for adequate root protection. A typical minimum root protection zone allows encroachments no closer than a radius from a tree of 0.5 feet per inch of DBH if no more than 25 percent of the root protection zone area (estimated at one foot radius per inch of DBH) is impacted. Figure 1 illustrates this concept. This standard may need to be adjusted on a case-by-case basis due to tree health, species, root distribution, whether the tree will be impacted on multiple sides, the specific development proposed, and other factors. A recommended limit of disturbance is provided on a preliminary site plan in Attachment 2. The recommended limit of disturbance designates where no construction, grading, or utilities should occur. If utilities must be constructed inside the limits of construction, alternative methods of construction will be recommended (i.e., horizontal directional drilling, pneumatic excavation, hydro excavation).

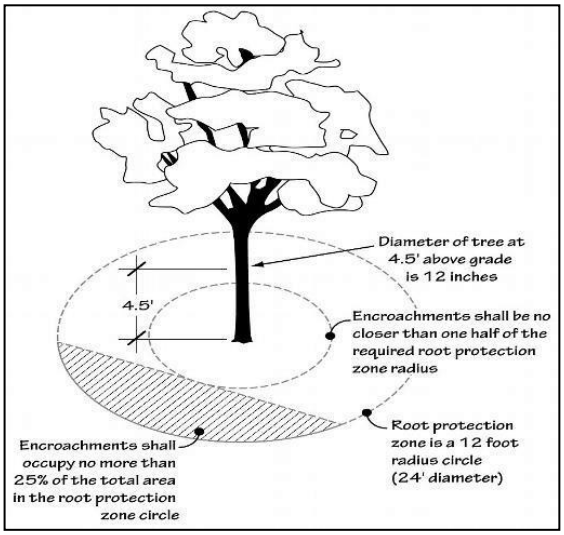

Figure 1 Typical minimum protection zone.

2. **Proposed road improvements.** If the existing access drive and sidewalk are reused for tax lot 106, then this will allow for tree preservation along that portion of the Norwood Road frontage. If a sidewalk and other improvements are required along the unimproved Norwood Road right of way adjacent to tax lots 106 and 108, trees will likely need to be removed along that frontage unless design changes are made to avoid the trees such as routing the sidewalk to the south of trees 50695, 50696, 50697 and 20698 through 20707. Coordination with the project arborist will be required during the design of right of way improvements if trees are to be retained along tax lots 106, 108, and the western portion of tax lot 106.

3. **Tree protection fencing.** Tree protection fencing with tree protection signage should enclose protected trees on all sides at the limits of disturbance.
4. **Underground electricity**. Overhead power lines exist along the south side of Norwood Road. These will be rerouted underground. The preferred location of this work is under the sidewalk or within the 7-foot-wide dedication and not within the PUE. Boring is the preferred method of installation.
5. **Routing of utilities.** An 8-foot-wide PUE is planned within the northern portion of the 60-foot-wide tree grove. If possible, additional utilities should be routed outside the recommended limit of disturbance or bored at least four feet below grade where there are existing trees to be retained. If alternative routes are unavailable or impractical, pneumatic excavation or hydro exaction under arborist supervision within the buffer may be compatible with tree preservation.
6. **Routine tree risk assessments.** If exterior trees are removed, or a new "edge" is created, routine risk assessments may be recommended.

Conclusion

Adjustments to the preliminary design for the Norwood Multi-Family project have maximized tree preservation near Norwood Road. Preserving the 60-foot-wide buffer of Douglas-fir south of Norwood Road is compatible with the proposed road improvements and site plan at this stage of the planning process. Efforts should be made to adequately protect grove exterior trees which will in-turn protect interior trees. Close coordination with the project arborist team will be necessary as the project design is refined to ensure the trees to be retained are adequately protected.

Please contact our firm if there are any questions about the information provided in this report.

Preliminary
04/12/2023

Alternative sidewalk route to retain treed frontage.

Recommended limit of disturbance to the north is the existing sidewalk. No construction, paving, grading or right of way improvements beyond this point.

SW NORWOOD ROAD

Existing curb to be removed and replaced with 6 inch curb. No root cracked curbs or lifted pavement were observed.

Recommended corridor to bore underground utilities between the sidewalk and 7-foot-wide dedication.

37.0'

7.0' DEDICATION

8.0' PUBLIC UTILITY EASEMENT

53.0' TREE BUFFER

14.1' MIN SETBACK TO TREE BUFFER

15.3'

24'

Recommended limit of disturbance. No construction, paving, grading or right of way improvements beyond this point.

Proposed 5-foot-wide curb tight sidewalk west of 24-foot-wide drive aisle.

Recommended limit of disturbance. No construction, paving, grading or right of way improvements beyond this point.

Existing curb and pavement to the south to be removed and converted to landscape.

SW BOONES FERRY ROAD

TREE LEGEND

- X — Tree proposed for removal
- Recommended limits of disturbance
- Alternative sidewalk route
- 8' Public Utility Easement
- 7' Dedication
- Existing impervious area to be converted to landscape
- Proposed corridor for underground utilities

Note: This preliminary exhibit only addresses trees affected by road improvements along SW Norwood Road and does not address all trees on the site.

Attachment 5 – Assumptions and Limiting Conditions

1. Any legal description provided to the consultant is assumed to be correct. The information provided by Vista Residential Partners was the basis of the information provided in this report.
2. It is assumed that this property is not in violation of any codes, statutes, ordinances, or other governmental regulations.
3. The consultant is not responsible for information gathered from others involved in various activities pertaining to this project. Care has been taken to obtain information from reliable sources.
4. Loss or alteration of any part of this delivered report invalidates the entire report.
5. Drawings and information contained in this report may not be to scale and are intended to be used as display points of reference only.
6. The consultant's role is only to make recommendations. Inaction on the part of those receiving the report is not the responsibility of the consultant.
7. The information provided in this report includes information and recommendations for the benefit of our client's decision making. The ultimate decision of whether to retain, remove, prune, inspect, monitor, or otherwise apply treatment recommendations to a tree is the sole responsibility of the tree owner, and not the responsibility of the project arborist.
8. If there are any questions or concerns with the information presented in this report, please contact our firm so that we can address any issues as soon as possible.
9. The purpose of this report is to (1) inventory trees within a 60-foot-wide area south of Norwood Road, and (2) provide tree preservation recommendations for the proposed development.

MEMORANDUM

DATE: April 19, 2023

TO: VISTA RESIDENTIAL PARTNERS
25 NW 23rd Street
Suite 6, #414
Portland, OR 97210

FROM: Brendan Buckley
Johnson Economics, LLC

SUBJECT: Needs Analysis for Multifamily Housing Uses at a Site in South Tualatin, OR

JOHNSON ECONOMICS have completed an analysis of the appropriateness of a site located in south Tualatin, Oregon for the common uses under its current and proposed zoning. The 9.2-acre site is currently zoned Institutional (IN) and Medium-Low Density Residential (RML). An application has been submitted to rezone the parcel to High-Density High Rise (RH-HR) to allow a multi-family housing complex including buildings of four stories in height.

This analysis examines the site for appropriateness for the proposed use from a market perspective, assessing the layout and location for successful multi-family housing. This memo reviews the findings of our analysis of demand and supply of land for housing uses in Tualatin.

CONTENTS

I. Executive Summary 2

II. Subject Site and Proposed Use 3

III. Site and Location Analysis 5

IV. Rental Housing Market Trends 7

V. Property Value Impacts 9

VI. Need for Housing in Tualatin/Basalt Creek 10

VII. Conclusions 15

I. EXECUTIVE SUMMARY

The analysis presented in this memo supports a zone change at the subject site from a medium-low density residential zone and institutional zone to a high-density residential zone based on market factors and land need findings. The following is a summary of major findings:

- The subject site's location and configuration are supportive of multi-family development at this location. The use would be compatible with neighboring uses, while having a greatly mitigated impact on any low density residential nearby. The proposed use will be complementary to the Plambeck Gardens development underway nearby.
- Multi-family development is a common transitional use found at the border of residential neighborhoods and active institutional uses with proper buffering.
- The subject location is advantageous in terms of site size and configuration and transportation access, and multi-family housing will be in demand and market feasible at this location. Buildable residential sites of this size, and roughly rectangular, are rare not just locally but in much of the Metro area. These sites are well suited for multi-family development, while low-density development can more easily adjust to smaller and more irregular parcels.
- The rental housing market in Tualatin is strong and supportive of the continued development of additional market-rate rental supply. Average rents have climbed steadily over the past decade, outpacing inflation, while the vacancy rate has fallen. This indicates a tight supply of available units which generally leads to increasing rent levels for renter households and offers them less choice among properties. New housing supply helps to alleviate rent increases and helps renter households remain in the community.
- The proposed development should not lower nearby property values and will very likely increase property values in the immediate area.
- There are compelling reasons to conclude that the housing need forecast included in the 2019 HNA is low, and the forecasted need for 1,014 units is significantly understated for a 20-year timeframe. The updated data demonstrates that demand is outpacing the HNA forecast and supports a policy choice by the City to provide needed housing based on the updated information. It is important to note that cities are not bound by the forecasts adopted in an HNA and may adapt to a new reality if it outpaces the forecast.
- The recent Decennial Census provided a new higher population estimate for Tualatin that is higher than not only the 2020 population assumption in the HNA, but higher than the *2040 population at the end of the forecast period.*
- The HNA assumes that multi-family housing will be built on RMH, RH, or RH-HR zoned land. The HNA concludes that there is a deficit of land in two of these zones, while most of the remaining RH land is under development at Plambeck Gardens. This means that the supply of land zoned for multi-family identified in the HNA has been exhausted, while the need for such housing has not been met.

- The low HNA forecast and rate of development already experienced since adoption indicate that the need for new housing of all types, including multi-family, is likely to be greatly in excess of the HNA forecast.
- The findings of the HNA and the subsequent Housing Production Strategy are supportive of rezoning lower density residential land and encouraging housing opportunities for households at middle income, many of whom are typically served by market-rate rental apartments. The policies laid out in the Strategy call for greater diversity of housing types, increased rental unit availability, and more housing for all segments of the local workforce so more residents can live and work in the same community.

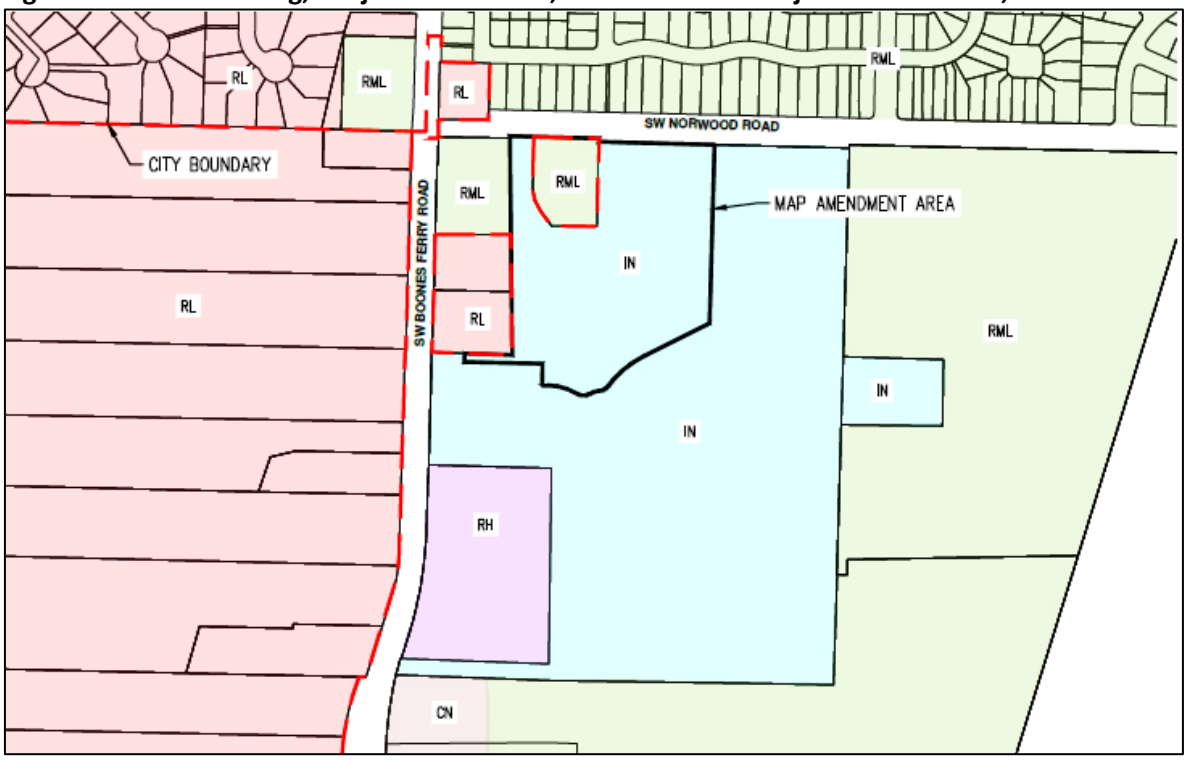
Analysis supporting these findings is presented in the following sections.

II. SUBJECT SITE AND PROPOSED USE

The subject site is located east of SW Boones Ferry Road and south of SW Norwood Road in south Tualatin. The site is roughly 9.2 vacant acres that was formerly a portion of the grounds of the Horizon Christian High School, plus one adjacent single-family home.

To the north of the subject site, across SW Norwood Road is a neighborhood of single-family homes, with medium-low density zoning. To the west are parcels with RML and RL zoning (Figure 1).

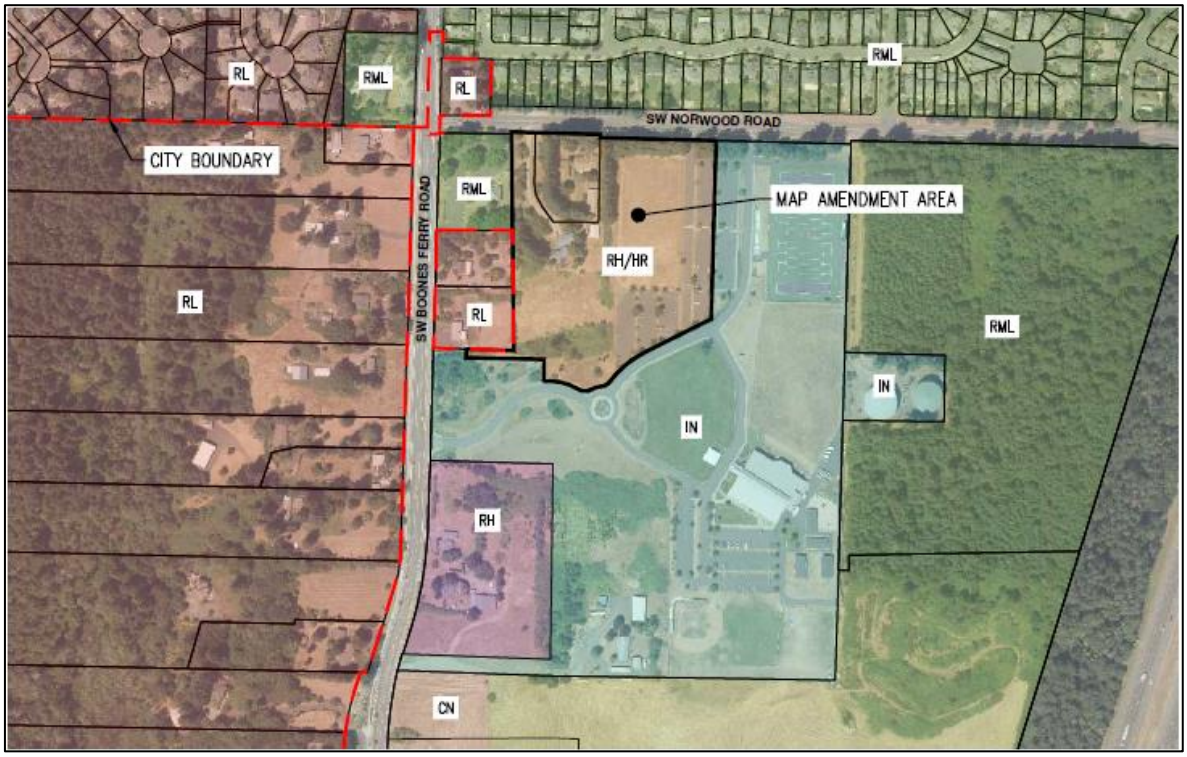
Figure 1: Current Zoning, Subject Site & Area, South Tualatin Subject Site Location, South Tualatin



Source: AKS Engineering

To the south of the site, beyond the access road of the high school, is a parcel of high-density residential zoning where the Plambeck Gardens apartments are currently under development. That 116-unit project will be compatible with the proposed development at the subject site. To the east of the site, beyond the alternate access and playing field of the high school is the large Autumn Sunrise master planned subdivision. This subdivision, currently underway on 62 acres, is zoned RML and planned to eventually accommodate 400 new single family units (80% detached, 20% attached).

Figure 2: Subject Site Location (Map Amendment Area), With Proposed Zoning, South Tualatin



Source: AKS Engineering

CURRENT ZONE: Medium-Low Density Residential (RML) - 1 acre of the site

Purpose and Permitted Uses

The City of Tualatin Development Code defines the purpose of the RML zone as follows:

> *The purpose of this zone is to provide household living uses with a variety of housing types at moderately low densities. This district is primarily oriented toward middle housing types including attached dwellings, multi-family development, and manufactured dwelling parks. (TDC Chapter 41.100)*

The RML zone permits a range of residential uses at a density of up to 25 townhouse units per acre.

CURRENT ZONE: Institutional (IN) - 8-acres of the site

Purpose and Permitted Uses

> *The purpose of the Institutional (IN) Zone is to provide areas of the City that are suitable for public, educational, religious, recreational, and incidental support facilities to serve the community.*
> *(TDC Chapter 49.100)*

The IN zone permits assembly uses such as churches as well as schools, government offices, or infrastructure. Oregon Senate Bill 8, passed in 2021, updated ORS 197.308 and allows for affordable housing to be located on property that is zoned for religious assembly. Therefore, affordable housing could currently be built on the IN zoned land at an undefined density.

PROPOSED ZONE: High-Density High Rise (RH-HR), Purpose and Permitted Uses

The proposed new zone for the subject site is RH-HR with some proposed textual amendments to that zone in the Tualatin Development Code. The following is the purpose of this zone as shown in Code, ***with the proposed textual changes of the applicant presented in red***:

> *The purpose of the High Density High Rise (RH-HR) zone is to provide areas of the City ~~within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club~~ that are suitable for high density apartment or condominium~~s towers~~. (Chapter 44.100)*

The zone allows for residential density of up to 30 units per acre, the only residential zone to allow housing developments at this density. (The RH zone allows household uses at 25 units per acre). The proposed textual changes to the chapter would limit the height of development at the subject site to four stories, or 50 feet, whichever is less. (Elsewhere in this zone, the maximum allowed height is 64 feet.)

III. SITE AND LOCATION ANALYSIS

From a market perspective the subject site, like any property, will have strengths and weaknesses as a physical location for different potential land uses. While zoning determines what is allowed on a specific property, real estate market forces will determine if or when a property is actually developed.

HIGH-DENSITY RESIDENTIAL USE OF THE SUBJECT SITE

The subject site is well-suited to multi-family apartment development, given the location and site attributes. The surrounding area of the Basalt Creek Plan Area is intended to house medium-to-high density housing. Much of the remainder of the Plan Area is intended for low-density residential development. In general, residential uses do not face the same requirements of visibility and access as commercial properties do and can be located in internal neighborhoods and away from major arterial streets.

Access: As a high density residential use, the site will have access for its residents to SW Norwood Road, with ready access to SW Boones Ferry Road immediately to the west. SW Boones Ferry Road is a major arterial that provides access to North Wilsonville and the I-5 freeway roughly 1.25 miles to the south, and central Tualatin roughly 2 miles to the north. The location near this arterial will also greatly increase the visibility and marketability of apartments at this location, which helps to ensure that the project is successful in attracting and housing local households.

The arterial is served by Trimet Route 96, which runs roughly every half hour during rush hour periods, between Wilsonville and central Portland. It also features bike lanes for most of the length between central Tualatin and Wilsonville.

Site configuration: The 9.2-acre site is well configured for multi-family housing development. The site is roughly rectangular allowing for flexibility in site planning and building layout, while allowing open space and buffering of neighboring uses as well as the road. Buildable residential sites of this size, and roughly rectangular, are rare not just locally but in much of the Metro area. These sites are well suited for multi-family development, while low-density residential development can more easily adjust to smaller and more irregular parcels. Growth management measures limit the number of these large "greenfield" sites that come available, making it valuable to use these opportunities effectively.

Neighboring uses: The proposed multi-family development is compatible with neighboring uses. The high school produces traffic, noise, and other activity expected of an active daytime use. Multi-family development is often used as a buffer between active daytime uses, such as a school or commercial use, and neighboring low-density residential. Multi-family zoning is a common "step down" land use between higher activity land uses, and low activity neighborhoods. Also adjacent to the site, at the corner of SW Norwood and Boones Ferry roads is a church, which is a less active, but still non-residential use compatible with multi-family development.

In form and density, the proposed multi-family development will be very similar to the approved Plambeck Gardens apartments, currently under construction roughly 500 feet to the south of site.

To the west, are two low-density residential properties that will likely be redeveloped, and across Norwood Road to the north is a medium-low density residential neighborhood. These uses are commonly located near multi-family development, and impacts can be mitigated with setbacks, landscaping, fencing and other buffering. The neighborhood to the north is separated from the subject site by the road, a 30 foot landscape buffer, and a multi-use path. Furthermore, the homes in this neighborhood are not accessed via Norwood Road, but SW Stone Drive to the north, meaning these homes face away from the proposed development and are further buffered by backyards and fencing.

Residential Conclusions: The site and location are well-suited for multi-family housing, and this is likely the "highest and best" economic use for a parcel of this size and configuration. Low density housing is more adaptable to using smaller and more irregular sites. Rental apartments will be market feasible at the subject site as evidenced by the success of medium to high-density residential uses in the immediate area. The higher density of the proposed land use is compatible with surrounding uses, and can be further buffered by setbacks, landscaping, and other measures. The site is neighbored on two sides by non-active portions of the high school property (drives and parking), and a church to the west. Existing low-density residential use in the area is compatible with a nearby apartment complex, and properly buffered.

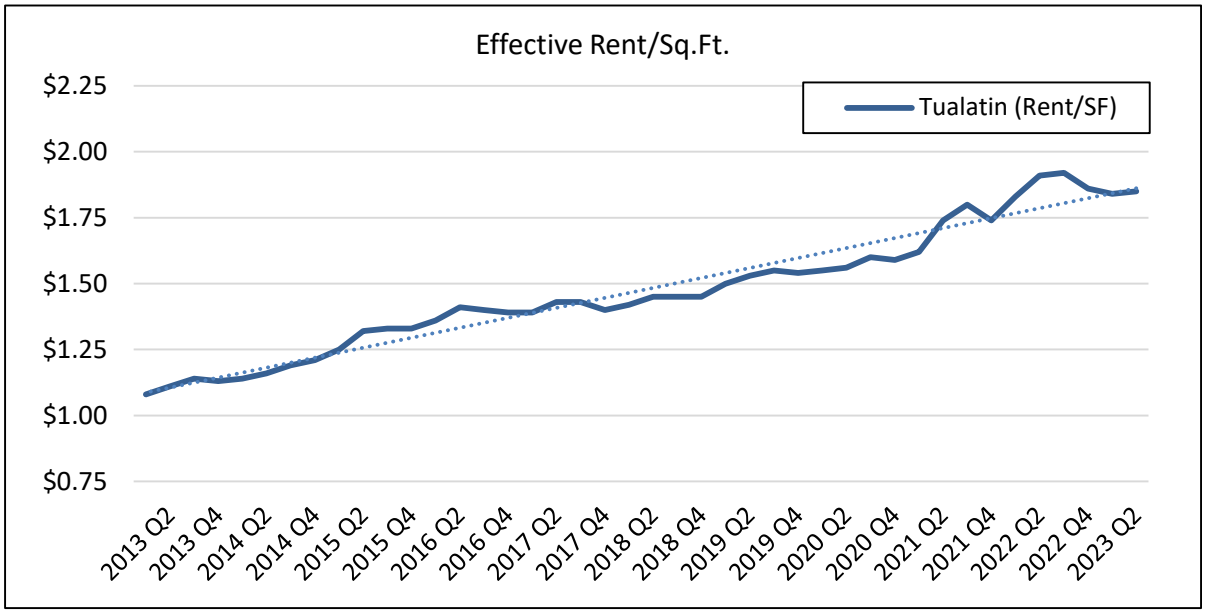
IV. RENTAL HOUSING MARKET TRENDS

The rental housing market in Tualatin is strong and supportive of the continued development of additional market-rate rental supply. Average rents have climbed steadily over the past decade, outpacing inflation, while the vacancy rate has fallen. This indicates a tight supply of available units which generally leads to increasing rent levels for renter households and offers them less choice among properties. New housing supply helps to alleviate rent increases and helps renter households remain in the community.

Rent levels in Tualatin are supportive of new development at the subject site, and the feasibility of multifamily housing in general. Development of new rental housing has migrated from Central Portland to suburban markets in recent years, due to the impacts of COVID including increased working from home, and households seeking different living situations during the "lockdown" phase. Simultaneously, Portland has implemented some conditions on new rental housing development and operations that have caused some regional developers to look to outer markets. These trends mean that demand for multi-family housing and the feasibility of building will likely continue to increase in coming years.

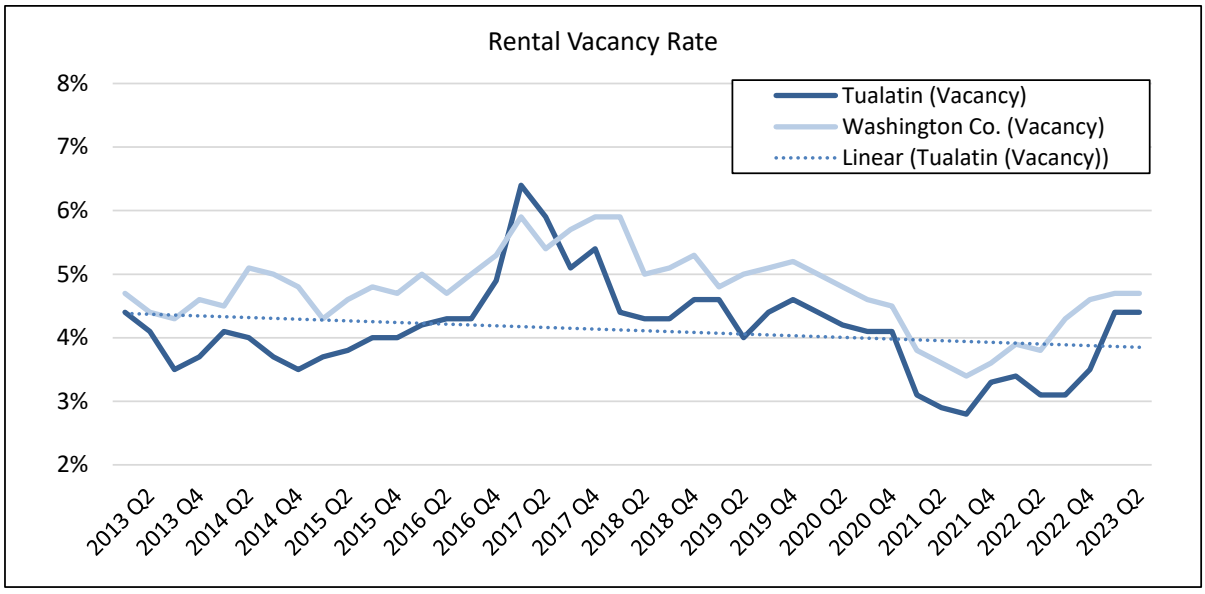
Figure 3 shows growth in effective rent per square foot in Tualatin over the prior decade. In that time, average rent grew by 77%, from $1.08/SF to $1.85/SF. The average monthly rent per unit grew from $945 to $1,613. Estimated inflation over this period was 31%, so the growth in average rent significantly outpaced inflation.

Figure 3: Average Effective Rent per Sq.Ft., Tualatin (2013 – 2023)



Source: CoStar

Figure 4: Average Vacancy Rate, Tualatin and Washington County (2013 – 2023)



Source: CoStar

Figure 4 shows vacancy rate trends over the same period. The vacancy rate shows more volatility than average rents, but still presents a general downward trend over time as the supply has tightened over the past decade. Tualatin has tended to experience a lower vacancy rate than Washington County. Generally, the rental housing market considers 5% to be a "healthy" vacancy rate, allowing choice and mobility for renters while supporting the upkeep of properties. The extended period of sub-5% vacancy in Tualatin over the last decade is another indicator that the community has

experienced a tight housing supply for many years. The low vacancy is contributing to increasing rent levels for local households as demand is high for the more limited supply.

The latest statistics tracked by Multifamily Northwest indicate that market rent units in broader Tualatin market area are generally affordable to households earning roughly $50k to $125k per year depending on unit size. The median household income in Tualatin is an estimated $98k per year. Therefore, market-rate rental housing in the city tends to serve those earning between 50% and 125% of the median income.

V. PROPERTY VALUE IMPACTS

The proposed development is unlikely to have demonstrable negative impacts on property values of surrounding properties. As a general rule, land zoned for multi-family development is *more* valuable than lower-density residential land, including land zoned for single-family homes. This is because multi-family land allows for a greater density of economic use and returns on investment per square foot of buildable land.

The new multi-family uses in the area (the subject site and Plambeck Gardens) should be expected to increase the value of nearby uses in the long run, as it increases the viability of more intensive development on those sites as well, if the property owners should choose to pursue it. This includes the adjacent high school site, and church site, though these users may not choose to sell their property for a very long time, if ever. Adding new households in an area also tends to attract new services and amenities to the area that can benefit the property values of everyone in the neighborhood.

Some community members might voice an intuitive concern that new apartments may decrease to nearby properties due to negative externalities such as additional traffic, noise, or appearance. However, there is little to support that multi-family properties have this impact on nearby property values. Multiple studies have demonstrated that multifamily housing does not have an impact on the value of neighboring properties, and in many cases increases the value of adjacent homes (Obrinsky, 2008; Eskic, 2021)[1]. The Eskic study found that homes within a half mile of newly constructed apartments actually appreciated faster than those located farther away. Additional studies support

[1] Obrinsky, Mark and Debra Stein. March 2007, *Overcoming Opposition to Multifamily Rental Housing* Massachusetts: Joint Center for Housing Studies Harvard University.

Eskic, Dejan. February 2021, *The Impact of High-Density Apartments on Surrounding Single-Family Home Values in Suburban Salt Lake County* Salt Lake City: Kern C. Gardner Policy Institute.

Chakraborty, A., & McMillan, A. November 2018, *Is Housing Diversity Good for Community Stability? Evidence from the Housing Crisis:* Journal of Planning Education and Research.

that a diverse mix of housing types within a neighborhood have greater stability in the face of a housing market downturn (Chakraborty, 2018).

The proposed development will be well buffered from neighboring properties, particularly to the north, east, and south. To the west, site plan considerations such as setbacks and landscape buffering will mitigate impacts on neighbors. Multi-family development is a common land use adjacent to lower density housing. As noted, the subject development is likely to *increase* the value of the church property and the adjacent single-family lots in the long run, by making them eventual candidates for greater residential density development in the future, either through a zone change or the new statewide middle housing rules.

VI. NEED FOR HOUSING IN TUALATIN/BASALT CREEK

The proposed zone change from Institutional (IN) and Medium Low Density Residential (RML) use to High Density High Rise (RH-HR) use at the subject site will increase the supply of land zoned for high-density residential development and the capacity for new housing units in the area. A review of the most recent relevant studies of housing land need in the city supports the increase in RH-HR land based on projected growth and identified need.

HOUSING NEEDS ANALYSIS (ADOPTED 2019)

The most recently adopted Tualatin Housing Needs Analysis (HNA) forecasted a need for 1,014 new housing units in the city between 2020 and 2040. Figure 5 summarizes the forecasted need (which is Exhibit 97 in the HNA report):

Figure 5: Comparison of Residential Land Capacity and 20-Year Need, Reproduced from HNA

Exhibit 97. Comparison of capacity of existing residential land with demand for new dwelling units and land surplus or deficit, Tualatin City Limits and Basalt Creek, 2020 to 2040
Source: Buildable Lands Inventory; Calculations by ECONorthwest. *Note: DU is dwelling unit.*

Residential Plan Designations	Capacity (Dwelling Units)	Demand for New Housing	Remaining Capacity (Supply minus Demand)	Land Surplus or (Deficit) *Gross Acres*
Low Density	523	466	57	10
Medium Low Density	386	71	315	27
Medium High Density	13	122	(109)	(7)
High Density	285	254	31	2
High Density High-Rise	-	101	(101)	(4)

Source: City of Tualatin Housing Needs Analysis (2019), ECONorthwest

- There was an estimated need for 571 units within the 2019 City limits, and 443 in the Basalt Creek planning area, most of which was not yet annexed. Of the total, an estimated 456 (or 45%) were forecasted to be multi-family units.

- The 2019 HNA concluded that there was a deficit of land for medium-high and high-density high-rise development, which are zones the HNA concludes are supportive of multi-family housing.

As discussed in detail below, there are reasons to believe that this 20-year housing forecast will prove to significantly understate the actual achieved growth over that period, and need for housing of all types, including multi-family will prove to be higher than was stated in the HNA.

HNA Population and Forecast Assumptions: An HNA analysis presents a good faith effort to estimate future growth in a city based on the best data and assumptions available at the time. But like any forecast, an HNA can be quickly overtaken by events on the ground.[2] The following is a range of points regarding the assumptions reflected in the HNA with the benefit of a few years of new data and observations:

- Like all Metro cities, Tualatin utilized the distributed population forecast from Metro regional government as the source of its growth figures. In the case of the adopted HNA, the analysis used the Metro forecast from 2020 to 2040; a forecast that was adopted in 2016.
- The forecast projected that the city (not including Basalt Creek area) would have 26,745 people in 2020 and grow to 27,372 people in 2040. This is 20-year growth of 627 people. These figures are reflected in the HNA document.
- However, the subsequent 2020 Decennial Census showed that Metro's 2020 population assumption (from 2016) was low. The 2020 Census counted a higher population of 27,942 people in Tualatin, or 533 people more than the HNA projected would live in Tualatin in 2020 (26,745 people).
- *This correction to the 2020 population figure means that 85% of the population growth forecasted in the HNA* ***had already occurred*** *before the base year of the analysis had even arrived (533 people/627 people).*
- In addition, the Census estimated a higher population in 2020 than the number forecasted by Metro *in 2040, at the end of the forecast period.*
- This indicates that Tualatin had been growing faster than assumed by either Metro or the PSU Population Center at the time the HNA was prepared in 2019.
- In the decade between 2010 and 2020, the Census estimates that the city grew by 1,888 people, or an average of roughly 190 people per year. At this rate, the total population

[2] Johnson Economics regularly prepares Housing Needs and Analysis for Oregon cities and has over a decade of direct experience on these analyses.

growth forecasted in the HNA (627 new people) *over 20 years*, would be realized *in just 3.3 years*.

- The achieved average population growth rate between 2010 and 2020 (Census) was 0.7% per year. The Metro 2020-2040 forecast used in the HNA reflects a much slower average annual growth rate assumption of 0.1% per year. Compounded over 20 years, this is a large difference. For instance, if we assume that the 0.7% growth rate continues into the future, that would mean over 31,000 residents in Tualatin by 2040, or over 4,000 new people.
- This indicates that the growth assumptions in the HNA for the period both prior to 2020 and going forward to the year 2040 were likely too low. Therefore, the finding of need for 1,014 housing units over 20 years is also likely very low.
- Since adoption of the HNA at the end of 2019, more than 800 units have already been permitted in Tualatin, including 380 multi-family units combined in the Plambeck Garden and the Commons on the Tualatin, and 400 single family units in Autumn Sunrise (320 detached and 80 attached). This means that roughly 80% of the 20-year forecasted housing growth (a total of 1,014 units) has been permitted in just the few years since the HNA's adoption.
- The HNA assumes that multi-family housing will be built on RMH, RH, or RH-HR zoned land. The HNA concludes that there is a deficit of land in two of these zones, while most of the remaining RH land is under development at Plambeck Gardens. This means that the supply of land zoned for multi-family identified in the HNA has been exhausted, while the need for such housing has not been met.
- As Figure 3 shows, as of 2019, Tualatin (including Basalt Creek) had an estimated remaining capacity for an additional 1,207 new housing units within its residential zones. As noted above, over 800 units have since been permitted in just a few years. Therefore, the estimated remaining capacity is likely to be greatly diminished.

The implication of the above points is that Tualatin is very likely to exceed the forecasted growth in population and households well before 2040, and perhaps in the next few years. It is safe to assume that new housing of all types, particularly multi-family, will be needed in coming years in excess of the amount forecasted in the HNA.

The points made above are not to disparage Tualatin's adopted HNA, which must reflect the best assumptions available at the time and is required by statute to use the forecasts provided by Metro. The 2019 HNA reflects these limitations.

Impacts of the HNA: It is important to note that cities are not bound by the forecasts adopted in an HNA if reality outpaces the forecast. The number of units forecasted is a floor, not a statutory ceiling beyond which more permits cannot be issued. If the population growth exceeds the forecast in the HNA (as it already has), the City is not obligated to put limits on growth to conform to the HNA. The HNA (with dated information) demonstrated a need for additional RH-HR zoned land. The updated population data indicates that the need is even greater than projected.

TUALATIN HOUSING STRATEGY (ADOPTED 2019)

The Housing Needs Analysis was accompanied by a Housing Strategy memo based on its findings. The Strategy, developed with input from advisory committees and City staff and officials, identified six major strategic priorities, with 24 underlying action items. The following findings and adopted strategies are most relevant to the proposed zone change application:

> The results of the HNA show that Tualatin has a deficit of land designated for housing the Medium High Density Residential and High Density/High Rise Residential comprehensive plan designations. The City will need to develop policies to meet this deficit, such as redevelopment or rezoning land to meet these housing needs. (Page 1)
>
> **Strategy 1: Ensure adequate supply of land that is available and serviceable.**
>
> - Recommendation 1.2b: Evaluate opportunities to re-zone Residential Low Density and Medium-Low Density residential land for higher-density housing.
>
> **Strategy 3: Support development and preservation of housing that is affordable for all households.**
>
> - Action 3.2: Develop policies to support development of housing affordable to people who have incomes between 60% and 120% of MFI… and live and work in Tualatin.
>
> Source: Tualatin Housing Strategy (2019), ECONorthwest

The adopted strategies identified are supportive of rezoning residential lands to allow greater housing density. The strategy also encourages development of market-rate rental housing, which is typically affordable to middle-income households, and having a higher density supplies more units for these households more efficiently.

TUALATIN HOUSING PRODUCTION STRATEGY (2021)

A more formal Housing Production Strategy was adopted in 2021. It is intended to establish a framework of policies and strategic actions that address the housing needs described in the Tualatin Housing Needs Analysis. The Housing Production Strategy included the following key findings that are applicable to the proposed zone change application.

- Tualatin needs increased housing diversity. Nearly two-thirds of Tualatin's housing stock is single-family detached housing. The City's demographic and socioeconomic characteristics suggest a need for a wide variety of housing types to meet the needs of a growing and diverse pool of existing and future residents.
- Tualatin needs greater housing affordability and availability for renters. Competition for lower-priced affordable units in Tualatin is strong and many cannot afford these rents or housing sales prices without cost burdening themselves. In the 2013-2017 period, about 56% of Tualatin's renters were cost burdened.
- Housing is needed for people to live and work in Tualatin. Tualatin's Economic Opportunities Analysis report (December 2019) reported that 93% of people working in Tualatin lived in

another community and commuted into Tualatin each day. Some people who work in Tualatin can afford rent or homeownership in Tualatin, but some would be cost burdened in Tualatin.

The Housing Production Strategy also identified barriers to development of needed housing within the City of Tualatin which include:

- Land for Housing – There is a limited amount of unconstrained, vacant buildable residential land within the city. Of this land, more than 90% is Low Density or Medium Low Density Residential, providing limited opportunities for development of multifamily housing. "Scarcity of vacant land, especially for multifamily development, is one of Tualatin's primary barriers to development of needed housing.
- Complexity and expense of redevelopment - While areas can be identified for redevelopment, the costs and complexity of redevelopment are substantial. Barriers to redevelopment include higher site acquisition and preparation costs, higher construction costs, and costs of upgrades to infrastructure to support increased development density. In a suburban environment, rents may not be high enough to justify these higher development costs. In addition, a number of the sites that the City has identified as potential redevelopment opportunities are located in a floodplain, or have other site-specific constraints that create challenges for development.

  - Tualatin Housing Production Strategy (2021), ECONorthwest

Another consideration outlined in The Housing Production Strategy is the importance of supporting and leveraging the private market's ability to deliver market-rate development, stating that "…increasing the overall supply of available housing units plays a significant role in overall housing affordability…" (Pg. 21).

Finally, the following goal and strategic actions were adopted with the Housing Production Strategy and would be addressed by the proposed zone change:

Goal 11: Increase housing development opportunities through regulatory and zoning changes to accommodate a diverse range of housing types and price points to meet the housing needs in Tualatin.

11.a. Evaluate updating density standards for multifamily housing in medium-density, high-density, and mixed-use zones.

11.b. Evaluate opportunities to rezone lower-density residential land to higher density.

- Tualatin Housing Production Strategy (2021), ECONorthwest

These actions support increasing residential densities to allow for efficient development, especially in proximity to transit. It encourages rezoning to the RH-HR to provide more housing on the limited available buildable land.

VII. CONCLUSIONS

The analysis presented in this memo supports a zone change at the subject site from a medium-low density residential zone and institutional zone to a high-density residential zone based on market factors and land need findings. The following is a summary of major findings:

- The subject site's location and configuration are supportive of multi-family development at this location. The use would be compatible with neighboring uses, while having a greatly mitigated impact on any low density residential nearby. The proposed use will be complementary to the Plambeck Gardens development underway nearby.
- Multi-family development is a common transitional use found at the border of residential neighborhoods and active institutional uses with proper buffering.
- The subject location is advantageous in terms of site size and configuration and transportation access, and multi-family housing will be in demand and market feasible at this location. Buildable residential sites of this size, and roughly rectangular, are rare not just locally but in much of the Metro area. These sites are well suited for multi-family development, while low-density development can more easily adjust to smaller and more irregular parcels.
- The rental housing market in Tualatin is strong and supportive of the continued development of additional market-rate rental supply. Average rents have climbed steadily over the past decade, outpacing inflation, while the vacancy rate has fallen. This indicates a tight supply of available units which generally leads to increasing rent levels for renter households and offers them less choice among properties. New housing supply helps to alleviate rent increases and helps renter households remain in the community.
- The proposed development should not lower nearby property values and will very likely increase property values in the immediate area.
- There are compelling reasons to conclude that the housing need forecast included in the 2019 HNA is low, and the forecasted need for 1,014 units is significantly understated for a 20-year timeframe. The updated data demonstrates that demand is outpacing the HNA forecast and supports a policy choice by the City to provide needed housing based on the updated information. It is important to note that cities are not bound by the forecasts adopted in an HNA and may adapt to a new reality if it outpaces the forecast.
- The recent Decennial Census provided a new higher population estimate for Tualatin that is higher than not only the 2020 population assumption in the HNA, but higher than the *2040 population at the end of the forecast period.*
- The HNA assumes that multi-family housing will be built on RMH, RH, or RH-HR zoned land. The HNA concludes that there is a deficit of land in two of these zones, while most of the remaining RH land is under development at Plambeck Gardens. This means that the supply of land zoned for multi-family identified in the HNA has been exhausted, while the need for such housing has not been met.

- The low HNA forecast and rate of development already experienced since adoption indicate that the need for new housing of all types, including multi-family, is likely to be greatly in excess of the HNA forecast.
- The findings of the HNA and the subsequent Housing Production Strategy are supportive of rezoning lower density residential land and encouraging housing opportunities for households at middle income, many of whom are typically served by market-rate rental apartments. The policies laid out in the Strategy call for greater diversity of housing types, increased rental unit availability, and more housing for all segments of the local workforce so more residents can live and work in the same community.

From: Melissa Slotemaker, AICP
Project Name: Norwood Multifamily Plan Map and Text Amendment
AKS Job No.: **8723**
Project Site: 9300 SW Norwood Road

Subject: **Supplemental Information on School Capacity**

Please add this memo as supplemental information to the Norwood Multifamily Plan Map and Text Amendment application (PMA 23-0001 and PTA 23-0001) that was originally submitted to the City in January 2023.

Criterion 33.070.5.e requires that "the appropriate school district must be able to reasonably accommodate additional residential capacity." The Plan Map and Text Amendment application includes correspondence from the Sherwood School District (see Exhibit G) which states that the School District can accommodate additional students expected from the development of a 276 unit apartment project.

Additionally, ORS 195.110 dictates the rules regarding school capacity. ORS 195.110(12) states that a development moratorium cannot be based on school capacity. Under ORS 195.110(13), a city can deny an application for residential development based on lack of school capacity if three requirements are met: 1) the issue is raised by the school district; 2) the lack of school capacity is based on a school facility plan formally adopted under the statute and incorporated in the comp plan; and 3) the city has considered options to address school capacity.

The Sherwood School District has not raised the issue of lack of school capacity. Additionally, the Sherwood School District has over 2,500 students, which means it qualifies as a "large school district." The City of Tualatin is therefore required to include as an element of its Comprehensive Plan a school facility plan per ORS 195.110(2). Tualatin does not have a school facility plan included within the Comprehensive Plan. Instead, there is a general policy related to coordination (see Policy 5.1.7). Therefore, pursuant to ORS 195.110(13), the City cannot deny the application based on lack of school capacity. TDC 33.070.5.e is not an independent basis for denial because it does not satisfy the standards in ORS 195.110.

CITY OF TUALATIN
Planning Division

NOTICE OF HEARING AND OPPORTUNITY TO COMMENT

NOTICE IS HEREBY GIVEN that a public hearing will be held before the City of Tualatin City Council at 7:00 p.m., Monday, May 22, 2023, held online over Zoom and additionally accessible at the Tualatin City Services Building (10699 SW Herman Road).

AKS Engineering & Forestry, LLC, on behalf of Vista Residential Partners and Property Owner Horizon Community Church, requests approval of two applications:

A Plan Map Amendment PMA 23-0001: The proposal requests the zone change from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR) for property located on a 9.2-acre site at 23370 SW Boones Ferry Road (Tax Lot: 2S135D000106); and

A Plan Text Amendment PTA 23-0001: The proposal requests to remove locational factors from the High-Density High Rise (RH-HR) purpose statement in Tualatin Development Code Section 44.100 and revise Table 44-3 to limit the structure height to 4 stories or 50 feet in the RH-HR zoning district south of Norwood Road, which would be applicable to the subject site.

You may view the application materials on our Projects web page: https://www.tualatinoregon.gov/planning/pma23-0001-pta23-0001-norwood-multi-family-plan-map-text-amendment

Comments due for staff report: **May 8, 2023.** Comments made after that date but prior to the close of the written record will be included in the written record but may not be included in the staff report to the City Council.

To grant the amendment, Council must find the proposal meets the applicable criteria of Tualatin Development Code (TDC) Chapters 32 and 33 and the Tualatin Comprehensive Plan; Applicable Oregon Statewide Planning Goals; Applicable Oregon Administrative Rules including compliance with the Transportation Planning Rule; and Metropolitan Service District's Urban Growth Management Functional Plan.

Individuals wishing to comment may do so in writing to the Planning Division prior to the hearing and/or present written and/or verbal testimony to the City Council at the hearing prior to the close of the written record. Testimony should be directed to the applicable criteria or those criteria the person testifying believes apply.

The public hearing process begins with a staff presentation, followed by testimony by proponents, testimony by opponents, and rebuttal. Individual testimony may be limited. At the conclusion of the hearing, the City Council will deliberate and make a decision based on the facts and arguments in the public record. Before the hearing is closed, a participant may request that the record remain open for at least seven days after the hearing.

Everyone is invited to attend the hearing and comment on the application's approval criteria. Failure of an issue to be raised in the hearing, in person, or by letter, or failure to provide sufficient specificity to afford the decision maker an opportunity to respond to the issue precludes appeal to the State Land Use Board of Appeals (LUBA) based on that issue. The failure of the applicant to raise constitutional or other issues relating to proposed conditions of approval with sufficient specificity to the decision maker to respond to the issue precludes an action for damages in circuit court.

A copy of the staff report, findings, and draft Ordinances on PMA 23-0001 and PTA 23-0001 will be available one week before the hearing at: https://www.tualatinoregon.gov/citycouncil.

Application materials are public record and are available for review. Copies can be viewed online or obtained at a reasonable cost, by contacting the Planning Division (503-691-3026 or planning@tualatin.gov).

NOTICE OF PUBLIC HEARING AND OPPORTUNITY TO COMMENT
CASE FILE: PMA 23-0001 & PTA 23-0001 — Norwood Multi-Family

NOTICE IS HEREBY GIVEN that an application for a Plan Map and Text Amendment (PMA 23-0001 & PTA 23-0001) will be heard by Tualatin City Council:

Monday, May 22, 2023 at 7 pm
Tualatin City Services Building
10699 SW Herman Road

To view the application materials visit:
www.tualatinoregon.gov/projects

TO PROVIDE COMMENTS:
Email: mnelson@tualatin.gov

Mail: Planning Division
Attn: Madeleine Nelson
10699 SW Herman Road
Tualatin, OR 97062

Questions?: 503-691-3027

To attend the hearing, there are two options:

- **Zoom Teleconference.** Details at: www.tualatinoregon.gov/citycouncil/council-meetings
- **Attend in person at the Tualatin City Services Building.**

AKS Engineering & Forestry, LLC, on behalf of Vista Residential Partners and Property Owner Horizon Community Church, proposes two applications located on a 9.2-acre site at 23370 SW Boones Ferry Road (Tax Lot: 2S135D000106).

Plan Map Amendment (PMA 23-0001): The proposal requests the zone change from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR).

Plan Text Amendment (PTA 23-0001): The proposal requests to remove locational factors from the High-Density High Rise (RH-HR) purpose statement in Tualatin Development Code Section 44.100 and revise Table 44-3 to limit the structure height to 4 stories or 50 feet in the RH-HR zoning district south of Norwood Road.

- **Criteria**: Tualatin Development Code (TDC) Chapters 32 and 33; Tualatin Comprehensive Plan; Applicable Oregon Statewide Planning Goals; Applicable Oregon Administrative Rules including compliance with the Transportation Planning Rule; and Metropolitan Service District's Urban Growth Management Functional Plan.
- **Application materials** are public record and are available for review. Copies can be viewed online or obtained at a reasonable cost, by contacting the Planning Division.
- **Staff report materials** will be available for inspection at no cost, at least seven days prior to the hearing. Copies can be obtained for a reasonable cost.
- **Individuals wishing to comment** may do so via email (mnelson@tualatin.gov) or in writing to the Planning Division prior to the hearing and/or present

written and/or verbal testimony at the City Council hearing prior to the close of the written record. Comments should address the identified approval criteria or those criteria that the person commenting believes apply.

- **The public hearing process** begins with a staff presentation, followed by testimony by proponents, testimony by opponents, and rebuttal. Individual testimony may be limited. At the conclusion of the hearing, the City Council will deliberate and make a decision based on the facts and arguments in the public record. Before the hearing is closed, a participant may request that the record remain open for at least seven days after the hearing.
- **Everyone is invited to attend the hearing and comment** on the application's approval criteria. Failure of an issue to be raised in the hearing, in person, or by letter, or failure to provide sufficient specificity to afford the decision maker an opportunity to respond to the issue precludes appeal to the State Land Use Board of Appeals (LUBA) based on that issue. The failure of the applicant to raise constitutional or other issues relating to proposed conditions of approval with sufficient specificity to the decision maker to respond to the issue precludes an action for damages in circuit court.
- A copy of the staff report, exhibits, and findings for PMA 23-0001 and PTA 23-0001 will be available one week before the hearing at: https://www.tualatinoregon.gov/citycouncil.

For additional information contact:
Madeleine Nelson, Assistant Planner: mnelson@tualatin.gov, 503-691-3027

You received this mailing because you own property within 1,000 feet (ft) of the site or within a residential subdivision which is partly within 1,000 ft.

Executive Summary

Planning Goal 10 and OAR 660-008. The methods used for this study generally follow the *Planning for Residential Growth* guidebook, published by the Oregon Transportation and Growth Management Program (1996).

The primary goals of the housing needs analysis were to (1) project the amount of land needed to accommodate the future housing needs of all types within the Tualatin Planning Area, (2) evaluate the existing residential land supply within the Tualatin Planning Area to determine if it is adequate to meet that need, (3) to fulfill state planning requirements for a twenty-year supply of residential land, and (4) identify policy and programmatic options for the City to meet identified housing needs.

What are the key housing needs in Tualatin?

Following are several key issues identified in the housing needs analysis:

- **Tualatin's housing market is strongly impacted by the regional market in the Portland Region.** Tualatin is relatively small, accounting for 4.5% of Washington County's population and 1.5% of the Portland Region's population. Of the more than 23,800 people who work in Tualatin, 93% of workers commute into Tualatin from other areas, most notably Portland, Tigard, Beaverton, and Hillsboro. Nearly 11,000 residents of Tualatin commute out of the city for work, many of them to Portland.
- **Household incomes in Tualatin are similar to Washington County's, and have not kept pace with housing prices.** Tualatin's home sales and rental costs are comparable to other communities in the region. Tualatin has a larger share of multifamily housing compared to Washington County and the Portland Region (42% the City's housing stock), and there are very few vacant units. Given these factors, Tualatin will continue to have demand for affordable, lower-income and middle-income housing.
- **Demographic and economic trends will drive demand for relatively affordable attached single-family housing and multifamily housing in Tualatin.** The key demographic trends that will affect Tualatin's future housing needs are: (1) the aging of the Baby Boomers, (2) aging of the Millennials, and (3) continued growth in the Latinx population.
    - As the Baby Boomers age, growth of retirees will drive demand for housing types specific to seniors, such as small and easy-to-maintain dwellings, assisted living facilities, or age-restricted developments.
    - Tualatin's ability to retain Millennials will depend on whether the city has opportunities for housing that both appeals to and is affordable to Millennials.
    - Growth in the number of Latinx households will result in increased demand for housing of all types, both for ownership and rentals, with an emphasis on

housing that is comparatively affordable. Latinx households are more likely to be larger than average, with more children and possibly with multigenerational households.

- **Tualatin has an existing lack of affordable housing.** Tualatin's key challenge over the next 20 years is providing opportunities for development of relatively affordable housing of all types of housing, from lower-cost single-family housing to market-rate multifamily housing.
  - About 26% of Tualatin's households had incomes less than $41,000 and cannot afford a two-bedroom apartment at Washington County's Fair Market Rent (FMR) of $1,330 without cost burdening themselves.
  - In 2018, a household needed to earn $25.58 an hour to afford a two-bedroom rental unit in Washington County.
  - Tualatin currently has a deficit of housing units that are affordable to households earning less than $35,000.
  - About 37% of Tualatin's households are cost burdened, with 56% of renters and 22% of owners paying more than 30% of their income on housing.

How much growth is Tualatin planning for?

A 20-year household forecast (in this instance, 2020 to 2040) is the foundation for estimating the number of new dwelling units needed. Exhibit 1 shows a household forecast for Tualatin for the 2020 to 2040 period. It shows that Tualatin will grow by about 1,014 households over the 20-year period (with 44% of households projected to locate in Basalt Creek).

Exhibit 1. Forecast of Household Growth, Tualatin city limits, 2020 to 2040
Source: Metro 2040 Population Distributed Forecast, Exhibit A. July 12, 2016.

10,791	11,362	571	5.3% increase
Households in 2020	Households in 2040	New households 2020 to 2040	0.26% Growth Rate

Exhibit 2. Forecast of Household Growth, Basalt Creek, 2020 to 2040
Source: Metro 2040 TAZ Forecast, Population Estimates (TAZ 980 and 981). November 6, 2015.

203	646	443	218% increase
Households in 2020	Households in 2040	New households 2020 to 2040	5.96% Growth Rate

How much buildable residential land does Tualatin currently have?

Exhibit 3 shows buildable residential acres by Plan Designation, after excluding constrained and unbuildable land. The results show that Tualatin has about 244 net buildable acres in residential Plan Designations. Of the 244 net acres, about 62% are located in Basalt Creek.

Exhibit 3. Buildable acres in vacant and partially vacant tax lots by Plan Designation, Tualatin Planning Area, 2018

Source: Metro BLI, ECONorthwest Analysis. *Note: The numbers in the table may not sum to the total as a result of rounding.*

Generalized Plan Designation	Total buildable acres	Buildable acres on vacant lots	Buildable acres on partially vacant lots
Residential			
Low Density Residential	79	11	68
Medium Low Density Residential	1	0	1
Medium High Density Residential	1	1	0
High Density High Rise Residential	0	0	0
High Density Residential	12	12	0
Commercial			
Mixed-Use Commercial Overlay Zone	0	0	0
Central Tualatin Overlay Zone	0	0	0
Basalt Creek Planning Area			
Low Density Residential	76	2	74
Medium Low Density Residential	69	49	20
High Density Residential	5	0	5
Neighborhood Commercial	0	0	0
Total	**244**	**75**	**168**

Exhibit 3 shows that Tualatin has 150 buildable acres in the Basalt Creek Planning Area. To analyze housing capacity and land sufficiency, this report uses the Basalt Creek Concept Plan's estimate of buildable acres (which is 88 buildable acres). The analysis uses the Basalt Creek Concept Plans estimate of buildable acres (rather than the buildable lands inventory estimate) to remain consistent with this recently adopted Concept Plan and the Comprehensive Plan amendment.

How much housing will Tualatin need?

Tualatin will need to plan for about 1,014 new dwelling units to accommodate forecasted household growth between 2020 and 2040. About 406 dwelling units will be single-family detached types (40%), 152 will be single-family attached (15%), and 456 will be multifamily (45%).

This mix represents a shift from the existing mix of housing, in which about 53% of the housing stock in the 2013-2017 period was single-family detached housing. The shift in mix is in response to the need for a broader range of housing types with a wider range of price points

than are currently available in Tualatin's housing stock, including housing types such as duplexes, townhouses, triplexes, and quadplexes, and apartments / condominiums.

How much land will be required for housing?

Exhibit 4 shows that Tualatin's 96 acres of buildable land in its city limits and 88 acres in Basalt Creek (per the Basalt Creek Concept Plan) has the capacity to accommodate 1,207 new dwelling units. While Tualatin's forecast for demand is for 1,014 new dwelling units, Tualatin has a deficit of capacity for 109 dwelling units in the Median High Density Plan Designation and 101 dwelling units in the High Density High-Rise Plan Designation (over the 2020 to 2040 period). The following summarizes Tualatin's land sufficiency results by Plan Designations:

- **Low Density:** Tualatin has a surplus of capacity for about 57 dwelling units, or 10 gross acres of land to accommodate growth.
- **Medium Low Density:** Tualatin has a surplus of capacity for about 315 dwelling units, or 27 gross acres of land to accommodate growth.
- **Medium High Density:** Tualatin has a deficit of capacity for about 109 dwelling units, or seven gross acres of land to accommodate growth.
- **High Density:** Tualatin has a surplus of capacity for about 31 dwelling units, or two gross acres of land to accommodate growth.
- **High Density High-Rise:** Tualatin has a deficit of capacity for about 101 dwelling units, or four gross acres of land to accommodate growth.

Exhibit 4. Comparison of capacity of existing residential land with demand for new dwelling units and land surplus or deficit, Tualatin City Limits and Basalt Creek, 2020 to 2040
Source: Buildable Lands Inventory; Calculations by ECONorthwest. *Note: DU is dwelling unit.*

Residential Plan Designations	Capacity (Dwelling Units)	Demand for New Housing	Remaining Capacity (Supply minus Demand)	Land Surplus or (Deficit) *Gross Acres*
Low Density	523	466	57	10
Medium Low Density	386	71	315	27
Medium High Density	13	122	(109)	(7)
High Density	285	254	31	2
High Density High-Rise	-	101	(101)	(4)

What are the Key Findings of the Housing Needs Analysis?

The key findings of the Tualatin's Housing Needs Analysis are that:

- **Tualatin is planning for 1,014 new dwelling units.** The growth of 1,014 households will result in demand for 1,014 new dwelling units over the 20-year planning period, averaging 51 new dwelling units annually.
- **Tualatin will plan for more single-family attached and multifamily dwelling units in the future to meet the City's housing needs.** Historically, about 53% of Tualatin's housing was single-family detached. While 40% of new housing in Tualatin is forecast to be single-family detached, the City will need to provide opportunities for development of new single-family attached (15% of new housing) and multifamily units (45% of new housing).
    - The factors driving the shift in types of housing needed in Tualatin include changes in demographics and decreases in housing affordability. The aging of the Baby Boomers and the household formation of the Millennials will drive demand for renter- and owner-occupied housing, such as single-family detached housing, townhouses, duplexes, triplexes, quadplexes, and apartments. Both groups may prefer housing in walkable neighborhoods, with access to services.
    - Tualatin's existing deficit of housing affordable for low- and high-income households indicates a need for a wider range of housing types, for renters and homeowners. About 37% of Tualatin's households are cost burdened (paying more than 30% of their income on housing), including a cost burden rate of 56% for renter households.
    - Without diversification of housing types, lack of affordability will continue to be a problem, possibly growing in the future if incomes continue to grow at a slower rate than housing costs. Under the current conditions, 307 of the forecasted new households will have incomes of $40,700 (in 2018 dollars) or less. These households often cannot afford market-rate housing without government subsidy. More than 300 new households will have incomes between $40,700 and $97,680. These households will all need access to affordable housing, such as the housing types described above.
- **Tualatin has a small deficit of land for higher density single-family and multifamily housing.** Tualatin has a deficit of land for 109 dwelling units in the Medium High Density Plan Designation (about seven gross acres) and 101 units in the High Density High-Rise Plan Designation (about four gross acres).
- **Tualatin will need to meet the requirements of House Bill 2001.** The Legislature passed House Bill 2001 in the 2019 Legislative session. The bill requires cities within the Metro UGB to allow "middle" housing types in low-density residential zones. The bill defines middle housing types as: duplexes, triplexes, quadplexes, cottage clusters, and townhouses. To comply with House Bill 2001, Tualatin will need to:

- Allow cottage cluster as a housing type in the Residential Low Density zone. Tualatin may want to allow cottage cluster housing in the Medium-Low Density and Medium-High Density zones. Tualatin will also need to include development standards in the Tualatin Development Code.
- Allow duplexes, townhouses, and multifamily housing as a permitted use in the Residential Low Density zone.

Following is a summary of ECONorthwest's recommendations to Tualatin based on the analysis and conclusions in this report. The *Tualatin Housing Strategy* memorandum presents the full list of recommendations for Tualatin.

- **Ensure an adequate supply of land that is available and serviceable.** Tualatin should evaluate opportunities to increase residential development densities by modifying the Development Code, such as increasing densities and height limits in higher density zones. Tualatin should identify opportunities to re-zone land, from lower density usage to higher density usage, to provide additional opportunities for multifamily housing development. Tualatin should plan for long-term development of housing in Tualatin through 2040 and beyond by working with Metro on upcoming Growth Management reports.
- **Encourage development of a wider variety of housing types.** Tualatin should allow duplexes, triplexes, quadplexes, cottage clusters, and townhouses in the Residential Low Density zone and allow cottage cluster housing in the Medium-Low Density and Medium-High Density zones (which already allow for the other housing types mentioned). These changes should be made in a way that makes the City's zoning code compliant with House Bill 2001.
- **Support development and preservation of housing that is affordable for all households.** The City should develop policies to support development of housing affordable to people who live and work in Tualatin. The City should identify opportunities to leverage resources (including funding) from the Metro Bond to support development of housing affordable to households earning less than 60% of Median Family Income in Washington County ($48,900 for a household size of four people). The City should develop policies to prevent and address homelessness, as well as to prevent and mitigate residential displacement resulting from redevelopment and increases in housing costs. These actions will require Tualatin to evaluate the adoption of a wide variety of housing policies such as creative financing opportunities for systems development charges, evaluating tax exemption programs, participating in a land bank, and other approaches to supporting development of housing affordable at all income levels.
- **Identify funding tools to support residential development.** The City should evaluate tools such as establishing a new Urban Renewal District and evaluate establishing a construction excise tax.
- **Identify redevelopment opportunities.** The City should identify districts within Tualatin with opportunities for redevelopment for both housing and employment

uses, as well as supporting redevelopment of underutilized commercial buildings for housing.

- **Ensure there are connections between planning for housing and other community planning**. Throughout the project, stakeholders emphasized the need to coordinate housing planning with economic development planning, transportation planning, and other community planning. Updates to the Tualatin Transportation System Plan should be coordinated with planning for housing growth. A key approach to accommodating new residential development is redevelopment that results in mixed-use districts, providing opportunities for more housing affordable to people working at businesses in Tualatin and living closer to work (thus reducing transportation issues). In addition, stakeholders would like to see the incorporation of services needed to meet daily needs of residents of neighborhoods without driving.

The *Tualatin Housing Strategy* memorandum presents more details about each of these topics and recommendations for specific actions to implement these recommendations.

1. Introduction

This report presents Tualatin's Housing Needs Analysis for the 2020 to 2040 period. It is intended to comply with statewide planning policies that govern planning for housing and residential development, including Goal 10 (Housing) and OAR 660 Division 8. The methods used for this study generally follow the *Planning for Residential Growth* guidebook, published by the Oregon Transportation and Growth Management Program (1996).

Tualatin has changed considerably in the last two decades. Tualatin grew from 22,791 people in 2000 to 27,135 people in the 2013-2017 period. This is an addition of 4,344 people, or 19% growth. In this time, rates of housing cost burden increased from 26% to 37%, with renter cost burdened rates increasing from 30% to 56%. Median gross rents increased by $386 (from $768 in 2000 to $1,154 in 2013-2017) and median home values increased by $83,168 (from $282,532 in 2000 to $365,700 in 2013-2017).

This report provides Tualatin with a factual basis to update the Housing Element of the City's Comprehensive Plan and Development Code, and to support future planning efforts related to housing and options for addressing unmet housing needs in Tualatin. This report provides information that informs future planning efforts, including development and redevelopment. It provides the City with information about the housing market in Tualatin and describes the factors that will affect future housing demand in Tualatin, such as changing demographics. This analysis will help decision makers understand whether Tualatin has enough land to accommodate growth over the next 20 years.

Framework for a Housing Needs Analysis

Economists view housing as a bundle of services for which people are willing to pay: shelter certainly, but also proximity to other attractions (job, shopping, parks and recreation), amenities (type and quality of fixtures and appliances, landscaping, views), prestige, and access to a range of services (i.e. medical, transportation) including public services (i.e. quality of schools). Because it is impossible to maximize all these services and simultaneously minimize costs, households must, and do, make tradeoffs. What they can get for their money is influenced both by economic forces and government policy. Moreover, different households will value what they can get differently. They will have different preferences, which in turn are a function of many factors like income, age of head of household, number of people and children in the household, number of workers and job locations, number of transportation vehicles, and so on.

Thus, housing choices of individual households are influenced in complex ways by dozens of factors. The housing market in Washington County and Tualatin are the result of the individual decisions of thousands of households. These points help to underscore the complexity of projecting what types of housing will be built in Tualatin between 2020 and 2040.

The complex nature of the housing market, demonstrated by the unprecedented boom and bust during the past decade, does not eliminate the need for some type of forecast of future housing

demand and need. This includes resulting implications for land demand and consumption. Such forecasts are inherently uncertain. Their usefulness for public policy often derives more from the explanation of their underlying assumptions about the dynamics of markets and policies than from the specific estimates of future demand and need. Thus, we start our housing analysis with a framework for thinking about housing and residential markets, and how public policy affects those markets.

Statewide Planning Goal 10

The passage of the Oregon Land Use Planning Act of 1974 (ORS Chapter 197) established the Land Conservation and Development Commission (LCDC) and the Department of Land Conservation and Development (DLCD). The Act required the Commission to develop and adopt a set of statewide planning goals. Goal 10 addresses housing in Oregon and provides guidelines for local governments to follow in developing their local comprehensive land use plans and implementing policies.

At a minimum, local housing policies must meet the requirements of Goal 10 and the statutes and administrative rules that implement it (ORS 197.295 to 197.314, ORS 197.475 to 197.490, and OAR 600-008).[1] Goal 10 requires incorporated cities to complete an inventory of buildable residential lands. Goal 10 also requires cities to encourage the numbers of housing units in price and rent ranges commensurate with the financial capabilities of its households. Jurisdictions located in the Metro UGB are also required to comply with Metropolitan Housing in OAR 660-007 and Title 7 of Metro's Urban Growth Management Functional Plan in the Metro Code (3.07 Title 7).

Goal 10 defines needed housing types as "all housing on land zoned for residential use or mixed residential and commercial use that is determined to meet the need shown for housing within an urban growth boundary at price ranges and rent levels that are affordable to households within the city with a variety of incomes, including but not limited to households with low incomes, very low incomes and extremely low incomes." ORS 197.303 defines needed housing types:

(a) Housing that includes, but is not limited to, attached and detached single-family housing and multiple family housing for both owner and renter occupancy.

(b) Government assisted housing.[2]

(c) Mobile home or manufactured dwelling parks as provided in ORS 197.475 to 197.490.

(d) Manufactured homes on individual lots planned and zoned for single-family residential use that are in addition to lots within designated manufactured dwelling subdivisions.

(e) Housing for farmworkers.

[1] ORS 197.296 only applies to cities with populations over 25,000.

[2] Government assisted housing can be any housing type listed in ORS 197.303 (a), (c), or (d).

DLCD provides guidance on conducting a housing needs analysis in the document *Planning for Residential Growth: A Workbook for Oregon's Urban Areas*, referred to as the Workbook.

Tualatin must identify needs for all of the housing types listed above as well as adopt policies that increase the likelihood that needed housing types will be developed. This housing needs analysis was developed to meet the requirements of Goal 10 and its implementing administrative rules and statutes.

The Metropolitan Housing Rule

OAR 660-007 (the Metropolitan Housing rule) is designed to "assure opportunity for the provision of adequate numbers of needed housing units and the efficient use of land within the Metropolitan Portland (Metro) urban growth boundary." OAR 660-0070-005(12) provides a Metro-specific definition of needed housing:

> "Needed Housing" defined. Until the beginning of the first periodic review of a local government's acknowledged comprehensive plan, "needed housing" means housing types determined to meet the need shown for housing within an urban growth boundary at particular price ranges and rent levels.

The Metropolitan Housing Rule also requires cities to develop residential plan designations:

> (1) Plan designations that allow or require residential uses shall be assigned to all buildable land. Such designations may allow nonresidential uses as well as residential uses. Such designations may be considered to be "residential plan designations" for the purposes of this division. The plan designations assigned to buildable land shall be specific so as to accommodate the varying housing types and densities identified in OAR 660-007-0030 through 660-007-0037.

OAR 660-007 also specifies the mix and density of new residential construction for cities within the Metro Urban Growth Boundary (UGB):

> "Provide the opportunity for at least 50 percent of new residential units to be attached single family housing or multiple family housing or justify an alternative percentage based on changing circumstances" (OAR 660-007-0030 (1).

OAR 660-007-0035 sets specific density targets for cities in the Metro UGB. Tualatin's average density target is eight dwelling units per net buildable acre.[3]

Metro Urban Growth Management Functional Plan

The Metro Urban Growth Management Functional Plan describes the policies that guide development for cities within the Metro UGB to implement the goals in the Metro 2040 Plan.

[3] OAR 660-024-0010(6) defines Net Buildable Acres as follows: "Net Buildable Acre" consists of 43,560 square feet of residentially designated buildable land after excluding future rights-of-way for streets and roads.

Title 1: Housing Capacity

Title 1 of Metro's Urban Growth Management Functional Plan is intended to promote efficient land use within the Metro UGB by increasing the capacity to accommodate housing capacity. Each city is required to determine its housing capacity based on the minimum number of dwelling units allowed in each zoning district that allows residential development and maintain this capacity.

Title 1 requires that a city adopt minimum residential development density standards by March 2011. If the jurisdiction did not adopt a minimum density by March 2011, the jurisdiction must adopt a minimum density that is at least 80% of the maximum density.

Title 1 provides measures to decrease development capacity in selected areas by transferring the capacity to other areas of the community. This may be approved as long as the community's overall capacity is not reduced.

Metro's *2017 Compliance Report* concludes that Tualatin is in compliance for the City's Title 1 responsibilities.

Title 7: Housing Choice

Title 7 of Metro's Urban Growth Management Functional Plan is designed to ensure the production of affordable housing in the Metro UGB. Each city and county within the Metro region is encouraged to voluntarily adopt an affordable housing production goal.

Each jurisdiction within the Metro region is required to ensure that their comprehensive plans and implementing ordinances include strategies to:

- Ensure the production of a diverse range of housing types,
- Maintain the existing supply of affordable housing, increase opportunities for new affordable housing dispersed throughout their boundaries, and
- Increase opportunities for households of all income levels to live in affordable housing (3.07.730)

Metro's *2017 Compliance Report* concludes that Tualatin is in compliance for the City's Title 7 responsibilities.

Title 11: Planning for New Urban Areas

Title 11 of Metro's Urban Growth Management Functional Plan provides guidance on the conversion of land from rural to urban uses. Land brought into the Metro UGB is subject to the provisions of section 3.07.1130 of the Metro Code, which requires lands to be maintained at rural densities until the completion of a concept plan and annexation into the municipal boundary.

The concept plan requirements directly related to residential development are to prepare a plan that includes:

(1) A mix and intensity of uses that make efficient use of public systems and facilities,

(2) A range of housing for different types, tenure, and prices that addresses the housing needs of the governing city, and

(3) Identify goals and strategies to meet the housing needs for the governing city in the expansion area.

Organization of this Report

The rest of this document is organized as follows:

- **Chapter 2. Residential Buildable Lands Inventory** presents the methodology and results of Tualatin's inventory of residential land.
- **Chapter 3. Historical and Recent Development Trends** summarizes the state, regional, and local housing market trends affecting Tualatin's housing market.
- **Chapter 4. Demographic and Other Factors Affecting Residential Development in Tualatin** presents factors that affect housing need in Tualatin, focusing on the key determinants of housing need: age, income, and household composition. This chapter also describes housing affordability in Tualatin relative to the larger region.
- **Chapter 5. Housing Need in Tualatin** presents the forecast for housing growth in Tualatin, describing housing need by density ranges and income levels.
- **Chapter 6. Residential Land Sufficiency within Tualatin** estimates Tualatin's residential land sufficiency needed to accommodate expected growth over the planning period.

2. Residential Buildable Lands Inventory

This chapter provides a summary of the residential buildable lands inventory (BLI) for the Tualatin Planning Area. This buildable lands inventory analysis complies with statewide planning Goal 10 policies that govern planning for residential uses. The detailed methodology used to complete the buildable lands inventory is presented in Appendix A.

First, the analysis established the residential land base (parcels or portion of parcels with appropriate zoning), classified parcels by buildable status, identified/deducted environmental constraints, and lastly summarized total buildable area by Plan Designation.

Definitions

ECONorthwest developed the buildable lands inventory with a tax lot database from Metro Regional Land Information Systems (RLIS). Maps produced for the buildable lands inventory used a combination of GIS data based on the Metro BLI for the 2018 Urban Growth Report, adopted maps, and visual verification to verify the accuracy of Metro data. The tax lot database is current as of 2016, accounting for changes and development updates through April 2019. The inventory builds from the database to estimate buildable land per plan designations that allow residential uses. The following definitions were used to identify buildable land for inclusion in the inventory:

- *Vacant land.* Tax lots designated as vacant by Metro based on the following criteria: (1) fully vacant based on Metro aerial photo; (2) tax lots with less than 2,000 square feet developed and developed area is less than 10% of lot; (3) lots 95% or more vacant from GIS vacant land inventory.
- *Partially vacant land.* Single-family tax lots that are 2.5 times larger than the minimum lot size with a building value less than $300,000, or lots that are 5 times larger than the minimum lots size (no threshold for building value). These lots are considered to still have residential capacity. For this analysis, we classified these lots as Partially Vacant, and we assumed that 0.25 acres of the lot was developed, and the remaining land is available for development, less constraints.
- *Public or exempt land.* Lands in public or semi-public ownership are considered unavailable for residential development. This includes lands in Federal, State, County, or City ownership as well as lands owned by churches and other semi-public organizations and properties with conservation easements. These lands are identified using the Metro's definitions and categories.
- *Developed land*. Lands not classified as vacant, partially vacant, or public/exempt are considered developed. Developed land includes lots with redevelopment capacity, which are also included in the BLI. The unit capacity of developed but redevelopable lots is based on Metro's estimates.

Development Constraints

Consistent with state guidance on buildable lands inventories, ECONorthwest deducted the following constraints from the buildable lands inventory and classified those portions of tax lots that fall within the following areas as constrained, unbuildable land:

- *Lands within floodplains*. Flood Insurance Rate Maps from the Federal Emergency Management Agency (FEMA) were used to identify lands in floodways and 100-year floodplains, as well as lands identified in Metro's Title 3 Stream and Floodplain Protection Plan.
- *Land within natural resource protection areas*. The Locally Significant Wetlands shapefile was used to identify areas within wetlands. Riparian corridors and other natural resource areas identified in Tualatin's Natural Resource Protection Overlay District were all considered undevelopable. These areas are consistent with the City's Development Code Chapter 72.
- *Land with slopes over 25%*. Lands with slopes over 25% are considered unsuitable for residential development.

Buildable Lands Inventory Results

Land Base

Exhibit 5 shows residential land in Tualatin by classification (development status). The results show that the Tualatin Planning Area has 2,556 total acres in residential Plan Designations. (This includes the areas of the Mixed-Use Commercial Overlay Zone and Central Tualatin Overlay Zone that allow residential uses). Of these 2,556 acres, about 2,193 acres (86%) are classified as Developed or Public (or Exempt) and do not have development capacity, and the remaining 364 acres (14%) are Vacant or Partially Vacant and have development capacity (not including development constraints).[4]

[4] The buildable lands inventory results in Exhibit 5 does not account for development constraints (yet). Land with development constraints are not classified as buildable; we remove development constraints in Exhibit 6 and we present final buildable land results in Exhibit 7.

Exhibit 5. Residential acres by classification and Plan Designation, Tualatin Planning Area, 2019
Source: Metro BLI, ECONorthwest Analysis. *Note: The numbers in the table may not sum to the total as a result of rounding.*

Generalized Plan Designation	Vacant	Partially Vacant	Developed	Public or Exempt	Total Acres	Percent of Total
Residential						
Low Density Residential	26	138	1,063	510	1,737	68%

Total	**2,556**	**1,747**	**566**	**244**

Vacant Buildable Land

Exhibit 7 shows buildable acres (e.g., acres in tax lots after constraints are deducted) for vacant and partially vacant land by Plan Designation. Of Tualatin's 244 unconstrained buildable residential acres, about 31% are in tax lots classified as vacant, and 69% are in tax lots classified as partially vacant. About 32% of Tualatin's buildable residential land is in the Low Density Residential Plan Designation and about 62% of Tualatin's buildable residential land is located in the Basalt Creek Planning Area.

Exhibit 7. Buildable acres in vacant and partially vacant tax lots by Plan Designation and zoning, Tualatin Planning Area, 2019

Source: Metro BLI, ECONorthwest Analysis. *Note: The numbers in the table may not sum to the total as a result of rounding.*

Generalized Plan Designation	Total buildable acres	Buildable acres on vacant lots	Buildable acres on partially vacant lots

3. Historical and Recent Development Trends

Analysis of historical development trends in Tualatin provides insight into the functioning of the local housing market. The mix of housing types and densities, in particular, are key variables in forecasting the capacity of residential land to accommodate new housing and to forecast future land need. The specific steps are described in Task 2 of the DLCD *Planning for Residential Lands Workbook* as:

1. Determine the time period for which the data will be analyzed.
2. Identify types of housing to address (all needed housing types).
3. Evaluate permit/subdivision data to calculate the actual mix, average actual gross density, and average actual net density of all housing types.

This Housing Needs Analysis examines changes in Tualatin's housing market from 2000 to 2017, as well as residential development from 2002 to 2017. We selected this time period because (1) the period provides information about Tualatin's housing market before and after the national housing market bubble's growth, deflation, and the more recent increase in housing costs and (2) data about Tualatin's housing market during this period is readily available from sources such as the Census and RLIS.

The Housing Needs Analysis presents information about residential development by housing type. There are multiple ways that housing types can be grouped. For example, they can be grouped by:

1. Structure type (e.g., single-family detached, apartments, etc.).
2. Tenure (e.g., distinguishing unit type by owner or renter units).
3. Housing affordability (e.g., subsidized housing or units affordable at given income levels).
4. Some combination of these categories.

For the purposes of this study, we grouped housing types based on: (1) whether the structure is stand-alone or attached to another structure and (2) the number of dwelling units in each structure. The housing types used in this analysis are consistent with needed housing types as defined in ORS 197.303:

- **Single-family detached** includes single-family detached units, manufactured homes on lots and in mobile home parks, and accessory dwelling units.
- **Single-family attached** is all structures with a common wall where each dwelling unit occupies a separate lot, such as row houses or townhouses.
- **Multifamily** is all attached structures (e.g., duplexes, triplexes, quadplexes, and structures with five or more units) other than single-family detached units, manufactured units, or single-family attached units.

In Tualatin, government-assisted housing (ORS 197.303(b)) and housing for farmworkers (ORS 197.303(e)) can be any of the housing types listed above.

Data Used in this Analysis

Throughout this analysis (including the subsequent Chapter 4), we used data from multiple sources, choosing data from well-recognized and reliable data sources. One of the key sources for housing and household data is the U.S. Census. This report primarily uses data from two Census sources, the Decennial and the American Community Survey:

- The **Decennial Census**, which is completed every ten years and is a survey of *all* households in the U.S. The Decennial Census is considered the best available data for information such as demographics (e.g., number of people, age distribution, or ethnic or racial composition), household characteristics (e.g., household size and composition), and housing occupancy characteristics. As of 2010, the Decennial Census does not collect more detailed household information, such as income, housing costs, housing characteristics, and other important household information. Decennial Census data is available for 2000 and 2010.
- The **American Community Survey (ACS)**, which is completed every year and is a *sample* of households in the U.S. From 2013 to 2017, the ACS sampled an average of 3.5 million households per year, or about 2.9% of the households in the nation. The ACS collects detailed information about households, including demographics (e.g., number of people, age distribution, ethnic or racial composition, country of origin, language spoken at home, and educational attainment), household characteristics (e.g., household size and composition), housing characteristics (e.g., type of housing unit, year unit built, or number of bedrooms), housing costs (e.g., rent, mortgage, utility, and insurance), housing value, income, and other characteristics.

This report uses data from the 2013-2017 ACS for Tualatin. Where information is available and relevant, we report information from the 2000 and 2010 Decennial Census. Among other data points, this report includes population, income, and housing price data from Redfin, the Bureau of Labor Services, and the United States Department of Housing and Urban Development. It uses the Oregon Department of Housing and Community Services affordable housing inventory and Oregon's Manufactured Dwelling Park inventory. It uses Metro's Regional Land Information System (RLIS) database, which provides tax lot data for jurisdictions within the three-county Metro Area (Clackamas County, Multnomah County, and Washington County).[5]

The foundation of the housing needs analysis is the population forecast for Tualatin from Metro's *2040 Household Distributed Forecast*.

[5] We use RLIS tax lot data as a proxy for building permit data for Tualatin. The analysis period is 2000-2017, unless otherwise noted.

It is worth commenting on the methods used for the American Community Survey.[6] The American Community Survey (ACS) is a national survey that uses continuous measurement methods. It uses a sample of about 3.54 million households to produce annually updated estimates for the same small areas (census tracts and block groups) formerly surveyed via the decennial census long-form sample. It is also important to keep in mind that all ACS data are estimates that are subject to sample variability. This variability is referred to as "sampling error" and is expressed as a band or "margin of error" (MOE) around the estimate.

This report uses Census and ACS data because, despite the inherent methodological limits, they represent the most thorough and accurate data available to assess housing needs. We consider these limitations in making interpretations of the data and have strived not to draw conclusions beyond the quality of the data.

Trends in Housing Mix

This section provides an overview of changes in the mix of housing types in Tualatin and compares Tualatin to Washington County and to Oregon. These trends demonstrate the types of housing developed in Tualatin historically. Unless otherwise noted, this chapter and the next chapter uses data from the 2000 and 2010 Decennial Census and the 2013-2017 American Community Survey 5-Year Estimates.

This section shows the following trends in housing mix in Tualatin:

- **About half (53%) of Tualatin's housing stock is single-family detached housing units.** Forty-one percent of Tualatin's housing stock is multifamily and 6% is single-family attached (e.g., townhouses, rowhouses, duplexes).
- **Since 2000, Tualatin's housing mix has remained relatively static.** Tualatin's housing stock grew by about 23% (about 2,112 new units) between 2000 and the 2013-2017 period.
- **Single-family housing accounted for the majority of new housing growth in Tualatin between 2000 and 2017.** Sixty percent of new housing built between 2000 and 2017 was single-family housing (detached and attached).

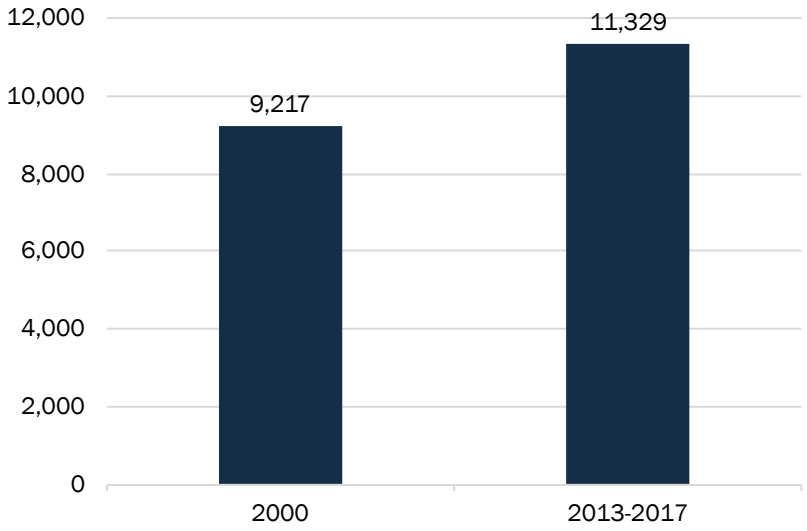
[6] A thorough description of the ACS can be found in the Census Bureau's publication "What Local Governments Need to Know." https://www.census.gov/library/publications/2009/acs/state-and-local.html

Housing Mix

The total number of dwelling units in Tualatin increased by 23% from 2000 to 2013-2017.

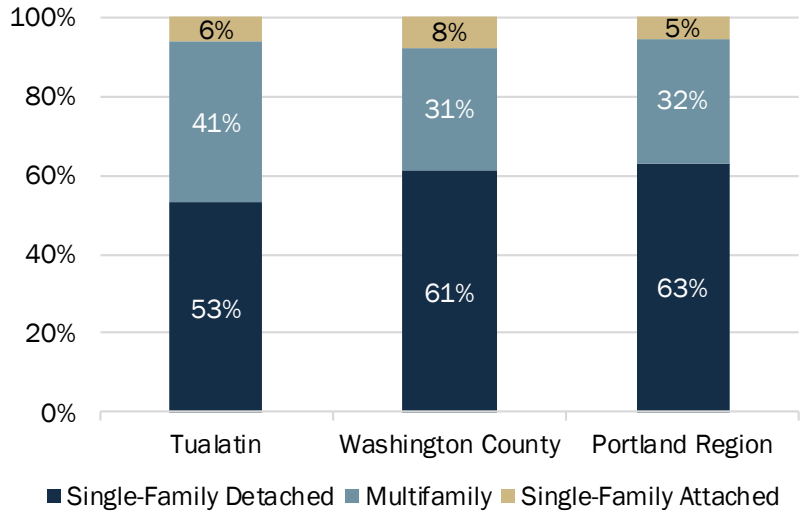
Tualatin added 2,112 units since 2000.

Exhibit 10. Total Dwelling Units, Tualatin, 2000 and 2013-2017
Source: U.S. Census Bureau, 2000 Decennial Census, SF3 Table H030, and 2013-2017 ACS Table B25024.



Tualatin had a smaller share of single-family detached housing and a larger share of multifamily housing than Washington County and the Portland Region.

Exhibit 11. Housing Mix, Tualatin, Washington County, Portland Region, 2013-2017
Source: U.S. Census Bureau, 2013-2017 ACS Table B25024.



From 2000 to 2013-2017, Tualatin's housing mix stayed about the same.

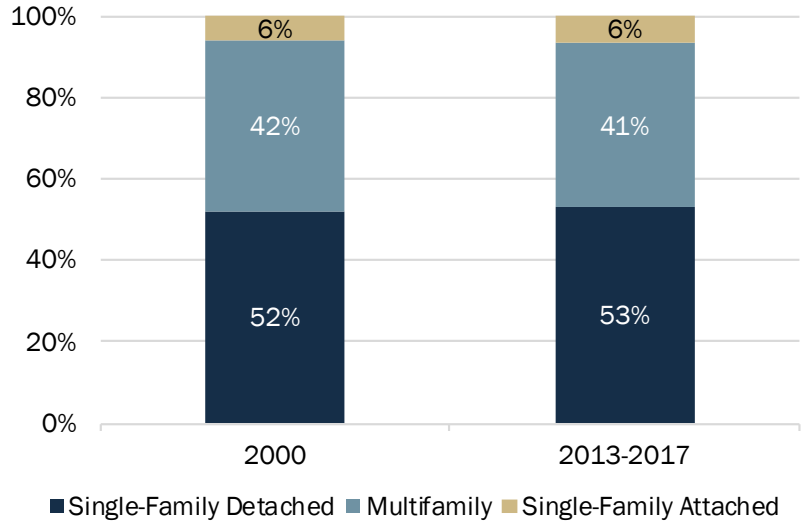
Source: U.S. Census Bureau, 2000 Decennial Census, SF3 Table H030, and 2013-2017 ACS Table B25024.



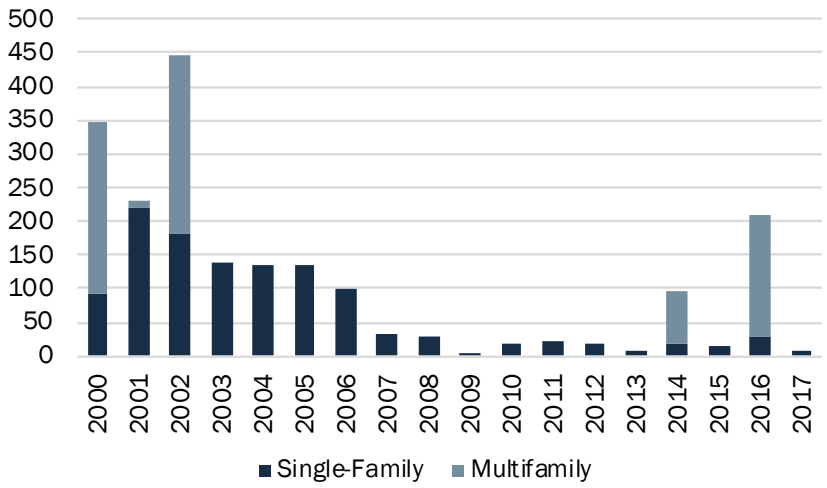
Dwelling Units Built

Over the 2000 to 2017 period, Tualatin added 1,996 dwelling units, with an annual average of 111 dwelling units.

Of these 1,996 units, about 60% were single-family units and 40% were multifamily units.

Exhibit 13. Units Built by Year and Type of Unit, Tualatin, 2000 through 2017

Source: RLIS.



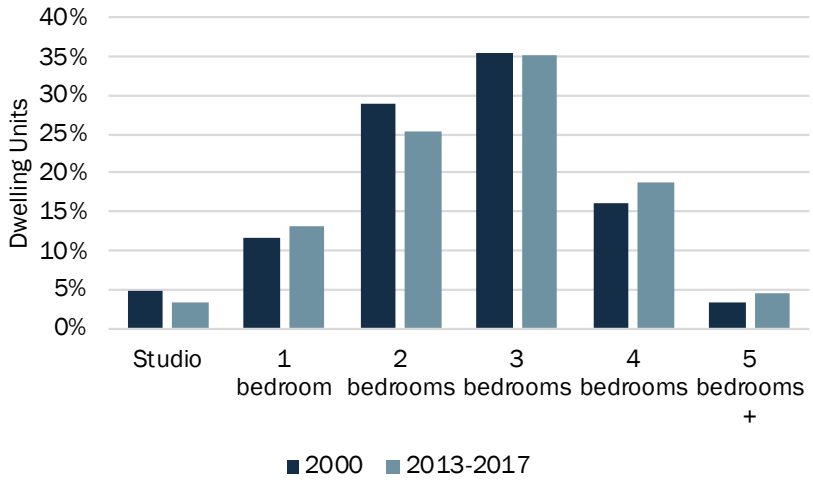
Size of Units

This section provides an overview of dwelling unit size in Tualatin.

In 2000, a larger share of dwelling units in Tualatin were three-bedroom units. As of the 2013-2017 period, this trend continues to persist.

Exhibit 14. Share of Units by Number of Bedrooms, Tualatin, 2000 and 2013-2017

Source: U.S. Census Bureau, 2000 Decennial Census, SF3 Table H041, and 2013-2017 ACS Table B25041. Note: The total number of units in 2000 is 9,217; the total number of units in the 2013-17 period is 11,329.

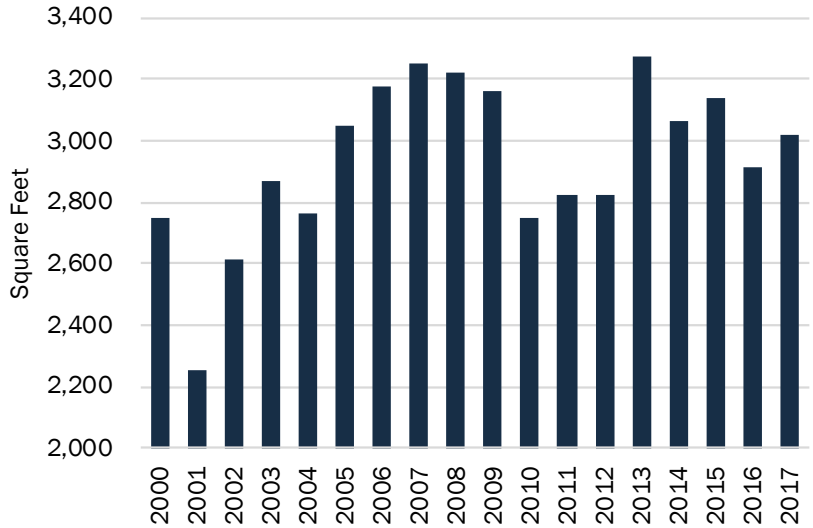


Single-family units built in Tualatin since 2000, averaged 2,773 sq. ft. per unit.

Single-family units built in Tualatin since 2014, averaged 3,015 sq. ft. per unit.

Exhibit 15. Average Size of Single-Family Units Built by Year, Tualatin, 2010 through 2017

Source: RLIS. Note: Single-family units include single-family detached and attached units.



Based on historical trends, condominiums in Tualatin were slightly smaller than single-family dwellings (Exhibit 15) and slightly larger than apartments.

Exhibit 16. Average Size of Multifamily Units Built by Year (including housing description), Tualatin, 2000, 2001, 2002, 2014, and 2016

2000: 1,172 Sq. Ft.
Condominium

2001: 1,562 Sq. Ft.
Condominium

2002: 892 Sq. Ft.
Apartment

2014: 1,322 Sq. Ft.
Retirement Facility

2016: 977 Sq. Ft.
Apartment

On average, a 2-bedroom multifamily unit in Tualatin is about 928 sq. ft.

Exhibit 17. Average Square Feet of Multifamily Units, Tualatin, 2019
Source: Costar. Note: "All Beds" represent the aggregate of multifamily units in Tualatin (recognizing that bedroom counts are unknown for some units).

Multifamily Unit by Bedroom Count	Average Sq. Ft. (2019)	Inventory (Units)
All Beds	856	3,905
Studio	445	249
1-Bedroom	649	1,206
2-Bedrooms	928	1,739
3-Bedrooms	1,144	608
4+ Bedrooms	1,255	4

Trends in Housing Density

Housing density is the density of housing by structure type, expressed in dwelling units per net or gross acre. The U.S. Census does not track residential development density thus, this study analyzes housing density based on Metro's RLIS database for development between 2000 and 2017.

Between 2000 and 2017, Tualatin permitted 1,996 new dwelling units. Of the 1,996 new units, 1,207 units were single-family (60%) and 789 units were multifamily (40%). During this time, housing in Tualatin developed at an average net density of 8.7 dwelling units per net acre. Exhibit 18 shows average net residential development by structure type for the historical analysis period. Single-family housing (detached and attached) developed at 6.4 units per net acre and multifamily housing developed at 19.9 units per net acre.

Exhibit 18. Net Density by Unit Type and Zone, Tualatin, 2000 through 2017

Source: RLIS.
Note: Single-family includes single-family detached and single-family attached units because RLIS data does not distinguish between the type of single-family unit.

	Single-family (Detached and Attached)			Multifamily			Total, combined		
	Units	Acres	Net Density	Units	Acres	Net Density	Units	Acres	Net Density
Low Density Residential	976	172	5.7				976	172	5.7
Medium Low Density Residential	79	10	8.0	90	5	19.5	169	14	11.7
High Density Residential	152	6	23.4	699	35	19.9	851	42	20.5
Total	1,207	189	6.4	789	40	19.9	1,996	228	8.7

Trends in Tenure

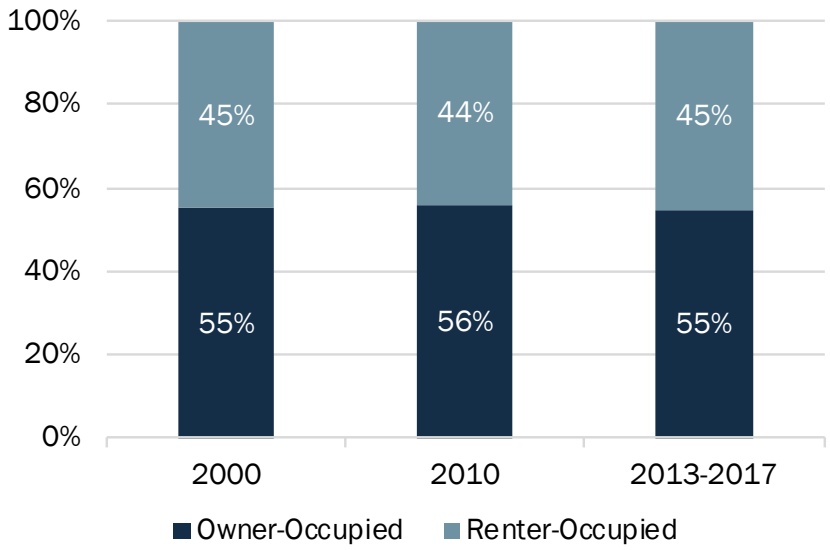
Housing tenure describes whether a dwelling unit is owner- or renter-occupied. This section shows:

- **Homeownership in Tualatin is lower than Washington County's and Oregon's rate.** About 55% of Tualatin's households own their own home. In comparison, 61% of Washington County households and 60% of Oregon households are homeowners.
- **Homeownership in Tualatin stayed about the same between 2000 and 2013-2017.** Homeownership hovered around 55% in 2000, 2010, and the 2013-2017 period.
- **Most of Tualatin homeowners (88%) live in single-family detached housing, while most of Tualatin's renters (82%) live in multifamily housing.**

The homeownership rate in Tualatin stayed about the same since 2000.

Exhibit 19. Tenure, Occupied Units, Tualatin, 2000, 2010, and 2013-2017

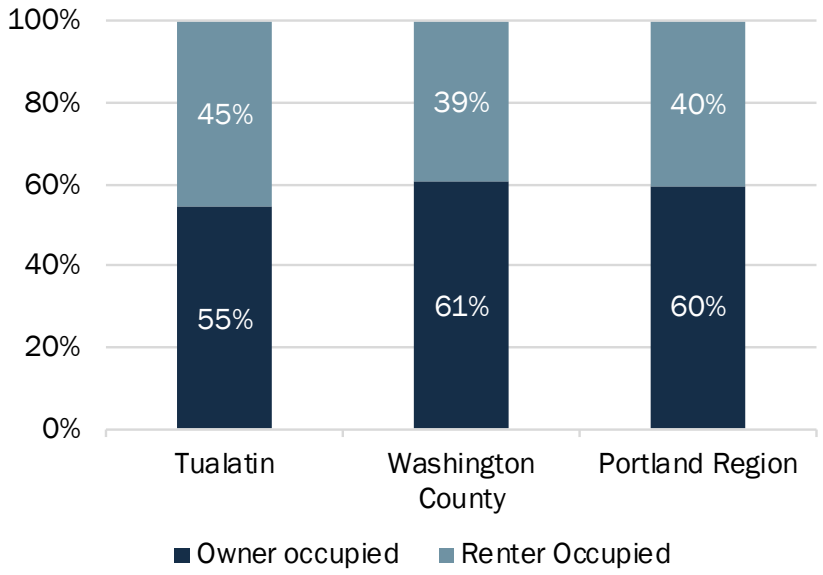
Source: U.S. Census Bureau, 2000 Decennial Census SF1 Table H004, 2010 Decennial Census SF1 Table H4, 2013-2017 ACS Table B24003.



Tualatin had a lower homeownership rate than Washington County and the Portland Region.

Exhibit 20. Tenure, Occupied Units, Tualatin, Washington County, and Portland Region, 2013-2017

Source: U.S. Census Bureau, 2013-2017 ACS 5-Year Estimates, Table B24003.

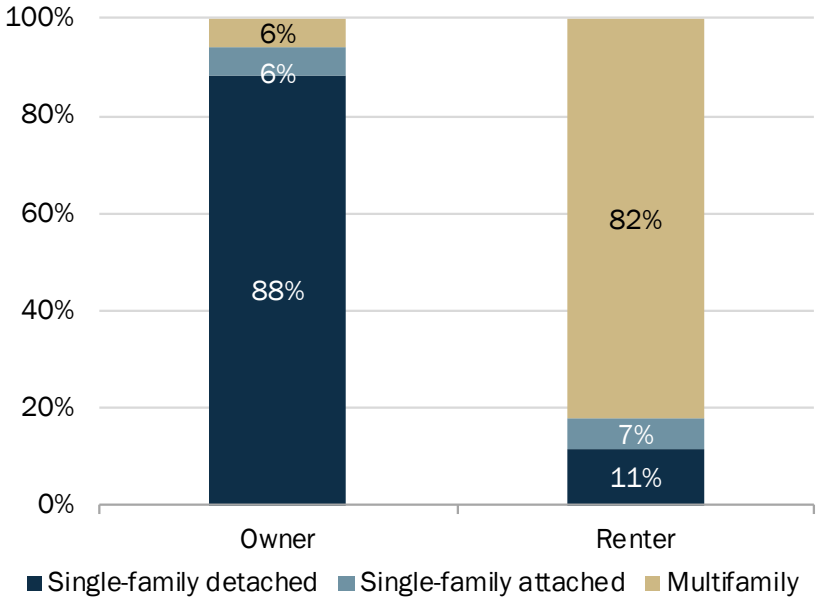


Most of Tualatin homeowners (88%) lived in single-family detached housing.

In comparison, most of Tualatin renters lived in multifamily housing.

Exhibit 21. Housing Units by Type and Tenure, Tualatin, 2013-2017

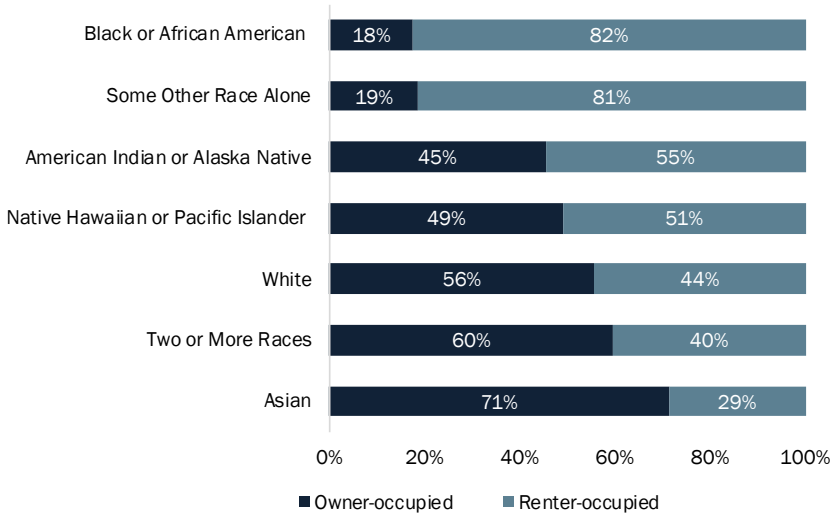
Source: U.S. Census Bureau, 2013-2017 ACS Table B25032.



A proportionately smaller share of households with an African American head of household were homeowners.

Exhibit 22. Tenure by Race of the Head of Household, Tualatin, 2013-2017

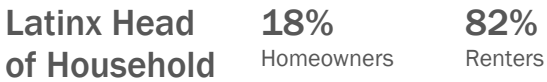
Source: U.S. Census Bureau, 2013-2017 ACS Table B25003A-G.



Most households with a Latinx head of household were renters.

Exhibit 23. Tenure by Latinx Head of Household, Tualatin, 2013-2017

Source: U.S. Census Bureau, 2013-2017 ACS Table B250031.



Vacancy Rates

Housing vacancy is a measure of housing that is available to prospective renters and buyers. It is also a measure of unutilized housing stock. The Census defines vacancy as: "Unoccupied housing units…determined by the terms under which the unit may be occupied, e.g., for rent, for sale, or for seasonal use only." The 2010 Census identified vacancy through an enumeration, separate from (but related to) the survey of households. Enumerators are obtained using information from property owners and managers, neighbors, rental agents, and others.

According to the 2013-2017 Census, the vacancy rate in Tualatin was 4.3%, compared to 4.8% for Washington County and 5.5% for the Portland Region.

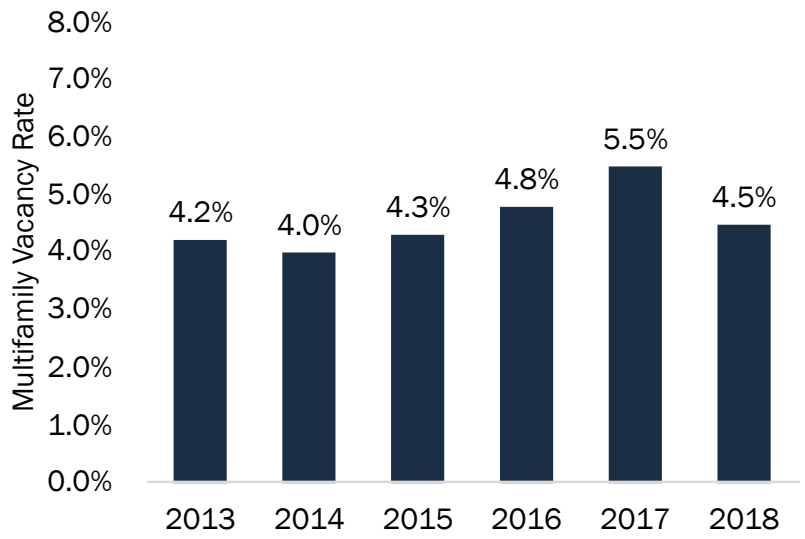
Tualatin's vacancy rate declined from 2000 to the 2013-2017 period.

Exhibit 24. Vacancy Rate, Tualatin, 2000 and 2013-2017
Source: U.S. Census Bureau, 2000 Decennial Census SF1 Table H005, 2013-2017 ACS Table B25004.

2000	6.2% Of Total Dwelling Units
2013-2017	4.3% Of Total Dwelling Units

Tualatin's average multifamily vacancy rate dipped to a low of 4% in 2014. In 2018, Tualatin's multifamily vacancy rate was 4.5%.

Exhibit 25. Average Multifamily Vacancy Rate, Tualatin, 2013 through 2018
Source: CoStar.



As of 2013-2017, less than half a percent of Tualatin's dwelling units were vacant for seasonal, recreational, or occasional use (e.g. short-term rentals or vacation homes).

Exhibit 26. Vacancy for Seasonal, Recreational, or Occasional Use, Tualatin, 2000 and 2013-2017
Source: U.S. Census Bureau, 2000 Decennial Census SF1 Table H005, 2013-2017 ACS Table B25004.

2000	43 Units	0.5% Share of Total Dwelling Units
2013-2017	44 Units	0.4% Share of Total Dwelling Units

Rent-Restricted Housing

Governmental agencies offer subsidies to support housing development for low- and moderate-income households. Tualatin has three rent-restricted housing developments, with 604 subsidized units.

Exhibit 27. Government-Assisted Housing, Tualatin, December 2019
Source: Oregon Housing and Community Services, Affordable Housing Inventory in Oregon (data pulled December 2019).

Housing Developments	Total Units	Affordable Units	Population Served	Government Subsidy Type	Affordability Contract Expiration
Terrace View	100	100	Family	LIHTC 4%	January 2028
Tualatin Meadows	240	240	Family	LIHTC 4%	January 2031
Woodridge	264	264	Family	OHCS Grants	March 2049
Total	**604**	**604**			

In addition to these rent-restricted units, and as of August 5, 2019, households in Tualatin utilized 113 of Washington County Housing Authority's Housing Choice Vouchers.[7]

[7] More information about Housing Choice Vouchers: https://www.hud.gov/program_offices/public_indian_housing/programs/hcv/about/fact_sheet

Manufactured Homes

Manufactured homes provide a source of affordable housing in Tualatin. They provide a form of homeownership that can be made available to low- and moderate-income households. Cities are required to plan for manufactured homes—both on lots and in parks (ORS 197.475-492).

Generally, manufactured homes in parks are owned by the occupants who pay rent for the space. Monthly housing costs are typically lower for a homeowner in a manufactured home park for several reasons, including the fact that property taxes levied on the value of the land are paid by the property owner, rather than the manufactured homeowner. The value of the manufactured home generally does not appreciate in the way a conventional home would, however. Manufactured homeowners in parks are also subject to the mercy of the property owner in terms of rent rates and increases. It is generally not within the means of a manufactured homeowner to relocate to another manufactured home to escape rent increases. Homeowners living in a park is desirable to some because it can provide a more secure community with on-site managers and amenities, such as laundry and recreation facilities.

OAR 197.480(4) requires cities to inventory the mobile home or manufactured dwelling parks sited in areas planned and zoned or generally used for commercial, industrial, or high-density residential development.[8] Exhibit 28 presents the inventory of mobile and manufactured home parks within Tualatin as of early 2019.

Tualatin has two manufactured housing parks, with a total of 178 spaces within its city limits.

Exhibit 28. Inventory of Mobile/Manufactured Home Parks, Tualatin City Limits, March 2019

Source: Oregon Manufactured Dwelling Park Directory.

Name	Location	Type	Total Spaces	Vacant Spaces	Plan Designation
Angel Haven	18485 SW Pacific Dr	Senior	129	2	RML
Willow Glen	9700 SW Tualatin Rd	Family	49	1	RML
Total			**178**	**3**	

[8] ORS 90.645 regulates rules about closure of manufactured dwelling parks. It requires that the landlord do the following for manufactured dwelling park tenants before closure of the park: give at least one year's notice of park closure, pay the tenant between $5,000 to $9,000 for each manufactured dwelling park space, and refrain from charging tenants demolition costs of abandoned manufactured homes.

4. Demographic and Other Factors Affecting Residential Development in Tualatin

Demographic trends are important for a thorough understanding of the dynamics of the Tualatin housing market. Tualatin exists in a regional economy; trends in the region impact the local housing market. This chapter documents demographic, socioeconomic, and other trends relevant to Tualatin at the national, state, and regional levels.

Demographic trends provide a context for growth in a region; factors such as age, income, migration, and other trends show how communities have grown and how they will shape future growth. To provide context, we compare Tualatin to Washington County and Oregon. We also compare Tualatin to nearby cities where appropriate. Characteristics such as age and ethnicity are indicators of how the population has grown in the past and provide insight into factors that may affect future growth.

A recommended approach to conducting a housing needs analysis is described in *Planning for Residential Growth: A Workbook for Oregon's Urban Areas*, the Department of Land Conservation and Development's guidebook on local housing needs studies. As described in the workbook, the specific steps in the housing needs analysis are:

1. Project the number of new housing units needed in the next 20 years.
2. Identify relevant national, state, and local demographic and economic trends and factors that may affect the 20-year projection of structure type mix.
3. Describe the demographic characteristics of the population and, if possible, the housing trends that relate to demand for different types of housing.
4. Determine the types of housing that are likely to be affordable to the projected households based on household income.
5. Determine the needed housing mix and density ranges for each Plan Designation and the average needed net density for all structure types.
6. Estimate the number of additional needed units by structure type.

This chapter presents data to address steps 2, 3, and 4 in this list. Chapter 5 presents data to address steps 1, 5, and 6 in this list.

Demographic and Socioeconomic Factors Affecting Housing Choice[9]

Analysts typically describe housing demand as the *preferences* for different types of housing (e.g., single-family detached or apartment), and *the ability to pay* for that housing (the ability to exercise those preferences in a housing market by purchasing or renting housing; in other words, income or wealth).

Many demographic and socioeconomic variables affect housing choice. However, the literature about housing markets finds that age of the householder, size of the household, and income are most strongly correlated with housing choice.

- **Age of householder** is the age of the person identified (in the Census) as the head of household. Households make different housing choices at different stages of life. This chapter discusses generational trends, such as housing preferences of Baby Boomers, people born from about 1946 to 1964, and Millennials, people born from about 1980 to 2000.
- **Size of household** is the number of people living in the household. Younger and older people are more likely to live in single-person households. People in their middle years are more likely to live in multiple person households (often with children).
- **Household income** is the household income. Income is probably the most important determinant of housing choice. Income is strongly related to the type of housing a household chooses (e.g., single-family detached, duplex, triplex, quadplex, or a building with more than five units) and to household tenure (e.g., rent or own).

[9] The research in this chapter is based on numerous articles and sources of information about housing, including:

Davis, Hibbits, & Midghal Research, "Metro Residential Preference Survey," May 2014.

D. Myers and S. Ryu, *Aging Baby Boomers and the Generational Housing Bubble*, Journal of the American Planning Association, Winter 2008.

Herbert, Christopher and Hrabchak Molinsky. "Meeting the Housing Needs of an Aging Population," 2015.

J. McIlwain, *Housing in America: The New Decade,* Urban Land Institute, 2010.

L. Lachman and D. Brett, *Generation Y: America's New Housing Wave,* Urban Land Institute, 2010.

Schuetz, Jenny. Who is the new face of American homeownership? Brookings, 2017.

The American Planning Association, "Investing in Place; Two generations' view on the future of communities," 2014.

Transportation for America, "Access to Public Transportation a Top Criterion for Millennials When Deciding Where to Live, New Survey Shows," 2014.

This chapter focuses on these factors, presenting data that suggests how changes to these factors may affect housing need in Tualatin over the next 20 years.

National Trends[10]

This brief summary on national housing trends builds on previous work by ECONorthwest, the Urban Land Institute (ULI) reports, and conclusions from *The State of the Nation's Housing, 2018* report from the Joint Center for Housing Studies of Harvard University. The Harvard report summarizes the national housing outlook as follows:

"By many metrics, the housing market is on sound footing. With the economy near full employment, household incomes are increasing and boosting housing demand. On the supply side, a decade of historically low single-family construction has left room for expansion of this important sector of the economy. Although multifamily construction appears to be slowing, vacancy rates are still low enough to support additional rentals. In fact, to the extent that growth in supply outpaces demand, a slowdown in rent growth should help to ease affordability concerns."

However, challenges to a strong domestic housing market remain. High housing costs make housing unaffordable for many Americans, especially younger Americans. In addition to rising housing costs, wages have also failed to keep pace, worsening affordability pressures. Single-family and multifamily housing supplies remain tight, which compound affordability issues. *The State of the Nation's Housing* report emphasizes the importance of government assistance and intervention to keep housing affordable moving forward. Several challenges and trends shaping the housing market are summarized below:

- **Moderate new construction and tight housing supply, particularly for affordable housing.** New construction experienced its eighth year of gains in 2017 with 1.2 million units added to the national stock. Estimates for multifamily starts range between 350,000 to 400,000 (2017). The supply of for sale homes in 2017 averaged 3.9 months, below what is considered balanced (six months) and lower-cost homes are considered especially scarce. The State of the Nation's Housing report cites lack of skilled labor, higher building costs, scarce developable land, and the cost of local zoning and regulation as impediments to new construction.
- **Demand shift from renting to owning.** After years of decline, the national homeownership rate increased from a 50-year low of 62.9% in 2016 (Q2) to 63.7% in 2017 (Q2). Trends suggest homeownership among householders aged 65 and older have remained strong and homeownership rates among young adults have begun stabilizing after years of decline.
- **Housing affordability.** In 2016, almost one-third of American households spent more than 30% of their income on housing. This figure is down from the prior year,

[10] These trends are based on information from: (1) The Joint Center for Housing Studies of Harvard University's publication "The State of the Nation's Housing 2018," (2) Urban Land Institute, "2018 Emerging Trends in Real Estate," and (3) the U.S. Census.

bolstered by a considerable drop in the owner share of cost-burdened households. Low-income households face an especially dire hurdle to afford housing. With such a large share of households exceeding the traditional standards for affordability, policymakers are focusing efforts on the severely cost-burdened. Among those earning less than $15,000, more than 70% of households paid more than half of their income on housing.

- **Long-term growth and housing demand.** The Joint Center for Housing Studies forecasts that nationally, demand for new homes could total as many as 12 million units between 2017 and 2027. Much of the demand will come from Baby Boomers, Millennials,[11] and immigrants. The Urban Land Institute cites the trouble of overbuilding in the luxury sector while demand is in mid-priced single-family houses affordable to a larger buyer pool.
- **Growth in rehabilitation market.**[12] Aging housing stock and poor housing conditions are growing concerns for jurisdictions across the United States. With almost 80% of the nation's housing stock at least 20 years old (40% at least 50 years old), Americans are spending in excess of $400 billion per year on residential renovations and repairs. As housing rehabilitation becomes the go-to solution to address housing conditions, the home remodeling market has grown more than 50% since the recession ended — generating 2.2% of national economic activity (in 2017).

  Despite trends suggesting growth in the rehabilitation market, rising construction costs and complex regulatory requirements pose barriers to rehabilitation. Lower-income households or households on fixed-incomes may defer maintenance for years due to limited financial means, escalating rehabilitation costs. At a certain point, the cost of improvements may outweigh the value of the structure, which may necessitate new responses such as demolition or redevelopment.
- **Changes in housing preference.** Housing preference will be affected by changes in demographics; most notably, the aging of the Baby Boomers, housing demand from Millennials, and growth of immigrants.
  - *Baby Boomers.* The housing market will be affected by continued aging of the Baby Boomers, the oldest of whom were in their seventies in 2018 and the youngest of whom were in their fifties in 2018. Baby Boomers' housing choices will affect housing preference and homeownership. Addressing housing needs for those moving through their 60s, 70s, and 80s (and beyond) will require a

[11] According to the Pew Research Center, Millennials were born between the years of 1981 to 1996 (inclusive). Read more about generations and their definitions here: http://www.pewresearch.org/fact-tank/2018/03/01/defining-generations-where-millennials-end-and-post-millennials-begin/.

To generalize, and because there is no official generation of millennial, we define this cohort as individuals born between 1980 and 2000.

[12] These findings are copied from: Joint Center for Housing Studies. (2019). Improving America's Housing, Harvard University. https://www.jchs.harvard.edu/sites/default/files/Harvard_JCHS_Improving_Americas_Housing_2019.pdf

range of housing opportunities. For example, "the 82-to-86-year-old cohort dominates the assisted living and more intensive care sector" while new or near-retirees may prefer aging in place or active, age-targeted communities.[13] Characteristics like immigration and ethnicity play a role too as "older Asians and Hispanics are more likely than whites or blacks to live in multigenerational households."[14] Senior households earning different incomes may make distinctive housing choices. For instance, low-income seniors may not have the financial resources to live out their years in a nursing home and may instead choose to downsize to smaller, more affordable units. Seniors living in close proximity to relatives may also choose to live in multigenerational households.

Research shows that "older people in western countries prefer to live in their own familiar environment as long as possible," but aging in place does not only mean growing old in their own homes.[15] A broader definition exists which explains that aging in place also means "remaining in the current community and living in the residence of one's choice."[16] Therefore, some Boomers are likely to stay in their home as long as they are able, and some will prefer to move into other housing products, such as multifamily housing or age-restricted housing developments, before they move into to a dependent living facility or into a familial home. Moreover, "the aging of the U.S. population, [including] the continued growth in the percentage of single-person households, and the demand for a wider range of housing choices in communities across the country is fueling interest in new forms of residential development, including tiny houses."[17]

- *Millennials.* Over the last several decades, young adults increasingly lived in multi-generational housing – and increasingly more so than older demographics.[18] Despite this trend, as Millennials age over the next 20 years, they will be forming households and families. In 2018, the oldest Millennials were in their late-30s and the youngest were in their late-teens. By 2040, Millennials will be between 40 and 60 years old.

  At the beginning of the 2007-2009 recession, Millennials only started forming their own households. Today, Millennials are driving much of the growth in new households, albeit at slower rates than previous generations. From 2012 to 2017,

[16] Ibid.

[17] American Planning Association. Making Space for Tiny Houses, Quick Notes.

[18] According to the Pew Research Center, in 1980, just 11% of adults aged 25 to 34 lived in a multi-generational family household and by 2008, 20% did (82% change). Comparatively, 17% of adults aged 65 and older lived in a multi-generational family household and by 2008, 20% did (18% change).

millennials formed an average of 2.1 million net new households each year. Twenty-six percent of Millennials aged 25 to 34 lived with their parents (or other relatives) in 2017.

Millennials' average wealth may remain far below Boomers and Gen Xers and student loan debt will continue to hinder consumer behavior and affect retirement savings. As of 2015, Millennial's comprised 28% of active home buyers, while Gen Xers comprised 32% and Boomers 31%.[19] That said, "over the next 15 years, nearly $24 trillion will be transferred in bequests," presenting new opportunities for Millennials (as well as Gen Xers).

- *Immigrants.* Research on foreign-born populations find that immigrants, more than native-born populations, prefer to live in multi-generational housing. Still, immigration and increased homeownership among minorities could also play a key role in accelerating household growth over the next 10 years. Current Population Survey estimates indicate that the number of foreign-born households rose by nearly 400,000 annually between 2001 and 2007, and they accounted for nearly 30% of overall household growth. Beginning in 2008, the influx of immigrants was staunched by the effects of the Great Recession. After a period of declines, however, the foreign born are again contributing to household growth. The Census Bureau's estimates of net immigration in 2017–2018 indicate that 1.2 million immigrants moved to the U.S. from abroad, down from 1.3 million immigrants in 2016-2017 but higher than the average annual pace of 850,000 during the period of 2009–2011. However, if recent Federal policies about immigration are successful, growth in undocumented and documented immigration could slow and cause a drag on household growth in the coming years.
- *Diversity.* The growing diversity of American households will have a large impact on the domestic housing markets. Over the coming decade, minorities will make up a larger share of young households and constitute an important source of demand for both rental housing and small homes. The growing gap in homeownership rates between whites and blacks, as well as the larger share of minority households that are cost burdened warrants consideration. Since 1994, the difference in homeownership rates between whites and blacks rose by 1.9 percentage points to 29.2% in 2017. Alternatively, the gap between white and Latinx homeownership rates and white and Asian homeownership rates both decreased during this period but remained sizable at 26.1 and 16.5 percentage points, respectively. Although homeownership rates are increasing for some minorities, large shares of minority households are more likely to live in high-cost metro areas. This, combined with lower incomes than white households,

[19] Srinivas, Val and Goradia, Urval (2015). The future of wealth in the United States, Deloitte Insights. https://www2.deloitte.com/insights/us/en/industry/investment-management/us-generational-wealth-trends.html

leads to higher rates of cost burden for minorities—47% for blacks, 44% for Latinx, 37% for Asians/others, and 28% for whites in 2015.

- **Changes in housing characteristics.** The U.S. Census Bureau's Characteristics of New Housing Report (2017) presents data that show trends in the characteristics of new housing for the nation, state, and local areas. Several long-term trends in the characteristics of housing are evident from the New Housing Report:[20]
  - *Larger single-family units on smaller lots.* Between 1999 and 2017, the median size of new single-family dwellings increased by 20% nationally, from 2,028 sq. ft. to 2,426 sq. ft., and 20% in the western region from 2,001 sq. ft. in 1999 to 2,398 sq. ft in 2017. Moreover, the percentage of new units smaller than 1,400 sq. ft. nationally, decreased by more than half, from 15% in 1999 to 6% in 2017. The percentage of units greater than 3,000 sq. ft. increased from 17% in 1999 to 25% of new one-family homes completed in 2017. In addition to larger homes, a move towards smaller lot sizes is seen nationally. Between 2009 and 2017, the percentage of lots less than 7,000 sq. ft. increased from 25% to 31% of lots.
  - *Larger multifamily units.* Between 1999 and 2017, the median size of new multiple family dwelling units increased by 5.3% nationally and 2.4% in the Western region. Nationally, the percentage of new multifamily units with more than 1,200 sq. ft. increased from 28% in 1999 to 33% in 2017 and increased from 25% to 28% in the Western region.
  - *Household amenities.* Across the U.S. and since 2013, an increasing number of new units had air-conditioning (fluctuating year by year at over 90% for both new single-family and multifamily units). In 2000, 93% of new single-family houses had two or more bathrooms, compared to 97% in 2017. The share of new multifamily units with two or more bathrooms decreased from 55% of new multifamily units to 45%. As of 2017, 65% of new single-family houses in the U.S. had one or more garages (from 69% in 2000).
  - *Shared amenities*. Housing with shared amenities are growing in popularity as it may improve space efficiencies and reduce per-unit costs / maintenance costs. Single-Room Occupancies (SROs)[21], Cottage Clusters, co-housing developments, and multifamily products are common housing types that take advantage of this trend. Shared amenities may take many forms and include shared: bathrooms; kitchens and other home appliances (e.g. laundry facilities, outdoor grills);

security systems; outdoor areas (e.g. green space, pathways, gardens, rooftop lounges); fitness rooms, swimming pools, and tennis courts; and free parking.[22]

State Trends

Oregon's 2016-2020 Consolidated Plan includes a detailed housing needs analysis as well as strategies for addressing housing needs statewide. The plan concludes that "a growing gap between the number of Oregonians who need affordable housing and the availability of affordable homes has given rise to destabilizing rent increases, an alarming number of evictions of low- and fixed- income people, increasing homelessness, and serious housing instability throughout Oregon."

It identified the following issues that describe housing need statewide:[23]

- For housing to be considered affordable, a household should pay up to one-third of their income toward rent, leaving money left over for food, utilities, transportation, medicine, and other basic necessities. Today, one in two Oregon households pays more than one-third of their income toward rent, and one in three pays more than half of their income toward rent.
- More school children are experiencing housing instability and homelessness. The rate of K-12 homeless children increased by 12% from the 2013-2014 school year to the 2014–2015 school year.
- Oregon has 28,500 rental units that are affordable and available to renters with extremely low incomes. There are about 131,000 households that need those apartments, leaving a gap of 102,500 units.
- Housing instability is fueled by an unsteady, low-opportunity employment market. Over 400,000 Oregonians are employed in low-wage work. Low-wage work is a growing share of Oregon's economy. When wages are set far below the cost needed to raise a family, the demand for public services grows to record heights.
- Women are more likely than men to end up in low-wage jobs. Low wages, irregular hours, and part-time work compound issues.

[23] These conclusions are copied directly from the report: Oregon's 2016-2020 Consolidated Plan http://www.oregon.gov/ohcs/docs/Consolidated-Plan/2016-2020-Consolidated-Plan-Amendment.pdf.

- People of color historically constitute a disproportionate share of the low-wage work force. About 45% of Latinx, and 50% of African Americans, are employed in low-wage industries.
- The majority of low-wage workers are adults over the age of 20, many of whom have earned a college degree, or some level of higher education.
- In 2019, minimum wage in Oregon[24] was $11.25, $12.50 in the Portland Metro, and $11.00 for non-urban counties.

Oregon's *2018 Statewide Housing Plan* identified six housing priorities to address in communities across the State over 2019 to 2023, summarized below. It includes relevant data to help illustrate the rationale for each priority. The *2018 Statewide Housing Plan* describes the Oregon Housing and Community Services' (OHCS) goals and implementation strategies for achieving the goals.[25]

- **Equity and Racial Justice.** *Advance equity and racial justice by identifying and addressing institutional and systemic barriers that have created and perpetuated patterns of disparity in housing and economic prosperity.*
  - Summary of the issue: In Oregon, 26% of people of color live below the poverty line in Oregon, compared to 15% of the White population.
  - 2019-2023 Goal: Communities of color will experience increased access to OHCS resources and achieve greater parity in housing stability, self-sufficiency and homeownership. OHCS will collaborate with its partners and stakeholders to create a shared understanding of racial equity and overcome systemic injustices faced by communities of color in housing discrimination, access to housing and economic prosperity.
- **Homelessness.** *Build a coordinated and concerted statewide effort to prevent and end homelessness, with a focus on ending unsheltered homelessness of Oregon's children and veterans.*
  - Summary of the issue: According to the Point-in-Time count, approximately 14,000 Oregonians experienced homelessness in 2017, an increase of nearly 6% since 2015. Oregon's unsheltered population increased faster than the sheltered population, and the state's rate of unsheltered homelessness is the third highest in the nation, at 57%. The state's rate of unsheltered homelessness among people in families with children is the second highest in the nation, at 52%.

[24] The 2016 Oregon Legislature, Senate Bill 1532, established a series of annual minimum wage rate increases beginning July 1, 2016 through July 1, 2022. https://www.oregon.gov/boli/whd/omw/pages/minimum-wage-rate-summary.aspx

[25] Priorities and factoids are copied directly from the report: Oregon Housing and Community Services (November 2018). Breaking New Ground, Oregon's Statewide Housing Plan, Draft. https://www.oregon.gov/ohcs/DO/shp/OregonStatewideHousingPlan-PublicReviewDraft-Web.pdf

- 2019-2023 Goal: OHCS will drive toward impactful homelessness interventions by increasing the percentage of people who are able to retain permanent housing for at least six months after receiving homeless services to at least 85 percent. We will also collaborate with partners to end veterans' homelessness in Oregon and build a system in which every child has a safe and stable place to call home.

- **Permanent Supportive Housing.** *Invest in permanent supportive housing, a proven strategy to reduce chronic homelessness and reduce barriers to housing stability.*
  - Summary of the issue: Oregon needs about 12,388 units of permanent supportive housing to serve individuals and families with a range of needs and challenges.
  - 2019-2023 Goal: OHCS will increase our commitment to permanent supportive housing by funding the creation of 1,000 or more additional permanent supportive housing units to improve the future long-term housing stability for vulnerable Oregonians.
- **Affordable Rental Housing.** *Work to close the affordable rental housing gap and reduce housing cost burden for low-income Oregonians.*
  - Summary of the issue: Statewide, over 85,000 new units are needed to house those households earning below 30% of Median Family Income (MFI) in units affordable to them. The gap is even larger when accounting for the more than 16,000 units affordable at 30% of MFI, which are occupied by households at other income levels.
  - 2019-2023 Goal: OHCS will triple the existing pipeline of affordable rental housing — up to 25,000 homes in the development pipeline by 2023. Residents of affordable rental housing funded by OHCS will have reduced cost burden and more opportunities for prosperity and self-sufficiency.
- **Homeownership.** *Provide more low- and moderate-income Oregonians with the tools to successfully achieve and maintain homeownership, particularly in communities of color.*
  - Summary of the issue: In Oregon, homeownership rates for all categories of people of color are lower than for white Oregonians. For White non-Latinx Oregonians, the home ownership rate is 63%. For Latinx and non-White Oregonians, it is 42%. For many, homeownership rates have fallen between 2005 and 2016.
  - 2019-2023 Goal: OHCS will assist at least 6,500 households in becoming successful homeowners through mortgage lending products while sustaining efforts to help existing homeowners retain their homes. OHCS will increase the number of homebuyers of color in our homeownership programs by 50% as part of a concerted effort to bridge the homeownership gap for communities of color while building pathways to prosperity.
- **Rural Communities.** *Change the way OHCS does business in small towns and rural communities to be responsive to the unique housing and service needs and unlock the opportunities for housing development.*

- Summary of the issue: While housing costs may be lower in rural areas, incomes are lower as well: median family income is $42,750 for rural counties versus $54,420 for urban counties. Additionally, the median home values in rural Oregon are 30% higher than in the rural United States and median rents are 16% higher.
- 2019-2023 Goal: OHCS will collaborate with small towns and rural communities to increase the supply of affordable and market-rate housing. As a result of tailored services, partnerships among housing and service providers, private industry and local governments will flourish, leading to improved capacity, leveraging of resources and a doubling of the housing development pipeline.

Regional and Local Demographic Trends that may affect housing need in Tualatin.

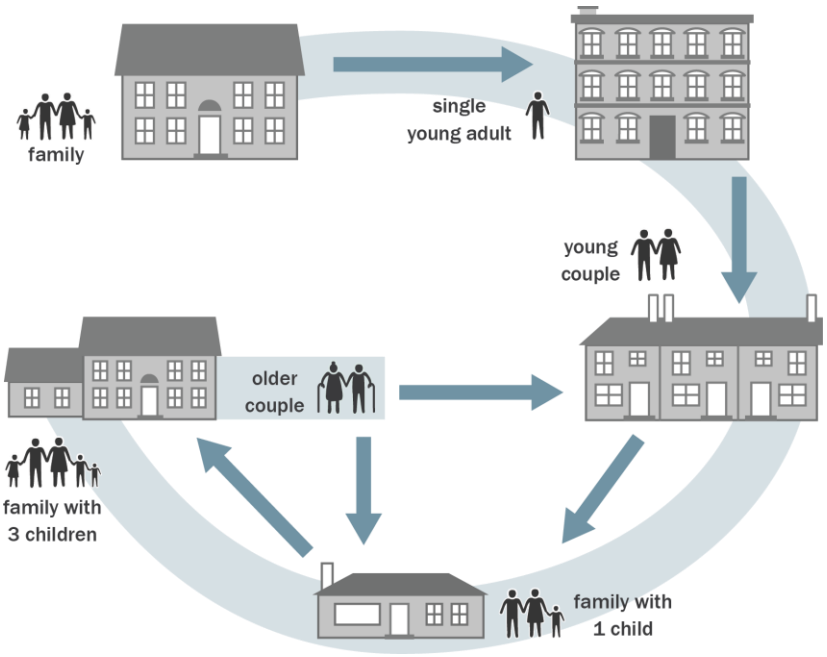
Demographic trends that might affect the key assumptions used in the baseline analysis of housing need are: (1) the aging population, (2) changes in household size and composition, and (3) increases in diversity.

An individual's housing needs change throughout their life, with changes in income, family composition, and age. The types of housing needed by a 20-year-old college student differ from the needs of a 40-year-old parent with children, or an 80-year-old single adult. As Tualatin's population ages, different types of housing will be needed to accommodate older residents. The housing characteristics by age data below reveal this cycle in action in Tualatin.

Housing needs and preferences change in predictable ways over time, such as with changes in marital status and size of family.

Families of different sizes need different types of housing.

Exhibit 29. Effect of demographic changes on housing need
Source: ECONorthwest, adapted from Clark, William A.V. and Frans M. Dieleman. 1996. Households and Housing. New Brunswick, NJ: Center for Urban Policy Research.



Growing Population

Tualatin's population growth will drive future demand for housing in the City over the planning period. The population forecast in Exhibit 31 is Tualatin's official population forecast, from the Oregon Population Forecast Program. Tualatin must use this forecast as the basis for forecasting housing growth over the 2020 to 2040 period.

Tualatin's population grew by 81% between 1990 and the 2013-2017 period. Tualatin added 12,122 new residents, at an average annual growth rate of 2.2%.

Exhibit 30. Population Growth and Change, Tualatin, Washington County, Portland Region, Oregon, and the United States, 1990, 2000, 2010, and 2018

Source: U.S. Decennial Census 1990, 2000, 2010, and 2018 Quick Facts. Portland State University 2018 Certified Population Estimates.
Note: the Portland Region is the aggregate of Clackamas, Multnomah, and Washington Counties.

					Change 1990 to 2018		
	1990	2000	2010	2018	Number	Percent	AAGR
U.S.	248,709,873	281,421,906	308,745,538	327,167,434	78,457,561	32%	1.0%
Oregon	2,842,321	3,421,399	3,831,074	4,195,300	1,352,979	48%	1.5%
Portland Region	1,174,291	1,444,219	1,641,036	1,839,005	664,714	57%	1.7%
Washington County	311,554	445,342	529,710	606,280	294,726	95%	2.5%
Tualatin	15,013	22,791	26,054	27,055	12,042	80%	2.2%

Tualatin city limits is projected to grow by 627 people between 2020 and 2040, at an average annual growth rate of 0.12%.[26]

Exhibit 31. Forecast of Population Growth, Tualatin city limits, 2020 to 2040

Source: Metro 2040 Population Distributed Forecast, Exhibit A. July 12, 2016.

26,745	27,372	627	2.3% increase
Residents in 2020	Residents in 2040	New residents 2020 to 2040	0.12% Growth Rate

Tualatin's Basalt Creek is project to grow by 1,080 people between 2020 and 2040, at an average annual growth rate of 5.68%[27]

Exhibit 32. Forecast of Population Growth, Basalt Creek, 2020 to 2040

Source: Metro 2040 TAZ Forecast, Population Estimates (TAZ 980 and 981). November 6, 2015.

535	1,616	1,080	202% increase
Residents in 2020	Residents in 2040	New residents 2020 to 2040	5.68% Growth Rate

[26] This forecast of population growth is based on Tualatin's (city limits) official population forecast from Metro 2040 Population Distributed Forecast (2016). ECONorthwest extrapolated the population forecast for 2015 (to 2020) using an average annual growth rate.

[27] This forecast of population growth is based on Basalt Creek's official population forecast from Metro 2040 TAZ Population Forecast (2015). ECONorthwest extrapolated the population forecast for 2015 (to 2020) using an average annual growth rate.

Aging Population

This section shows two key characteristics of Tualatin's population, with implications for future housing demand in Tualatin:

- **Seniors.** Tualatin currently has a smaller share of people over 60 years old than Washington County. As Tualatin's senior population grows, it will have increasing demand for housing that is suitable for older demographics.

  Demand for housing for seniors will grow over the planning period, as the Baby Boomers continue to age and retire. The Washington County forecast share of residents aged 60 years and older will account for 24% of its population in 2040, compared to around 18% in the 2013-2017 period.

  The impact of growth in seniors in Tualatin will depend, in part, on whether older people already living in Tualatin continue to reside there as they retire. National surveys show that, in general, most retirees prefer to age in place by continuing to live in their current home and community as long as possible.[28] Tualatin may be attractive to newly retiring seniors because of its location within the Portland Metro region.

  Growth in the number of seniors will result in demand for housing types specific to seniors, such as small and easy-to-maintain dwellings, assisted living facilities, or age-restricted developments. Senior households will make a variety of housing choices, including: remaining in their homes as long as they are able, downsizing to smaller single-family homes (detached and attached) or multifamily units, moving in with family, or moving into group housing (such as assisted living facilities or nursing homes), as their health declines. The challenges aging seniors face in continuing to live in their community include changes in healthcare needs, loss of mobility, the difficulty of home maintenance, financial concerns, and increases in property taxes.[29]

- **Tualatin has a slightly larger share of younger people than the Portland Region.** About 26% of Tualatin's population and Washington County's population is under 20 years old, compared to 24% of the Portland Region's population. The forecast for population growth in Washington County shows the percent of people under 20 years staying static at 24% of the population in 2013-2017 to 2040.

  People currently aged 20 to 40 are referred to as the Millennial generation and account for the largest share of population in Oregon.[30] By 2040, they will be about 40 to 60 years of age. The forecast for Washington County shows a slight shift in Millennials from about 29% of the population in 2020 to about 25% of the population in 2040.

---

[28] A survey conducted by the AARP indicates that 90% of people 50 years and older want to stay in their current home and community as they age. See http://www.aarp.org/research.

[29] "Aging in Place: A toolkit for Local Governments" by M. Scott Ball.

[30] Pew Research Center. (March 2018). "Defining generations: Where Millennials end and post-Millennials begin" by Michael Dimock. Retrieved from: http://www.pewresearch.org/fact-tank/2018/03/01/defining-generations-where-millennials-end-and-post-millennials-begin/.

Tualatin's ability to attract people in this age group will depend, in large part, on whether the city has opportunities for housing that both appeals to and is affordable to Millennials. Again, Tualatin is attractive because of the amenities of the Portland Metro region.

The long-term housing preference of Millennials is uncertain. Research suggests that Millennials' housing preferences may be similar to the Baby Boomers, with a preference for smaller, less costly units. Recent surveys about housing preference suggest that Millennials want affordable single-family homes in areas that offer transportation alternatives to cars, such as suburbs or small cities with walkable neighborhoods.[31]

A recent survey of people living in the Portland region shows that Millennials prefer single-family detached housing. The survey finds that housing price is the most important factor in choosing housing for younger residents.[32] The survey results suggest Millennials are more likely than other groups to prefer housing in an urban neighborhood or town center.

Growth in Millennials in Tualatin will result in increased demand for both affordable single-family detached housing (such as small single-family detached units like cottages), as well as increased demand for affordable townhouses and multifamily housing. Growth in this population will result in increased demand for both ownership and rental opportunities, with an emphasis on housing that is comparatively affordable.

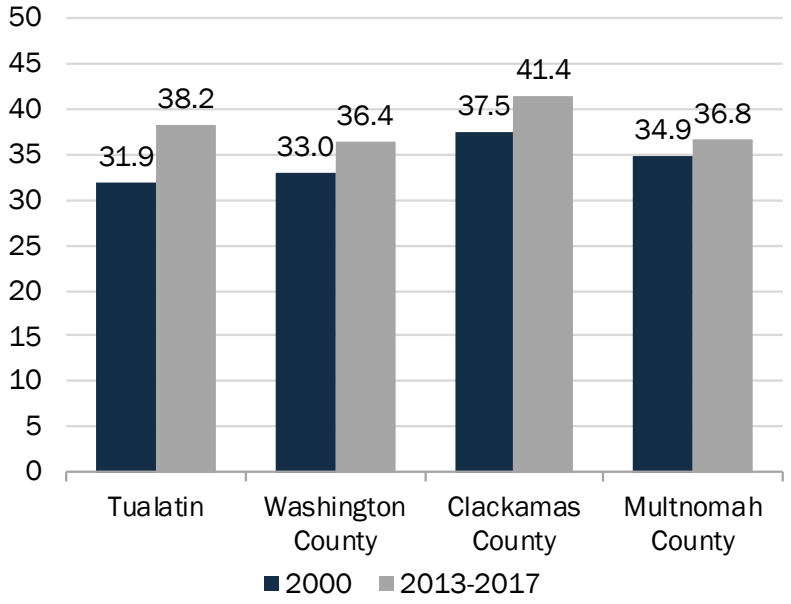
"Access to Public Transportation a Top Criterion for Millennials When Deciding Where to Live, New Survey Shows," Transportation for America.
"Survey Says: Home Trends and Buyer Preferences," National Association of Home Builders International Builders

[32] Davis, Hibbits, & Midghal Research, "Metro Residential Preference Survey," May 2014.

From 2000 to 2013-2017, Tualatin's population grew older on average.

Exhibit 33. Median Age, Tualatin, Washington County, Clackamas County, and Multnomah County, 2000 and 2013-2017

Source: U.S. Census Bureau, 2000 Decennial Census Table B01002, 2013-2017 ACS, Table B01002.

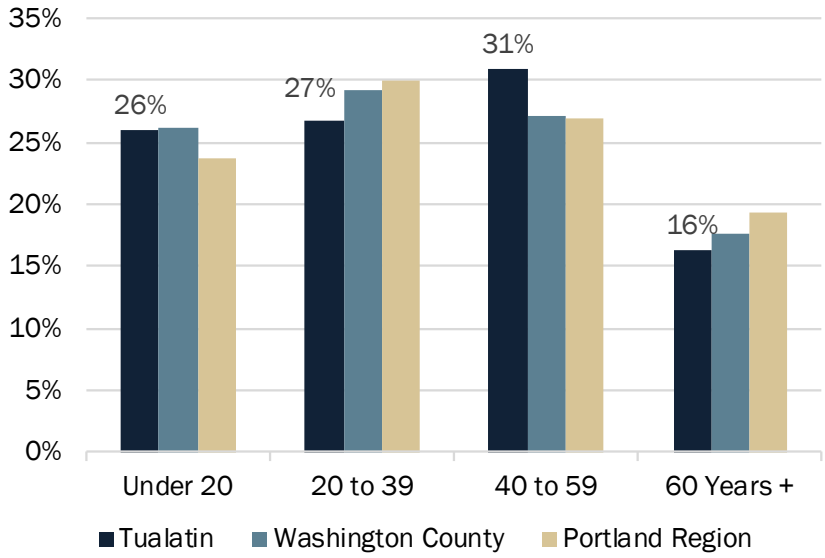


In the 2013-2017 period, about 58% of Tualatin's residents were between the ages of 20 and 59 years.

Tualatin had a slightly smaller share of people over the age of 60 than Washington County and Portland Region.

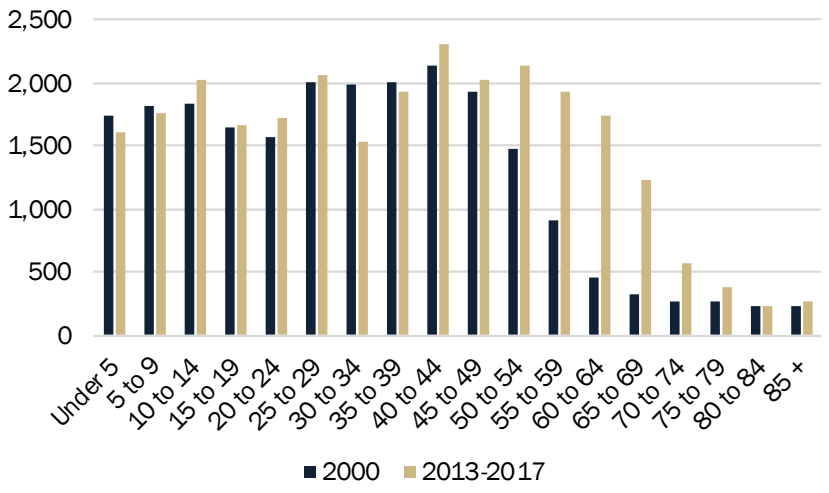
Exhibit 34. Population Distribution by Age, Tualatin, Washington County, and Portland Region, 2013-2017

Source: U.S. Census Bureau, 2013-2017 ACS, Table B01001.



The number of senior residents in Tualatin grew between 2000 and the 2013-2017 period.

Exhibit 35. Population Distribution by Age, Tualatin, 2013-2017
Source: U.S. Census Bureau, 2000 Decennial Census Table P012 and 2013-2017 ACS, Table B01001.

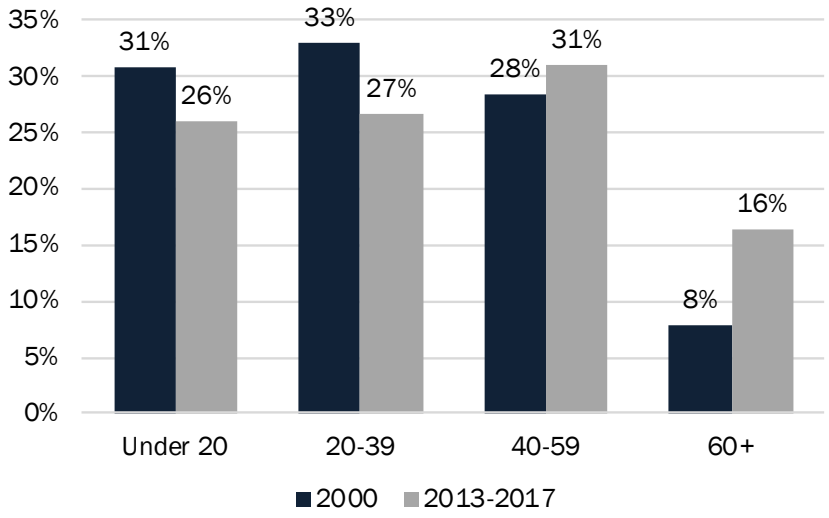


Between 2000 and 2013-2017, the share of Tualatin's population aged 60 years and older doubled.

Tualatin's population aged 60 years and older grew by 2,643 people between 2000 and 2013-2017.

This increase can be explained in part through aging of the Baby Boomers across the Portland Region. Development of senior housing in Tualatin likely attracted seniors to Tualatin, increasing the percentage of people over 60 years old in the city.

Exhibit 36. Population Composition by Age, Tualatin, 2000 and 2013-2017
Source: U.S. Census Bureau, 2000 Decennial Census Table P012 and 2013-2017 ACS, Table B01001.



Between 2020 and 2040, Washington County's population over 60 years old is forecast to grow the fastest, by 62%.

Exhibit 37. Fastest-growing Age Groups, Washington County, 2020 to 2040
Source: Portland State University, Population Research Center, Washington County Forecast, June 2017.

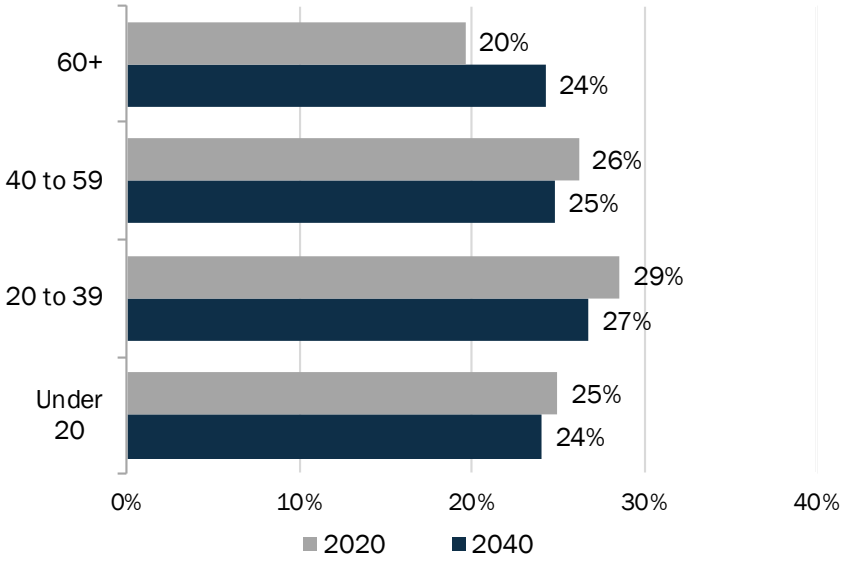
Under 20	20-39 Yrs	40-59 Yrs	60+ Yrs
23%	23%	24%	62%
36,773 People	40,023 People	38,953 People	75,217 People

Between 2020 and 2040, the share of Washington County residents over the age of 40 will make up 49% of the county's total population.

Of the age cohorts shown in Exhibit 38, the share of residents over 60 years of age will increase by 2040, while the share of all other age cohorts will decrease.

Exhibit 38. Population Growth by Age Group, Washington County, 2020 to 2040

Source: Portland State University, Population Research Center, Washington County Forecast, June 2017.



Increased Ethnic Diversity

Tualatin is becoming more ethnically diverse. The Latinx population grew from 12% of Tualatin's population in 2000 to 16% of the population in the 2013-2017 period, adding about 1,774 new Latinx residents. Tualatin is more ethnically diverse than the Portland Region.

The U.S. Census Bureau forecasts that at the national level, the Latinx population will continue growing faster than most other non-Latinx population between 2020 and 2040. The Census forecasts that the Latinx population will increase 93% from 2016 to 2060 and foreign-born Latinx population will increase by about 40% in that same time.[33]

Continued growth in the Latinx population will affect Tualatin's housing needs in a variety of ways.[34] Growth in first and, to a lesser extent, second and third generation Latinx immigrants, will increase demand for larger dwelling units to accommodate the, on average, larger household sizes for these households. Foreign-born households, including Latinx immigrants, are more likely to include multiple generations, requiring more space than smaller household

[33] U.S. Census Bureau, *Demographic Turning Points for the United States: Population Projections for 2020 to 2060,* pg. 7, https://www.census.gov/content/dam/Census/library/publications/2018/demo/P25_1144.pdf

[34] Pew Research Center. *Second-Generation Americans: A Portrait of the Adult Children of Immigrants*, February 7, 2013, Appendix 8, http://www.pewsocialtrends.org/2013/02/07/appendix-1-detailed-demographic-tables/.
National Association of Hispanic Real Estate Professionals. *2017 State of Hispanic Homeownership Report*, 2017.

sizes. As Latinx households integrate over generations, household size typically decreases, and housing needs become similar to housing needs for all households.

According to the *State of Hispanic Homeownership* report from the National Association of Hispanic Real Estate Professionals[35], Latinx accounted for 28.6% of the nation's household formation in 2017. Household formations, for Latinx homeowners specifically, accounted for 15% of the nation's net homeownership growth. The rate of homeownership for Latinx increased from 45.4% in 2014[36] to 46.2% in 2017. The only demographic that increased their rate of homeownership from 2016 to 2017 was for Latinx households.

The *State of Hispanic Homeownership* report also cites the lack of affordable housing products as a substantial barrier to homeownership. The report finds that Latinx households are more likely than non-Latinx households to be nuclear households, comprised of married couples with children, and multiple-generation households in the same home, such as parents and adult children living together. These housing preferences—affordability and larger household size—will influence the housing market as the Latinx population continues to grow.[37] Accordingly, growth in Latinx households will result in increased demand for housing of all types, both for ownership and rentals, with an emphasis on housing that is comparatively affordable.

The share of Tualatin's population that is Latinx increased by 4% (1,774 people) from 2000 to 2013-2017.

Tualatin was more ethnically diverse than the Portland Region.

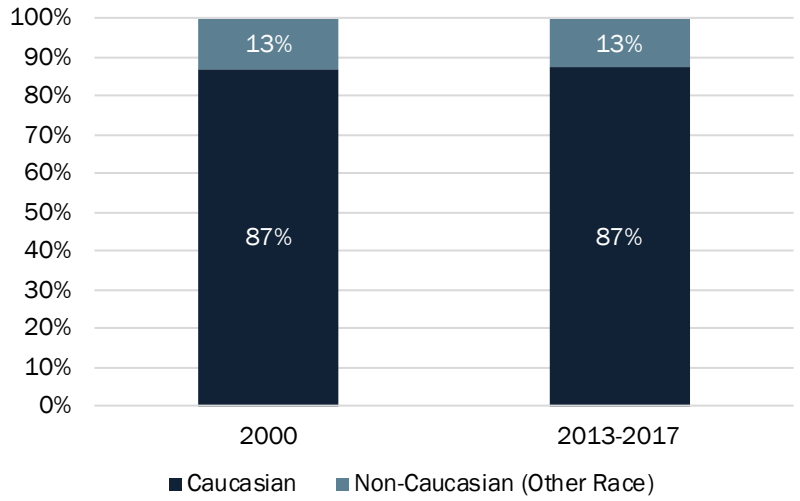
Racial Diversity[38]

The non-Caucasian population is defined as the share of the population that identifies as a race other than "White alone" according to Census definitions. Racial diversity in Tualatin did not increase between 2000 and the 2013-2017 period and. In the 2013-2017 period, Tualatin was less racially diverse than both the county and region.

The share of the non-white population in Tualatin stayed the same from 2000 to 2013-2017.

Exhibit 40. Non-Caucasian Population as a Percent of Total Population, Tualatin, 2000 and 2013-2017

Source: U.S. Census Bureau, 2000 Decennial Census Table P008, 2013-2017 ACS Table B02001.



[38] The US Census Bureau considers race and ethnicity as two distinct concepts. The Census applies two categories for ethnicity, which are Hispanic or Latino (i.e., Latinx) and Not Hispanic or Latino (i.e., Non-Latinx). Latinx is an ethnicity and not a race, meaning individuals who identify as Latinx may be of any race. The share of the population that identifies as Latinx should not be added to percentages for racial categories.

In the 2013-2017 period, Tualatin was less racially diverse than Washington County and the Portland Region.

Homelessness

Washington County's point-in-time homeless count decreased by about 4% (22 people) from 2017 to 2018.

Household Size and Composition

Tualatin's households are smaller than Washington County's households. Tualatin's household composition shows that households in Tualatin are similar to Washington County and Portland Region averages.

Tualatin's average household size was smaller than Washington County's and Clackamas County's, but larger than Multnomah County's.

Exhibit 44. Average Household Size, Tualatin, Washington County, Clackamas County, Multnomah County, 2013-2017

Source: U.S. Census Bureau, 2013-2017 ACS 5-year estimate, Table B25010.

Tualatin had a similar household composition to Washington County. Compared to the Portland Region, Tualatin had a smaller share of nonfamily households and a larger share of family households with children.

About a third of Tualatin's households were non-family households (i.e. 1-person households and households composed of roommates).

Income of Tualatin Residents

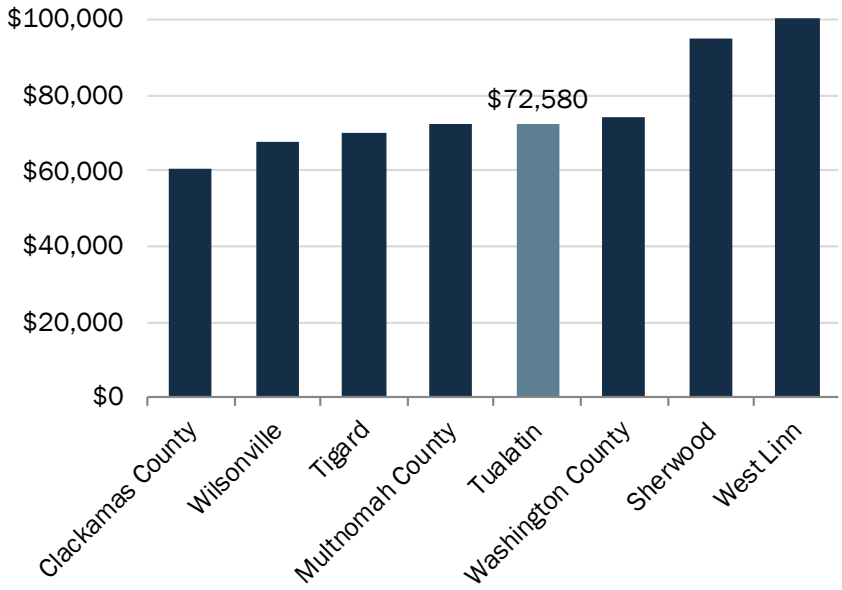
Income is one of the key determinants in housing choice and households' ability to afford housing. Income for residents living in Tualatin was lower than the Washington County median income and the state's.

Over the 2013-2017 period, Tualatin's median household income (MHI) was below that of Washington County's.

Tualatin's MHI was $1,453 lower than Washington County's MHI ($74,033).

Exhibit 49. Median Household Income, Tualatin, Washington County, and Comparison regions, 2013-2017

Source: U.S. Census Bureau, 2013-2017 ACS 5-year estimate, Table B25119.



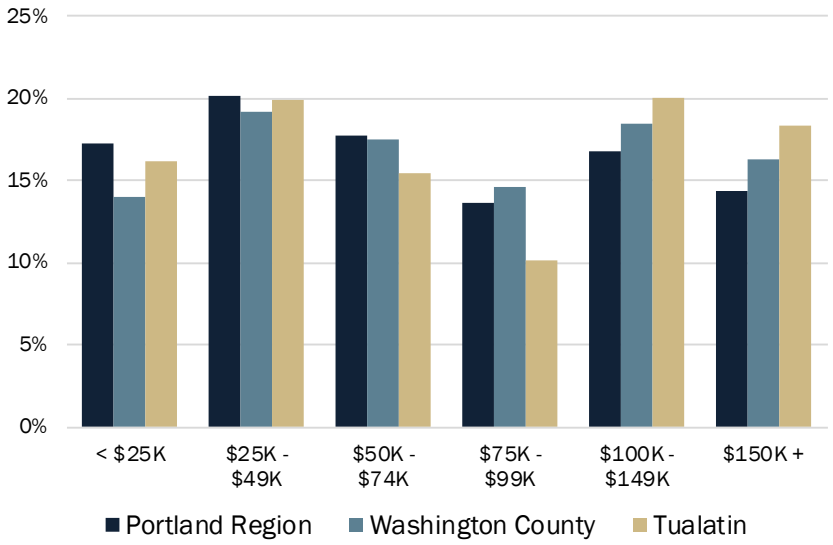
Tualatin had a larger share of higher-earning households.

About 38% of Tualatin's households earned more than $100,000 per year, compared to 35% of Washington County households and 31% of the Portland Region's households.

About 36% of Tualatin's households earned $50,000 or less per year, compared to 33% of Washington County's households and 37% of the Portland Region's households.

Exhibit 50. Household Income, Tualatin, Washington County, and Portland Region, 2013-2017

Source: U.S. Census Bureau, 2013-2017 ACS 5-year estimate, Table B19001.



After adjusting for inflation, Tualatin's median household income (MHI) decreased by 12%, from $82,488 in 2000 to $72,580 in 2013-2017.

In this same time, Washington County's MHI decreased by 4%, Clackamas County's MHI decreased by 1%, and Multnomah County's MHI decreased by 5%.

Commuting Trends

Tualatin is part of the complex, interconnected economy of the Portland Region. Of the more than 23,800 people who work in Tualatin, 93% of workers commute into Tualatin from other areas, most notably Portland, Tigard, Beaverton, and Hillsboro. Almost 11,000 residents of Tualatin commute out of the city for work, many of them to Portland.

Tualatin is part of an interconnected regional economy.

More than 22,000 people commuted into Tualatin for work, and nearly 11,000 people living in Tualatin commuted out of the city for work.

Exhibit 57. Commuting Flows, Tualatin, 2015

Regional and Local Trends Affecting Affordability in Tualatin

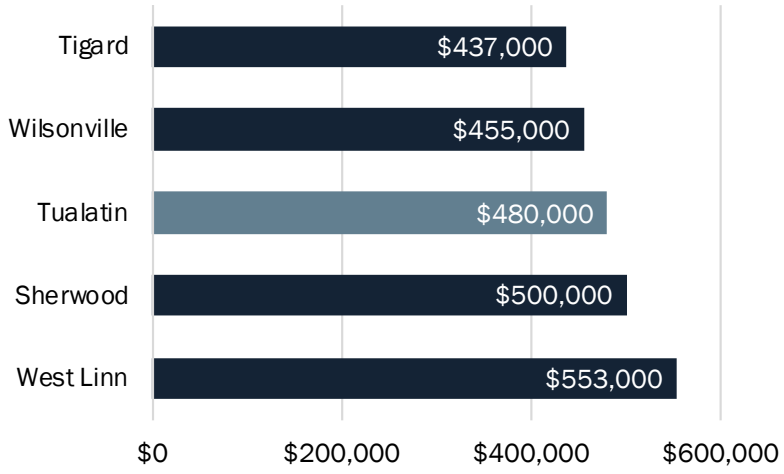
This section describes changes in sales prices, rents, and housing affordability in Tualatin. It uses cities in the region, as well as Washington County and Oregon, as comparisons.

Changes in Housing Costs

With a median sale price of $480,000 in February 2019, Tualatin's housing sales were slightly higher than some comparison cities in this analysis, but below sale prices of other cities. Tualatin's housing prices grew along with comparison cities over the January 2015 to February 2019 analysis period.

Tualatin's median home sale price was within range of comparison cities.

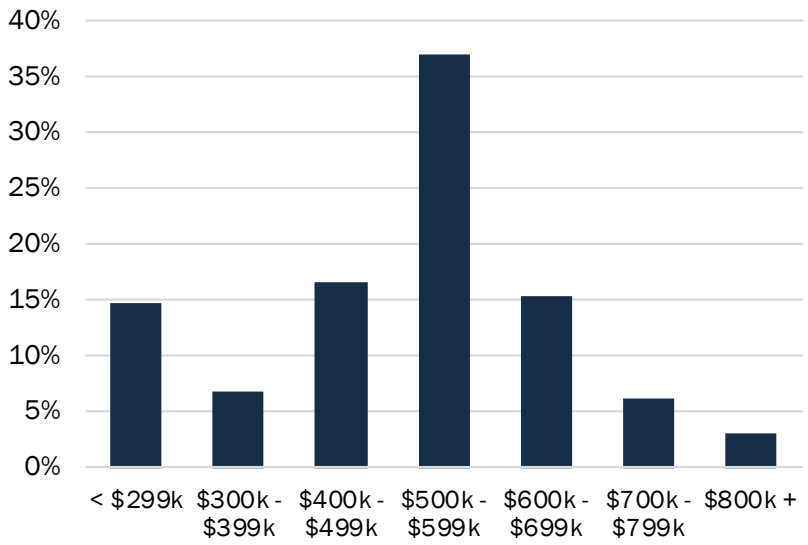
Exhibit 62. Median Home Sale Price, Tualatin and Comparison Cities, February 2019
Source: Redfin.



In 2017 through 2018, more than half of the homes (62%) in Tualatin sold for more than $500,000.

Exhibit 63. Distribution of Home Sale Prices, Tualatin, 2017—2018

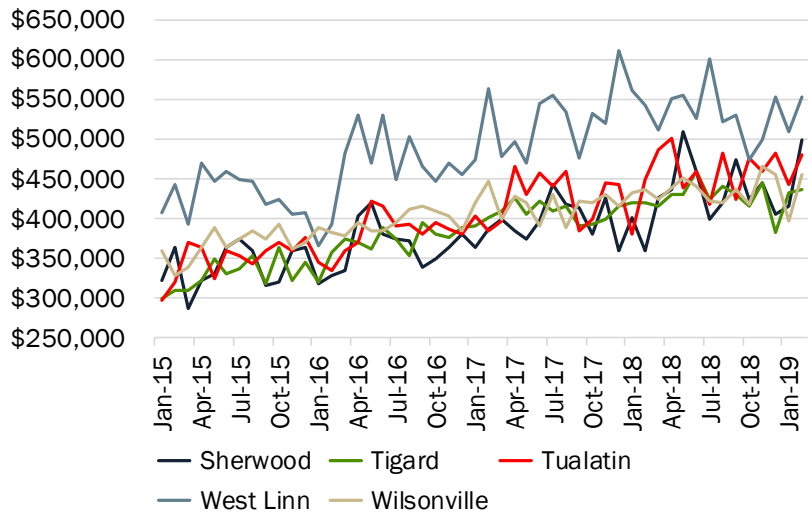
Source: RLIS.



Between January 2015 and February 2019, home sale prices in Tualatin followed similar trends to other nearby cities (with West Linn as an outlier).

Exhibit 64. Median Sale Price, Tualatin and Comparison Cities, January 2016–February 2019

Source: Redfin.



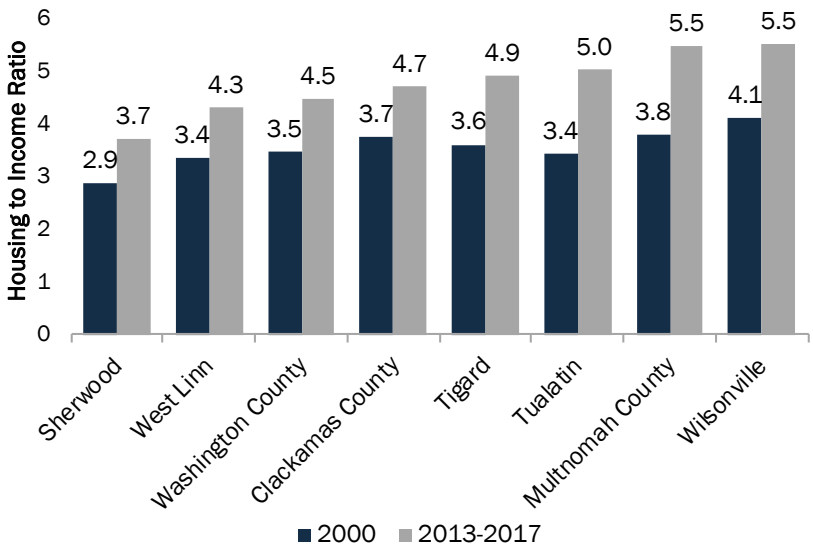
Since 2000, housing costs in Tualatin increased faster than incomes.

The household reported median value of a house in Tualatin was 3.4 times the median household income (MHI) in 2000 and 5.0 times MHI in 2016.

The decline of housing affordability was more extreme than in Washington County overall.

Exhibit 65. Ratio of Median Housing Value to Median Household Income, Tualatin, Washington County, and Comparison Jurisdictions, 2000 to 2013–2017[39]

Source: U.S. Census Bureau, 2000 Decennial Census, Tables HCT012 and H085, and 2012–2016 ACS, Tables B19013 and B25077.



[39] This ratio compares the median value of housing in Tualatin (and other places) to the median household income. Inflation-adjusted median owner values in Tualatin increased from $282,532 in 2000 to $365,700 in 2013–2017. Over the same period, inflation-adjusted median income decreased from $82,488 to $72,580.

Rental Costs

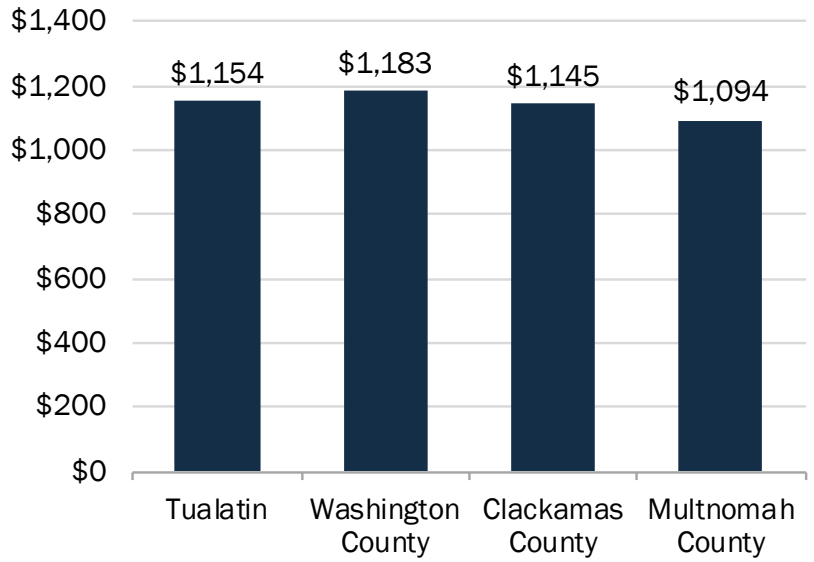
Median multifamily rents in Tualatin and Washington County are about $1,200. The following charts show gross rent (which includes the cost of rent plus utilities) for Tualatin in comparison to Washington County and the Portland Region.

The median gross rent in Tualatin was $1,154 in the 2013-2017 period.

Rent in Tualatin was comparable to that of comparison regions.

Exhibit 66. Median Gross Rent, Tualatin, Washington County, Clackamas County, and Multnomah County, 2013-2017

Source: U.S. Census Bureau, 2013-2017 ACS 5-year estimate, Table B25064.

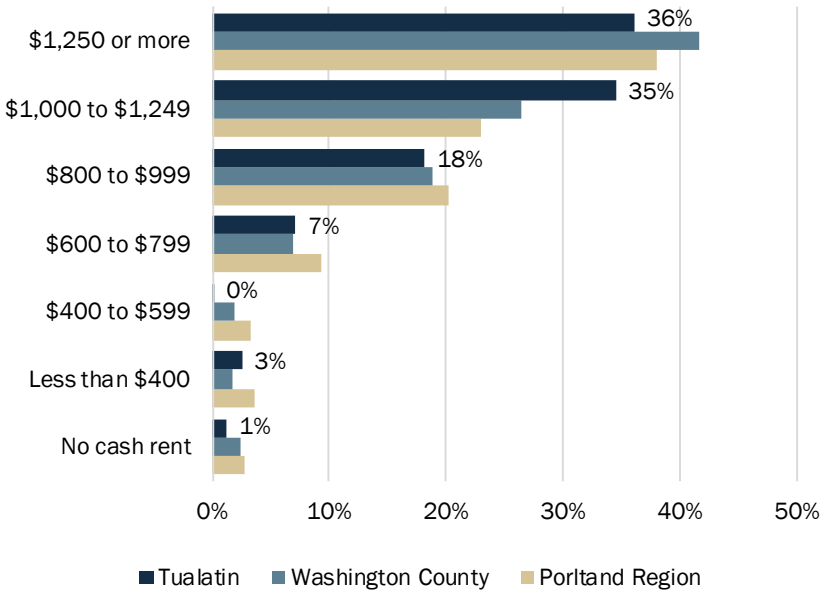


Most renters in Tualatin paid more than $1,000 per month in rent.

About 36% of Tualatin's renters paid $1,250 or more in gross rent per month, a smaller share than renters across Washington County (42%) and the Portland Region (38%).

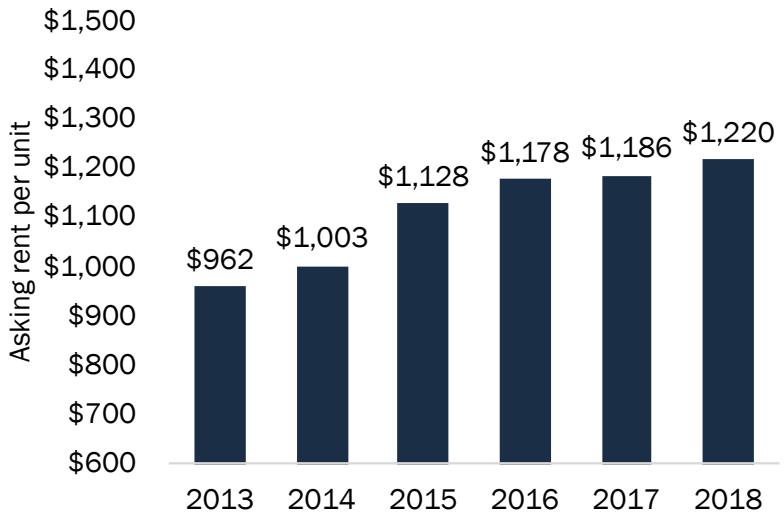
Exhibit 67. Gross Rent, Tualatin, Washington County, and Portland Region, 2013-2017

Source: U.S. Census Bureau, 2013-2017 ACS Table B25063.



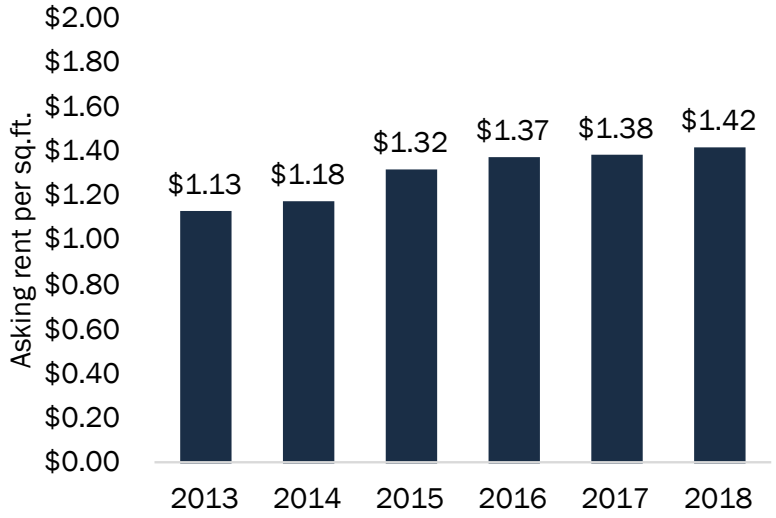
Tualatin's average asking multifamily rent per unit increased by $372, from $848 in 2010 to $1,220 in 2018.

Exhibit 68. Average Asking Multifamily Rent Per Unit, Tualatin, 2013 through 2018
Source: CoStar.



Tualatin's average asking multifamily rent per square foot had increased since 2013.

Exhibit 69. Average Asking Multifamily Rent per Square Foot, Tualatin, 2013 through 2018
Source: CoStar.



Housing Affordability

A typical standard used to determine housing affordability is that a household should pay no more than a certain percentage of household income for housing, including payments and interest or rent, utilities, and insurance. The Department of Housing and Urban Development's guidelines indicate that households paying more than 30% of their income on housing experience "cost burden," and households paying more than 50% of their income on housing experience "severe cost burden." Using cost burden as an indicator is one method of determining how well a city is meeting the Goal 10 requirement to provide housing that is affordable to all households in a community.

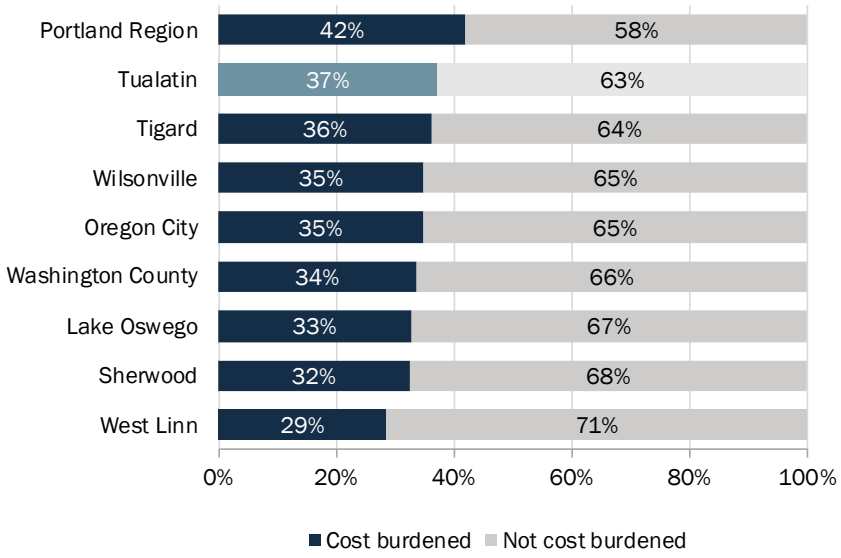
About 37% of Tualatin's households (renters and homeowners) are cost burdened, of which 16% are severely cost burdened. About 56% of renter households (households who rent) are cost burdened, compared with 22% of homeowners (households who own their own home). Twenty-five percent of households in Tualatin are rent burdened households.[40] Overall, Tualatin has a slightly larger share of cost-burdened households than Washington County but a lower share of cost-burdened households that the Portland Region.

Overall, about 37% of all households in Tualatin were cost burdened.

In the 2013-2017 period, Tualatin had one of the highest rates of cost burdened households relative to other comparison areas.

Exhibit 70. Housing Cost Burden, Tualatin, Washington County, and Comparison Areas, 2013-2017

Source: U.S. Census Bureau, 2013-2017 ACS Tables B25091 and B25070.

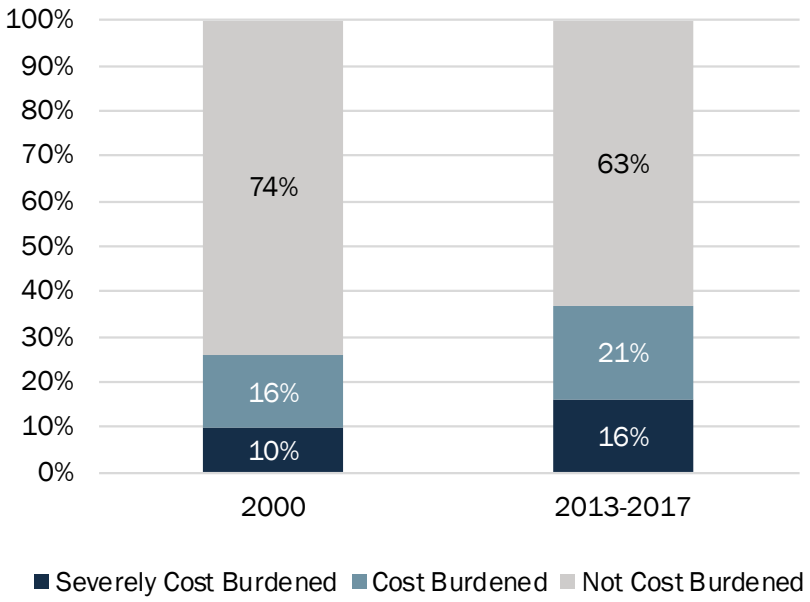


[40] Cities with populations >10,000 are required, per HB 4006, to assess "rent burden" if more than 50% of renters are cost burdened. In Tualatin as of the 2013-2017 period, 56% of total renter households were cost burdened. Upon further assessment, we find that a quarter (25%) of Tualatin's households (renters and homeowners) were cost burdened renters (households that rent housing and pay more than 30% of their income on housing).

From 2000 to the 2013-2017 period, the share of cost burdened and severely cost burdened households in Tualatin grew by 11%.

Exhibit 71. Change in Housing Cost Burden, Tualatin, 2000 to 2013-2017

Source: U.S. Census Bureau, 2000 Decennial Census, Tables H069 and H094 and 2013-2017 ACS Tables B25091 and B25070.

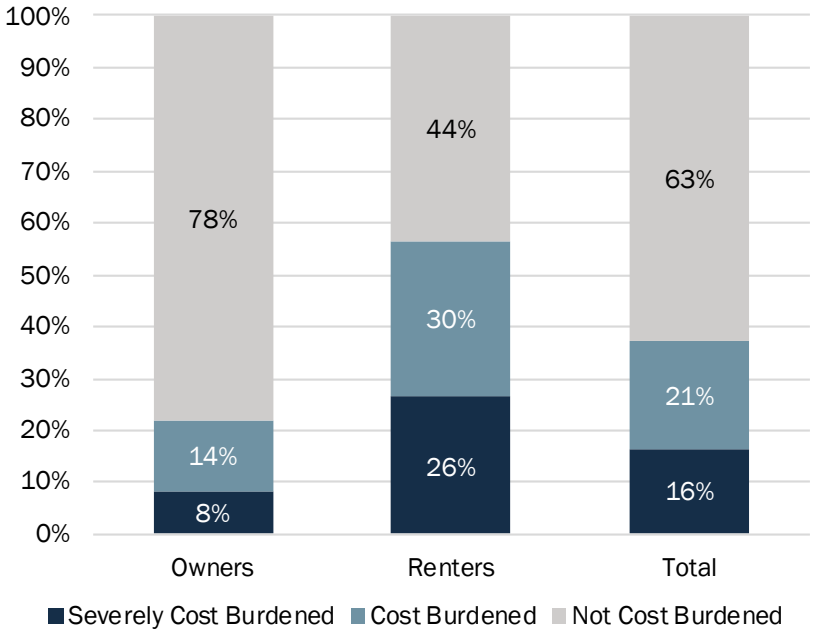


Renters were more likely to be cost burdened than homeowners.

In the 2013-2017 period, about 56% of Tualatin's renters were cost burdened or severely cost burdened, compared to 22% of homeowners.

Exhibit 72. Housing Cost Burden by Tenure, Tualatin, 2013-2017

Source: U.S. Census Bureau, 2013-2017 ACS Tables B25091 and B25070.

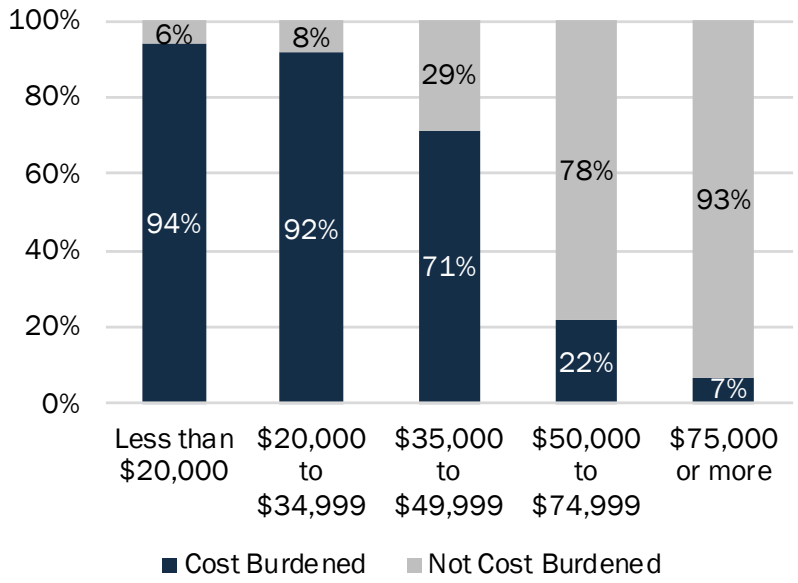


Nearly all renter households earning less than $35,000 per year were cost burdened.

Most households earning between $35,000 and $50,000 per year were cost burdened.

Exhibit 73. Cost Burdened Renter Households, by Household Income, Tualatin, 2013-2017

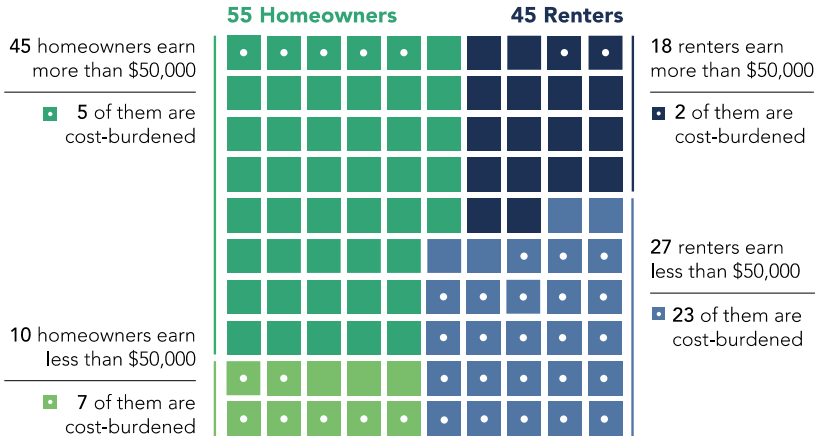
Source: U.S. Census Bureau, 2013-2017 ACS Table B25074.



If all of Tualatin's households were 100 residents, 27 households would be renters earning $50,000 or less per year; 23 of these households (85%) would be cost burdened.

Exhibit 74. Illustration of Cost Burden: If all of Tualatin's Households were 100 Residents

Source: U.S. Census Bureau, 2013-2017 ACS Table S2503.



Another measure of cost burden is considering housing costs plus transportation costs. When examining housing and transportation cost burden, a household is considered cost burdened if they spend more than 45% of gross income on housing and transportation costs combined. Metro's 2*014 Metro Urban Growth Report* contains extensive documentation of housing and transportation cost burden.

Tualatin residents spend between 34% and 40% of their income on housing plus transportation costs.

Compared to the Metro Region, Tualatin residents spend a similar percentage of their income on housing and transportation costs.

Exhibit 75. Average Cost of Transportation and Housing as a Percent of Income, Tualatin and the Metro Region, 2010 and 2035[41]

Source: 2014 Metro Urban Growth Report, Appendix 12.

2010	40% $2,541 per month Tualatin	39% $2,300 per month Metro UGB
2035	34% $2,723 per month Tualatin	35% $2,050 per year Metro UGB

Using Metro's definition for cost burdened, about 15% of households in Tualatin are forecast to be cost burdened by 2035, comparable with the region.

Exhibit 76. Percent of Households with Housing and Transportation Cost Burden, Tualatin and the Metro Region, 2010 and 2035

Source: 2015 Metro Urban Growth Report, Appendix 12.

2010	20% 2,046 households Tualatin	17% 104,100 households Metro UGB
2035	15% 1,838 households Tualatin	15% 119,300 households Metro UGB

[41] 2035 estimates use Metro's Medium Growth forecast.

While cost burden is a common measure of housing affordability, it does have some limitations. Two important limitations are:

- A household is defined as cost burdened if the housing costs exceed 30% of their income, regardless of actual income. The remaining 70% of income is expected to be spent on non-discretionary expenses, such as food or medical care, and on discretionary expenses. Households with higher incomes may be able to pay more than 30% of their income on housing without impacting the household's ability to pay for necessary non-discretionary expenses.
- Cost burden compares income to housing costs and does not account for accumulated wealth. As a result, the estimate of how much a household can afford to pay for housing does not include the impact of a household's accumulated wealth. For example, a household of retired people may have relatively low income but may have accumulated assets (such as profits from selling another house) that allow them to purchase a house that would be considered unaffordable to them based on the cost burden indicator.

Another way of exploring the issue of financial need is to review housing affordability at varying levels of household income.

Fair Market Rent for a 2-bedroom apartment in Washington County was $1,330 in 2018.

Exhibit 77. HUD Fair Market Rent (FMR) by Unit Type, Washington County, 2018
Source: U.S. Department of Housing and Urban Development.

$1,026	$1,132	$1,330	$1,935	$2,343
Studio	1-Bedroom	2-Bedroom	3-Bedroom	4-Bedroom

A household must earn at least $25.58 per hour to afford a two-bedroom unit at Fair Market Rent ($1,330) in Washington County.

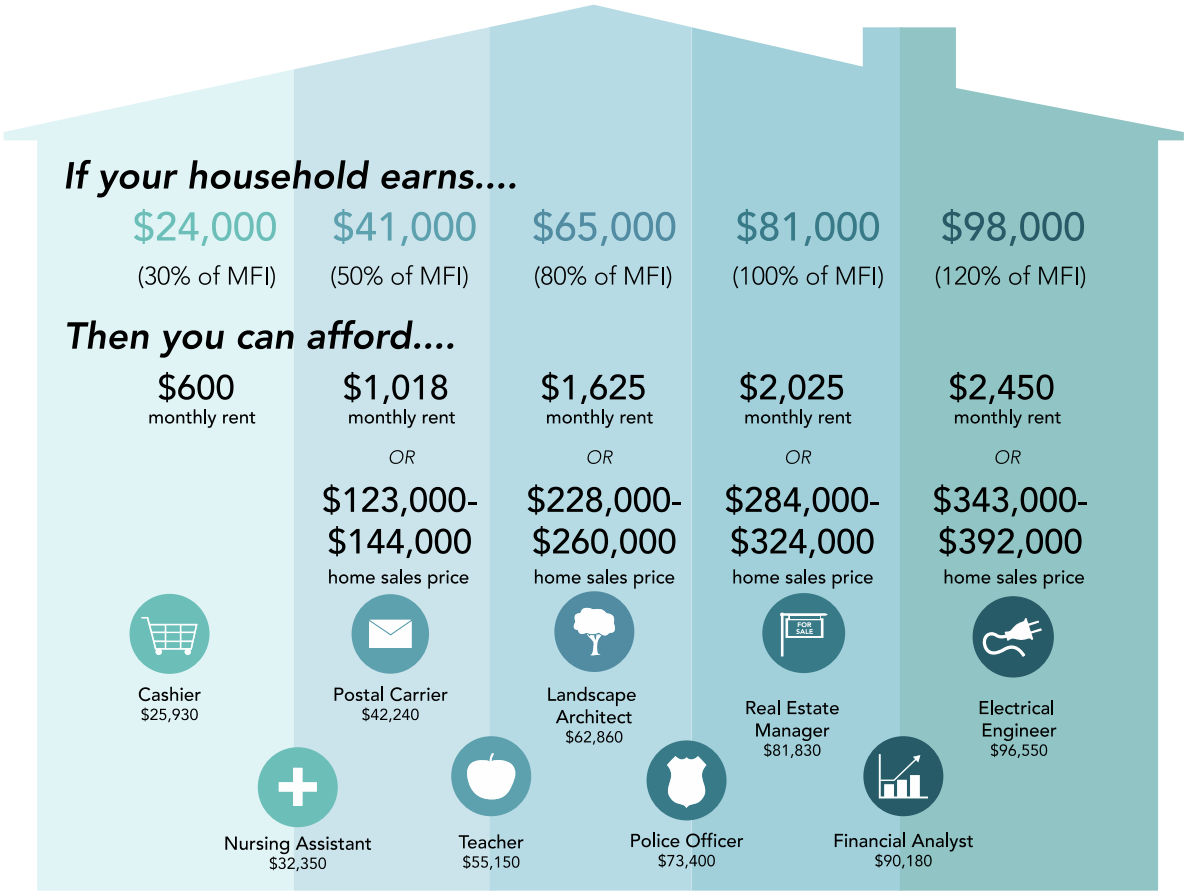
Exhibit 78. Affordable Housing Wage, Washington County, 2018
Source: U.S. Department of Housing and Urban Development; Oregon Bureau of Labor and Industries.

$25.58 per hour
Affordable Housing Wage for two-bedroom Unit in Washington County

Illustrated in Exhibit 79, a household earning median family income in Washington County (about $81,000 per year) can afford a monthly rent of about $2,025 or a home roughly valued between $284,000 and $324,000.

Exhibit 79. Financially Attainable Housing, by Median Family Income (MFI) for Washington County ($81,400), Tualatin, 2018

Source: U.S. Department of Housing and Urban Development, Washington, 2018. Bureau of Labor Services, 2017, for Portland MSA.



About 26% of Tualatin's households had incomes less than $41,000 and cannot afford a two-bedroom apartment at Washington County's Fair Market Rent (FMR) of $1,330.

Exhibit 80. Share of Households, by Median Family Income (MFI) for Washington County ($81,400), Tualatin, 2018

Source: U.S. Department of Housing and Urban Development, Washington County, 2018. U.S. Census Bureau, 2013-2017 ACS Table 19001.

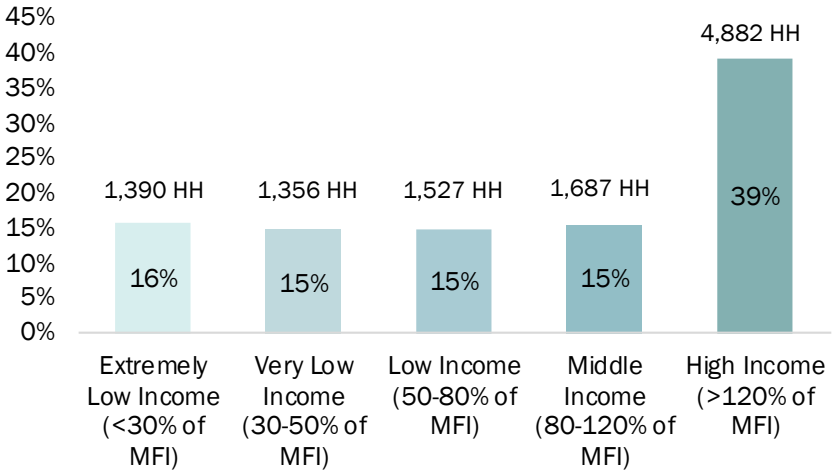


Exhibit 81 illustrates the types of financially attainable housing by income level in Washington County. Generally speaking, lower-income households will be renters occupying existing housing. Newly built housing will be a combination of renters (most likely in multifamily housing) and homeowners. The types of housing affordable for the lowest income households is limited to subsidized housing, manufactured housing, lower-cost single-family housing, and multifamily housing (apartments). The range of financially attainable housing increases with increased income.

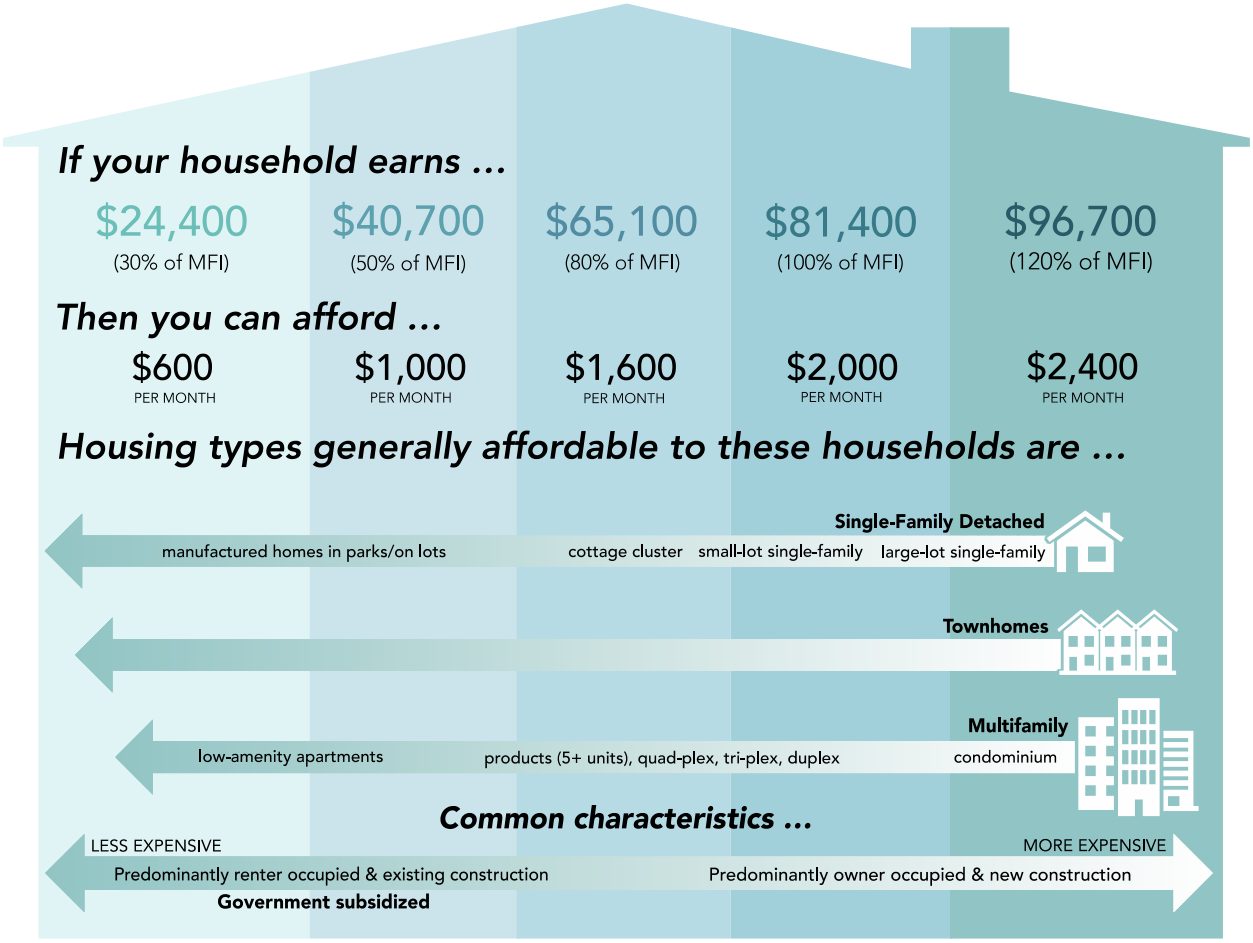
Exhibit 81. Types of Financially Attainable Housing by Median Family Income (MFI) for Washington County ($81,400), Tualatin, 2018

Source: U.S. Department of Housing and Urban Development, Washington County, 2018.



While Exhibit 63 presented a distribution of home sale prices in Tualatin from homes sold in 2017—2018, Exhibit 82 presents a distribution of home sale prices by affordability range for Tualatin in 2016—2018. Most housing sold in Tualatin in 2016, 2017, 2018 these years were affordable to households earning between 150% and 200% of the Median Family Income (MFI), or a household income of about $122,100 to $162,800. If housing prices continue to rise as they have in Exhibit 82, Tualatin may need to consider policies to support development of housing affordable for homeownership for households earning 80% to 150% of MFI, such as allowing smaller lot and smaller unit single-family detached housing or townhouses or policies to lower the costs of housing development such as SDC waivers or other financial support for development of housing affordable for homeownership.

Exhibit 82. Distribution of Home Sale Prices by Affordability Range, Tualatin, 2016, 2017, 2018
Source: RLIS. Note: 2018 data is through September 2018.

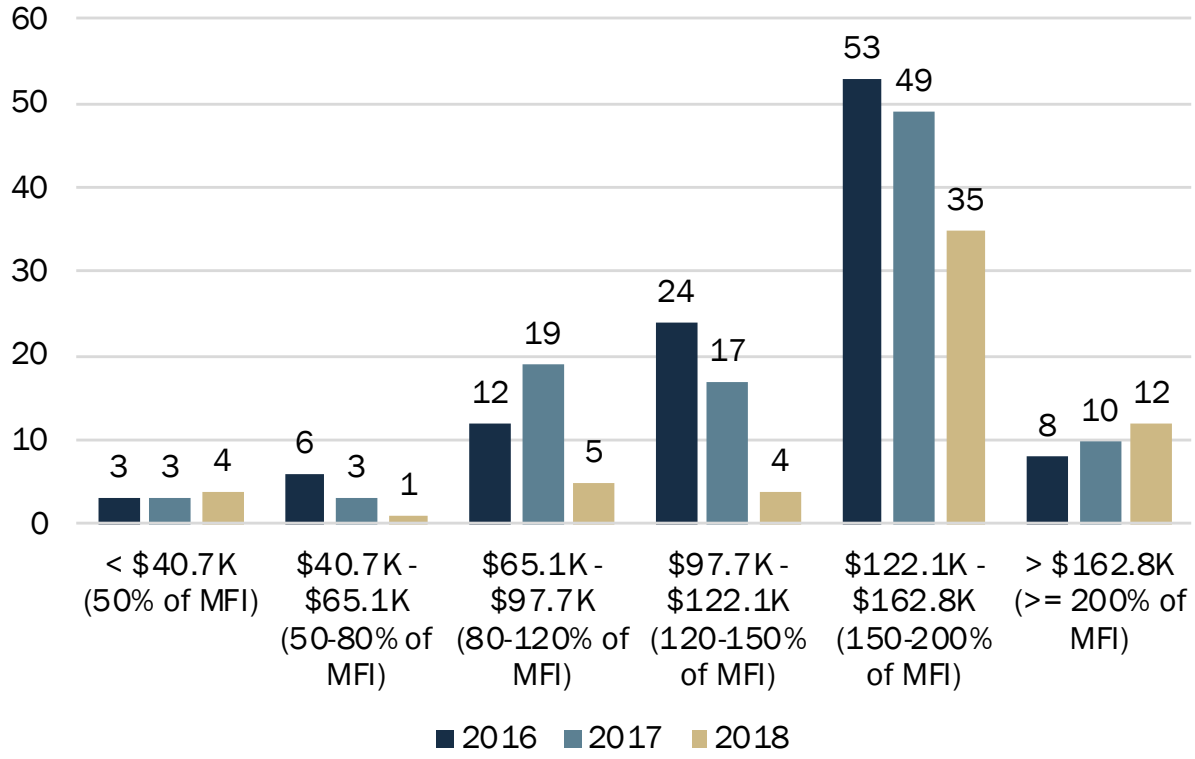


Exhibit 83 compares the number of households by income with the number of units affordable to those households in Tualatin. Tualatin currently has a deficit of housing affordable to households earning less than $35,000. The types of housing that Tualatin has a deficit of are more affordable housing types such as: government-subsidized housing, multifamily products, and more affordable single-family homes (e.g. tiny homes, cottages, manufactured housing). Tualatin also shows a need for higher amenity housing types for households earning more than $150,000 per year or more. Higher amenity housing types include single-family detached housing, single-family attached housing (e.g. townhomes and rowhouses), and higher-end multifamily products (including condominiums).

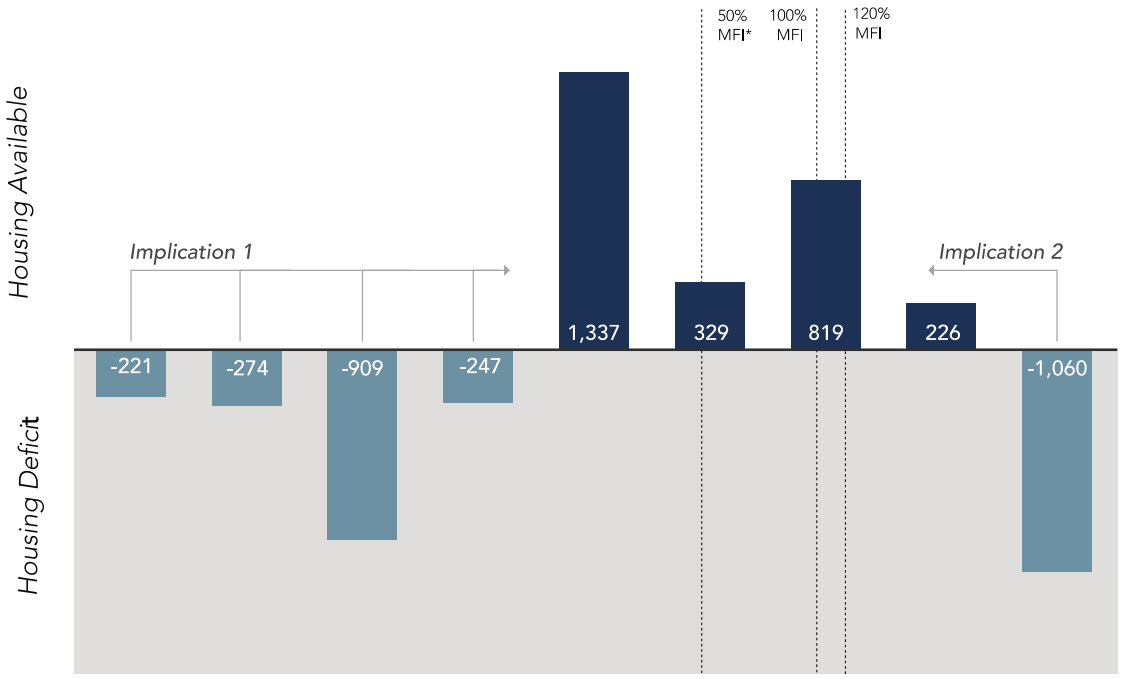
Exhibit 83. Affordable Housing Costs and Units by Income Level, Tualatin, 2018

Source: U.S. Census Bureau, 2013-2017 ACS. *Note: MFI is Median Family Income, determined by HUD for the Portland MSA. Portland MSA's MFI in 2018 was $81,400.*



Household Income	Less than $10,000	$10,000–$14,999	$15,000–$24,999	$25,000–$34,999	$35,000–$49,999	$50,000–$74,999	$75,000–$99,999	$100,000–$149,999	$150,000 or more
# Households	375	368	1,008	1,014	1,146	1,677	1,094	2,172	1,989

Share of Units in each Income Category	1%	1%	1%	7%	23%	18%	18%	22%	9%

*Median Family Income for a family of four.

Implication 1

Some lower-income households live in housing that is more expensive than they can afford because affordable housing is not available. These households are cost burdened.

Implication 2

Some higher-income households choose housing that costs less than they can afford. This may be the result of the household's preference or it may be the result of a lack of higher-cost and higher-amenity housing that would better suit their preferences.

Exhibit 58 shows that 7% of the people who work in Tualatin also live in Tualatin. One of the key questions for Tualatin is whether people who work at businesses in Tualatin can afford housing in Tualatin.

Tualatin has 0.7 residents for every job (Exhibit 84).[42] In comparison, Washington County has 1.6 residents for every job and the Portland Region (Clackamas, Multnomah, and Washington County) has 1.4 residents for every job. The large number of jobs relative to the number of residents in Tualatin was an important part of the discussion in the development of the Housing Needs Analysis, with concerns focusing on the impacts of commuting on Tualatin's transportation system and negative impacts on quality of life in Tualatin (such as heavy traffic congestion).

Tualatin has more jobs per capita than Washington County and the Portland Region.

Exhibit 84. Ratio of Residents to Jobs, Tualatin, 2017
Source: Bureau of Labor Services, Quarterly Census of Employment and Wages.

	Employees	Residents	Residents for every Job
Tualatin	38,838	26,960	0.7
Washington County	595,860	337,127	1.6
Portland Region	1,811,860	1,259,773	1.4

Exhibit 85 shows affordable housing costs for workers at businesses in Tualatin. For example, a household with one individual employed in furniture manufacturing (earning about $39,000 per year) can afford neither the average multifamily rents in Tualatin ($1,220 per month) nor the median housing sale price in Tualatin (about $480,000 as of February 2019) is affordable.

However, Exhibit 85 reflects housing affordability costs for one worker per household. This analysis recognizes that most multi-person households have more than one person employed, and many have dual incomes. According to Census and Oregon Employment Department data, Washington County and Tualatin both have about 1.4 jobs per household, including both full-time and part-time jobs. This shows that most multi-person households in Tualatin have more than one worker. **It is not necessarily reasonable to expect one worker to be able to afford housing costs in Tualatin alone (or any other city in the Portland region), given the prevalence of dual-income households.**

[42] Ratios rely on population estimates from Portland State University's Population Research Center (2017) and Bureau of Economic Analysis (2017).

Exhibit 85. Housing affordability for workers at existing jobs in Tualatin, 2017

Summary of the Factors Affecting Tualatin's Housing Needs

The purpose of the analysis thus far has been to provide background on the kinds of factors that influence housing choice. While the number and interrelationships among these factors ensure that generalizations about housing choice are difficult to make and prone to inaccuracies, it is a crucial step to informing the types of housing that will be needed in the future.

There is no question that age affects housing type and tenure. Mobility, the ability to move freely and easily from one community to another, is substantially higher for people aged 20 to 34. People in that age group will also have, on average, less income than people who are older and they are less likely to have children. These factors mean that younger households are much more likely to be renters, and renters are more likely to be in multifamily housing.

The data illustrates what more detailed research has shown and what most people understand intuitively: life cycle and housing choice interact in ways that are predictable in the aggregate; age of the household head is correlated with household size and income; household size and age of household head affect housing preferences; and income affects the ability of a household to afford a preferred housing type. The connection between socioeconomic and demographic factors and housing choice is often described informally by giving names to households with certain combinations of characteristics: the "traditional family," the "never-marrieds," the "dinks" (dual-income, no kids), and the "empty-nesters."[43] Thus, simply looking at the long wave of demographic trends can provide good information for estimating future housing demand.

[43] See *Planning for Residential Growth: A Workbook for Oregon's Urban Areas* (June 1997).

Still, one is ultimately left with the need to make a qualitative assessment of the future housing market. The following is a discussion of how demographic and housing trends are likely to affect housing in Tualatin over the next 20 years:

- **Growth in housing will be driven by growth in households.** Households in Tualatin's city limits are forecast to grow from 10,791 households to 11,362 households, an increase of 571 households between 2020 and 2040.[44] In that same time, households in Basalt Creek are forecast to grow from 203 households to 646 households, an increase of 443 households. Together, Tualatin city limits and Basalt Creek will grow by 1,014 households between 2020 and 2040. Tualatin is planning for 1,014 new dwelling units to meet the needs of its forecasted new households.
- **Housing affordability is a growing challenge in Tualatin.** It is a challenge in most of the region in general, and Tualatin is affected by these regional trends. Housing prices are increasing faster than incomes in Tualatin and Washington County, which is consistent with state and national challenges. Tualatin has a large share of multifamily housing (about 41% of the City's housing stock), but over half of renter households are cost burdened. Tualatin's key challenge over the next 20 years is providing opportunities for development of relatively affordable housing of all types, such as lower-cost single-family housing, townhouses and duplexes, market-rate multifamily housing, and government-subsidized affordable housing.
- **Without substantial changes in housing policy, on average, future housing will look a lot like past housing.** That is the assumption that underlies any trend forecast, and one that is important when trying to address demand for new housing.

  The City's residential policies can impact the amount of change in Tualatin's housing market, to some degree. If the City adopts policies to increase opportunities to build smaller-scale single-family and multifamily housing types (particularly single-family attached that is comparatively affordable to moderate-income households), a larger percentage of new housing developed over the next 20 years in Tualatin may begin to address the city's needs. Examples of policies that the City could adopt to achieve this outcome include: allowing a wider range of housing types (e.g., duplex or townhouses) in single-family zones, ensuring that there is sufficient land zoned to allow single-family attached and multifamily housing development, supporting development of government-assisted affordable housing, and encouraging multifamily residential development in downtown. The degree of change in Tualatin's housing market, however, will depend on market demand for these types of housing in Washington County.
- **If the future differs from the past, it is likely to move in the direction, on average, of smaller units and more diverse housing types.** Most of the evidence suggests that the bulk of the change will be in the direction of smaller average house and lot sizes for

[44] This forecast is based on Metro's 2040 *Population Distributed Forecast* (2016) for Tualatin from 2015 (extrapolated to 2020) to 2040 period, shown in Exhibit 31.

single-family housing. This includes providing opportunities for development of smaller single-family detached homes, townhomes, and multifamily housing.

Key demographic and economic trends that will affect Tualatin's future housing needs are: (1) the aging of the Baby Boomers, (2) the aging of the Millennials, and (3) the continued growth in Latinx population.

- *The Baby Boomer's population is continuing to age.* By 2040, people 60 years and older will account for 24% of the population in Washington County (up from 20% in 2020). The changes that affect Tualatin's housing demand as the population ages are that household sizes and homeownership rates decrease. The majority of Baby Boomers are expected to remain in their homes as long as possible, downsizing or moving when illness or other issues cause them to move. Demand for specialized senior housing, such as age-restricted housing or housing in a continuum of care from independent living to nursing home care, may grow in Tualatin.
- *Millennials will continue to form households and make a variety of housing choices.* As Millennials age and form households, generally speaking, their household sizes will increase, and their homeownership rates will peak by about age 55. Between 2020 and 2040, Millennials (and the generation after) will be a key driver in demand for housing for families with children. The ability to attract Millennials will depend on the City's availability of affordable renter and ownership housing. It will also depend on the location of new housing in Tualatin as many Millennials prefer to live in more urban environments.[45] The decline in homeownership among the Millennial generation has more to do with financial barriers rather than the preference to rent.[46]

- *Latinx population will continue to grow.* The U.S. Census projects that by about 2040, the Latinx population will account for one-quarter of the nation's population. The share of Latinx population in the Western U.S. is likely to be higher. The Latinx population currently accounts for about 16% of Tualatin's population. In addition, the Latinx population is generally younger than the U.S. average, with many Latinx people belonging to the Millennial generation.

  The Latinx population growth will be an important driver in growth of housing demand, both for owner- and renter-occupied housing. Growth in the Latinx population will drive demand for housing for families with children. Given the lower income for Latinx households, especially first-generation immigrants,

[45] Choi, Hyun June; Zhu, Jun; Goodman, Laurie; Ganesh, Bhargavi; Strochak, Sarah. (2018). Millennial Homeownership, Why is it So Low, and How Can We Increase It? Urban Institute. https://www.urban.org/research/publication/millennial-homeownership/view/full_report

[46] Ibid.

growth in this group will also drive demand for affordable housing, both for ownership and renting.[47]

In summary, an aging population, increasing housing costs (although lower than the Region), housing affordability concerns for Millennials and the Latinx populations, and other variables are factors that support the conclusion of need for a broader array of housing choices. Growth of retirees will drive demand for small single-family detached houses and townhomes for homeownership, townhome and multifamily rentals, age-restricted housing, and assisted-living facilities. Growth in Millennials and Latinx populations will drive demand for affordable housing types, including demand for affordable single-family units (many of which may be ownership units), for affordable multifamily units (many of which may be rental units), and for dwellings with a larger number of bedrooms.

- **No amount of analysis is likely to make the distant future completely certain: the purpose of the housing forecasting in this study is to get an approximate idea about the future (so policy choices can be made today).** Economic forecasters regard any economic forecast more than three (or at most five) years out as highly speculative. At one year, one is protected from being disastrously wrong by the sheer inertia of the economic machine. A variety of factors or events could, however, cause growth forecasts to be substantially different.

[47] The following articles describe housing preferences and household income trends for Latinx families, including differences in income levels for first, second, and third generation households. In short, Latinx households have lower median incomes than the national averages. First and second generation Latinx households have median incomes below the average for all Latinx households. Latinx households have a strong preference for homeownership, but availability of mortgages and availability of affordable housing are key barriers to homeownership for this group.

5. Housing Need in Tualatin

Project New Housing Units Needed in the Next 20 Years

The results of the housing needs analysis are based on: (1) Metro's official household forecast for growth in Tualatin over the 20-year planning period, (2) information about Tualatin's housing market relative to Washington County and the Portland Region, and (3) the demographic composition of Tualatin's existing population and expected long-term changes in the demographics of Washington County.

Forecast for Housing Growth

A 20-year household forecast (in this instance for 2020 to 2040) is the foundation for estimating needed new dwelling units. The forecast for Tualatin is based on Metro's 2040 Household Distributed Forecast, 2016 and Metro's 2040 TAZ Forecast for households, 2015. Tualatin city limits will grow from 10,994 households in 2020[48] to 12,008 households in 2040, an increase of 1,014 households.[49]

To accommodate new households, Exhibit 87 shows that Tualatin will have demand for 1,014 new dwelling units over the 20-year period, with an annual average of 51 dwelling units.

Exhibit 87. Forecast of demand for new dwelling units, Tualatin Planning Area (city limits and Basalt Creek), 2020 to 2040

Source: Metro's *2040 Household Distributed Forecast*, July 12, 2016. Metro's 2040 TAZ Forecast for households, November 6, 2015. Calculations by ECONorthwest. Note: DU is dwelling unit.

Variable	New DU City Limits	New DU Basalt Creek	New DU Tualatin Planning Area
Household Forecast 2020	10,791	203	10,994
Household Forecast 2040	11,362	646	12,008
Total New Dwelling Units (2020-2040)	**571**	**443**	**1,014**
Annual Average of New Dwelling Units	**29**	**22**	**51**

[48] Metro's *2040 Household Distributed Forecast* shows that in 2015, the Tualatin city limits had 10,653 households. The Metro forecast shows Tualatin growing to 11,362 households in 2040, an average annual growth rate of 0.26% for the 25-year period. Using this growth rate, ECONorthwest extrapolated the forecast to 2020 (10,791 households).

In addition, ECONorthwest included the forecast for new households in the Basalt Creek Planning Area. The forecast for households in Basalt Creek derive from Metro's 2040 TAZ Forecast for households (TAZ 980 and 981). The Metro forecast shows Basalt Creek growing to 646 households in 2040, an average annual growth rate of 5.96% for the 25-year period. Using this growth rate, ECONorthwest extrapolated the forecast from 2015 (152 households) to 2020 (203 households).

[49] This forecast is based on Tualatin city limits' official household forecast from Metro for the 2020 to 2040 period.

Housing Units Needed Over the Next 20 Years

Exhibit 87 presents a forecast of new housing in Tualatin for the 2020 to 2040 period. This section determines the needed mix and density for the development of new housing developed over this 20-year period in Tualatin.

Exhibit 89 shows that over the next 20-years, the need for new housing developed in Tualatin will generally include a wider range of housing types across the affordability spectrum. This conclusion is consistent with housing need in other in the Portland Region and most cities across the State. This conclusion is based on the following information, found in Chapter 3 and 4 of this report.

- Tualatin's housing mix is predominately single-family detached and multifamily. In the 2013-2017 period, 53% of Tualatin's housing was single-family detached, 41% was multifamily, and 6% was single-family attached. In comparison, the mix of housing for the entire Portland Region was 63% single-family detached, 32% multifamily, and 5% single-family attached.
- Demographic changes across the Portland Region (and in Tualatin) suggest increases in demand for single-family attached housing and multifamily housing. The key demographic trends that will affect Tualatin's future housing needs are the aging of the Baby Boomers, household formation of Millennial households, and growth of Latinx households.
- Tualatin households have incomes about the same as those for the Portland Region. Tualatin's median household income was $72,580, about $1,500 lower than Washington County's median. Approximately 36% of Tualatin households earn less than $50,000 per year, compared to 33% in Washington County and 37% in the Portland Region.
- About 37% of Tualatin's households are cost burdened (paying 30% or more of their household income on housing costs), compared to 42% of households in the Portland Region and 34% in Washington County.[50] About 56% of Tualatin's renters are cost burdened and about 22% of Tualatin's homeowners are cost burdened.
- About 45% of Tualatin's households are renters, 82% of whom live in multifamily housing. Median rents in Tualatin are $1,154 per month, compared to the $1,183 median rent for Washington County as a whole.

  A household earning 60% of Tualatin's median household income ($43,548) could afford about $1,089 per month in rent. A household with median income in Tualatin ($72,580) could afford $1,815 rent per month, compared with the median gross rent of $1,154. About 41% of Tualatin's housing stock is multifamily, compared to 32% of the housing in the Portland Region.

[50] The Department of Housing and Urban Development's guidelines indicate that households paying more than 30% of their income on housing experience "cost burden," and households paying more than 50% of their income on housing experience "severe cost burden."

- Housing sales prices increased in Tualatin over the last four years. From February 2015 to February 2019, the median housing sale price increased by $160,000 (50%), from $320,000 to $480,000. A household would need to earn $120,000 to $160,000 to afford the median sales price in Tualatin. About 36% of Tualatin's households have incomes at or above this amount.
- Tualatin needs more affordable housing types for homeowners and renters. A household earning 100% of Tualatin's median household income of $72,580 could afford about $1,815 per month in rent, compared with the median gross rent of about $1,154. This household could afford to own a home roughly valued between $254,000 and $290,000, which is less than the median home sales price of about $480,000 in Tualatin.[51]

  While a household could begin to afford Tualatin's median rents at about 65% of Tualatin's median household income, the rates of cost burden among renters suggest that Tualatin does not have a sufficient number of affordable rental units. A household can start to afford median home sale prices at about 190% of Tualatin's median household income.

These factors suggest that Tualatin needs a broader range of housing types with a wider range of price points than are currently available in Tualatin's housing stock. This includes providing opportunity for development of housing types such as: single-family detached housing (e.g., small homes like cottages or small-lot detached units, traditional detached homes, and high-amenity detached homes), townhouses, and multifamily products (duplexes, triplexes, quadplexes, and apartments and condominiums).

Tualatin evaluated several scenarios to forecast housing growth (Exhibit 88). The scenario selected, and described below, was a combination between Scenario 2 and Scenario 3 (referred to here as Scenario 4). Scenario 4 was 40% single-family detached, 15% multifamily, and 45% multifamily.

[51] In 2016, 2017, and 2018, 19 homes in Tualatin sold within the $254,000 and $290,000 price range (out of 268 homes).

Exhibit 88. Forecast of demand for new dwelling units, Tualatin Planning Area (city limits and Basalt Creek), 2020 to 2040
Source: Calculations by ECONorthwest. Note: DU is dwelling unit.

Variable	Mix of New Dwelling Units (2020-2040)			
	Scenario 1	Scenario 2	Scenario 3	Scenairo 4

Percent multifamily	41%	45%	50%	45%
Total new multifamily	416	456	507	456
equals Total new dwelling units (2020-2040)	**1,014**	**1,014**	**1,014**	**1,014**

Exhibit 89 shows the final forecast for housing growth in the Tualatin city limits during the 2020 to 2040 period. The projection is based on the following assumptions:

- Tualatin's official forecast for population growth shows that the city will add 1,014 households over the 20-year period. Exhibit 89 shows Metro's forecast for growth of 1,014 new dwelling units over the 20-year planning period.
- The assumptions about the mix of housing in Exhibit 89 are consistent with the requirements of OAR 660-007[52]:
  - **About 40% of new housing will be single-family detached**, a category which includes manufactured housing. In 2013-2017, 53% of Tualatin's housing was single-family detached.
  - **Nearly 15% of new housing will be single-family attached.** In 2013-2017, 6% of Tualatin's housing was single-family attached.
  - **About 45% of new housing will be multifamily**. In 2013-2017, 41% of Tualatin's housing was multifamily.

[52] OAR 660-007-0030(1) requires that most Metro cities "…provide the opportunity for at least 50 percent of new residential units to be attached single family housing or multiple family housing…"

Tualatin will have demand for 1,014 new dwelling units over the 20-year period, 40% of which will be single-family detached housing.

Total new multifamily	456
equals Total new dwelling units (2020-2040)	**1,014**

The forecast of new units does not include dwellings that will be demolished and replaced. This analysis does not factor those units in; however, it assumes they will be replaced at the same site and will not create additional demand for residential land.

Exhibit 90 allocates needed housing to Plan Designations in Tualatin. The allocation is based, in part, on the types of housing allowed in the zoning designations in each Plan Designation.

Exhibit 90 shows:

- **Low Residential (RL)** land will accommodate single-family detached housing, including manufactured houses. Low density will also accommodate duplexes, triplexes, quadplexes, cottage clusters, and townhouses based on the requirements of House Bill 2001.
- **Medium Low Residential (RML)** land will accommodate duplexes, townhomes (or rowhouses), and manufactured homes in manufactured housing parks. For consistency with the housing types allowed in Low Residential, this analysis assumes that RML will also allow triplexes and quadplexes.
- **Medium High Residential (RMH)** land will accommodate duplexes, townhomes (or rowhouses), and multifamily housing.
- **High Density Residential (RH)** land will accommodate duplexes, townhomes (or rowhouses), and multifamily housing.
- **High Density High Rise Residential (RH-HR)** land will accommodate duplexes, townhomes (or rowhouses), and multifamily housing.

Exhibit 90. Allocation of needed housing by housing type and Plan Designation, Tualatin Planning Area, 2020 to 2040
Source: ECONorthwest.

Housing Type	Residential Plan Designations					Total
	Low Density	Medium Low Density	Medium High Density	High Density	High High-Rise	
Dwelling Units

Single-family attached	3%	4%	2%	6%	0%	15%
Multifamily	3%	3%	10%	19%	10%	45%
Total	46%	7%	12%	25%	10%	100%

Exhibit 91 presents assumptions about future housing density based on historical densities in Tualatin shown in Exhibit 18. Exhibit 91 converts between net acres and gross acres[53] to account for land needed for rights-of-way by Plan Designation in Tualatin, based on Metro's methodology of existing rights-of-way.[54]

- **Low Residential (RL):** Average density in this Plan Designation was historically 5.7 dwelling units per gross acre in tax lots smaller than 0.38 acres and no land is needed for rights-of-ways based on Metro's assumptions. For lots between 0.38 and 1.0 acres the future density will be 5.1 dwelling units per gross acre, and for lots larger than 1.0 acres the future density will be 4.6 dwelling units per gross acre.
- **Medium Low Residential (RML):** Average density in this Plan Designation was historically 11.7 dwelling units per gross acre in tax lots smaller than 0.38 acres and no land is needed for rights-of-ways based on Metro's assumptions. For lots between 0.38 and 1.0 acres the future density will be 10.5 dwelling units per gross acre, and for lots larger than 1.0 acres the future density will be 9.5 dwelling units per gross acre.
- **Medium High Residential (RMH):** Average density in this Plan Designation was historically 16.1 dwelling units per gross acre in tax lots smaller than 0.38 acres and no land is needed for rights-of-ways based on Metro's assumptions. For lots between 0.38

[53] OAR 660-024-0010(6) uses the following definition of net buildable acre. "Net Buildable Acre" "…consists of 43,560 square feet of residentially designated buildable land after excluding future rights-of-way for streets and roads." While the administrative rule does not include a definition of a gross buildable acre, using the definition above, a gross buildable acre will include areas used for rights-of-way for streets and roads. Areas used for rights-of-way are considered unbuildable.

[54] Metro's methodology about net-to-gross assumptions are that: (1) tax lots under 3/8 acre assume 0% set aside for future streets; (2) tax lots between 3/8 acre and 1 acre assume a 10% set aside for future streets; and (3) tax lots greater than an acre assumes an 18.5% set aside for future streets. The analysis assumes an 18.5% assumption for future streets.

and 1.0 acres the future density will be 14.5 dwelling units per gross acre, and for lots larger than 1.0 acres the future density will be 13.1 dwelling units per gross acre.

- **High Density Residential (RH):** Average density in this Plan Designation was historically 20.5 dwelling units per gross acre in tax lots smaller than 0.38 acres and no land is needed for rights-of-ways based on Metro's assumptions. For lots between 0.38 and 1.0 acres the future density will be 18.4 dwelling units per gross acre and, for lots larger than 1.0 acres the future density will be 16.7 dwelling units per gross acre.
- **High Density High Rise Residential (RH-HR):** Average density in this Plan Designation was historically 28.0 dwelling units per gross acre in tax lots smaller than 0.38 acres and no land is needed for rights-of-ways based on Metro's assumptions. For lots between 0.38 and 1.0 acres the future density will be 15.2 dwelling units per gross acre, and for lots larger than 1.0 acres the future density will be 22.8 dwelling units per gross acre.

Exhibit 91. Assumed future density of housing built in the Tualatin Planning Area, 2020 to 2040
Source: ECONorthwest. *Note: DU is dwelling unit.*

Residential Plan Designations	Tax Lots Smaller than 0.38 acre			Tax Lots > 0.38 and < 1.0 acre			Tax Lots larger than 1.0 acre		
	Net Density (DU/net acre)	% for Rights-of-Way	Gross Density (DU/gross acre)	Net Density (DU/net acre)	% for Rights-of-Way	Gross Density (DU/gross acre)	Net Density (DU/net acre)	% for Rights-of-Way	Gross Density (DU/gross acre)
Low Density	5.7	0%	5.7	5.7	10%	5.1	5.7	18.5%	4.6
Medium Low Density	11.7	0%	11.7	11.7	10%	10.5	11.7	18.5%	9.5
Medium High Density	16.1	0%	16.1	16.1	10%	14.5	16.1	18.5%	13.1
High Density	20.5	0%	20.5	20.5	10%	18.4	20.5	18.5%	16.7
High Density / High-Rise	28.0	0%	28.0	28.0	10%	25.2	28.0	18.5%	22.8

Through the Housing Strategy, Tualatin may consider increasing densities in specific zones. For example, the City may consider increasing the allowed densities in High Density / High-Rise (and adjusting related zoning standards, such as building heights) to allow higher density multifamily housing than is currently allowed in Tualatin.

Needed Housing by Income Level

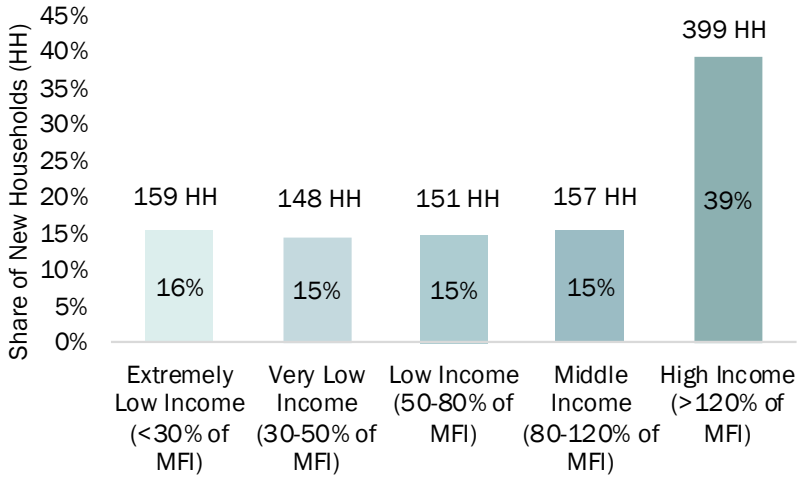
The next step in the housing needs analysis is to develop an estimate of need for housing by income and housing type. This analysis requires an estimate of the income distribution of current and future households in the community. Estimates presented in this section are based on (1) secondary data from the Census, and (2) analysis by ECONorthwest.

The analysis in Exhibit 92 is based on American Community Survey data about income levels for existing households in Tualatin. Income is categorized into market segments consistent with HUD income level categories, using Washington County's 2018 Median Family Income (MFI) of $81,400. The Exhibit is based on existing household income distribution, assuming that approximately the same percentage of households will be in each market segment in the future.

About a third of Tualatin's future households are forecast to be extremely or very low income and nearly 40% are forecast to have high incomes.

Exhibit 92. Future (New) Households, by Median Family Income (MFI) for Washington County ($69,600), Tualatin Planning Area, 2018

Source: U.S. Department of Housing and Urban Development, Washington County, 2018. U.S. Census Bureau, 2013-2017 ACS Table 19001.



Need for Government-Assisted and Manufactured Housing

ORS 197.303, 197.307, 197.312, and 197.314 requires cities to plan for government-assisted housing, manufactured housing on lots, and manufactured housing in parks.

- **Government-assisted housing.** Government subsidies can apply to all housing types (e.g., single-family detached, apartments, etc.). Tualatin allows development of government-assisted housing in all residential Plan Designations, with the same development standards for market-rate housing. This analysis assumes that Tualatin will continue to allow government housing in all of its residential Plan Designations. Because government assisted housing is similar in character to other housing (with the exception being the subsidies), it is not necessary to develop separate forecasts for government-subsidized housing.
- **Farmworker housing.** Farmworker housing can apply to all housing types and the City allows development of farmworker housing in all residential Plan Designations, with the same development standards as market-rate housing. This analysis assumes that Tualatin will continue to allow this housing in all of its residential Plan Designations. Because it is similar in character to other housing (with the possible exception of government subsidies, if population restricted), it is not necessary to develop separate forecasts for farmworker housing.
- **Manufactured housing on lots.** Tualatin allows manufactured homes on lots in Low Density Residential zones.
- **Manufactured housing in parks.** Tualatin allows manufactured homes in parks in Medium Low Density zones. According to the Oregon Housing and Community Services' Manufactured Dwelling Park Directory,[55] Tualatin has two manufactured home parks with 178 spaces.
- ORS 197.480(2) requires Tualatin to project need for mobile home or manufactured dwelling parks based on: (1) population projections, (2) household income levels, (3) housing market trends, and (4) an inventory of manufactured dwelling parks sited in areas planned and zoned or generally used for commercial, industrial, or high density residential.
    - Exhibit 87 shows that Tualatin will grow by 1,014 dwelling units over the 2020 to 2040 period.
    - Analysis of housing affordability shows that about 31% of Tualatin's new households will be considered very low or extremely low income, earning 50% or less of the region's median family income. One type of housing affordable to these households is manufactured housing.

[55] Oregon Housing and Community Services, Oregon Manufactured Dwelling Park Directory, http://o.hcs.state.or.us/MDPCRParks/ParkDirQuery.jsp

- Manufactured homes in manufactured housing parks accounts for about 2% (about 178 dwelling units) of Tualatin's current housing stock.
- National, state, and regional trends since 2000 showed that manufactured housing parks are closing, rather than being created. For example, between 2000 and 2015, Oregon had 68 manufactured parks close, with more than 2,700 spaces. Discussions with several stakeholders familiar with manufactured home park trends suggest that over the same period, few to no new manufactured home parks have opened in Oregon.
- The households most likely to live in manufactured homes in parks are those with incomes between $24,420 and $40,700 (30% to 50% of MFI), which include 15% of Tualatin's households. However, households in other income categories may live in manufactured homes in parks.

  Manufactured home subdivision development is an allowed use in the Medium Low Density Plan Designation. The national and state trends of closure of manufactured home parks, and the fact that no new manufactured home parks have opened in Oregon in over the last 15 years, demonstrate that development of new manufactured home parks or subdivisions in Tualatin is unlikely.

  Our conclusion from this analysis is that development of new manufactured home parks or subdivisions in Tualatin over the 2020 to 2040 planning period is unlikely, although manufactured homes may continue to locate on lots in the Low Density Plan Designation. The forecast of housing assumes that no new manufactured home parks will be opened in Tualatin over the 2020 to 2040 period. The forecast for new dwelling units includes new manufactured homes on lots in the category of single-family detached housing.
- Over the next 20 years (or longer) one or both of Tualatin's manufactured housing parks may close. This may be a result of the manufactured home park landowners selling or redeveloping their land for uses with higher rates of return, rather than lack of demand for spaces in manufactured home parks. Manufactured home parks contribute to the supply of low-cost affordable housing options, especially for affordable homeownership.

  While there is statewide regulation of the closure of manufactured home parks designed to lessen the financial difficulties of this closure for park residents,[56] the City has a role to play in ensuring that there are opportunities for housing for the displaced residents. The City's primary roles are to ensure that there is sufficient land zoned for new multifamily housing and to reduce barriers to residential

[56] ORS 90.645 regulates rules about closure of manufactured dwelling parks. It requires that the landlord must do the following for manufactured dwelling park tenants before closure of the park: give at least one year's notice of park closure, pay the tenant between $5,000 to $9,000 for each manufactured dwelling park space, and cannot charge tenants for demolition costs of abandoned manufactured homes.

development to allow for development of new, relatively affordable housing (i.e. housing affordable to households earning less than 80% of MFI and especially those earning less than 60% of MFI). The City may use a range of policies to encourage development of relatively affordable housing, such as allowing a wider range of moderate density housing (e.g., duplexes or cottages) in Low Density Plan Designation, removing barriers to multifamily housing development, using tax credits to support affordable housing production, developing an inclusionary zoning policy, or partnering with a developer of government-subsidized affordable housing.

6. Residential Land Sufficiency within Tualatin

This chapter presents an evaluation of the sufficiency of vacant residential land in Tualatin to accommodate expected residential growth over the 2020 to 2040 period. This chapter includes an estimate of residential development capacity (measured in new dwelling units) and an estimate of Tualatin's ability to accommodate needed new housing units for the 2020 to 2040 period, based on the analysis in the housing needs analysis. The chapter ends with a discussion of the conclusions and recommendations for the housing needs analysis.

Capacity Analysis

The buildable lands inventory summarized in Chapter 2 (and presented in full in Appendix A) provides a *supply* analysis (buildable land by type), and Chapter 5 provided a *demand* analysis (population and growth leading to demand for more residential development). The comparison of supply and demand allows the determination of land sufficiency.

There are two ways to calculate estimates of supply and demand into common units of measurement to allow their comparison: (1) housing demand can be converted into acres, or (2) residential land supply can be converted into dwelling units. A complication of either approach is that not all land has the same characteristics. Factors such as zone, slope, parcel size, and shape can affect the ability of land to accommodate housing. Methods that recognize this fact are more robust and produce more realistic results. This analysis uses the second approach: it estimates the ability of vacant residential lands within the UGB to accommodate new housing. This analysis, sometimes called a "capacity analysis,"[57] can be used to evaluate different ways that vacant residential land may build out by applying different assumptions.

[57] There is ambiguity in the term *capacity analysis*. It would not be unreasonable for one to say that the "capacity" of vacant land is the maximum number of dwellings that could be built based on density limits defined legally by plan designation or zoning, and that development usually occurs—for physical and market reasons—at something less than full capacity. For that reason, we have used the longer phrase to describe our analysis: "estimating how many new dwelling units the vacant residential land in the UGB is likely to accommodate." That phrase is, however, cumbersome, and it is common in Oregon and elsewhere to refer to that type of analysis as "capacity analysis," so we use that shorthand occasionally in this memorandum.

Tualatin Capacity Analysis Results

The capacity analysis estimates the development potential of vacant residential land to accommodate new housing, based on the needed densities shown in Exhibit 91. Exhibit 95 shows that **Tualatin city limit's** (Exhibit 93) **and Basalt Creek's** (Exhibit 94) **buildable land has capacity to accommodate approximately 1,207 new dwelling units**, based on the following assumptions:

- **Buildable residential land.** The capacity estimates start with the number of buildable acres in residential Plan Designations, per the buildable lands inventory, for city limits. It starts with the number of buildable acres in residential Plan Designations, per the Basalt Creek Concept Plan, for Basalt Creek.
- **Needed densities.** The capacity analysis assumes development will occur at assumed future densities. Those densities were derived from the densities shown in Exhibit 91.
- **Average net density.** Exhibit 93 shows capacity and densities in gross acres. OAR 660-007 requires that Tualatin provide opportunity for development of housing at an overall average density of eight dwelling units per net acre. The average density of dwelling units in Exhibit 93 is 7.9 dwelling units per net acre and 6.7 dwelling units per gross acre. The average net density of dwelling units in Exhibit 95 is approximately 7.9 dwelling units per net acres and 6.6 dwelling units per gross acre.

Exhibit 93. Estimate of residential capacity on unconstrained vacant and partially vacant buildable land, Tualatin City Limits, 2018

Source: Buildable Lands Inventory; Calculations by ECONorthwest. *Note: DU is dwelling unit.*

Residential Plan Designations	Tax Lots Smaller than 0.38 acre			Tax Lots > 0.38 and < 1.0 acre			Tax Lots larger than 1.0 acre			Total, combined	
	Buildable Acres	Density Assumption (DU/gross acre)	Capacity (Dwelling Units)	Buildable Acres	Density Assumption (DU/gross acre)	Capacity (Dwelling Units)	Buildable Acres	Density Assumption (DU/gross acre)	Capacity (Dwelling Units)	Buildable Acres	Capacity (Dwelling Units)
Low Density	18	5.7	100	17	5.1	85	44	4.6	204	79	389
Medium Low Density	0	11.7	5	1	10.5	7	0	9.5	-	1	12
Medium High Density	0	16.1	-	0	14.5	-	1	13.1	13	1	13
High Density	0	20.5	6	0	18.4	7	12	16.7	205	13	218
High High-Rise	0	28.0	-	0	25.2	-	0	22.8	-	0	-
Total	18	-	111	18	-	99	58	-	422	94	632

Exhibit 94. Estimate of residential capacity on unconstrained vacant and partially vacant buildable land, Basalt Creek, 2018

Source: *Basalt Creek Concept Plan. Note: this table uses the Basalt Creek Concept Plan's estimate for capacity and of buildable land; it does not rely on historic net densities by Plan Designation to calculate capacity on buildable lands. Historic net densities in Basalt Creek were not increased as they were in the estimate of capacity for Tualatin city limits. The amount of buildable land in Exhibit 90 is based on the Basalt Creek Concept Plan and is different than the amount of buildable land shown in* Exhibit 7*of the Buildable Lands Inventory.*

Residential Plan Designations	Dwelling Units	Buildable Acres from Basalt Creek Concept Plan	Density Assumption (DU per Gross Acre)
Low Density	134	24.8	5.4
Medium Low Density	374	59.8	6.3
High Density	67	3.4	19.9
Total	575	88	6.5

Exhibit 95. Estimate of residential capacity on unconstrained vacant and partially vacant buildable land, Tualatin Planning Area, 2018

Source: Buildable Lands Inventory; Calculations by ECONorthwest. *Note1: DU is dwelling unit. Note2: Capacity in Basalt Creek uses the Basalt Creek Concept Plan's estimate of capacity (*Exhibit 94*).*

Residential Plan Designations	Dwelling Units		
	Capacity (in City Limits)	Capacity (in Basalt Creek Concept Plan)	Capacity (Total)
Low Density	389	134	523
Medium Low Density	12	374	386
Medium High Density	13	-	13
High Density	218	67	285
High Density / High-Rise	-	-	-
Total	632	575	1,207

The amount of buildable land in Basalt Creek in the BLI (Exhibit 7) is more than the amount of buildable land from the Basalt Creek Concept Plan (Exhibit 94). The reason for the difference in capacity is primarily differences in assumptions about land constraints to development of vacant land. The Concept Plan assumed that more land would have soft constraints (that would decrease development capacity) and be unbuildable than the buildable lands inventory for this analysis.

Exhibit 96 shows an estimate of the additional capacity for development in Basalt Creek, if buildout occurs at densities consistent with development in Tualatin (the densities shown in Exhibit 91) and the amount of buildable land is consistent with the buildable lands inventory in this report (Exhibit 7). Under those conditions, Basalt Creek has capacity for 1,339 dwelling units, which is 764 dwelling units beyond the capacity in the Basalt Creek Concept Plan.

Exhibit 96. Estimate of additional residential capacity on unconstrained vacant and partially vacant buildable land, Basalt Creek, 2018

Source: Buildable Lands Inventory; Calculations by ECONorthwest. *Note: DU is dwelling unit.*

Residential Plan Designations	Capacity for Dwelling Units (using BLI)	Capacity for Dwelling Units (using Concept Plan)	Additional Capacity Potentially Available
Low Density	433	134	299
Medium Low Density	804	374	430
High Density	102	67	35
Total	1,339	575	764

Residential Land Sufficiency

The next step in the analysis of the sufficiency of residential land within Tualatin is to compare the demand for housing by Plan Designation (Exhibit 90) with the capacity of land by Plan Designation (Exhibit 95), which does **not** include the potential additional capacity in Basalt Creek discussed in Exhibit 96.

Exhibit 97 shows that Tualatin has sufficient land to accommodate development in the Low Density Plan Designation, Medium Low Density Plan Designation, and High Density Plan Designation – with a surplus of capacity for 57 dwelling units, 315 dwelling units, and 31 dwelling units respectively. Tualatin has a deficit of capacity for 109 dwelling units in the Medium High Plan Designation and a deficit of capacity for 101 dwelling units in the High Density High-Rise Plan Designation. **The land sufficiency results *are* inclusive of capacity of land in Basalt Creek but *are not* inclusive of capacity which may become available as redevelopment occurs.**

Exhibit 97. Comparison of capacity of existing residential land with demand for new dwelling units and land surplus or deficit, Tualatin City Limits and Basalt Creek, 2020 to 2040
Source: Buildable Lands Inventory; Calculations by ECONorthwest. *Note: DU is dwelling unit.*

Residential Plan Designations	Capacity (Dwelling Units)	Demand for New Housing	Remaining Capacity (Supply minus Demand)	Land Surplus or (Deficit) *Gross Acres*
Low Density	523	466	57	10
Medium Low Density	386	71	315	27
Medium High Density	13	122	(109)	(7)
High Density	285	254	31	2
High Density High-Rise	-	101	(101)	(4)

Tualatin's surplus of Low Density Residential capacity (57 dwelling units) means that the City has an approximate surplus of 10 gross acres of Low Density land (at 5.7 dwelling units per gross acre). Tualatin's surplus of Medium Low Density Residential capacity (315 dwelling units) means that the City has an approximate surplus of 27 gross acres of Medium Low Density land (at 11.7 dwelling units per gross acre).[58] Tualatin's surplus of High Density Residential capacity (31 dwelling units) means that the City has an approximate surplus of two gross acres of High Density Land (at 20.5 dwelling units per gross acre).

This estimate of capacity does **not** include the potential additional capacity in Basalt Creek, shown in Exhibit 96. If Basalt Creek builds out with more housing than shown in the Concept Plan (shown in Exhibit 94), then Tualatin has about 764 dwelling units of additional capacity, all in Low Density, Medium Low Density, and High Density Plan Designations.

[58] This estimate of land is approximate, as densities in Medium Low Density may range from 11.7 to 9.5 dwelling units per gross acre depending on parcel size, as shown in Exhibit 91.

Conclusions and Recommendations

The key findings of the Tualatin Housing Needs Analysis are that:

- **Growth in housing will be driven by growth in households.** Households in Tualatin's city limits is forecast to grow from 10,791 households to 11,362 households, an increase of 571 households between 2020 and 2040. In that same time, households in Basalt Creek are forecast to grow from 203 households to 646 households, an increase of 443 households.
- **To accommodate households in Tualatin city limits and Basalt Creek, Tualatin is planning for 1,014 new dwelling units.** To accommodate the 1,014 dwelling units over the 20-year planning period, Tualatin will average 51 new dwelling units annually.
- **Tualatin will plan for more single-family attached and multifamily dwelling units in the future to meet the City's housing needs.** Historically, about 53% of Tualatin's housing was single-family detached. New housing in Tualatin is forecast to be 40% single-family detached, 15% single-family attached, and 45% multifamily.
    - The factors driving the shift in types of housing needed in Tualatin include changes in demographics and decreases in housing affordability. The aging of senior populations and the household formation of young adults will drive demand for renter- and owner-occupied housing, such as small single-family detached housing, townhouses, duplexes, and apartments / condominiums. Both groups may prefer housing in walkable neighborhoods, with access to services.
    - Tualatin's existing deficit of housing that is affordable for low- and high-income households indicates a need for a wider range of housing types, for renters and homeowners. About 37% of Tualatin's households have affordability problems, including a cost burden rate of 56% for renter households.
    - Without diversification of housing types, lack of affordability will continue to be a problem, possibly growing in the future if incomes continue to grow at a slower rate than housing costs. Under the current conditions, 307 of the forecasted new households will have incomes of $40,700 (in 2018 dollars) or less (50% of MFI income or less). These households cannot afford market rate housing without government subsidy. Another 151 new households will have incomes between $40,700 and $65,120 (50% to 80% of MFI). These households will all need access to affordable housing, such as the housing types described above.
- **Tualatin cannot accommodate all of its housing needs.** Tualatin has a deficit of land in the Medium High Density and High Density High Rise Plan Designations, of 7 acres and 4 acres respectively. The deficits shown in Exhibit 97 may be addressed in multiple ways, such as by re-zoning land, increasing densities allowed in Plan Designations with deficits, or by accommodating housing in Plan Designations with surpluses.

- **Tualatin will need to meet the requirements of House Bill 2001.** The Legislature passed House Bill 2001 in the 2019 Legislative session. The bill requires cities within the Metro UGB to allow "middle" housing types in low-density residential zones. The bill defines middle housing types as: duplexes, triplexes, quadplexes, cottage clusters, and townhouses. To comply with House Bill 2001, Tualatin will need to:
  - Allow cottage cluster as a housing type in the Residential Low Density zone. Tualatin may want to allow cottage cluster housing in the Medium-Low Density and Medium-High Density zones. Tualatin will also need to include development standards in the Tualatin Development Code.
  - Allow duplexes, townhouses, and multifamily housing as a permitted use in the Residential Low Density zone.

Following is a summary of ECONorthwest's recommendations to Tualatin based on the analysis and conclusions in this report. The *Tualatin Housing Strategy* memorandum presents the full list of recommendations for Tualatin.

- **Ensure an adequate supply of land that is available and serviceable.** Tualatin should evaluate opportunities to increase residential development densities by modifying the Development Code, such as increasing densities and height limits in higher density zones. Tualatin should identify opportunities to re-zone land, from lower density usage to higher density usage, to provide additional opportunities for multifamily housing development. Tualatin should plan for long-term development of housing in Tualatin through 2040 and beyond by working with Metro on upcoming Growth Management reports.
- **Encourage development of a wider variety of housing types.** Tualatin should allow duplexes, triplexes, quadplexes, cottage clusters, and townhouses in the Residential Low Density zone and allow cottage cluster housing in the Medium-Low Density and Medium-High Density zones (which already allow for the other housing types mentioned). These changes should be made in a way that makes the City's zoning code compliant with House Bill 2001.
- **Support development and preservation of housing that is affordable for all households.** The City should develop policies to support development of housing affordable to people who live and work in Tualatin. The City should identify opportunities to leverage resources (including funding) from the Metro Bond to support development of housing affordable to households earning less than 60% of Median Family Income in Washington County ($48,900 for a household size of four people). The City should develop policies to prevent and address homelessness, as well as to prevent and mitigate residential displacement resulting from redevelopment and increases in housing costs. These actions will require Tualatin to evaluate adoption of a wide variety of housing policies such as creative financing opportunities for systems development charges, evaluating tax exemption programs, participating in a land bank, and other approaches to supporting development of housing affordable at all income levels.

- **Identify funding tools to support residential development.** The City should evaluate tools such as establishing a new Urban Renewal District and evaluate establishing a construction excise tax.
- **Identify redevelopment opportunities.** The City should identify districts within Tualatin with opportunities for redevelopment for both housing and employment uses, as well as supporting redevelopment of underutilized commercial buildings for housing.
- **Ensure there are connections between planning for housing and other community planning**. Throughout the project, stakeholders emphasized the need to coordinate housing planning with economic development planning, transportation planning, and other community planning. Updates to the Tualatin Transportation System Plan should be coordinated with planning for housing growth. A key approach to accommodating new residential development is redevelopment that results in mixed-use districts, providing opportunities for more housing affordable to people working at businesses in Tualatin and living closer to work (thus reducing transportation issues). In addition, stakeholders would like to see the incorporation of services needed to meet daily needs of residents of neighborhoods without driving.

The *Tualatin Housing Strategy* memorandum presents more details about each of these topics and recommendations for specific actions to implement these recommendations.

Appendix A – Residential Buildable Lands Inventory

The general structure of the standard method BLI analysis is based on the DLCD HB 2709 workbook "*Planning for Residential Growth – A Workbook for Oregon's Urban Areas*," which specifically addresses residential lands.[59] The steps and sub-steps in the supply inventory are:

1. Calculate the gross vacant acres by plan designation, including fully vacant and partially vacant parcels.

2. Calculate gross buildable vacant acres by plan designation by subtracting unbuildable acres from total acres.

3. Calculate net buildable acres by plan designation, subtracting land for future public facilities from gross buildable vacant acres.

4. Calculate total net buildable acres by plan designation by adding redevelopable acres to net buildable acres.

The methods used for this study are consistent with many others completed by ECONorthwest that have been acknowledged by DLCD and LCDC.

Overview of the Methodology

The BLI for Tualatin is based on the data and methods used by Metro. In addition, ECONorthwest's approach updated Metro's results to account for new development (the Metro 2018 UGR is based on 2016 data) and other potential local conditions, such as unique environmental constraints.

Study Area

The BLI for Tualatin includes all residential land designated in the comprehensive plans within city limits and designated planning areas (referred to as Tualatin Planning Area). ECONorthwest used the most recent tax lot shapefile from Metro's Regional Land Information System (RLIS) for the analysis.

Inventory Steps

The BLI consisted of several steps:

1. Generating UGB "land base"
2. Classifying land by development status

[59] We note that Newberg is not required to comply with ORS 197.296.

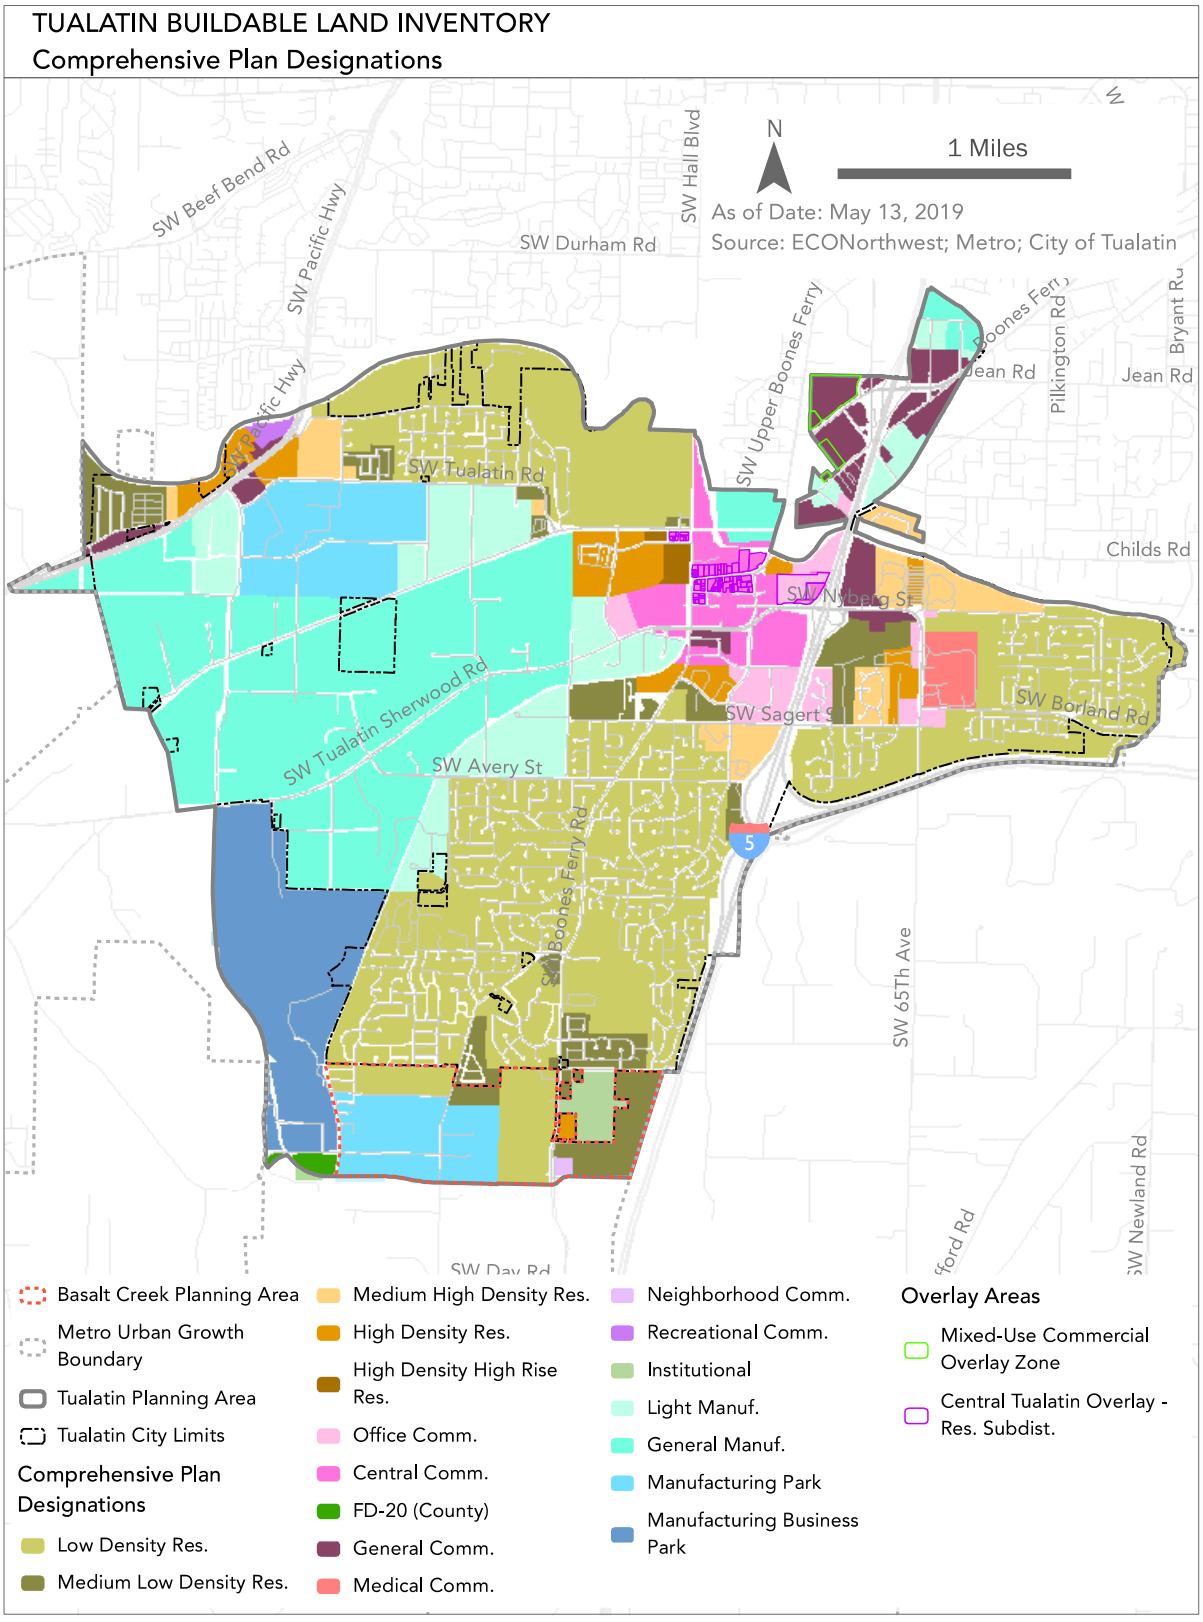
3. Identify constraints
4. Verify inventory results
5. Tabulate and map results

Step 1: Generate "land base."

Per Goal 10 this involves selecting all of the tax lots with residential and other non-employment Plan Designations where residential uses are planned for and allowed by the implementing zones. The City provided ECO with their Comprehensive Plan GIS files and indicated what designations should be included within the inventory.

Exhibit 98 (on the following page) shows Comprehensive Plan designations for the City of Tualatin. This BLI includes lands in the Low Density Residential, Medium Low Density Residential, Medium High Density Residential, High Density Residential, and High Density High Rise Residential Plan Designations. The BLI also includes areas that allow residential use in the Basalt Creek Planning Area, Mixed-Use Commercial Overlay Zone, and Central Tualatin Overlay.

Exhibit 98. Comprehensive Plan Designations, Tualatin Planning Area, 2019



Step 2: Classify lands.

In this step, ECONorthwest classified each tax lot with a plan designation that allows residential uses into one of four mutually exclusive categories based on development status:

- Vacant
- Partially Vacant
- Public or Exempt
- Developed

ECONorthwest used the classification determined through Metro's model: Vacant, Ignore, and Developed. In addition, ECO included a new classification for partially vacant lots. The definitions for each classification are listed below.

Development Status	Definition	Statutory Authority
Vacant	Tax lots designated as vacant by Metro based on the following criteria: 1) Fully vacant based on Metro aerial photo 2) Tax lots with less than 2,000 square feet developed AND developed area is less than 10% of lot 3) Lots 95% or more vacant from GIS vacant land inventory	OAR 660-008-0006(2) "Buildable Land" means residentially designated land within the urban growth boundary, including both vacant and developed land likely to be redeveloped, that is suitable, available and necessary for residential uses.
Partially Vacant	Single-family tax lots that are 2.5 times larger than the minimum lot size and a building value less than $300,000 **or** lots that are 5 times larger than the minimum lots size (no threshold for building value). These lots are considered to still have residential capacity. For this analysis, we are classifying these lots as Partially Vacant. We assume that 0.25 acres of the lot is developed, and the remaining land is available for development, less constraints.	OAR 660-008-0006(2)
Ignore (Public or Exempt uses)	Lands in public or semi-public ownership are considered unavailable for residential development. This includes lands in Federal, State, County, or City ownership as well as lands owned by churches and other semi-public organizations and properties with conservation easements. These lands are identified using the Metro's definitions and categories.	OAR 660-008-0005(2) - Publicly owned land is generally not considered available for residential uses.
Developed	Lands not classified as vacant, partially vacant, or public/exempt are considered developed. Developed land includes lots with redevelopment capacity, which are also included in BLI. The unit capacity of developed but redevelopable lots is based on Metro's estimates.	OAR 660-008-0006(2) "Buildable Land" means residentially designated land within the urban growth boundary, including both vacant and developed land likely to be redeveloped, that is suitable, available and necessary for residential uses.

Step 3: Identify constraints

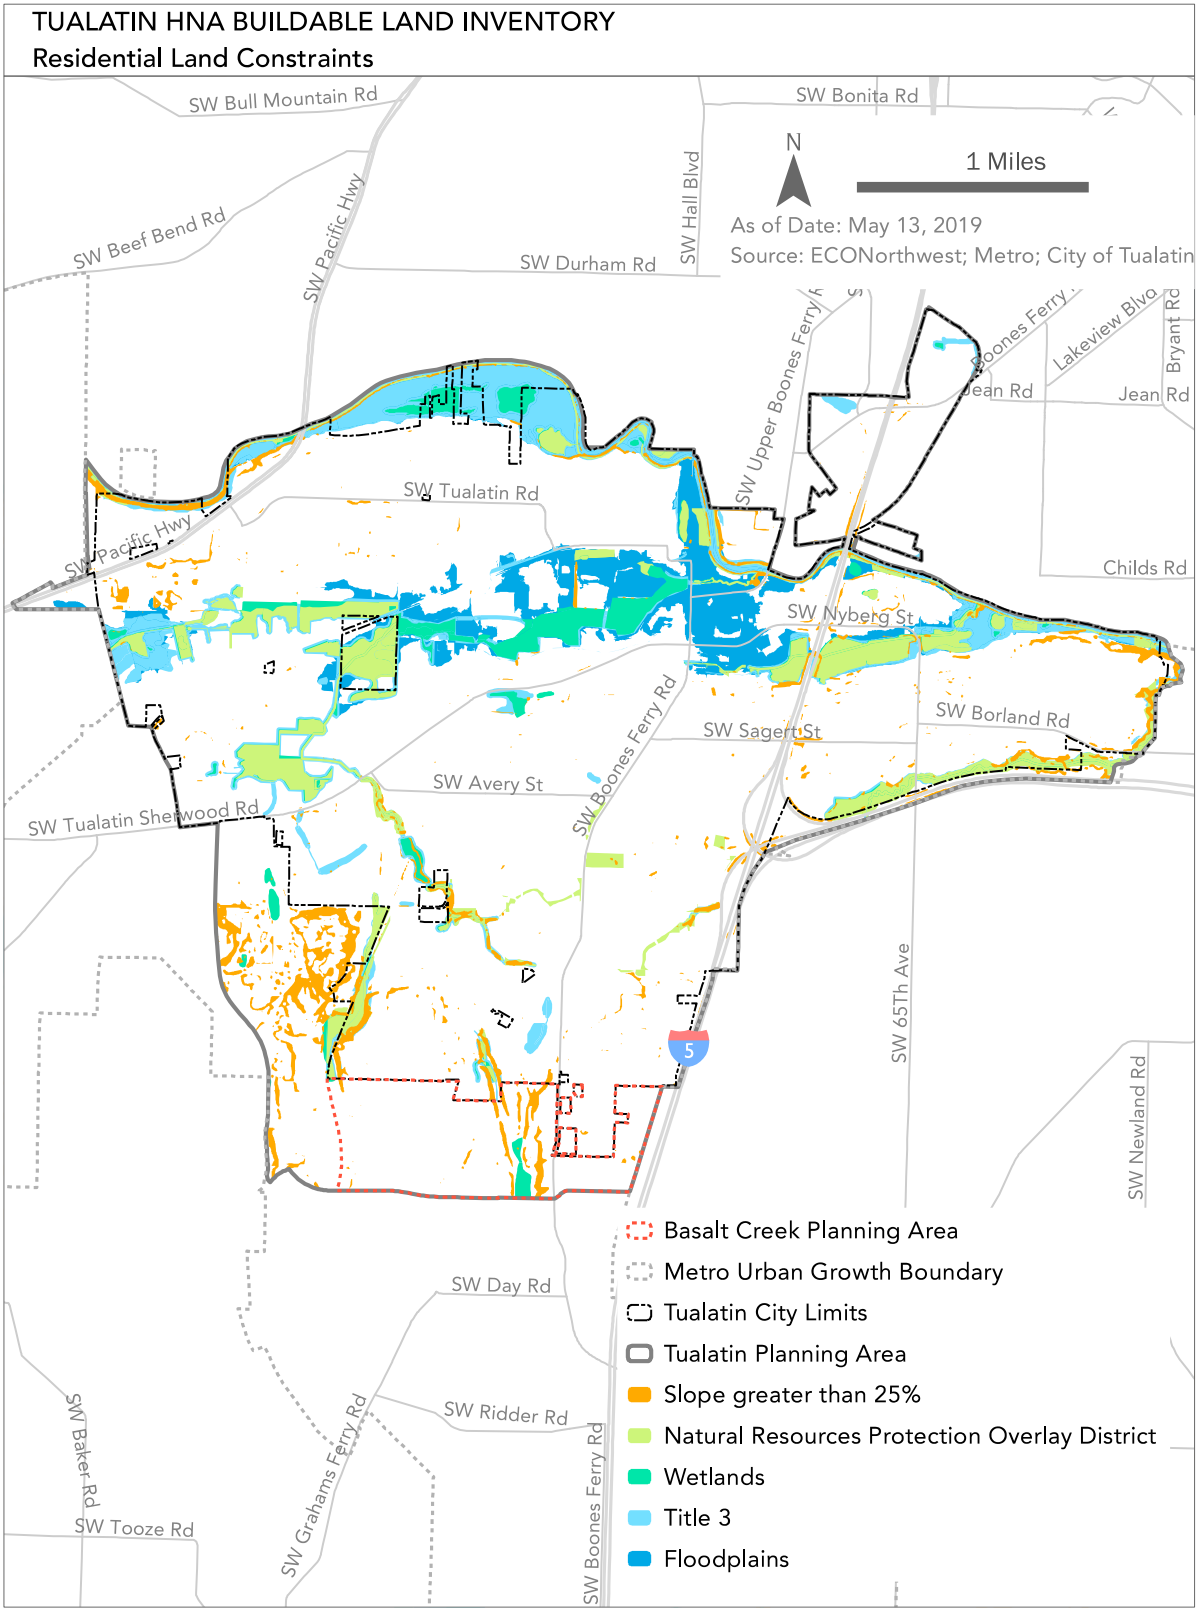
Consistent with OAR 660-008-0005(2) guidance on residential buildable lands inventories, ECO deducted certain lands with development constraints from vacant lands. We used some of the constraints established in Metro's methodology, with modifications to fit local considerations in Tualatin. These constraints are summarized in the table below.

Constraint	Statutory Authority	Threshold
Goal 5 Natural Resource Constraints		
Natural Resources Protection Overlay District	OAR 660-008-0005(2)	Areas in the NRPOD
Riparian Corridors	OAR 660-015-0000(5)	Areas protected by the Stream and Floodplain Plan
Wetlands		
Natural Hazard Constraints		
100 Year Floodplain	OAR 660-008-0005(2	Lands within FEMA FIRM 100-year floodplain
Steep Slopes	OAR 660-008-0005(2	Slopes greater than 25%

The lack of access to water, sewer, power, road or other key infrastructure cannot be considered a prohibitive constraint unless it is an extreme condition. This is because tax lots that are currently unserviced could potentially become serviced over the 20-year planning period.

Exhibit 99 maps the development constraints used for the residential BLI.

Exhibit 99. Development Constraints, Tualatin Planning Area, 2019



Step 4: Verification

ECO used a multi-step verification process. The first verification step will included a "rapid visual assessment" of land classifications using GIS and recent aerial photos. The rapid visual assessment involves reviewing classifications overlaid on recent aerial photographs to verify uses on the ground. ECO reviewed all tax lots included in the inventory using the rapid visual assessment methodology. The second round of verification involved City staff verifying the rapid visual assessment output. ECO amended the BLI based on City staff review and comments, particularly related to vacant land developed since 2016.

Step 5: Tabulation and mapping

The results are presented in tabular and map format. The Tualatin Residential BLI includes all residential land designated in the Comprehensive Plan within the Tualatin Planning Area. From a practical perspective, this means that ECONorthwest inventoried all lands within tax lots identified by Metro that fall within the Tualatin Planning Area. The inventory then builds from the tax lot-level database to estimates of buildable land by Plan Designation.

Executive Summary

This report presents a housing production strategy (HPS) for the City of Tualatin. A housing production strategy is intended to include goals and strategic actions to work together to achieve equitable outcomes for all residents of Tualatin, with an emphasis on improving outcomes for underserved communities, people with lower incomes, and people in state and federal protected classes.[1] This report is intended to meet the requirements of OAR 660-008, as described within the report.

The HPS is intended to address the housing needs identified in the *Tualatin Housing Needs Analysis* (HNA) in 2019, which concluded that Tualatin has very limited land to accommodate future housing growth and that housing needs are changing as a result of demographic changes and need for affordable housing. Specifically, the HNA concluded:

- **Tualatin is forecasted to increase its housing by about 1,014 new dwelling units between 2020 and 2040.**
- **Changes in demographic characteristics will drive need for new housing.** The HNA forecast that Tualatin would need more attached and multifamily housing in the future than the current housing stock provides. The factors driving the shift in types of housing needed in Tualatin include changes in demographics, such as growing senior populations, and the household formation of young adults.

  Tualatin has an existing deficit of housing that is affordable to low and moderate-income households and is likely to have similar future deficits. Tualatin's existing deficit of housing to meet the needs of extremely low to low-income households indicates a need for subsidized affordable housing for renters and affordable homeownership. Moderate income households may benefit from a wider range of housing types, but housing types alone do not necessarily bring the cost down for renters or homeowners. Without the types of solutions proposed in this report, lack of affordability will continue to be a problem and will possibly grow, in the future, if incomes continue to grow at a slower rate than housing costs.
- **Tualatin has a limited amount of vacant, unconstrained buildable residential land, particularly for higher-density multifamily housing.** Tualatin has about 244 acres of vacant, unconstrained buildable land. About 64% of vacant land is in Low Density Residential, 29% is in Medium Low Density Residential, and 8% of land in areas that allow higher-density multifamily housing such as Medium High Density, High Density, High Density High-Rise, and commercial area.

[1] Federal protected classes include race, color, national origin, gender, familial status, and disability. Oregon's additional protected classes include marital status, source of income, sexual orientation, and status as a domestic violence survivor. Under Fair Housing laws, it is illegal to deny access to housing based on the characteristics of people within these protected classes.

- **Tualatin cannot accommodate all of its housing needs on existing vacant land.** Tualatin has a land deficit of seven acres and four acres in the Medium High Density and High Density High Rise Plan Designations, of 7 acres and 4 acres respectively.

The HPS is intended to establish a framework for the evaluation and potential development of policies and strategic actions that address the housing needs described above over a six-year period. Key findings of the HPS are that Tualatin needs:

- **Increased housing diversity.** Nearly two-thirds of Tualatin's housing stock is single-family detached housing. The City's demographic and socioeconomic characteristics suggest a need for a wide variety of housing types to meet the needs of a growing and diverse pool of existing and future residents.
- **Greater housing affordability and availability for homeowners.** Tualatin's homeownership stayed static from 2000 to 2017 at about 55%, however, it was lower than Washington County's (61%) and the Portland Region's (60%) homeownership rate. These statistics highlight a potential need for greater homeownership opportunities as homeownership continues to be one of the most effective (and primary ways) for households and individuals to build wealth.
- **Greater housing affordability and availability for renters.** Competition for lower-priced affordable units in Tualatin is strong and many cannot afford these rents or housing sales prices without cost burdening themselves. In the 2013-2017 period, about 56% of Tualatin's renters were cost burdened, with 26% severely cost burdened.[2] Renters, especially those with lower incomes, are at risk of being displaced through increases in rental costs.
- **Increased income-restricted regulated, emergency, and supportive housing.** Tualatin has about 604 rent-restricted affordable housing units (accounting for about 5% of Tualatin's housing stock) but has about 1,753 households experiencing severe housing cost burden in the city. Washington County has about 530 people experiencing homelessness, about 300 of whom are unsheltered. About 44 people experiencing homelessness are estimated to live in the Tualatin and Tigard area.
- **Need for housing for people to live and work in Tualatin.** Tualatin's Economic Opportunities Analysis report (December 2019) reported that 93% of people working in Tualatin lived in another community (such as Portland, Tigard, Beaverton, or Hillsboro) and commuted into Tualatin each day. Some people who work in Tualatin can afford rent or homeownership in Tualatin, but some would be cost burdened in Tualatin.

This analysis finds disproportionate housing needs for seniors, people of color, people with one or more disabilities, and people experiencing homelessness. Washington County's Consolidated

[2] A household is said to be cost burdened if they spend 30% or more of their gross income on housing costs. A household is said to be severely cost burdened if they spend 50% or more of their gross income on housing costs.

Plan identifies all of these groups as a priority with special housing needs. The following groups have greater-than-average housing needs:

- **Seniors.** People 65 years of age and older are disproportionally cost burdened compared to the average household—many living on fixed incomes in a region with increasing housing costs. Over the next twenty years, people over 65 years are expected to be the fastest-growing age group. As this group grows, Tualatin will need more housing that is affordable, physically accessible, and in proximity to needed services (such as nearby health care or in-home assistance). Seniors will also need improved access to housing without discrimination, especially seniors of color.
- **People of color.** About 25% of Tualatin's population identified as a person of color, who are more likely to be cost burdened when compared to the average household. Broadly, the housing needs for many people of color in Tualatin include improved access to affordable housing units, assistance to avoid displacement, access to housing in locations with "high opportunity" (such as areas near jobs, transit, or services), and access to housing without discrimination.
- **People with disabilities.** Across the Portland Region, people with one or more disabilities experience disproportionate cost burden. Housing needs of people with one or more disabilities vary by type of disability. But in general, housing needs include improved access to an affordable unit, improved physical access to housing units, access to housing with needed services, and access to housing without discrimination.
- **People experiencing homelessness.** People experiencing homelessness are disproportionately affected by the lack of affordable housing. Housing needs for people experiencing homelessness vary by reason for homelessness. In Washington County, the primary reason cited for experiencing homelessness was inability to afford housing. The broad housing needs for this group include the need for immediate assistance (e.g., rent support), permanent supportive housing (with services), and improved access to an affordable unit.

Summary of Goals and Strategic Actions

The HPS presents goals and strategic actions to address the housing needs described above. Implementation of the HPS is expected to occur over a six-year period. Each strategic action will require further consideration, such as additional analysis, engagement of consultants, changes to existing standards or programs, discussions with decision makers, or public hearings. The City may be unable to or not chose to implement some strategic actions because of new information that arises from a detailed evaluation of the specifics of each strategic action. In that case, the City may identify a different action (or actions) to meet the specific housing need addressed by the strategic action.

Exhibit 1 presents a summary of the goals and strategic actions and includes the following information:

- **Goal or strategic action.** This is either the text of the goal or a short summary of the strategic action. Chapter 3 of the report presents additional information about each goal and a description of each strategic action.
- **Incomes of populations served by each strategic action.** Income is based on Median Family Income (MFI) as defined by the US Department of Housing and Urban Services (HUD) for Washington County. The example below is for a family of four people. The HUD terms used to describe housing by income group are:
  - Extremely Low Income: Less than 30% MFI, $28,000 or less for a family of four
  - Very Low Income: 31% to 50% of MFI, $28,000 to $46,000 for a family of four
  - Low Income: 51% to 80% of MFI, $46,000 to $74,000 for a family of four
  - Moderate Income: 81% to 120% of MFI, $74,000 to $110,000 for a family of four
  - High Income: 121% of MFI or more, $110,000 or more for a family of four
- **Potential magnitude of the action for producing new housing.** This is an estimate of the amount of new housing that may be produced over the six-year period as a result of each strategic action. The magnitudes of impact are:
  - A **low** magnitude is anticipated production of 1% or less of the needed new units (1,014 units) or about 10 dwelling units over the six-year period. A low magnitude does not mean a strategic action is unimportant. Some strategic actions are necessary but not sufficient to produce new housing.
  - A **moderate** magnitude is anticipated production of 1% to 5% of the needed new units (1,014 units) or about 10 to 50 dwelling units over the six-year period.
  - A **high** magnitude is anticipated production of 5% or more of the needed new units (1,014 units) or 50 or more dwelling units over the six-year period.
- **Expected year of adoption.** The HPS will be implemented over a six-year period. Each strategic action will be evaluated, and if the City chooses to implement it, then it would be adopted or would have some other official acknowledgement that the City is going to execute the strategic action.

Exhibit 1. Summary of Goals and Strategic Actions

Goal and Strategic Actions	Income Levels Served (MFI)	Magnitude of Impact	Expected Year of Adoption
1. Affordable Housing: Strongly prioritize, encourage, and support affordable rental housing development to increase affordable housing for households earning 0-60% Median Family Income.			
1.a Evaluate a Low-Income Housing Property Tax Exemption Program for Affordable Rental Housing	0-60%	Moderate	2023
1.b Evaluate Changes to Systems Development Charges	0-80%	Low	2026
1.c Evaluate Implementation of a Construction Excise Tax (CET)	Mostly 0-60% Possibly 61-80%	Moderate	2025
1.d Evaluate Support for Affordable and Workforce Rental Housing as part of Urban Renewal	0-80%	Moderate to large	2022
1.e Evaluate Financial Resources for Local Contributions to Affordable Housing Development	0-60%	Moderate	2026
1.f Evaluate Buildable or Redevelopable Public and Institutional Land Potentially Suitable for Affordable Housing	0-60%	Moderate	2023
1.g Evaluate Development Code Changes to Allow and Support Other Affordable Rental Housing Types in Tualatin	0-80%	Indirect, low	2024
1.h Evaluate Municipal Code, Development Code, Public Works Construction Code, and Building Code Processes to Make Building Affordable Housing Easier	0-60%	Low	2024
2. Affordable Homeownership: Encourage and support affordable homeownership to create opportunities for wealth creation.			
2.a Evaluate Impediments to Homeownership and Their Removal	0-120%	Indirect, low	2024
2.b Partner to Encourage Education about Homeownership Opportunities	0-120%	Low to moderate	2022
2.c Partner with Organizations that Develop Affordable Ownership Housing	0-80%	Low to moderate	2023
2.d Evaluate Development Code to Encourage Diverse Housing Types for Affordable Homeownership	0-120%	Indirect, low	2024
3. Preservation of Regulated Affordable Housing: Preserve affordable housing to prevent the loss of existing affordable housing units and to prevent resident displacement.			
3.a Evaluate How to Support Preservation of Regulated Affordable Rental Housing	0-60%	Moderate	2025
3.b Evaluate Developing a Healthy Housing Initiative for Multifamily Housing	0-80%	Moderate to large	2024

Goal and Strategic Actions	Income Levels Served (MFI)	Magnitude of Impact	Expected Year of Adoption
4. Preservation of Naturally Occurring Affordable Housing (NOAH): Preserve naturally occurring affordable housing, where possible, to prevent loss of affordable units and to mitigate resident displacement.			
4.a Evaluate Development of Incentives to Preserve Low-Cost Rentals for Below-Market-Rate Privately Owned Rental Housing	0-80%	Moderate	2026
4.b Evaluate Using the Multiple Unit Property Tax Exemption to Slow Rental Cost Increases	0-80%	Moderate	2026
5. Housing for Underserved Communities: Implement housing policies, projects, programs, and partnerships to further support racial and social equity.			
5.a Consider Development of a Funding Action Plan to Implement the HPS with Attention to Equity	Emphasis on 120% and below	Indirect, large	2023
5.b Evaluate Impediments to Fair Housing to Create an Analysis of Impediments	All income groups	Moderate	2024
5.c Evaluate Ways to Best Ensure Opportunities for Education about Fair Housing Are Provided	All income groups	Moderate	No adoption needed
5.d Evaluate Strategies to Encourage Diverse Housing Types in High-Opportunity Neighborhoods	0-80%	Moderate	2024
6. Workforce Housing: Encourage, plan for, and support the development of workforce housing for households earning 61-80% Median Family Income for both owner and renter, in order to increase the jobs-housing balance, reduce commute time, and provide attainable housing for workers in Tualatin.			
6.a Evaluate Ways to Incentivize Inclusion of Workforce Housing Units within New Multifamily Rental Development	61-80%	Moderate	2026
6.b Evaluate Potential Partnerships with Employers on Employer-Assisted Housing	Less than 120%	Low to moderate	No adoption needed
6.c Evaluate City Partnership to Participate in a Land Bank	0-80%	Low to moderate	2024
7. Housing Stabilization: Prevent and address homelessness to provide safe living conditions for everyone living in Tualatin.			
7.a Evaluate Opportunities to Partner on a Local Rental and Utility Assistance Program	0-80%	Moderate	No adoption needed
7.b Evaluate Ways to Develop Housing Options and Services to Address and Prevent Houselessness	0-30%	Moderate	2026
8. Housing Rehabilitation: Plan for and support housing programs and initiatives that are responsive to the safety and health needs of households earning 0-80% of Median Family Income.			

Goal and Strategic Actions	Income Levels Served (MFI)	Magnitude of Impact	Expected Year of Adoption
8.a Evaluate Establishing Local Housing Rehabilitation Program	0-80%	Low to moderate	2026
8.b Evaluate the Implementation of a Healthy Housing Initiative for Single-Family Housing	0-80%	Moderate to large	2024
9. Accessible Design and Other Specialized Design: Encourage and support Universal Design, Lifelong Housing Certification, and other similar standards.			
9.a Evaluate the Development of Specialized Design Standards and Incentives to Accommodate Special Needs	For Standards: All income groups For Incentives: income qualifying level TBD.	Low	2024
10. Mixed-Use Housing and Redevelopment: Encourage and support development of mixed-use, mixed-income, and multifamily housing in commercial zones and urban renewal areas for households earning 0-80% Median Family Income.			
10.a Evaluate Redevelopment Opportunities for the Creation of Mixed-Use Development Districts to Support Development of Affordable Housing and Workforce Housing	0-80%	Large	2022
10.b Evaluate Opportunities for Conversion of Commercial Buildings to Residential Uses	0-80%	Low to moderate	2023
10.c Evaluate Opportunities to Rezone Land for Mixed-Use	All income groups	Large	2022
10.d Evaluate Establishing Incentives to Support Mixed-Use Development, such as the Vertical Housing Tax Abatement	Typically, over 80% unless affordable housing	Moderate	2023
11. Regulatory and Zoning Changes: Increase housing development opportunities through regulatory and zoning changes to accommodate a diverse range of housing types and price points to meet the housing needs in Tualatin.			
11.a Evaluate Updating Density Standards for Multifamily Housing in Medium-Density, High-Density, and Mixed-Use Zones	All income groups	Large	2022

Goal and Strategic Actions	Income Levels Served (MFI)	Magnitude of Impact	Expected Year of Adoption
11.b Evaluate Opportunities to Rezone Lower-Density Residential Land to Higher Density	All income groups	Moderate to large	2022
11.c Evaluate the Feasibility of Targeted Reductions to Off-Street Parking Requirements	All income levels	Moderate	2022
11.d Evaluate Updating Code to Allow Small Dwelling Unit Developments	Less than 100%	Low	2024
11.e Evaluate Adopting an Expedited Permitting Process for Affordable Rental Housing and Affordable Homeownership	0-80%	Low to moderate	2023
11.f Evaluate Providing Additional Engagement and Information to Developers of Affordable Housing	0-60%	Low to moderate	2022
12. Transportation and Public Infrastructure: Plan for and develop transportation and public infrastructure to support affordable housing, workforce housing, mixed-use housing, and mixed-income housing.			
12.a Evaluate Ways to Prioritize Capital Improvements Programming for Affordable and Workforce Housing	0-80%	Moderate	2023

1. Introduction

A Housing Production Strategy is intended to include goals and strategic actions to work together to achieve equitable outcomes for all residents of Tualatin, with an emphasis on improving outcomes for underserved communities, people with lower incomes, and people in state and federal protected classes. Fair housing law is intended to provide access to housing choice for everyone, free from discrimination. Federal protected classes are: race, color, national origin, gender, familial status, and disability. Oregon's additional protected classes are: marital status, source of income, sexual orientation, and status as a domestic violence survivor. Under Fair Housing laws, it is illegal to deny access to housing based on the characteristics of people within these protected classes.

The Tualatin Housing Production Strategy presents information about Tualatin's housing needs (including the housing needs of people disproportionately affected by insufficient access to affordable housing) and presents goals and strategic actions to address these housing needs. This report is intended to meet the requirements of OAR 660-008, which are presented below.

Background

Tualatin is a city with a unique role and location within the Portland Region. The city is located at the southern portion of the region, along Interstate 5 and very near the intersection of Interstate 5 and Interstate 205. Tualatin had about 27,200 residents in 2020 and approximately 40,500 employees at businesses located in Tualatin.[3] Commuting is common in the Portland Region and in Tualatin. In Tualatin, approximately 93% of working people commute out and 7% of working people who live in Tualatin also work in Tualatin.[4]

Tualatin completed the Tualatin Housing Needs Analysis (HNA) in 2019, which concluded that Tualatin has very limited land to accommodate future housing growth and that housing needs are changing as a result of demographic changes and the need for affordable housing.[5] Specifically, the analysis concluded:

- **Tualatin is forecasted to increase its housing by about 1,014 new dwelling units between 2020 and 2040.** This is anticipated to occur within the city limits (571 new households) and in the Basalt Creek Area (443 new households).

[3] The population estimate from the Portland State University Population Research Center Annual Population Estimate. The employment estimate is based on the Tualatin Economic Opportunities Analysis report.

[4] US Census Bureau, Census On the Map, 2015

[5] Throughout this report, we use information from the Tualatin Housing Needs Analysis report, which is largely based on information from the 2013-2017 US Census Bureau American Community Survey. We updated data about housing sales costs and rents, as they have changed meaningfully since completion of the Housing Needs Analysis. This report does not incorporate data specifically about the impacts of the COVID-19 pandemic on housing affordability because newer information is unavailable on a city level. It is reasonable to assume that, since completion of the HNA, more households are struggling to afford housing.

- **Changes in demographic characteristics will drive the need for new housing.** The HNA forecast that Tualatin would need more attached and multifamily housing in the future than the current housing stock provides. The HNA forecast that 40% of new housing would be single-family detached, 15% single-family attached, and 45% multifamily. The factors driving the shift in types of housing needed in Tualatin include changes in demographics. The aging of senior populations and the household formation of young adults will drive demand for renter and owner-occupied housing, such as small single-family detached housing, town houses, duplexes, and apartments/condominiums. Both groups may prefer housing in walkable neighborhoods with access to services.
- **Tualatin has an existing deficit of housing that is affordable to low and moderate-income households and is likely to have similar future deficits.** Tualatin's existing deficit of housing to meet the needs of extremely low to low-income households indicates a need for subsidized affordable housing for renters and affordable homeownership. Moderate income households may benefit from a wider range of housing types, but housing types alone do not necessarily bring the cost down for renters or homeowners. As of 2017, about 37% of Tualatin's households were cost burdened,[6] including a cost-burden rate of 56% for renter households. As the Tualatin HNA was completed prior to the occurrence of the Covid-19 pandemic in 2020-2021, and the data in this report is based largely on that HNA, it does not include cost-burden data for that more recent period. It is reasonable to assume that, since completion of the HNA, more households are struggling to afford housing.

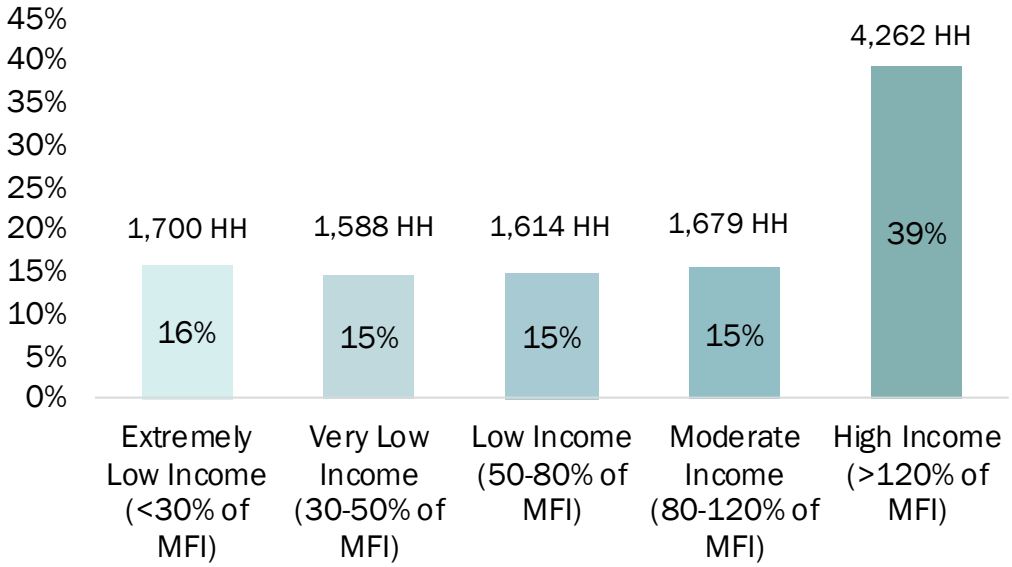
  Exhibit 2 shows that 31% of Tualatin's households had incomes less than 50% of MFI ($41,000) and cannot afford a two-bedroom apartment at Washington County's Fair Market Rent (FMR) of $1,330 in 2018.

[6] A household is considered cost burdened if they pay 30% or more of their gross income on housing costs, such as rent, selected utilities like electricity and heating, and mortgage/interest/insurance. A household is severely cost burdened if they spend 50% or more of their gross income on housing costs

Exhibit 2 Share of Households, by Median Family Income (MFI) for Washington County ($81,400), Tualatin, 2018

Source: US Department of Housing and Urban Development, Washington County, 2018. US Census Bureau, 2013-2017 ACS Table 19001.

Note: Exhibit 2 was based on information from Tualatin's Housing Needs Analysis, with corrections (to fix errors) to the number of existing dwelling units in each income category.



Without the types of solutions proposed in Chapter 3 of this report, lack of affordability will continue to be a problem and will possibly grow in the future if incomes continue to grow at a slower rate than housing costs. Under the current conditions, 307 of the forecasted new households will have incomes of $40,700 (in 2018 dollars) or less (50% of MFI income or less). These households cannot afford market-rate housing and have the largest unmet housing need. Another 151 new households will have incomes between $40,700 and $65,120 (51% to 80% of MFI). All tiers of low-income households need access to subsidized affordable housing or stable below-market-rate housing to be able to afford housing.

- **Tualatin has a limited amount of vacant, unconstrained buildable residential land, particularly for higher-density multifamily housing.** Tualatin has about 244 acres of buildable, unconstrained vacant land. About 64% of vacant land is in Low Density Residential and 29% is in Medium Low Density Residential, both of which allow single-family detached housing and will allow multifamily housing types (such as duplexes, triplexes, quadplexes, and town houses) when the City implements HB 2001. This leaves a very small amount of land (about 19 acres) in areas that allow higher-density multifamily housing such as Medium High Density, High Density, High Density High-Rise, and commercial area.
- **Tualatin cannot accommodate all of its housing needs on existing vacant land.** Tualatin has a deficit of land in the Medium High Density and High Density High Rise Plan Designations, of 7 acres and 4 acres respectively. The deficits may be addressed in multiple ways, such as by re-zoning land, increasing densities allowed in Plan

Designations with deficits, or by accommodating housing in Plan Designations with surpluses. These options are included in the strategic actions in this report.

Housing Production Strategy Purpose

The Housing Production Strategy is intended to establish a framework for the evaluation and potential development of policies and strategic actions that address Tualatin's housing needs. Throughout this report, we discuss housing income based on Median Family Income (MFI) as defined by the US Department of Housing and Urban Services (HUD) for Washington County. The example below is for a family of four people. The information used in this report is generally from the Tualatin HNA, which presents data current as of 2018.[7] The information about Median Family Income below (and throughout the report) use the 2020 MFI for Washington County ($92,000). The HUD terms used to describe housing by income group are:[8]

- Extremely-Low Income: Less than 30% MFI or $28,000 or less for a family of four
- Very-Low Income: 31% to 50% of MFI or $28,000 to $46,000 for a family of four
- Low Income: 51% to 80% of MFI or $46,000 to $74,000 for a family of four
- Moderate Income: 81% to 120% of MFI or $74,000 to $110,000 for a family of four
- High Income: 121% of MFI or more $110,000 or more for a family of four

Throughout this report, the term "workforce housing" is used. In this report, it generally refers to housing affordable at 61% to 80% of MFI.

[7] The date ranges for data vary, with much of the information from the HNA from the U.S. Census 2013-2017 period. In some cases, the report presents data from the 2000 or 2010 Decennial Census to provide historical context. In some cases the report uses more updated data for things like housing sales prices, rents, median family income, people experiencing homelessness, and other subjects.

[8] The actual income limits on specific affordable housing programs, such as LIHTC or CDBG HOME, vary by program. As the City implements the strategic actions presented in this report, the City will need to understand the income limitations of different programs.

Requirements of a Housing Production Strategy

OAR 660-008 describes the requirements of a Housing Production Strategy (HPS) in sections 660-008-0050 through 660-008-0070. This section briefly describes these requirements and review by staff with the Department of Land Conservation and Development (DLCD).

The HPS is required to include the following information. We have noted what chapter this information is included in this report:

- **Contextualized Housing Need and Engagement** (Chapter 2 in this report) should provide information about the socioeconomic and demographic trends of households in Tualatin, the policies the City has adopted to meet housing needs, and a summary of engagement the City has had with stakeholders about housing needs.
- **Strategies to Meet Future Housing Need** (Chapter 3 in this report) identifies specific actions, measures, and policies needed to address housing needs identified in Tualatin's HNA report.
- **Achieving Fair and Equitable Housing Outcomes** (Chapter 4 in this report) evaluates the entire list of strategies to achieve equitable outcomes. The valuation considers factors such as location of housing, affirmatively furthering Fair Housing, facilitating housing choice, identifying housing options for residents experiencing homelessness, supporting development of affordable housing, and increasing housing stability.

The City is required to submit the HPS to DLCD after its adoption by the City Council. Then the City is required to monitor progress on implementation of the HPS and progress on production of housing related to the policies and strategic actions in this report. Linking housing development directly to implementation of the strategic actions in this report may be challenging and difficult to quantify. But City staff will be able to report changes in building activity that occurs before and after implementation of specific strategic actions and will be able to provide qualitative feedback on implementation of strategic actions based on development of partnerships and discussions with stakeholders.

Tualatin will be required to submit a report to DLCD three years after the City adopts the HPS, which includes:

- A **summary** of the strategic actions taken by that time. For strategic actions not adopted on the schedule in the HPS, the City must provide an explanation of the circumstances that posed a barrier to implementation and a plan for addressing the need identified in the strategy.
- An **evaluation** of the efficacy of the strategic actions that the City has implemented for meeting the needs in the HNA and whether the strategic actions are moving the City to achieve more fair and equitable housing outcomes.

Implementation of the HPS will take time because each strategic action will require further consideration, such as additional analysis, engagement of consultants, changes to existing

standards or programs, discussions with decision-makers, or public hearings. The City may be unable to or chose not to implement some strategic actions because of new information that arises from a detailed evaluation of the specifics of each strategic action.

If the City is unable to or chooses not to implement a strategic action within 90 days of the timeline proposed in the HPS, the City must notify DLCD about the action(s) that the City is taking to address this issue. The City may propose an alternative schedule for implementing the strategic action or may identify a different action (or actions) to meet the specific housing need addressed by this strategic action.

Structure of the Report

This report is organized as follows:

- **Chapter 2. Contextualizing Housing Need** summarizes the findings about housing need in Tualatin, with a focus on housing need at varying income levels and housing needs of specific groups of people
- **Chapter 3. Strategies to Meet Future Housing Need** presents the proposed goals and strategic actions to meet the housing need described in Chapter 2.
- **Chapter 4. Evaluation of the Housing Production Strategy for Achieving Fair and Equitable Housing Outcomes** presents an evaluation of the HPS through considerations of the location of housing, Fair Housing, housing choice, and other factors.
- **Appendix A. Contextualizing Tualatin's Housing Needs** presents the data and analysis necessary to understand Tualatin's housing needs in more detail.

2. The Need for Housing in Tualatin

Introduction

The Tualatin Housing Needs Analysis (HNA) describes the housing needs of current and future residents of Tualatin based on demographic and socioeconomic characteristics, such as age and income. It does not provide detailed data about housing needs for other demographic characteristics, such as race, ethnicity, people with one or more disabilities, or people experiencing homelessness.[9]

This chapter provides additional information about the housing needs by income, age, race, ethnicity, disability and for people experiencing homelessness. It uses standard sources of information from the U.S. Census. It adds information from other sources, such as Oregon's Housing and Community Services Department, the United States Department of Housing and Urban Development, RLIS, Redfin, Costar, the City of Tualatin, and the Washington County Consortia 2020-2024 Consolidated Plan.

This chapter presents a description of the housing needs that the Housing Production Strategy is intended to address, as well as existing policies to address Tualatin's housing needs. It ends with a summary of the existing and expected barriers to development of needed housing.

Summary of Tualatin's Housing Needs

Appendix A provides detailed information about housing needs in Tualatin. Appendix A includes discussion of housing need related to demographics and socioeconomic characteristics of people in Tualatin, housing market conditions and trends, housing affordability, and information about outreach and engagement by City staff. This section summarizes these housing needs briefly. For more details about housing needs and the sources of information for this analysis, please refer to Appendix A.

- **Increased housing diversity.** Nearly two-thirds of Tualatin's housing stock is single-family detached housing. Tualatin is a relatively young and ethnically diverse city. While Tualatin comprises many families with and without children, the senior population across the region is growing. Tualatin serves as an important employment hub in the Portland Metro area, drawing workers from across the region. The City's demographic and socioeconomic characteristics suggest a need for a wide variety of housing types to meet the needs of a growing and diverse pool of existing and future residents. Feedback from stakeholders (in Appendix A) indicated that they think Tualatin needs to allow a wider range of housing types, such as more town homes,

[9] Inclusion of detailed information about housing needs for other demographic characteristics—such as race, ethnicity, people with disabilities, or people experiencing homelessness—was not a requirement of the HNA when the Tualatin HNA was completed. This information is required by the HPS, so it has been included in this report.

mixed-use development, duplexes, triplexes, cottage clusters, multigenerational housing, accessory dwelling units, and high-rise apartments (structures that are six to eight stories in height).

- **Greater housing affordability and availability for homeowners.** Tualatin's homeownership stayed static from 2000 to 2017 at about 55%, however, it was lower than Washington County's (61%) and the Portland Region's (60%) homeownership rates. These statistics highlight a potential need for greater homeownership opportunities as homeownership continues to be one of the most effective (and primary ways) for households and individuals to build wealth. In addition, renter households are more likely to be at risk of displacement than homeowners, particularly in Oregon.[10] Plans to increase homeownership can help to prevent displacement due to rising rental costs. Median sales prices in Tualatin continue to increase (more than doubling in Tualatin between 2012 and 2020) consistent with the region, putting homeownership out of reach for many households in the city.
- **Greater housing affordability and availability for renters.** Based on a survey of currently available rental properties in Tualatin, the typical asking rent ranged from about $1,125 for a one-bedroom unit to more than $2,000 per month for a three-bedroom unit. These costs are affordable to households earning 55% to 98% of the region's MFI (about $45,000 to $80,000).

  Competition for lower-priced affordable units is strong, and many cannot afford these rents or housing sales prices without cost burdening themselves. In the 2013-2017 period, about 56% of Tualatin's renters were cost burdened, with 26% severely cost burdened.[11] Renters, especially those with lower incomes, are at risk of being displaced through increases in rental costs. Anecdotal discussions with stakeholders in Tualatin suggest that rising rents are causing people to move out of the city to find more affordable housing.
- **Increased income-restricted regulated, emergency, and supportive housing.** Tualatin has about 604 rent-restricted affordable housing units (accounting for about 5% of Tualatin's housing stock) but has about 1,753 households experiencing severe housing cost burden in the city. Washington County has about 530 people experiencing homelessness, about 300 of whom are unsheltered. Tualatin's Continuum of Care region has 111 emergency shelter beds, 10 safe haven beds, 119 transitional shelter beds, and 725 permanently supportive housing beds supporting persons experiencing homelessness in the region. However, in 2019, 44% of people experiencing homelessness

[10] In Oregon, homeowners are largely insulated from the financial effects of market changes due to the property taxation system, which decouples market sales prices from assessed values, meaning that rising home values only impact property tax amounts in very limited circumstances. However, even after recent changes to state law providing greater protection for renters, renters are still much more vulnerable to changing market conditions and are subject to the decisions of the property owner regarding redevelopment, remodels, rent increases, etc.

[11] A household is said to be cost burdened if they spend 30% or more of their gross income on housing costs. A household is said to be severely cost burdened if they spend 50% or more of their gross income on housing costs.

in the region were unsheltered and about 211 students in the Tualatin/Tigard School District experienced homelessness in some form in the 2018-19 school year (many of them doubled-up[12]).

- **Need for housing for people to live and work in Tualatin.** Tualatin's Economic Opportunities Analysis report (December 2019) reported that 93% of people working in Tualatin lived in another community (such as Portland, Tigard, Beaverton, or Hillsboro) and commuted into Tualatin each day. Some people who work in Tualatin can afford rent or homeownership in Tualatin, but some would be cost burdened in Tualatin.

  - *Lower wage.* A household with 1.8 employees in lower-paying sectors, such as retail (with an average pay of $28,300), would have an income of about 55% of the region's MFI. This household would be unlikely to afford homeownership. They may be able to afford monthly rent of about $1,250, such as a one-bedroom unit in Tualatin. They would not be able to afford a larger unit with two or more bedrooms. This household would likely either live in an overcrowded unit (because a one-bedroom unit is too small for a family of four) or be cost burdened so that they could have a dwelling unit big enough for their household.
  - *Average wage.* The average wage at a job in Tualatin was about $57,300 in 2017. Assuming about 1.8 jobs per household,[13] the average wage for a household with jobs in Tualatin would be approximately $103,000. This income would put the household at about 119% of the region's MFI. A household with this income could afford a house between $360,000 and $412,000. While this is below the median sales price of $491,000, a household with this income may be able to afford a lower-cost home in Tualatin.
  - *Higher wage.* A household with 1.8 employees in higher-paying sectors, such as manufacturing and health care (which has an average pay of $73,400), would have an income of about 144% of the region's MFI. This household could afford to rent or own and could afford the median sales price of $491,000 in Tualatin.

Throughout this analysis, we discuss housing needs for specific populations, such as people of color. The reason for this discussion is that the housing needs of these populations are different from other groups in Tualatin. The Washington County Consolidated Plan describes the issue in the following way:

> "Analyses persistently demonstrate that some population groups, including communities of color and people with disabilities, experience disproportionately high housing cost burdens, are less likely to be homeowners, are disproportionately represented in the criminal justice system, have a school

[12] "Doubled-up" refers to the sharing of other persons' housing due to loss of housing or economic hardship.

[13] This assumption is based on information about jobs per household for the Portland Region, including Clackamas County, Washington County, and Multnomah County. We use this estimate because commuting trends make it difficult to estimate jobs per household in Tualatin, given that so many workers commute into Tualatin for work.

achievement gap and experience other disparities relative to health, wellbeing, wealth, income and life outcomes. In deciding on priorities, the County sought opportunities to address persistent historic imbalances, consider systemic causes and advance a more equitable and fair housing system."[14]

This analysis finds disproportionate housing needs for seniors, people of color, people with one or more disabilities, and people experiencing homelessness. Washington County's Consolidated Plan identifies all of these groups as a priority with special housing needs.

- **Seniors.** People 65 years of age and older are disproportionally cost burdened compared to the average household—many living on fixed incomes in a region with increasing housing costs.[15] About 62% of people aged 65 years of age and older are rent burdened in the Portland Region, compared to an overall average of 46% of renter households cost burden in the Portland Region. [16] Over the next twenty years, people over 65 years are expected to be the fastest-growing age group. As this group grows, Tualatin will need more housing that is affordable, physically accessible, and in proximity to needed services (such as nearby health care or in-home assistance). Seniors will also need improved access to housing without discrimination, especially seniors of color.
- **People of color.** About 25% of Tualatin's population identified as a person of color. In the Portland Region, about 55% of renter households that identified as Latino and 52% of renter households that identified as a non-Asian person of color were cost burdened.[17] Latinos are the largest ethnic group in Tualatin (16% of the population) and have the lowest median income ($30,761) of any race or ethnicity in Tualatin.[18] Broadly, the housing needs for many people of color in Tualatin include improved access to affordable housing units, assistance to avoid displacement, access to housing in locations with "high opportunity" (such as areas near jobs, transit, or services), and access to housing without discrimination.
- **People with disabilities.** Across the Portland Region, people with one or more disabilities experience disproportionate cost burden. In particular, 53% of renters in the

[14] *2020-2024 Consolidated Plan for Washington County and the Cities of Beaverton and Hillsboro, Executive Summary, page 3.*

[15] Some seniors have accumulated wealth, which is not accounted for in this analysis. Information about accumulated wealth is available at the national level but not at the state or city level.

[16] Rent burden by these groups is less available and accurate for Tualatin, given the small size of the city and the quality of available data. As a result, this section presents rent burden for these groups in the Portland Region based on analysis from the report *Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations* by ECONorthwest, March 2021.

[17] This information is not available on a city-by-city basis from the US Census ACS. This statistic is pulled from a statewide analysis from the report *Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations* by ECONorthwest, August 2020.

[18] Tualatin's largest community of color is Latino, with about 4,475 Latino people living in Tualatin. Other people of color living in Tualatin are Asian (1,013 people), two or more races (795 people), Black or African American (364 people), Native Hawaiian or Pacific Islander (127 people), American Indian or Alaska Native (103 people), and some other race (54 people).

Portland Region with a hearing or vision disability and 65% of renters with a disability other than a hearing or vision-based disability are cost burdened, compared to the average rate of cost burden for all households in the region at 46%. Housing needs of people with one or more disabilities vary by type of disability, but in general housing needs include improved access to an affordable unit, improved physical access to housing units, access to housing with needed services, and access to housing without discrimination—especially for people with one or more disabilities who are also seniors and/or people of color. Feedback from stakeholders (documented in Appendix A) indicates that people with disabilities have a difficult time finding accessible housing, such as housing that is physically accessible.

- **People experiencing homelessness.** People experiencing homelessness are disproportionately affected by the lack of affordable housing. There were 307 people who identified as homeless and unsheltered in Washington County and 44 people in the Tigard/Tualatin area in 2020.[19] In addition, 16% of households in Tualatin are at risk of homelessness because they have income at or below 30% of MFI. More than 90% of these households are cost burdened and likely many are severely cost burdened. Housing needs for people experiencing homelessness vary by reason for homelessness. In Washington County, the primary reason people cited for experiencing homelessness was inability to afford housing. The broad housing needs for this group includes needs for immediate assistance (including rent support), permanent supportive housing (including supportive housing with services), and improved access to an affordable unit. The housing needs of people experiencing homelessness who are also a senior, disabled, or a Person of Color include the housing needs of those groups as well. The housing needs for people at-risk of becoming homeless may be the same as for people experiencing homelessness.

Stakeholder Engagement

The HPS uses stakeholder involvement that was conducted over the last two years: interviews with stakeholders as a part of the Tualatin 2040 engagement process, Tualatin HNA, and public events about severely rent-burdened communities.[20] The key issues identified through stakeholder engagement included the need for an increased variety of housing options (especially multifamily housing), the need for more affordable housing for both renter and owner-occupied housing, the need for housing for people who work at jobs in Tualatin, changes to the Development Code to support development of these housing types, the need for

[19] This is based on the annual Point-in-Time (PIT) data. The PIT count is a snapshot of individuals experiencing homelessness on a single night in a community. Though the PIT count is not a comprehensive survey, it serves as a measure of homelessness at a given point of time and is used for policy and funding decisions.

[20] Annual meetings about severely rent-burdened communities are required in Oregon by HB 4006 or Oregon Laws 2018 Chapter 47. A "severely rent-burdened city" is a city where at least 25 percent of the renter households in the city are severely rent burdened. Tualatin has been designated by the State as a severely rent-burdened city since 2019.

redevelopment and creation of complete neighborhoods, and housing need for specific groups like people with disabilities and people of color.

Appendix A presents a full summary of the stakeholder input from these events. These issues have been incorporated into the goals and strategic actions presented in Chapter 3.

Housing Needs Addressed by the Housing Production Strategy

The housing market produces some types of housing without need for public intervention, such as development of single-family detached housing. The HPS focuses on housing that may require public intervention to ensure production. This section describes the housing needs that are the focus of the HPS: development of income-restricted affordable housing, housing for moderate-income households, and housing to meet the special needs of specific groups. This section describes Tualatin's housing needs based on analyses from the *Tualatin Housing Needs Analysis* report (December 2019)[21] and Appendix A, which includes an analysis of unmet housing needs for underserved groups. The analysis shows income and housing affordability based on the 2020 MFI for Washington County ($92,000).

The housing needs in Exhibit 3 are the basis for the goals and strategic actions presented in Chapter 3.

Exhibit 3. Tualatin's Housing Needs that Are Addressed in the HPS

Description of Need	Tualatin's Housing Need
New housing to accommodate population growth	The HNA projects growth of **1,014** new dwelling units in Tualatin between 2020 and 2040.
Housing Need by Income	
Existing households[22]	Extremely Low Income (< 30% MFI): **1,700** households (16% of households) Very Low Income (30-50% MFI): **1,588** households (15% of households) Low Income (50-80% MFI): **1,614** households (15% of households) Moderate Income (80-120% MFI): **1,679** households (15% of households)
New households [23]	Extremely Low Income: **159** households (16% of new households) Very Low Income: **148** households (15% of new households) Low Income: **151** households (15% of new households)

[21] https://www.tualatinoregon.gov/sites/default/files/fileattachments/planning/page/22631/hna.pdf

[22] The HPS does not anticipate building new units for all existing households in Tualatin that have problems affording housing costs. But the HPS does propose actions to stabilize the housing costs of existing lower-income households and may result in development of housing that is more affordable to these households, enabling them to stay in Tualatin. Information about lower-income households and cost burden for existing households illustrates the existing housing need in Tualatin.

[23] This assumes that future residents of Tualatin have an income distribution that is the same as existing residents. Given the fact that incomes have grown at a relatively slow pace over the last two decades in comparison to housing costs (especially home sales prices), this seems like a conservative assumption about the future affordability of housing.

	Moderate Income: **157** households (15% of new households)
Housing Needs for Extremely Low (< 30% MFI) and Very Low–Income (30-50% MFI) Households	At a minimum, Tualatin has housing need for: ▪ **307** households earning less than 50% of MFI ▫ Tualatin also has **3,288** existing households earning less than 50% of MFI. ▪ These households can afford rents (including basic utility costs) of not more than **$1,150** per month. ▫ A household would need to earn **$58,000** to afford average multifamily rent of **$1,450** for a 2-bedroom unit (about 63% of MFI for a family of four). ▪ Meeting the housing needs of these households will require a combination of preserving existing income-restricted affordable housing and developing new income-restricted affordable housing. Development of income-restricted affordable housing typically requires extensive subsidy, with funding from the State, region, or County, in addition to any support from the City and other partners.
Housing Needs for Low-Income (50-80% MFI) Households	At a minimum, Tualatin has housing need for: ▪ **151** households earning between 50% and 80% of MFI ▫ Tualatin also has **1,614** existing households earning between 50% and 80% of MFI. ▪ These households can afford rents (including basic utility costs) of between **$1,150** and **$1,850** per month. ▫ A household would need to earn **$58,000** to afford average multifamily rent of **$1,450** for a 2-bedroom unit (about 63% of MFI for a family of four). ▫ Households with this income range are likely to live in rental housing predominantly and can likely afford a range of costs from below-average rent to average or above-average rent in Tualatin. ▪ Meeting the housing needs of these households will require a combination of preserving existing "naturally occurring affordable housing" and developing new income-restricted affordable housing in this price range. Development of new housing affordable in this price range generally requires some subsidy or public support, such as tax exemptions, government funding (typically from the State, region, or County, with some level of local contribution being critical), reduced systems development charges, low interest loans, philanthropic contributions, or other financial support. Funding for rental housing for households at 61% MFI and above is very scarce. Homeownership opportunities for this income range will likely be related to housing developed by nonprofit organizations, possibly

	with some form of subsidy, such as land donation, discounted land leasing, and land banking.

Housing Needs for Moderate-Income (80-120% MFI) Households	At a minimum, Tualatin has housing need for:
	▪ **157** households earning between 80% and 120% of MFI
	  ▪ Tualatin also has **1,679** existing households earning between 80% and 120% of MFI
	▪ These households can afford rents (including basic utility costs) of between **$1,850** and **$2,750** per month.
	  ▪ These households can afford rents higher than the average multifamily rent (**$1,450)** for a two-bedroom unit, and many of these households can afford the typical multifamily rent for a three-bedroom unit ($2,000 to $2,400).
	  ▪ These households cannot afford the median sales prices of $491,000 in Tualatin but can likely afford lower-cost housing in the Tualatin housing market.
	  ▪ Some households with income in the higher part of this range are likely to live in rental housing and some are likely to be homeowners. Households with incomes in the lower part of this income range may need assistance in attaining homeownership.
	▪ Meeting the housing needs of these households will be a combination of development of rental housing (without subsidy from local or state government) and lower-cost housing for homeownership. Some homeownership opportunities for this income range will likely be related to housing developed by nonprofit organizations, possible with some subsidy, such as land donation, discounted land leasing, land banking, or a community land trust. Development of smaller and more affordable housing units, such as cottage housing, may provide opportunities for homeownership (without subsidy) for households in this group with higher incomes.

Housing Need of Specific Populations	
Housing Needs of People of Color	Blacks, Latinos, American Indian or Alaska Natives, and Native Hawaiian or Pacific Islanders are more likely to rent their homes and live in multifamily housing than the overall average in Tualatin. People of color are more frequently cost burdened than the average in the Portland Region. About **19%** of Tualatin's population identified as Black, Latino, American Indian or Alaska Native, or Native Hawaiian or Pacific Islander. Meeting the housing needs of these households will require addressing the affordability issues, discussed above, as well as ensuring that people of color have access to housing without discrimination. This will require increasing awareness of Fair Housing rules for property owners and managers, tenants, City decision

	makers, and City staff. It will also require careful decision-making to change policies that have created barriers to housing access for people of color.
Housing Need of People with Disabilities	Disabilities include those that are visible, such as ambulatory or vision disabilities, and those that are not readily apparent, such as self-care, independent-living, or cognitive disabilities. Other conditions may require special accommodations, such as disabling diseases or mental health conditions. The Census reports that about **10%** of Tualatin's population has disabilities, such as ambulatory, vision, hearing, cognitive, self-care, or independent-living disabilities. Meeting the housing needs of these households will require addressing the affordability issues, discussed above, as well as ensuring that people with disabilities have access to housing that addresses their disability and that they have access to housing without discrimination. This will require increasing awareness of Fair Housing rules for property owners and managers, tenants, City decision makers, and City staff. It will also require approaches that encourage development of housing with specialized design standards to accommodate special needs.
Housing Need of People Experiencing Homelessness	The number of people experiencing homelessness in Tualatin is not clearly known. In part, this number is not known because people experiencing homelessness may move between neighboring cities, such as between Tigard and Tualatin. There were approximately **307** people experiencing homelessness in Washington County in 2020, **44** of whom were unsheltered in the Tigard and Tualatin area. Meeting the housing needs of people experiencing homelessness can range from emergency assistance (including rent and utility assistance), rapid rehousing, inclusion of local shelter, permanent supportive housing (including supportive housing with services), and improved access to an affordable housing unit (as discussed above).

Existing Policies to Address Tualatin's Housing Needs

This section lists existing measures that Tualatin has implemented to support housing development and presents preliminary draft measures (or policies or strategies) that may be included in the HPS.

This City of Tualatin has the following housing measures (goals, policies, or strategies) currently in place to address Tualatin's housing needs. These measures include:

- Prohibiting single-family detached housing in most high-density zones in Tualatin.
- Allowing one or more accessory dwelling units (ADUs) in residential zones per lot.[24]
- Applying density standards uniformly across zones that allow dwelling units on fee simple lots and on multifamily sites.
- Ensuring decisions about the types and locations of housing are data-driven and focused on equitable outcomes instead of the best outcomes for those with the most money and/or privilege.
- Removing open space/common amenity requirements for low-density residential.
- Providing information to small, local developers to help them understand land use permitting processes and give them a sense of clarity and certainty about the requirements, so they can better provide smaller-scale housing. Tualatin's existing measures generally focus on land use efficiency, such as allowing development of denser housing types, or measures to reduce development costs, such as removing open space requirements for some housing development. By and large, the types of policies that Tualatin has yet to adopt are policies to support:
- Development of affordable rental housing and preservation of affordable housing stock to prevent displacement of existing residents.
- Prevention and reduction of houselessness.
- Expansion of workforce owner and rental housing to increase the jobs housing balance.
- Expansion of housing for people with special needs and seniors, and the development of housing to meet the cultural needs of diverse populations.
- Greater availability of diverse housing types through regulatory or zoning changes, including mixed-use housing and redevelopment in commercial areas.
- Planning for and developing transportation and public infrastructure to support affordable housing, workforce housing, and mixed-use housing development.

[24] Although, Tualatin's ADU provisions are not yet compliant in regard to HB 2001 off-street parking requirements.

Existing and Expected Barriers to Development of Needed Housing

Barriers to development of needed housing in Tualatin include:

- **Land for housing.** Tualatin has a limited amount of unconstrained, vacant buildable residential land (244 acres) within the city (including in the Basalt Creek Planning Area). About 62% of this buildable land is within the Basalt Creek Planning Area, which is in the process of annexation. The City expects infrastructure development sufficient to support residential development over time. The concentration of buildable land in Basalt Creek may slow new residential development in Tualatin until this area is ready for development.

  More than 90% of Tualatin's unconstrained, vacant buildable land is Low Density or Medium Low Density Residential, providing limited opportunities for development of multifamily housing. Tualatin has 1 acre of unconstrained vacant buildable land that is Medium High Density, 17 acres of High Density, and no unconstrained High Density High Rise Residential land. These are the areas where multifamily housing with five or more units per structure can be built. Scarcity of vacant land, especially for multifamily development, is one of Tualatin's primary barriers to development of needed housing.
- **Complexity and expense of redevelopment**. While Tualatin is able to identify areas that may be ripe for redevelopment (including areas for 4 to 6-story multifamily housing), the costs and complexity of redevelopment are substantial. Barriers to redevelopment include higher site acquisition and preparation costs (sometimes including negotiating with multiple landowners), higher construction costs for 4 to 6-story development (compared to 2 to 3-story development), and costs of upgrades to infrastructure (such as roads, water, stormwater, or sewer) to support increased development density. In a suburban environment, rents may not be high enough to justify these higher development costs. In addition, a number of the sites that the City has identified as potential redevelopment opportunities are located in a floodplain, which precludes federal funding for affordable housing from being used on those sites, or have other site-specific constraints that create challenges for development.
- **Regulatory barriers to multifamily housing**. In addition to a lack of land for multifamily development, existing development regulations for multifamily housing do not support efficient development or redevelopment of the type of housing the zones are intended to allow. Standards that force lower densities reduce the viability of both unregulated affordable housing and income-restricted affordable housing, and they make it even more challenging to build on the few smaller sites that are zoned for multifamily housing.
- **Funding and resources to support development of affordable housing**. Developing income-restricted housing for households with incomes 60% and below of MFI nearly always requires state, local, and/or philanthropic subsidy so that it can cover the costs of

development and operations with restricted rents. Developing new housing affordable to households with incomes of 51% to 80% of MFI also typically requires government subsidy and/or funding from sources such as nonprofits. One of the key barriers to development of affordable housing is identifying sufficient funding to support its development. Options for funding affordable housing development include direct funding (i.e., monetary contributions for housing), contributions of land, and cost reductions (e.g., tax abatements or waiving fees).

- **Capacity of the income-restricted development community to support development of affordable housing**. Capacity for development of affordable housing includes developers willing and able to develop income-restricted housing, such as nonprofits with the capacity to support development of affordable housing. There may be some capacity constraints for development of income-restricted affordable housing based on nonprofit developer capacity. However, availability of funding to support development of affordable housing is more of an issue.
- **Staff capacity to implement the Housing Production Strategy.** Implementing the strategic actions in the HPS will take a considerable amount of City staff capacity. If staff do not have sufficient capacity to work on the items in the HPS, that may slow or halt implementation of the HPS. Insufficient staff time to implement the HPS could be a barrier to development of needed housing. The amount of staff time needed to implement the HPS will only become clear as the City begins the evaluation of each strategic action to determine how much additional research and public engagement will be needed.
- **Need for ongoing engagement to understand housing needs.** Ongoing community engagement, especially with underserved communities or people with specialized housing need, is necessary to ensure that the City understands the current housing needs of these groups. Engagement has been more difficult than usual during the COVID-19 pandemic, especially with underserved communities because they are disproportionately negatively impacted by the pandemic. This is a potential barrier to needed housing development if the City does not have staff capacity to maintain this engagement or is unable to establish relationships with the communities in question.

3. Strategies to Meet Future Housing Need

Developing the Housing Production Strategy

Development of the HPS required attention to a variety of factors, such as the City's housing policy objectives, funding sources to support housing development, and factors that affect both housing development and the range of impact of the strategic actions.

Housing Policy Objectives

The Tualatin 2040 project, which included the Tualatin Housing Needs Analysis, resulted in an update to Tualatin's Comprehensive Plan and set new housing goals, policies, and strategic actions. These goals and policies, as well as the housing needs documented in Exhibit 3, are part of the basis of the goals and strategic actions presented in this chapter. In addition, the HPS requirements place more emphasis on equitable housing, fair housing, and underserved communities. These requirements have also provided part of the basis for the goals and strategic actions in this chapter. The high-level housing goals in Tualatin's Comprehensive Plan are:

- **Goal 3.1 Housing Supply.** Ensure that a 20-year land supply is designated and has urban services planned to support the housing types and densities identified in the Housing Needs Analysis.
- **Goal 3.2 Housing for All.** Encourage development and preservation of housing that is affordable for all households in Tualatin.
- **Goal 3.3 Affordable Housing**. Encourage the establishment of funding sources to support development of affordable housing and related public infrastructure.
- **Goal 3.4 Redevelopment.** Encourage timely strategic planning and redevelopment in Tualatin to create new mixed-use residential and commercial planning districts.
- **Goal 3.5 Housing and Transportation.** Encourage development and redevelopment in Tualatin that supports all modes of transportation, including walking, biking, and mass transit.
- **Goal 3.6 Residential Growth.** Residential growth by annexation or expansion to the Urban Planning Area or Urban Growth Boundary will be coordinated with local, state, and regional governments, districts, and stakeholders.

Funding Sources and Incentives

Potential Funding Sources. One of the key challenges in implementing financial actions in the HPS is likely to be the availability of funding. Funding is needed for staff time to evaluate the feasibility of implementing the HPS, but it is also needed in the form of financial contribution, waiver, or forgone revenue to support development of units, preservation of housing, and redevelopment. Identifying realistic funding sources will be necessary to achieve the outcomes of the HPS, increasing access to housing in Tualatin, especially for low-income households and underserved communities. Strategic Action 5.a is intended as a way to develop a specific funding action plan for implanting the HPS.

Potential local sources of funding could include implementation of a Construction Excise Tax (CET) in Strategic Action 1.c, evaluating other local sources of funding in Strategic Action 1.e, evaluating how to support preservation of regulated affordable housing in Strategic Action 3.a, use of Urban Renewal to support housing development in Strategic Action 10.a, and evaluating the prioritizing of Capital Improvements Programming in Strategic Action 12.a.

Other funding sources may include Washington County's Housing Authority, Metro's grant programs, the State of Oregon's Housing and Community Services Department, other state agencies that fund infrastructure, other programs necessary to support housing development, and other private and nonprofit organizations.

Potential Incentives. Financial incentives are also a critical part of a successful strategy for equitable housing production. In the HPS, potential incentives include property tax exemption in Strategic Action 1.a, changes to Systems Development Charges in Strategic Action 1.b, development of incentives to preserve low-cost rentals for below-market-rate privately owned rental housing in Strategic Action 4.a, Multiple Unit Property Tax Exemption to slow rental cost increases in Strategic Action 4.b, evaluating ways to incentivize inclusion of workforce housing units within new multifamily rental development in Strategic Action 6.a, evaluating the development of specialized design standards and incentives to accommodate special needs in Strategic Action 9.a, and evaluating incentives to support mixed-use development like Vertical Housing Tax Abatement in strategic action 10.d.

Partnerships

Partnerships will also play an important role in supporting housing development. For example, Strategic Action 2.c is about partnering to develop affordable housing for homeownership, Strategic Action 6.b is about partnering with employers on employee-assisted housing, 6.c is about partnerships for land banking, and 7.a is about partnering on existing rental and utility assistance programs.

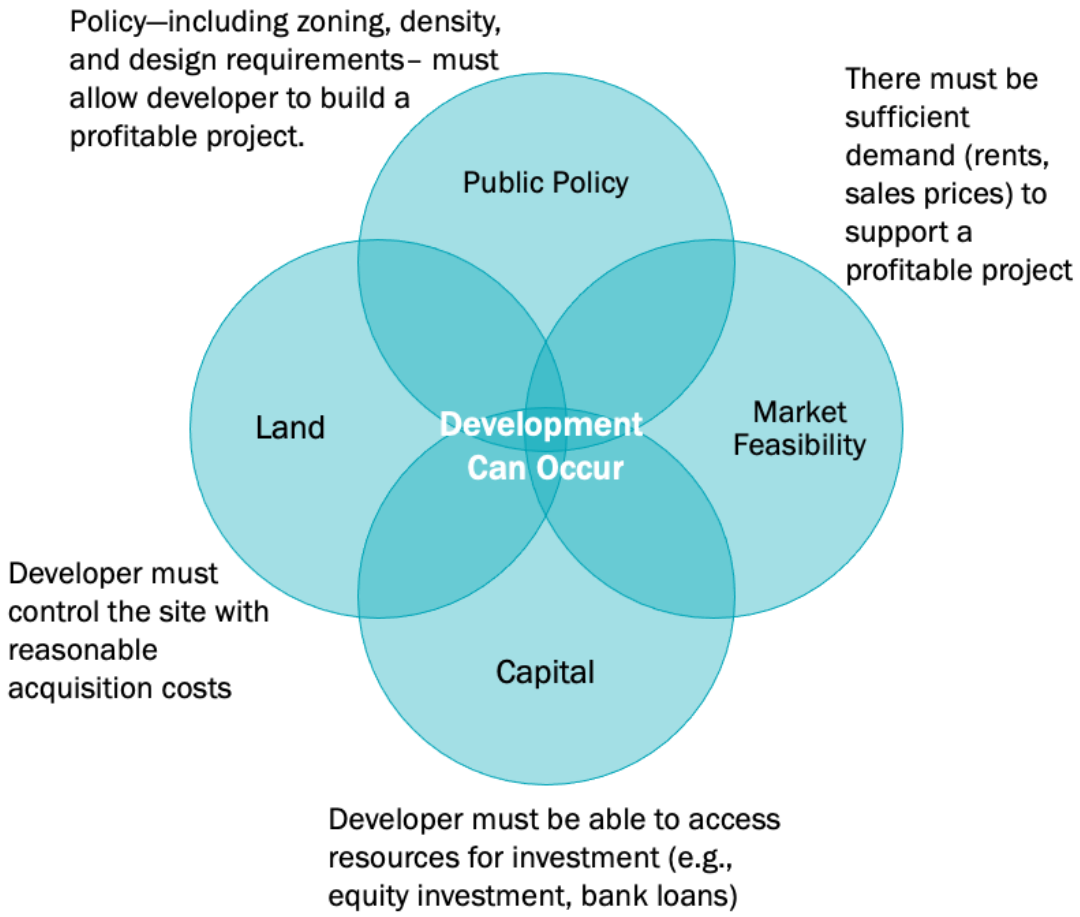
Considerations for Implementing the Housing Production Strategy

In evaluating the implementation of potential strategic actions, it will be important to consider supporting and leveraging the private market's ability to delivery market-rate development at a variety of price points, due to the limited public funding available to support income-restricted housing. In other words, increasing the overall supply of available housing units plays a significant role in overall housing affordability, including increasing opportunities for providing for those at the lower end of the income spectrum as well as historically underserved communities. The emphasis in the HPS is on production of housing that is affordable below 80% of MFI because that need is difficult or impossible to meet through market-rate housing development without public subsidy, such as many of the strategic actions proposed in the HPS. In addition, the HPS has an additional emphasis on the housing needs of underserved communities.

In an area with relatively low housing production per capita, the City has some influence over market-rate development through fees, charges, and development restrictions, despite the number of factors that the City does not control. The graphic in Exhibit 4 illustrates how four factors must intersect so that development can occur and where the City has most influence.

Tualatin does not control all of these factors entirely. Public policy at the local level is shaped through regional policy (by Metro) and the state. Land is generally controlled by the individual landowners, and development of infrastructure necessary to make land development can be prohibitively expensive. Market feasibility is largely affected by market forces, such as construction costs and achievable rents. Access to capital is largely controlled by investors and banks. However, Tualatin can directly influence public policy (through its Development Code) and availability of land (through zoning, density, planning for new land needed for housing, redevelopment, and infrastructure planning). Tualatin can also have a limited influence on market feasibility (through policies that reduce costs like tax abatements or waiving fees).

Exhibit 4. Four Necessary Factors that Allow Development of New Market-Rate Housing
Source: ECONorthwest

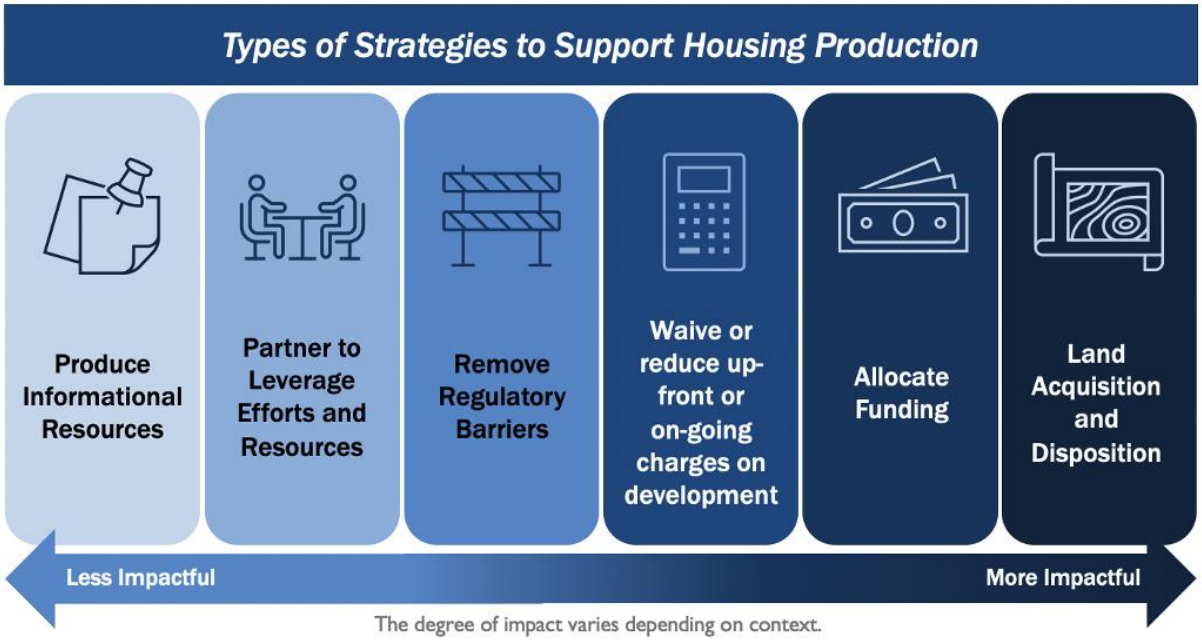


These factors all suggest that Tualatin should consider a wide range of strategic actions. Exhibit 5 shows the range of strategies, characterizing some strategies as more impactful and some as less impactful. More impactful strategies are those that provide funding or direct resources to support housing development (like land acquisition and disposition). These strategies are more impactful because funding and resources are the greatest constraint on development of income-restricted affordable housing (such as housing affordable to households with incomes below 80% of MFI).

While removing regulatory barriers and forming partnerships are shown as less impactful strategies, they are often necessary (but not sufficient on their own) to support housing development. For example, Tualatin's HPS includes a strategic action (10.a) about redevelopment opportunities for creation of mixed-use development districts that supports development of affordable and workforce housing. This strategic action assumes that development densities will allow buildings that are four to six stories tall, with at least 80 dwelling units per acre. However, Tualatin's Development Code does not allow for development of buildings that tall or at those densities. Strategic Action 11.a proposes to remove that regulatory barrier and allow taller and denser residential and mixed-use development.

This example also underscores the fact that many of the strategic actions presented in this chapter build on each other. While a partnership on its own may not be sufficient to support development of housing, it may be key when combined with other strategic actions.

Exhibit 5. Types of Strategies to Support Housing Production
Source: ECONorthwest



As part of development of the strategic actions in this report, ECONorthwest conducted interviews with the following developers, to assess potential use of key strategies: Alma Flores with REACH CDC, Community Development Partners, and Community Partners for Affordable Housing. In addition, ECONorthwest staff frequently discuss the types of strategies discussed in this document with developers in the Portland Region, as well as other developers across Oregon. What we learned from these interviews, as well as other work done for similar projects, is reflected in the goals and strategic actions in this report.

Goals and Strategic Actions

This section presents the goals and proposed strategies for inclusion in the HPS. The goals are intended to clearly describe the intended outcome(s) of the strategic actions, as they relate to Tualatin's Comprehensive Plan. For each strategic action, we include the following information, most of which is required by OAR 660-008-0050:

- A description of the strategic action
- The type of action
- A rationale for inclusion of the strategic action
- The anticipated impact of each strategic action, including:
  - Populations served by the strategic action
  - Income level addressed by the strategic action
  - Housing tenure, either owner or renter
  - Potential Impacts
    - Estimate of production of new units as a result of implementing the strategic action
    - Potential negative impact of the strategic action if it is successfully implemented
  - Magnitude of the action for producing new housing
    - A **low** magnitude is anticipated production of 1% or less of the needed new units (1,014 units) or about 10 dwelling units over the six-year period. A low magnitude does not mean a strategic action is unimportant. Some strategic actions are necessary but not sufficient to produce new housing.
    - A **moderate** magnitude is anticipated production of 1% to 5% of the needed new units (1,014 units) or about 10 to 50 dwelling units over the six-year period.
    - A **high** magnitude is anticipated production of 5% or more of the needed new units (1,014 units) or 50 or more dwelling units over the six-year period.
- Timeline for adoption and implementation of the strategic action, including:
  - A timeline for adoption of the strategic action, which is when the city would adopt the strategic action or otherwise officially decide to implement the strategic action.
  - A timeline for implementation of the strategic action, which is when the city would begin to use or allow use of the strategic action.
  - Time frame of the impact, which is the time period when the impact occurs.
- Implementation steps summarize the steps for implementing the strategic action at a high level.
- Lead agency and potential partners provide information about who will be responsible for implementing the strategic action.

- Funding or revenue implications provide high-level implications of the strategic action.

Implementation Schedule for Strategic Actions

Exhibit 6 presents a draft schedule for implementation of the Housing Production Strategy. The table shows each of the 12 goals with the strategic actions below. Each strategic action will go through a period of evaluation, then potentially adoption and implementation. The activities for each of these are described below.

- **Evaluation:** All strategic actions will require some level of evaluation prior to implementation, which may range from simple logistics (including information on a website) to complicated coordination between multiple internal and external stakeholders (adoption of a construction excise tax). The evaluation period will occur during the time in the tables shown in a teal color, before adoption.
- **Adoption:** This occurs when the City takes official action to adopt (or uses another official acknowledgement that the City is going to execute on the strategic action). The table shows the expected time of adoption in the time period represented by a teal color and "A" in the table.
- **Implementation:** This occurs when the City officially allows the strategic action to be used, represented by a brown color and "I" in the table.

Exhibit 6. Schedule for Evaluating, Adopting, and Implementing the Strategic Actions

Goal and Strategic Actions	On-Going 2021	2022		2023		2024	2025	2026	2027	Beyond 2027
1. Affordable Housing: Strongly prioritize, encourage, and support affordable rental housing development to increase affordable housing for households earning 0-60% Median Family Income.										
1.a Evaluate a Low-Income Housing Property Tax Exemption Program for Affordable Rental Housing				A	I					
1.b Evaluate Changes to Systems Development Charges								A	I	
1.c Evaluate Implementation of a Construction Excise Tax (CET)							A	I		
1.d Evaluate Support for Affordable and Workforce Rental Housing as part of Urban Renewal			A	I						
1.e Evaluate Financial Resources for Local Contributions to Affordable Housing Development								A	I	
1.f Evaluate Buildable or Redevelopable Public and Institutional Land Potentially Suitable for Affordable Housing					A	I				
1.g Evaluate Development Code Changes to Allow and Support Other Affordable Rental Housing Types in Tualatin						A, I				
1.h Evaluate Municipal Code, Development Code, Public Works Construction Code, and Building Code Processes to Make Building Affordable Housing Easier						A, I				
2. Affordable Homeownership: Encourage and support affordable homeownership to create opportunities for wealth creation.										
2.a Evaluate Impediments to Homeownership and their Removal						A	I			
2.b Partner to Encourage Education about Homeownership Opportunities		A	I							
2.c Partner with Organizations that Develop Affordable Ownership Housing					A	I				
2.d Evaluate Development Code to Encourage Diverse Housing Types for Affordable Homeownership						A, I				
3. Preservation of Regulated Affordable Housing: Preserve affordable housing to prevent the loss of existing affordable housing units and to prevent resident displacement.										

Goal and Strategic Actions	On-Going 2021	2022		2023		2024	2025	2026	2027	Beyond 2027
3.a Evaluate How to Support Preservation of Regulated Affordable Rental Housing							A	I		
3.b Evaluate Developing a Healthy Housing Initiative for Multifamily Housing						A	I			
4. Preservation of Naturally Occurring Affordable Housing (NOAH): Preserve naturally occurring affordable housing, where possible, to prevent loss of affordable units and to mitigate resident displacement.										
4.a Evaluate Development of Incentives to Preserve Low-Cost Rentals for Below-Market-Rate Privately Owned Rental Housing								A	I	
4.b Evaluate Using the Multi-Unit Property Tax Exemption to Slow Rental Cost Increases								A	I	
5. Housing for Underserved Communities: Implement housing policies, projects, programs, and partnerships to further support racial and social equity.										
5.a Consider Development of a Funding Action Plan to Implement the HPS with Attention to Equity				A	I			U[25]		
5.b Evaluate Impediments to Fair Housing to Create an Analysis of Impediments						A	I			
5.c Evaluated Ways to Best Ensure Opportunities for Education about Fair Housing Are Provided				I						
5.d Evaluated Strategies to Encourage Diverse Housing Types in High-Opportunity Neighborhoods						A, I				
6. Workforce Housing: Encourage, plan for, and support the development of workforce housing for households earning 61-80% Median Family Income, for both owner and renter, in order to increase the jobs-housing balance, reduce commute time and provide attainable housing for workers in Tualatin.										
6.a Evaluate Ways to Incentivize Inclusion of Workforce Housing Units within New Multifamily Rental Development								A	I	

[25] The Funding Action Plan will likely need to be updated by about 2026.

Goal and Strategic Actions	On-Going 2021	2022		2023		2024	2025	2026	2027	Beyond 2027
6.b Evaluate Potential Partnerships with Employers on Employer-Assisted Housing							I			
6.c Evaluate City Partnership to Participate in a Land Bank						A	I			
7. Housing Stabilization: Prevent and address homelessness to provide for safe living conditions for everyone living in Tualatin.										
7.a Evaluate Opportunities to Partner on a Local Rental and Utility Assistance Program	P[26]	I								
7.b Evaluate Ways to Develop Housing Options and Services to Address and Prevent Houselessness								A	I	
8. Housing Rehabilitation: Plan for and support housing programs and initiatives that are responsive to the safety and health needs of households earning 0-80% of Median Family Income.										
8.a Evaluate Establishing Local Housing Rehabilitation Program								A	I	
8.b Evaluate the Implementation of a Healthy Housing Initiative for Single-Family Housing						A	I			
9. Accessible Design and Other Specialized Design: Encourage and support Universal Design, Lifelong Housing Certification, and other similar standards.										
9.a Evaluate the Development of Specialized Design Standards and Incentives to Accommodate Special Needs						A	I			
10. Mixed-Use Housing and Redevelopment: Encourage and support development of mixed-use, mixed-income, and multifamily housing in commercial zones and urban renewal areas for households earning 0-80% of Median Family Income.										
10.a Evaluate Redevelopment Opportunities for the Creation of Mixed-Use Development Districts to Support Development of Affordable Housing and Workforce Housing			A	I						
10.b Evaluate Opportunities for Conversion of Commercial Buildings to Residential Uses				A	I					

[26] The City is piloting a test for this Strategic Action through December 2021, with potential extension of the partnership into 2022 and beyond.

Goal and Strategic Actions	On-Going 2021	2022		2023		2024	2025	2026	2027	Beyond 2027
10.c Evaluate Opportunities to Rezone Land for Mixed-Use			A	I						
10.d Evaluate Establishing Incentives to Support Mixed-Use Development, such as the Vertical Housing Tax Abatement					A	I				
11. Regulatory and Zoning Changes: Increase housing development opportunities through regulatory and zoning changes to accommodate a diverse range of housing types and price points to meet the housing needs in Tualatin.										
11.a Evaluate Updating Density Standards for Multifamily Housing in Medium-Density, High-Density, and Mixed-Use Zones		A	I							
11.b Evaluate Opportunities to Rezone Lower-Density Residential Land to Higher Density		A	I							
11.c Evaluate the Feasibility of Targeted Reductions to Off-Street Parking Requirements			A	I						
11.d Evaluate Updating Code to Allow Small Dwelling Unit Developments						A, I				
11.e Evaluate Adopting an Expedited Permitting Process for Affordable Rental Housing and Affordable Homeownership				A	I					
11.f Evaluate Providing Additional Engagement and Information to Developers of Affordable Housing		A	I							
12. Transportation and Public Infrastructure: Plan for and develop transportation and public infrastructure to support affordable housing, workforce housing, mixed-use housing, and mixed-income housing.										
12.a Evaluate Ways to Prioritize Capital Improvements Programming for Affordable and Workforce Housing					A	I				

Goals and Strategic Actions

This section presents Goals 1 to 12 and the strategic actions associated with each goal.

Goal 1. Affordable Housing: Strongly prioritize, encourage, and support affordable rental housing development to increase affordable housing for households earning 0-60% Median Family Income.

We recommend that the City pursue the following goal, which supports Goals 3.2 and 3.3 in the Comprehensive Plan:

- Strongly prioritize, encourage, support, and promote the development of affordable rental housing for households earning 0-60% Median Family Income.

Implementing this goal would require developing an affordable rental housing program to encourage and support affordable housing development for households earning 0-60% Median Family Income. The strategic actions to evaluate and potentially implement this goal are described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

1.a	Evaluate a Low-Income Housing Property Tax Exemption Program for Affordable Rental Housing	
Description		**Type of Action**
Evaluate a property tax exemption program for affordable rental housing. Two tax exemptions programs could be used to support affordable housing: ▪ **Low-Income Rental Housing Exemption:** Would provide a 20-year, renewable property tax exemption for rental housing for low-income households (60% of area median income and below). Housing need not be owned or operated by a nonprofit entity; if it is not, only housing built after the program is adopted is eligible. The exemption could also apply to land held for future affordable housing development. Only the City's taxes would be exempted unless there is sufficient support from overlapping taxing districts. Requires that savings be passed on to tenants through rent reductions. ▪ **Nonprofit Low-Income Rental Housing Exemption:** Would provide a full property tax exemption for new and existing		Adopt a Tax Exemption to Reduce Ongoing Charges on Development

affordable housing owned and operated by a nonprofit organization for as long as the property meets eligibility criteria. Tenants must initially qualify at 60% of area median income or below, but once qualified, existing tenant incomes may rise to as much as 80% of area median income over time. The exemption could also apply to land held by a nonprofit for future affordable housing development. Only the City's taxes would be exempted unless there is sufficient support from overlapping taxing districts. The evaluation would include a conclusion as to which of the two available options under state statute is better suited to the needs of housing providers in Tualatin.	
Rationale	With very thin margins for rents in affordable housing developments to be able to cover operating costs (even with subsidies), eliminating the cost of property taxes is an important way to improve the viability of affordable housing. Affordable housing providers sometimes use alternative means to secure tax exemptions (e.g., partnership with the local Housing Authority), but the alternatives add complexity to an already complex process. A locally enabled tax exemption also demonstrates local support for affordable housing development, which can help with securing state and federal funds.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, and low-income renter households ▪ **Income:** 0-60% of Median Family Income ▪ **Housing tenure:** Rental ▪ **Potential Benefit:** - **Housing Production (new units).** If this incentive were used for one to two apartment buildings at 50 to 150 units each, this strategy could contribute to development of 50 to 300 affordable units. - **Equitable Outcomes:** This is an opportunity to provide equitable housing for low-income households by serving, for example, underserved communities, people with disabilities, and people with special needs, increasing diversity in neighborhoods. ▪ **Potential Financial Impact:** The City will forgo some property tax income for these properties for the duration of the exemption. This reduces some revenue for city services and some revenue for participating taxing districts. ▪ **Magnitude:** Moderate

Timeline	▪ **Timeline for adoption:** June 30, 2023 ▪ **Implementation to commence:** 2023 ▪ **Time frame of impact:** The property tax exemption can be used after adoption for as long as the City offers the tax exemption.
Implementation Steps	▪ Evaluate viability of adoption, including an analysis of the pros and cons of the two tax exemptions. ▪ Seek input from overlapping taxing districts on their willingness to support the exemption. ▪ Discuss topic with City Council at work sessions and in public hearings. City Council may choose to adopt exemption by resolution or ordinance following a public hearing. ▪ Follow up with overlapping taxing districts to request that they pass resolutions to support the exemption. ▪ If supported, select one of the tax exemptions for adoption.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division and City of Tualatin Finance Department ▪ **Partners:** Overlapping Taxing Districts
Funding or Revenue Implications	Tax exemptions reduce general fund revenues for all overlapping taxing districts, including the City.

1.b Evaluate Changes to Systems Development Charges

Description	Type of Action
Evaluate options for potential changes to System Development Charges (SDCs) and Transportation Development Tax (TDT) to support development of affordable housing. ▪ **SDCs** are fees collected when new development and some redevelopment occurs within the City. Revenues are used to fund growth-related capital improvements. ▪ **TDT** is a voter-approved charge imposed on new development and redevelopment within Washington County (including its cities) to help pay for the impact development has on the transportation system. The City of Tualatin has limited control over SDCs because most are collected on behalf of other service districts and providers, who determine the rates and rate structures. The parks and water SDCs are set by the City. The primary opportunity for changes to SDC is with the parks SDC, which recently went through a review and update process. The water SDC is based on meter size, which makes meaningful changes in SDCs challenging, especially for multiunit projects. Tualatin does not have control over the rate or rate structure for Washington County's TDT, though the City does receive a share of the revenue. The City of Tualatin could evaluate changes to its parks and water SDCs by reducing, deferring, and/or financing SDCs at a low interest rate for regulated affordable housing or other needed housing types.	Evaluate Change to Fee Schedules to Reduce Charges on Development

Rationale	Changes to the City's parks or water SDC rates or methodology could reduce up-front costs for developers of regulated affordable housing and/or encourage specific types of housing development (e.g., smaller units).
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, and low-income renter households ▪ Extremely low, very low, and low-income owner households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Owner and Renter ▪ **Potential Benefit:** - **Housing Production (new units):** Tualatin can have an impact on its parks and water SDCs and can backfill the costs to

	County TDTs. - While reducing parks or water SDCs could provide some support for affordable housing development, on its own this action is unlikely to directly result in development of new affordable housing, but it may serve to attract affordable housing developers to Tualatin with this cost reduction. - **Equitable Outcomes:** Providing **i**ncentives like SDC reductions supports the development of equitable housing. ▪ **Potential Financial Impact:** The City will likely need to make up revenue forgone through the changes to SDCs, such as by backfilling with TDTs. ▪ **Magnitude:** Low
Timeline	▪ **Timeline for adoption:** December 31, 2026 ▪ **Implementation to commence:** 2027 ▪ **Time frame of impact:** Changes to SDCs will impact development of needed housing if changes are adopted and in use by 2027.
Implementation Steps	▪ Evaluate options for deferral or financing of parks or water SDCs for affordable housing under the existing methodology, working with current planning and finance divisions. ▪ At the next update to the parks or water SDC methodology, evaluate options to offer full or partial exemptions for affordable housing and/or to adjust the residential rate structure to offer lower rates for smaller units.
Lead Agency and Potential Partners	▪ **Lead Agency** City of Tualatin Parks and Recreation Department, City of Tualatin Finance Department, and City of Tualatin Planning Division.
Funding or Revenue Implications	Changes may reduce or delay SDC revenue to the City.

1.c Evaluate Implementation of a Construction Excise Tax

Description	Type of Action
Evaluate a Construction Excise Tax (CET), a tax assessed on new development and expansions as a percent of the permit value. State statute defines the allowed uses of CET funds and the allowed maximum tax rate. The City of Tualatin could levy a CET on commercial, industrial, and/or residential development. Tualatin has limited land for new residential development within City limits at present; however, revenues from a CET levied on commercial or industrial development could be used for housing programs. At least half of the revenue from a CET on commercial and industrial development would need to be used for local housing programs (capital or programmatic services), but the other half is unrestricted (capital or programmatic services); revenue from a CET on housing would need to go toward housing, with certain percentages toward various specific categories of expenditures. At least eight jurisdictions in Oregon have adopted a CET to fund affordable housing. Most are using or plan to use the revenues to offer grants and/or loans as flexible gap financing for affordable housing development. While it can be used to pay for services, capacity building, etc., the variable nature of the revenues makes it challenging to fund ongoing commitments.	Establish a CET to Allocate Funding

Rationale	CET is one of few options to generate locally controlled funding for affordable housing and could be implemented without a public vote. Industrial development has been strong in Tualatin in recent years. If this continues, a CET on commercial and industrial development could potentially generate enough revenue to allow the City to fund some of its other equitable housing and related strategies.
Anticipated Impact	▪ **Populations served:** Depends on how revenue is used, but would be for extremely low, very low, and low-income and underserved communities. ▪ **Income:** Depends on how revenue is used, but most likely directed toward 0-60% of Median Family Income, however, could be used to meet other income groups, such as contribution to homeownership for households at 61-80% of Median Family Income. ▪ **Housing tenure:** Renter or owner

	▪ **Potential Benefit:** - **Housing Production (new units):** Based on analysis by ECONorthwest, a 0.5-1% CET on commercial and industrial development could generate roughly $200,000-400,000 per year. While this would cover the full cost of only a few units of affordable housing per year, it could pay for SDCs and TDT on roughly 100 units per year. If used as gap financing, it could potentially contribute to funding one or two affordable housing developments per year. - **Equitable Outcomes:** Developing funding sources like CET can support equitable housing programs and development, such as affordable housing and workforce housing. ▪ **Potential Financial Impact:** Homebuyers and businesses that pay the CET will have slightly higher costs for their homes and for commercial or industrial development. The increase in home prices will not exceed 1% as a result of the CET and may be smaller if the City establishes a CET below 1%. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2025 ▪ **Implementation to commence:** 2026 ▪ **Time frame of impact:** If a CET is implemented in 2026, it may take several years for funds to accumulate to an amount that could be used to support development of housing.
Implementation Steps	▪ Evaluate potential approach. Include projections on potential revenue and what programmatic goals could be accomplished with revenue. Include SWOT analysis for both residential and commercial/industrial. ▪ Engage with developers, major employers, and the business community in Tualatin to evaluate tolerance for a CET on commercial and industrial development and where there are shared interests in supporting local housing production. ▪ Seek direction on whether to proceed with adoption from City Council at work sessions. ▪ Tualatin City Council could impose the CET by adoption of an ordinance or resolution that conforms to the requirements of ORS 320.192–ORS 320.195. ▪ If directed, create a plan for the use of CET funds.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division and City of Tualatin Finance Department ▪ **Partners:** Local developers, Chamber of Commerce, major

	employers, and the Tualatin business community
Funding or Revenue Implications	Adopting a CET would provide funding for other strategies. ECONorthwest conducted a preliminary estimate of CET revenue via a backward-looking analysis using the City of Tualatin's permit database for new residential and commercial/industrial construction from the last five years. The results of this analysis are summarized in Appendix B. Because a percentage (4%) of the revenue can be applied to the City's costs for administering the program, there should be minimal additional cost for the City.

1.d Evaluate Support for Affordable and Workforce Rental Housing as Part of Urban Renewal

Description	Type of Action
Evaluate the potential to specifically identify affordable housing (for instance, housing affordable at 0-60% of MFI and workforce affordable housing at 61-80% of MFI) as a goal of existing or future Urban Renewal Plans. As applicable, identify specific affordable housing programs, projects, and/or supportive infrastructure to be included with urban renewal plan(s). TIF funding for affordable housing or other equitable housing would need to gain approval through the City's Urban Renewal process and be consistent with the State Oregon Revised Statute (ORS) 457. TIF (for urban renewal districts) is used as a way to make strategic public investments that spur development in areas where it might not otherwise occur. When successful, the new development leads to an increase in property value and property tax revenue. The increment of new tax revenue from within the district (from the time the district is established) is captured and used to pay off bonds (or directly pay) for the public investments in the area. When the bonds are paid off, the entire valuation of the district is returned to the general property tax rolls. While regulated affordable housing is often tax exempt and does not generate additional tax revenue, some jurisdictions allocate a portion of TIF revenues to fund affordable housing to support equitable development within the TIF district. TIF can be invested in the form of low interest loans and/or grants for housing projects or a variety of capital investments. **Additional Context:** The City of Tualatin is in the process of evaluating two potential new TIF districts: (District 1) the Basalt Creek and Southwest Industrial Area and (District 2) the North Study Area, Bridgeport Village, Town Commons, I-5 Corridor and Tualatin-Sherwood Road. The City also recently modified plans for an existing district (Leveton). While much of the land included in these areas is planned for industrial and commercial use, portions of the potential new districts are planned for residential or mixed-use development. These could be appropriate locations for new affordable housing rehabilitation or mixed-income housing. District 1 potential total TIF revenue over 30 years is estimated to be between $28.4 million and $55.5 million, depending on future growth in assessed value in the area.	Evaluate Affordable Housing Support as Part of Urban Renewal

District 2 potential total TIF revenue over 30 years is estimated to be between $248.2 million and $362.7 million, depending on future growth in assessed value in the area. District 1 is slated to be established in fall of 2021 and District 2 in approximately two years. In determining the resources for affordable housing from TIF, the City would want to consider the specific housing needs of each district. TIF funding for District 1 may be focused more on infrastructure funding to pay for infrastructure needed to support new development. For District 2, the amount of TIF used for housing could be a larger share of TIF funding, as this district may be focused on housing redevelopment.	
Rationale	TIF is one of few available locally controlled sources of funding to build or improve housing. In addition, investing a share of TIF revenues into affordable or mixed-income housing within an area that is a focus for local investment helps support inclusive and equitable housing development in that area.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, low-income, and moderate-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Renter or Owner ▪ **Potential Benefits:** - **Housing Production (new units):** Urban renewal TIF is the largest source of funding over time that could be made available for affordable housing development. The amount of housing production depends on the funds raised and allotted through urban renewal. TIF can only be spent on capital projects, not operations. - **Equitable Outcomes:** Establishing TIF funding for equitable housing may have the greatest impact over time of any single funding sources on equitable housing development in the city to be used to develop affordable housing, workforce housing, mixed-use housing, and mixed-income housing and related infrastructure. ▪ **Potential Financial Impact:** The financial impacts of a URA are borne by overlapping taxing districts, not by individual taxpayers. The financial capacity of two potential new districts on the horizon in Tualatin would not be available immediately but would build slowly over time. In pursing this strategic action in Tualatin, it will be important to get an early start on setting goals and priorities for TIF funding for affordable housing and other

	equitable housing before the URA districts are established. ▪ **Magnitude:** Moderate to Large
Timeline	▪ **Timeline for adoption:** December 32, 2022 ▪ **Implementation to commence:** 2022 ▪ **Time frame of impact:** It would likely be at least 5 to 10 years before there is sufficient revenue in the Urban Renewal District to have enough funds to make significant investment in housing.
Implementation Steps	▪ As part of urban renewal planning for the two potential new districts, evaluate inclusion of affordable housing as a policy. Additionally, identify affordable housing programs, projects, and/or supportive infrastructure. ▪ Proceed with the planning and adoption processes already underway for the two potential new districts, including establishing priorities for the areas, identifying project lists, confirming financial feasibility, preparing required plan documents, and holding adoption hearings.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division and City of Tualatin Finance Department ▪ **Partners:** Tualatin Development Commission; Overlapping taxing districts
Funding or Revenue Implications	TIF results in foregone tax revenue for the City and other overlapping taxing districts for several decades for a variety of types of development investment, though it can (and should) grow the tax base in the long term by supporting development that would not otherwise have occurred.

1.e	Evaluate Financial Resources for Local Contributions to Affordable Housing Development

Description	Type of Action
Evaluate, develop, and promote financial resources for local contribution to affordable housing development. Funds from this effort could be contributed to a Housing Trust Fund Initiative. The City of Tualatin could consider funding sources including foundation grants, private gifts, or other sources to assist with funding contributions to support affordable housing development. The City may consider other sources of funding, such as money from the City's General Fund, Local Option Levy, Cannabis Tax revenues, and other funding sources. Local contributions to affordable housing development are often critical in helping to fill the funding gap for these projects and to compete successfully for other government funding and foundation grants.	Collect Revenue to Allocate Funding to Housing Programs

Rationale	These funds can be used to support incentives and support for affordable housing development, such as tax exemptions.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, and low-income households ▪ **Income:** 0-60% of Median Family Income ▪ **Housing tenure:** Renter ▪ **Potential Benefit:** - **Housing Production (new units):** The amount of housing production depends on the funds raised and contributed through these resources. - **Equitable Outcomes:** Local contributions to affordable housing development could help underserved communities and demonstrate the City's commitment to equity. ▪ **Potential Financial Impact:** Funds spent on affordable housing will be unavailable for other city services, however, these funds may not have been able to be successfully raised otherwise. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2026 ▪ **Implementation to commence:** 2027 ▪ **Time frame of impact:** If this strategic action is implemented in

	2026, it may take several years for funds to accumulate to an amount that could be used to support development of housing.
Implementation Steps	▪ Identify financial sources that the City could use to support affordable housing development. ▪ Develop a Housing Trust Fund as a place to collect funds. ▪ Continue to raise funds over time.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division and Finance Department ▪ **Partners:** State/Federal Agencies, State and National Foundations
Funding or Revenue Implications	Evaluating, developing, and promoting financial resources for local contribution is a comparatively low-cost strategy, primarily relying on the use of staff time. If the City uses General Fund revenue or revenue from other taxes, such as Cannabis Tax revenues, the money from these sources would not be available of use for other purposes in Tualatin.

1.f Evaluate Buildable or Redevelopable Public and Institutional Land Potentially Suitable for Affordable Housing

Description	Type of Action
Periodically evaluate and maintain an inventory of potentially buildable or redevelopable surplus or excess land owned by public agencies and/or institutions to determine its suitability to support development of income-restricted, publicly subsidized, affordable housing. As the facilities needs of public agencies or institutions change over time, properties may not be needed for their originally intended purpose. Also, sometimes sites that are still serving their intended purpose are larger than needed, and the unused portion could be converted to other uses. When these opportunities come up, the City can capitalize on them to support development of affordable housing, but this requires forethought, an intentional approach, and aligning policies and procedures around surplus and excess land and facilities management. Other public agencies and institutions (including religious institutions) may also have land that they no longer need and are willing to make available for affordable housing. Some may be legally required to sell surplus and excess property at fair market value, but others may have flexibility for how they dispose of this land and may be willing to partner with the City to consider opportunities to use this land for affordable housing.	Adopt a Policy or Program to Support Land Acquisition and Disposition

Rationale	Four primary factors influence housing development: (1) ability to secure suitable land, including acquisition costs; (2) access to capital, including equity and bank loans; (3) public policy, such as zoning, density, and design requirements; and (4) market conditions, including depth of demand and rents/sales prices. This strategy allows the City of Tualatin to directly influence the ability to secure land for affordable housing, by offering particular properties only to affordable housing developers. It can also influence the cost of land, by buying down prices to support affordable housing.
Anticipated Impact	▪ **Populations served:** Extremely and very low–income households ▪ **Income:** 0-60% of Median Family Income ▪ **Housing tenure:** Renter ▪ **Potential Benefit:** - **Housing Production (new units):** The amount of housing production depends on the size and number of properties that

	can be converted to affordable housing as a result of this strategy. If this strategy identified 0.5 to 3 acres of surplus or excess land over the eight-year planning horizon, at 30 to 60 units per acre, this strategy could produce between 15 and 180 units of affordable housing. - **Equitable Outcomes:** Land acquisition and land donation for affordable housing development could result in project feasibility by buying down the cost of the overall project; this could contribute to much needed housing for low-income households. ▪ **Potential Risk:** If certain public land is used for affordable housing, it may not be able to be used for other city functions. However, if the land is deemed surplus or excess land, it may not be needed for other city functions. If the land is owned by an institution, such as a church, it may be able to be used, purchased, or donated for affordable housing. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2023 ▪ **Implementation to commence:** 2024 ▪ **Time frame of impact:** Land may be available to support affordable housing development immediately after adoption of this strategic action (or possibly before it is completed). It is also possible that no land will be available by adoption and that land will become available in the future through implementing this strategic action, especially with potential future conversations with land owned by institutions.
Implementation Steps	▪ Inventory City-owned land within Tualatin that may be suitable for affordable housing development and determine what land is currently surplus or excess or may be deemed so in the next few years. ▪ Reach out to other public agencies and institutions, including faith-based organizations, that own land within Tualatin to determine if these entities are willing to include their lands in the inventory. ▪ Review policies and procedures related to surplus and excess lands to determine whether changes or refinements are needed to enable or encourage them to be made available for affordable housing and to establish protocols for how affordable housing developers would be selected when land is available.

Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Public agencies and/or institutions, including faith-based organizations, in Tualatin; affordable housing developers; City of Tualatin Finance Department; other divisions at the City of Tualatin (as needed)
Funding or Revenue Implications	Leveraging currently owned surplus and excess lands does not require direct funding, other than staff time to manage the process. Coordination with other partners primarily requires staff time; however, if the City were to acquire land from partners to control the disposition process, this would require funding. Disposing of surplus and excess land could relieve the City's existing upkeep costs on those lands, but the City may forego revenue by selling the property at below-market value. Depending on whether the affordable housing development is tax exempt (e.g., Housing Authority) or subject to a City-controlled tax exemption, it is possible that after development, the City of Tualatin could experience an increase in their tax base.

1.g	Evaluate Development Code Changes to Allow and Support Other Affordable Rental Housing Types in Tualatin	
Description		**Type of Action**
Evaluate Development Code Changes to allow and support development of other affordable rental housing types in Tualatin that provide affordable housing, beyond the required housing types in House Bill 2001. Other housing options may include dwelling units designed for multiple unrelated individuals living in the same dwelling with shared kitchen and bathrooms such as "adult dorms"; small-scale homes (dwelling units between 100 and 500 square feet); and other innovative, small housing types (such as cargo containers). Allowing and clarifying standards for a diverse array of housing types would require development of clear and objective standards for these housing types.[27] In addition, Tualatin's Development Code does not currently allow small-scale dwellings, such as those at 100 to 500 square feet in size, at densities that would support development of this housing type as affordable housing.		Evaluate Change to Zoning Code
Rationale	Further diversifying Tualatin' housing stock gives residents and prospective residents a wider range of housing options to meet their financial needs and housing preferences.	
Anticipated Impact	▪ **Populations served:** Extremely low and very low–income, low-income, and moderate-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Renter ▪ **Potential Benefit:** - **Housing Production (new units):** This action would not directly result in production of new affordable housing units. However, it is a crucial step in the process necessary to open up more opportunities for production of potentially more affordable types of housing in Tualatin.	

[27] Tualatin's Development Code defines household living as "the residential occupancy of a dwelling unit by a family or household, where the dwelling unit is self-contained with cooking, sleeping, and bathroom facilities." In addition, Tualatin's Development Code defines a household as "one or more persons related by blood, marriage, domestic partnership, legal adoption or guardianship, plus not more than five additional persons, who live together in one dwelling unit." These definitions limit options for living situations with separate living quarters but with shared kitchen and bathrooms (such as "adult dorms"), in situations that do not qualify as group living (as defined by Tualatin's Development Code).

	- **Equitable Outcomes:** This is an opportunity to provide more options for lower-cost housing, which may help underserved communities, people with disabilities, and people with special needs, increasing diversity in neighborhoods. ▪ **Potential Risk:** Allowing smaller units may increase density in existing neighborhoods, with the potential to cause concern for some of the existing residents, while others may welcome it. ▪ **Magnitude:** Indirect, small
Timeline	▪ **Timeline for adoption:** December 31, 2024 ▪ **Implementation to commence:** 2024 or early 2025 ▪ **Time frame of impact:** Impact is small. Impact may be greater if changing the Development Code would allow market-rate and regional affordable housing providers to utilize the new wider range of housing types in Tualatin.
Implementation Steps	▪ Review Development Code to identify and clarify innovative and diverse housing types in the Development Code. Consider housing definitions, types of units permitted, lot dimensions, height standards, and other related standards. ▪ Revise Development Code as needed.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Development community
Funding or Revenue Implications	Evaluating zoning code changes for allowed uses is a comparatively low-cost strategy, primarily relying on the use of staff time.

1.h	Evaluate Municipal Code, Development Code, Public Works Construction Code, and Building Code Processes to Make Building Affordable Housing Easier

Description	Type of Action
Evaluate the City's Municipal, Development, Public Works Construction, and Building Codes processes to identify opportunities to make it easier to develop and build affordable housing. This could include updating the modifications or variance process and requirements, including making allowing modification or variance processes for affordable housing to have a simpler review process than typical, such as not requiring hearings. It could also include prioritizing review of regulated affordable housing development proposals to the maximum extent possible, while also meeting state-required timelines for review of other development proposals. The City has varying administrative roles in land use and building permitting processes. The City could look for opportunities to reduce or expedite these processes, resulting in improved customer service and reduced development timelines. This strategy could include updating the modifications/variance processes and requirements, which would result in making modification/variance processes for affordable housing simpler and quicker (e.g., not requiring hearings).	Evaluate Change to Zoning Code and Other Development Processes

Rationale	Enable easier development of regulated affordable housing in Tualatin. Enable quicker development time frames by demonstrating responsiveness to affordable housing developer needs.
Anticipated Impact	▪ **Populations served:** Extremely and very low–income households ▪ **Income:** 0-60% of Median Family Income ▪ **Housing tenure:** Renter ▪ **Potential Benefit:** - **Housing Production (new units):** In and of itself, this strategic action is not likely to result in development of more housing. It may make affordable housing more feasible to develop by decreasing the permitting time and may be helpful by attracting affordable housing developers to develop in Tualatin. - **Equitable Outcomes:** This is an opportunity to provide more options for lower-cost housing, which may help underserved communities, people with disabilities, and people with special needs, increasing diversity in neighborhoods.

	▪ **Potential Risk:** This strategic action may result in faster review of affordable housing development, possibly decreasing opportunities for public input. Expediting permitting processes for affordable housing may result in minor increases in the time needed for the permitting processes of other development. ▪ **Magnitude:** Low
Timeline	▪ **Timeline for adoption:** December 31, 2024 ▪ **Implementation to commence:** 2024 or early 2025 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Municipal Code.
Implementation Steps	▪ Work with City Council to develop goals for the length of time the permitting process may take. ▪ Identify inefficiencies in the permitting process and make the necessary changes to streamline procedures. ▪ Develop a system to measure and monitor the time it takes for affordable housing proposals to get through the City's development processes. ▪ Survey applicants periodically to assess services and areas for improvement.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** City of Tualatin Engineering and Building Divisions and Legal Services Department
Funding or Revenue Implications	Evaluating Development Code and process changes is a comparatively low-cost strategy, primarily relying on the use of staff time. If additional staff time were needed to support faster review/permitting times, that may require additional funding for the applicable division.

Goal 2. Affordable Homeownership: Encourage and support affordable homeownership to create opportunities for wealth creation.

We recommend that the City pursue the following goal, which supports the existing Goal 3.2, Policy 3.2.1, and Goal 3.3 in the Comprehensive Plan:

- Encourage and support affordable homeownership education and development to increase equitable opportunities for homeownership and generational wealth creation.

The strategic actions to evaluate and potentially implement this goal are described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

2.a Evaluate Impediments to Homeownership and Their Removal

Description	Type of Action
Work with development stakeholder to develop a comprehensive review of the impediments to homeownership opportunities and evaluate actionable steps to remove those impediments. Barriers to homeownership and impediments may include saving for a down payment, access to down payment assistance, poor credit scores restricting households' ability to obtain a mortgage, underproduction of homes for sale relative to demand, and lack of affordable homeownership opportunities (particularly in markets with rising home sales prices). The City may form partnerships with organizations that remove barriers by providing financial assistance, such as down payment assistance or paying down interest rates.	Remove Impediments

Rationale	Homeownership is one of the most effective (and primary ways) for households and individuals to build wealth. Further, renter households are more likely to be at risk of displacement than homeowners.
Anticipated Impact	▪ **Populations served:** Extremely low and very low–income, low-income, and moderate-income households ▪ **Income:** 0-120% of Median Family Income ▪ **Housing tenure:** Owner ▪ **Potential Benefit:** - **Housing Production (new units):** This strategic action does not directly result in production of new housing but is intended to

	make it easier for residents to afford homeownership. - **Equitable Outcomes:** Removing barriers to homeownership opportunities can increase equitable outcomes by making it easier for households with lower incomes to become homeowners. ▪ **Potential Risk:** Impacts are likely to have no negative impact. ▪ **Magnitude:** Indirect, small
Timeline	▪ **Timeline for adoption:** December 31, 2024 ▪ **Implementation to commence:** 2025 ▪ **Time frame of impact:** The strategic action can begin to take effect when it is adopted and implemented, once the impediments to homeownership are removed.
Implementation Steps	▪ Work with partners to better understand impediments to homeownership in Tualatin. ▪ Develop programs or partnerships to lower or remove barriers to homeownership ▪ Provide outreach to eligible, prospective program participants to connect them with homeownership programs.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division Department ▪ **Partners:** Oregon Housing and Community Services; Portland Housing Center or other nonprofits (e.g., Oregon Housing Alliance, Housing Oregon, etc.)
Funding or Revenue Implications	Establishing partnerships and identifying impediments to homeownership are comparatively low-cost strategies, primarily relying on the use of staff time.

2.b Partner to Encourage Education about Homeownership Opportunities

Description	Type of Action
Partner with a nonprofit homeownership education program. Consider partnering with the Portland Housing Center (or other nonprofit) to promote homeownership educational opportunities and to help refer interested people to the program. The Portland Housing Center may be a suitable partner as they currently provide guidance, financial services, and home buyer education to Portland-area residents. Tualatin may provide support to renters in their pursuit of becoming homeowners. The City may also provide support to residents in manufactured housing parks (who own their home but not the lot) to form a cooperative (a group of people organized for the purpose of owning and operating a housing park for the benefit of its members on a not-for-profit basis).	Establish Partnerships

Rationale	Responsible homeownership is one of the most effective (and primary ways) for households and individuals to build wealth. Further, in Oregon, renter households are more likely to be at risk of displacement than homeowners.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, low-income, and moderate-income households ▪ **Income:** 0-120% of Median Family Income ▪ **Housing tenure:** Owner ▪ **Potential Benefit:** - **Housing Production (new units):** This strategic action does not directly result in production of new housing but is intended to make it easier for residents to afford homeownership. - **Equitable Outcomes:** The City partnering with a homeownership education organization could result in new households actively planning with support for first-time homeownership and potentially attaining it. This could open up new opportunities for underserved communities as well as low-income and moderate-income households and others who are interested yet may never have had access to homeownership education and the possibility of wealth creation. ▪ **Potential Risk:** There are likely to be no or minor negative

	impacts. ▪ **Magnitude:** Low to moderate
Timeline	▪ **Timeline for adoption:** June 30, 2022 ▪ **Implementation to commence:** 2022 ▪ **Time frame of impact:** The strategic action can begin to have impacts when the partnerships are formed and the strategic action has begun to be implemented.
Implementation Steps	▪ Review state homeownership resources. ▪ Establish a partnership with a nonprofit focused on encouraging and supporting homeownership opportunities in the Portland Region. ▪ Identify opportunities to help Tualatin residents achieve homeownership. ▪ Provide outreach to residents who rent in Tualatin to support their efforts in achieving homeownership. ▪ Consider offering a workshop or series of workshops on homeownership in coordination with partner organizations.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division Department ▪ **Partners:** Portland Housing Center or other nonprofits (e.g., Oregon Housing Alliance, Housing Oregon, etc.); Oregon Housing and Community Services.
Funding or Revenue Implications	Encouraging residents to pursue homeownership education is a comparatively low-cost strategy, primarily relying on the use of staff time and/or community partners with support from staff to reach out to prospective/interested residents.

2.c Partner with Organizations that Develop Affordable Ownership Housing

Description	Type of Action
Explore partnership opportunities with a homeownership development organization, such as Habitat for Humanity or a land trust like Proud Ground, that develops and constructs affordable homes to own for households earning 0-80% Median Family Income. Habitat for Humanity (Portland Region) builds homes purposed for affordable homeownership for qualified, low-income families. Proud Ground is a community land trust that provides permanently affordable housing opportunities through funding that creates affordable home buying opportunities and management of real estate to ensure it remains permanently affordable. Tualatin could partner with these or other affordable housing development organizations, for example, by offering surplus or excess land (see Action 1.f), helping to identify suitable land, assisting with the assemblage of land, and providing support on funding applications for homeownership development in Tualatin or local gap funding contribution if funds are available such as through a Housing Trust Fund.	Establish Partnerships

Rationale	Increase the supply of housing available for homeownership for households with income below 80% of MFI.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, low-income, and moderate-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Owner ▪ **Potential Benefit:** - **Housing Production (new units):** The amount of housing to be produced over a six-year period as a result of this is likely to be on the order of 10 to 30 units, depending on the land or funds the City has to contribute to this effort. - **Equitable Outcomes:** The City partnering with a homeownership development organization could result in increased opportunities for homeownership for households that cannot generally afford homeownership. This could open up new opportunities for underserved communities as well as low-income and moderate- income households and others who are interested in homeownership and the possibility of wealth creation. ▪ **Potential Risk:** There are likely to be no or minor negative

	impacts. ▪ **Magnitude:** Low to moderate
Timeline	▪ **Timeline for adoption:** December 31, 2023 ▪ **Implementation to commence:** 2024 ▪ **Time frame of impact:** The strategic action can begin to have impacts when the partnerships are formed and the strategic action has begun to be implemented.
Implementation Steps	▪ Establish a partnership with a homeownership development organization to support development of affordable homeownership opportunities. ▪ Identify funds (or land in Strategic Action 1.f) available to support affordable homeownership development
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Habitat for Humanity, Proud Ground, or other homeownership development organizations
Funding or Revenue Implications	Revenue implications vary depending on the amount of monetary support the City of Tualatin is willing to provide. Monetary support would reduce division budgets or general fund dollars unless a new funding source (tax or fee) is established/enacted.

2.d	Evaluate Development Code to Encourage Diverse Housing Types for Affordable Homeownership

Description	Type of Action
Evaluate Development Code changes to allow and support development of other affordable ownership housing types in Tualatin that provide affordable housing, beyond the required housing types in House Bill 2001. Other housing options may include dwelling units designed for multiple unrelated individuals living in the same dwelling with shared kitchen and bathrooms such as cohousing; small-scale homes (dwelling units between 100 and 500 square feet); and other innovative, small housing types (such as cargo containers). Allowing and clarifying standards for a diverse array of housing types would require development of clear and objective standards for these housing types.[28] In addition, Tualatin's Development Code does not currently allow small-scale dwellings, such as those at 100 to 500 square feet in size, at densities that would support development of this housing type as affordable housing.	Making Zoning Code Changes

Rationale	Comparatively small dwelling units can help meet identified housing needs for Tualatin's workforce, particularly affordable homeownership opportunities.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, low-income, and moderate-income households ▪ **Income:** 0-120% of Median Family Income ▪ **Housing tenure:** Owner ▪ **Potential Benefit:** - **Housing Production (new units):** This action would not directly result in production of new units. But it is necessary to remove barriers to production of more types of housing in Tualatin. - **Equitable Outcomes:** This is an opportunity to provide more

[28] Tualatin's Development Code defines household living as "the residential occupancy of a dwelling unit by a family or household, where the dwelling unit is self-contained with cooking, sleeping, and bathroom facilities." In addition, Tualatin's Development Code defines a household as "one or more persons related by blood, marriage, domestic partnership, legal adoption or guardianship, plus not more than five additional persons, who live together in one dwelling unit." These definitions limits options for living situations with separate living quarters but with shared kitchen and bathrooms (such as "adult dorms"), in situations that do not qualify as group living (as defined by Tualatin's Development Code).

	lower-cost homeownership opportunities, which may help underserved communities and lower-income households, increasing diversity in neighborhoods. ▪ **Potential Risk:** Allowing smaller units may increase density in existing neighborhoods, with the potential to cause concern for some of the existing residents but may be welcomed by other residents. ▪ **Magnitude:** Indirect, small
Timeline	▪ **Timeline for adoption:** December 31, 2024 ▪ **Implementation to commence:** 2024 or early 2025 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code.
Implementation Steps	▪ Review Development Code to identify and clarify innovative and diverse housing types in the Development Code. Consider housing definitions, types of units permitted, lot dimensions, height standards, and other related standards. ▪ Revise Development Code as needed.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Development community
Funding or Revenue Implications	Evaluating zoning code changes for allowed uses is a comparatively low-cost strategy, primarily relying on the use of staff time.

Goal 3. Preservation of Regulated Affordable Housing: Preserve affordable housing to prevent the loss of existing affordable housing units and to prevent resident displacement.

We recommend that the City pursue the following goal, which supports the existing Goals 3.2 and 3.3 in the Comprehensive Plan:

- Preserve affordable housing to prevent the loss of existing affordable housing units and to prevent resident displacement.
- Ensure and support no net loss for affordable housing in the City through preservation of one-for-one unit replacement that will retain at least the current number of housing units affordable to households at or below 60% of area Median Family Income (MFI). The City would track and report on the no net loss of affordable housing annually and ensure there are affordability agreements to maintain long-term affordability.

The strategic actions to evaluate and potentially implement this goal are described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

3.a Evaluate How to Support Preservation of Regulated Affordable Rental Housing

Description	Type of Action
Encourage and support preservation of affordable rental housing for households earning 0-60% Median Family Income, working with the State and affordable housing partners to ensure no net loss of regulated affordable housing units. Two of Tualatin's three regulated housing properties have Low-Income Housing Tax Credit (LIHTC) projects that are privately owned and expire in 7 and 10 years, respectively. With nothing in place to protect from loss of these units upon expiration of the LIHTC, especially with the expansion of urban renewal districts and planning for redevelopment, these units could be lost. The City could, at a minimum, track the expiration of the tax credits for these properties. Recent state legislation established a regulatory framework for multifamily rental housing developments with expiring affordability restrictions across a range of state funding programs. Owners must give notice to local government and the state when affordability restrictions will expire, and owners must provide the	Adopt a Program

opportunity for the state, local government, or designee to make an offer to purchase the property and to match a competing offer.[29]

The City could also develop a program to enforce a policy about no net loss of regulated affordable housing, in addition to tracking expiration of the tax credits. If the City develops a policy to avoid losing regulated affordable housing, it will need to identify how to support and enforce that policy, as discussed below.

Two of Tualatin's three regulated housing properties have Low-Income Housing Tax Credit (LIHTC) projects that are privately owned and expire in 7 and 10 years, respectively. Preserving affordability of these properties is a priority for the City. The legislation mentioned above can make it easier for Tualatin to track these properties. The City may also want to have outreach to these property owners to establish relationships with them and better understand their intentions when the tax credits are near to expiration.

For these or other properties in a similar situation, the City could work to identify organizations (e.g., nonprofit affordable housing providers) that might be willing and able to acquire the properties if the owners seek to sell or convert them to market rate. The City could also reach out to the property owner before the end of the affordability period to offer technical assistance with preservation options and make them aware of any City programs or incentives available at that time to support maintaining affordability (e.g., tax exemptions).

Rationale	Preservation of existing and expiring regulated affordable housing is a more cost-effective strategy to maintain the supply than building new affordable housing.
Anticipated Impact	▪ **Populations served:** Extremely low and very low–income residents and households ▪ **Income:** 0-60% of Median Family Income ▪ **Housing tenure:** Renter ▪ **Potential Benefit:** - **Housing Production (new units):** Tualatin has three regulated affordable housing units with a total of 604 income-restricted units. One of these developments (with 100 units made affordable through the LIHTC) is set to expire in January 2028. Preserving this development, for example, could maintain 100

[29] Oregon Housing and Community Services (OHCS), "Preservation Compliance (for Owners)," https://www.oregon.gov/ohcs/compliance-monitoring/Pages/push.aspx. Accessed 3/18/21.

	units of affordable housing in the city, resulting in no net loss of regulated affordable housing units, which is a significantly positive impact. However, this strategy would not directly result in the production of new units. - **Equitable Outcomes:** Residents living in affordable housing with tax credits coming up for expiration may be particularly vulnerable to displacement. Preservation and no net loss policies for regulated affordable housing may offer a level of protection from displacement for low-income and vulnerable residents living in affordable housing. - **Potential Risk:** There are likely to be no or minor negative impacts. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2025 ▪ **Implementation to commence:** 2026 ▪ **Time frame of impact:** This strategic action will begin to take effect in 2026. The impact will really be felt as the existing tax exemptions begin to expire on a property-by-property basis, which will begin to occur after this strategic action is implemented.
Implementation Steps	▪ Reach out to the GSL Properties (property owners of Terrace View, Tualatin Meadows, and Woodridge) to learn their plans for these properties once affordability restrictions expire. If ownership has changed, then reach out to current property owner. ▪ The City may offer assistance or connect the property owner to other supportive options should any of these properties be at risk for converting back to market rate.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** GSL Properties and other property owners of affordable housing in Tualatin.
Funding or Revenue Implications	Outreach to a single property owner is a low-cost strategy, primarily relying on the use of staff time. Depending on the program, a no net loss policy may involve a funding source to carry it out, such as CET.

3.b Evaluate Developing a Healthy Housing Initiative for Multifamily Housing

Description	Type of Action
Evaluate developing a Healthy Housing Initiative to address life safety, mold, lead, and ventilation issues for multifamily housing. A Healthy Housing Initiative could involve proactive inspection of renter-occupied multifamily properties to identify issues similar to those mentioned above. In addition, this initiative could include an educational component to provide information on how to prevent these issues from developing and funding plan to address the issues identified through inspections. This strategic action would be connected with Action 8.b, a Healthy Housing Initiative for Single-Family Housing	Implement a Program to Provide Financial Resources

Rationale	To improve older multifamily properties in Tualatin that are lower cost, unregulated, and deteriorating. The City needs this housing stock, and it is important that housing stays affordable while ensuring habitable and healthy conditions for residents.
Anticipated Impact	▪ **Populations served:** Extremely low and very low–income, and low-income ▪ **Income:** 0-80% Median Family Income ▪ **Housing tenure:** Rental ▪ **Potential Benefit:** - **Housing Production (new units):** This action focuses on addressing safety problems in existing housing, not producing new housing. If this action is used to assist 10 to 25 households per year, it may help 60 to 150 households over the 6-year period for the HPS. - **Equitable Outcomes:** Residents living in rental housing in poor condition are more likely to have lower incomes and fewer housing choices. Supporting a Healthy Housing Initiative can improve the conditions of rental housing, which may help protect vulnerable residents. ▪ **Potential Risk:** Most negative impacts would be borne by the property owner to address identified deficiencies, though there likely would be positive impacts for the property owner too, such as property value increases and longer-term renters, resulting in increased revenue. If the property owner makes substantial changes to the housing and must bear the entire cost, that may

	result in increased rents without some form of rent control agreement. ▪ **Magnitude:** Moderate to large, depending on the outreach of the program
Timeline	▪ **Timeline for adoption:** December 31, 2024 ▪ **Implementation to commence:** 2025 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented.
Implementation Steps	▪ Evaluate the benefit of establishing a Healthy Housing Initiative with interested stakeholders and the public. Conduct outreach to housing consumers and property owners/managers of older, multifamily rental properties to gauge interest in resources and to identify questions/concerns about a potential inspection program. ▪ If the initiative is deemed important, draft code language that covers mold, lead, ventilation, and other healthy/safety issues. ▪ Develop an educational component of the program in coordination with the Community Development Department with representation between Planning, Building, and Engineering. ▪ Establish program parameters: How can residents file complaints? How are inspections administered? How are alleged issues communicated to property owners? How are mitigation requests enforced? ▪ Establish source of funds to administer the program. ▪ Discuss topic with City Council at work sessions and in a public hearing if desired. Tualatin City Council may adopt the program and code language via ordinance.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Washington County Public Housing Authority, Community Alliance of Tenants (CAT)
Funding or Revenue Implications	A source of funds to administer the program may be needed, such as CET funds. Alternatively, some additional staff time may be needed if the program is primarily informational.

Goal 4. Preservation of Naturally Occurring Affordable Housing (NOAH): Preserve naturally occurring affordable housing, where possible, to prevent loss of affordable units and to mitigate resident displacement.

We recommend that the City pursue the following goal, which supports the existing Goals 3.2 and 3.3 in the Comprehensive Plan:

- Preserve naturally occurring affordable housing to prevent loss of affordable units and to prevent and mitigate resident displacement.

Implementing this goal will require developing a program to preserve "naturally occurring affordable housing" through acquisition, low interest loans/revolving loan fund for preservation, code enforcement, or other approaches. The strategic actions to evaluate and potentially implement this goal are described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

4.a Evaluate Development of Incentives to Preserve Low-Cost Rentals for Below-Market-Rate Privately Owned Rental Housing

Description	Type of Action
Evaluate options to assist with needed improvements to existing low-cost rental housing where the housing is in poor condition. The options may include a tax abatement (such as the Multi-Unit Property Tax Exemption), low interest loan program, or other financial incentives for low-cost market-rate apartments that agree to make needed improvements (e.g., to address code violations or health/safety issues) without displacing existing residents or agree to stabilize or reduce rents. Needed improvements may include addressing code violations or health/safety issues. The City would need to ensure they only grant financial incentives to property owners who agree to stabilize/reduce rents or not displace existing residents. Much of the rental housing in Tualatin that is affordable to low and moderate-income households is older, privately owned rental housing that is not subject to affordability restrictions. This housing may have deferred maintenance issues as a result of a lack of resources to make improvements and pay for repairs (or, in some cases, owner neglect). The City could work with property owners of low-cost unregulated rental housing to support needed repairs without displacing tenants. This could include: ▪ Offer low interest loans and/or grants to property owners for	Establish Financial Incentives

repairs and major rehabilitation, providing they do not displace residents. ▪ Evaluate reducing regulatory requirements and permitting challenges for owners seeking to improve older rental housing. ▪ Provide information/technical assistance to smaller property owners regarding state and local resources to support weatherization and healthy housing. ▪ Use the Multi-Unit Property Tax Exemption (Action 4.b) to support rehabilitation of multifamily housing, as described in Action 4.b. The City may want to begin implementing this strategic action with a limited scope pilot program to test and fine tune this program.	
Rationale	This action focuses on improvement of the condition of existing housing. Keeping low-cost unregulated housing both habitable and affordable reduces the need for subsidized new construction.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, and low-income ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Renter ▪ **Potential Benefit:** - **Housing Production (new units):** This strategy is not anticipated to produce new units, but it could improve the quality of the city's existing supply of low-cost, regulated rental units. - **Equitable Outcomes:** Preservation mechanisms would protect these vulnerable populations from housing displacement. ▪ **Potential Risk:** If there are not effective mechanisms in place to ensure that housing will be affordable for the populations served, the rents may increase, making the housing less affordable and potentially displacing tenants. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2026 ▪ **Implementation to commence:** 2027 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented, as the incentives start to be used.
Implementation Steps	▪ Define eligibility for this program based on income. Eligibility requirements should tell whether all units in the multifamily building serve households with incomes 80% of MFI or less or whether a minimum percentage of units should be rented to

	households with incomes below 80% of MFI. In addition, the City should determine whether assistance goes to the property owner or another entity ▪ Develop a list of lower-cost, unregulated rental housing, including property locations, number of units per development, and property owner contact information. ▪ Evaluate programs, technical assistance opportunities, regulatory changes, and other options to support property improvements. This step can include multiple approaches, as noted in the description of this action. ▪ Reach out to property owners (identified in Step 1). Gauge their interest in improving the safety, health, and stability of their property. Determine what kinds of improvements their properties might need and what resources would be most useful to them. ▪ Refine and implement programs, technical assistance opportunities, regulatory changes, and other options (identified in Step 2) based on feedback from property owners. ▪ Connect interested property owners to established programs and opportunities. ▪ Seek additional federal funding through the US Department of Housing and Urban Development's (HUD's) Lead Hazard Control and Healthy Homes program
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Property owners of low-cost, unregulated rental housing
Funding or Revenue Implications	Amending permitting and regulatory requirements or providing technical assistance and information are comparatively low-cost strategies, primarily relying on the use of staff time. Providing low interest loans, grants, or implementing the MUPTE tax exemption would require a funding source to backfill program dollars awarded/loaned. Implementing a new program such as the HUD Lead Hazard Control and Healthy Homes program would take extensive administrative and partner resources to meet federal regulatory requirements, including performance measures.

4.b	Evaluate Using the Multiple Unit Property Tax Exemption to Slow Rental Cost Increases

Description	Type of Action
Evaluate the Multi-Unit Property Tax Exemption (MUPTE) as a tool to incentivize rehabilitation of existing low-cost unregulated affordable multifamily without displacing or increasing rents for existing tenants. The savings from the tax exemption could help the property owner pay for the costs of rehabilitation over time. To qualify, owners of multifamily rental properties who are applying for MUPTE would need to enter into a contract with a public agency (such as the City of Tualatin) that would set affordability restrictions; the terms of the affordability restrictions can be set by the City, and there are no specific income/affordability requirements in the state statute that enable the program. The City must also show that the exemption is necessary to preserve or establish low-income units.[30] The exemption applies to the improvement value of the property (not the land value). The exemption is initially for 10 years (per statute), but it could be extended for as long as the housing is subject to the affordability contract. The exemption would apply only to the City's portion of property taxes unless taxing districts representing 51% or more of the combined levying authority (including the City's tax rate) agree to support the exemption.	Adopt a Tax Exemption to Reduce Ongoing Charges on Development

Rationale	The MUPTE program is flexible and eligibility criteria can be set locally, allowing the City to target solutions to meet its needs. It can offer an incentive for mixed-income housing, providing a way to leverage private, market-rate development to expand affordable housing.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, and low-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Rental ▪ **Potential Benefit:** - **Housing Production (new units):** If this incentive was used for one to two existing apartment buildings at about 150 units

[30] The statute does not specify how to show that the exemption is necessary.

	each, if 10-20% of units were affordable, this strategy could result in 30 to 60 units below market rate. - **Equitable Outcomes:** This strategic action would preserve naturally occurring affordable housing for tenants, such as those vulnerable to displacement or housing instability if rents increased or rent discounts were not offered. ▪ **Potential Risk:** The City and participating taxing districts would forgo property tax income for the properties that qualify for MUPTE. This would reduce some revenue for city services and for participating taxing districts. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2026 ▪ **Implementation to commence:** 2027 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented, when property owners begin to apply for the tax exemption.
Implementation Steps	▪ Determine desired eligibility criteria (e.g., affordability requirements and any other public benefit requirements). ▪ Seek input from overlapping taxing districts on their willingness to support the exemption. ▪ Discuss topic with City Council at work sessions and in public hearings. City Council may choose to adopt MUPTE by resolution or ordinance following a public hearing. ▪ Follow up with overlapping taxing districts to request that they pass resolutions to support the exemption.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division and City of Tualatin Finance Department ▪ **Partners:** Overlapping Taxing Districts
Funding or Revenue Implications	MUPTE reduces general fund revenues for all overlapping taxing districts. The City of Tualatin must weigh the loss of tax revenue against value of the rent discounts offered by qualifying development.

Goal 5. Housing for Underserved Communities: Implement housing policies, projects, programs, and partnerships to further support racial and social equity.

We recommend that the City pursue the following goal, which supports the existing Goal 3.2 and Goal 3.3 in the Comprehensive Plan:

- Implement all City housing policies with consideration for racial and social equity, which recognizes historical inequities in housing to underserved communities and aims to rectify inequities going forward by establishing an equitable housing program and a measurable action plan toward equitable housing.
- City of Tualatin affirmatively furthers access to decent, affordable housing in locations near the services and destinations to thrive, ensuring equal access for underserved communities.
- Promote access to opportunity by encouraging and supporting affordable housing, workforce housing, mixed-use housing, and mixed-income housing that meets the cultural needs of diverse populations by providing multiple unit sizes, types, and tenure options in high-opportunity areas.

The strategic actions to evaluate and potentially implement this goal are described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

5.a Consider Development of a Funding Action Plan to Implement the HPS with Attention to Equity

Description	Type of Action
Consider development of a funding action plan that would include how best to implement the strategic actions in the Housing Production Strategy (HPS) through considerations of equity. Implementing housing policies in an equitable way goes beyond affordability—it aims to ensure all people have housing choices that are diverse, high quality, physically accessible, and reasonably priced with access to opportunities, services, and amenities (e.g., transit, schools, childcare, food, and parks). These issues are addressed throughout the 12 goals and the strategic actions in the HPS. A key to implementing the HPS with consideration of equity is identifying and securing resources to implement the HPS. The City could develop an action plan that refines the schedule described in the HPS and develop a confirmed budget with identified funding sources for the implementation of the HPS. This action plan could be adopted by City Council. Part of implementation of the HPS could be ongoing outreach to underserved communities to get feedback on prioritization of action and resources called for in the HPS. This outreach could build on the Equity Resolution adopted by the City Council on February 22, 2021, that confirms the City of Tualatin's commitment to local actions that promote equity and other equity planning the City has recently been engaged in. A part of implementing the HPS will be assessing, aligning, and updating the strategic questions, perhaps at the three-year point of the HPS. Key questions that the City could consider at this point include: • Is there a need to reprioritize the strategic actions based on changing conditions or feedback from stakeholders, including underserved communities? • Are additional actions needed to address new or changing conditions? • How will the City fund implementation of the HPS? • Is staff capacity sufficient to meaningfully advance the strategic actions?	Develop a Funding Action Plan

• What benefits has the City seen from its efforts to date? Are the City's residents, especially its lower-income residents and communities of color, seeing a return on the investments that the City has made? These and other questions could be addressed as part of developing the funding action plan.	
Rationale	The purpose of a HPS is to increase access to housing with an emphasis on low and moderate-income households but also to further racial and social equity.
Anticipated Impact	▪ **Populations served:** Low-income and moderate-income households, underserved communities, communities of color, other state and federal protected classes ▪ **Income:** Emphasis on households with incomes below 120% of Median Family Income ▪ **Housing tenure:** Renter or Owner ▪ **Potential Benefit:** - **Housing Production (new units):** This strategy alone would not result in additional units, but it may result in better housing outcomes for more people. - **Equitable Outcomes:** This strategic action is aimed at developing an equitable action plan to support the HPS work. This may need to be done in two phases (as noted in Exhibit 6) as the evaluation of funding resources and incentives are planned to occur over the course of the six-year HPS. This process may raise community awareness and increase participation from underserved communities. ▪ **Potential Risk:** The strategy will require explicit consideration of funding sources, which may raise issues and considerable dialogue regarding specific funding strategies. This is not necessarily negative, but it could be challenging. ▪ **Magnitude:** Indirect, large
Timeline	▪ **Timeline for adoption:** June 30, 2023 ▪ **Implementation to commence:** 2023 ▪ **Time frame of impact:** This strategic action will begin to have impact when adopted. However, the funding plan resulting from this strategic action is central to the implementation of other parts of HPS.

Implementation Steps	▪ Identify City's overarching policy objectives for equity and understand how housing equity fits into those objectives. ▪ Develop a public engagement plan that can guide conversations with the community, stakeholders, housing producers, and service providers. Focus conversations on opportunities and constraints related to equitable development and the priorities of the strategic actions in the HPS to build equity. ▪ Through these conversations, identify and document recommendations for prioritization of resources and strategic actions to achieve more equitable housing outcomes. ▪ Identify specific sources of funding for implementing the HPS and establish a budget for implementing each action. ▪ Report on the findings of engagement and implementation progress of the HPS, with recommendations for consideration by the Tualatin City Council. ▪ Tualatin City Council should revisit prioritization of the strategic actions in the HPS based on these findings.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Underserved communities in Tualatin, Tualatin TuaLatinos (previously the Diversity Task Force), all residents of Tualatin, Tigard-Tualatin School District, Washington County Housing Authority, Metro, area developers, service providers, nonprofits, and residents of Tualatin.
Funding or Revenue Implications	Research and development of an analysis to impediments is a time-intensive analysis, primarily relying on the use of staff time. The City may consider approaching Metro about funding this type of outreach, as it is closely connected with the equitable housing planning grants that Metro has made since 2016. The next grant funding cycle will start in fall 2021.

5.b Evaluate Impediments to Fair Housing to Create an Analysis of Impediments

Description	Type of Action
Evaluate impediments to Fair Housing and create an Analysis of Impediments, starting with Washington County's Analysis of Impediments completed in May 2020.[31] Fair housing is the right to choose housing free from unlawful discrimination. An analysis of impediments to fair housing is a process that recipients of grant funds from the US Department of Housing and Urban Development (HUD) must go through to receive funds. Jurisdictions can choose to conduct this analysis to affirmatively further fair housing on their own. An analysis of impediments would identify fair housing issues in Tualatin (in the context of Washington County), the factors that contribute to those issues, and strategies to address those issues. Among other topics, the analysis would consider patterns of segregation, racial/ethnic concentrations of poverty, and disproportionate access to opportunity and housing needs. The analysis concludes with a set of recommendations to inform future policies that will promote fair housing choice and inclusivity.	Conduct Research and Develop Policy Recommendations

Rationale	Improving fair housing is foundational to family success and helps to achieve broader equity goals.
Anticipated Impact	▪ **Populations served:** Low-income, moderate-income, and high-income residents and households, communities of color, and all state and federal protected classes ▪ **Income:** All income groups ▪ **Housing tenure:** Renter or Owner ▪ **Potential Benefit:** - **Housing Production (new units):** This strategy alone would not result in additional units, but it may result in better housing outcomes for more people. - **Equitable Outcomes:** Likely to increase community awareness regarding fair and equitable housing and inform future policies. ▪ **Potential Risk:** This strategic action may raise challenging issues

[31] https://www.co.washington.or.us/CommunityDevelopment/Planning/upload/FinalAI.pdf

	and considerable community dialogue, but it is also likely to result in increased community awareness and a useful set of recommendations. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2024 ▪ **Implementation to commence:** 2025 ▪ **Time frame of impact:** The strategic action will begin to have impact once the analysis is completed and the impediments begin to be removed.
Implementation Steps	▪ Establish a planning process to develop an analysis of impediments, following HUD guidelines. Establish recommendations to resolve impediments. ▪ Conduct public and stakeholder outreach to gather feedback on the recommendations. ▪ Pursue action with City Council, should the plan's recommendations lead to a desire to revise or adopt new policies.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** City Council, Tigard-Tualatin School District, Washington County, Metro, Oregon Housing and Community Services, area developers, service providers, nonprofits, and regional foundations.
Funding or Revenue Implications	Research and development of an analysis to impediments is a time-intensive analysis, primarily relying on the use of staff time. If the City hires a consultant to complete the analysis, the amount of staff time required to complete the analysis will decrease and the City will need to fund the cost of the consultant's analysis. The City should consider hiring a consultant to complete this analysis and assist community engagement. The consultant should have considerable expertise in fair housing and fair housing analysis.

5.c	Evaluate Ways to Best Ensure Opportunities for Education about Fair Housing Are Provided

Description	Type of Action
Ensure there are opportunities for education about Fair Housing for residents, property owners, property managers, those involved in real estate transactions, Tualatin City staff, Tualatin Planning Commission, and Tualatin City Council. The City could contract with the Fair Housing Council of Oregon to conduct these trainings.	Provide Education

Rationale	Education about Fair Housing is important to preventing and addressing housing discrimination.
Anticipated Impact	▪ **Populations served:** Low-income, moderate-income, and high-income residents and households, communities of color, and all state and federal protected classes. ▪ **Income:** All income levels ▪ **Housing tenure:** Renter or Owner ▪ **Potential Benefit:** - **Housing Production (new units):** This strategy alone would not result in additional units, but it may result in better housing outcomes for more people. - **Equitable Outcomes:** This strategic action is likely to raise community awareness about this topic and help to prevent discrimination. ▪ **Potential Risk:** There are likely to be no or minor negative impacts. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** No need for adoption or official action, as this strategic action is about forming a partnership. ▪ **Implementation to commence:** 2023 ▪ **Time frame of impact:** The strategic action can begin to have impacts when the partnerships are formed and the strategic action has begun to be implemented.
Implementation Steps	▪ Partner with the Fair Housing Council of Oregon to identify educational needs and conduct trainings. These trainings should occur on a regular basis, such as every few years. ▪ Tualatin could provide written Fair Housing information for residents, property managers, property owners, and those involved with real estate transactions.

Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Fair Housing Council of Oregon
Funding or Revenue Implications	By partnering with the Fair Housing Council of Oregon, this is likely to be a lower-cost strategy, primarily relying on the use of staff time to coordinate education opportunities and funding to pay for the trainings.

5.d Evaluate Strategies to Encourage Diverse Housing Types in High-Opportunity Neighborhoods

Description	Type of Action
Encourage development of diverse housing types in high-opportunity neighborhoods, such as neighborhoods with high environmental quality and access to transit, jobs, good schools, parks, and open spaces. Enable developments that support multiple unit sizes, types, and tenure options to promote diverse housing options in high-opportunity neighborhoods. Use an analysis of "access to opportunity" to decide which zones or locations (via zoning overlay) where this is appropriate. The purpose of this strategy is to promote access to opportunity to households with a range of backgrounds and incomes. This strategy may work well with the incentives for development of affordable and workforce housing.	Provide Education

Rationale	Reverse historical patterns of racial, ethnic, cultural, and socioeconomic exclusion.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, low-income, and moderate-income households, communities of color, and all state and federal protected classes ▪ **Income:** 0-80% of Median Family Income ▪ **Housing Tenure:** Renter ▪ **Potential Benefit:** - **Housing Production (new units):** This strategy may result in a modest increase in development of new diverse housing types that are smaller in size across the city, especially on small infill lots. - **Equitable Outcomes:** By locating a diverse range of smaller housing types in high-opportunity areas, it may increase access to amenities for households at 80% MFI and below to better schools, parks, modes of transportation, health-care facilities, shopping, and other neighborhood amenities they might not otherwise have had access to. ▪ **Potential Risk:** Allowing more diverse housing types may increase density in existing neighborhoods, with the potential to cause concern by some of the existing residents. ▪ **Magnitude:** Moderate

Timeline	▪ **Timeline for adoption:** December 31, 2024 ▪ **Implementation to commence:** 2024 or early 2025 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented. It may take some years after implementation for development resulting from this strategic action to begin to occur.
Implementation Steps	▪ Identify high-opportunity areas and capacity in these areas to accommodate a range of housing types. ▪ Evaluate incentives and regulatory changes that would support diverse housing in opportunity areas, such as MUPTE or a property tax exemption for regulated affordable housing. ▪ Talk with developers about the incentives most likely to incent them to develop a wider variety of housing types in identified opportunity areas.
Lead Agency and Potential Partners	▪ **Lead Agency:** Tualatin Planning Division ▪ **Partners:** Developers of affordable housing, workforce housing, and market-rate housing.
Funding or Revenue Implications	This is a comparatively low-cost strategy, primarily relying on the use of staff time.

Goal 6. Workforce Housing: Encourage, plan for, and support the development of workforce housing for households earning 61%-80% Median Family Income, for both owner and renter, in order to increase the jobs-housing balance, reduce commute time, and provide attainable housing for workers in Tualatin.

We recommend that the City pursue the following goal, which supports the existing Goal 3.2 in the Comprehensive Plan:

- Encourage, plan for, and support the development of workforce owner and rental housing, 61-80% Median Family Income to increase the jobs-housing balance, reduce commute time, and provide attainable housing for workers in Tualatin.

The strategic actions to evaluate and potentially implement this goal are described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

6.a Evaluate Ways to Incentivize Inclusion of Workforce Housing Units within New Multifamily Rental Development

Description	Type of Action
Evaluate the feasibility of establishing a tax abatement for new multifamily development that includes a portion of units affordable between 61 and 80% of Median Family Income under the Multi-Unit Property Tax Exemption program (MUPTE). The state-authorized, locally implemented MUPTE program would allow Tualatin to offer a partial property tax exemption (limited to the value of the housing, not the land) for multifamily development that meets specific, established criteria by the City, such as having an affordability agreement with the City of Tualatin or another public agency.[32] The terms of the affordability agreement could be set by the City—there are no specific income/affordability requirements in the state statute that enables the program. The exemption would apply only to the City's portion of property taxes, unless taxing districts representing 51% or more of the combined levying authority (including the City's tax rate) agree to support the exemption. It would last for 10 years or longer if the affordability agreement remains in place. The City would need to seek support from overlapping taxing districts to offer the exemption for all property taxes (not just the City's portion).	Adopt a Tax Exemption

[32] If the abatement were being applied to a project that does not have state or federal affordability requirements, the City could enter into the contract directly with the property owner or seek to partner with Washington County, which would administer the affordability agreement.

The City could explore using MUPTE in two possible ways: ▪ To incentivize mixed-income development through inclusion of below-market units in otherwise market-rate developments. ▪ To incentivize owners of existing low-cost unregulated affordable housing to rehabilitate properties without displacing existing tenants or escalating rents (Strategic Action 4.b).	
Rationale	The MUPTE program is flexible and eligibility criteria can be set locally, allowing the City to target the housing to meet its needs. It can offer an incentive for mixed-income housing, providing a way to leverage private, market-rate development to expand affordable housing.
Anticipated Impact	▪ **Populations served:** Low-income residents and households ▪ **Income:** 61-80% of Median Family Income ▪ **Housing tenure:** Renters ▪ **Potential Benefit:** - **Housing Production (new units):** If this incentive was used for one to two apartment buildings at about 150 units each and 10-20% of units were affordable to low-income households,[33] this strategy could result in 30 to 60 workforce-affordable units. - **Equitable Outcomes:** Provides the opportunity for mixed income in multifamily housing, with a portion of units affordable to low-income residents. ▪ **Potential Risk:** The City and participating taxing districts would forgo some property tax income for the duration of the exemption, reducing some revenue for city services and revenue for participating taxing districts. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2026 ▪ **Implementation to commence:** 2027 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented, when property owners begin to apply for the tax exemption.

[33] Where jurisdictions are trying to incentivize or require mixed-income housing, it is typically structured so that a certain percentage of units in the building (e.g., 10% to 25%) meet a certain affordability level (e.g., 61% to 80% of MFI).

Implementation Steps	▪ Determine desired eligibility criteria (e.g., affordability requirements and any other public benefit requirements). ▪ Seek input from overlapping taxing districts on their willingness to support the exemption. ▪ Discuss topic with City Council at work sessions and in public hearings. City Council may choose to adopt MUPTE by resolution or ordinance following a public hearing. ▪ Follow up with overlapping taxing districts to request that they pass resolutions to support the exemption.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Tualatin Finance Department and Overlapping Taxing Districts
Funding or Revenue Implications	MUPTE reduces general fund revenues for all overlapping taxing districts. The City of Tualatin must weigh the loss of tax revenue against value of the rent discounts offered by qualifying development.

6.b Evaluate Potential Partnerships with Employers on Employer-Assisted Housing

Description	Type of Action
Evaluate the potential for the City to partner with one or more area employers to develop an Employer Assisted Housing program. Employer Assisted Housing can take many forms, such as: short-term relocation assistance, medium-term rental assistance, and homeownership assistance (such as down payment assistance). The City could talk with major employers to identify opportunities to partner with or support employers who are interested in developing an employer-assisted housing program. The City's role in development of an Employer Assisted Housing program could be to provide support and information to employers and help them connect with partners who can assist them in developing a program.	Establish Partnerships

Rationale	Brings local businesses into the discussion of housing needs and efforts to encourage housing development.
Anticipated Impact	▪ **Populations served:** Employees working in Tualatin who also desires to live in Tualatin ▪ **Income:** Generally less than 120% of MFI ▪ **Housing tenure:** Renter or owner ▪ **Potential Benefit:** - **Housing Production (new units):** Depends on interest and employer's funding potential. An employer may provide rental assistance or down payment assistance for a few employees. Alternatively, a single employer developing a moderate-size apartment complex could produce 20 to 40 units of housing. - **Equitable Outcomes:** There is a significant need for workforce housing in Tualatin, so that workers employed here—particularly in the industrial and commercial sectors—can also afford to live here. This strategic action may help to meet that need. ▪ **Potential Risk:** There are likely to be no or minor negative impacts. ▪ **Magnitude:** Low to moderate depending on interest from employers

Timeline	▪ **Timeline for adoption:** No need for adoption or official action, as this strategic action is about forming a partnership. ▪ **Implementation to commence:** 2025 ▪ **Time frame of impact:** The strategic action can begin to have impacts when the partnerships are formed and the strategic action has begun to be implemented.
Implementation Steps	▪ Evaluate the potential to periodically host an employer roundtable or focus group to educate, discuss, and work through Tualatin's housing issues. ▪ Inquire if employer-supported housing programs would be of interest to larger employers in Tualatin. What questions do they have about how such a program would function? ▪ Identify ways the City could help interested employers establish an employer-assisted housing program.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Larger employers in Tualatin; Chamber of Commerce
Funding or Revenue Implications	Unless the City wishes to financially support an employer-assisted housing program, this strategy could be a comparatively low-cost option, primarily relying on the use of staff time.

6.c Evaluate City Partnership to Participate in a Land Bank

Description	Type of Action
Evaluate potential partnerships with organization(s) to establish or support a land bank for affordable housing, workforce housing, mixed-use housing, or combination of these types. Land banks can take several forms. Many are administered by a nonprofit or nongovernmental entity with a mission of managing a portfolio of properties to support affordable housing development over many years or decades. A land bank could be set up to manage financial and administrative resources, including strategic property disposal, for the explicit purpose of supporting affordable housing development. Cities can partner with nonprofits or manage their own land banks. Cities may also donate, sell, or lease publicly owned land for the development of affordable housing, even without a formal "land bank" organization. Another source of land for a land bank is religious institutions. If Tualatin determines it is able to contribute publicly owned land or work with partners on land contributions (such as religious institutions), then this action will connect to Strategic Action 1.f.	Establish Partnerships

Rationale	Land banks support affordable housing development by reducing or eliminating land cost from development.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, low-income, and moderate-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Renter or Owner ▪ **Potential Benefit:** - **Housing Production (new units):** If this incentive were used for one to two apartment buildings at about 75 units each, and if all of these units were affordable at 80% of MFI or less, this strategy could result in a mix of units affordable to households below 60% of MFI as well as units affordable to households between 61% and 80% of MFI. Alternatively, potential lands could be evaluated for their use to develop affordable owner-occupied housing, likely in housing types such as single-family detached units, town houses, cottage housing, duplexes, triplexes, or quadplexes. If

	Tualatin had about two to five acres of land for land banking for these types of units, that may result in 20 to 45 units, assuming densities of 10 to 15 dwelling units per acre. - **Equitable Outcomes:** Land banking is proposed for the purpose of efficiently developing affordable housing and/or workforce housing. ▪ **Potential Risk:** If public land is used for affordable housing, typically it cannot be used for other city functions. However, if the land were identified as surplus or excess, it would likely not be needed for city functions. If institutional land (such as church land) were land banked, this would not impact city functions. ▪ **Magnitude:** Low to moderate as Tualatin has a highly limited land supply
Timeline	▪ **Timeline for adoption:** December 31, 2024 ▪ **Implementation to commence:** 2025 ▪ **Time frame of impact:** The strategic action can begin to have impacts when the partnerships are formed and the strategic action has begun to be implemented.
Implementation Steps	▪ Evaluate use of existing GIS tools to inventory publicly and privately owned properties (including properties owned by faith-based organizations) in areas well suited for a land bank purpose. ▪ Partner with and contribute funds or land to an existing nonprofit land bank or participate in the formation of a new nonprofit land bank if one does not exist with sufficient capacity to serve Tualatin. ▪ Incorporate publicly owned land into a bank or acquire new land to incorporate.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Nonprofit Land Bank; public agencies and/or institutions, including faith-based organizations in Tualatin; affordable housing developers; City of Tualatin Finance Department; and other divisions at the City of Tualatin (as needed)
Funding or Revenue Implications	Partnering is the most administratively efficient and cost-efficient approach to implementing this strategy. If the City is contributing land to the land bank at low or no cost, then the City is forgoing realizing the value of the land if it were sold on the open market.

Goal 7. Housing Stabilization: Prevent and address homelessness to provide safe living conditions for everyone living in Tualatin.

We recommend that the City pursue the following goal, which supports the existing Goals 3.2 and 3.3 in the Comprehensive Plan:

- Prevent and address homelessness to provide safe living conditions for everyone living in Tualatin.

The strategic actions to evaluate and potentially implement this goal are described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

7.a Evaluate Opportunities to Partner on a Local Rental and Utility Assistance Program

Description	Type of Action
Evaluate opportunities to partner with an agency that provides rental and utility assistance partnership to stabilize households and prevent people from losing their homes. The City is currently exploring a partnership or collaboration with the Community Action Agency, including targeted outreach to underserved communities. For rental assistance, the household must be under 80% of Area Median Income. For utility assistance, the household must be under 60% of Oregon's median income. They are two separate programs. The City is in a trial period of this partnership with the Community Action Agency, which lasts through December 2021. The partnership may be extended beyond that date.	Establish Partnerships

Rationale	Rental and utility assistance can provide stability to households at risk of homelessness or loss of utility services.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, and low-income households ▪ **Income:** Under 80% of Area Median Income for rental assistance and under 60% of Oregon Median Income for utility assistance. ▪ **Housing tenure:** Renter ▪ **Potential Benefit:** - **Housing Production (new units):** This strategy will not directly result in the production of more units. - **Equitable Outcomes:** The rental and utility assistance partnership in the planning stages includes targeted outreach

	to historically underserved communities and households in low-income census tracts. ▪ **Potential Risk:** There are likely to be no or minor negative impacts. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** This action may not be adopted, as it is a partnership. ▪ **Implementation to commence:** 2021, with potential extension of the partnership into 2022 and beyond ▪ **Time frame of impact:** The strategic action can begin to have impacts when the partnerships are formed and the strategic action has begun to be implemented.
Implementation Steps	▪ Work with the Community Action Agency to develop a memorandum of understanding for a rent and utility assistance partnership to support lower-income households in Tualatin.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division; Tualatin Finance Department ▪ **Partners:** Community Action of Washington County, nonprofit agency
Funding or Revenue Implications	Unless the City financially supports the rental and utility assistance program, this strategy is a comparatively low-cost option, primarily relying on the use of staff time, possibly using City phones for volunteers to carry out the targeted outreach.

7.b	Evaluate Ways to Develop Housing Options and Services to Address and Prevent Houselessness

Description	Type of Action
Evaluate partnering with agencies and nonprofit organizations that provide housing and services to people experiencing houselessness to address and prevent homelessness. Explore establishing partnerships, programs, or opportunities to rapidly rehouse people experiencing homelessness.	Establish Partnerships

Rationale	To improve livelihoods by reducing the number of people experiencing homelessness in Tualatin and Washington County.
Anticipated Impact	▪ **Populations served:** Extremely low income residents and people currently experiencing houselessness ▪ **Income:** 0-30% of Median Family Income ▪ **Housing tenure:** Renter ▪ **Potential Impacts:** - **Housing Production (new units):** This strategy may not result in production of new units in itself, but it may lead to partnerships that will support production of new units. - **Equitable Outcomes:** This strategic action may result in partnering with another jurisdiction or organization to serve people experiencing houselessness. ▪ **Potential Risk:** There are likely to be no or minor negative impacts. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2026 ▪ **Implementation to commence:** 2027 ▪ **Time frame of impact:** The strategic action can begin to have impacts when the partnerships are formed and the strategic action has begun to be implemented.
Implementation Steps	▪ Contact staff with City of Tigard to understand what Tigard plans to do around providing services to address and prevent houselessness. Evaluate whether there are opportunities to partner with Tigard. ▪ Contact Washington County to explore options for a partnership with the County to provide services to address and prevent houselessness.

Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** City of Tigard; Washington County
Funding or Revenue Implications	This strategy will depend primarily on staff outreach to Tigard and Washington County to explore options for partnerships. It could result in development of programs that have financial implications for the City, but none are proposed in this strategic action at this point.

Goal 8. Housing Rehabilitation: Plan for and support housing programs and initiatives that are responsive to the safety and health needs of households earning 0-80% of Median Family Income.

We recommend that the City pursue the following goal, which supports the existing Goal 3.2, Policy 3.2.1, and Goal 3.3 in the Comprehensive Plan:

- Plan for and support housing programs and initiatives that are responsive to the safety and health needs of households earning 0-80% of Median Family Income.

Implementing this policy will require researching, evaluating, and developing a housing rehabilitation program, for both ownership and rental housing, suitable for Tualatin. The strategic actions to evaluate and potentially implement this goal are described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

8.a Evaluate Establishing Local Housing Rehabilitation Program

Description	Type of Action
Evaluate the feasibility of establishing a local housing rehabilitation program to improve housing safety and health conditions for households earning 80% or less of the Median Family Income. Much of the rental housing in Tualatin that is affordable to low and moderate-income households is older, privately owned housing that is not subject to affordability restrictions. This housing may have deferred maintenance issues as a result of a lack of resources to make improvements and pay for repairs (or, in some cases, owner neglect). The City can work with property owners of low-cost unregulated rental housing to support needed repairs without displacing tenants. This could include: ▪ Offer low interest loans and/or grants to property owners for repairs and major rehabilitation, providing they do not displace residents. ▪ Explore reducing regulatory and permitting requirements in the Development Code to identify and reduce challenges for owners seeking to improve older rental housing. ▪ Provide information/technical assistance to smaller property owners regarding state and local resources to support weatherization and healthy housing. ▪ Use the Multi-Unit Property Tax Exemption (Action 4.b) to support rehabilitation, as described in Action 4.b.	Develop a Program

Rationale	Keeping low-cost unregulated housing both habitable and affordable reduces the need for subsidized new construction.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, and low-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Renter ▪ **Potential Benefit:** - **Housing Production (new units):** This strategy is not anticipated to produce new units, but it is intended to preserve and may improve the quality of the City's existing supply of low-cost, regulated rental units. It may also result in improved health and safety for the residents in the existing units. - **Equitable Outcomes:** Improves housing safety and health conditions for households earning 80% or less of the Median Family Income. ▪ **Potential Risk** Most negative impacts would be borne by the property owner to address identified deficiencies. However, property may also have positive impacts, such as an increase in property value and longer-term renters. If the property owner makes substantial changes to the housing, that may increase rents (making it less affordable) or encourage conversion to owner-occupied housing. ▪ **Magnitude:** Low to moderate
Timeline	▪ **Timeline for adoption:** December 31, 2026 ▪ **Implementation to commence:** 2027 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented, as the incentives start to be used.
Implementation Steps	▪ Maintain and enhance the existing list of lower-cost, unregulated rental housing, including property locations, number of units per development, and property owner contact information. ▪ Evaluate programs, technical assistance opportunities, regulatory changes, and other options to support property improvements. This step can include multiple approaches, as noted in the description of this action. ▪ Reach out to property owners (identified in Step 1). Gauge their interest in improving the safety, health, and stability of their property. Determine what kinds of improvements their properties might need and what resources would be most useful to them. ▪ Refine and implement programs, technical assistance

	opportunities, regulatory changes, and other options (identified in Step 2) based on feedback from property owners. ▪ Connect interested property owners to established programs and opportunities. ▪ Seek additional federal funding through the US Department of Housing and Urban Development's (HUD's) Lead Hazard Control and Healthy Homes program.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Community Development Department, City of Tualatin Finance Department, and City of Tualatin Building Division and Engineering Division. ▪ **Partners:** Overlapping taxing districts (if using MUPTE), Washington County Public Housing Authority, and Community Alliance of Tenants (CAT)
Funding or Revenue Implications	Providing low interest loans, grants, or implementing the MUPTE tax exemption will require a funding source to backfill program dollars awarded/loaned. Implementing a new program such as the HUD Lead Hazard Control and Healthy Homes program would take extensive administrative and partner resources to meet federal regulatory requirements, including performance measures.

8.b	Evaluate the Implementation of a Healthy Housing Initiative for Single-Family Housing

Description	Type of Action
Evaluate the development of a Healthy Housing Initiative to address life safety, mold, lead and ventilation issues for single-family housing. A Healthy Housing Initiative could involve proactive inspection of single-family properties to identify issues similar to those mentioned above. In addition, this initiative could include an educational component to provide information on how to prevent these issues from developing and funding to address the issues identified in the inspections. This strategic action could be connected with Strategic Action 3.b, a Healthy Housing Initiative for Multifamily housing.	Implement a Program to Provide Financial Resources

Rationale	To improve older single-family properties in Tualatin that are lower cost, unregulated, and deteriorating. The City needs this housing stock, and it is important that housing stays affordable while ensuring habitable and healthy conditions for residents.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, low-income, and moderate-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Rental or owner ▪ **Potential Benefits:** - **Housing Production (new units):** This action focuses on addressing safety problems in existing housing, not producing new housing. If this action is used to assist 10 to 25 households per year, it may help 60 to 150 households over the 6-year period for the HPS. - **Equitable Outcomes:** Improves health and safety conditions in housing for qualifying households at 80% MFI or below. ▪ **Potential Risk:** Most negative impacts would be borne by the property owner to address identified deficiencies. However, the property owner may experience positive impacts too, such as increased property value and longer-term renters. If the property owner makes substantial changes to the housing, that may increase rents (making it less affordable) or encourage conversion to owner-occupied housing. ▪ **Magnitude:** Moderate to large, depending on the outreach of the program

Timeline	▪ **Timeline for adoption:** December 31, 2024 ▪ **Implementation to commence:** 2025 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented.
Implementation Steps	▪ Evaluate the benefit of establishing a Healthy Housing Initiative with interested stakeholders and the public. Conduct outreach to housing consumers and property owners/managers of older, single-family rental to gauge interest in resources and to identify questions/concerns about a potential inspection program. Consider initial grant research funding source, such as the Robert Wood Johnson Foundation. https://www.rwjf.org/en/how-we-work/grants-and-grant-programs.html ▪ If the initiative is deemed important, draft code language that covers mold, lead, ventilation, and other healthy/safety issues. ▪ Develop an educational component of the program in coordination with the Community Development Department with representation between Planning, Building, and Engineering. ▪ Establish program parameters: How can residents file complaints? How are inspections administered? How are alleged issues communicated to property owners? How are mitigation requests enforced? ▪ Establish source of funds to administer the program. ▪ Discuss topic with City Council at work sessions and in a public hearing if desired. Tualatin City Council may adopt the program and code language via ordinance.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Community Development Department ▪ **Partners:** Washington County Public Housing Authority, Community Alliance of Tenants (CAT), AARP
Funding or Revenue Implications	A source of funds to administer the program may be needed, such as CET funds. Alternatively, some additional staff time may be needed if the program is primarily informational.

Goal 9. Accessible Design and Other Specialized Design: Encourage and support Universal Design, Lifelong Housing Certification, and other similar standards.

We recommend that the City pursue the following goal, which supports the existing Goal 3.2 and Policy 3.2.1 and Goal 3.3 in the Comprehensive Plan:

- Encourage and support Universal Design, Lifelong Housing Certification, and other similar standards.

The strategic actions to evaluate and potentially implement this goal are described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

9.a	Evaluate the Development of Specialized Design Standards and Incentives to Accommodate Special Needs
Description	**Type of Action**
Research and evaluate development of standards in the City's development, building, and municipal codes to increase development of housing accessible for people with disabilities and other populations that need housing with specialized design. Disabilities include those that are visible, such as ambulatory or vision disabilities, and those that are not readily apparent, such as self-care, independent living, or cognitive disabilities. Other conditions may require special accommodations, such as disabling diseases or mental health conditions. Standards to accommodate special needs may include universal design components (e.g., basic accessibility features; security or communication systems; easily traversed floors; remote control features; accessible lavatories, sinks, and counters; accessible bathtubs and showers; variable height counters and accessible work surfaces; and hearing and visual impairment aids). Provide incentives in the Development Code to increase the number of units designed to meet Universal Design, Lifelong Housing Certification, and other similar standards. This strategy could include preapproved plan sets (e.g., single-family detached and attached homes with barrier-free universal design),[34] within the context of the	Develop Code Standards and Develop Incentives

[34] It may be that these types of plan sets become commonly used among different cities in Oregon, not necessarily developed from the ground up for each city.

American with Disabilities Act (ADA) and Federal Housing Administration (FHA) rules. One option could be to use the Oregon Lifelong Housing Certification program,[35] which lists accessibility at different levels of accessible design elements, such as "visitor accessible" (which is basic accessibility for visitors) and "enhanced accessible" (which is accessible for a person in a wheel chair for the central living floor). Consider offering path-of-travel improvements like curb ramps on the adjoining street/sidewalk. In consultation with the Building Department, the City may decrease charges (plan check fee) by 50% for preapproved plans and that the review to approve time would be three days, rather than potentially several weeks.	
Rationale	Provide more options for people to live independently or in a housing setting of their choice.
Anticipated Impact	▪ **Populations served:** Seniors and people with disabilities ▪ **Income:** Standards may apply to All Income Groups; Use of incentives may apply only to income qualifying households ▪ **Housing tenure:** Renter and Owner ▪ **Potential Benefit:** - **Housing Production (new units):** This strategy will not directly result in the production of new units, but it may increase the number of new units that have accessibility features incorporated into the design—or it may increase the number of units remodeled with accessibility features. - **Equitable Outcomes:** Serves people with disabilities, people with special needs, and seniors to provide housing accessibility, many of whom may also be low income. ▪ **Potential Risk:** There should be minimal negative impact if the strategic action is implemented as described above. If the City requires special design standards for all new housing (which is not recommended), that may increase housing development costs and decrease housing affordability. ▪ **Magnitude:** Low

[35] The Rogue Valley Council of Government's Lifelong Housing Certification Project is a "voluntary certification process for evaluating the accessibility and/or adaptability of homes. Developed in partnership with AARP Oregon, the project is designed to help meet the growing market demand for accessible housing in our region and to enable older adults and people with disabilities to age in place safely and independently." Information about this certification program can be found at: https://rvcog.org/home/sds-2/lifelong-housing-program/#:~:text=The%20Lifelong%20Housing%20Certification%20Project,call%20541%2D423%2D1383.

Timeline	▪ **Timeline for adoption:** December 31, 2024 ▪ **Implementation to commence:** 2025 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code.
Implementation Steps	▪ Develop an incentive program and source of funding to increase the number of dwelling units designed accessibly. ▪ Work with developers to gather feedback on program parameters and interest. ▪ Implement program (and potentially a new funding source) through council action.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Community Development Department ▪ **Partners:** Home Builders Association of Metropolitan Portland; Fair Housing Council of Oregon; AARP
Funding or Revenue Implications	Developing preapproved plans may require hiring consultants to develop the plans. Lowering the fee to review the preapproved plans should be commensurate with the lower staff effort to review the plans.

Goal 10. Mixed-Use Housing and Redevelopment: Encourage and support development of mixed-use, mixed-income, and multifamily housing in commercial zones and urban renewal areas for households earning 0-80% of Median Family Income.

We recommend that the City pursue the following goal, which supports the existing Goal 3.2, Goal 3.3, Goal 3.4, and Policy 3.4.1 and Policy 3.4.2 in the Comprehensive Plan:

- Encourage and support development of mixed-use, mixed-income, and multifamily housing in commercial zones and urban renewal areas for households earning 0-80% of Median Family Income.

This goal includes affordable housing (0-60% of Median Family Income) and may include workforce housing (61-80% of Median Family Income). Development of mixed-use housing will likely also result in development of housing affordable above 80% of Median Family Income. The strategic actions to evaluate and potentially implement this goal are described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

10.a Evaluate Redevelopment Opportunities for the Creation of Mixed-Use Development Districts to Support Development of Affordable Housing and Workforce Housing

Description	Type of Action
Identify and evaluate redevelopment opportunities to create mixed-use districts, which could include an area master planning process to guide development. A key finding of the Housing Needs Analysis is that Tualatin has limited land for development of multifamily housing and projects deficits of land to accommodate new housing in the Medium High Density and High Density / High Rise plan designations. The Economic Opportunities Analysis finds that Tualatin has limited land for commercial development. The COVID 19 pandemic has resulted in closure of businesses, which will leave existing buildings with vacant spaces and lessen the pressure for development of new commercial space, at least in the next two to five years. To address the need for more land for multifamily housing development and commercial uses, the City could identify several areas within Tualatin for redevelopment into mixed-use areas, with a mixture of higher-density housing and employment uses such as retail, office, and commercial services. These may be underutilized commercial or industrial areas ripe for mixed-use or mixed-income redevelopment. Two of these areas may already be identified through	Develop a Planning Process and Redevelopment Plans for Mixed-Use Districts

planning for Urban Renewal Districts: District 1 is the Basalt Creek and Southwest Industrial Area and District 2 is the North Study Area, Bridgeport Village, Town Commons, I-5 Corridor, and Tualatin-Sherwood Road. The City has yet to have discussions about funding for affordable housing in these areas. The City could engage the community in developing a vision for redeveloping the selected areas. The planning to implement this vision could be developed through redevelopment plans that show how the property will be redeveloped into a vibrant area with a mixture of uses, connections with Tualatin's automotive and pedestrian/bicycle transportation networks, and a variety of housing types. The redevelopment plans would typically include working with landowners to ensure they are supportive of the plans, as well as incorporating stakeholder and citizen input into the vision for the district and the formation of the redevelopment plans. A key aim would be to ensure equitable funding for affordable housing development to serve households earning 0-60% of Median Family Income and to consider opportunities for workforce housing at 61-80% of Median Family Income in mixed-use districts and urban renewal areas through redevelopment. To ensure that the districts provide opportunities for development of income-restricted affordable housing and consider workforce housing (housing affordable for rent between 61% and 80% of MFI), the City could evaluate opportunities to implement strategic actions such as 1.a (property tax exemption for income-restricted housing), 1.d (planning for Urban Renewal), 1.f (public and other land for affordable housing), 6.a (inclusion of workforce housing in multifamily development), and regulatory actions in Policy 11.	
Rationale	Creating mixed-use districts would provide opportunity for development of new multifamily housing in areas with commercial services and access to some types of jobs.
Anticipated Impact	▪ **Populations served:** Low-income, moderate-income, and high-income residents ▪ **Income:** Inclusive of income-restricted housing development that will serve 0-60% of Median Family Income and workforce housing at 61-80% of Median Family Income. ▪ **Housing tenure:** Renter or Owner ▪ **Potential Impacts:** - **Housing Production (new units):** The amount of housing

	production depends on the size and number of properties that are redeveloped. If this strategy identified 5 acres of land for residential redevelopment over the six-year planning horizon, at 80 units per acre (assuming 4 to 6 story buildings), this strategy could produce between 400 units of housing. Achieving this density will require changes to the Tualatin Development Code to allow this level of density. - **Equitable Outcomes:** Equitable funding for housing development for affordable housing and workforce housing in mixed-use districts and urban renewal areas through redevelopment. ▪ **Potential Risk:** Redevelopment could displace existing residents. Lower-income residents may be most vulnerable to redevelopment and urban renewal, unless housing preservation actions are taken and affordable housing investments are made to offset displacement. ▪ **Magnitude:** Large
Timeline	▪ **Timeline for adoption:** December 31, 2022 ▪ **Implementation to commence:** 2023 ▪ **Time frame of impact:** It would likely be at least 5 to 10 years before there is sufficient revenue in the Urban Renewal District to have enough funds to make significant investment in housing. The strategic action may have impact sooner for redevelopment that does not depend on Urban Renewal.
Implementation Steps	▪ Identify and evaluate areas within Tualatin for redevelopment into mixed-use areas, which may be Urban Renewal District 1 and District 2 and additional areas. ▪ Engage the community in developing a vision for redeveloping the selected areas. ▪ Use available tools, such as Urban Renewal, to support redevelopment of these areas. ▪ Identify opportunities for supporting development of income-restricted affordable housing. Also consider opportunities for workforce housing. Funding for housing affordable in the 61-80% MFI is limited and may be difficult to find. ▪ Identify land to rezone for mixed-use (see Strategic Action 10.b), as part of the redevelopment planning. ▪ Identify infrastructure improvements necessary to support development of the mixed-use district. Incorporate these improvements and costs into the City's capital improvements plan.

	▪ Develop the policies and development standards necessary to support development of a mixed-use district. ▪ Work with the Planning Commission and City Council to adopt the redevelopment plans and begin implementing them.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** City of Tualatin Finance Department, City of Tualatin Engineering and Building Division, and Developers
Funding or Revenue Implications	Developing and implementing plans for mixed-use districts will take substantial staff time and may require hiring consultants. Developing mixed-use district plans will have broader funding implications, especially for infrastructure development.

10.b Evaluate Opportunities for Conversion of Commercial Buildings to Residential Uses

Description	Type of Action
Identify and evaluate opportunities for housing above ground-floor retail, which would require an update to the Development Code to allow more housing above ground-floor retail in commercial areas. Tualatin has several underutilized commercial buildings, such as stores that have closed, that could be appropriate for redevelopment. The City could work with landowners to evaluate opportunities for redeveloping vacant buildings for new housing. The City could consider opportunities to support redevelopment of underutilized commercial buildings as part of developing a mixed-use district and redevelopment in Strategic Action 10.a. Implementing this action may depend, in part, on use of tools such as urban renewal (Strategic Action 1.d) to address infrastructure deficiencies or support development of affordable housing The City could also consider opportunities for conversion of some ground-floor retail to allow housing on the ground floor. This strategic action would be connected closely to Strategic Action 10.a, as a part of developing a mixed-use district and supporting development of income-restricted affordable housing and potentially workforce affordable housing.	Implement a Program

Rationale	Reusing vacant commercial buildings provides additional opportunities for housing, as well as making better use of an unused site.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, and low-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Predominantly renter housing with some opportunities for owner-occupied housing ▪ **Potential Benefit:** - **Housing Production (new units):** One existing building is about 60,500 square feet. Assuming that 75% of the building is used for housing (and the remainder used for shared spaces, like hallways), they may reasonably be converted into 56 units approximately 800 square feet in size or 37 units approximately 1,200 square feet in size. Two other older existing buildings

	that could be converted to housing are in the town center area and just west of town center and include: one at 15,000 square feet and the other 10,000 square feet. Under the same assumptions as above, these buildings together may result in 16 to 24 dwelling units. - **Equitable Outcomes:** Potential to provide housing for all income ranges. ▪ **Potential Risk:** There are likely to be no or minor negative impacts. ▪ **Magnitude:** Low to moderate
Timeline	▪ **Timeline for adoption:** June 30, 2023 ▪ **Implementation to commence:** 2023 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented, but redevelopment will depend on when the building owners move forward.
Implementation Steps	▪ Identify one or more vacant buildings that could be converted to residential uses. ▪ Discuss interest in converting vacant buildings to residential uses with the owners or assess the owners' interest in selling the buildings. ▪ Act as a convener between the owners and potential developers. ▪ Assist with the development process to make it easier for redevelopment to occur. This development may require a rezone from a commercial zone into a mixed-use zone where housing is allowed. ▪ Pursue the appropriate process for permitting the reuse of the building(s)
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Property owners of buildings considered for redevelopment and possibly adjacent/nearby property owners
Funding or Revenue Implications	Developing and implementing plans for conversion of vacant buildings for residential use will require staff time and may require City support for rezoning.

10.c Evaluate Opportunities to Rezone Land for Mixed-Use

Description	Type of Action
Identify and evaluate opportunities to rezone commercial or industrial land for mixed-use that includes employment and residential uses. In development of the mixed-use districts (Strategic Action 10.a), the City could identify opportunities to rezone underutilized land to a mixed-use zone. In addition, the City may identify other opportunities to rezone underutilized land to support mixed-use development in areas not included in the new mixed-use districts.	Make Change to Zoning Map

Rationale	This would help to address Tualatin's limited residential land base and to increase the supply of land that can accommodate residential uses outright.
Anticipated Impact	▪ **Populations served:** Low-income, moderate-income, and high-income residents and households ▪ **Income:** All income levels ▪ **Housing tenure:** Predominantly renter housing with some opportunities for owner-occupied housing ▪ **Potential Benefit:** - **Housing Production (new units):** The amount of housing production depends on the size and number of properties that are redeveloped. If this strategy identified 2 to 5 acres of land for residential redevelopment over the six-year planning horizon, at 80 units per acre (assuming 4 to 6 story buildings), this strategy could produce between 40 and 160 units of housing. Achieving this density will require changes to the Tualatin Development Code to allow this level of density. - **Equitable Outcomes:** Potential to provide mixed-use housing that is inclusive of affordable and workforce housing. ▪ **Potential Risk:** If successfully implemented, rezoning land could displace existing residents. Lower-income residents may be most vulnerable to rezoning, unless housing preservation actions are taken in conjunction with rezoning. ▪ **Magnitude:** Large
Timeline	▪ **Timeline for adoption:** December 31, 2022 ▪ **Implementation to commence:** 2022 ▪ **Time frame of impact:** The strategic action can begin to take effect once land is rezoned.

Implementation Steps	▪ Establish criteria to identify land to rezone for mixed-use (employment and residential) purposes. ▪ Pursue a public process (with public hearings) to implement the zone change.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Property owners of land considered for rezoning as well as adjacent/nearby property owners
Funding or Revenue Implications	This strategy would rely on use of staff time but may also require funds to hire a consultant to comply with the Transportation Planning Rule.

10.d Evaluate Establishing Incentives to Support Mixed-Use Development, such as the Vertical Housing Tax Abatement

Description	Type of Action
Identify, evaluate, and promote potential financial incentives for developers of mixed-use housing. Evaluate feasibility of adopting the Vertical Housing Tax Abatement within urban renewal districts or mixed-use zones. This program would provide a partial exemption of property taxes for multistory, mixed-use developments (residential over commercial space) for 10 years, which reduces operating costs and improves development feasibility. Using this program, a jurisdiction could subsidize mixed-use projects to encourage dense development or redevelopment by providing a partial property tax exemption on the building value for qualified developments. The exemption varies in accordance with the number of residential floors on a mixed-use project with a maximum property tax exemption of 80% of improvement value over 10 years. An additional property tax exemption on the land may be given if some or all of the residential housing is for low-income persons (80% of area median income or below), but this is uncommon. The Vertical Housing Tax Abatement helps to support affordable housing by providing retail opportunities nearer to income-restricted building. There is no tax exemption on the nonresidential component. The exemption is only available within areas designated by the City as a vertical housing development zone. The City must consider the potential for displacement of households within a proposed vertical housing development zone before designating the zone. Once the zone is established, a developer may apply for the Vertical Housing Tax Abatement program for eligible projects.	Adopt a Tax Exemption

Rationale	This tax abatement offers incentives for market-rate, mixed-income, and affordable housing, with greater incentives for affordable/mixed-income housing. It incents higher-density development, as well as mixed-income and mixed-use development.
Anticipated Impact	▪ **Populations served:** All populations potentially ▪ **Income:** Typically over 80% of Median Family Income unless applied to affordable housing (which is unusual)

	▪ **Housing tenure:** Renter ▪ **Potential Benefit:** - **Housing Production (new units):** If this incentive were used for one to two mixed-use apartment buildings at 50 to 150 units each with 25% of units affordable at less than 80% of Median Family Income, this strategy could contribute to development of 50 to 300 units. - **Equitable Outcomes:** Supports mixed-use housing, which may include workforce housing with retail or other uses. ▪ **Potential Risk:** The City and participating taxing districts would forgo property tax income for the duration of the exemption for the buildings where the exemption is granted, reducing revenue for city services and revenue for participating taxing districts. This tax abatement may disproportionately benefit moderate and high-income households, who can afford the rents in mixed-use housing unless affordable housing units are part of the mix. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2023 ▪ **Implementation to commence:** 2024 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented, when property owners begin to apply for the tax exemption.
Implementation Steps	▪ Evaluate the feasibility of and potential locations for establishing a Vertical Housing Tax Abatement Zone. ▪ If considering designating areas within existing or proposed urban renewal districts, consider potential impacts of the tax abatement on urban renewal financial forecasts. ▪ Evaluate likely impacts of the tax exemption on feasibility of desired mixed-use development. ▪ Evaluate impacts of the exemption and the potential resulting development on displacement for vulnerable populations. ▪ Discuss topic with City Council at work sessions and in public hearings. ▪ Notify overlapping taxing districts and offer the opportunity to opt out of having their rate included in the exemption.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** City of Tualatin Finance Department, developers

Funding or Revenue Implications	The Vertical Housing Tax Abatement results in foregone general fund revenues for all overlapping taxing districts (unless they opt out). However, it can still increase tax revenue if new development occurs that would not otherwise, because the commercial portion is taxable immediately and the residential portion is added to the tax rolls when the abatement expires. If applied within an urban renewal district, the tax abatement instead affects the tax increment revenue to the district and does not necessarily directly affect the overlapping taxing districts.

Goal 11. Regulatory and Zoning Changes: Increase housing development opportunities through regulatory and zoning changes to accommodate a diverse range of housing types and price points to meet the housing needs in Tualatin.

We recommend that the City pursue the following goal, which supports the existing Policy 3.1.2, Goal 3.2, Policy 3.2.1, and Goal 3.3 in the Comprehensive Plan:

- Increase housing development opportunities through regulatory and zoning changes to accommodate a diverse range of housing types and price points to meet Tualatin's housing needs as identified in the current adopted Housing Needs Analysis.

The strategic actions to evaluate and potentially implement this goal are described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

11.a Evaluate Updating Density Standards for Multifamily Housing in Medium-Density, High-Density, and Mixed-Use Zones

Description	Type of Action
Evaluate the feasibility of increasing maximum densities—which would require corresponding revisions to other standards, including maximum lot coverage and minimum front setbacks—to create the opportunity for more efficient multifamily development in zones that allow it outright (High Density, High Density High-Rise, Medium Density High, Medium Density Low, and MUCOD (mixed-use zone)). Initial feasibility analysis indicates that existing densities for multifamily are too low to allow for efficient development or redevelopment of the type of housing the zones are intended to allow. At least one of the High Density and/or High Density High-Rise zones, as well as MUCOD, should allow for efficient 4 to 6 story buildings, and at least one zone (e.g. High Density and/or Medium Density High) should allow for efficient 2-3 story apartment buildings. Updates in the Medium Density High and Medium Density Low zones should be informed by changes to comply with HB 2001. One consideration in increasing density could be proximity to transit service and transit stations. Areas closer to transit, particularly high-capacity/high-frequency transit stations, may provide opportunities for increases of density in the Medium-Density, High-Density, and mixed-use zones. Areas near transit or transit stations may be places where density could be increased and parking requirements (in Strategic Action 11.c) could be decreased somewhat.	Adopt Zoning Code Changes

Rationale	Increasing densities and revising zoning standards allows more efficient use of buildable land, which may be particularly effective in areas with access to transit or near to transit stations. Given Tualatin's shortage of buildable land, allowing taller multifamily buildings will provide important opportunities for housing development.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, low-income, moderate-income, and high-income households ▪ **Income:** All income levels ▪ **Housing tenure:** Predominantly renter, possibly some owner units ▪ **Potential Benefit:** - **Housing Production (new units):** Tualatin has 16 acres of High Density and no acres of High Density High-Rise land, according to the Tualatin Housing Needs Analysis. If the City increased densities in these zones (from the current maximum density of 25 units per acre in High Density and 30 dwelling units per acre High Density High-Rise) to at least 80 units per acre (assuming 4 to 6 story buildings), that would allow for an additional 1,280 dwelling units to be built in High Density. If land is re-zoned to High Density High-Rise, that would allow for additional development at these higher densities. - **Equitable Outcomes:** May open up opportunity for development of affordable rental multifamily housing or workforce housing. ▪ **Potential Risk:** Allowing higher-density development may cause concern for some existing residents. ▪ **Magnitude:** Large
Timeline	▪ **Timeline for adoption:** June 30, 2022 ▪ **Implementation to commence:** 2022 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code.
Implementation Steps	▪ Evaluate conceptual feasibility with stakeholders and the public, identifying opportunities to alleviate resident concerns about traffic and parking as well as those associated with allowing taller buildings and denser development. ▪ Evaluate potential transportation and other public utility system impacts of potential changes. ▪ Draft revised zoning standard amendments, providing opportunities for public comment and discussions with planning

	commissioners and city councilors. ▪ Work with Tualatin's Planning Commission and City Council to adopt the revised standards into the Development Code.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Community Development Department ▪ **Partners:** City of Tualatin Public Works Department, area developers, property owners, and adjacent/nearby property owners and residents.
Funding or Revenue Implications	Revising zoning standards would rely on staff time and hiring a consultant to analyze the impacts of density increases on transportation and other public utility systems. For areas near transit or transit stations, Tualatin could apply for one of Metro's Transit-Oriented Development (TOD) grants to implement this strategic action.

11.b Evaluate Opportunities to Rezone Lower-Density Residential Land to Higher Density

Description	Type of Action
Evaluate and identify opportunities to re-zone Residential Low Density and Residential Medium Low-Density residential land for higher-density housing in selected areas. The Tualatin Housing Needs Analysis report showed that Tualatin has very little buildable land in the following zones: Medium High Density, High Density, and High Density High-Rise zones. The report identified a seven acre deficit of land in the Medium High Density zone and a four acre deficit in the High Density High-Rise zone for development through 2040.	Adopt Zoning Code Changes

Rationale	This could help to address Tualatin's limited residential land base and to increase the supply of land that can accommodate residential uses at higher densities.
Anticipated Impact	▪ **Populations served:** Low-income, moderate-income, and high-income residents and households ▪ **Income:** All income levels ▪ **Housing tenure:** Predominantly renter housing with some opportunities for owner-occupied housing ▪ **Potential Benefit:** - **Housing Production (new units):** The amount of housing production depends on the size and number of properties that are rezoned. If this strategy identified 2 to 5 acres of land for residential redevelopment over the six-year planning horizon, at 70 to 150 units per acre (assuming 4 to 6-story buildings), this strategy could produce between 140 and 750 units of housing from land zoned Low Density. - **Equitable Outcomes:** May open up opportunity for development of affordable rental multifamily housing or workforce housing. ▪ **Potential Risk:** Rezoning land could displace existing residents. Lower-income residents may be most vulnerable to rezoning, unless affordable housing preservation actions are taken in conjunction with rezoning. ▪ **Magnitude:** Moderate to large, depending on the amount of land rezoned

Timeline	▪ **Timeline for adoption:** June 30, 2022 ▪ **Implementation to commence:** 2022 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code.
Implementation Steps	▪ Establish criteria to identify land to rezone for higher-density residential uses. ▪ Pursue a public process (with public hearings) to implement the zone changes.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Property owners of land considered for rezoning as well as adjacent/nearby property owners
Funding or Revenue Implications	Revising density standards is a comparatively low-cost strategy, primarily relying on the use of staff time.

11.c Evaluate the Feasibility of Targeted Reductions to Off-Street Parking Requirements

Description	Type of Action
Evaluate the feasibility of providing off-street parking reductions targeted for multifamily and/or affordable housing, particularly in conjunction with nearby transit availability. Current parking ratios for multifamily create an additional potential obstacle to higher-density/efficient development, particularly for affordable housing and zones that are intended for higher-density housing (four or more stories in height). High parking ratios for retail and restaurants may also present an obstacle to mixed-use development. Tualatin could consider allowing reduction of parking requirements near transit and affordable housing with tenants who generally own fewer cars, like seniors. In addition, the City should consider allowing public on-street parking in rights-of-way within a certain radius to count toward off-street parking requirements. This strategic action should be implemented in conjunction with the increases to density in High Density and High Density High-Rise zones, in Strategic Action 11a, because the strategic actions work together to achieve higher densities.	Adopt Zoning Code Changes

Rationale	Reducing parking requirements reduces costs and can allow a development to fit more units on a site, making public resources go further.
Anticipated Impact	▪ **Populations served:** Low-income, moderate-income, and high-income households ▪ **Income**: All income levels ▪ **Housing tenure:** Renter ▪ **Potential Benefit:** - **Housing Production (new units):** This strategy may not produce units in itself. But it may support development of more affordable units, especially in conjunction with Strategic Action 11.a. - **Equitable Outcomes:** Allowing parking reductions may benefit affordable housing developments that will serve a percentage of tenants that do not own cars, such as seniors in some cases. ▪ **Potential Risk:** Reducing off-street parking requirements may

	cause concern for existing residents. For lower-income residents to benefit, this action should be taken in conjunction with development of affordable housing. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2022 ▪ **Implementation to commence:** 2023 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code.
Implementation Steps	▪ Evaluate off-street parking requirements for multifamily housing to identify opportunities for reduction in parking requirements. ▪ Evaluate how potential amendments would affect the type and amount of multifamily housing that would be feasible to build in Tualatin. ▪ Adopt revised parking standards by amending the Development Code.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Development Community
Funding or Revenue Implications	Amending the City's Development Code is a comparatively low-cost strategy, primarily relying on the use of staff time.

11.d Evaluate Updating Code to Allow Small Dwelling Unit Developments

Description	Type of Action
Tualatin should evaluate the potential to update its development, municipal, and building codes to allow small-scale units with affordable housing income limits that are not part of HB 2001. This could be accomplished by allowing land division where small lots or parcels are created below the standard lot/parcel size for dwelling units that are limited in size. Tualatin could consider this in the context of new cottage cluster regulations because of the similar development type. This would involve calculating density differently for the dwelling units due to their limited size. For example: ▪ Dwelling units 600 square feet or smaller: 0.25 of a dwelling unit. ▪ Dwelling units 601 to 1,200 square feet: 0.50 of a dwelling unit. This strategy may result in housing opportunity for households at 60% of MFI or lower. But this strategic action is not expected to result in income-restricted housing on its own. It is more likely to produce housing affordable at 61% to 100% of MFI.	Adopt Zoning Code Changes

Rationale	Provides greater opportunity for development of housing affordable to low and moderate-income households.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, low-income, and moderate-income households ▪ **Income:** 100% of MFI or less. ▪ **Housing tenure:** Renter and owner ▪ **Potential Benefit:** - **Housing Production (new units):** If this strategy resulted in development of one acre for small dwelling units over the six-year planning horizon, at 10 to 15 units per acre, this strategy could produce between 10 and 15 units of housing. This may represent a pilot of this policy. - **Equitable Outcomes:** May produce small number of units of housing that could serve lower-income households. ▪ **Potential Risk:** Allowing smaller units may increase density in existing neighborhoods, with the potential to cause concern for some existing residents.

	▪ **Magnitude:** Low
Timeline	▪ **Timeline for adoption:** December 31, 2024 ▪ **Implementation to commence:** 2024 or early 2025 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code.
Implementation Steps	▪ Revise Tualatin's Development Code to allow these smaller units, including revising the density standards. ▪ Pursue a public process (with public hearings) to implement the zone changes.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** Small-scale housing developers and builders, lenders
Funding or Revenue Implications	Amending the City's Development Code is a comparatively low-cost strategy, primarily relying on the use of staff time.

11.e Evaluate Adopting an Expedited Permitting Process for Affordable Rental Housing and Affordable Homeownership

Description	Type of Action
Evaluate adopting an expedited and/or priority review process for review of development proposed for affordable rental housing at 0-60% of Median Family Income and affordable homeownership at 80% of Median Family Income and below. Such a process could consider projects with direct or indirect funding from local, state, or federal government as essential and projects with long-term affordability covenants through tax abatement or inclusionary requirements as high priority. Assigning a designated staff person to shepherd these projects through the development and construction process in order to expedite them is likely to be essential.	Make Development Process Changes

Rationale	Expedited permitting of both land use applications and building permits would help to reduce costs and financial vulnerabilities of development and construction of affordable housing.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, low-income, and moderate-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Renter or Owner ▪ **Potential Benefit:** - **Housing Production (new units):** This action will not directly result in development of more units but may make it easier to develop affordable housing. - **Equitable Outcomes:** Beneficial to affordable housing development, as it can save on costs and construction time. ▪ **Potential Risk:** This strategic action may allow less time for comment on affordable housing development. Expediting permitting processes for affordable housing may result in minor increases in the time needed for the permitting processes of other development. ▪ **Magnitude:** Low to moderate
Timeline	▪ **Timeline for adoption:** June 30, 2023 ▪ **Implementation to commence:** 2023 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code

Implementation Steps	▪ Plan and carry out public engagement to get input on changes in the permitting system. ▪ Pursue public decision-making process to make the changes to the permitting system.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Community Development Department ▪ **Partners:** Local and Regional Development Community
Funding or Revenue Implications	Amending the City's permitting process is a comparatively low-cost strategy, primarily relying on the use of staff time.

11.f Evaluate Providing Additional Engagement and Information to Developers of Affordable Housing

Description	Type of Action
The City could evaluate the establishment of a formalized information source (i.e., an FAQ) or additional engagement opportunities specific to developers of affordable housing. The City informally provides information to small, local developers to help them understand land use permitting processes and to give developers a sense of clarity and certainty about the requirements so they can better provide smaller-scale housing at an affordable level. The City could create a formal process to provide this information to include all housing developers, especially aimed at those that can produce housing affordable at 80% of Median Family Income and below. The City could promote development of this housing through a City program with a variety of venues such as a developers' roundtable hosted by the Mayor, informational sessions with developers, promotion of incentives and funding resources, and more. These activities are intended to engage, inform, and build relationships with developers to attract them to do business in Tualatin.	Develop Processes and Materials

Rationale	Building relationships with developers, providing quality information to them, and offering incentives and networking opportunities to developers and those in the development community are effective ways to support development in Tualatin.
Anticipated Impact	▪ **Populations served:** Extremely low income and very low–income households ▪ **Income:** 0-60% of Median Family Income ▪ **Housing tenure:** Renter or Owner ▪ **Potential Benefit:** - **Housing Production (new units):** This action is aimed at attracting more affordable and workforce housing developers to Tualatin and may generate a fair amount of interest in housing for households at 0-80% of MFI, resulting in more development that would otherwise not have come here. - **Equitable Outcomes:** Cultivating relationships with affordable housing and workforce housing developers to develop equitable housing. ▪ **Potential Risk**: There are likely to be no or minor negative

	impacts. ▪ **Magnitude:** Low to moderate
Timeline	▪ **Timeline for adoption:** June 30, 2022 ▪ **Implementation to commence:** 2022 ▪ **Time frame of impact:** The strategic action can begin to take effect once it is adopted and implemented in the Development Code.
Implementation Steps	▪ Prepare materials and presentations intended to engage, inform, and educate developers about housing development in Tualatin and share what we have to offer in Tualatin. ▪ Meet with developers in a series of lively roundtable events to inform and interest them in Tualatin development opportunities and offer new incentives where possible. Gather feedback from the developers and development community. ▪ Continue to develop relationships with the development community and to update materials and presentations as needed.
Lead Agency and Potential Partners	▪ **Lead Agency:** Tualatin Planning Division ▪ **Partners:** Local and Regional Development Community
Funding or Revenue Implications	Developing materials and presentations for roundtable events about Tualatin's housing development opportunities and process may be labor intensive for staff.

Goal 12. Transportation and Public Infrastructure: Plan for and develop transportation and public infrastructure to support affordable housing, workforce housing, mixed-use housing, and mixed-income housing.

We recommend that the City pursue the following goal, which supports the existing Policy 3.1.5, Policy 3.1.6, Policy 3.1.7, and Goal 3.5 in the Comprehensive Plan:

- Plan for and develop transportation and public infrastructure to support affordable housing, workforce housing, and mixed-use housing.

The strategic action to evaluate and potentially implement this goal is described below. The City may choose to adopt this goal or the results of the strategic actions into the Comprehensive Plan in the future.

12.a Evaluate Ways to Prioritize Capital Improvements Programming for Affordable and Workforce Housing

Description	Type of Action
Evaluate ways to prioritize capital improvements programming (CIP) for affordable housing, workforce housing, and mixed-use housing with a component that includes a specified percentage of units for each of these types of housing. The City could coordinate housing planning, CIP planning, and public facilities planning to ensure projects that support development of needed housing types are prioritized. For example, implementing new sewer master plans or new stormwater plans in areas targeted for future housing expansions. This type of coordinated planning could make it easier to understand infrastructure costs. It would also enable the City and developers to plan for more development capacity in areas ripe for higher-density housing.	Improve CIP Planning Processes

Rationale	The City could prioritize work in a CIP and public facilities planning so that projects that support development of needed housing can be constructed sooner.
Anticipated Impact	▪ **Populations served:** Extremely low income, very low–income, and low-income households ▪ **Income:** 0-80% of Median Family Income ▪ **Housing tenure:** Renter or Owner ▪ **Potential Benefit:** - **Housing Production (new units):** This strategy alone will not result in additional units, but it will improve coordination and

	commitment to production of housing. - **Equitable Outcomes**: Prioritizing capital improvements programming (CIP) for affordable housing, workforce housing, and mixed-use housing supports equitable housing development. ▪ **Potential Risk:** Funds spent on needed affordable, workforce, and mixed-used housing will be unavailable for other city infrastructure priorities. However, coordinated planning could result in a more integrated and efficient approach to planning for needed housing and infrastructure. ▪ **Magnitude:** Moderate
Timeline	▪ **Timeline for adoption:** December 31, 2023 ▪ **Implementation to commence:** 2024 ▪ **Time frame of impact:** The strategic action will begin to have impact with changes to funding of infrastructure to support affordable housing.
Implementation Steps	▪ Identify priority areas for infrastructure investment. ▪ Determine the types of infrastructure funding needs (specific projects and costs) in priority areas. ▪ Update the City's CIP and respective public facility plans by listing needed infrastructure projects in these documents and establishing an implementation schedule for these projects.
Lead Agency and Potential Partners	▪ **Lead Agency:** City of Tualatin Planning Division ▪ **Partners:** City of Tualatin Public Works Department
Funding or Revenue Implications	Coordinated infrastructure planning is a comparatively low-cost strategy, primarily relying on the use of staff time.

4. Evaluation: Achieving Fair and Equitable Housing Outcomes

This chapter presents an evaluation of the goals and strategic actions for achieving fair and equitable housing outcomes. It also includes a discussion of monitoring the outcomes of Tualatin's HPS.

Evaluation of the Goals and Strategic Actions

OAR 660-008 requires an evaluation of all the HPS for achieving the following types of outcomes. The discussion below provides a brief evaluation of each of the expected outcomes for the goals and strategic actions of the HPS, with a focus on housing opportunities for federal and state protected classes.[36] This is not intended to be an exhaustive evaluation of how each strategic action addresses these outcomes but a high-level overview of the HPS as a whole.

- **Affordable Homeownership.** This criteria focuses on strategic actions that support production of housing affordable for homeownership and includes actions to support development of housing affordable at less than 120% of MFI. Many of the strategic actions in the HPS support development of affordable housing for homeownership through partnerships, fair housing, rehabilitation programs, removing regulatory barriers to development of affordable ownership housing, and capital improvements necessary to support affordable ownership housing. Some of the strategic actions within the HPS that support affordable homeownership include:
  - The strategic actions in Goal 2 are focused on production of affordable housing for homeownership. These strategic actions are intended to work together to identify and remove barriers to homeownership, provide education to residents of Tualatin about homeownership, make regulatory changes that make it easier to develop affordable housing for homeownership, and partner with organizations that build affordable ownership housing.
  - The strategic actions in Goal 5 focus on increasing equity in the City's housing policies. Strategic Action 5.a focuses on identifying funding sources to support the actions within the HPS, including those that support development of affordable ownership housing. Other strategic actions in Goal 5 support Fair Housing goals, which includes development of affordable ownership housing.
  - Strategic Action 8.b supports rehabilitation of single-family housing, which includes ownership housing for households with income below 80% of MFI. Rehabilitation

[36] Federal protected classes are: race, color, national origin, gender, familial status, and disability. Oregon's additional protected classes are: marital status, source of income, sexual orientation, and status as a domestic violence survivor. Under Fair Housing laws, it is illegal to deny access to housing in based on the characteristics of people within these protected classes.

may be necessary to improve housing conditions to allow people to continue to live in their housing.

- Goal 11 includes proposals for regulatory and zoning changes that support development of affordable ownership housing. These changes include allowing for development of small dwelling units, expediting permitting processes for affordable homeownership, and providing additional information to developers of affordable housing to make development in Tualatin easier.
- Strategic Action 12.a is intended to prioritize capital improvements for affordable housing, including ownership housing. Without infrastructure (such as roads, sewer, or water), vacant land cannot be developed for affordable ownership housing at the densities envisioned in the *Tualatin Housing Needs Analysis*.

- **Affordable Rental Housing**. Supporting affordable rental housing includes actions to support production of both income-restricted affordable housing (affordable to households with incomes below 60% of MFI) and privately developed affordable housing (affordable for households with incomes between 61% and 80% of MFI). Strategic actions within the HPS that support affordable rental housing development include:
  - The strategic actions in Goal 1 are focused on production of income-restricted affordable rental housing, with the exception of Strategic Action 1.d, which also includes workforce affordable housing. These strategic actions work together to support production of income-restricted affordable housing through proposal of actions that may reduce development or operational costs (property tax exemptions, changes to systems development charge changes, and identification of public or institutional land at low or no cost), increase funds available to support development of income-restricted affordable housing (a Construction Excise Tax, use of Urban Renewal, and identification of other sources of funding), and potential regulatory changes.
  - The strategic actions in Goals 3 and 4 are focused on preservation of existing affordable housing, both income-restricted and naturally occurring affordable housing.
  - The strategic actions in Goal 5 focus on increasing equity in the City's housing policies. Strategic Action 5.a focuses on identifying funding sources to support the actions within the HPS, including those that support development of affordable rental housing. Other strategic actions in Goal 5 support Fair Housing goals, which includes development of affordable rental housing.
  - The strategic actions in Goal 6 support development of workforce housing, which includes affordable rental housing.
  - Goal 7 supports housing stabilization, which includes strategic actions to provide rental and utility assistance.

- Strategic actions within Goal 10 support mixed-use development and redevelopment, with a focus on development of affordable housing. Given the small amount of vacant land for multifamily development in Tualatin, developing rental housing will require development of mixed-use housing and redevelopment.
- Goal 11 includes proposals for regulatory and zoning changes that support development of affordable rental housing. These changes include allowing for increases in the development of higher-density multifamily housing, upzoning of lower-density land to higher-density zones to increase the amount of land where multifamily housing can be built, potential targeted reductions of off-street parking requirements, expediting permitting processes for affordable rental housing, and providing additional information to developers of affordable housing to make development in Tualatin easier.
- Strategic Action 12.a is intended to prioritize capital improvements for affordable housing, including ownership housing. Without infrastructure (such as roads, sewer, or water), vacant land cannot be developed for affordable rental housing at the densities envisioned in the *Tualatin Housing Needs Analysis*.

- **Housing Stability.** Increasing housing stability includes actions that increase the stability of existing households and preventing displacement by mitigating gentrification resulting from public investments or redevelopment. Strategic actions within the HPS that address housing stability include:
  - Part of increasing housing stability will be preservation of existing housing, rehabilitation of housing, and development of more affordable ownership and rental housing. These items are discussed above.
  - Goal 7 supports housing stabilization, which includes strategic actions to provide rental and utility assistance and identifying housing options and services to address and prevent homelessness.
  - The descriptions of strategic actions under Goal 10 discuss the potential for displacement of existing residents through redevelopment. Through redevelopment planning, the City will need to be careful to avoid displacing existing residents through redevelopment. Urban Renewal District 2 has a mix of uses, including apartment buildings, commercial buildings, and public buildings. As the City plans for redevelopment here, the City will need to take care not to displace existing residents.
- **Housing Options for People Experiencing Homelessness.** Increasing options for people experiencing homelessness includes working with partners and identifying ways to address homelessness and strategic actions that reduce the risk of households becoming homeless (especially for households with income below 30% of MFI). Strategic actions within the HPS that provide options for people experiencing homelessness include:

- Part of providing options for people experiencing homelessness is development of income-restricted affordable housing, which is the focus of Goal 1 (as described above). The strategic actions in Goal 1 are also intended to provide affordable housing options for people at risk of becoming homeless, such as households with incomes below 30% of MFI.
- Strategic Action 7.b is to evaluate development of options for provision of housing and services necessary to address and prevent homelessness.

- **Housing Choice.** Increasing housing choice involves increasing access to housing for communities of color, low-income communities, people with disabilities, and other state and federal protected classes. Increasing housing choice also means increasing access to existing or new housing that is located in neighborhoods with healthy, safe environments and high-quality community amenities, schooling, and employment and business opportunities. Strategic actions within the HPS that increase housing choice include:
  - Increasing housing choice for state and federal protected classes involves preservation of existing housing, rehabilitation of housing, and development of more affordable ownership and rental housing. These items are discussed above.
  - The regulatory changes proposed in Goal 11 also support increases in housing choice for state and federal protected classes through supporting development of additional housing, which may be located in high-opportunity neighborhoods.
  - Strategic Action 5.d addresses housing choice directly through an evaluation of strategies to encourage development of diverse housing types in high-opportunity neighborhoods.
  - Strategic Actions 5.b and 5.c address Fair Housing issues, with the intention of increasing housing choice for state and federal protected classes.
- **Location of Housing.** Diversifying the location of housing requires increasing options for residential development that is compact, in mixed-use neighborhoods, and available to people within state and federal protected classes. This measure is intended, in part, to meet statewide greenhouse gas emission reduction goals. Strategic actions within the HPS that support development of compact, mixed-use neighborhoods include:
  - Goal 10 proposes strategic actions that increase options for development of compact housing in mixed-use neighborhoods. The strategic actions include evaluating opportunities for redevelopment and creation of mixed-use districts, conversion of unused commercial buildings to residential uses, evaluating land to rezone for mixed-use development, and a tax exemption to support mixed-use development.
  - Strategic actions in Goal 11 support diversifying the location of housing through evaluation of actions that increase multifamily development densities, upzone lower-density land, target reductions of off-street parking requirements, and allow smaller dwelling unit development.

- **Fair Housing.** Supporting Fair Housing is accomplished by increasing access to housing for people part of state and federal protected classes, affirmatively furthering fair housing, addressing disparities on access to housing opportunity for underserved communities, and decreasing patterns of segregations or concentrations of poverty. Strategic actions within the HPS that further Fair Housing goals include:
  - Production of affordable rental and homeownership housing, increasing housing stability, identifying housing options for people experiencing homelessness, and increasing housing choice are all part of supporting Fair Housing. These issues are addressed above.
  - The strategic actions in Goal 5 focus on increasing equity in the City's housing policies and Fair Housing. Strategic Action 5.a focuses on identifying funding sources to support the actions within the HPS. Strategic Actions 5.b and 5.c address Fair Housing issues, with the intention of increasing housing choice for state and federal protected classes. Strategic Action 5.d addresses housing choice directly through an evaluation of strategies to encourage development of diverse housing types in high-opportunity neighborhoods.

Taken together, the goals and strategic actions included in Tualatin's Housing Production Strategy are intended to work together to achieve equitable outcomes for all residents of Tualatin, with an emphasis on improving outcomes for historically underserved communities, households with lower income, and people in state and federal protected classes.

Monitoring Outcomes of the HPS

This is Tualatin's first HPS. As a result, the City is required to describe how it will measure the implementation and progress of the HPS. This section focuses on these issues.

Tualatin is required to report progress on implementation of the HPS to DLCD every three years.[37] This report must include:

- **A summary of the actions taken to implement the HPS**. There may be strategic actions that the City has not implemented on the schedule for the first three years of the HPS (i.e., actions expected to be adopted by December 31, 2024). If so, the City needs to provide an explanation of the barriers to implementation and a plan for addressing the need that the strategic action was intended to address. That plan could include identification of other strategic actions in the HPS that will meet the identified need, or it could include development of a new strategic action to meet the need.
- **A reflection of the efficacy of the strategic actions the City has implemented**. This reflection should discuss the outcomes the City is observing from the strategic actions they have implemented to date and could include expectations for future outcomes.

[37] This report is due to DLCD no later than December 31 three years after Tualatin adopts its HPS.

- **A reflection of the efficacy of the strategic actions in the context of the outcomes described above.** The section evaluates the goals and strategic actions in the HPS for expected outcomes such as increasing housing options for affordable homeownership, affordable rental housing, housing stability, housing options for people experiencing homelessness, housing choice, location of housing, and fair housing. The report should describe whether the goals and strategic actions implemented have resulted in the outcomes described above.

In addition, Tualatin is required to report about strategic actions that will not be adopted on the schedule presented in Exhibit 6. The City must notify DLCD that it will be unable to adopt the strategic action within 90 days of the end of the timeline to implement the strategic action. This notice must identify the actions or combinations of actions that the City will take to address the need that the strategic action was intended to address. This could include identification of other strategic actions in the HPS that will meet the identified need, or it could include development of a new strategic action to meet the need.

Tualatin proposes to monitor the impact of the HPS through the following measures. Tualatin staff will conduct a briefing to City Council every two years to discuss implementation of the HPS and the outcomes resulting from the strategic actions in the HPS.

- Number of new regulated affordable units built in Tualatin
- Loss of existing regulated affordable housing units
- Number of regulated affordable housing units that Tualatin contributed funding to, including the sources of funding or tax exemption
- Number of nonregulated affordable housing units that Tualatin contributed funding to, including the sources of funding or tax exemption
- Types of new units built
  - The types should at least include single-family detached, single-family attached, duplexes, triplexes, quadplexes, and multifamily with five or more units.
  - The types could be further disaggregated to include cottage housing, manufactured housing, accessory dwelling units, duplexes, triplexes, quadplexes, residential multifamily with five or more units, and mixed-use multifamily with five or more units.
- Densities of new units built by housing type and zone, considering the difference between the maximum allowed density and the built density
- Location of new units built
- Regulatory changes to allowable density by zone
- Code amendments that are made to remove barriers to development of housing

- Partnerships formed as a result of the HPS, including number of people served by the partnerships
- Changes in the characteristics of Tualatin's population, such as changes in:[38]
  - Median household income
  - Percent of population in communities of color
  - Percent of renters
  - Percent of renter households cost burdened and severely cost burdened
  - Percent of owner households cost burdened and severely cost burdened
- Changes in housing prices, such as:
  - Changes in median rent[39]
  - Changes in median sales price[40]

When Tualatin produces its next HPS in six years, the City will be required to summarize the efficacy of each strategic action included in this HPS. The information resulting from these measures will help Tualatin to summarize the outcomes and efficacy of the strategic actions in this HPS.

[38] The best source of data for these indicators is the US Census' American Community Survey Five-Year Estimate. These estimates naturally have some variation year over year and that variation may not indicate an actual change. The City should look at the change in these indicators over a period of at least 3 years or longer.

[39] The best existing source of data for rent is the US Census' American Community Survey Five-Year Estimate. The City should look at the change in these indicators over a period of at least 3 years or longer. The City may also want to discuss change in rents with knowledgeable stakeholders to get current information about rents.

[40] The US Census' American Community Survey Five-Year Estimate provides data about home values, but that data is not as reliable as other data about home sales. The City may be able to collect data about home sales from a source like Redfin or Zillow. Alternatively, the City may be able to work with a real estate professional who is able to provide median sales price data periodically.

Appendix A: Contextualizing Tualatin's Housing Needs

In 2019, Tualatin completed its Housing Needs Analysis for the 2020-2040 period.[41] The analysis found that Tualatin could not accommodate all of its housing needs on lands designated for residential use. Tualatin had a deficit of land in the Medium High Density and High-Density High-Rise Plan Designations, of seven acres (or 109 dwelling units) and four acres (or 101 dwelling units), respectively. The analysis also found that Tualatin had an unmet need for housing for extremely low income, very low–income, low-income, and moderate-income households—indicating a need for a wider range of housing types for renters and homeowners.

To build on Tualatin's recent planning efforts, including development of the Housing Needs Analysis, the City applied for a grant with the Department of Land Conservation and Development in 2020 to produce a prototype Housing Production Strategy. The Housing Production Strategy will craft policy measures and actions to address Tualatin's housing needs, meet the City's housing goals, and effect positive change in the community.

To contextualize Tualatin's housing needs, this memorandum summarizes relevant data from Tualatin's Housing Needs Analysis, Statewide Regional Housing Needs Analysis,[42] the Washington County Consolidated Plan,[43] and other available sources to describe current and future housing needs in the context of population and market trends in Tualatin. Where appropriate, this memorandum also draws on information gathered through engagement with housing producers and consumers, including underrepresented communities, through recent outreach efforts conducted by the City of Tualatin.

As a part of providing context to better understand Tualatin's housing needs, this memorandum presents information about housing in Tualatin for race, ethnicity, age, disability status, and other characteristics of the community to understand disproportionate housing impacts on different groups.

Data Used in This Analysis

Throughout this analysis, data from multiple well-recognized and reliable data sources were used. One of the key sources for housing and household data is the US Census. This report primarily uses data from two Census sources:[44]

[41] ECONorthwest. (December 2019). City of Tualatin Housing Needs Analysis, Final Report.

[42] ECONorthwest. (August 2020). Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations.

[43] Root Policy Research. (May 15, 2020). Washington County – Beaverton – Hillsboro 2020-2024 Consolidated Plan.

[44] It is worth commenting on the methods used for the American Community Survey. The American Community Survey (ACS) is a national survey that uses continuous measurement methods. It uses a sample of about 3.54 million

- The **Decennial Census**, which is completed every ten years and is a survey of *all* households in the United States. The Decennial Census is considered the best available data for information such as demographics (e.g., number of people, age distribution, or ethnic or racial composition), household characteristics (e.g., household size and composition), and housing occupancy characteristics. As of 2010, the Decennial Census does not collect more detailed household information, such as income, housing costs, housing characteristics, and other important household information. Decennial Census data is available for 2000 and 2010.
- The **American Community Survey (ACS)**, which is completed every year and is a *sample* of households in the United States. The ACS collects detailed information about households, including demographics (e.g., number of people, age distribution, ethnic or racial composition, country of origin, language spoken at home, and educational attainment), household characteristics (e.g., household size and composition), housing characteristics (e.g., type of housing unit, year unit built, or number of bedrooms), housing costs (e.g., rent, mortgage, utility, and insurance), housing value, income, and other characteristics.

This report uses data from the 2013-2017 ACS for Tualatin and comparison areas primarily. Where information is available and relevant, we report information from the 2000 and 2010 Decennial Census. Among other data points noted throughout this analysis, this report also includes data from Oregon's Housing and Community Services Department, the United States Department of Housing and Urban Development, RLIS, Redfin, Costar, the City of Tualatin, and the Washington County Consortia 2020-2024 Consolidated Plan.

households to produce annually updated estimates for the same small areas (census tracts and block groups) formerly surveyed via the Decennial Census long-form sample. It is also important to keep in mind that all ACS data are estimates that are subject to sample variability. This variability is referred to as "sampling error" and is expressed as a band or "margin of error" (MOE) around the estimate.

This report uses Census and ACS data because, despite the inherent methodological limits, they represent the most thorough and accurate data available to assess housing needs. We consider these limitations in making interpretations of the data and have strived not to draw conclusions beyond the quality of the data.

Existing Measures, Policies, or Strategies that Address Tualatin's Housing Needs

This City of Tualatin has the following housing measures (or policies or strategies) currently in place to address Tualatin's housing needs. These measures include:

- Prohibited single-family detached housing in most high-density zones in Tualatin.
- Allowed one or more accessory dwelling units (ADUs) in residential zones per lot.[45]
- Applied density standards uniformly across zones that allow dwelling units on fee simple lots and on multifamily sites.
- Ensured decisions about type and location of housing are data-driven and focused on equitable outcomes instead of the best outcomes for those with the most money and/or privilege.
- Removed open space/common amenity requirements for low-density residential.
- Provided information to small, local developers to help them understand land use permitting processes and to give developers a sense of clarity and certainty about the requirements so they can better provide smaller-scale housing.

Tualatin's existing measures generally focus on land use efficiency (such as allowing development of denser housing types) or measures to reduce development costs (such as removing open space requirements for some housing development). By and large, the types of policies that Tualatin has yet to adopt include policies to support:

- Development of affordable rental housing for households with incomes at or below 60% of Median Family Income (MFI).
- Preservation of affordable housing stock to prevent loss of affordable housing units and displacement of existing residents.
- Development and preservation of affordable housing for homeownership, including rehabilitation of existing housing.
- Expansion of workforce owner and rental housing to increase the jobs-housing balance.
- Increased racial and social equity for housing.
- Prevention and reduction of houselessness.
- Expansion of accessible housing and housing for people with special needs.
- Planning for mixed-use housing and redevelopment.
- Greater availability of diverse housing types through regulatory or zoning changes, including mixed-use housing and redevelopment in commercial areas.

[45] Tualatin's ADU provisions are not yet compliant in regard to HB 2001 off-street parking requirements.

- Planning for and developing transportation and public infrastructure to support affordable housing, workforce housing, and mixed-use housing development.

Summary of Tualatin's Housing Needs

Tualatin's primary housing needs, as described in the remainder of this memorandum, are:

- **Greater housing affordability and availability for renters.** Based on a survey of currently available rental properties in Tualatin, the typical asking rent for a two-bedroom apartment ranged from $1,125 for a one-bedroom unit to more than $2,000 per month for a three-bedroom unit. These costs are affordable to households earning 55% to 98% of the region's MFI (about $45,000 to $80,000). Competition for affordable units is strong and many cannot afford these rents without cost burdening themselves. In the 2013-2017 period, about 56% of Tualatin's renters were cost burdened, with 26% severely cost burdened.[46] Renters, especially those with lower incomes, are at risk of being displaced through increases in rental costs.
- **Greater housing affordability and availability for renters.** Based on a survey of currently available rental properties in Tualatin, the typical asking rent for a two-bedroom apartment was about $1,125 to more than $2,000 per month. These costs are affordable to households earning 55% to 98% of the region's MFI (about $45,000 to $80,000). Competition for affordable units is strong and many cannot afford these rents without cost burdening themselves. In the 2013-2017 period, about 56% of Tualatin's renters were cost burdened or severely cost burdened.
- **Housing diversity.** Tualatin is a relatively young and ethnically diverse city. While Tualatin comprises many families with and without children, the senior population across the region is growing. Tualatin serves as an important employment hub in the Portland Metro area, drawing workers from across the region. These characteristics suggest a need for a wide variety of housing types to meet the needs of a growing and diverse pool of existing and future residents.
- **Government-subsidized, emergency, and supportive housing.** Tualatin has about 604 rent-restricted affordable housing units (accounting for about 5% of Tualatin's housing stock), despite having about 1,753 households experiencing severe housing cost burden in the city. Tualatin's Continuum of Care region has 111 emergency shelter beds, 10 safe haven beds, 119 transitional shelter beds, and 725 permanently supportive housing beds supporting persons experiencing homelessness in the region. However, in 2019, 44% of people experiencing homelessness in the region were unsheltered and about 211

[46] A household is said to be cost burdened if they spend 30% or more of their gross income on housing costs. A household is said to be severely cost burdened if they spend 50% or more of their gross income on housing costs.

students in the Tualatin/Tigard School District experienced homelessness in some form in the 2018-19 school year (many of them doubled-up[47]).

Throughout this analysis, we discuss housing needs for specific populations, such as people of color. The reason for this discussion is that the housing needs of these populations are different from other groups in Tualatin. The Washington County Consolidated Plan describes the issue in the following way:

> "Analyses persistently demonstrate that some population groups, including communities of color and people with disabilities, experience disproportionately high housing cost burdens, are less likely to be homeowners, are disproportionately represented in the criminal justice system, have a school achievement gap and experience other disparities relative to health, wellbeing, wealth, income and life outcomes. In deciding on priorities, the County sought opportunities to address persistent historic imbalances, consider systemic causes and advance a more equitable and fair housing system."[48]

This analysis finds disproportionate housing needs in Tualatin for seniors, people of color, people with one or more disabilities, and people experiencing homelessness.

- **Seniors.** People 65 years of age and older tend to be disproportionally cost burdened compared to the average household—many living on fixed incomes in a region with increasingly growing housing costs.[49] About 62% of people aged 65 years of age and older are rent burdened in the Portland Region. Over the next twenty years, people over 65 years are expected to be the fastest-growing age group. As this group grows, Tualatin will need more housing that is affordable, physically accessible, and has needed services. Seniors will also need improved access to housing without discrimination, especially seniors who are also people of color.
- **People of Color.** About 55% of renter households that identified as Latino and 52% of renter households that identified as a non-Asian person of color were cost burdened in the Portland Region.[50] Latino is the largest ethnic or racial group in Tualatin (16% of the population) and has the lowest median income ($30,761) of any race or ethnicity in Tualatin. Broadly, the housing needs for many people of color in Tualatin include improved access to affordable units, access to housing in locations with "high

[47] "Doubled-up" refers to the sharing of other persons' housing due to loss of housing or economic hardship.

[48] *2020-2024 Consolidated Plan for Washington County and the Cities of Beaverton and Hillsboro, Executive Summary, page 3.*

[49] Some seniors have accumulated wealth, which is not accounted for in this analysis. Information about accumulated wealth is available at the national level but not at the state or city level.

[50] This information is not available on a city-by-city basis from the US Census ACS. This statistic is pulled from a statewide analysis from the report *Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations* by ECONorthwest, August 2020.

opportunity" (such as areas near jobs, transit, services, or high-quality education), and access to housing without discrimination.

- **People with disabilities.** Across the Portland Region, people with one or more disabilities experience dipropionate cost burden. In particular, 53% of renters in the Portland Region with a hearing or vision disability and 65% of renters with a disability other than a hearing or vision-based disability are cost burdened, compared to the average rate of cost burden for all households in the region at 46%. Housing needs of people with disabilities vary by type of disability, but in general, housing needs include a need for improved access to an affordable unit, improved physical access to housing units, access to housing with needed services, and access to housing without discrimination, especially for people with disabilities who are also people of color.
- **People experiencing homelessness.** People experiencing homelessness are disproportionately affected by lack of affordable housing. Three hundred seven people were identified as homeless and unsheltered in Washington County and 44 people were identified in the Tigard/Tualatin area in 2020. Housing needs for people experiencing homelessness vary by reason for homelessness. In Washington County, the primary reason people cited for experiencing homelessness was inability to afford housing. The broad housing needs for this group include needs for emergency assistance (including rent support), permanent supportive housing (including with supportive housing with services), and improved access to an affordable unit.

In addition to these needs, findings from public and stakeholder outreach helped to identify the following specific housing needs, as described later in this memorandum:

- ADA-accessible housing units and housing units developed with universal design components such as basic accessibility features; security or communication systems; easily traversed floors; remote control features; accessible lavatories, sinks, and counters; accessible bathtubs and showers; variable height counters and accessible work surfaces; and hearing and visual impairment aids.
- Wider range of housing types, such as more town homes and row houses, mixed-use development, duplexes, triplexes, cottage clusters, multigenerational housing, accessory dwelling units, and high-rise apartments (structures that are six to eight stories in height).
- Housing in mixed-use neighborhoods with access to transit, jobs, green space, and entertainment.
- Support for seniors to age in place.
- Housing options for households earning $50,000 or less.
- Higher-quality housing.

- Access to housing without discrimination.[51]

Discussions with stakeholders provided input on existing and expected barriers to development of needed housing, includes:

- High cost of land due to limited availability of sites (including larger sizes) that can accommodate new development.
- Increasingly high construction costs and competition for materials and labor.
- Zoning and development constraints, including lot size, height, density, and parking limitations/requirements.
- Competition for national or state grants and loans to subsidize affordable housing development.
- Developer willingness and financial ability to produce "needed" housing.

Overview of Housing Needs in Washington County

The Washington County Consolidated Plan for 2020 to 2024 presents additional information to provide context for Tualatin's housing needs. The groups with special housing needs in Washington County are elderly households, households with disabilities, and households with mental illness and/or substance abuse disorders. The section below presents a summary of the housing need for people in these groups. More information is available in Appendix D of the Washington County Consolidated Plan report.

- **Elderly and frail elderly.** In Washington County, between 8,000 and 20,000 elderly and frail elderly have unaddressed housing needs out of 95,000 individuals in 56,960 households that have at least one person 62 or older. About 21,000 households (38%) have a housing and supportive service need, and 25,000 households earn less than 80% of MFI and are very low income (an increase from the last Consolidated Plan). About 6,000 households in this group are extremely low income, earning less than 30% MFI. The primary concern of seniors who own their own home or live in market-rate rental housing is managing rising costs on fixed incomes. Affordable housing wait lists for seniors may be longer than their life expectancy, especially if they need a ground-floor unit. Moderate income seniors have no options for help. Lack of access to transportation is also a significant challenge for most seniors.

- **Persons with disabilities.** In Washington County, there are 57,605 households that have an individual with a self-care limitation, independent living limitation, and/or physical disability, representing 26%of households in the entire County. Another 18,200

[51] Issues around housing discrimination were additionally identified through the help of focus groups during production of the Washington County Consolidated Plan: Washington County, Beaverton, Hillsboro. (August 2020). *2020-2024 Consolidated Plan for Washington County and the Cities of Beaverton and Hillsboro*, Volume 1.

households have an individual with a cognitive limitation, representing 8% of households in the entire County.

- **Persons with mental illness and/or substance abuse disorders.** In Washington County, many as 40,000 have unaddressed substance abuse in need of treatment. According to the state data base on affordable housing, there are only three developments in Washington County that serve persons with substance abuse; these have a total of 84 beds.
- **Survivors of domestic violence.** In Washington County, there are an estimated 500 to 1000 housing units or supports needed.[52]

Some of the housing priorities in the Washington County Consolidated Plan include:

- Priorities for housing, including:
  - Increase the inventory of deeply affordable rental housing in good condition
  - Increase the inventory of accessible and visitable housing to serve elderly persons and those with disabilities
  - Improve the quality of affordable ownership housing in good condition and with accessibility features
  - Improve access to ownership for low to moderate income households through home buyer assistance programs/products and by helping increase the affordable ownership inventory
- Special needs priorities for elderly and frail; persons with disabilities; persons with mental illness and substance abuse challenges (includes those who are justice involved); adults and youth at risk and experiencing homelessness (including youth leaving the foster system); large families; agricultural workers; extremely low and very low–income households
- Neighborhood and community development priorities to expand transit to better serve persons with disabilities, elderly persons, and those without a car; expand the inventory of facilities servicing people experiencing homelessness; support household stabilization and displacement mitigation; and invest in public infrastructure and facilities that stabilize communities and support a variety of community needs and cultures.
- Public service priorities to fund supportive services and community-serving nonprofits and support educational and outreach activities focused on landlord-tenant and fair housing activities.

[52] *2020-2024 Consolidated Plan for Washington County and the Cities of Beaverton and Hillsboro, Appendix D.*

Demographic and Socioeconomic Characteristics Affecting Tualatin's Housing Needs

This section describes unmet housing needs in Tualatin by age, race and ethnicity, disability, household size and composition, and household income.

Age of People in Tualatin

Population growth is the primary driver of growth in housing. Between 2000 and 2020, Tualatin's population grew by about 4,404 people, with most of the growth occurring in the early 2000s. Over that period, Tualatin grew at a slower rate than Washington County and Oregon.

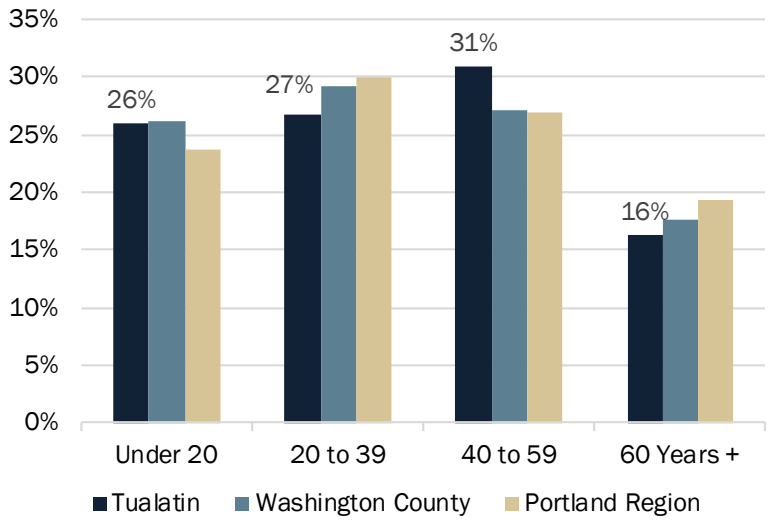
Growth in Tualatin's senior population, as well as other age cohorts, will continue to shape the city's housing needs. Seniors account for 16% of Tualatin's existing population, and Washington County expects to have more than 75,000 more people over 60 years old by 2040 than in 2020.

Growth in the number of seniors will result in demand for housing types specific to seniors, such as small and easy-to-maintain dwellings, assisted-living facilities, or age-restricted developments. Senior households will make a variety of housing choices, including remaining in their homes as long as they are able, downsizing to smaller single-family homes (detached and attached) or multifamily units, moving in with family, or moving into group housing (such as assisted-living facilities or nursing homes) as their health declines.

In the 2013-2017 period, about 16% of Tualatin's residents were over 60 years old.

Tualatin had a slightly smaller share of people over the age of 60 than Washington County and Portland Region.

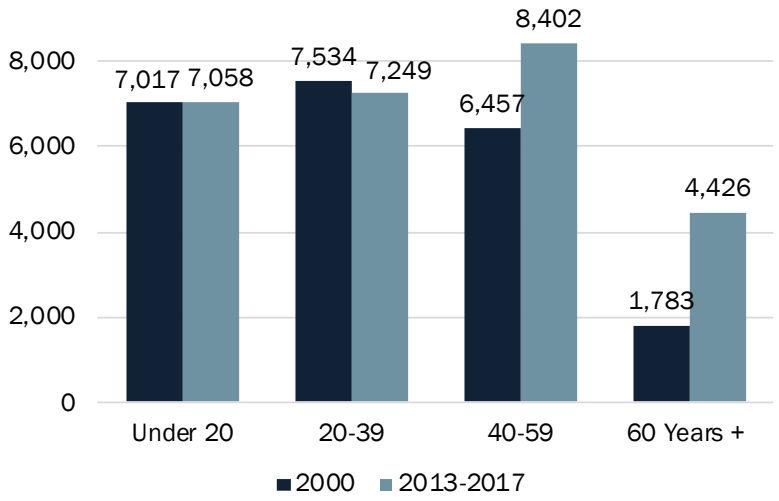
Exhibit 7. Population Distribution by Age, Tualatin, Washington County, and the Portland Region, 2013-2017
Source: US Census Bureau, 2013-2017 ACS, Table B01001.



Between 2000 and 2013-2017, people over 60 years old had the largest increase, adding 2,643 people.

Over the next 20 years (2020 to 2040), the population aged 60 and older in Washington County is forecast to grow by 62% (75,217 people).

Exhibit 8. Population Distribution by Age, Tualatin, 2013-2017
Source: US Census Bureau, 2000 Decennial Census Table P012 and 2013-2017 ACS, Table B01001.



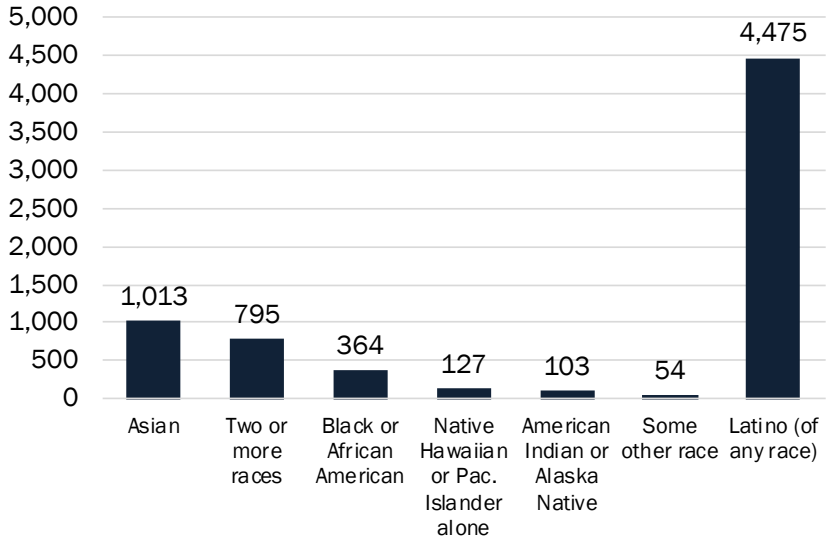
Race and Ethnicity

Understanding race and ethnicity characteristics[53] in Tualatin is important for understanding housing needs because people of color often face discrimination when looking for housing.

About 2,400 people identify as a race other than white in Tualatin. Nearly 4,500 people identify as Latino.

Not shown in the exhibit are the 23,694 people identifying as white in Tualatin.

Exhibit 9. Population by Race/Ethnicity, Tualatin, 2013-2017
Source: US Census Bureau, 2013-2017 ACS, Table B03002.



[53] The US Census Bureau considers race and ethnicity as two distinct concepts. Latino is an ethnicity and not a race, meaning individuals who identify as Latino may be of any race.

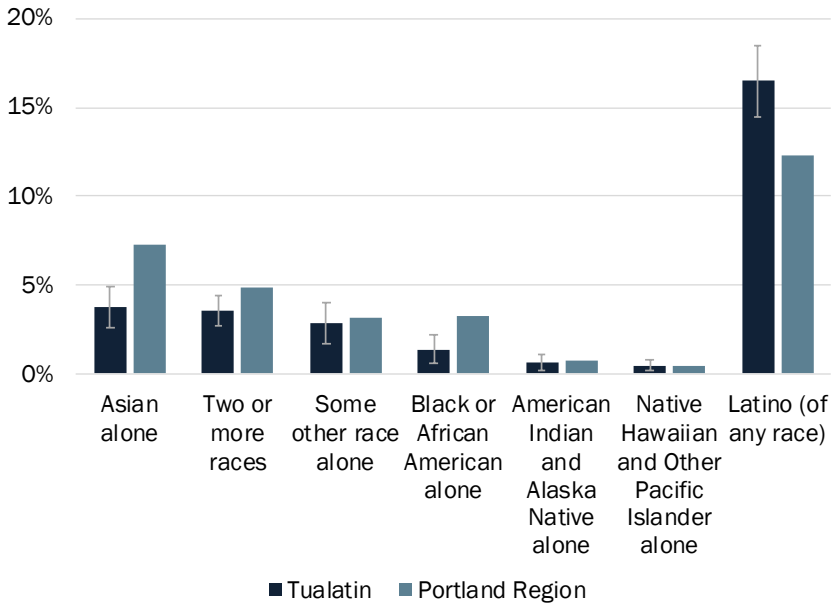
Residents who identify as Latino (of any race) account for 16% of Tualatin's population. The largest racial group in Tualatin is the Asian community, which accounts for 4% of Tualatin's population.

Not shown in this exhibit is about 74% of Tualatin's population and 72% of the Portland Region's population identifying as white.

Exhibit 10. Share of Population by Race and Ethnicity (Percent of Total Population), Tualatin, and the Portland Region, 2013-2017

Source: US Census Bureau, 2013-2017 ACS, Table B03002.

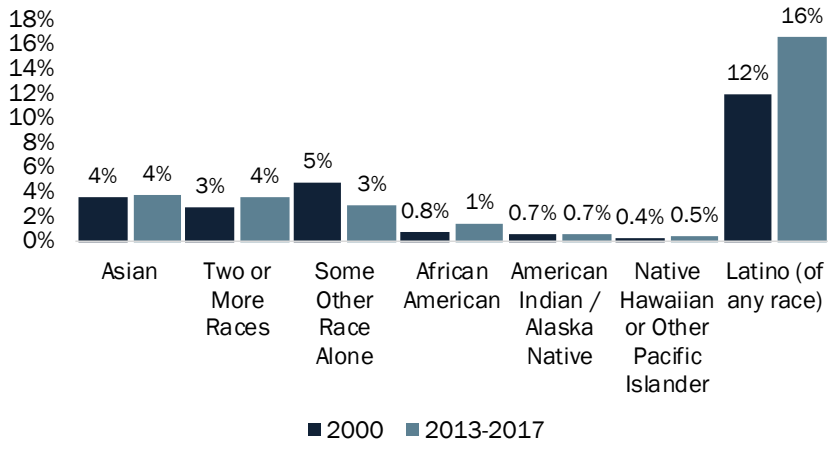
Note: Gray bars denote the potential upper and lower bound of the estimate using the margin of error reported by the Census.



The share of Tualatin's households that identified as Latino (of any race) increased from 2,701 people in 2000 to 4,475 people in 2017, consistent with regional trends.

Exhibit 11. Change in Population by Race/Ethnicity as a Percent of the Total Population, Tualatin, 2000 and 2013-2017

Source: US Census Bureau, 2013-2017 ACS, Table B01001.



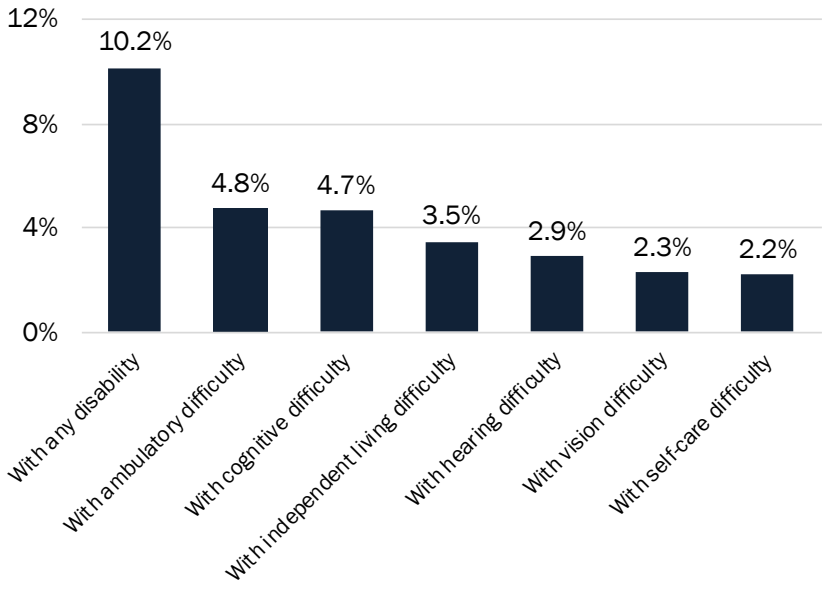
People with One or More Disabilities

People with one or more disabilities have special housing needs because they may need housing that is physically accessible, that meets the needs of people with a cognitive disability, or that has specialized services.

People with disabilities comprise about 10% of Tualatin's population, or 2,800 people.

Exhibit 12. Share of Population with a Disability by Type of Disability, Tualatin, 2013-2017

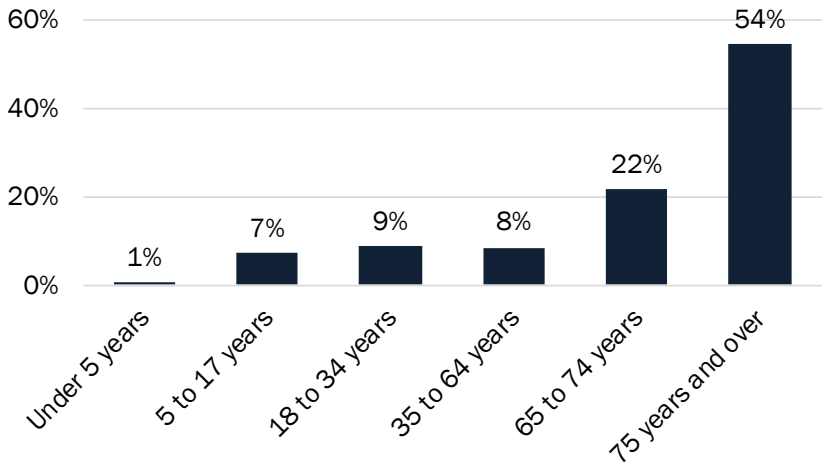
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table S1810. Note that an individual can have more than one disability.



The likelihood of having a disability increases with age. In Tualatin, over half the population that was 75 years and older had one or more disabilities.

Exhibit 13. Share of Population with a Disability by Age Group, Tualatin, 2013-2017

Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table S1810



Household Size and Composition

Housing need varies by household size and composition. The housing needs of a single-person household are different than those of a multigenerational family. Tualatin's households are smaller than Washington County's households.

Tualatin's average household size was smaller than Washington County's and Clackamas County's, but larger than Multnomah County's.

Exhibit 14. Average Household Size, Tualatin, Washington County, Clackamas County, Multnomah County, 2013-2017
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table B25010.

2.49 People
Tualatin

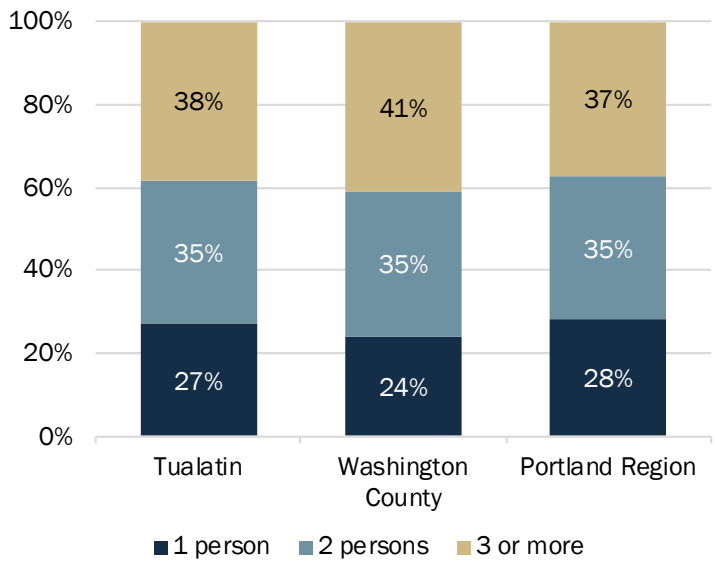
2.66 People
Washington County

2.42 People
Multnomah County

2.58 People
Clackamas County

About 62% of Tualatin's households were 1 or 2-person households, compared to 59% of Washington County's and 63% of the Portland Region's households.

Exhibit 15. Household Size, Tualatin, Washington County, and Portland Region, 2013-2017
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table B25010.

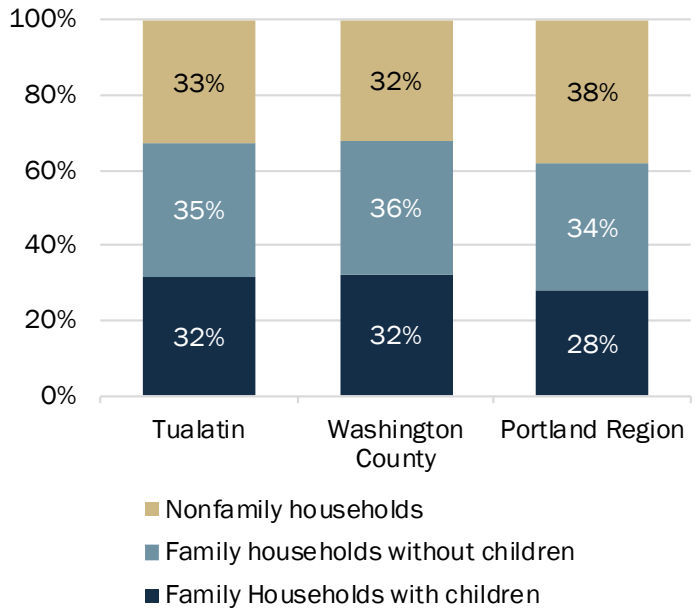


Tualatin had a similar household composition to Washington County. Compared to the Portland Region, Tualatin had a smaller share of nonfamily households and a larger share of family households with children.

About a third of Tualatin's households were nonfamily households (i.e., 1-person households and households composed of roommates).

Exhibit 16. Household Composition, Tualatin, Washington County, and Portland Region, 2013-2017

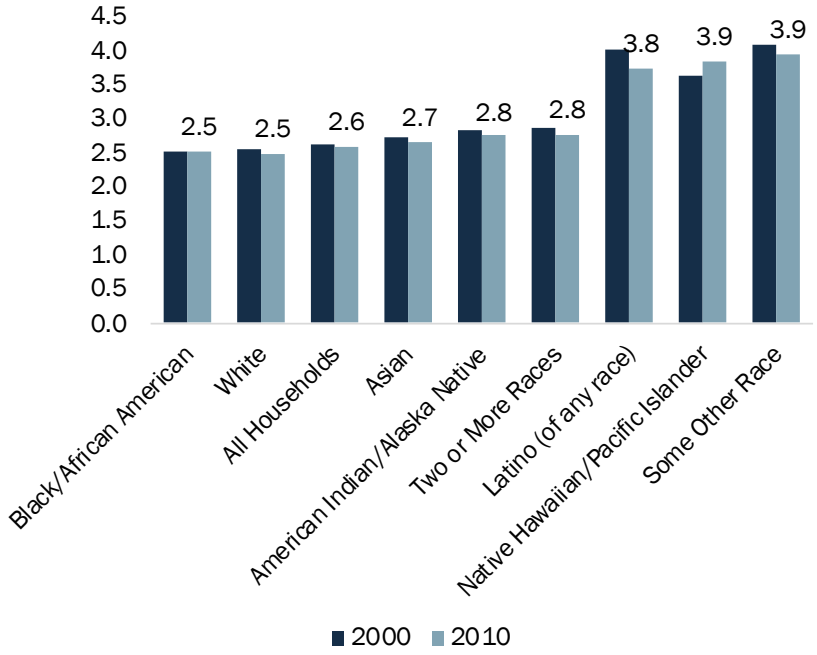
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table DP02.



Tualatin's households that identified as Black/African American and white had smaller household sizes than other racial or ethnic groups.

Exhibit 17. Historical Average Household Size Trends by Race and Ethnicity, Tualatin, 2000 and 2010

Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table B25010.

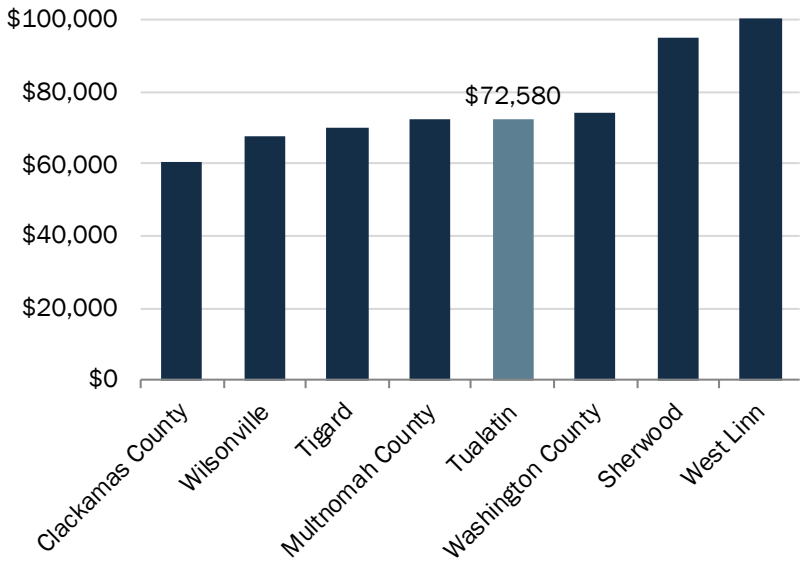


Household Income

Income is one of the key determinants in housing choice and household ability to afford housing. Income for residents living in Tualatin was lower than the Washington County median income and the state's median income.

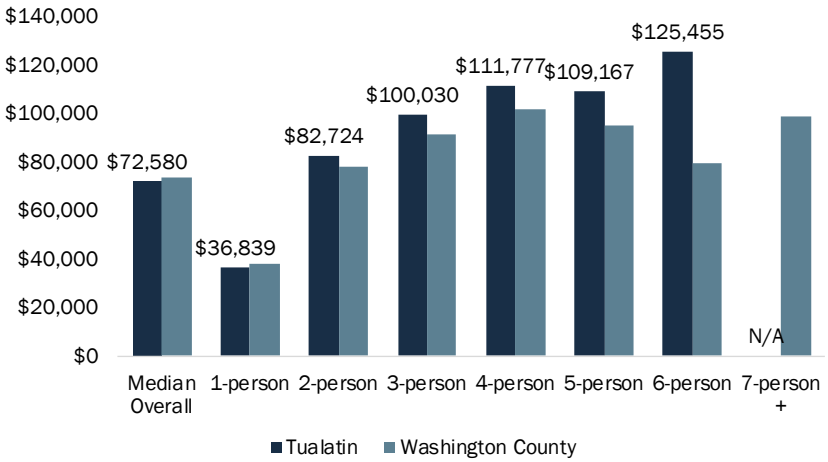
Over the 2013-2017 period, Tualatin's median household income (MHI) was $1,453 below that of Washington County's.

Exhibit 18. Median Household Income, Tualatin, Washington County, and Comparison Regions, 2013-2017
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table B25119.



In Tualatin, household income tends to increase with household size, peaking with households with four to six people.

Exhibit 19. Household Income by Household Size, Tualatin and Washington County, 2013-2017
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table B19019.

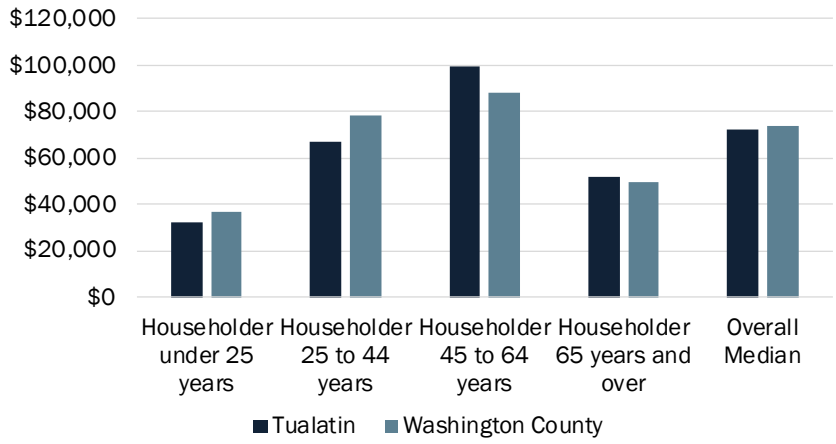


Median household income was comparatively lower for households over 65 years in Tualatin and the county.

In Tualatin, median household income for householders 65 years and older was $57,073, compared to the overall median of $81,118 in the 2014-2018 period.

However, older households may have wealth and savings not reflected in this statistic.

Exhibit 20. Median Household Income by Age, Tualatin, 2013-2017
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table B19049.



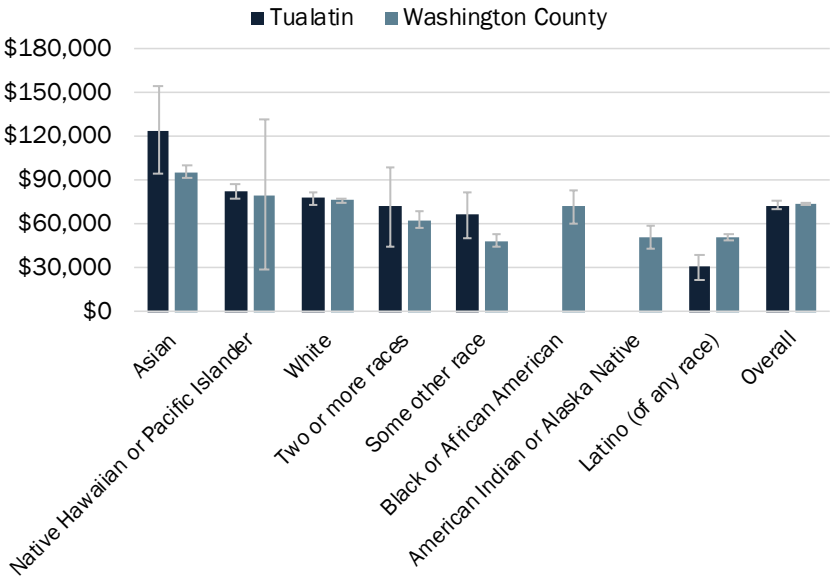
Household income varies among households with different races and ethnicity.

In Tualatin, median household income was proportionately higher for households with an Asian-identifying head of household.

The median household income was proportionately lower than the overall average for households with a head of household identifying as Latino or some other race.

Exhibit 21. Median Household Income by Race and Ethnicity for the Head of Household, Tualatin and Washington County, 2013-2017
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimate, Table S1903.

Note: In Tualatin, data was not available for heads of households identifying as Black or African American and as American Indian or Alaska Native.
Gray bars denote the potential upper and lower bound of the estimate using the margin of error reported by the Census.



Housing Market Conditions and Trends

An analysis of housing market conditions and trends in Tualatin provides insight into the functioning of the local housing market. The housing types used in this analysis are consistent with needed housing types as defined in ORS 197.303:

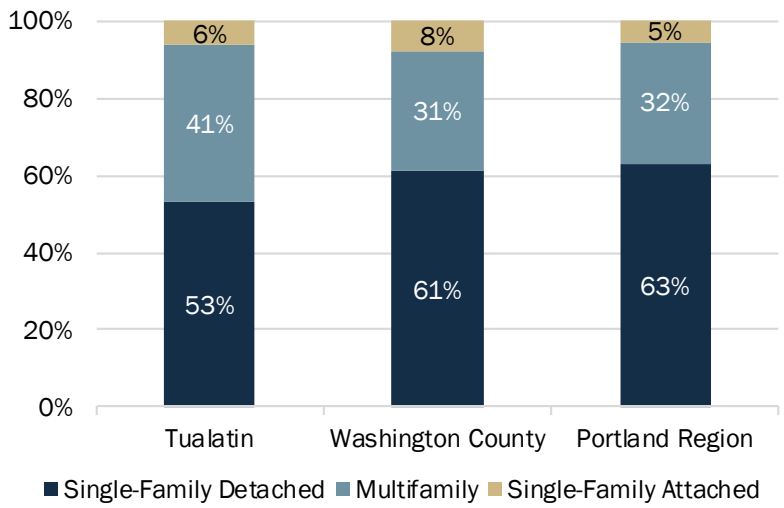
- **Single-family detached** includes single-family detached units, manufactured homes on lots and in mobile home parks, and accessory dwelling units.
- **Single-family attached** is all structures with a common wall where each dwelling unit occupies a separate lot, such as row houses or town houses.
- **Multifamily** is all attached structures (e.g., duplexes, triplexes, quadplexes, and structures with five or more units) other than single-family detached units, manufactured units, or single-family attached units.

Existing Housing Stock

According to the 2013-2017 American Community Survey (ACS) from the US Census, Tualatin had 11,329 dwelling units, an increase of 2,110 dwelling units from 2000. In that time, about 771 units of multifamily housing were built in Tualatin, accounting for 37% of the 2,110 new units over that period.

Tualatin had a smaller share of single-family detached housing and a larger share of multifamily housing than Washington County and the Portland Region.

Exhibit 22. Housing Mix, Tualatin, Washington County, Portland Region, 2013-2017
Source: US Census Bureau, 2013-2017 ACS Table B25024.



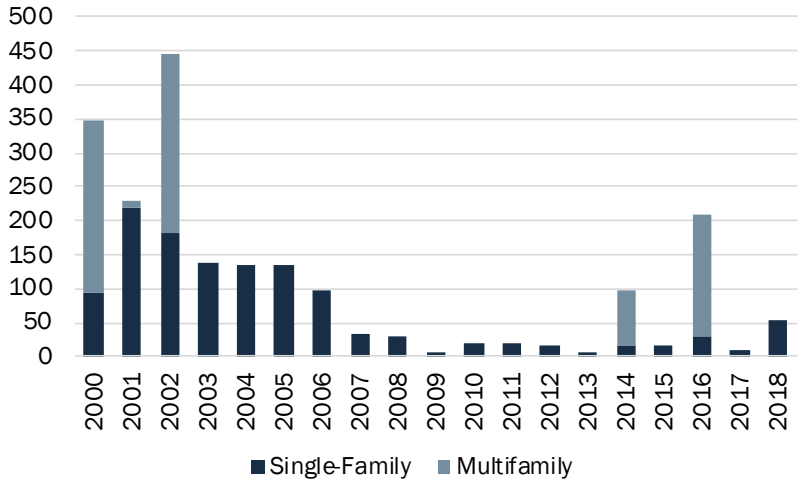
Development of multifamily housing was strong and cyclical in Tualatin.

Between 2000 and 2016, 789 new multifamily units were developed in Tualatin. Between 2000 and 2018, 1,262 new single-family units were developed in Tualatin.

Note: The single-family category includes detached and attached single-family homes. The multifamily category is inclusive of all multifamily types (duplexes to larger units).

Exhibit 23. Units Built by Year and Type of Unit, Tualatin, 2000 to 2016/2018[54]

Source: RLIS (data pulled November 2020).



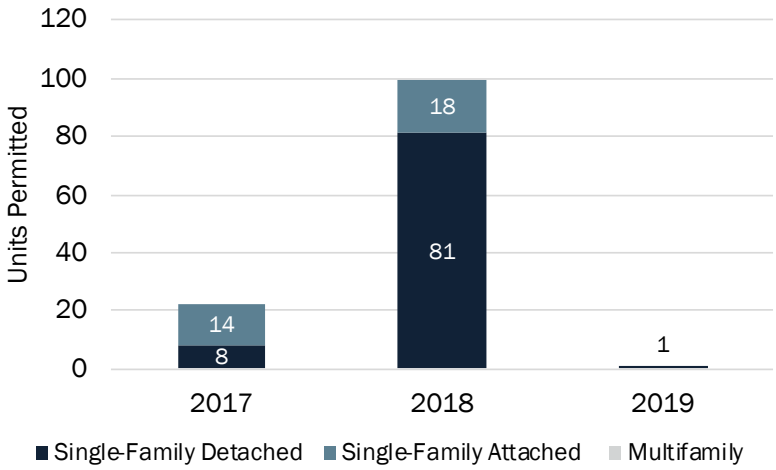
In the last three years, mostly single-family detached housing has been permitted in Tualatin.

In 2019, a 264-unit apartment complex began the permitting process.

Another 116-unit affordable housing apartment complex is currently in process to annex to Tualatin.

Exhibit 24. Units Permitted, Tualatin, 2017, 2018, 2019

Source: City of Tualatin Permit Database.

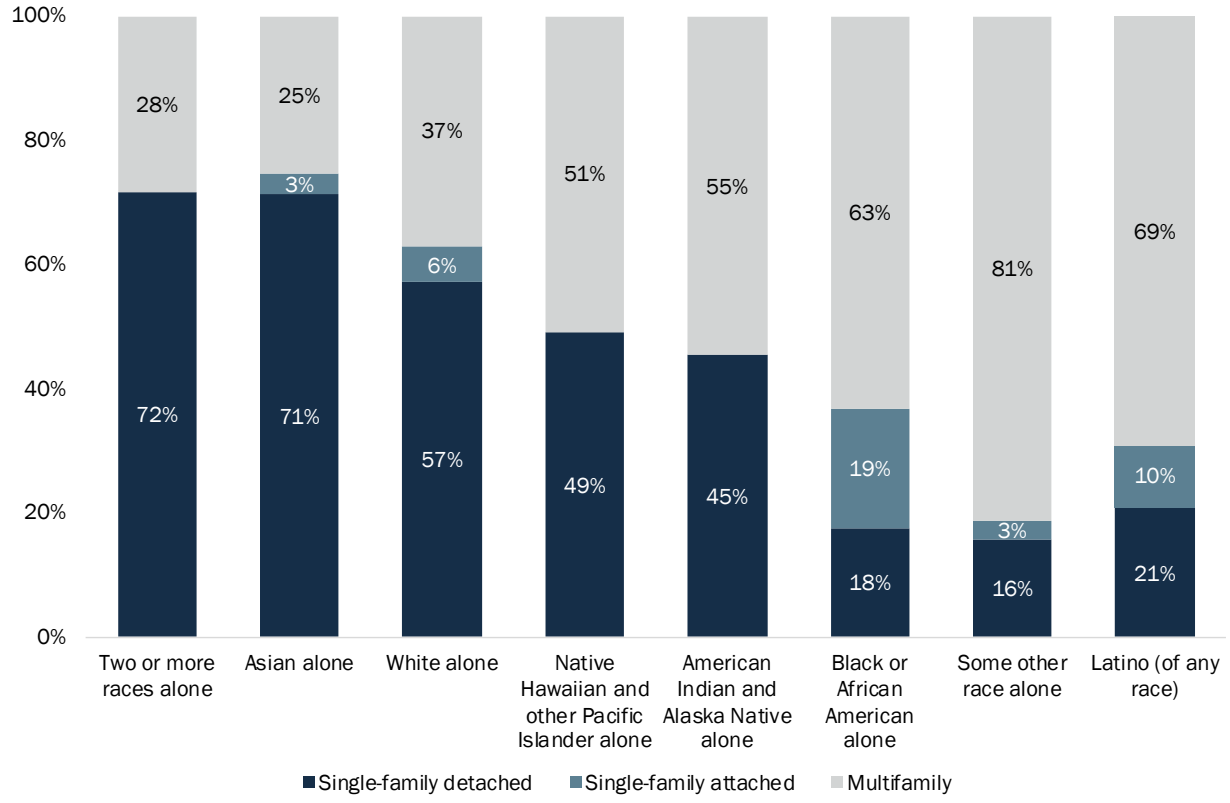


[54] A disclaimer about RLIS data: data for single-family and multifamily units is updated by Metro periodically. In Tualatin, RLIS data for multifamily units represents development through 2016 and the RLIS data for single-family units represents development through 2018.

Exhibit 25 shows that households that identified as Two or More Races or Asian were most likely to live in single-family detached housing (72% and 71%, respectively). The people most likely to live in multifamily housing were Black, at 63% of households; Latinos (of any race), at 70% of households; and people identifying as some other race, at 81% of households.

While this exhibit reflects the types of housing these groups *currently* live in and/or what they can currently afford to live in, it may not reflect their housing preferences.

Exhibit 25. Housing Mix by Race and Ethnicity, Tualatin 2013-2017
Source: US Census Bureau, 2013-2017 ACS Table B25032 B-H, I.

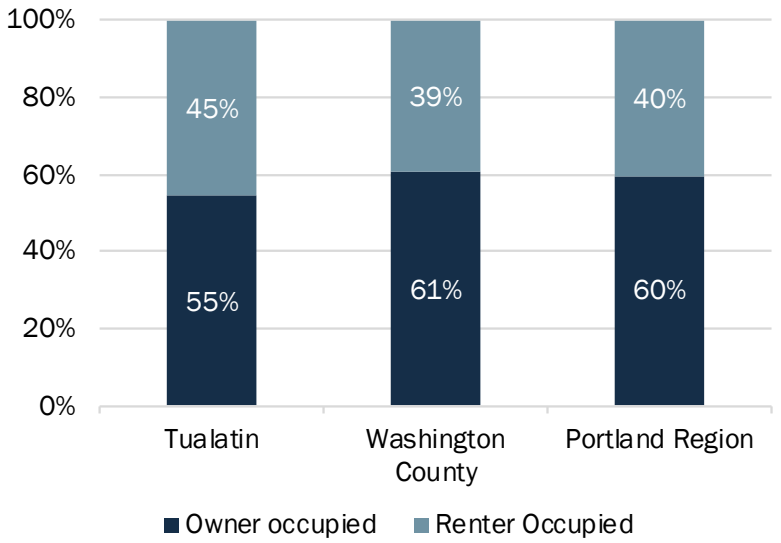


Housing Tenure

Housing tenure describes whether a dwelling is owner or renter-occupied. In 2000 as well as in the 2013-2017 period, 55% of Tualatin's housing stock was owner occupied and 45% was renter occupied.

Tualatin had a lower homeownership rate than Washington County and the Portland Region by 6 percentage points.

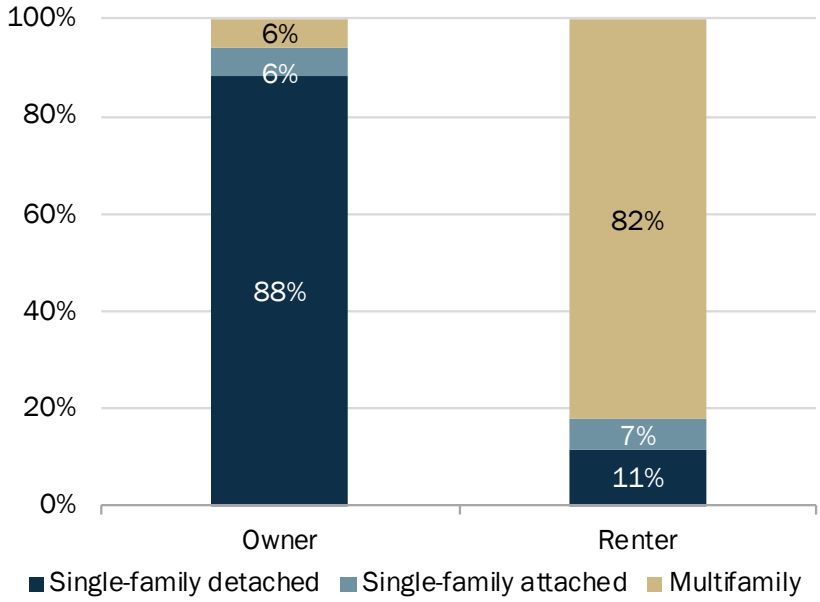
Exhibit 26. Tenure, Occupied Units, Tualatin, Washington County, and Portland Region, 2013-2017
Source: US Census Bureau, 2013-2017 ACS 5-Year Estimates, Table B24003.



Most of Tualatin homeowners (88%) lived in single-family detached housing.

In comparison, most of Tualatin renters (82%) lived in multifamily housing.

Exhibit 27. Housing Units by Type and Tenure, Tualatin, 2013-2017
Source: US Census Bureau, 2013-2017 ACS Table B25032.

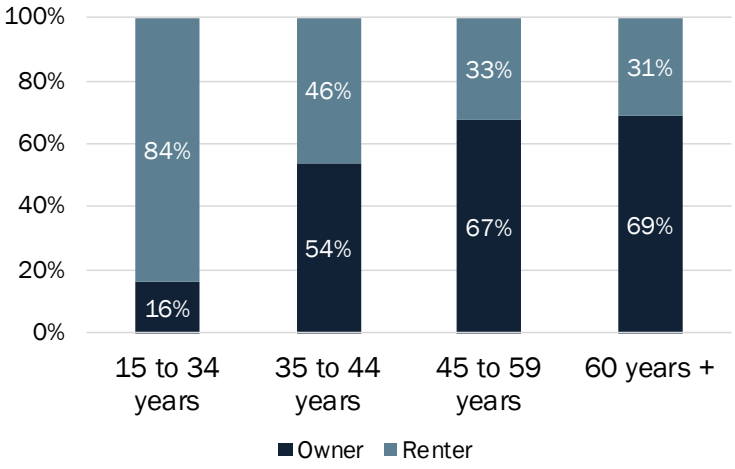


Tualatin's household homeownership rate increases with age.

In Tualatin, nearly 70% of householders over the age of 60 owned their own home.

Exhibit 28. Housing Tenure by Age of the Head of Household, Tualatin, 2013-2017

Source: US Census Bureau, 2013-2017 ACS Table B25007.

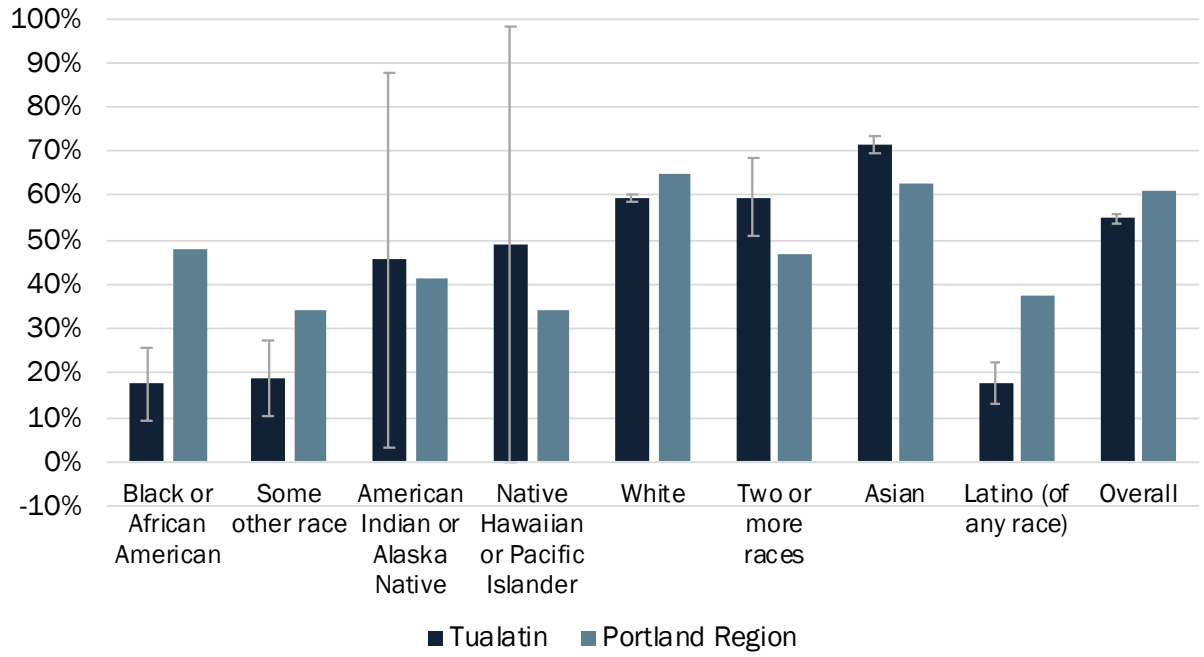


As Exhibit 29 shows, in Tualatin, the homeownership rates were lowest for households with a Black/African American or Latino-identifying head of household.

Exhibit 29. Homeownership Rate by Head of Households' Race and Ethnicity, Tualatin and Washington County, 2013-2017

Source: US Census Bureau, 2013-2017 ACS Table B25003 and B25003 B-I.

Note: Gray bars denote the potential upper and lower bound of the estimate using the margin of error reported by the Census. For American Indian or Alaska Native and Native Hawaiian or Pacific Islander, the margin of error is very large in Tualatin because those populations are so small in Tualatin.



Vacancy Rates

Housing vacancy is a measure of housing that is available to prospective renters and buyers. It is also a measure of unutilized housing stock. The Census defines vacancy as "unoccupied housing units . . . determined by the terms under which the unit may be occupied, e.g., for rent, for sale, or for seasonal use only."

According to the 2013-2017 Census, the vacancy rate in Tualatin was the lowest at 4.3%, compared to 4.8% for Washington County and 5.5% for the Portland Region.

Tualatin's homeowner vacancy rate is lower than its rental and overall vacancy rates.

Exhibit 30. Vacancy Rate by Tenure, Tualatin, 2013-2017
Source: US Census Bureau 2013-2017 ACS Table DP04.

Homeowner	**1.4%** of Total Dwelling Units
Rental	**3.7%** of Total Dwelling Units
Total	**4.3%** of Total Dwelling Units

As of 2013-2017, less than half a percent of Tualatin's dwelling units were vacant for seasonal, recreational, or occasional use (e.g., short-term rentals or vacation homes).

Exhibit 31. Vacancy for Seasonal, Recreational, or Occasional Use, Tualatin, 2000 and 2013-2017[55]

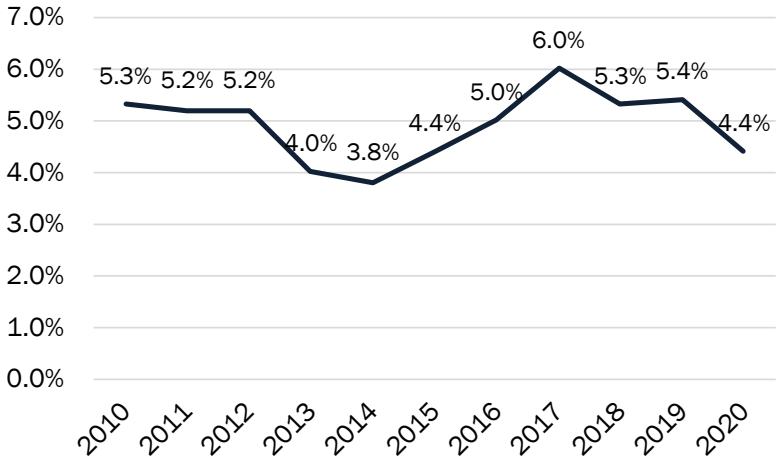
2000	**43 Units**	**0.5%** of Total Dwelling Units
2013-2017	**44 Units**	**0.4%** of Total Dwelling Units

Tualatin's multifamily vacancy rate was 4.4% in 2020, down from Tualatin's 10-year high of 6.0% in 2017.

Exhibit 32. Average Multifamily Vacancy Rate, Tualatin, 2010–2020
Source: CoStar.



[55] Short-term rentals (commercial lodging) are not an allowed use in Tualatin's residential zones.

Rent-Restricted and Emergency Housing

Governmental agencies offer subsidies to support housing development for extremely low income, very low–income, and low-income households. Tualatin has three rent-restricted housing developments, with 604 subsidized units. These 604 units represented about 5.3% of Tualatin's total housing stock in the 2013-2017 period. In addition to these rent-restricted units, and as of August 5, 2019, households in Tualatin utilized 113 of Washington County Housing Authority's Housing Choice Vouchers.[56]

Manufactured Housing Communities

Manufactured homes provide a source of affordable housing in Tualatin. They provide a form of homeownership that can be made available to low and moderate-income households. Cities are required to plan for manufactured homes—both on lots and in parks. Exhibit 35 shows that Tualatin has two manufactured housing parks, with a total of 178 spaces within its city limits.

People Experiencing Homelessness

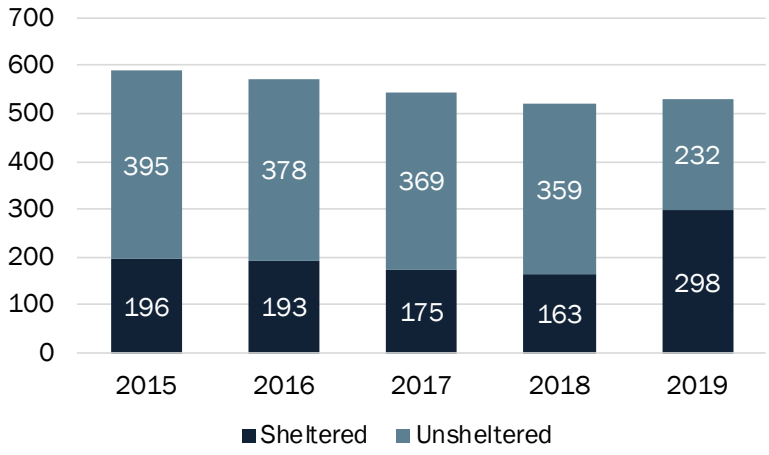
According to HUD's 2019 Homeless Assessment Report, across the United States, people experiencing homelessness increased. People experiencing *unsheltered* homelessness increased across all racial groups, among women and girls, and for people 25 and older. [57] Oregon had the second-highest rate of people experiencing unsheltered homelessness in the United States (64% of total people experiencing homelessness), behind California only. Oregon also had the largest change in homelessness by state (an increase of 1,400 people or 10% change from 2018-2019), again behind California. The following exhibits provide local estimates of homelessness in Tualatin's region.

[57] The US Department of Housing and Urban Development. (2019). The 2019 Annual Homeless Assessment Report (AHAR) to Congress. Office of Community Planning and Development.

In 2019, Tualatin's Continuum of Care (CoC) district counted 530 people experiencing homelessness in their annual Point-in-Time estimate.

In 2019, 44% of the people experiencing homelessness were unsheltered, down from 67% in 2015.

Exhibit 36. Homelessness Estimate (Sheltered and Unsheltered), Hillsboro/Beaverton/Washington County CoC, 2015-2019
Source: Annual Homeless Assessment Report (AHAR) PIT data.



About 44 people were experiencing unsheltered homelessness in the Tigard/Tualatin area in 2020.

Proportioning out these individuals using population, this analysis estimates that about 15 individuals experienced homeless in Tualatin.

Exhibit 37. Unsheltered Homelessness, Washington County and Tualatin/Tigard Area, 2020

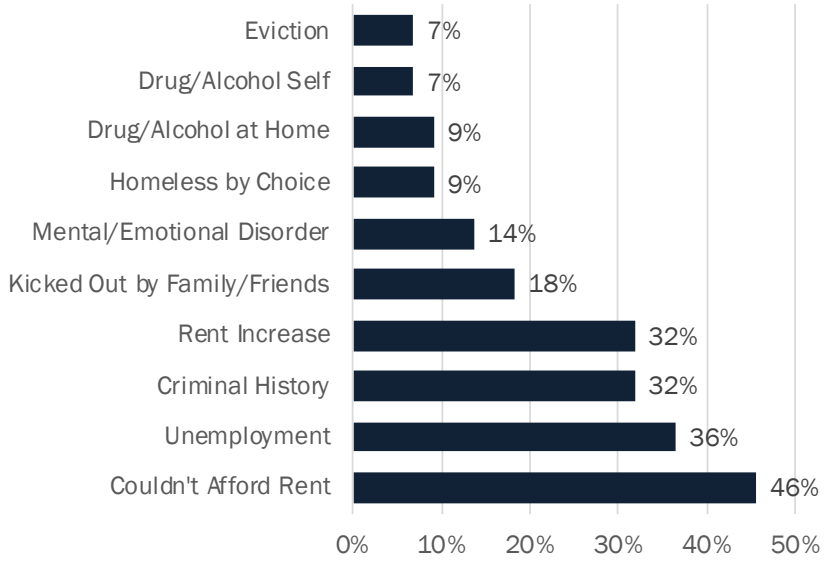
Source: Washington County Department of Housing Services, PIT data. Portland State University Population Estimates for Tualatin and Tigard Area.

Washington County	**307**[58] Unsheltered People	**33%** Chronic Homeless	**18%** Domestic Violence
Tualatin / Tigard Area	**44** Unsheltered People	**27%** Chronic Homeless	**14%** Domestic Violence
Tualatin	**15** Estimated Unsheltered People	-	-

The primary reason for homelessness in the Tigard/Tualatin area was inability to afford rent.

Exhibit 38. Reason for Unsheltered Homelessness, Tualatin/Tigard Area, 2020

Source: Washington County Department of Housing Services, from the PIT 2020 Tigard Tualatin Presentation. Exhibit remade by ECONorthwest for readability.



[58] The PIT count is a snapshot of individuals experiencing homelessness on a single night in a community. Though the PIT count is not a comprehensive survey, it serves as a measure of homelessness at a given point in time and is used for policy and funding decisions.

From the 2017-18 school year to the 2018-19 school year, student homelessness increased from 207 students to 211 students, resulting in an increase of four students.

Of the 211 students in 2018-19 experiencing homelessness, 36 were unaccompanied youth (17%).

Exhibit 39. Students Homeless by Living Situation, Tigard/Tualatin School District, 2017-2018 and 2018-2019

Annual Average

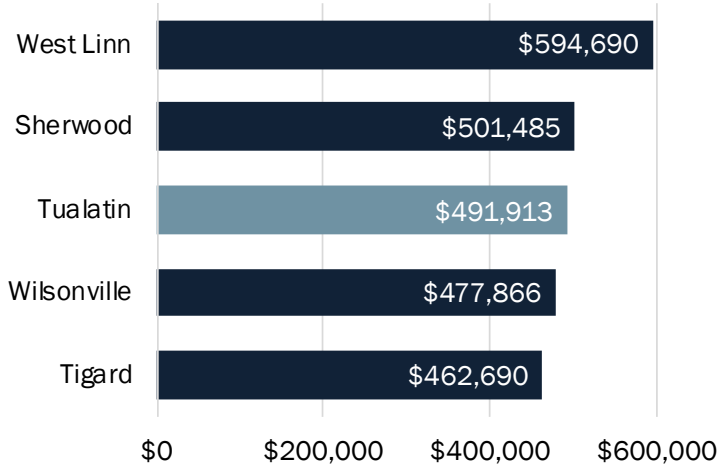
Housing Affordability Considerations

This section describes changes in sales prices, rents, and housing affordability in Tualatin. It uses cities in the region, as well as Washington County and Oregon, as comparisons. Both housing sales prices and rents have increased steadily in Tualatin and the greater region over the last several years.

Housing Costs

In 2020, Tualatin's annual, median home sales price was $491,913, or $102,777 less than West Linn's and $29,223 more than Tigard's median home sales price.

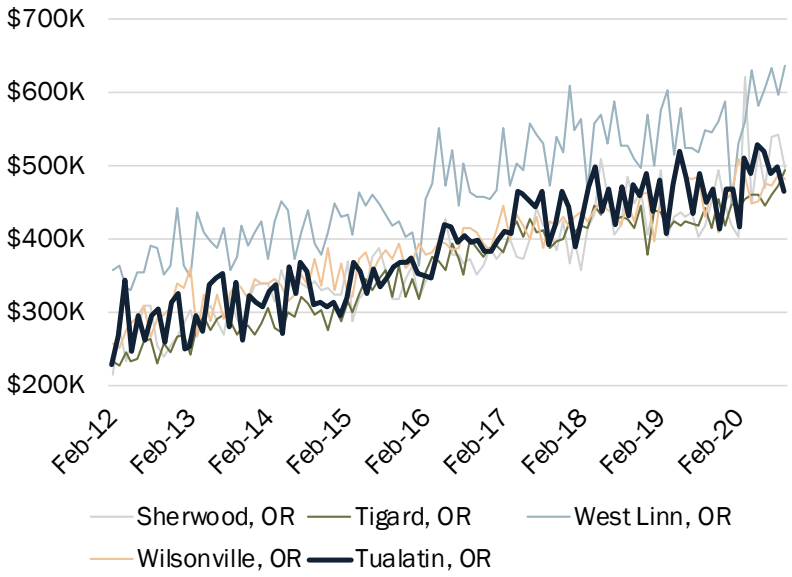
Exhibit 41. Median Home Sales Price, Tualatin and Comparison Cities, 2020 Annual Median
Source: Redfin.



Over the last decade, median home sales prices have marched upward in Tualatin and comparison cities. In 2020, Tualatin's median home sales price was $491,913.

Between February 2012 and 2020, home sales prices increased by $261,913 (114%) in Tualatin, consistent with changes in sales prices in nearby cities.

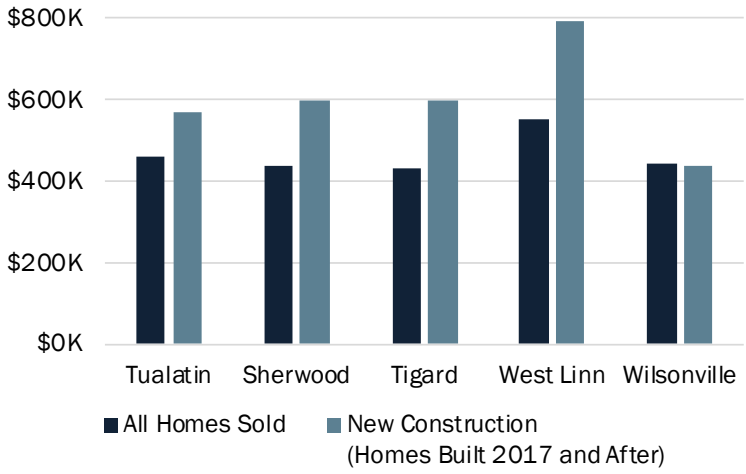
Exhibit 42. Median Sales Price, Single-Family housing, Tualatin and Comparison Cities, February 2012–September 2020
Source: Redfin.



Newly built homes generally have higher prices than existing housing.

In Tualatin, the median sales price of all homes sold since 2017 (including existing housing) was $461,204, compared to $566,900 for new homes sold (i.e., new construction—homes built since 2017).

Exhibit 43. New Construction Price Premium, Tualatin and Comparison Cities, January 2017 through September 2020
Source: Redfin.



Renter Costs

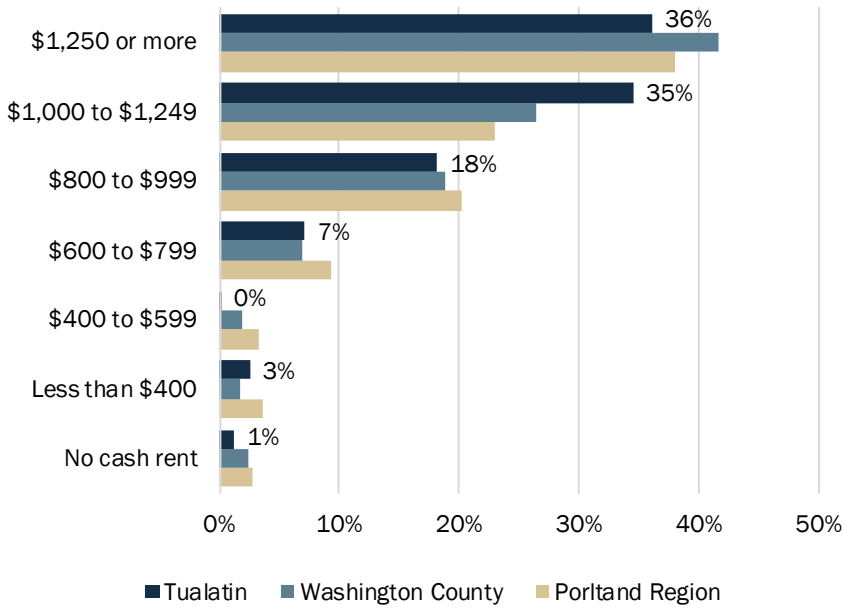
Rental costs are increasing in Tualatin. According to the US Census and ACS, median gross rents in Tualatin increased from $768 in 2000 to $1,154 in the 2013-2017 period.

Most renters in Tualatin paid more than $1,000 per month in rent.

About 36% of Tualatin's renters paid $1,250 or more in gross rent per month, a smaller share than renters across Washington County (42%) and the Portland Region (38%).

Exhibit 44. Gross Rent, Tualatin, Washington County, and Portland Region, 2013-2017

Source: US Census Bureau, 2013-2017 ACS Table B25063.



The average asking rent per unit has increased steadily for all bedroom sizes since 2010.

The asking rent for a 2-bedroom unit in Tualatin increased from $873 in 2010 to $1,334 in 2019, an increase of $461 (53% change).

Exhibit 45. Average Multifamily Asking Rent by Bedroom Size, Tualatin, 2010 through 2019[59]

Source: CoStar.

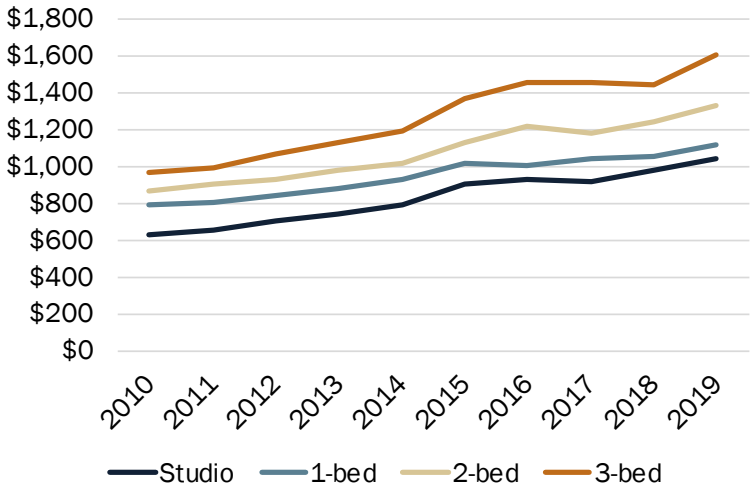


Exhibit 46 presents the findings of an assessment of available rental properties advertised on Apartments.com as of December 2020. The rental costs for these developments likely have

[59] This analysis excludes units with four or more bedrooms, as there is highly limited observations in the CoStar inventory for Tualatin.

higher asking rents compared to all rental housing in Tualatin. This is because Apartments.com (and similar platforms) are more likely to include listings for newer, professionally managed, larger apartment buildings (those typically priced with a premium). Exhibit 46 shows a broader, more complete picture of housing costs for renters in Tualatin than Census or CoStar data alone.

Exhibit 46. Rent Survey Findings, Tualatin, December 2020

100% MFI	$1,726 – $2,394	$1,726	$2,072	$2,394

Housing Cost Burden

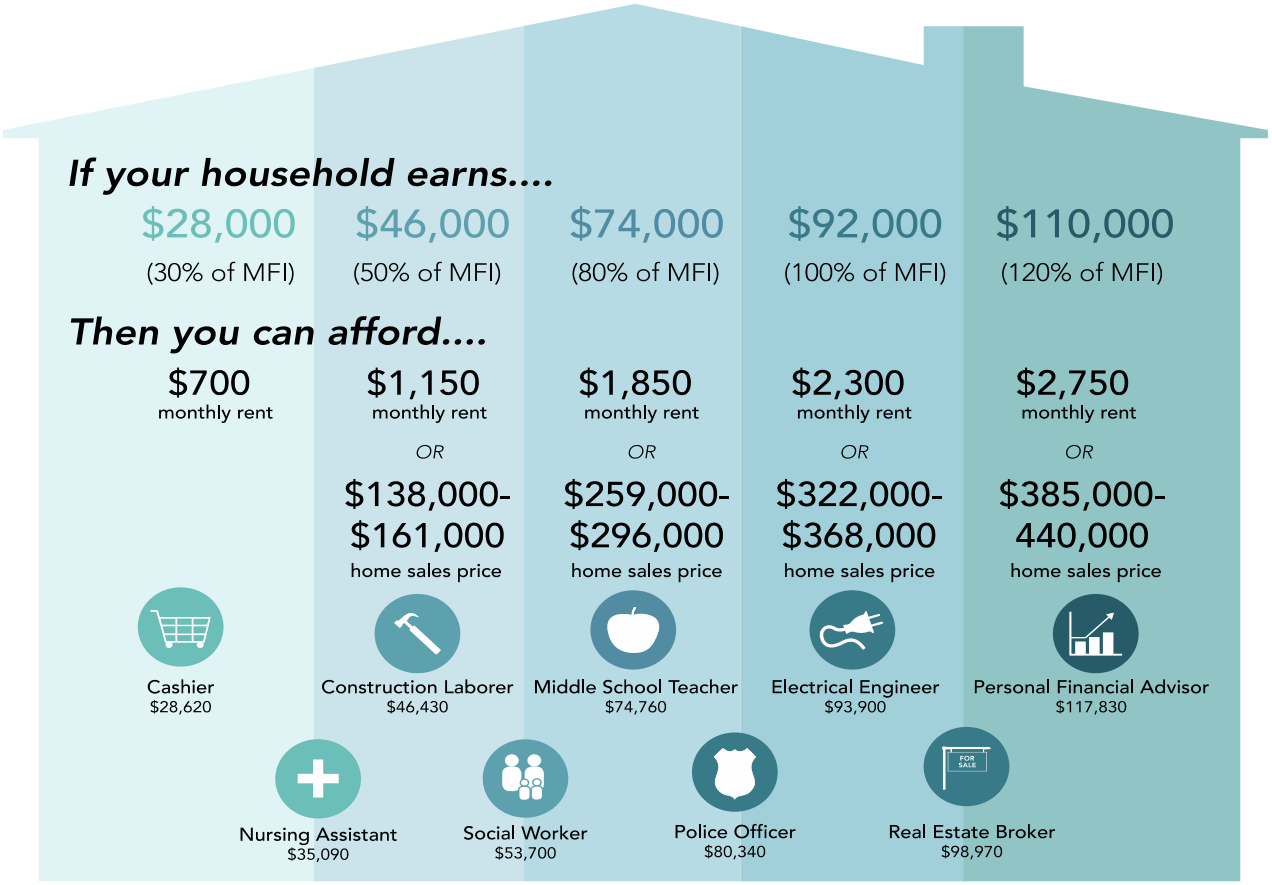
Financially attainable housing costs for households across the income spectrum in Washington County are identified in Exhibit 47. For example, a household earning Median Family Income in Washington County (about $92,000 per year for a family of four) can afford a monthly rent of about $2,300,[60] or a home roughly valued between $322,000 and $368,000, without cost burdening themselves.

A household would need to earn about $140,500 a year (153% of MFI for a family of four) to afford the median sales price of a home in Tualatin ($491,913). A household would need to earn about $58,000 (63% of MFI for a family of four) to afford the rent on a two-bedroom apartment in Tualatin ($1,450).

[60] Note that Median Family Income for the region is different than median household income (MHI) for Tualatin (see Exhibit 18). MFI is determined by HUD for each metropolitan area and nonmetropolitan county. It is adjusted by family size—in that 100% MFI is adjusted for a family of four. MHI is a more general term. MHI includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not.

Exhibit 47. Financially Attainable Housing, by Median Family Income (MFI) for Washington County ($92,000), Tualatin, 2020

Source: US Department of HUD 2020. Note: MFI is Median Family Income for a family of 4.



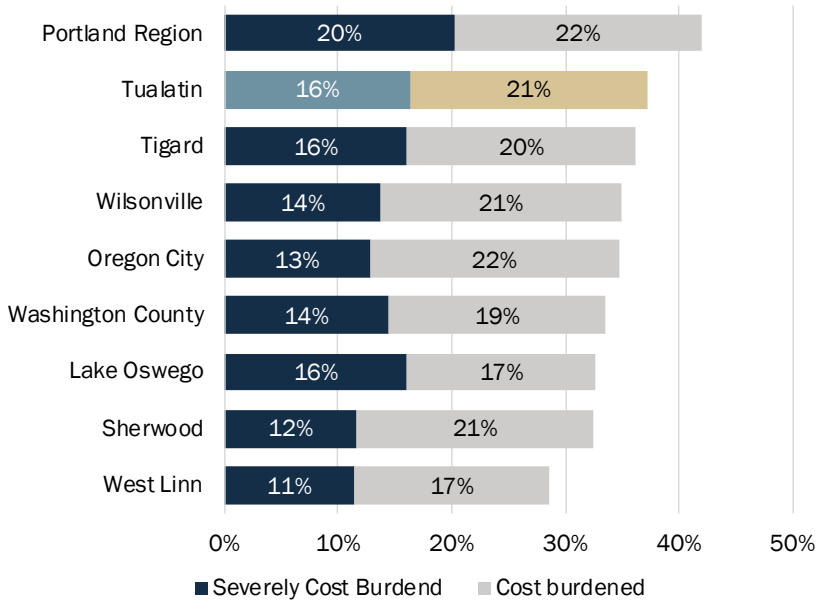
Because the local housing market cannot produce income-restricted, subsidized affordable housing at sufficient levels—and because it cannot often produce moderate-income/workforce housing without subsidy—many households in Tualatin are cost burdened (as Exhibit 48 to Exhibit 51 show). A household is defined by HUD as cost burdened if their housing costs exceed 30% of their gross income.[61] A household that spends 50% or more of their gross income on housing costs is considered to be severely cost burdened by HUD and the State of Oregon.

Overall, about 37% of all households in Tualatin were cost burdened.

In the 2013-2017 period, Tualatin had one of the highest rates of cost-burdened households relative to other comparison areas.

Exhibit 48. Housing Cost Burden, Tualatin, Washington County, and Comparison Areas, 2013-2017

Source: US Census Bureau, 2013-2017 ACS Tables B25091 and B25070.



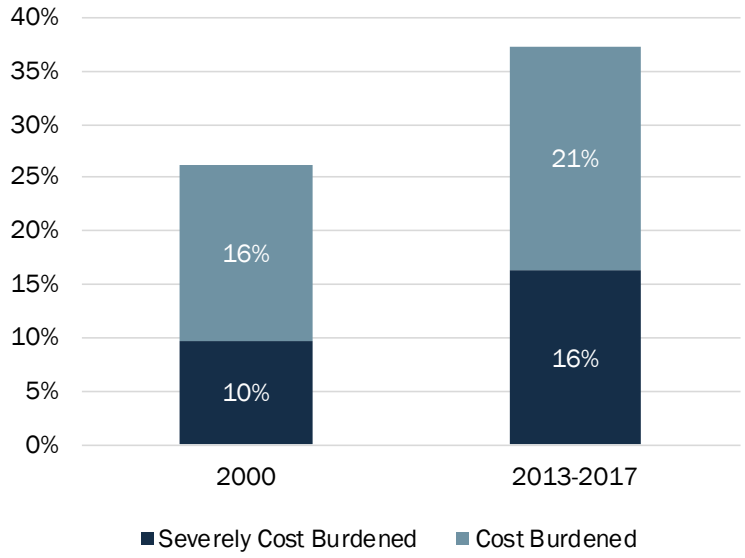
[61] US Department of Housing and Urban Development (HUD). See https://www.huduser.gov/portal/pdredge/pdr_edge_featd_article_092214.html

From 2000 to the 2013-2017 period, the share of cost-burdened and severely cost burdened households in Tualatin grew by 11%.

Tualatin has also experienced a substantial rise in its renters who are severely cost burdened. In the 2014-2018 time period, 27% of Tualatin's renters were severely cost burdened,[62] compared to 26% in the 2013-2017 time period.

Exhibit 49. Change in Housing Cost Burden, Tualatin, 2000 to 2013-2017

Source: US Census Bureau, 2000 Decennial Census, Tables H069 and H094 and 2013-2017 ACS Tables B25091 and B25070.

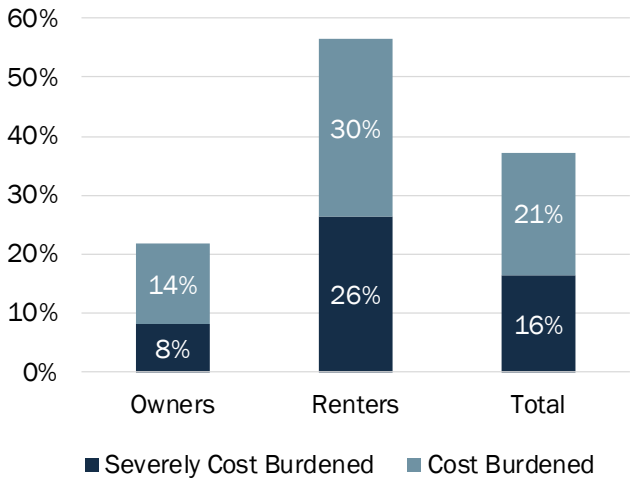


Renters were more likely to be cost burdened than homeowners.

In the 2013-2017 period, about 56% of Tualatin's renters were cost burdened or severely cost burdened, compared to 22% of homeowners.

Exhibit 50. Housing Cost Burden by Tenure, Tualatin, 2013-2017

Source: US Census Bureau, 2013-2017 ACS Tables B25091 and B25070.



[62] Oregon Department of Land Conservation and Development. "Severe Rent Burden in Oregon 2020," 2020.

Nearly all renter households earning less than $35,000 per year were cost burdened.

Most households earning between $35,000 and $50,000 per year were cost burdened.

Exhibit 51. Cost-Burdened Renter Households, by Household Income, Tualatin, 2013-2017

Source: US Census Bureau, 2013-2017 ACS Table B25074.

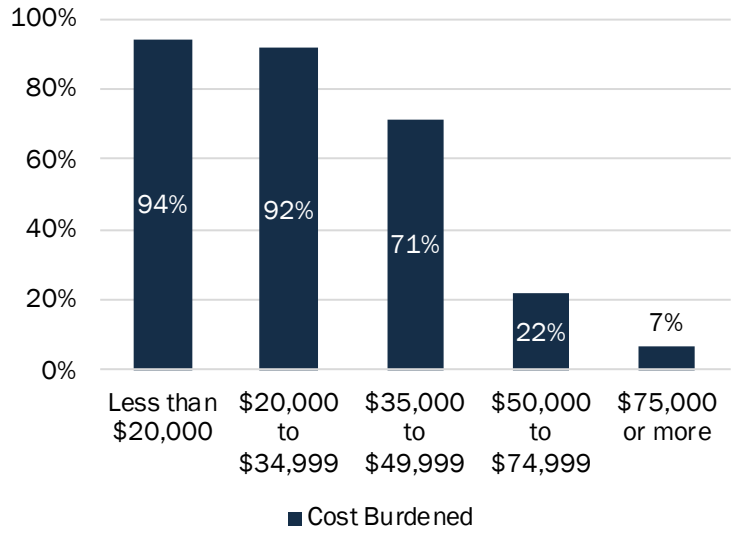


Exhibit 52 through Exhibit 54 present information about cost burden among different populations for the Portland Region. This information is not available on a city-by-city basis and is pulled from a statewide analysis from the report *Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations* by ECONorthwest, August 2020.

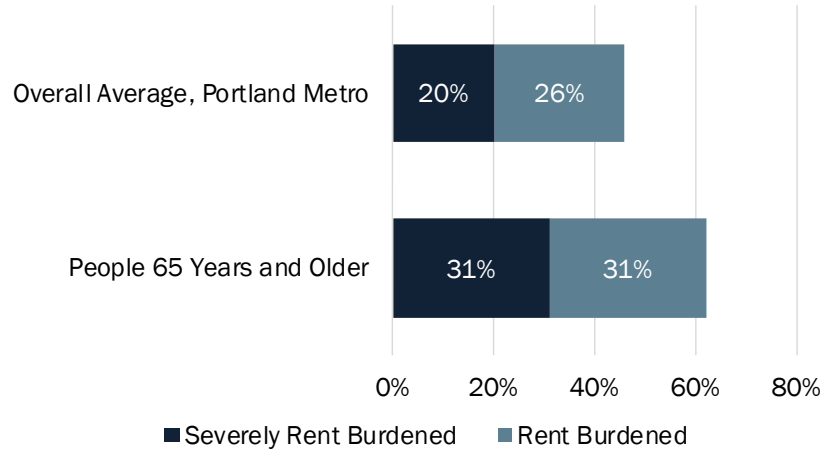
Renters 65 years of age and older are disproportionately cost burdened compared to the Portland Region average.

Over 60% of renters aged 65 and older are cost burdened.

Exhibit 52. Cost-Burdened Renter Households, for People 65 Years of Age and Older, Portland Region, 2018

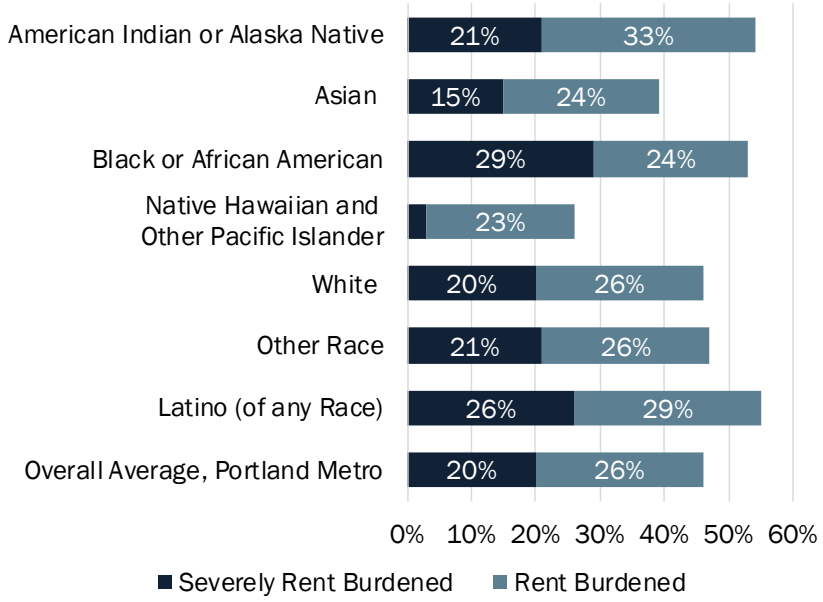
Source: US Census, 2018 ACS 1-Year PUMS Estimates. From the Report *Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations* by ECONorthwest, March 2021.



Compared to the average renter household in the Portland Region, those that identified as American Indian or Alaska Native, Black or African American, and Latino were disproportionately cost burdened.

Exhibit 53. Cost-Burdened Renter Households, by Race and Ethnicity, Portland Region, 2018

Source: US Census, 2018 ACS 1-Year PUMS Estimates. From the Report *Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations* by ECONorthwest, March 2021.



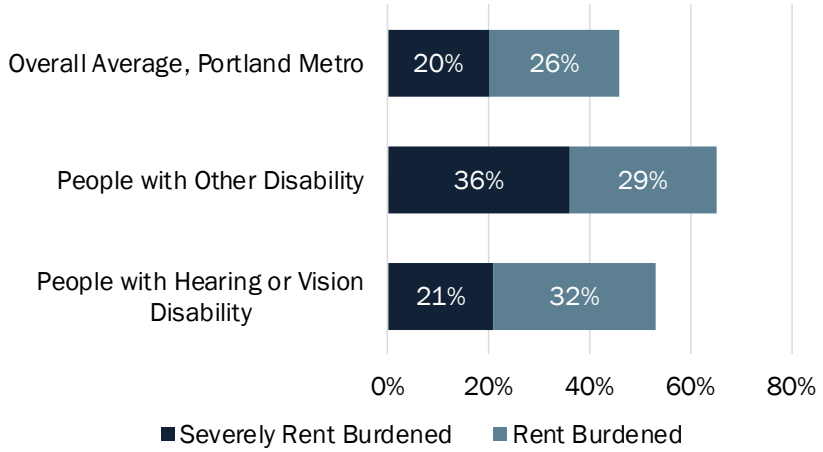
Renters with one or more disabilities in the Portland Region are disproportionately cost burdened.

About 46% of renters in the Portland Region are cost burdened, compared to 53% of renters with a hearing or vision disability and 65% of renters with a disability other than a hearing or vision-based disability in the Portland Region.

Other disabilities include self-care difficulty (having difficulty bathing or dressing), independent living difficulty (having difficulty doing errands alone), ambulatory difficulty (having serious difficulty walking or climbing stairs), and cognitive difficulty (having difficulty remembering, concentrating, or making decisions).

Exhibit 54. Cost-Burdened Renter Households, for People with Disabilities, Portland Region, 2018

Source: US Census, 2018 ACS 1-Year PUMS Estimates. From the Report *Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations* by ECONorthwest, March 2021.

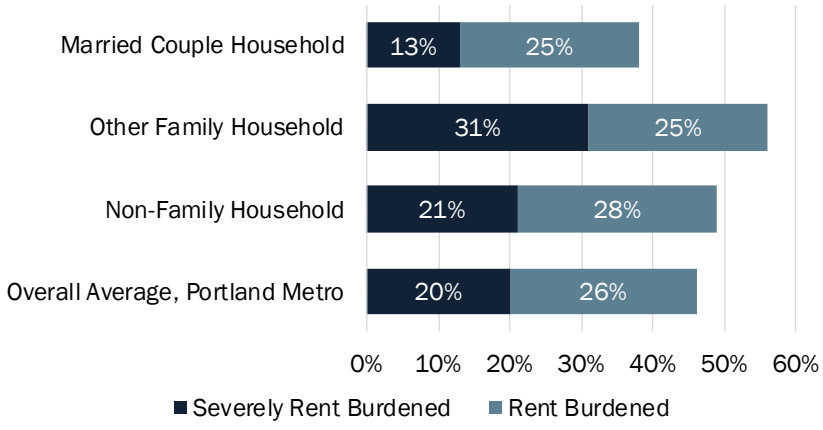


Those designated as "other family household," which includes single-parent households, are disproportionately cost burdened.

About 55% of renters in other family households, such as single-parent households, are cost burdened more frequently than the overall average in the region.

Exhibit 55. Cost-Burdened Renter Households, by Household Type, Portland Region, 2018

Source: US Census, 2018 ACS 1-Year PUMS Estimates. From the Report *Implementing a Regional Housing Needs Analysis Methodology in Oregon: Approach, Results, and Initial Recommendations* by ECONorthwest, March 2021.



Findings from Outreach and Engagement

The following is a summary of outreach and engagement efforts sponsored by the City of Tualatin in 2018 through 2020. The summary relates to matters of housing—and in particular, housing production. The following synthesizes the key findings of each effort.

- **Individual Interview (April 3, 2019).** As part of Tualatin's 2040 engagement, the City of Tualatin interviewed a person with a physical disability. The interviewee identified several concerns related to accessibility—not only access to housing but access to parking, parks, street crossings, sidewalks, and other amenities. They indicated that people in wheelchairs require doors/entryways with suitable clearance, dwelling units on the first floor or within a structure with an elevator, park spaces without woodchips, sidewalks with space for passing (e.g., sandwich boards or tree root issues can make sidewalks inaccessible). They indicated concern with vision clearance regulations in the code—an important ADA safety and ongoing maintenance issue to evaluate. The interview identified a need to increase Tualatin's supply of affordable housing options, particularly near grocery store options, as well as a need to address mold issues in apartments.[63]
- **Summary of interviews with 15 participants from (April 1 to April 29, 2019) and a group stakeholder interview with Tualatin Aging Task Force (May 13, 2019).** Findings from the following group and individual interviews identified a concern for Tualatin's lack of affordable and workforce housing. Participants showed support for a diversity of housing types to provide more affordable options. Housing types of interest included town homes and row houses, mixed-use development, duplexes, triplexes, and accessory dwelling units. Some participants also showed interest in high-rise apartments (structures that are six to eight stories in height) and concern for large housing types (i.e., McMansions).
- **Technical Advisory Committee Meetings for Tualatin's HNA and EOA.** The City of Tualatin convened a Technical Advisory Committee (TAC) in April 2019 to provide input on the Housing Needs Analysis (HNA), Economic Needs Analysis (EOA), and related strategy documents. The TAC met four times with the last meeting held on September 25, 2019. The TAC focused on the technical approach and methodology for HNA and EOA. The TAC comprised City staff with expertise related to city planning and development code regulation as well as county, regional, and state agencies and experts in the housing and economic development field.

[63] The City of Tualatin has considered implementing a rental housing inspection program within the city, but none have been implemented to date. In general, newer rental housing in Tualatin is quite adequate, suggesting that housing quality may be more of a challenge for older buildings.

The City of Tualatin has, however, received four complaints for mold in 2019. Three complaints were in apartment buildings and one complaint at a rental house. Tualatin has no city ordinance to address mold, and those that submitted complaints were told to contact (or recontact) their property management/property owner, a mold abatement company, and/or legal counsel.

- **Community Advisory Committee Meetings for Tualatin's HNA and EOA.** A 16-member Community Advisory Committee (CAC) was convened by the City of Tualatin in March 2019 to provide policy input on the HNA, EOA, and related strategy documents. The CAC met seven times with the last meeting held on September 26, 2019. The CAC provided input to guide the City's housing and economic policies with a focus on developing strategies and actions that could lead to possible changes to the Comprehensive Plan and Development Code regulations. Desirable housing outcomes brainstormed by the CAC included:
  - Housing/jobs balance
  - Housing planning that is inclusive of all households
  - Variety of housing options
  - Multifamily opportunities
  - Complete neighborhoods - mixed-use
  - Flexible plan designations - universal design standards
  - Livability/walkability
  - Enable small-scale developers
  - Support for aging in place
  - Access to max/transit
  - Renter/homeowner affordability
  - More rental opportunities
  - Housing location and quality
  - Multigenerational housing
  - Flexible zoning standards
  - Think creatively about potential solutions to affordable housing issues
  - Address affordability
- **Pop-up Event and Online Survey (July–August 2019):** In the summer of 2019, the City of Tualatin hosted a pop-event and disseminated an online survey to gather input on housing and non-housing-related concerns. Key findings of these efforts include:
  - Respondents identified three preferred actions to meet affordable housing needs: offer incentives for affordable housing, improve connections to jobs/services to reduce costs, and allow more types of homes. For households making $50,000 and below, rent control and incentives for affordable housing were of great interest. For people of color, allowing more types of homes and obtaining land for new housing were of great interest.
  - Respondents' top three desired choices for new housing types: small homes, town homes, cottage courtyard, in addition to work-from-home (home-business) arrangements. For households making $50,000 and below, small homes and cottage courtyards were of great interest. For people of color, the greatest preference was for home-businesses and small homes.
  - Respondents' top three non-housing priority topics were improving connectivity, increasing and protecting green space, and increasing opportunities for jobs and entertainment. For households making $50,000 and below, the preference was increasing and protecting green space and increasing opportunities for jobs and entertainment. For people of color, it was improving connectivity and increasing opportunities for jobs and entertainment.

- **Under One Roof Luncheon (September 2019).** The City of Tualatin held two severely rent burdened public events. The Under One Roof Luncheon was the first event attended by 40 community members, representing a diverse group of people that included affordable housing residents, housing service providers, and elected officials. The event included a discussion with a panel of housing experts. The experts recommended the following actions for the City of Tualatin to address affordable housing needs: review what land is already in public control, reform the zoning (especially parking and density), and be ready for not-in-my-backyard (NIMBY) concerns. Luncheon participants agreed that affordable housing is a complex issue and a coalition is needed to address these issues. It was determined that the coalition should include housing experts and advocates within the community. The major theme from participant feedback was a desire to achieve greater land use efficiencies, accomplished by improving transportation connectivity or increasing the location of jobs, businesses, services, and green spaces near housing. During the question-and-answer portion of the event, community members commented on housing options and services that could be further explored: housing vouchers, shared/transitional housing, tiny homes, mobile or manufactured homes, and immediate assistance.
- **Our Home, Our Health Event (September 2020).** Our Home, Our Health event was Tualatin's second severely rent burdened event. It included a keynote speaker from the American Association of Retired Persons (AARP) in Oregon on the connection between housing and health and story sharing from two members of Tualatin's Diversity Task Force. Participants expressed concerns for poor quality housing (e.g., conditions that lead to mold) and concerns for the City's lack of affordable housing. Families are working multiple jobs and choosing between housing and food to get by. Participants commented on and shared possible solutions to these issues, which are summarized below:
  - Resolve issues related to legally undocumented persons residing in Tualatin.
  - Solve this problem: making a little too much money to qualify for assistance, yet not being able to survive on what you make.
  - Invite people of color in.
  - Ensure people are able to participate in programs without fear of being reported.
  - Provide local rental assistance.
  - Support new affordable housing.
  - Economically stabilize sites.
  - Implement rent control.
  - Enable shared housing options.
  - Relax regulations to support development of affordable housing.
  - Commit to livability and accessibility.

- Continue to extend eviction moratorium.
- Consider short and long-term solutions.
- Solve for housing instability, which particularly has long-term impacts on children.

Key Terms in the HPS

This appendix presents applicable key terms used in Tualatin's Contextualizing Housing Needs memorandum. Per the Department of Land Conservation and Development, the following key terms will be incorporated into the definitions section of OAR 660-008 (if they are not already):

- **Consumers of Needed Housing:** any person who inhabits or is anticipated to inhabit Needed Housing, as described in the definition of "Needed Housing" in ORS 197.303.
- **Housing Production Strategy Report:** the report cities must adopt within one year of their deadline to complete an updated Housing Capacity Analysis, pursuant to OAR 660-008-0050.
- **Housing Production Strategy:** a specific tool, action, policy, or measure a city will implement to meet the housing needs described in an adopted Housing Capacity Analysis. A Housing Production Strategy is one component of a Housing Production Strategy Report.
- **Needed Housing:** housing types determined to meet the need shown for housing within an urban growth boundary at particular price ranges and rent levels, including (but not limited to) renter and owner-occupied attached and detached single-family housing, multifamily housing, and manufactured homes.
- **Producers of Needed Housing:** developers, builders, service providers, or other persons or entities providing materials and funding needed to build housing. Producers of Needed Housing may include non-profit organizations or public entities.
- **Unmet Housing Needed:** occurs when housing need determined pursuant to ORS 197.296 (3)(b) is greater than the housing capacity (i.e., buildable, residential land is insufficient to accommodate demand for housing).

Appendix B: Construction Excise Tax Analysis

This appendix presents an analysis of a Construction Excise Tax (CET) for Tualatin.

DATE: February 17, 2021
TO: City of Tualatin
FROM: Becky Hewitt, Sadie DiNatale, and Angelica True, ECONorthwest
SUBJECT: Summary of Construction Excise Tax Analysis

The Department of Land Conservation and Development contracted ECONorthwest to develop a Housing Production Strategy (HPS) for the City of Tualatin. This memorandum presents preliminary research for one strategy of the HPS. The findings documented in this memorandum may later become a section or appendix of the final HPS report.

This project is funded by Oregon general fund dollars through the Department of Land Conservation and Development. The contents of this document do not necessarily reflect the views or policies of the State of Oregon.

Construction Excise Tax

The City of Tualatin is considering a range of strategies and actions to meet its housing production goals. One such action is implementation of a Construction Excise Tax (CET). To understand the potential trade-offs of implementing a CET in Tualatin, this memorandum describes what a CET is and how it works. In addition, it summarizes an analysis of the potential revenue impacts of implementing a CET. The final section outlines potential next steps for the City of Tualatin to consider.

How It Works, Fiscal Impacts, Pros and Cons

How It Works

In 2016, the Oregon Legislature passed Senate Bill 1533, which permits cities to adopt a construction excise tax (CET) on the value of new construction projects to raise funds for affordable housing projects. The tax is limited to 1% of the permit value on residential construction with no cap on the rate applied to commercial and industrial construction. A number of cities of various sizes in Oregon have adopted a CET.

Construction Excise Tax: Levies a tax on new construction projects to fund housing programs and/or investments. It can be applied to residential and/or commercial and industrial development.

The allowed uses for CET funding are defined by state statute:

- The City may retain up to 4% of funds to cover administrative costs. The funds remaining must be allocated as follows, depending on whether the CET is on residential or commercial and industrial development:
- For a residential CET:
  - 50% must be used for developer incentives (e.g., permit fee and SDC waivers,[64] tax abatements, or finance-based incentives). The City would have to offer incentives but could cover the costs or foregone revenues with CET funds.
  - 35% may be used flexibly for affordable housing programs, as defined by the jurisdiction.
  - 15% is not available to the city and flows instead to Oregon Housing and Community Services for homeownership programs that provide down payment assistance.
- For a commercial/industrial CET:
  - 50% of the funds must be used for housing-related programs, as defined by the jurisdiction (note that these funds are not necessarily limited to affordable housing).
  - The remaining 50% is unrestricted.

Fiscal Impacts/Who Pays

The source for CET funds is new development. The statute exempts public buildings, regulated affordable housing, places of worship, public and private hospitals, agricultural buildings, nonprofit facilities, long-term care facilities, residential care facilities, and continuing care retirement communities.[65] The City can exempt other types of development if desired.

Pros and Cons

Pros:

- Offers the ability to link industrial or other employment investments, which generate new jobs and demand for new housing, with funding for housing development.
- CET is a flexible funding source, especially for funds derived from commercial/industrial development.
- Program funds can fund administration of the CET as well as staff time needed to administer programs funded by CET.

[64] Note that while these are called "waivers," they are really subsidies, since the fees would still be paid by CET revenues rather than by the developer.

[65] Oregon Revised Statute 320.173

Cons:

- CET increases development costs in an environment where many developers are already seeking relief from system development charges. Depending on the rates imposed, CET could have an impact on feasibility. More research would be necessary to understand the potential magnitude of the impact.
- Where demand is high relative to supply, additional fees on residential development may be passed on to tenants or home buyers through higher housing costs.
- Because CET revenue is development derived, it will fluctuate with market cycles and will not be a steady source of revenue for affordable housing when limited development is occurring.

Summary of CET Analysis for Tualatin

This section summarizes ECONorthwest's CET analysis for Tualatin.

Estimating Revenue Potential

Methodology Overview

There is no statutory cap on the CET rate applied on commercial and industrial construction. Therefore, this analysis assumed a range of potential rates that the City could apply on this development type: 0.3%, 0.5%, 1%, and 2%. The CET rate applied on residential construction is capped at 1%. Therefore, this analysis assumed a range of potential rates that the City could apply on this development type under the 1% threshold: 0.3%, 0.5%, .75%, and 1%.

After establishing a range of rates, the analysis assessed what revenue would look like based on historical building permit values for each respective development type (i.e., commercial and industrial development over the last five years and residential development over the last five years).

Based on the statutory regulations about how the CET funds can be expended, we allocated the projected revenue forecasts as follows:

- **Commercial/Industrial Construction: (1)** 4% to administrative costs, **(2)** 50% of the balance after subtracting administrative costs to housing-related programs (i.e., 48% of the total), and **(3)** 50% of the balance after subtracting administrative costs to an unrestricted use (i.e., 48% of the total).
- **Residential Construction: (1)** 4% administrative costs, **(2)** 15% of the balance after subtracting administrative costs to OHCS (i.e., 14% of the total), **(3)** 35% of the balance after subtracting administrative costs to affordable housing programs (i.e., 34% of the total), and **(4)** 50% of the balance after subtracting administrative costs to developer incentives (i.e., 48% of the total).

Results: Historical Permit Values

One way to estimate CET revenue is a backward-looking analysis. If the City of Tualatin had charged CET fees on recent development that had occurred, how much revenue might have the City collected (assuming the permitting activity had been unchanged as a result of that CET)?

Building permits for residential development and commercial/industrial development in Tualatin fluctuated from year to year over the last five years. Exhibit 56 summarizes annual total permit values for new residential and commercial/industrial construction as well as additions that increase square feet (excluding exempt development) in 2020 dollars.[66] The annual average over the five-year period (2016-2020) for residential development is about **$10m in qualifying permit value** in 2020 dollars. The annual average over the five-year period for commercial and industrial development is about **$41.8m in qualifying permit value** in 2020 dollars.

Exhibit 56. Residential Building Permit and Commercial/Industrial Building Permit Values by Year (2016 to 2020), (in 2020 dollars)
Source: ECONorthwest analysis of City of Tualatin permit data.
Note: The large bump in residential permit valuation in 2018 is primarily due to the City of Tualatin permitting an above-average number of residential developments (101 total permits in 2018, compared to 11, 12, 35, and 37 total permits in other years). The large bump in commercial/industrial valuation in 2020 is predominately due to a new industrial structure permitted on Blake Street with a permit value of $90m (2020$).

Year	Commercial and Industrial Bulilding Permit Valuation (2020$)	Residential Building Permit Valuation (2020$)
2016	$17,166,894	$9,304,128
2017	$11,042,600	$6,270,048
2018	$53,020,643	$32,351,852
2019	$14,918,542	$1,257,071
2020	$112,883,996	$926,520
Annual Average	**$41,806,535**	**$10,021,924**
Total (2016-2020)	**$209,032,675**	**$50,109,618**

Next, the analysis calculated the revenue that the City would have generated if it had a CET in place during the 2016 to 2020 period (assuming the permitting activity had been unchanged as a result of that CET) using the different CET rates listed previously.

Exhibit 57 and Exhibit 58 show potential CET revenue for commercial/industrial development. This analysis shows that under the highest rate tested (2%), the average annual CET revenue over this period would have been about $836,100.

[66] ECONorthwest used the Construction Cost Index published by Engineering News Record to inflate permit values to 2020 dollars.

Exhibit 59 and Exhibit 60 show potential CET revenue for residential development. This analysis shows that under the highest rate tested (1%), the average annual CET revenue over this period would have been about $100,200.

Under either development type, the minimum CET revenue collected in a slow year would have varied little with the different rates, while the maximum collected in a "busy" year would have varied substantially.

Exhibit 57. Potential Annual Commercial/Industrial CET Revenue by Year and Rate (2016 to 2020)
Source: ECONorthwest analysis of City of Tualatin permit data.

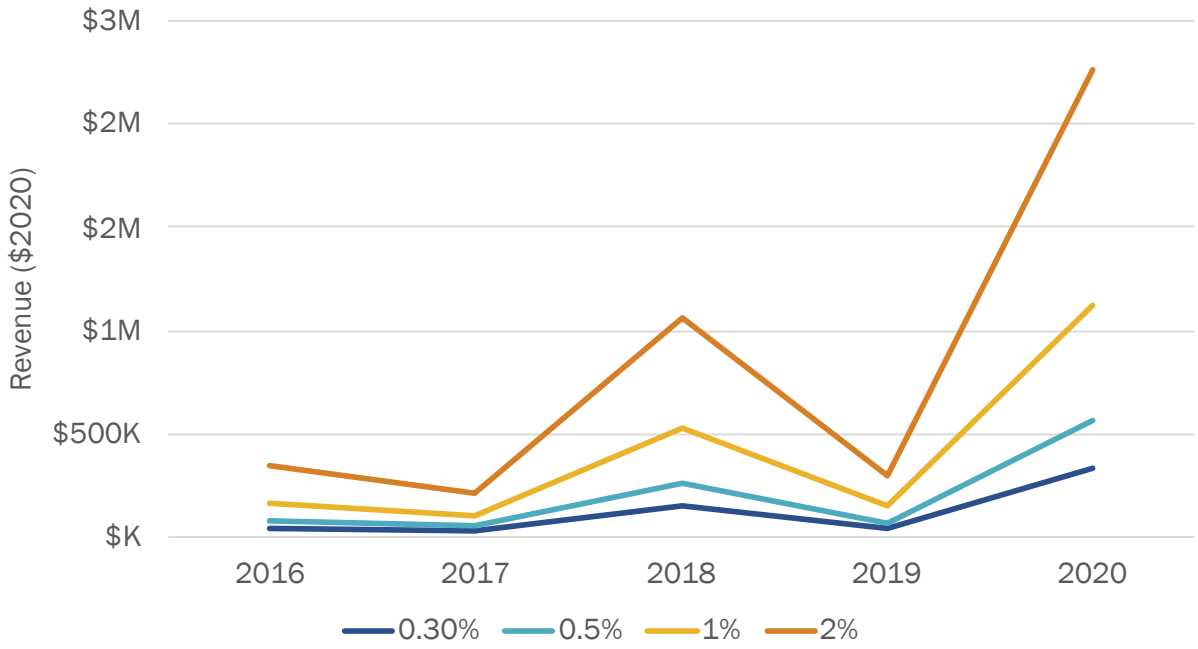


Exhibit 58. Historical Minimum, Maximum, and Average Annual Potential Commercial/Industrial CET Revenue by Rate (2016 to 2020)

Source: ECONorthwest analysis of City of Tualatin permit data.

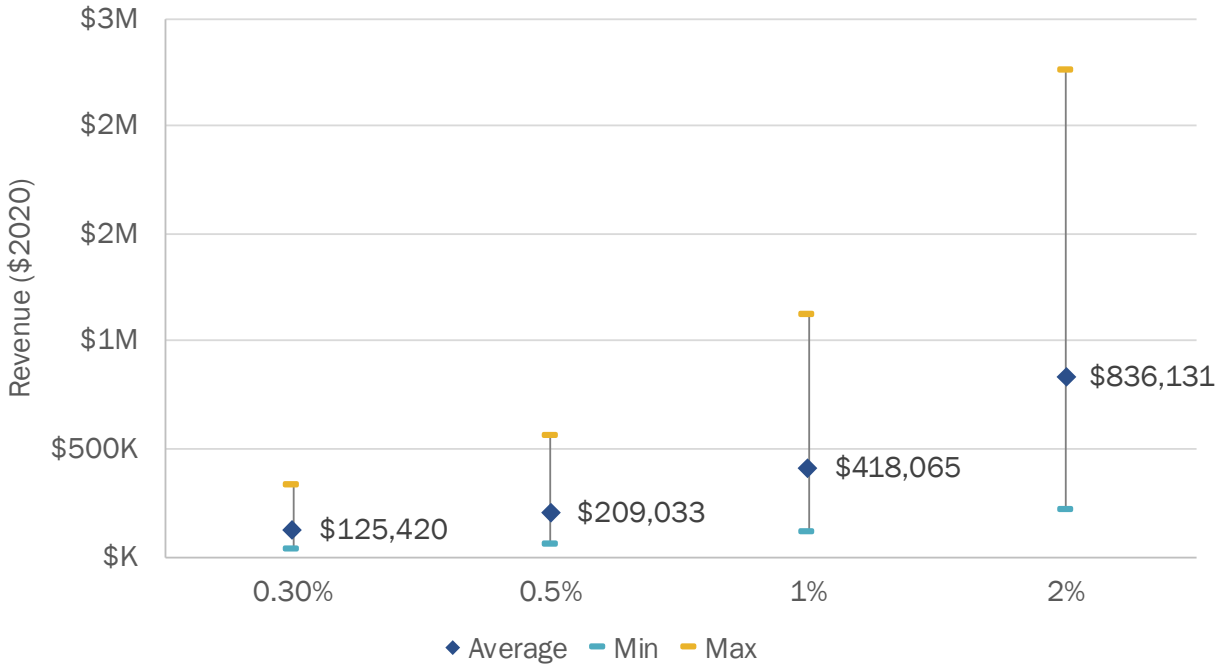

Exhibit 59. Potential Annual Residential CET Revenue by Year and Rate (2016 to 2020)
Source: ECONorthwest analysis of City of Tualatin permit data.

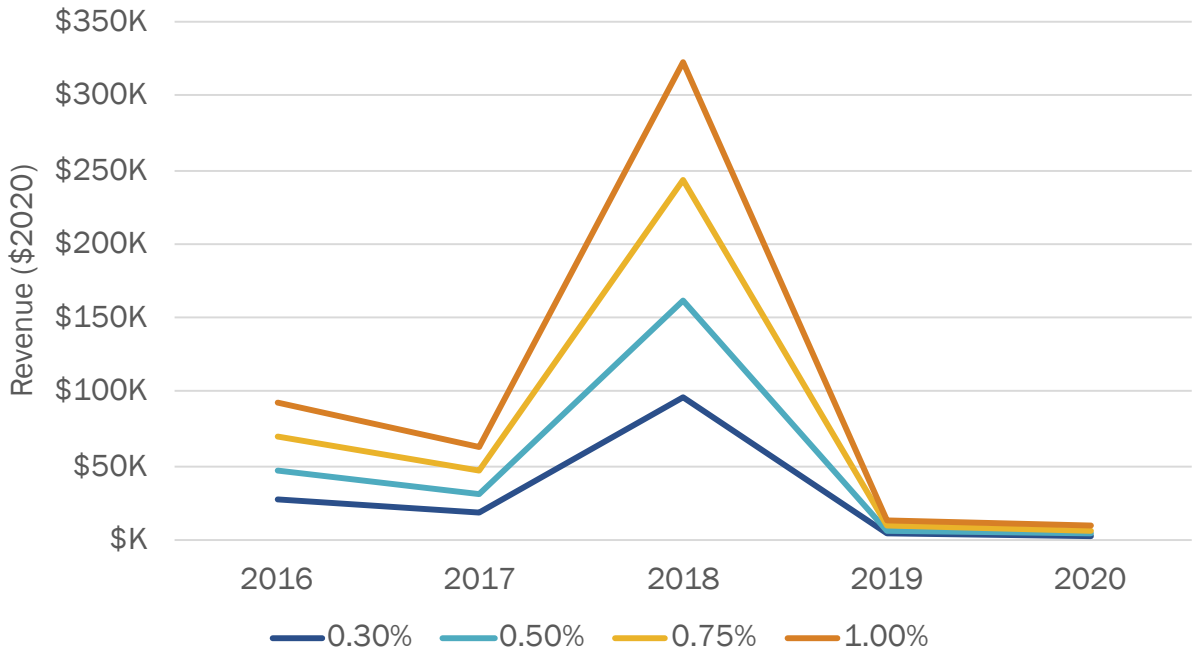

Exhibit 60. Historical Minimum, Maximum, and Average Annual Potential Residential CET Revenue by Rate (2016 to 2020)
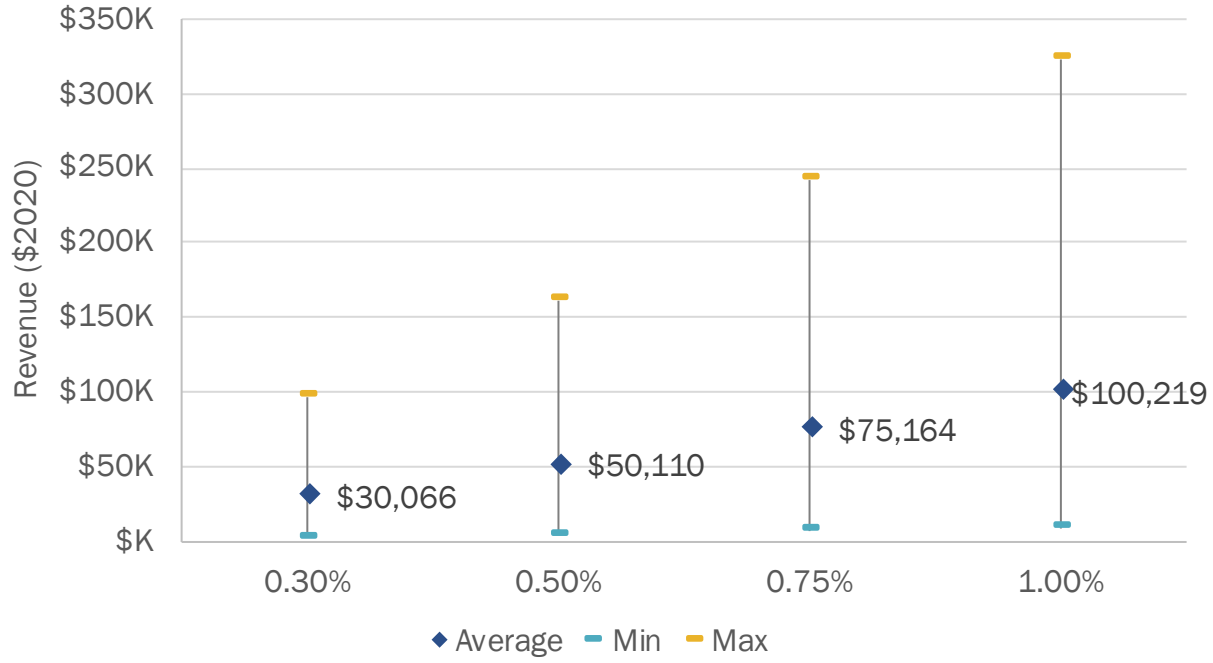
Source: ECONorthwest analysis of City of Tualatin permit data.



Based on the statutory requirements about use of funds, ECONorthwest translated the average annual simulated CET collections between 2016 and 2020 into funds available for each funding category, as shown in Exhibit 61 and Exhibit 62.

Exhibit 61. Hypothetical Total Commercial/Industrial CET Revenue (2016 to 2020) by Rate and Use of Funds
Source: ECONorthwest analysis of City of Tualatin permit data.

	0.30%	0.5%	1%	2%
Unrestricted	$60,201	$100,336	$200,671	$401,343
Housing Programs	$60,201	$100,336	$200,671	$401,343
Admin Costs	$5,017	$8,361	$16,723	$33,445

Exhibit 62. Hypothetical Total Residential CET Revenue (2016 to 2020) by Rate and Use of Funds
Source: ECONorthwest analysis of City of Tualatin permit data.

	0.30%	0.50%	0.75%	1.00%
OHCS	$4,329	$7,216	$10,824	$14,432
Affordable Housing Programs	$10,102	$16,837	$25,255	$33,674
Developer Incentives	$14,432	$24,053	$36,079	$48,105
Admin Costs	$1,203	$2,004	$3,007	$4,009

As shown above, a 0.5% or 1% rate on commercial and industrial development could generate meaningful revenue for programs, especially if the unrestricted portion is also dedicated toward housing programs. Because of the greater flexibility for these revenues, the City could design a flexible program for the revenues, or direct all of the net revenues towards a Housing Trust Fund or similar fund. This ease of use is important, because even with the higher revenue potential of the commercial/industrial CET, a 0.5% to 1% rate would offer little funding for administrative costs.

A CET on residential development would generate relatively little revenue given past trends in residential development, even at the maximum rate (1%). In addition, the administration would be more complex due to needing to separate out revenues toward the spending categories as specified in statute, while the funding available to cover administrative costs would be negligible.

Conclusions and Next Steps

Given the results summarized above, a 0.5% to 1% CET on commercial and industrial development may be worthwhile to consider as it could generate a flexible source of revenue for local housing programs, especially if the City continues to see strong industrial and commercial growth. Imposing a CET on residential development is likely not worth considering unless the City annexes a large amount of vacant residential land where higher-end new housing is expected.

If the City chooses to further evaluate adoption of a CET, it should conduct additional outreach to stakeholders and local businesses to offer an opportunity for discussion and to raise any concerns. The City should also advance conversations about the potential uses of the funds, even though this is flexible and does not necessarily need to be determined prior to adoption. Working with stakeholders to clearly define the program's intended purpose, how the funds (especially the unrestricted portion) would be used, and who would make decisions about the use of funds is likely to help build support for the program. If the City chooses to adopt a CET, it must pass an ordinance or resolution that states the rate and base of the tax. Most communities also identify any further self-imposed restrictions on the use of funds as part of adopting the ordinance. If the ordinance passes, the City must then establish a process to distribute the funds.

Executive Summary

This report presents an economic opportunities analysis (EOA) consistent with the requirements of Statewide Planning Goal 9 and the Goal 9 administrative rule (OAR 660-009). Goal 9 describes the EOA as "an analysis of the community's economic patterns, potentialities, strengths, and deficiencies as they relate to state and national trends" and states that "a principal determinant in planning for major industrial and commercial developments should be the competitive advantage of the region within which the developments would be located."

The primary goals of the EOA are to (1) project the amount of land needed to accommodate the future employment growth within Tualatin between 2020 and 2040, (2) evaluate the existing employment land supply within the City to determine if it is adequate to meet that need, and (3) to fulfill state planning requirements for a twenty-year supply of employment land.

How much buildable employment land does Tualatin currently have?

Exhibit 1 shows commercial and industrial land in Tualatin with development capacity (lands classified vacant or partially vacant). The results show that Tualatin has about 385 unconstrained buildable acres within its city limits and Basalt Creek.

Exhibit 1. Buildable Acres by Plan Designation and Zoning, Tualatin Planning Area, 2019

Source: Metro BLI, ECONorthwest Analysis. Note: The numbers in the table may not sum to the total as a result of rounding.

Generalized Plan Designation	Total buildable acres	Buildable acres on vacant lots	Buildable acres on partially vacant lots
Commercial			
Central Commercial	0	0	0
General Commercial	4	4	0
Medical Commercial	0	0	0
Neighborhood Commercial	0	0	0
Office Commercial	3	3	0
Recreational Commercial	0	0	0
Industrial			
General Manufacturing	99	99	0
Light Manufacturing	29	29	0
Manufacturing Business Park	85	85	0
Manufacturing Park	56	56	0
Mixed-Use Commercial Overlay Zone			
General Commercial	0	0	0
Central Tualatin Overlay Zone			
Central Commercial	0	0	0
General Commercial	0	0	0
Office Commercial	0	0	0
General Manufacturing	0	0	0
Light Manufacturing	0	0	0
Basalt Creek Planning Area			
Manufacturing Park	105	35	70
Neighborhood Commercial	4	4	0
Total	**385**	**314**	**70**

How much growth is Tualatin planning for?

Goal 9 requires that cities provide for an adequate supply of commercial and industrial sites consistent with plan policies. To meet this requirement, Tualatin needs an estimate of the amount of commercial and industrial land that will be needed over the 2020–2040 planning period. Exhibit 2 presents the forecast of employment growth by land use type in Tualatin from 2020 to 2040.

Tualatin's employment base was 40,478 employees in 2020. The forecast shows that by 2040, Tualatin will have 53,332 employees, an increase of 12,854 jobs over the planning period.

Exhibit 2. Forecast of Employment Growth by Land Use Type, Tualatin Planning Area, 2020–2040

Source: ECONorthwest. Note: The shaded percentages denote an assumption about the future share of employment (as a percent of total) by land use type. It assumes that the share of employment by land use type will remain the same.

Land Use Type	2020		2040		Change
	Employment	% of Total	Employment	% of Total	2020 to 2040
Industrial	18,218	45%	24,004	45%	5,786
Retail Commercial	3,050	8%	4,018	8%	968
Office & Commercial Services	18,382	45%	24,219	45%	5,837
Government	829	2%	1,092	2%	263
Total	**40,478**	**100%**	**53,332**	**100%**	**12,854**

Tualatin will accommodate new government employees (263 employees) in Institutional Plan Designations. Therefore, the estimate of new employees (between 2020 and 2040) that will require commercial and industrial lands is 12,591 employees.

How much land will be required for employment?

The forecast for land needed to accommodate employment growth in Tualatin shows that the growth of 12,591 new employees will result in demand for about 677 gross acres of commercial and industrial employment lands.

Does Tualatin have enough land to accommodate employment growth?

Exhibit 3 shows that Tualatin has a deficit of suitable employment land to accommodate demand for commercial and industrial employment in the Tualatin Planning Area.

Exhibit 3. Comparison of the Capacity of Land with Employment Land Demand by Land Use Type, Tualatin Planning Area, 2020—2040

Source: ECONorthwest. Note: Employment demand requires an additional 42 gross acres on land in Residential Plan Designations and one gross acre on land in an institutional (public) Plan Designation.

General Plan Designation	Land Supply (Suitable Gross Acres)	Land Demand (Gross Acres)	Land Sufficiency (Deficit)
Industrial	374	448	(74)
Commercial (incl Retail and Office)	11	186	(175)

What types of business does Tualatin want to attract?

An analysis of growth industries in Tualatin should address two main questions: (1) Which industries are most likely to be attracted to Tualatin? and (2) Which industries best meet Tualatin's economic development goals? The selection of target industries is based on Tualatin's goals for economic development; economic conditions in Tualatin, Washington County, and the Portland Metro Region; and the city's competitive advantages.

Given the current employment base, which is composed of small and midsized businesses, it is reasonable to assume that much of the city's business growth will come from small and midsized businesses. This growth will either come from businesses already in Tualatin or new businesses that start or relocate to Tualatin from within the Portland Region or from outside of the region.

The industries identified as having potential for growth in Tualatin are:

- **Manufacturing.** Tualatin's manufacturing sector accounts for 27% of the city's employment base. A few examples of Tualatin's potential growth industries in manufacturing are:
  - *Advanced manufacturing.* This industry is an internally preferred grouping of five independent traded clusters: (1) Downstream Metal Products, (2) Lighting and Electrical Equipment, (3) Metalworking Technology, (4) Production Technology and Heavy Machinery, and (5) Upstream Metal Manufacturing.
  - *Food processing and manufacturing.* The Bureau of Labor Statistics describes this industry cluster as one that takes livestock and agricultural products (raw food materials) and transforms them into products for intermediate or final consumption (sold to wholesalers or retailers for distribution). Tualatin's food

processing and manufacturing cluster is its fastest growing industry (projected to grow 64% from 2017 to 2028).

  - *Plastics.* Wages in the plastics industry cluster (comprising establishments that manufacture plastic materials and other plastic components/products) grew 14 % from 2012 to 2017. As the fourth most concentrated cluster in Tualatin (with an LQ of 5.21), this industry presents objective growth potential for lower-skilled workers.

- **Information technology and analytical systems.** This industry cluster includes establishments that work in computers, software, audio visual equipment, laboratory instruments, and medical apparatus development (e.g., standard and precision electronics like circuit boards and semiconductors).
- **Business services.** Business services establishments including corporate headquarters and other professional services (e.g., consulting, back office services, financial services/legal services, facilities support, computer services, etc.). In Tualatin, this industry is expected to see the largest growth in total jobs, and it had the largest growth in average wage.

What are the key conclusions from the EOA?

The conclusions about commercial and industrial land sufficiency in Tualatin are:

- **Tualatin has a deficit of land to accommodate new employment growth.** Tualatin has a deficit of about 74 acres of land in industrial Plan Designations and 175 acres of employment in commercial Plan Designations to accommodate employment. Tualatin will need to consider policies to increase the efficiency of employment land use within the City, such as policies to encourage denser employment development and redevelopment that results in higher-density development.
- **Tualatin has substantial redevelopment potential.** A majority of redevelopable lots are in industrial areas. For example, change of use (and redevelopment) of the gravel pit in the southwest area of the Manufacturing Business Park presents substantial redevelopment opportunities. The six tax lots in the gravel pit comprise 181 acres with about 47 constrained acres, mostly due to steep slopes and wetlands. When mining ceases in the gravel pit, which may or may not occur in the twenty-year planning period, the gravel pit may be redevelopable and available for new employment uses.
- **Tualatin's primary comparative advantages for economic development are its location along the I-5 corridor and proximity to urban and cultural amenities/services in the Portland Region, making Tualatin an attractive place for businesses to locate.** Tualatin has advantages through its access to the regional labor market and the region's growing labor force comprising diverse skill sets.
- **Tualatin will need to address transportation capacity issues to accommodate growth, particularly along regional connectors (roads and avenues).** Traffic congestion is a substantial issue in Tualatin and surrounding areas, making it difficult to commute to

Tualatin from other cities within the Portland Region and within Tualatin. Stakeholders are concerned that additional employment growth will make congestion substantially worse.

What are the key recommendations of the EOA?

Following are a summary of ECONorthwest's recommendations to Tualatin based on the analysis and conclusions in this report. The *Tualatin Economic Development Strategy* memorandum presents the full list of recommendations for Tualatin.

- **Ensure that Tualatin has enough land to accommodate expected employment growth and that land has infrastructure to support employment growth.** Tualatin should identify opportunities to support mixed-use development (especially development that includes commercial and residential uses) to accommodate employment growth, especially commercial employment growth. The City should identify opportunities to make more efficient use of employment land, such as limiting development of businesses that have large land requirements and have little employment (such as distribution). In addition, the City should work with landowners to get key employment sites certified as "shovel ready" to speed the development process.
- **Identify opportunities for redevelopment, especially mixed-use redevelopment.** The City has a substantial deficit of industrial and commercial land. The City may be able to address some or most of this deficit within the existing planning area (without a UGB expansion). To do so, the City should identify districts for redevelopment, such as mixed-use development. This planning includes revising the Tualatin Town Center Plan to focus on opportunities to support redevelopment, identify tools to support redevelopment, and identify areas appropriate for more intense industrial uses (e.g., redevelopment of the gravel pit in the southwest area of the city once mining activity has ceased).
- **Grow jobs and businesses in Tualatin by supporting business retention, growth, and attraction.** The first step in growing jobs and businesses in Tualatin is revising the economic development strategy, including developing a clear vision for economic development in Tualatin and creating an action plan to implement the vision. The revised strategy can build on the *Tualatin Economic Development Strategy* produced as part of this analysis, but the revised strategy should include a detailed action plan to implement the newly developed vision for economic development. In revising the strategy, the City should identify partnerships and incentive programs to grow, retain, and attract businesses and to support entrepreneurial businesses in Tualatin.
- **Ensure that the City connects planning for economic development with other community planning.** Throughout the project, stakeholders emphasized the need to coordinate economic development planning with housing, transportation planning, and other community planning. Updates to the Tualatin Transportation System Plan should be coordinated with planning for employment and business growth. A key approach to accommodating new commercial development is redevelopment that results in mixed-

use districts, providing opportunities for more housing affordable to people working at businesses in Tualatin and living closer to work (thus reducing transportation issues). In addition, stakeholders would like to see incorporation of services needed to meet daily needs of residents of neighborhoods without driving.

The *Tualatin Economic Development Strategy* memorandum presents more details about each of these topics and recommendations for specific actions to implement these recommendations.

1. Introduction

This report presents an economic opportunities analysis (EOA) for the City of Tualatin. The purpose of an EOA is to develop information as a basis for policies that capitalize on Tualatin opportunities and help address the City's challenges. The EOA includes technical analysis to address a range of questions that Tualatin faces in managing its commercial and industrial land. For example, the EOA includes an employment forecast that describes how much growth Tualatin should plan for over the 2020–2040 period and identifies the amount and type of employment land necessary to accommodate growth in Tualatin over that period. The EOA also includes an inventory of commercial and industrial land within Tualatin's Planning Area to provide information about the amount of land available to accommodate employment growth.

This EOA complies with the requirements of Statewide Planning Goal 9, the Goal 9 administrative rules (OAR 660 Division 9), and the court decisions that have interpreted them. Goal 9 requires cities to state objectives for economic development (OAR 660-009-0020[1][a]) and to identify the characteristics of sites needed to accommodate industrial and other employment uses (OAR 660-009-0025[1]) over the twenty-year planning period. This approach could be characterized as a *site-based* approach that projects land need based on the forecast for employment growth, the City's economic development objectives, and the specific needs of target industries.

Background

Tualatin last evaluated economic trends in a 2014 update to the City's Economic Development Strategic Plan. Around that same time, Greater Portland Inc. completed a five-year economic development strategy for the Portland Region (Greater Portland 2020), which defined emerging industry clusters and policies for economic development in the region. In 2018, Tualatin also completed a concept plan for the Basalt Creek Planning Area, which allocated substantial land as a Manufacturing Park and was expected to accommodate 1,897 new jobs.

The purpose of this project was to develop a factual base to provide the City with information about current economic conditions. This factual basis provides information necessary for updating the City's Economic Development Comprehensive Plan policies. This report identifies opportunities to meet the City's economic development objectives and develop comprehensive plan policies and implementation strategies that capitalize on the City's comparative advantages and address areas of economic weakness.

The EOA provides information that the City can use to identify and capitalize on its economic opportunities. It also provides information essential to addressing the City's challenges in managing economic development, such as a lack of commercial sites to support growth of businesses that require office space and a lack of policy direction to address these issues, as well as underutilized industrial and commercial land.

The EOA draws on information from numerous data sources, such as the Oregon Employment Department, U.S. Bureau of Economic Analysis, U.S. Bureau of Labor Statistics, and the U.S. Census.

Framework for an Economic Opportunities Analysis

The content of this report is designed to meet the requirements of Oregon Statewide Planning Goal 9 and the administrative rule that implements Goal 9 (OAR 660-009). The analysis in this report is designed to conform to the requirements for an economic opportunities analysis (EOA) in OAR 660-009 as follows.

1. *Economic Opportunities Analysis (OAR 660-009-0015)*. The EOA requires communities to (1) identify the major categories of industrial or other employment uses that could reasonably be expected to locate or expand in the planning area based on information about national, state, regional, county, or local trends; (2) identify the number of sites by type reasonably expected to be needed to accommodate projected employment growth based on the site characteristics typical of expected uses; (3) include an inventory of vacant and developed lands within the planning area designated for industrial or other employment use; and (4) estimate the types and amounts of industrial and other employment uses likely to occur in the planning area. Local governments are also encouraged to assess community economic development potential through a visioning or some other public input-based process in conjunction with state agencies.

2. *Industrial and commercial development policies (OAR 660-009-0020)*. Cities are required to develop commercial and industrial development policies based on the EOA. Local comprehensive plans must state the overall objectives for economic development in the planning area and identify categories or particular types of industrial and other employment uses desired by the community. Local comprehensive plans must also include policies that commit the city or county to designate an adequate number of employment sites of suitable sizes, types, and locations. The plan must also include policies to provide necessary public facilities and transportation facilities for the planning area. Tualatin's draft economic development policies will be in the Tualatin Economic Development Strategy memorandum, which will accompany this report.

3. *Designation of lands for industrial and commercial uses (OAR 660-009-0025).* Cities and counties must adopt measures to implement policies adopted pursuant to OAR 660-009-0020. Appropriate implementation measures include amendments to plan and zone map designations, land use regulations, public facility plans, and transportation system plans. More specifically, plans must identify the approximate number, acreage, and characteristics of sites needed to accommodate industrial and other employment uses to implement plan policies and must designate serviceable land suitable to meet identified site needs.

Organization of this Report

This report is organized as follows:

- **Chapter 2.** Factors Affecting Future Economic Growth summarizes historic economic trends that affect current and future economic conditions in Tualatin as well as Tualatin's competitive advantages for economic development.
- **Chapter 3.** Employment Growth and Site Needs presents a forecast for employment growth in Tualatin and describes the City's target industries and site needs for potential growth in industries.
- **Chapter 4.** Buildable Lands Inventory presents a summary of the inventory of employment lands.
- **Chapter 5.** Land Sufficiency and Conclusions compares the supply of land demand for buildable lands and presents key concluding recommendations for Tualatin.

This report also includes two appendices:

- **Appendix A.** National, State, and Regional and Local Trends
- **Appendix B.** Buildable Lands Inventory Methodology

2. Factors Affecting Future Economic Growth

Tualatin exists as part of the economy of the Portland Region. While Portland is the economic center of the region, providing urban amenities (such as stores, medical services, or personal financial services) to residents, Tualatin also provides similar amenities to its residents and visitors.

This chapter describes the factors affecting economic growth in Tualatin within the context of national and regional economic trends. The analysis presents the City's competitive advantages for growing and attracting businesses, which forms the basis for identifying potential growth industries in Tualatin.

Factors that Affect Economic Development[1]

The fundamental purpose of Goal 9 is to make sure that a local government plans for economic development. The planning literature provides many definitions of economic development, both broad and narrow. Broadly,

> Economic development is the process of improving a community's well-being through job creation, business growth, and income growth (factors that are typical and reasonable focus of economic development policy), as well as through improvements to the wider social and natural environment that strengthen the economy.[2]

That definition acknowledges that a community's wellbeing depends in part on narrower measures of economic wellbeing (e.g., jobs and income) and on other aspects of quality of life (e.g., the social and natural environment). In practice, cities and regions trying to prepare an economic development strategy typically use a narrower definition of economic development; they take it to mean business development, job growth, and job opportunity. The assumptions are that:

- Business and job growth are contributors to and are consistent with economic development, increased income, and increased economic welfare. From the municipal point of view, investment and resulting increases in property tax are important outcomes of economic development.
- The evaluation of trade-offs and balancing of policies to decide whether such growth is likely to lead to overall gains in well-being (on average and across all citizens and

[1] The information in this section is based on previous Goal 9 studies conducted by ECONorthwest and the following publication: *An Economic Development Toolbox: Strategies and Methods*, Terry Moore, Stuart Meck, and James Ebenhoh, American Planning Association, Planning Advisory Service Report Number 541, October 2006.

[2] *An Economic Development Toolbox: Strategies and Methods*, Terry Moore, Stuart Meck, and James Ebenhoh, American Planning Association, Planning Advisory Service Report Number 541, October 2006.

businesses in a jurisdiction, and all aspects of well-being) is something that decision makers do after an economic strategy has been presented to them for consideration.

That logic is consistent with the tenet of the Oregon Land Use Planning program: all goals matter, no goal dominates, and the challenge is to find a balance of conservation and development that is acceptable to a local government and state. Goal 9 does not dominate, but it legitimizes and requires that a local government focus on the narrower view of economic development that focuses on economic variables.

In that context, a major part of local economic development policy is about local support for business development and job growth; that growth comes from the creation of new firms, the expansion of existing firms, and the relocation or retention of existing firms. Specifically, new small businesses are accounting for a larger share of the job growth in the United States.[3] This shift toward a focus on entrepreneurship, innovation, and small businesses presents additional options for local support for economic development beyond firm attraction and retention. Thus, a key question for economic development policy is, *What are the factors that influence business and job growth, and what is the relative importance of each?* This document addresses that question in depth.

What factors matter?

Why do firms locate where they do? There is no single answer—different firms choose their locations for different reasons. Key determinants of a location decision are a firm's *factors of production*. For example, a firm that spends a large portion of total costs on unskilled labor will be drawn to locations where labor is relatively inexpensive. A firm with large energy demands will give more weight to locations where energy is relatively inexpensive. In general, firms choose locations they believe will allow them to maximize net revenues—if demand for goods and services are held roughly constant, then revenue maximization is approximated by cost minimization.

The typical categories that economists use to describe a firm's production function are:

- **Labor.** Labor is often the most important factor of production. Other things equal, firms look at productivity—labor output per dollar. Productivity can decrease if certain types of labor are in short supply, which increases the costs by requiring either more pay to acquire the labor that is available, the recruiting of labor from other areas, or the use of the less productive labor that is available locally.
- **Land.** Demand for land depends on the type of firm. Manufacturing firms need more space and tend to prefer suburban locations where land is relatively less expensive and

[3] According to the 2018 Small Business Profile from the U.S. Small Business Office of Advocacy, small businesses account for over 99 percent of total businesses in the United States, and their employees account for nearly 50% of American workers. https://www.sba.gov/sites/default/files/advocacy/2018-Small-Business-Profiles-US.pdf

less difficult to develop. Warehousing and distribution firms need to locate close to interstate highways.

- **Local infrastructure.** An important role of government is to increase economic capacity by improving quality and efficiency of infrastructure and facilities, such as roads, bridges, water and sewer systems, airport and cargo facilities, energy systems, and telecommunications.
- **Access to markets.** Though part of infrastructure, transportation merits special attention. Firms need to move their product (either goods or services) to the market, and they rely on access to different modes of transportation to do this.
- **Materials.** Firms producing goods, and even firms producing services, need various materials to develop products that they can sell. Some firms need natural resources (i.e., raw lumber) and others may need intermediate materials (i.e., dimensioned lumber).
- **Entrepreneurship**. This input to production may be thought of as good management, or even more broadly as a spirit of innovation, optimism, and ambition that distinguishes one firm from another even though most of their other factor inputs may be quite similar. Entrepreneurial activity, even when unsuccessful, can offer information about the local market that other entrepreneurs can use in starting a new firm. Entrepreneurs are typically willing to take on more risk in uncertain markets, and a strengthened entrepreneurial environment can help to reduce that risk and uncertainty. [4] Entrepreneurs also tend to have more mobility than larger firms and are more likely to locate in areas with a strong entrepreneurial environment.[5] To some degree, local governments can promote the high quality of life in an area to attract entrepreneurs, in addition to adopting regulations with minimal barriers—or at least, clear guidelines—for new small businesses.

The supply, cost, and quality of any of these factors obviously depends on market factors such as conditions of supply and demand locally, nationally, and even globally. But they also depend on public policy. In general, public policy can affect these factors of production through:

- **Regulation.** Regulations protect the health and safety of a community and help maintain the quality of life. Overly burdensome regulations, however, can be disincentives for businesses to locate in a community. Simplified bureaucracies and straightforward regulations can reduce the burden on businesses and help them react quickly in a competitive marketplace.
- **Taxes**. Firms tend to seek locations where they can optimize their after-tax profits. Tax rates are not a primary location factor—they matter only after businesses have made decisions based on labor, transportation, raw materials, and capital costs. The costs of these production factors are usually similar within a region. Therefore, differences in tax

[4] Tessa Conroy and Stephan Weiler. "Local and Social: Entrepreneurs, Information Network Effects, and Economic Growth" (2017). https://redi.colostate.edu/wp-content/uploads/sites/50/2017/05/gender_gia_Jun2017-2.pdf

[5] Emil E. Malizia and Edward J. Feser. *Understanding Local Economic Development. (*1999).

levels across communities within a region are more important in the location decision than are differences in tax levels between regions.

- **Financial incentives**. Governments can offer firms incentives to encourage growth. Most types of financial incentives have had little significant effect on firm location between regions. For manufacturing industries with significant equipment costs, however, property or investment tax credit or abatement incentives can play a significant role in location decisions. Incentives are more effective at redirecting growth within a region than they are at providing a competitive advantage between regions.

This discussion may make it appear that a location decision is based entirely on a straightforward accounting of costs, with the best location being the one with the lowest level of overall costs. Studies of economic development, however, have shown that location decisions depend on a variety of other factors that indirectly affect costs of production. These indirect factors include agglomerative economies (also known as industry clusters), quality of life, and innovative capacity.

- **Industry clusters**. Firms with similar business activities can realize operational savings when they congregate in a single location or region. Clustering can reduce costs by creating economies of scale for suppliers. For this reason, firms tend to locate in areas where there is already a presence of other firms engaged in similar or related activities.
- **Quality of life.** A community that features many quality amenities, such as access to recreational opportunities, culture, low crime, good schools, affordable housing, and a clean environment can attract people simply because it is a nice place to be. A region's quality of life can attract skilled workers, and if the amenities lure enough potential workers to the region, the excess labor supply pushes their wages down so that firms in the region can find skilled labor for a relatively low cost. The characteristics of local communities can affect the distribution of economic development within a region, with different communities appealing to different types of workers and business owners. Sometimes location decisions by business owners are based on an emotional or historical attachment to a place or set of amenities, without much regard for the cost of other factors of production.
- **Innovative capacity.** Increasing evidence suggests that a culture promoting innovation, creativity, flexibility, and adaptability is essential to keeping U.S. cities economically vital and internationally competitive. Innovation is particularly important in industries that require an educated workforce. High-tech companies need to have access to new ideas typically associated with a university or research institute. In addition to innovations in research and development within firms or research institutions, firms may also draw on the innovative capacity of entrepreneurs in an area. These entrepreneurs may be former employees of the larger firm or businesses that relocated to an area because of the proximity to an industry cluster. Strong networks and communication between firms, research institutions, and entrepreneurs are key

components to leveraging innovative capacity in an area.[6] Local governments are well-equipped to help foster these networks through supporting economic development tools such as small business assistance centers or incubation centers. Government can also be a key part of a community's innovative culture through the provision of services and regulation of development and business activities that are responsive to the changing needs of business.

How important are these factors?

To understand how changes in public policies affect local job growth, economists have attempted to identify the importance for firms of different locational factors. They have used statistical models, surveys, and case studies to examine detailed data on the key factors that enter the business location decision.

Economic theory says that firms locate where they can reduce the costs of their factors of production (assuming demand for products and any other factors are held constant). Firms locate in regions where they have access to inputs that meet their quality standards, at a relatively low cost. Because firms are different, the relative importance of different factors of production varies both across industries and, more importantly, across firms.

No empirical analysis can completely quantify firm location factors because numerous methodological problems make any analysis difficult. For example, some would argue simplistically that firms would prefer locating in a region with a low tax rate to reduce tax expenses. However, the real issue is the value provided by the community for the taxes collected. Because taxes fund public infrastructure that firms need, such as roads, water, and sewer systems, regions with low tax rates may end up with poor infrastructure, making it less attractive to firms. When competing jurisdictions have roughly comparable public services (type, cost, and quality) and quality of life, then tax rates (and tax breaks) can make a difference.

Further complicating any analysis is the fact that many researchers have used public expenditures as a proxy for infrastructure quality. But large expenditures on roads do not necessarily equal a quality road system. It is possible that the money has been spent ineffectively and the road system is in poor condition.

An important aspect of this discussion is that the business function at a location matters more than a firm's industry. A single company may have offices spread across cities with headquarters located in a cosmopolitan metropolitan area, the research and development divisions located near a concentration of universities, the back office in a suburban location, and manufacturing and distribution located in areas with cheap land and good interstate access.

The location decisions of businesses are primarily based on the availability and cost of labor, transportation, raw materials, and capital. The availability and cost of these production factors are usually similar within a region. Most economic development strategies available to local

[6] Nancey Green Leigh and Edward Blakely. *Planning Local Economic Development: Theory and Practice.* 2013.

governments, however, only indirectly affect the cost of these primary location factors. Local governments can most easily affect tax rates, public services, and regulatory policies. Economists generally agree that these factors do affect economic development, but the effects on economic development are modest. Thus, most of the strategies available to local governments have only a modest effect on the level and type of economic development in the community.

Local governments can provide support for new and existing small businesses through policies and programs that support entrepreneurship and innovation. The National League of Cities suggests strategies for local governments, including strong leadership from elected officials; better communication with entrepreneurs, especially regarding the regulatory environment for businesses in the community; and partnerships with colleges, universities, small business development centers, mentorship programs, community groups, businesses groups, and financial institutions.[7]

Local governments in Oregon also play a central role in the provision of buildable land through the inclusion of lands in the Urban Growth Boundary, through the determination of plan designations and zoning, and through the provision of public services. Obviously, businesses need buildable land to locate or expand in a community. Providing buildable land alone is not sufficient to guarantee economic development in a community—market conditions must create demand for this land, and local factors of production must be favorable for business activity. In the context of expected economic growth and the perception of a constrained land supply in Tualatin, the provision of buildable land has the potential to strongly influence the level and type of economic development in the City. The provision of buildable land is one of the most direct ways that Tualatin can affect the level and type of economic development in the community.

Summary of the Effect of National, State, and Regional Trends on Economic Development in Tualatin

This section presents a summary and the implications of national, state, and regional economic trends on economic growth in Tualatin, which are presented in Appendix A. Employment growth in Tualatin is closely related to trends that affect economic growth in Washington County and the broader Portland region.

- **Recovery from the national recession.** Incomes grew faster in Washington County than Oregon since 2001, and the unemployment rate in Washington County was lower than the statewide average.
    - The unemployment rate in Washington County has declined since the recession, consistent with trends in the United States and Oregon. In 2018, the unemployment rate was 3.5% in Washington County, 4.2% in Oregon, and 3.9% in the United States. Comparatively, in 2009, unemployment was 9.5% in Washington County, 11.3% in Oregon, and 9.3% in the United States. As of 2018, the unemployment rate for Washington County is similar to its rate in 2000.
    - Employment has increased in Washington County since 2001, with a gain of about 66,799 employees between 2001 and 2018. The largest increases were in professional/business services and health care/social assistance, while the largest decreases were in wholesale trade and information. Tualatin accounts for about 11% of employment in Washington County.

- **Growth in manufacturing and healthcare / social assistance sectors.** Employment in manufacturing and the healthcare / social assistance sectors accounted for about 37% of employment in Tualatin in 2017. In 2007, employment in these industries accounted for about 36% of employment in Tualatin, an increase of about 3,299 employees between 2007 and 2017. Employment in both of these sectors support above average wages.

  In Washington County, employment in manufacturing and the healthcare / social assistance sectors accounted for 23% of employment in 2017, down from 24% in 2007. While the overall share of employment decreased, total employment increased by about 9,809 employees between 2007 and 2017.

- **Availability of trained and skilled labor.** Availability of labor depends, in part, on population growth and in-migration. Tualatin's population increased by 4,344 people between 2000 and the 2013–2017 period, at an average growth rate of 1.0%. In comparison, Oregon's population also grew at an average rate of 1.0%, between 2000 and 2017, with 66% of population coming from in-migration.

  The current labor force participation rate is another important consideration in the availability of labor. The labor force in any market consists of the adult population (16 and over) who are working or actively seeking work. The labor force includes both the employed and unemployed. Children, retirees, students, and people who are not actively seeking work are not considered part of the labor force. According to the 2013–

2017 American Community Survey, Tualatin had about 15,643 people in its labor force and Washington County had over 310,400. The labor force participation rate in Tualatin (73%) was higher than Washington County (69%) and the Portland Region (68%) in the 2013–2017 period. A higher concentration of older residents in an area or a mismatch of the types of jobs available in an area and the types of skills of the labor force can contribute to low labor force participation rates.

Businesses in Tualatin draw employees from across Washington County as well as Multnomah and Clackamas Counties. Relative to Washington County and the Portland Region, Tualatin residents have a slightly higher level of educational attainment.

- **Aging of the population.** Tualatin has a smaller percentage of residents 60 years and older relative to Washington County and the Portland Region. Tualatin's median age, which was 31.9 in 2000, increased to 38.2 by the 2013–2017 period. In comparison, Washington County's median age was 36.4 in the 2013–2017 period.

  Washington County's population is expected to continue to age, with people 60 years and older forecast to grow from 20% of the population in 2020 to 24% of the population in 2040, consistent with Statewide trends. Tualatin may continue to attract midlife and older workers over the planning period. People in this age group may provide sources of skilled labor, as people continue to work until later in life. These skilled workers may provide opportunities to support business growth in Tualatin.

- **Increases in racial and ethnic diversity.** Overall, the nation and Oregon are becoming more racially and ethnically diverse. Between 2000 and 2013–2017, the Latinx population in Oregon increased from 8% to 13%, and the Latinx population in Tualatin increased from 12% to 16% in that same time. Growth in the Latinx community will continue to drive economic development in Oregon. The share of Oregon's non-Caucasian population increased from 13% to 15% and stayed static in Tualatin at 13%. Tualatin is less racially diverse but more ethnically diverse than Oregon.

- **Importance of small businesses in Oregon's economy.** Small business, those with 100 or fewer employees, account for 66% of private-sector employment in Oregon. The average size for a private business in Tualatin is 18 employees per business, compared to the State average of 11 employees per private business. Businesses with five or fewer employees in Tualatin account for 64% of private employment, and businesses with fewer than 20 employees account for 89% of private employment. Only 3% of private businesses in Tualatin have more than 100 employees, accounting for 39% of the jobs in Tualatin.

- **Increases in energy prices.** In 2018, lower energy prices decreased the costs of commuting. Over the long-term, if energy prices increase, these higher prices will likely affect the mode of commuting before affecting workers' willingness to commute. For example, commuters may choose to purchase a more energy-efficient car or carpool. Very large increases in energy prices may affect workers' willingness to commute, especially workers living the furthest from Tualatin or workers with lower-paying jobs. In addition, very large increases in energy prices may make shipping freight long

distances less economically feasible, resulting in a slowdown or reversal of offshore manufacturing, especially of large, bulky goods.

- **Increases in remote workers.** Working from home has increased in Oregon in both urban and rural areas. Firms that allow workers to work remotely cover a variety of industries, allowing their employees to continue working for that firm but enjoy the quality of life and amenities of the location that the workers prefer to live. While data on remote workers is difficult to obtain, about 6% of workers in Tualatin reported that they worked from home in the 2013–2017 period (according to Census data), up from 4.6% in 2000. In comparison, 6.0% of workers in Washington County worked from home in 2013–2017.

Employment Trends in Tualatin, Clackamas County, and Washington County

The economy of the nation changed substantially between 1980 and 2018. These changes affected the composition of Oregon's economy, including Tualatin's economy. At the national level, the most striking change was the shift from manufacturing employment to service-sector employment. The most important shift in Oregon during this period was the shift from a timber-based economy to a more diverse economy, with the greatest employment in services.

This section focuses on changes in the economy in Clackamas and Washington County since 2001 and in Tualatin since 2007.

Exhibit 4 shows covered employment in Washington County for 2001 and 2018.[8] Employment increased by 66,799 jobs, at an average annual growth rate (AAGR) of 1.5% over this period. The sectors with the largest increases in numbers of employees were professional and businesses services, healthcare and social assistance, and accommodation and food services. The average annual wage for employment in Washington County in 2018 was about $70,308.

[8] Covered employment includes employees covered by unemployment insurance. Examples of workers not included in covered employment are sole proprietors, some types of contractors (often referred to as "1099 employees"), or some railroad workers. Covered employment data is from the Oregon Employment Department.

Exhibit 5 shows covered employment and average wage for the 10 largest industries in Washington County. Jobs in professional and business services, as well as manufacturing, each account for about 18% of the county's covered employment, and these sectors pay more per year than the County average ($91,027 and $113,297, respectively). Jobs in wholesale trade and information also pay more per year than the county average but account for a smaller share of covered employment in the county.

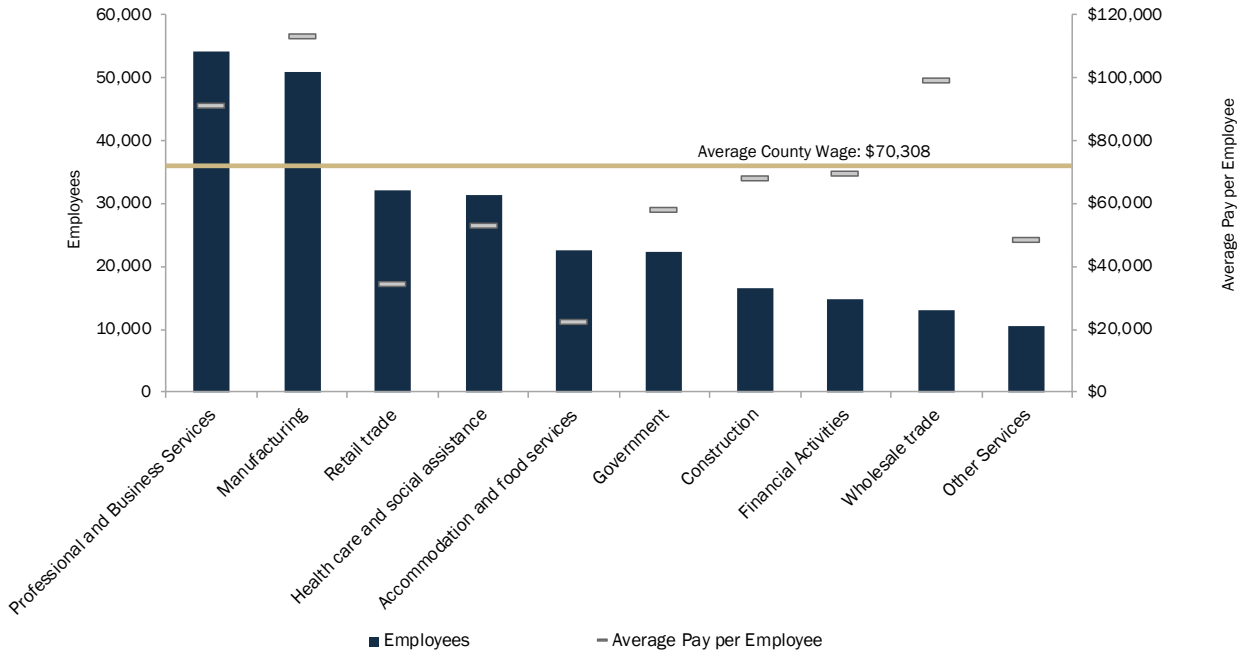

Exhibit 6 shows covered employment in Clackamas County for 2001 and 2018. Employment increased by 31,975 jobs, with an average annual growth rate (AAGR) of 1.3% over this period. The sectors with the largest increases in numbers of employees were health care and social assistance, professional and business services, accommodation and food services, and construction. The average annual wage for employment in Clackamas County in 2018 was about $53,326.

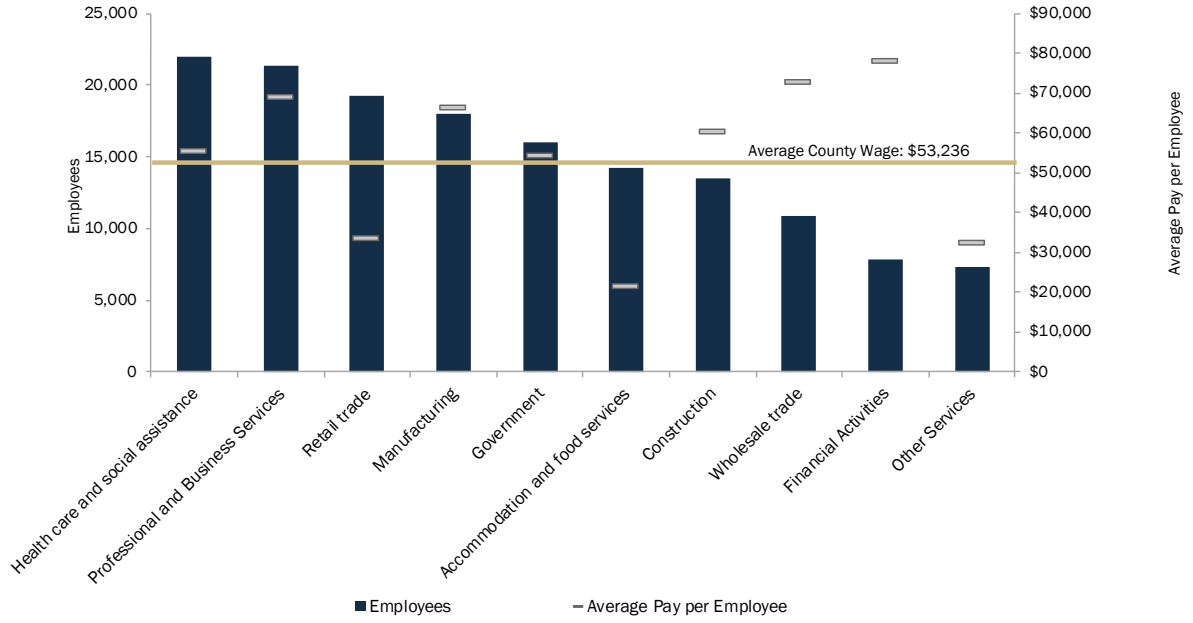
Exhibit 7 shows covered employment and average wage for the 10 largest industries in Clackamas County. Jobs in health care and social assistance, as well as professional and business services, each account for about 13% of the county's covered employment, and these sectors pay more per year than the county average ($55,217 and $68,652, respectively).

Exhibit 7. Covered Employment and Average Pay by Sector, 10 Largest Sectors Clackamas County, 2018

Source: Bureau of Labor Statistics, Quarterly Census of Employment and Wages, 2018. Note: Largest sectors are defined by number of employees.



Employment in Tualatin accounts for about 11% of employment in Washington County. Exhibit 8 shows a summary of covered employment data for the Tualatin Planning Area in 2017. The sectors with the largest number of employees in Tualatin were manufacturing (27%), health care and social assistance (11%), and wholesale trade (10%). These sectors accounted for 14,897 jobs or 48% of Tualatin's employment.

[9] The following sectors were combined due to confidentiality of QCEW data: utilities, transportation, and warehousing; manufacturing and wholesale trade; finance and insurance, real estate and rental and leasing; health care and social assistance and private education; arts, entertainment, and recreation and accommodation and food services.

Exhibit 9 shows the employment and average pay per employee for sectors in Tualatin. Average pay for all employees ($57,283) is shown as a light brown line across the graph, and average pay for individual sectors are shown as short red lines. The exhibit shows that Tualatin's retail, administrative/waste management, and accommodations/food service sectors have below-average wages. The highest wages are in manufacturing (Exhibit 10).

Exhibit 9. Covered Employment and Average Pay by Sector, Tualatin, 2017

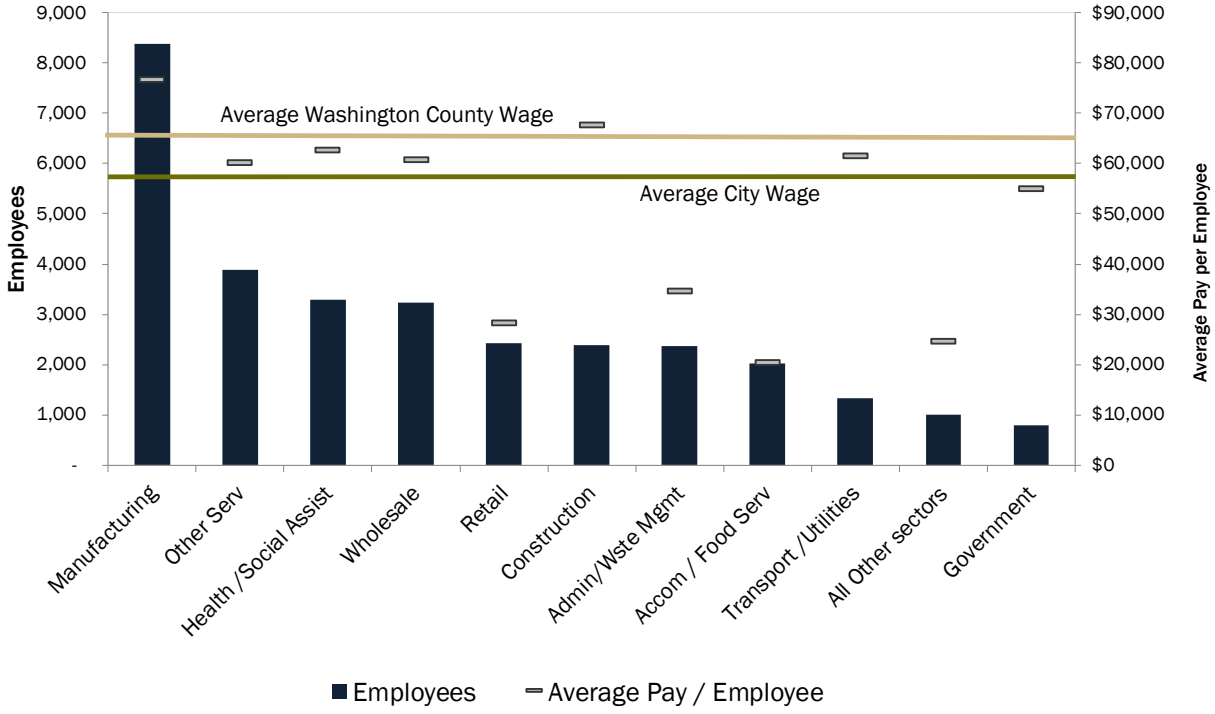

Exhibit 10. Covered Employment and Average Pay by Manufacturing Sub-Sector, Tualatin, 2017

Source: Oregon Employment Department, Quarterly Census of Employment and Wages, 2017.

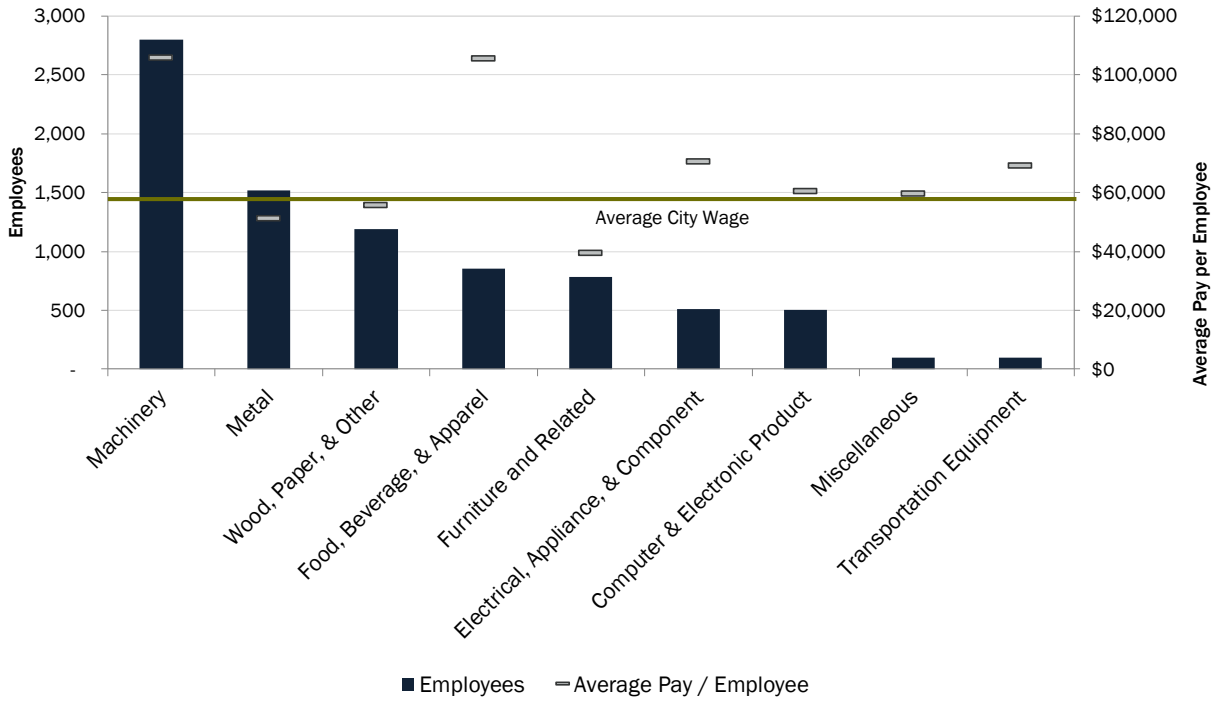

Exhibit 11 shows that employment in Tualatin grew by nearly 7,800 employees between 2007 and 2017 at an average annual growth rate of 2.9%. All sectors grew in employment, with three exceptions: (1) agriculture, forestry, and mining; (2) finance and insurance, and (3) private education services. The sectors with the largest growth were manufacturing, health care and social assistance, and administrative support/waste management and remediation services.

Outlook for Growth in Washington County

Exhibit 12 shows the Oregon Employment Department's forecast for employment growth by industry for the Portland Region (Clackamas, Multnomah, and Washington Counties) over the 2017–2027 period. Employment in the region is forecast to grow at an average annual growth rate of 1.2%.

The sectors that will lead employment in the region for the 10-year period are: professional and business services (adding 28,100 jobs); private education and health services (adding 27,300 jobs); trade, transportation, and utilities (adding 21,400); and leisure and hospitality (adding 13,800 jobs). In sum, these sectors are expected to add 90,600 new jobs or about 74% of employment growth in the Portland Region. As of 2017, Washington County accounts for about 36% of employment in these three counties (the Portland Region), and Tualatin accounts for about 10% of the County's employment.

Exhibit 12. Regional Employment Projections, Portland Region (Clackamas, Multnomah, and Washington County), 2017 and 2027

Source: Oregon Employment Department. Employment Projections by Industry 2017–2027. Note: AAGR is average annual growth rate.

Infrastructure Capacity

This section outlines details about Tualatin's infrastructure capacity (including water, wastewater, stormwater, and transportation and transit infrastructure). Findings derive from an interview conducted with the Tualatin Public Works Department.

Water

Tualatin purchases its water from the City of Portland. Tualatin's water system, which extends past Bridgeport Village, is City-owned (and water becomes City-owned once it enters city limits). Its water supply derives from the Bull Run Watershed and Columbia South Shore Well Field. In the summer months, Tualatin uses about 10m gallons of water per day, and in the winter months, Tualatin uses about 4.4m gallons of water per day. The maximum water delivery to Tualatin is 14.1m gallons per day. Tualatin's 10-year water contract expires in 2026.

While Tualatin is closer to capacity in the summer, its water system currently accommodates all existing needs. From an economic development perspective, however, some types of businesses that use significant amounts of water (i.e., 1m gallons of water per day) may not locate in Tualatin because of the available water in the city. For example, Business Oregon was pursuing potential sites for a business looking to locate somewhere in the Greater Portland area—where they could access about 2m gallons of water per day. Tualatin turned this opportunity down.

Currently, Tualatin is helping to pay for a water treatment plant (expected delivery is 2026) that serves the Portland region. In addition, Tualatin is updating its Water Master Plan (expected delivery is summer 2019), developing its Water Emergency Supply Plan (expected delivery is fall 2019), and developing its Water Supply Strategy (expected delivery spring 2020).

On the horizon, Tualatin does not have big plans to expand its system per its Water Master Plan update. Core strategic priorities, per its Water Supply Strategy, are to find ways to access water from other water supplies. The City's water systems are in good repair. The most significant upgrade to water infrastructure is in Basalt Creek, which may need an additional reservoir depending on how fast the sub-area builds out.

Wastewater

Tualatin's wastewater collection system is serviced by Clean Water Services. Clean Water Services treats the wastewater and manages several of Tualatin's pump stations, which are City-owned. Its effluent discharge is typically 2.4m gallons per day (dry peak) and 4 million gallons per day (wet peak). While Tualatin has some issues with inflow to manhole lids, it does not have significant issues with infiltration.

Tualatin is not concerned about its water treatment capacity, as Clean Water Services is continuously improving and expanding its facilities. It is likely that as Basalt Creek grows, however, Tualatin will need to replace its piping and add five new pump stations. Despite growing population and jobs, Tualatin is not concerned with future wastewater capacity.

Tualatin recently finished an update to their Sewer Master Plan (which went to council in August 2019).

Stormwater

Tualatin staff do not think that stormwater management or treatment is a barrier to supporting new business growth. As new development occurs, developers are required to address stormwater issues on a property by property basis.

Transportation Services

This analysis looked at connections and capacity to I-5, regional connectors, and local roadways. Transportation access is both a significant advantage for economic development (because Tualatin is located directly on I-5) and a significant disadvantage because of increasing congestion on I-5 and other major roads.

- **Connection and capacity to I-5.** ODOT finished an auxiliary lanes project last year, which made a notable difference in easing capacity and reducing congestion (particularly from Carmen to Nyberg and the 205 on-ramps). I-5's (regional) pinch points are the Rose Quarter and Boones Bridge. Generally speaking, congestion issues around I-5 are less about Tualatin's interchanges and ramps and more about regional conditions on I-5.
- **Regional connector roads.** Over the last decade and longer, major roads connecting Tualatin to nearby cities have become increasingly congested. Major regional connectors include Tualatin Sherwood Road, Boones Ferry Road N-S, Hwy 99 W, Borland Road E-W, and 124th Avenue. The following provides more information:
    - *Tualatin Sherwood Road.* Washington County plans to complete a road widening project in 2023. The project will widen Tualatin Sherwood Road from three lanes to five lanes. It will include bicycle facilities.
    - *124th Avenue.* New improvements on this road are currently being underused. The City's long-term plan is to implement more signage to direct vehicles onto this currently underutilized roadway (offsetting traffic on other roadways). This road was built with three lanes but was planned for five lanes, allowing for future expansions of the road. Because few people know about (or use) this road, not much traffic exists. It is likely that as this road becomes more used, traffic pressure on Boones Ferry and Tualatin Sherwood Road will be relieved somewhat.
    - *Boones Ferry Road N–S.* Despite congestion near Tualatin Sherwood Road, the City has no plans for expansion at this time.
    - *Highway 99 W.* As this connector is located toward the north portion of Tualatin, this connector is not as extensive of an issue for traffic within the City of Tualatin. The City is, however, looking to develop a funding plan to improve Sherwood through King City and Tigard.

- *65th Avenue.* Running north to south, this road is becoming a bypass to get around 205 and I-5. While it is not considered a regional connector, it is a road likely to be looked at in the next Transportation System Plan update.
- *Mary Borland Road.* Tualatin recently took possession of Borland Road from Washington County. From Lake Oswego to Stafford, the City plans to make pavement improvements and conduct maintenance to make it a more pleasant place to drive. While there are no current plans for expansion, the City will likely address this piece of the network in their next Transportation System Plan update.

- **Local roadways.** Tualatin's road network is well-built and fairly new. As new development occurs, developers will be required to pay for transportation improvements that will support upgrading local and other roads. Tualatin is working to complete a cyclist pathway across I-5 and is working to increase multimodal pathways to T-S road (developed as part of the T-S Road widening project; expected delivery 2023). A $20 million general obligation bond passed last year to implement transportation capital projects to improve safety and relieve congestion at key intersections and locations.

Transit

Tualatin has three Tri-Met bus routes that serve the community (the 76, 96, and 97 routes) and the WES commuter rail that connects Tualatin to Beaverton. In addition, Ride Connection, which is funded through a Tri-met grant, offers two fixed, on-call lines that serve the business community on a regular schedule. Development of a 12-mile TriMet MAX line (the Southwest Corridor) between southwest Portland and Bridgeport Village in Tualatin is also on the horizon. To date, the City has not participated in discussions about implementing a local transit agency.

Tualatin's Strengths, Weaknesses, Opportunities, and Threats

OAR 660-009-0015(4) requires that cities conduct an assessment of community economic development potential, as part of the EOA. This assessment considers market factors, infrastructure and public facility availability and access, labor, proximity to suppliers and other necessary business services, regulations, and access to job training. The local factors that form Tualatin's competitive advantage are summarized in the subsections below.

Strengths

- **Location.** Tualatin is located in Washington County, about 13 miles south of Portland and about 36 miles north of Salem, along the I-5 corridor. Tualatin is located about midway between Hillsboro and Gresham. Other nearby and relatively large cities include Tigard, Lake Oswego, and Wilsonville. These locational aspects allow both goods and workers to move in and out of Tualatin relatively efficiently. Tualatin's location is an advantage, especially for freight transportation and households composed of workers that commute to different cities for work.

  Due to Tualatin's prime location along the I-5 corridor, about 93% of employees who work in Tualatin commute into Tualatin from other areas. This reality is advantageous for Tualatin, as they can attract workers (at a range of skill sets) from around the region.

- **Availability of transportation.** All firms are heavily dependent upon surface transportation for efficient movement of goods, customers, and workers. Access to an adequate highway and arterial roadway network is needed for all industries. Close proximity to a highway or arterial roadway is critical for firms that generate a large volume of truck or auto trips and firms that rely on visibility from passing traffic to help generate business.

  Businesses and residents in Tualatin have access to a variety of modes of transportation: automotive (I-5, 99W, and local roads), commuter train (West Side Express Service [WES]), light rail (Metropolitan Area Express [MAX] connection to WES at Lombard); bus (TriMet lines 76, 96, and 97), and air (Portland International Airport and Hillsboro Airport). These options provide options for residents and workers in Tualatin to commute in and out of the city, though traffic congestion is a growing concern. Additionally, Tualatin's easy access to I-5 is an advantage for attracting many types of businesses, such as warehouse and distribution or manufacturers that need close access to I-5 for heavy freight

- **Quality of life.** Tualatin residents' value the City's many urban services and amenities available to residents while maintaining a small-town character. Tualatin residents and workers have access to numerous local businesses, a high-quality school system, access to retail shopping opportunities, and an expansive parks system (which includes 90 park sites, 60 miles of trails, and 1,500 acres of natural area). Tualatin also provides access to medical care services through the Kaiser Permanente Tualatin Medical Office, Legacy Meridian Park Medical Center, Providence Bridgeport, and other medical and dental

offices. Tualatin is also a relatively safe community; in 2018, criminal citations, traffic citations, total arrests, and traffic crashes (activities) each amounted to less than 0.1 activity per capita.[10]

- **Support for local businesses.** Successful local economic development is often a result of effective collaboration among governments, business owners, and community members. To support new and existing small businesses in Tualatin, the City and Chamber of Commerce have developed a small business toolkit. The toolkit helps business owners with permitting their business in Tualatin.[11]
- **Existing businesses.** Tualatin has several key sectors (e.g., manufacturing, health care, social assistance), which present key opportunities for the creation of local clusters. These sectors may build off of regional clusters on the westside of the metro region. Tualatin also has many small businesses in a range of industries, including those listed above. Tualatin's existing businesses provide a base to build upon and expand.
- **Access to workers.** Tualatin pulls workers from across the Portland metropolitan area. The types of jobs available at businesses in Tualatin range from highly skilled professional and technical service jobs to service-sector jobs, such as retail services. These jobs require a range of educational background or specialized training.
- **Access to education and training.** Tualatin is also close to higher education facilities, including Clackamas Community College in Wilsonville, Portland Community College (Sylvania), Portland State University, Lewis and Clark, Oregon Institute of Technology, and Reed College. Businesses in Tualatin are able to attract workers from these schools.
- **Infrastructure capacity.** Tualatin has plans for expansion of water, wastewater, and stormwater systems to meet business needs as the city grows. The City recently updated its plans (and planning is ongoing) to address growing demands in the Basalt Creek subarea.

Weaknesses

- **Traffic congestion**. Tualatin's location along the I-5 corridor within the southern part of the Portland region results in significant congestion within the city, particularly during peak travel hours. Addressing these congestion issues will require addressing regional congestion issues on I-5, as well as expansion of connector roads with neighboring cities, as described in the section above. Part of the resolution of traffic congestion issues is increases in public transit and expansion of bicycling and pedestrian facilities.
- **Limited access to transit**. Tualatin residents and commuters have access to TriMet bus lines 76, 96, and 97; the WES commuter rail line; and the Tualatin Shuttle operated by

[10] City of Tualatin. (2018). Tualatin Police Annual Report. https://www.tualatinoregon.gov/sites/default/files/fileattachments/police/page/4885/2018_annual_report.pdf

[11] Tualatin's Small Business Toolkit: www.tualatinoregon.gov/sites/default/files/fileattachments/economic_development/page/4725/small_business_toolkit_final_draft_webpdf.pdf

Ride Connection. These alternative modes of transportation are important but do not meet the scale of the community's public transportation needs. More public transit routes that are more convenient and accessible is desired by the community to reduce congestion and to allow employees to get to work more efficiently.

- **Commuting trends**. While employee commuting trends in Tualatin have their advantages (ability to attract a workforce from across the region), they also present disadvantages. As Tualatin's population grows and as employment in Tualatin grows, it is likely that the number of employees commuting in and out of Tualatin will grow too. Commuting increases road congestion, and with limited access to transit to alleviate this problem, Tualatin's transportation infrastructure will become overloaded.
- **Affordable housing for workers.** A significant concern among Tualatin leaders and community members is the lack of affordable and available housing for people who work at businesses in Tualatin. The cost of housing does not align with the existing salaries of the workforce, which may prevent households from living and working in Tualatin.
- **Need for Replacement Workers.** The population across the region is aging, prompting a need for replacement workers. As workers in Tualatin retire, the need for skilled, educated workers will increase. This trend is consistent with workforce issues common to Oregon's cities.
- **Downtown area that looks dated and has limited draw for residents and visitors**. A perception that Tualatin lacks urban design standards, architectural variety, and amenities in close proximity has resulted in many community members feeling that Tualatin looks dated. Specifically, community members note a need for a refined downtown center to draw visitors to Tualatin from I-5. Potential improvements to the physical appearance of the built environment in the city include increases to allowed building heights in specific areas, more mixed-use development, and improved connectivity to increase walkability.
- **Availability of high-wage jobs.** The average wage in Tualatin is $57,283, while the average wage in Washington County is $70,308. The largest sector of employment in Tualatin is in manufacturing industries, which pay higher-than-average wages. Tualatin also has many service-sector jobs, which tend to provide lower-than-average wages. Tualatin's location and cluster of manufacturing industries may help to attract more businesses with high wages, which may allow more workers in Tualatin to afford to also live in the city.
- **Retention of businesses.** Tualatin's Business Outreach Survey uncovered several issues that may make keeping businesses in Tualatin difficult. Issues include a poor perception of public safety (issues around the interstate and rail line and the perception of rising crime), the lack of transportation and freight access, inconvenient public transit,

perceived slowness on part of the City to modify the Development Code,[12] and lack of incentives for development. In addition, businesses cited a mismatch between business needs and workforce skill sets.

Opportunities

- **Public transportation.** Tualatin may work with Tri-Met to expand public transportation to promote connectivity, reduce reliance on cars, and reduce congestion, and to encourage alternative modes of transportation. While local jurisdictions are not mandated to offer transit services, public transit is essential to the households that need it to access services or to get to work. Connections to the Southwest Corridor transit line will be key to connecting Tualatin within the Portland region. Local transit will be necessary to allow riders to get from the Southwest Corridor station to employment centers in Tualatin.
- **Improvements to regional connectors.** Regional transportation corridors, connecting Tualatin to nearby cities, are congested. Plans for road expansions, as well as road expansions completed in the recent past, may improve existing conditions and support further growth.
- **Redevelopment and infill development.** Community members noted the lack of a downtown center of Tualatin to draw visitors. Along with improvements to the physical appearance and urban form of commercial areas in Tualatin, the City can continue to attract small businesses to locate in Tualatin, especially those that would attract visitors and residents to a core area. One potential area for this type of development would be the redevelopment of the Tualatin Commons, to create a more pedestrian-oriented center.
- **Small business retention and growth.** Issues with business retention have created vacant storefronts. The City could develop and promote initiatives that encourage use of currently vacant storefronts through continued support for small businesses and entrepreneurs.

Threats

- **Environmental and climate change risks.** Environmental factors, including climate change, can threaten the success of a variety of industries that rely on key infrastructure that may not be adapted to growing environmental pressures (e.g., flooding, seismic hazards, or powerful storms). The risk of these natural hazards is likely to increase as a result of climate change.[13] Forest fires and urban heat islands also cause poor air quality, which can decrease quality of life for residents and impact their health.
- **Potential for decline in the State and national economies.** Changes in the State and national economies are beyond local control and directly affect Tualatin's economy.

[12] Tualatin updated its Development Code in 2018 through a project known as the Tualatin Development Code Improvement Project (TDCIP) Phase 1.

[13] Oregon Climate Change Research Institute. *Fourth Oregon Climate Assessment Report*. January 2019.

National recessions generally have a greater effect on Oregon, with higher job losses and longer recovery periods than the national average.

Summary of Tualatin's Competitive and Comparative Advantages

The prior sections presented Tualatin's strengths, weaknesses, opportunities, and threats for economic development. Based on this, Tualatin's competitive and comparative advantages are:

- **Location.** Tualatin is located along a major transportation corridor (the I-5 corridor) and is 13 miles from downtown Portland. While Tualatin is not an especially large city, it is in close proximity to all of the urban amenities and services one would expect in a large metropolitan area. Residents of Tualatin have access to cultural activities such as concerts and events (like the West Coast Giant Pumpkin Regatta) at the Tualatin Commons and museums, markets, and concert halls in Portland. Residents also have access to outdoor recreational activities such as many park amenities offered by the City and the Tualatin River National Wildlife Refuge in Sherwood. These locational aspects are attractive to businesses who prioritize quality of life for their employees.

  Additionally, most of Tualatin's workers commute to the city from other areas. Businesses that need access to or want to attract customers across the Portland Region may locate in Tualatin. Tualatin's location will impact the area's future economic development.

- **Regional Labor Market.** The availability of labor is critical for economic development. Availability of labor depends not only on the number of workers available but the quality, skills, and experience of available workers. Businesses in Tualatin have access to workers in Tualatin and from neighboring communities. Businesses need access to reliable skilled workers, both with and without higher education. The multitude of higher education institutions located in and around the Portland Metro area means that Tualatin has sufficient access to skilled workers.

- **Existing Businesses.** Tualatin's existing businesses provide an opportunity for development of new businesses within the city. The existing business base is an advantage for economic development in numerous ways—as a source of future economic expansion, for attracting skilled workers, and for provision of goods and services to other businesses in Tualatin.

- **Ongoing Planning Projects.** The City is revising its Comprehensive Plan (the Tualatin 2040 process), which will result in ongoing planning work that is necessary to support economic growth. This work may include revisions to the City's economic development strategy, additional planning for housing to provide more opportunities for workers to live in Tualatin, updating the Transportation System Plan, ongoing planning for transit services, area planning for redevelopment that may result from this EOA and the housing needs analysis project, and other ongoing planning projects.

Target Industries

The characteristics of Tualatin will affect the types of businesses most likely to locate in the city. Tualatin's attributes that may attract firms are Tualatin's access to industrial land, access to workers, and its location along the I-5 corridor.

Tualatin's industry concentrations with a potential competitive advantage are defined in Exhibit 13. Tualatin has categorized its existing businesses into four main categories based on the analysis of location quotients (i.e., highly specialized industries), differential shift (i.e., competitive advantage compared to the national level), and critical concentration (i.e., at least five establishments in a defined cluster). These four categories are Growing Base, Emerging Clusters, Mature Clusters, and Transformation Clusters. Exhibit 13 and Exhibit 14 list the specific industries by each category.

Exhibit 13. Concentration of Industries and Employment, Tualatin, 2017

Source: City of Tualatin, Economic Development Department using data from EMSI and Oregon Department of Employment (QECW data).
Note: Not pictured is Food Processing and Manufacturing, with an LQ of 2.73 and DS 142%. Automotive is also not displayed, with an LQ of 0.51 and DS of -62%.

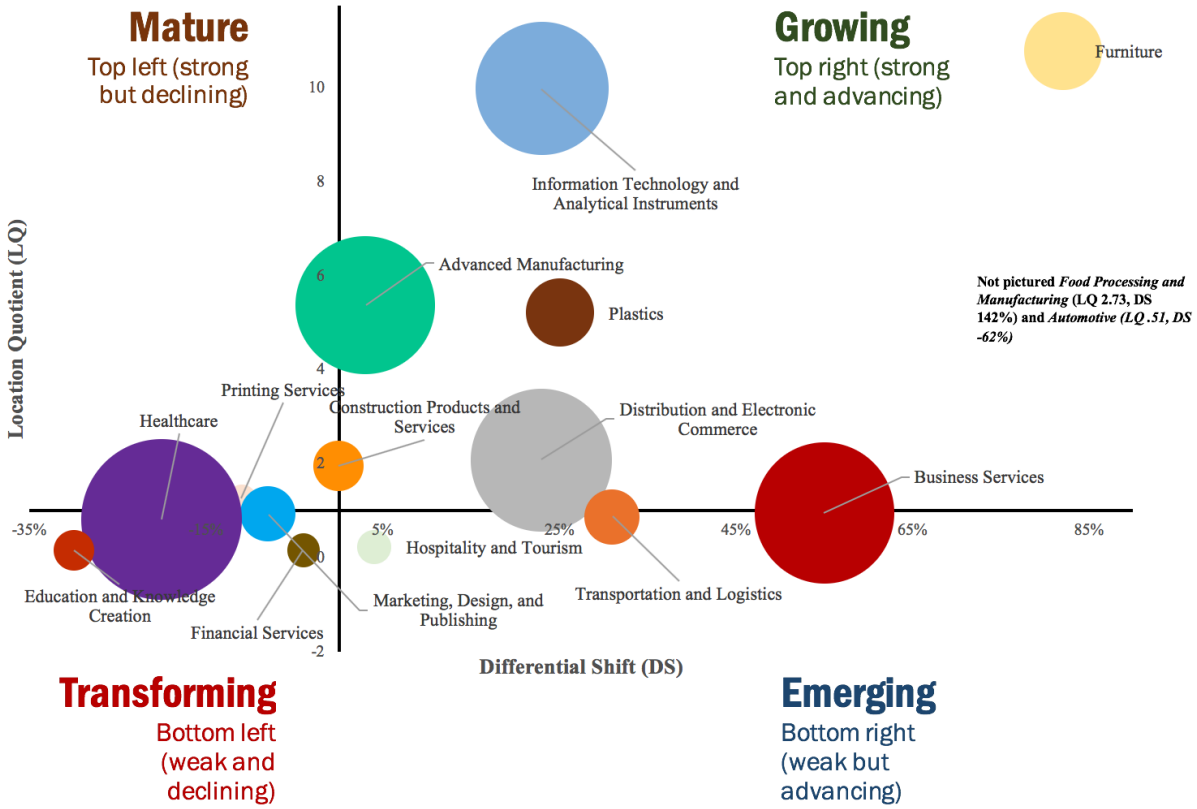

Exhibit 14. Industries Ranked Based on Differential Shift and Location Quotient
Source: City of Tualatin, Economic Development department using EMSI data (2018).

Rank	Cluster	Location Quotient (LQ)	Cluster Employment, 2017	Number of Establishments, 2016	Differential Shift (DS)
GROWING BASE					
1	Food Processing and Manufacturing	2.73	564	6	142%
2	Furniture	10.79	776	6	82%
3	Plastics	5.21	587	10	25%
4	Information Technology and Analytical Instruments	9.99	2,270	37	23%
5	Distribution and Electronic Commerce	2.08	2,535	193	23%
6	Advanced Manufacturing	5.38	2,433	46	3%
EMERGING CLUSTERS					
7	Business Services	0.96	2,506	131	55%
8	Transportation and Logistics	0.88	378	16	31%
9	Hospitality and Tourism	0.22	144	8	4%
MATURE CLUSTERS					
10	Construction Products and Services	1.96	331	7	-0.4%
11	Printing Services	1.26	110	11	-11%
TRANSFORMATION CLUSTERS					
12	Financial Services	0.17	141	35	-4%
13	Marketing, Design, and Publishing	0.93	385	28	-8%
14	Healthcare	0.82	3,279	153	-20%
15	Education and Knowledge Creation	0.16	199	16	-30%

The potential growth industries in Tualatin will draw from existing industry concentration in the City, Washington County, and the Portland Region, along with the City's economic development policies that align with changing or emerging industries and result in employment growth in Tualatin. Tualatin may also have opportunities for employment growth in industries without a concentration of employment or a high location quotient.

Potential Growth Industries

An analysis of growth industries in Tualatin should address two main questions: (1) Which industries are most likely to be attracted to Tualatin? and (2) Which industries best meet Tualatin's economic development goals? The selection of target industries is based on Tualatin's goals for economic development, economic conditions in Tualatin and Washington County, and the City's competitive advantages.

Given the current employment base, which is composed of small and mid-sized businesses, it is reasonable to assume that much of the city's business growth will come from small and mid-sized businesses. This growth will either come from businesses already in Tualatin or new businesses that start or relocate to Tualatin from within the Portland Region or from outside of the region.

The industries identified as having potential for growth in Tualatin are outlined below. This section primarily draws from the City of Tualatin's cluster analysis and reports developed for the Portland Region.

- **Manufacturing.** Tualatin's manufacturing sector accounts for 27% of the city's employment base. Greater Portland, Inc. (GPI) described Portland as a hot spot for manufacturing growth for key sub-clusters (footwear, apparel, knives, and sporting; machinery; and medical devices).[14] Tualatin's potential growth industries in manufacturing are:
    - *Advanced manufacturing.* This industry is an internally preferred grouping of five independent traded clusters: (1) downstream metal products, (2) lighting and electrical equipment, (3) metalworking technology, (4) production technology and heavy machinery, and (5) upstream metal manufacturing. In a report by the U.S. Subcommittee on Advanced Manufacturing, this industry is challenged by "a shortage of Americans with the science, technology, engineering, and mathematics knowledge and technical skills needed for advanced manufacturing jobs."[15] Tualatin has a larger share of highly educated residents compared to Washington County and the Portland Region, alleviating some concerns related to not having sufficient levels of skilled workers.

      Greater Portland Global (GPG), in its latest Investment Plan,[16] states that "[t]he region is rich with firms in legacy industries such as metals manufacturing and wood processing that use advanced processes and possess a highly skilled labor pool, [motor vehicle manufacturing, and computers and electronics]." While GPG indicates that there is "a limited economic development role to play,"

[14] Greater Portland, Inc. (n.d.). Regional Trends in Greater Portland's Target Clusters. Greater Portland 2020.

[15] The United States Subcommittee on Advanced Manufacturing. *Strategy for American Leadership in Advanced Manufacturing*. Office of the President, Committee on Technology of the National Science and Technology Council.

[16] Greater Portland Global. (n.d.). *Global Trade and Investment Plan.* Global Cities Initiative, A Joint Project of Brookings and JPMorgan Chase.

Tualatin has substantial access to labor talent and may continue to support expansions of existing advanced metals manufacturing, family-owned operations, and wood products manufacturing.

- *Food processing and manufacturing.* The Bureau of Labor Statistics describes this industry cluster as one that takes livestock and agricultural products (raw food materials) and transforms them into products for intermediate or final consumption (sold to wholesalers or retailers for distribution). Tualatin's food processing and manufacturing cluster is its fastest growing industry (projected to grow 64% from 2017 to 2028). GPG cites the region's food processing sector as an established sector, requiring support in the form of industrial lands readiness and continued recruitment.
- *Furniture.* The furniture industry cluster comprises establishments that manufacture furniture, cabinets, shelving, and manufactured homes using products made of wood, metal, plastic, or textiles. While the furniture cluster provides the lowest annual wage of $38,911 per year (almost $19,000 less than the city average), it is the most concentrated cluster in Tualatin (with an LQ of 10.79).
- *Plastics.* Wages in the plastics industry cluster (comprising establishments that manufacture plastic materials and other plastic components/products) grew 14% from 2012 to 2017. As the fourth most concentrated cluster in Tualatin (with an LQ of 5.21), this industry presents objective growth potential for lower-skilled workers.
- *Consumer products.* Per a 2019 discussion with GPI, the consumer products sector was described as an important industry target for Oregon, particularly for food and beverage products but also apparel, outdoor wear, and footwear, as well as health and beauty products, home accessories, and pet products. Consumer products consists of convenience, shopping, specialty, or unsought products (e.g., final goods). BuiltOregon, purposed to make Oregon the leader in consumer product innovation and development, launched the United States first nonprofit consumer product accelerator in Oregon. Tualatin may support efforts to connect consumer product businesses with BuiltOregon to encourage growth in its manufacturing target industries (e.g., advanced manufacturing, food processing, furniture manufacturing, etc.).

- **Information technology and analytical systems.** This industry cluster comprises establishments that work in computers, software, audio visual equipment, laboratory instruments, and medical apparatus development (e.g., standard and precision electronics like circuit boards and semiconductors). As of 2017, employees working in this industry cluster maintain an average wage of $109,832 (about $52,000 above the city's average)—representing the highest average-waged industry in Tualatin. Tualatin's information technology and analytical system industry has, however, grown slower (17%) than the nation.

- **Business services.** Business services establishments, including corporate headquarters and other professional services (e.g., consulting, back office services, financial services/legal services, facilities support, computer services, etc.). In Tualatin, this industry is expected to see the largest growth in total jobs and had the largest growth in average wage.

3. Employment Growth and Site Needs

Goal 9 requires cities to prepare an estimate of the amount of commercial and industrial land that will be needed over a 20-year planning period. The estimate of employment land need and site characteristics for Tualatin is based on expected employment growth and the types of firms that are likely to locate in Tualatin over the 20-year period. This section presents an employment forecast and analysis of target industries that build from recent economic trends.

Forecast of Employment Growth and Commercial and Industrial Land Demand

Demand for industrial and non-retail commercial land will be driven by the expansion and relocation of existing businesses and by the growth of new businesses in Tualatin. This employment land demand is driven by local growth independent of broader economic opportunities, including the growth of target industries.

The employment projections in this section build off of Tualatin's existing employment base, assuming future growth is similar to the Portland Region's long-term historical employment growth rates. The employment forecast does not take into account a major change in employment that could result from the location (or relocation) of one or more large employers in the community during the planning period. Such a major change in the community's employment would exceed the growth anticipated by the city's employment forecast and its implied land needs (for employment, housing, parks, and other uses). Major economic events, such as the successful recruitment of a very large employer, are difficult to include in a study of this nature. The implications, however, are relatively predictable—more demand for land (of all types) and public services.

Projecting demand for industrial and non-retail commercial land has four major steps:

1. **Establish base employment for the projection.** We start with the estimate of covered employment in Tualatin presented in Exhibit 8. Covered employment does not include all workers, so we adjust covered employment to reflect total employment in the city.
2. **Project total employment.** The projection of total employment considers forecasts and factors that may affect employment growth in Tualatin over the 20-year planning period.
3. **Allocate employment.** This step involves allocating types of employment to different land use types.
4. **Estimate land demand.** This step estimates general employment land demand based on employment growth and assumptions about future employment densities.

The remainder of this section follows this outline to estimate employment growth and commercial and industrial land demand for Tualatin.

Employment Base for Projection

The purpose of the employment projection is to model future employment land need for general employment growth. The forecast of employment growth in Tualatin starts with a base of employment growth on which to build the forecast.

Exhibit 15 shows ECONorthwest's estimate of total employment in Tualatin in 2017. Tualatin had an estimated 38,838 total employees in 2017.

To develop the figures, ECONorthwest started with estimated covered employment in Tualatin using confidential Quarterly Census of Employment and Wages (QCEW) data provided by the Oregon Employment Department. Based on this information, Tualatin had about 31,102 covered employees in 2017.

Covered employment, however, does not include all workers in an economy. Most notably, covered employment does not include sole proprietors. Analysis of data shows that covered employment reported by the Oregon Employment Department for Washington County is only about 77% of total employment reported by the U.S. Department of Commerce.[17] We evaluated this ratio for each industrial sector for Washington County and used the resulting ratios to determine the number of noncovered employees. This allowed us to determine the total employment in Tualatin.

[17] **Covered employment** includes employees covered by unemployment insurance. Examples of workers not included in covered employment are sole proprietors, some types of contractors (often referred to as "1099 employees"), or some railroad workers. Covered employment data is from the Oregon Employment Department.

Total employment includes all workers based on date from the U.S. Department of Commerce. Total employment includes all covered employees, plus sole proprietors and other noncovered workers.

Exhibit 15. Estimated Total Employment by Sector, Tualatin Planning Area, 2017
Source: 2017 covered employment from confidential Quarterly Census of Employment and Wage (QCEW) data provided by the Oregon Employment Department.

Sector	Covered Employment	Estimated Total Employment	Covered % of Total
Agriculture, Forestry, & Mining	162	162	100%
Construction	2,384	3,018	79%
Manufacturing	8,371	8,761	96%
Wholesale Trade	3,235	3,805	85%
Retail Trade	2,429	2,926	83%
Transportation, Warehousing & Utilities	1,337	1,734	77%
Information	195	235	83%
Finance & Insurance	380	675	56%
Real Estate, Rental, & Leasing	294	1,175	25%
Professional &Technical Services	1,044	1,821	57%
Management of Companies	789	827	95%
Admin. & Support / Waste Mgmt & Remediation Serv.	2,366	2,942	80%
Private Education Services	296	552	54%
Health Care & Social Assistance	3,291	4,019	82%
Arts, Entertainment, & Recreation	846	1,658	51%
Accommodation & Food Services	2,017	2,201	92%
Other Services	879	1,532	57%
Government	787	795	99%
Total Non-Farm Employment	**31,102**	**38,838**	**77%**

Exhibit 16 shows that industrial employment (i.e., manufacturing, warehousing, or construction) is predominantly located in Industrial Plan Designations, with small amounts of employment located in commercial Plan Designations (such as contractors and delivery or transportation logistics services) and in residential Plan Designations (such as contractors, plumbers, electricians, contractors, and delivery or transportation logistics services).

In contrast, about one-fifth of commercial employment (i.e., retail, health care, financial services, and other commercial uses) are located in industrial Plan Designations (such as gas stations, auto body shops, storage facilities, and professional or technical-service businesses) and 12% are located in residential Plan Designations (such as financial institutions, property management or real estate offices, cafes, restaurants, and professional or technical-service businesses).

In the future, it is reasonable to expect that employment in Tualatin will continue to mix within existing Plan Designations, with substantial amounts of commercial employment locating in industrial and residential Plan Designations. Existing commercial and industrial employment in residential Plan Designations (Exhibit 16) consists of construction businesses, some wholesale and retail, as well as financial and real estate businesses.

Exhibit 16. Location of Employment by Plan Designation, Tualatin Planning Area, 2017

Source: Bureau of Labor Statistics, Quarterly Census of Employment and Wage, summarized by ECONorthwest. Note: Data is organized by 2-digit NAICS and only includes employment at businesses with private ownership.

General Plan Designation	Industrial employment		Commercial employment		Total	
	Employees	Percent	Employees	Percent	Employees	Percent
Industrial	13,985	94%	3,090	20%	17,075	56%
Commercial	547	4%	10,352	67%	10,899	36%

Employment Projection

The employment forecast covers the 2020–2040 period, requiring an estimate of total employment for Tualatin in 2020. Tualatin does not have an existing employment forecast, and there is no required method for employment forecasting. OAR 660-024-0040(9) sets out some optional "safe harbors" that allow a city to determine employment land need.

ECONorthwest modeled four scenarios of employment growth. The employment growth assumption and basis for the scenarios are outlined below and in Exhibit 17:

- **Metro's Household Growth Rate for Tualatin:** The growth rate of 0.44% based on Tualatin's household growth forecast for the 2020–2040 period. This rate is consistent with the household forecast used in Tualatin's Housing Needs Analysis (2020–2040). Use of this growth rate is consistent with the safe harbor in OAR 660-024-0040(9)(a).
- **OED's Employment Growth Rate for the Tri-County Region:** The growth rate of 1.2% based on Oregon Employment Departments' (OEDs') forecast for employment growth for the Portland Region (Clackamas County, Multnomah County, and Washington County). Use of this growth rate is consistent with the safe harbor in OAR 660-024-0040(9)(a).
- **Metro's Employment Growth Rate for Tualatin:** The growth rate of 1.4% based on Metro's employment forecast for Tualatin for the 2015–2040 period.
- **Tualatin's Historic Employment Growth Rate:** The growth rate of 2.9% based on Tualatin's employment growth for the 2007–2017 period.

Exhibit 17. Employment Growth Scenarios, Tualatin Planning Area, 2020–2040

Source: (1) Metro's *2040 Household Distributed Forecast*, July 12, 2016. Metro's 2040 TAZ Forecast for households, November 6, 2015. Calculations by ECONorthwest. (2) State of Oregon Employment Department, Employment Projections by Industry, 2017–2027. (3) Metro's 2040 Employment Distributed Forecast, July 12, 2016. (4) Bureau of Labor Statistics, Quarterly Census of Employment and Wage, 2007 and 2017. Note: "HH" is household and "Emp." is employment.

Year	Total Emplyment Scenarios			
	Metro's HH Growth for Tualatin	OED's Emp. Growth for Tri-County Region	Metro's Emp. Growth for Tualatin	Historic Emp. Growth for Tualatin
2020	39,355	40,252	40,478	42,339
2040	42,985	51,089	53,332	75,272
Change 2020 to 2040				
Employees	3,630	10,837	12,854	32,933
Percent	9%	27%	32%	78%
AAGR	0.44%	1.20%	1.39%	2.92%

Tualatin is assuming that the City will grow at the rate forecast by Metro, 1.4% average annual growth rate. This assumption is based on the fact that Tualatin grew at a substantially faster rate over the 2007–2017 period (2.9% average annual growth rate), as well as Tualatin's key comparative advantages, such as the city's location along I-5 and its land base of industrial land.

Exhibit 18 shows employment growth for Tualatin between 2020 and 2040, based on the assumption that the City will grow at an average annual growth rate of 1.4%. Tualatin will have 53,332 employees by 2040, which is an increase of 12,854 employees (32%) between 2020 and 2040.

Tualatin is forecast to have 12,854 new employees over the 20-year period.

Exhibit 18. Forecast of Employment Growth, Tualatin Planning Area, 2020–2040

Source: ECONorthwest.

Year	Total Employment
2020	40,478
2040	53,332
Change in Employees (2020 to 2040)	
Employees	12,854
Percent	32%
AAGR	1.39%

Allocate Employment to Different Land Use Types

The next step in forecasting employment is to allocate future employment to broad categories of land use. Firms wanting to expand or locate in Tualatin will look for a variety of site characteristics, depending on the industry and specific circumstances. We grouped employment into four broad categories of land use based on North American Industrial Classification System (NAICS): industrial, retail commercial, office and commercial services, and government.

Exhibit 19 shows the expected share of employment by land use type in 2020 and the forecast of employment growth by land use type in 2040 in Tualatin. For each land use type, we assumed that the share of total employment will stay the same.

Exhibit 19. Forecast of Employment Growth by Land Use Type, Tualatin Planning Area, 2020–2040

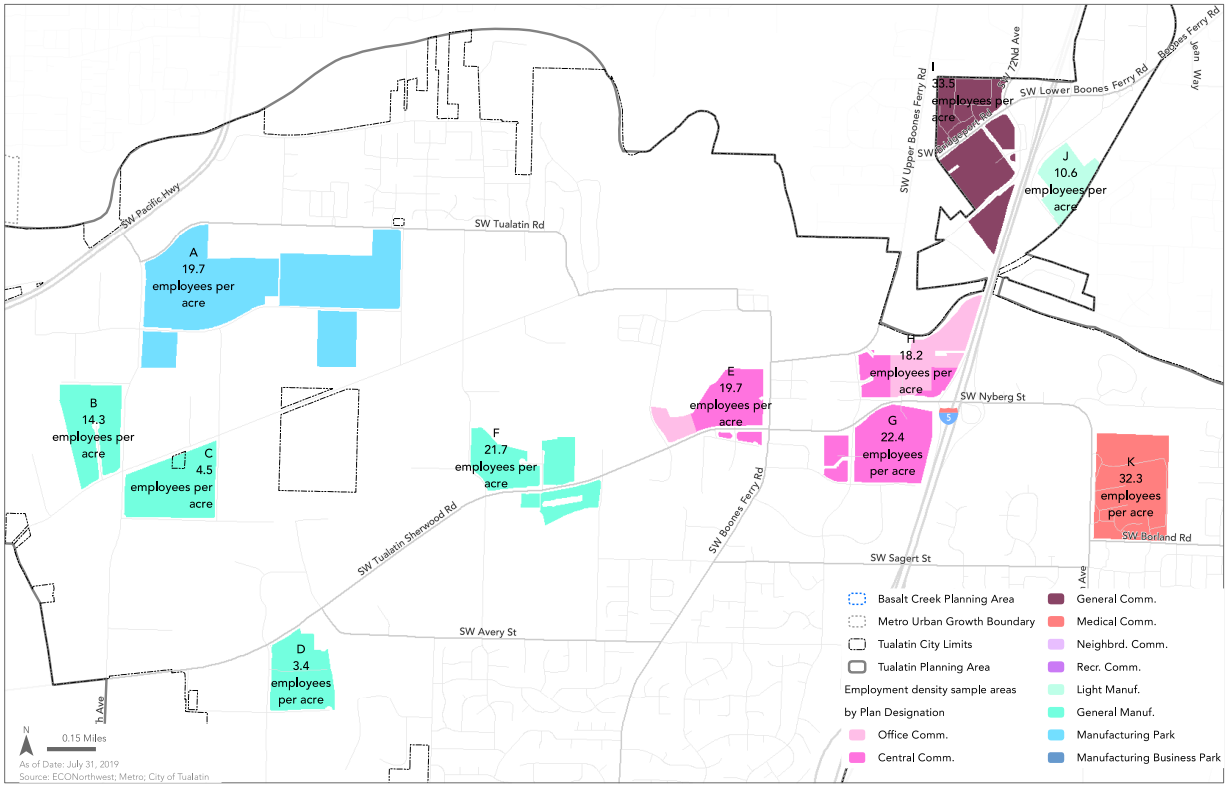
Source: ECONorthwest. Note: The shaded percentages denote an assumption about the future share of employment (as a percent of total) by land use type. It assumes that the share of employment by land use type will remain the same.

Land Use Type	2020		2040		Change
	Employment	% of Total	Employment	% of Total	2020 to 2040
Industrial	18,218	45%	24,004	45%	5,786
Retail Commercial	3,050	8%	4,018	8%	968
Office & Commercial Services	18,382	45%	24,219	45%	5,837
Government	829	2%	1,092	2%	263
Total	**40,478**	**100%**	**53,332**	**100%**	**12,854**

Estimate of Demand for Commercial and Industrial Land

Converting from employment growth to land need (in acres) requires assumptions about future employment densities. Employees per acre is a measure of employment density based on the ratio of the number of employees per acre of employment land that is developed for employment uses. Exhibit 20 displays sample sites that informed ECONorthwest's analysis of employment densities for businesses and sites in Tualatin based on existing employment. Results of the employment density analysis are summarized in Exhibit 21.

Exhibit 20. Employment Densities in Tualatin, Tualatin Sample Sites, 2019
Source: Bureau of Labor Statistics, Quarterly Census of Employment and Wage, 2017; analysis by ECONorthwest.



Based on a sampling of sites in Tualatin, industrial areas average about 15 employees per acre (EPA) and commercial areas average about 27 EPA.

Exhibit 21. Summary of Employment Average Employment Densities, Tualatin Planning Area, 2018

Source: Bureau of Labor Statistics, Quarterly Census of Employment and Wage; summarized by ECONorthwest. Note1: Area names (A through K) correspond to areas mapped in Exhibit 20. Note2: "EPA" is employees per acre.

Land Use Type/ Area Name on Map	Type of Use	Average density (EPA)
Industrial		15
A	Manufacturing Park	20
B	General Manufacturing	14
C	General Manufacturing	5
D	General Manufacturing	3
F	General Manufacturing	22
J	Light Manufacturing	11
Commercial and Retail		27
E	Office/Central Commercial	20
G	Central Commercial	22
H	Office/Central Commercial	18
I	General Commercial	34
K	Medical Commercial	32

Exhibit 22 shows demand for vacant (including partially vacant) land in Tualatin over the 20-year period. ECONorthwest uses two assumptions in Exhibit 22: (1) employment density and (2) net-to-gross conversion factor.

- **Employment density.** Exhibit 22 displays the density assumptions as net employees per acre (EPA) for use in the analysis of employment land demand. It assumes industrial will have an average of 15 EPA, retail commercial will have an average of 25 EPA, and office commercial will have an average of 40 EPA.

  These employment densities are consistent with Tualatin's historic densities and employment densities in Oregon cities of a similar size as Tualatin. Some types of employment will have higher employment densities (e.g., a multistory office building), and some will have lower employment densities (e.g., a convenience store with a large parking lot).

  This analysis assumes 15 EPA for industrial uses, as it is consistent with the EPA weighted average of industrial sample sites. This analysis assumes 25 EPA for retail, as it is consistent with the weighted average of sample site G, H, and I. This analysis assumes 40 EPA for office based on the assumption that Tualatin will encourage more two and three-story office buildings over the 20-year planning period (meaning we assume a higher employment density than historical).

- **Conversion from net-to-gross acres**. The data about employment density is in *net* acres, which does not include land for public right-of-way. Future land need for employment should include land in tax lots needed for employment plus land needed for public right-of-way. One way to estimate the amount of land needed for employment, including public right-of-way, is to convert from *net* to *gross* acres based on assumptions about the amount of land needed for public right-of-way.[18] A net-to-gross conversion is expressed as a percentage of gross acres that are in public right-of-way.

  Based on empirical evaluation of Tualatin's existing net-to-gross ratios, ECONorthwest uses a net-to-gross conversion factor of 9% for industrial and 27% for commercial.

Using these assumptions, the forecast for growth is 12,854 new employees. Exhibit 22 displays and accounts for 12,591 new employees, as government employees (263 employees) were deducted from the analysis of land demand. Tualatin will accommodate new government employees in institutional Plan Designations. The 12,591 new employees will result in the following demand for employment land: 424 gross acres of industrial land, 53 gross acres of retail commercial land, and 200 gross acres of office and commercial services land.

Exhibit 22. Demand for Land to Accommodate Employment Growth, Tualatin Planning Area, 2020–2040

Source: ECONorthwest.

Land Use Type	New Emp. on Vacant Land	Employees per Acre (Net Acres)	Land Demand (Net Acres)	Land Demand (Gross Acres)
Industrial	5,786	15	386	424
Retail Commercial	968	25	39	53
Office & Commercial Services	5,837	40	146	200
Total	**12,591**	**-**	**570**	**677**

Exhibit 23 shows land demand by general Plan Designation based on the existing distribution of employment in Exhibit 16. For example, Exhibit 23 assumes that 94% of growth in industrial employment (demand for 424 acres shown in Exhibit 22) will occur in industrial Plan Designations, with 4% in commercial Plan Designations and 3% in residential Plan Designations.

[18] OAR 660-024-0010(6) uses the following definition of net buildable acre. "Net Buildable Acre" consists of 43,560 square feet of residentially designated buildable land after excluding future rights-of-way for streets and roads. While the administrative rule does not include a definition of a gross buildable acre, using the definition above, a gross buildable acre will include areas used for rights-of-way for streets and roads. Areas used for rights-of-way are considered unbuildable.

Exhibit 23. Demand for Land to Accommodate Employment Growth by Generalized Plan Designation, Tualatin Planning Area, 2020–2040
Source: ECONorthwest.

Land Use Type	General Plan Designation				Total (Acre)
	Industrial	Commercial	Residential	Institutional	
Industrial	397	16	11	-	424
Retail, Office, & Com Services	51	170	31	1	253
Total (Acres)	**448**	**186**	**42**	**1**	**677**

Site Needs for Potential Growth Industries

OAR 660-009-0015(2) requires the EOA to "identify the number of sites by type reasonably expected to be needed to accommodate the expected [20-year] employment growth based on the site characteristics typical of expected uses." The Goal 9 rule does not specify how jurisdictions conduct and organize this analysis.

The rule, OAR 660-009-0015(2), does state that "[i]ndustrial or other employment uses with compatible site characteristics may be grouped together into common site categories." The rule suggests, but does not require, that the city "examine existing firms in the planning area to identify the types of sites that may be needed." For example, site types can be described by (1) plan designation (e.g., heavy or light industrial), (2) general size categories that are defined locally (e.g., small, medium, or large sites), or (3) industry or use (e.g., manufacturing sites or distribution sites). For purposes of the EOA, Tualatin groups its future employment uses into categories based on their need for land with a particular plan designation (i.e., industrial or commercial) and by their need for sites of a particular size.

Based on the forecast of employment growth in Exhibit 19 and the average business size of business in Tualatin in 2017 (using analysis of Quarterly Census of Employment and Wage data), employment growth in Tualatin will require:

- **Industrial** employment will grow by 5,785 employees, with 5,785 employees requiring buildable land. The average site of industrial employers in Tualatin in 2017 was 26 employees per business. At that average size, Tualatin will need 223 industrial sites. Exhibit 29 (in Chapter 4) shows that Tualatin has 697 sites for industrial development (with a total of 374 buildable acres of land). The majority of these sites (626 sites) are smaller than 0.5 acres. Tualatin has seven industrial sites between 10 and 20 acres and 2 industrial sites larger than 20 acres. These sites provide a range of sizes that may be needed by future industrial businesses in Tualatin.
- **Commercial** employment will grow by 6,805 employees, with 6,805 employees requiring buildable land. The average site of commercial employers in Tualatin in 2017 was 13 employees per business. At that average size, Tualatin will need 511 commercial sites. Exhibit 29 (in Chapter 4) shows that Tualatin has 149 sites for commercial development (with a total of 10.5 buildable acres of land). The majority of these sites (143 sites) are smaller than 0.5 acres. Tualatin has four commercial sites between 0.5 and 1 acre, one

commercial site between 1 and 2 acres, and one commercial site between 2 and 5 acres. Limited available sites will affect commercial development in Tualatin.

The potential growth industries described in the prior section are a mixture of business sizes, from small businesses to larger businesses. For the most part, Tualatin's potential growth industries need relatively flat sites, especially for industrial or manufacturing businesses with access to arterial roads to connect with I-5 or key employment centers in Beaverton, Hillsboro, and Portland.

Manufacturing and other industrial businesses that are likely to locate in Tualatin will have a range of space needs:

- **Small-scale manufacturing spaces.** Businesses would be located in an industrial building with many other users.
- **Space in flex-service buildings.** These businesses may locate in a building that includes other industrial businesses, as well as commercial businesses that prefer to locate in flex space buildings. Per a 2019 discussion with GPI, we find that vacancy rates in flex-service buildings are exceptionally low compared to more traditional employment spaces.
- **Mid-sized manufacturing**. Businesses would be located potentially in a building with a few other businesses. Between 2015 and 2019, Greater Portland Inc. (GPI) reported manufacturing projects in its pipeline that requested an average square footage between 35,000 square feet (approximately two to four-acre sites) and 118,000 square feet (approximately eight to 10-acre sites).[19] Average space needs (per square foot) have increased each year, between 2015 and 2019.

Retail, office, and commercial service businesses have a range of space needs ranging from:

- **Small- or mid-sized space**. Between 2015 and 2019, on average, GPI reported office projects seeking sites that range from about 14,045 square feet to about 39,000.
- **Space in a building dominated by one firm or in a building with many other businesses**. Some commercial employment will locate in a newly constructed building with other commercial businesses of all types. This could potentially be with other commercial (or light industrial) uses in the building. Other businesses may require or desire their own space.
- **Land for construction of a building designed for the firm.** However, in the case where the business needs to build a building, they are typically seeking existing space rather than land to build a new facility.

[19] Greater Portland Inc. (May 2019). "Almost Mid-Year Pipeline Analysis."

Overall, of the businesses included in GPI's 2019 pipeline analysis—both office and manufacturing projects consistently requested existing space over "greenfield" space for their facility. In 2019, about 33% requested either greenfield space, up from 21% in 2017.

4. Buildable Lands Inventory

This chapter provides a summary of the commercial and industrial buildable lands inventory (BLI) for the Tualatin Planning Area. The buildable lands inventory analysis complies with Statewide Planning Goal 9 policies that govern planning for employment uses. The detailed methodology used to complete the buildable lands inventory completed is presented in Appendix B.

The analysis established the employment land base (parcels or portions of parcels with appropriate zoning), classified parcels by buildable status, identified/deducted environmental constraints, and summarized total buildable area by Plan Designation.

Definitions

ECONorthwest developed the buildable lands inventory with a tax lot database from Metro Regional Land Information Systems (RLIS). Maps produced for the buildable lands inventory used a combination of GIS data based on the Metro BLI for the 2018 Urban Growth Report, adopted maps, and used visual verification to verify the accuracy of Metro data. The tax lot database is current as of 2016, accounting for changes and development updates through April 2019. The inventory builds from the database to estimate buildable land per Plan Designations that allow employment uses. The following definitions were used to identify buildable land for inclusion in the inventory:

- *Vacant land.* Tax lots designated as vacant by Metro based on the following criteria: (1) fully vacant based on Metro aerial photo; (2) tax lots with less than 2,000 square feet developed and the developed area is less than 10% of lot; and (3) lots 95% or more vacant from GIS vacant land inventory.
- *Partially vacant land.* Tax lots located on land designated for employment uses but have an existing single-family structure. These lots are assumed to likely develop with an employment use within the planning period.
- *Potentially redevelopable land.* Lots determined to have redevelopment capacity based on Metro's threshold price methodology. This method identifies lots that meet size and price thresholds based on location in the Metro UGB and Plan Designation. The methods use property value thresholds where it is economically viable for a lot to redevelop. For example, if the unconstrained area of tax lot in a central commercial Plan Designation is greater than 0.249 acres, and the real market value per square foot is below $12, then the unconstrained acreage is considered as potentially redevelopable.
- *Public or exempt land.* Lands in public or semi-public ownership are considered unavailable for commercial or industrial development. This includes lands in federal, state, county, or city ownership as well as lands owned by churches and

other semi-public organizations and properties with conservation easements. These lands are identified using Metro's definitions and categories.

- *Developed land*. Lands not classified as vacant, partially vacant, or public/exempt are considered developed. Developed land includes lots with redevelopment capacity, which are also included in BLI. The capacity of developed but redevelopable lots is based on Metro's estimates.

Development Constraints

Consistent with state guidance on buildable lands inventories, ECONorthwest deducted the following constraints from the buildable lands inventory and classified those portions of tax lots that fall within the following areas as constrained, unbuildable land:

- *Lands within floodplains*. Flood insurance rate maps from the Federal Emergency Management Agency (FEMA) were used to identify lands in floodways and 100-year floodplains, as well as lands identified in Metro's Title 3 Stream and Floodplain Protection Plan.
- *Land within natural resource protection areas*. The Locally Significant Wetlands shapefile was used to identify areas within wetlands. Riparian corridors and other natural resource areas identified in Tualatin's Natural Resource Protection Overlay District were all considered undevelopable. These areas are consistent with chapter 72 of the City's Development Code.
- *Land with slopes over 15%*. Lands with slopes over 15% are considered unsuitable for commercial or industrial development.

Buildable Lands Inventory Results

Land Base

Exhibit 24 shows commercial and industrial land in Tualatin by classification (development status). The results show that the Tualatin Planning Area has 2,731 total acres in commercial or industrial Plan Designations. Of these 2,731 acres, about 1,534 acres (56%) are classified as developed or public (or exempt) and do not have development capacity, about 683 acres (25%) are on lots classified as potentially redevelopable, and the remaining 514 acres (19%) are vacant or partially vacant and have development capacity (not including development constraints).

Vacant Buildable Land

Exhibit 26 shows buildable acres (e.g., acres in tax lots after constraints are deducted) for vacant and partially vacant land by Plan Designation. Of Tualatin's 385 unconstrained buildable commercial or industrial acres, about 82% of the land is in tax lots classified as vacant, and 18% is in tax lots classified as partially vacant. About 28% of Tualatin's buildable commercial and industrial land is located in the Basalt Creek Planning Area.

Exhibit 26. Buildable Acres in Vacant and Partially Vacant Tax Lots by Plan Designation and Zoning, Tualatin Planning Area, 2019

Exhibit 27. Commercial and Industrial Land by Development Status with Constraints, Tualatin Planning Area, 2019

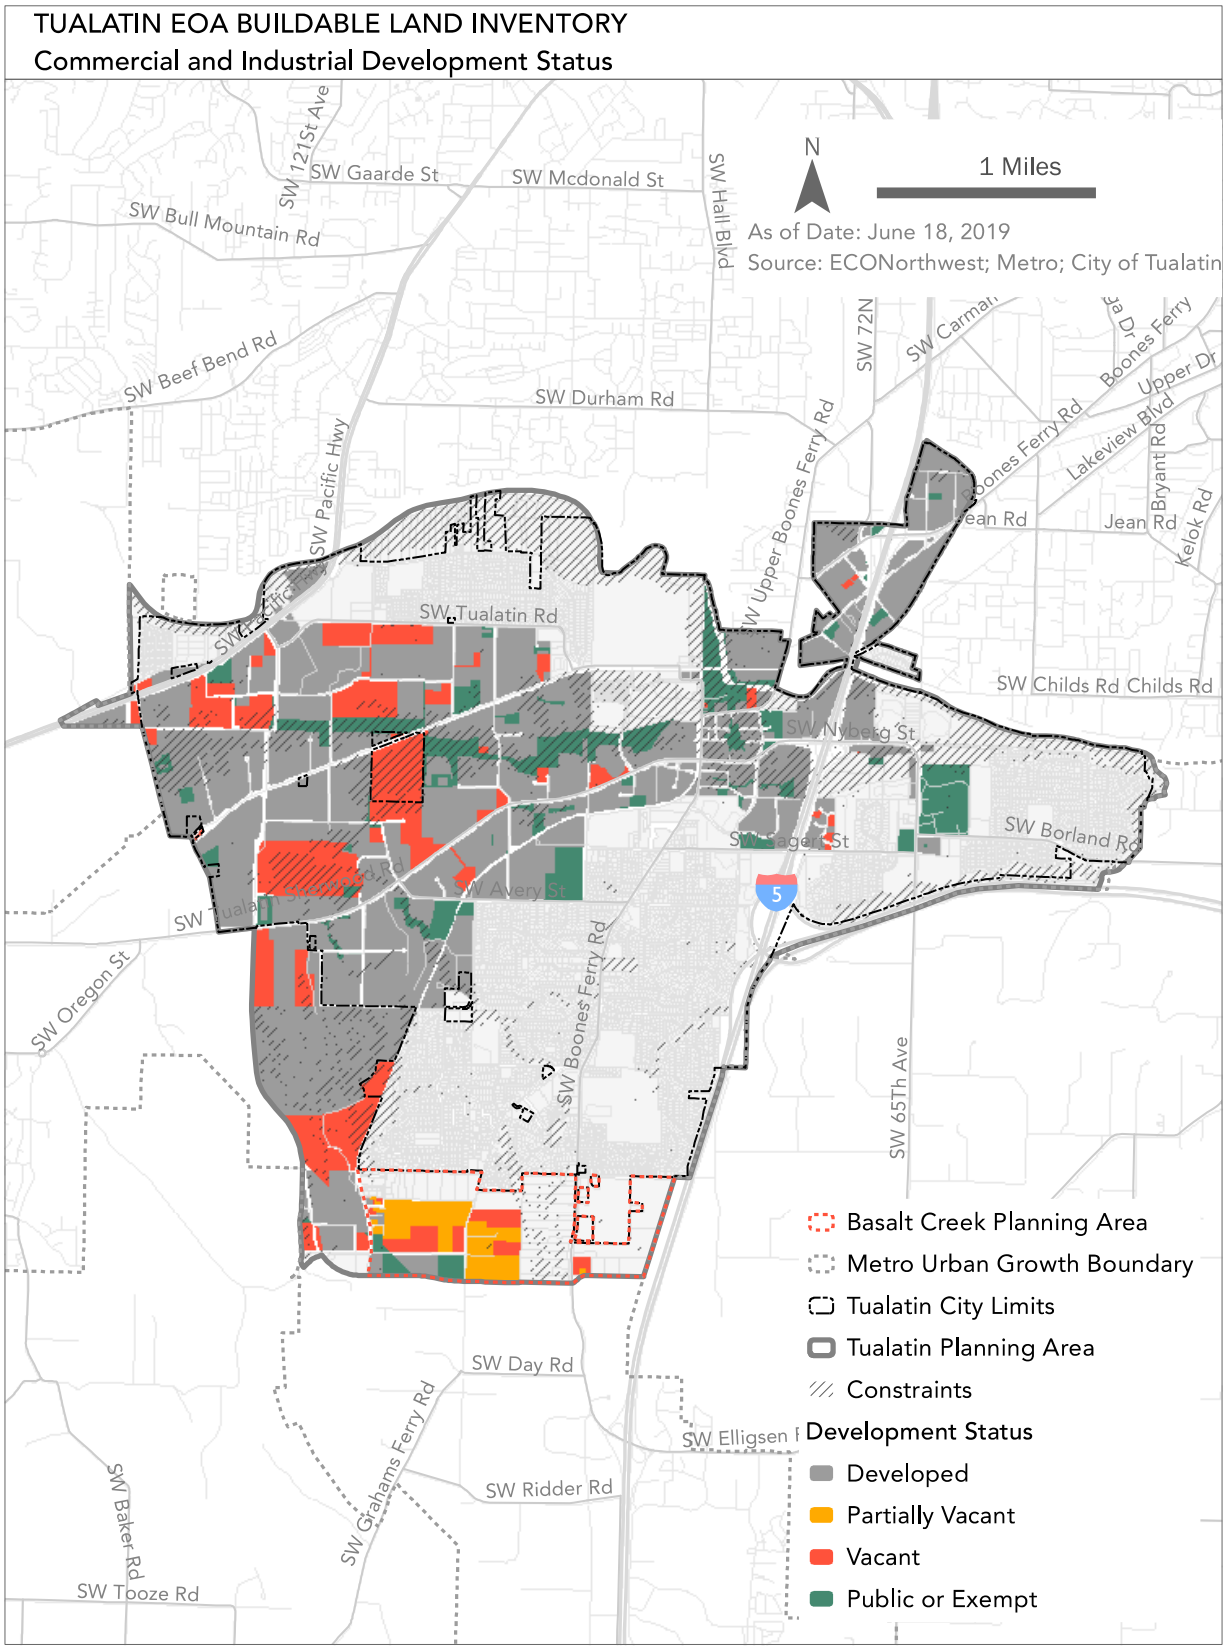

Exhibit 28. Unconstrained Vacant and Partially Vacant Commercial and Industrial Land, Tualatin Planning Area, 2019

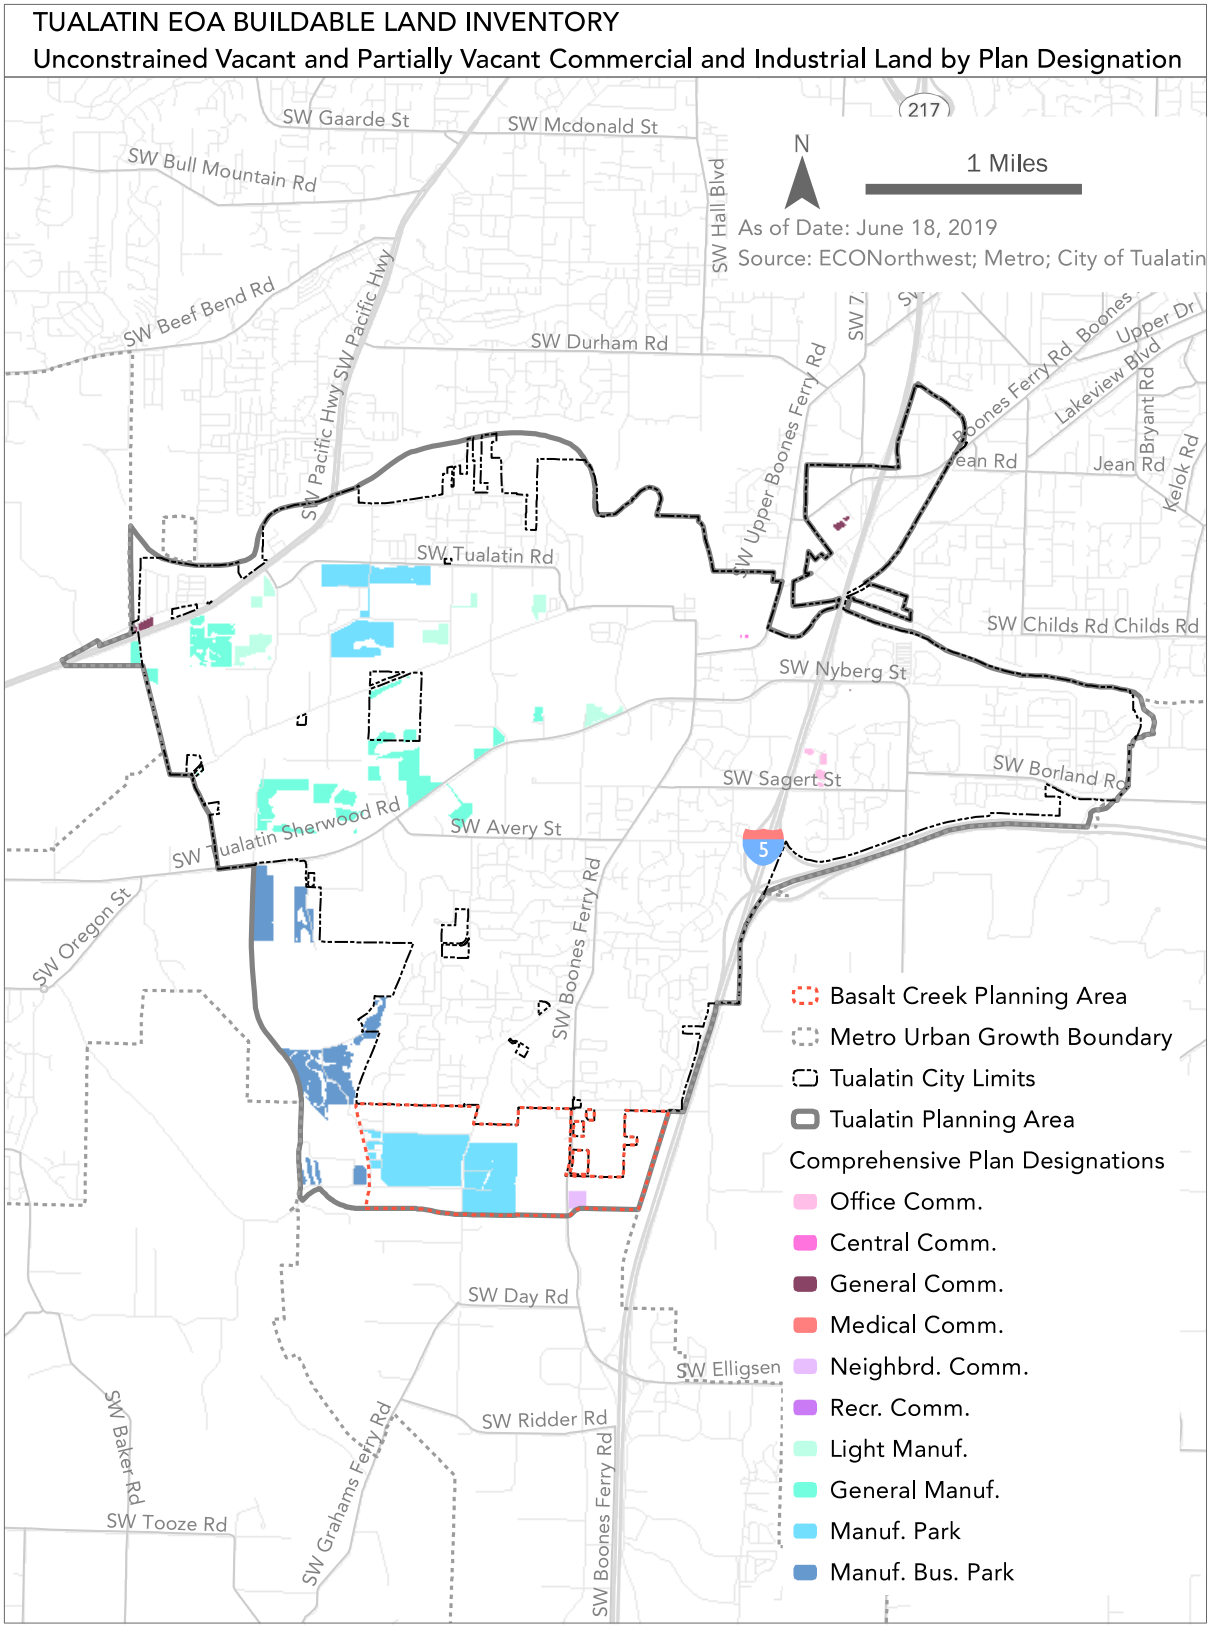

Exhibit 29 shows the size of lots by Plan Designations for buildable employment land. Tualatin has:

- 24 lots that are smaller than 0.5 acres (with 4.7 acres of land),
- 9 lots between 0.5 and 1 acres (6.3 acres of land),
- 13 lots between 1 and 2 acres (19.6 acres of land),
- 35 lots between 2 and 5 acres in size (132 acres of land),
- 11 lots between 5 and 10 acres in size (81 acres of land),
- 7 lots between 10 and 20 acres in size (95.5 acres of land), and
- 2 lots 20 acres or more in size (45.3 acres of land).

Redevelopment Potential

Over the 20-year study period a portion of developed lots are likely to redevelop within new buildings. To account for the development capacity on these developed lots, Metro identifies a subset of developed lots as "redevelopable." Metro has created two "filters" to identify lots with the potential to redevelop.

- **Threshold Method.** This method identifies lots that meet size and price thresholds based on location in the Metro UGB and Plan Designation. The method uses property value thresholds where it is economically viable for a lot to redevelop. For example, if the *unconstrained* area of a tax lot in a central commercial Plan Designation is greater than 0.249 acres, and the real market value per square foot is below $12, then the unconstrained acreage is considered as potentially redevelopable.[20]
- **Historic Probability Method.** This method determines the probably of a lot redeveloped based on a statistical analysis of lots that historically redeveloped within the region. The probability for each lot is multiplied by the total zoned capacity of the lot to determine the likely future capacity.

For the Tualatin BLI, ECONorthwest proposes to use redevelopable acreage identified based on the threshold method, a recommendation that is based on discussion with Metro staff. Exhibit 30Exhibit 11 shows the estimate of potentially redevelopable acreage by Plan Designation.

[20] "Appendix 2: Buildable Land Inventory." Oregon Metro. Urban Growth Report 2018. https://www.oregonmetro.gov/sites/default/files/2018/12/03/Appendix2-BuildableLandsInventory_12032018.pdf

Exhibit 30. Estimate of Potentially Redevelopable Land by Plan Designation, Tualatin Planning Area, 2019

Source: Metro BLI, using 2016 data to calculate redevelopment potential.

Generalized Plan Designation	Potentially Redevelopable Acres
Commercial	
Central Commercial	0
General Commercial	3
Medical Commercial	0
Neighborhood Commercial	0
Office Commercial	1
Recreational Commercial	0
Industrial	
General Manufacturing	135
Light Manufacturing	37
Manufacturing Business Park	71
Manufacturing Park	36
Mixed-Use Commercial Overlay Zone	
General Commercial	0
Central Tualatin Overlay Zone	
Central Commercial	0
General Commercial	0
Office Commercial	0
General Manufacturing	0
Light Manufacturing	0
Basalt Creek Planning Area	
Manufacturing Park	15
Neighborhood Commercial	0
Total	**297**

The analysis of redevelopment in Exhibit 30Exhibit 11 is based on analysis of existing land values (i.e., the threshold method). In considering likely commercial and industrial redevelopment that may occur over the next 20 years, stakeholders discussed the possibility of change of use (and redevelopment) of the gravel pit in the southwest area of the city, zoned Manufacturing Business Park. This area is classified as "committed" in the buildable lands inventory. The six tax lots in the gravel pit are a total size of 181 acres with about 47 constrained acres, mostly due to steep slopes and wetlands. When mining ceases in the gravel pit, which may or may not occur in the 20-year planning period, the gravel pit may be redevelopable and available for new employment uses.

5. Land Sufficiency and Conclusions

This chapter presents conclusions about Tualatin's employment land sufficiency for the 2020–2040 period. The chapter then concludes with a discussion about Tualatin's land base and its ability to accommodate growth over the next 20 years, as well as recommendations for the City to consider, ensuring it meets its economic growth needs throughout the planning period.

Land Sufficiency

Exhibit 31 shows commercial and industrial land sufficiency within the Tualatin Planning Area. It shows:

- **Capacity of Land** (supply) within the Tualatin Planning Area (see Exhibit 26). Exhibit 31 shows that Tualatin has 374 gross acres of industrial land and 11 gross acres of commercial land.
- **Demand for Commercial and Industrial Land** in the Tualatin Planning Area (see Exhibit 22 and Exhibit 23). Exhibit 31 shows Tualatin will need a total of 448 gross acres for industrial uses and 186 gross acres for commercial uses (including retail and office) over the 2020–2040 period.

Exhibit 31 shows that Tualatin has:

- A 74-acre deficit of industrial land in the Tualatin Planning Area.
- A 175-acre deficit of commercial land (including retail and office) in the Tualatin Planning Area.

Exhibit 31. Comparison of the Capacity of Land with Employment Land Demand by Land Use Type, Tualatin Planning Area, 2020–2040

Source: ECONorthwest. Note: Employment demand requires an additional 42 gross acres on land in residential Plan Designations and one gross acre on land in an institutional (public) Plan Designation.

General Plan Designation	Land Supply (Suitable Gross Acres)	Land Demand (Gross Acres)	Land Sufficiency (Deficit)
Industrial	374	448	(74)
Commercial (incl Retail and Office)	11	186	(175)

Conclusions and Recommendations

The conclusions about commercial and industrial land sufficiency in Tualatin are:

- **Tualatin is expected to have job growth in commercial and industrial sectors over the 20-year period.** Tualatin is forecast to grow by about 12,591 new employees (excluding new government employees) over the 2020–2040 period, with about 5,800 new industrial employees and 6,800 new employees in retail, office, and commercial services, with the remaining employees in government.
- **Tualatin has a deficit of land to accommodate new employment growth.** Tualatin has a deficit of about 74 acres of land in industrial Plan Designations and 175 acres of employment in commercial Plan Designations to accommodate employment. Tualatin will need to consider policies to increase the efficiency of employment land use within the city, such as policies to encourage denser employment development and redevelopment that results in higher-density development.
- **Tualatin has substantial redevelopment potential.** A majority of redevelopable lots are in industrial areas. For example, change of use (and redevelopment) of the gravel pit in the southwest area of the Manufacturing Business Park presents substantial redevelopment opportunities. The six tax lots in the gravel pit are a total size of 181 acres with about 47 constrained acres, mostly due to steep slopes and wetlands. When mining ceases in the gravel pit, which may or may not occur in the 20-year planning period, the gravel pit may be redevelopable and available for new employment uses.
- **Tualatin's primary comparative advantages for economic development are its location along the I-5 corridor and proximity to urban and cultural amenities/services in the Portland Region, making Tualatin an attractive place for businesses to locate.** Tualatin has advantages through its access to the regional labor market and the region's growing labor force comprising diverse skill sets.
- **Tualatin will need to address transportation capacity issues to accommodate growth, particularly along regional connectors (roads and avenues).** Traffic congestion is a substantial issue in Tualatin and surrounding areas, making it difficult to commute to Tualatin from other cities within the Portland Region and within Tualatin. Stakeholders are concerned that additional employment growth will make congestion substantially worse.
- **New employment will require additional urban infrastructure.** Growth in Basalt Creek will prompt the need for new pipes, pump stations, and potentially another reservoir to accommodate water and wastewater capacity demands in the sub-area. If Tualatin wishes to accommodate businesses that are more water-intensive, Tualatin will need to look to new or additional water supplies.

Following is a summary of ECONorthwest's recommendations to Tualatin based on the analysis and conclusions in this report. The *Tualatin Economic Development Strategy* memorandum presents the full list of recommendations for Tualatin.

- **Ensure that Tualatin has enough land to accommodate expected employment growth and that land has infrastructure to support employment growth.** Tualatin should identify opportunities to support mixed-use development (especially development that includes commercial and residential uses) to accommodate employment growth, especially commercial employment growth. The City should identify opportunities to make more efficient use of employment land, such as limiting development of businesses that have large land requirements and little employment (such as distribution). In addition, the City should work with landowners to get key employment sites certified as "shovel ready" to speed the development process.
- **Identify opportunities for redevelopment, especially mixed-use redevelopment.** The City has a substantial deficit of industrial and commercial land. The City may be able to address some or most of this deficit within the existing planning area (without a UGB expansion). To do so, the City should identify districts for redevelopment, such as mixed-use development. This planning includes revising the Tualatin Town Center Plan to focus on opportunities to support redevelopment, identify tools to support redevelopment, and identify areas appropriate for more intense industrial uses (e.g., redevelopment of the gravel pit in the southwest area of the city once mining activity has ceased).
- **Grow jobs and businesses in Tualatin by supporting business retention, growth, and attraction.** The first step in growing jobs and businesses in Tualatin is revising the economic development strategy, including developing a clear vision for economic development in Tualatin, and creating an action plan to implement the vision. The revised strategy can build on the *Tualatin Economic Development Strategy* produced as part of this analysis, but the revised strategy should include a detailed action plan to implement the newly developed vision for economic development. In revising the strategy, the City should identify partnerships and incentive programs to grow, retain, and attract businesses as well as support entrepreneurial businesses in Tualatin.
- **Ensure that the City connects planning for economic development with other community planning.** Throughout the project, stakeholders emphasized the need to coordinate economic development planning with housing, transportation planning, and other community planning. Updates to the Tualatin Transportation System Plan should be coordinated with planning for employment and business growth. A key approach to accommodating new commercial development is redevelopment that results in mixed-use districts, providing opportunities for more housing affordable to people working at businesses in Tualatin and living closer to work (thus reducing transportation issues). In addition, stakeholders would like to see the incorporation of services needed to meet daily needs of residents of neighborhoods without driving.

The *Tualatin Economic Development Strategy* memorandum presents more details about each of these topics and recommendations for specific actions to implement these recommendations.

Appendix A. National, State, and Regional and Local Trends

National Trends

Economic development in Tualatin over the next 20 years will occur in the context of long-run national trends. The most important of these trends include:

- **Economic growth will continue at a moderate pace**. Analysis from the Congressional Budget Office (CBO) predicts real GDP to grow by 3.1% in 2018 and 2.4% in 2019, while settling just under 2% growth for the rest of the decade (through 2028), assuming current laws remain intact.[21]

  The unemployment rate is expected to decrease to 3.6% by the end of 2018 and fall to 3.4% in 2019. Thereafter, the CBO predicts the unemployment rate will rise to 3.8% in 2020 and approach 4.8% through the end of the forecast period (2028).[22]

  As demand for labor increases and market competition for workers pushes the growth of hourly wage compensation, the CBO projects that "the increase in labor compensation, [will dampen] demand for labor, slowing employment growth and, by 2020, diminishing the positive employment gaps."[23]

- **The aging of the Baby Boomer generation accompanied by increases in life expectancy.** As the Baby Boomer generation continues to retire, the number of Social Security recipients is expected to increase from 61 million in 2017 to over 86 million in 2035, a 41% increase. However, due to lower-birth rate replacement generations, the number of covered workers is only expected to increase 9% over the same time period, from 174 million to almost 190 million in 2035. Currently, there are 35 Social Security beneficiaries per 100 covered workers in 2014, but by 2035, there will be 46 beneficiaries per 100 covered workers. This will increase the percent of the federal budget dedicated to Social Security and Medicare.[24]

  Baby Boomers are expecting to work longer than previous generations. An increasing proportion of people in their early- to mid-50s expect to work full-time after age 65. In 2004, about 40% of these workers expect to work full-time after age 65, compared with

[24] The Board of Trustees, Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds, 2015, the *2018 Annual Report of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds*, June 5, 2018. Retrieved from: https://www.ssa.gov/oact/tr/2018/tr2018.pdf.

about 30% in 1992.[25] This trend can be seen in Oregon, where the share of workers 65 years and older grew from 2.9% of the workforce in 2000 to 4.1% of the workforce in 2010. In 2017, this share reached 5.5%, or a 90% increase over the 2000–2017 period. Over the same seventeen-year period, workers 45 to 64 years increased by about 7%.[26]

- **The population identifying as Latinx will continue to grow and be an important driver in the economy.** The U.S. Census projects that by about 2040, the Latinx population will account for one-quarter of the nation's population. The share of Latinx population in the western United States is likely to be higher. The Latinx population currently accounts for about 16% of Tualatin's population. In addition, the Latinx population is generally younger than the U.S. average, with many Latinx individuals belonging to the Millennial generation.
- **Need for replacement workers.** The need for workers to replace retiring Baby Boomers will outpace job growth. According to the Bureau of Labor Statistics, total employment in the United States will grow by about 11.5 million jobs over 2016 to 2026. Annually, they estimate there will be 18.7 million occupational openings over the same period. This exhibits the need for employees over the next decade, as the quantity of openings per year is large relative to expected employment growth. About 71% of annual job openings are in occupations that do not require postsecondary education.[27]
- **The importance of education as a determinant of wages and household income.** According to the Bureau of Labor Statistics, a majority of the fastest growing occupations will require an academic degree, and on average, they will yield higher incomes than occupations that do not require an academic degree. The fastest-growing occupations requiring an academic degree will be registered nurses, software developers, general and operations managers, accountants and auditors, market research analysts and marketing specialists, and management analysts. Occupations that do not require an academic degree (e.g., retail salespeople, food preparation workers, and home care aides) will grow, accounting for approximately 71% of all new jobs by 2026. These occupations typically have lower pay than occupations requiring an academic degree.[28]

  The national median income for people over the age of 25 in 2017 was about $47,164. Workers without a high school diploma earned $20,124 less than the median income, and workers with a high school diploma earned $10,140 less than the median income. Workers with some college earned $6,916 less than median income, and workers with a bachelor's degree earned $13,832 more than median. Workers in Oregon experience the

[28] "Occupational Employment Projections to 2016–2026," Bureau of Labor Statistics, 2018.

same patterns as the nation, but pay is generally lower in Oregon than the national average.[29]

- **Increases in labor productivity.** Productivity, as measured by output per hour of labor input, increased in most sectors between 2000 and 2010, peaking in 2007. However, productivity increases were interrupted by the recession. After productivity decreases from 2007 to 2009, many industries saw large productivity increases from 2009 to 2010. Industries with the fastest productivity growth were information technology–related industries. These include wireless telecommunications carriers, computer and peripheral equipment manufacturing, electronics and appliance stores, and commercial equipment manufacturing wholesalers.[30]

  Since the end of the recession (or 2010), labor productivity has increased across a handful of large sectors but has also decreased in others. In wholesale trade, productivity—measured in output per hour—increased by 19% over 2009 to 2017. Retail trade gained even more productivity over this period at 25%. Food services, however, have remained stagnant since 2009, fluctuating over the nine-year period and shrinking by 0.01% over this time frame. Additionally, the Bureau of Labor Statistics reports that multifactor productivity in manufacturing has been slowing down 0.3% per year over the 2004–2016 period. Much of this, they note, is due to slowdown in semiconductors, other electrical component manufacturing, and computer and peripheral equipment manufacturing.[31]

- **The importance of entrepreneurship and growth in small businesses.** According to the 2018 Small Business Profile from the US Small Business Office of Advocacy, small businesses account for over 99% of total businesses in the United States, and their employees account for nearly 50% of American workers.[32] The National League of Cities suggests ways that local governments can attract entrepreneurs and increase the number of small businesses, including strong leadership from elected officials; better communication with entrepreneurs, especially about the regulatory environment for businesses in the community; and partnerships with colleges, universities, small business development centers, mentorship programs, community groups, businesses groups, and financial institutions.[33]

- **Increases in automation across sectors.** Automation is a long-running trend in employment, with increases in automation (and corresponding increases in productivity) over the last century and longer. The pace of automation is increasing, and the types of jobs likely to be automated over the next 20 years (or longer) is broadening. Lower-paying jobs are more likely to be automated, with potential for automation of more than 80% of jobs paying less than $20 per hour over the next 20 years. About 30% of jobs paying $20 to $40 per hour and 4% of jobs paying $40 or more are at risk of being automated over the next 20 years.[34]

  Low- to middle-skilled jobs that require interpersonal interaction, flexibility, adaptability, and problem solving will likely persist into the future, as will occupations in technologically lagging sectors (e.g., production of restaurant meals, cleaning services, hair care, security/protective services, and personal fitness).[35] This includes occupations such as recreational therapists; first-line supervisors of mechanics, installers, and repairers; emergency management directors; mental health and substance abuse social workers; audiologists; occupational therapists; orthotists and prosthetists; health-care social workers; oral and maxillofacial surgeons; and first-line supervisors of firefighting and prevention workers. Occupations in the service and agricultural or manufacturing industry are most at risk of automation because of the manual-task nature of the work.[36,37,38] This includes occupations such as telemarketers; title examiners, abstractors, and searchers; hand sewers; mathematical technicians; insurance underwriters; watch repairers; cargo and freight agents; tax preparers; photographic process workers and processing machine operators; and accounts clerks.[39]

- **Consolidation of Retail.** Historical shift in retail businesses, starting in the early 1960s, was the movement from one-off mom-and-pop shops toward superstores and the clustering of retail into centers or hubs. Notably, we still see this trend persist. For example, in 1997, the 50 largest retail firms accounted for about 26% of retail sales, and by 2007, they accounted for about 33%.[40] The more recent shift began in the late 1990s, where technological advances have provided consumers with the option to buy goods through e-commerce channels. The trend toward e-commerce has become increasingly

preferential to Millennials and Generation Xers, who are easier to reach online and are more responsive to digital ads than older generations.[41] Since 2000, e-commerce sales have grown from 0.9% to 6.4% (2014) and are forecast to reach 12% by 2020. It is reasonable to expect this trend to continue. With it has come closures of retail stores. By 2027, for example, an estimated 15% of about 1,050 U.S. malls in smaller markets will close, impacting local employment levels, local government revenue streams (tax dollars), and neighborhood character.

While it is unclear what impact e-commerce will have on employment and brick-and-mortar retail, it seems probable that e-commerce sales will continue to grow, shifting business away from some types of retail. Over the next decades, communities must begin considering how to redevelop and reuse retail buildings in shopping centers, along corridors, and in urban centers.

The types of retail and related services that remain will likely be sales of goods that people prefer to purchase in person or that are difficult to ship and return (e.g., large furniture), specialty goods, groceries and personal goods that maybe needed immediately, restaurants, and experiences (e.g., entertainment or social experiences).

- **The importance of high-quality natural resources.** The relationship between natural resources and local economies has changed as the economy has shifted away from resource extraction. High-quality natural resources continue to be important in some states, especially in the western United States. Increases in the population and in household incomes, plus changes in tastes and preferences, have dramatically increased demand for outdoor recreation, scenic vistas, clean water, and other resource-related amenities. Such amenities contribute to a region's quality of life and play an important role in attracting both households and firms.[42]
- **Continued increase in demand for energy.** Energy prices are forecast to increase over the planning period. While energy use per capita is expected to decrease through 2050, total energy consumption will increase with rising population. Energy consumption is expected to grow primarily from industrial (0.9%) and, to a lesser extent, commercial users (0.4%). Residential consumption is forecast to stagnate (0.0%), and transportation will slightly decrease (-0.1%). This decrease in energy consumption for transportation is primarily due to increased federal standards and increased technology for energy efficiency in vehicles. Going forward through the projection period, potential changes in federal laws (such as decreases in car emissions) leave energy demand somewhat uncertain.

"Natural Amenities and Rural Development: Understanding Spatial and Distributional Attributes." *Growth and Change* 36 (2): 273–297.

Energy consumption by type of fuel is expected to change over the planning period. In 2050, the United States will be continuing to shift from crude oil toward natural gas and renewables. For example, from 2017 to 2050, the Energy Information Administration projects that the United States' overall energy consumption will average a 0.4% annual growth rate, while consumption of renewable sources will grow by 1.4% per year. With increases in energy efficiency, strong domestic production of energy, and relatively flat demand for energy by some industries, the United States will be able to be a net exporter of energy over the 2017–2050 period. Demand for electricity is expected to increase, albeit slowly, over the 2017–2050 period as the population grows and economic activity increases.[43]

- **Impact of rising energy prices on commuting patterns.** As energy prices increase over the planning period, energy consumption for transportation will decrease. These increasing energy prices may decrease willingness to commute long distances, though with expected increases in fuel economy, it could be that people commute further while consuming less energy.[44] Over 2019 to 2035, the U.S. Energy Information Administration estimates that the decline in transportation energy consumption, a result of increasing fuel economy, will more than offset the total growth in vehicle miles traveled (VMT). VMT for passenger vehicles is forecast to increase through 2050.
- **Potential impacts of global climate change.** The consensus among the scientific community that global climate change is occurring expounds important ecological, social, and economic consequences over the next decades and beyond.[45] Extensive research shows that Oregon and other western states already have experienced noticeable changes in climate and predicts that more change will occur in the future.[46]

  In the Pacific Northwest, climate change is likely to (1) increase average annual temperatures, (2) increase the number and duration of heat waves, (3) increase the amount of precipitation falling as rain during the year, (4) increase the intensity of rainfall events, (5) increase sea level, (6) increase wildfire frequency, and (7) increase

forest vulnerability to tree disease.[47] These changes are also likely to reduce winter snowpack and shift the timing of spring runoff earlier in the year.[48]

These anticipated changes point toward some of the ways that climate change is likely to impact ecological systems and the goods and services they provide. There is considerable uncertainty about how long it would take for some of the impacts to materialize and the magnitude of the associated economic consequences. Assuming climate change proceeds as today's models predict, however, some of the potential economic impacts of climate change in the Pacific Northwest will likely include:[49]

- *Potential impact on agriculture and forestry.* Climate change may impact Oregon's agriculture through changes in growing season, temperature ranges, and water availability.[50] Climate change may impact Oregon's forestry through an increase in wildfires, a decrease in the rate of tree growth, a change in the mix of tree species, and increases in diseases and pests that damage trees.[51]
- *Potential impact on tourism and recreation.* Impacts on tourism and recreation may range from (1) decreases in snow-based recreation if snow-pack in the Cascades decreases, (2) negative impacts to tourism along the Oregon Coast as a result of damage and beach erosion from rising sea levels,[52] (3) negative impacts on availability of summer river recreation (e.g., river rafting or sports fishing) as a result of lower summer river flows, and (4) negative impacts on the availability of water for domestic and business uses.

[49] The issue of global climate change is complex, and there is a substantial amount of uncertainty about climate change. This discussion is not intended to describe all potential impacts of climate change but to present a few ways that climate change may impact the economy of cities in Oregon and the Pacific Northwest.

[50] "The Economic Impacts of Climate Change in Oregon: A Preliminary Assessment," Climate Leadership Initiative, Institute for Sustainable Environment, University of Oregon, October 2005.

[51] "Economic Impacts of Climate Change on Forest Resources in Oregon: A Preliminary Analysis," Climate Leadership Initiative, Institute for Sustainable Environment, University of Oregon, May 2007.

[52] "The Economic Impacts of Climate Change in Oregon: A Preliminary Assessment," Climate Leadership Initiative, Institute for Sustainable Environment, University of Oregon, October 2005.

Short-term national trends will also affect economic growth in the region, but these trends are difficult to predict. At times, these trends may run counter to the long-term trends described above. A recent example is the downturn in economic activity in 2008 and 2009 following declines in the housing market and the mortgage banking crisis. The result of the economic downturn was decreases in employment related to the housing market, such as construction and real estate. As these industries recover, they will continue to play a significant role in the national, state, and local economy over the long run. This report takes a long-run perspective on economic conditions (as the Goal 9 requirements intend) and does not attempt to predict the impacts of short-run national business cycles on employment or economic activity.

State Trends

Short-Term Trends

According to the Oregon Office of Economic Analysis (OEA), the Oregon economy "continues to hit the sweet spot."[53] They also report, "job gains are enough to match population growth and absorb the workers coming back into the labor market. Wages are rising faster than in the typical state, as are household incomes."[54] Though they note recent growth is slower than growth experienced several years ago.

Wages in Oregon continue to remain below the national average, but they are at their highest since the early 1980s. The OEA reports that new Oregon Employment Department research "shows that median hourly wage increases for Oregon workers since 2014 has been 3.1 percent annually for the past three years."[55] These wage increases are "substantially stronger for the Oregonians who have been continually employed over the last three years."[56]

By the end of 2018, the OEA forecasts 41,700 jobs will be added to Oregon's economy. This is an approximate 2.2% annual growth in total nonfarm employment relative to 2017 levels.[57] The leisure and hospitality, construction, professional and business services, and health services industries are forecast to account for well over half of the total job growth in Oregon for 2018. Oregon continues to have an advantage in job growth compared to other states, due to its industrial sector and in-migration flow of young workers in search of jobs.

The housing market continues to recover as Oregon's economy improves. Oregon is seeing an increase in household formation rates, which is good for the housing market, as this will "help drive up demand for new houses."[58] Though younger Oregonians are tending to live at home

[53] Office of Economic Analysis. Oregon Economic and Revenue Forecast, September 2018. Vol. XXXVIII, No. 3, page 2.

[54] *Ibid*, page 2.

[55] *Ibid*, page 5.

[56] *Ibid*, page 5.

[57] *Ibid*, page 13.

[58] *Ibid*, page 13.

with their parents longer, the aging Millennial generation (from their early 20s to mid-to-late 30s) and the state's increase in migration will drive demand for homes in the coming years. Housing starts in 2018 are on track to just under 22,000 units annually. This is "driven in large part by a decline in multifamily permit activity."[59] Through 2020, the OEA forecasts moderate to strong housing growth. Beyond this time frame, the OEA forecasts an average growth of 24,000 units per year to satisfy the demand for Oregon's growing population and to make up for the under development of housing post-recession.[60]

The Oregon Index of Leading Indicators (OILI) has grown quite rapidly since January 2017. The leading indicators showing improvement are consumer sentiment, industrial production, initial claims, the manufacturing purchasing managers index (PMI), new incorporations, semiconductor billings, and withholdings. The indicators that are slowing include air freight and the Oregon Dollar Index, and the indicators not improving include help wanted ads and housing permits.[61]

Oregon's economic health is dependent on the export market. The value of Oregon exports in 2017 was $21.9 billion. The countries that Oregon exports the most to are China (18% of total Oregon exports), Canada (11%), Malaysia (11%), South Korea (9%), Japan (8%), and Vietnam (7%).[62] With straining trade relations overseas, specifically with China, Oregon exports are left potentially vulnerable, as China is a top destination for Oregon exports.[63] An economic slowdown across many parts of Asia will have a spillover effect on the Oregon economy. Furthermore, with the United States' withdrawal from the Trans-Pacific Partnership in January 2017, it is unclear how much Pacific Northwest trade will be impacted in the years to come.

Long-Term Trends

State, regional, and local trends will also affect economic development in Tualatin over the next 20 years. The most important of these trends includes continued in-migration from other states, distribution of population and employment across the state, and change in the types of industries in Oregon.

- **Continued in-migration from other states.** Oregon will continue to experience in-migration (more people moving to Oregon than from Oregon) from other states, especially California and Washington. From 1990 to 2017, Oregon's population increased by about 1.3 million, 66% of which was from people moving into Oregon (net migration). The average annual increase in population from net migration over the same time period was just over 33,200. During the early to mid-1990s, Oregon's net migration

[59] *Ibid*, page 13.

[63] Office of Economic Analysis. Oregon Economic and Revenue Forecast, September 2018. Vol. XXXVIII, No. 3, page 14.

was highest, reaching over 60,000 in 1991, with another smaller peak of almost 42,100 in 2006. In 2017, net migration reached just over 56,800 persons. Oregon has not seen negative net migration since the early to mid-1980s.[64] Oregon's population has continued to get more ethnically and racially diverse, with Latinx populations growing from 8% of the population in 2000 to 13% of the population in 2013–2017. The nonwhite population grew from 13% of the population to 15% of the population over the same period. The share of Latinx population increased in Tualatin from 2000 to 2013–2017 while the share of the nonwhite population stayed the same.

- **Forecast of job growth.** Total nonfarm employment is expected to increase from 1.91 million in 2018 to just over 1.99 million in 2022, an increase of 80,000 jobs. The industries with the largest growth are forecast to be professional and business services, health services, and retail, accounting for 61% of employment growth.[65]
- **Continued importance of manufacturing to Oregon's economy.** Oregon's exports totaled $19.4 billion in 2008, nearly doubling since 2000, and reached almost $22 billion in 2017. The majority of Oregon exports go to countries along the Pacific Rim, with China, Canada, Malaysia, South Korea, and Japan as top destinations. Oregon's largest exports are tied to high-tech and mining industries, as well as agricultural products.[66] Manufacturing employment is concentrated in five counties in the Willamette Valley or Portland area: Washington, Multnomah, Lane, Clackamas, and Marion Counties.[67]
- **Shift in manufacturing from natural resource-based to high-tech and other manufacturing industries.** Since 1970, Oregon has been transitioning away from reliance on traditional resource-extraction industries. A significant indicator of this transition is the shift within Oregon's manufacturing sector, with a decline in the level of employment in the lumber and wood products industry and the concurrent growth of employment in other manufacturing industries, such as high-tech manufacturing (industrial machinery, electronic equipment, and instruments), transportation equipment manufacturing, and printing and publishing.[68]
- **Income.** Oregon's income and wages are below that of a typical state. However, mainly due to the wage growth over the last two to three years, Oregon wages are at their highest point relative to other states since the recession in the early 1980s. In 2017, the

[64] Portland State University Population Research Center. 2017 Annual Population Report Tables. April 2017. Retrieved from: https://www.pdx.edu/prc/population-reports-estimates.

[65] Office of Economic Analysis. Oregon Economic and Revenue Forecast, September 2018. Vol. XXXVIII, No. 3, page 38.

[67] Oregon Employment Department. *Employment and Wages by Industry (QCEW)*. 2017 Geographic Profile, Manufacturing (31–33). Retrieved from: qualityinfo.org.

[68] Although Oregon's economy has diversified since the 1970s, natural resource-based manufacturing accounts for about 38% of employment in manufacturing in Oregon in 2017, with the most employment in food manufacturing (nearly 30,000) and wood product manufacturing (nearly 23,000) (QCEW).

average annual wage in Oregon was $51,117 and the median household income was $60,212 (compared to national average wages of $53,621 in 2017 and the national household income of $60,336).[69] Total personal income (all classes of income minus Social Security contributions and adjusted for inflation) in Oregon is expected to increase by 22%, from $202.2 billion in 2018 to $247.5 billion in 2022.[70] Per capita income is expected to increase by 16% over the same time period, from $48,000 (thousands of dollars) in 2018 to $55,800 in 2022 (in nominal dollars).[71]

- **Small businesses continue to account for a large share of employment in Oregon**. While small firms played a large part in Oregon's expansion between 2003 and 2007, they also suffered disproportionately in the recession and its aftermath (64% of the net jobs lost between 2008 and 2010 was from small businesses).

  In 2017 small businesses (those with 100 or fewer employees) accounted for 95% of all businesses and 66% of all private-sector employment in Oregon. Said differently, most businesses in Oregon are small (in fact, 78% of all businesses have fewer than 10 employees), but the largest share of Oregon's employers work for large businesses.

  The average annualized payroll per employee for small businesses was $37,149 in 2015, which is considerably less than that for large businesses ($54,329) and the statewide average for all businesses ($47,278).[72] Younger workers are important to continue growth of small businesses across the nation. More than one-third of Millennials (those born between 1980 and 1999) are self-employed, with approximately one-half to two-thirds interested in becoming an entrepreneur. Furthermore, in 2011, about 160,000 start-up companies were created each month; 29% of these companies were founded by people between 20 and 34 years of age.[73]

- **Entrepreneurship in Oregon.** The creation of new businesses is vital to Oregon's economy, as their formations generate new jobs and advance new ideas and innovations into markets. They also can produce more efficient products and services to better serve local communities. According to the Kauffman Index, Oregon ranked thirteenth in the country in 2017 for its start-up activity, a measurement comprised of three statistics: rate

[69] Average annual wages are for "all industries," which includes private and public employers. Oregon Quarterly Census of Employment and Wages, 2017. Retrieved from: https://www.qualityinfo.org; Bureau of Labor Statistics, Quarterly Census of Employment and Wages, 2017; Total, U.S. Census American Community Survey 1-Year Estimates, 2017, Table B19013.

[73] Cooper, Rich, Michael Hendrix, Andrea Bitely. (2012). "The Millennial Generation Research Review." Washington, DC: The National Chamber Foundation. Retrieved from: https://www.uschamberfoundation.org/sites/default/files/article/foundation/MillennialGeneration.pdf.

of new entrepreneurs, opportunity share of new entrepreneurs, and start-up density.[74] This ranking is higher than its 2016 position at spot fifteen. Oregon's rate of new entrepreneurs (the percent of adults that became an entrepreneur in a given month) was in steady decline post-recession, but since 2013, it has gradually recovered to about 0.34% in 2016. This rate is still well below Oregon's pre-recession peak of 0.43% in 2000, but its recent growth broadly exhibits that business ownership and formation is increasing.

Moreover, in 2018, the Oregon Office of Economic Analysis reported that new business applications in Oregon are increasing. They do, however, simultaneously note that start-up businesses "are a smaller share of all firms than in the past."[75] Though this measurement of economic activity does not constitute a full understanding of how well entrepreneurship is performing, it does provide an encouraging signal.

Regional and Local Trends

Throughout this section, Tualatin is compared to Washington County, the Portland region, and the State of Oregon. These comparisons provide context for changes in Tualatin's socioeconomic characteristics.

Availability of Labor

A skilled and educated populace can attract well-paying businesses and employers and spur the benefits that follow from a growing economy. Key trends that will affect the workforce in Tualatin over the next 20 years include growth in its overall population, growth in the senior population, and commuting trends.

Growing Population

Population growth in Oregon tends to follow economic cycles. Oregon's population grew from about 2.8 million people in 1990 to 4.0 million people in the 2013–2017 period, an increase of almost 1.2 million people, at an average annual rate of 1.3%. Oregon's growth rate slowed to 1.0% annual growth between 2000 and 2017.

Tualatin's population increased over the 1990 to 2013–2017 period, by 12,122 residents. Washington County's population also grew over the same time, by 260,517 residents, at a similar rate of growth as Tualatin.

					Change 1990 to 2013-2017		
	1990	2000	2010	2013-2017	Number	Percent	Growth Rate
U.S.	248,709,873	281,421,906	308,745,538	321,004,407	72,294,534	29%	0.9%
Oregon	2,842,321	3,421,399	3,831,074	4,025,127	1,182,806	42%	1.3%
Portland Region	1,174,291	1,444,219	1,641,036	1,760,492	586,201	50%	1.5%
Washington County	311,554	445,342	529,710	572,071	260,517	84%	2.3%
Tualatin	15,013	22,791	26,054	27,135	12,122	81%	2.2%

Age Distribution

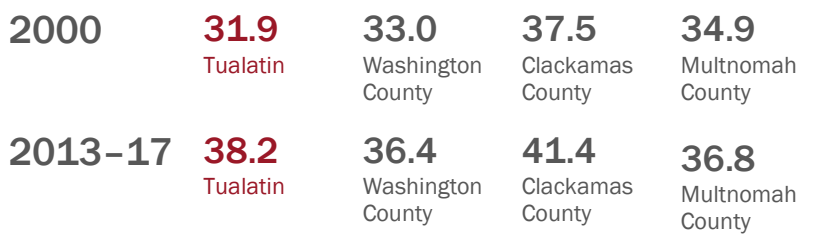
The number of people aged 65 and older in the United States is expected to increase by nearly three-quarters by 2050, while the number of people under age 65 will only grow by 16%. The economic effects of this demographic change include the slowing of labor force growth, the need for workers to replace retirees, and the aging of the workforce for seniors that continue working after age 65, as well as an increase in the demand for health-care services and an increase in the percent of the federal budget dedicated to Social Security and Medicare.[76]

Between 2000 and the 2013–2017 period, Tualatin grew older on average (6.3 years).

This increase suggests Tualatin attracted more workers in their later adult lives.

Exhibit 33. Median Age, Tualatin, Washington County, Clackamas County, Multnomah County, 2000 to 2013–2017

Source: U.S. Census Bureau, 2000 Decennial Census, Table P013; American Community Survey 2013–2017 5-year estimates, Table B01002.



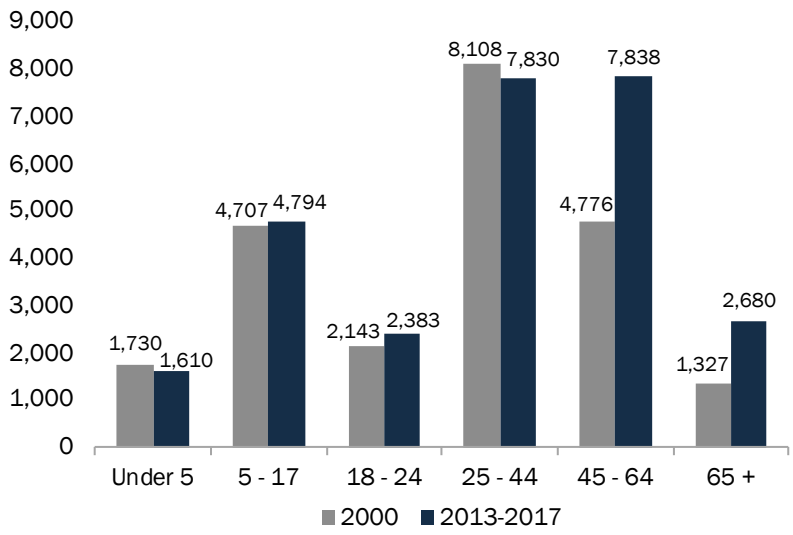
[76] The Board of Trustees, Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds, 2017, the *2017 Annual Report of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds*, July 13, 2017. *The Budget and Economic Outlook: Fiscal Years 2018 to 2028*, April 2018.

Over 2000 to 2013–2017, Tualatin's largest population increase was for those between 45 and 64 years of age.

This age group grew by 3,062 people between 2000 and 2013–2017.

Exhibit 34. Population Change by Age Group, Tualatin, 2000 and 2013–2017

Source: U.S. Census Bureau, 2000 Summary File; American Community Survey, 2013–2017, 5-year estimates, Table B01001.

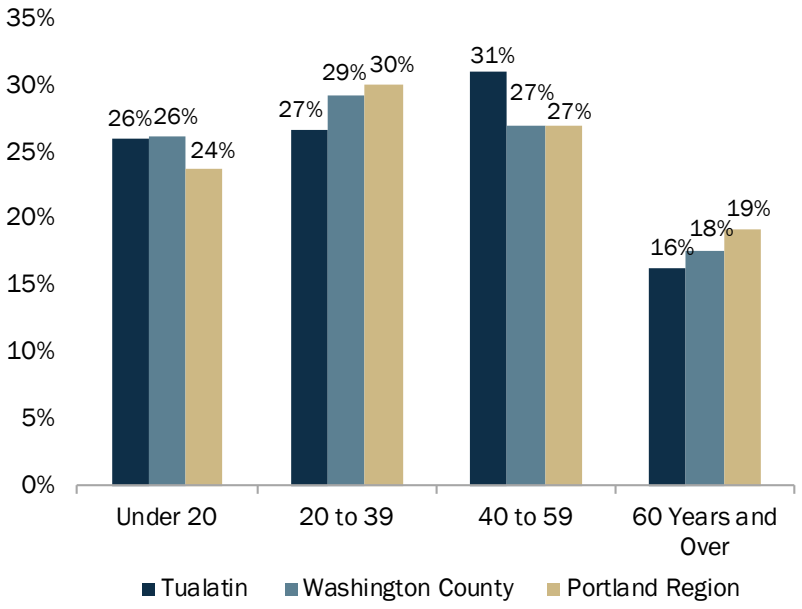


Compared to Washington County and the Portland Region, Tualatin had a slightly larger proportion of adults aged 40 to 59.

During the 2013–2017 period, 58% of Tualatin residents were between 20 and 59 years of age.

Exhibit 35. Population Distribution by Age, Tualatin, Washington County, Portland Region, 2013–2017

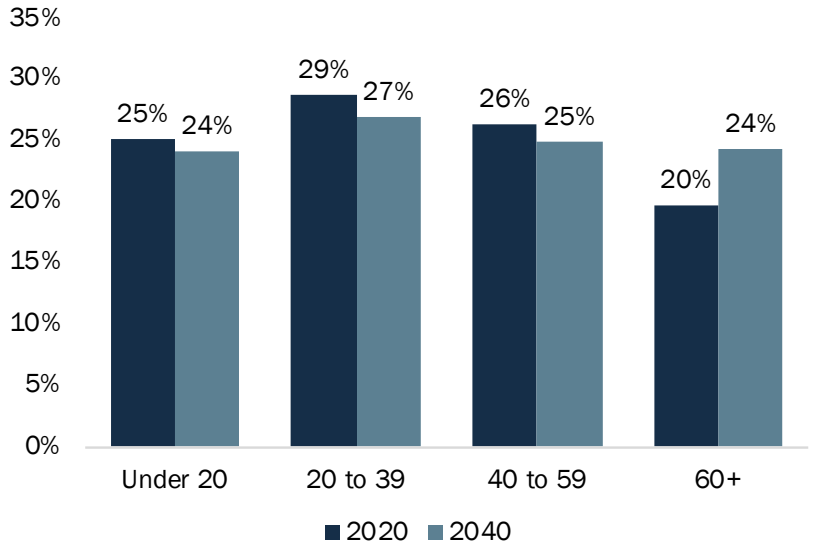
Source: U.S. Census Bureau, American Community Survey, 2013–2017 5-year estimate, Table B01001.



From 2020 to 2040, the share of residents 60 years and older in Washington County is forecast to grow while other age cohorts are forecast to decline proportionately.

Exhibit 36. Population Growth by Age Group, Washington County, 2020 and 2040

Source: Portland State University, Population Research Center, Washington County Forecast, June 2017.



Income

Income and wages affect business decisions for locating in a city. Areas with higher wages may be less attractive for industries that rely on low-wage workers. In the 2013–2017 period, Tualatin's median household income ($72,580) was similar to Washington County's median ($74,033). In 2017 (inflation adjusted to 2018 $), average wages at businesses in Tualatin ($58,429) were below the County's average ($70,310, 2018).

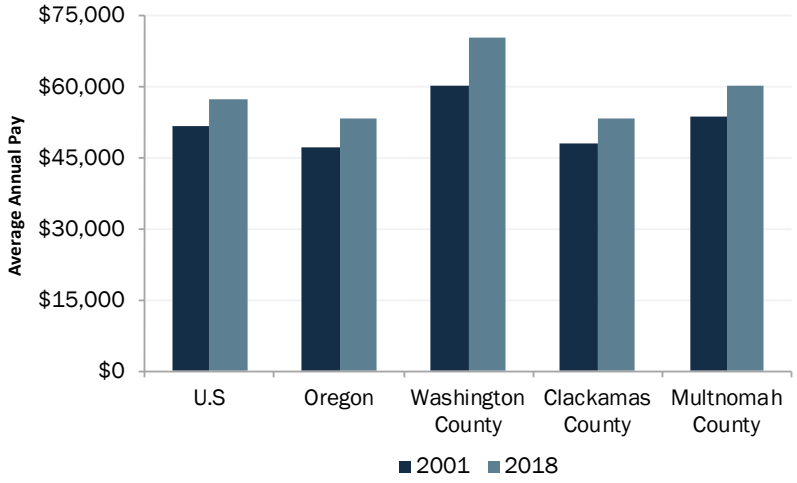
Adjusting for inflation, between 2000 and 2018, Washington County's average wages increased, as did the average wages of other counties in the Portland region, Oregon, and the nation. When adjusted for inflation, average annual wages grew by 17% in Washington County and 13% in Oregon.

From 2000 to 2018, average annual wages increased in Washington County, as did the average wages of other counties in the Portland Region, Oregon, and the nation.

In 2018, the average annual wage was $70,310 in Washington County, compared to 53,058 in Oregon.

Exhibit 37. Average Annual Wage (Inflation-Adjusted 2018 $), Covered Employment, Washington County, Clackamas County, Multnomah County, Oregon, U.S., 2001 to 2018,

Source: Bureau of Labor Statistics, Quarterly Census of Employment and Wages.



Over the 2013–2017 period, the median household income (MHI) in Tualatin was below Washington County's MHI, comparable to Multnomah County's MHI and above Clackamas County's MHI.

Exhibit 38. Median Household Income (MHI),[77] 2013–2017

Source: U.S. Census Bureau, American Community Survey 2013–2017 5-year estimates, Table B19013.

$72,580 Tualatin	**$74,033** Washington County
$60,369 Clackamas County	**$72,408** Multnomah County

[77] The Census calculated household income based on the income of all individuals 15 years old and over in the household, whether they were related or not.

Tualatin median family income during the 2013–2017 period, similar to the median household income and above the median family incomes of Washington County, Clackamas County, and Multnomah County.

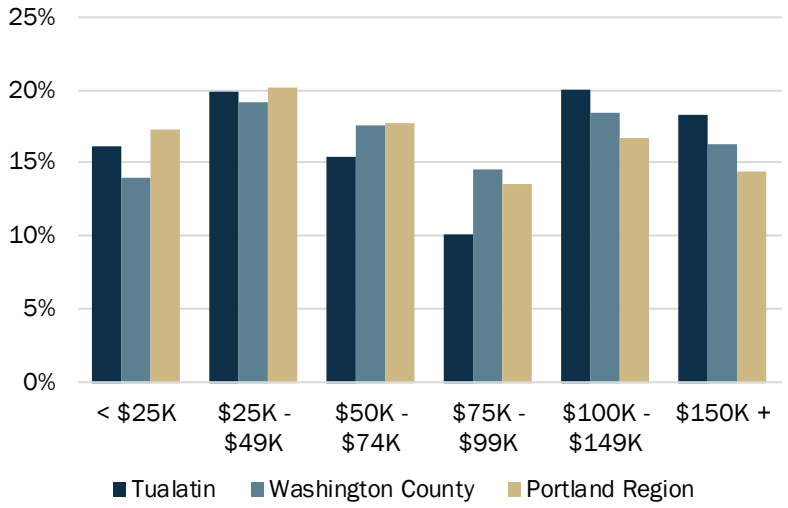
$95,656 Tualatin	**$85,993** Washington County
$87,858 Clackamas County	**$76,557** Multnomah County

During the 2013–2017 period, 48% of Tualatin households earned over $75,000 annually, comparable to Washington County.

Exhibit 40. Household Income by Income Group, Tualatin, Washington County, Portland Region, 2013–2017

Source: U.S. Census Bureau, American Community Survey 2013–2017 5-year estimates, Table B19001.



[78] The Census calculated family income based on the income of the head of household, as identified in the response to the Census forms, and income of all individuals 15 years old and over in the household who are related to the head of household by birth, marriage, or adoption.

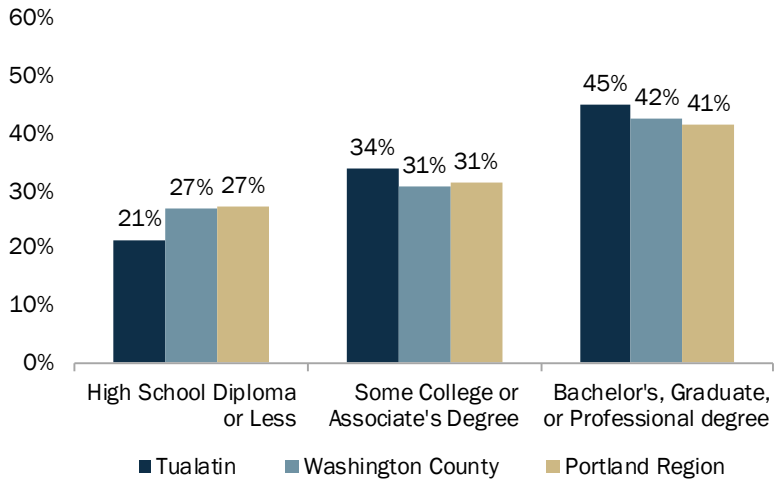
Educational Attainment

The availability of trained, educated workers affects the quality of labor in a community. Educational attainment is an important labor force factor because firms need to be able to find educated workers.

The share of residents, 25 years and older, with a bachelor's degree (or higher) is slightly larger in Tualatin than Washington County and the Portland Region.

Exhibit 41. Educational Attainment for the Population 25 Years and Over, Tualatin, Washington County, and the Portland Region, 2013–2017

Source: U.S. Census Bureau, American Community Survey 2013–2017 5-year estimates, Table B15003.



Race and Ethnicity

Tualatin, like Oregon overall, is becoming more ethnically diverse (while racial diversity has remained about the same). The Latinx community increased in Tualatin between 2000 and 2013–2017, from 12% of the total population to 16%. The non-Caucasian share of the population stayed the same,[79] from 2000 to 2013–2017 at 13% of the population. The Latinx community in Washington County also increased from 11% to 16%, while the non-Caucasian population increased from 18% to 23% between 2000 and 2013–2017.

Exhibit 42 and Exhibit 43 show the change in the share of Latinx and non-Caucasian populations in Tualatin, compared to Washington County and the Portland Region, between 2000 and 2013–2017.

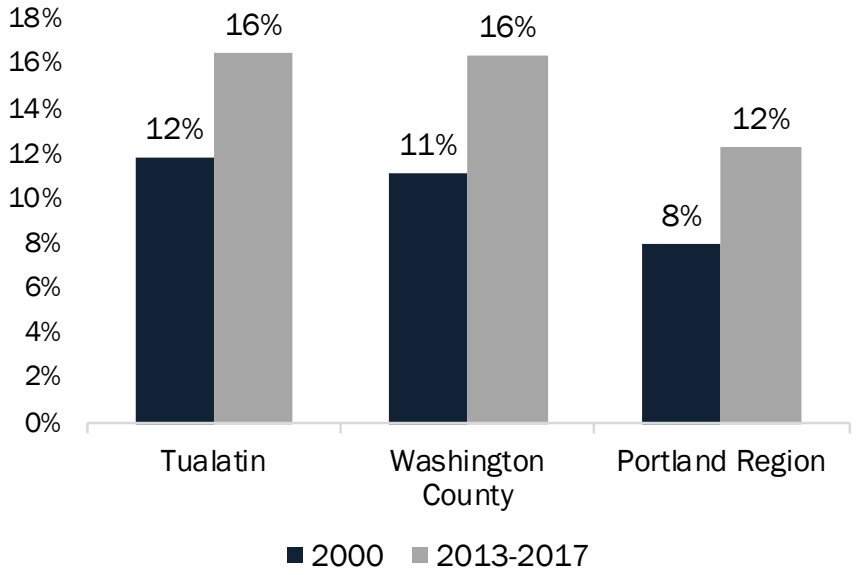
[79] The non-Caucasian population is defined as the share of the population that identifies as another race other than "white alone" according to Census definitions.

Tualatin's Latinx population increased between 2000 and 2013–2017 from 12% to 16%.

Tualatin and Washington County are more ethnically diverse than the Portland Region.

Exhibit 42. Latinx Population as a Percent of the Total Population, Tualatin, Washington County, and Oregon, 2000 and 2013–2017

Source: U.S. Census Bureau, 2000 Decennial Census Table P008, 2013–2017 ACS Table B03002.

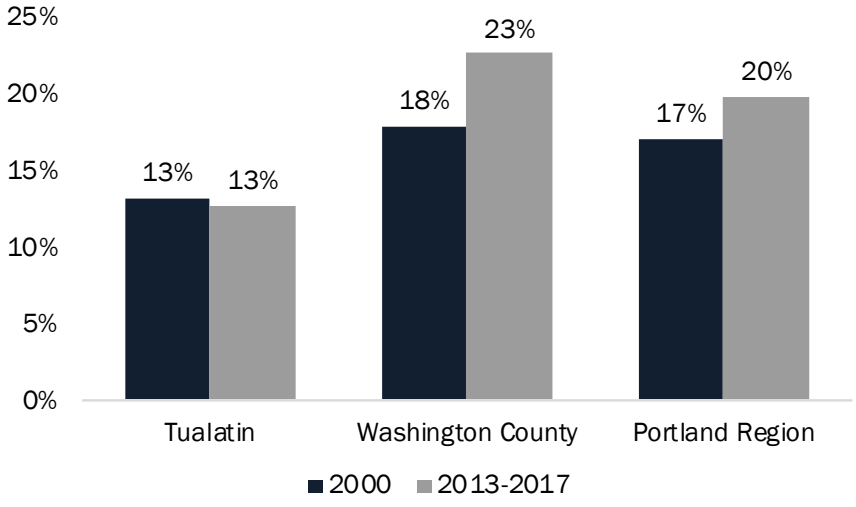


The non-Caucasian population in Tualatin stayed the same (at 13%) between 2000 and 2013–2017.

Tualatin is less racially diverse than Washington County and the Portland Region.

Exhibit 43. Non-Caucasian Population as a Percent of the Total Population, Tualatin, Washington County, and Oregon, 2000 and 2013–2017

Source: U.S. Census Bureau, 2000 Decennial Census Table P007, 2013–2017 ACS Table B02001.



Labor Force Participation and Unemployment

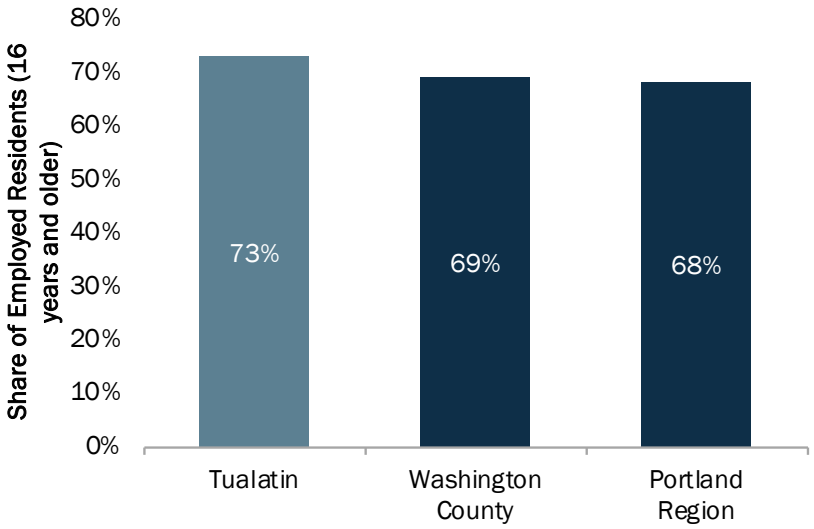
The current labor force participation rate is an important consideration in the availability of labor. The labor force in any market consists of the adult population (16 and over) who are working or actively seeking work. The labor force includes both the employed and unemployed. Children, retirees, students, and people who are not actively seeking work are not considered part of the labor force. According to the 2013–2017 American Community Survey, Washington County had more than 310,426 people in its labor force and Tualatin had 15,643 people in its labor force.

In 2017, the Oregon Office of Economic Analysis reported that 64% of job vacancies were difficult to fill. The most common reason for difficulty in filling jobs included a lack of applications (30% of employers' difficulties), lack of qualified candidates (17%), unfavorable working conditions (14%), a lack of soft skills (11%), and a lack of work experience (9%).[80] These statistics indicate a mismatch between the types of jobs that employers are demanding and the skills that potential employees can provide.

Tualatin has a higher labor participation rate than Washington County and the Portland Region.

Exhibit 44. Labor Force Participation Rate, Tualatin, Washington County, Portland Region, 2013–2017

Source: U.S. Census Bureau, American Community Survey 2013–2017 5-year estimates, Table B23001.

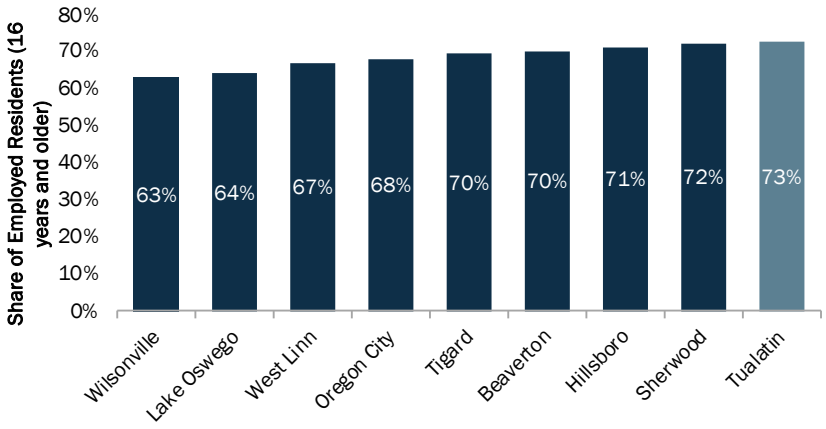


[80] *Oregon's Current Workforce Gaps: Difficult-to-fill Job Openings, Oregon Job Vacancy Survey*, Oregon Employment Department, June 2018.

Compared to neighboring cities, Tualatin has the highest labor force participation rate.

Exhibit 45. Labor Force Participation Rate, Tualatin and comparison cities, 2013–2017

Source: U.S. Census Bureau, American Community Survey 2013–2017 5-year estimates, Table B23001.

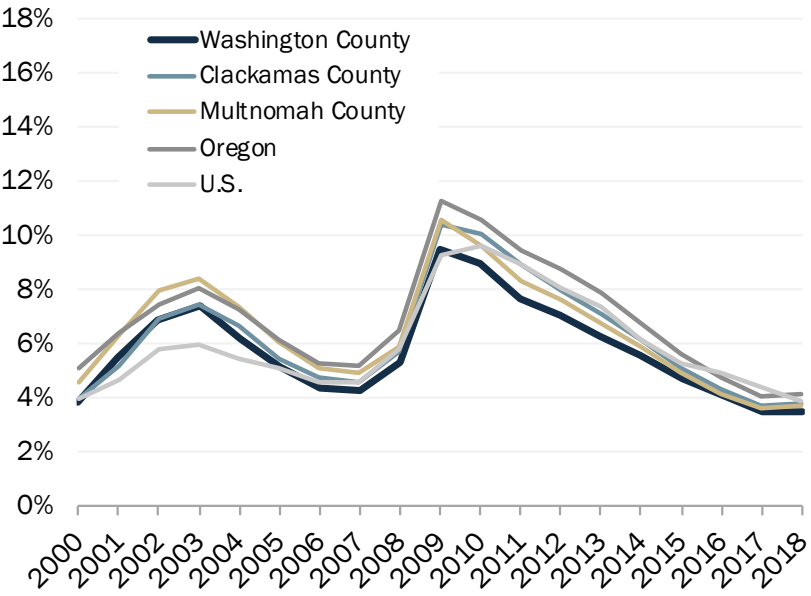


Alongside other counties in the Portland Region, Oregon, and the U.S., the unemployment rate in Washington County has declined since the Great Recession.

In general, Washington County's unemployment rate is below that of other regions.

Exhibit 46. Unemployment Rate, Washington County, Clackamas County, Multnomah County, Oregon, U.S., 2000–2018

Source: Bureau of Labor Statistics, Local Area Unemployment Statistics and Labor Force Statistics.



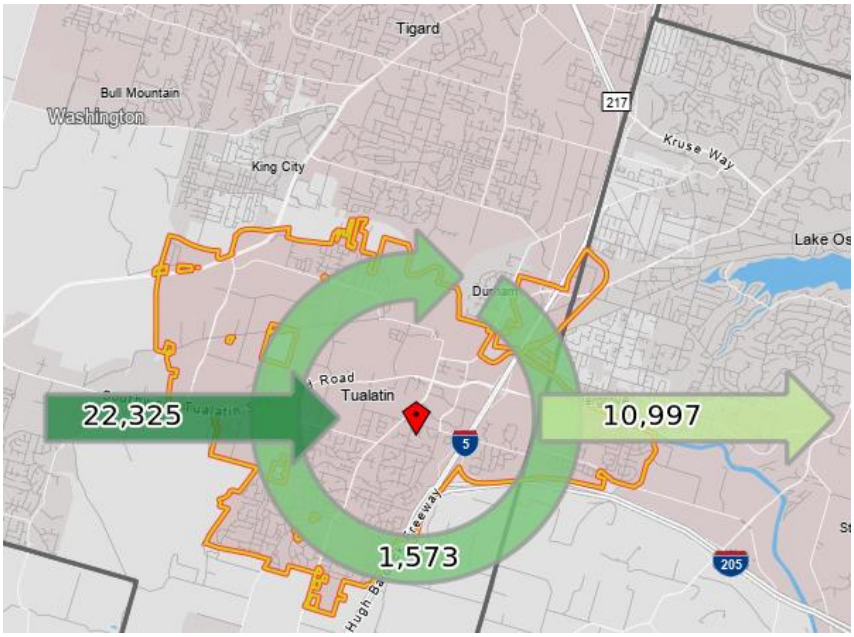
Commuting Patterns

Commuting plays an important role in Tualatin's economy because employers in these areas are able to access workers living in cities across Washington County and the broader Portland Region.

Exhibit 47 shows commuting flows of employees. Of the employees who work in Tualatin (about 23,898 persons), 93% commute into Tualatin from other areas. Of the employees who live in Tualatin (about 12,570 persons), 87% of people commute out of Tualatin to work in other areas.

Tualatin is part of an interconnected regional economy.
More than 22,000 people commute into Tualatin for work, and nearly 11,000 people living in Tualatin commute out of the city for work.

Exhibit 47. Commuting Flows, Tualatin, 2015
Source: U.S. Census Bureau, Census on the Map.



About 7% of people who work at businesses located in Tualatin also live in Tualatin.
The remainder commute from Portland and other parts of the Region.

2013–2017:	6.8%

Tourism in the Portland Region and Washington County

Longwoods International provides regional statistics on travel. The following information is from Longwoods International's 2017 Regional Visitor Report for the Portland Region.[81] Broadly, travelers to the Portland Region accounted for:

- 10.9 million overnight trips in 2017, or 32% of all Oregon overnight travel that year.
- The primary market areas for travelers over 2016 and 2017 were Oregon, Washington, and California: 28% of the visitors to the Portland Region came from Oregon, 26% came from Washington, and 20% came from California.
- About 48% of visitors stayed two or fewer nights over 2016 and 2017 in the Portland Region, 37% stayed three to six nights, and 15% stayed 7 or more nights. The average nights spent in the Portland Region were four days.
- The average per person expenditures on overnight trips in 2017 ranged from $16 on transportation at destination to $66 per night on lodging.
- About 63% of visits to the Portland Region over 2016 and 2017 were via personally owned automobiles, 22% were by rental car, and 18% were via an online taxi service (such as Lyft or Uber).
- Over 2016 and 2017, visitors tended to be younger- or middle-aged adults, with the average age being about 43.7. Those aged 25 to 44 comprised 43% of overnight visits, 30% were between 45 and 64, and 14% were 65 or older. About 66% of visitors graduated college or completed a post-graduate education. Additionally, 35% of visitors earned less than $50,000 in household income, 41% earned between $50,000 and $99,999, and 24% earned more than $100,000. The average household income for Portland Region visitors was about $70,440.

Washington County's direct travel spending increased 103% from 2000 to 2017.

The Portland Region's direct travel spending increased by 89% over the same period.

Appendix B. Buildable Lands Inventory

Oregon Administrative Rules provide guidance on conducting employment land BLIs:

OAR 660-009-0005:

(1) "Developed Land" means non-vacant land that is likely to be redeveloped during the planning period.

(2) "Development Constraints" means factors that temporarily or permanently limit or prevent the use of land for economic development. Development constraints include, but are not limited to, wetlands, environmentally sensitive areas such as habitat, environmental contamination, slope, topography, infrastructure deficiencies, parcel fragmentation, or natural hazard areas.

(11) "Site Characteristics" means the attributes of a site necessary for a particular industrial or other employment use to operate. Site characteristics include, but are not limited to, a minimum acreage or site configuration including shape and topography, visibility, specific types or levels of public facilities, services or energy infrastructure, or proximity to a particular transportation or freight facility such as rail, marine ports and airports, multimodal freight or transshipment facilities, and major transportation routes.

(12) "Suitable" means serviceable land designated for industrial or other employment use that provides, or can be expected to provide the appropriate site characteristics for the proposed use.

(13) "Total Land Supply" means the supply of land estimated to be adequate to accommodate industrial and other employment uses for a 20-year planning period. Total land supply includes the short-term supply of land as well as the remaining supply of lands considered suitable and serviceable for the industrial or other employment uses identified in a comprehensive plan. Total land supply includes both vacant and developed land.

(14) "Vacant Land" means a lot or parcel:

(a) Equal to or larger than one half-acre not currently containing permanent buildings or improvements; or

(b) Equal to or larger than five acres where less than one half-acre is occupied by permanent buildings or improvements.

Unlike with residential lands, the rules for employment lands include the concept of "suitability," which can be affected by factors other than the physical attributes of land. (See OAR 660-009-0005 [11] and [12] above.) The BLI methods do not fully address the suitability factors, rather, they more narrowly assess whether a parcel is buildable based solely on attributes of the land.

The methods used for conducting the Tualatin commercial and industrial BLI is consistent with Oregon statutes. However, the methods used for inventorying land within the city are based on the BLI completed by Metro for the 2018 Urban Growth Report (UGR). Metro is required to complete a BLI for land within the regional UGB every six years, and the agency updated the BLI (based on 2016 data) in January 2018. The methods used for inventorying Tualatin lands attempt to be consistent with Metro's results while also accounting for new development since 2016 and other local conditions, such as unique environmental constraints.

Overview of the Methodology

The BLI for Tualatin is based on the data and methods used by Metro. In addition, ECONorthwest's approach updated Metro's results to account for new development (the Metro 2018 UGR is based on 2016 data) and other potential local conditions, such as unique environmental constraints.

Study Area

The BLI for Tualatin includes all commercial and industrial land designated in the Comprehensive Plans within city limits and designated planning areas (referred to as Tualatin Planning Area). ECONorthwest used Metro's BLI, which used the 2016 RLIS tax lot database, as the basis for the BLI. We worked with City staff to identify new developments or changes since 2016 to reflect Tualatin's commercial and industrial land base in 2019.

Inventory Steps

The BLI consisted of several steps:

1. Generating UGB "land base"
2. Classifying land by development status
3. Identifying constraints
4. Verifying inventory results
5. Tabulating and mapping results

Step 1: Generate "Land Base"

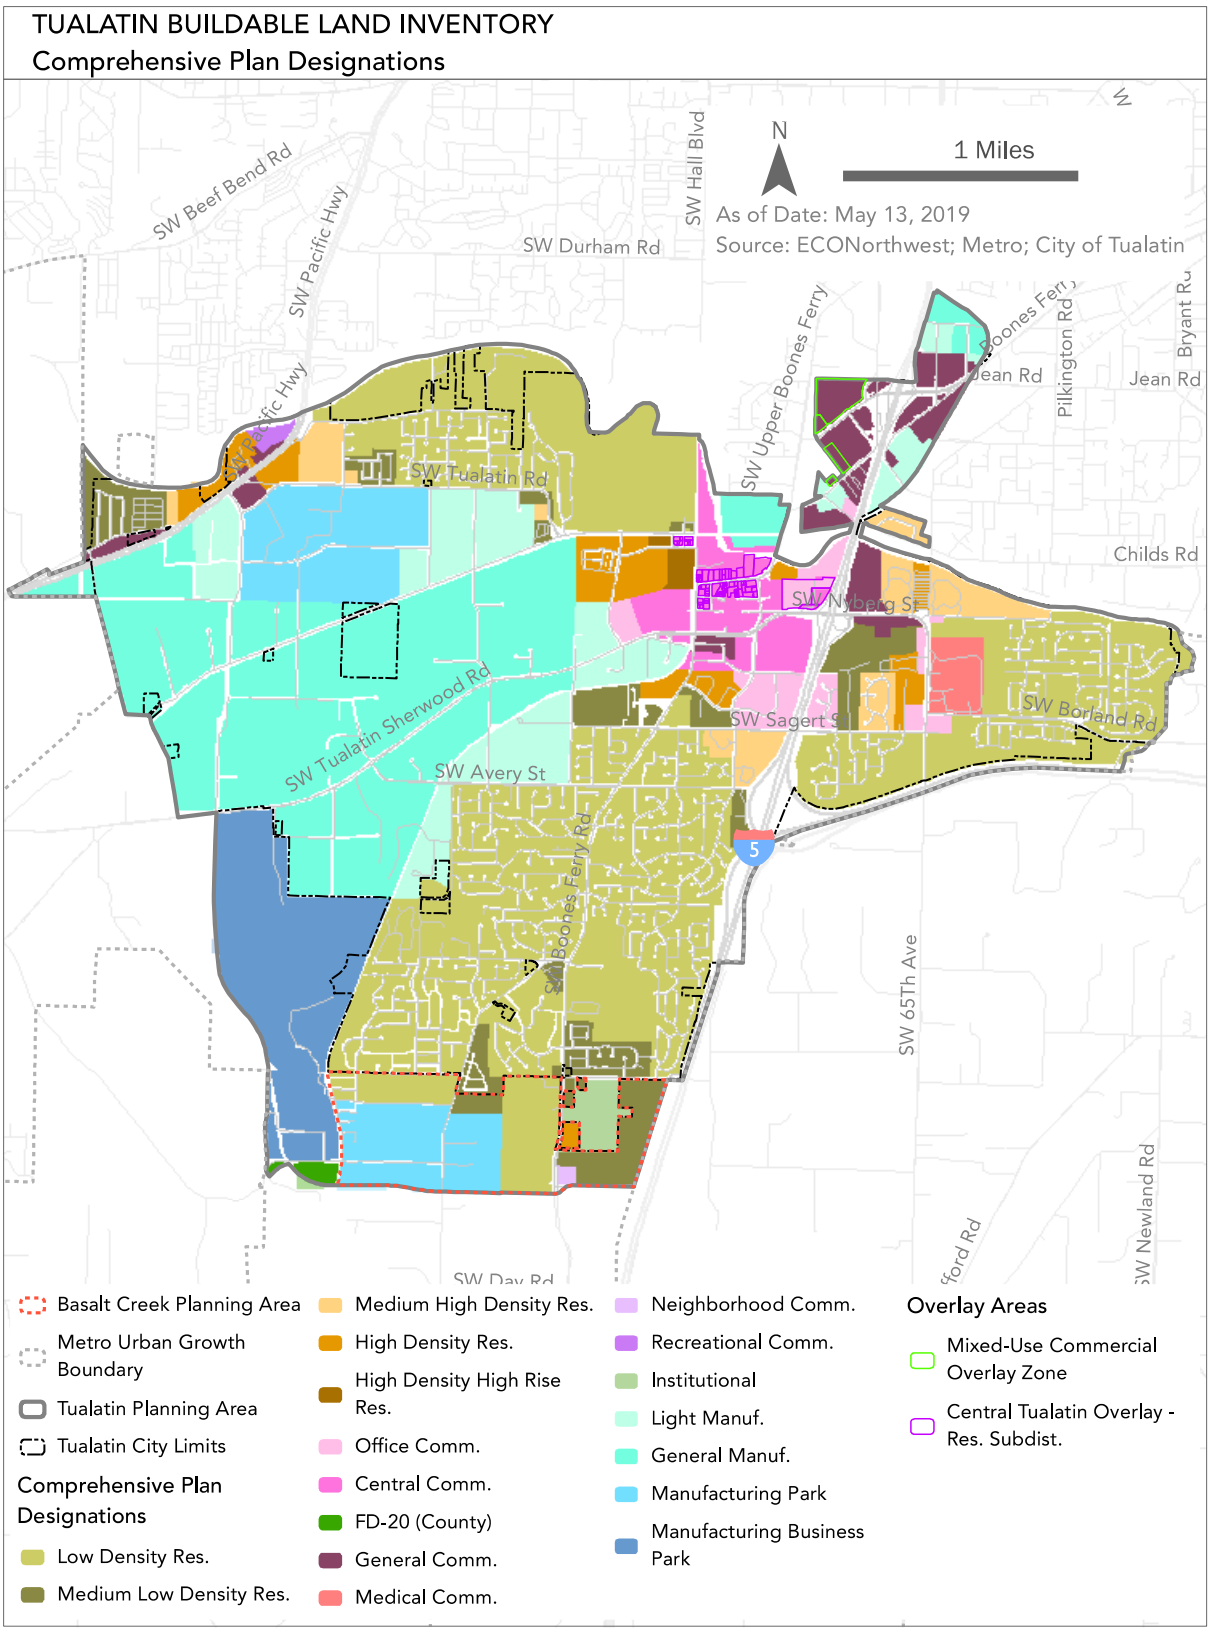
Per Goal 9, this involves selecting all of the tax lots with employment plan designations. Based on information provided by City staff, ECONorthwest included the following Plan Designations in the BLI:

- Office Commercial
- Central Commercial
- General Commercial
- Medical Commercial
- Neighborhood Commercial
- Recreational Commercial

- Light Manufacturing
- General Manufacturing
- Manufacturing Park
- Manufacturing Business Park

Exhibit 58 shows Comprehensive Plan designations for the City of Tualatin.

Exhibit 58. Comprehensive Plan Designations, Tualatin Planning Area, 2019



Step 2: Classify Lands

In this step, ECONorthwest classified each tax lot with a plan designation that allows employment uses into one of four mutually exclusive categories based on development status:

- Vacant
- Partially Vacant
- Potentially Redevelopable
- Public or Exempt
- Developed

ECONorthwest used the classification determined through Metro's model: vacant, ignore, and developed. In addition, ECONorthwest included a new classification for partially vacant and potentially redevelopable lots. The definitions for each classification are listed below.

Development Status	Definition	Statutory Authority
Vacant	Tax lots designated as vacant by Metro based on the following criteria: 1) Fully vacant based on Metro aerial photo 2) Tax lots with less than 2,000 square feet developed AND developed area is less than 10% of lot 3) Lots 95% or more vacant from GIS vacant land inventory	OAR 660-009-005(14)
Partially Vacant	Lots with an existing single-family dwelling but have been redesignated for commercial or industrial use (e.g., lots in the Basalt Creek Planning Area). These lots are assumed to redevelop in the planning period.	No statutory definition
Potentially Redevelopable	Lots determined to have redevelopment capacity based on Metro's Threshold Price methodology.	No statutory definition
Ignore (Public or Exempt uses)	Lots in public or semi-public ownership are considered unavailable for commercial or industrial development. This includes lands in Federal, State, County, or City ownership, as well as lands owned by churches and other semi-public organizations and properties with conservation easements. These lands are identified using the Metro's definitions and categories.	No statutory definition
Developed	Lots not classified as vacant, potentially redevelopable, or public/exempt are considered developed. Developed land includes lots with redevelopment capacity, which are also included in BLI. The capacity of developed but redevelopable lots is based on Metro's estimates.	OAR 660-009-005(1)

Step 3: Identify Constraints

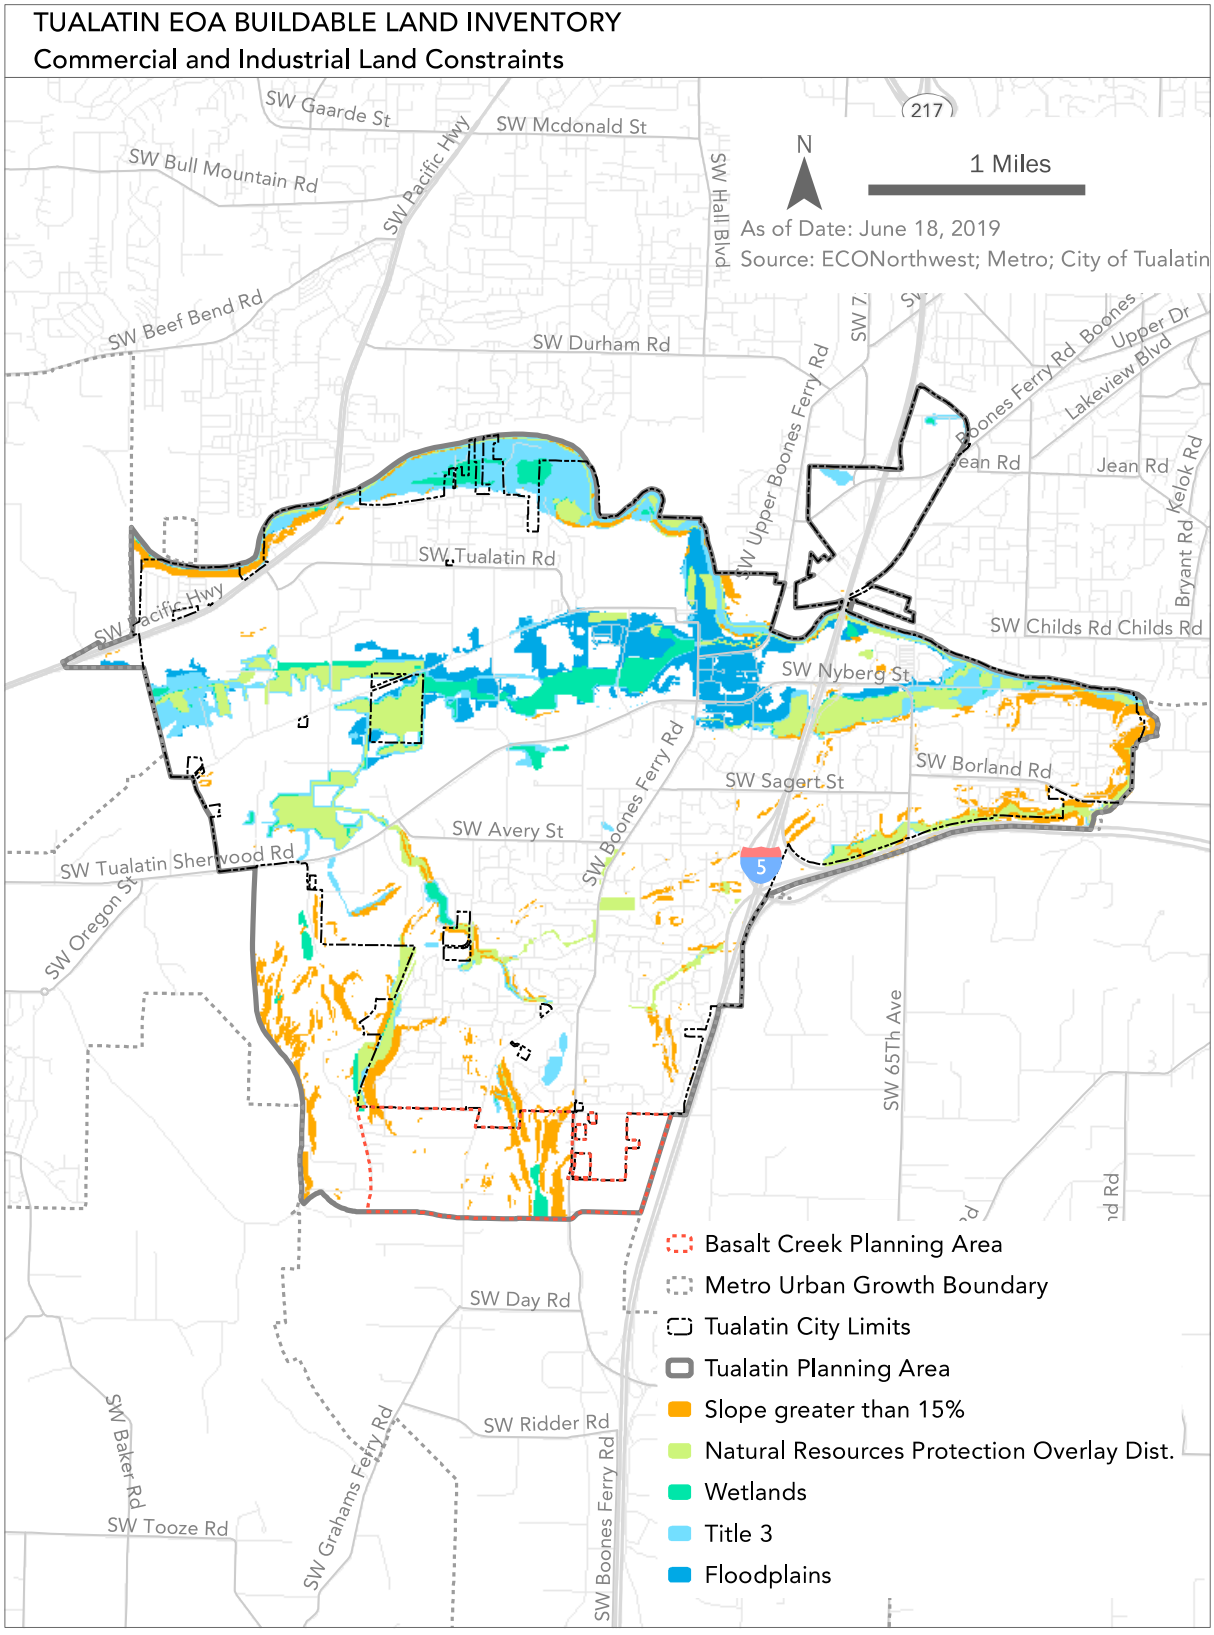
Consistent with OAR 660-008-0005(2) guidance on buildable lands inventories, ECONorthwest deducted certain lands with development constraints from vacant lands. We used some of the constraints established in Metro's methodology with modifications to fit local considerations in Tualatin. These constraints are summarized in the table below.

Constraint	Statutory Authority	Threshold
Goal 5 Natural Resource Constraints		
Natural Resources Protection Overlay District	OAR 660-008-0005(2)	Areas in the NRPOD
Riparian Corridors	OAR 660-015-0000(5)	Areas protected by the Stream and Floodplain Plan
Wetlands	OAR 660-008-0005(2)	Areas in wetlands
Natural Hazard Constraints		
100-Year Floodplain	OAR 660-008-0005(2	Lands within FEMA FIRM 100-year floodplain
Steep Slopes	OAR 660-008-0005(2	Slopes greater than 15%

The lack of access to water, sewer, power, road or other key infrastructure cannot be considered a prohibitive constraint unless it is an extreme condition. This is because tax lots that are currently unserviced could potentially become serviced over the 20-year planning period.

Exhibit 59 maps the development constraints used for the commercial and industrial BLI.

Exhibit 59. Development Constraints, Tualatin Planning Area, 2019



Step 4: Verification

ECONorthwest used a multi-step verification process. The first verification step included a "rapid visual assessment" of land classifications using GIS and recent aerial photos. The rapid visual assessment involved reviewing classifications overlaid on recent aerial photographs to verify uses on the ground. ECONorthwest reviewed all tax lots included in the inventory using the rapid visual assessment methodology. The second round of verification involved City staff verifying the rapid visual assessment output. ECONorthwest amended the BLI based on City staff review and comments, particularly related to vacant land developed since 2016.

Step 5: Tabulation and Mapping

The results are presented in tabular and map format. The Tualatin Commercial and Industrial BLI includes all employment land designated in the Comprehensive Plan within the Tualatin Planning Area. From a practical perspective, this means that ECONorthwest inventoried all lands within tax lots identified by Metro that fall within the Tualatin Planning Area. The inventory then builds from the tax lot–level database to estimates of buildable land by plan designation.

Subject: No on rezoning for high-rises on Norwood

City Council,

I agree with the planning commission recommendation to deny the amendments to allow high-density high-rises on Norwood. The negative impact on existing residents and infrastructure would be too great, and the area is not prepared for and would not well support such high-density housing.

High-rise apartments belong in downtown Tualatin.

Please vote no on.

Thank you.

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: PMA 23-0001 Med to high density

Hello,

I'd like to go on record that changing the med to high density apartment building is not a good idea.

Even without the new horrible development going in, the traffic is a nightmare. I can't go into Wilsonville or Tualatin after 4:00pm on most days due to traffic backup. Some nights the line of cars going towards I-5 ramp is past the high school.

The city has ruined Tualatin with this new development off Norwood. I've been a resident for 29 years and never expected this. Unfortunately Tualatin will no longer be my forever home.

Thanks, Alisa

I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Consider the needs of the entire City.

This entire situation (deforestation, destruction of roadway and future development) is making this 29 year resident put up a for sale sign. I no longer value living in the city of Tualatin.
Thank you all for being strong leaders for the community!

Subject: Mysterious flyers we received regarding "high rise" apartments in "downtown Tualatin"

Hi. My wife and I are newcomers, having moved here only about 2 ½ years ago so we had no knowledge of the history of this project until flyers were taped to the front doors of every house in our neighborhood (Martinazzi Woods) over the weekend. My initial reaction was, and is, suspicion since no group or individuals are identified as sponsors of this drive, which asks everyone to send you personally a pre-written statement of opposition. There is, of course no contact information....I imagine you're aware.... We're both older (early and mid-70s) and chose Tualatin for affordability and greater proximity to our two kids, who are in L.A. and New York.

We drove out to the area in question last night and noticed, of course, that there is already a subdivision under construction and abundant vacant land surrounding the church. We were also struck by the term "high rise," since even the revised permissible height would not be a "high rise" in any conventional meaning of the term. The density of the proposed project is high in terms of housing units, but in terms of the available land, it doesn't strike us as excessive. I am assuming that the 236 units proposed would be market rate (meaning tenants who are employed but needing affordable rents) or low income. If that correct? I didn't read the entire Planning file, but nothing jumped off the page at me that addresses that question.

We both worked careers in Los Angeles and I was a reporter for 26 years, including at the L.A. Times. We moved to Kauai in 2002 and I got back into the news business working in a hyper-local market because of a need for accurate information in an island environment. I had never planned to return to journalism. In both of those capacities, but especially on Kauai, I covered housing shortage/crisis issues intensively and the crisis is real on all of the islands, regardless of the tourism/paradise stereotype. I saw many of the same opposition schemes when it came to adding affordable housing near high end luxury homes.

I'm not sure what to make of this Tualatin controversy, though my gut tells me that, at its base, it's about socioeconomic, or even racial, opposition. My wife and I want to take a position, but it's not entirely clear what that should be. The mysteriously anonymous leaflet campaign that relies on hyperbolic descriptors represents a number of red flags to me. I've actually thought about writing something about it, though it's not at all clear for whom. Would you be comfortable talking about this? Thanks.

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Andrew Malm

Mr. Mayor and Council Members,

Tualatin is our home. It was, is and should continue to be what we moved here for. A beautiful, balanced community with good schools, parks and sense of place. The consideration of high density housing in multi story buildings outside of the core changes all that. Consider what our community is and what is should continue to be. Buildings and density of this type in the proposed area is a mistake we cannot recover from. Please consider the future of our community when voting NO on the proposed code changes.

I say NO to PTA23-001 and PMA 23-001applications as these are not in the best interest of the public and these applications are not appropriate for the area. These types of structures and density belong downtown ONLY where infrastructure can support them and those who live there. Please consider the needs of all.

Respectfully,
Mr. Andy Clarke
Ibach Park

I agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community. For now I am requesting City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.

Subject: Please do the right thing for Tualatin tax payers and residents

Hello and thank you for allowing me to submit my comments,

I have lived in or near Tualatin since 1978, with a child attending School in the Tualatin School district – our family shares the City's desire to offer affordable housing, address big picture objectives and hopes our elected officials make logical decisions which represent their Constituents values and work within the existing building codes Neighbors of Norwood bought into – please stop the PTA23-0001 and PMA23-0001 applications.

This all started when the City approved the Plambeck apartment project (also on Norwood), in which developers requested to bypass the city zoning for height restrictions. It's mind boggling why this request was ever approved & set into motion a precedent & slippery slope which is unfolding recklessly and a money grab from non-local developers guised as building "affordable housing" when in fact – they are salivating at the opportunity to build high end apartments and townhomes in the suburbs (openly advertising as such), which were never designated for such developments. There are designated areas for such projects readily available, it's just that these developers can't command high end prices in these designated areas – this is a money grab – not "affordable housing".

The original proposal the City approved on the Plambeck apartments on Norwood was good, it met the City's broader planning objectives for affordable housing, was within City codes, Aesthetically appealing and not detrimental to neighborhoods property rights. But later the developers said "the property was difficult to develop due to challenging topography", therefore requested a "variance" to increase to 4 stories (2 stories about the zoning laws)…

That "argument" has been proven false – all anyone has to do is look at the Lennar new home development on Norwood (adjacent to this project) – I walked the cleared land before improvements – the topography revealed tremendous up & down elevation changes no different than what the adjacent Plambeck original development plan faced. While I'm no

fan of Lennar and how they managed to remove their promised “tree preservation zone” (which is a whole other issue which should never have occurred) Lennar validated the ability to work within those parameters and within the existing building codes! The Plambeck developers whom purchased that property knew the topography before they bought it, they just wanted to change the rules & the City obliged (ref. attached visual how the Plabeck project changed from the original proposal).

It's simply wrong what was allowed to be approved and now appears to be leading to continuous like projects being approved! These developments are not benefitting those in need of affordable housing, only adding to an already extremely congested traffic area (trying to bypass I-5 rush hours) – all you have to do is drive down boones ferry road in the late afternoons – it backs up from the north Wilsonville I-5 exit all the way to Tualatin High School!

These projects only benefit developers bottom line, not the neighbors of Norwood. We can hire lawyers and fight the email campaigns for those lobbying for zoning changes and high rises in neighborhoods (including the community church whom wants to profit from selling their property and of course developers), but it's time to our elected officials to represent the residents of Tualatin & not big business, non-local money grabbing developers!

Sincerely concerned neighbor,

Arthur Robert Taylor; 22675 SW Vermillion Drive, Tualatin

What was proposed and Tualatin agreed to annex the property into Tualatin & all this project to move forward

- **Meets zoning criteria**
- **Aesthetically appealing**
- **Not detrimental to other property owners & rights**
- **Achieves objective of providing affordable housing**
- **HARD TO ARGUE SUCH A PROJECT**

What the local community & neighbors is going to get?

- **None of the above, except "Affordable housing"**

Table 43-3 Development Standards in the RH Zone

STANDARD	REQUIREMENT	PROPOSAL
Structure Height	35 feet	54 feet

Subject: Planning has heard the tax payers of Tualatin

Hello and thank you for allowing me to submit my comments,

I hope the Tualatin City Council will follow Planning's recommendation to adhere to established zoning standards (specifically height limits) in our neighborhoods.

I have lived in or near Tualatin since 1978, with a child attending School in the Tualatin School district – our family shares the City's desire to offer affordable housing, address big picture objectives and hopes our elected officials make logical decisions which represent their Constituents values and work within the existing building codes Neighbors of Norwood bought into – please stop the PTA23-0001 and PMA23-0001 applications.

This all started when the City approved the Plambeck apartment project (also on Norwood), in which developers requested to bypass the city zoning for height restrictions. It's mind boggling why this request was ever approved & set into motion a precedent & slippery slope which is unfolding recklessly and a money grab from non-local developers guised as building "affordable housing" when in fact – they are salivating at the opportunity to build high end apartments and townhomes in the suburbs (openly advertising as such), which were never designated for such developments. There are designated areas for such projects readily available, it's just that these developers can't command high end prices in these designated areas – this is a money grab – not "affordable housing".

The original proposal the City approved on the Plambeck apartments on Norwood was good, it met the City's broader planning objectives for affordable housing, was within City codes, Aesthetically appealing and not detrimental to

neighborhoods property rights. But later the developers said "the property was difficult to develop due to challenging topography", therefore requested a "variance" to increase to 4 stories (2 stories about the zoning laws)…

That "argument" has been proven false – all anyone has to do is look at the Lennar new home development on Norwood (adjacent to this project) – I walked the cleared land before improvements – the topography revealed tremendous up & down elevation changes no different than what the adjacent Plambeck original development plan faced. While I'm no fan of Lennar and how they managed to remove their promised "tree preservation zone" (which is a whole other issue which should never have occurred) Lennar validated the ability to work within those parameters and within the existing building codes! The Plambeck developers whom purchased that property knew the topography before they bought it, they just wanted to change the rules & the City obliged (ref. attached visual how the Plabeck project changed from the original proposal).

It's simply wrong what was allowed to be approved and has lead to developers pushing for more projects to be approved via either "exceptions" or outright changing the zoning standards! These developments are not benefitting those in need of affordable housing, only adding to an already extremely congested traffic area (trying to bypass I-5 rush hours) – all you have to do is drive down Boones Ferry road in the late afternoons – it backs up from the north Wilsonville I-5 exit all the way to Tualatin High School!

These projects only benefit developers bottom line, not the neighbors of Norwood. We can hire lawyers and fight the email campaigns lobbying for zoning changes and high rises in neighborhoods (including the community church whom wants to profit from selling their property and of course developers).

Please do the right thing, and represent the residents of Tualatin and not big business, non-local money grabbing developers!

Sincerely concerned neighbor,

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Subject: Subject: No to PTA23-0001 and PMA23-0001

I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Consider the needs of the entire City.
I also ask that you consider the proven impacts of putting apartments directly next to an established neighborhood, including the 500 additional vehicles it will add to Boones Ferry and crime.

Given AKS's failure to implement promised forestry buffer zones on their previous development on the Autumn Sunrise Development on Norwood Road between 89th and Vermillion, it is my opinion that we should not grant them any more leeway for any more development. Period. Autumn Sunrise is now a barren moonscape that allows us the privilege of seeing hearing and smelling Interstate 5 and the two unsightly water tanks and unrestricted damaging winds. We miss greatly what we had when there was a beautiful forest, sound and smog barrier and windbreak. We wonder if they ever really meant to preserve ANY trees. AKS appears to be a logging company, first and foremost.

In addition, I object to their plan beyond this annexation and partition to **create an apartment complex directly next to and established single-home neighborhood**. Doing so will have a

negative effect on home values and increase likelihood of crime in what has been a relatively crime-free area. This effect is documented (see attached letter below)

Some in this neighborhood say "No Hi-Rise on Norwood". I will go further to say "No APARTMENTS, PERIOD on NORWOOD". I do not object to apartments, just their placement, especially as when the Basalt Creek development was being drawn up, ***we were told by the Tualatin City government that any multi-family homes in the residential development areas would be placed far to the south, along the proposed Basalt Creek Parkway extension***. Taking the city at its word, many of us quit being concerned and stopped watching. While we "weren't looking" over time, the apartment location has creeped northward on development maps until it is now planned directly next to our neighborhood. The City government should be held to its original plan to restrict the placement of any multi-family developments away from existing single family homes.

If the city will put the Apartments back on the southern edge of the development, I don't care if they are Hi-Rise or not. Build a skyscraper down there if you want.

This new area in question is a beautiful wooded oasis that *needs to be preserved and enhanced as a park,* not as a yet another bulldozed apartment complex and parking lot and mass contributor to more gridlock on Boones's Fwy.

(Note: the planned park along Boone's Fwy is NOT an acceptable substitute, as it is not realistically within walking distance.

Please reject these applications .

Brent Beebe
8895 SW Stono Drive
Tualatin, OR 97062

Attachment of email sent to the City Council of Tualatin For consideration at the April 11 City Council Meeting, 7:00 PM

Honorable Mayor and Councillors,

When Tualatin was working on the Basalt Creek extension of the City limits, **we were told, and shown maps that stated that there would be ONLY single family homes next to our neighborhood, and that any apartment complexes would be near the Basalt Creek parkway extension.** See Figure 1.

Figure 1. From https://www.tualatinoregon.gov/sites/default/files/fileattachments/planning/meeting/19061/agenda_packet_1-19.17_updated.pdf

Scenario Prog

- Dec 2014 Joint Council meeting
- Basalt Creek Parkway jurisdictional boundary
- Tualatin Council feedback: Need more housing

I am not generally opposed to apartments (having been an apartment dweller for some time in my earlier years), but it **would be better if they were constructed further south below NEW constructed neighborhoods just above the basalt parkway proposed extension to I5 as shown in Figure 1.** Building there**,** *the acceptance of the Apartment complex would be baked into the purchase of new nearby homes*. New houses built around it would be already valued appropriately, and buyers would go in with eyes open. It might also encourage more lower priced owned homes to be built around it, where there is no opportunity for that now.

It is not apartments themselves I am opposed to, **but the intended location next to an established neighborhood of single family owned homes.** It has been my experience that apartments have a chilling effect on property values on the adjacent established neighborhood, and will increase crime in the area, where there is almost none now.

There are several websites that contain studies of the effect of apartments next to established neighborhoods. There were two studies that I read in depth. The first one was conducted by Mark Obrinsky and Debra Stein in March 2007 entitled "***Overcoming Opposition*** to

Multifamily Rental Housing". As one might expect from the paper title, the aim of the paper was not to enlighten, but to influence using facts that suited the stated goal of overcoming resistance to rental multifamily rental housing.

The second study was "**Rental Housing and Crime**: The Role of Property Ownership and Management" by Terance J. Rephann Regional Economist at the Center for Economic and Policy Studies Weldon Cooper Center for Public Service, University of Virginia. This second study **statistically shows that multifamily rentals actually do correlate to an increase in crime in nearby previously established neighborhoods.**

Most of the other studies I found were by contracting interests, with predictable findings.

One pro-apartment argument is that because of the number of families at a single location, of course there would be more crime per-capita. However, one just has to **look at the crime map of Tualatin (see Figure 2) supplied by the Tualatin Police department to readily see that the vast majority of crimes, I might venture to speculate 90-95% in Tualatin crime occurs in Multifamily rental locations.** *As you may also notice on the same map, the area south of Tualatin High school had **one** dot.*

Figure 2 - Crime Map of Tualatin (as of date 4/11/2022).

If increased density is the goal, I would not be opposed to a zoning change for **family** owned condominiums (but not speculators for rentals), as there is an inverse relationship between home ownership and criminal activity in a neighborhood.

I don't know how far along AKS is with their zoning petition, but would like to stop it if possible, unless a change is made to Condominiums instead of Apartments.

In closing, I would like to reiterate that building multifamily rental units next to an established neighborhood causes property value loss on neighbors in established neighborhoods through no fault or control of their own.

Thank you for your time and best regards.

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: Byrom CIO Executive Committee Statement: No on PTA23-0001 and PMA23-0001

Hello Planning Commission and City Council Members,

The leadership of the Byrom CIO met recently and discussed the proposed text and map amendments: PTA23-0001 and PMA23-0001. **The Executive Boards of the Byrom CIO agreed that these proposed text and map amendments are NOT in the best interests of the current and future residents of Tualatin, and therefore should not be recommended for approval.**

Reasons to not approve the proposed text and map amendments:
1. The rationale to remove the restriction on residential high rises and enable them to be built anywhere in Tualatin is rooted in a concern for lack of affordable housing. It is important to note that the proposed apartments have been described by the builder as "class A, luxury apartments." These are not low income or subsidized housing. Additionally, studies have recommended that the city of Tualatin should add about 1000 housing units by 2040. Based on current construction and approvals in the city, about 1200 units will already be added to housing inventory, well above the 2040 target. There is not a need to rush to build more housing units.

2. Traffic - South Boones Ferry Road already has significant development planned: light industrial development, the Autumn Sunrise housing development, and the Plambeck Gardens subsidized housing

community. Traffic studies complete to date have never examined the cumulative impact of all of the proposed development projects, and some of the studies that have been completed identify that Boones Ferry will fail, and already is failing to effectively manage traffic, especially during peak hours. Adding the 286 housing units specific to the Norwood high rise apartment project would only further worsen traffic. South Tualatin is heavily car dependent. There is inadequate public transit, and there are no stores, restaurants, or places of employment for miles, requiring all new and current residents to drive, creating a recipe for gridlock on Boones Ferry Road.

3. **Most significantly, the proposed text and map amendments do not meet Tualatin Development Code Approval Criteria, specifically the following items:**
TDC 33.070 (5) (A) - Granting the amendment is in the public interest. - As representatives of all of the Tualatin CIOs representing residents of the city, we identify that the proposed amendments are not in the public interest.
TDC 33.070 (5) (B) - The public interest is best protected by granting the amendment at this time. Given the approved and in development housing units that have yet to be occupied and that these units are well in excess of the anticipated need of the city by 2040, it is not critical or necessary to change the restriction on residential high rises at this time.Furthermore, public interest would be harmed by granting the amendments, as traffic will worsen on Boones Ferry, adversely impacting quality of life.
TDC 33.070 (5) (C) - The proposed amendment is in conformity with the goals and policies of the Tualatin Comprehensive Plan. The comprehensive plan does not call for building residential high rises outside of the downtown area, and the area for the proposed Norwood high rise is specifically left as undeveloped on the maps associated with the comprehensive plan. Per the Tualatin 2040 Comprehensive plan, high density residential/ high rise zone is specifically supposed to be in areas with the greatest access to amenities. The site at Norwood Rd has no access to amenities. See the description copied from the 2040 developmental plan.

High-Density Residential/High-Rise Planning District (RH-HR)
This district supports a wide range of housing types at the greatest density of household living in areas with the greatest access to amenities.

34

Due to the above factors, the leadership of the Byrom CIO do not support the proposed text amendment and map amendments. Alternatively, CIO leadership would be happy to consult regarding other changes that could be more beneficial to current and future residents of Tualatin. CIO leadership would gladly participate in conversations regarding alternative development of the site at Norwood Road, particularly development options that minimally impact traffic and increase livability of the community.

Sincerely,

Tim Neary

Subject: No to PTA23-0001 and PMA23-0001 Applications

Dear City of Tualatin, City Council, the Planning Department, and Ms. Nelzon,
I am a long-time resident of Tualatin (bought my house in 2008) and have paid property taxes faithfully every year despite increases, worked in Tualatin, shopped and spent money locally, and am very upset at the idea of rezoning the land behind my house into high-density high-rise and building apartment buildings right behind my neighborhood..

This doesn't belong here in Tualatin. I would not have bought here where I did had I known there would be such a callous disregard for our natural resources.

I heartily **oppose the partition and text amendment applications** because they open the door to decision after decision by the City culminating in the approval of the high-density high-rise literally right behind my fence.

You already have Autumn Sunrise and CPAH Plambeck Apartments. Can't you stop there?

We're not downtown Portland - this is a semi-rural suburban area that cannot support the traffic from even the influx of homes from Autumn Sunrise - let alone high-density residences on the corner. Traffic studies are out of date. **They don't take into account current traffic levels** in the surrounding areas, multiple feeder streets to this area and the crash data from there, and the lack of entry/exit to this small corner on SW Norwood Dr.

Please say NO to these applications.

Thank you,
Carly

Subject: Subject: The Planning Commission should NOT consider Plan Map and Text Amendment (PMA 23-0001 & PTA 23-0001) at the April 20 Meeting

To the City Planning Commission, Ms. Lombos, and Tualatin City Council,

I am writing concerning the procedure for Plan Map and Text Amendment (PMA 23-0001 & PTA 23-0001) and the Tualatin City Planning Commission meeting scheduled for April 20th, 2023.

Please clarify the following at your earliest opportunity:

1) Per TDC Section 32.020 (3)," Where one land use application is dependent on the approval of another land use application, the land use application upon which the other is dependent must be processed first." The Plan Map Amendment (PMA 23-0001) requesting zone change to RH-HR ***cannot proceed without removing the location factors from the TDC Section 44.100*** as requested by the Plan Text Amendment (PTA 23-0001). ***Therefore, these Amendments cannot be reviewed nor decided upon at the same time according to the City of Tualatin's own TDC Chapter 32: Development Review Procedures.***

2) The community has been notified on multiple occasions that this is a Quasi-judicial review or Type IV-A procedure, limiting the council's ability to attend CIO meetings to prevent ex parte. However, a type IV-A quasi-judicial hearing requires "**written notice of a public hearing**" per TDC Section 32.240 (3) – Type IV-A Procedure.

There has not been written notice of a public hearing for the Planning Commission meeting on 4/20/2023, where these Amendments are being reviewed to make a recommendation to the City Council.*

In summary, the adherence to the city's TDC Chapter 32: Development Review Procedures requires these amendments to be considered separately and **with adequate public notice**. In addition, TDC 32.010 (3) states," Questions regarding the appropriate procedure will be resolved in favor of the review type **providing the widest notice and opportunity to participate."** We ask the city of Tualatin to follow its written procedures in considering these applications.

3) If the Planning Commission chooses to move forward with considering both applications at the same time in the April 20 meeting, not adhering the City of Tualatin's written procedures ***and*** not providing adequate public notice, then I am **restating my opposition** to **both applications** The Text Amendment is not in context for changing land zoning to RH-HR outside of Tualatin's Central Urban Renewal District, and subsequently, the Plan Map Amendment to RH-HR is not in context for SW Norwood Rd. Adequate infrastructure does not exist to support either amendment, and RH-HR should be restricted to Tualatin Central Urban Renewal District ONLY.

* Per the posted Planning Commission meeting agenda action items:
"The Planning Commission is asked to make a recommendation to the City Council on a request for a Plan Map Amendment (PMA) from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR) located on a 9.2-acre site at 23370 SW Boones Ferry Road. The Planning Commission is asked to make a recommendation to the City Council on a request for a Plan Text Amendment (PTA) that would remove the locational factors from the High-Density High Rise (RH-HR) purpose statement in Tualatin Development Code Section 44.100 and revise Table 44-3 to limit the structure height to 4 stories or 50 feet in the RH-HR zoning district south of Norwood Road, which would be applicable to the subject site."

Thank you,
Carly Cais

Subject: City Council should NOT consider Plan Map and Text Amendment (PMA 23-0001 & PTA 23-0001) at the May 22 Meeting

Dear City Council,
I am writing concerning the procedure for Plan Map and Text Amendment (PMA 23-0001 & PTA 23-0001) and the Tualatin City Council meeting scheduled for May 22, 2023.

Per TDC Section 32.020 (3)," Where one land use application is dependent on the approval of another land use application, **the land use application upon which the other is dependent must be processed first.**" The Plan Map Amendment (PMA 23-0001) requesting zone change to RH-HR cannot proceed without removing the location factors from the TDC Section 44.100 as requested by the Plan Text Amendment (PTA 23-0001). Therefore, **these Amendments cannot be reviewed nor decided upon at the same time** according to the City of Tualatin's own TDC Chapter 32: Development Review Procedures.

The adherence to the city's TDC Chapter 32: Development Review Procedures requires these amendments to be considered **separately** and with adequate public notice. In addition, TDC 32.010 (3) states," Questions regarding the appropriate procedure will be resolved in favor of the review type providing the widest notice and opportunity to participate." I ask the city of Tualatin to **follow its written procedures** in considering these applications.

If City Council chooses to move forward with considering both applications at the same time in the May 22 meeting, not adhering to the City of Tualatin's written procedures and not providing adequate public notice for PTA 23-0001, then I am restating my opposition to both applications.

The Text Amendment is not in context for changing land zoning to RH-HR outside of Tualatin's Central Urban Renewal District, and subsequently, the Plan Map Amendment to RH-HR is not in context for SW Norwood Rd. Adequate infrastructure does not exist to support either amendment, and RH-HR should be restricted to Tualatin Central Urban Renewal District ONLY due to lack of amenities and available space for parking and emergency vehicles outside the District.

Furthermore, allowing RH-HR building outside of the Central Urban Renewal District, before the downtown area is fully built out, undermines Tualatin's Planning goals and adds to an already unbearable traffic situation with SW Boones Ferry Rd. and the conduits to I-5.

I respectfully ask City Council to vote against both applications, and allow infrastructure build to catch up with the rampant development that has happened in recent years to this City.

Sincerely,
Carly Cais

Subject: No to proposed plan and text amendments PTA 23-0001 and PMA 23-0001

Dear Ms. Nelson, Mayor Bubenik, and members of Tualatin City Council,

Please include this email in the public comment to the above proposed plan text amendments PTA 23-0001 and PMA 23-0001. I strongly recommend to the City Council to vote no on both.

Although increasing density is a worthy goal, these amendments, as written, are a serious error. The current Tualatin Development code simple restriction of high-rise residential construction to the downtown area ensures walking distance access for high-rise residents to grocery stores, banks, medical services, restaurants, and nearby transit service. Amending the code to allow it anywhere in Tualatin without regard to those services must be rejected. Requiring these services within walking distance must be included. Our development code is the only restriction to bad development. There is no doubt in my mind that if these amendments are approved, nearby neighborhoods, traffic volume, and poor quality of life would result.

Please vote no.

Cathy Holland

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: 4/20 meeting information

Hello,

I am writing this letter to have it included as information for consideration by the City Planning Commission and City planners. This is in regards to the upcoming meeting on 4/20 of whether or not to recommend the proposed plan text amendment and other proposals regarding the High Rise on Norwood Rd.

I, along with many others members of our community have looked at this from many angles and tried our best to understand the cities decision making process. When looking at this project there are a couple things that stick out very clearly. First of all any opinion submitted by a member of Horizon Christian Church that is not a resident of Tualatin should not be accepted. This should be a Tualatin resident discussion only.

As I have looked at and tried to make sense of the city development code, along with talks with staff in the planning department, the decision on whether to approve building proposals are very complicated and not as cut and dry as looking at our comprehensive plan or the Housing Needs Analysis. While I have been told that the HNA is more of a floor than a ceiling for development it still seems to me that the amount of current and proposed development is more than excessive in the first 3 years of a 20 year plan. While everyone in the planning department and on the commission have certain criteria to meet for projects what I have not seen are arguably the two most important questions to ask. 1. Is this project good for our city and how will it benefit our current residents quality of life. 2. Is this project good for our city and how does it benefit future residents. Well if you as a planning group do nothing more than just look at these two questions and truly ask yourselves who does this project benefit, the answer to both questions is an overwhelming NO. This project in NO way will benefit current residents. In fact it will have a very strong negative impact on all of us. Traffic is already a major issue and only going to get worse with the additional 1,000+ cars coming from the Autumn Sunrise development. Plus add in additional traffic from people trying to avoid future tolls on I5. With the city currently not planning any changes to Boones Ferry to help with traffic things are only going to get much worse. Property values will also go down and nobody wants to see their homes take a big financial loss. Putting more people farther from resources like Fire, Food and transportation is only going to put further strain on our resources and impact current and future residents. Bringing more people into an already taxed infrastructure will is not a great quality of life for future residents of this proposed complex or our city in general. So I again ask you to start by considering current and future residents and their quality of life.

If that is not enough the proposed text amendment will just give more developers the opportunity to build more high rise structures anywhere in Tualatin. There is a reason that the city code has limited these structures to the downtown area. It is beneficial to build them downtown because they are located closer to emergency resources, transportation and food. Lets keep them downtown and not let the developers run the game. If we are not careful approving these proposals could send a message to all developers that the city of Tualatin is fair game and can be developed anyway that they want so long as they get all the right paperwork in and boxes checked on applications.

This is your chance to stand up to big developers that do not have to stick around and deal with the impact of their developments on our community. We the residents still have to live here and live with these choices. I hope that you all recommend to not pass these proposals and stand up for our city and our people.

Thank you for your consideration,
Chad fribley

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Charles Redwing

Dear Planning Department;

I am writing to you in opposition to the plan and text amendment applications PTA23-0001 and PMA23-0001. I also agree with the 383 pages of comments from citizens of Tualatin in opposition to a high-rise on Norwood Rd especially regarding the proposed text amendment (attached). These applications are not in the public's interest nor in context for the area.

Dear Mayor and City Council;

Please also discern the attached testimony provided by members of Horizon Community Church that are in opposition to these developments as these members actually live in Tualatin.

Again, I hope you understand the ramifications of this text amendment change. It will be detrimental to Tualatin's future if approved. These applications completely disregard community input or involvement.

Thanks,

-Chris McReynolds

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without

relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,
Abbi Bertalotto

Dear Tualatin Planning Division Members;

Steve Koper, AICP
Assistant Community Development Director

Erin Engman
Senior Planner

Keith Leonard, AICP
Associate Planner

Madeleine Nelson
Assistant Planner

Lindsey Hagerman
Office Coordinator

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a homeowner in SW Skokomish Ln for three years, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available. The current area and local infrastructure in general does not conform to this level of zoning especially with the new Autumn Sunrise development of approximately 500 new homes and condos.

The three areas of concern are traffic, removal of local institutional zoned areas for future development and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall these properties arebetter suited for this type of zoning with local transit, retail and similar residential development, which could serve the Basalt Creek master plan more locally.

Issue one regarding traffic:

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though the Autumn Sunrise development plans to introduce a stoplight at the

intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5. See Exhibit A in attached document "Norwood Woods and Community for Smart Zoning Practices.pdf".

Issue two regarding institutional infrastructure:

The Tualatin public school system is already dealing with classrooms at capacity, especially the localEdward Byrom Elementary school, where many families' children I know attend. With the addition of the Autumn Sunrise development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone. See Exhibit B in attached document "Norwood Woods and Community for Smart Zoning Practices.pdf" for more detail.

Issue three regarding existing RH-HR zones:

As stated, properties 8412, 8514, and 8538 near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, and easily accessible public transportation. Seeing how fast Autumn Sunrise is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan.

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part

of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

See Exhibit C in attached document "Norwood Woods and Community for Smart Zoning Practices.pdf" for more details on a

Norwood Woods and Community for Smart Zoning Pr...

proposed alternate plan.

I, and fellow residents of Norwood Wood's community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near

Norwood Rd does not fit these requirements and will strain our available infrastructure. As AKS Engineering and Forestry applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning Division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin.

Sincerely,

Alejandro Cruz

Subject: Partition on Norwood opposition

Alisa Bear
8525 SW Maricopa drive
Tualatin

Hello, I've been a resident in Tualatin for 29 years and thought I'd keep this home for life. Well everything changed in April of 2022. With the deforestation and destruction of the lot on Norwood. Everyday I'm impacted by huge boulders on the road, deep grooves in the road and construction noise and traffic delays. It's only going to get worse with the planned apartment complex which I also oppose. Traffic is backed up to high school on some evenings.

Saying no to high rise apartment complex and new laughable, affordable homes.

Will be moving out of Tualatin since no one has taken into consideration the impact this is having on neighborhood.

Subject: Pending Partition and Annexation Decisions Partition # PAR-(22)-0002 Annexation # ANN 22-0003

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments in against both these land use decisions.

While I have no issue with affordable housing, I do have concerns about traffic and the already overcrowding we have going on. Living off of Boones Ferry, I can tell you it is very hard to get through the area during parts of the day. Part of that is that we have limited roads, with heavy traffic leading to the highway and the bottle neck near McDonalds on Boones and Tualatin-Sherwood. The rest of the traffic being commuters trying to bypass I-5 traffic down through Boones Ferry. The constant noise, speed racing, and traffic on Boones is already unbearable during the day.

Low income housing means many homes/apts within a small area. That may seem harmless, but consider the amount of additional traffic it will create. Our roads just can't handle any more at this time.

Please consider my argument against this project.

Warm Regards,
8678 SW Logan Lane

Subject:	Please hear the voice of your constituents - don't change zoning in our neighborhood
Follow Up Flag:	Follow up
Flag Status:	Flagged

I oppose the request for yet another zoning change request in our neighborhood (Norwood Rd. Partition case ile 22-0002). The continued applications of greedy developers masking their for profit higher end developments as "affordable housing" which they expect the City will grant them requests to change existing zoning laws. Please don't let another mistake be made in our neighborhood! The bordering Plambeck apartment developers request to bypass the city zoning codes for height restrictions should never have been approved and we fear this is leading to a slippery slope which thousands of your constituents are already very upset about. I ask your help to do the right thing and not change our neighborhood into a series of hi-rise structures and further pack already jammed streets (not the "quality of life" we have & continue to pay our property taxes for).

We are already crushed with traffic in our neighborhood, this development is not consistent with mandates to reduce houselessness. If the City is serious about that mandate – then developers should meet the mandate objectives (affordable) and within the many properties already zoned for such developments.

We are not "nimby's", we just expect our neighborhood to be what it is in regard to the zoning which exists and what we bought into. Nor are we against "affordable housing"… The original Plambeck proposal was good, it met broader planning objectives for affordable housing, was within City codes, Aesthetically appealing and not detrimental to neighborhoods property rights. However, Plambeck developers pleaded a case saying "the property was difficult to develop due to challenging topography", therefore requested a "variance" to increase to 4 stories (2 stories above the zoning laws), which was then granted.

Why was that land purchased in the first place if they thought it was too challenging? Is it because they knew the they could change the zoning if they asked? Reality is the original 2 story plan which was within existing code, could have been built. Simply look at the adjacent Lennar development on Norwood - before the clearing & leveling - you could see just how up & down the topography is on this land and within the existing building codes! It cost more to level it out, but they did.

Reflecting also on the Lennar project, frankly, has been a debacle. The lack of oversight of their thinning out the tree preservation zone along Norwood last spring, to the point that the remaining trees were unstable and after just typical late fall winds (they call "storm"), the "preservation area has been deemed to now have to go – Lennar culled roughly 30 large trees that were in that so called "tree preservation area" in the late spring, it's no doubt the reason for this result. Did they get permission to do that? Why is it that the same such buffer to the west has existed for decades, that not even a branch fell from that buffer during what Lennar phrased as "a storm". Resulting in another slap in the face of our community!

In closing, for the projects which are currently in review, please hear the voices of concerned tax payers and consider our quality of life and perspectives. We ask you to please reflect on what is already happening to our community and not grant variances and permit further high rise projects that are not within the codes that existed when developers purchased such property and cause detriment to our neighboring property and community.

Sincerely,

Arthur Taylor
22675 SW Vermillion Drive, Tualatin

Subject:	No high-rise on Norwood Norwood for Smart Zoning

Dear Planning Department & City Council Members,

Please deny the zoning that would allow a high-rise development of 276 units along SW Norwood Road. As a realtor, you may think that I would gain from more housing, but the community sure would not. Like printing more dollars devalues the dollar, so will adding all these new homes to Tualatin. Not to mention the ridiculous traffic congestion it will obviously create. Adding all these new homes will make areas impacted by traffic congestion less desirable to homeowners and buyers and lower quality of life for Tualatin residents. If you currently own a home anywhere near these projects, you'd be very unhappy with your location, that once was desirable.
I'm a local Realtor with 22 plus years of experience in what affects home values and desirability. Building these projects will absolutely do that.
Again, please deny these projects.
Sincerely and for the sake of Tualatin,
Ben Richardson

Planning Division
City of Tualatin

CC: Sherilyn Lombos, Tualatin City Councilors, and Mayor Bubenik

I am writing regarding PAR 22-0002. As a 12 resident of Tualatin I have concerns with the application for partition. Specifically, I am concerned about the foundation it sets for the ultimate annexation, rezoning, sale, and development of the proposed "Parcel 1."

On any given day during ahernoon rush hour, SW Boones Ferry Road is considerably congested from the I-5 interchange, through the southern Tualatin city limits at the corner of Norwood Road, and down as far as SW Avery Street. I am aware of plans to introduce a traffic signal at the intersection of SW Norwood Road and SW Boones Ferry Road as well as a widening of roadway and walkways (with no additional lanes) on SW Norwood Road. However, there has not been sufficient evidence provided to support the claim that these changes will appropriately mitigate the current traffic concerns, let alone the natural increase in traffic that will come with the Autumn Sunrise subdivision. The possible addition of even more units, residents, and vehicles for which PAR 22-0002 lays the groundwork, will only **exacerbate the existing traffic problems all of which disrupt schedules, impede first responder access, and increase carbon-emissions.**

It has been suggested that development of the proposed Parcel 1 will provide needed housing opportunities in our community. I understand the need for and strongly support any initiative to provide accessible-priced and low-income housing throughout Tualatin. However, based on the information provided at the neighborhood/developer meeting on October 25, 2022, the proposed housing type and market rate for rent for the units that will be built if PAR 22-0002 is allowed **will not address an affordable housing need in our community.** What's more, the type of development being proposed is better suited to the area near the Westside

transit station on SW Boones Ferry Road, as it is better situated and proximate to support infrastructure such as grocery stores, government facilities, retail, and transit.

As I am sure you are already aware, PAR 22-0002 lays a framework for future development that is strongly opposed by the Norwood Heights and surrounding neighborhood communities in the Byrom CIO. While some growing pains are expected and necessary as we expand our city limits at the edges of the urban growth boundary, I believe that the ultimate development of the proposed Parcel 1 only serves to **put a strain on our available infrastructure but also on our community relations.**

I urge you **not to approve PAR 22-0002 or any related annexation or zoning changes** to the proposed parcels.

With thanks and respect for your service and time,

Beth Dittman

Subject: NORWOOD FOR SMART ZONING

Before I start my "official" email, I'd like to say how terrible sad I am every time I drive on Norwood Road. What a disaster!!!

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Betsy Gillett

Madeline,

Per your mailed notices, as a resident near the partition applications areas "SW Norwood Road Partition" File No. PAR 22-0002 by AKS Engineering and Forestry LLC, I wish to state my objections in writing to both of these proposals.

Given AKS's failure to implement promised forestry buffer zones on their previous development on the Autumn Sunrise Development on Norwood Road between 89th and Vermillion, it is my opinion that we should not grant them any more leeway for any more development. Period. Autumn Sunrise is now a barren moonscape that allows us the privilege of seeing hearing and smelling Interstate 5 and the two unsightly water tanks and unrestricted damaging winds. We miss greatly what we had when there was a beautiful forest, sound and smog barrier and windbreak. We wonder if they ever really meant to preserve ANY trees. AKS appears to be a logging company, first and foremost.

This new area in question is a beautiful wooded oasis that needs to be preserved and enhanced as a park, not as a yet another bulldozed apartment complex and parking lot and mass contributor to more gridlock on Boones's Fwy.

In addition, I object to their plan beyond this annexation and partition to create an apartment complex directly next to and established single-home neighborhood. Doing so will have a negative effect on home values and increase likelihood of crime in what has been a relatively crime-free area. This effect is documented (see attached letter below)

Some in this neighborhood say "No Hi-Rise on Norwood". I will go further to say "No APARTMENTS, PERIOD on NORWOOD". I do not object to apartments, just their placement, especially as when the Basalt Creek development was being drawn up, we were told by the Tualatin City government that any multi-family homes in the residential development areas would be placed far to the south, along the proposed Basalt Creek Parkway extension. Taking the city at its word, many of us quit being concerned and stopped watching. While we "weren't looking" over time, the apartment location has creeped northward on development maps until it is now planned directly next to our neighborhood. The City government should be held to its original plan to restrict the placement of any multi-family developments away from existing single family homes.

If the city will put the Apartments back on the southern edge of the development, I don't care if they are Hi-Rise or not. Build a skyscraper down there if you want.

If stopping the Annexation and Partition will cause the City to return to its original plan, then I am against the annexation and Partition.

As long as AKS is the developer, I am against the plan.

However, if the same property can be made into a Park area within walking distance of our homes, where we are sorely lacking any park facilities, then I would be in favor of both annexation and Partition, (provided that AKS is not the developer.- I do not trust them with the trees). (Note: the planned park along Boone's Fwy is NOT an acceptable substitute, as it is not realistically within walking distance.

Please reject these applications until more suitable plans are made that consider existing homeowners and not just AKS and Lennar Stockholders.

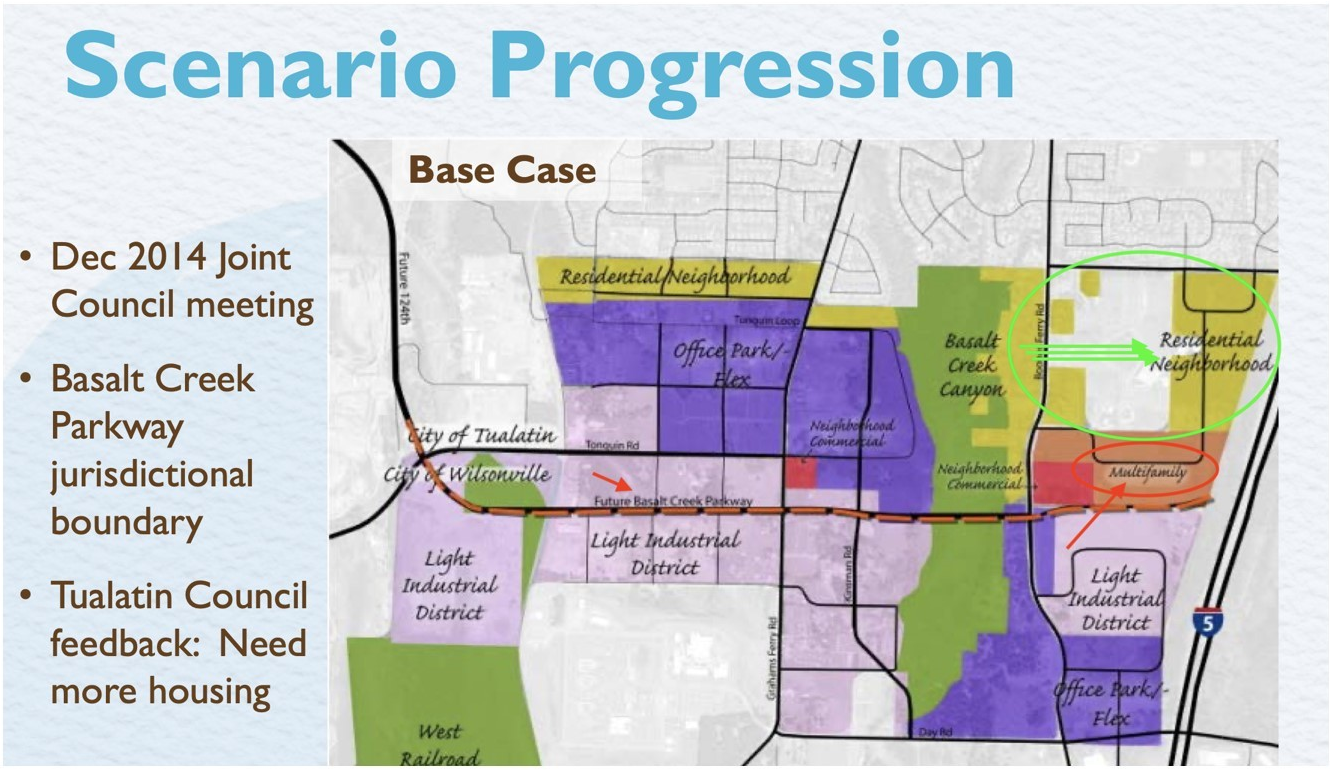
Attachment of email sent to the City Council of Tualatin For consideration at the April 11 City Council Meeting, 7:00 PM

Honorable Mayor and Councillors,

I would like to register my opposition to the zoning change to 10 acres alongside Norwood and Boones Ferry Roads as requested by AKS Engineering and Forestry. (See Figure 3, at bottom).

When Tualatin was working on the Basalt Creek extension of the City limits, we were told, and shown maps that stated that there would be ONLY single family homes next to our neighborhood, and that any apartment complexes would be near the Basalt Creek parkway extension. See Figure 1.

Figure 1. From https://www.tualatinoregon.gov/sites/default/files/fileattachments/planning/meeting/19061/agenda_packet_1-19.17_updated.pdf



I am not generally opposed to apartments (having been an apartment dweller for some time in my earlier years), but it would be better if they were constructed further south below NEW constructed neighborhoods just above the basalt parkway proposed extension to I5 as shown in Figure 1. Building there, the acceptance of the Apartment complex would be baked into the purchase of new nearby homes. New houses built around it would be already valued appropriately, and buyers would go in with eyes open. It might also encourage more lower priced owned homes to be built around it, where there is no opportunity for that now.

It is not apartments themselves I am opposed to, but the intended location next to an established neighborhood of single family owned homes. It has been my experience that apartments have a chilling effect on property values on the adjacent established neighborhood, and will increase crime in the area, where there is almost none now.

There are several websites that contain studies of the effect of apartments next to established neighborhoods. There were two studies that I read in depth. The first one was conducted by Mark Obrinsky and Debra Stein in March 2007 entitled "Overcoming Opposition to Multifamily Rental Housing". As one might expect from the paper title, the aim of the paper was not to enlighten, but to influence using facts that suited the stated goal of overcoming resistance to rental multifamily rental housing.

The second study was "Rental Housing and Crime: The Role of Property Ownership and Management" by Terance J. Rephann Regional Economist at the Center for Economic and Policy Studies Weldon Cooper Center for Public Service, University of Virginia. This second study statistically shows that multifamily rentals actually do correlate to an increase in crime in nearby previously established neighborhoods.

Most of the other studies I found were by contracting interests, with predictable findings.

One pro-apartment argument is that because of the number of families at a single location, of course there would be more crime per-capita. However, one just has to look at the crime map of Tualatin (see Figure 2) supplied by the Tualatin Police department to readily see that the vast majority of crimes, I might venture to speculate 90-95% in Tualatin crime occurs in Multifamily rental locations. As you may also notice on the same map, the area south of Tualatin High school had one dot.

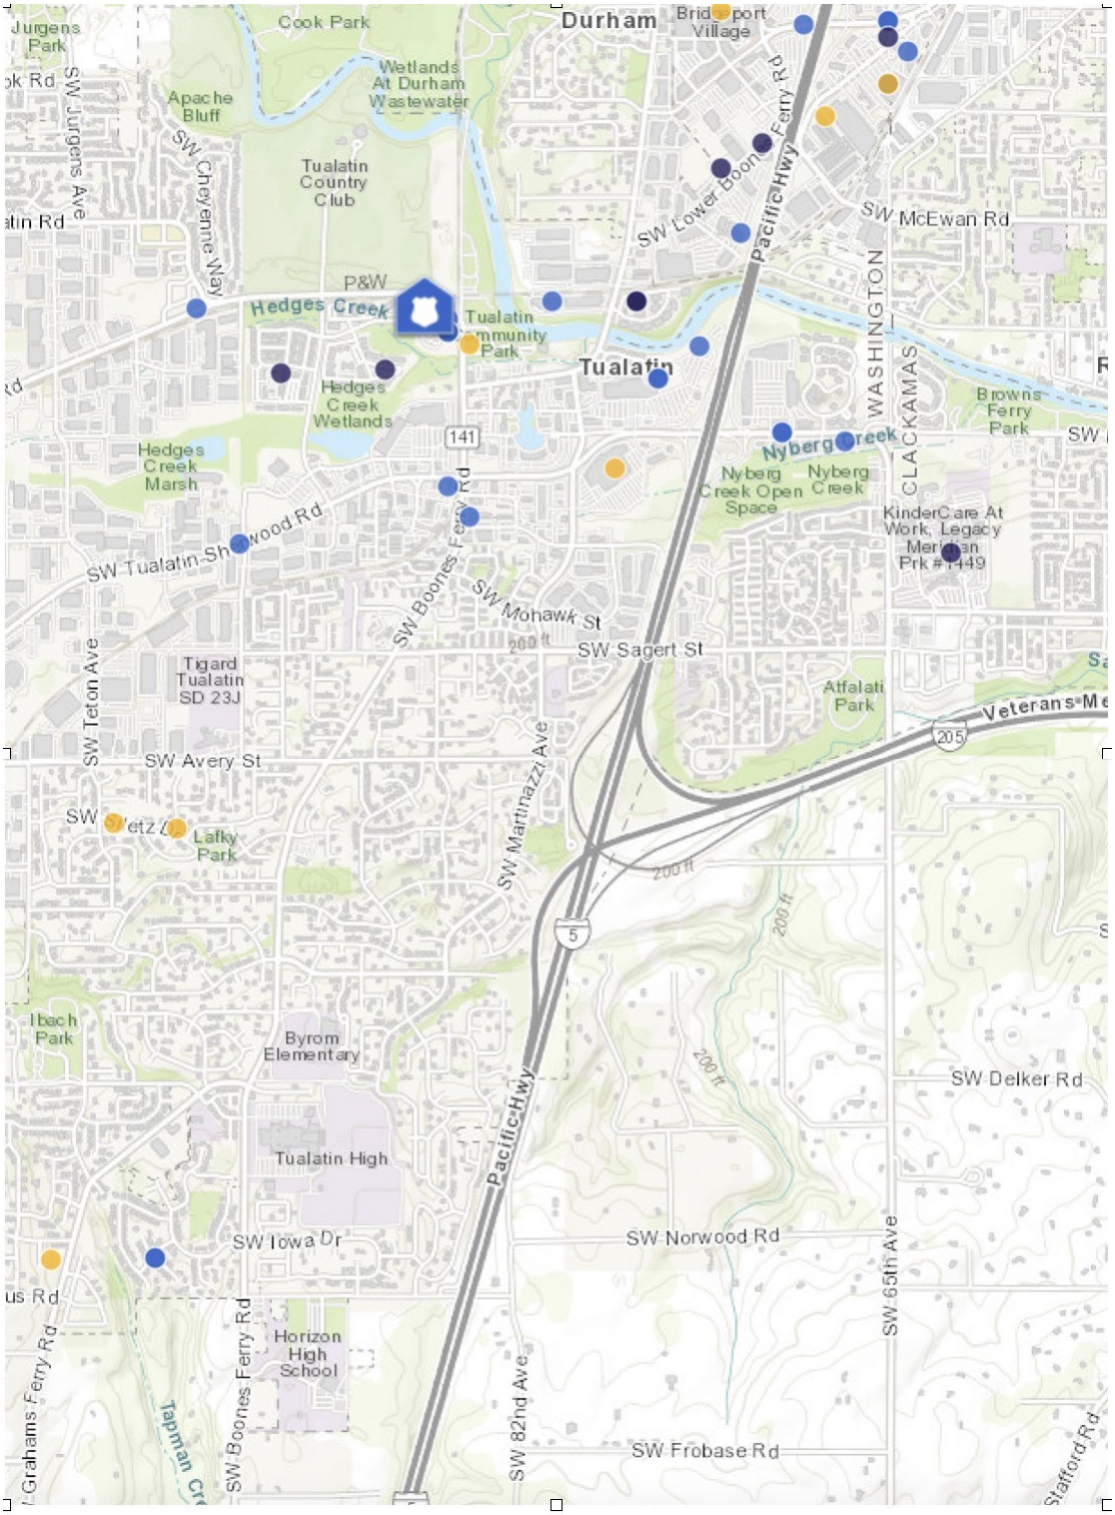


Figure 2 - Crime Map of Tualatin (as of date 4/11/2022).

If increased density is the goal, I would not be opposed to a zoning change for family owned condominiums (but not speculators for rentals), as there is an inverse relationship between home ownership and criminal activity in a neighborhood.

I don't know how far along AKS is with their zoning petition, but would like to stop it if possible, unless a change is made to Condominiums instead of Apartments.

In closing, I would like to reiterate that building multifamily rental units next to an established neighborhood causes property value loss on neighbors in established neighborhoods through no fault or control of their own.

Thank you for your time and best regards.

Re:Letter of Oppostion to rezoning allowing Apartment construction next to an established neighborhoodrr

Honorable Mayor and Councillors,

I would like to register my opposition to the zoning change to 10 acres alongside Norwood and Boones Ferry Roads as requested by AKS Engineering and Forestry that would allow construction of a multi story apartment complex. (See the proposed location in the map in Figure 3, at the end of this message).

When Tualatin was working on the Basalt Creek extension of the City limits, in multiple meetings, we were told, and shown maps that stated that there would be ONLY single family homes next to our neighborhood, and that any apartment complexes would be further south near the Basalt Creek parkway extension. See Figure 1.

Figure 1. From https://www.tualatinoregon.gov/sites/default/files/fileattachments/planning/meeting/19061/agenda_packet_1-19.17_updated.pdf

Scenario

- Dec 2014 Joint Council meeting
- Basalt Creek Parkway jurisdictional boundary
- Tualatin Council

It is not apartments themselves I am opposed to, but the intended location next to an established neighborhood of single family owned homes. It has been my experience that apartments have a chilling effect on property values on the adjacent established neighborhood, and will increase crime in the area, where there is almost none now.

There are several websites that contain studies of the effect of apartments next to established neighborhoods. There were two studies that I read in depth. Hello,

I oppose the rezoning of the Norwood area site for high rise apartments

I am not generally opposed to new housing opportunities for people, but this particular site seems inappropriate for such a development, from an infrastructure perspective. It doesn't appear there are plans to scale transport & commercial infrastructure to accommodate this development, and so I would support its development elsewhere closer to the center of Tualatin. Prior to living in Norwood, we lived in an apartment closer to the city center where such housing styles make more sense.

Thanks,
Brian Glass

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also

adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Bruce Varney

Subject:	Attn Madeleine Nelson - I Oppose the Partition Application

Dear Ms. Nelson,
I am a long-time resident of Tualatin (bought my house in 2008) and have paid property taxes faithfully every year despite increases, worked in Tualatin, shopped and spent money locally, and am very upset at the idea of rezoning the land behind my house into high-density high-rise and building apartment buildings right behind my neighborhood..

This doesn't belong here in Tualatin. I would not have bought here where I did had I known there would be such a callous disregard for our natural resources.

I heartily oppose the partition application because it opens the door to decision after decision by the City, culminating in the approval of the high-density high-rise literally right behind my fence.

You already have Autumn Sunrise. Can't you stop there?

We're not downtown Portland - this is a semi-rural suburban area that cannot support the traffic from even the influx of homes from Autumn Sunrise - let alone high-density residences on the corner. Traffic studies are out of date. They don't take into account current traffic levels in the surrounding areas, and the lack of entry/exit to this small corner on SW Norwood Dr.

Please do not let this partition go through.

Please retain the little natural forest we have left - which are mature trees, providing necessary noise buffer from I-205 and carbon sequestration, that have been standing for over 30 years.

Shouldn't "Tree City USA" comply with Biden's Executive Order 14072: “Strengthening the Nation’s Forests, Communities and Local Economies” - that cities should consult with state, local, Tribal and territorial governments as well as the private sector, nonprofit organizations, unions, and the scientific community to pursue science-based, sustainable forest and land management?

Can the City prove that this has been done?
What is sustainable about cutting down the entire forest and building high-rise apartments?

Please stand with the residents and stop this partition from happening.

Thank you,
Carly

Cc:	Ext - Planning
Subject:	November 2022 = a great month for Blackout Bubenik and the proposed High-Density High Rise Apartments on SW Norwood

Dear Mayor Bubenik,
Four times this morning, between 2:10am and 5am, we experienced power surges from trees falling on the power lines along SW Norwood Rd.
We lost power 3 times throughout ONE day last month at the first big wind storm that came through here, for the same reason. I lost 8 productive hours of work that Friday since I couldn't connect to the internet and I work from home.
This morning I was woken up FOUR times by four separate power surges, where things powered up and then flickered and shut off afterwards, from 2:10 am to just after 5am. Each time, backup battery kicks on for our ADT system and Ziply internet, which causes loud beeps when the power supply is disrupted. Really fun getting up on each occasion to have to reset the whole system due to surges, I love going into a day with less than 4 hours of sleep....

This is intolerable to have Lennar Homes be so cavalier with our last remaining tree border along Norwood Rd. We as residents requested a pittance of a compromise for the horrendous development that is Autumn Sunrise: just a small buffer zone of trees. Lennar took FAR MORE than they agreed to - and you yourself said at the council meeting on 11/28/22 that it was not the council's plan for that many trees to be removed!

We have no recourse now and just have to sit back and have Lennar take the last remaining poor trees down, deal with frequent power outages that literally prevent me earning a living, and put up with this silly plan for a "meandering sidewalk" and "landscaping" in place of a forest that was agreed to as part of the compromise. Where are the forest replanting plans for that area? Why, there are none! We asked for FOREST not a meandering sidewalk. It's insulting and creates more development instead of preserving and replanting ecology critical to the area.

Perhaps you've heard of the 4/22/22 Presidential Executive Order 14072? “Strengthening the Nation’s Forests, Communities and Local Economies.” The order reiterates the Administration’s policy regarding consultation with state, local, Tribal and territorial governments as well as the private sector, nonprofit organizations, unions, and the scientific community to:
pursue science-based, sustainable forest and land management.

This is not science-based, sustainable, or good land management.

And we as residents have to suffer because of poor planning and 0 forest management - and a Mayor going along with all of this.

How do you want to be remembered?

To us here on Stono Drive - you are now "Blackout Bubenik" because it's clear you don't care about what we have to deal with to accommodate these callous, negligent developers and the coming impact of Autumn Sunrise in our backyards.

We're asking for a reasonable compromise.

Leave the last part of the forest on Norwood - just like how Norwoodsaysno.org lays out. We're asking for an even smaller pittance of a pittance - even call it Bubenik Gardens if you want - but leave the forest where it belongs and please STOP re-zoning into high-density living that the area can clearly not support.

They can't even get the power lines to work right for a few weeks.

How many more problems are going to arise because of this - and how will we all see you, Mayor Bubenik because of it?

Sincerely,
Carly J. Cais
SW Stono Drive, Tualatin resident since 2008

To:	Madeleine Nelson
Subject:	Norwood Partition application

Good morning Madeline,

My name is Chad Fribley and I live at 9005 Sw Stono Dr.. Currently I am the Byrom CIO Land Use Officer.

I am writing to you to get on record and express my voice AGAINST the proposed Norwood Partition Application. I, along with many neighbors, are strongly against this project. The City of Tualatin currently has a big traffic issue throughout town but especially in this area. Current development of Autumn sunrise is only going to make problems worse. The position of the city to sit back and wait for the development to finish before makes any improvements to infrastructure, roads and emergency services is not the least bit appropriate. While I have been told that this is how the city has always worked that does not mean that this is how we need to proceed into the future. It is not hard to see the existing problems and project that another 1200 cars are not going to help the situation get better. So looking to develop at such a. Rapid rate without improving road capacity and services is not wise at all.

The other issue with this proposed Partition and future apartment project is the way the developers are trying to get the language changed as it relates to the entire city and not just this project. This to even a casual observer opens the doors to all kinds of potential problems in the future.

I really feel that the city needs to take a hard pause on development projects right now, fix the existing problems and get a better plan for handling all this expansion before any more projects move forward.

In the end we are just asking that you not approve this application, come up with better plans to fix current problems and give serious thought to what best benefits the quality of life for current and future residents.

Thanks,
Chad Fribley

Dear Tualatin Planning Department Members, Planning Commission, City Council Members, and Mayor Frank Bubenik;

I understand Council is currently receiving training on land use laws and procedures from the planning department. I hope with this training you also understand the significant differences in land use categories allowed in Tualatin. The applicant is first trying to change the Tualatin Development Code to allow the RH-HR zone outside the central urban renewal district making a permanent change to the code (text amendment). In doing so they are also trying to apply the highest density zoning (30 units/acre) in an area surrounded by low and low medium density housing (RL, RML) (plan amendment). The Tualatin zoning map shows, there is no place in Tualatin where a RH-HR zone is adjacent to low and medium low housing. That is why RH-HR was originally designated to the core of Tualatin and called a high-rise. These applications are an obvious play at maximizing profit for both the seller and the buyer at the expense of the community.

I mention these facts because allowing small incremental passes and variances to developers has also created a slippery slope for Tualatin and the Citizens. Developers are starting to see they can get away with whatever they want in Tualatin. The word on the street is that Tualatin approves everything. I want to remind you again, you have almost approved 1000 new housing units in Tualatin and you are in line with the 2019 Housing Need Analysis (HNA). As this developer tries to convince you that Tualatin needs more housing, you have already done your duty. Approving this development will also put the Tualatin's Core Opportunity Initiative in severe jeopardy. A high-rise on Norwood Rd is not in the Public’s or the City’s best interest.

Also, in general HB2001 goal was to provide equitable middle housing with a variety of options. The key word is "equitable" in my statement as individuals in my opinion are seeking something they can own, rather than paying for rent their entire life.

As you ponder your decision today regarding the annexation application, ANN22-0003 (applied by a corporation), please read this article by a local resident. This is how the community perceives your past decisions that has created what we are dealing with today.

Norwood Road Zoning Change

BY BOB TAYLOR

This all started when the City approved the Plambeck apartment project, where developers requested to bypass the city zoning for height restrictions. It's mind-boggling why this request was ever approved and set into motion a precedent that is unfolding recklessly. A money grab from non-local developers guised as building "affordable housing," when in fact, they are salivating at the opportunity to build high-end apartments and townhomes in the suburbs (openly advertising as such), which were never designated for such developments. They are asking the City to change zoning to expand the area for such developments, when the designated area already has plenty of lands available for these developments. These developers can't command high-end prices in these designated areas – this is a money grab – not "affordable housing."

They are requesting a change in the language of current zoning – specifically "CHAPTER 44 HIGH-DENSITY HIGH RISE ZONE (RH-HR) TDC 44.100" as follows:

The purpose of the High-Density High Rise (RH-HR) zone is to provide areas of the City that are suitable for high-density apartments or condominiums.

The original proposal the City approved on the Plambeck apartments on Norwood was good. It met the City's broader planning objectives for affordable housing, was within City codes, aesthetically appealing, and not detrimental to neighborhoods' property rights. But later, the developers said, "the property was difficult to develop due to challenging topography," and requested a "variance" to increase to 4 stories (2 stories about the zoning laws). That "argument" has been proven false. All anyone has to do is look at the Lennar new home development on Norwood (adjacent to this project) – I walked the cleared land before improvements – the topography revealed tremendous up & down elevation changes no different than what the adjacent Plambeck original development plan faced. While I'm no fan of Lennar and how they removed their promised "tree preservation zone" (a whole other issue that should never have occurred), Lennar validated the ability to work within those parameters and the existing building codes. The Plambeck developers who purchased the property knew the topography before they bought it, they just wanted to change the rules & the City obliged.

It's simply wrong that this project was approved and what appears to be leading to similar projects being approved. These developments are not benefitting those in need of affordable housing. They only add to an already extremely congested traffic area (trying to bypass I-5 rush hours) while benefitting developer's bottom line at the expense of neighbors of Norwood. We can hire lawyers, but it's time to ask our elected officials to represent the residents of Tualatin – not the non-local, money-grabbing developers!

Bob Taylor has lived in the Tualatin area since 1978.

Article is also attached.

Thanks,

-Chris McReynolds

Dear Tualatin Planning Department Members, Planning Commission, City Council Members, and Mayor Frank Bubenik;

I hope the city is parsing out testimony for the partition and annexation applications as residents that do not even live in Tualatin are commenting. I also wanted to fill in the blanks regarding this generic letter from Horizon Community Church that you may be receiving.

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments in support of both these land use decisions.

As a resident of Tualatin and a member of Horizon Community Church, these two decisions are very important to the future plans for our church and the greater community within the City of Tualatin too.

While these decisions do not approve of any specific future projects for these properties,

The application sent on 1/9/2023 by AKS Engineering and Forestry LLC on behalf of Horizon Community Church, Norwood Horizon Holdings LLC and Vista Residential Partners LLC is to apply a RH-HR (high-rise) zone. This changes the land use zoning on Norwood from Institutional and RL (lowest residential density per TDC) to the highest land use zone category in Tualatin (RH-HR). That is a 500% increase in density.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents.

Tualatin has already approved 891 housing units that have not even been completed yet.

1. 407 single family and multifamily homes (Autumn Sunrise)
2. 114 affordable apartments (Plambeck Apartments)
3. 256 apartments (Commons on the River)
4. 114 apartments (Tualatin Heights, RMH zone change)

5. 45 townhomes (Alden apartments, under review. Not included in the total)

Many in our family and friends in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

With the variety of housing units already approved, I would think individuals would be able to find something affordable. 54% of the projects the City has already approved are multifamily units.

Please approve these two land use applications.

If you approve these applications, this will indicate that tax revenue is more important to the City than the residents and community…the City has no plan for infrastructure upgrades...and you are also ok with clear cutting another three acres of trees…Say no to a high-rise on Norwood Rd.

ADD NAME, ADDRESS AND PHONE NUMBER

RH-HR application is attached.

Sincerely,

Chris McReynolds

Dear Tualatin Planning Department Members, Planning Commission, City Council Members, and Mayor Frank Bubenik;

We are trying to respectfully follow the city's process with land use changes, but there seems to be little oversight or defined process. There is a new neighborhood developers sign on Norwood Rd with no information associated. We hope the city is being transparent with the public regarding this project.

Consider this a public records request. I will also fill out a formal request:

1. The deadline to provide written comments for the annexation application since there is none listed on the notice the public received.
2. The decision on the partition application
3. The plan/text application documents
4. The documents and agenda associated with this new neighborhood development meeting on 2/21/2023

Subject:	Re: No High Rise Zone on Norwood

Dear Tualatin Planning Department Members, Planning Commission, City Council Members, and Mayor Frank Bubenik;

I will let this proposed text amendment speak for itself submitted by AKS Engineering and Forestry LLC, on the behalf of Horizon Community Church, Norwood Horizon Holdings LLC, and Vista Residential Partners LLC. Again, a developer is trying to remove restrictions in Tualatin Development Code to build what they want with little regard to the residents…

CHAPTER 44 HIGH DENSITY HIGH RISE ZONE (RH-HR)

TDC 44.100. Purpose.

The purpose of the High Density High Rise (RH-HR) zone is to provide areas of the City ~~within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club~~ that are suitable for high density apartment or condominium~~s towers~~.

application_form_narrative.pdf (tualatinoregon.gov)

As I have said in the past, codes have a purpose to protect the residents, the environment and the city. It is ok to say no... Do not let developers run our city. Say no to a high-rise on Norwood Rd. We are more than tax revenue…

Subject:	Norwood for Smart Zoning Practices
Attachments:	1875_001 (1).pdf

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a homeowner in Tualatin Woods of ten years, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new Autumn Sunrise development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall these properties are better suited for this type of zoning with local transit, child care, retail and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though the Autumn Sunrise development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5. See Exhibit A.

Issue two regarding institutional infrastructure;

The Tualatin public school system is already dealing with classrooms at capacity, especially the local Edward Byrom Elementary school, where my children and many other families' children I know attend. With the addition of the Autumn Sunrise development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area

once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone. Seen Exhibit B for more detail.

Issue three regarding existing RH-HR zones;

As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, child care and easily accessible public transportation. Seeing how fast Autumn Sunrise is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies;

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

See Exhibit C for more details on a proposed alternate plan.

I, and fellow residents of Tualatin Wood's community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As AKS Engineering and Forestry applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

Link below provides the exhibits for reference regarding our concerns.

Subject:	No High Rise Zone on Norwood

Dear Tualatin Planning Department Members, Planning Commission, City Council Members, and Mayor Frank Bubenik;

It is extremely poor planning to perform a traffic study on Boones Ferry after the Basalt creek residential zones are built out. This is proof that the city has no plan to provide proper infrastructure, especially when the current Autumn Sunrise and Plambeck traffic studies indicate a failed study. It is also a waste of taxpayers dollars as we already know our road infrastructure is lacking with the current residential load, through 2026. Even more reasons to say no to the text amendment change to RH-HR for tax lot 106, 108 and annexation of Washington county. This is also proof that the city is failing to uphold the requirements of housing choices bill 2001.

“They (Cities) are also able to make sure that new housing is built with adequate infrastructure such as water, sewer, and roads. Cities are required to provide supporting infrastructure and the law directs DLCD to help cities figure out how to address their infrastructure gaps.”

Sincerely,

Chris McReynolds

Traffic_Fail.jpg

SUMMARY **AND RECOMMENDATIONS**

The traffic study tor the Plainbeck Gardens development containing 11G aftordable housing apartment units has been prepared to determine the potential impacts at several study intersections along SW Boones Ferry Road. Development of the site is expected to generate a net of 612 daily trips, 4 I AM peak hour trips, and 49 PM peak hour trips.

The tratfic analysis has determined the following results.

- The intersection sight distance standard (450 feet) on SW Boones Ferry Road at the proposed Street H' approach is met in both directions.
- The capacity analysis determined that the Iowa Drive intersection on SW Boones Ferry Road is failing. The stop controlled intersection currently operates LOS 'F in the peak hours and will continue to fail though the year 2026 total traffic scenario. The condition can be mitigated it a traffic signal is insta Iled. As the signal warrant is not met, the crash history is very low (crash rate = 0.22 MEV/year), and tra ffic associated Plambeck Gardens will not be distributed on the Iowa Drive approaches installing a traffic signa1 is not recommend in conjunction with the proposed development.
- The Norwood Road stop controlled intersection will experience failing conditions (LOS 'F) in the year 2026 background and total traffic scenarios. To mitigate the situation will require the installation of a traffic signal. The peak hour signal warrant is met in the year 2026 background and total traffic scenarios. The crash rate of 0.19 crashes/MEV is well below the threshold rate of 1.0 MEV/year. Installation of a signal is not recommended in conjunction with the proposed development as the signal warrant is met due to the background traffic conditions and Plambeck Gardens will distribute only two trips in the worst case AM peak hour on the westbound approach.
- According to the analysis it will be necessary to provide a right turn lane and curb return radius for northbound traffic making a right turn trom SW Boones Ferry Road onto Street 'H'. The safety considerations include the roadway approach volume, number of right turns, and vehicular travel speeds along SW Boones Ferry Road. The turn lane will be built as part of the Autumn Sunrise Subdivision development.
- Review of the intersection crash data furnished by ODOT documented that none of the study intersections experienced a rate greater 0.22 MEV/year and therefore no safety improvements are recommended at the existing locations.
- The Street 'H' approach at SW Boone s Ferry Road will need to be controlled with a stop sign and stop bar pavement marking as part of the Autumn Sunrise Development.

- The site's access occurring at Street H' on SW Boones Ferry Road will be built in conjunction with the Autumn Sunrise Subdivision development project.
- No other intersection improvements are recommended on SW Boones Ferry Road in conjunction with the Plambeck Gardens development at the study intersections including Dav Road, Norwood Road, and Iowa Drive.

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments in support of both these land use decisions.

Please consider the heavy traffic around the Norwood and Grahams Ferry. I am a member of Horizon but I do not want to have the apartment complex to be built. I would consider leaving my neighborhood and out of Tualatin if this plan is approved.

My family and I moved Tualatin and specifically to this area for having less congestion.
Now with the new housing development and pending apartment the congestion and quietness of our neighborhood will be ruined.

Please don't approve these two land use applications.

Thank you for your time .

Respectfully,

Cliff Ingram

Subject:	Objections to SW Norwood Road Partition" File No. PAR 22-000

Attn: Madeleine Nelson

As another concerned Tualatin resident residing near the partition applications areas for "SW Norwood Road Partition" File No. PAR 22-0002, I wish to state my strong objections for the record regarding both proposals for the following reasons:

1. As previously mentioned many, many times, the traffic on Boones Ferry is already very heavy, ridiculously so. There are times of the day the back up heading south starts from north of the high school all the way to the I-5 south bound onramp. On days like this you can not get onto Boones Ferry. If there are cars ahead of you waiting to try to get onto Boones Ferry to go south, it doesn't matter if you want to head north into Tualatin, you will be waiting until the south bound cars can squeeze onto Boones Ferry to get to the front of the line to turn and go into Tualatin. Sadly, this is before adding the hundreds and hundreds of additional cars from the Autumn tract house development currently being worked on off Norwood, nor does it include the other massive tract house development they are also putting in just south on Boones Ferry. That will also add hundreds and hundreds more cars. And then there is the traffic soon to be dumped onto Boones Ferry Road from the Balsat Parkway that will dead-end onto Boones Ferry Road leaving those cars to travel Boones Ferry to continue on to their final destination. There is also mention with the proposed 205 tolls, that people will be going through Tualatin in the attempt to dodge the tolls. The LAST thing we need is zoning changes allowing massive high density high rise building in residential Tualatin areas, as proposed for Norwood adding more traffic to our overloaded neighborhood streets.

As previosly conveyed to you by other concerned citizens, There are many beautiful amenities and parks in our lovely downtown Tualatin as well as services and available land. This is exactly why builders of high-density housing build in urban areas. This planned development will not only make everyone in the surrounding neighborhoods unhappy, it will also not make the tenants happy. As also previously stated, this is a poor "plan" that has not been thought through and literally makes no sense.

Thank you,

Cynthia Ray

Subject: Norwood for Smart Zoning

Attention Madeleine Nelson

Dear Tualatin Planning Department Members, City Council Members, Madeleine Nelson and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoningwith local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;

The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any

additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;

As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and

RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

Subject:	Norwood development

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Dainette Harris

Subject: Please don't break the promise.

Dear Ms. Lombos:

My wife and I built our "forever home" on 89th Place for a reason. The community was beautiful and livable. We planted our lives in this community, raised our family here, planted three cherry trees in the backyard, one for each of our sons. Our holiday get togethers are often here. Our sons and their families visit our home for big events. Grandkids swing on the swings we hung from those now-mature cherry trees. Our heritage is here, our lives and our memories, and we hope, our future.

Re-zoning the area south of Norwood to RH-HR will fully destroy the livability of our community. We didn't build our forever home next to high-rise apartments, because no one would ever choose to do that. With a massive increase in residents living along Norwood Rd, all roads in the area will become impassable most of the day. Our ability to get to downtown Tualatin will become severely constrained, and we already know how bad traffic can get on Boonesferry Rd, today. There will be a jump in crime in our community.

The council may have the legal right to re-zone the area, but it surely does not have the moral right.

We live in a democracy, and We, the Citizens of Tualatin who have built our homes and our lives in Tualatin don't want to see such large developments wreck the livability of our community. If we had known that the City of Tualatin would adopt an "anything goes" development policy, many of us would never have moved here. But we did move here. We invested here. We paid our taxes and built our fine schools, parks, and roads. We honored each other and our community with continuous improvement bonds. With our dollars we paid for a very fine community, supported Tualatin in every way imaginable, but the city seems intent on dishonoring our citizenship and investments by allowing the construction of high-rise, high-density housing nearly in middle of single-family neighborhoods.

Zoning rules are truly a pact, a promise, defining for investors (in the case, Tualatin homeowners) what they can build in an area. By re-zoning land to allow high-rise apartment construction immediately next door to existing neighborhoods that were built under current zoning laws, the city will be tearing up that pact in favor of corporations and their tax revenues, rather than the people who already invested their lives here. A decision to re-zone would be profoundly immoral and incredibly unfair to the families who have made Tualatin their home. Please, don't break our pact.

Sincerely,
Dan Cobb

Subject:	Comment regarding PAR 22-0002.

Dear Ms. Nelson:

Per the TDC rules to approve a partition, the proposed application does not meet criteria and cannot be approved:

Per TDC 36.115 (1), the proposed use must be consistent with the land use zone. - The applicant identifies intention to build high rise high density multifamily apartment homes, not consistent with the present land use zone: RML. The city would first need to approve different zoning before the partition application is approved.

The application does not meet criteria TDC 36.115(2)b: the plan is not consistent with residential design standards, which are defined as those for single family homes, townhomes, duplex, triplex and quadplexes. (TDC 73A.100).

Most significantly, the proposal in the application is in violation of TDC36.010, in that the proposal is not consistent with the provisions of the Tualatin Comprehensive Plan, Tualatin Community Map, and capital improvement plans. These plans make no reference of permitting high density high rise outside of the downtown development zone. Furthermore, the proposal identified in the partition plan violate the following Tualatin Comprehensive Plan Policies and Goals: POLICY 2.1.1 Encourage structures be planned in ways that relate to the site and surrounding context. A high rise high density apartment is not 'in context' with institutional use zoning and RML zoning.

The proposed development involves removal of a forest, in violation of the following elements of the Tualatin Comprehensive Plan: GOAL 2.2 Promote the preservation and establishment of trees throughout the city, in order to protect and enhance the aesthetic character of Tualatin, protect and improve air and water quality, provide noise and visual screening, and protect habitat for wildlife. Even if a tree barrier is left, the destruction of a few acres of forest destroys significant wildlife habitat that would not be adequately replaced by a tree barrier strip. POLICY 2.2.1 Require the establishment and protection of street trees. POLICY 2.2.2 Promote the protection and establishment of trees during the development process. As this proposal involves AKS engineering, which has demonstrated disregard for these provisions in the Tualatin Comprehensive Plan through their work on the Autumn Sunrise subdivision, AKS cannot be trusted to adhere to these policies.

The proposed development described in the application is for multifamily housing on Norwood road, which is not serviced by public transportation. This is in violation of the Tualatin Comprehensive Plan: POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

Please respect the people who have made Tualatin their home, based on the promises codified by the documents referenced above.

Sincerely
Dan Cobb – Tualatin resident for 28 years.

Subject:	Opposed to multifamily, high rise complex off Norwood

My name is Danny , Burns, I've lived in Tualatin for over 10 years. I'm a born and raised Oregonian.
I live on Quinault Lane, which is one block north of the proposed multi family, high-rise complex in discussion here

Not only with this complex exponentially increase the traffic on Norwood, which is a two-lane road. It will also increase the traffic throughout the neighborhood.
This neighborhood so close to Tualatin high school in the elementary school is loaded with children. Ranging from elementary age to high school age.
There is no doubt cars will be taking shortcuts through the neighborhood to get into that climb Plex, increasing the probability of a traject accident taking place.
Also, there are no doubt, will be a rise in crime, car theft in vandalism I hate to be "that guy", We must also consider the wildlife that will be forced out of its current habitat

Oh, there's a small pack of coyotes that live there not to mention other smaller creatures.
The construction will also push rats and mice out of that area and into the neighborhood.
Feel free to check with a pet inspector, Tualatin is one of the most densely populated rat habitats in the Portland metro area.
Trust me, I know I've dealt with the issue

Please please please do everything you can to convey this message and concern I have as well as everyone in our neighborhood has

Sincerely, Danny Burns

Subject:	No high-rise on Norwood! We agree with Norwood for Smart Zoning

We agree with Norwood for Smart Zoning. A high-rise on SW Norwood Rd. is not in the public's best interest. We live next door to Councilor Sacco on Martinazzi Avenue and are very concerned about the increased traffic and drivers "cutting through" via Vermillion and Martinazzi while trying to avoid traffic congestion on Boones Ferry Rd.
David and Judi Wick
—-
Dear Assistant Community Development Director, Steve Koper;

We hope that you had an enjoyable, restful vacation, and you are refreshed with a clear mind.

We also understand that the planning department may be understaffed as there are many land use projects in the works.

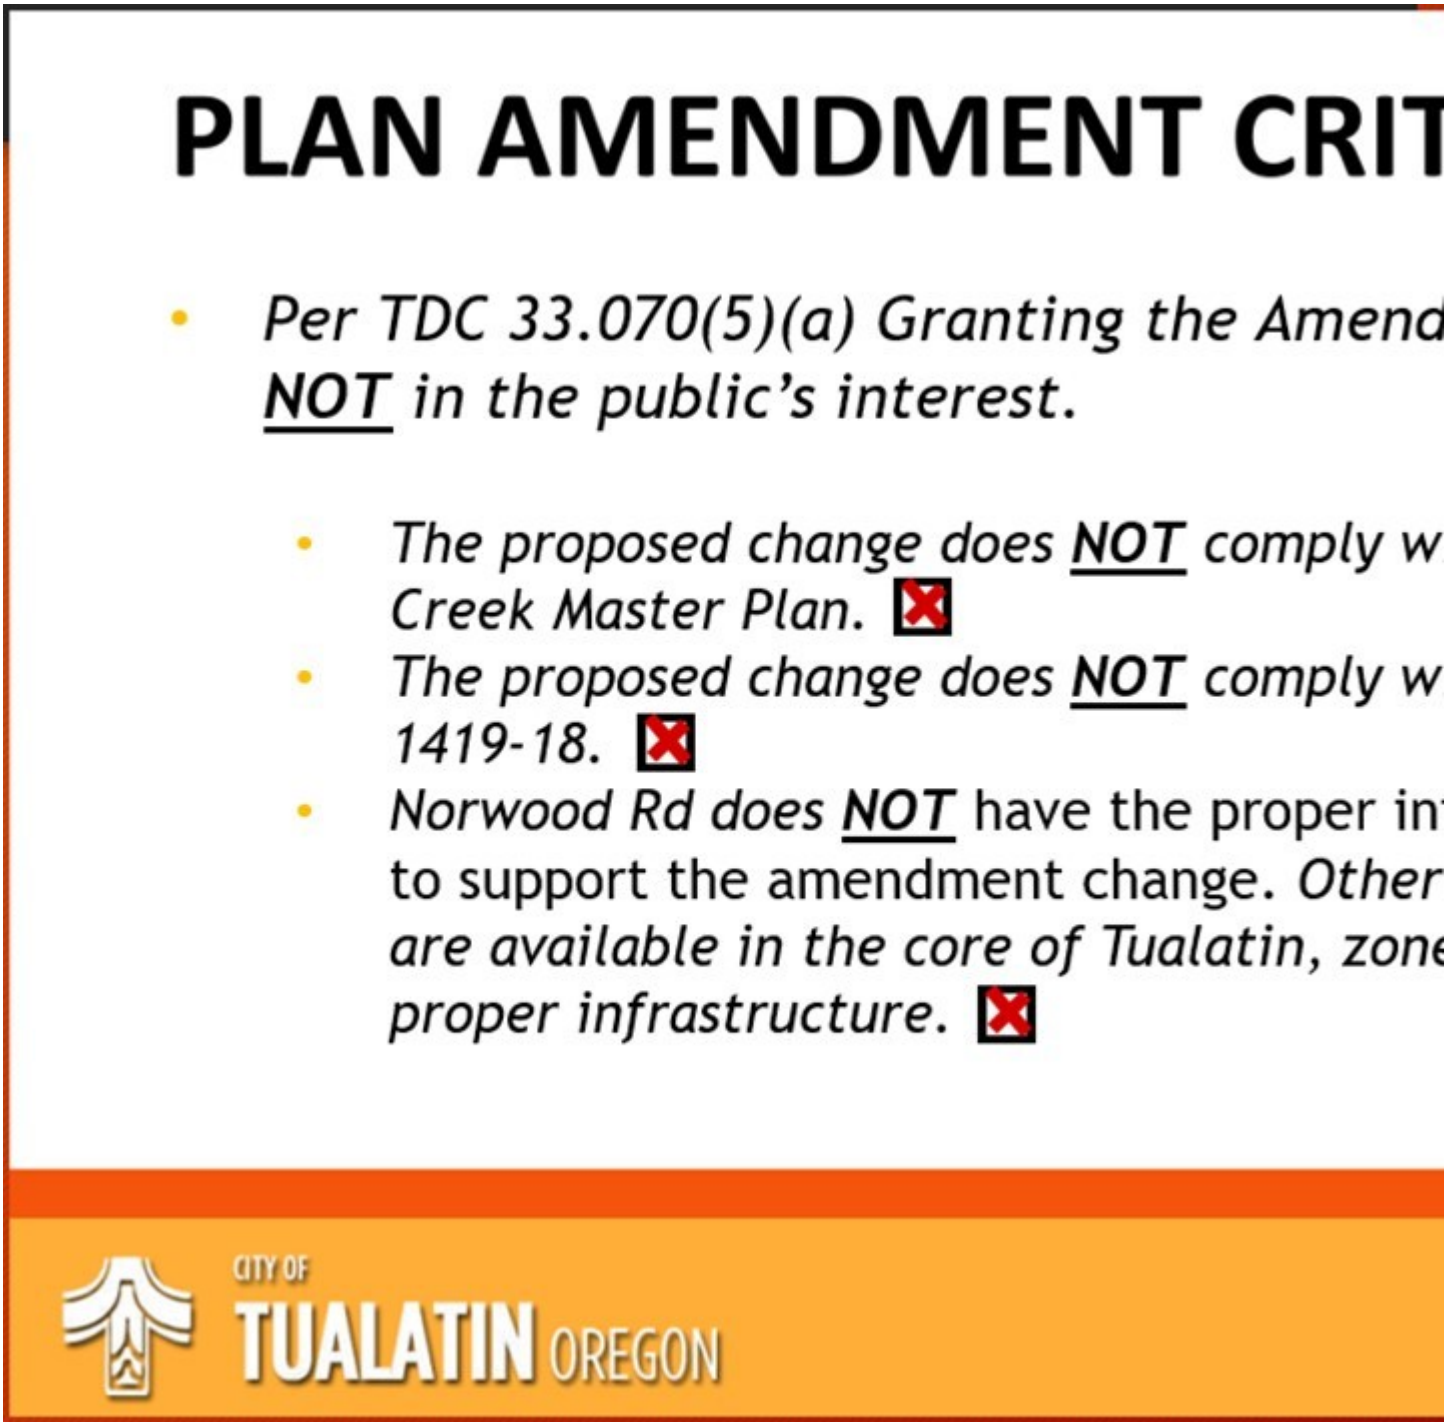
In the meantime, the residents of Tualatin thought it would be helpful to assist you in preparing your presentation to council, regarding the proposed RH-HR plan amendment change on SW Norwood Rd.

If it is not already clear, this proposed change is not in the best interests of the public. Feel free to copy this image below and insert it in your presentation when it's ready.

We have at least 20 more reasons why this plan amendment change is a bad idea, but it was hard for us to summarize in a single slide as done for the Tualatin Heights apartment's plan amendment change.

For that specific project, as a reminder, it was recommended that the housing density increase 35% within the same area.

It is not in the public's interest to approve an RH-HR zone off of Norwood Rd.



We also wanted to remind you about all those residents that were extremely concerned about parking and traffic who currently live around Tualatin Heights. We also want to refresh your memory regarding the statements you made discussing traffic problems in Tualatin.

From the Tualatin's Transportation System Plan Update:

"Director Koper stated there is a lot of employment in our city that passes through traffic in relationship to I-5, which gives us a unique position relative to other cities. He stated it will be best for the City to work with DLCD and partners to find a solution to our traffic issues."

We also hope you work together with the DLCD and the public works department to develop a comprehensive traffic plan that provides new road construction instead of just "meandering sidewalks" and bike lanes on Boones Ferry. We also hope

the city would spend our bond tax dollars more wisely when looking at new land use projects, especially with the drastic escalation of housing projects in Tualatin.

If the city's plan is to put infrastructure upgrades onto the private sector (developer), to save money, the result usually ends up hurting the city and the residents for decades to come. Developers usually find the lowest cost solution to appease local jurisdictions within their project boundary. Their focus is to develop the land they purchased at minimal costs and turn a profit. This also causes a lack of uniformity within each development, with very little possibility of a course correction for the city in the future.

We also do not think it is a coincidence that AKS Engineering and Forestry's office is located near Tualatin's planning department.

When you review the partition, annexation, and plan amendment application with AKS, please also indicate to them, there is other buildable land within Tualatin if they just took the time to look. A simple five-minute search on Zillow found three plots currently for sale. We would also suggest that AKS inform their client of these properties that are very suitable for a high-rise development within the core. Overall, it seems like their client is more interested in profit than really helping our community…

Again, Mr. Koper and Council, say no to a high-rise on SW Norwood Rd.

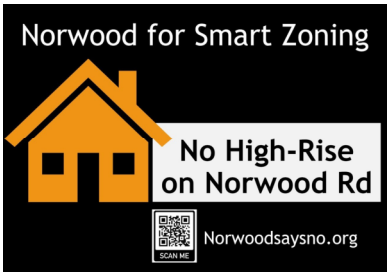
Commit to building a central Norwood Park like we explain on our website and try to rectify the Autumn Sunrise debacle.

If housing is truly needed, keep the current zoning as RL or RML.

Have a Happy New Year,

Norwood for Smart Zoning

--



Together Let's Make Tualatin a Great City!

Subject: SW Norwood Rd Partition Application

Dear Ms. Nelson,

As residents of Tualatin since 2016 we are opposed to the proposed partition application and request that you deny the request by AKS Engineering and Forestry, LLC. From our home at 22390 SW Martinazzi Ave we access Norwood Rd daily and have been very disappointed in how AKS Engineering is handling the Autumn Sunrise development. The proposed addition of high rise high density multifamily apartment homes would add to the already overwhelming amount of traffic onto Norwood Rd and Boones Ferry Rd. This congestion will bring many more drivers through our neighborhood adversely affecting the safety of pedestrians and homeowners.

Thank you in advance for reviewing and taking into consideration the information below, and denying the application by AKS Engineering and Forestry, LLC.

Sincerely,
David and Judi Wick

Per the TDC rules to approve a partition, the proposed application does not meet criteria and cannot be approved:

Per TDC 36.115 (1), THE PROPOSED USE MUST BE CONSISTENT WITH LAND USE ZONE. - The applicant identifies intention to build high rise high density multifamily apartment homes, NOT CONSISTENT with the present land use zone: RML. The city would first need to approve different zoning before the partition application is approved.

The application does not meet criteria TDC 36.115(2)b: the plan is not consistent with residential design standards, which are defined as those for SINGLE FAMILY HOMES, TOWNHOMES, DUPLEXES, TRIPLEXES, AND QUADPLEXES. (TDC 73A.100).

Most significantly, the proposal in the application IN VIOLATION OF of TDC36.010, in that the proposal is not consistent with the provisions of the Tualatin Comprehensive Plan, Tualatin Community Map, and capital improvement plans. These plans make no reference of permitting high density high rise outside of the downtown development zone. Furthermore, the proposal identified in the partition plan violate the following Tualatin Comprehensive Plan Policies and Goals: POLICY 2.1.1 Encourage structures be planned in ways that relate to the site AND SURROUNDING CONTEXT. A high rise high density apartment is NOT 'in context' with institutional use zoning and RML zoning.

The proposed development involves removal of a forest, in violation of the following elements of the Tualatin Comprehensive Plan: GOAL 2.2 Promote the preservation and establishment of trees throughout the city, in order to protect and enhance the aesthetic character of Tualatin, protect and improve air and water quality, provide noise and visual screening, and protect habitat for wildlife. Even if a tree barrier is left, the destruction of a few acres of forest destroys significant wildlife habitat that would not be adequately replaced by a tree barrier

strip. POLICY 2.2.1 Require the establishment and protection of street trees. POLICY 2.2.2 Promote the protection and establishment of trees during the development process. As this proposal involves AKS engineering, which has demonstrated disregard for these provisions in the Tualatin Comprehensive Plan through their work on the Autumn Sunrise subdivision, AKS cannot be trusted to adhere to these policies.

Cc:	Frank Bubenik
Subject:	Attn Madeleine Nelson - I Oppose the Partition Application

Ms Nelson and Mr Bubenik,

In response to the proposed Partition 22-0002 (which I strongly oppose and hope officials will), I am sharing an email exchange between me, TVFR staff and your Ken Froescher and Bryan Lavigne after a treacherous event on Nov 30, 2022. I share it because I believe the project happening on Norwood (directly behind me) has been poorly overseen by the City of Tualatin and that the builder Lennart is grossly irresponsible (specifically in forest removal). It details a second round of wind and fiery power outage due to the removal of the trees that once protected my neighborhood from weather. The remaining trees were cut since then AND we've sustained yet another wind storm in January that damaged many fences and took down trees on the North side of Norwood.

The project has drastically changed our environment. As a newer resident of Tualatin (Dec/2017) I am greatly saddened about my decision to purchase property here - because of the project and because Tualatin seems to welcome extreme growth. We bought this house for the privacy and forest buffer, the view and the quiet neighborhood. The past year, while working from a home office, was filled with stress, grief and anxiety due to heavy equipment noise, chainsaw activity. My backyard, garden is no longer quiet. I actually see car lights on I-5 now, 2 water towers, a cell phone tower, the lights of Horizon Christian's stadium and the entire school. I also hear the noise of I-5 like never before, and no longer enjoy the peace of my back yard. We had grime on our furniture, our plants, cars and well, everything all year long from the disruption. Our roofing project (Mar/April) resulted in some wood repair. We did have new siding painted, but were advised to put off painting the entire house until the project is complete.

I know our future holds more cars, noise and disruption. I know new housing is extreme in terms of density. And I know we need more housing. I am asking the City, it's officials and staff to slow down your approvals, vet sensible projects and think/work outside the box instead of saying 'yes' to everything. In the 5 years I've lived here I've seen thousands upon thousands of square' of commercial property built along Tualatin Sherwood Hwy, but near our downtown, no changes to vacant land and properties. Why not build housing near the transit! Cut down on cars! Use existing resources, rather than leveling swaths of green space. Empty grocery store, empty lots - better place for high density housing.

Please do not approve Par 22-0002. Make the builder improve the neighorhood and keep a balance. Use the space for a park for the thousands of new residents. Keep Tualatin attractive. Allow some garden space. Keep the spirit of community and good health. Pay attention to your existing community members.

This is the email sent to your compliance people. i share it so you are aware of the effects of a poorly managed project:

All,

I was given your contact information by TVFR after calling them about an incident during the November 29-30 storm. Power in my neighborhood was knocked out at about 2:20am on

November 30th during the sustained high winds. Our house was lit up with bright light and what sounded like an explosion directly behind us. A tree, blown by the wind that is no longer buffered by the forest that was formerly there, fell onto power lines and caught fire. Fiery debris from the tree blew into our yard and against our house, and we continued to hear explosive electrical sounds and see flashes from the accident and smell the smoke in our home. My next door neighbor called 911 about fiery debris blowing into their yard as well. I wonder what might have happened if rain hadn't been dampening our area all day.

This was a repeat of the November 4th afternoon outage resulting from high winds, when a tree from the same area fell on the same lines resulting in power losses on and off during the day, and for 4-5 hours that evening. Members of our HOA were in communication with the city about this risk on November 4th, and the HOA members were informed that those matchstick-like trees near the power line were going to be cut down. As neighbors and witnesses to this project, we have wondered since the removal of the majority of trees, why those were ever left standing. The weather comes from the direction that would blow them right onto the power lines.

As I left our neighborhood this morning, several of these trees which are remnants of the logging project (at the new Autumn Sunrise subdivision) are still leaning toward the power lines.

When will they be removed and why weren't they removed before storm season arrived?

Can the City of Tualatin better monitor this large project? We want to feel safe in our homes and the outages seem totally preventable. Any information would be appreciated.

I did hear back from both Bryan and Ken. I am hopeful you are listening to the many objections to the ongoing negative changes in Tualatin. We already have much to figure out about how to live comfortably with our new surroundings, the high wind effects, noise and traffic that we did not ask for.

Respectfully,
Debbie Burchfiel

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Dennis McAllister

Subject:	No high rise in Autumn Sunrise area Until traffic studies prove Boones Ferry Rd. Upgraded to high traffic capabilities.

Sent from Samsung Galaxy smartphone.

There should be no high density residential development in all of Tualatin until the roads are capable of handling the expected traffic flow!

Specifically to that, the proposed zoning change to Multi-Family High Rise off Norwood Rd. should be denied!

Boones Ferry Road is presently in gridlock between N. Wilsonville and Grahams Ferry Rd WITHOUT any homes being built in Autumn Sunrise subdivision. A high density development in that gridlocked area would be catastrophic to traffic flow!

Residents are currently unable to exit SW Iowa St. during the heavy traffic flow both North and Southbound in the afternoons.

With the expected additional traffic on Boones Ferry Road from Autumn Sunrise and other future nearby developments, and the lack of any reliable mass transit on BFR, it will cause massive gridlock in South Tualatin.

I am the Land use Officer for nearby Ibach CIO, and our residents feel their #1 concern is poor traffic flow in Tualatin.

The proposed land use changes to property on Norwood Road will guarantee certain gridlock, decrease of property values and residents leaving our community.

There are much better areas in Tualatin that will fit higher density zoning.

Please vote NO to this zoning change request.

Sincerely,
Ed Casey

Subject:	Pending Partition and Annexation Decisions Partition # PAR-(22)-0002 Annexation # ANN 22-0003

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments.

I am a resident of Tualatin and a member of Horizon Community Church and NOT in support of this decision by the city or the church. Though I understand the perspective of both parties and what they believe will help our community, I STRONGLY disagree and hope you will hear my voice along with the many other voices in the community that ask you to reconsider.

Respectfully,

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik,

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone.

I'm concerned about this impact on the natural areas surrounding us, environmental impact for my 3 daughters, as well as the traffic and issues this will cause getting my girls to and from school. My hope is that another solution can be found that protects our forests and reduces the need for significant additional infrastructure, such as allowing for zoning in spaces that already have the infrastructure available.

As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

Subject:	Additional Apartments in new development south of Norwood Rd.

Good Afternoon,

I'm reaching out to voice my concern along with those in my community about the proposal to build additional apartments to the south of Norwood between I-5 and SW Boones Ferry.

I understood and supported the need for additional housing in Tualatin with the Autumn Sunrise development but am incredibly concerned about these new additional apartments for many reasons.

Concern #1: Traffic. It is evident that the Autumn Sunrise traffic study did not consider additional high density apartments. At minimum, another study needs to be done, though it makes me wonder how aware you are of the massive traffic issues that occur most days around school arrival and dismissal and, more importantly, at evening rush hour when at times it is impossible to get from Norwood down to the I-5 on-ramp in less than 15 minutes.

Concern #2: Crime and Safety. Statistically higher crime occurs in areas of greater housing density. The proposed location of high density apartments is more than twice the difference from the police station as other high density residential areas in the city. A crime and public safety study must be completed to ensure that current public safety officers can respond to incidents in a timely manner and have adequate resources for increased safety concerns on the south edge of town.

Concern #3: Infrastructure. The Norwood Heights neighborhood regularly experiences power outages with mild wind events. Neighbors don't have any information that supports the electrical grid can support Autumn Sunrise, let alone new apartments.

Concern #4: Schools. As the parent of a child (soon to be two children) at Byrom and the husband of an educator in the district, where are these kids going to go to school and how are you going to manage the influx of children/families into the district? I'm concerned that this is an afterthought and that Byrom and Hazelbrook, the lone middle school in Tualatin, will become overwhelmed with the additional high density apartments in addition to the new development.

I would like to reiterate that while I was sad to lose the natural area south of Norwood, I understood the need to provide more housing for families in our community or interested in moving to it. I feel as though this new high density apartment proposal is too much and not within the best interest of current residents and the city as a whole.

Please speak to the residents of Tualatin to address these concerns and communicate how you will evaluate more sensible sites for high density housing.

Thank you,

Fletcher Johnson
Norwood Heights Resident

Subject:	Title of email: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

As a resident of Tualatin over 20 years, I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

AKS Engineering & Forestry, LLC does not have any planning for proper infrastructure to the city of Tualatin, which would give a heavy burden to the city to deal with in the coming years. Also, the contractors and developers mentioned that the future project on Norwood road would be a high end apartment complex, which is definitely not affordable housing to the community. As a resident of Norwood neighborhood for more than 10 years, I ask the City Council and staff to consider not to approve the SW Norwood Road Partition application.

Sincerely,

Florence Lee
8822 SW Stono Dr.
Tualatin, OR 97062

Subject:	Debacle on Norwood

Dear Tualatin City Administration,

Each day that I walk by the Lennar development on Norwood I see a scar on the City of Tualatin. I also see the total abdication of responsibility of the mayor, city council, and city administration. It did not have to be this way. It is my understanding that the City approved the development with a 60 foot buffer zone from the development to Norwood. This would be similar to the buffer zone in front of the Horizon church and school. This buffer zone would be adequate for the development. However, as we can now see, there is not ONE tree where the buffer zone should be.

The developer, apparently with approval from the city, has destroyed the "tree preservation zone" and left a vast open sore to replace what should be an extremely limited buffer zone to a development that is totally out of character of the surrounding neighborhood. I understand the need for additional housing with the growth of the area, but a responsible and concerned city government would not have approved this development with total disdain for the neighborhood and the resulting nightmare that will be Boones Ferry Road, Norwood and the adjacent streets like Pinto Drive where I live.

I believe that this project should be halted until and unless this developer complies to replant native trees in the buffer zone. A compromise of a "meandering sidewalk" with a few shrubs thrown in is not acceptable.

Sincerely,

GARY L. DOMINICK
22467 SW Pinto Drive

Subject: Tonight's meeting

Dear City Council,

Tonight I went to a meeting and the same developers who tricked us last year on Zoom were there in person! Last year they told us that there would be a 200 foot setback of trees between I5 and the new development and they got us to agree to medium density and now they want to buy more land for ultra high density and you can see the trucks on I5 straight through from Boones Ferry. These people are not honest, they are opportunistic developers and I feel that you, the City Council, is allowing this kind of railroading to happen to your constituents and our citizens.

Does everyone on the City Council live in the north end of town? Surely at least one of you can tell the others about the traffic problem we are currently having on Boones Ferry Rd. and the first 500 units haven't been built yet, and the same trickster developers want to add another 275! This is a disaster for our town.

I hope that you are standing up for us against these big companies and their rude lawyers. I know to follow the money. I know Horizon will make a lot of dough and nobody from Horizon had the guts to attend the meeting. Did you? Was our City council even there to hear us? There were about 100 people there trying to say "no" but none of our elected leaders were there or if they were, they didn't say anything.

I have lost trust in you and the developers. This has not been done well. There is no need to say words like "transparency." It is crystal clear that this new development idea is bad for the neighborhood and bad for Tualatin (it seems that Sherwood would get the taxes and we would get the headaches) and yet you are allowing it to be done to us. There doesn't seem to be a part of the process that citizens can say no and be heard-no vote, nothing.

You let us down last time, please don't do it again. Please do not change the zoning where Horizon is now to allow this high density development. Please.

Gillian Stratton

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

Dear City Council Members,

Please do not allow the development of the high rise apartments on Norwood and Boones Ferry Rd. Data projects an increase in crime with statistical support and that location is close to schools. If we need affordable housing in Tualatin, why not put it near the train and bus line rather than next to a school? The indicators are there for something bad to happen in our neighborhood if this development goes through, and you are in a position to help it be avoided. I'm asking you to use your position to protect our children.

Additionally, I live on Iowa Dr. behind the high school. I am a public school teacher in West Linn. I already leave my house before 7 to avoid the traffic jam that is Boones Ferry Rd. Please come and watch what happens to that area from say, 5-6pm. You can avoid making it worse for our neighborhood and I'm asking you to use your position to protect our life styles.

Thank you for reading this,

Gillian Stratton

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Subject:	Proposed High Rise, High Density Development at Norwood and Boones Ferry

Dear Mayor Frank and Tualatin City Council Members,

On the evening of Monday, October 24, 2022, I sat through a presentation by AKS Engineering and Vista Residential Partners at the Tualatin Community Library regarding their plans to file applications to develop the land at SW Norwood Road and SW Boones Ferry Road. They informed us that the proposal will include the following three parts: 1.) annexation, 2.) partition, and 3.) map & text amendment in an effort to change the existing zoning to that of high density high rise for additional apartments.

I am writing in opposition to this Proposed Development. I acknowledge growth and development is necessary within the urban growth boundary, but high density high rise does not seem appropriate for this property.

First, please seriously consider the traffic capacity of Boones Ferry Road. There is already a high density residential development (Autumn Sunrise) coming in across Norwood and the impact on that alone will be significant. For those of us who are a part of this community, it simply is not acceptable to those of us who live in the surrounding neighborhoods. Traffic already diverts through our neighborhood during peak hours. These neighborhood streets will be overrun with traffic avoiding an already over-congested Boones Ferry Road. Imagine the increase after Autumn Sunrise and the 116 units of multifamily next to it, are built and occupied.

Alternatively, you could allow a rezone for neighborhood commercial, which is allowed under the Basalt Creek Plan (high rise is not). Day care, restaurant, small retail, an essentially walkable and central mixed use for the surrounding neighborhoods, would be more welcome. It would be healthy and perhaps would decrease some traffic. Or better yet, given there was almost no green space required of the Autumn Sunrise development, a park would be suitable and welcome in that space. The nearest park is Ibach. A walkable park from Norwood Heights, Autumn Sunrise, and Hedges Creek would be central, valuable and appropriate, and would counterbalance the impact of Autumn Sunrise's high density.

High rise zoning should be limited to downtown, and adjacent to rail. By far the most logical place for that type of high density, high rise, would be the former Haggen's. A mixed use town center would be appropriate and attractive at that location. At Norwood, that type of density and high rise makes no sense.

As stewards of Tualatin, you have an obligation to consider the impacts of this type of development on our community's livability. Housing is very important to Oregon and our community but we need to do it in a thoughtful, deliberative manner that first and foremost does no harm to existing neighbors. I respectfully ask that you keep the zoning as-is, medium residential.

Thank you for your consideration of this matter throughout this process.

Regards,
Heidi Augee
8905 SW Iowa Drive

Subject: SW Norwood Rd and Partition

To whom it may concern,

I object to the partition and future development of a highrise which is not in the best interest of the city nor the residents of Tualatin. Tualatin is in no way prepared nor will benefit from high density housing. The disregard and destruction of mature native trees is shameful to a city that claims to be the city of trees. Our city is being steam rolled by zelus developers without regard to the drastic effects it will have on the livability of Tualatin.

Rest assured land value will not decrease if time, patience and diligence are taken in the planning and growth of our city. Families primarily move to Tualatin for the community of people, not for the immediate industry.

Our schools are not prepared for this growth, our roads are not prepared for this growth, and surrounding neighborhoods will bear the brunt of it's impact.

My hope is that our voted in mayor, city commissioners, and the professionals our city employs will take deep consideration in listening to their neighbors and fellow residents in planning a community that we continue to be proud of and choose to stay in for generations.

Growth is inevitable but we can do better.

Thank you ,

Holly Stuart

19 years-Tualatin Resident

Per the TDC rules to approve a partition, the proposed application does not meet criteria and cannot be approved:

Per TDC 36.115 (1), THE PROPOSED USE MUST BE CONSISTENT WITH LAND USE ZONE. - The applicant identifies an intention to build high rise high density multifamily apartment homes, NOT CONSISTENT with the present land use zone: RML. The city would first need to approve different zoning before the partition application is approved.

The application does not meet criteria TDC 36.115(2)b: the plan is not consistent with residential design standards, which are defined as those for SINGLE FAMILY HOMES, TOWNHOMES, DUPLEXES, TRIPLEXES, AND QUADPLEXES. (TDC 73A.100).

Most significantly, the proposal in the application IN VIOLATION OF of TDC36.010, in that the proposal is not consistent with the provisions of the Tualatin Comprehensive Plan, Tualatin Community Map, and capital improvement plans. These plans make no reference to permitting high density high rise outside of the downtown development zone. Furthermore, the proposal identified in the partition plan violates the following Tualatin Comprehensive Plan Policies and Goals: POLICY 2.1.1 Encourage structures be planned in ways that relate to the site AND SURROUNDING CONTEXT. A high rise high density apartment is NOT 'in context' with institutional use zoning and RML zoning.

The proposed development involves removal of a forest, in violation of the following elements of the Tualatin Comprehensive Plan: GOAL 2.2 Promote the preservation and establishment of trees throughout the city, in order to protect and enhance the aesthetic character of Tualatin, protect and improve air and water quality, provide noise and visual screening, and protect habitat for wildlife. Even if a tree barrier is left, the destruction of a few acres of forest destroys significant wildlife habitat that would not be adequately replaced by a tree barrier strip. POLICY 2.2.1 Require the establishment and protection of street trees. POLICY 2.2.2 Promote the protection and establishment of trees during the development process. As this proposal involves AKS engineering, which has demonstrated disregard for these provisions in the Tualatin Comprehensive Plan through their work on the Autumn Sunrise subdivision, AKS cannot be trusted to adhere to these policies.

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;
I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Itsel O'Dee

Subject:	Pending Partition and Annexation Decisions Partition # PAR-(22)-0002 Annexation # ANN 22-0003

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments in decline of both these land use decisions.

As a resident of Tualatin and a member of Horizon Community Church, I am concerned about having a low income or apartment complex so close to the school.

Please decline these two land use applications.

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

Dear Tualatin City Manager,

I STRONGLY agree with Norwood for Smart Zoning (see email below). A high-rise on Norwood Road is a terrible plan and NOT in the best interest of the public.

I live on SW Boones Ferry Rd. and the traffic implications alone of this plan make it a non starter. Please reconsider.

Jackie

Remember 2 emails ago - where we shared about new signs posted on SW Norwood Rd?

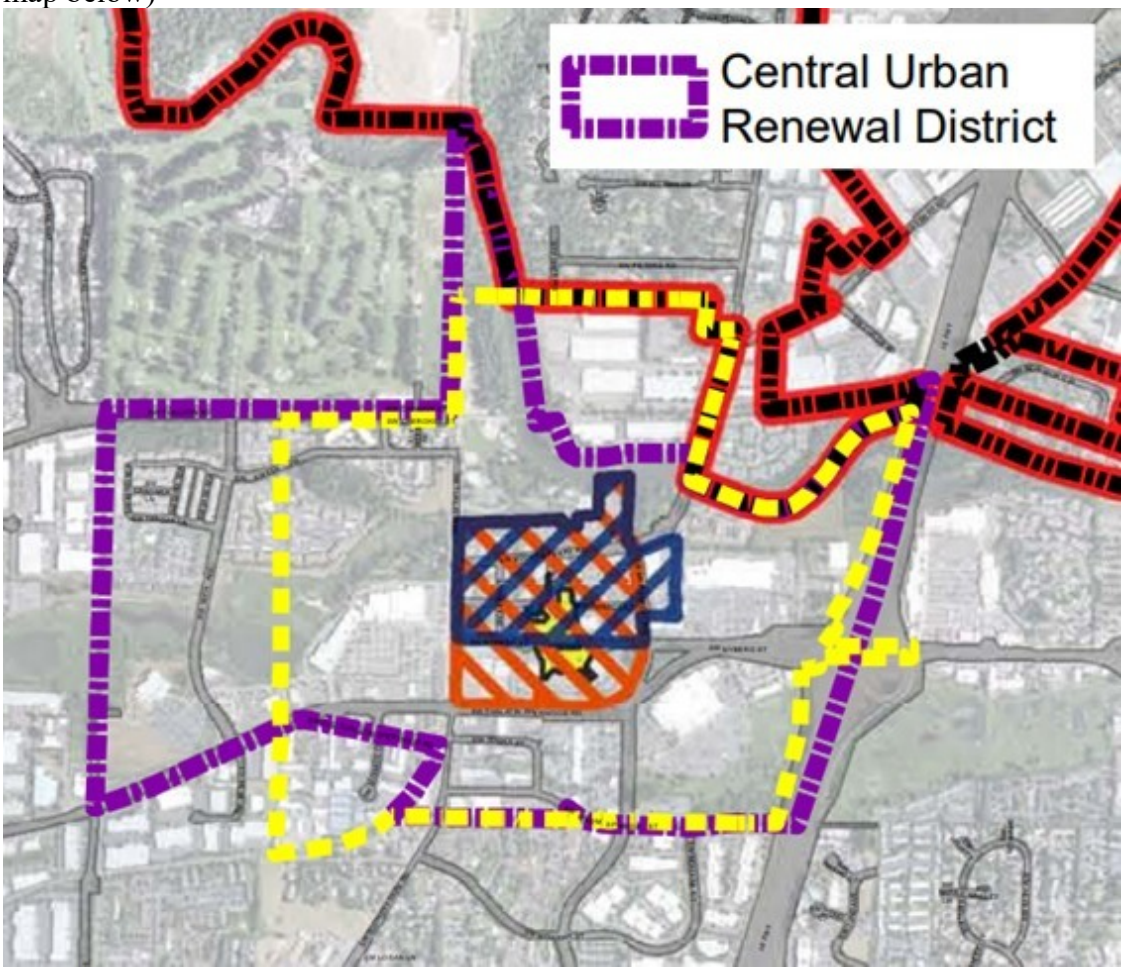
Currently the city is reviewing those applications associated with those signs and right now, the city could stop this whole arduous process from even happening. Also, right now, the public cannot interject directly due to the city code bylaws however, we can express our concern to the decision maker, City Manager, Sherilyn Lambos.

A little more detail…In the partition application, AKS Engineering & Forestry and Vista Multi-Family Residential Partners clearly indicate they will request to change the language in the Tualatin Development Code (TDC) in the future applications they will submit.

Here is what AKS wrote, "Text Amendment to the Tualatin Development Code (TDC) will also be submitted that modifies the TDC's RH-HR language to allow the zoning district to be applied elsewhere in the City."

What do all these words mean? If this code language is changed a high-rise can really be located anywhere in the city, in any district and not just where it is supposed to be in downtown Tualatin.

The current TDC code language states that High-rises are reserved for the core only. This is the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club that are suitable for high density apartment or condominium towers. (see map below)



As we all know, the core of Tualatin has a lot of development to be done, before high-rises should even be considered outside the core. No developer, city, or entity should even be thinking about jamming a high-rise next your home…

A few more facts…

If this process continues it will allow ANY future developer to continue this practice and request the highest density zoning for any project in ANY area in Tualatin.

Along Norwood the change in density would increases housing density by 300-500% from our current zoning.

The City of Tualatin has known about this plan since July 2022, and has not impeded this process…

Here is the petition stating these intentions:
[PAR22-0002 - 23370 SW Boones Ferry Road Partition | The City of Tualatin Oregon Official Website]

What to do...

Developers (and tax revenue) should not be more important to the city than the current residents!

Subject:	No high-rise on Norwood -- Norwood for Smart Zoning

Dear Mr. Mayor and Councilors,

I am a homeowner on SW Boones Ferry Rd. just south of Greenhill Lane. While I am NOT a resident of the City of Tualatin (we are in unincorporated Wash. Co.) my neighbors and I are directly impacted by the gridlock nearly every weekday of cars leaving Tualatin trying to get to I-5.

Here is a recent video I shot from my driveway.

The residential developments planned for SW Norwood Rd. will only exacerbate the traffic, as you know. If the connector bridge comes through as planned, all bets are off. None of these projects make sense.

When the current councilors were new to office, there was a clear voice of reason coming from City Hall regarding the bridge and traffic. I hope you're still questioning and pushing back on the decisions made years ago that no longer make sense for this area.

Thank you for having the courage to stand up and say no to development that will harm our community. It is hoped you can work with Wilsonville and Washington County to devise a plan and solution that makes sense for TODAY, not 20 years ago.

Thank you.

Jackie

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

Please read the attached letter concerning the partitioning and annexing requests received by the City of Tualatin.

Thank you,
Ken and Jan Perry
Stono Drive

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing to express my concerns about the latest proposal received by AKS for the partitioning on Horizon property and the annexation of the acre property on Norwood Road for the purpose of building high-rise apartment buildings on Norwood Road.

The proposal is concerning for so many reasons that many of us in the Bryom CIO Neighborhood have expressed. But what is literally the most concerning on this proposal, is the following from their proposal:

"A Text Amendment to the Tualatin Development Code (TDC) will also be submitted that modifies the TDC's RH-HR language to allow the zoning district to be applied elsewhere in the City. I t appears this request has been made (see below)."

Map and Text Amendment

In conjunction with the Partition and Annexation applications, a Plan Map Amendment will be submitted to the City that will apply the High-Density High Rise (RH-HR) zoning district to the new ±9.2-acre site on SW Norwood Road (this ±9.2-acre site combines Parcel 2 of the subject Partition Application and adjacent Tax Lot 108, as described above). Currently, the RH-HR zoning district is defined as a specific area within the City's Central Urban Renewal Area. A Text Amendment to the Tualatin Development Code (TDC) will also be submitted that modifies the TDC's RH-HR language to allow the zoning district to be applied elsewhere in the City.

This is an attempt on the part of AKS to remove trees and build high-rise apartments everywhere in Tualatin. What AKS has demonstrated thus far:

- They have no regard for the environment. They will say anything to get their plans approved and then they will do exactly what they want once the approval is in place, regardless of whether they've met their commitments/promises. This is what is required (see below). Unfortunately, they have proven that they will not follow through.
  The layout, size, and dimensions of the parcels within the Tentative Partition Plan take into account the topography and vegetation of the site, such that the least disruption of the site, topography, and vegetation will occur from the reasonable development of the parcels.
- They have no concern for the community when it comes to the amount of traffic these endless building projects are placing on our roads. The traffic study concerning Alden Apartments read, from 220 added residences, it would only put 16 more trips on the road during morning rush hour and 18 trips during pm rush hour. This is beyond reason! Are we to believe that all these people are not working? That they're just staying home all day? These estimates can't be correct. But even it were (and more, given the two developments), that's too many to put on an already overcrowded road with no solution in sight.

- **Table 1: Vehicle Trip Generation Estimates**

Land Use	ITE Code	Size (Units)	Daily Trips	Weekday AM Peak Hour			Weekday PM Peak Hour		
				Total	In	Out	Total	In	Out
Existing Use									
Apartments	220	15	101	6	1	5	8	5	3
Proposed Use									
Townhomes	215	45	324	22	7	15	26	15	11
Net New Trips (Proposed – Existing)			**223**	**16**	**6**	**10**	**18**	**10**	**8**

- As shown in Table 1, the proposed redevelopment is expected to result in a net increase of 223 daily trips, including 16 trips (6 inbound, 10 outbound) during the AM peak hour and 18 trips (10 inbound, 8 outbound) during the PM peak hour.

Tualatin will be unrecognizable and impossible to navigate if you continue to approve such egregious plans and changes. Please, listen to the members of the community that you've pledged to support! Stop this madness! Say "No!" to this amendment. Say "No!" to the request for a change of zoning for this land. Say "No!" to the request for a high-rise apartment complex on Norwood Road. Please, do the right thing for the community!

Thanks for listening.

Attached is my first letter concerning the latest AKS proposal. I will continue to send to you the letters I've been sending to the city council.

Please read this letter and consider what is being stated here. We are directly impacted by the decisions that are made by the Mayor and the Tualatin City Council. We should have a voice.

Thanks in advance for your consideration.

Ken and Jan Perry
Norwood for Smart Zoning

To MNelson@tualatin.gov,

I am writing to express my concerns about the latest proposal received for the partitioning on Horizon property and the annexation of the property on Norwood Road for the purpose of building high-rise apartment buildings on Norwood Road.

The proposal is concerning for so many reasons that many of us in the Bryom CIO Neighborhood have expressed to the City Council. But what is literally the most concerning on this proposal, is the following:

> "A Text Amendment to the Tualatin Development Code (TDC) will also be submitted that modifies the TDC's RH-HR language to allow the zoning district to be applied elsewhere in the City. I t appears this request has been made (see below)."

This appears to be an attempt on the part of AKS and the builder to continue to remove all of the trees and build high-rise apartments everywhere in Tualatin. What AKS has demonstrated thus far:

- They have no regard for the environment. They will say anything to get their plans approved and then will do exactly what they want once the approval is in place, regardless of whether they've met the commitments/promises. Unfortunately, they clearly proved this with the Autumn Sunrise development. Below is text in the document. We have seen just the opposite so far with Autumn Sunrise and cannot believe that they will do what it says, or is right, in the future.

> The layout, size, and dimensions of the parcels within the Tentative Partition Plan take into account the topography and vegetation of the site, such that the least disruption of the site, topography, and vegetation will occur from the reasonable development of the parcels.

- They have shown no concern for the community when it comes to the amount of traffic these endless building projects are placing on our roads. The traffic study concerning Alden Apartments read, from 220 added residences, it would only put 16 more trips on the road during morning rush hour and 18 trips during pm rush hour. This is beyond reason! Are we to believe that all these people are not working? That they're just staying home all day? These estimates can't be correct. Even if they were (and more, given the two developments here), that's too many more cars to put on an already overcrowded road (SW Boones Ferry) with no solution in sight.

Tualatin will be unrecognizable and impossible to navigate if such egregious plans and changes are approved. We, the citizens of Tualatin, are saying "No!" to this ridiculous proposal for a change in wording AND to the proposed apartments that will sit on this land. We are trusting our City leaders to listen to our voice of concern and reason. The City Council needs to say "No!" to the wording change and the partition request.

Thank you,
Ken and Jan Perry

Subject:	Norwood For Smart Zoning Reponse to latest partition and annexation proposals
Attachments:	Norwood Says No letter 01182023.docx

Attached is a letter expressing my concerns about taking recommendations from AKS Engineering and (DE)Forestry. They have shown us, in the neighborhood, that their work cannot be trusted.

Thanks, Ken and Jan Perry, 8885 SW Stono Dr, Tualatin, OR 97062.

Planning Division, Attn: Madeleine Nelson,

Per your mailed notices, as a resident near the partition applications areas "SW Norwood Road Partition" File No. PAR 22-0002 by AKS Engineering and Forestry LLC, I wish to state my objections in writing to both of these proposals for the following reason:

We have zero trust in AKS, and any developer working with AKS. We are asking that these changes for the 8 ½ acres on Norwood Drive be soundly rejected. Nothing AKS says can be trusted as, clearly, they will say whatever they need to get an approval and then do whatever they want. Here is clear evidence:

What a tree preservation buffer should look like:

- This buffer has been here for years. The larger limbs are cut back to ensure no power lines are impacted. This is beautiful and natural. Exactly how the Tree Preservation Zone should have looked like for Autumn Sunrise.

What the Tree Preservation Zone at Autumn Sunrise actually looked like:

- You can't look at these trees and not wonder when they will fall on the power lines. Please look at the comparison to an actual tree buffer. This is a flagrant disregard for the City of Tualatin's wishes and directive. And, of course, many of the trees did fall.

Where we are now:

- Why are we here? What we've been told is that an Aborist decided the trees in the Tree Preservation Zone were dangerous. Question: Is this the same Arborist who determined for AKS and Lennar which trees should be kept for this zone? Can we see the results of the study showing which trees needed to be kept and which of the trees were **actually** kept? And who provided that determination?
- Two days following the dead and dying trees falling on power lines, Lennar had a rendering of a new plan for this buffer. Question: Are we supposed to believe that this was not the original plan that Lennar wanted to go with? That they did not intentionally keep trees that could be counted on to fall on power lines and, therefore, lead the City of Tualatin, and PGE, to determine they all needed removed?
- AKS cannot be trusted to advise on what should be done with the trees in **any** new development.

- The City of Tualatin should be irate that Lennar and AKS went directly against the explicit requirement to maintain a Tree Preservation Zone requires action on the part of the City.
- For every project the City of Tualatin engages in with AKS, a neutral Arborist must be hired to ensure they do not pull another stunt like this one. We would also like to see a legitimate Environmental specialist assess the impact of removing trees in this area, so close to a freeway (for future development).
- We all would love for the City of Tualatin to no longer use AKS, or their recommendations, and find a more competent engineering company to advise the council. Or to refuse to work with any developer who is using AKS.

Thanks for listening,
Ken and Jan Perry
8885 SW Stono Drive.
Tualatin, OR 97062

P.S.

It's been stated that we all live in a neighborhood that was once a forest. This is what it looks like to develop a neighborhood while respecting the environment and the trees that have stood for hundreds of years. This is our neighborhood (next page):

Madeleine,

Attached is a letter to you and the City Council concerning the request for partitioning and annexation.

Thank you for considering our feedback.

Ken and Jan Perry
Stono Drive

Planning Division, Attn: Madeleine Nelson,

Per your mailed notices, as a resident near the partition applications areas "SW Norwood Road Partition" File No. PAR 22-0002 by AKS Engineering and Forestry LLC, I wish to state my objections in writing to both of these proposals for the following reason:

As has been stated several times, the potential development of another 276 residences on Norwood Rd. will cause even more cars to back up on SW Boones Ferry Rd. This after adding the already approved Autumn Sunrise. We've calculated over 2000 more trips up and down SW Boones Ferry Road each weekday.

What I hear from the City Council, AKS and the developer is "That's really not our problem." They cite that Wilsonville is part of the solution and, of course, ODOT. What I hear them saying is, the system is broken. We can't address our traffic issues (actually, the city of Tualatin's issues) because it's just too hard. There are too many parts and pieces.

We are suggesting that the City of Tualatin works with ODOT and Wilsonville to address this very real problem. Agencies and governing bodies should be able to work together to address this already untenable issue affecting both Wilsonville and Tualatin (as well as the freeway issues, which are a big part of the problem). All that has been done has served to exacerbated the problem with no clear solution (and adding a traffic light will not solve the problem, by the way).

It sounds like AKS and all traffic studies have washed their hands of anything having to do with Boones Ferry Rd. No more homes should be built, or added, until this issue is addressed. I think this may be the most disappointing part of this situation, that there has been no effort at all to work together on a problem that everyone acknowledges exists. I'd love to see the City of Tualatin be the ones who solve this problem and bring the parties together to make this happen.

As for the apartments proposed for Norwood Rd. (clearly the purpose of the request for annexation and partitioning): This small two-lane road cannot handle this added traffic. I envision the people of the apartment complex being unable to turn left onto Norwood due to traffic. This will lead to them turning right and likely cutting through our neighborhood. This will also need to be addressed with Autumn Sunrise added traffic and the temptation for them to go speeding through our neighborhood

to avoid the Boones Ferry traffic. This will be a very clear hazard for all of us living in the surrounding neighborhood.

I know the city leaders have pledged to protect the safety and quality of life of the people of Tualatin. We have placed our trust in them. I know they can find a way to work together with the other entities to address this issue. Even without these new neighborhoods and the proposed apartment complex, this needs to be addressed. The right thing to do is to say no to the partition and annexation requests. Anything else will only make things worse for everyone in Tualatin.

Thank you for considering our feedback.

Madeleine,

Attached in an email concerning the request for partitioning and annexation. There are some really good reasons why high rise/high density housing is built in urban areas. Building them in suburban areas makes no sense and shows a lack of planning.

Thank you for considering our feedback in this matter.

Jan and Ken Perry
8885 SW Stono Dr, Tualatin, OR 97062

Planning Division, Attn: Madeleine Nelson,

Per your mailed notices, as a resident near the partition applications areas “SW Norwood Road Partition” File No. PAR 22-0002 by AKS Engineering and Forestry LLC, I wish to state my objections in writing to both proposals for the following reasons:

- **Increased traffic:** When populations are concentrated, traffic congestion is a given. **Public transportation and walkability of neighborhoods becomes increasingly important**. The traditional model of developers being required to provide a set number of parking spaces per anticipated user encourages more cars on the road, leading to more traffic issues. With no walkable services near these apartments, and 276 units, it will require people to use their cars causing a big increase of traffic on Norwood Road and SW Boones Ferry Rd.

- **Lack of services:** Traffic and suburban sprawl are already straining our resources. The most logical plan is in-fill urban centers with high density developments. This provides the renters access to critical services. Walkability is the key to high rise/high density housing location.

- **Lack of green spaces:** Amenities like parks and other green spaces don’t in themselves provide income to developers and must be planned in high density developments to provide improved quality of life for would-be residents. There are many beautiful amenities and parks in our lovely downtown Tualatin. This is exactly why builders of high-density housing build in urban areas.

This planned development will not only make everyone in the surrounding neighborhoods unhappy, it will also not make the tenants happy. This is a poor plan (or a complete lack of a plan) and literally makes no sense.

Thank you for considering our input,
Ken and Jan Perry
8885 SW Stono Drive
Tualatin, OR 97062

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.
The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,
Ken and Jan Perry, Stono Drive, Tualatin

Subject:	Norwood for Smart Zoning, Council meeting follow up

Thank you for listening to our concerns at the meeting on 11/28. The few people who attended and spoke represent a very small percentage of the number of people who are legitimately concerned about upcoming proposed zoning changes on Norwood.

I wanted to reiterate what I said at the meeting. The concern I have about the trees is a real threat to our quality of life. There have been arguments saying our neighborhoods were once forests like existed prior to Autumn Sunrise. I beg to differ. The other neighborhoods in our area have retained as many large, 100-year-old trees as possible. However, the Autumn Sunrise development cut down every tree, with the exception of the scraggly, dying trees that they claimed would be a tree buffer. No attempt was made to retain any trees in the development.

Concerning the buffer, this was a diabolical, well executed plan to get rid of all the trees. This was not an unfortunate accident! Not by a long shot. It is amazing to me that one week after three trees fell on electrical lines, the development had a new plan all sketched out and sent to our mailboxes. We had a very small yard project and the plans took at least a month. This was all a part of their original plan to get around the tree buffer.

And if they had an arborist who advised them on the trees, then he/she should be fired. The ones that were kept were absolutely dying and weak! It didn't take an arborist to determine that.

I'm say all of this to explain why we do not trust AKS. We do not trust developers and we have a very low level of trust in all of you right now. You are complicit in the actions to remove all the trees (no tree retention requirements or plan) and the approval of higher density zoning (producing yet more green-house gasses without the help of the absorbing trees). If there was an environmental study, by a true conservation agency, I'd love to see it. If none was done, then it's not too late to have one done on all future projects and to assess current already approved plans for new developments.

Please help us to trust you again. Show us that you care about this community, the air we breathe, the roads we travel on and our quality of life. Do the right thing. When you receive the proposal for the HD/HR zoning change, give a resounding "NO!" Show us that you care about your constituents. We really do want to trust and support you.

Thanks,

Jan and Ken Perry

Subject:	Norwood for Smart Zoning

To the Mayor and Tualatin City Council,

Me again! I am writing on behalf of Norwood for Smart Zoning with a focus on the existing community near this HR/HD zoning change being proposed by AKS.

Imagine living in a neighborhood where you paid good money for your home and you have done so surrounded by trees. You then learn that the City Council has approved a huge, high-density neighborhood and all the trees will be gone.

This changes everything for your neighborhood and for the market price of your home. The approved neighborhood will have some apartment complexes and higher-density homes but the price of the homes will reflect this fact. This is how it should work as it impacts home prices in that new neighborhood. But this is also having an impact on existing neighborhoods and home owners.

For us who are living in long standing surrounding neighborhoods, adding a high-rise apartment complex has an even more profound impact. It causes our home prices to drop for many reasons.

- Regardless of what you may think or say, we know that apartments bring a higher level of crime. My husband is former law enforcement. It could not be more clear to him based on experience that neighborhoods with apartment complexes have higher rates of crime. (Please refer to an earlier email sent to you by Brent Bebee showing crime rates in neighborhoods with apartments.)
- The impact to the traffic, which I've previously noted, is another negative impact to our home values. (Please refer to my earlier email on traffic impacts.)
- The aesthetics of the neighborhood as you drive to your home also has an impact. Where tall evergreens once stood you now have the eye sore of a 4-7 story imposing apartment building. This is not what someone wants to see when looking for a home in a safe and quiet neighborhood.

The answer to this 8 ½ acres: A park

We don't have nearly enough parks in our area. Well, to be accurate, none. Although we know there is a park possibly being planned a half mile plus from here, that is not good enough. (The location of the park in the current plans won't be near any of the neighborhoods.)
This entire area has no park. You continue to raise money for parks (a recent bond measure was just approved) and we continue to only wish that we could have one near us.

This property would be perfect for a park. You cannot ethically continue to build homes without also providing a comprehensive plan that includes parks and open space. Doing so is how cities become concrete jungles with no plan and no open space that no one wants to live in. I've lived in areas where this has happened, and the cities have become low-income, low-quality communities. Do you want that for Tualatin?

We would like for you to consider putting together a comprehensive plan for Tualatin that includes parks and open spaces. This is so critical for the quality of life of those living here. This is what you were elected to do. Please show us you care about all of Tualatin and preserving this lovely community and quality oflife.

Thank you,
Ken and Jan Perry, Stono Drive

Subject:	Norwood for Smart Zoning

To the Mayor and City Council of Tualatin

I sent a message to AKS last week asking that they reach out to the neighboring community to discuss the plan following their completely failed approach at a Tree Preservation Zone. The neighborhood would like large, native trees and a sufficient buffer, as promised.

Needless to say, I have heard nothing back from them. They clearly don't care about this community or about the importance of being wise in how you blend a community in with an existing environment. They continue to take trees down next to the freeway. This is the worst possible action to take when you are near a greenhouse gas producing roadway.

My request is that you do not trust AKS as they will say anything to get approved and then fail to deliver on their promises and do whatever they want. They have continued to prove that they cannot be trusted. Please say "No!" to any of their proposals. We don't need more of what they have given us with Autumn Sunrise.

Please stand up for your constituents and communities. Please just say "No!" And please say no to HD/HR zoning changes that would remove all the remaining trees.

Thank you,
Ken and Jan Perry, Stono Drive

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

I agree with Norwood for Smart Zoning. A high-rise on SW Norwood Rd. is not in the public's best interest.
—-
Dear Assistant Community Development Director, Steve Koper;

We hope that you had an enjoyable, restful vacation, and you are refreshed with a clear mind.

We also understand that the planning department may be understaffed as there are many land use projects in the works.

In the meantime, the residents of Tualatin thought it would be helpful to assist you in preparing your presentation to council, regarding the proposed RH-HR plan amendment change on SW Norwood Rd.

If it is not already clear, this proposed change is not in the best interests of the public. Feel free to copy this image below and insert it in your presentation when it's ready.

We have at least 20 more reasons why this plan amendment change is a bad idea, but it was hard for us to summarize in a single slide as done for the Tualatin Heights apartment's plan amendment change.

For that specific project, as a reminder, it was recommended that the housing density increase 35% within the same area.

<u>It is not in the public's interest to approve an RH-HR zone off of Norwood Rd.</u>

Subject:	Neighborhood feedback: Proposed Apartments at Norwood and Boones Ferry

I hope you will listen to my perspective on the development (high rise apartments) being proposed on Norwood. My husband and I live on Stono Drive and will be directly impacted by your decision.

I have been walking around this area for 3 years. This was a beautiful area with tall evergreens and an amazing ecosystem of animals and birds. I watched the birds (hawks and eagles) as they fed their young and then pushed them out of the nest to fly on their own.

I've also watched as that ecosystem was destroyed to build high density housing. Not a single tree was spared. I watched as the hawks and eagles flew in circles above the devastation which was formerly their home. It was heartbreaking. And my husband has been taking food for the squirrels who lost their homes and food source.

Those beautiful birds have relocated, many of them finding homes in the trees that you are now wanting to remove for high rise apartments. I hear lots of talk of respecting and caring for the environment, but those words seem very empty right now. This is not a little sacrificing of trees to provide some additional housing. This is just complete and total destruction of an environment in order to provide tax money for the city of Tualatin. A city once known as the City of Trees.

In addition to the impact to the ecosystem, there will be an enormous impact to the surrounding roads. The I5 freeway is already totally exposed, adding to the amount of exhaust fumes for the neighborhood. Without the shade from the trees, our temperatures have already risen.

Additionally, this and the Lennar development will pour thousands of additional cars onto our already overloaded roads. If you are driving East on Boones Ferry Road any time after 3 pm, you will encounter up to a five mile backup of cars heading to I5. We've been told no improvements to the roads are necessary. Really? This is a nightmare.

From what I understand, there are other areas already zoned for high density/high rise development. Why are you destroying this area when other land is available for similar housing without causing the destruction this will cause? And why do you zone land only to quickly turn your back on that plan and change the zoning? The only answer must be money.

Please consider the environment as well as the issues the added traffic will create for this area. It's not too late to do the right thing. Please do the right thing.

Subject:	Follow up from Tuesday's meeting with Developers/AKS

I am writing following the meeting held last night, 10/25, at the Tualatin Library with AKS and LSW.

I took from that meeting the following:

- First, those presenting were doing their job in providing information about their plans with this development. AKS just wants to be paid. LWS just wants to build and make money. That's their goal. We all get it.
- They don't care about the neighborhood. In their words, they care about utilities, water and sewer. Period.
- What they don't have is any analysis on the impact to the environment. And the impact to the ecosystem here. That is totally not on their radar. The idling cars will add to our unhealthy air while we have fewer trees to provide much needed oxygen. And the wildlife that were displaced by the Lennar development will be displaced again. All remaining trees will be removed. Getting an analysis of how this will environmentally impact our city is imperative.
- AKS admits that Boones Ferry is a failed road but is adbacating any responsibility to address it. They cited ODOT as responsible for addressing issues. And that they are unlikely to do anything quickly, if at all. Who will do anything about the worsening traffic. This development, with 276 additional apartments, will only exacerbate the already awful traffic on Boones Ferry.
- Pouring 500 additional cars onto Norwood (in addition to cars from Autumn Sunrise) is just ridiculous. AKS says they have no choice but to have the apartment exit onto Norwood. It is not a road capable of handling this additional traffic. It will be a nightmare.

Nothing about his plan makes any sense whatsoever. Please put yourselves in our shoes and consider what you will be doing, not just to us who already live here, but to all of the people who would be moving into this complex. It will be the same nightmare for all of us.

Our next steps will be to attend the City Council meeting in large numbers and make sure you are unable to ignore our serious and valid concerns.

You will be hearing more from me and our neighbors as we fight for what's right in our city.

Subject:	Traffic on Norwood Dr.

Re: Traffic Concerns

Thanks to the city council who approved the Autumn Sunrise project, we will have a significant increase of cars on Norwood drive. This alone will cause a traffic issue.

Now AKS is suggesting that Norwood drive will be able to handle another 200-500 cars from the 276 apartments. This entire plan is just wishful thinking and no thinking whatsoever about those of us who live in the adjacent and surrounding neighborhoods.

As people find it too difficult to get through the Norwood-Boones Ferry light, where do you think they will go? Unfortunately, they will fly through our neighborhood making our roads filled with cars and introducing danger for children and residents who live there. My question: Are you planning to limit our neighborhood (Stono, Vermillion, Iowa, Martinazzi) to local traffic only? Will there be speed bumps added? How will you protect us from the traffic issues your decisions have created?

If you put a light at Norwood and Boones Ferry, it is likely that, given all the added cars, this will become a large back up of cars trying to pull onto an already overloaded road. It is unlikely that the people leaving the apartment complex will be able to turn left onto Norwood going North to Boones Ferry. It will be a frustration to them and everyone else driving

down Norwood. And again, they will seek out another option which likely will be streets in our neighborhood.

This entire project is going to be a nightmare to us who already live here as well as to all of the new residents. Not a fair proposition for anyone.

A park would be a much better option. Or anything fitting the designation of "institutional" would be an improvement on this plan. Please take a moment and put yourselves in our shoes (and cars). This is not the right place in Tualatin to add this large complex.

Thanks for listening,
Jan Perry

Me again…power outages

The Autumn Sunrise development promised a tree buffer on Norwood. They took out all the healthy trees (I guess to sell) and left the weakest trees. They then began to trench next to the trees for the utilities to be laid and weakened the ground even more.

So we sat in the dark last night because the electricity was out again after a third tree fell on the power lines. Two other trees fell yesterday, one at approximately 9 am and another at 2:25 pm. The third tree caused an approximate 4-hour outage.

This is the poorest run and planned project I've ever seen. There has been no concern whatsoever for the environment and the quality of the trees that were retained. Yes, it was windy. But the development has greatly exacerbated this situation. Anyone should have foreseen what would happen when leaving weak and dying trees so near utility lines and the impact of the trenching prior to a predicted wind and rain event.

So, I'm sure you can understand why we are so adamantly opposed to yet another development planned on Norwood. Please stop! We have had enough. Norwood Says No!

Thanks for listening,
Jan Perry

Subject:	Norwood for Smart Zoning

I am copying in a letter that I agree with 100%. But I am also adding my own personal thoughts about the recent loss of power.

On November 14, 2022, We received a letter from Lennar "re: Tree Removal and Replanting along SW Norwood Road within Autumn Sunrise" The letter said (paragraph 3), "As a result of the damage from the storm, the remaining trees within the Autumn Sunrise open space tracts along SW Norwood Road have been deemed by the arborists at both PGE and AKS Engineering to be hazardous and present a danger to the public...Therefore, given the above and having consulted with City staff, the trees are planned to be removed this week under the emergency provision of the Tualatin Development Code Section 33.110.(6)"

It is November 30, two weeks after we received this letter. These weak and sickly trees were NOT removed. I guess what they meant was, "we'll wait until they fall one by one on the power lines and then remove them"?

What you need to keep in mind is, there are people in this neighborhood who rely on medical equipment to sleep at night and to not die. My husband is one of them. He sleeps with a C-Pap machine. Without it, he stops breathing, on average, 27 times an hour. I'm fairly certain he is not the only person who woke up last night gasping for air! Fortunately, we have invested in some battery backups for just such occasions. This was critical for him to know he could still safely sleep if the power went out. It's good for one night only and then needs to be recharged. It's also difficult to get back to sleep after waking in a panic. Needless to say, we had very little sleep last night.

Someone needs to be held accountable for promising one thing and then failing to follow through. Will you be doing that? Will PGE charge Lennar for the times they have had to come out and restore power due to their negligence? Please! A message must be sent. This development, which none of us wanted, cannot continue to distrupt our lives! We are asking that you stand up for your community. It's what you were elected to do.

...jan perry, Stono Drive

Dear Mayor 'Blackout' Frank Bubenik,

I understand it seems legacy is important to you since around 2021-2022, during the mid-peak of COVID, you changed term limits for extending a council member's term in office if the person was going to run for mayor. This directly affected you at the time. Five Council members, including you, decided that it was easier to put this on a ballot versus people petitioning it first as the city's bylaws instructed, citing public safety because of COVID. I bring this up to you now because this seems directly related to how you are forming your legacy for the future.

To elaborate, today your legacy will be known by thousands as Mayor 'Blackout' Frank. The reason I say this is because at 2:40am this morning, thousands of people for the fourth time in the last month lost power due to weakened trees falling on power lines from the Autumn Sunrise development. My three-year-old daughter, scared, woke me up in the middle of the night because of loud crashing noises echoing throughout the neighborhood, caused by the faulted power lines. During the council meeting on 11/28/22 you indicated it was not the council's plan for that many trees to be removed. Unfortunately, that is not an excuse as the city now owns the plan. Council voted in favor of the plan unanimously, 7-0. The planning director recommended the plan, and the planning commission envisioned the plan, who, by the way, was selected by council as well. The caveat to all of this is it could have all been avoided if the planning commission's plan was followed. You see, the commission indicated that 59 acres of land would be dedicated to RML zoning per Ordinance 1418-19 or 59.83 acres to be exact. The current Autumn Sunrise development that council and you unanimously approved, was for 62 acres and 407 homes. Those approximate two acres in excess, could have easily been placed as a reserve buffer along Norwood, instead of jamming as many houses on that plot of land. Heaven forbid reducing the number of homes being built to 390, instead of 407…

I leave you with what you want your legacy to be. Today, thousands will have a different idea of what youmight want your legacy to be perceived as in the end. I suggest saving the last part of Norwood forest and reserve it for Norwood Park and Community Gardens, as the website norwoodsaysno.org is saying to do.

Council, say no to the text amendment change for a high-rise on Norwood Rd.

On Wed, Dec 7, 2022 at 1:36 PM Jan Perry <jrperry.perry11@gmail.com> wrote:

To the Mayor and Tualatin City Council,

Hello again. And, again with the trees. This is a big concern for not just me but many of the neighborhoods and residents of Tualatin.

What a tree preservation buffer should look like:

- This buffer has been here for years. The larger limbs are cut back to ensure no power lines are impacted. This is beautiful and natural. Exactly how the Tree Preservation Zone should have looked like for Autumn Sunrise.

What the Tree Preservation Zone at Autumn Sunrise actually looked like:

- You can't look at these trees and not wonder when they will fall on the power lines. Please look at the comparison to an actual tree buffer. This is a flagrant disregard for the City of Tualatin's wishes and directive.

Where we are now:

- Why are we here? What we've been told is that an Arborist decided the trees in the Tree Preservation Zone were dangerous. Question: Is this the same Arborist who determined for AKS and

Lennar which trees should be kept for this zone? Can we see the results of the study showing which trees needed to be kept and which of the trees were actually kept? And who provided that determination?

- Two days following the dead and dying trees falling on power lines, Lennar had a rendering of a new plan for this buffer. Question: Are we supposed to believe that this was not the original plan that Lennar wanted to go with? That they did not intentionally keep trees that could be counted on the fall on power lines and, therefore, lead the City of Tualatin, and PGE, to determine they all needed removed?

I say this to make the following points:

- AKS cannot be trusted to advise on what should be done with the trees in a new development. If they are using their own Arborist, he/she needs to be fired.
- The City of Tualatin should be irate that Lennar and AKS conspired to remove all these trees. The fact that they went directly against the explicit requirement to maintain a Tree Preservation Zone requires action on the part of the City.
- For every project the City of Tualatin engages in with AKS, a neutral Arborist must be hired to ensure they do not pull another stunt like this one. We would also like to see a legitimate Environmental specialist assess the impact of removing trees in this area, so close to a freeway (for any future developments).
- We all would love for the City of Tualatin to no longer use AKS, or their recommendations, and find a more competent engineering company to advise the council. Or to refuse to work with any developer who is using AKS.
- Because we have zero trust in AKS, and any developer working with AKS, we ask that you reject the proposal for a zoning change to HR/HD for the 8 ½ acres on Norwood Drive. Nothing they say can be trusted as, clearly, they will say whatever they need to get an approval and then do whatever they want.

P.S.

It's been stated that we all live in a neighborhood that was once a forest. This is what it looks like to develop a neighborhood while respecting the environment and the trees that have stood for hundreds of years. This is our neighborhood!

Thank you for your consideration in this matter.

Subject: Annexation/proposed highrise on Norwood

Norwood road is currently a broken up mess. Daily we can't get out of our neighborhood to go east to 65th due to constant construction which appears from a new sign posting will continue til MAY!

Tualatin has already lost control of the current developer and the destruction he made of all the trees. The buffer zone is gone after losing those trees in a storm due to their destroyed root systems from removing acres of trees. This caused 2 day long power outages for our neighborhood from the first 2 winter storms.

We now have to look at the ugly water towers that used to be camouflaged by the trees and acres of land that will house hundreds of home equaling hundreds of cars pouring out onto Norwood.

Tualation decision makers having totally degradated our neighborhood. This is supposed to be the city of trees but you let developers clear cut acres of trees.

Now u want to open up more land on Norwood to another out of state developer who has only $ signs on their minds. They don't care anything about Tualation residents and their neighborhood.This means more clear cutting and cars on Norwood and more months of construction. And more degradation of our neighborhood.

If they want to build a high rise the perfect place is that deplorable corner on Tualation Sherwood and Boones Ferry. Residents of that high-rise would put people downtown walking to restaurants, shopping, grocery stores, mass transit and Tualatin Community park. It would enhance the look of downtown Tualation not add to the continual ruin of Norwood road and our neighborhood.

And while they r putting a high-rise on that corner of Tualation Sherwood they can go over to the long vacated Haden grocery store and build another highrise there. This would really add walking customers to the surrounding areas not more cars on our roads.

Subject:	Norwood High Rise Apartments Development

Greetings;

My wife and I attended the community/developer meeting last night.

Takeaways:

1. We have not one but 2 developments set to go in around Horizon Community Church--one a 500-unit subdivision with a mix of residential dwellings (presently underway), and the other a proposed 276-unit high-rise apartment development. Both, once completed, will add between 1,500-2,500 additional residents to a 38-acre area and as many additional vehicles contributing to the traffic congestion that is already bad at times. This number represents a 10% increase to our city's population on a disproportionately tiny piece of land
2. Other than the proposed aesthetic improvements to Norwood and to the access road to the south of the development, there will be zero additional lanes added to accommodate this huge influx of traffic
3. These apartments are Class A units that, while providing additional needed housing, will not satisfy affordable housing metrics, and there are no other apartment complexes within 1 mile as all the surrounding area is medium to low density residential

Questions:

1. What happens if the City of Sherwood decides to redraw the school district lines so that the area south of Norwood and east of Boones Ferry goes back into the Tualatin school district, effectively forcing the kids of all these households under construction presently and proposed into Byrom, Hazelbrook and TuHS?
2. Just a few years ago, we witnessed the 'improvements' made to Boones Ferry south of Norwood which made aesthetic and safety improvements but added zero lanes to accommodate the growing population. Why weren't lanes added at that time?

Input:

If you listened intently to the voices at that meeting, there was not a single NIMBY in the audience. My impression from the questions asked and input given was that we are for development of additional apartment complexes--both affordable and Class A--but we are not in support of locating them where they will erode the quality of life for Tualatin residents by contributing significantly to traffic congestion with no plans for adding lanes to accommodate the additional traffic or plans for further development of amenities like stores or expansion of schools.

I realize this matter has another side to it--tax revenue--which is always the case with proposed residential development. It can be very tempting to succumb to it as a city evaluating development options but there are other areas in Tualatin where a development of this kind would be appropriate. How about buying the old

Haggen's from the developer and rezoning it and the surrounding parking lot as high density residential? The WES commuter rail is right there, it's in downtown Tualatin with all its amenities and stores and it would offer quick freeway access. Or, how about rezoning some of the light industrial west of town with access to Tualatin-Sherwood road and its existing 4 lanes?

My family and I are very supportive of the development of additional housing; particularly as long as it's done in the appropriate area, but we don't have any desire to be another Beaverton or Hillsboro. Quality of life, a small population and access to the freeway were all major contributing factors in our decision to move here as a family 16 years ago. We will fight this development with everything we've got because it is inappropriate at its proposed location without adding traffic lanes to support the additional population growth. I would urge you not to give in to the temptation of the additional tax revenue of this issue because I (and I would suspect many people like me) are going to be paying attention to how you vote in the matter, and we will do our best to vote you out of office if you support it.

Sincerely,

Jason Bennett

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

Hello. My family and I have lived in Tualatin for 12 years and we are extremely concerned about a high-rise on Norwood. Traffic is already terrible and this will make it so much worse.

I agree with Norwood for Smart Zoning. A high-rise on SW Norwood Rd. is not in the public's best interest.

—-

Dear Assistant Community Development Director, Steve Koper;

We hope that you had an enjoyable, restful vacation, and you are refreshed with a clear mind.

We also understand that the planning department may be understaffed as there are many land use projects in the works.

In the meantime, the residents of Tualatin thought it would be helpful to assist you in preparing your presentation to council, regarding the proposed RH-HR plan amendment change on SW Norwood Rd.

If it is not already clear, this proposed change is not in the best interests of the public. Feel free to copy this image below and insert it in your presentation when it's ready.

We have at least 20 more reasons why this plan amendment change is a bad idea, but it was hard for us to summarize in a single slide as done for the Tualatin Heights apartment's plan amendment change.

For that specific project, as a reminder, it was recommended that the housing density increase 35% within the same area.

It is not in the public's interest to approve an RH-HR zone off of Norwood Rd.

We also wanted to remind you about all those residents that were extremely concerned about parking and traffic who currently live around Tualatin Heights. We also want to refresh your memory regarding the statements you made discussing traffic problems in Tualatin.

From the Tualatin's Transportation System Plan Update:

“Director Koper stated there is a lot of employment in our city that passes through traffic in relationship to I-5, which gives us a unique position relative to other cities. He stated it will be best for the City to work with DLCD and partners to find a solution to our traffic issues.”

We also hope you work together with the DLCD and the public works department to develop a comprehensive traffic plan that provides new road construction instead of just “meandering sidewalks” and bike lanes on Boones Ferry. We also hope the city would spend our bond tax dollars more wisely when looking at new land use projects, especially with the drastic escalation of housing projects in Tualatin.

If the city’s plan is to put infrastructure upgrades onto the private sector (developer), to save money, the result usually ends up hurting the city and the residents for decades to come. Developers usually find the lowest cost solution to appease local jurisdictions within their project boundary. Their focus is to develop the land they purchased at minimal costs and turn a profit. This also causes a lack of uniformity within each development, with very little possibility of a course correction for the city in the future.

We also do not think it is a coincidence that AKS engineering and Forestry’s office is located near Tualatin’s planning department.

When you review the partition, annexation, and plan amendment application with AKS, please also indicate to them, there is other buildable land within Tualatin if they just took the time to look. A simple five-minute search on Zillow found three plots currently for sale. We would also suggest that AKS inform their client of these properties that are very suitable for a high-rise development within the core. Overall, it seems like their client is more interested in profit than really helping our community…

Again, Mr. Koper and Council, say no to a high-rise on SW Norwood Rd.

Commit to building a central Norwood Park like we explain on our website and try to rectify the Autumn Sunrise debacle.

If housing is truly needed, keep the current zoning as RL or RML.

Have a Happy New Year,

Madeleine Nelson

Subject:	Proposed High rise development

To Whom it may concern:
I firmly believe the further development of the property along Norwood ave and Boones Ferry Rd creates mor issues than it will solve, chiefly among them is the increased traffic and resulting longer gridlock along those roads, traffic diverting through neighborhoods to try to avoid gridlock and the dangers that will bring with it, also since the city has determined that more affordable housing is needed, the proposed class A high rise will bring none of that it will only serve to raise rental prices in an already tight market.
thank you for your time
Jim Stuart
Tualatin resident and for 19 years

Per the TDC rules to approve a partition, the proposed application does not meet criteria and cannot be approved:

Per TDC 36.115 (1), THE PROPOSED USE MUST BE CONSISTENT WITH LAND USE ZONE. - The applicant identifies an intention to build high rise high density multifamily apartment homes, NOT CONSISTENT with the present land use zone: RML. The city would first need to approve different zoning before the partition application is approved.

The application does not meet criteria TDC 36.115(2)b: the plan is not consistent with residential design standards, which are defined as those for SINGLE FAMILY HOMES, TOWNHOMES, DUPLEXES, TRIPLEXES, AND QUADPLEXES. (TDC 73A.100).

Most significantly, the proposal in the application IN VIOLATION OF of TDC36.010, in that the proposal is not consistent with the provisions of the Tualatin Comprehensive Plan, Tualatin Community Map, and capital improvement plans. These plans make no reference to permitting high density high rise outside of the downtown development zone. Furthermore, the proposal identified in the partition plan violates the following Tualatin Comprehensive Plan Policies and Goals: POLICY 2.1.1 Encourage structures be planned in ways that relate to the site AND SURROUNDING CONTEXT. A high rise high density apartment is NOT 'in context' with institutional use zoning and RML zoning.

The proposed development involves removal of a forest, in violation of the following elements of the Tualatin Comprehensive Plan: GOAL 2.2 Promote the preservation and establishment of trees throughout the city, in order to protect and enhance the aesthetic character of Tualatin, protect and improve air and water quality, provide noise and visual screening, and protect habitat for wildlife. Even if a tree barrier is left, the destruction of a few acres of forest destroys significant wildlife habitat that would not be adequately replaced by a tree barrier strip. POLICY 2.2.1 Require the establishment and protection of street trees. POLICY 2.2.2 Promote the protection and establishment of trees during the development process. As this proposal involves AKS engineering, which has demonstrated disregard for these provisions in the Tualatin Comprehensive Plan through their work on the Autumn Sunrise subdivision, AKS cannot be trusted to adhere to these policies.

Subject:	Attn Madeleine Nelson - I Oppose the Partition Application

Ms. Nelson,

Please be advised that I oppose the partition application. The intended use by the developer -- high rise, high density -- is totally inappropriate for this area, and is a massive overreach. The burden on traffic and infrastructure is inappropriate and would be harmful to existing residents, especially given the unknown impact of Autumn Sunrise and Pambeck Gardens.

At a minimum, I urge you to deny approval until the known impacts of those two developments is fully understood, meaning they are built out and we understand the impact on traffic and schools.

Most folks here would not be opposed to the partition if the development remained at current density, which is low to medium residential.

Thank you for your consideration of my input.

Joel Augee, concerned neighbor

Subject:	Proposed High Rise, High Density Development at Norwood and Boones Ferry

Dear Mayor Frank Bubenik, Tualatin City Council Members (cc Tualatin Planning Department Members),

I attended and listened to the presentation last night at the Tualatin Community Library by AKS Engineering and Vista Residential Partners regarding their plans to file multiple applications to develop the land at SW Norwood Rd. and SW Boones Ferry Road as high density high rise (the "Proposed Development").

As a resident in the Norwood Heights neighborhood, I am writing in opposition to the Proposed Development and ask that as stewards of Tualatin, you do the same. Consider the following:

1. High density high rise is absolutely not appropriate for this property. The impact it would have on those who live here, coming on the heels of the high density residential development known as Autumn Sunrise, is not acceptable to those of us who live in the surrounding neighborhoods. The side streets (Iowa Drive, Martinazzi, etc.) will be overrun with traffic avoiding an already over-congested Boones Ferry at peak hours. Imagine the increase after Autumn Sunrise and the 116 units of multifamily next to it, are built and occupied. There is no additional capacity for high rise apartments in this area.
2. You are stewards of Tualatin. The interests of those who live here matter and must be part of the equation. We have lived here for years, we pay taxes, we are volunteers, coaches … we are the community. We daily experience the functioning of our neighborhood, and we acutely understand and appreciate the impacts of new development. The representative of AKS said she took only into consideration the City's housing needs, and that the high rise zoning designation is necessary because of the housing crisis. She did not take into account the impact to and needs of existing neighbors. We take strong issue with this, and this is where you come in. No amount of "housing crisis" justifies allowing this concentrated, high rise density and the resulting impacts to Tualatin's livability. The housing crisis is absolutely not a justification to turn Tualatin into Portland-style density. If we wanted Portland style density we would have selected Portland to raise our families. Instead, we chose the lifestyle of Tualatin. Saying that the housing crisis means that high rise apartments are necessary here, without balancing the interest of those who live here, is simply a fallacy. How much would you degrade the Tualatin lifestyle in the name of more units? As stewards of Tualatin, you have the right, and a moral obligation, to consider the impacts on the community, and say no to excessive, harmful density. Keep the zoning as-is, medium residential.
3. A more appropriate use for this property would be a park. There was almost zero green space required of Autumn Sunrise. Every single interior tree was cut. The nearest park is Ibach. A walkable park from Norwood Heights, Autumn Sunrise, and Hedges Creek would be central, valuable and appropriate, and would counterbalance the impact of Autumn Sunrise's high density.
4. Alternatively, you could allow a rezone for neighborhood commercial, which is allowed under the Basalt Creek Plan (high rise is not). Day care, restaurant, small retail, an essentially walkable and central mixed use for the surrounding neighborhoods, would be welcome by many of the neighbors. That is what this area of Tualatin is sorely missing. It would be healthy and it would decrease car trips. Alternatively, keeping the "neighborhood commercial" tract all the way to the south, where it is currently located in the Basalt Creek Plan (along the future Basalt Creek extension), makes little sense, as it would be on the periphery of the neighborhoods and not central.

5. High rise zoning should be limited to downtown, and adjacent to rail. By far the most logical place for that type of high density, high rise, would be the former Haggen's. A mixed use town center would be appropriate and attractive at that location. At Norwood, that type of density and high rise makes no sense.

Thank you for your continued consideration of these very important matters,

Joel Augee
8905 SW Iowa Drive

Subject:	No high-rise on Norwood! Long Term Expansion of the Urban Growth Boundary is the Answer

To Tualatin City Council,

I am writing to reiterate my strong opposition to the pending application for high density, high rise zoning of the 8.2 acres along Norwood Road, and share some thoughts on what you can do as stewards for this community.

The developer's engineers, at the community meeting, scolded us and told us that we need this high density to solve the housing crisis, that it is necessary because of Oregon's land use laws. That is simply false. Do not believe that false narrative. We do not need to harm our livability for this crisis. This crisis was caused by the lack of long term planning, and in particular, lack of reasonable expansion of the urban growth boundary over time. In short, it was caused by long term neglect. If you want to solve it, this requires a long term effort and commitment to do so, through smart planning. These problems were not created in an instant, and cannot be solved by knee jerk reactions. I suggest that you need key goals to guide you in your long term planning, to do it in a smart and reasonable way, and that the #1 goal should be not to harm your current citizens (note: I am not saying no impact, but I am saying no harm), and this means, not changing the nature of our density. Tualatin (and other cities) CAN expand the urban growth boundary AND NOT increase density. I suggest this should be the long term, reasonable goal and approach, as it is best and fair for all. So please, work on long term planning that preserves livability by maintaining, and not destroying, current, reasonable density. For example, if housing is the primary need, then consider changing some of the zone in Basalt Creek to medium/low density residential (from industrial).

Jamming a high rise apartment complex, with all the traffic impacts that it will entail, on top of the new subdivision (Autumn Sunrise) and the upcoming new apartment complex (Plambeck Gardens) is not responsible or reasonable, and as stewards of our community, I ask that you reject it. Frankly, this is not even a close call or a tough decision. Since the 2019 housing study, we have already met approximately 80% of the City's new housing needs for the next 20 years! There is no need to panic, no need to jam a high density, high rise apartment complex in our neighborhood. Frankly, the idea of changing zoning to high density, high rise is a massive overreach, and a clear attempt to capitalize on the fear of the moment regarding housing. After it is built, what can be done then if it is a big mistake? Think about that question .... what can be done? Will the developer remain somehow accountable? We know the answer. The residents will be stuck with 100% of the impacts, while the developer leaves with 100% of its profits. This is nothing against developers per se .... we need them, we should be grateful for good development, and we need smart development, to reasonably grow our City. But when a developer proposes an obvious over-reach, we also need to say no to the zone change, and demand smart zoning.

Again, please think big picture. Expand the urban growth boundary reasonably and preserve our density and livability in the process. Do not jam high density into our neighborhoods. That is not the nature of Tualatin, nobody would win, and it would create a whole host of new and expensive problems, both seen and unforeseen, leaving only the residents to endure the fallout.

So what about the location in question? Use it as a park -- that would be really welcome. There is almost zero green space required of Autumn Sunrise (and in this way, you can make up for that planning disaster). An important note on that, and community trust: We have no confidence in the planner after he has allowed the strip of trees to remain along Norwood, repeatedly knocking out our power at least 10 times. That trust was lost a long time ago. And now the trees are gone too. It is a failure and a joke from a planning perspective. Look, it isn't rocket science -- an arborist should have been required to determine whether it is wise to keep shallow rooted trees along power lines after you remove the protective forest. I hear that the plan was for the developer to put the power lines under ground at a later point in time, AFTER the forest was removed. Brilliant! But how about reversing that sequence? How about putting the lines underground FIRST, and THEN cutting down the forest. I think if you asked a 5th grader which was the proper sequence, you would have gotten a better answer. If we felt the City of Tualatin cared about our neighborhood, and our livability, that obvious sequence would have been a condition for Autumn Sunrise. Apparently it wasn't.

Say no to high density high rise. If the developer wants to keep the current zoning, that is fine, although we think a park makes far more sense. Absent a park, neighborhood commercial would be smart zoning and would be welcome by many. Lastly, again, keep the zoning the same and do not increase density. Homes and duplexes could be built in the proposed location at the same density as surrounding neighborhoods.

Thanks,

Joel Augee, concerned citizen near Norwood Road

Subject: Norwood Developments

Hello Madeleine,

First, thank you for serving the public. I can empathize that it's a very tough occupation where everyone seems to bark and complain without offering solutions.

I wanted to share some concerns and possible solutions that I have about the Norwood HR/rezoning effort being put on the table. We (my wife and two small kiddos 7 Ellie & 3 Clark) live at 9345 SW Stono Dr, and our house faces the south - right across the street from where this project is located. I'll include a screenshot as well.

We're very concerned about the impact of traffic around the intersection of Boones Ferry and Norwood. I'm cognizant of the traffic light going in there, which is fine, but hundreds more vehicles along these single lane roads doesn't add up to safety. Couple that with the already halfway through Autumn Sunrise (Plambeck Gardens as well), and it's a tidal wave that we can see coming - and preemptively do something about.

This parcel of land would serve better as a community gathering place or park, where kids and families of all abilities can enjoy. A splash-pad, a ADA play structure, a sand pit, an outdoor stage/auditorium for arts. Just a few suggestions for the acreage. Even a small market, coffee shop, or other small family-forward establishment

would be a better improvement for this spot of land. This is also potentially important due to Lennar Homes developers not saving some space for a future park for Autumn Sunrise either!

I understand that Horizon Christian wants to sell this *donated land* so they can build an auditorium. But at what cost to the adjacent neighborhoods? Collectively, Norwood, Victoria Woods, 65th Communities and more are staring at these rapidly implemented projects with very wary eyes. I'm also curious to know how much the Church in question financially helps the city of Tualatin in general. The Church has disregarded their neighbors after a few of us have asked them for a more positive community-forward solution.

We encourage having more housing because people need places to live - and more affordable places at that. We don't think that a semi-luxury high rise condominium is a smart decision for the sleepy intersection and surrounding family-oriented neighborhoods. A much better alternative spot for housing would be the area around the WES station. Right next to transit, not in a food desert, bicycle friendly, and many other close by amenities.

The retail space just sits, unoccupied, because the owner isn't helping/improving the city of Tualatin and they haven't done anything to the space in a very long time. Is there a way to talk with the landowner and persuade them to improve the area or have that be zoned for HR Residential instead? Make much more sense in many ways.

We moved from NE Portland down here for my work in Tualatin and the safety of our kiddos. We LOVE it here. Our neighborhood and our immediate community are wonderful. With these 2-3 projects developing or coming soon, it seems just so out-of-place to put a 7 story high-rise in a maximum 2 story area - with no walkable food options among others.

Please represent us, the current constituents of South Tualatin, in opposing this rezoning effort. Value smart growth instead of a permanent high-density project - for everyone currently living here.

If you have any questions, please let me know.

Many Thanks for your time,

Jon Wong

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Julia Olson

Subject:	Proposed text amendment in Partition Application: par22-0002-23370

Hello,

The current text amendment proposal can catastrophically alter the future of development in our city.

Please consider the consequences of approving the proposed text amendment in Partition Application: par22-0002-23370! If approved, developers could create high-density high-rise apartments anywhere in Tualatin. This is a lazy text revision that opens all of Tualatin up to potential high-rise development.

High-density high-rise apartments in Basalt Creek are not beneficial to current or new residents. Traffic will already be severely worsened with existing developments and will be further exacerbated by more high-density housing in an area of town where all residents have to be car dependent.

Instead of allowing space to be zoned high density high rise, instead consider allowing areas outside of downtown to be rezoned to mixed use residential/ commercial. If properties are constructed in the basalt creek area that have ground floor stores, restaurants, or groceries, residents in the area are less car dependent. A mixed use residential commercial zoning definition could also include a more appropriate height cap when properties are being developed outside of the downtown urban renewal area, such as a hard limit of 4 stories for mixed use commercial residential property.

A more ideal use of this property for Horizon, developers, current residents and new residents, are buildings with ground floor commercial space, with a lower number of residential units. This increases walkability and provides local options where residents do not have to drive 2 miles or more for any goods or services. South Tualatin needs more commercial opportunities and community gathering space. This property could be developed in a way that meets community needs, and still enables Horizon and developers to profit.

Following is a quote from the application highlighting that the text amendment request is to enable RH-HR to be built anywhere in the city:

"In conjunction with the Partition and Annexation applications, a Plan Map Amendment will be submitted to the City that will apply the High-Density High Rise (RH-HR) zoning district to the new ±9.2-acre site on SW Norwood Road (this ±9.2-acre site combines Parcel 2 of the subject Partition Application and adjacent Tax Lot 108, as described above). Currently, the RH-HR zoning district is defined as a specific area within the City's Central Urban Renewal Area. A Text Amendment to the Tualatin Development Code (TDC) will also be submitted that modifies the TDC's RH-HR language to allow the zoning district to be applied elsewhere in the City.

Allowing RH-HR zoning to be applied anywhere in the city would be disastrous to Tualatin. A more appropriate text amendment would add a specific site or parcel to the current definition of

limiting the code to the City's Central Urban Renewal Area, so the text revision does not create a carte blanche for high rises to be built all over the city!

The Byrom CIO does wants to see development to the South be enhance the quality of life for current and future residents and businesses. Please consider the negative impacts of only enabling more high-density housing in an area where residents must drive for all basic needs!

Julie Heironimus
Byrom CIO Interim Vice President

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning A high-rise on SW Norwood Rd. is not in the public's best interest

Dear Steve Koper and council,

We hope that you had an enjoyable, restful vacation, and you are refreshed with a clear mind.

We also understand that the planning department may be understaffed as there are many land use projects in the works.

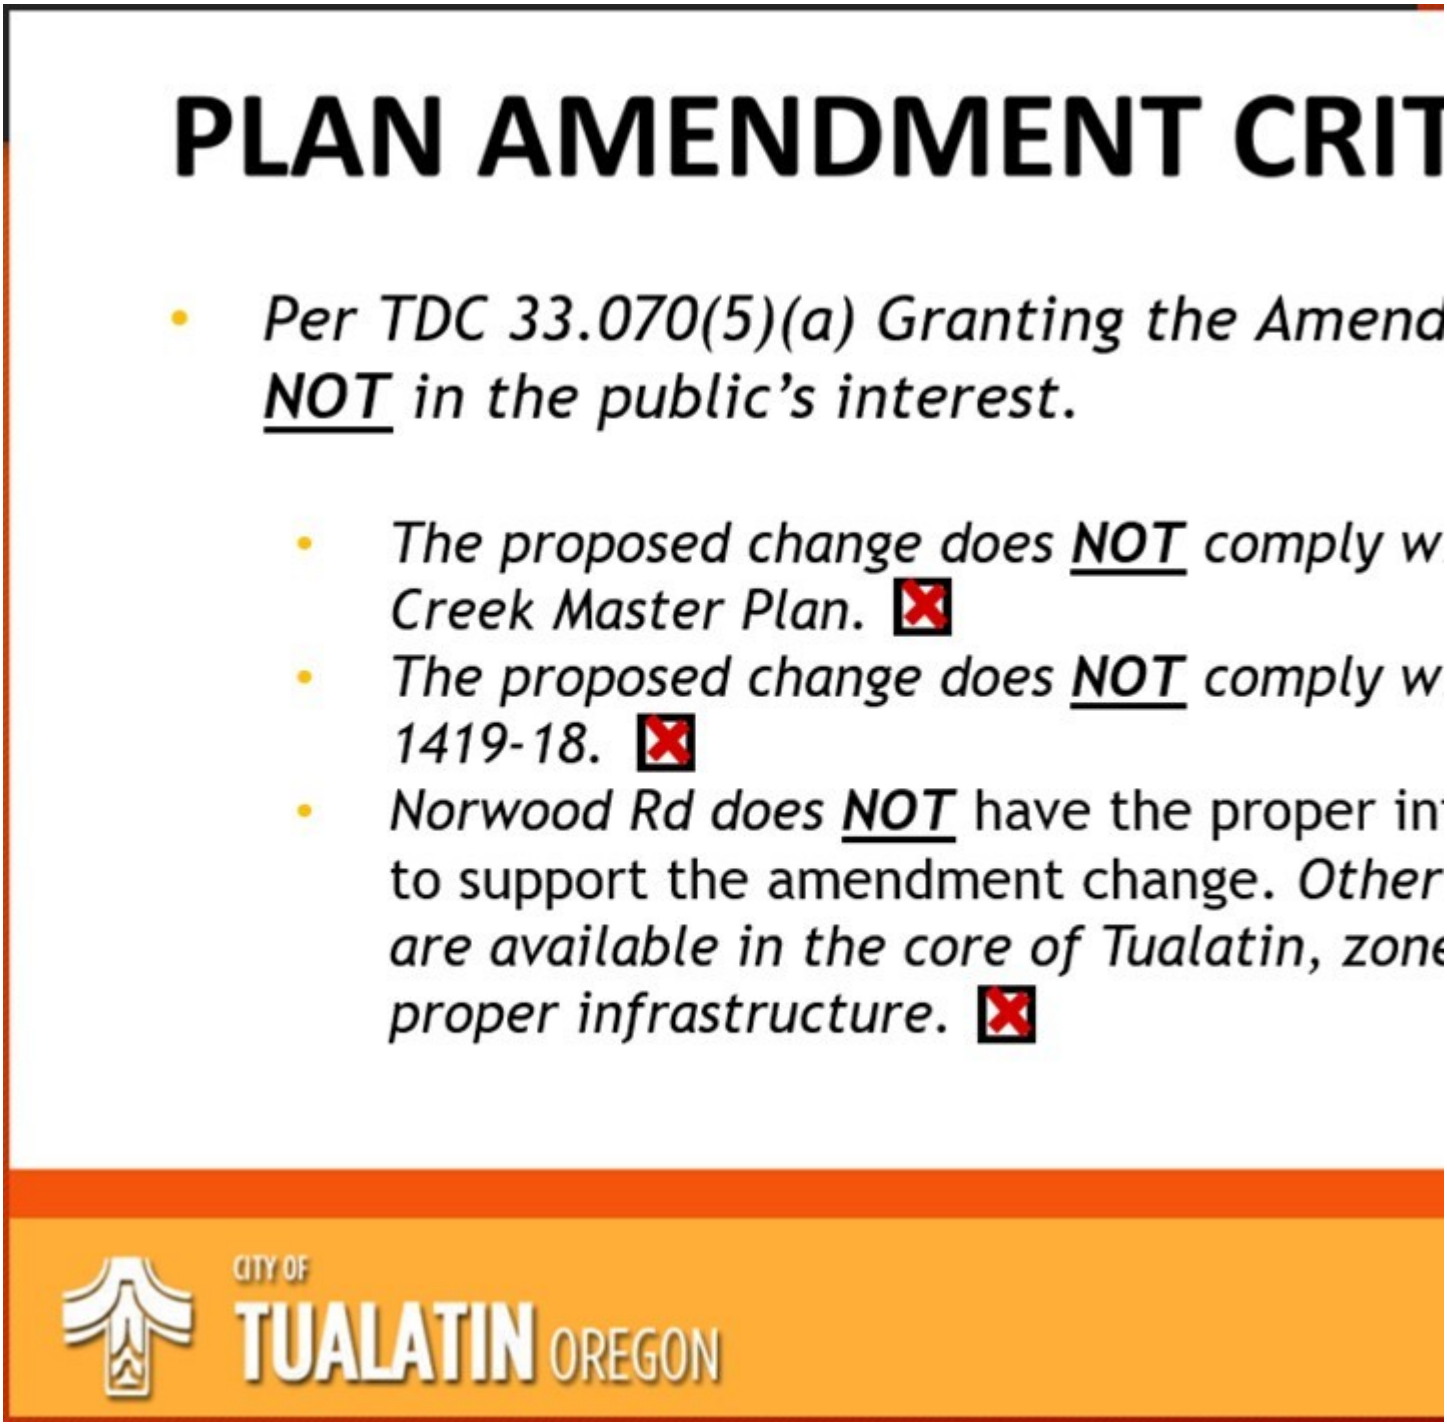
In the meantime, the residents of Tualatin thought it would be helpful to assist you in preparing your presentation to council, regarding the proposed RH-HR plan amendment change on SW Norwood Rd.

If it is not already clear, this proposed change is not in the best interests of the public. Feel free to copy this image below and insert it in your presentation when it's ready.

We have at least 20 more reasons why this plan amendment change is a bad idea, but it was hard for us to summarize in a single slide as done for the Tualatin Heights apartment's plan amendment change.

For that specific project, as a reminder, it was recommended that the housing density increase 35% within the same area.

It is not in the public's interest to approve an RH-HR zone off of Norwood Rd.



We also wanted to remind you about all those residents that were extremely concerned about parking and traffic who currently live around Tualatin Heights. We also want to refresh your memory regarding the statements you made discussing traffic problems in Tualatin.

From the Tualatin's Transportation System Plan Update:

"Director Koper stated there is a lot of employment in our city that passes through traffic in relationship to I-5, which gives us a unique position relative to other cities. He stated it will be best for the City to work with DLCD and partners to find a solution to our traffic issues."

We also hope you work together with the DLCD and the public works department to develop a comprehensive traffic plan that provides new road construction instead of just "meandering sidewalks" and bike lanes on Boones Ferry. We also hope the city would spend our bond tax dollars more wisely when looking at new land use projects, especially with the drastic escalation of housing projects in Tualatin.

If the city's plan is to put infrastructure upgrades onto the private sector (developer), to save money, the result usually ends up hurting the city and the residents for decades to come. Developers usually find the lowest cost solution to appease local jurisdictions within their project boundary. Their focus is to develop the land they purchased at minimal costs and turn a profit. This also causes a lack of uniformity within each development, with very little possibility of a course correction for the city in the future.

We also do not think it is a coincidence that AKS engineering and Forestry's office is located near Tualatin's planning department.

When you review the partition, annexation, and plan amendment application with AKS, please also indicate to them, there is other buildable land within Tualatin if they just took the time to look. A simple five-minute search on Zillow found three plots currently for sale. We would also suggest that AKS inform their client of these properties that are very suitable for a high-rise development within the core. Overall, it seems like their client is more interested in profit than really helping our community…

Again, Mr. Koper and Council, say no to a high-rise on SW Norwood Rd.

Commit to building a central Norwood Park like we explain on our website and try to rectify the Autumn Sunrise debacle.

If housing is truly needed, keep the current zoning as RL or RML.

Have a Happy New Year,

Norwood for Smart Zoning
--

Thank you.

Subject: “SW Norwood Road Partition” File No. PAR22-0002 OPPOSITION

Follow Up Flag: Follow up
Flag Status: Flagged

Planning Division
Attn: Madeline Nelson
mnelson@tualatin.gov

Dear Ms. Nelson,

I wish to state my objections in writing to “SW Norwood Road Partition” File No. PAR22-0002. The planned high-density high-rise is not a smart choice for this location. Here’s why:

- increased traffic congestion in one small area
- the City's lack of planning to accommodate the immediate increase in traffic
- zoning changes to a suburban residential area before the Tualatin Central Urban Renewal District is built up make no sense
- lack of a coordinated Basalt Creek master plan amongst the various developers and the City
- Class A high-density high-rise apartments do not meet the Governor's mandate for effectively reducing houselessness
- Tualatin residents' have opposed developments in this area for months but the City has allowed them to move forward regardless
- This partition opens the door to high-rises ANYWHERE in the City!

We have zero trust in AKS, and any developer working with AKS. We are asking that these changes for the 8 ½ acres on Norwood Drive be soundly rejected. Nothing AKS says can be trusted as, clearly, they will say whatever they need to get an approval and then do whatever they want.

Let's do the right thing for the city of Tualatin residents! Let's not let developers from out of state and AKS dictate our future!

I oppose "SW Norwood Partition" File No. PAR22-0002!

Julie Heironimus

Subject: Power outage on Norwood Road

Hello, With today's power outage on Norwood due to a tree falling on a power line once again it made me wonder about what infrastructure improvements have been proposed for the new Autumn Sunrise development. This would be an ideal time to bury those power lines on Norwood. Routinely half of our neighborhood to the north loses their power anytime there is a storm. Please consider this much needed improvement. Thank you. Julie Heironimus 22710 SW 90th Pl, Tualatin OR 97062

Subject: Norwood For Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

Hello city representatives,

I would like to express my opposition to the high rise-zoning proposal by AKS Engineering & Forestry.

It is clear that our infrastructure on Norwood does not have the capacity to accommodate the amount of traffic congestion this proposal will create. It is simply not fair to the residents who live here, especially when there are other, smarter options for this type of "vision" in downtown Tualatin. Old Haggen's parking lot is a perfect place for this type of project - mixed use commercial/residential in downtown Tualatin, close to public transit. Traffic is already a nightmare. People who live in southern neighboring cities are utilizing Boones Ferry as a thoroughfare and traffic byTualatin Highschool has already become a safety concern. Vehicles speed through the school zone every day and often show no regard for students attempting to cross the street. Peak traffic hours are already over capacity along Norwood and Boones Ferry - this is prior to the further vehicular congestion Autumn Sunrise development will bring. Adding High Rise apartments on Norwood is just not well thought out.

I hope you consider the mentioned concerns. thank you,

Junior Carbajal

Subject: Concern for new development

Follow Up Flag: Follow up
Flag Status: Flagged

Hello There,

I am writing you to express my concern regarding the possible zoning change for the property that Horizon Community Church currently owns. We live in Victoria Woods and as it is we can barely get out of our neighborhood. If we are turning left it can take up to 5 minutes to get out. I understand there is nothing that we can do about the Autumn Sunrise development as the work has already started. However, I do not think it is right of the City of Tualatin to rezone these properties to high density housing. Adding an additional 300-400 residences on top of the Autumn Sunrise development is not going to work unless the City and County plan to upgrade the infrastructure of Boones Ferry Rd. At 5pm traffic is backed up from North Wilsonville past Tualatin High School. Its already a nightmare. I cannot imagine how unsafe it will be if an additional 300-400 residences (apartments) are added to this part of town.

My family is part of the Horizon Church community. My kids attend school there. They have not been forthcoming with the information that they have sent out to their congregation. And I think it is extremely unfair that they have asked their "community" to submit emails to the city in support of the zoning change. These are not people who reside in the community or on this side of town. This benefity Horizon financially and does not benefit the neighbors one bit. If anything this will bring down our property values and add more crime to the area.

Tualatin is already so hard to get to and it is my fear that business will not want to move into Tualatin if we continue to grow and create more traffic and less traffic revisions. Approving this change really demolishes the safety as well as community feel of this part of town. We are begging you as neighbors to this property to not change the current zoning. We will already be impacted tremendously by the Autumn Sunrise development. And would appreciate it if our voices are heard and taken into consideration. I am begging you to listen to the residents of Tualatin and not the congregation of the church. They do not have to deal with the daily traffic, crime, and development.

Our address is 22545 SW Miami Drive

Thank you very much,

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I have lived in Tualatin for the past 7 years and I have stayed here because it still has a small town feel nestled in the forest. I own two properties here and am very invested in the future of this little oasis. I am saddened at every tree felled as we learn so much about the importance of the age and maturity of the woodlands to our lives. It would be a tragic to lose old growth forest, of all things. While I'm not sure that downtown is the place for a highrise either, citing traffic and future plans of Tualatin's own to revitalize the area, and proximity to the park and woods along the river, it seems like there are definitely opportunities that don't sacrifice our precious, unreplaceable, non-renewable old growth forest. Thank you for your attention to the concerns from the community in keeping Tualatin the City of Trees.

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. Subject: Rezoning in Tualatin near Norwood

Attn: Madeleine Nelson

Hi,

My name is Linda Kennedy and I am a long time resident of over 40 years and have lived in 2 different neighborhoods in Tualatin. I want to make sure that the neighborhoods stay safe and enjoy the livability that we have enjoyed for so many years. Please hear those who have spoken so well and done so much work to bring up essential information that points out how bad traffic and commuting issues will get if high density zones are allowed on Norwood and Boones Ferry roads. Put the 4 story apartments downtown closer to adequate transportation areas.

Thank you for listening and considering our Neighborhood.

Linda Kennedy

Subject: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

My husband and I are long time residents of this fine city (since 1981) and have purchased two homes here and raised our three children here. We have seen many changes and improvements, but the high density re-zoning on the south side of Norwood Road just does not help our city!

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Linda Kennedy

Subject: high rise zoning notice

Hi,
I am writing to say I appose the approval of the high rise that is proposed at the corner of Norwood and Boones Ferry road. Why would this be changed from a low rise to a high rise? The Lennar development has already shown how many trees were lost that were not part of the project and all the power outages. The Lennar development is not bringing any road improvements and the 500 homes are going to drastically increase traffic on Boones Ferry Road and 65th that will even be worse if a high rise goes in. It changes the landscape and livability in Tualatin. I understand the need for more housing by the location of the proposed high rise is not a good location. A low rise would fit in much better given the overall landscape of that area and protect what little farm land there is behind horizon. Seems like this is a bate and switch buy getting a low rise approved and now pushing for a high rise.

Subject:	Norwood for smart zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;

The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;

As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. Subject:	Re: Proposed Partition on Norwood (PAR 22-0002)

Hello,

First, thank you for your work for our city. I know that it's often difficult to find solutions that work well for all parties involved and can be exhausting and frustrating to hear from unhappy people routinely. My husband and I have been residents here since 2007 and just finally were able to buy our first house in the Dakota Hills neighborhood (near Norwood) February 2022. We love this city and our neighborhood and while I understand and accept that growth and change is necessary and can even be good, I really believe the plan to annex, rezone, sell and develop the proposed Parcel 1 is not in the best interest of our city or community and the partition request should NOT be approved.

My primary concern is that I don't believe that the roads in the area can safely handle the significant increase in traffic that a high density multifamily apartment complex will bring (especially since we have yet to see how the traffic will be impacted by the new Autumn Sunrise neighborhood). I believe the congestion the extra traffic will create will significantly impede the response times of emergency vehicles. Additionally, the walkability from this location is not safe for residents to be able to get to grocery stores, work or other places, and while I understand there are plans in place to address some of the traffic/walkability needs (a traffic light at Norwood and Boones Ferry) I do not believe this will be sufficient and I do believe we will see traffic accidents due to the high density of additional vehicles on the road and pedestrians in the area.

While I understand the need for more affordable housing (and absolutely agree with it) I do not believe this will meet the goals for providing affordable housing. In my experience as a property manager, units in buildings such as these are rarely rented at affordable rates (unless they are designated as affordable housing through a HUD or similar program). And because they tend to be owned by investors there are typically significant rent increases annually which leads to significant turnover and ultimately does not meet the goal of the city to maintain healthy community relationships. To help address the affordable housing need I would love to see our city work with some place like Washington County Housing Department or similar and look into options to provide actual affordable housing instead of more high cost apartments. The folks who will be able to move into this type of apartment are not likely to be the folks who are in need of affordable housing as most rents for such apartments start close to $1,900/month or more these days. That's as much as, if not more, than many people's monthly mortgage payment and is certainly not affordable.

Finally, there are a number of areas in which the proposed partition does not meet city criteria and therefore it should not be approved. Please see below for more details.

Per the TDC rules to approve a partition, the proposed application <u>does not meet criteria and cannot be approved:</u>

Per TDC 36.115 (1), THE PROPOSED USE MUST BE CONSISTENT WITH LAND USE ZONE. - The applicant identifies intention to build high rise high density multifamily apartment homes, NOT CONSISTENT with the present land use zone: RML. The city would first need to approve different zoning before the partition application is approved.

The application does not meet criteria TDC 36.115(2)b: the plan is not consistent with residential design standards, which are defined as those for SINGLE FAMILY HOMES, TOWNHOMES, DUPLEXES, TRIPLEXES, AND QUADPLEXES. (TDC 73A.100).

Most significantly, the proposal in the application IN VIOLATION OF of TDC36.010, in that the proposal is not consistent with the provisions of the Tualatin Comprehensive Plan, Tualatin Community Map, and capital

improvement plans. These plans make no reference of permitting high density high rise outside of the downtown development zone. Furthermore, the proposal identified in the partition plan violate the following Tualatin Comprehensive Plan Policies and Goals: POLICY 2.1.1 Encourage structures be planned in ways that relate to the site AND SURROUNDING CONTEXT. A high rise high density apartment is NOT 'in context' with institutional use zoning and RML zoning.

The proposed development involves removal of a forest, in violation of the following elements of the Tualatin Comprehensive Plan: GOAL 2.2 Promote the preservation and establishment of trees throughout the city, in order to protect and enhance the aesthetic character of Tualatin, protect and improve air and water quality, provide noise and visual screening, and protect habitat for wildlife. Even if a tree barrier is left, the destruction of a few acres of forest destroys significant wildlife habitat that would not be adequately replaced by a tree barrier strip. POLICY 2.2.1 Require the establishment and protection of street trees. POLICY 2.2.2 Promote the protection and establishment of trees during the development process. As this proposal involves AKS engineering, which has demonstrated disregard for these provisions in the Tualatin Comprehensive Plan through their work on the Autumn Sunrise subdivision, AKS cannot be trusted to adhere to these policies.

Thank you for your time and attention to these concerns! Your work is appreciated.

Best,

Liz Rockwood

Subject: Attn Madeleine Nelson - I Oppose the Partition Application

From: Maria Lathrop
9265 SW Iowa DR. Tualatin

I strongly oppose the partition. This area of Tualatin does not have the infrastructure to support this many new dwellings. Traffic is already so backed up on Boones Ferry. We hardly have any parks that serve this area of Tualatin. Before any developments are made the city of Tualatin needs to improve current conditions. We are really falling behind other cities in terms of livability. Please do not make it worse.

Subject: SW Norwood Rd. Partition 22-0002

Hi Madeleine,

I am writing in opposition of the sw Norwood rd partition.

I live near Norwood rd. and we have an immense amount of development going on near our Tualatin community with Autumn Sunrise and Plambeck Gardens. We do not have the infrastructure to support this extreme amount of growth in such a short time. Our roads, public transit, emergency services, and community spaces cannot support the growth. On top of the development already occurring, there is now another development being pushed through increasing our population even more.

One of the big reasons I enjoy living in Tualatin is because of the beautiful trees. Many of the gorgeous trees have been removed and the once beautiful forest off Norwood is gone. The trees that are left and the open space left is now being petitioned to be a high rise.

When I purchased my home in Tualatin, I did not expect to be living near extremely dense housing and a high rise. The parks are already heavily used and the new development has very little open space for the residents.

Please preserve some of what I enjoy about living in Tualatin and do not allow this partition to occur.

Sincerely,

Marissa

In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,
Matt Majewski

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Subject:	no high rise on norwood

My husband and I are strongly opposed to the idea of allowing a high rise apartment complex to be built on Norwood. I have read the input from Mr. Cobb and agree with his understanding of why this should not be allowed. We also feel that the city government has not done adequate planning for any type of new housing in this area. From what we have leaned there are no plans for additional police. We moved into our house on Stono 25 years ago. I can remember a patrol car driving through the neighborhood several times a week. I have not seen that type of community policing in years. Traffic is also a problem and we do not hear any type of planning from the city government about how traffic management, I watched a video and read a letter from the mayor. I believe they were both from 2021. I understood him to say he wanted all the available land in Tualatin filled with housing because he wanted a "vibrant and diverse community." You do not get a vibrant and diverse community just by building houses. We would as the city government to stop the growth and plan for this current community to be vibrant and diverse.

Michael and Sherie Ostrowski

9370 SW Stono Dr

Tualatin

Per the TDC rules to approve a partition, the proposed application does not meet criteria and cannot be approved:

Per TDC 36.115 (1), THE PROPSOED USE MUST BE CONSISTE WITH LAND USE ZONE. - The applicant identifies intention to build high rise high density multifamily apartment homes, NOT CONSISTENT with the present land use zone: RML. The city would first need to approve different zoning before the partition application is approved.

The application does not meet criteria TDC 36.115(2)b: the plan is not consistent with residential design standards, which are defined as those for SINGLE FAMILY HOMES, TOWNHOMES, DUPLEXES, TRIPLEXES, AND QUADPLEXES. (TDC 73A.100).

Most significantly, the proposal in the application IN VIOLATION OF of TDC36.010, in that the proposal is not consistent with the provisions of the Tualatin Comprehensive Plan, Tualatin Community Map, and capital improvement plans. These plans make no reference of permitting high density high rise outside of the downtown development zone. Furthermore, the proposal identified in the partition plan violate the following Tualatin Comprehensive Plan Policies and Goals: POLICY 2.1.1 Encourage structures be planned in ways that relate to the site AND SURROUNDING CONTEXT. A high rise high density apartment is NOT 'in context' with institutional use zoning and RML zoning.

The proposed development involves removal of a forest, in violation of the following elements of the Tualatin Comprehensive Plan: GOAL 2.2 Promote the preservation and establishment of trees throughout the city, in order to protect and enhance the aesthetic character of Tualatin, protect and improve air and water quality, provide noise and visual screening, and protect habitat for wildlife. Even if a tree barrier is left, the destruction of a few acres of forest destroys significant wildlife habitat that would not be adequately replaced by a tree barrier strip. POLICY 2.2.1 Require the establishment and protection of street trees. POLICY 2.2.2 Promote the protection and establishment of trees during the development process. As this proposal involves AKS engineering, which has demonstrated disregard for these provisions in the Tualatin Comprehensive Plan through their work on the Autumn Sunrise subdivision, AKS cannot be trusted to adhere to these policies.

Subject:	Planning Division, Attn: Madeleine Nelson

Hello my name is Michaela Zacher and my family and I have been living in our home, located at 9325 SW Quinault Lane, Tualatin, for over a decade now. I want to state my objections in writing as opposition to the partition application areas "SW Norwood Road Partition" File No. PAR 22-0002 by AKS Engineering and Forestry LLC.

A high-density high-rise is not a smart choice for the location. Below are only SOME of the reasons I'm objecting to both of these proposals:

- A high-rise apartment building will have a negative impact on my neighborhood's property values. Never in my career, have I seen a high density high-rise next to a single dwelling property, increase its property value the same way a detached home surrounded by other detached homes would. An apartment building will, however, create a less desirable location for a buyer looking to purchase a single dwelling home in Tualatin.
- Lack of city planning to accommodate a significant increase in traffic
- Zoning changes to a suburban residential area before the Tualatin Central Urban Renewal District is built up makes no sense
- Lack of a coordinated Basalt Creek master plan amongst the various developers and the City
- Class A high-density high-rise apartments do not meet the Governor's mandate for effectively reducing houselessness
- There are designated areas in Tualatin that are already zoned for this kind of development. Why are these areas not being utilized???
- Tualatin residents' have opposed developments in this area for months, but the City has allowed them to move forward regardless. It's time to take matters into the residents' hands! We can no longer rely on the City to make choices for us.
- <u>This partition opens the door to high-rises ANYWHERE in the City!</u>

We know that this partition is <u>just a step in the process</u> and if the City does not oppose, it opens the door for AKS and other developers to proceed through this process of re-zoning.

Thank You,

Michaela “Kella” Zacher

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

My husband and I are against a change in zoning to allow high rise apartments to go in on Norwood. We feel there is sufficient new apartment complexes on Nyberg and sufficient new housing with the Autumn Sunset mega development. We feel there is not enough planning regarding infrastructure, especially police and traffic control. We would like to see a moratorium on new building until these two large projects have been around for a few years.

Subject: Norwood Development

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most

appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

The Murray Family

Madeline Nelson,

My name is Patricia Galver and I live at 22995 SW Vermillion Drive in Tualatin. I am the corner house at the intersection of Norwood and Vermillion and the Autumn Sunrise project is 2 lanes of traffic away from my house, which means every window of my house looks into this project. I received the blue post card with details of the apartment complex project and I don't believe it should proceed. I am living through an incredible mess here and not one house has been built yet. No one seems to have any oversight over this project and no one seems to care with what we are putting up with up here. I have addressed several people, including the mayor and the city council several times and the project manager. Currently, I have tried to get in contact with the Lennar project manager and the Tualatin manager and haven't heard from either.

Firstly, the noise is incredible-I am thinking of hiring a sound specialist to check the decibel levels-no one in the city can seem to respond to this level of noise. Several people who have come to my house have had to yell at my front door and say "How can you stand this?". It goes on 6-8 hours a day.

Secondly, my house has turned into the spare parking lot for the project. Since day 1, I have had as many as 3 trucks/cars each day parking there, but no where else on the street-I have many photos to back this up. The mayor told me this wasn't supposed to happen- but I'm the one who has to be Karen and several workers have been incredibly obnoxious about it. I had one worker who had his Malamute dog in his truck and at lunchtime, he was eating lunch on the tailgate with his dog running around my front yard. I'm tired of no one backing the community up.

Thirdly, where are the trees? This was promised at all the talks pre-project, that they would preserve as many as possible. Oops, we took them all down. I know they paid a big fine-where did that go? I have no shade in my yard and we now have a wind tunnel that comes down the hill and right into our houses. From my living room, I now have a view of every car on the freeway, and the noise is so bad, it's almost impossible to use our front bedroom. I hear freeway noise 24 hours a day. I didn't buy a house on the freeway, but I have one now. There are only 2 houses that actually look into this site, mine is one. My front yard and the whole side of my house face the project. I also have a new view of the water towers and the high school.

Fourthly there has been minimal oversight here, and when there is a problem, no one wants to address it-I've heard lots of "man-splaining " but none solves the problem, we're just supposed to suck it up. Traffic issues haven't been addressed, tree issues haven't been addressed, no one has ever asked the residents how things are going, what issues need to be addressed. For example-when we had all the wind/rain after Christmas, there were 3 trees behind my fence that were badly leaning-2 were on the edge of the street, beyond the sidewalk on Norwood. They were pushing the tree behind my fence so that it was falling over. I called the city-they looked at it but it wasn't "their" tree. They gave me the county's number-because it wasn't in the street yet or on a power line, they weren't going to do anything. By the next day they were leaning so badly, that I paid to have them taken down at my expense-ridiculous. I have a window on the construction side of my house that has separated the frame from the glass which was noted. My neighbor directly across from me also has a new broken window on the same side of his house and both started when they were using the huge rolling machines, which also caused my house to shudder and my floors to vibrate-no one cares. On the Wednesday morning before Thanksgiving, I had a Porta-Potty delivered to the front of my house-couldn't find anyone in the city of Tualatin who was working that day. Finally found 4 sub-contractors working along the freeway side and they made phone calls for me to find out where it was supposed to go. Luckily they were very kind and used their front loader to move it back across the street. Of course-no apologies from anyone. I've had rodents who chewed up

my car's hose and wiring harness that was 500$ to fix-while there isn't a direct correlation, it's a big coincidence.

And lastly, if you build that project, that is the last green spot on the block. There is no park/trail up here. Ibach Park is almost 1.5 miles away and lots of old/broken equipment there for little ones. There;s no place to go sit in a park on a bench; Little Woodrose is also about 1.5 miles away. We have 2 high schools within a mile of us and traffic is abominable. I know that I pay for parks/trails in my taxes and there are neither here and it needs to be more than a swing, a slide and a picnic bench because it seems like you're trying to appeal to families with Autumn Sunrise. In just the 5 years I've been here, there are too many changes being made to increase population, with little support for infrastructure, and needs. You can't squish 600 plus new residences into the same area. I'm so disappointed with what's going on that I hate where I live now-we didn't get a voice in increasing housing density, we didn't get a voice in housing zoning, and the city does not listen to the people who live here. Maybe it's time to pay more attention to the residents who are already paying taxes. I'm already looking at moving-we're taking at multiple years of construction in the same area

Sorry for such a negative response, but the last 7-8 months have been hell-the noise, the dirt, the traffic, the rodents, and we're all on our own up here. And the message to residents is basically, sorry, you have to suck it up. This is not the place for a high rise of more than 250 units. Boones Ferry and Norwood need a traffic signal already. Lots of teenage drivers and rushing parents due to 2 high schools in the area. You're destroying the last stand of old trees, so we might as well pull down the Tualatin Woods sign on our subdivision because they don't exist anymore. The sadder part is that there seems to be a disconnect between the city and its residents.

Subject: Please do not approve the SW Norwood Partition

Dear Ms Nelson

I am writing in opposition to the planned SW Norwood partition.

I have lived in the Norwood neighborhood for 28 years and use Norwood Road to access Boones Ferry Road several times a week. I am already nervous about how the Autumn Sunrise development will affect traffic in that neighborhood—adding a whole high rise on top of that will surely cause terrible daily traffic congestion, especially without major improvements to the surrounding roads.

Please consider the needs of the existing and new residents of this neighborhood and deny the partition until a comprehensive traffic mitigation can be implemented.

Thank you

Penny Harper

Subject: Norwood Against ANN22-0003 - 9300 SW Norwood Road Annexation

Hello Distinguished Planning Commission Members and Council members,

I write to you to request your support of the local community in Tualatin, over the interest of out of state developers. I oppose this annexation, not because I am against development in my community, but because I am concerned about the proposed development by Vista.

We know that Vista intends to rezone to High Rise density, and this annexation is a step toward that rezoning.

I question the ultimate premise that this land must be high density in order to provide sufficient housing for the area. Vista has built several townhome communities nationwide that would meet the RML density zoning the land current is zoned for. Why has that not been pursued as an option?

I believe there is a tremendous opportunity for the community to partner with our local leaders to achieve housing developments that meet the needs of current and future inhabitants. This application by Vista is not that opportunity.

Thank you for considering my opposition to this annexation application.

Best regards,

Rachel Neill

Subject:	Attn Madeleine Nelson - I Oppose the Partition Application

Hello,

I oppose the proposed application as the City has not completed due diligence in evaluating the immediate increase in traffic congestion zoning changes in addition to the matter that zoning changes to a suburban residential area before the Tualatin Central Urban Renewal District is built up are not logical.

I appreciate your careful consideration to the local residents of Tualatin concerns regarding this matter.

Regards,

Rachel Neill

Subject:	Pending Partition and Annexation Decisions Partition # PAR-(22)-0002 Annexation # ANN 22-0003

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my additional comments against both of these land use decisions.

As a resident of Tualatin and a member of Horizon Community Church, these two decisions are very important to the future plans for our church and the greater community within the City of Tualatin.

High density housing is not supported by the current infrastructure in this community.

I am not in support of Horizon's partnership with Vista to rezone this land partition into High density dwellings. It is concerning to me that the church is not working with the local residents to determine a solution that works for the both the church and community needs.

Subject:	Pending Partition and Annexation Decisions Partition # PAR-(22)-0002 Annexation # ANN 22-0003

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments against of both these land use decisions.

As a resident of Tualatin and a member of Horizon Community Church, these two decisions are not just important to the plans for the church but have a tremendous impact on the the community of Tualatin, which the church is failing to recognize.

While these decisions do not approve of any specific future projects for these properties, I would like to state my concern that Horizon's message that this land use application will lead to affordable housing for our region is misleading to the public. Vista residential partners is seeking to build class A residential structures, which are not affordable housing, but considered a high rent opportunity. In addition, they are seeking to have this property rezoned as high density housing.

There are currently over 500 residential single-family homes and town houses being built in the Autumn Sunrise development. There will also be an additional 100 apartments in the Plannbeck apartments development. The Norwood infrastructure cannot support a high density housing development, in addition to all which is being added.

Horizon Church is under contract with Vista residential services, an out-of-state developer with no ties or investment to supporting our local community. There are numerous lawsuits against Vista residential services in other states, due to their lack of ethical and responsible building. This is something that we as Oregonians and Tualatin residents take very seriously, and should be carefully considered be our elected officials.

Please do not approve these two land use applications.

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

Thank you for your ongoing service to our Tualatin community. I appreciate your continuous efforts to protect and preserve the livability and safety of the place we call home.

Please see the attached letter with my concerns about the proposed Text Amendment change in the Norwood area.

Kindest regards,
Rachel Neill, MSN, RN

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106 and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin and speaking on behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure generally do not conform to this level of zoning, especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at Norwood and Boones Ferry intersection, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles, according to Google maps and personal

experience. The addition of RH-HR zones only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of the current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrollment rates and children returning to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and are prime locations for this type of development. There is a vacant retail space where Haagen's grocery store was, existing retail, grocery stores, and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add the RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside

rail transit, a station can be built at the Basalt Creek Employment Center, giving access to a downtown high-rise. Utilizing WES commuter rail would also not directly impact vehicular traffic besides crossings and utilize existing taxpayer public transit more efficiently. Also, adding another RH-HR zone near the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home-based businesses and occupations in all residential zones, subject to regulations to minimize impact on housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present or compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services to support residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower-income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, fellow residents and I strongly urge the Tualatin Planning division not to approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Rachel Neill

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

As a 5 year resident of Tualatin, I am grateful for your work to support our community. I ask that you continue to work for the good of the residents of Tualatin. Please do not approve a change to high density zoning in the AKS/Vista application. We can create a better solution as a community without decreasing the quality of living.

Best regards,

Rachel Neill

Hello,

I attend Horizon Christian Church, and my kids attend Horizon Middle School and Horizon High School. I also live here in Tualatin on Boones Ferry Rd. I am against having a high rise apartment complex on the above listed property due to traffic concerns and the look and feel it gives this section of Tualatin.

I do not feel that the opinion of those who attend Horizon Church but do not reside here in Tualatin should impact the approval of this annexation, as this is not where they live.

Thank you,
Rebecca Kimmel

This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Thank you for your time,

Ron Dunevant
21865 SW Mandan Dr Tualatin, OR 97062

Subject:	We are Not Nimby's please hear the voice of your constituents

Was a precedent set when the Plambeck apartment developers request to bypass the city zoning codes for height restrictions was approved? We fear this is leading to a slippery slope which thousands of your constituents are very upset about, and hope you will help to do the right thing and not change our neighborhood into a series of hi-rise structures and further pack already jammed streets (not the "quality of life" we have & continue to pay our property taxes for).

We are not "nimby's", we just expect our neighborhood to be what it is in regard to the zoning which exists and what we bought into. Nor are we against "affordable housing"… The original Plambeck proposal was good, it met broader planning objectives for affordable housing, was within City codes, Aesthetically appealing and not detrimental to neighborhoods property rights. However, Plambeck developers pleaded a case saying "the property was difficult to develop due to challenging topography", therefore requested a "variance" to increase to 4 stories (2 stories above the zoning laws), which was then granted.

Why was that land purchased in the first place if they thought it was too challenging? Is it because they knew the they could change the zoning if they asked? Reality is the original 2 story plan which was within existing code, could have been built. Simply look at the adjacent Lennar development on Norwood - before the clearing & leveling - you could see just how up & down the topography is on this land and within the existing building codes! It cost more to level it out, but they did.

Reflecting also on the Lennar project, frankly, has been a debacle. The lack of oversight of their thinning out the tree preservation zone along Norwood last spring, to the point that the remaining trees were unstable and after just typical late fall winds (they call "storm"), the "preservation area has been deemed to now have to go – Lennar culled roughly 30 large trees that were in that so called "tree preservation area" in the late spring, it's no doubt the reason for this result. Did they get permission to do that? Why is it that the same such buffer to the west has existed for decades, that not even a branch fell from that buffer during what Lennar phrased as "a storm". Resulting in another slap in the face of our community!

In closing, for the projects which are currently in review, please hear the voices of concerned tax payers and consider our quality of life and perspectives. We ask you to please reflect on what is already happening to our community and not grant variances and permit further high rise projects that are not within the codes that existed when developers purchased such property and cause detriment to our neighboring property and community.

Sincerely,

Robert Taylor

Subject:	Pending Partition and Annexation Decisions Partition # PAR-(22)-0002 Annexation # ANN 22-0003

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments against the land use.

As a resident of Tualatin, and someone that lives across the stream the property, we do NOT support high-rise buildings of any kind being built on that property.

Thank you,
Ron & Rebecca Kimmel
23605 SW Boones Ferry Rd, Tualatin, OR 97062.

Subject: Norwood Rd Annexation

I am writing this to you and the city council to look at the long range ramifications of starting with this request for the property on Norwood Rd to be annexed into the City of Tualatin.

Normally, an annexation has to do with an individual's property to be able to make use of all the benefits of the city they are wanting to be annexed into for the purposes of attending their schools, using their utilities, police, fire dept., etc. This particular annexation is for the purpose of a developer to be able to rezone the property to build apartments/high rise for their profit.

Please understand that the citizens you represent are very much against this proposal. There are so many housing projects taking place on Norwood and Boonesferry Rd. that another one is not justified or needed.

Sincerely,
Rose Toler

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. Subject: Annexation on 9300 SW Norwood Road

I am writing in the hopes that you will not approve the annexation on Norwood Road that is coming up for a decision.

Ordinarily, I would not be against it; however, this is just the first step in requesting that the city rezone the property for high-rises. This area is already inundated with the 521 units of single family and multifamily housing units that are already being built on the corner of SW Norwood and Boones Ferry Road.

The current TDC code language states that High-rises are reserved for the core only. This is the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club that are suitable for high density apartment or condominium towers.

The last thing we need is additional housing for high rises in an area that will already be overburdened with traffic.

Thank you for your consideration,

Rose Toler

Subject: Norwood Road Partition - PAR 22-0002 -- (part of Tax Lot 106 & 108 - Norwood Road proposed development???)

This appears to be part of Tax Lot 106 & 108 - Norwood Road proposed development. Am I correct?

The application for the planned Type II Partition is from the same developer (AKS) that wants to build a 4-story in the same area - a 4-story that residents have continually & strongly objected to. We chose to live here because we liked what the community represented and how it was laid out. We trusted the city to be as concerned about all these new developments as we are. We do not expect the city to add more issues & negatively to already existing/unsolved problems.

Will there be enough water and/or water pressure to serve all the many proposed new buildings? Will the city build an additional reservoir for drinking water, washing machines, cooking, watering lawns, washing cars, etc. Approving more buildings would seriously impact all of Tualatin except that as of now, the city is installing larger water pipes to take the water away from current residents & new residents in the new developments. It seems the city plans to alleviate or eliminate the impact on water usage - by making sure residents in other areas of the city gets enough water. In the process it will affect and/or impact nearby established residents next to the new developments. That causes more problems for some of us - other residents of the city will benefit - I believe solutions should be fair to all residents.

How does your proposed development plan to address traffic & parking issues.? Parking by students at Tualatin school already crowds neighboring streets. Boones Ferry has a traffic back up from the I5 Freeway, past Norwood Road and beyond during to-and-from work and school start & stop hours. Do you propose to widen Boones Ferry again??? How many traffic lights will we need?

The already large, partially completed development near the water reservoirs will severely stress sewer systems in the area. How do you propose to add all the developments' sewage without more impact to already existing neighborhoods?"

*** Note: The more developments we put in this area, the more infrastructures we will need and the more unhappy Tualatin residents/ Tax Payers we will have. . It will impact not just the already established tax-paying residents near Norwood but most of Tualatin's citizens in a number of ways.

Traffic, water & sewer issues are #1 issues. BUT, there are more issues: We are experiencing more electrical outages with electric out longer and longer hours (spoiled food sometimes even, and NO heat). We also are experiencing more noise from the freeway since all our beautiful old growth trees were cut down to allow for the larger development now being built. Our climate seems to be already changing because of the changes. Tall condos, and other developments will not only block sun & alter wind patterns but contribute negatively to the (once) beautiful area we live(d) in. Their plan for a "buffer" of trees between their development and the residents across Norwood is

laughable. The first partially completed new development has descimated the old growth trees next to Norwood Road and the freeway.
One can easily see that the old growth trees along Norwood to Boones Ferry are marked for removal.

There will be a need for more police , fire personnel & equipment. Current staffing would not be adequate. What about 911 services???

Most families have more than 1 car. Additional families moving close by will need parking round the clock. Will established residents and their guests be able to park in front of their own house? Congestion and traffic to our neighborhood streets will increase as people attempt to find better ways to travel in and out of our city.

PLEASE..... RE-ZONE AREAS THAT ARE NOT SO CONGESTED!!! Do not allow more changes until we have resolved the problems that clearly exist and will continue to grow.

Please consider what this is doing to many of the city's tax payers. Consider what all this lower priced housing will do to the values of our houses and the neighborhood. There is other land that could be rezoned for some of these developments that would not impact already established resident tax payers!!

Sincerely,
S Bell, long time Iowa Drive resident

Subject:	Modification of Tax Lot 106 & 108 - Norwood Rood proposed development

I attended the meeting on Oct 25 at the Library. There were at least 50 Tualatin citizens there to speak against the proposed development. It was a very rainy night or there probably would have been more. The developer did not even have the courtesy to have a microphone there to present their proposal so all could hear!

.... Here is an excerpt of a memo I sent when another developer expressed interest in developing in the area of Norwood Road & Boones Ferry. Please, take the time to read it.

"It is my understanding that the reservoir near Horizon Church & near your planned development, supplies a big % of the city's water. The area has a very large housing development being built in that area - there is already concern there will not be enough water and/or water pressure to serve so many new buildings. Are there plans to build an additional reservoir? Water is not only used for drinking, but for washing machines, cooking, watering lawns, washing cars, etc. Additional development, I believe, would seriously impact all of Tualatin and its existing reservoirs. How does the company plan to alleviate or eliminate the impact on water usage?

Since the already planned and approved large high-density will cause parking problems as well as traffic problems, How does your proposed development plan to address traffic and parking issues.? Parking by students at Tualatin school already crowds neighboring streets. Boones Ferry has a traffic back up from the I5 Freeway, past Norwood Road and beyond during to-and-from work hours. The road has already been widened. Do you propose to widen it even further?

Also, the already large, planned development will severely stress sewer systems in the area. How do you propose to add the development's sewage without more impact to already existing neighborhoods?"

*** Note: I believe the more development we put in this area, the more infrastructure we will need and the more unhappy Tualatin residents/tax payers.. It will impact not just the already established tax-paying residents near Norwood but most of Tualatin's citizens in a number of ways.

Traffic, water & sewer issues are #1 issues, but there are more: We are experiencing more electrical outages with electric out longer and longer hours (spoiled food sometimes even, and NO heat). We also are experiencing more noise from the freeway since all our beautiful trees were cut down to allow for the larger development now being built. Our climate seems to be already changing because of the changes. Tall condos will not only block sun & alter wind patterns but contribute negatively to the (once) beautiful area we live(d) in. Their plan for a "buffer" of trees between their development and the residents across Norwood is a joke if their "buffer" is like the "buffer" in the development already being built. -- Drive over and take a look for yourselves.

What about the need for more police and fire personnel & equipment?? Surely, the current staffing would not be adequate. What about 911 services???

Where will people park? Most families have more than 1 car. As stated, school children already use some of our residential parking. Additional families moving close by will need parking at night as well as during the days. Will established residents and their guests be able to park in front of their own house? Congestion and traffic to our neighborhood streets will increase as people attempt to find better ways to travel in and out of our city.

PLEASE.....

IF THERE IS A NEED FOR MORE DEVELOPMENT, THEN RE-ZONE AREAS THAT ARE NOT SO CONGESTED!!!

Sincerely,
S Bell, long time Iowa Drive resident

To: Madeleine Nelson; Frank Bubenik
Subject: Norwood/Boones Ferry project comment

Hello Madeleine and Mayor Bubenik:

I'm writing this email to express my opposition to the proposed development on Norwood and Boones Ferry. Can you tell me what traffic revision plans the city has to accommodate all of the new residents that Autumn Woods alone will be bringing in? I've seen the email campaign from Horizon encouraging its congregation to email the city in support of this. As a resident of Victoria Woods, I've experienced the traffic get increasingly heavier year over year and it seems there is no planned solution to lighten it. Depending on the time of day, I can be forced to wait for several minutes before its safe to pull on out of VW. Even more of a concern is the speed at which cars travel coming down Boones Ferry. I've got four kids who cross Boones Ferry and it is truly frightening because cars don't stop and are at in increased speed coming down the hill. I've experienced it multiple times when trying to cross the street as well. The pedestrian crosswalk was a start but there needs to be something better. I cant imagine thousands of extra cars being forced to use Boones Ferry Road and Norwood each day with the proposed high density housing project. Please consider the residents immediately impacted by this proposal and what it means to us. These new projects will only make it worse, traffic congestion wise and safety wise. I believe the increased traffic will be a deterrent to non-Tualatin residents to visit our great city and support our local businesses. I ask that this project NOT be approved.

I look forward to your response.

Respectfully,
Sara Gregory

Subject:	Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential

developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Follow Up Flag:	Follow up
Flag Status:	Flagged

I'm letting you or whoever know that I'm totally against city of Tualatin rezoning so they can put in high rise apartments off of Norwood Rd. I moved to this city 20 years ago because it was quite and rural. Now whoever is in charge of the zoning should know that this isn't right. Just like the high density housing that is also occurring on Norwood. They were suppose to leave a buffer of trees along the road. But instead they clear cut them and lied by saying the wind blew them down. Is this what Tualatin is coming to? It's totally disgusting. Sincerely, Steve Carns

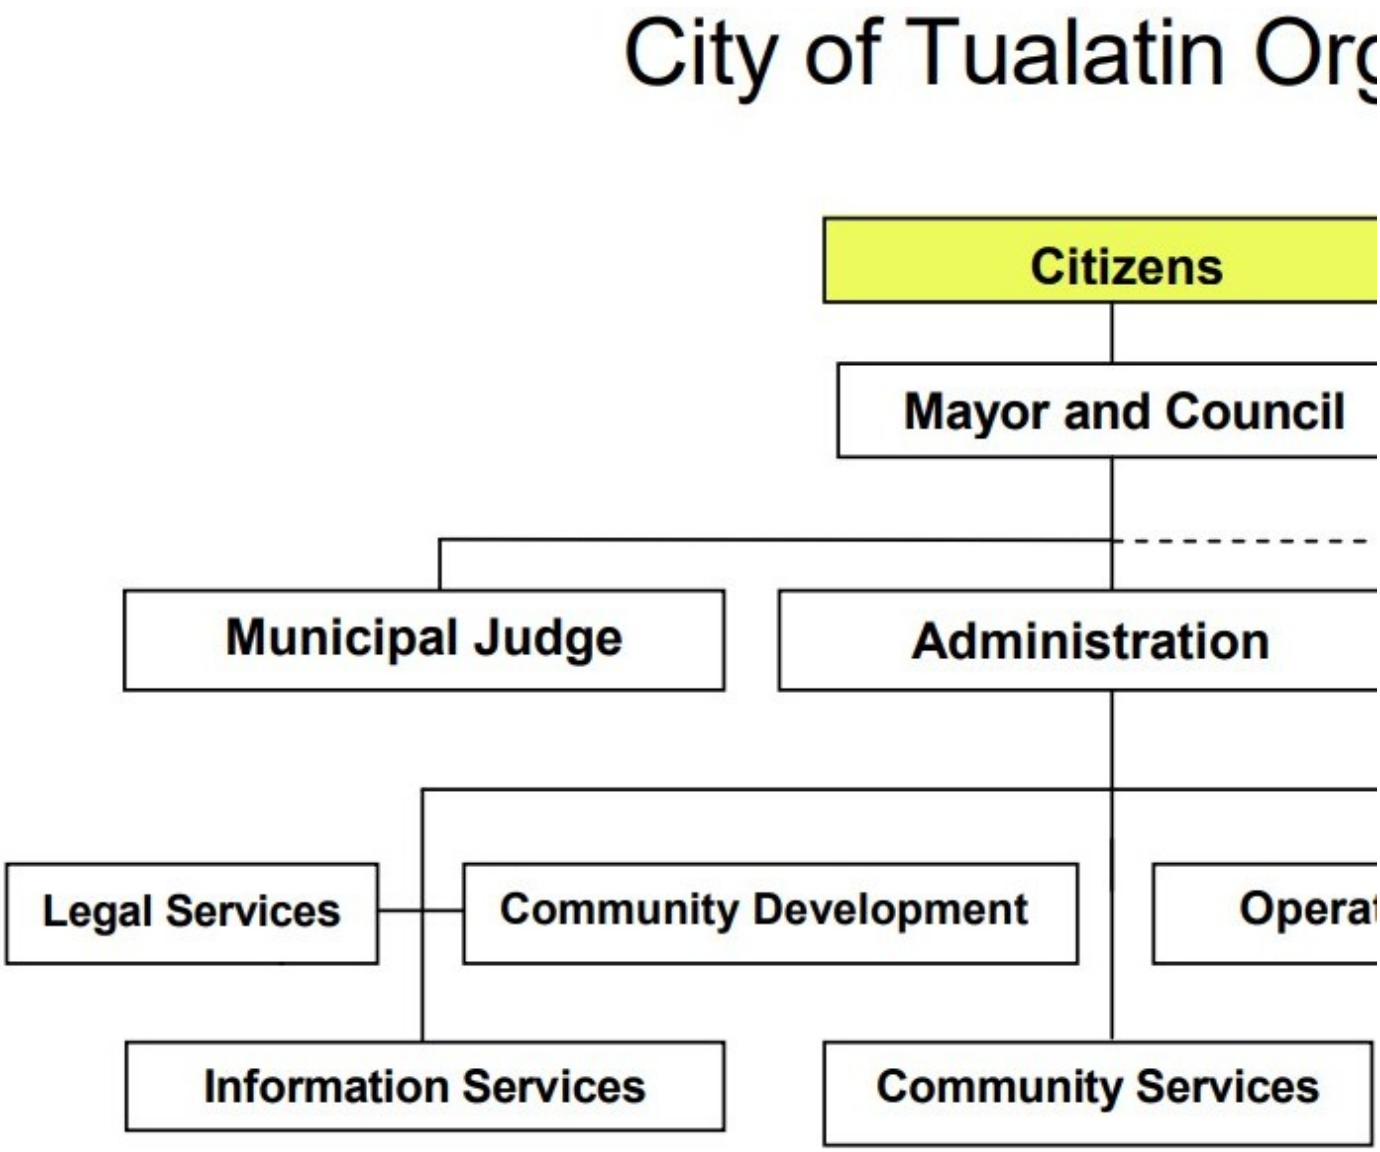
Subject: Norwood Against ANN22-0003 - 9300 SW Norwood Road Annexation



*The Citizen Advisory Committees include the Tualatin Library Advi
Committee, Tualatin Arts Advisory Committee, Tualatin Planning C
Architectural Review Board, Tualatin Urban Renewal Advisory Co
Tualatin Tomorrow Advisory Committee, and Transportation Task

Tualatin Planning Commission meeting on 1/19/23. The meeting agenda: discuss a significant zone change that would allow heavy manufacturing behind residents' homes on Boones Ferry Rd.(Tualatin City Council will also be discussing this issue on 2/27/23).

You know what happened? The developer brought an attorney to the meeting. It seemed to attendees that the developer was implying they would file a lawsuit if they didn't get their way.

At the same meeting a resident had concerns and questions regarding the zone change, and they accidentally spoke out of turn.They were quickly silenced by one planning commissioner.
Thankfully the Chair let this person speak, but at the end of the meeting when the Commission was supposed to deliberate on a recommendation to council, the developerspoke out of turn to sway the commission one more time.

It wasn't enough that the developer received more than half an hour for their presentation earlier, it was that they had so much clout to basically walk all over the process. And they were not silenced by any planning commissioner and were allowed to speak out of turn.

We hope you see the issue here…
From our perspective it seems as if Council has forgotten who is really in charge of the city.

It is supposed to be the citizens, not developers.

A high-rise is not a smart choice on SW Norwood Rd when this type of development is supposed to be in the core of Tualatin.

Kind regards,
Susan Pitt

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

Dear Assistant Community Development Director, Steve Koper;

We hope that you had an enjoyable, restful vacation, and you are refreshed with a clear mind.

We also understand that the planning department may be understaffed as there are many land use projects in the works.

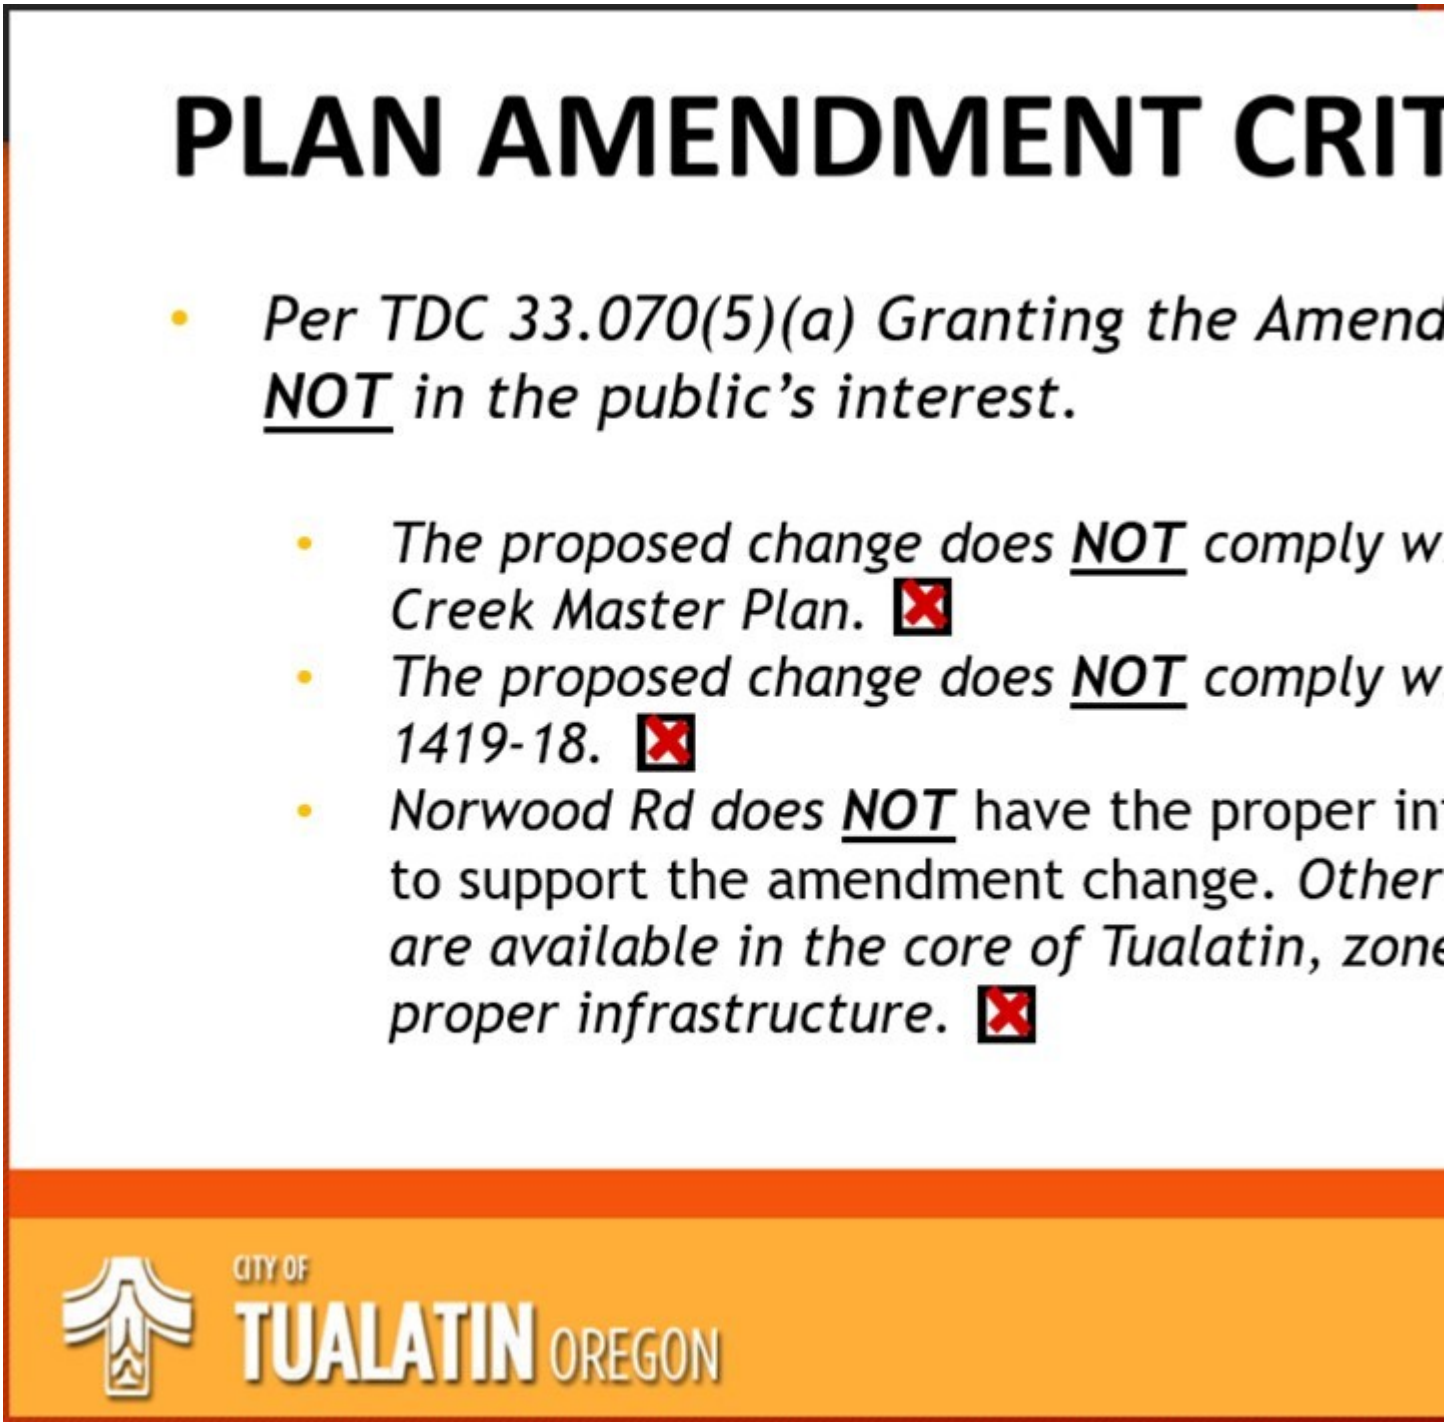
In the meantime, the residents of Tualatin thought it would be helpful to assist you in preparing your presentation to council, regarding the proposed RH-HR plan amendment change on SW Norwood Rd.

If it is not already clear, this proposed change is not in the best interests of the public. Feel free to copy this image below and insert it in your presentation when it's ready.

We have at least 20 more reasons why this plan amendment change is a bad idea, but it was hard for us to summarize in a single slide as done for the Tualatin Heights apartment's plan amendment change.

For that specific project, as a reminder, it was recommended that the housing density increase 35% within the same area.

It is not in the public's interest to approve an RH-HR zone off of Norwood Rd.



We also wanted to remind you about all those residents that were extremely concerned about parking and traffic who currently live around Tualatin Heights. We also want to refresh your memory regarding the statements you made discussing traffic problems in Tualatin.

From the Tualatin's Transportation System Plan Update:

"Director Koper stated there is a lot of employment in our city that passes through traffic in relationship to I-5, which gives us a unique position relative to other cities. He stated it will be best for the City to work with DLCD and partners to find a solution to our traffic issues."

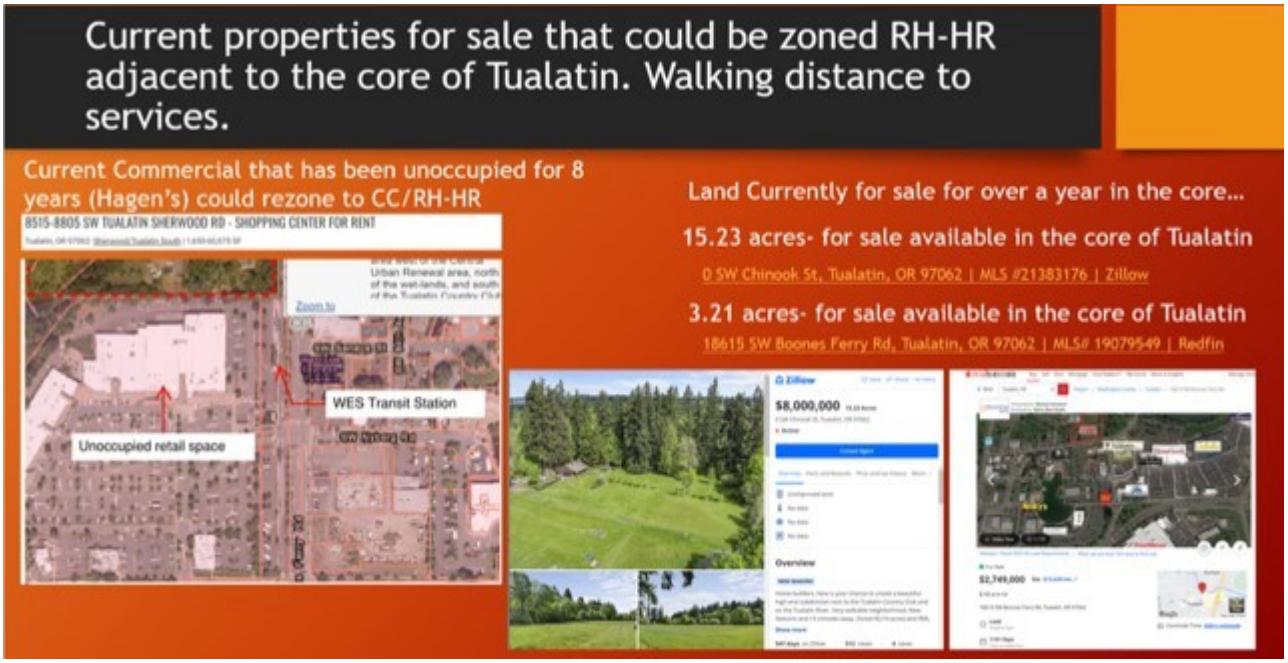
We also hope you work together with the DLCD and the public works department to develop a comprehensive traffic plan that provides new road construction instead of just "meandering sidewalks" and bike lanes on

Boones Ferry. We also hope the city would spend our bond tax dollars more wisely when looking at new land use projects, especially with the drastic escalation of housing projects in Tualatin.

If the city's plan is to put infrastructure upgrades onto the private sector (developer), to save money, the result usually ends up hurting the city and the residents for decades to come. Developers usually find the lowest cost solution to appease local jurisdictions within their project boundary. Their focus is to develop the land they purchased at minimal costs and turn a profit. This also causes a lack of uniformity within each development, with very little possibility of a course correction for the city in the future.

We also do not think it is a coincidence that AKS engineering and Forestry's office is located near Tualatin's planning department.

When you review the partition, annexation, and plan amendment application with AKS, please also indicate to them, there is other buildable land within Tualatin if they just took the time to look. A simple five-minute search on Zillow found three plots currently for sale. We would also suggest that AKS inform their client of these properties that are very suitable for a high-rise development within the core. Overall, it seems like their client is more interested in profit than really helping our community…



Again, Mr. Koper and Council, say no to a high-rise on SW Norwood Rd.

Commit to building a central Norwood Park like we explain on our website and try to rectify the Autumn Sunrise debacle.

If housing is truly needed, keep the current zoning as RL or RML.

Have a Happy New Year,

Susan Pitt

Subject: Attn Madeleine Nelson - I Oppose the Partition Application

Ms. Nelson,

I would like to go on record as being opposed to the high rise proposed for Norwood.

It is clear that the traffic on Boones Ferry is already an issue, and adding more residences PRIOR to solving the already-existent problem is irresponsible.

We have already, sadly, seen the beautiful trees removed in the Lennar development and feel the City blindly allowed this to occur.

Does the City care? Why can't things be done in proper order? First solve the existing traffic issues before adding so many more cars to our neighborhood streets.

There are other issues as well, as you surely are aware. I, as well as my neighbors, will be attending all future meetings to voice our concerns regarding this proposed development.

Kind regards,
Susan Pitt

Subject:	No high-rise on Norwood! I agree with Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;

The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

Subject: Procedural Concern RE: Proposed Ordinance No. 1472-23
To: Frank Bubenik <fbubenik@tualatin.gov>,Maria Reyes <mreyes@tualatin.gov>,Christen Sacco <csacco@tualatin.gov>,Bridget Brooks <bbrooks@tualatin.gov>,Cyndy Hillier <chillier@tualatin.gov>,Octavio Gonzalez <ogonzalez@tualatin.gov>,Valerie Pratt <vpratt@tualatin.gov>
Cc:

Hello,

I am writing as I observed that the City Council Meeting scheduled for 2/27/22 is planning to address the annexation of the property on 9300 SW Norwood Road, identified on the agenda as Ordinance No. 1472-23 and in the planning Department as ANN22-0003.

As per TDC 32.020, Procedures for Review of Multiple Applications identifies, the applications with the highest numbered procedure type will be processed first, and the application on which others are dependent will be processed first. I am wondering, why then is the annexation decision being considered before the text amendment decision, which also requires a type IV-A review? Per TDC 32.020 (3), Am I to understand that the text amendment is dependent on the annexation? Logically, it seems the opposite, as the developers would not

wish to move forward with annexation if their text amendment application is not approved. It seems to be the case that the annexation is dependent on the text amendment, as the annexation clearly identifies a plan for residential high rise construction. It seems that failure to consider the text amendment first could expose the city to avoidable appeal and/or legal review, regardless of outcome, as approving or denying the annexation first would imply consent or disapproval of the general project, including the text amendment, and the other related applications.

Please note, this is a question regarding procedure which seems contradictory to the TDC, not communication regarding the opinions on the project as a whole, and as such I would greatly appreciate a response to facilitate my understanding.

Thank you!
Tim Neary
Byrom CIO President

TDC Section 32.020 – Procedures for Review of Multiple Applications. Multiple applications processed individually require the filing of separate applications for each land use action. Each application will be separately reviewed according to the applicable procedure type and processed sequentially as follows: (1) Applications with the highest numbered procedure type must be processed first; (2) Applications specifically referenced elsewhere in the TDC as to the particular order must be processed in that order; and (3) Where one land use application is dependent on the approval of another land use application, the land use application upon which the other is dependent must be processed first (e.g., a conditional use permit is subject to prior approval before architectural review).

Subject:	URGENT: Do not allow high rises to be built anywhere in Tualatin!

Hello,

The current text amendment proposal can catastrophically alter the future of development in our city.

Please consider the consequences of approving the proposed text amendment in Partition Application: par22-0002-23370! If approved, developers could create high density high rise apartments anywhere in Tualatin. This is a lazy text revision that opens all of Tualatin up to potential high rise development.

High density high rise apartments in Basalt Creek are not beneficial to current or new residents. Traffic will already be severely worsened with existing developments, and will be further exacerbated by more high density housing in an area of town where all residents have to be car dependent.

Instead of allowing space to be zoned high density high rise, instead consider allowing areas outside of downtown to be rezoned to mixed use residential/ commercial. If properties are constructed in the basalt creek area that have ground floor stores, restaurants, or groceries, residents in the area are less car dependent. A mixed use residential commercial zoning definition could also include a more appropriate height cap when properties are being developed outside of the downtown urban renewal area, such as a hard limit of 4 stories for mixed use commercial residential property.

A more ideal use of this property for Horizon, developers, current residents and new residents, are buildings with ground floor commercial space, with a lower number of residential units. This increases walkability, and provides local options where residents do not have to drive 2 miles or more for any goods or services. South Tualatin needs more commercial opportunities and community gathering space. This property could be developed in a way that meets community needs, and still enables Horizon and developers to profit.

Following is a quote from the application highlighting that the text amendment request is to enable RH-HR to be built anywhere in the city:

"In conjunction with the Partition and Annexation applications, a Plan Map Amendment will be submitted to the City that will apply the High-Density High Rise (RH-HR) zoning district to the new ±9.2-acre site on SW Norwood Road (this ±9.2-acre site combines Parcel 2 of the subject Partition Application and adjacent Tax Lot 108, as described above). Currently, the RH-HR zoning district is defined as a specific area within the City's Central Urban Renewal Area. A Text Amendment to the Tualatin Development Code (TDC) will also be submitted that modifies the TDC's RH-HR language to allow the zoning district to be applied elsewhere in the City.

Allowing RH-HR zoning to be applied anywhere in the city would be disastrous to Tualatin. A more appropriate text amendment would add a specific site or parcel to the current definition of limiting the code to

the City's Central Urban Renewal Area, so the text revision does not create a carte blanche for high rises to be built all over the city!

The Byrom CIO does wants to see development to the South be enhance the quality of life for current and future residents and businesses. Please consider the negative impacts of only enabling more high density housing in an area where residents must drive for all basic needs!

Tim Neary
Byrom CIO Interim President

Subject:	Recommend Denial of Partition application: PAR22-0002
Attachments:	20221025_183829.jpg; 20221025_184733.jpg

Hello,

I encourage the planning division to deny partition application PAR22-0002.

I encourage the application to be denied as the application materials includes statement of intention that is beyond the scope of the partition decision, and the intended use of the partition is not consistent with present Tualatin Development Codes. Approval of a partition application that includes content of intention for future development that is in violation of Tualatin Development Code could be construed as the city giving approval for the proposed, illegal, development plan in addition to the plan to create the partition itself.

The partition application references intent to create a "multifamily housing development." At the developer meeting and in subsequent communications and materials, the applicants clearly identified intent to create a 'multifamily housing development' that is consistent with the definition of residential high density high rise. The application materials for the partition identify a plan to rezone the land as RML, however this is not consistent with the use plan portrayed to residents at the developer meeting. The application does not specify how the applicant defines "multifamily housing development," and given the information presented at the developer meeting, this must be interpreted as an intention to develop property to be zoned as a residential high density high rise. The developer meeting specifically disclosed plans to build a "276 unit, 4 story 'class A' apartment complex," consistent with a residential high density high rise definition. See attached images from the developer meeting. Given this evidence, the applicant's term, "multifamily development" must be construed as "a 276 unit, 4 story 'class A' apartment complex."

Specifically, the partition application includes the language in the attached memo: "This letter is to serve the purpose of Horizon Community Church, authorizing Ken Allen, of Norwood Horizon Holdings, LLC as our official representative as pertaining to matters of land use and development of the proposed multifamily land approval process with the City of Tualatin." This statement is beyond the partition decision itself, and should more appropriately read as "This letter is to serve the purpose of Horizon Community Church, authorizing Ken Allen, of Norwood Horizon Holdings, LLC as our official representative as pertaining to matters related to this partition application." This revised statement would not indicate that the city is approving the ongoing plan for multi family development housing, and is focused solely on the presented partition plan. Including this language cannot be approved, as presently the city does not allow for a multi family housing complex to be developed on this property. Furthermore, the partition application identifies the partition area will be zones medium to low density residential, inconsistent with a multi family housing development.

Additionally, the Executive Summary includes a statement of intent to create multifamily housing. Executive Summary: Vista Residential Partners (Applicant) is submitting this Partition application for the Horizon Community Church and Christian School site. The Partition application is the first of several applications needed to create a new parcel for future multifamily residential dwellings within the Basalt Creek Planning Area of the City of Tualatin. The following is an outline of the anticipated applications." Again, based on the

zoning plan of the partition and current city zoning restrictions, it is not possible to build a multi family development on the proposed lot.

The city has not yet completed any action to enable the proposed lot to be zoned to enable a multifamily development. A multifamily development is consistent with a residential high density high rise zoning classification. This partition application should be denied, and should be resubmitted by the applicant ONLY AFTER the city identifies that a multifamily development is able to be built in the proposed area.

According to Tualatin Development Code, TDC 44.100, "The purpose of the High Density High Rise (RH-HR) zone is to provide areas of the City within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club that are suitable for high density apartment or condominium towers." Presently, High density High Rise zoning is not permitted on or near the proposed partition. Approving the application identifying the intention to create multifamily development consistent with the definition of high density high rise zoning cannot be done as it violates present city development code.

In summary, the applicant uses the term, "multifamily development" to mean a 276 unit, 4 story apartment complex, which is not consistent with the zoning requested in the partition application, and is not permitted under current Tualatin Development codes. As such, the partition application should be denied since it cannot be developed as intended.

Subject: Comment re: PAR 22-0002

Per the TDC rules to approve a partition, the proposed application does not meet criteria and cannot be approved:

Per TDC 36.115 (1), the proposed use must be consistent with the land use zone. - The applicant identifies intention to build high rise high density multifamily apartment homes, not consistent with the present land use zone: RML. The city would first need to approve different zoning before the partition application is approved.

The application does not meet criteria TDC 36.115(2)b: the plan is not consistent with residential design standards, which are defined as those for single family homes, townhomes, duplex, triplex and quadplexes. (TDC 73A.100).

Most significantly, the proposal in the application is in violation of TDC36.010, in that the proposal is not consistent with the provisions of the Tualatin Comprehensive Plan, Tualatin Community Map, and capital improvement plans. These plans make no reference of permitting high density high rise outside of the downtown development zone. Furthermore, the proposal identified in the partition plan violate the following Tualatin Comprehensive Plan Policies and Goals: POLICY 2.1.1 Encourage structures be planned in ways that relate to the site and surrounding context. A high rise high density apartment is not 'in context' with institutional use zoning and RML zoning.
The proposed development involves removal of a forest, in violation of the following elements of the Tualatin Comprehensive Plan: GOAL 2.2 Promote the preservation and establishment of trees throughout the city, in order to protect and enhance the aesthetic character of Tualatin, protect and improve air and water quality, provide noise and visual screening, and protect habitat for wildlife. Even if a tree barrier is left, the destruction of a few acres of forest destroys significant wildlife habitat that would not be adequately replaced by a tree barrier strip. POLICY 2.2.1 Require the establishment and protection of street trees. POLICY 2.2.2 Promote the protection and establishment of trees during the development process. As this proposal involves AKS engineering, which has demonstrated disregard for these provisions in the Tualatin Comprehensive Plan through their work on the Autumn Sunrise subdivision, AKS cannot be trusted to adhere to these policies.

The proposed development described in the application is for multifamily housing on Norwood road, which is not serviced by public transportation. This is in violation of the Tualatin Comprehensive Plan: POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

The partition application should be rejected, and resubmitted by the applicants with an aim to meet this provision of the Tualatin Comprehensive Plan, ONLY after approval for the area to be zoned as mixed-use commercial has been granted: POLICY 3.4.2 MIXED-USE COMMERCIAL. Support the application of mixed-use commercial designations in areas of Tualatin that are suitable for a mix of office, retail commercial, and high density housing.

The city should re-evaluate standards for building apartment homes outside of the downtown development area, as it is unreasonable to apply downtown Tualatin standards to developments on the edge of town. Mixed use commercial space would benefit current and new residents by creating retail, dining, and/or grocery

opportunities without needing to drive to the next nearest retail centers, which are over 2 miles away.A review of the mixed use commercial zone desgination should occur, to limit structure height and stories when outside of the downtown development zone.

Subject:	No Rezoning of tax lots 106, 108 to RMH from RML

Hello,

I apologize for including so many of you in this message, I am not well versed in all the roles of city government, and as this is of great importance to myself and my neighbors, I believe it more important to overcommunicate than risk not being heard.

The neighborhoods in the south of Tualatin have been informed and engaged in the planning of the Autmn Sunrise development under the current plans to develop the area as low-medium residential, to include development of multi-family dwellings such as townhomes, duplexes, and triplexes.

The proposal to rezone the properties to medium- high residential amounts to a "bait and switch" of these neighbors. Increased density would further strain infrastructure, including traffic, police, fire, water, sewer, and electrical.

An argument has been made that increasing higher density housing is a goal of the city. If that were true, then why initially approve the lots as RML? As others have pointed out, there is RMH land available for development at and around the site of the former Hagen's grocery store. Rezoning unused commercial property closer to the WES station and other municipal resources makes more sense than creating a higher density pocket on the outskirts of town.

If rezoning is even to be considered, all impact studies need to be recompleted and all recommended infrastructure adjustments made, including environmental impact studies, traffic studies, crime studies, and utility use studies. These studies must also include the limits of what Tualatin and Washington county can do to accommodate increased density, and what the impact is when Clackamas County roads and infrastructure remain unchanged.

Mayor Bubenik, City Councillors, Tualatin Planning Commission, please go with the plans as originally made, please do not allow your neighbors to be misled by developers. Do not allow tax lots 106 and 108 south of Norwood Rd and East of Boones Ferry Rd to be rezoned as medium high residential, keep these lots zoned as medium low residential.

Thank you,

Tim Neary
Tualatin Resident of Norwood Heights

Subject:	No Apartments South of Norwood

Hello City Officials,

Thus far I have not heard of any comment from the city on the proposal to build additional apartments south of Norwood between I5 and SW Boones Ferry.

I request a response from the City to the following concerns about the proposal to rezone the area and build apartments, myself and other Tualatin residents are very concerned about the impact on the community.

Concern: Traffic. The traffic study for the Autumn Sunrise development did not consider additional high density apartments. At minimum, a traffic impact study needs to be completed again factoring in the increased density.

Concern: Crime and Safety. Statistically, higher crime occurs in areas of greater housing density. The proposed location of the high density apartments is more than twice the difference from the police station as other high density residential areas in the city. A crime and public safety study must be completed to ensure that current public safety officers can respond to incidents in a timely manner and have adequate resources for increased safety concerns on the south edge of town.

Concern: Infrastructure. The Norwood Heights neighborhood regularly experiences power outages with mild wind events. Neighbors don't have any information that supports the electrical grid can support Autumn Sunrise, let alone nee apartments.

Overall, although Tualatin needs more high density housing options, it does not make sense to locate high density apartments so far away from police stations, transportation hubs, and other public resources near the center of town when already zoned property is close to the town center.

Please speak to the residents of Tualatin to address these concerns, and communicate how you will evaluate more sensible sites for high density housing.

Thank you,

Tim Neary
Norwood Heights Resident

Subject:	Norwood Apartments Plan - The 5x Win by including commercial space!

Hello,

You are all already aware of the concerns neighbors have about an additional 276 unit apartment complex being built on Norwood.

The Issue: The biggest concern tends to be about traffic. 500+ homes in Autumn Sunrise and another 276 apartments here would require everyone, plus the existing neighborhoods, to be car dependent for everything. As the plan is for higher end apartments, it is unlikely that any of this income bracket will be interested in using public transportation.

The Solution: Everyone wins if the proposed apartment land is instead zoned as combination commercial and medium - high density residential. This would reduce the number of apartments, while enhancing the quality of life for new and old neighbors.
We have seen this solution work in Mercato Grove in Lake Oswego! Although existing plans propose a small commercial space, such as Plaid Pantry, this is not adequate nor enriching for the proposed number of residents. The addition of ground floor commercial space provides restaurant, shop, and potentially high end grocery opportunities that would make the community more walkable and less car dependent. Having local retail and restaurant options benefits both existing neighbors and new ones at the proposed apartment site and Autumn Sunrise, and fits well with existing plans for the Basalt Creek Development and Parks plan.

Given the number of units, it may even be worthwhile for the city to implement an auxillary police station at one of the commercial spaces, given that Autumn Sunrise and the apartments could increase the city's population by 20% in a small area that is furthest from existing police.

This plan could be even further enhanced by improved traffic solutions, such as a second southbound lane on Boones Ferry, or creating an I5 onramp at Norwood.

Stakeholders:
Horizon Christian: They are still able to sell their land, their needs are met.

Developers: They can still create a profitable series of structures. Their needs are met.

Existing neighbors: They benefit from a more walkable neighborhood, have an improved quality of life. New and old neighbors alike have options where they don't have to drive for shops, restaurants, and possibly groceries. If further traffic interventions occur, their needs are met.

New Neighbors: Improved quality of life by having walkable shops and restaurants and improved traffic. Their needs are met.

The City of Tualatin: More businesses in the city create additional revenue, the creation of a quality restaurant and shopping space fits with the vision of the city. Additional housing units are created. In the recent meeting, the developers attempt to make a case that this site is the only opportunity to add apartments in the city. This is not correct, especially if land can be rezoned. There are over 20 acres of undeveloped lots in the city currently zoned RML, and existing vacant commercial properties, such as the Hagen's grocery site could be rezoned for additonal housing. The city has plenty of solutions for additional housing development The needs of the city are met.

Subject:	Norwood (Tualatin) Smart Zoning ... instead

To
Tualatin Planning Department
City Council, and
Mayor;

cc: Pamplin Media Group; Willamette Week

I appreciate the opportunity to support fellow homeowners concerned about the Norwood-Boones Ferry Road development proposal. As a Tualatin homeowner and long-time resident previously involved in the unsuccessful attempt to halt overdevelopment of the Tualatin Heights apartment complex on SW Sagert Street because of justifiable concerns regarding tenants blocking our parking in adjacent streets in front of our homes, I have to also voice my concerns.

I watched with dismay as the Tualatin Heights process proceeded, merely appeasing homeworkers with developer-paid bogus parking studies and highly restrictive time limits during meetings (homeowners received five minutes or less during one hour meetings to voice their concerns). The end result was a rubber-stamp process which I could see coming.

It is necessary to once again support the Norwood area homeowners in their efforts to oppose this latest development, and to demand that they receive equal time during ALL meetings to voice their concerns and/or objections and present their case with the same reception that the developer receives.

Sincerely,
TimG
Tualatin

Following is the NorwoodSaysNo website form letter. I attach it in agreement with everything stated within:

"I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

* Issue one - traffic:

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

* Issue two - infrastructure:

The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

* Issue three - existing RH-HR zones:

As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies"

Subject: Norwood For Smart Zoning

I know that you have received the letter listed below from many of our Tualatin residents stating their concerns regarding the massive development of Autumn Sunrise and the proposed multi-store apartment complex on SW Norwood Rd. and SW Boones Ferry Rd.

My wife and I have owned a home near Ibach Park for the last 27 years in a development known a Hedges Creek. When we first moved hear there was no Tualatin High School, no Ibach Park and minimal housing development in the area. But now over the years things have blossomed and changed to the point where certain things like the infrastructure have not kept pace with the increase in our population. Boones Ferry Rd. is now becoming the new SW Tualatin Sherwood Rd. where the traffic crawls at a snails pace at certain parts of the day, and this will only become far worse with the increase in the population of the new additional developments. The infrastructure should come first with residential and business additions to follow, not the other way around.

There are times in the morning and afternoon at and near the high school that it takes me nearly 10 minutes to get onto Boones Ferry Rd. from my home which is only approximately five blocks west of the school.

And what about the over crowding of the schools due to the new increased population of students? Their education will be compromised to a lower standard. And will teachers flee their profession due to the increase in classroom sizes?

These things along with many other issues must be considered before moving ahead with anymore development.

Please listen to, and consider the request of your people listed below. After all, we elected you to represent us, the people of Tualatin, not big money and over crowded development!

Thank you,
Vern & Teri Boomer

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local

infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;

The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;

As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative

of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,
Vern and Teri Boomer

Subject:	Opposed Partition and Annexation Decisions Partition # PAR-(22)-0002 Annexation # ANN 22-0003

Dear Tualatin City Council and Staffs,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, I strongly opposed these land use decisions.

As a resident of Tualatin, these two decisions are very important to the future plans for the greater community within the City of Tualatin too.

I would like to express my sincere concern about the public safety/security in this community while ten percent of Tualatin people suddenly living across the street as follows:

1. Would you increase police force patrolling this area?
2. Would you extend the width of Norwood road, Boones Ferry road so as to facilitate the large flow rate of car traffic?
3. Would you consider how bad the traffic will be clogged between Sherwood and Tualatin during daily school bus timing?
4. Would you consider the existing water tanks sufficient to supply needs for emergency use?

Please do not approve these two land use applications! Thank you so much for your time and consideration!

Subject: Norwood

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing about my concerns about the Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone.

My backyard backs directly to Norwood road, so we are massively affected by all the new and upcoming changes happening in our neighborhood. At this very moment in time, traffic is a literal nightmare going from Norwood to Boones Ferry Road. So I am already greatly concerned with the new development and how much strain this is going to put on our already cramped situation. Now high rise apartments? Absolutely cannot happen where plans are being made. Clearly the people attempting this build don't care about our city, or have ever attempted to leave this south side of Tualatin for I5.

It's a bit maddening that there are much more appropriate alternative options available in downtown Tualatin. The Norwood area infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and

personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where

compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin.

City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

Sincerely,

Zack & Kendra Nell

Hello There,

I am writing you to express my concern regarding the possible zoning change for the property that Horizon Community Church currently owns. We live in Victoria Woods and as it is we can barely get out of our neighborhood. If we are turning left it can take up to 5 minutes to get out. I understand there is nothing that we can do about the Autumn Sunrise development as the work has already started. However, I do not think it is right of the City of Tualatin to rezone these properties to high density housing. Adding an additional 300-400 residences on top of the Autumn Sunrise development is not going to work unless the City and County plan to upgrade the infrastructure of Boones Ferry Rd. At 5pm traffic is backed up from North Wilsonville past Tualatin High School. Its already a nightmare. I cannot imagine how unsafe it will be if an additional 300-400 residences (apartments) are added to this part of town.

My family is part of the Horizon Church community. My kids attend school there. They have not been forthcoming with the information that they have sent out to their congregation. And I think it is extremely unfair that they have asked their "community" to submit emails to the city in support of the zoning change. These are not people who reside in the community or on this side of town. This benefity Horizon financially and does not benefit the neighbors one bit. If anything this will bring down our property values and add more crime to the area.

Tualatin is already so hard to get to and it is my fear that business will not want to move into Tualatin if we continue to grow and create more traffic and less traffic revisions. Approving this change really demolishes the safety as well as community feel of this part of town. We are begging you as neighbors to this property to not change the current zoning. We will already be impacted tremendously by the Autumn Sunrise development. And would appreciate it if our voices are heard and taken into consideration. I am begging you to listen to the residents of Tualatin and not the congregation of the church. They do not have to deal with the daily traffic, crime, and development.

Our address is 22545 SW Miami Drive

Thank you very much,

Madeleine Nelson

Subject: Pending Partition and Annexation Decisions Partition # PAR-(22)-0002 Annexation # ANN 22-0003

Dear Tualatin City Council and Staff,

As you consider the annexation into the city of the parcel at 9300 SW Norwood and the proposed partition of 23370 SW Boones Ferry Road, please accept my comments in I DO NOT support of both these land use decisions.

Please consider the heavy traffic around the Norwood and Grahams Ferry. The new community behind Horizon is going to bring more than enough traffic. I am a member of Horizon but I do not want to have the apartment complex to be built. I would consider leaving my neighborhood and out of Tualatin if this plan is approved.

My family and I moved Tualatin and specifically to this area for having less congestion.
Now with the new housing development and pending apartment the congestion and quietness of our neighborhood will be ruined.

Please don't approve these two land use applications.

Thank you for your time.

Respectfully,

Cliff Ingram

Hello,

I attend Horizon Christian Church, and my kids attend Horizon Middle School and Horizon High School. I also live here in Tualatin on Boones Ferry Rd. I am against having a high rise apartment complex on the above listed property due to traffic concerns and the look and feel it gives this section of Tualatin.

I do not feel that the opinion of those who attend Horizon Church but do not reside here in Tualatin should impact the approval of this annexation, as this is not where they live.

Thank you,
Rebecca Kimmel

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to the Planning Commission and Council at the public hearing. The public hearing will be held on May 22, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

A Notice of Decision shall be provided to anyone submitting written comments. As a comment participant, you will receive a Notice of Decision when the decision is made – do you have a preferred mailing address you would like the notice sent?

Subject: High rise

Please, please, please don't let this high rise be built off Norwood and Boonesferry road. It will only make traffic uncontrollable and unbearable. I have lived in Tualatin since 1980 and I can't believe how much Tualatin keeps changing, and not always for the better.

You can make a difference in making Tualatin a livable and breathable city. We have many neighbors who are opposed to this project. It is enough seeing our beautiful forest disappear, now we are in danger of too many people being put on such a small piece of land.

Thanks for your consideration.
Christy

Subject: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Clint Owens

Vista Residential Partners/Horizon Community Church Plan Amendments Planning Commission Public Hearing
Planning Commissioner R.S.Hledik notes 4/20/23

-The current plan designations of the 9.2 acre site allow expansion of institutional buildings such as churches, schools, government offices and community recreation centers and swimming pools on 8.2 acres zoned Institutional (IN) as well as construction of a maximum of 25 dwelling units on 1.0 acre zoned Medium Low Density Residential (RML).

-The proposed plan map amendment for High Density-High Rise Residential (RH-HR) zoning would eliminate expansion of institutional uses and instead would allow construction of up to 276 dwelling units on the entire 9.2 acres ... more than 10 times the current allowed amount of housing.

-The requested plan text amendment would remove the "locational factors" criteria from the city development code. This would allow the relocation of high density-high rise residential zoning from the only area in the city that is currently designated for such development, i.e., a portion of the Central Urban Renewal area. For the proposed amendment, the zone would be applied to property located at the southern periphery of the city. The change would also allow other areas of the city to be considered for high density-high rise residential use.

-Additionally, the amendments would fulfill a shortfall of 4 acres of high density-high rise land as identified in the city's Housing Needs Analysis:

- -This is because the central city location has been determined to be unbuildable.
- -The proposal would also more than double the amount of high density-high rise land needed to meet the city's identified need for this housing type.

-A number of Findings suggests that approval of the amendments would generally contribute to achieving the city's goals, including 8% overall residential density with a housing mix consisting of 45% of affordable multifamily housing. It should be noted, however, that the multifamily housing proposed in the amendments is not intended to be "regulated affordable housing" or housing for households that are "cost burdened", i.e., households that spend a disproportionate amount of their income on rent or mortgages.

-A number of other Findings suggests that the amendments satisfy other criteria required by the state planning goals and administrative rules, Metro urban growth management requirements, and Tualatin comprehensive plan and development code standards.

-Missing from the Findings is adequate justification as to how the proposed amendments comply with Goal 3.1 of the Tualatin Comprehensive Plan.

-Goal 3.1 requires the city to "designate a 20-year land supply along with urban services planned to support the housing types and densities identified in the Housing Needs Analysis" (emphasis added). The current Housing Needs Analysis identifies a deficit of only 4 acres for high density-high rise residential land. The proposed amendments would add 9.2 acres to the supply – or more than twice as much as is needed. This would result in an unsubstantiated surplus of 5.2 acres of land for this purpose.

- Since the land in the city center is not suitable for high density-high rise residential development, and because a considerable amount of residential development has been approved in recent months, and because the city code has been changed to comply with a state mandate to allow multifamily dwellings in zones that were formerly reserved solely for single family homes, it may be time to update the Housing Needs Analysis.

-But until new data is obtained and evaluated we do not have a clear understanding as to how the city's housing mix and acreage allocation calculations may need to be adjusted. Rather than relying upon generalized

assumptions about future population growth, we are obliged to justify land use decisions according to the housing types and densities that are tabulated in the current Housing Needs Analysis. The proposal to add 9.2 acres of high density-high rise residential land, i.e., 5.2 acres more than just the 4 acres identified in the needs analysis, is not consistent with Goal 3.1. Therefore, without further justification in the Findings, the proposed level of development is not appropriate and does not satisfy the criteria necessary for approval of the amendments.

-Also absent from the Findings is adequate justification as to how the proposed amendments comply with the criteria of Chapter 10 of the Tualatin Comprehensive Plan regarding the objective of the High Density Residential/High Rise Planning District (RH-HR).

-Chapter 10 states that the objective of the High Density Residential/High Rise Planning District (RH-HR) is to "support a wide range of housing types at the greatest density of household living in areas with the greatest access to amenities"(emphasis added).

-Of all the city's residential zones, the High Density Residential/High Rise zone provides 'the greatest density of household living" by requiring a density of 26 to 30 dwelling units per acre. By comparison, the city's other High Density Residential (RH) zone allows a maximum of only 25 units per acre.

-Even without reviewing legislative history, it is self-evident as to why land in the Central Urban Renewal area was originally zoned for high density-high rise residential development. This location is in close proximity and has convenient access to a significant number of amenities. Included among the many amenities are a wide range of existing employment opportunities, a variety of established office services and retail stores and restaurants, city hall, the police department and municipal court, the library, a major city park and community center, and access to transit bus stops and a commuter rail station. Many of these amenities are within walking distance of the zoned area, making this central city location initially appropriate for the highest level of residential density. The amount and types of amenities available in close proximity to each other also provide reasonable examples and set expectations and a standard for determining where, or even whether, other "areas with greatest access to amenities" exist in the city.

-In contrast, the Findings for the proposed 9.2 acre plan amendment indicate that this site is near the Basalt Creek development area which offers only a limited number of amenities in close proximity to the site, specifically "public transportation bus lines, future goods and services, and employment areas". When compared to the fairly high standard established by the currently zoned high density-high rise land in the city center, the significantly fewer amenities found near the proposed amendment site do not justify the area as having "the greatest access to amenities". Therefore, without further justification in the Findings, designating the 9.2 acre site for the highest level of residential density available in the city's planning districts is not appropriate and does not satisfy the objective criteria of Chapter 10 necessary for approval of the amendments.

-The Findings as presented do not justify the following:

1) **The proposed addition of a surplus of 5.2 acres of high density-high rise residential land in excess of the 4 acre deficit identified by the Housing Needs Analysis, and**
2) **The proposed application of the high density-high rise residential plan designation to 9.2 acres which would allow the highest level of residential density to be developed in a location at the city's southern periphery that is not in an area with "greatest access to amenities".**

-Due to the lack of Findings, the proposed amendments do not conform with requirements of the Tualatin Comprehensive Plan Goal 3.1 and Chapter 10.

-Therefore, criteria for approval of the proposed plan map and text amendments are not satisfied at this time.

Subject: Norwood Area Proposed Zone Change Comment

Hello.

My name is Dan Unrein. I am a 30+ year resident / home owner on Frobase Road.

I have a Tualatin mailing address and Zipcode although the property is under Washington County jurisdiction.

Many years ago Washington County sent a notification to property owners with Frobase Road “connections” that the County was going to revert the road from a very badly in need of repair asphalt surface to a “gravel” surface.

One of my then neighbors took up the cause to prevent this reversion. (The dust from the traffic would have been outrageous!)

After quite a process my neighbor was able to get the County and the neighbors to agree on a “private” road improvement bond to pave Frobase Road with asphalt. This re-pavement project was funded by an assessment on each property on Frobase Road.

(I know the assessment calculation was quite involved – and I never knew if the properties on the south side of Frobase were accessed – they are in Clackamas County!)

Here is why Frobase Road residents need consideration in your Rezoning Decision.

Washington County would only make the road so wide!

There can be no center dividing line for two way traffic.

There can be no white reflective stripes on the outside edges to help with identifying the edges on the dark nights, especially with a heavy fog setting on the area. (Multiple personal thrills associated with this over the years!)

There can be no speed limit signs and no speed limit set.

Without any of the typical street aids, two way traffic on Frobase is and always has been an accident waiting to happen. It is a driver's choice about where the edge of the road is and how comfortable they are at "feeling" for the edge of the road.

The saying they "took their half out of the middle" applies way too often, especially with drivers just discovering the new found shortcut!

Frobase Road is strategically located for traffic to leave the congestion of Boones Ferry Road, SW 65th, Stafford Road via 205 exit and try another route – even if it only makes the driver feel better because they are moving! The congestion can be on both ends of Frobase Road.

Boones Ferry Road on one end and SW 65th on the other end on a Friday afternoon is a no win situation for all parties.

Thank you for your consideration.

Dan

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Danette Ramirez

Subject: Proposed Map and Text Amendments for Vista Residential Partners, Horizon Church

Dear Tualatin City Planning Commission,

Regarding the land use decisions for the proposed apartment development at 23370 SW Boones Ferry Road, please accept my comments below:

Residents in the area deserve to enjoy the benefits afforded to everyone in Tualatin resulting from rational zoning rules. Zoning rules exist for several important reasons, and this property should not be rezoned to the HIGHEST POSSIBLE DENSITY to allow a 276-unit, six-building, four-story complex to be built immediately across the street from a neighborhood of single-family homes. If this is approved, our quality of life will suffer greatly, and out property values will suffer as well.

This is especially true given that over 500 new residences have been already approved for construction within yards of this location. The resulting increase in traffic coming from roughly 900 additional households will turn the Norwood Rd – Boonesferry Rd intersection into the worst-rated intersection. Even with a traffic light, delays and backups at this intersection will be severe. This is also compounded greatly by Tualatin High School and Byrom Elementary located so close by.

This plot of land could be used to build duplexes and other multi-family units, without having to go to such high density. This would help address the housing need without so severely impacting the quality of life and property values for neighboring homeowners.

I respectfully request that the wishes of the many neighbors, who would be so severely impacted by this project, be honored. Please do NOT support the proposed Plan Map Amendment (PMA) from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR) at 23370 SW Boones Ferry Road.

Thank you kindly,

Daniel Cobb

Dear Madeleine,

My personal Information.

Danny and Joni O'Neal
22625 SW 94th Terrace
Tualatin, OR 97062
503-692-0908

We live in the adjacent area that will be affected by this project,

We will provide bullet point comments rather than a long narrative.

We will be away from home when the meeting on May 22, 2023 is scheduled.

1. We've lived in Tualatin since July 1995 in the same home.
2. I attended the Byrom CIO meeting on February 28, 2023 expecting to hear Mayor Bubenik and Councilor Reyes comments on this project. Neither were in attendance as they were advised not to by the City legal counsel. I was disappointed that we couldn't hear directly from our cities leaders on this.
3. We've watched Tualatin grow and change, most was good. However the growth we've seen lately is counter to the reason We choose to live here. The traffic is beyond the capabilities of the roads and infer-structure. Just try and enter Boones Ferry from a side street in the morning

hours or afternoon around 4:00 pm. Not an easy task or even safe at times. Now we are faced with more homes on Boones Ferry Road and a high rise muti-family complex on Norwood. We both know that the increased population will put a strain on our already saturated community. We're very disappointed in our City Government's decision to approve these projects, sometimes it seems to be ignoring current zoning regulations and processes to accommodate the developers over the residents. We're not against increasing the availability of homes. We are against the rapid increase and heavy concentration in one area and high rise buildings. It doesn't need to happen all at once and in a already heavily populated area.

4. We loved all of the big beautiful trees that populated our city and Boones Ferry and Norwood Road. They are quickly disappearing at an alarming rate so that developers can build more while ignoring the concerns of Tualatin residents. Didn't we used to claim to be "America's Tree City"? Not true anymore!
5. We cringe now when we drive along Norwood Road at the complete destruction of all the senior trees and foliage. Their removal has ruined a landscape that can't and won't be replaced by the proposed addition of NEW trees and fauna.
6. We understand that there is perceived need for more apartment style residences in Tualatin. However Norwood Road is not the answer to this issue. High Rise apartments will not fit the surrounding home styles and community.
7. Traffic is already a daily problem and will be exacerbated by this project and the additional homes in the Sunrise Development. The recommendation of a traffic control light at Norwood and Boones Ferry will do nothing to reduce the additional traffic that comes with impending approval of these apartments.
8. Property owners will suffer in reduced values of their current homes along the Norwood Rood corridor. That will be no fault of their own but the direct result of government decisions overriding the home owners input into this project.
9. The green-light given the project in the annexing approval for the property in question amounts to a forgone conclusion that the rezoning will follow suit.
10. The developer is a Atlanta based company with no ties or concerns about the affect this high rise will have on the neighborhood or the residents.
11. This property resides in the Sherwood School District and they have stated the district can accommodate the additional students. Memo from Jim Rose of Sherwood to Glen Southerland of AKS engineering. ***How long before the new residents apply for exemption status to enroll their children in Tualatin High School and Byrom Elementary that are actually within walking distance of the new developments? We know we would. We believe that both schools are at capacity or near it.***
12. Vehicular access to this property will require additional egress points. The current recommendation does not meet the 600 foot spacing requirement and requires right of ways on current lots 101 and 102 to provide flow also to lot 109.
13. The removal of existing trees will be the next variance requested much like the Sunrise Development received to remove trees under the guise that they were not healthy.
14. The stated services and amenities by AKS makes several overstated availability. The most glaring is that Tualatin High School and Edward Byrom Elementary school are close by when in fact they received notification from the Sherwood School District that they could accommodate the additional students in their schools. The project is in their district. Also basing park availability on a park that hasn't been properly approved or designed yet.
15. Our concerns are in step with other neighborhood residents in regards to traffic and building heights.The traffic study stated that the traffic light at Norwood and Boones Ferry is required without the apartment project in consideration. So then it adds no real benefit to the additional vehicles associated with this project..As usual developers lay the responsibility for traffic improvements on the city and it will always lag behind the growth experienced with new homes and apartments. The proposed height of 4 stories of 50 feet will still limit the visibility of those residents in homes on the Norwood Road elevation.
16. We completely disagree with this statement by AKS "The proposed code height limitation would reduce the visual impacts of the future site improvements on the surrounding area. Along with the

transportation improvements, the proposed plan map and text amendments consciously consider the characteristics of this and other areas of the City, and this criterion is met." Question: Do any of these people believe that this would be acceptable in their own communities? We don't expect a response would be forth coming.

With the comments we've provided we're completely against the rezoning approval that would give this development the authorization to proceed with the project that would have a negative impact on the city and my community.

Thanks for the opportunity to provide or opinions and comments in this all important process.

Our personal Information.

Danny and Joni O'Neal
22625 SW 94th Terrace
Tualatin, OR 97062
503-692-0908

We live in the adjacent area that will be affected by this project,

We will provide bullet point comments rather than a long narrative.

We will be away from home when the meeting on May 22, 2023 is scheduled.

1. We've lived in Tualatin since July 1995 in the same home.
2. I attended the Byrom CIO meeting on February 28, 2023 expecting to hear Mayor Bubenik and Councilor Reyes comments on this project. Neither were in attendance as they were advised not to by the City legal counsel. I was disappointed that we couldn't hear directly from our cities leaders on this.
3. We've watched Tualatin grow and change, most was good. However the growth we've seen lately is counter to the reason We choose to live here. The traffic is beyond the capabilities of the roads and infer-structure. Just try and enter Boones Ferry from a side street in the morning hours or afternoon around 4:00 pm. Not an easy task or even safe

at times. Now we are faced with more homes on Boones Ferry Road and a high rise muti-family complex on Norwood.

4. We both know that the increased population will put a strain on our already saturated community. We're very disappointed in our City Government's decision to approve these projects, sometimes it seems to be ignoring current zoning regulations and processes to accommodate the developers over the residents. We're not against increasing the availability of homes. We are against the rapid increase and heavy concentration in one area and high rise buildings. It doesn't need to happen all at once and in a already heavily populated area.
5. We loved all of the big beautiful trees that populated our city and Boones Ferry and Norwood Road. They are quickly disappearing at an alarming rate so that developers can build more while ignoring the concerns of Tualatin residents. Didn't we used to claim to be "America's Tree City"? Not true anymore!
6. We cringe now when we drive along Norwood Road at the complete destruction of all the senior trees and foliage. Their removal has ruined a landscape that can't and won't be replaced by the proposed addition of NEW trees and fauna.
7. We understand that there is perceived need for more apartment style residences in Tualatin. However Norwood Road is not the answer to this issue. High Rise apartments will not fit the surrounding home styles and community.
8. Traffic is already a daily problem and will be exacerbated by this project and the additional homes in the Sunrise Development. The recommendation of a traffic control light at Norwood and Boones Ferry will do nothing to reduce the additional traffic that comes with impending approval of these apartments.
9. Property owners will suffer in reduced values of their current homes along the Norwood Rood corridor. That will be no fault of their own but the direct result of government decisions overriding the home owners input into this project.
10. The green-light given the project in the annexing approval for the property in question amounts to a forgone conclusion that the rezoning will follow suit.
11. The developer is a Atlanta based company with no ties or concerns about the affect this high rise will have on the neighborhood or the residents.
12. This property resides in the Sherwood School District and they have stated the district can accommodate the additional students. Memo from Jim Rose of Sherwood to Glen Southerland of AKS engineering. ***How long before the new residents apply for exemption status to enroll their children in Tualatin High School and Byrom Elementary that are actually within walking distance of the new developments? We know we would. We believe that both schools are at capacity or near it.***
13. Vehicular access to this property will require additional egress points. The current recommendation does not meet the 600 foot spacing requirement and requires right of ways on current lots 101 and 102 to provide flow also to lot 109.
14. The removal of existing trees will be the next variance requested much like the Sunrise Development received to remove trees under the guise that they were not healthy.
15. The stated services and amenities by AKS makes several overstated availability. The most glaring is that Tualatin High School and Edward Byrom Elementary school are close by when in fact they received notification from the Sherwood School District that they could accommodate the additional students in their schools. The project is in their district. Also basing park availability on a park that hasn't been properly approved or designed yet.
16. Our concerns are in step with other neighborhood residents in regards to traffic and building heights.The traffic study stated that the traffic light at Norwood and Boones Ferry is required without the apartment project in consideration. So then it adds no real

benefit to the additional vehicles associated with this project..As usual developers lay the responsibility for traffic improvements on the city and it will always lag behind the growth experienced with new homes and apartments. The proposed height of 4 stories of 50 feet will still limit the visibility of those residents in homes on the Norwood Road elevation.

17. We completely disagree with this statement by AKS "The proposed code height limitation would reduce the visual impacts of the future site improvements on the surrounding area. Along with the transportation improvements, the proposed plan map and text amendments consciously consider the characteristics of this and other areas of the City, and this criterion is met." Question: Do any of these people believe that this would be acceptable in their own communities? We don't expect a response would be forth coming.

With the comments we've provided we're completely against the rezoning approval that would give this development the authorization to proceed with the project that would have a negative impact on the city and our community.

Thanks for the opportunity to provide our opinions and comments in this all important process.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Darilyn Berray

Subject: No to PTA23-0001 and PMA23-0001 Applications

I am opposed to the applications and what they stand to do to our neighborhood and city.
These applications will first of all make my neighborhood and Norwood road worse off then it will be after the homes of Autumn Springs get built and residences are filled. This alone will cause us all huge traffic congestion and issues since no traffic studies were done to comprehend the impact of such a large amount of housing being placed on this two lane Road.

The thought of high rises being placed not only along Norwood Road but also anywhere in our great city sickens me. Is this a developers community or are we a community made up of People that have been in this city and contributed to this city?
We are a community of people that are willing to work together to help make growth decisions for our community that are smart and reasonable.
Not because the church has some financial incentive to sell off property to a developer that can make the money and turn the city council to change its current policies and not represent the people that voted them in the position they have been elected to.

If this were to pass my 16 years in this community will end and I and my family will have no choice but to leave this community we love. I'm certain I am not alone.
I ask that you all really consider these applications very carefully and consider not only what they will do immediately, but the future of Tualatin as we know it.
I have heard a rumor that this council has never seen application that they never liked.
Let's START with these TWO!!

Let’s say NO to these applications!

Sincerely
Dave Tully

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Dear Tualatin City Council Members and Mayor Bubenik,
We agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities.
The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community.
We are requesting City Council deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.
Thank you,

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Deanna Cain

We already know what decision has been made, some administrator has already been lobbied and received payment in some fashion from the contractor. The rest of this is just wasting time and taxpayers money to make us think we have input, when we really don't.

Subject: Norwood for Smart Zoning - Please Consider the Needs of Your Residents!

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;

The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;

As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of

ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,
Diana Fitts

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to the Planning Commission and Council at the public hearing. The public hearing will be held on May 22, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

A Notice of Decision shall be provided to anyone submitting written comments. As a comment participant, you will receive a Notice of Decision when the decision is made – do you have a preferred mailing address you would like the notice sent?

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Erica Shafer

We agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community. For now I am requesting City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.
Thank you,

Subject: I say NO to PTA23-0001 and PMA23-0001 Applications

Good Afternoon,

I would like to add my voice to those saying:

High Rises BELONG in Tualatin Central Urban Renewal District ONLY.
High density high rise dwellings are limited to the core of Tualatin for good reason:

- Amenities within walking distance
- Shops and City services
- Mass transit
- Supporting City infrastructure
- Architecture that blends with existing urban environment
- Lighter dedicated parking requirements
- Livability and accessibility within a car-dependent suburb

They make NO SENSE anywhere else in Tualatin, especially on the edge of practically farmland and ON TOP OF ~600 units already approved for construction.

Let's not just make a decision because a developer wants us to. Let's be smart about our future, the future of our kids in the school district, the future of our safety, and the future of our community.

Thank you for time, consideration, and for your forthcoming vote of NO on this matter.

Subject: No code change for high-rise on Norwood

Good Morning Council,

I am writing you this morning to reiterate my support for what the Planning Commission recommended, which is that the text amendment and plan amendment are not in the public's interest and this development is not appropriate for the area on Norwood Rd. A high-rise belongs downtown as the current code allows for numerous reasons that the Planning Commission acknowledged with their recommendation.

Please make the right choice and make sure this high-rise is not allowed to go up on Norwood Road and that the code is not changed to allow high-rises anywhere outside of downtown.

Thank you for your work in helping keep Tualatin a vibrant community!

Cheers,

Fletcher

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission, As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments. As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too. I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes. Please support and approve the Map and Text Amendments. Thank you,
Gabriella Levasa ,(503) 939-0765 10695 Sw Meier Dr, Tualatin, OR 97062

Subject: Notice Of Public Hearing, Case File PMA 23-0001 & PTA 23-0001
Norwood Multi Family

Attn: Madeleine Nelson

Upon receipt of the Notice I have given considerable thought to the proposed project. Probably not a good idea as I'm looking out my window at the current project on Norwood including the removal of the forest entirely, the construction on Norwood itself leaving temporary asphalt patches rough and messy.
I can't imagine the amount of traffic this project is going to add to Norwood and surrounding neighborhood streets and collectors. I'm guessing increasing the need for traffic signals and other traffic control. If thats the case I hope it's a requirement for the contractor to pay for those future traffic control projects. And thats just for the project under construction.

The proposed multi level multi family project will only add to the existing traffic and infrastructure problems. Considering this project again in my opinion is self serving and not in the best interest of neighboring residents. I'm guessing you won't receive any favorable comments from all those you sent notice. Most probably will just discard the information thinking it won't matter what they write or they'll say you are going to do what you want anyway. Have seen it before and certain will again.

I am not in favor of this project and request the City Of Tualatin reject the proposal.

I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area.

A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Consider the needs of the entire City.

I agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community. For now I am requesting City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.
Thank you,
Glenn & Nancy Reynholds

Subject: Citizen Comments RE: City Tualatin Planning Commission 4-20-2023 Agenda Item Proposed (PMA) from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR)

DATE: 4-19-2023

TO: CITY OF TUALATIN PLANNING COMMISSION
C/O CITY OF TUALATIN PLANNING DEPARTMENT (planning@tualatin.gov)

We request the Planning Department to forward this submission to the individual members of the Planning Commission in a timely manner, that the Commissioners may have time to review prior to their meeting on Thursday.

Cc: City of Tualatin City Council (Collectively and Individually)

FROM: John and Grace Lucini-Residents & Property Owners Basalt Creek Area

RE: CITY OF TUALATIN PLANNING COMMISSION MEETING 4-20-2023
AGENDA ITEM:

The Planning Commission is asked to make a recommendation to the City Council on a request for a Plan Map Amendment (PMA) from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR) located on a 9.2-acre site at 23370 SW Boones Ferry Road

FOR INCLUSION INTO THE PUBLIC RECORD

As residents and property owners in the Basalt Creek Area since 2006, we wish to make a clear statement that we are not against development in the Basalt Creek Area.

As we have commented on multiple occasions, it is our hope and goal that development in the Basalt Creek Area should be planned and implemented in a thoughtful, coordinated, and integrated manner and in spirit and compliance with the protections provided by the Oregon Statewide Land Use Planning Goals.

Relevant to the proposed changes to the City of Tualatin Land Use Designations and Plan Map Amendments include (but not limited to) the following Land Use Planning Goals:

- #1 Citizen Involvement OAR 660-015-0000(1)
- #2 Land Use Planning OAR 660-015-0000(2)
- #5 Protections Natural Resources OAR 660-015-0000(5)
- #6 Air, Water and Land Resources Quality OAR 660-015-0000(6)
- #7 Areas Subject to Natural Hazards OAR 660-015-0000(7)
- #11 Public Facilities and Services OAR 660-015-0000(11)
- #12 Transportation OAR 660-015-0000(12)
- #14 Urbanization OAR 660-015-0000(14)

For many years we have repeatedly presented to the City of Tualatin the need for effective Land Use Planning as part of the urbanization process for the Basalt Creek Area.

We again submit our concerns as to the lack of appropriate or incomplete Land Use Planning for the Basalt Creek Area, and potential negative impacts for local citizens, and property and natural resources/environment from the proposed changes to the City Code and Land Use Designation Map for the Basalt Creek Area.

Due to the City of Tualatin's lack of a Stormwater Management Plan (as mandated by the State of Oregon) Publicly vetted and adopted for the Basalt Creek Area, these proposed changes should not be approved.

Prior to accepting and adopting these proposed changes to the City Code pertaining to Land Use in the Basalt Creek Area and/or make a change to the City Plan Map Amendment relating to the Basalt Creek Area, the City of Tualatin should prove it can ensure the safe and effective provision of the Public Service of Stormwater Management within the Basalt Creek Area- currently and throughout the entire urbanization process- in a timely coordinated, integrated manner; and in conjunction with Washington County, and the City of Wilsonville who have adjacent, overlapping and/or common downstream stormwater management responsibilities.

The public, including Basalt Creek Citizens and property owners, should have the right to review at this time- how the City of Tualatin has planned, documented, and memorialized their stormwater management planning for the Basalt Creek Area in coordination with other local governments who have adjacent, overlapping and/or downstream stormwater management responsibilities.

These currently proposed Code and Land Use changes in land use designations will have a direct impact upon the assessment, calculation, and identification of current and future stormwater management needs. Increased density of housing and removing relatively undeveloped land being replaced by development which has larger buildings, and more impervious surfaces has a direct correlation with increasing stormwater runoff, collection, treatment, and conveyance needs.

Stormwater flow is not bound nor contained by City Limit Lines. Effective stormwater management planning should be a cooperative regional responsibility and goal. This is even more relevant during the multiple years/decades it will take for the full build out of the Basalt Creek Area by the City of Tualatin. In the meantime, the Basalt Creek Area will contain a patchwork of properties under various jurisdictions of both the City of Tualatin and/or Washington County. The impact of Land Use decisions regarding the Basalt Creek Area by the City of Tualatin upstream from these properties may have negative impacts downstream- regardless if the properties have been annexed into the City- or not.

A well written thoughtful Stormwater Management Plan for the Basalt Creek Area is needed to evaluate and address potential adverse stormwater impacts ----which exist today, AND which may occur throughout the entire urbanization process of the Basalt Creek Area to ensure the City will be able to address and mitigate identifiable issues timely and appropriately.

Any future proposed land use actions to be accepted by the City of Tualatin which may impact stormwater management needs in the Basalt Creek Area; or potentially cause negative impacts to citizens, property,; or natural resources which the city is charged to protect- either locally or downstream, should be halted until the city is compliant with all local, state, and federal requirements for stormwater management and the city can ensure the safe effective provision of this public service as needed currently and throughout the entire urbanization process.

It is of importance to realize-the City of Tualatin continues to lack an adopted comprehensive, integrated and coordinated Stormwater Management Plan for the Basalt Creek Area, as required by the State for a municipality of greater than 2500 persons (*OAR 660-011-0010 Land Conservation and Development Department Chapter 660 Division 11 PUBLIC FACILITIES PLANNING*.)

- The City Of Tualatin has had ample knowledge of the need to assess, develop and adopt a Stormwater Management Plan for the Basalt Creek Area as the Basalt Creek Area was brought into the urban growth boundary in 2004 (Metro 04 1040B). It is now 19 years later, and the City of Tualatin continues to lack an adopted Stormwater Management Plan for the Basalt Creek Area

- Since 2016, the City Of Tualatin has made numerous statements of the *intention* to adopt a stormwater management plan for the Basalt Creek Area –none of which have come to fruition.

- The 2019 City of Tualatin's Basalt Creek Comprehensive Plan provided inadequate Stormwater Management information.

- The 2019-2020 City of Tualatin's proposed Stormwater Master Plan (SWMP) Update was adopted by the Tualatin City Council in 2020.

Prior to the adoption of the SWMP Update, the City, the Tualatin Planning Commission, and the City Council had all received our written submissions as to the need for a Stormwater Plan for the Basalt Creek Area, and the inadequate and incomplete information and assessment of Stormwater Management Planning for the Basalt Creek Area within the scope of the document. Our submissions included a review and written comments by our Hydraulic/ Environmental Engineering Consultant who also supported our concerns as to the inadequacies of the proposed SWMP to identify and address stormwater management needs in the Basalt Creek Area within the City's Land Use Planning Jurisdiction.

> It should be noted, during the SWMP Update adoption hearing, a senior City staff member commented a Stormwater Management Plan for the Basalt Creek Area was not necessary, as the City has a relationship with Clean Water Services who review individual development plans for the City.

However, the piecemeal evaluation of individual proposed developments to provide for the provision of Public Services within a greater area is not supported by the State's Land Use Planning Goals and does not provide a Publicly vetted framework and guidance for the development of effective integrated stormwater systems within the entire region for current needs and future development.

- In 2020, the City's SWMP Update was legally challenged due to the lack of inclusion of the Basalt Creek Area within the scope of the newly adopted City's Stormwater Master Plan. The City agreed to rescind the adopted SWMP Update. The members of the City staff made later statements as to their intention to develop and adopt a Stormwater Management Plan for the Basalt Creek Area.

- In 2021, as part of the City of Tualatin SW Industrial and Basalt Creek Area Urban Renewal Bond Task Force, the City stated, "The City of Tualatin intends to complete this project [the assessment and development of a Stormwater Management Plan for the Basalt Creek Area] under the Community Development budget and operation. Currently the City is expected to allocate $100,000 in FY 21-22." As of this date the City has not completed a Stormwater Management Plan for the Basalt Creek Area for Public Review prior to adoption- again failing to fulfill stated intentions for the adoption of this document in a timely manner.

- The City of Tualatin's Stormwater Master Plan which is now currently in force was adopted in 1972, when the Basalt Creek Area was not within the City's Land Use Planning jurisdiction. The City's 1972 SWMP has dated information and does not include the current or future land use designations identified for the Basalt Creek area upon which Stormwater Management Planning needs are determined.

The absence of a thoughtful, clearly written integrated stormwater management plan for the entire Basalt Creek area which meets or exceeds the state's requirements- continually places the city, and local citizens, property, and natural resources in jeopardy of the negative impacts from stormwater flows, erosion, land instability/ landslides, and water quality degradation.

THIS PHOTO TAKEN ON 2-28-2022 IS ONE VISUAL EXAMPLE

OF THE IMPACT OF 3 DAYS OF RAIN AND THE RESULTING DOWNSTREAM STORMWATER IMPACTS ON THE WETLANDS IN THE BASALT CREEK CANYON

- DISCOLORED BROWN STORMWATER DUE TO UPSTREAM EROSION CAN BE SEEN FLOWING FROM THE NORTH (Right side of photo)

DOWN SOUTH INTO THE WETLANDS WITHIN THE CITY OF TUALATIN'S LAND USE PLANNING JURISDICTION AND WITHIN THE WILLAMETTE RIVER BASIN

RAIN IS A CURRENT AND RECURRING EVENT IN OREGON

AND SUPPORTS THE NEED FOR A CURRENT STORMWATER MANAGEMENT PLAN FOR THE BASALT CREEK AREA

WHICH INCLUDES COORDINATED PLANNING & IMPLEMENTATION BY LOCAL GOVERNMENTS

The City of Tualatin has very recently stated, *"The City of Tualatin manages stormwater discharges in accordance with Clean Water Services (CWS) Municipal Separate Storm Sewer System (MS4) permit. The City is one of 12 member cities who operate under CWS's MS4 permit, which established regulations and standards for managing stormwater within the Tualatin River Watershed.*
(City of Tualatin 4-24-2023 City Council Work Session Informational Packet-2024-2028 Capital Improvement Plan Review).
Yet, a large majority of the Basalt Creek Area is located within the Willamette River Watershed- and not within the Tualatin River Watershed.

This 4-24-2023 City Council Work Session Document included a proposed *"Capital Improvement Plan 2023/24 – 2027/28"* for future Capital Improvements to be funded by the City and/or by other outside sources for the next four years. While this budgeting document for the City identified and included Capital Improvements needed within the Basalt Creek Area for improvements to provide for the provision of Public Services of water and sewer, fails to identify ***any*** stormwater project needed within the Basalt Creek Area to ensure the safe timely and effective provision of the Public Service of Stormwater Management in the Basalt Creek Area within the next four years.

The City's proposed *"Capital Improvement Plan 2023/24 – 2027/28"* document does not even include a Stormwater Management Project for the Basalt Creek within the Plan's "Unfunded CIP Projects by Category."

> It is difficult to believe that one of the largest areas identified for growth within the City's Land Use Planning Area with …. With 194 developable acres within the City's Land Use Planning jurisdiction…
> - where the Basalt Creek Concept Plan acknowledged the need for upgrades to the minimally existing stormwater infrastructure would be needed with development
> - where the majority of land has been rural or underdeveloped

- where there are concerns as to the finite carrying capacity of the land to absorb additional stormwater from new development when previously existing stormwater collections basins on undeveloped land are removed due to development
- where the majority of the stormwater in the Basalt Creek Area flows south away from the City of Tualatin's existing infrastructure and into the Willamette River Basin

- where the lands within the Basalt Creek Area contains multiple constraints and limitations including a large deep canyon with wetlands and steep walls some exceeding 25% grade divides the Basalt Creek Area; and includes large formations of basalt rock- which increase the difficulties and costs for construction of stormwater infrastructure within the area.

A Stormwater Management Plan, as identified by the Oregon Department of Environmental Quality, would contain components including necessary assessments, analysis and identification of major projects needed for the Basalt Creek Area currently and in the future.

It is concerning that the City has not adopted a Stormwater Management Plan for the Basalt Creek Area when it is reasonable and likely there are major stormwater management improvements which will be needed within the Basalt Creek Area to address current Stormwater Management needs or the needs for future development resulting from the City's urbanization process. The City continues to lack a mandated document which includes a process for clearly identifying needed major stormwater projects within specific timeframes.

In addition to the issues presented above, there are additional concerns as to the adequacy of Land Use Planning for the Basalt Creek Area by the City of Tualatin which have potential negative impacts to the various and natural resources/environment known to exist within the Basalt Creek Area, and which the City is charged for protecting and conserving by various Regional, State, and/or Federal requirements.

The Basalt Creek Area contains various resources including many listed within the State's Goal #5 Land Use Planning Goal for Natural Resources and Open Spaces and or in Metro Title #13 Maps. Many of these Natural Resources in the Basalt Creek Area can be negatively impacted by mismanaged stormwater flows. However, the City of Tualatin has not provided clear standardized identification as to type, location or condition of these various Natural Resources known to exist in the Basalt Creek Area, yet not clearly memorialized within the City's adopted Natural Resources Maps 72-1 Natural Resources Protection Overlay District (NRPO) Map or 72-3 Significant Natural Resources Map.

The inadequate mapping of various Significant Natural Resources and/or clear identification of areas of Natural Resources areas which are to be protected in the Basalt Creek Area, hampers effective Stormwater Management planning by the City in the Basalt Creek Area.

The concerns as to the incomplete/ inadequate memorialization in the City's Governing Documents of natural resources which are required to be protected or conserved in the Basalt Creek Area are amplified during the review process for proposed development in the Basalt Creek Area, when some of the City of Tualatin's City Codes and/or Erosion Control Requirements cite specific reference to the City's Natural Resources Protection Overlay Map, yet the City's Natural Resources Protection Overlay Map lacks complete accurate information on the various resources requiring protection within the Basalt Creek Area.

There are very reasonable concerns that the City of Tualatin lacks completion or memorialization of major elements necessary for effective Land Use Planning for the Basalt Creek Area. These issues must be resolved prior to allowing future development--- or consideration of changes to the current Land Use Plans and

Governing Documents when fundamental and essential Land Use Planning Documents have not yet been fully developed and memorialized for the Basalt Creek Area.

If the health, safety, and quantity of living for the citizens of the Basalt Creek Area and the health, protection and conservation of various highly valued Natural Resources which currently exist within the Basalt Creek Area- have significance and meaning- then the City should not rush to adopt changes to the Basalt Creek Development Code or Land Use Designations within the Basalt Creek ----

- until the City has full use and power of a fully vetted and Publicly adopted Stormwater Management Plan for the Basalt Creek Area
- to use in effectively evaluating proposed Land Use Actions potential impacts within the Basalt Creek Area and/or downstream.

We realize the City and developers are anxious to propose changes Land Use Maps for the Basalt Creek Area or Code Changes which may initiate and allow more rapid development in the Basalt Creek Area, which will bring development fees more quickly into the City. However, this approach at the expense of thoughtfully planned and implemented development is very short sighted and may lead to long term negative outcomes for the region, and the City.

We appreciate the opportunity to present our concerns regarding the proposed changes to the City Code, and the proposed changes to Land Use Designations within the Basalt Creek Area being presented to the Tualatin Planning Commission on 4-20-2023.

To reduce the redundancy of the concerns we have previously made to the City, the Planning Commission and/or the City Council of Tualatin since 2016 regarding the need for effective Stormwater Management by the City of Tualatin in the Basalt Creek Area, we have included a partial list of our previously written submission. Please let us know if the City should wish us to provide copies.

We respectfully submit our concerns regarding the City adopting changes to the City Code, or changes to the City's Map Plan which may impact the Basalt Creek Area while the City continues to lack a Stormwater Management Plan for the Basalt Creek Area adopted and memorialized within the Public Process.

PARTIAL LIST OF WRITTEN SUBMISSIONS TO THE CITY OF TUALATIN, THE TUALATIN PLANNING COMMISSION AND/OR THE TUALATIN CITY COUNCIL

-REGARDING THE NEED FOR THOUGHTFUL EFFECTIVE STORMWATER MANAGEMENT PLANNING BY THE CITY OF TUALATIN FOR THE BASALT CREEK AREA

2016 Notice to the Cities of Tualatin and Wilsonville of Stormwater Flooding of our Basalt Creek Property from upstream stormwaters within the NE portion of the Basalt Creek Area and the need for thoughtful Stormwater Planning including an assessment of the stormwater flooding of our property by Hydraulic/Environmental Engineer Consultant

2016 Email chain with the City of Tualatin Engineer inquiring if the Professional Services Contract the City was executing to Update the City's Stormwater Master Plan, would include the Basalt Creek Area. A positive response including the rational for inclusion of the Basalt Creek Area within the scope of the contract was provided by the City Engineer.

2019 Multiple Citizen Comments submitted to the Tualatin City Council prior to adoption of the Basalt Creek Comprehensive Plan

2019 Citizen Comments submitted to the Tualatin City Council prior to the annexation of the Autumn Sunrise Properties in the Basalt Creek Area

2019-2020 Citizen Comments submitted to the City of Tualatin, the Tualatin Planning Commission, and then to the City of Tualatin City Council regarding the City of Tualatin proposed Stormwater Master Plan Update, including a review and comments supporting our concerns by our Hydraulic/Environmental Engineer Consultant.

2021 Citizen Comments submitted to the Tualatin City Council prior to the annexation of the CPAH property in the Basalt Creek Area

2021 Dissenting Vote Submission to the City of Tualatin City Council, as a member of the City of Tualatin SW Industrial/Basalt Creek Urban Renewal Task Force

2021 Citizen Comments submitted to the Tualatin City Council prior to the Code Variances requested by the CPAH property in the Basalt Creek Area including a review and comments supporting our concerns by our Hydraulic/Environmental Engineer Consultant

2022 Multiple Citizen Comments and emails submitted to the Tualatin City Planning Department after the City had accepted, reviewed, and submitted for hearing the CPAH Architectural Review which included the developers Stormwater Plan for development in the Basalt Creek Area. These emails which we generated were requests for basic standard stormwater management planning information to be provided and which should have been included within a developers Stormwater Plan submitted for Architectural Review- (i.e., to how and where the developer planned to discharge offsite overflow and how and if the developer planned to connect to existing stormwater pipes or to use piping to be constructed in the future).

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Heather Kabli

Subject: No to PTA23-0001 and PMA23-0001 Applications

Dear Madeleine,

As a property owner in Tualatin, I am writing to say NO to the PTA23-0001 and PMA23-0001 Applications.

We have had unprecedented development of building new homes to alleviate the housing crisis here in our City, with almost 1,000 new units underway already in the past 2 years.
This meets 92% of Tualatin's 30-year growth plan.
92% of a 30 year plan - met already!
We also are already in compliance with the 2022 Oregon Housing Needs Analysis - which is what this developer is trying to use to push this code change.
I say NO to development that can't be supported by existing City infrastructure.
I say NO to development that opens the floodgates to high-rises everywhere and anywhere.
I say NO to development that hands our City over to developers to build what they want.
Keep high rises to the core of Tualatin - which has infrastructure, amenities, and provides the necessary quality of life for apartment/condo living.

Sincerely,

Jackie Mathys

24305 SW Boones Ferry Rd.
Tualatin, OR 97062

Subject: Addressing Tualatin Zoning Changes: Traffic, Schools, and Alternative Options

Dear Tualatin Decision Makers,

I've written before but writing again. As a Tualatin resident and rental property owner, I'm writing on behalf of my neighbors and myself to express our concerns about the proposed zoning changes involving Tax Lots 106 and 108. We believe there are more suitable alternatives available in downtown Tualatin that would minimize the negative impact on our community.

Here are our main concerns:

Traffic congestion: The area around SW Boones Ferry Road already experiences significant traffic. Increasing housing density in this area would exacerbate the problem, affecting the quality of life for Tualatin

residents. Although the proposed stoplight at Norwood and Boones Ferry would help, it may not be enough to mitigate the added traffic.

School capacity and public facilities: Our schools are nearing capacity, and further residential development will put a strain on the education system. Additionally, the proposed zoning change would eliminate a space designated for public institutions without providing a suitable alternative location.

Utilizing vacant spaces downtown: There are already properties zoned for high-density residential development near the Westside transit station (8412, 8514, and 8538). These locations are conveniently located near transit, retail, and other amenities, making them a more appropriate choice for new housing.

We appreciate your commitment to the well-being of the Tualatin community and hope you will consider these concerns when making decisions regarding the proposed zoning changes. We believe that focusing development efforts on existing high-density zones in downtown Tualatin would better serve our community.

Thank you for your attention to this matter.

Sincerely,

Jackie Mathys

Subject: Strong opposition to PTA23-0001 and PMA23-0001 proposals

Dear members of the Tualatin Planning Dept.,

I am writing to express my strong opposition to the PTA23-0001 and PMA23-0001 applications. As a long-time property owner and resident of Tualatin, I am extremely concerned that these proposals are not in the best interest of the public and are not suitable for the area in question.

High-rise developments are better suited for downtown Tualatin, where the infrastructure is more capable of supporting increased population density and traffic. By concentrating such developments in the downtown area, we can ensure that the city's growth is sustainable, and our community's unique character is preserved.

I urge the committee to prioritize the needs of the entire city and its residents, and reconsider the approval of the PTA23-0001 and PMA23-

0001 applications. Instead, let us work together to find alternative solutions that are more compatible with our community's values and vision for the future.

Thank you for your time and consideration.

Sincerely,

Jackie Mathys

Hi Madeleine,

Please add my comments to the official record from Thursday's meeting. Attached. Thank you.

Jackie

Jackie Mathys
M: 503-781-2872
jackiemathys@gmail.com

Thank you. My name is Jackie Mathys, and I live with my husband, Steve, at 24305 SW Boones Ferry Rd. We also own a second home at 20310 SW Boones Ferry, both in Tualatin. We have been homeowners in Tualatin since 2005, nearly 20 years.

I'm speaking today to express our strong opposition to the proposed Plan Map Amendment and Plan Text Amendment for the 9.2-acre site located at Norwood Rd. and Boones Ferry Road.

Our community's character is at stake. The proposed change from Medium-Low Density Residential and Institutional to High-Density High Rise would dramatically alter the very essence of our neighborhood. We moved to this area because of its quiet, residential atmosphere. The introduction of high rise buildings in this proposed location would be a jarring, ill-conceived departure from the Tualatin we've loved and valued for almost 20 years.

The increased density and the construction of high-rise buildings also pose a threat to our limited resources and infrastructure. This kind of development would exacerbate the existing daily gridlock and dangerous lane skipping on Boones Ferry to I-5. We personally have a front row seat to this nearly daily traffic jam and it's only gotten worse in the past few years.

Also, the construction of high-rise buildings on this 9.2-acre site means stripping what's left of the stand of trees on Norwood Rd. Our community has a responsibility to preserve our environment and maintain a healthy balance between development and conservation.

I implore the Planning Commission to take our concerns to heart when making a recommendation to the City Council. This proposed Plan Map Amendment and Plan Text Amendment are not just minor changes – they would drastically alter the character of our community, negatively impact our resources and infrastructure, and set a troubling precedent for future development.

We urge the commission to reject these amendments and preserve the integrity of our neighborhood that we've called home for so long.
Thank you.

Subject: A Concerned Homeowner's Perspective on the Proposed High-Rise on SW Norwood Rd.

Dear Tualatin City Council Members,

As a 63-year-old woman approaching retirement, I have been proud to call Tualatin home since 2005. I am writing to express my concern regarding the high-rise development proposed for SW Norwood Rd. I stand with the Planning Commission in believing that a high-rise building is unsuitable for our community.

High-rise structures are more fitting for downtown locations with easy access to mass transit and various amenities. I encourage you to visit the website Norwoodsaysno.org, which illustrates the possibilities of well-planned development if the involved parties, such as Horizon Community Church and Vista Residential Partners, are open to reevaluating their intentions for the property.

As someone who deeply cares for our city's future, I strongly request that the City Council reject these applications for a high-rise and a code change that would impact all of Tualatin. Instead, I implore you to consider a plan that garners the support of our community.

We must not permit developers to amend our development code merely to augment their profits at the expense of our beloved community. I ask that you think of Tualatin as a whole, preserving the qualities that make our city a wonderful place to live, both for current residents and future generations.

Sincerely,

Jackie Mathys

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Ms. Nelson:

Have you been to Norwood lately? The housing development has recreated chaos for months. Constant dust on homes and cars last summer and assuming again this spring and summer. Forest lost and ugly water tanks exposed. Now we also have to watch the traffic on I-5…who wants to do that. Nothing good has come from the housing development. It is like looking at a development in IOWA…flat land with no trees…baron. And Norwood is undriveable always dug up and we can't even turn into our street we have to go to Boones Ferry and use Iowa Street to get home. And soon all those new home owners with their vehicles will empty out on Norwood. I imagine soon we will have to endure traffic lights on Norwood. It has ruined a once beautiful neighborhood. Hard to believe a town referred as a City of Trees could agree to this development.

AND IT APPEAR TO JUST BE THE BEGINNING

Now you want to let a high rise go up on Norwood. Do you have a limit as to how many cars you are willing to dump onto Norwood?
Where are all these cars going to be parked. This condensed living leads to more people swamping the neighborhood. Our neighborhood in not suppose to be downtown Tualatin with shops and restaurants and grocery

stores. Downtown Tualatin would be the place for a high rise. Renters could WALK to grocery stores, shops and restaurants. They wouldn't need their cars.

And on top of all these items the developers aren't even Oregonians. Why are you letting people who don't even call Oregon home into Tualatin to destroy this once beautiful city. Money is the answer, only money. Not what is best for Tualatin.

Jane Robinson

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Jim Brauch

Subject: Comments on Case File: PMA 23-0001 & PTA 23-0001-Norwood Multi-Family

Proposed code amendment:

The applicant proposes to amend Section 44.100 of the Code.

The purpose statement currently reads: "The purpose of the High Density High Rise (RH-HR) zone is to provide areas of the City within the City's Central Urban Renewal area, an area west of the Central Urban Renewal area, north of the wetlands, and south of the Tualatin Country Club that are suitable for high density apartments or condominium towers." The proposed amendment would remove the restriction to the City's Central Urban Renewal area and "towers" form the current language. In addition a 4-story height limit would be imposed south of SW Norwood Road.

The Central Urban Renewal Area is well served by transit, goods and services and parks; all within walking distance; suitable for residents who may not have access to or choose to limit their reliance on cars.

By contrast, the Norwood site is located in the Basalt Creek Plan area. The applicant's submittal materials refer to employment lands in the area which may not be fully developed for 16 years. There is only one small neighborhood commercial area planned within walking distance of the Norwood site shown on the Basalt Creek Plan map. There are no parks shown on the plan. Transit service to the Norwood site is currently not available on weekends or after 8 pm on weeknights. Residents of a multi-family project in this location will need to rely primarily on a car to access most services.

The City's Central Urban Renewal Area is well suited for High Density High Rise because of the proximity to services and transit. The Norwood site is not due to limited services within close proximity and the fact that a height limit will be required to ensure compatibility with surrounding development.

I respectfully request the city council deny the code amendment and focus High Density High Rise development in areas in closer proximity to services and transit.

Property Comp Plan/Zone Amendment:

Should the council vote to approve the code amendment I have some concerns about the proposed zone change.

How does this comp plan and zone change meet the city's needed housing inventory?

Goal 3.2 HOUSING FOR ALL reads:

"Encourage development and preservation of housing that is affordable for all households in Tualatin"

Page 3 of the applicant's submission refers to the city's housing needs assessment and the fact that half of renter households in our community are cost burdened. There is an identified need for multi-family units but even more, a need for affordable housing units. Changing the zoning on this site doesn't guarantee affordable housing here.

There was also a reference to commutes of 30 minutes into Tualatin for jobs. Is this because housing isn't available or is unaffordable?

Does the traffic analysis consider/include the impact of traffic from the 400+ single family unit Autumn Sunrise development now under construction in addition to this multi family development? Wouldn't peak traffic volumes occur at the same time for both developments – am/pm commuter hours?

Currently transit is limited to a commuter bus line to this site. Does Tri-Met have plans to increase service to this site?

In conclusion, at this time, this site is not well suited for a multi family development as this is not guaranteed to meet the affordable housing needs for our community, is not well served by transit, not close to goods and services, nor current employment opportunities.

Respectfully Submitted,

Jo Aust

Dear Tualatin Planning Department Members, Planning Commission, City Council Members, and Mayor Frank Bubenik,

Thank you for your time and attentive listening at yesterday's hearing, and your thoughtful comments before the vote. Please know these were much appreciated.

In case you find it useful, below is the transcript from my 3 minute presentation laying the groundwork for our primary objections to the zone change application (FYI, I pulled the complete application from the City's website). I understood you had no choice but to approve the annexation. As we all know, the zone change application, is a much different matter, and with that in mind, I wanted to raise these key points sooner rather than later, so that you all have the time to digest them.

Rest assured, there are even more detailed reasons to reject the applicant's zone change (using the code criteria), but the 3 minute limit prevented me from getting into those details last night. Please know that we will share with you a full rebuttal of the application in the days and weeks to come.

Thank you for your service and all you do. Transcript is below.

Joel Augee

TRANSCRIPT

My name is Joel Augee. I live at 8905 SW Iowa Drive. I am here to speak out specifically against the applicant's annexation vis-à-vis its map and text amendment to change the zoning to High Density High Rise.

First, I want to say that I imagine how difficult it must seem, to be in your position. There is a lot being written and said about this proposed development. At the end of the day, though, the decision really isn't difficult. And here is why.

First, let's dispel a myth. The first myth is that we neighbors here are NIMBYS. But is that really the case? After Autumn Sunrise was approved, with nary an objection, and the same with Plambeck Gardens, the result is that we neighbors trusted the City and did not object to these developments. These two developments will result in over 500 housing units (in our back yards), which is over 50% of the City's entire housing needs for the next 20 years, per your own 2019 housing analysis. How in the world does that make us NIMBYS? It doesn't.

Second, let's understand why we neighbors no longer blindly trust the City to "do the right thing" with this application. The Autumn Sunrise approval has been a failure in a number of important regards. There are lessons to be learned. Not a stick of a tree was left in the middle – it is hideous, frankly, and nothing that our neighbor Wilsonville would have allowed. Second, no arborist was required to approve the plan to leave that thin strand of trees along Norwood, trees which ultimately knocked out power so many times that they had to be mowed down. And finally, as we can see by the developer's application here, even before another unit is approved, the traffic of Autumn Sunrise and Plambeck Gardens already requires, by the applicant's own traffic study, a signal at Norwood. A signal which was never required but clearly should have been required. And the developer's solution – let us build 276 more units of HDHR, so you can get your traffic signal. Wow. Really? That is bold.

Next, let's talk about the application. When you read through it, it plays heavily to the "housing crisis," and refers to the City's 2019 Housing Needs Analysis, as it should, but it offers ZERO, and that is the key here, ZERO data on where we currently stand in meeting those housing needs.

Where do we stand in? Since the study, 940 housing units have been approved.

- Alden Apartments – 45 town homes
- Plambeck Gardens – 116 multi family affordable housing
- Tualatin Height Apartments – 116 more units
- Autumn Sunrise, 407 housing units, some single family, some attached
- Nyberg Tualatin Apartments, 256 Units

So with 940 units already approved, that means, that in less than three years into a 20 year goal, you have reached 92% of that goal.

Looking at the facts and the data, your decision is easy. The re-zone application, and its extreme zoning, isn't in the public good. Leave the high density high rise for the city's downtown core where it is appropriate and needed. Please, use common sense, don't rubber stamp another proposal in our back yard, and reject the move to push the highest density, high rise zoning, into a place where it doesn't belong.

Thank you.

Madeleine Nelson

Subject: No to PTA23-0001 and PMA23-0001

Dear Tualatin Mayor and City Council Members,

I am writing to encourage you to follow the direction of the planning commission's 4-1 recommendation to reject the developer's proposed text and zoning map amendments.

I attended the planning commission hearing on April 20 and also spoke (the text of my remarks is pasted below). I want to say how impressed I was with the planning commission members, especially the 4 who voted against the developer's proposal. I was impressed with the obvious time and careful thought that these 4 commissioners put into their analyses and decisions, and I especially want to recognize commissioner Randall Hledik and the time he put into his review of the application, his insights, and finally his written remarks that he asked to have entered into the record. These remarks, which I encourage all of you to read, clearly showed how the applicant has NOT met the applicable zone code criteria. Among other items, the attempt to move the HD-HR zoning designation outside the City's downtown core clearly and obviously moves it away from important transportation hubs, especially including rail, but also important commercial business concerns, the library, and the park, etc. We here in Norwood think this is common sense, but it is wonderful to have the planning commissioners recognize this.

Other commissioners provided informed and thoughtful remarks, and talked about the obvious traffic impacts here, which will be huge and devastating not only to our neighborhood, but all of Tualatin.

The bottom line is that an extreme zone change is not appropriate here in Norwood, or in any other periphery of Tualatin.

I also want to address one counter-argument that the developer has been making, and that Steve Koper also attempted to make. That is, that the current location of the HD-HR zone map is located within wetlands and non-buildable areas, and so it must be moved to an area with no development, which would include a place like the Norwood Road location. While it may be true that the current map is located, at least in part, in wetland or other non-buildable areas, it absolutely does not follow that the best place to move it is the periphery of town. Frankly, that type of argument feels disingenuous at best.

Clearly, the logical place to move it would be elsewhere in the downtown core area, an area that is appropriate and that needs it. Think of the old Ace Hardware location, or the vacant Hagan's building. There are plenty of incredible redevelopment opportunities for that appropriate zone designation. Further, as planning commission chair Bill Beers said, we don't have to move it only to an area with no development. It could be moved to an area that will be redeveloped. It was so nice to hear that common sense from our planning commission chair and members! However, we are puzzled and alarmed that the employees in the planning department don't appear to even consider these common sense positions. I do not say this lightly. So thank goodness for the objectivity, wisdom and decency of the planning commission members.

Finally, in addition to what should not be built at the Norwood Road location, I want to remind you that there is so much potential here to make Tualatin better, and in this regard, mixed use and green space is critical. I know so many people who would welcome the Neighborhood Commercial zoning here, with a little grocery store and coffee shop, day care, etc., all that could be walkable from both existing and new neighborhoods. Unlike our neighbors in Wilsonville, we have very, very little walkable mixed use here in Tualatin, especially on the periphery. If we are serious about cutting down traffic trips, changing the zoning to Neighborhood Commercial would make all the sense in the world. It also should have been part of the Basalt Creek Master Plan. Per that plan, there is neighborhood commercial, but it is farther south, which makes little sense. The solution is to move it here. It would be such a welcome and obvious solution.

So a huge thank you to the planning commission members, for all their time and effort, and for rejecting extreme zoning that really is just an attempt by the developer and church to maximize density by using the pretext of the "housing crisis," but which would harm the community and infrastructure in the short, medium and long term. Please, see the application for what it is -- extreme zoning, and reject the high density as inappropriate.

Thank you,

Joel Augee
8905 SW Iowa Drive
Tualatin, OR

Text of remarks made to planning commission on April 20, 2023

Good evening, planning commission members. My name is Joel Augee. I live on Iowa Drive and I have been a Tualatin resident since 1998 and Norwood Heights resident since 2003. That said, the concerns here are by not just long term residents, but new residents as well.

Tonight I am here to ask that you each vote to recommend AGAINST the two action items before you, specifically against the applicant's map and text amendment to change the zoning to High Density High Rise.

Frankly, the issues before you are not difficult. The application here contains the most extreme zoning possible – high density high rise – and attempts to remove it from the downtown core, where it is appropriate, to the outskirts, where it is not appropriate, and where it will absolutely overburden the already congested roads of Boones Ferry and Norwood Road. And this is before Autumn Sunrise and Plambeck Gardens have even been built.

As we can see by the developer's application here, even before another unit is approved, the traffic of Autumn Sunrise and Plambeck Gardens already requires, by the applicant's own traffic study, a signal at Norwood. A signal which was never required but clearly should have been required. And the developer's solution – let us build 276 more units of HDHR, so you can get your traffic signal. Wow. So we must agree to this project, to get the signal that we already deserve? Really? That is pretty bold.

So why would the developer push for such an extreme position, with such high density?

Let's look at the developer's application. When you read through it, it plays heavily to the "housing crisis," and refers to the City's 2019 Housing Needs Analysis, as it should, but it offers ZERO, and that is the key here, ZERO data on where we currently stand in meeting those housing needs.

Where do we stand in? Since the study, 940 housing units have been approved.

- Alden Apartments – 45 town homes
- Plambeck Gardens – 116 multi family affordable housing
- Tualatin Height Apartments – 116 more units
- Autumn Sunrise, 407 housing units, some single family, some attached
- Nyberg Tualatin Apartments, 256 Units

So with 940 units already approved, that means, that in less than three years into a 20 year goal, the city of Tualatin has already reached 92% of that goal.

Now is not the time to panic. Now is not time to resort to extreme measures.

Looking at the facts and the data, your decision is easy. The re-zone application, and its extreme zoning, isn't in the public good. Leave the high density high rise for the city's downtown core where it is appropriate and needed. Please, use common sense, don't rubber stamp another proposal in our back yard, and reject the move to push the highest density, high rise zoning, into a place where it doesn't belong.

Thank you.

Joel Augee

Subject: Norwood Expansion

Tualatin Planning members,

Please take the time to read this message. Please do not simply scan through and delete...

I am very concerned about the new development coming to the Norwood/Boones Ferry intersection. As I am sure you are very aware, Tualatin has a LARGE traffic congestion issue. Allowing this development to be built is simply going to overload our already fragile and damaged local infrastructure.

My home is on SW 82nd Ave. and have lived here for several years, now. Before this development was started, SW Boones Ferry Rd. suffered (suffers) from daily commuter build-up from I-5 to various parts of Boones Ferry Rd., sometimes all the way to Tualatin High School. SW Norwood Rd. is often used by commuters who feel they must be moving- they will apparently get home faster. So, they use Norwood Rd., then 82nd Ave, then Frobase to get to 65th. From there, they sit in traffic at Elligsen/65th/Stafford Rd. with no gain to their commute.

My issue isn't that a commuter wants to feel like they're moving. My concern is that when they use 82nd & Frobase to get there, they travel at seriously excessive speeds- I have witnessed cars travelling at speeds in excess of 90 MPH. If you don't believe me, I invite you to park in my driveway for any given weekday (preferably when the weather is nice) from 2:00pm to 4:30pm and observe. I would imagine that you wouldn't have to wait too long before you see someone rushing to get home...in the military, we called that "Hurry up and wait."

This concern is felt by ALL residents on 82nd Ave. This development will only worsen the issue. Although we are a rural neighborhood, we still have small children living on this street. As a matter of fact, the Tualatin High School Track & Field runners practice on these roads. They are simply being put in harm's way. The travel on these roads will be increased. There will most assuredly be more speeding vehicles. These students are already at risk of being hit by a car. Now, they are even more vulnerable as this development in installed.

Additionally, For those of us who live in this area have been dealing with the construction on Norwood, between Boones Ferry and I-5. The construction company responsible for the roadwork should be fired. I invite you to drive YOUR PERSONAL VEHICLE on this portion of the road- IT IS HORRIBLE. The construction company doesn't care- they're being paid. As well, they recently poured the curbs for this portion of the road. If the road is any wider than previous, it is only a few feet. Are they planning on adding a bike lane? Yet another target for all these additional vehicles...

Please DO NOT allow any more construction in this area. I understand that contracts have been written, etc. However, YOU HAVE THE AUTHORITY TO RESTRICT AND REGULATE WHAT IS BEING BUILT IN THIS CITY! DO NOT ALLOW ANY TALL BUILDINGS (nothing more than residential two-story homes) TO BE BUILT HERE! I am sure you have seen what has been happening in Portland, Salem and Eugene...these types of areas have become dumps for those less fortunate (I need not go into how they typically live, nor do I need to remind you of the panhandling, drugs & alcohol, filth, etc.). My family and I are seriously considering leaving Tualatin if this poor management continues...

PLEASE DO THE RIGHT THING AND STOP THE OVER DEVELOPMENT OF TUALATIN. You are all representatives of this once fine city. Please represent us and do the right thing. Don't be blinded by $$$. Keep Tualatin a wonderful city.

Thank you and sincerely,

Jon Klapp, concerned Tualatin resident.

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

High Rises BELONG in Tualatin Central Urban Renewal District ONLY.

High density high rise dwellings are limited to the core of Tualatin for good reason:

- Amenities within walking distance
- Shops and City services
- Mass transit
- Supporting City infrastructure
- Architecture that blends with existing urban environment
- Lighter dedicated parking requirements
- Livability and accessibility within a car-dependent suburb

They make NO SENSE anywhere else in Tualatin, especially on the edge of practically farmland and ON TOP OF ~600 units already approved for construction.

I agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community. For now I am requesting City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.
Thank you,
Junior Carbajal

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Karen Russell

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment of further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

As has been stated several times, the potential development of another 276 residences on Norwood Rd. will cause even more cars to back up on SW Boones Ferry Rd. This after adding the already approved Autumn Sunrise. We've calculated over 2000 more trips up and down SW Boones Ferry Road each weekday.

What I hear from the City Council, AKS and the developer is “That’s really not our problem.” They cite that Wilsonville is part of the solution and, of course, ODOT. What I hear them saying is, the system is broken. We can’t address our traffic issues (actually, the city of Tualatin’s issues) because it’s just too hard. There are too many parts and pieces.

We are suggesting that the City of Tualatin works with ODOT and Wilsonville to address this very real problem. Agencies and governing bodies should be able to work together to address this already untenable issue affecting both Wilsonville and Tualatin (as well as the freeway issues, which are a big part of the problem). All that has been done has served to exacerbated the problem with no clear solution (and adding a traffic light will not solve the problem, by the way).

It sounds like AKS and all traffic studies have washed their hands of anything having to do with Boones Ferry Rd. No more homes should be built, or added, until this issue is addressed. I think this may be the most disappointing part of this situation, that there has been no effort at all to work together on a problem that everyone acknowledges exists. I’d love to see the City of Tualatin be the ones who solve this problem and bring the parties together to make this happen.

As for the apartments proposed for Norwood Rd. (clearly the purpose of the request for annexation and partitioning): This small two-lane road cannot handle this added traffic. I envision the people of the apartment complex being unable to turn left onto Norwood due to traffic. This will lead to them turning right and likely cutting through our neighborhood. This will also need to be addressed with Autumn Sunrise added traffic and the temptation for them to go speeding through our neighborhood to avoid the Boones Ferry traffic. This will be a very clear hazard for all of us living in the surrounding neighborhood.

I know the city leaders have pledged to protect the safety and quality of life of the people of Tualatin. We have placed our trust in them. I know they can find a way to work together with the other entities to address this issue. Even without these new neighborhoods and the proposed apartment complex, this needs to be addressed. The right thing to do is to say no to the partition and annexation requests. Anything else will only make things worse for everyone in Tualatin.

Thank you for considering our feedback.

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment of further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

I am opposing this change, specifically, for the following reasons:

- **Increased traffic:** When populations are concentrated, traffic congestion is a given. **Public transportation and walkability of neighborhoods becomes increasingly important**. The traditional model of developers being required to provide a set number of parking spaces per anticipated user encourages more cars on the road, leading to more traffic issues. With no walkable services near

these apartments, and 276 units, it will require people to use their cars causing a big increase of traffic on Norwood Road and SW Boones Ferry Rd.

- **Lack of services:** Traffic and suburban sprawl are already straining our resources. The most logical plan is in-fill urban centers with high density developments. This provides the renters access to critical services. Walkability is the key to high rise/high density housing location.

- **Lack of green spaces:** Amenities like parks and other green spaces don't in themselves provide income to developers and must be planned in high density developments to provide improved quality of life for would-be residents. There are many beautiful amenities and parks in our lovely downtown Tualatin. This is exactly why builders of high-density housing build in urban areas.

This planned development will not only make everyone in the surrounding neighborhoods unhappy, it will also not make the tenants happy. This is a poor plan (or a complete lack of a plan) and literally makes no sense.

Thank you for considering our input,
Ken and Jan Perry

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment of further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

My concern with this, and all projects involving AKS, are the following:

I sent a message to AKS asking that they reach out to the neighboring community to discuss the plan following their completely failed approach at a Tree Preservation Zone. The neighborhood would like large, native trees and a sufficient buffer, as promised.

Needless to say, I have heard nothing back from them. They clearly don't care about this community or about the importance of being wise in how you blend a community in with an existing environment. They continue to take trees down next to the freeway. This is the worst possible action to take when you are near a greenhouse gas producing roadway.

My request is that you do not trust AKS as they will say anything to get approved and then fail to deliver on their promises and do whatever they want. They have continued to prove that they cannot be trusted. Please say "No!" to any of their proposals. We don't need more of what they have given us with Autumn Sunrise.

Please stand up for your constituents and communities. Please just say "No!" And please say no to HD/HR zoning changes that would remove all the remaining trees and build HD/HR apartments anywhere in Tualatin without consideration of appropriate planning and services for these apartment residents and neighboring communities.

Thank you,
Ken and Jan Perry, Stono Drive

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment of further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The proposal is concerning for so many reasons that many of us in the Bryom CIO Neighborhood have expressed to the City Council. But what is literally the most concerning on this proposal, is the following:

This appears to be an attempt on the part of AKS and the builder to continue to remove all of the trees and build high-rise apartments everywhere in Tualatin. What AKS has demonstrated thus far:

- They have no regard for the environment. They will say anything to get their plans approved and then will do exactly what they want once the approval is in place, regardless of whether they've met the commitments/promises. Unfortunately, they clearly proved this with the Autumn Sunrise development. Below is text in the document. We have seen just the opposite so far with Autumn Sunrise and cannot believe that they will do what it says, or is right, in the future.

- They have shown no concern for the community when it comes to the amount of traffic these endless building projects are placing on our roads. The traffic study concerning Alden Apartments read, from 220 added residences, it would only put 16 more trips on the road during morning rush hour and 18 trips during pm rush hour. This is beyond reason! Are we to believe that all these people are not working? That they're just staying home all day? These estimates can't be correct. Even if they were (and more, given the two developments here), that's too many more cars to put on an already overcrowded road (SW Boones Ferry) with no solution in sight.

Tualatin will be unrecognizable and impossible to navigate if such egregious plans and changes are approved. We, the citizens of Tualatin, are saying "No!" to this ridiculous proposal for a change in wording AND to the proposed apartments that will sit on this land. We are trusting our City leaders to listen to our voice of concern and reason. The City Council needs to say "No!" to the wording change and the partition request.

Thank you,
Ken and Jan Perry

Subject: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment of further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

Imagine living in a neighborhood where you paid good money for your home and you have done so surrounded by trees. You then learn that the City Council has approved a huge, high-density neighborhood and all the trees will be gone.

This changes everything for your neighborhood and for the market price of your home. The approved neighborhood will have some apartment complexes and higher-density homes but the price of the homes will reflect this fact. This is how it should work as it impacts home prices in

that **new** neighborhood. But this is all having an impact on existing neighborhoods and home owners.

For us who are living in long standing surrounding neighborhoods, adding a high-rise apartment complex has an even more profound impact. It causes our home prices to drop for many reasons.

- Regardless of what you may think or say, we know that apartments bring a higher level of crime. My husband is former law enforcement. It could not be more clear to him based on experience that neighborhoods with apartment complexes have higher rates of crime. (*Please refer to an earlier email sent to you by Brent Bebee showing crime rates in neighborhoods with apartments.)*
- The impact to the traffic, which I've previously noted, is another negative impact to our home values. *(Please refer to my earlier email on traffic impacts)*
- The esthetics to the neighborhood as you drive to your home also has an impact. Where tall evergreens once stood you now have the eye sore of a 4-7 story imposing apartment building. This is not what someone wants to see when looking for a home in a safe and quiet neighborhood.

The answer to this 8 ½ acres: A park

We don't have nearly enough parks in our area. Well, to be accurate, none. Although we know there is a park possibly being planned a half mile plus from here, that is not good enough. (The location of the park in the current plans won't be near any of the neighborhoods.)
This entire area has no park. You continue to raise money for parks (a recent bond measure was just approved) and we continue to only wish that we could have one near us.

This property would be perfect for a park. You cannot ethically continue to build homes without also providing a comprehensive plan that includes parks and open space. Doing so is how cities become concrete jungles with no plan and no open space that no one wants to live in. I've lived in areas where this has happened, and the cities have become low-income, low-quality communities. Do you want that for Tualatin?

We would like for you to consider putting together a comprehensive plan for Tualatin that includes parks and open spaces. This is so critical for the quality of life of those living here. This is what you were elected to do. Please show us you care about all of Tualatin and preserving this lovely community and our quality of life.

Thank you,
Ken and Jan Perry, Stono Drive

Subject: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment of further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

I have been walking around this area for over 3 years. This was a beautiful area with tall evergreens and an amazing ecosystem of animals and birds. I watched the birds (hawks and eagles) as they fed their young and then pushed them out of the nest to fly on their own.

I've also watched as that ecosystem was destroyed to build high density housing. Not a single tree was spared. I watched as the hawks and eagles flew in circles above the devastation which

was formerly their home. It was heartbreaking. And my husband has been taking food to the squirrels who lost their homes and food source.

Those beautiful birds have relocated, many of them finding homes in the trees that you are now wanting to remove for high rise apartments. I hear lots of talk of respecting and caring for the environment, but those words seem very empty right now. This is not a little sacrificing of trees to provide some additional housing. This is just complete and total destruction of an environment in order to provide tax money for the city of Tualatin. A city once known as the City of Trees.

In addition to the impact to the ecosystem, there will be an enormous impact to the surrounding roads. The I5 freeway is already totally exposed, adding to the amount of exhaust fumes for the neighborhood. Without the shade from the trees, our temperatures have already risen.

Additionally, this and the Lennar development will pour thousands of additional cars onto our already overloaded roads. If you are driving East on Boones Ferry Road any time after 3 pm, you will encounter up to a five mile backup of cars heading to I5. We've been told no improvements to the roads are necessary. Really? This is a nightmare.

From what I understand, there are other areas already zoned for high density/high rise development. Why are you destroying this area when other land is available for similar housing without causing this destruction? And why do you zone land only to quickly turn your back on that plan and change the zoning? The only answer must be money.

Please do the right thing. Please say "No!" to the change in the code that will bring HR/HD apartments to all of the open areas across Tualatin with no consideration to the destruction this will cause.

Subject: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment of further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

A couple of observations as to the track record of the City Council and Tualatin's (lack of) planning:

- The first plan we looked at, published by the development company (2020?), concerning the property just south of I5, included a mix of lower to higher density housing; some single-family dwellings mixed with some duplexes. Although it is extremely sad to see the beautiful trees torn down and the disruption of the many ecosystems and wildlife habitats, the plans seemed not to be too disruptive to the area; somewhat similar to what we have in our current neighborhood.

- The next plan had added even higher density housing as well as apartment buildings incorporated into the area. For those buying in that neighborhood, they would do so with awareness of the apartments and mixed high/low density. It might not be too big of an impact to us in our neighborhood. Although not great (especially given the current traffic on Boones Ferry Road), it was still something we could live with.
- The latest plan seems entirely focused on the highest possible density. Not the two-story apartments, but now 4 story apartments (and a request to change the zoning wording for all of Tualatin). These apartments would be nearer our neighborhood than earlier projected. This new plan is the most intrusive, highest impact to our neighborhood. It literally changes everything for us in the way of home value and safety (see Brent Bebee's earlier letter as it is well stated there).

This prompted a few questions:

- What seems to be driving these changes? Those defining the zoning are good with one plan and then, suddenly, more interested in another plan just to change the plan once again. What is the driver here? Do you consider, at all, the impact to the surrounding neighborhoods? To the roads and environment?
- The purpose of zoning is "to regulate and control land and property markets to ensure complementary uses." The current plan seems to be the opposite of that. It does not consider what is complementary to those living nearby. It is not even a reasonable plan that is taking into consideration the impact not only to the neighborhoods, but also to roads, schools, etc.
- These many changes in plans have created a high level of distrust in, and lack of credibility with, the City Council. Many of us are asking ourselves "what is next?" Will the zoning changes continue until there is no resemblance to the community we love so much?

We, as a community, are trying to be flexible and would welcome the opportunity to provide our ideas and feedback in this process. Are you willing to hear us out? Or is this a done deal?

Thanks for the opportunity to provide this input. I hope it will serve as a starting point for further discussion.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Ken Hawes

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin evelopment code (TDC) to allow the most dense zoning (RH-HR) as defined y TDC, anywhere in Tualatin. It is not in the best interest of the public. I am aying NO to the plan and text amendment applications PTA23-0001 and MA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current ode allows. Council, please provide leadership and say no to this extreme verreach by developers. The City is yet to understand the infrastructure mpact for almost 1,000 new approved homes still to be constructed.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Good morning Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

Like many cities, Tualatin is no different in its lack of housing opportunities and the impact this shortage has on both prices and rents is a concern. Many in the Horizon Church community wish they could find and afford housing in the city.

The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Kevin J Holtzman

Dear Tualatin City Planning Commission,

I do not support what is said below. I don't think it's fair that Horizon community church is sending this to their congregation. Most who do not reside within Tualatin City limits.

My children attend Horizon Christian School. And I do not support what horizon is doing. We live at 22545 SW Miami Drive and can barely get out of our neighborhood as it is.

We do not need apartments on this side of town. There is plenty of space downtown for that.

Thank you,
Kristin Giboney

Dear Tualatin City Planning Commission,

Regarding the land use decisions for the proposed apartment development at 23370 SW Boones Ferry Road, please accept my comments below:

Residents in the area deserve to enjoy the benefits afforded to everyone in Tualatin resulting from rational zoning rules. Zoning rules exist for several important reasons, and this property should not be rezoned to the HIGHEST POSSIBLE DENSITY to allow a 276-unit, six-building, four-story complex to be built immediately across the street from a neighborhood of single-family homes. If this is approved, our quality of life will suffer greatly, and out property values will suffer as well.

This is especially true given that over 500 new residences have been already approved for construction within yards of this location. The resulting increase in traffic coming from roughly 900 additional households will turn the Norwood Rd – Boonesferry Rd intersection into the worst-rated intersection. Even with a traffic light, delays and backups at this intersection will be severe. This is also compounded greatly by Tualatin High School and Byrom Elementary located so close by.

This plot of land could be used to build duplexes and other multi-family units, without having to go to such high density. This would help address the housing need without so severely impacting the quality of life and property values for neighboring homeowners.

I respectfully request that the wishes of the many neighbors opposing this project, be honored. Please do NOT support the proposed Plan Map Amendment (PMA) from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR) at 23370 SW Boones Ferry Road.
V
Thank you kindly,
Linda McKean

Subject: Map and Text Amendments concerning Horizon Community Church

I have lived in Tualatin since 2004 and worked here since 2000. My husband and I purchased a home in the year 2004 and enjoy living here in Tualatin. I understand Horizon's mission and appreciate their commitment to the Tualatin and closely surrounding localities. But while I understand progress is always on going, I am not in favor of changing the zoning in the area in question from medium/low density to high density. In that area, there are over 500 new homes already started and if the zoning is changed, there will be that many more homes/apartments/condos that will build adjacent to the Norwood/Boones Ferry intersection. Boones Ferry already has a heavy traffic load and Norwood is also quite heavily travelled. My understanding is that changing the zoning to multiple density will result in taller apartment/condo complexes and also taller office buildings eventually. Having lived in the Bay Area in California, I've seen higher density zoning brings heavier traffic, more crime and less of a personal feel to a town. Please do not do that to Tualatin. Please maintain the current zoning of low to medium density in the area in question.

Thank you for your consideration.

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Keep original zoning to downtown only

www.tualatinoregon.gov/projects

NO high rise anywhere else in Tualatin!

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: No to PTA23-0001 and PMA23-0001 Applications

Hello,
I wrote previously about my concerns for safety (traffic related) and environmental concerns in allowing for a high rise in this location of Tualatin. I also do not believe it's in the best interest of our city to allow for high rises to be built anywhere. And finally, although affordable housing is important, unless these are actually low income housing, based on the current market they will certainly not be affordable. In light of all of this and more, I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Consider the needs of the entire City.
Thank you for your serious consideration on this matter.

Subject: No to PTA23-0001 and PMA23-0001 Applications

Ladies and Gentlemen,

As a resident of Tualatin for the past 17 years and a former resident of Portland, I am deeply concerned about the proposal to change the current zoning code. I live in the Byrom neighborhood and its appeal was obvious from the moment my family and I moved here: An abundance of trees, limited traffic, neighbors who care about their property, and a peaceful, lovely atmosphere of a smaller city.

I am concerned that the proposed changes could threaten those qualities. Already, traffic congestion along Boones Ferry Rd. can, at times, line up from Day Road all the way back to Norwood. With the addition of the Autumn Sunrise subdivision, nearly 500 new residences will be added to this area. Add into that 276 apartments from this proposal, and I fear that the livability of this section of Tualatin will be dramatically decreased.

Tualatin is a very special place, and I stand with our citizens who demand a lighter and more considerate approach to growth. To do otherwise is to risk destroying the qualities that make this area so attractive, and so different from the city of Portland, which, sadly, has become everything we abhor about large cities.

I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Please consider the needs of the entire City.

Please don't turn Tualatin into another Portland.

Thank you for your time and attention,

Lorrie Callopy

I agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community. For now I am requesting our City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Lynda McGillvrey

High Rises BELONG in Tualatin Central Urban Renewal District ONLY.

High density high rise dwellings are limited to the core of Tualatin for good reason:

- Amenities within walking distance
- Shops and City services
- Mass transit
- Supporting City infrastructure
- Architecture that blends with existing urban environment
- Lighter dedicated parking requirements
- Livability and accessibility within a car-dependent suburb

They make NO SENSE anywhere else in Tualatin, especially on the edge of practically farmland and ON TOP OF ~600 units already approved for construction.

Sincerely,
Margie Humphrey, CPA

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Marlene Redwing

Title of email: Norwood for Smart Zoning

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local

transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

Sincerely,
Mary Kruchoski

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to Council at the public hearing. The public hearing will be held on May 22, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

A Notice of Decision shall be provided to anyone submitting written comments. As a comment participant, you will receive a Notice of Decision when the decision is made – do you have a preferred mailing address you would like the notice sent?

Subject: NO to PTA23-0001 and PMA23-0001

Hi Mayor Frank Bubenik,

My name is Michael Gallardo and I live in the Riverpark neighborhood in Tualatin.

I am writing because I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Please consider the needs of the entire city.

Thank you for your time and consideration.

Sincerely,
Michael

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank You,

Michele Leisman

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Olivia Peterson

A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commissioners,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident Tualatin and a member of Horizon Community Church, these two decisions are very important to the future plans for Horizon (and the City of Tualatin, too).

I would like to express concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

I urge you to support and approve the Map and Text Amendments. Thank you for your consideration.

Thank you,

Paul and Vanita Pedersen

- **Dear Ms Nelson**

  I am writing in opposition to the planned SW Norwood annexations referenced above.

  I have lived in the Norwood neighborhood for 28 years and use Norwood Road to access Boones Ferry Road several times a week. I am already nervous about how the Autumn Sunrise development will affect traffic in that neighborhood—adding a whole high rise on top of that will surely cause terrible daily traffic congestion, especially without major improvements to the surrounding roads.

  Please consider the needs of the existing and new residents of this neighborhood and deny the annexation until a comprehensive traffic mitigation can be implemented.

  Thank you

  Penny Harper

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments against both the Map and Text Amendments.

As a resident of this community and a former constituent of Horizon “Community” Church and School, I am against rezoning a residential neighborhood to high rise buildings and permanently altering the Tualatin development code to allow for high rise, anywhere in the city of tualatin.

The due diligence to determine appropriate infrastructure as required by state law has not been conducted in order to ensure the proper services to support current and future residents of Tualatin.

Please do not recommend the Map and Text Amendments to City council.

Thank you,

Subject: Opposed to PTA23-0001 and PMA23-0001

We moved to this Tualatin neighborhood 22 years ago and we are opposed to applications PTA23-0001 and PMA23-0001 as these are not in the best interests of our local community.

I don't appreciate having an out-of-state developer, or those working on their behalf, coming in and attempting to gain a rezoning of our neighborhood and put in a high-rise, high-density development.

I am convinced that very few, if any, of those advocating for these applications actually live in this neighborhood. Regardless, this is just not a suitable area for a high-rise. The downtown area is already set for that.

I know growth will happen, but let it be done wisely, not just growth for growth's sake or for profit only.

Additionally, we still don't know what impact the Autumn Wind development will have in our community once it is complete and people have moved in.

When considering growth, please, let's not allow developers to indiscriminately alter the character of our neighborhoods.

Thank you,
Randy Welborn

Hello,
I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. It would change the entire character of our neighborhood and I am concerned it would allow for any other kind of high-rise development.

A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Also, I especially don't appreciate out-of-town developers dictating what and where development will occur.

Please consider the needs of the entire City.

Thank you,
Randy Welborn

In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Good Morning,

Thank you for your email. Your comments have been received and will be added to the public record which will be presented to the Planning Commission and Council at the public hearing. The public hearing will be held on May 22, 2023. Attached is the Notice of Public Hearing for additional information. The comments will also be shared with the applicant team.

A Notice of Decision shall be provided to anyone submitting written comments. As a comment participant, you will receive a Notice of Decision when the decision is made – do you have a preferred mailing address you would like the notice sent?

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Subject: No to PTA23-0001 and PMA23-0001 Applications

Ladies and Gentlemen,

As a resident of Tualatin for the past 17 years and a former resident of Portland, I am deeply concerned about the proposal to change the current zoning code. I live in the Byrom neighborhood and its appeal was obvious from the moment my family and I moved here: An abundance of trees, limited traffic, neighbors who care about their property, and a generally peaceful atmosphere (even with the freeway just a block from our home.)

I am concerned that the proposed changes could threaten those qualities. Already, traffic congestion along Boones Ferry Rd. can, at times, line up from Day Road all the way back to Norwood. With the addition of the Autumn Sunrise subdivision, nearly 500 new residences will be added to this area. Add into that 276 apartments from this proposal, and I fear that the livability of this section of Tualatin will be dramatically decreased.

Tualatin is a very special place, and I stand with our citizens who demand a lighter and more considerate approach to growth. To do otherwise is to risk destroying the qualities that make this area so attractive, and so different from the city of Portland, which, sadly, has become everything we abhor about large cities.

I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Please consider the needs of the entire City.

Thank you for your time and attention,

Ron Dunevant

Esteemed Members of the Tualatin City Council,
I have written to you previously regarding the proposed change to the zoning of the land south of SW Norwood Road. Again, I ask you to consider the long range ramifications such a change will have on the quality of life that Tualatin offers its residents. Tualatin is a very special place, one that my family and I are grateful to have called home for the past 17 years. While I understand that some growth is necessary, I also believe a more moderate approach is imperative to ensuring that future residents are able to enjoy that same quality of life.
I agree with the Planning Commission that a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community.
For now I am requesting the City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.
Thank you for your time and your service to this community,
Ron Dunevant 21865 SW Mandan Dr, Tualatin, OR 97062 971-678-1454 rondunevant@gmail.com

Dear Tualatin City Planning Commission,

Do not rezone this area! No one that actually lives in this area wants this type of housing. The greed of Horizon church is undeniable. Please do not be a part of this!

Thank you,
Ron Kimmel

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able to remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

I am writing this to you and the city council to look at the long range ramifications of changing the zoning on Norwood Rd to build apartments/high rises.

This area is zoned for single family homes. High rises are zoned in Tualatin downtown, where there is plenty of land to build on and where there is better public transportation, and shopping.

Please understand that the citizens you represent are very much against this proposal. There are so many housing projects taking place on Norwood and Boonesferry Rd. that another one is not justified or needed.

Sincerely,
Rose Toler

I have lived in Tualatin for over 30 years. I have watched more and more apartments, condos, high rises be built mainly throughout the downtown area, as that is where they belong. Norwood Rd and Boonesferry Road are not zoned for high rises for good reason. It is an area of duplex and single homes. I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A high-rise belongs in downtown Tualatin ONLY where infrastructure can support it.

I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A high-rise belongs in downtown Tualatin ONLY where infrastructure can support it and is already zoned for high-rises.
Also, has anyone even given any thought to the impact of all the traffic that this is going to create. South Boonesferry Road is already overwhelmed by the afternoon with traffic. This is just creating further congestion.

I urge you to vote NO this rezoning request. These companies can build the high-rise they want in the areas already zoned for it within Tualatin.

Dear Madeleine Nelson,

Thank so much for your reply. You can send us a email: heyer4414@comcast.net
or send a note to Heyers at 22775 SW Vermillion Dr. Tualatin OR 97062
We have lived in Oregon for more than 50 years and in Tualatin for over 21 years. We love Tualatin and hope we do not get High Rise Buildings,we have enough traffic with the project they are doing already. I can not drive now from Norwood in Boones-Ferry Rd around 4-5 to go Costco. Please think about that, a traffic light will not solve it, would even get worse. Thank you for your dedication and caring.

Rosemarie Heyer

How many units can you put on one acre by law?

There is a big empty field on corner Grahams-Ferry Rd.and Tonquin

There is a building from EX- Frye's Store in Wilsonville , close to shopping and also Transportation.

There is the old Albertson building in Tualatin where the Wes-Station is and shopping center and Red Line Bus around Tualatin.

If you add a 1000 people on Norwood and no park and no Sub Police, this area will get worse with more crime.

Last week our car door got broken when somebody wanted to steal our car and it was locked.

If the builder gets the change they can build not only 4 story high, even up to 7. Nowhere else are 4 story buildings next to single houses here. First they said high end apartments and the Church says now low housing apartments, this is all wrong.

If you live here across the street, you would never approve it, I know.

Thank you for listening and thinking hard to make a decision.

Sincerely

Rosemarie Heyer

Dear Mayor Bubenik,
I am writing to express my strong opposition to the applications from a developer from Georgia changing the city building codes. The codes were put in place by our city government to prevent exactly this kind of situation.

These changes are solely for the purpose of maximizing profits for an out of state developer. The proposed building changes are far too dense and would allow for a high rise next to residential homes and over 40 units per acre.
This change ruins plans to concentrate future development downtown. Traffic is already a nightmare the Lower Boones Ferry and Stafford areas and would only get worse. The Norwood area is not prepared for this type of unfettered growth and negatively impact those who live around it.

Don't turn Tualatin into Portland in the name of "progress" or profits. Continue with intelligent, responsible city planning that will not turn our beautiful, forested community into an urban nightmare.

Sincerely,
Sam Bartholomew

It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: No high rise on Norwood

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local

transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.
POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Sandi Hamm

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. I agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community. For now I am requesting City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.
Thank you,
Sara Gregory

Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as defined by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you

Subject: Norwood Project

Good Morning,

I am writing to you about the proposed high rise on Norwood Road. I am 100% against it. A huge apartment complex doesn't belong there. It isn't zoned for it and that alone should be enough to stop it. I feel like the planning department and city council have turned a blind eye to what the citizens of Tualatin want. There is huge opposition to this project and no one at the city level seems to care.

When I replace a water heater at my house I have to get a permit to do it and follow the rules. If I wanted to add a 3 or 4th story to my home I would ultimately be turned down and not able to secure the permits needed. Why then does the developer and Horizon Church not have to follow the same rules that I do? It's not zoned for that and shouldn't be approved. There is no bus service to areas around Tualatin from that location. There is only Tri-met service Monday through Friday. There are no grocery stores etc anywhere around there.

If you approve this type of development on Norwood Road then you will be approving this type of development everywhere in Tualatin. Do you really think this is what the citizens of Tualatin want? Remember we the citizens of Tualatin do not have access to high priced downtown Portland attorneys like the developer or Horizon Church do. We only have our elected officials to represent us. I don't feel that you are doing that at all!

Norwood road is 100% wrong for such a huge complex. The traffic is already awful and at times the traffic line to get through day roads backs up back to Norwood road. There are no plans that I have heard of to help alleviate the traffic issues that will be caused by more traffic. The solution of adding lights will not help this. It will make matters worse.

As a concerned citizen who has lived in Tualatin for over 30 years I am pleading with you to say no to this development and make the developer and Horizon Church follow the rules and zoning that are already in place.

Thank You,

Sherrie Nelson

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

I say NO to PTA23-0001 andPMAA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A High-Rise belongs in downtown Tualatin ONLY where infrastructure can support it. Consider the needs of the entire City.

Hello,

As an owner of properties on Boones Ferry Rd on both sides of this proposal, I can say for certain that this is a really, really bad idea.

Not only do we not need this project, it will make traffic so much worse than it already is. I have had six car accidents on my property south of the project and increased traffic flow will only make this worse. There are already evenings when the traffic backs up as people try to get onto I5. With this additional increase over what's already in the works, traffic will get worse to the point of intolerable.

It makes much more sense to put such a development elsewhere in Tualatin, where car traffic can be mitigated with bus/foot/bike transportation and a multi-story building won't look out of place. I understand that there are times when owners and developers want to push or stretch the boundaries of what is zoned... it's understandable. It's also understandable when elected officials push back with the support of the will of the people to hold firm to the current zoning.

I would expect any elected official to do what's best for their constituents.

Subject:

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;
SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;
The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;
As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.
POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan
POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.
POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.
POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,

Steven R Hamm

Dear Mayor and Tualatin city council and Planners

I have been a citizen of Tualatin for over thirty years. I have seen many changes over the years, some for the good, many for the worst in regards to the livability of its citizens. Traffic being one such issue, no surprise there I'm sure. The latest attempt to ruin our livability in this fine city is the re-zoning of property to allow High-rise dwellings to be located anywhere in the city. This I am totally against. There is one being purposed on the corner of Norwood and boones ferry road. With a huge neighborhood already being built, having a High rise located on the corner would be a traffic and livability disaster. There other other places in Tualatin like downtown that would be better suited like where the old Hagans store was located. Close to transit and amenities. I say NO to any development that can't be supported by existing city infrastructure as well as city zoning. I say NO to development that opens floodgates to High-rise everywhere. I say NO to development that hands our wonder city of Tualatin over to Developers to ruin our city and lessen our livability. There are better choices out there lets do the right thing by our community and not developers who don't even reside in our state.

Sincerely,
Steve Hamm

Subject: me, Susan regarding the land use decisions: For the Record

Tualatin City Planning Commission,

Regarding the land use decisions for the proposed apartment development at 23370 SW Boones Ferry Road, please accept my comments below:

Residents in the area deserve to enjoy the benefits afforded to everyone in Tualatin resulting from rational zoning rules. Zoning rules exist for several important reasons, and this property should not be rezoned to the HIGHEST POSSIBLE DENSITY to allow a 276-unit, six-building, four-story complex to be built immediately across the street from a neighborhood of single-family homes. If this is approved, our quality of life will suffer greatly, and our property values will suffer as well.

This is especially true given that over 500 new residences have been already approved for construction within yards of this location. The resulting increase in traffic coming from roughly 900 additional households will turn the Norwood Rd – Boonesferry Rd intersection into the worst-rated intersection. Even with a traffic light, delays and backups at this intersection will be severe. This is also compounded greatly by Tualatin High School and Byrom Elementary located so close by.

This plot of land could be used to build duplexes and other multi-family units, without having to go to such high density. This would help address the housing need without so severely impacting the quality of life and property values for neighboring homeowners.

I continue to worry about the accidents and the near misses I have witnessed along Boones Ferry Road and Norwood. One accident I witnessed was at the intersection of Boones Ferry and Norwood - a young woman swerved to avoid an oncoming car, She hit a curb and was unconscious. I immediately gave her first aid and called

911 and waited until the EMTs took over. I have also witnessed near misses with children on their bikes on Boones Ferry, some running when crosswalks because cars are speeding and disregard crosswalks.
Please tell me where the nearest crosswalk will be between Boones Ferry and Norwood and Boones Ferry Road and Boones Ferry and Boeckman Road? I feel it is unsafe to pass this decision and explain to the next driver that gets hurt or killed - blood on your hands!

I respectfully request that the wishes of the many neighbors opposing this project be honored. Please do NOT support the proposed Plan Map Amendment (PMA) from Medium-Low Density Residential (RML) and Institutional (IN) to High-Density High Rise (RH-HR) at 23370 SW Boones Ferry Road.

Thank you kindly,

Susan Humphrey RN

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

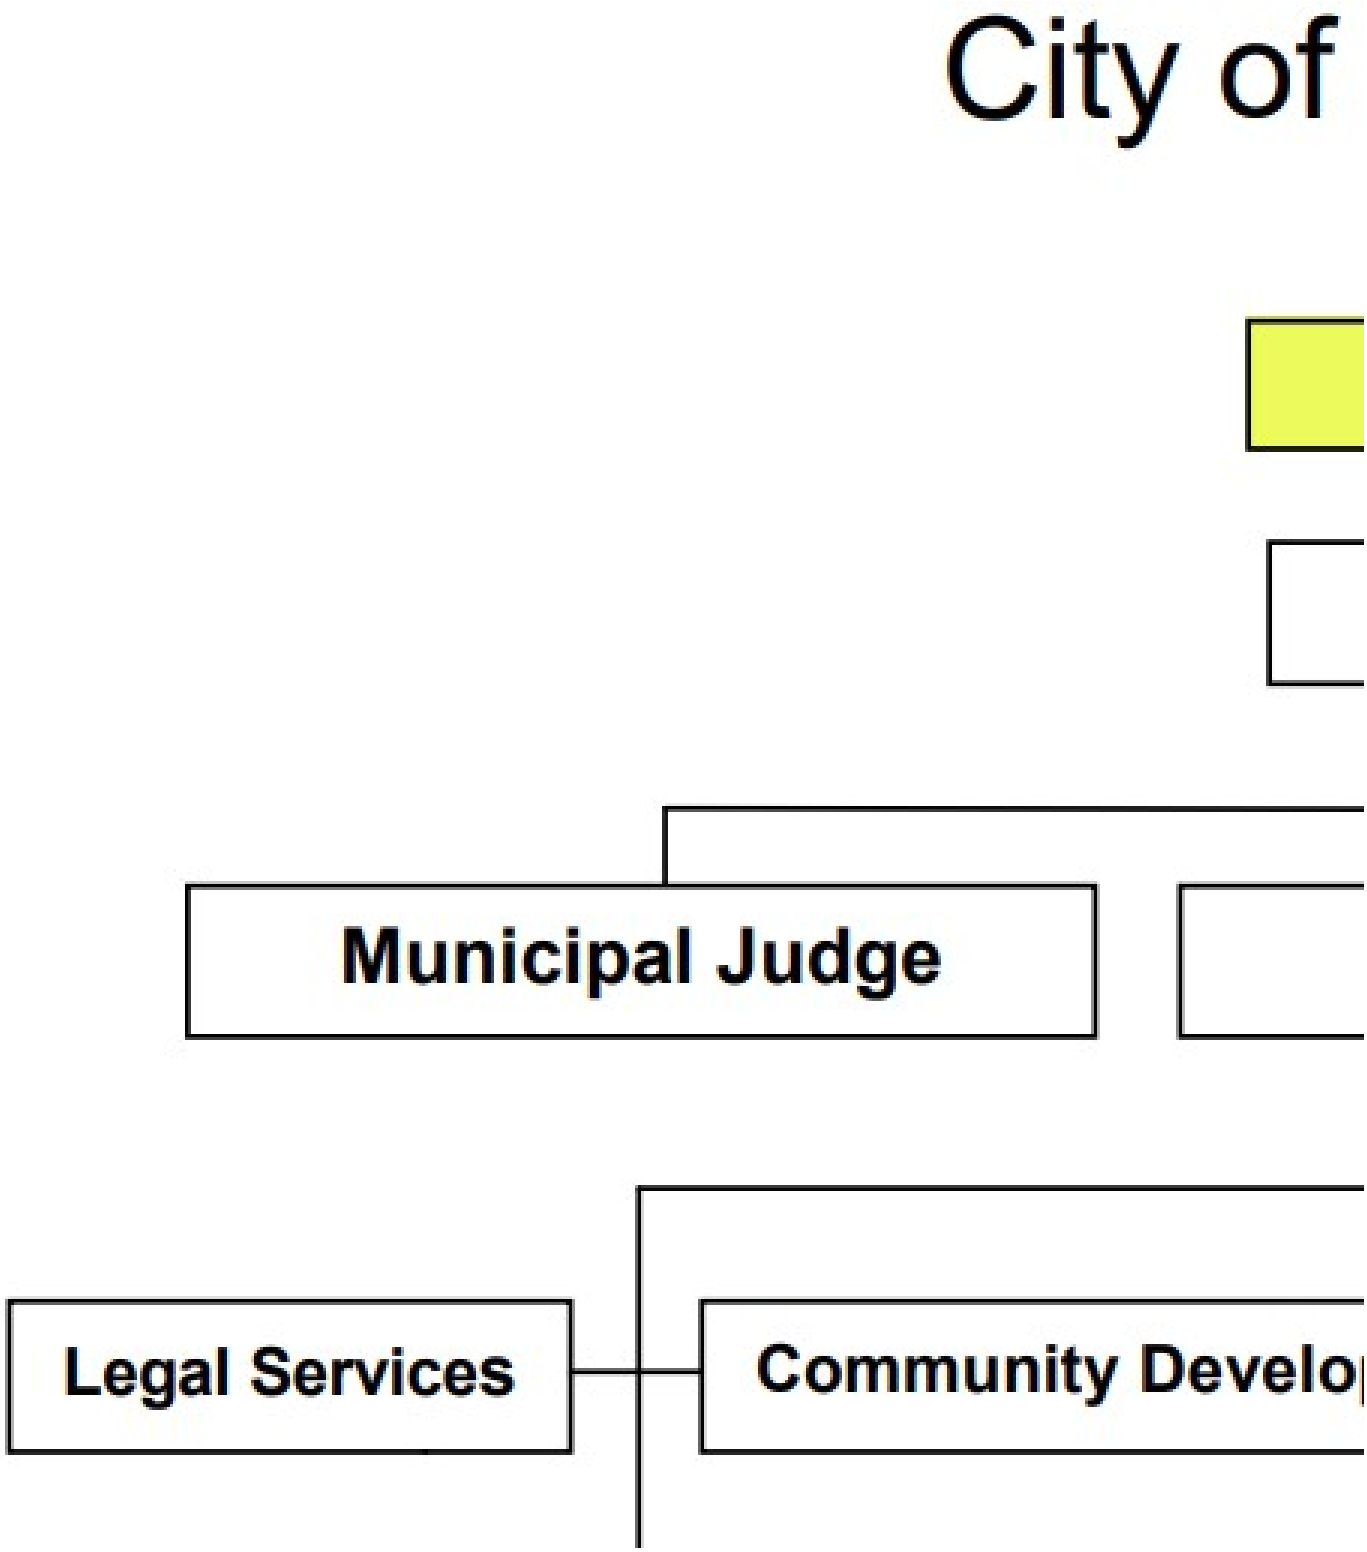
Subject: Norwood Against ANN22-0003 - 9300 SW Norwood Road Annexation



Tualatin Planning Commission meeting on 1/19/23. The meeting agenda: discuss a significant zone change that would allow heavy manufacturing behind residents' homes on Boones Ferry Rd.(Tualatin City Council will also be discussing this issue on 2/27/23).

You know what happened? The developer ***brought an attorney to the meeting***. It seemed to attendees that the developer was implying they would file a lawsuit if they didn't get their way.

At the same meeting a resident had concerns and questions regarding the zone change, and they accidentally spoke out of turn.They were quickly silenced by one planning commissioner.
Thankfully the Chair let this person speak, but at the end of the meeting when the Commission was supposed to deliberate on a recommendation to council, the ***developer***spoke out of turn to sway the commission one more time.

It wasn't enough that the developer received more than half an hour for their presentation earlier, it was that they had ***so much clout to basically walk all over the process***. And they were not silenced by any planning commissioner and were allowed to speak out of turn.

We hope you see the issue here…
From our perspective it seems as if Council has forgotten who is really in charge of the city.

It is supposed to be **the citizens**, not developers.

A high-rise is not a smart choice on SW Norwood Rd when ***this type of development is supposed to be in the core of Tualatin***.

Kind regards,
Susan Pitt

Good Afternoon.

I wish to state that I strongly oppose altering the City Code as proposed. **Changing the text of the Tualatin Development Code opens the entire city to high rise development anywhere and is not just relative to the proposed high rise apartment building on Norwood,** but goes much further than that. It affects all of Tualatin and the surrounding unincorporated areas, as well as our neighboring cities. It affects all of our community and everyone who lives, works, shops or visits this city.

Tualatin has already done our part to alleviate the housing crisis with almost 1,000 new units already underway here in the past two years. We have already met 92% of the City's 30-year growth plan!

Additionally, we are already in compliance with the 2022 Oregon Housing Needs Analysis. We do not need to do more.

Our existing city infrastructure cannot support this level of growth.

Any new high rises should be built in the core of Tualatin, where infrastructure and amenities provide quality of life for apartment/condo living.

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Tualatin needs YOU to be a Leader...
A High-Rise Belongs in Downtown Tualatin

Today a developer is trying to change Tualatin's Development Code to allow the highest density land use zone anywhere in Tualatin (RH-HR). Currently this zoning is only allowed in the core of the city (30units/acre) for good reason. Downtown Tualatin is not fully developed. In the past 2-3 years Tualatin has also already approved almost 1,000 apartments and single family homes that are yet to be constructed. Developers should not be able t remove restrictions in the development code to build whatever they want, wherever they want, to maximize profits at the expense of the community.

NOW is the time for the community of Tualatin to provide leadership and stop this action from continuing!

If you agree please sign this notice, add a stamp, and mail it to the address shown on the back to make sure your voice is heard.

As a resident of Tualatin I do not want developers changing the Tualatin development code (TDC) to allow the most dense zoning (RH-HR) as define by TDC, anywhere in Tualatin. It is not in the best interest of the public. I am saying NO to the plan and text amendment applications PTA23-0001 and PMA23-0001. A high-rise belongs ONLY in downtown Tualatin as the current code allows. Council, please provide leadership and say no to this extreme overreach by developers. The City is yet to understand the infrastructure impact for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

I join the community in saying NO to the proposed plan and text amendments PTA23-0001 and PMA23-0001 and I agree with these statements.

I agree with the Planning Commission, a high-rise does not belong on SW Norwood Rd. and the City of Tualatin development code should not change to allow a high-rise anywhere in Tualatin. A high-rise was specifically designed to be located downtown near mass transit and amenities. The website Norwoodsaysno.org shows what smart development can look like if Horizon Community Church is willing to change their minds about who to sell the property to, or if Vista Residential Partners withdraws the application for a high-rise and code change for all of Tualatin and implements a different plan approved by our community. For now I am requesting City Council to deny these applications and think of our City holistically. Developers should not be able to change codes to maximize profit at the expense of the community.

Thank you,

Subject: Concern with application PTA 23-0001

Hi Madeleine,

I am concerned that the application is still incomplete, as those involved with the project did not make any known attempts to contact any of the executive committee members of the Byrom CIO.

This is in violation of TDC 32.140 criterion h:
A statement as to whether any City-recognized Citizen Involvement Organizations (CIOs) whose boundaries include, or are adjacent to, the subject property were contacted in advance of filing the application and, if so, a summary of the contact. The summary must include the date when contact was made, the form of the contact and who it was with (e.g. phone conversation with neighborhood association chairperson, meeting with land use committee, presentation at neighborhood association meeting), and the result.

I have CC'ed the other Byrom CIO board members, who can also confirm that they have not been contacted regarding this project.

Thank you Madeleine!

As a community member, I would appreciate it if planning department procedure changed and posted materials publicly as soon as possible, even if that includes a clear indicator that the application is not yet complete and moving forward. The goal in this change would be to create a greater degree of equality for project applicants and community members, as applicants likely put significant time and effort, at their own pace, to put their materials together, whereas delays in a proposed change drastically limits community members' time to research the project and its impact from their perspective.

Hi Madeleine,

Are there public comment opportunities related to PTA23-0001 beyond the public hearing?

I am concerned as the submitted public meeting summary as written does not capture the significant neighborhood opposition to the project.

Additionally, could you provide insight as to why it took over a month after application submission to make the text revision application public?

Thank you,

Tim Neary, Byrom CIO President

Subject: Comment for Planning Commission re: DO NOT APPROVE PTA23-0001 and PMA23-0001

Hello Planning Commission, Planning Staff, and City Council:

The proposed text and map amendments will be harmful to the community if approved.

The proposed text amendment is particularly problematic in that it removes the restriction for residential high rises to be built anywhere in the city. This is not consistent with the context of most of Tualatin, and based on approval criteria, should not be approved.

The proposed map amendment is similarly problematic, in that approving the building of high rise residential housing is not in context with the community, and there are precedents that the construction of high rise apartments will adversely impact neighboring home values.
Please see below as I will speak to each point for consideration of approval as outlined by the TDC.

TDC 33.070(5) *Approval Criteria.*

a. Granting the amendment is in the public interest.
   Comment: Hundreds of residents have expressed opposition, as well as leadership of all of the Tualatin Residential CIOs. The message from the residents of Tualatin is clear, these amendments are not supported by the people, and are not in the public interest.

(b) The public interest is best protected by granting the amendment at this time.

Comment: Given the approved and in development housing units that have yet to be occupied and that these units are well in excess of the anticipated need of the city by 2040, it is not critical or necessary to change the restriction on residential high rises at this time.Furthermore, public interest would be harmed by granting the amendments, as traffic will worsen on Boones Ferry, adversely impacting quality of life.

(c) The proposed amendment is in conformity with the applicable goals and policies of the Tualatin Comprehensive Plan.

Comment: The comprehensive plan does not call for building residential high rises outside of the downtown area, and the area for the proposed Norwood high rise is specifically left as undeveloped on the maps associated with the comprehensive plan. Per the Tualatin 2040 Comprehensive plan, high density residential/ high rise zone is specifically supposed to be in areas with the greatest access to amenities. The site at Norwood Rd has no access to amenities. See the description copied from the 2040 developmental plan.

High-Density Residential/High-Rise Planning District (RH-HR)
This district supports a wide range of housing types at the greatest density of household living in areas with the greatest access to amenities.

34 TUALATIN 2040

(d)The following factors were consciously considered:

(i)The various characteristics of the areas in the City;

The Norwood apartments project is not in context with the neighborhood and would not match the characteristics of the community.

(ii) The suitability of the areas for particular land uses and improvements in the areas;

The area is not suitable for use as a residential high rise due to the poor traffic infrastructure, inadequate parking plan, lack of access to amenities, and lack of support by public transportation.

(iii) Trends in land improvement and development;

There are no trends of building high rise apartments in any other areas of Tualatin, including presently in the only approved area in downtown. High rise apartment projects should focus on the area where zoning is already approved before considering expanding the zoning area.

(iv) Property values;

There are precedents that construction of a high rise apartment complex is associated with negative impacts on nearby single family home property values:

1. **St. Charles County v. Breeze Park Senior Living Communities, LLC: In this case, the construction of a high-rise senior living complex was found to have a negative impact on the property values of neighboring single-family homes. The court ruled that the high-rise complex, which obstructed the view and privacy of the neighboring homes, caused a reduction in property values, and awarded compensation to the affected homeowners.**
2. **Murr v. Wisconsin: In this case, the construction of a high-rise condominium complex was found to have diminished the value of a neighboring single-family home. The court determined that the high-rise complex, which restricted the development potential and**

use of the neighboring property, resulted in a "taking" of property rights without just compensation.

3. **Hobart v. Hobart West Group: In this case, the construction of a high-rise residential building was associated with a decrease in property values of nearby single-family homes. The court found that the high-rise building obstructed views, created noise and traffic, and resulted in a loss of privacy for the neighboring homeowners, leading to a reduction in property values.**

(v) The needs of economic enterprises and the future development of the area; needed right-of-way and access for and to particular sites in the area;
As the 2040 comprehensive plan, which includes economic development of the Basalt Creek Planning area, does not include the Norwood property, there is no support for the creation of the Norwood high rise apartments having been factored into consideration of economic enterprises and other future development.

(vi) Natural resources of the City and the protection and conservation of said resources;
A forest was destroyed to build Autumn Sunrise, and what remains of the forest is on the proposed land for development. The city has provided no evidence that protection and conservation of natural resources was considered in the proposed map amendment. The proposed text amendment could have far reaching impact on natural resources throughout the city if it enables remaining natural land to be developed as high rise apartments.

(vii) Prospective requirements for the development of natural resources in the City;

(viii) The public need for healthful, safe, esthetic surroundings and conditions; and
South Tualatin has already experienced a drastic reduction in healthful, safe, aesthetic surroundings. A view of a forest is replaced by a field of mud and two looming water tower eye sores. On dry days, construction dust covers the adjacent neighborhoods. Road noise is much louder, and wind blows harder with the trees gone, resulting in many residential fences along Norwood being blown over and homeowners being saddled with repair costs. Removing the remaining forest would further reduce the healthful, aesthetic surroundings of South Tualatin.

(ix) Proof of change in a neighborhood or area, or a mistake in the Plan Text or Plan Map for the property under consideration are additional relevant factors to consider.

(e) If the amendment involves residential uses, then the appropriate school district or districts must be able to reasonably accommodate additional residential capacity by means determined by any affected school district.
Comment: The Sherwood school district commented the ability to accommodate additional students; however TTSD was not contacted to identify how they could accommodate students that may petition to enroll in TTSD so they would not have to travel to Sherwood district schools. There is also no assurance that school district boundary lines will remain in place into the future, so TTSD should also be consulted should boundary lines change.

(f) Granting the amendment is consistent with the applicable State of Oregon Planning Goals and applicable Oregon Administrative Rules, including compliance with the Transportation Planning Rule TPR (OAR 660-012-0060).
Comment: The increased population would overburden Norwood and Boones Ferry Roads. There is already inadequate public transportation. The proposed apartments are not consistent with the Transportation Planning Rule.

(g) Granting the amendment is consistent with the Metropolitan Service District's Urban Growth Management Functional Plan.
Comment: The proposed Norwood apartments, and the building of any high rise in Tualatin, is not needed given at this time or in the foreseeable future given Tualatin's forecasted housing needs as outlined in the 2040 comprehensive plan. Most significantly, the proposed Norwood Apartments are contradictory to the

Metropolitan Service District's Urban Growth Management Functional Plan, specifically Title 12: Protection of Residential Neighborhoods, and Title 13: Nature In Neighborhoods.

(h) Granting the amendment is consistent with Level of Service F for the p.m. peak hour and E for the one-half hour before and after the p.m. peak hour for the Town Center 2040 Design Type (Comprehensive Plan Map 10-4), and E/E for the rest of the 2040 Design Types in the City's planning area.

Comment: This project integrated data from Autumn Sunrise to complete the traffic study, however this study gathered data during the pandemic when driving patterns were drastically different. Additionally, Traffic impact from the Norwood apartments project was not comprehensively considered with the impact of Plambeck Gardens and industrial development in the Basalt Creek Planning area. It is probable that if a comprehensive study were completed, significant failures on both Boones Ferry and Norwood Road would be observed.

(i) Granting the amendment is consistent with the objectives and policies regarding potable water, sanitary sewer, and surface water management pursuant to applicable goals and policies in the Tualatin Comprehensive Plan, water management issues are adequately addressed during development or redevelopment anticipated to follow the granting of a plan amendment.

(j)The applicant has entered into a development agreement. This criterion applies only to an amendment specific to property within the Urban Planning Area (UPA), also known as the Planning Area Boundary (PAB), as defined in both the Urban Growth Management Agreement (UGMA) with Clackamas County and the Urban Planning Area Agreement (UPAA) with Washington County.

As you can see, the proposed text and map amendments do not meet many of the approval criteria s outlined in Tualatin Development Code, and therefore cannot be approved.

As a final note, neighbors have become aware that Horizon Christian School has launched an e-mail campaign. **Please note, many, if not most Horizon members do not live in Tualatin and do not have a vested interest in our town and community.** Please be aware that the motivation for this campaign is **not focused on community benefit**, but rather focused on the church raising capital to build a new sanctuary. As evidence of this, here is a screen grab from the page instructing Horizon members to write the city:

---

from those of us in support of this project as well.

To send an email, **simply click the button below**, it will open a new email on your device that will include a letter to the Planning Commission and their email address already populated. Then just **add your name, address, and phone number at the end of the email** and send it **no later than Friday, April 14.** You may add personal comments if desired.

Thanks for your help with this important effort that we believe will help us secure a new sanctuary for Horizon and bring new residents to our area!

Blessings,

Pastor Stan

Subject: Re: Comment for Planning Commission re: DO NOT APPROVE PTA23-0001 and PMA23-0001

Hello Madeleine,

I wanted to amend my previous comment, as I could not find support for one of the sources that was relayed to me about the potential for negative impact on property values. I could not verify the Hobart v. Hobart West Group case. That said, the construction of an apartment complex could adversely impact nearby home values by creating oversupply in the market in the short term. With over a thousand units aimed to be available in Tualatin in the coming years, it is a recipe to create at least a short term oversupply of housing. It is also possible that the creation and visibility of an apartment complex could impact the resale values of nearby family homes, as up until a year ago all homes with backyards on Norwood had picturesque forest views behind their homes..

It is important that the city council and planning commission are aware that the burden to demonstrate that property values were adequately considered falls to the developer. The developer should need to demonstrate with adequate support, reference, and precedent that their plan will minimize impact to property values, to only provide a statement that such values were considered. The city council must be aware that they decide how to interpret that property values were 'adequately considered.'

Subject: Norwood Growth and Traffic

Dear Mayor and council members,

I have lived in Tualatin for over 25 years in three different homes. I could have moved from Tualatin several times, but I live here because I love it. I live near Ibach Park for reference.
I am writing to you because I feel some of your recent decisions are not in the best interest of the city. I'm not necessarily for or against the Norwood development, but I am strongly against your recent projects around the city. You have continued to spend untold amounts of money on improving sidewalks and crosswalks with little to no consideration for traffic and road improvements. The roads need repaired all over town and some need widened. And yet you continue to spend money on sidewalks that will need to be removed and redone as soon as you realize the traffic issues. This will only get worse with new the new development on Norwood.
Your decisions are not improving the lives of the people of Tualatin. If so, why is the old Haggens store still empty. Why do restaurants continue to go out of business around the commons?
Let's focus on traffic flow that encourages people to shop and eat in Tualatin, not stay out of Tualatin due to traffic!
If you would like an example of road repairs that are needed and have been needed for years, please drive over the freeway headed East and get on I5 Northbound. Just before the ramp is a seam that has developed into a massive pothole. You can't avoid it and it continues to get worse.

Thank you for your time and all the many things you do for our community.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Tom Carlisle

I have lived in Tualatin for over 30 years. I have watched more and more apartments, condos, high rises be built mainly throughout the downtown area, as that is where they belong. Norwood Rd and Boonesferry Road are not zoned for high rises for good reason. It is an area of duplex and single homes. I say NO to PTA23-0001 and PMA23-0001 applications as these are not in the best interest of the public and these applications are not appropriate for the area. A high-rise belongs in downtown Tualatin ONLY where infrastructure can support it.

I know that you have received the letter listed below from many of our Tualatin residents stating their concerns regarding the massive development of Autumn Sunrise and the proposed multi-store apartment complex on SW Norwood Rd. and SW Boones Ferry Rd.

My wife and I have owned a home near Ibach Park for the last 27 years in a development known a Hedges Creek. When we first moved hear there was no Tualatin High School, no Ibach Park and minimal housing development in the area. But now over the years things have blossomed and changed to the point where certain things like the infrastructure have not kept pace with the increase in our population. Boones Ferry Rd. is now becoming the new SW Tualatin Sherwood Rd. where the traffic crawls at a snails pace at certain parts of the day, and this will only become far worse with the increase in the population of the new additional developments. The infrastructure should come first with residential and business additions to follow, not the other way around.

There are times in the morning and afternoon at and near the high school that it takes me nearly 10 minutes to get onto Boones Ferry Rd. from my home which is only approximately five blocks west of the school.

And what about the over crowding of the schools due to the new increased population of students? Their education will be compromised to a lower standard. And will teachers flee their profession due to the increase in classroom sizes?

These things along with many other issues must be considered before moving ahead with anymore development.

Please listen to, and consider the request of your people listed below. After all, we elected you to represent us, the people of Tualatin, not big money and over crowded development!

Thank you,
Vern & Teri Boomer

Dear Tualatin Planning Department Members, City Council Members, and Mayor Frank Bubenik;

I am writing regarding the following Text Amendment and annexation of Washington County to modify Tax Lot 106, and Tax lot 108 and further areas of incorporation of Washington county zoned FD-20 from RL and RML zoning to the proposed RH-HR zone. As a resident of Tualatin, and speaking on the behalf of my neighbors, we have considerable concerns with this proposed zoning change, especially when there are other alternative options available downtown Tualatin. The current area and local infrastructure in general does not conform to this level of zoning especially with the new development of approximately 500 new homes and condos within proximity.

The three areas of concern are traffic, removal of local institutional zoned areas for future development, and the lack of use of existing RH-HR zoned areas in Tualatin near the Westside transit station on SW Boones Ferry Rd, properties 8412, 8514, and 8538. Overall, these properties are better suited for this type of zoning with local transit, grocery stores, government facilities, retail, and similar residential development, which could also serve the Basalt Creek master plan more locally.

Issue one regarding traffic;

SW Boones Ferry Road is already considerably congested from Tualatin city limits to the corner of Norwood and SW Boones Ferry Rd. Though this new development plans to introduce a stoplight at the intersection of Norwood and Boones Ferry, this will not mitigate the merging traffic from I-5 that backs up all the way to this intersection during rush hour. Travel time is up to 20 min to drive 1.7 miles according to Google maps and personal experience. With the addition of RH-HR zones, this only compounds the issue and does not alleviate the lack of traffic planning between the border of Tualatin city limits and Wilsonville, not to mention the development plan for the Basalt Creek Employment Center and its impact to SW Boones Ferry arterials to I-5.

Issue two regarding institutional infrastructure;

The Tualatin public school system is already dealing with classrooms at close to capacity. With the addition of current development and the proposed RH-HR zone change, this development will most likely be districted to Edward Byrom if the Sherwood school district does not agree to districting this area once residential developments are built. Based on current enrolled rates and children coming back to traditional classroom learning since the peak of COVID, the influx of new students will strain our educational institution without any additional planned expansion in this vicinity. In addition, with the RH-HR proposed zone change, the city would be removing an institutional zone without relocating or considering other areas in Tualatin for replacement or having a plan shown in the Basalt Creek development for an additional institutional zone.

Issue three regarding existing RH-HR zones;

As stated, properties 8412, 8514, and 8538 of 18 acres near the Westside transit station are already zoned RH-HR and is a prime location for this type of development. There is a completely vacant retail space where Hagen's grocery store was, existing retail, grocery stores and easily accessible public transportation. Seeing how fast the new development off of I-5 is progressing, it would be most appropriate to develop the downtown area that is currently zoned RH-HR than to add an additional RH-HR zone in the middle of RL and RML areas on the outer south edge of Tualatin. With the Westside rail transit, a station can be built at the Basalt Creek Employment Center giving access to a downtown high rise. Utilizing WES commuter rail would also not directly impact vehicular traffic, besides crossings, and utilize existing taxpayer public transit more efficiently. Also adding another RH-HR zone near the center of the Basalt Creek employment center would assist with commuting and provide a local housing center for the anticipated 2000 jobs that will be created with the Basalt Creek development plan. This also complies with the Southwest and Basalt Creek Development Area Plan Policies and Ordinances.

POLICY 3.1.1 DENSITY. Maintain a citywide residential density of at least eight (8) dwelling units per net acre.

POLICY 3.1.2 ZONING FOR MULTIFAMILY. Provide zoning for multifamily development, which may be located in areas adjacent to transit.

POLICY 3.1.3 COMMERCIAL ACTIVITY. Allow home based businesses and occupations in all residential zones, subject to regulations to minimize impact to housing supply and uses in commercial and industrial zones. Provide for compatible agricultural uses in areas where significant development barriers are present, or where

compatible with permitted residential uses. 29 | Southwest and Basalt Creek Development Area Plan

POLICY 3.1.4 CLEAR AND OBJECTIVE REVIEW. Provide for clear and objective review standards for all residential development and redevelopment.

POLICY 3.1.5 FUNCTIONAL PLANNING. Consider the development-ready residential land supply as part of ongoing functional planning efforts to provide necessary urban services in support of residential development.

POLICY 3.1.6 INFRASTRUCTURE PLANNING. Evaluate future infrastructure planning for consistency with the Housing Needs Analysis and Housing Strategies

I, and fellow residents of the Tualatin community, appreciate the open ear regarding the proposed Text Amendment change. I also understand the sentiment and initiative of providing lower income housing throughout Tualatin. However, based on the provided concerns and examples, the location near Norwood Rd does not fit these requirements and will strain our available infrastructure. As the applicant applies for this zoning alteration, I and fellow residents strongly urge the Tualatin Planning division to not approve the Text Amendment change and keep the existing zoning areas intact, which similarly match the surrounding RL and RML zones, and better utilize existing planned RH-HR zones within downtown Tualatin. City Council members and Mayor, I also encourage you to think of our city holistically with the entire community in mind.

See the exhibits Norwood for Smart Zoning has sent to the city in previous emails regarding these issues.

Sincerely,
Vern and Teri Boomer

Currently high-density high-rise zoning is the ***maximum*** zone density allowed in Tualatin - and it is only reserved for downtown (for good reason: walking amenities and shops, public transportation, less need for parking spaces, adequate infrastructure to support high-density living, and architectural congruent with the downtown skyline).
Please maintain the current high-density, high rise zoning regulations. To allow them to change to the proposed new zoning rules will in time destroy the liability of the city of Tualatin.

Thank you,
Vern & Teri Boomer

sident of Tualatin I do not want developers changing the Tualatin oment code (TDC) to allow the most dense zoning (RH-HR) as define , anywhere in Tualatin. It is not in the best interest of the public. I am NO to the plan and text amendment applications PTA23-0001 and -0001. A high-rise belongs ONLY in downtown Tualatin as the current llows. Council, please provide leadership and say no to this extreme ach by developers. The City is yet to understand the infrastructure for almost 1,000 new approved homes still to be constructed.

www.tualatinoregon.gov/projects

the community in saying NO to the proposed plan and amendments PTA23-0001 and PMA23-0001 and I agree these statements.

Subject: Proposed Map and Text Amendments for Vista Residential Partners

Dear Tualatin City Planning Commission,

As you consider the land use decisions for the proposed multi-family apartment development by Vista Residential Partners, please accept my comments in support of both the Map and Text Amendments.

As a resident of this community and a constituent of Horizon Community Church and School, these two decisions are very important to the future plans for Horizon and the city of Tualatin too.

I would like to express my sincere concern about the lack of housing opportunities within the city and the impact this shortage has on both prices and rents. Many in the Horizon community wish they could find and afford housing in the city. The most important housing option missing is multi-family development, those between affordable housing projects and single-family homes.

Please support and approve the Map and Text Amendments.

Thank you,

Victoria Soderstrom

Subject: City of Wilsonville Comments on Norwood Multi-family Plan Amendments PMA-0001 & PTA23-0001

Thank you for the opportunity to comment on this proposal. As the jurisdictional neighbor to the south the City of Wilsonville is interested in how the proposal impacts downstream infrastructure systems, particularly streets and stormwater. Please see below and attached. Feel free to reach out to discuss further.

- The proposal does not provide sufficient analysis of the Level of Service impact at City of Wilsonville-owned intersection at SW Boones Ferry Road/SW Day Road. The traffic report should be updated throughout to compare to the City of Wilsonville LOS D standard at this intersection. Analysis by DKS Associated (see attached) states it appears reasonable that 45-50% of project-generated traffic will travel through Wilsonville, including this intersection.

- As the Basalt Creek Parkway Extension has not secured funding, the TRP analysis should also include analysis of study intersections without the Basalt Creek Parkway construction. The intersection of SW Boones Ferry Road/SW 95th Avenue should be added to the analysis.

- The documentation should provide an updated analysis of the total planned trip generation in the Basalt Creek planning area under Tualatin's jurisdiction compared to previous trip caps agreed to between Tualatin and Wilsonville during the Basalt Creek concept planning.

- The submitted lacks sufficient information on stormwater to determine any downstream impact on City of Wilsonville stormwater system.

DKS DKSASSOCIATES.COM

MEMORANDUM

DATE: April 25, 2023

TO: Amy Pepper | City of Wilsonville

FROM: Scott Mansur, PE, PTOE | DKS Associates
Jenna Bogert, PE | DKS Associates

SUBJECT: Tualatin Norwood Apartments TIA Review Project #21123-020

DKS Associates has reviewed the traffic impact analysis (TIA) for the proposed SW Norwood Apartments prepared by Lancaster Mobley.[1] The proposed development is located east of SW Boones Ferry Road and south of Norwood Road in Tualatin, Oregon. The proposed project includes a 276-unit apartment development which will require the rezoning of two parcels, totaling 9.2 acres. Below are comments compiled by DKS regarding the TIA and the Transportation Planning Rule evaluation.

TIA REVIEW COMMENTS

1. **Trip Generation and Trip Distribution:** The trip generation and distribution assumptions for the development appear to be reasonable with 45%-50% of project-generated traffic traveling through Wilsonville city limits.
2. **Basalt Creek Parkway Extension Analysis:** The 2026 volumes and volume shifting assumptions at SW Boones Ferry Road/SW Day Road appear reasonable for the Basalt Creek Parkway Extension analysis scenarios. The 2026 volumes at SW Boones Ferry Road/SW Basalt Creek Parkway appear generally consistent with the Basalt Creek Extension Traffic Analysis (2020).
3. **City of Wilsonville Operating Standard:** The intersection of SW Boones Ferry Road/SW Day Road is under City of Wilsonville jurisdiction and all intersection operations should be compared to the City's LOS D standard throughout the entirety of the report.
4. **TPR Analysis:** The 2040 TPR analysis assumes that the Basalt Creek Parkway Extension is constructed for both the current zoning scenario and proposed zoning scenario. However, the project does not have secured funding as mentioned on Page 11 of the report and therefore, the TPR analysis should also include analysis of the study intersections without the Basalt Creek Parkway Extension project and identify any necessary mitigations. The study intersections in the TPR analysis should also include the intersection of SW Boones Ferry Road/SW 95th Avenue as it will have an increase in traffic due to the proposed zone change that is similar to the increase in traffic at SW Boones Ferry Road/SW Ibach Street, which is already included in the analysis.

Please let us know if you have any questions. Thank you!

5/8/23: ODOT #12916

ODOT Response

Project Name: Norwood Multi-Family Map and Text Amendment	**Applicant:** Lee Novak
Jurisdiction: City of Tualatin	**Jurisdiction Case #:** PMA 23-0001, PTA 23-0001
Site Address: 9300 SW Norwood Rd and 23370 SW Boones Ferry Rd	**State Highway:** I-5

The site of this proposed land use action is in the vicinity of I-5. ODOT has permitting authority for this facility and an interest in ensuring that this proposed land use is compatible with its safe and efficient operation. A Traffic Impact Analysis (TIA) was prepared by Lancaster Mobley for the proposed map and text amendment dated February 2nd, 2023. ODOT was not contacted during the scoping process and State highway facilities are not included within the study area.

COMMENTS/FINDINGS

The applicant proposes a map amendment from RML and IN to the RH-HR Zone for a 9.2 acre site located in the southeast quadrant of the SW Norwood Rd/Boones Fry Rd intersection. The property is located just west of the recently approved Autumn Sunrise Subdivision (500 residential lots and two commercial lots) adjacent to I-5. A text amendment is also proposed to remove locational factors from RH-HR purpose statement.

The TIA submitted by Lancaster Mobley dated September 20, 2021 with the Autumn Sunrise Subdivision application, showed that the new development would contribute traffic volume to the I-5 southbound off ramp at the Elligsen Rd interchange. Therefore, ODOT has determined that the proposed plan amendment and subsequent development will likely add traffic to the I-5 interchange at Elligsen Rd.

The 2018 RTP project (11489) proposes to construct a second right-turn lane on the southbound off-ramp. Since the project is on the RTP financially constrained project list, it can be assumed to be in place for the purposes of this plan amendment. The RTP project acknowledges that "conditions are currently congested" and suggests that the time period for the improvement is 2028-2040. Funding for the project has not been committed to date.

Since we anticipate that future development of the site will contributes traffic volumes to the I-5 southbound off-ramp, ODOT recommends that the future development be required to prepare a TIA that includes the I-5 interchange at Elligsen Rd. ODOT intents to recommend that the future development of this site contribute its proportionate share of its contribution to interchange improvements. This recommendation is consistent with ODOT comments submitted for the Autumn Sunrise Subdivision dated October 28, 2021.
